YEAR 1923.

KINGSTON.

The Rainfall for the year was about one-half of the 50-year average of 34 inches. Only 0.11 in. fell in September. May recorded 4.88 ins. and October 7.91 ins. which were slightly above normal.

"Northers" were experienced in January, and in the last three months of the year.

Brisk south-easterly winds prevailed during many months, and the total mileage of wind for the year was 10 per cent. above the 15-year average.

Lightning and thunderstorm occurred on many occasions from the month of March to November

The absolute maximum range of temperature 29.1 degs. occurred in the month of March.

The extreme maximum temperature was 97.8 degs. on August 11th. And the extreme minimum 63.2 degs. on March 8th.

NEGRIL POINT LIGHTHOUSE.

The rainfall for the year was eleven inches below the average, January, May and September were slightly above normal. Many of the remaining months were much below, and only 0.54 in. fell in November.

Thunderstorms were noted, chiefly, during the months from March to September.

The extreme maximum temperature 92.6 degs. was noted on 14th July. And the extreme minimum of 62.8 degs. on 8th January. The absolute maximum range of temperature 26.1 degs., occurred in February.

MORANT POINT LIGHTHOUSE.

The rainfall was about four-sevenths of the average. The May rains were slightly above the average; and the October record was 50 per cent. above normal. All the rest of the months were much below their averages.

Thunderstorms were noted chiefly from March to October.

"Northers" were experienced in January, November and December.
