P R E F A C E.

This is part I of the volume "The Daily Rainfall of India" which is a compilation of (a) The Daily Rainfall Tables and (b) The Monthly Rainfall Tables for the different States in India for the calendar year 1955. The volume is issued in five parts, each part containing the data of a Zone as detailed below :-

Part	I	Jammu & Kashmir. Punjab. Patiala and East Punjab States Union. Rajasthan. Himachal Pradesh.
Part	II	Bihar. West Bengal. Assam. Orissa. Kosi Catchment.
Part	III	Bombay. Kutch. Mysore.
Part	IV	Madras. Hyderabad. Andhra Pradesh.
Part	V	Uttar Pradesh. Madhya Pradesh. Madhya Bharat, Bhopal and Vindhya Pradesh.

For each State, the set of 12 Daily Rainfall Tables is followed by the Monthly and Annual Rainfall Table. The Monthly and Annual Rainfall Tables alone will also be found in the volume entitled "The Monthly Rainfall of India", which contains this data for all the States of India.

The Daily Rainfall Tables of Orissa for all the months and of Patiala and East Punjab States Union for the month of May and the Monthly and Annual Rainfall Tables of Orissa, Bihar, West Bengal, Andhra Pradesh and Madhya Pradesh are not included in the respective parts and will be issued separately when available.

Contd.....2

Since the inception of the system of rainfall registration in India till 31st December, 1949, the hour of rainfall measurement at the State Raingauge stations was 8 a.m. local mean time. From 1st January, 1950, this has been changed to 8.30 a.m. I.S.T. (0300 hours G.M.T.). The amount indicated against any date in the tables denotes the total rainfall which occurred during the 24 hour period ending at 8.30 a.m. of that date and measured at that time. If this rainfall is a tenth of an inch or more, then, by convention, the particular date is counted as a rainy day.

In most of the cases, the (actual) district average
(normal)
is the unweighted arithmetic mean of the (actual) values
(normal)
for those stations in the district which possess normals and for which the actual values are recorded.

The normals used in this volume are based on the rainfall records available upto December 1940. These normals are contained in the 'Memoirs of the India Meteorological Department' Vol. XXVII Part - V.

Sowing of Zaid Rabi crops was continued, and that of Sugarcane and Cotton had commenced in places. As a result of recent locust invasion in Barnala Sub-Division egg laying in villages Isapur and Rurgarh and emergence of hoppers in village Chhap was reported. Adequate steps to destroy the hoppers were taken and no damage was done to the standing crops. Fodder was sufficient. Condition of cattle was satisfactory except in a few villages of Narwana Tahsil, where incidence of cattle diseases was reported. Adequate measures to check the disease were taken by the Veterinary Department.
