NOAA Technical Memorandum NMFS

The National Marine Fisheries Service's Alaska Fisheries Science Center uses the NOAA Technical Memorandum series to issue informal scientific and technical publications when complete formal review and editorial processing are not appropriate or feasible. Documents within this series reflect sound professional work and may be referenced in the formal scientific and technical literature.

The NMFS-AFSC Technical Memorandum series of the Alaska Fisheries Science Center continues the NMFS-F/NWC series established in 1970 by the Northwest Fisheries Center. The NMFS-NWFSC series is currently used by the Northwest Fisheries Science Center.

ABSTRACT

The results of the 2010 Alaska Fisheries Science Center's (AFSC) bottom trawl survey of the groundfish and invertebrate resources of the eastern Bering Sea upper continental slope (EBSS) is presented. The 2010 EBSS survey is the fourth standardized biennial groundfish bottom trawl survey of this region.

Two hundred successful survey bottom trawls were conducted from 200 to 1,200 m on the eastern Bering Sea slope. The survey area stretched from Unalaska and Akutan Island in Alaska (54° N) to the U.S-Russian border at 61° N. Sampling was stratified by six subareas running south to north and by five depth strata within each subarea. Stations were chosen randomly and target sampling density was proportional to the area (km^2) in each subarea and depth stratum. Mean sampling density was approximately one tow per 204 km^2 .

This report provides estimates of biomass in metric tons (t), population number, and catch per unit effort (CPUE; no./ha and kg/ha) for all species identified on the survey. Size frequencies (42 species) and CPUE distribution plots (43 species) are presented for the most abundant species or species of commercial and ecological interest. The largest biomass of fish and invertebrate species, respectively, were the giant grenadier (*Albatrossia pectoralis*), Pacific ocean perch (*Sebastes alutus*), arrowtooth flounder (*Atheresthes stomias*), popeye grenadier (*Coryphaenoides cinereus*), shortspine thornyhead (*Sebastolobus alascanus*), deep sea papillate sea cucumber (*Pannychia moseleyi*), the brittlestar (*Ophiacantha normani*), and the claypipe sponge (*Aphrocallistes vastus*).

INTRODUCTION

The Alaska Fisheries Science Center's (AFSC) Resource Assessment and Conservation Engineering Division (RACE) conducted a bottom trawl survey from 27 May to 21 July 2010 to assess the groundfish and invertebrate resources on the eastern Bering Sea upper continental slope (EBSS). The survey area extended from Unalaska and Akutan Islands to the U.S.-Russian border near the International Date Line (166° E to 180° W) at depths from 200 to 1,200 m.

Prior to the current standardized EBSS biennial surveys (2002, 2004, 2008, 2010) a pilot survey was conducted in 2000 which tested two versions of the Poly Nor'easter bottom trawl gear (mud-sweep and rockhopper footropes). The pilot study showed that the Poly Nor'easter net with mud sweep gear was more efficient and robust for sampling the EBSS survey area bottom than the rockhopper gear (Mark Wilkins, AFSC, pers. comm.). Eastern Bering Sea Slope surveys were conducted in 2002, 2004, and 2008, and the results are detailed in NOAA Technical Memoranda (Hoff and Britt 2003, 2005, 2009). The slope survey was not conducted in 2006 due to budget limitations. The 2010 EBSS trawl survey is the fourth in this series of biennial groundfish surveys that incorporate the AFSC's latest sampling technologies and protocols for survey design, catch data gathering, species identification, and net mensuration monitoring.

Triennial surveys were conducted from 1979 to 1991 on the EBSS using a variety of nets, methods, vessels, and sampling locations. The results from these surveys have been summarized in numerous data reports (Bakkala et al. 1985a, Bakkala et al. 1985b, Sample et al. 1985, Walters et al. 1988, Bakkala et al. 1992, Goddard and Zimmermann 1993). Comparisons between the post-2000 surveys and those conducted from 1979 to 1991 remain confounded due to the differences in sampling gear, survey design, sampling methodology, and species identification.

This report summarizes the survey design, sampling gear, and survey logistics used as well as the personnel that participated in this survey. Estimates of abundance, distribution, and size frequency are presented for commercially and ecologically important species. The purpose of this report is to provide information on the biological resources encountered to the scientific community, the fishing industry, and the general public. The results presented herein represent the exclusive report prepared from the EBSS survey conducted in 2010. For additional information from this survey please contact the authors (G.R. Hoff email: *jerry.hoff@noaa.gov* or L.L. Britt email: *lyle.britt@noaa.gov*).

METHODS

Survey Area and Sampling Design

The EBSS survey area was divided into six geographic subareas (1-6) running south to north along the upper continental slope (Fig. 1) to assist in the distribution of trawl effort in relation to estimated habitat area. The subareas were based on distinct bathymetric types and underwater features: broad low slope areas, canyon areas, and steep slope inter-canyon faces. Subareas 1 and 6 consist of broad low slope areas with wide bathymetric contours in the 200-600 m depth range followed by a gradual slope to 1,200 m. Subareas 2 and 4 consist of Pribilof and Zhemchug canyons, respectively, which are characterized by semi-enclosed basins with steep walls and narrow bathymetric contours below 600 m. Subareas 3 and 5 are steep slope inter-canyon “faces” with narrow bathymetric contours throughout most of their depths.

Geographic subareas were stratified by depth every 200 m from 200 to 1,200 m resulting in five depth strata for each geographic subarea (200-400 m; 400-600 m; 600-800 m; 800-1,000 m;

1,000-1,200 m). The total area of each substratum (km^2) was calculated using known bathymetry contour lines (Table 1) and used to determine sampling density. Two-hundred survey stations were selected using a stratified random sampling design from a pool of over 200 successful stations completed between 2000 and 2008 as well as additional stations added randomly in most strata. Stratum sampling densities ranged from one haul per 112.39 km^2 to one haul per 368.96 km^2 with a mean sampling density of one haul per 204.48 km^2 . Sampling densities varied due to difficulties in successfully completing all planned stations in some deep strata due to areas with untrawlable bottom.

Survey Agenda and Personnel

The EBSS survey began on 27 May 2010 near Zhemchug Canyon and concluded on 21 July 2010 in the south-western eastern Bering Sea. Mobilization and demobilization of the survey took place in Dutch Harbor, Alaska. There was one mid-survey exchange of scientific crews on St. Paul Island on 24 June 2010. Research personnel for the survey were primarily AFSC staff and two graduate students (Table 2).

Vessel, Scientific Gear, and Procedures

The F/V *Vesteraalen*, a 38-m commercial stern trawler powered by twin engines with 1,725 continuous horsepower, was chartered for the survey. Electronic navigation and fishing equipment on the vessel included global positioning system (GPS) receivers, video position plotters, radar, single sideband and VHF transmitter-receivers, an EC-150 color video depth sounder, and auto-pilots. The vessel was operated by Captain Tim Cosgrove during the entire slope survey. A four-member crew aided in the operation of the vessel and in the use of the fishing gear.

The standard RACE Division fishing gear included trawls, bridles, and trawl doors. A Poly Nor'easter high-opening bottom trawl equipped with mud-sweep roller gear was used to sample all stations (Fig. 2). This sampling trawl had a 27.2 m headrope with twenty-one 30 cm floats and a 24.3 m long-link chain fishing line attached to a 24.9 m footrope. The body of the net was constructed of 127 mm stretched-mesh polyethylene netting, with 89 mm stretched-mesh polyethylene netting in the codend, and a 32 mm stretched-mesh nylon codend liner. The mud-sweep roller gear was constructed of 203 mm solid rubber disks strung over 16 mm high-tensile chain. The net was fished with 1.83 m × 2.75 m (6 ft × 9 ft; 1,000 kg) steel V-doors rigged with four-point bridles to enhance their stability at slow towing speeds and 55 m bridles between the doors and wingtips. This trawl is a modified version of the standard trawl used for the RACE Division's West Coast Upper Continental Slope survey (Lauth 2000). During fishing the height and width of the trawl were measured using a Scanmar (Scanmar, Asgardstrand, Norway) net measurement system. The GPS system recorded vessel location recording tow duration, distance fished, and precise location. A tilt sensor (bottom contact sensor) attached to the footrope recorded bottom contact which was used to determine the precise beginning and end of the tow. Bottom depth and water temperature profiles were recorded using a Sea-Bird SBE-39 microbathythermograph (Sea-Bird Electronics Inc., Bellevue, Washington). All net configuration measurements were recorded electronically as well as on paper. The Haul Log (Appendix C) details net performance for each tow.

Each station was surveyed with echosounding over a 1.5-2.0 nautical mile (nmi) horizontal distance. A site was considered towable when the depth changed less than 50 m over the 2-nmi transect and there were no detectable obstacles in the trawl path. Trawl operations

followed Stauffer (2004). Standard tow speed was 2.5 knots and standard tow duration was 30 minutes at all depths. For each tow the following data was recorded: date, time, latitude, longitude, gear depth, surface temperature, bottom temperature, water column temperature profile, net spread, net height, and bottom contact. At the end of each tow, haul data were plotted and examined for appropriate distance, bottom contact, and depth range. Each tow, the tow was scored on a graded scale: successful tows were given a positive score, whereas unsuccessful tows received a negative score. In general, a positive tow was considered valid and used for survey abundance estimates, while a negative tow was not used in the analysis. Table 3 lists the specific models, versions, serial numbers, and RACE numbers for most sampling tools used for this survey.

Catch Processing and Collection of Biological Data

Catches were sorted, weighed, and enumerated for all species of fishes and invertebrates. The catch was processed in one of two ways: either by sorting the entire catch and weighing each species in aggregate or by weighing the net codend and discarding the predominant species (except for a weighed and sexed random length frequency sample) and the rest of the catch sorted and weighed by species. Random samples of species that were designated for biological data collection were set aside after weighing. Total weight and numbers for each species were recorded onto a paper on-deck catch form. In cases where individuals could not be reasonably enumerated (i.e., corals, sponges, bryozoans, ascidians) only total weight was recorded. For large numbers of an individual species in a single haul, the total number was extrapolated from subsample weight and count of 50-200 individuals. In most cases fish length frequency subsamples were used for extrapolation of the total haul count for individual species.

A random subsample of 100-150 fish, depending on the size range for the species, was selected for length frequency measurements. The sex of each individual was determined by internal examination of the gonads or by external characters (e.g., claspers for elasmobranchs), and specimens were sorted into baskets of males, females, or undetermined sex. Fork length (FL) was measured for most fishes, except for elasmobranchs which were measured to total length (TL) and macrourids to preanal-fin length (PAFL). Fishes and cephalopods were measured to the nearest centimeter on a bar-coded length board using a Juniper LS 600 Polycorder, which uses a bar-code reader wand and species-specific numerical codes. Data from polycorders were downloaded into a database, examined for accuracy, and paper copies printed. All crab species were measured to the nearest 1.0 mm using vernier calipers and recorded on an on-deck paper form.

Otoliths (age structures) were collected from commercially and ecologically important fish species utilizing a stratified sampling regime based on geographic subarea and length. Otoliths of each species were collected from 1 to 3/cm/sex/subarea with the exception of rougheye rockfish (*S. aleutianus*) and blackspotted rockfish (*S. melanostictus*) for which there was an attempt to collect otoliths from all fish encountered. At the time of otolith collection, the sex, fork length (cm) or pre-anal fin length (PAFL), and weight (kg) of each specimen were recorded on on-deck paper forms.

Stomach samples were collected from selected fish species for the AFSC's Resource Ecology and Ecosystem Modeling Program. Many commercial and ecologically important species were targeted for food habits including walleye pollock (*Theragra chalcogramma*), arrowtooth flounder (*Atheresthes stomias*), Pacific ocean perch (*Sebastodes alutus*), and

Pacific cod (*Gadus macrocephalus*). Specimens were chosen at random and only intact stomachs (non-regurgitated) were chosen for collection. Stomachs were excised and preserved in 10% buffered formalin at sea for later examination. Species, haul number, fish length, weight, and sex were recorded on specimen forms at the time of collection.

Voucher specimens were collected from species that are rare, of taxonomic interest, or were unidentifiable at the time of encounter. Collections were labeled with a cruise number, vessel number, haul number, species, voucher number, preservative, and collector's name or initials. Voucher specimens were preserved in 10% buffered formalin (most fishes and non-calcareous invertebrates) or 95% ethanol for calcareous invertebrates. A few specimens were stored frozen and returned to Seattle, Washington. Additional biological samples were collected for study per investigators' requests. Table 4 details the investigators, samples collected, and study purposes.

Abundance Estimates

Catch per unit effort (CPUE) was calculated by dividing catch weight or number for each species by the estimated area swept of the trawl. CPUE is expressed in kilograms per hectare (kg/ha) and number of individuals per hectare (no./ha). Population and biomass (metric tons) estimates were calculated using mean CPUE and extrapolated into the area for each stratum and subsequently summer for all strata. Fish length frequencies were used to estimate the proportion of fish at each length interval weighted by the CPUE (number of fish/ha) and then expanded to the depth strata population. For details on these methods see Wakabayashi (et al. 1985) and Alverson and Pereyra (1969).

RESULTS

Haul, Catch, and Biological Data

During the 2010 EBSS survey, 200 tows were completed successfully and were used for abundance estimates (Fig. 1). Nine tows were considered unsatisfactory in meeting survey standards and were recorded, but in most cases the location was resampled to obtain a successful tow at that station (see Appendix B).

The EBSS survey sampling was designed to distribute trawling effort in proportion to the total area (km^2) of each stratum. A comparison of the planned total effort distribution by stratum to that actually achieved is shown in Table 1. In general, sampling effort in the deepest strata (1,000-1,200 m) was under-represented due to the difficulty in finding trawlable grounds. Shallow strata more commonly received the prescribed sampling density, where on average each tow represented 204 km^2 of area. The Haul Log (Appendix C) details date, exact location, depth of all hauls attempted, net parameters during the tow, environmental conditions, and catch weights for all hauls attempted.

Bottom temperatures recorded during the survey ranged from 2.2 °C to 4.0 °C and were correlated with depth below approximately 400 m. Between 200 and 400 m, bottom temperature was highly variable and showed no direct relationship with depth (Fig. 3). Surface temperatures ranged from 2.1°C to 7.8 °C, and were related to latitude, with cooler surface waters at higher latitudes. Bottom temperatures showed no relationship with latitude.

Approximately 145 fish species and 334 invertebrate species were identified during the 2010 EBSS survey. The actual number of species encountered may be slightly higher or lower given inadequate field identification characteristics for some species. Tables 5a and 5b list all species of fishes and invertebrates encountered and identified on the 2010 EBSS survey

alphabetized by common name or scientific name, respectively.

The giant grenadier (*Albatrossia pectoralis*) represented the largest biomass estimated on the 2010 EBSS survey followed by Pacific ocean perch (*Sebastes alutus*), and arrowtooth flounder (*Atheresthes stomias*). The most abundant fish species was the popeye grenadier (*Coryphaenoides cinereus*). The deep sea papillate cucumber (*Pannychia moseleyi*) had the largest estimated biomass for invertebrates and the brittle star (*Ophiacantha normani*) was the most abundant. Table 6 lists all species encountered during the survey in descending order of total weight, with details on the depth distribution and the frequency of occurrence for each species. Tables 7 and 8 detail the biological data collected for selected species.

Population, biomass, and CPUE estimates and variance of the estimates were calculated for every species encountered on the 2010 EBSS survey and are presented in Table 9. The estimates are reported by: shallow strata (200-600 m), deep strata (600-1,200 m), and all strata combined.

Distributions, Length Frequencies, and Abundance Estimates

Abundance estimates, population size estimates, CPUE distribution plots, and estimates of population length frequencies are presented in Tables 10-52 and Figures 5-89 for 43 of the most abundant and commercially important fish and invertebrate species. Abundance estimates were calculated for each subarea and each 200-m stratum within each subarea, and all subareas and strata combined. CPUE distribution plots represent the abundance of the species for each haul. Fishes are presented in phylogenetic order (Nelson 1994).

Table 3. - - Details of sampling and data recording gear used during the 2010 EBSS survey.

Net & mensuration gear	Data type/function	Model/Version/serial #
Poly Nor'Eastern trawl	research sampling tool	Net #15 Hauls 1-31, 47, 83; Net #5 Hauls 32-46, 48-63, 154-175, 191-192 Net#11 Hauls 64-82, 84-92, 111, 113, 176-189, 193-209 Net #16 Hauls 94-110, 112, 114-153, 190

Table 4. - Projects and collections completed or attempted during the 2010 EBSS survey.

Project title	Project description	Investigator(s) & affiliation	Data/samples collected
Age structures for critical species	collection of otoliths from selected fish species for current stock assessment models	Anne Hollowed (AFSC)	see Table 7 for details on otolith collection numbers
Age structures of giant grenadier	collection of otoliths from giant grenadiers for future stock assessment models	Dave Clausen (AFSC)	see Table 7 for details on otolith collection numbers
Age structures for selected species	collection of otoliths from a selected group of fishes for future stock assessment models	Gerald Hoff (AFSC)	see Table 7 for details on otolith collection numbers
Biological data on crab	collection of carapace size, weight, and shell condition on selected crab species	Robert Foy, Jan Haaga (AFSC-Kodiak)	see Table 7 for details on species, length and weight collection numbers. Shell conditions were also recorded
Light profiles	collection of light profiles with light meter to study influence of light on pollock distribution	Stan Kotwicki (AFSC)	Light, depth, temperature, conductivity profiles were collected for 209 bottom trawls
Rougheye & Blackspotted rockfish tissues	collection of tissue samples of shortraker rockfish in conjunction with otolith collections for population genetic study	Tony Gharret (UAF), Paul Spencer (AFSC)	262 tissue samples collected
Sleeper shark life history	tag and release of sleeper shark for life history information, growth and movement	Gerald Hoff (AFSC), Robert Foy (AFSC-Kodiak)	Spaghetti tags (n = 21) were deployed and tissue samples (n = 21) collected from sleeper sharks
Alaska skate tagging	tagging and release of all Alaska skates	Olav Ormseth (AFSC)	44 Alaska skates were tagged and released
Skate eggs & juvenile data	measure juvenile skates & retain and preserve selected skate egg cases.	Gerald Hoff (AFSC)	142 juvenile skates were measured identified to <i>B. trachura</i> (n = 2), <i>B. minispinosa</i> (n = 15), <i>B. lindbergi</i> (n = 34), <i>B. maculata</i> (n = 4), <i>B. taranetzi</i> (n = 4), <i>B. aleutica</i> (n = 6), <i>B. interrupta</i> (n = 47), approximately 100 skate egg cases were collected
Live skate eggs	collect live skate eggs for development study	Gerald Hoff (AFSC), Jared Guthridge (ASLC)	19 live skate eggs were collected and transported to the Alaska Sealife Center for development studies. <i>B. trachura</i> (n = 6), <i>B. taranetzi</i> (n = 6), <i>B. aleutica</i> (n = 2), <i>B. interrupta</i> (n = 2), <i>B. parmiifera</i> (n = 3)
Octopus data collection	collection of lengths and sex on octopus species	Liz Connors (AFSC)	Mantle lengths and sex were taken on >200 octopus. The dominant species were <i>Benthoctopus leioderma</i> (n = 62), <i>Sasakiopus salebrosus</i> (n = 93), <i>Octopus dofleini</i> (n = 54)

Table 4. -- continued.

Project title	Project description	Investigators & affiliation	Data/samples collected
Squid data collection	collector of mantle lengths on all squid species	Olav Ormseth (AFSC)	Mantle lengths were collected on >2000 squid with the dominant species being <i>Berryteuthis magister</i> (n = 1,704)
Outreach/fishermans festival	collection of selected fish and invertebrate specimens used for public outreach and teaching and display at Fishermans festival	Jason Connor, Mark Wilkins (AFSC)	Two specimens each of a variety of commercial and unusual fish and invertebrate species were frozen
Survey operations photos	photograph standard trawl survey operations for use in presentations and outreach events	Rebecca Reuter (AFSC)	41 usable digital photographs were taken during the survey of deck and survey operations
Sightings of short-tail albatross	report sightings of endangered short-tail albatross	Shannon Fitzgerald (AFSC), Greg Balogh (USFWS)	Seven sightings of short-tail albatross were reported
Trophic interactions feeding ecology	collections of stomach contents of selected fish species and preserved at sea for later analysis	Kerim Aydin, Troy Buckley (AFSC)	see Table 7 for numbers by species of stomach samples that were collected during the survey
Fish photos	collect high quality digital photos of selected fishes for use in a new publication on North Pacific fishes	Gerald Hoff (AFSC) & Milton Love (UCSB)	approximately five photos were taken that fulfilled this project
Hydroacoustic data	used to estimate biomass of pelagic fishes	Patrick Ressler, Taina Honkalehto (AFSC)	ES60 Hydroacoustic data was collected during each trawl
Snailfish collections	collect snailfish for taxonomic studies	Jay Orr (AFSC)	approximately 76 lots of snailfish were collected
Snailfish eggs from Lithodids	life history of parasitic snailfishes on crabs	Jay Orr (AFSC)	approximately three snailfish egg specimens were collected
Coral collections	identification and systematics of corals	Ewanne Bernston (NWFSC)	approximately 25 coral specimens were collected
Zoarcoid fish collections	taxonomic studies on this group	Eric Hilton (VIMS)	approximately 10 zoarcoid specimens were collected
Myctophid fish collections	forage fishes for fatty acid analysis	Alan Springer (UAF)	approximately 100 myctophid specimens were collected
Assorted fish collections	reference collection of mammal prey items	Bill Walker (AFSC-NMML)	approximately 10 fish specimens were collected

Table 5a. - - Alphabetical list by common name of all fishes and invertebrates encountered on the 2010 EBSS survey.

Common name	Species/Taxon
Alaska eelpout	<i>Bothrocara pusillum</i>
Alaska skate	<i>Bathyraja parmifera</i>
Alaska skate egg case	<i>Bathyraja parmifera</i> egg case
Alaska snailfish	<i>Careproctus colletti</i>
Alaska volute	<i>Arctomelon stearnsii</i>
Alaska volute species	<i>Arctomelon</i> species cf. <i>stearnsii</i> (Clark & McLean)
Alaskan hermit	<i>Pagurus ochotensis</i>
Alaskan pink (=northern) shrimp	<i>Pandalus eos</i> (= <i>borealis</i>)
Alaskan trophon	<i>Boreotrophon alaskanus</i>
Aleutian alligatorfish	<i>Aspidophoroides bartoni</i>
Aleutian hermit	<i>Pagurus aleuticus</i>
Aleutian moonsnail	<i>Cryptonatica</i> (= <i>Natica</i>) <i>aleutica</i>
Aleutian skate	<i>Bathyraja aleutica</i>
Aleutian skate egg case	<i>Bathyraja aleutica</i> egg case
amphipod species	<i>Amphiodia</i> species
amphipod species	Amphipoda
Arctic argid	<i>Argis dentata</i>
Arctic moonsnail	<i>Cryptonatica affinis</i>
arrowtooth flounder	<i>Atheresthes stomias</i>
articulated bamboo coral	<i>Isidella</i> species
Atka mackerel	<i>Pleurogrammus monopterygius</i>
barbed eualid	<i>Eualus barbatus</i>
barnacle species	Thoracica
barrel sponge	<i>Halichondria panicea</i>
barrel sponge species	<i>Halichondria</i> species
barreleye	<i>Macropinna microstoma</i>
baseball sponge	<i>Craniella cranium</i>
basketstar	<i>Gorgonocephalus eucnemis</i>
basketstar species	<i>Gorgonocephalus</i> species
bat sea star species	<i>Ceramaster</i> species
beautiful sun star	<i>Solaster</i> species C (Clark)
Bering eelpout	<i>Lycodes beringi</i>
Bering Henricia	<i>Henricia beringiana</i>
Bering skate	<i>Bathyraja interrupta</i>
Bering skate egg case	<i>Bathyraja interrupta</i> egg case
Bering spiny star	<i>Hippasteria</i> species C (Clark)
bigmouth sculpin	<i>Hemitripterus bolini</i>
bigmouth sculpin eggs	<i>Hemitripterus bolini</i> eggs
bigscale species	Melamphaidae
bivalve species	<i>Acharax johnsoni</i>
bivalve species	Bivalvia
blackfaced red snailfish	<i>Paraliparis ulochir</i>
blackfin poacher	<i>Bathyagonus nigripinnis</i>
blackfin snailfish	<i>Careproctus cypselurus</i>
blackline snipe eel	<i>Avocettina infans</i>
blacklip snailfish	<i>Elassodiscus tremebundus</i>
blacknose sculpin	<i>Icelus canaliculatus</i>
blacksmelt species	<i>Bathylagus</i> species
blackspined sea star	<i>Lethasterias nanimensis</i>

Table 5a. - - Continued.

Common name	Species/Taxon
blackspotted rockfish	<i>Sebastes melanostictus</i>
blacktail snailfish	<i>Careproctus melanurus</i>
blob sculpin	<i>Psychrolutes phrictus</i>
blotched snailfish	<i>Crystallichthys cyclospilus</i>
boreopacific armhook squid	<i>Gonatopsis borealis</i>
Bowers Bank snailfish	<i>Careproctus bowersianus</i>
brachiopod species	<i>Frieleia halli</i>
brislingid sea star	Brisingidae
bristlemouth species	Gonostomatidae
brittlestarfish species	<i>Ophiacantha cataleimmoidea</i>
brittlestarfish species	<i>Ophiacantha normani</i>
brittlestarfish species	<i>Ophiopholis longispina</i>
brittlestarfish species	<i>Ophioscolex</i> species
brittlestarfish species	Ophiuroidea
brittlestarfish species	<i>Stegophiura ponderosa</i>
brokenline lampfish	<i>Lampanyctus jordani</i>
bryozoan species	<i>Alcyonidium pedunculatum</i>
California headlightfish	<i>Diaphus theta</i>
cannonball sun star	<i>Heterozonias alternatus</i>
chestnut whelk	<i>Buccinum castaneum</i>
chevron-tentacled anemone	<i>Cribrinopsis fernaldi</i>
Chinook salmon	<i>Oncorhynchus tshawytscha</i>
chiton species	<i>Leptochiton</i> species
chiton species	<i>Placiphorella pacifica</i>
chiton species	<i>Placiphorella</i> species
Chrysaora jellyfish	<i>Chrysaora melanaster</i>
chum salmon	<i>Oncorhynchus keta</i>
clawed armhook squid	<i>Gonatus onyx</i>
clay pipe sponge	<i>Aphrocallistes vastus</i>
comb jelly species	<i>Beroe abyssicola</i>
comb jelly species	<i>Beroe</i> species
Commander skate	<i>Bathyraja lindbergi</i>
Commander skate egg case	<i>Bathyraja lindbergi</i> egg case
common mud star	<i>Ctenodiscus crispatus</i>
coral eelpout	<i>Puzanova rubra</i>
coral species	<i>Amphilaphis</i> species
coral species	<i>Muriceides</i> species cf. <i>cylindrica</i> (Bayer et al.)
coral species	<i>Primnoa</i> species
costate whelk	<i>Buccinum costatum</i>
crab species	<i>Oregonia bifurca</i>
crangonid shrimp species	<i>Crangon</i> species
crangonid shrimp species	Crangonidae
crested bigscale	<i>Poromitra curilensis</i> (= <i>crassiceps</i>)
crested sea star	<i>Lophaster furcilliger</i>
crested star	<i>Lophaster vexator</i>
crimson pasiphaeid	<i>Pasiphaea tarda</i>
crinoid species	<i>Florometra inexpectata</i>
crinoid species	<i>Florometra</i> species
crinoid species	Crinoidea species
darkfin sculpin	<i>Malacobocottus zonurus</i>

Table 5a. - - Continued.

Common name	Species/Taxon
deep sea papillate cucumber	<i>Pannychia moseleyi</i>
deepsea eualid	<i>Eualus biunguis</i>
deepsea skate	<i>Bathyraja abyssicola</i>
deepsea sole	<i>Embassichthys bathybius</i>
deepsea spinyhead	<i>Metacrangon variabilis</i>
divaricate nutclam	<i>Acila castrensis</i>
dorid species	<i>Dendronotus</i> species
Dover sole	<i>Microstomus pacificus</i>
dreamer species	<i>Oneirodes</i> species
dreamer species	<i>Oneirodes thompsoni</i>
dusky rockfish	<i>Sebastes variabilis</i>
eared barnacle	<i>Scalpellum cornutum</i>
eastern Pacific bobtail	<i>Rossia pacifica</i>
ebony eelpout	<i>Lycodes concolor</i>
echiuroid worm species	<i>Echiura</i>
eelpout species	<i>Bothrocara</i> species
eelpout species	<i>Lycenchelys</i> species
eelpout species	<i>Lycodapus</i> species
eelpout species	<i>Lycodes</i> species
egg yolk jelly	<i>Phacellophora camtschatica</i>
emarginate snailfish	<i>Careproctus furcellus</i>
empty clam shells	Bivalvia shells
empty snail shells	Gastropoda shells
encrusting coral	<i>Clavularia incrustans</i>
eulachon	<i>Thaleichthys pacificus</i>
eualid shrimp species	<i>Eualus</i> species
Evermann's seastar	<i>Zoroaster evermanni</i>
feathery shipworm	<i>Bankia setacea</i>
Fisher sun star	<i>Solaster</i> species F (Clark)
flabby sculpin	<i>Zesticelus profundorum</i>
flapjack devilfish	<i>Opisthoteuthis californiana</i>
flathead sole	<i>Hippoglossoides elassodon</i>
four spined brittle star	<i>Ophiura quadrispina</i>
fragile moonsnail	<i>Bulbus fragilis</i>
fragile sea star	<i>Cheiraster dawsoni</i>
funnel sponge	<i>Phakellia cribrosa</i>
fuzzy hermit crab	<i>Pagurus trigonocheirus</i>
garnet lampfish	<i>Stenobrachius nannochir</i>
gastropod species	<i>Antiplanes thalea</i>
gastropod species	<i>Puncturella rothi</i>
giant barnacle	<i>Balanus evermanni</i>
giant grenadier	<i>Albatrossia pectoralis</i>
giant octopus	<i>Octopus dofleini</i>
giant red mysid	<i>Neognathophausia gigas</i>
gigantic anemone	<i>Metridium farcimen</i> (= <i>Metridium giganteum</i>)
glass sponge species	Hexactinellida
golden king crab	<i>Lithodes aequispinus</i>
gorgonian coral species	Gorgonacea
grape anemone	<i>Oractis diomedaeae</i>
gravel tube worm	<i>Onuphis conchylega</i>

Table 5a. - - Continued.

Common name	Species/Taxon
gray starsnout poacher	<i>Bathyagonus alascanus</i>
great sculpin	<i>Myoxocephalus polyacanthocephalus</i>
green sea urchin	<i>Strongylocentrotus droebachiensis</i>
Greenland cockle	<i>Serripes groenlandicus</i>
Greenland turbot	<i>Reinhardtius hippoglossoides</i>
Greenland wentletrap	<i>Boreoscala greenlandica</i>
grooved sea star	<i>Crossaster borealis</i>
grooved Tanner crab	<i>Chionoecetes tanneri</i>
hairy-lure dreamer	<i>Oneirodes bulbosus</i>
hat sponge	<i>Phakellia beringensis</i>
heart urchin	<i>Brisaster latifrons</i>
heart urchin species	<i>Brisaster owstoni</i>
hermit species	<i>Pagurus cornutus</i>
hermit species	<i>Pagurus</i> species
highsnout bigscale	<i>Melamphaes lugubris</i>
Korean horsehair crab	<i>Erimacrus isenbeckii</i>
hot dog sea anemone	<i>Bathyphelia australis</i>
humpback snailfish	<i>Elassodiscus caudatus</i>
hybrid Tanner crab	<i>Chionoecetes</i> hybrid
isopod species	<i>Rocinella angusta</i>
jellyfish species	<i>Aequorea</i> species
jellyfish species	<i>Atolla</i> species
jellyfish species	<i>Aurelia</i> species
jellyfish species	<i>Periphylla periphylla</i>
jellyfish species	<i>Scyphozoa</i>
Kamchatka coral	<i>Paragorgia arborea</i>
Kamchatka flounder	<i>Atheresthes evermanni</i>
keeled aforia	<i>Aforia circinata</i>
Kessler sun star	<i>Solaster</i> species E (Clark)
king crab species	<i>Paralomis multispina</i>
king crab species	<i>Paralomis</i> species A (Clark 2006)
king crab species	<i>Paralomis verrilli</i>
knobbyhand hermit	<i>Pagurus confragosus</i>
ladder whelk	<i>Buccinum scalariforme</i>
lampfish species	<i>Lampanyctus</i> species
lampfish species	<i>Stenobrachius</i> species
lamprey species	<i>Petromyzontidae</i>
lebbeid shrimp species	<i>Lebbeus</i> species
lion's mane	<i>Cyanea capillata</i>
long nippled sponge	<i>Polymastia robusta</i>
longfin grenadier	<i>Coryphaenoides longifilis</i>
longfinger hermit	<i>Pagurus rathbuni</i>
longhand hermit	<i>Pagurus tanneri</i>
longhorned decorator crab	<i>Chorilia longipes</i>
longnose lancetfish	<i>Alepisaurus ferox</i>
longsnout prickleback	<i>Lumpenella longirostris</i>
longspine thornyhead	<i>Sebastolobus altivelis</i>
magistrate armhook squid	<i>Berryteuthis magister</i>
majestic sea star	<i>Pedicellaster magister</i>
mollusk species	<i>Neomenia</i> cf. <i>yamamotoi</i> (Clark 2006)

Table 5a. - - Continued.

Common name	Species/Taxon
mollusk species	<i>Neomenia</i> species
mollusk species	<i>Onchidiopsis</i> species
mottled anemone	<i>Urticina crassicornis</i>
mud skate	<i>Bathyraja taranetzi</i>
mud skate egg case	<i>Bathyraja taranetzi</i> egg case
Murray sea pen	<i>Anthoptilum murrayi</i>
Mysidae shrimp species	Mysidae
Nodal bamboo coral species	<i>Keratoisis</i> species
North Pacific sea star	<i>Leptychaster arcticus</i>
northern cardiid	<i>Cyclocardia</i> species cf. <i>borealis</i> (Clark 2006)
northern horse mussel	<i>Modiolus modiolus</i>
northern lampfish	<i>Stenobrachius leucopsarus</i>
northern pearleye	<i>Benthalbella dentata</i>
northern rock sole	<i>Lepidopsetta polyxystra</i>
northern rockfish	<i>Sebastes polypinus</i>
northern sea star	<i>Dipsacaster borealis</i>
northern smoothtongue	<i>Leuroglossus schmidti</i>
notched brittlestar	<i>Ophiura sarsi</i>
nudibranch species	Nudibranchia
oblique smoothcockle	<i>Serripes notabilis</i>
octopus species	<i>Benthoctopus oregonensis</i>
octopus species	<i>Benthoctopus</i> species
octopus species	<i>Graneledone</i> species cf. <i>boreopacifica</i> (Nesis)
octopus species	<i>Japetella diaphana</i>
octopus species	Octopodidae
octopus species	<i>Opisthoteuthis</i> species cf. <i>californiana</i> (Jorgensen)
octopus species	<i>Sasakiopus salebrosus</i>
orange bat sea star	<i>Ceramaster patagonicus</i>
orange-pink sea urchin	<i>Allocentrotus fragilis</i>
Oregon triton	<i>Fusitriton oregonensis</i>
Pacific ambereye	<i>Hymenodora frontalis</i>
Pacific blacksmelt	<i>Bathylagus pacificus</i>
Pacific cod	<i>Gadus macrocephalus</i>
Pacific Colga	<i>Colga pacifica</i>
Pacific flatnose	<i>Antimora microlepis</i>
Pacific glass shrimp	<i>Pasiphaea pacifica</i>
Pacific grenadier	<i>Coryphaenoides acrolepis</i>
Pacific hake	<i>Merluccius productus</i>
Pacific halibut	<i>Hippoglossus stenolepis</i>
Pacific herring	<i>Clupea pallasi</i>
Pacific lamprey	<i>Lampetra tridentata</i>
Pacific lyre crab	<i>Hyas lyratus</i>
Pacific ocean perch	<i>Sebastes alutus</i>
Pacific sergestid	<i>Sergestes similis</i>
Pacific sleeper shark	<i>Somniosus pacificus</i>
Pacific viperfish	<i>Chauliodus macouni</i>
pale mammilated sponge	<i>Weberella bursa</i>
pale moonsnail	<i>Euspira pallida</i>
peaked shrimp	<i>Acanthephyra curtirostris</i>
peanut worm unid.	Sipuncula

Table 5a. - - Continued.

Common name	Species/Taxon
pearly prickleback	<i>Bryozoichthys marjorius</i>
pinch bug species	<i>Munidopsis</i> species
pincushion sea star	<i>Diplopteraster multipes</i>
pink rose star	<i>Crossaster</i> species B (Clark)
pinpoint lampfish	<i>Nannobrachium regale</i>
polychaete worm species	Polychaeta
polychaete worm tubes	Polychaete tubes
popeye blacksmelt	<i>Bathylagus ochotensis</i>
popeye grenadier	<i>Coryphaenoides cinereus</i>
Pribilof whelk	<i>Neptunea pribiloffensis</i>
proboscis snailfish	<i>Careproctus simus</i>
prowfish	<i>Zaprora silenus</i>
puncerellas	<i>Cranopsis</i> species
purple hermit	<i>Elassochirus cavimanus</i>
purple striated sea anemone	Actiniaria species
red bat star	<i>Ceramaster japonicus</i>
red snailfish	<i>Paraliparis dactylosus</i>
redbanded rockfish	<i>Sebastes babcocki</i>
reticulate anemone	<i>Actinauge verrilli</i>
rex sole	<i>Glyptocephalus zachirus</i>
ribbed bryozoan	<i>Rhamphostomella costata</i>
ridged blood star	<i>Henricia aspera</i>
ridged crangon	<i>Crangon dalli</i>
robust blacksmelt	<i>Bathylagus milleri</i>
rockfish species	<i>Sebastes</i> species
rose sea star	<i>Crossaster papposus</i>
rosy tritonia	<i>Tritonia diomedea</i>
rotund trophon	<i>Boreotrophon rotundatus</i>
rough China hat sponge	<i>Neoesperiopsis infundibula</i>
rough purple sea anemone	<i>Paractinostola faeculenta</i>
rougheye rockfish	<i>Sebastes aleutianus</i>
roughtail skate	<i>Bathyraja trachura</i>
roughtail skate egg case	<i>Bathyraja trachura</i> egg case
rusty snailfish	<i>Paraliparis</i> species cf. <i>pectoralis</i> (Orr and Baldwin)
sablefish	<i>Anoplopoma fimbria</i>
salmon snailfish	<i>Careproctus rastrinus</i>
sandy sea cucumber	<i>Pseudostichopus mollis</i>
sawback poacher	<i>Leptagonus frenatus</i>
scaly paperbone	<i>Scopelosaurus harryi</i>
scarlet king crab	<i>Lithodes couesi</i>
scarlet sea star	<i>Pseudarchaster parelii</i>
sea anemone species	<i>Actinernus</i> species
sea anemone species	Actiniaria
sea anemone species	<i>Actinistola</i> species A (Clark 2006)
sea anemone species	<i>Actinoscyphia</i> species
sea anemone species	Actinostolidae
sea anemone species	<i>Actinurnis</i> species
sea anemone species	Hormathiidae
sea anemone species	<i>Stomphia</i> species
sea anemone species	<i>Urticina</i> species

Table 5a. - - Continued.

Common name	Species/Taxon
sea cucumber species	<i>Bathyplotes</i> species
sea cucumber species	Holothuroidea
sea cucumber species	<i>Pannychia</i> species
sea cucumber species	<i>Psolus</i> species
sea cucumber species	<i>Scotoplanes</i> species
sea cucumber species	<i>Synallactes challengerii</i>
sea cucumber species	<i>Synallactes</i> species
sea mouse species	<i>Aphrodita negligens</i>
sea mouse species	<i>Aphrodita</i> species
sea raspberry	<i>Gersemia</i> species
sea spider species	<i>Colossendeis</i> species
sea spider species	Pycnogonida
sea star species	<i>Asteronyx</i> species
sea star species	<i>Brisingella exilis</i>
sea star species	<i>Brisingella</i> species
sea star species	<i>Henricia asthenactis</i>
sea star species	<i>Henricia derjugini</i>
sea star species	<i>Henricia longispina</i>
sea star species	<i>Henricia</i> species
sea star species	<i>Leptychaster anomalus</i>
sea star species	<i>Lophaster</i> species
sea star species	<i>Mediaster tenellus</i>
sea star species	<i>Myxoderma sacculatum</i>
sea star species	<i>Nearaster</i> species
sea star species	<i>Nearaster variabilis</i>
sea star species	<i>Odontohenricia fisheri</i>
sea star species	<i>Odontohenricia</i> species
sea star species	<i>Odontohenricia</i> species A (Clark)
sea star species	<i>Pteraster jordani</i>
sea star species	<i>Pteraster marssipus</i>
sea star species	<i>Pteraster</i> species
sea star species	<i>Pteraster tesselatus</i>
sea star species	<i>Solaster hypothrissus</i>
sea star species	<i>Solaster</i> species
sea star species	<i>Solaster</i> species A (Clark 1997)
sea star species	<i>Stephanasterias albula</i>
sea urchin species	<i>Strongylocentrotus</i> species
searcher	<i>Bathymaster signatus</i>
seaslug species	<i>Tritonia</i> species
seawhip species	<i>Halipterus</i> species
seawhip species	<i>Halipterus willemoesi</i>
serpent sea star	<i>Asteronyx loveni</i>
shadow eelpout	<i>Bothrocara nyx</i>
shell shrimp	<i>Crangon alaskensis</i>
shortfin eelpout	<i>Lycodes brevipes</i>
shorthraker rockfish	<i>Sebastodes borealis</i>
shortscale eulaid	<i>Eualus suckleyi</i>
shortspine thornyhead	<i>Sebastolobus alascanus</i>
shrew whelk	<i>Colus halli</i>
shrimp species	<i>Benthogenennema borealis</i>

Table 5a. - - Continued.

Common name	Species/Taxon
shrimp species	<i>Pandalopsis aleutica</i>
shrimp species	<i>Pandalopsis ampla</i>
shrimp species	<i>Pandalopsis longirostris</i>
shrimp species	<i>Pandalopsis</i> species
sidestripe shrimp	<i>Pandalopsis dispar</i>
silvergray rockfish	<i>Sebastes brevispinis</i>
skate species	<i>Bathyraja</i> species
skate species egg case	<i>Bathyraja</i> species egg case
slender codling	<i>Halargyreus johnsonii</i>
slender seawhips	<i>Stylatula</i> species
slim snailfish	<i>Rhinoliparis attenuatus</i>
smalldisk snailfish	<i>Careproctus giberti</i>
smooth green sponge	<i>Latrunculia</i> species B (Clark 2006)
smooth lump sucker	<i>Aptocyclus ventricosus</i>
smoothskin octopus	<i>Benthoctopus leioderma</i>
smoothstem seawhip	<i>Virgularia</i> species
snail eggs	gastropod eggs
snail species	<i>Beringius frielei</i>
snail species	<i>Beringius undatus</i>
snail species	<i>Buccinum</i> species
snail species	<i>Colus</i> species
snail species	<i>Otukaia kiheiziebisu</i>
snail species	<i>Volutomitra alaskana</i>
snail species egg case	<i>Beringius</i> species eggs
snail species egg case	<i>Buccinum</i> species eggs
snailfish species	<i>Careproctus</i> species
snailfish species	<i>Elassodiscus</i> species
snailfish species	Liparidinae
snailfish species	<i>Paraliparis</i> species
snailfish species	<i>Paraliparis</i> species cf. <i>dactylosus</i> (Orr and Baldwin)
snailfish species	<i>Paraliparis</i> species cf. <i>ulochir</i> (Orr and Baldwin)
snailfish species	<i>Rhinoliparis</i> species
snakehead eelpout	<i>Lycenchelys crotalinus</i>
snakeshead brachiopod	<i>Terebratulina unguicula</i>
snow crab	<i>Chionoecetes opilio</i>
soft coral species	<i>Anthomastus</i> species
softskin slickhead	<i>Rouleina attrita</i>
spectacled sculpin	<i>Triglops scepticus</i>
spiny eel species	<i>Polyacanthonotus challengerii</i>
spiny henricia	<i>Henricia spiculifera</i>
spiny lebbeid	<i>Lebbeus groenlandicus</i>
spiny red sea star	<i>Hippasteria spinosa</i>
spiny sea star species	<i>Hippasteria armata</i>
spiny sea star species	<i>Hippasteria californica</i>
spiny sea star species	<i>Hippasteria heathi</i>
spiny sea star species	<i>Hippasteria</i> species
spiny trophon	<i>Scabrotrophon scitulus</i>
spinyhead sculpin	<i>Dasycottus setiger</i>
spinyridge shrimp	<i>Notostomus japonicus</i>
splendid hermit	<i>Labidochirus splendescens</i>

Table 5a. - - Continued.

Common name	Species/Taxon
sponge hermit	<i>Pagurus brandti</i>
sponge species	<i>Neoesperiopsis digitata</i>
sponge species	<i>Phakellia</i> species
sponge species	<i>Polymastia</i> species
sponge species	Porifera
sponge species	<i>Staurocalyptus</i> species
sponge species	<i>Suberites ficus</i>
sponge species	<i>Swiftia</i> species
squid species	<i>Chiroteuthis calyx</i>
squid species	<i>Galiteuthis phyllura</i>
squid species	<i>Gonatus madokai</i>
squid species	<i>Gonatus middendorffii</i>
squid species	<i>Gonatus</i> species
squid species	<i>Taonius pavo</i>
squid species	Teuthoidea
starsnout poacher species	<i>Bathyagonus</i> species
striped sea leech	<i>Notostomobdella cyclostoma</i>
sweet sea potato	<i>Molpadia intermedia</i>
swellhead snailfish	<i>Paraliparis cephalus</i>
Swift's sea star	<i>Gephyreaster swifti</i>
swimming anemone	<i>Stomphia coccinea</i>
swimming sea cucumber	<i>Paelopatides confundens</i>
swollen whelk	<i>Buccinum oedematum</i>
Tanner crab	<i>Chionoecetes bairdi</i>
tentacle-shedding anemone	<i>Liponema brevicornis</i>
thick spined brittle star	<i>Ophiolebes pachybactra</i>
thin-ribbed whelk	<i>Colus herendeenii</i>
thorny sculpin	<i>Icelus spiniger</i>
three-ribbed whelk	<i>Ancistrolepis eucosmias</i>
tomato snailfish	<i>Careproctus</i> species G (Orr)
toothless snailfish	<i>Paraliparis paucidens</i>
Townsend hermit crab	<i>Pagurus townsendi</i>
tree sponge	<i>Mycale loveni</i>
tree sponge species	<i>Mycale</i> species
triangle Tanner crab	<i>Chionoecetes angulatus</i>
tubeshoulder species	Platytroctidae
tunicate species	Asciidae
tunicate species	<i>Boltenia</i> species
twoline eelpout	<i>Bothrocara brunneum</i>
two-ribbed whelk	<i>Ancistrolepis bicinctus</i>
twospine crangon	<i>Crangon communis</i>
ubiquitous brittle star	<i>Ophiopholis aculeata</i>
vampire squid	<i>Vampyroteuthis infernalis</i>
Vancouver lampshell	<i>Laqueus vancouverensis</i>
Vancouver scallop	<i>Delectopecten vancouverensis</i>
vase sponge	<i>Aulosaccus schulzei</i>
Verrill pinch bug	<i>Munidopsis verrilli</i>
walleye pollock	<i>Theragra chalcogramma</i>
warped whelk	<i>Pyrulofusus deformis</i>
western eelpout	<i>Bothrocara zestum</i>

Table 5a. - - Continued.

Common name	Species/Taxon
whelk species	<i>Neptunea insularis</i>
whelk species	<i>Neptunea</i> species
whelk species	<i>Neptunea</i> species F (Clark & McLean)
whelk species	<i>Pyrulofusus dexius</i>
whelk species	<i>Pyrulofusus melonis</i>
whelk species	<i>Pyrulofusus</i> species eggs
whelk species egg case	<i>Neptunea</i> species eggs
white henricia	<i>Henricia</i> species B (Clark 2006)
white neptune	<i>Neptunea amianta</i>
white night doris	<i>Archidoris odhneri</i>
white rose star	<i>Crossaster</i> species A (Clark)
white scallop	<i>Chlamys albida</i>
white sea urchin	<i>Strongylocentrotus pallidus</i>
whiteblotched skate	<i>Bathyraja maculata</i>
whiteblotched skate egg case	<i>Bathyraja maculata</i> egg case
whitebrow skate	<i>Bathyraja minispinosa</i>
whitebrow skate egg case	<i>Bathyraja minispinosa</i> egg case
whiteknee hermit	<i>Pagurus dalli</i>
whitescaled sea cucumber	<i>Psolus squamatus</i>
wide-eye sculpin	<i>Icelus euryops</i>
worm species	<i>Cerebratulus californienesis</i>
worm species	<i>Emplectonema</i> species
worm species	Phascolosomatidae
worm species	<i>Serpula</i> species
worm species	<i>Spinther</i> species A (Clark 2006)
worm species	Polychaeta species
wrinkled star	<i>Pteraster militaris</i>
yellow Irish lord	<i>Hemilepidotus jordani</i>
yellow leafy sponge	<i>Leucosolenia blanca</i>
yellowleg pandalid	<i>Pandalus tridens</i>
yellowmouth rockfish	<i>Sebastes reedi</i>

Table 5b. - - Alphabetical list by scientific name of all fishes and invertebrates on the 2010 EBSS survey.

Species/Taxon	Common name
<i>Acanthephyra curtirostris</i>	peaked shrimp
<i>Acharax johnsoni</i>	bivalve species
<i>Acila castrensis</i>	divaricate nutclam
<i>Actinauge verrilli</i>	reticulate anemone
<i>Actinernus</i> species	sea anemone species
Actiniaria	sea anemone species
<i>Actinistola</i> species A (Clark 2006)	sea anemone species
<i>Actinoscyphia</i> species	sea anemone species
Actinostolidae	sea anemone species
<i>Actinurnis</i> species	sea anemone species
<i>Aequorea</i> species	jellyfish species
<i>Aforia circinata</i>	keeled aforia
<i>Albatrossia pectoralis</i>	giant grenadier
<i>Alcyonium pedunculatum</i>	bryozoan species
<i>Alepisaurus ferox</i>	longnose lancetfish
<i>Allocentrotus fragilis</i>	orange-pink sea urchin
<i>Amphilaphis</i> species	coral species
<i>Amphiodia</i> species	amphipod species
Amphipoda	amphipod species
<i>Ancistrolepis bicinctus</i>	two-ribbed whelk
<i>Ancistrolepis eucosmius</i>	three-ribbed whelk
<i>Anoplopoma fimbria</i>	sablefish
<i>Anthomastus</i> species	soft coral species
<i>Anthoptilum murrayi</i>	Murray sea pen
<i>Antimora microlepis</i>	Pacific flatnose
<i>Antiplanes thalea</i>	gastropod species
<i>Aphrocallistes vastus</i>	clay pipe sponge
<i>Aphrodita negligens</i>	sea mouse species
<i>Aphrodita</i> species	sea mouse species
<i>Aptocyclus ventricosus</i>	smooth lump sucker
<i>Archidoris odhneri</i>	white night doris
<i>Arctomelon</i> species cf. <i>stearnsii</i> (Clark & McLean)	Alaska volute species
<i>Arctomelon stearnsii</i>	Alaska volute
<i>Argis dentata</i>	Arctic argid
Asciidiacea	tunicate species
<i>Aspidophoroides bartoni</i>	Aleutian alligatorfish
<i>Asteronyx loveni</i>	serpent sea star
<i>Asteronyx</i> species	sea star species
<i>Atheresthes evermanni</i>	Kamchatka flounder
<i>Atheresthes stomias</i>	arrowtooth flounder
<i>Atolla</i> species	jellyfish species
<i>Aulosaccus schulzei</i>	vase sponge
<i>Aurelia</i> species	jellyfish species
<i>Avocettina infans</i>	blackline snipe eel
<i>Balanus evermanni</i>	giant barnacle
<i>Bankia setacea</i>	feathery shipworm
<i>Bathyagonus alascanus</i>	gray starsnout poacher
<i>Bathyagonus nigripinnis</i>	blackfin poacher
<i>Bathyagonus</i> species	starsnout poacher species

Table 5b. - - Continued.

Species/Taxon	Common name
<i>Bathylagus milleri</i>	robust blacksmelt
<i>Bathylagus ochotensis</i>	popeye blacksmelt
<i>Bathylagus pacificus</i>	Pacific blacksmelt
<i>Bathylagus</i> species	blacksmelt species
<i>Bathymaster signatus</i>	searcher
<i>Bathyphelia australis</i>	hot dog sea anemone
<i>Bathyplotes</i> species	sea cucumber species
<i>Bathyraja abyssicola</i>	deepsea skate
<i>Bathyraja aleutica</i>	Aleutian skate
<i>Bathyraja aleutica</i> egg case	Aleutian skate egg case
<i>Bathyraja interrupta</i>	Bering skate
<i>Bathyraja interrupta</i> egg case	Bering skate egg case
<i>Bathyraja lindbergi</i>	Commander skate
<i>Bathyraja lindbergi</i> egg case	Commander skate egg case
<i>Bathyraja maculata</i>	whiteblotched skate
<i>Bathyraja maculata</i> egg case	whiteblotched skate egg case
<i>Bathyraja minispinosa</i>	whitebrow skate
<i>Bathyraja minispinosa</i> egg case	whitebrow skate egg case
<i>Bathyraja parvifera</i>	Alaska skate
<i>Bathyraja parvifera</i> egg case	Alaska skate egg case
<i>Bathyraja</i> species	skate species
<i>Bathyraja</i> species egg case	skate species egg case
<i>Bathyraja taranetzi</i>	mud skate
<i>Bathyraja taranetzi</i> egg case	mud skate egg case
<i>Bathyraja trachura</i>	roughtail skate
<i>Bathyraja trachura</i> egg case	roughtail skate egg case
<i>Benthalbella dentata</i>	northern pearleye
<i>Bentheogenenema borealis</i>	shrimp species
<i>Benthoctopus leioderma</i>	smoothskin octopus
<i>Benthoctopus oregonensis</i>	octopus species
<i>Benthoctopus</i> species	octopus species
<i>Beringius frielei</i>	snail species
<i>Beringius</i> species eggs	snail species egg case
<i>Beringius undatus</i>	snail species
<i>Beroe abyssicola</i>	comb jelly species
<i>Beroe</i> species	comb jelly species
<i>Berryteuthis magister</i>	magistrate armhook squid
<i>Bivalvia</i>	bivalve species
<i>Boltenia</i> species	tunicate species
<i>Boreoscala greenlandica</i>	Greenland wentletrap
<i>Boreotrophon alaskanus</i>	Alaskan trophon
<i>Boreotrophon rotundatus</i>	rotund trophon
<i>Bothrocara brunneum</i>	twoline eelpout
<i>Bothrocara nyx</i>	shadow eelpout
<i>Bothrocara pusillum</i>	Alaska eelpout
<i>Bothrocara</i> species	eelpout species
<i>Bothrocara zestum</i>	western eelpout
<i>Brisaster latifrons</i>	heart urchin
<i>Brisaster owstoni</i>	heart urchin species
<i>Brisingella exilis</i>	sea star species

Table 5b. - - Continued.

Species/Taxon	Common name
<i>Brisingella</i> species	sea star species
Brisingidae	brislingid sea star
<i>Bryozoichthys marjorius</i>	pearly prickleback
<i>Buccinum castaneum</i>	chestnut whelk
<i>Buccinum costatum</i>	costate whelk
<i>Buccinum oedematum</i>	swollen whelk
<i>Buccinum scalariforme</i>	ladder whelk
<i>Buccinum</i> species	snail species
<i>Buccinum</i> species eggs	snail species egg case
<i>Bulbus fragilis</i>	fragile moonsnail
<i>Careproctus bowersianus</i>	Bowers Bank snailfish
<i>Careproctus colletti</i>	Alaska snailfish
<i>Careproctus cypselurus</i>	blackfin snailfish
<i>Careproctus furcellus</i>	emarginate snailfish
<i>Careproctus gilberti</i>	smalldisk snailfish
<i>Careproctus melanurus</i>	blacktail snailfish
<i>Careproctus rastrinus</i>	salmon snailfish
<i>Careproctus simus</i>	proboscis snailfish
<i>Careproctus</i> species	snailfish species
<i>Careproctus</i> species G (Orr)	tomato snailfish
<i>Ceramaster japonicus</i>	red bat star
<i>Ceramaster patagonicus</i>	orange bat sea star
<i>Ceramaster</i> species	bat sea star species
<i>Cerebratulus californienesis</i>	worm species
<i>Chauliodus macouni</i>	Pacific viperfish
<i>Cheiraster dawsoni</i>	fragile sea star
<i>Chionoecetes angulatus</i>	triangle Tanner crab
<i>Chionoecetes bairdi</i>	Tanner crab
<i>Chionoecetes</i> hybrid	hybrid Tanner crab
<i>Chionoecetes opilio</i>	snow crab
<i>Chionoecetes tanneri</i>	grooved Tanner crab
<i>Chiroteuthis calyx</i>	squid species
<i>Chlamys albida</i>	white scallop
<i>Chorilia longipes</i>	longhorned decorator crab
<i>Chrysaora melanaster</i>	Chrysaora jellyfish
<i>Clavularia incrassata</i>	encrusting coral
<i>Clupea pallasi</i>	Pacific herring
<i>Colga pacifica</i>	Pacific Colga
<i>Colossendeis</i> species	sea spider species
<i>Colus halli</i>	shrew whelk
<i>Colus herendeenii</i>	thin-ribbed whelk
<i>Colus</i> species	snail species
<i>Coryphaenoides acrolepis</i>	Pacific grenadier
<i>Coryphaenoides cinereus</i>	popeye grenadier
<i>Coryphaenoides longifilis</i>	longfin grenadier
<i>Crangon alaskensis</i>	shell shrimp
<i>Crangon communis</i>	twospine crangon
<i>Crangon dalli</i>	ridged crangon
<i>Crangon</i> species	crangonid shrimp species
Crangonidae	crangonid shrimp species

Table 5b. - - Continued.

Species/Taxon	Common name
<i>Craniella cranium</i>	baseball sponge
<i>Cranopsis</i> species	puncterellas
<i>Cribrinopsis fernaldi</i>	chevron-tentacled anemone
<i>Crossaster borealis</i>	grooved sea star
<i>Crossaster papposus</i>	rose sea star
<i>Crossaster</i> species A (Clark)	white rose star
<i>Crossaster</i> species B (Clark)	pink rose star
<i>Cryptonatica</i> (= <i>Natica</i>) <i>aleutica</i>	Aleutian moonsnail
<i>Cryptonatica affinis</i>	Arctic moonsnail
<i>Crystallichthys cyclospilus</i>	blotched snailfish
<i>Ctenodiscus crispatus</i>	common mud star
<i>Cyanea capillata</i>	lion's mane
<i>Cyclocardia</i> species cf. <i>borealis</i> (Clark 2006)	northern cardiid
<i>Dasycottus setiger</i>	spinyhead sculpin
<i>Delectopecten vancouverensis</i>	Vancouver scallop
<i>Dendronotus</i> species	dorid species
<i>Diaphus theta</i>	California headlightfish
<i>Diplopteraster multipes</i>	pincushion sea star
<i>Dipsacaster borealis</i>	northern sea star
<i>Echiura</i>	echiuroid worm species
<i>Elassochirus cavimanus</i>	purple hermit
<i>Elassodiscus caudatus</i>	humpback snailfish
<i>Elassodiscus</i> species	snailfish species
<i>Elassodiscus tremebundus</i>	blacklip snailfish
<i>Embassichthys bathybius</i>	deepsea sole
<i>Emplectonema</i> species	worm species
<i>Erimacrus isenbeckii</i>	Korean horsehair crab
<i>Eualus barbatus</i>	barbed eualid
<i>Eualus biunguis</i>	deepsea eualid
<i>Eualus</i> species	eualid shrimp species
<i>Eualus suckleyi</i>	shortscale eualid
<i>Euspira pallida</i>	pale moonsnail
<i>Florometra inexpectata</i>	crinoid species
<i>Florometra</i> species	crinoid species
<i>Frielia halli</i>	brachiopod species
<i>Fusitriton oregonensis</i>	Oregon triton
<i>Gadus macrocephalus</i>	Pacific cod
<i>Galiteuthis phyllura</i>	squid species
gastropod eggs	snail eggs
<i>Gephyreaster swifti</i>	Swift's sea star
<i>Gersemia</i> species	sea raspberry
<i>Glyptocephalus zachirus</i>	rex sole
<i>Gonatopsis borealis</i>	boreopacific armhook squid
<i>Gonatus madokai</i>	squid species
<i>Gonatus middendorffi</i>	squid species
<i>Gonatus onyx</i>	clawed armhook squid
<i>Gonatus</i> species	squid species
<i>Gonostomatidae</i>	bristlemouth species
<i>Gorgonacea</i>	gorgonian coral species
<i>Gorgonocephalus eucnemis</i>	basketstar

Table 5b. - - Continued.

Species/Taxon	Common name
<i>Gorgonocephalus</i> species	basketstar species
<i>Graneledone</i> species cf. <i>boreopacifica</i> (Nesis)	octopus species
<i>Halargyreus johnsonii</i>	slender codling
<i>Halichondria panicea</i>	barrel sponge
<i>Halichondria</i> species	barrel sponge species
<i>Halipteris</i> species	seawhip species
<i>Halipteris willemoesi</i>	seawhip species
<i>Hemilepidotus jordani</i>	yellow Irish lord
<i>Hemitripterus bolini</i>	bigmouth sculpin
<i>Hemitripterus bolini</i> eggs	bigmouth sculpin eggs
<i>Henricia aspera</i>	ridged blood star
<i>Henricia asthenactis</i>	sea star species
<i>Henricia beringiania</i>	Bering Henricia
<i>Henricia derjugini</i>	sea star species
<i>Henricia longispina</i>	sea star species
<i>Henricia</i> species	sea star species
<i>Henricia</i> species B (Clark 2006)	white henricia
<i>Henricia spiculifera</i>	spiny henricia
<i>Heterozonias alternatus</i>	cannonball sun star
<i>Hexactinellida</i>	glass sponge species
<i>Hippasteria armata</i>	spiny sea star speices
<i>Hippasteria californica</i>	spiny sea star speices
<i>Hippasteria heathi</i>	spiny sea star speices
<i>Hippasteria</i> species	spiny sea star speices
<i>Hippasteria</i> species C (Clark)	Bering spiny star
<i>Hippasteria spinosa</i>	spiny red sea star
<i>Hippoglossoides elassodon</i>	flathead sole
<i>Hippoglossus stenolepis</i>	Pacific halibut
<i>Holothuroidea</i>	sea cucumber species
<i>Hormathiidae</i>	sea anemone species
<i>Hyas lyratus</i>	Pacific lyre crab
<i>Hymenodora frontalis</i>	Pacific ambereye
<i>Icelus canaliculatus</i>	blacknose sculpin
<i>Icelus euryops</i>	wide-eye sculpin
<i>Icelus spiniger</i>	thorny sculpin
<i>Isidella</i> species	articulated bamboo coral
<i>Japetella diaphana</i>	octopus species
<i>Keratoisis</i> species	Nodal bamboo coral species
<i>Labidochirus splendescens</i>	splendid hermit
<i>Lampanyctus jordani</i>	brokenline lampfish
<i>Lampanyctus</i> species	lampfish species
<i>Lampetra tridentata</i>	Pacific lamprey
<i>Laqueus vancouverensis</i>	Vancouver lampshell
<i>Latrunculia</i> species B (Clark 2006)	smooth green sponge
<i>Lebbeus groenlandicus</i>	spiny lebbeid
<i>Lebbeus</i> species	lebbeid shrimp species
<i>Lepidopsetta polyxystra</i>	northern rock sole
<i>Leptagonus frenatus</i>	sawback poacher
<i>Leptochiton</i> species	chiton species
<i>Leptychaster anomalous</i>	sea star species

Table 5b. - - Continued.

Species/Taxon	Common name
<i>Leptychaster arcticus</i>	North Pacific sea star
<i>Lethasterias nanimensis</i>	blackspined sea star
<i>Leucosolenia blanca</i>	yellow leafy sponge
<i>Leuroglossus schmidti</i>	northern smoothtongue
<i>Liparidinae</i>	snailfish species
<i>Liponema brevicornis</i>	tentacle-shedding anemone
<i>Lithodes aequispinus</i>	golden king crab
<i>Lithodes couesi</i>	scarlet king crab
<i>Lophaster furcilliger</i>	crested sea star
<i>Lophaster</i> species	sea star species
<i>Lophaster vexator</i>	crested star
<i>Lumpenella longirostris</i>	longsnout prickleback
<i>Lycenchelys crotalinus</i>	snakehead eelpout
<i>Lycenchelys</i> species	eelpout species
<i>Lycodapus</i> species	eelpout species
<i>Lycodes beringi</i>	Bering eelpout
<i>Lycodes brevipes</i>	shortfin eelpout
<i>Lycodes concolor</i>	ebony eelpout
<i>Lycodes</i> species	eelpout species
<i>Macropinna microstoma</i>	barreleye
<i>Malacocottus zonurus</i>	darkfin sculpin
<i>Mediaster tenellus</i>	sea star species
<i>Melamphaes lugubris</i>	highsnout bigscale
<i>Melamphaidae</i>	bigscale species
<i>Merluccius productus</i>	Pacific hake
<i>Metacrangon variabilis</i>	deepsea spinyhead
<i>Metridium farcimen</i> (= <i>Metridium giganteum</i>)	gigantic anemone
<i>Microstomus pacificus</i>	Dover sole
<i>Modiolus modiolus</i>	northern horse mussel
<i>Molpadia intermedia</i>	sweet sea potato
<i>Munidopsis</i> species	pinch bug species
<i>Munidopsis verrilli</i>	Verrill pinch bug
<i>Muriceides</i> species cf. <i>cylindrica</i> (Bayer et al.)	coral species
<i>Mycale loveni</i>	tree sponge
<i>Mycale</i> species	tree sponge species
<i>Myoxocephalus polyacanthocephalus</i>	great sculpin
<i>Mysidae</i>	Mysidae shrimp species
<i>Myxoderma sacculatum</i>	sea star species
<i>Nannobrachium regale</i>	pinpoint lampfish
<i>Nearchaster</i> species	sea star species
<i>Nearchaster variabilis</i>	sea star species
<i>Neoesperiopsis digitata</i>	sponge species
<i>Neoesperiopsis infundibula</i>	rough China hat sponge
<i>Neognathophausia gigas</i>	giant red mysid
<i>Neomenia</i> cf. <i>yamamoti</i> (Clark 2006)	mollusk species
<i>Neomenia</i> species	mollusk species
<i>Neptunea amianta</i>	white neptune
<i>Neptunea insularis</i>	whelk species
<i>Neptunea pribiloffensis</i>	Pribilof whelk
<i>Neptunea</i> species	whelk species

Table 5b. - - Continued.

Species/Taxon	Common name
<i>Neptunea</i> species eggs	whelk species egg case
<i>Neptunea</i> species F (Clark & McLean)	whelk species
<i>Notostomobdella cyclostoma</i>	striped sea leech
<i>Notostomus japonicus</i>	spinyridge shrimp
Nudibranchia	nudibranch species
Octopodidae	octopus species
<i>Octopus dofleini</i>	giant octopus
<i>Odontohenricia fisheri</i>	sea star species
<i>Odontohenricia</i> species	sea star species
<i>Odontohenricia</i> species A (Clark)	sea star species
<i>Oncidiopsis</i> species	mollusk species
<i>Oncorhynchus keta</i>	chum salmon
<i>Oncorhynchus tshawytscha</i>	Chinook salmon
<i>Oneirodes bulbosus</i>	hairy-lure dreamer
<i>Oneirodes</i> species	dreamer species
<i>Oneirodes thompsoni</i>	dreamer species
<i>Onuphis conchylega</i>	gravel tube worm
<i>Ophiacantha cataleimoida</i>	brittlestarfish species
<i>Ophiacantha normani</i>	brittlestarfish species
<i>Ophiolebes pachybactra</i>	thick spined brittle star
<i>Ophiopholis aculeata</i>	ubiquitous brittle star
<i>Ophiopholis longispina</i>	brittlestarfish species
<i>Ophioscolex</i> species	brittlestarfish species
<i>Ophiura quadrispina</i>	four spined brittle star
<i>Ophiura sarsi</i>	notched brittlestar
Ophiuroidea	brittlestarfish species
<i>Opisthoteuthis californiana</i>	flapjack devilfish
<i>Opisthoteuthis</i> species cf. <i>californiana</i> (Jorgensen)	octopus species
<i>Oractis diomedae</i>	grape anemone
<i>Oregonia bifurca</i>	crab species
<i>Otukaia kiheiziebisu</i>	snail species
<i>Paelopatides confundens</i>	swimming sea cucumber
<i>Pagurus aleuticus</i>	Aleutian hermit
<i>Pagurus brandti</i>	sponge hermit
<i>Pagurus confragosus</i>	knobbyhand hermit
<i>Pagurus cornutus</i>	hermit species
<i>Pagurus dalli</i>	whiteknee hermit
<i>Pagurus ochotensis</i>	Alaskan hermit
<i>Pagurus rathbuni</i>	longfinger hermit
<i>Pagurus</i> species	hermit species
<i>Pagurus tanneri</i>	longhand hermit
<i>Pagurus townsendi</i>	Townsend hermit crab
<i>Pagurus trigonocheirus</i>	fuzzy hermit crab
<i>Pandalopsis aleutica</i>	shrimp species
<i>Pandalopsis ampla</i>	shrimp species
<i>Pandalopsis dispar</i>	sidestripe shrimp
<i>Pandalopsis longirostris</i>	shrimp species
<i>Pandalopsis</i> species	shrimp species
<i>Pandalus eous</i> (=borealis)	Alaskan pink (=northern) shrimp
<i>Pandalus tridens</i>	yellowleg pandalid

Table 5b. - - Continued.

Species/Taxon	Common name
<i>Pannychia moseleyi</i>	deep sea papillate cucumber
<i>Pannychia</i> species	sea cucumber species
<i>Paractinostola faeculenta</i>	rough purple sea anemone
<i>Paragorgia arborea</i>	Kamchatka coral
<i>Paraliparis cephalus</i>	swellhead snailfish
<i>Paraliparis dactylosus</i>	red snailfish
<i>Paraliparis paucidens</i>	toothless snailfish
<i>Paraliparis</i> species	snailfish species
<i>Paraliparis</i> species cf. <i>dactylosus</i> (Orr and Baldwin)	snailfish species
<i>Paraliparis</i> species cf. <i>pectoralis</i> (Orr and Baldwin)	rusty snailfish
<i>Paraliparis</i> species cf. <i>ulochir</i> (Orr and Baldwin)	snailfish species
<i>Paraliparis ulochir</i>	blackfaced red snailfish
<i>Paralomis multispina</i>	king crab species
<i>Paralomis</i> species A (Clark 2006)	king crab species
<i>Paralomis verrilli</i>	king crab species
<i>Pasiphaea pacifica</i>	Pacific glass shrimp
<i>Pasiphaea tarda</i>	crimson pasiphaeid
<i>Pedicellaster magister</i>	majestic sea star
<i>Periphylla periphylla</i>	jellyfish species
<i>Petromyzontidae</i>	lamprey species
<i>Phacellophora camtschatica</i>	egg yolk jelly
<i>Phakellia beringensis</i>	hat sponge
<i>Phakellia cribrosa</i>	funnel sponge
<i>Phakellia</i> species	sponge species
<i>Phascolosomatidae</i>	worm species
<i>Placiphorella pacifica</i>	chiton species
<i>Placiphorella</i> species	chiton species
<i>Platytroctidae</i>	tubeshoulder species
<i>Pleurogrammus monopterygius</i>	Atka mackerel
<i>Polyacanthonotus challengerii</i>	spiny eel species
<i>Polychaeta</i>	polychaete worm species
<i>Polychaete</i> tubes	polychaete worm tubes
<i>Polymastia robusta</i>	long nippled sponge
<i>Polymastia</i> species	sponge species
<i>Porifera</i>	sponge species
<i>Poromitra curilensis</i> (= <i>crassiceps</i>)	crested bigscale
<i>Primnoa</i> species	coral species
<i>Pseudarchaster parelii</i>	scarlet sea star
<i>Pseudostichopus mollis</i>	sandy sea cucumber
<i>Psolus</i> species	sea cucumber species
<i>Psolus squamatus</i>	whitescaled sea cucumber
<i>Psychrolutes phrictus</i>	blob sculpin
<i>Pteraster jordani</i>	sea star species
<i>Pteraster marsipi</i>	sea star species
<i>Pteraster militaris</i>	wrinkled star
<i>Pteraster</i> species	sea star species
<i>Pteraster tessellatus</i>	sea star species
<i>Puncturella rothi</i>	gastropod species
<i>Puzanovia rubra</i>	coral eelpout
<i>Pycnogonida</i>	sea spider species

Table 5b. - - Continued.

Species/Taxon	Common name
<i>Pyrulofusus deformis</i>	warped whelk
<i>Pyrulofusus dexius</i>	whelk species
<i>Pyrulofusus melonis</i>	whelk species
<i>Pyrulofusus</i> species eggs	whelk species
<i>Reinhardtius hippoglossoides</i>	Greenland turbot
<i>Rhamphostomella costata</i>	ribbed bryozoan
<i>Rhinoliparis attenuatus</i>	slim snailfish
<i>Rhinoliparis</i> species	snailfish species
<i>Rocinella angusta</i>	isopod species
<i>Rossia pacifica</i>	eastern Pacific bobtail
<i>Rouleina attrita</i>	softskin slickhead
<i>Sasakiopus salebrosus</i>	octopus species
<i>Scabrotrophon scitulus</i>	spiny trophon
<i>Scalpellum cornutum</i>	eared barnacle
<i>Scopelosaurus harryi</i>	scaly paperbone
<i>Scotoplanes</i> species	sea cucumber species
<i>Scyphozoa</i>	jellyfish species
<i>Sebastes aleutianus</i>	rougheye rockfish
<i>Sebastes alutus</i>	Pacific ocean perch
<i>Sebastes babcocki</i>	redbanded rockfish
<i>Sebastes borealis</i>	shortraker rockfish
<i>Sebastes brevispinis</i>	silvergray rockfish
<i>Sebastes melanostictus</i>	blackspotted rockfish
<i>Sebastes pollyspinis</i>	northern rockfish
<i>Sebastes reedi</i>	yellowmouth rockfish
<i>Sebastes</i> species	rockfish species
<i>Sebastes variabilis</i>	dusky rockfish
<i>Sebastolobus alascanus</i>	shortspine thornyhead
<i>Sebastolobus altivelis</i>	longspine thornyhead
<i>Sergestes similis</i>	Pacific sergestid
<i>Serpula</i> species	worm species
<i>Serripes groenlandicus</i>	Greenland cockle
<i>Serripes notabilis</i>	oblique smoothcockle
<i>Sipuncula</i>	peanut worm unid.
<i>Solaster hypothrissus</i>	sea star species
<i>Solaster</i> species	sea star species
<i>Solaster</i> species A (Clark 1997)	sea star species
<i>Solaster</i> species C (Clark)	beautiful sun star
<i>Solaster</i> species E (Clark)	Kessler sun star
<i>Solaster</i> species F (Clark)	Fisher sun star
<i>Somniosus pacificus</i>	Pacific sleeper shark
<i>Spinther</i> species A (Clark 2006)	worm species
<i>Staurocalyptus</i> species	sponge species
<i>Stegophiura ponderosa</i>	brittlestarfish species
<i>Stenobrachius leucopsarus</i>	northern lampfish
<i>Stenobrachius nannochir</i>	garnet lampfish
<i>Stenobrachius</i> species	lampfish species
<i>Stephanasterias albula</i>	sea star species
<i>Stomphia coccinea</i>	swimming anemone
<i>Stomphia</i> species	sea anemone species

Table 5b. - - Continued.

Species/Taxon	Common name
<i>Strongylocentrotus droebachiensis</i>	green sea urchin
<i>Strongylocentrotus pallidus</i>	white sea urchin
<i>Strongylocentrotus</i> species	sea urchin species
<i>Stylatula</i> species	slender seawhips
<i>Suberites ficus</i>	sponge species
<i>Swiftia</i> species	sponge species
<i>Synallactes challengerii</i>	sea cucumber species
<i>Synallactes</i> species	sea cucumber species
<i>Taonius pavo</i>	squid species
<i>Terebratulina unguicula</i>	snakeshead brachiopod
Teuthoidea	squid species
<i>Thaleichthys pacificus</i>	eulachon
<i>Theragra chalcogramma</i>	walleye pollock
Thoracica	barnacle species
<i>Triglops scepticus</i>	spectacled sculpin
<i>Tritonia diomedea</i>	rosy triton
<i>Tritonia</i> species	seaslug species
<i>Urticina crassicornis</i>	mottled anemone
<i>Urticina</i> species	sea anemone species
<i>Vampyroteuthis infernalis</i>	vampire squid
<i>Virgularia</i> species	smoothstem seahip
<i>Volutomitra alaskana</i>	snail species
<i>Weberella bursa</i>	pale mammilated sponge
<i>Zaprora silenus</i>	prowfish
<i>Zesticelus profundorum</i>	flabby sculpin
<i>Zoroaster evermanni</i>	Evermann's seastar
Actiniaria species	purple striated sea anemone
Polychaeta species	worm species
Crinoidea species	crinoid species
Bivalvia shells	empty clam shells
Gastropoda shells	empty snail shells

Table 6. - - All species encountered on the 2010 EBSS survey with depth range and frequency of occurrence. Species are listed in descending order by total catch weight.

Species name	Total weight (kg)	Total number	Min-Max depth encountered (m)	Mean depth encountered (m)	Frequency of occurrence (hauls)
<i>Albatrossia pectoralis</i>	137,010.71	39,057	296-1149	620	141
<i>Sebastes alutus</i>	45,990.34	55,001	207-580	348	86
<i>Atheresthes stomias</i>	15,894.82	14,608	201-735	398	134
<i>Coryphaenoides cinereus</i>	11,664.71	66,084	449-1149	733	88
<i>Sebastolobus alascanus</i>	8,416.37	12,897	206-1149	568	132
<i>Bothrocara zestum</i>	7,900.03	11,252	398-1149	597	75
<i>Atheresthes evermanni</i>	7,225.01	5,578	202-1149	492	169
<i>Reinhardtius hippoglossoides</i>	5,040.14	1,477	206-1149	547	139
<i>Hippoglossoides elassodon</i>	4,761.21	11,292	201-567	357	103
<i>Bathyraja aleutica</i>	4,511.84	1,485	202-1149	524	156
<i>Pannychia moseleyi</i>	3,322.12	40,103	220-1132	614	76
<i>Glyptocephalus zachirus</i>	2,616.81	3,946	202-637	363	95
<i>Anoplopoma fimbria</i>	2,336.96	697	398-1059	634	96
<i>Theragra chalcogramma</i>	1,783.62	1,271	202-510	305	56
<i>Gadus macrocephalus</i>	1,407.96	538	201-420	256	40
<i>Hippoglossus stenolepis</i>	1,238.44	193	201-616	380	57
<i>Ophiacantha normani</i>	1,194.12	1,287,848	403-1149	656	51
<i>Bathyraja maculata</i>	1,093.46	393	214-1059	451	64
<i>Aphrocallistes vastus</i>	1,025.32	4	202-965	520	60
<i>Sebastes borealis</i>	951.52	301	225-737	430	37
<i>Bathyraja lindbergi</i>	840.20	396	215-1149	648	73
<i>Ceramaster japonicus</i>	814.93	8,317	208-1116	505	127
<i>Paractinostola faeculenta</i>	797.22	2,810	206-1132	591	38
<i>Coryphaenoides acrolepis</i>	743.12	2,406	629-1149	935	29
<i>Hemitripterus bolini</i>	738.63	186	202-629	373	67
<i>Liponema brevicornis</i>	673.28	6,395	201-1149	451	132
<i>Brisaster latifrons</i>	671.24	35,976	206-1116	457	28
<i>Bathyraja interrupta</i>	644.19	521	201-1065	403	93
<i>Lithodes aequispinus</i>	616.21	789	202-1059	448	90
<i>Lycodes concolor</i>	589.00	664	398-1149	584	53
<i>Hexactinellida</i>	498.22	1	202-901	548	11
<i>Berryteuthis magister</i>	488.21	1,802	202-1149	466	141
<i>Bathyraja minispinosa</i>	486.79	305	214-1149	581	98
<i>Chionoecetes angulatus</i>	475.98	5,058	247-1149	694	77
<i>Psychrolutes phrictus</i>	402.04	129	747-1149	966	20
<i>Dipsacaster borealis</i>	347.24	1,834	206-1065	434	72
<i>Chionoecetes tanneri</i>	334.68	1,396	279-1149	650	85
<i>Crossaster borealis</i>	332.93	2,827	202-1149	506	154
<i>Bathyraja trachura</i>	315.78	154	597-1149	864	36
crinoid unidentified	290.32	18,691	565-1009	752	5
<i>Neptunea</i> sp.	251.62	2,419	201-1116	527	89
<i>Bothrocara brunneum</i>	229.81	415	425-1116	684	43
<i>Somniosus pacificus</i>	227.41	22	220-965	505	19
<i>Chionoecetes bairdi</i>	221.98	1,451	201-737	326	56
<i>Bathyraja parmiifera</i>	220.19	35	206-416	271	15
<i>Porifera</i>	212.59	2	202-1149	448	85
<i>Gorgonocephalus eucnemis</i>	209.68	1,472	214-965	412	16
<i>Malacobottus zonurus</i>	199.64	1,994	202-1058	402	108
<i>Nearctaster variabilis</i>	198.54	5,847	336-1149	666	75
Polychaete tubes	196.57	2,770	909-1116	1011	3

Table 6. - - Continued.

Species name	Total weight (kg)	Total number	Min-Max depth caught (m)	Mean bottom depth (m)	Frequency of ocurrence (hauls)
<i>Zaprora silenus</i>	193.33	55	215-253	227	7
<i>Pandalus eous</i>	181.20	30,587	201-425	273	56
<i>Embassichthys bathybius</i>	152.92	139	616-901	721	18
<i>Sebastes melanostictus</i>	143.76	182	215-512	344	28
<i>Asteronyx loveni</i>	135.38	4,014	214-511	343	24
<i>Bathyraja taranetzi</i>	127.49	138	202-965	437	40
<i>Lithodes couesi</i>	124.67	182	510-1149	762	32
<i>Microstomus pacificus</i>	118.92	109	202-580	387	36
<i>Careproctus melanurus</i>	117.16	273	296-1065	675	59
<i>Careproctus furcellus</i>	97.12	269	206-1065	531	49
<i>Virgularia</i> sp.	95.73	10,783	220-847	460	9
<i>Pagurus cornutus</i>	84.78	1,991	206-637	408	53
<i>Actinostolidae</i>	84.45	2,540	201-1035	420	55
<i>Aulosaccus schulzei</i>	77.98	9	296-738	530	7

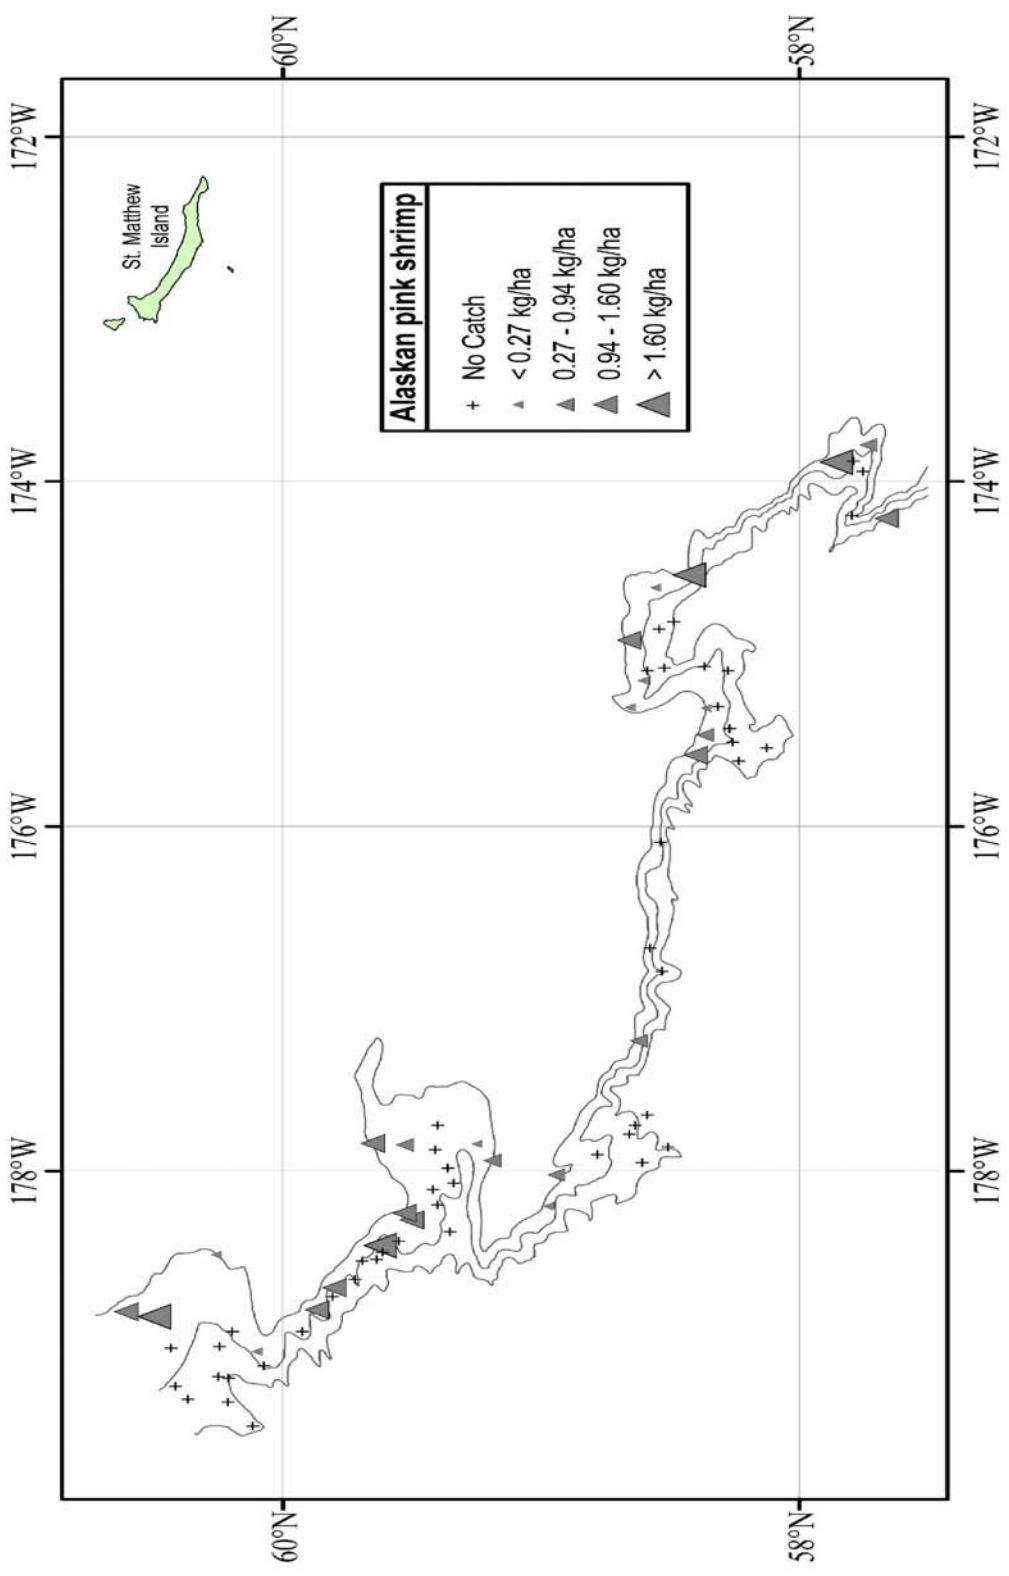

Figure 88. - Distribution and relative abundance of Alaskan pink shrimp from the 2010 EBSS survey. Relative abundance is categorized by no catch, sample CPUE less than the mean CPUE, between the mean CPUE and one standard deviation above the mean, between one and two standard deviations above the mean CPUE, and greater than two standard deviations above the mean CPUE.

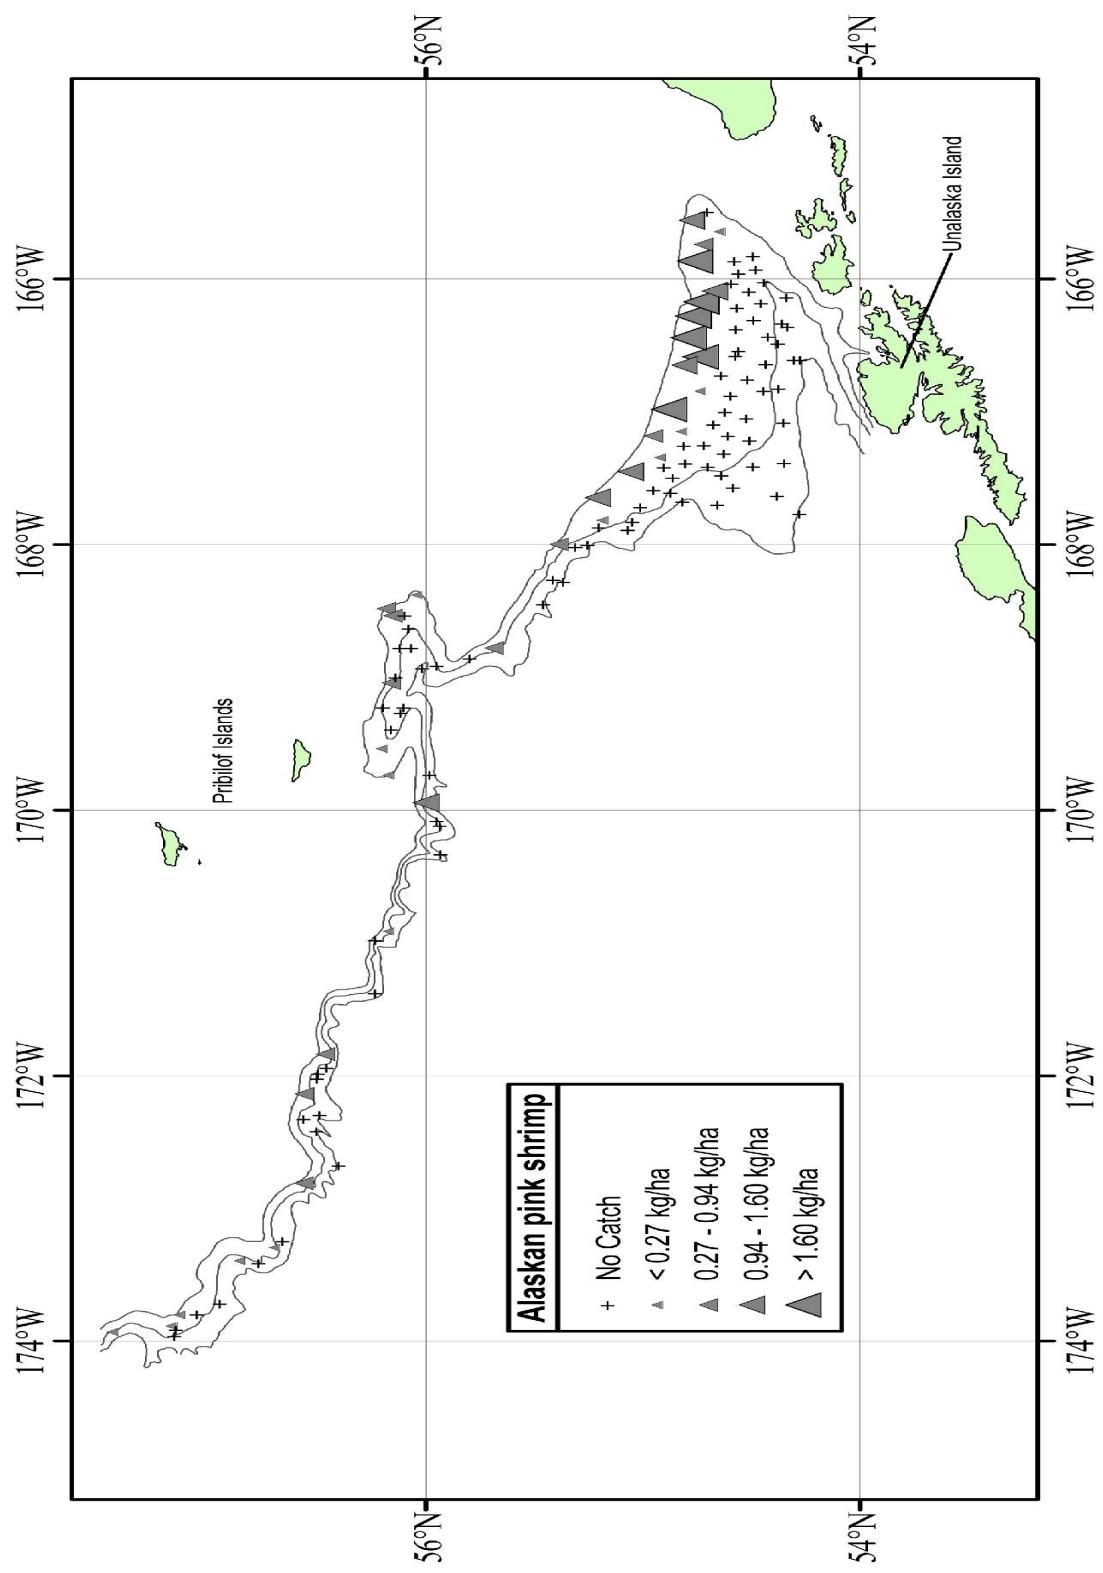

Figure 88. - Continued.

ACKNOWLEDGMENTS

We would like to sincerely thank all the scientific survey participants for all their hard work during the 2010 EBSS survey. Thanks also go to the skipper and crew of the F/V *Vesteraalen*. Their cooperation and knowledge was greatly appreciated.

APPENDICES

Haul Log

The haul log details the location, depth, time, temperature and net mensuration parameters of each haul conducted during the 2010 EBSS survey as well as each haul's catch by weight (kg) with a breakdown of the species composition and the individual species weight or a grouped weight for less abundant species. Appendix A describes the trawl warp/bottom depth ratio used for each trawl. Appendix B lists the number of hauls completed by trawl performance code during the survey. Zero and positive performance codes are considered successful tows and were used for the standard abundance estimates and negative performance tows were not included in the estimates of abundance. Appendix C is the detailed haul log for every haul completed with data during the survey. For quick reference, the unsuccessful tows not used for abundance estimates are shaded in gray.

Appendix A. -- Scope ratio table used during
the 2010 EBSS survey.

Bottom Depth		Warp Length	
Minimum (m)	Maximum (m)	Meters	Fathoms
146	176	550	301

Appendix B. - - Performance codes assigned to trawl hauls conducted on the 2010 EBSS survey. Performance codes zero or greater are considered successful hauls, and codes less than zero are unsuccessful hauls.

Performance Code	Description	Number of Hauls
6.24	Satisfactory performance, scope changed during tow	1
6	Satisfactory performance, unspecified problem	1
5.8	Satisfactory performance, light footrope contact	1
5.2	Satisfactory performance, net improperly configured, unspecified reason	1
5	Satisfactory performance, unspecified gear performance problem	4
4.4	Satisfactory performance, large fish catch affected net performance	5
4.2	Satisfactory performance, caught large quantity of mud	1
4.1	Satisfactory performance, caught large rock	4
4	Satisfactory performance, caught unspecified object	3
3.2	Satisfactory performance, caught longline gear	1
3.11	Satisfactory performance, caught sabelfish pot	1
2.4	Satisfactory performance, belly damage	1
2.1	Satisfactory performance, wing damage	2
1.2	Satisfactory performance, major hang, stopped forward progress of vessel	1
1.12	Satisfactory performance, hauled back early due to hang(s)	1
1.1	Satisfactory peformance, minor hang(s)	3
0	Good performance	169
-2.4	Unsatisfactory performance, belly damamage	4
-6	Unsatisfactory performance, unspecified problem	5
