## PREFACE

This bibliography was prepared for the dedication of the Charles Fitzhugh Talman Special Collections Room of the NOAA Central Library on Oct. 29, 2002. It is intended to be a comprehensive listing of his publications located at the NOAA Central Library. Other significant works that he co-authored are also included. His most enduring legacy, the *Weather Glossary* was published posthumously in 1946. The numerous articles he published in the *Monthly Weather Review* from 1900 to June 1936, the month before his death, are listed in a separate section.

In this bibliography, the item's library call number is stated after the bibliographic information. The notation "Rare Book" indicates that the item is permanently located in the Talman Special Collections Room. If there is no indication that the book is rare, it is in the regular stacks. Particularly interesting points are in bold-face type.

### POPULARIZER OF WEATHER

Brooks, Charles F., Talman, Charles F., and Thiessen, A.H. "Why the Weather", a series of radio addresses from 1923 to 1941. Talman authored approximately 3000 of these from April 25, 1927 until Dec. 24, 1935.

Rare Book QC851 .W49 1923 May - April 5, 1941 - 16 volumes

## HIS LEGACY

*Weather Glossary*, compiled by Alfred H. Thiessen. 299 pp., Washington, DC, U.S. Dept of Commerce, Weather Bureau, [1946].

### Preface

"The basic collection of terms for a weather glossary was made by Charles F. Talman, late librarian (1908-1936) of the United States Weather Bureau, who accumulated in his time an enormous number of weather terms gleaned from popular and scientific literature. In his search for terms, he covered the period from Aristotle to the present time, and included dialectical weather words. While he wrote no formal definitions, he appended copious references, citations, and personal notes which have been found invaluable. This great accumulation of terms was available for use in the present work, and it is hoped that it will always be preserved for investigators and students throughout the English speaking world.---- Alfred H. Thiessen"
