RE: Draft Site Cleanup Report for Southwest Point LORAN Station Battery Debris Site
(Non-TPA Site) Pribilof Islands Restoration St. Paul Island April 24, 2001

Dear Mr. Lindsay:

The Alaska Department of Environmental Conservation (ADEC) has received the above document on May 7, 2001. Below are ADEC's comments.

Section 7.0 Conclusions and Recommendations Page 9

Based on a review of the data presented in the report, ADEC concurs that no additional remedial action is required for the NON-TPA Site *Former Southwest Point LORAN Battery Debris Site*. This no further remedial action determination is only for the *Former Southwest Point LORAN Battery Debris Site*. However, if in the future, additional contamination is discovered at this site, further investigation and/or remedial actions will be requested of NOAA by ADEC. ADEC reserves its rights, under 18 AAC 75 Oil and Other Hazardous Substances Pollution Control regulations and AS 46.03 to require NOAA to conduct additional assessment and/or corrective actions, if information indicates the site conditions pose an unacceptable risk to human health, safety, or welfare, or to the environment.

If you have any questions regarding this letter, please don't hesitate to call me at (907) 269-7552.

Sincerely,

Louis Howard
Project Manager
