AVVERTENZA

Col presente numero ha termine la pubblicazione del Bollettino meteorologico della Cirenaica, iniziata nel 1921 con la raccolta delle prime osservazioni, effettuate nelle diverse località dell'allora costituenda rete Cirenaica.

Nel costante aumento della mole del Bollettino, nel numero sempre crescente di stazioni ordinarie ed udometriche di cui sono stati esposti progressivamente i dati, si rispecchia per così dire, il corso degli avvenimenti che in meno di un quindicennio hanno portato alla conquista delle più remote località della Libia ed insieme il costante ascendere della regione e la sua partecipazione a quelle forme di attività che mentre interessano il campo economico, sono la più alta e completa espressione del programma civile della grande Nazione che ne guida le sorti.

Il Ministero delle Colonie, nell'intento di rendere più organico questo ramo di ricerche e di consolidarne le basi, ha ritenuto opportuno di unificare l'elaborazione ed il coordinamento di tutto il materiale meteorologico raccolto nei nostri possedimenti africani, ed ha quindi stabilito, con decreto del 13 Maggio 1932, l'inizio di una nuova pubblicazione, che prenderà il nome di « BOLLETTINO METEOROLOGICO DELLE COLONIE ITALIANE ».
