On the 3rd at 11.55 a. The barometer has fallen moderately on the E. coast of China and in Formosa. The anticyclone is still central over N. China, and pressure seems to be relatively low in the neighbourhood of the Loochoos. Gradients continue rather steep, with very strong monsoon on the coast and in the N. part of the China Sea Forecast:—strong to fresh N winds; dull, rainy.

On the 6th at 11.55 a. The barometer has fallen considerably in Formosa and on the E. coast of China. The anticyclone still lies over China, and a low area probably exists in the neighbourhood of the Loochoos. Gradients continue rather steep, with very strong monsoon on the coast and in the N. part of the China Sea. Forecast:—fresh N winds; fair.

On the 18th at 11.55 a. The barometer has fallen moderately on the E. coast of China, risen slightly on the S. coast. The high pressure area is probably now central over Japan. Gradients slight on the coast, moderate with strong monsoon in the N. part of the China Sea. Forecast:—moderate or light NE to E winds; fine.

On the 24th at 11.45 a. The barometer has risen rapidly on the China coast, particularly in the North; fallen in E. Japan. A high pressure area is central over N. China, and pressure is relatively low to the E of Japan. Gradient rather steep generally, with very strong monsoon on the coast and in the N. part of the China Sea. Forecast:—strong NE winds; cloudy, misty.

On the 28th at 11.55 a The barometer has fallen considerably in the North, owing to a depression which has passed near Shanghai and is now moving eastwards towards W. Japan. Pressure appears to be again high over Central China, and gradients are rather steep with the monsoon freshening quickly over the entire coast. Forecast:—fresh N winds; some drizzling rain, colder.

On the 28th at 11.55 a The barometer has fallen considerably in the North, owing to a depression which has passed near Shanghai and is now moving eastwards towards W. Japan. Pressure appears to be again high over Central China, and gradients are rather steep with the monsoon freshening quickly over the entire coast. Forecast:—fresh N winds; some drizzling rain, colder.

On the 6th at 11.55 a. The barometer has risen in the North, particularly over Japan. The anticyclone covers the whole of the China coast and the grater part of Japan, the centre probably lying over Shantung. Gradients moderate on the E. coast of China, steep with very strong monsoon in S. China and the N. part of the China Sea. Forecast:—strong NE winds; fair.

On the 17th at 11.55 a. The barometer has fallen in the Sea of Japan, and remains almost steady on the China coast. A depression which was lying W. of the Loochoos yesterday, has probably moved NE and reached SW Japan this morning. Pressure is highest over N. China. Gradients moderate with fresh to strong monsoon on the coast and in the N. part of the China Sea. Forecast:—fresh NE winds; fair.

F. G. FIGG,
Acting Director.

On the 21st at 11.55 a. The barometer continues falling slowly on the China coast. The depression seems to be still situated in the Sea of Japan. Pressure is highest over N. China. Gradients slight with moderate monsoon on the coast, and in the N. part of the China Sea. Forecast:—moderate NE winds; fine.

F. G. FIGG,
Acting Director.

On the 24th at 11.55 a. The barometer continues to fall on the China coast owing to a depression which seems to be moving Eastwards over N. China. Pressure is highest in Japan. Conditions light with moderate to light monsoon in S. China and the N. part of the China Sea. Fresh [illegible] or light E winds; cloudy, probably some rain.

F. G. FIGG,
Acting Director.

On the 2nd at 11.55 a. The barometer has risen on the China coast, except in the South; fallen in the Sea of Japan. The depression is moving NE in the Sea of Japan. Pressure is high over the NE coast of China, and relatively low on the S. coast. Gradients steep in the Formosa Channel and along the S. coast of China, with very strong monsoon. Forecast:—strong NE winds; some drizzling rain

On the 3rd at 11.55 a. The barometer has risen in the Sea of Japan, fallen quickly on the China coast. The depression lying in the Sea of Japan yesterday, is probably moving away over E. Japan. Another depression seems to be developing between the E coast of China and the Loochoos. Gradients slight with light variable winds in S. China and the N. part of the China Sea. Forecast:—moderate or light E and varying winds; unsettled, some rain.

On the 13th at 11.55 a. The barometer has fallen very rapidly on the E. coast of China, owing to a depression which seems to be moving eastwards in Shantung. Gradients slight, except in the North, with the monsoon temporarily interrupted on the whole of the China coast. Forecast:—varying winds, light; fair.

F. G. FIGG,
Acting Director.

On the 14th at 11.55 a. The barometer has risen on the E. coast of China, fallen on the S. coast. The depression is moving away from the E. coast of China and approaching W. Japan. The monsoon will probably freshen again in the Formosa Channel and on the S. coast. Forecast:—NE winds, freshening; changeable, some rain.

On the 18th at 11.55 a. The barometer has risen slightly on the China coast, fallen in the extreme North. Pressure is high over N. China, and a depression seems to be situated in the Sea of Japan. Gradients moderate with strong monsoon on the China coast and in the N. part of the China Sea. Forecast: fresh N to NE winds; dull, some rain.

F. G. FIGG,
Acting Director.

On the 24th at 11.55 a. The barometer has fallen on the China coast. The depression has left the E. coast of China, and is now moving towards the Sea of Japan. Gradients slight, except in the North. The monsoon will probably re-appear in the Formosa Channel by tomorrow. Forecast:—varying winds, moderate; unsettled, equally; probably some thunder showers.

F. G. FIGG,
Acting Director.

On the 28th at 11.55 a. The barometer has risen in Japan, and is inclined to fall over China. The pressure area still lies over China, and a low area seems to be situated in the N. part of the Sea of Japan. Gradients slight to moderate, with strong monsoon on the coasts of S. China and in the N. part of China Sea. Forecast:—moderate NE winds; fine.

F. G. FIGG,
Acting Director.

On the 4th at 11.55 a. The barometer is rising in Japan, and inclined to fall on the China coast. The depression seems to be moving NE in the N. part of the Sea of Japan. Pressure is highest in the neighbourhood of the Loochoos. Gradients slight for E winds in S. China. Forecast:—light or moderate E winds; fair at first, probably some rain later.

F. G. FIGG,
Acting Director.

On the 10th at 11.55 a. The barometer has risen in Japan, and is inclined to fall on the China coast. The high pressure area has moved eastwards, and is now central over W. Japan and the Loochoos. Gradients slight to moderate for E and S winds on the China coast. Forecast:—fresh to moderate E winds; fair.

On the 11th at 11.55 a. The barometer is falling on the China coast, probably owing to the formation of a depression in N. China. Pressure remains high over W. Japan and the Loochoos. Gradients slight for SE and E winds on the China coast. Forecast:—moderate E to SE winds; some drizzling rain or mist.

On the 7th at 11.55 a. The barometer has risen slightly on the China coast and over Formosa. Pressure appears to be highest between the E. coast of China and W. Japan. The low area probably lies to the [illegible] of Japan, and pressure seems to be in defect also, over the W. part of the China Sea. Gradients slight [illegible] SE and E winds on the China coast. Forecast:—moderate E winds; fine.

On the 16th at 11.55 a. The barometer has risen considerably in the North, and is little changed elsewhere. The low pressure trough, in some part of which a circular depression may form, lies now across the China Sea, probably in about 20° lat. High pressure covers NE China. Gradients rather steep generally, with strong NE winds on the China coast and strong SW winds over the middle part of the China Sea. Forecast:—strong NE winds; squally, rainy.

On the 20th at 11.55 a. The barometer has risen in S. China, Formosa and the Phillipines. Pressure is high generally in China and Japan, and highest in the latter area. The low pressure trough lies now only over the middle and Western part of the China Sea, probably in about 19° Lat. Gradients slight for NE and E winds in S. China, rather steep with strong NE winds in the N. part of the China Sea. Strong SW winds in the South of the China Sea. Forecast:—moderate NE winds; fine.

F. G. FIGG,
Acting Director.

On the 14th at 11.30 a. Red Drum hoisted. The barometer continues to fall in S. China and Formosa. The typhoon seems to be now situated near N. Luzon and to be moving WNW at present. Increasing winds from NE in the Formosa Channel, and from N in the NE part of the China Sea.

Forecast:—N winds, probably freshening; unsettled, some rain.

Cebu, E. E. Cable Co., reports:—"4.14 a.m strong earthquake duration about a minute."

On the 16th at 11.55 a. The barometer has risen slightly in the Phillipines, fallen a little in S. China. The depression in the China Sea to the SE of Hongkong, appears to be of moderate intensity, and its advance is delayed owing to the existence of another depression in the Pacific to the S. or SE of the Loochoos. *Forecast:*—fresh NE winds; squally, some rain.

On the 17th at 11.0 a. Black Drum hoisted. At 11.30 a. The barometer has fallen moderately on the China coast, and is little changed in the Phillipines. The depression is of great extent and the position of the central area ill-defined, but probably it is situated near S. Formosa and has a slow motion towards NW. Bad weather in the Formosa Channel and NE part of the China Sea.

Forecast:—NW winds, fresh; squally.

On the 18th at 12.5 p. The barometer has fallen moderately in S. China and Formosa, and slightly in the Phillipines. The depression covers a very large area, extending from the N. part of the China Sea to the S. coast of Japan Probably it has two centres one to the E of the Loochoos. and the other, almost stationary, to the SW of Formosa. Forecast:—NW winds, fresh; unsettled. squally.

F. G. FIGG,
Acting Director.

On the 19th at 11.55 a. The barometer shows a slight fall on the S. coast of China and in Formosa since yesterday. The China Sea depression seems to be central to the South of Swatow. Its motion is slow and direction uncertain. The Japanese observations of yesterday afternoon show that the Pacific depression was then situated to the E of the Loochoos and moving Northwards.

Forecast:—fresh NW winds, possibly increasing; unsettled, squally.

F. G. FIGG,
Acting Director.

On the 20th at 6.45 a. Gun fired. Black South Cone hoisted. The typhoon seems to be situated about 150 miles to the SE of Hongkong, and moving slowly W or WNW. A heavy NE veering to SE gale may be expected in the Colony. At 11.0 a The Northern typhoon was moving NNE across W. Japan yesterday afternoon. Note:—The maximum shade temperature registered at the Hongkong Observatory yesterday was 97°, or 3° in excess of any record obtained at the Observatory since its inauguration in 1884.

F. G. FIGG,
Acting Director.

On the 21st at 11.45 a. The barometer is rising very slowly in the neighbourhood of Hongkong. The centre of the typhoon is probably situated to the SSW of Hongkong in about 20° Lat. It appears to be moving slowly WNW, and will probably enter the coast between Macao and Hainan Straits

Forecast:—E to SE gale, slowly decreasing; rainsqualls.

On the 22nd at 6.20 a. Black Ball hoisted. At 10.15 a. Black Ball lowered.

At 11.55 a. The barometer has risen decidedly in Hongkong, and remains almost steady on the coast to the Northward. The typhoon is probably approaching the neighbourhood of Hainan Straits, and moving WNW. Pressure is highest over Japan, and conditions favour the formation of another depression in the Pacific to the S of the Loochoos in about 20° Lat, where pressure is, apparently, still in defect.

Forecast:—SE and E winds, fresh; squally, showery.

F. G. FIGG,
Acting Director.

On the 24th at 12.5 p The barometer has risen slightly in S. China. The center of the Pacific depression passed over the Loochoos yesterday afternoon, moving, apparently, towards NNW. The recent typhoon in the China Sea moved across the N. part of the Gulf of Tongking, the center passing near Haiphong yesterday. Gradients slight for SW in S. China and the N. part of the Chiha Sea.

Forecast:—SW or varying winds, light; fair.

F. G. FIGG,
Acting Director.

On the 26th at 11.55 a. The barometer has risen on the E coast of China, fallen in Luzon. Pressure is high in N. China, and probably a trough-like area of low pressure, in some part of which a depression may be forming, lies across the China Sea and also over the Pacific in about 18° Lat.. Gradients slight to moderate for NE winds on the China coast, and for SW winds in the middle part of the China Sea.

Forecast:—moderate or fresh NE winds; fine.

On the 28th at 12.5 p. The barometer has risen generally, except in the neighbourhood of Hong-g and S. Formosa. The depression in the North appears to have entered the coast to the N. of Foochow rday, moving NNW. Pressure remains low in the N. part of the China Sea, with indications of the ation of a depression, probably to the SW of Formosa. Pressure is high over the Pacific.

ast:—N to NE winds, moderate; fair.

On the 29th at 12.5 p. The barometer has risen generally, particularly over Formosa and the S and SE coasts of China. Probably a shallow depression, moving Northwards, entered the coast near Swatow last night. Pressure is high over the Pacific and normal, or slightly in excess on the China coast. Gradients slight to moderate for SE winds on the China coast. Forecast:—moderate SW to SE winds; probably some thunder showers.

Iloilo reports:—" Very strong earthquake at 3.9 a. this morning."

F. G. FIGG,
Acting Director.

On the 10th at 4.15p. Gun fired. Probably the wind will reach the force of a strong gale from East. On the 11th at 11.30 a. Black Ball hoisted. The barometer has commenced to rise in Hong Kong. The typhoon is probably situated to the SW of Hong Kong in about 20° to 21° Lat., and is apparently moving towards the coast between St John's island and Hainan Straits. Forecast:—The gale, from E to SE, is not likely to decrease to any great extent for some hours.

On the 16th at 12.29 p. The barometer has fallen slightly on the S. coast of China, risen considerably in N. Formosa. The typhoon seems to have reached the coast near Foochow early this morning. It is probably filling up. Pressure is high over N. China. Gradients continue steep with bad weather over the E. coast of China and Formosa Channel. Forecast:—fresh or strong NW winds; fair, squally.

F. G. FIGG,
Acting Director.

On the 24th at 11.45 a. The barometer is falling over S China and the Phillipines, particularly in the latter area. A depression seems to be lying in the Pacific, probably to the SE of Luzon. Pressure is highest over the interior of China. Gradients slight with moderate monsoon on the coast, moderate with increasing NE winds in the N. part of the China Sea. Forecast:—moderate NE winds; fine.

On the 28th at 11.55 a. The barometer continues to rise on the China coast. Pressure is high over N. China, and relatively low in a troughlike area, between NE and SW winds, lying over the middle part of the China Sea. Gradients moderate to rather steep with strong NE winds on the coast, and in the N. part of the China Sea. Forecast:—fresh or strong NE winds; showery.

F. G. FIGG,
Acting Director.

On the 30th at 11.50 a. The barometer has risen slightly in S. China, fallen a little in the Phillipines. A depression probably lies to the East of the Southern Phillipines, and pressure remains high over N. China. Gradients continue moderate to rather steep, with strong monsoon on the coast and heavy monsoon in the N. part of the China Sea. Forecast:—fresh NE winds; fine.

On the 1st at 11.55 a. The barometer has fallen slightly on the China coast. The shallow depression in the South, probably lies to the N. of Palawan. The high pressure area in the North is apparently spreading eastwards over Japan. Gradients slight in the North, moderate with very strong monsoon off the coast of S. China and in the N. part of the China Sea. Forecast:—fresh NE winds; fine.

On the 9th at 11.55 a. The barometer has fallen at Sharp Peak, probably owing to the advance of a depression over the E coast of China from the Westward. The monsoon is temporarily interrupted in the North. The China Sea depression has probably entered Annam. Fresh monsoon in the N. part of the China Sea. Forecast:—moderate E and SE winds; showery.

On the 16th at 11.55 a. The barometer has risen slightly in S. China and the Phillipines. The depression, probably situated to the SSE of the Paracels, continues moving Westwards. A high pressure area appears to be central over N. China. Very strong monsoon along the China coast and in the N. part of the China Sea. Forecast:—strong NE winds; fine.

F. G. FIGG,
Acting Director.

On the 22nd at 11.55 a. The barometer has risen quickly in S. China. The depression is probably filling up in Formosa. Another depression was crossing the Sea of Japan yesterday. An area of high pressure lies over China. Strong monsoon on the coast and in the N. part of the China Sea.

Forecast:—fresh or moderate N. winds; fine.

F. G. FIGG,
Acting Director.

On the 29th at 11.55 a. The barometer has fallen moderately on the E. coast of China, probably owing to the existence of a depression over NE China. Gradients gentle with the monsoon temporarily interrupted, on the coast, slight with moderate monsoon in the N. part of the China Sea.

Forecast:—NE to N winds, light or moderate; fine.

On the 1st at 11.45 a. The barometer has risen on the China coast, very rapidly in the North; fallen quickly in Luzon. An area of high pressure covers China, its centre probably lying over Mongolia. The typhoon in the South seems to be approaching the neighbourhood of Manila from the Eastward, and moving apparently towards WNW. Gradients steep generally, with heavy monsoon along the whole of the China coast and in the N. part of the China Sea. Very bad weather over the E. part of the latter area. Forecast:—strong N and NE winds; fair, squally.

On the 2nd at 11.55 a. The barometer has risen considerably in Luzon, fallen slightly on the S. coast of China. The high pressure area remains central, apparently, over N. China. The typhoon seems to be situated to the SW of Luzon, and probably moving Westwards. Gradients continue steep with heavy monsoon off the coasts of S. China and over the N. part of the China Sea.

Forecast:—strong N to NE winds; fair.

On the 3rd at 11.55 a. The barometer has fallen slightly in S. China, risen moderately in Luzon. The high pressure area still lies over China, and the typhoon in the South is probably situated to the SSE. of the Paracels in about 13° Lat.. It apparently continues moving Westwards. Strong monsoon along the coasts of S. China, and heavy weather in the W. part of the China Sea.

Forecast:—strong NE winds; fair.

F. G. FIGG,
Acting Director.

On the 5th at 11.45 a. The barometer continues falling on the E. coast of China, and a quick fall has also occurred in the Phillipines. Pressure is low over NE China, and another depression has appeared in the Pacific to the E. of the S. Phillipines. Gradients gentle on the China coast. Moderate monsoon in the N W. part of the China Sea, increasing monsoon in the NE part.

Forecast:—E to N winds, moderate; fine.

On the 8th at 11.45 a. Red South Cone hoisted. The barometer has risen slightly on the E. coast of China and in the Phillipines, fallen moderately on the S. coast of China and in Formosa. Probably the typhoon is situated to the ESE of the Paracels, and moving NW. at present. Pressure is highest over the China. Gradients rather steep with very strong monsoon on the China coast, and bad weather over the N. part of the China Sea. Forecast:—strong N to NE winds; squally, probably some rain.

Telegraphic communication between the Observatory and Hongkong is interrupted.

On the 9th at 11.50 a. Black South Cone hoisted. The barometer has fallen slightly in Hongkong, risen a little on the E. coast of China and in Luzon. The typhoon is probably situated to the NE of the Paracels, and it, apparently, continues moving slowly towards NW. Bad weather in the N. part of the China Sea. Forecast:—NE and E winds, strong, probably a gale; squally, wet.

Telegraphic communication between the Observatory and Hongkong continues interrupted.

F. G. FIGG,
Acting Director.

On the 12th at 12.5p. The barometer has risen rapidly on the China coast. An anticyclone, with its centre over Mid China, covers the whole of the China coast, and pressure continues relatively low in the Pacific to the E. of Luzon. A depression was moving Eastwards in the Sea of Japan yesterday. Gradients steep generally with heavy monsoon on the coast, and in the N. part of the China Sea.

Forecast:—*strong or fresh N winds; fair.*

Telegraphic communication between the Observatory and Hongkong continues interrupted.

On the 15th at 11.55 a. The barometer has risen slightly on the China coast, fallen moderately in the Phillipines. A depression lies in the Pacific to the E. of S. Luzon, and pressure is high over Central China. Gradients moderate to rather steep with strong monsoon on the coast, and NE gales in the NE part of the China Sea. Forecast:—fresh N winds; fair.

Telegraphic communication between the Observatory and Hongkong re-established at 10.30 this morning.

F. G. FIGG,
Acting Director.

On the 16th at 11.55 a. The barometer has risen slightly on the China coast, fallen in S. Formosa. An anticyclone lies over Central China, and the depression, probably now lying to the NE of Luzon, appears to be moving Northwards. N and NE gales along the whole of the China coast, and in the N. part of the China Sea. Forecast:—strong N winds; fine.

On the 17th at 11.55 a. The barometer has risen moderately in Formosa and Luzon, fallen decidedly on the E. coast of China. The high pressure area remains central over China, and the depression has probably passed E of the Loochoos, moving N or NE towards the S. coast of Japan. Weather moderating on the China coast, but monsoon gales probably continue in the N. part of the China Sea.

Forecast:—fresh or moderate N winds; fine.

On the 21st at 11.45 a. The barometer has risen considerably in the North, and slightly in the South. The depression has probably passed to the East of Japan, and pressure is again high over N. China. Gradients moderate with strong monsoon on the coast, and increasing monsoon in the N. part of the China Sea. Forecast:—fresh or strong NE winds; showery.

F. G. FIGG,
Acting Director.

On the 2nd at 11.55 a. The barometer has fallen slightly in S. China. Pressure is highest, apparently, over NE China, and still relatively low in the neighbourhood of the Philippines. Fresh monsoon on the coast, strong monsoon in the N. part of the China Sea. Forecast:—moderate to fresh NE winds; fine.

F. G. FIGG,
Acting Director.

On the 3rd at 11.55 a. The barometer has fallen generally, particularly over Formosa and the SE coast of China. A shallow area of low pressure probably lies over the SE part of the China Sea, and a second low area seems to be situated between Formosa and the Loochoos. High pressure over N. China. Strong monsoon on the coast, and in the N. part of the China Sea. Forecast:—fresh or strong N winds; fine.

On the 4th at 11.55 a. Barometric changes are slight. The depression lying in the Pacific to the E of Formosa yesterday, is probably moving to the NE. The shallow depression in the China Sea seems to be lying in the neighbourhood of Palawan. Pressure is highest over NE China. Strong monsoon on the coast, and in the N. part of the China Sea. Forecast:—fresh NE winds; fine.

On the 5th at 11.55 a. The barometer has fallen slightly in the North, risen a little in the South. Pressure is highest between the NE coast of China and the Sea of Japan, and the shallow area of low pressure in the China Sea, seems to be lying between Palawan and the Annam coast. Moderate monsoon on the coast, strong monsoon in the N. part of the China Sea. Forecast:—fresh or moderate NE winds; fair.

On the 28th at 12.5p. The barometer has fallen on the China coast, owing to the depression which now seems to be moving Eastwards between the E. coast of China and W. Japan. The monsoon will probably freshen on the coast, and in the N. part of the China Sea. Forecast:—N winds, moderate or fresh; fair.
