Somewhat drier air is expected to spread eastwards over the western parts of the Cape Province and it will be fine over these areas. The air over the remainder of the interior is fairly humid and further isolated thundershowers will occur.

Tetwat droer lug word verwag om oosweerts uit te brei oor die westelike dele van die kaapprovinsie en dit sal mooiweer wees oor die dele. Die lug oor die res van die binneland is redelik vogtig en verdere los donderbuie sal uitsak oor meeste dele.

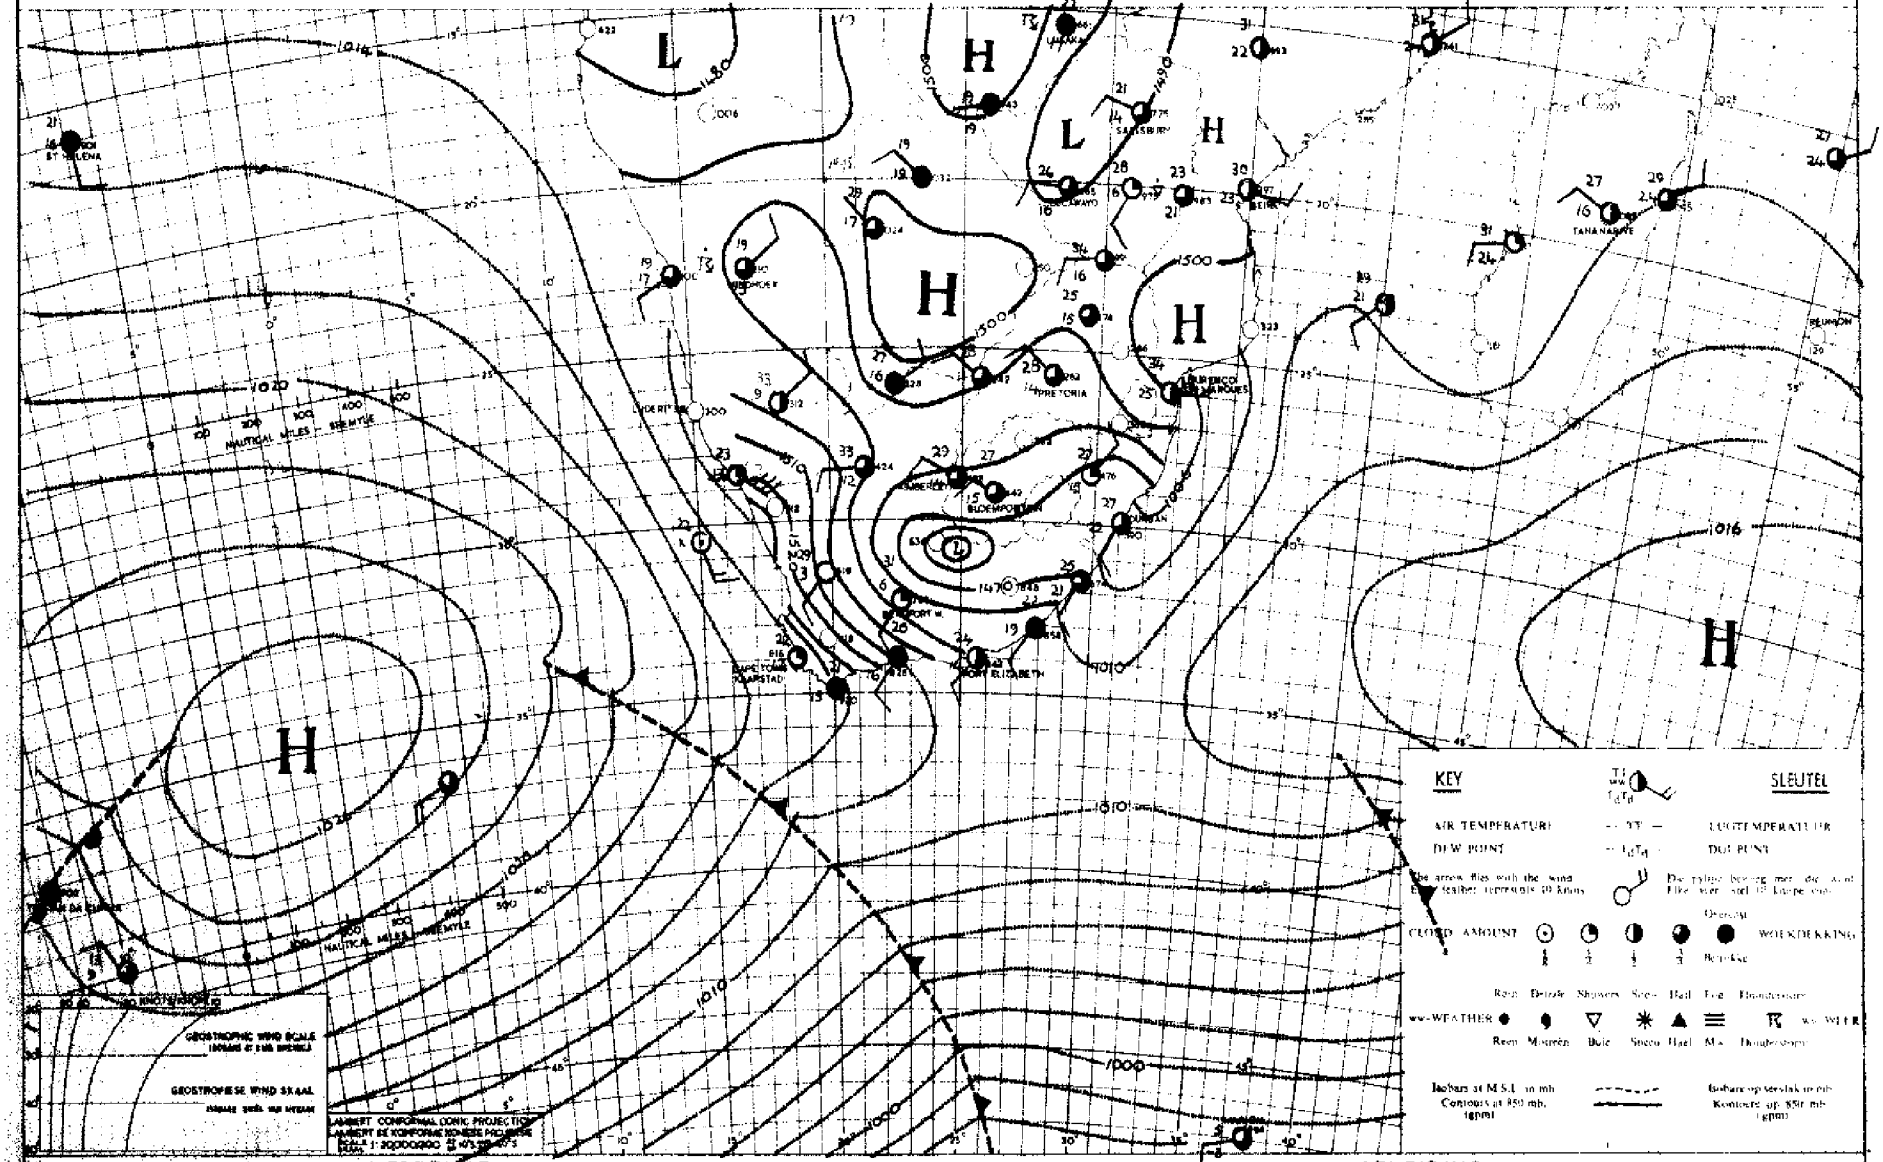
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 1 - 1 - 1959 DATUM AFLEIDING

The low over the Cape Province has deepened and it is expected that drier air will also spread over the greater part of the Cape Province and the southern parts of the Free State, Northern-Cape and South-West-Africa. It will be partly cloudy over the remainder of the area and thundershowers will occur.

Die laag oor die Kaapprovinsie het verdiep en na verwagting sal droër lug ook uitbrei oor die grootste gedeelte van die Kaapprovinsie asook oor die suidelike dele van die Vrystaat, Noord Kaapland en Suidwes-Afrika. Dit sal gedeeltelik bewolk wees oor die res van die gebied en verspreide donderbuie sal voorkom

INFERENCE

DATE 2 — 1 — 1959

AFLEIDING

Cooler, cloudy conditions will spread over Natal and Transvaal but dry air is spreading over the remainder of the Union, southern Bechuanaland and southern South-West Africa. Thundershowers will recur however over the northern parts of Bechuanaland and South-West Africa.

Koeler bewolkte toestande sal uitbrei oor Natal en Transvaal maar droër lug beweeg oor die res van die Unie, suidelike Betsjoeanaland en suidelike Suidwes-Afrika. Donderbuie sal egter weer voorkom oor die noordelike dele van Betsjoeanaland en Suidwes Afrika.

The arrow flies with the wind. Each feather represents 10 knots. — Die pyltjie beweeg met die wind. Elke veer stel 10 knope voor.

CLOUD AMOUNT — Overcast — WOLKDEKKING — Bewolkte

ww-WEATHER — Rain, Reen; Drizzle, Motreën; Showers, Buie; Snow, Sneeu; Hail, Hael; Fog, Mis; Thunderstorm, Donderstorm — ww-WEER

Isobars at M.S.L. in mb. — Isobare op seevlak in mb.
Contours at 850 mb. (gpm) — Kontoere op 850 mb. (gpm)

INFERENCE — DATE 3 - 1 - 1959 DATUM — AFLEIDING

Warm, humid air will start spreading southwards again over South West Africa, Bechuanaland and the eastern and central Union and thundershowers will again develop. The approaching cold front will bring cool, cloudy conditions to the southern and south-western Cape coastal regions.

Warm vogtige lug sal weer suidwaarts beweeg oor Suidwes Afrika, Betsjoeanaland en die oostelike en sentrale Unie en donderbuie sal weer begin voorkom. Die naderende koufront sal koel bewolkte weer aanbring oor die suidwestelike en suidelike Kaapse kusstreke.

The low over the interior is apparently filling and it will clear partially over the Free State, Northern Cape, Natal and south western half of Transvaal, but further rain will fall over the north eastern regions of Transvaal.

Die laag oor die binneland is blykbaar besig om op te vul en dit sal gedeeltelik begin opklaar oor die Vrystaat, Noord-Kaapland, Natal en die suidwestelike helfte van Transvaal: meer verdere reën sal uitbrei oor die noordoostelike dele van Transvaal.

INFERENCE

DATE 8 - 1 - 1959 DATUM

AFLEIDING

Somewhat drier air has spread from the west over the country but rain and thundershowers will again occur over the eastern half of the Transvaal and northern Natal. The approaching cold front will cause cloudy weather with showers over Southwestern Cape.

Effens droër lug het vanuit die weste oor die land begin beweeg maar reën en donderbuie sal nog oor die oostelike helfte van Transvaal en Natal voorkom. Die naderende koufront sal bewolkte weer met buie aanbring oor Suidwes-Kaapland.

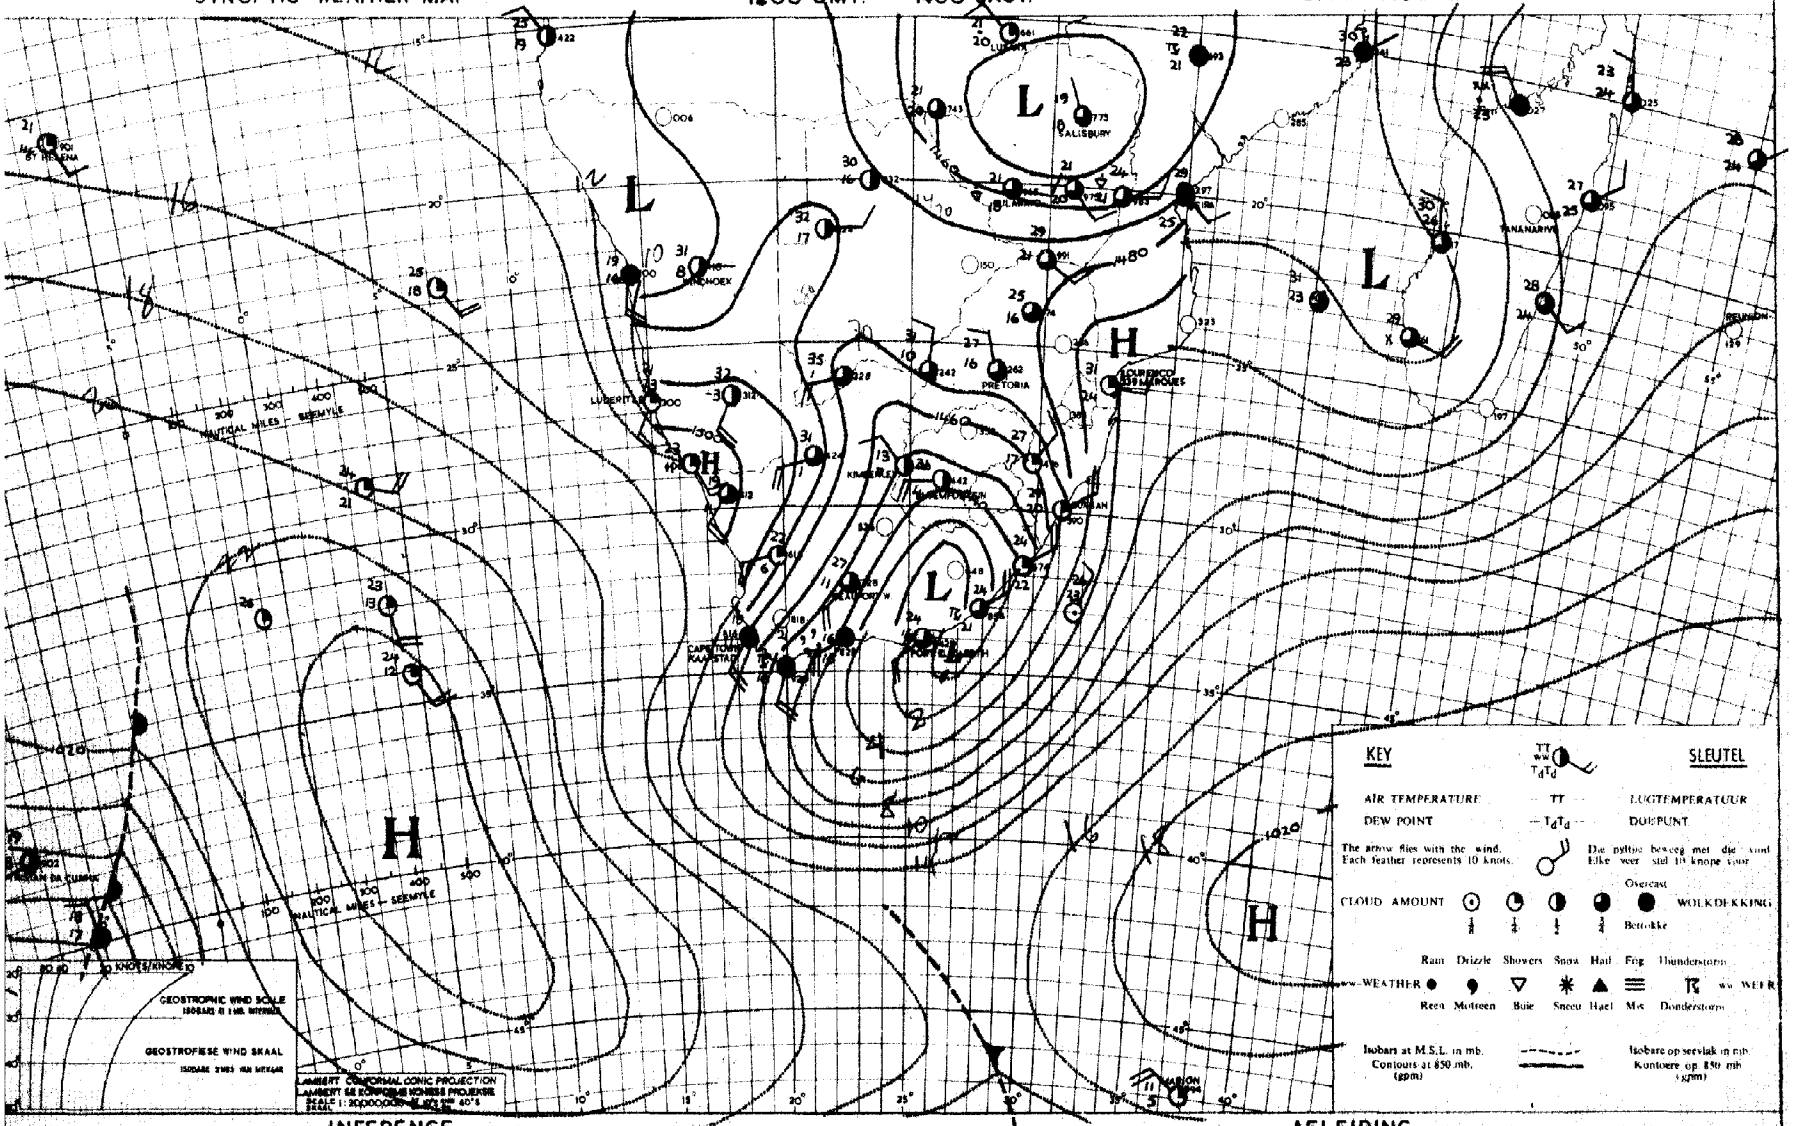
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

DATE 11 - 1 - 1959 DATUM

The deep low over the southeastern coast is moving slowly eastwards. Cool, cloudy conditions with showers will persist over the southern and southeastern Cape coasts spreading to the coastal regions of Natal later. Fairly strong southwesterly winds will bring considerably colder air over most of the Cape interior and the Free-State. It will be warm at first over Transvaal and the Natal interior and

AFLEIDING

die diep laag oor die suidooskus beweeg stadig ooswaarts. Koel, bewolkte toestande met buie sal voort duur oor die suidelike en suidoostelike Kaapse kusgebiede en later ook na die Natalse kus uitbrei. Teamlike sterk suidwestewind sal kouer lug oor die meeste dele van die Kaapse binneland en die Vrystaat invoer. Oor Transvaal en die Natalse binneland sal dit aanvanklik nog warm wees en donderbuie sal ontwikkel.

INFERENCE

DATE 12 - 1 - 1959 DATUM

AFLEIDING

With the deep low to the south-west of the continent, colder and drier air will also spread to northern Natal and the Transvaal. Apart from cloudy conditions and local showers over the southern and southeastern coastal regions of the Union, Natal and the lowveld of Transvaal it will be fine and cool to cold.

Met die diep laag suidoos van die vasteland sal kouer droër lug ook uitbrei oor Transvaal en die noordelike Natal. Afgesien van bewolkte toestande, gepaard met plaaslike buie oor die suidelike en suidoostelike kuste — beide van die Unie, Natal en die laeveld van Transvaal sal dit mooiweer en koel tot koud wees.

With the deep low pressure systems over the Indian Ocean and the high over the Atlantic Ocean, the inflow of rather cold dry air will persist over north of the country.

Met die diep laagdrukstelsel oor die Indiese-Oseaan en die hoog oor die Atlantiese-Oseaan sal dit instroming van betreklike koue, droë lug voortduur oor die meeste dele van die land.

INFERENCE

DATE 14 - 1 - 1959 DATUM

AFLEIDING

The cold low south-east of the continent is filling and it is expected that temperatures will rise rapidly over the western interior although it will still be cool over the south-eastern parts of the country. Because of the dry air fed in over the interior by the low it will be cloudless over most parts.

Die koue laag suidoos van die vastaland verswak en ne verwagting sal temperature oor die westelike deel van die binneland vinnig sal styg alhoewel dit nog koel sal wees oor die suidoostelike dele van die land. As gevolg van die droë lug ingevoer oor die binneland deur die laag sal dit wolkloos wees oor die meeste

With the trough developing over the country, warmer moist air will move southwards. It will become partly cloudy with rising temperatures.

Met die trog wat oor die land ontwikkel sal warmer en ietwat vogtiger lug suidwaarts beweeg. Gedeeltelik bewolkte toestande sal ontwikkel en temperatuur sal styg.

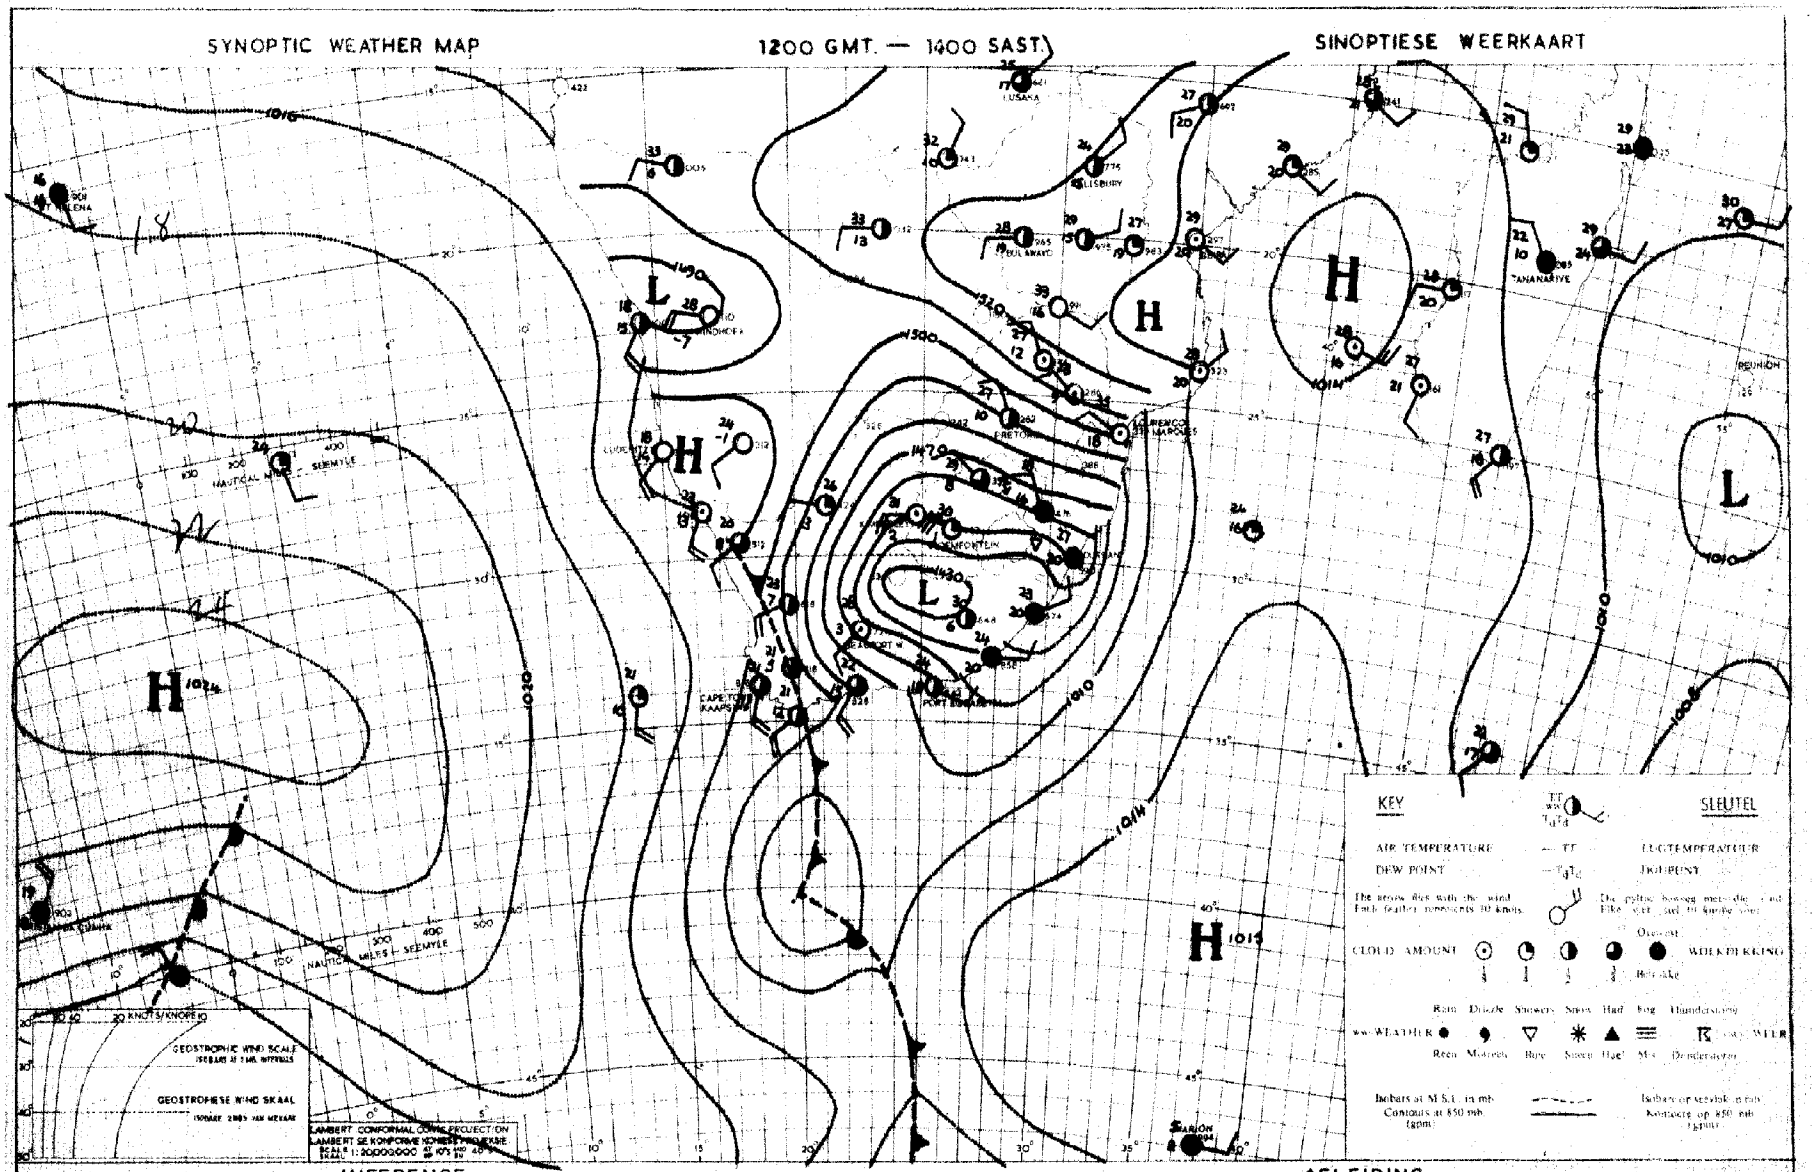
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 16 - 1 - 1959 DATUM — AFLEIDING

It is expected that the deep low over the interior will cause an influx of dry and cooler air over the interior. Isolated thundershowers will, however occur over the north - eastern parts of the Transvaal and of Bechuanaland. Elsewhere over the interior it will be mainly fine but it will be cloudy over the southern coastal regions and rain will occur.

Na verwagting sal die diep laag oor die binneland droë en ietwat koeler lug invoer oor die binneland meer en kale donderbuie sal nog voorkom oor die noord oostelike deel van Transvaal en oor die noordoostelike dele van Batsjoenaland. Elders oor die binneland sal dit meestal weer wees meer dit sal bewolk wees oor die suidelike kusgebiede en buie sal voorkom.

A trough is developing over the west coast in the upper air and since the air over the Transvaal is humid, thundershowers will develop in the afternoon. It will be fairly cloudy over the south-eastern coastal regions but elsewhere it will be fine and warm.

'n Trog is besig om in die bolug te ontwikkel oor die weskus en aangesien die lug betrekklik vogtig is oor die Transvaal sal donderbuie in die namiddag uitsien oor die deel. Dit sal teenlik bewolk en koel wees oor die suidoostelike kusgebied maar elders sal dit mooiweer en warm wees.

INFERENCE

DATE 18 - 1 -19 59 DATUM

AFLEIDING

With the upper air trough over the west coast and fairly humid air over the Transvaal and the northern parts of the Free-State and of the Northern Cape, thundershowers will develop over these parts in the afternoon. Apart from scattered clouds over the south-eastern coastal regions it will be fine and warm elsewhere.

Met die bolugtrog oor die weskus en betreklike vogtige lug oor die Transvaal en die noordelike dele van die Vrystaat en van Noordkaapland sal donderbuie in die namiddag oor hierdie dele ontwikkel. Afgesien van verspreide wolke oor die suidoostelike kusgebied sal dit mooiweer en warm wees elders.

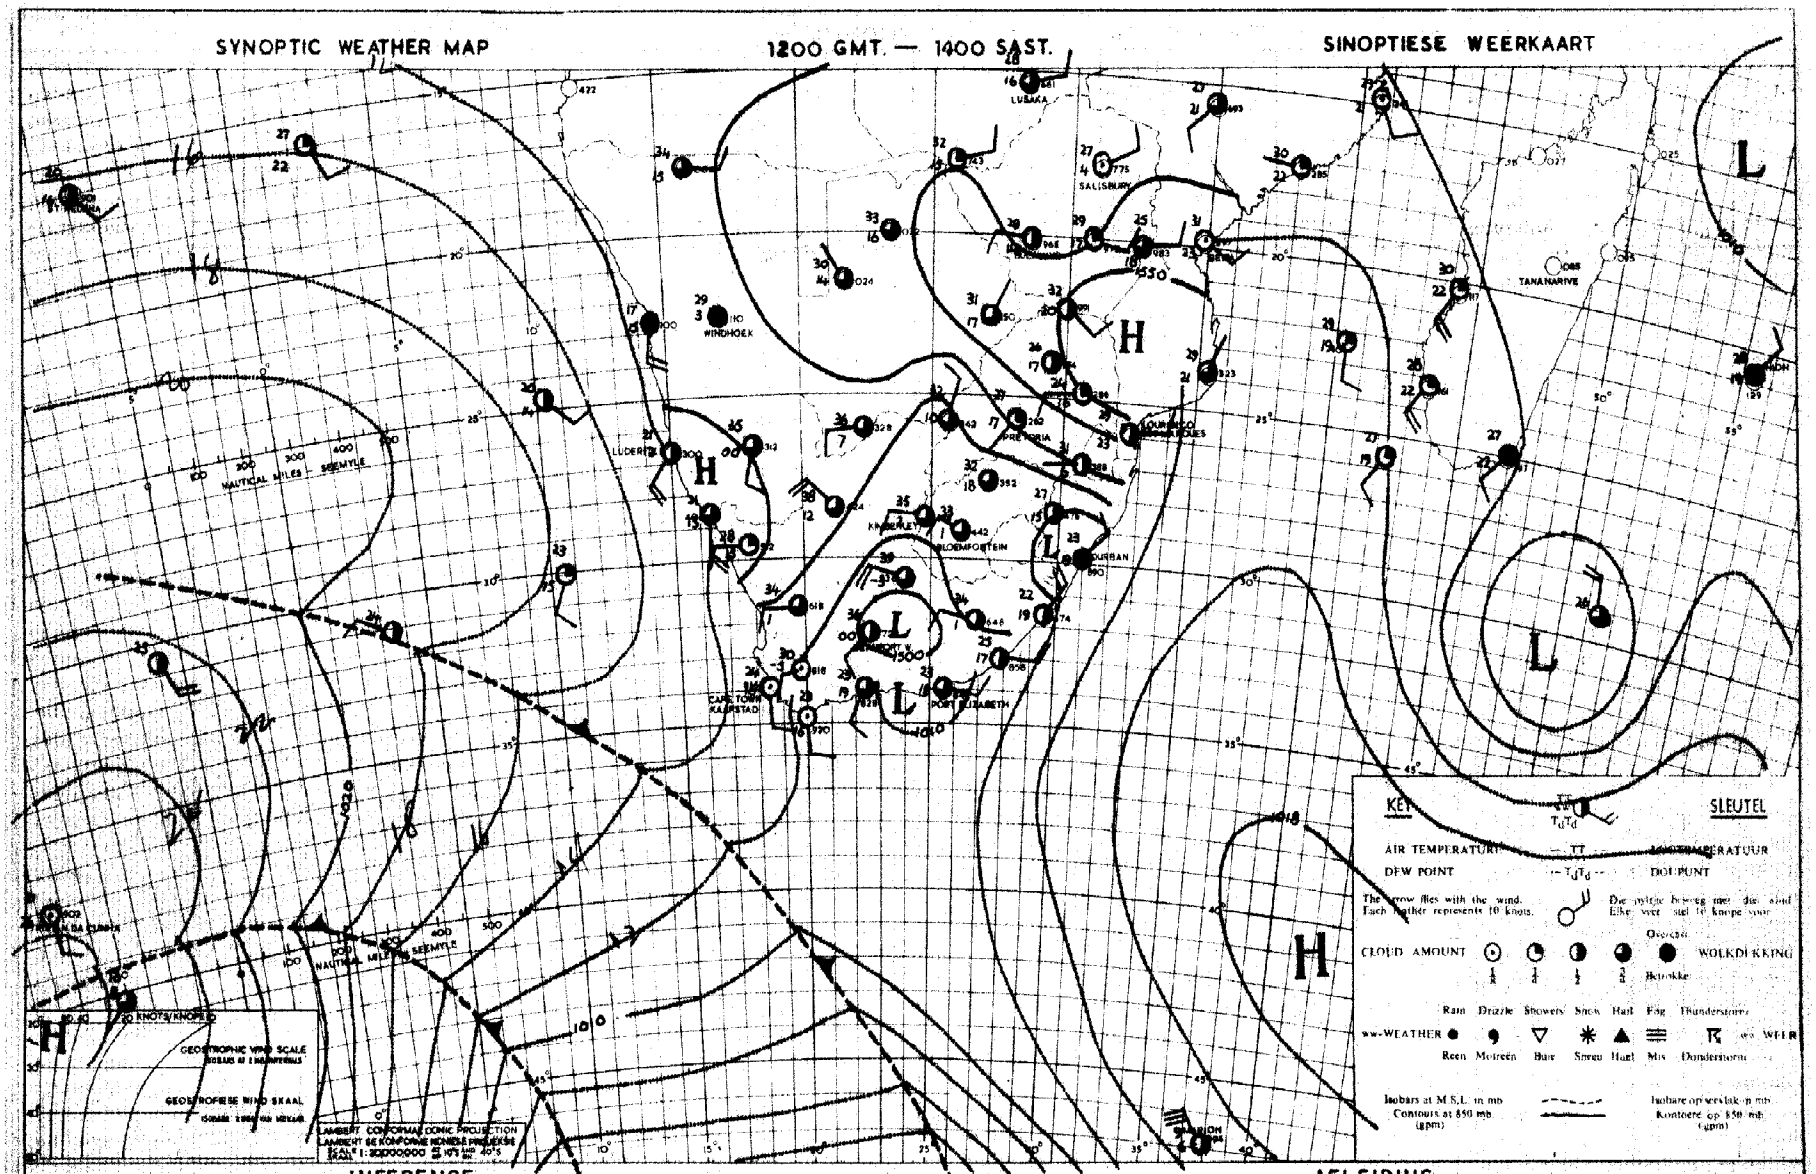
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 19 - 1 - 1959 DATUM — AFLEIDING

Cooler, cloudy weather with light rain will spread over the south-western, southern and eastern coastal regions but over the interior it will remain warm to hot. Humid air from the north is gradually spreading southwards and thundery conditions will redevelop over Transvaal, Natal, Free State, Northern Cape, Bechuanaland and the northern half of South-West Africa.

Koeler, bewolkte weer met ligte reën sal oor die suidwestelike, suidelike en oostelike kuslstreke uitbrei maar oor die binneland sal dit warm tot baie warm bly en vogtiger lug sal begin suidwaarts beweeg. Donderweersomstandighede sal gevolglik ontwikkel oor Transvaal, Natal, Vrystaat, Noord-Kaapland, Betsjoeanaland en die noordelike helfte van Suidwes-Afrika.

INFERENCE

DATE 20 - / - 19 59 DATUM

AFLEIDING

There apparently is an upper air trough over the eastern part of the interior and it is expected that somewhat drier air will spread eastwards over the Free-State. It will be partly cloudy over the northern parts of the Transvaal and Bechuanaland and isolated thundershowers will occur. It will be cloudy and cool over the southeastern coastal regions and adjacent interior but fine elsewhere.

Daar is skynbaar 'n boulugtrog oor die oostelike deel van die binneland en na verwagting sal ietwat droër lug ooswaarts uitbrei oor die Vrystaat. Oor die noordelike deel van Betsjoeanaland en die Transvaal sal dit gedeeltelik bewolk word en los donderbuie sal voorkom. Dit sal bewolk en koel wees oor die suidoostelike kusgebied en aangrensende binneland, maar mooiweer elders.

Humid air remains over the eastern and northern parts of the Union and the northern parts of Bechuanaland and South West Africa and consequently local thundershowers will recur over these regions.

Vogtige lug bly nog behoue oor die oostelike en noordelike dele van die Unie en die noordelike dele van Betsjoeanaland en Suidwes-Afrika en gevolglik sal plaaslike donderbuie meer oor hierdie dele voorkom.

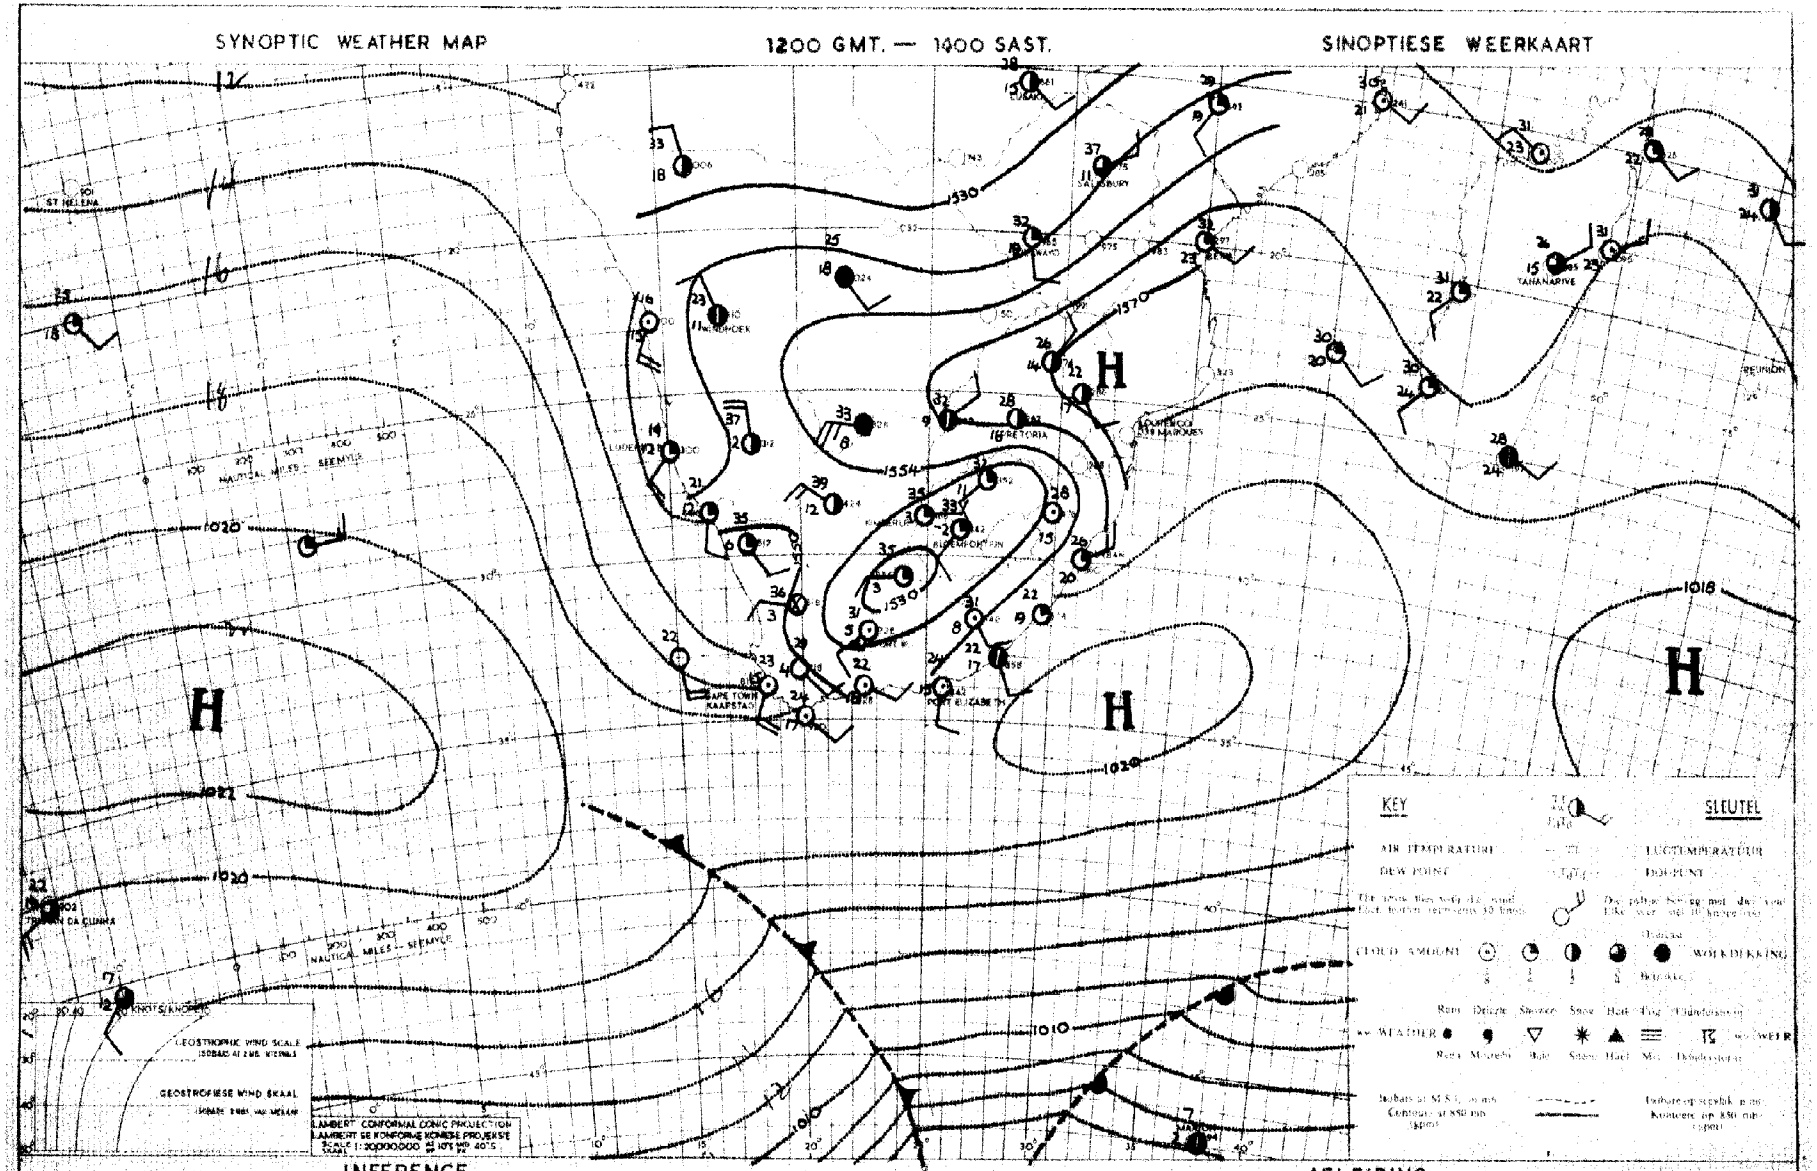
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 22-7-1959 DATUM — AFLEIDING

As a result of an upper-air trough over the west coast humid air has moved southwards over the interior. It is expected that it will be partly cloudy over the northern half of the Union and thundershowers will occur. Isolated thundershowers are also possible over the northern districts of the Karoo.

As gevolg van 'n boulugtrog oor die weskus het vogtiger lug suidwaarts beweeg oor die binneland. Na verwagting sal dit gedeeltelik bewolk oor die noordelike helfte van die Unie en donderbuie sal uitsek. Los donderbuie is ook moontlik oor die noordelike distrikte van die Karoo.

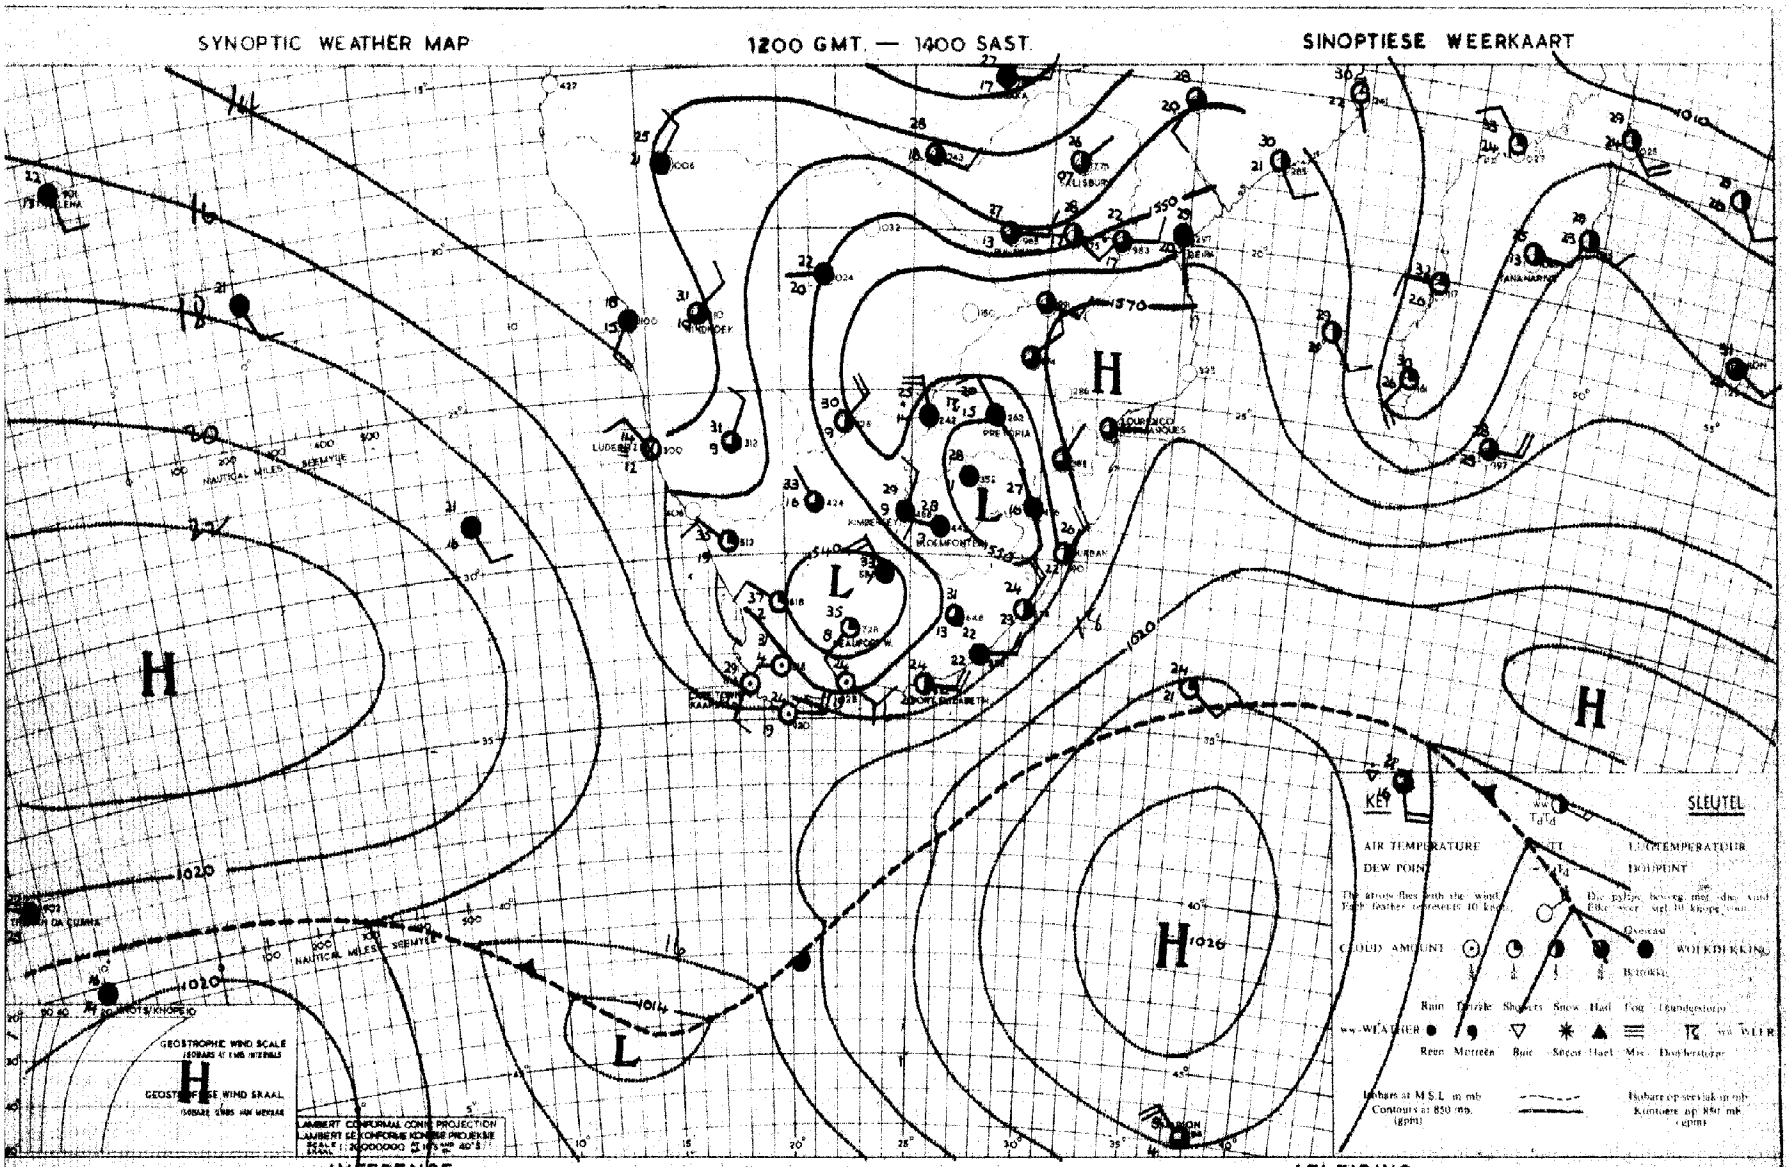
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 23 - 1 - 1959 DATUM — AFLEIDING

The high south-east of the continent causes a fairly deep stream of moist air to spread south-wards over the Union, South West Africa and Bechuanaland and rain and thundershowers will occur over most regions.

Hoë lugdruk ten suidooste van die vasteland veroorsaak 'n taamlike diep suidwaartse stroom van die vogtige lug oor die Unie, Suidwes-Afrika en Betsjoeanaland en reën en donderbuie sal oor meeste dele voorkom.

A further rise in pressure is expected south of the continent and as the trough over the western interior is persisting, wide spread rain and thundershowers will occur over west parts of the Union and Bechuanaland.

'n Verdere drukstyging word verwag suid van die vasteland en terwyl die trog oor die westelike binneland nog stand standhou, sal toestande gunstig bly vir uitgebreide reën en donderbuie oor meeste dele van die Unie en Betsjoeanaland.

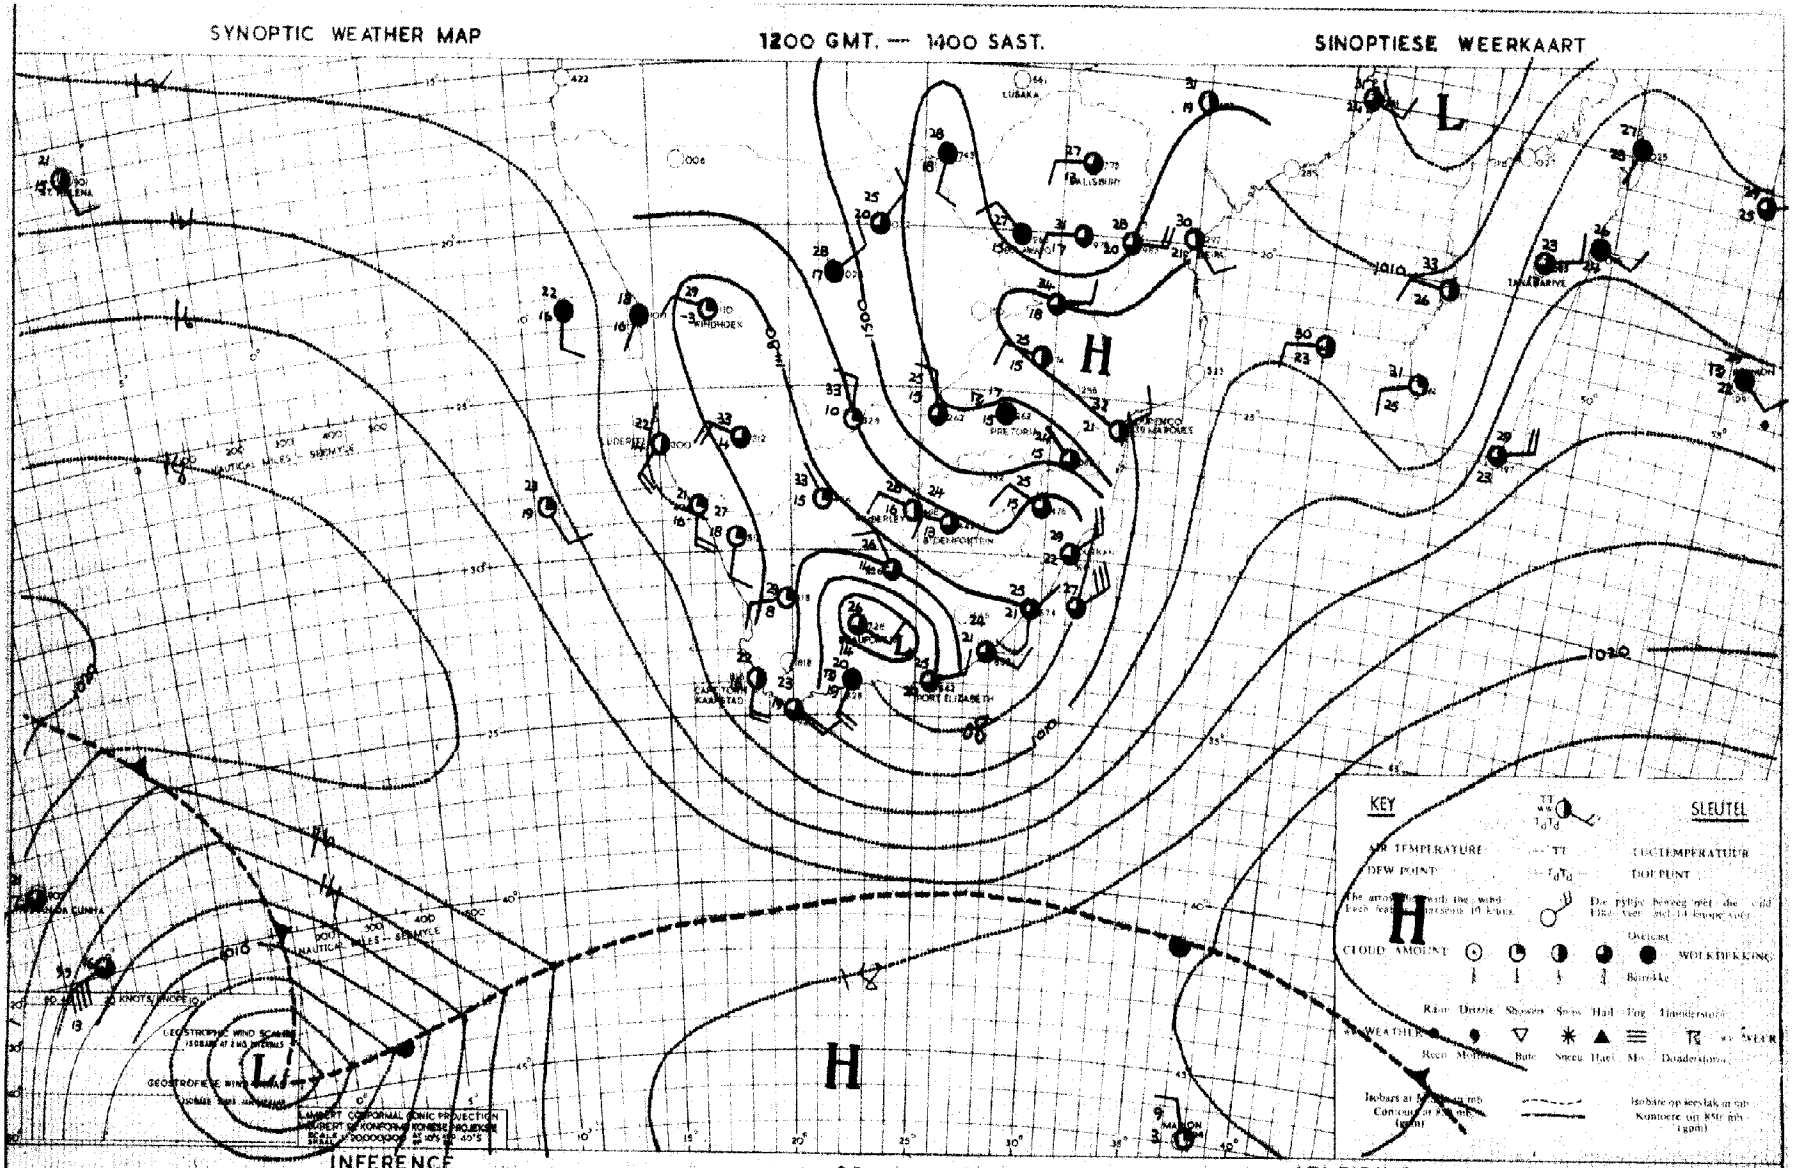
SINOPTIESE WEERKAART



INFERENCE

DATE 25 - 1 - 1959 DATUM

AFLEIDING

Pressure remains high south and south-east of the continent and the trough over the western Union has moved, but little. Consequently further rain and thunder showers will occur over Bechuanaland and all parts of the Union, except western Cape.

Lugdruk bly nog hoog suid en suidoos van die vastaland en die trog oor die westelike Unie met baie min beweging. Gevolglik sal verdere reën en donderbuie voorkom oor Betsjoeanaland en alle dele van die Unie, behalwe Weskaapland.

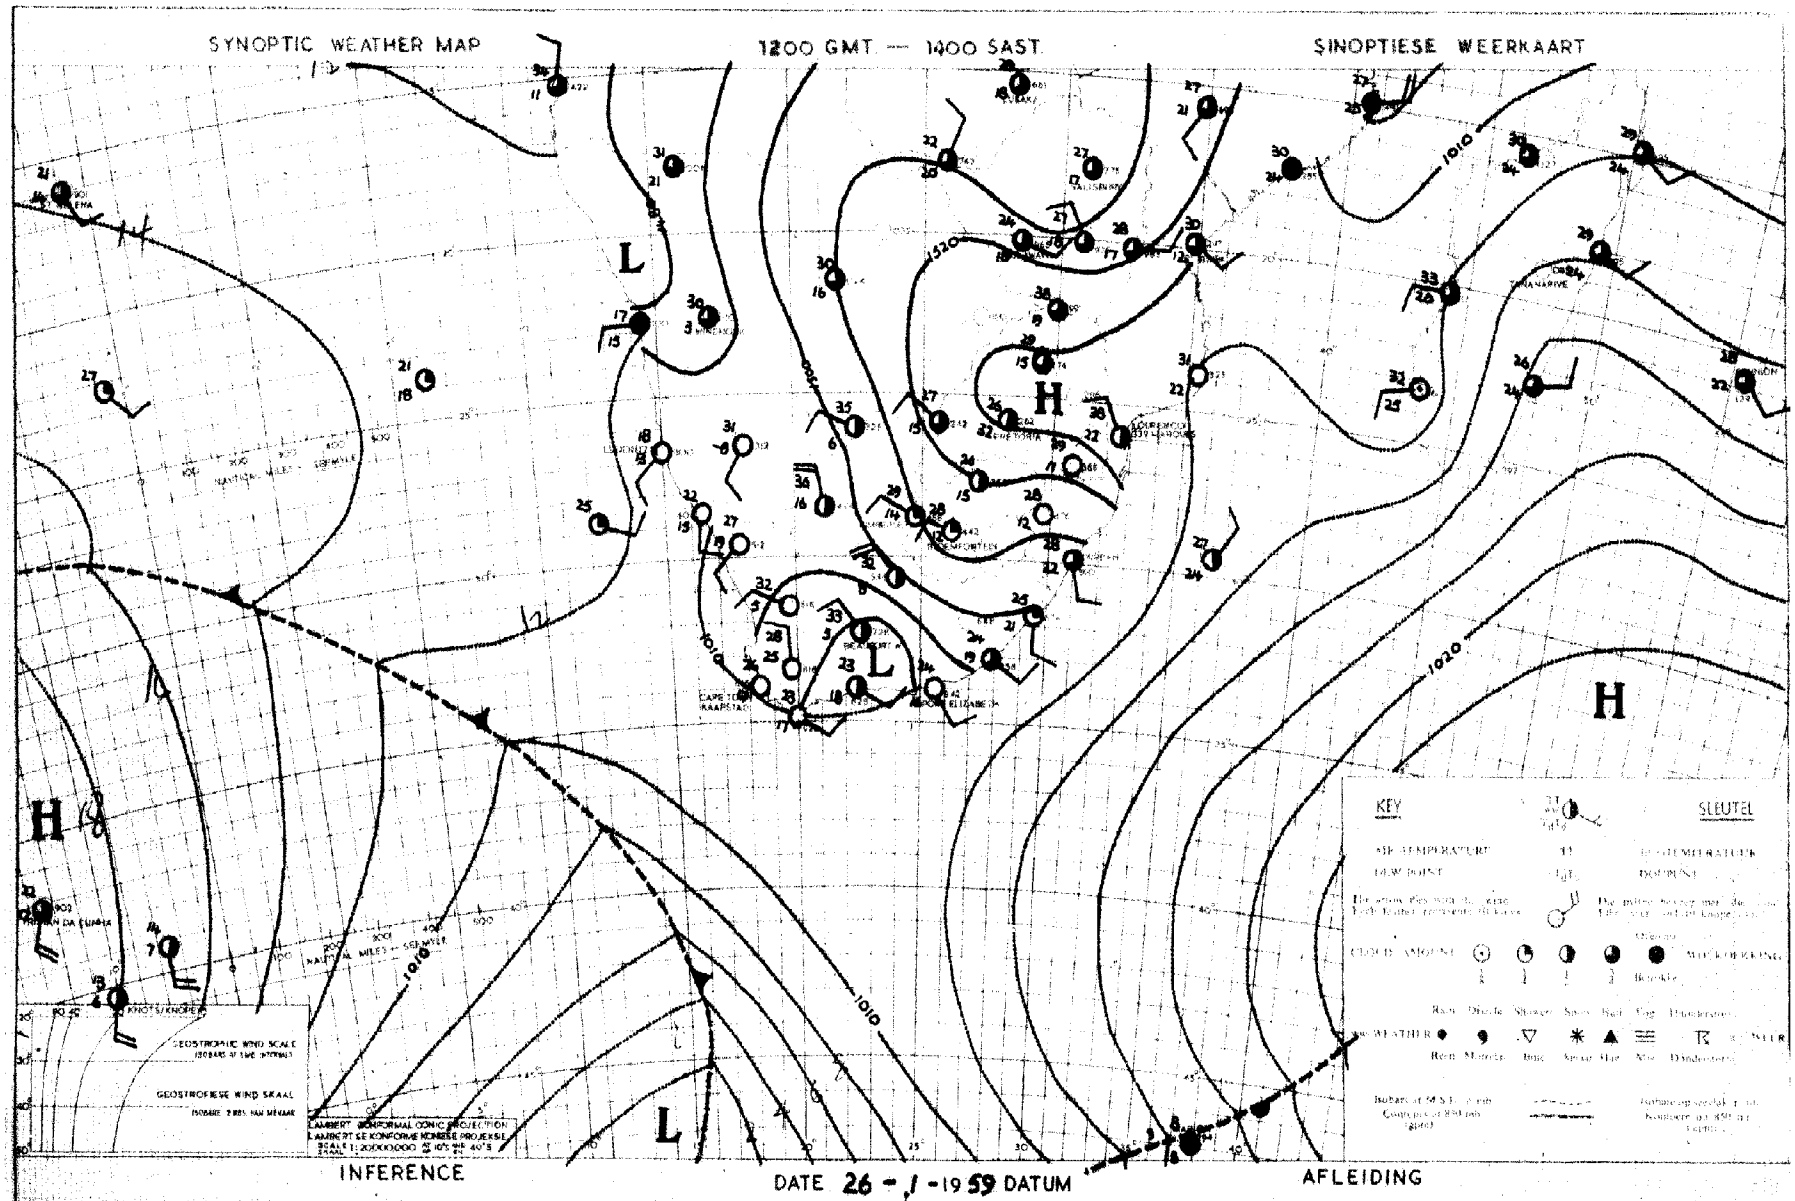
[1] Naby Kokstad

[2] Near Bothaville

[3] Naby Groblersdal



Fairly humid air is moving over the greater part of the country and thundershowers will occur over most inland areas and also over the southeastern and eastern coastal regions.

Betreklik vogtige lug beweeg oor die meeste dele van die land en donderbuie sal oor die meeste binnelandse gebiede asook oor die suidoostelike en oostelike kusgebiede voorkom.

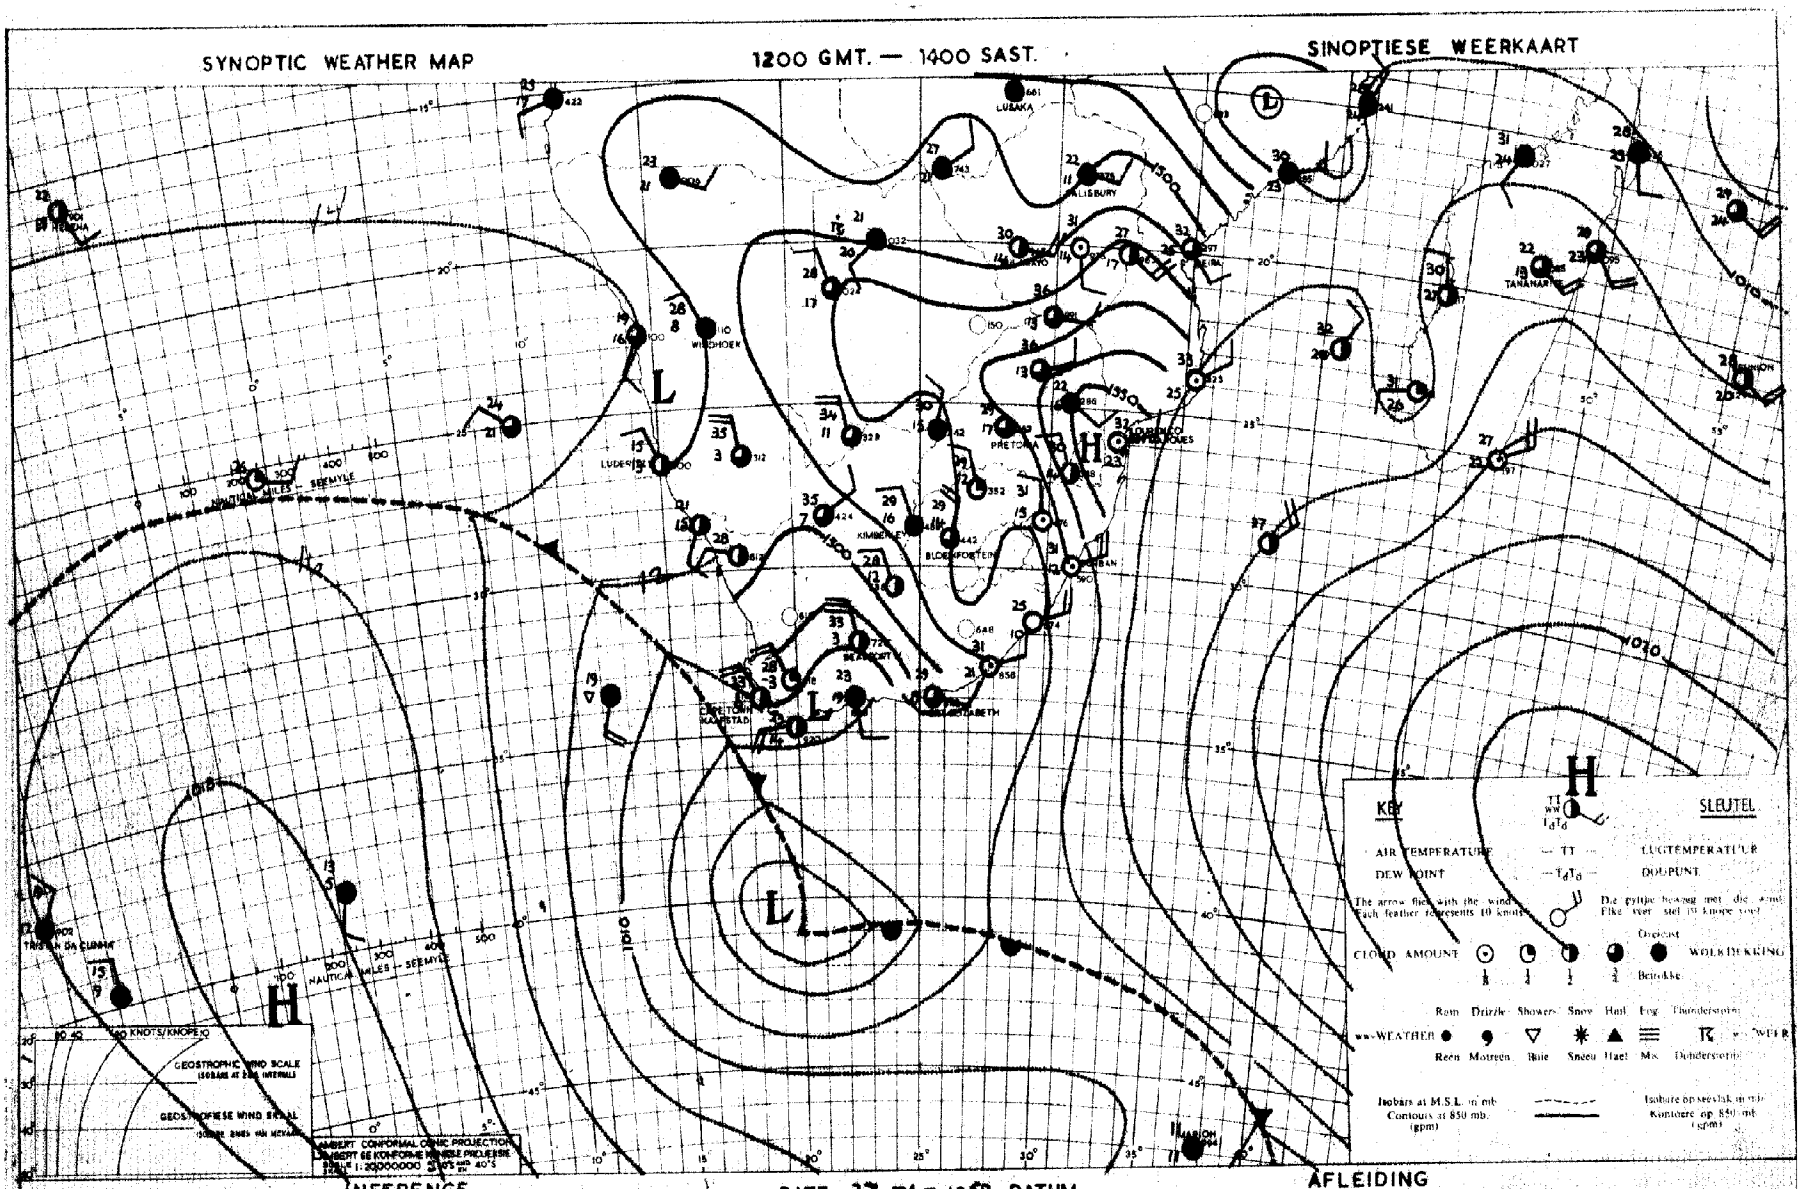
[1] Naby Kokstad

[2] Near Bothaville

[3] Naby Groblersdal



A deep trough is situated over the western parts of the sub-continent and to its east a broad stream of humid air is moving south-wards. As a result rain and thundershowers will occur over most regions.

Cooler cloudy conditions with rain will spread over the south-western and southern coastal regions.

'N Diep trog is aanwesig oor die westelike deel van die subkontinent en oos daarvan beweeg 'n wye stroom vogtige lug suidwaarts en reën en donderbuie sal oor meeste streke voorkom. Koeler, bewolkte weer met reën sal oor die suidwestelike en suidelike kusstreke uitbrei.

Cooler, cloudy conditions with showers will spread over Natal. Dry air is moving over most of the Cape Province but thundershowers are still possible elsewhere over the country.

Koeler, bewolkte toestande met buie sal oor Natal uitbrei. Droër lug beweeg oor die meeste dele van Kaapland, maar donderbuie is nog moontlik oor die res van die land.

INFERENCE

DATE 29 - 1 - 1959 DATUM

The cold air which has already spread over the southern and eastern parts of the Union will spread also over the Transvaal. Further rain will occur over Natal and eastern Transvaal. Thundery conditions with local showers will recur over Bechuanaland, northern and central south-west Africa, Western Transvaal and northern Cape.

AFLEIDING

Die koue lug wat reeds oor die suidelike en oostelike Unie beweeg het, sal ook oor die Transvaal uitbrei. Verdere reën sal oor Natal en oostelike Transvaal uitsak. Donderweerstoestande met plaaslike buie sal weer nog voorkom oor Bechuanaland, noordelike en sentrale Suidwes-Afrika, westelike Transvaal en Noord-Kaapland.

Pressure are falling over the southern and southeastern coastal regions and it will clear partially over Natal and Transvaal. Isolated thundershowers will develop over the Free State and Northern Cape.

Die druk daal vinnig oor die suidelike en suidoostelike kusgebiede en dit sal gedeeltelik begin opklaar oor Natal en Transvaal. Los donderbuie sal oor Noordkaapland en die Vrystaat ontwikkel.

SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART

INFERENCE — DATE 2 - 2 1959 DATUM — AFLEIDING

It is expected that the pressure will start rising over the southern and south-eastern coastal regions and it will be partly cloudy and cool over these regions. Little change is expected in the weather conditions prevailing over the interior.

The air over the eastern half of the Union and over the northern parts of Bechuanaland and South-West Africa is fairly humid and isolated thundershowers will develop over these parts. Mainly fine and warm elsewhere.

Na verwagting sal die druk begin styg oor die suidoostelike en suidelike kusgebiede en dit sal gedeeltelik bewolk en koel wees oor die dele. Min verandering word verwag en die haersende weerstoestande oor die binneland. Die lug is redelik vogtig oor die oostelike helfte van die Unie, asook oor die noordelike dele van Betsjoeanaland en Suidwes-Afrika en los donderbuie sal oor die dele uitsak. Hoofsaaklik mooi weer en warm elders.

INFERENCE

DATE 3 - 2 - 1959 DATUM

AFLEIDING

The high to the southwest is moving eastwards and somewhat cooler cloudy conditions will spread over Natal and the eastern regions of Transvaal. Isolated thundershowers will occur over the remainder of Transvaal, over the Free State and Northern Cape.

Die hoog na die suidweste beweeg ooswaarts en iets koeler bewolkte toestande sal oor Natal en die oostelike dele van Transvaal beweeg. Los donderbuie sal oor die res van Transvaal, die Vrystaat en oor Noord Kaapland voorkom.

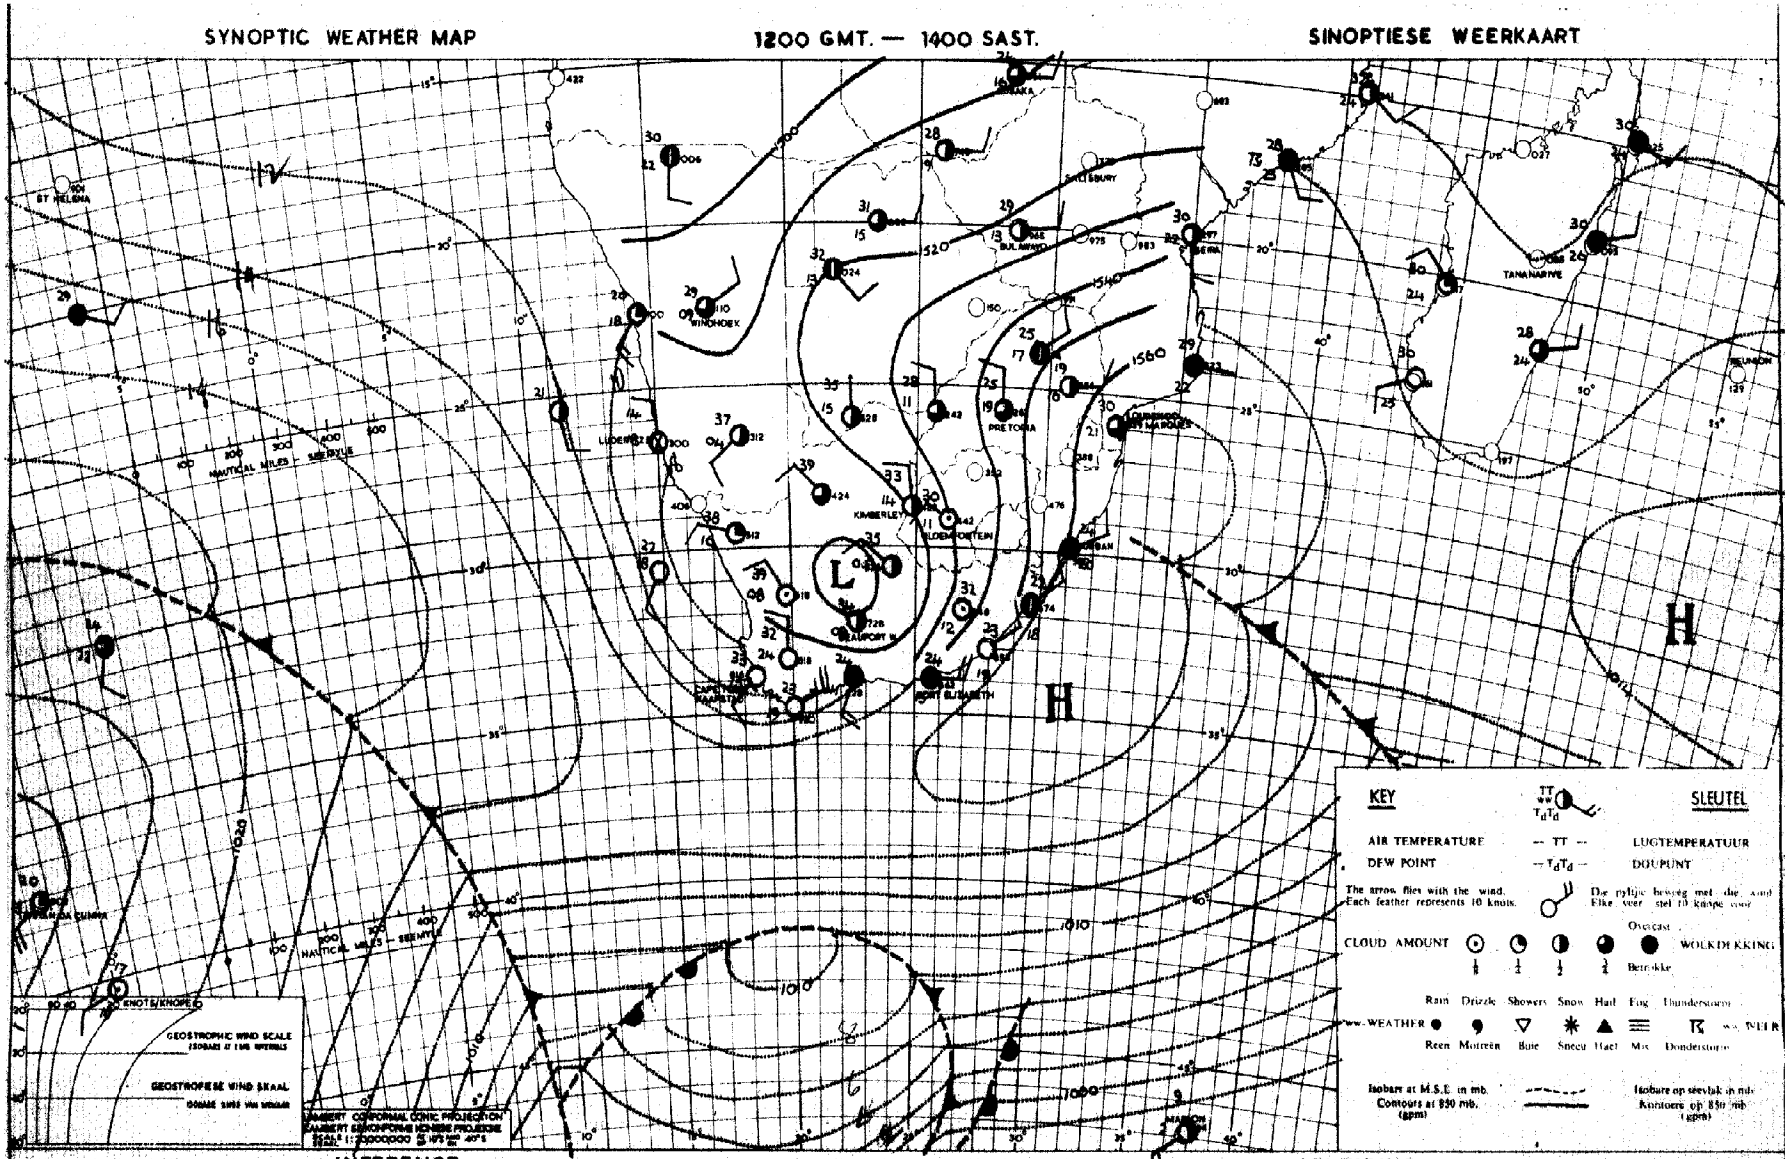
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 4 - 2 - 1959 DATUM — AFLEIDING

A low is apparently developing over the southern part of the interior and it is expected that humid air will flow southwards over the western half of the interior. Partly cloudy conditions associated with scattered thundershowers will occur over this part. Elsewhere over the interior it will be mainly fine but isolated thundershowers will also occur over this part in the afternoon.

'n Laag is skynbaar besig om te ontwikkel oor die suidelike deel van die binneland en na verwagting sal vogtiger lug suidwaarts beweeg oor die westelike helfte van die binneland. Gedeeltelik bewolkte toestande gepaard met verspreide donderbuie sal oor die deel voorkom. Elders oor die binneland sal dit hoofsaaklik mooiweer en warm weeg meer enkele donderbuie sal ook oor hierdie deel voorkom in die middag

Somewhat cooler cloudy conditions with showers will develop over the Southeastern Cape Coast and over the coastal regions of Natal. Thundershowers will occur over Transvaal, The Free State, Northern and Northeastern Cape and over Natal.

Ietwat koeler bewolkte toestande met buie sal oor die suidoostelike Kaapse Kusstreke en oor die Kusgebiede van Natal ontwikkel. Donderbuie sal nog voorkom oor Transvaal, die Vrystaat oor Noord- en Noordoos-Kaapland en oor Natal.

INFERENCE — DATE 8 - 2 - 1959 DATUM — AFLEIDING

The pressure is rising rapidly over the southern half of the interior and it is expected that it will be fairly cloudy over the southern and southeastern coastal regions. Scattered thundershowers will develop over the northern parts of the Transvaal, Bechuanaland and South-West-Africa but only isolated thundershowers are possible over the remainder of the Transvaal, Natal and the Free-State. Mainly fine elsewhere.

Die druk styg vinnig oor die suidelike helfte van die binneland en na verwagting sal dit taamlik bewolk en mistig wees oor die suidelike en suidoostelike kusgebiede. Verspreide donderbuie sal oor die noordelike dele van die Transvaal, Betsjoeanaland en Suidwes-Africa voorkom maar net enkele donderbuie is moontlik oor die res van Transvaal en die Vrystaal en Natal. Hoofsaaklik mooiweer elders.

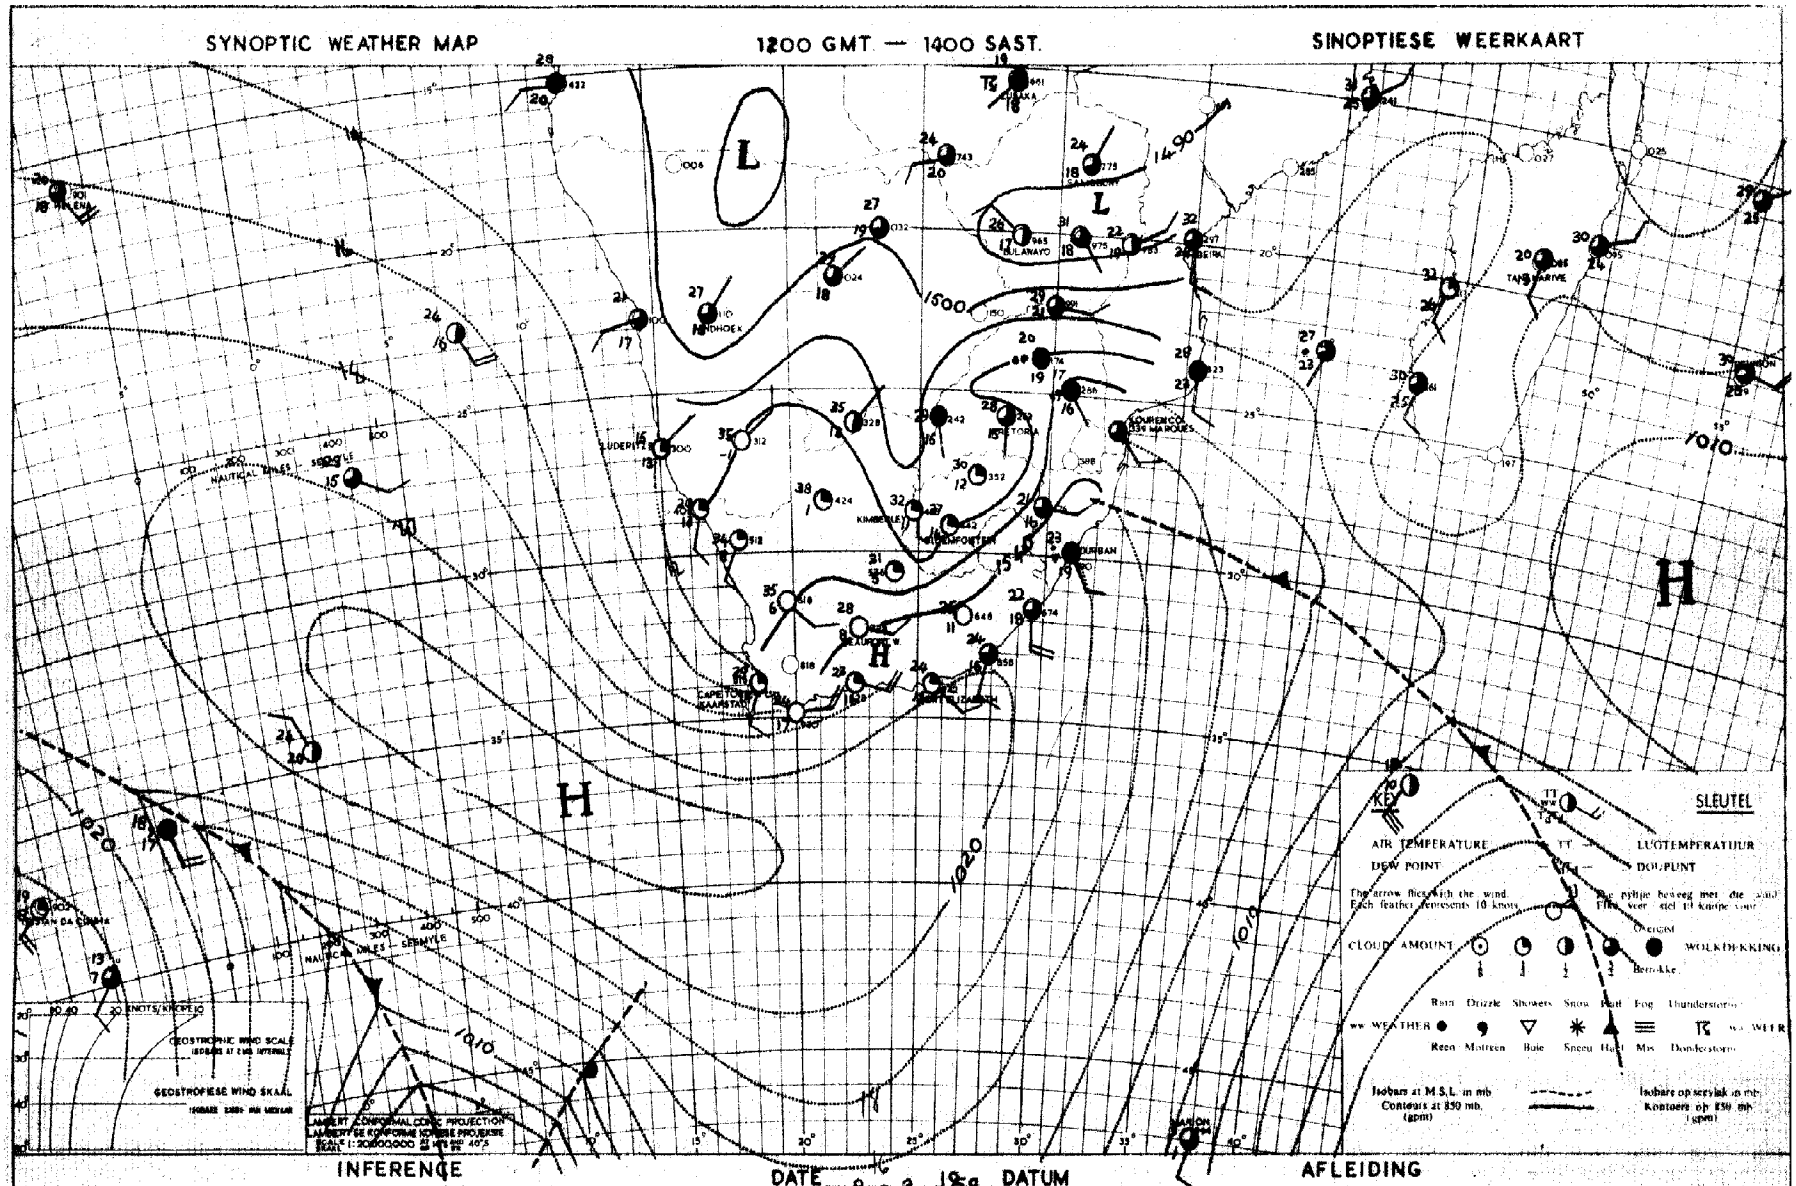
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 9 - 2 1959. DATUM AFLEIDING

Cloudy weather with local rain will occur over Natal and Transvaal. The warm humid air over northern Bechuanaland and South West Africa will start spreading southwards and thundershowers will occur over these regions and also over Northern Cape, Free State and the Northern - Karoo.

Bewolkte toestande met plaaslike reën sal voorkom oor Natal en Transvaal. Die warm, vogtige lug oor noordelike Betsjoeanaland en Suid-wes - Afrika sal weer suidwaarts beweeg en donderbuie sal oor hierdie gebiede asook oor Noordkaapland, Vrystaat en noordelike Karoo voorkom.

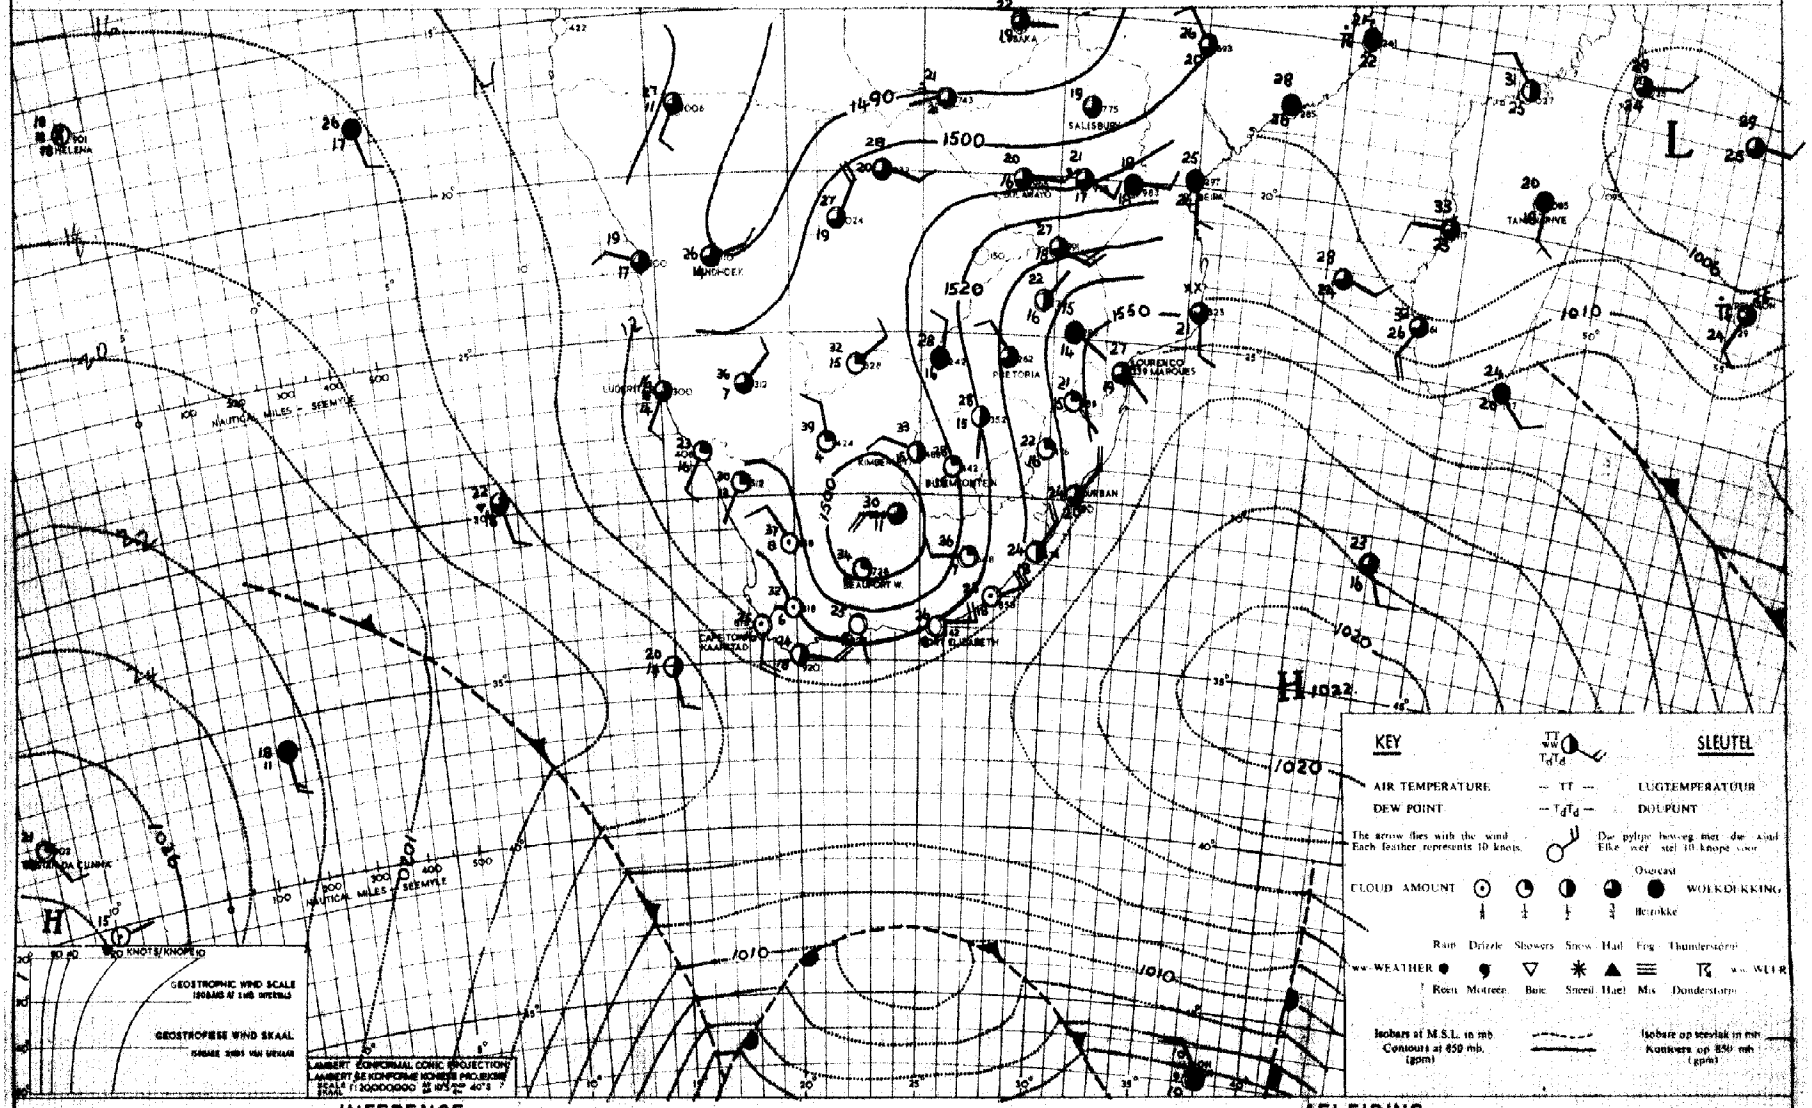
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 10 - 2 - 1959 DATUM AFLEIDING

Humid air is still flowing in over the western half of the interior and with the exception of the western parts of the Cape Province; scattered thundershowers will develop over these parts. Scattered thundershowers will also occur over the Eastern Cape and the Free State and isolated thundershowers are also possible elsewhere over the interior.

Vogtige lug word nog ingevoer oor die westelike helfte van die binneland en met uitsondering van die heel westelike distrikte van die Kaapprovinsie, sal verspreide donderbuie oor die dele voorkom. Verspreide donderbuie sal ook uitsak oor die Vrystaat en Oos-Kaapland en los donderbuie is moontlik elders oor die binneland.

AFLEIDING
The low over the Cape Province is moving slowly eastwards followed by drier air but cloudy weather with showers will still occur over the eastern half of the Union, Over Bechuanaland and the northern half of South-West Africa.
Die laag oor Kaapland beweeg stadig oostwaarts gevolg deur droër lug, maar bewolkte weer met buie sal nog oor die oostelike helfte van die Unie, oor Bersjoeanaland en die noordelike helfte van Suidwes-Afrika voorkom.

SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART

INFERENCE DATE 15 - 2 - 1955 DATUM AFLEIDING

Dry air has spread over South-West Africa on the western side of the low and will advance further also over Bechuanaland and western Transvaal, but it will remain cloudy with intermittent rain over most of the remainder of the Union.

Aan die westekant van die laag het droë lug reeds uitgebrei oor Suidwes-Afrika en dit sal ook oor Betsjoeanaland en Wes-Transvaal beweeg, maar oor meeste ander dele van die Unie sal dit bewolk bly met verspreide reën.

INFERENCE

With the high to the south it will remain cloudy with showers over the southern and southeastern coastal regions. The low over the interior is moving eastwards and it will clear elsewhere over the country.

DATE 16 - 2 - 1959 DATUM

AFLEIDING

Met die hoog suid van die land sal dit bewolk bly met buie oor die suidelike en suidoostelike kusgebiede. Die laag oor die binneland beweeg ooswaarts en dit sal opklaar oor die res van die land.

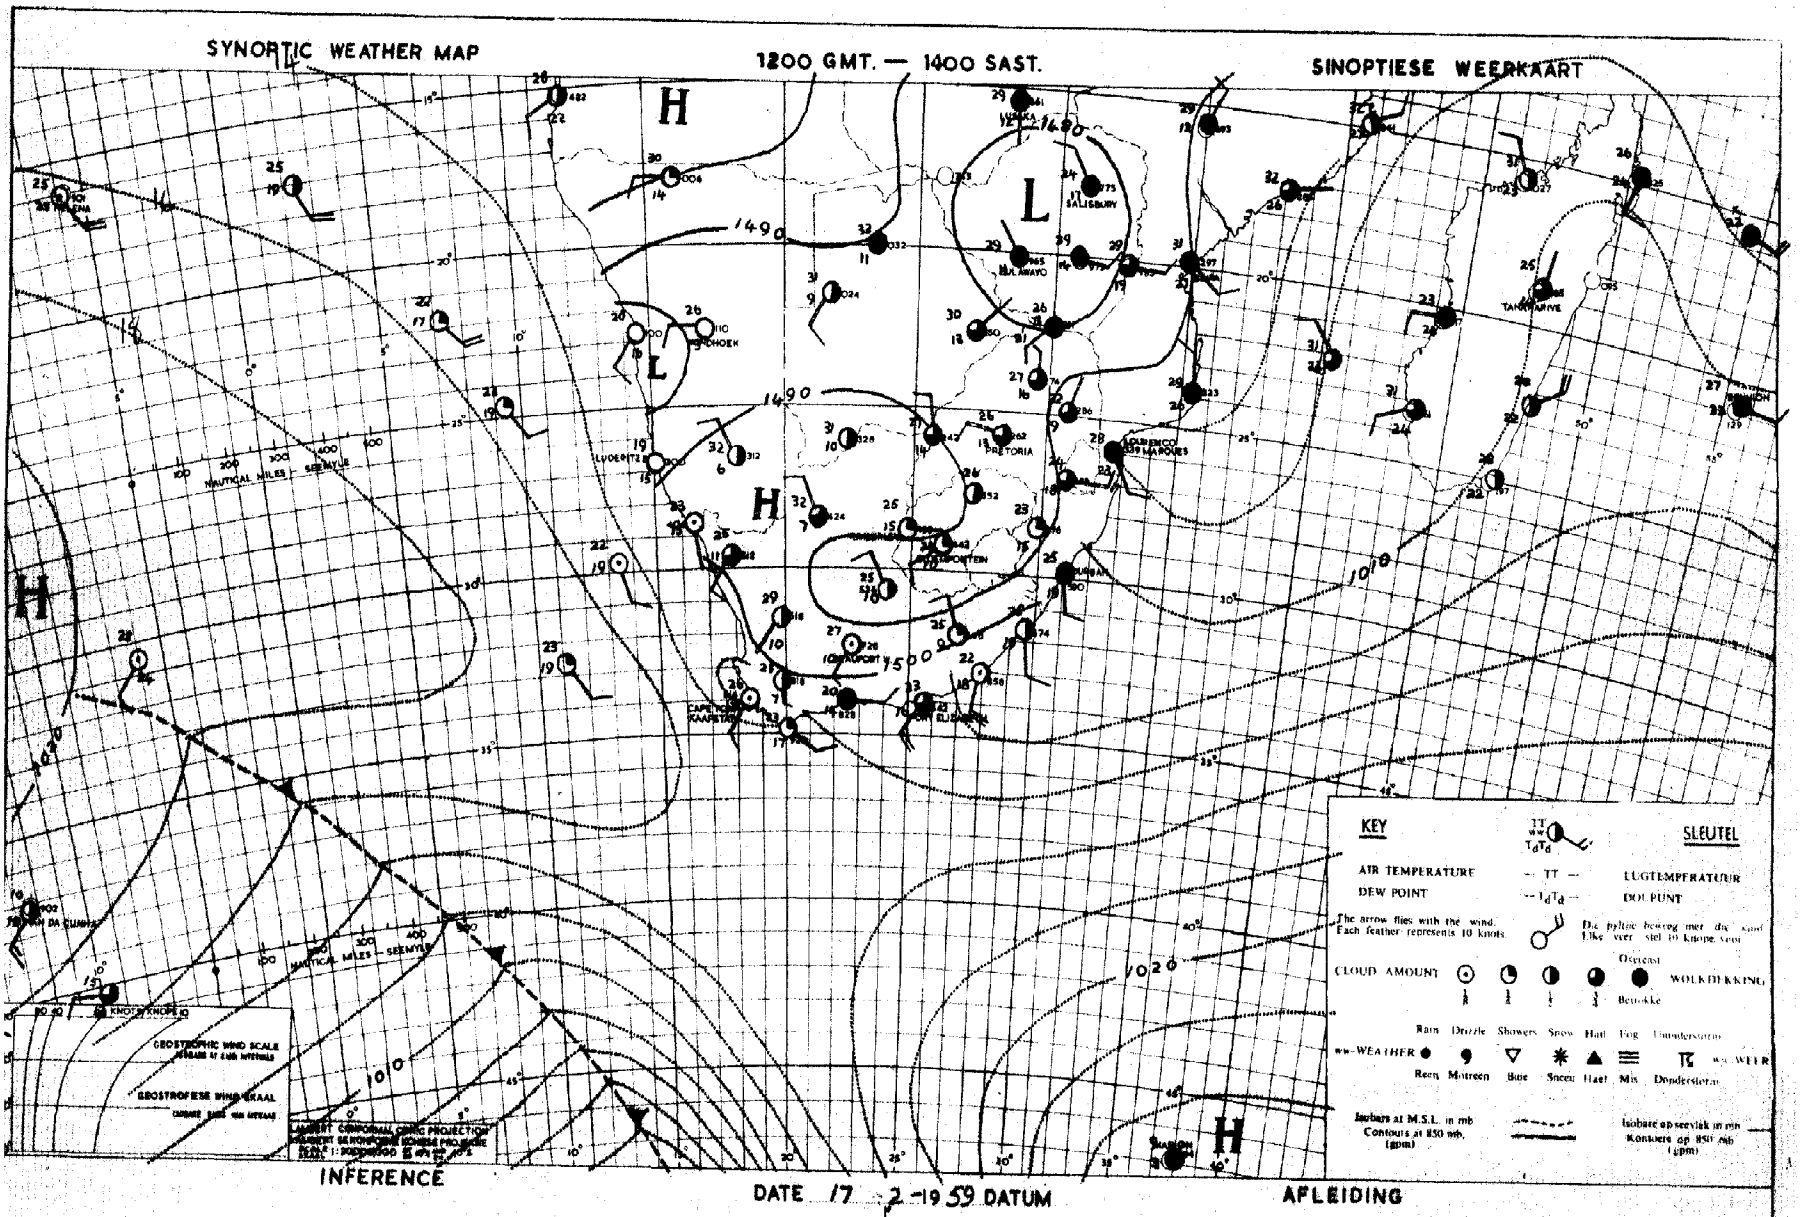
[2] Near Bothaville

[3] Naby Groblersdal



The air over the interior has dried out appreciably but there are still indications of a weak West coast trough, and as a result, isolated thundershowers will still occur over Bechuanaland and the eastern half of the Union.

Die lug oor die binneland het heelwat uitgedroog maar daar is nog aanduidings van 'n swak Weskuslrog en gevolglik sal los donderbuie nog voorkom oor Betsjoeanaland en die oostelike helfte van die Unie.

INFERENCE

DATE 18 - 2 - 1959. DATUM

AFLEIDING

It is clearing over the eastern interior, but with the cold front to the west cooler, cloudy conditions with rain will develop over the southwestern Cape-coasts.

Dit is besig om oop te trek oor die oostelike-binneland, maar met die koufront na die weste sal koeler bewolkte toestande met reën oor die suid-westelike Kaapse kusgebiede ontwikkel.

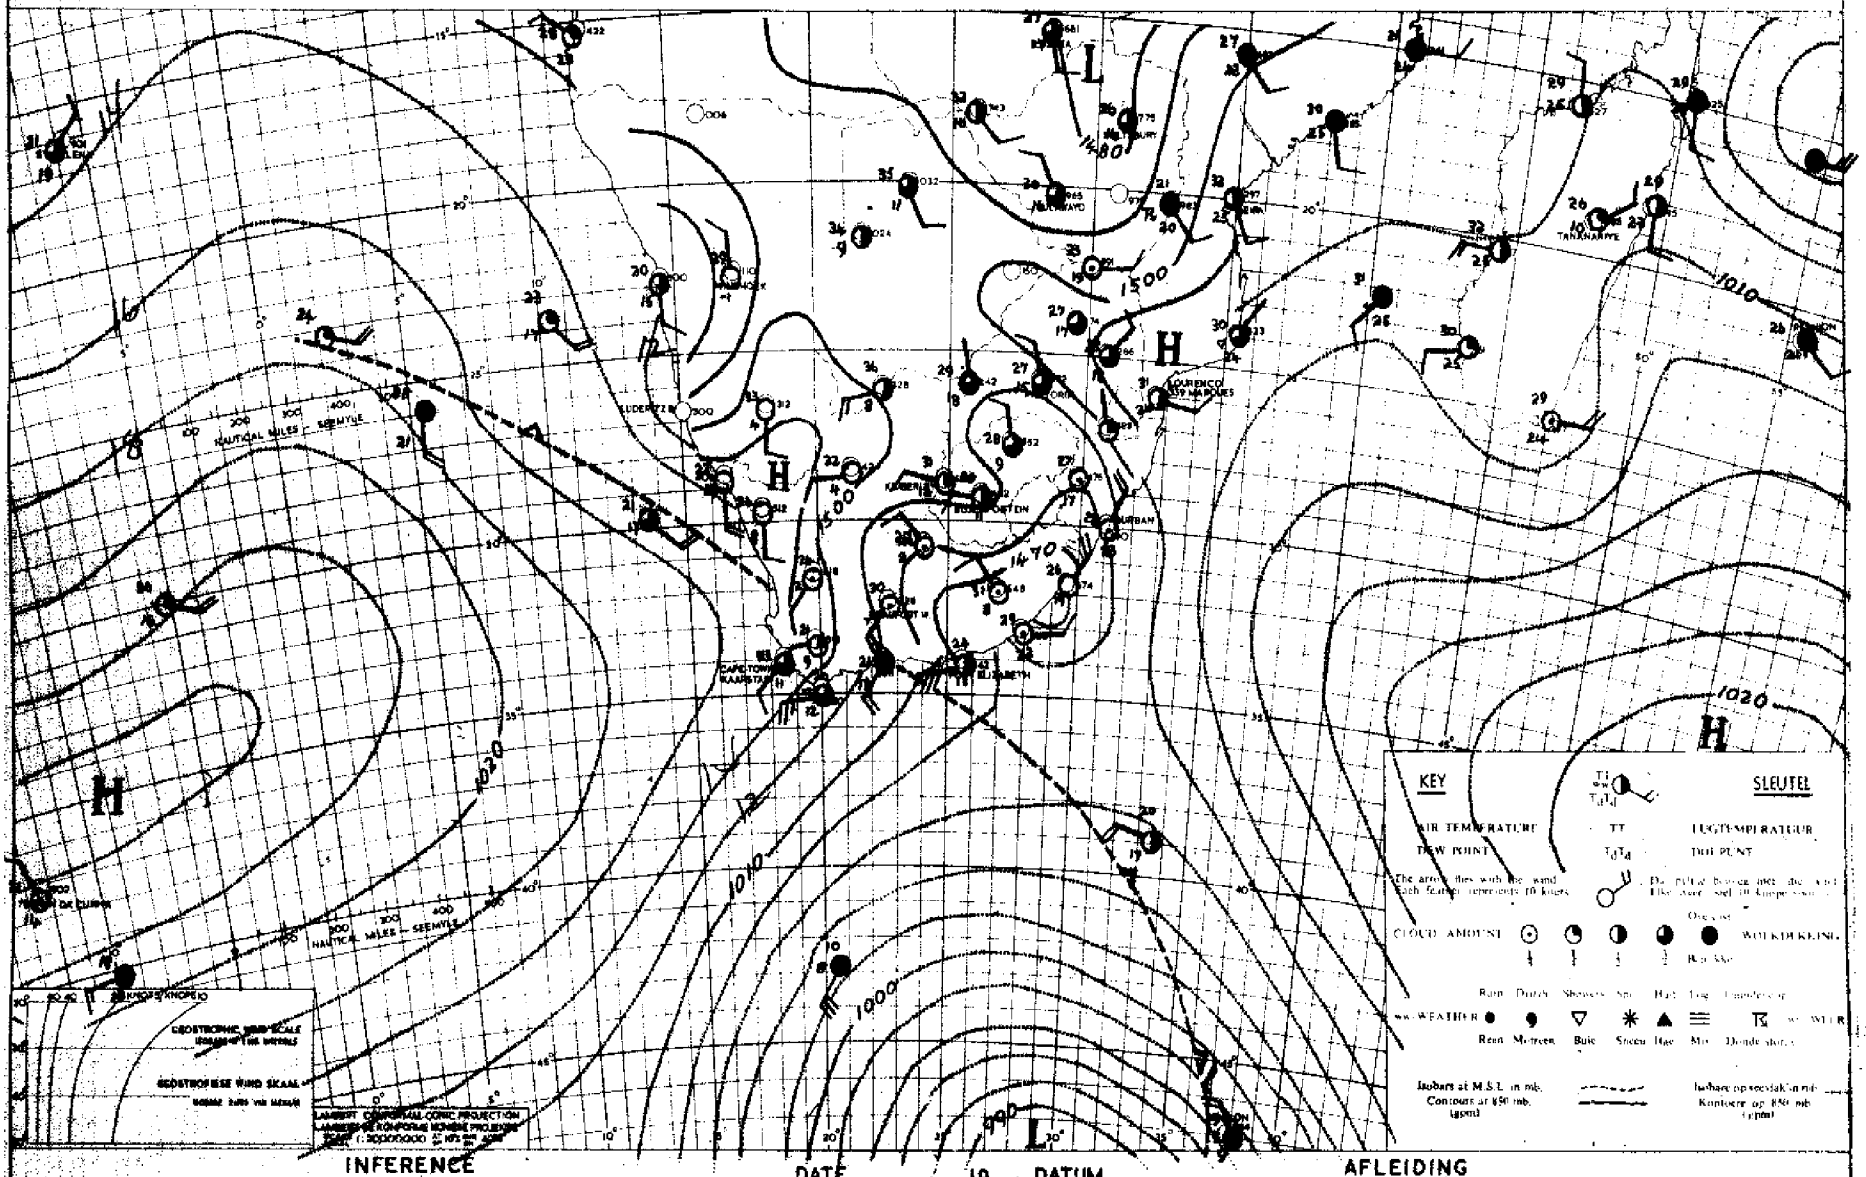
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE

Drier air is moving in over the interior from the west, and weather will clear over most areas. A ridge of high pressure is, however, moving in south of the Union and will result in cooler, cloudy conditions over the southern and eastern coastal regions.

DATE 19-12-59 DATUM

AFLEIDING

Droër lug beweeg in oor die binneland van die weste af en dit sal oor meeste gebiede opklaar. Die rug van hoë druk wat suid van die Unie in beweeg, sal egter tot gevolg hê dat koeler, bewolkte weer oor die suidelike en oostelike kuststreke uitbreek.

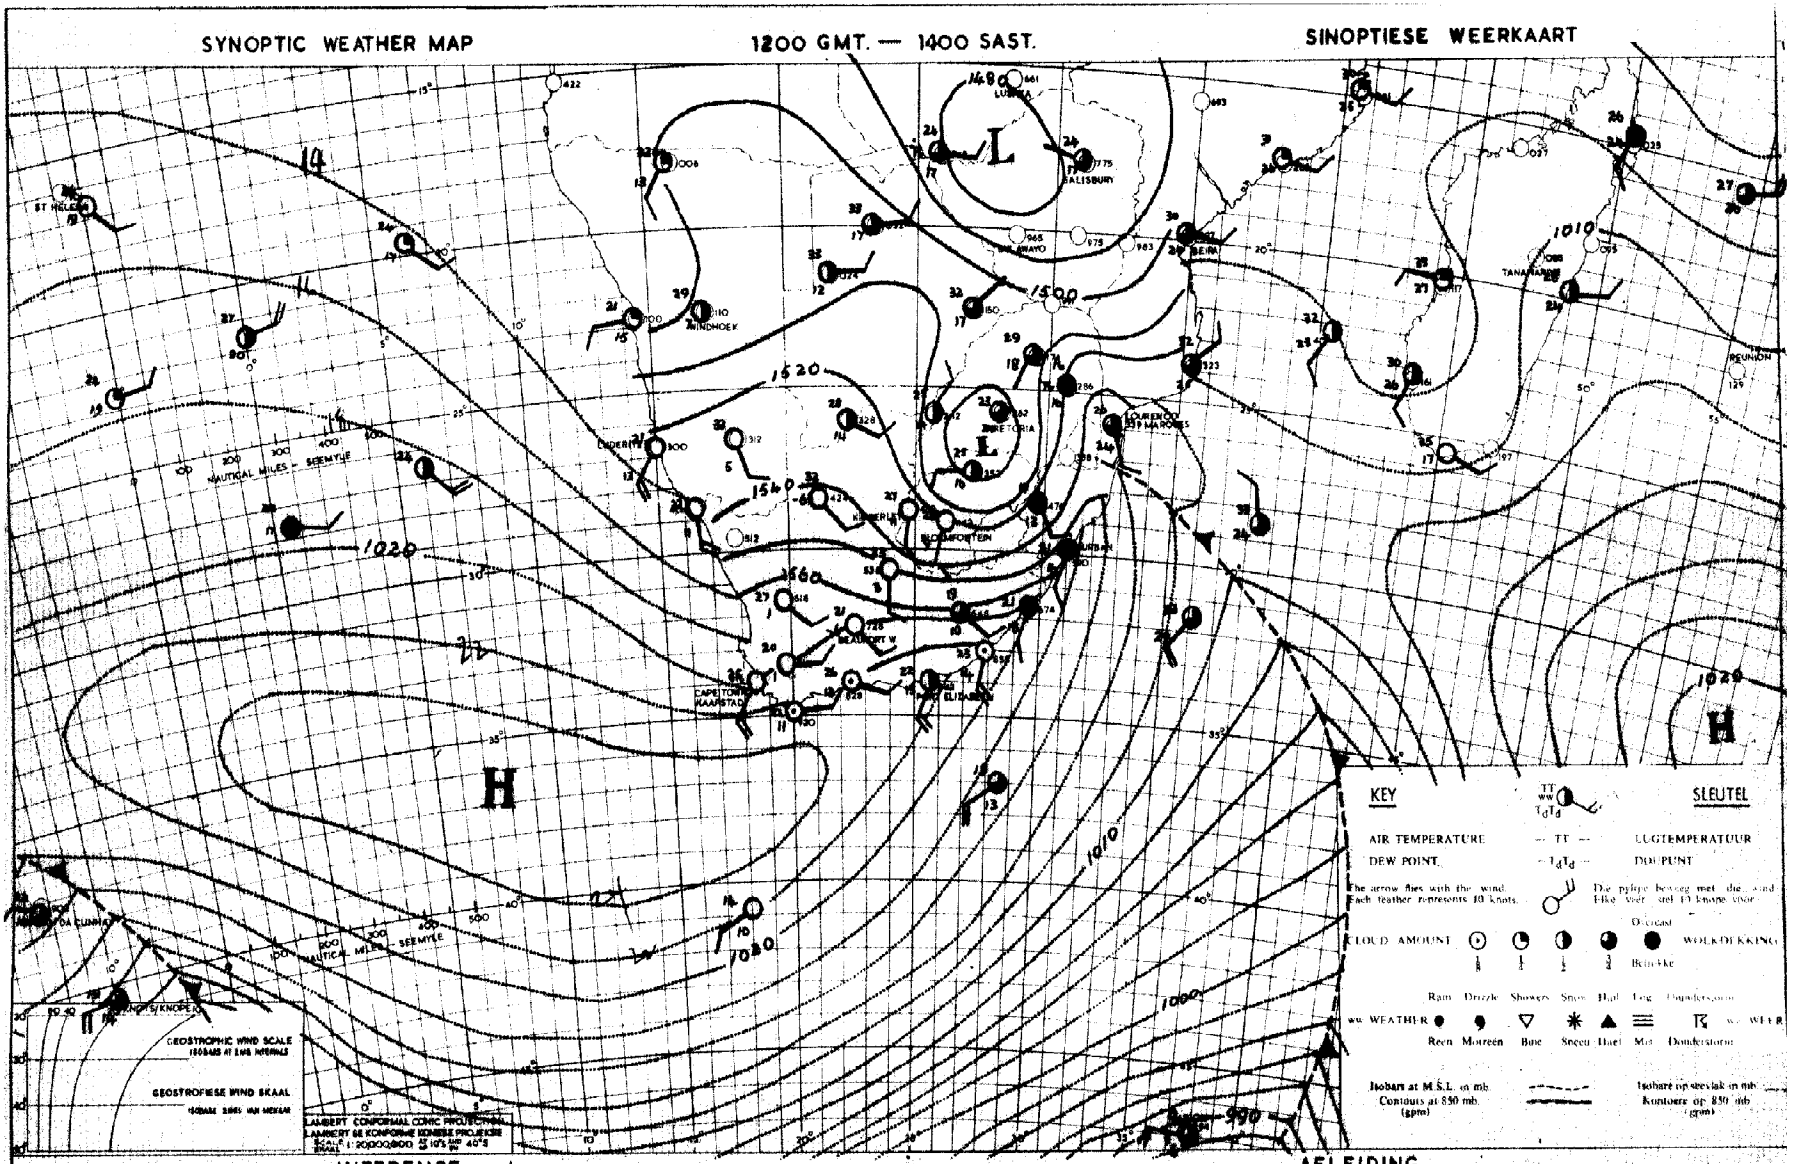
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 20 — 2 — 1959 DATUM — AFLEIDING

With the rising pressures over the eastcoast and the low over the interior, cooler cloudy conditions will occur over Natal and will spread over most of Transvaal and the northeastern Free State.

Met die druksetyging oor die oostkus en die laag oor die binneland sal koeler bewolkte toestande voorkom oor Natal en uitbrei oor die meeste dele van Transvaal en die noordoostelike Vrystaat.

Fairly humid air is moving slowly southwards over South West Africa and Bechuanaland. Isolated thunder-showers will develop over these regions and possibly also over Northern Cape.

Taamlik vogtige lug beweeg stadig suidwaarts oor Suidwes-Afrika en Betsjoeanaland. Los donderbuie sal oor die dele voorkom en moontlik ook na Noord-Kaapland uitbrei.

INFERENCE

DATE 22 - 2 - 79 DATUM

AFLEIDING

Waves are developing in the trough to the West of the country and little change is expected in the prevailing fair weather conditions. A few thundershowers are still possible over South West Africa, Bechuanaland and over Northern Cape.

Golwe ontwikkel in die trog wes van die land en min verandering in die heersende, redelike mooi-weerstoestande word verwag. Enkele donderbuie is nog moontlik oor Suidwes-Afrika, Betsjoeanaland en oor Noord Kaapland.

The waves south of the strong ridge of high pressure of the ocean move southwards and little change is expected in the prevailing weather conditions.

Die golwe suid van die sterk hoogdruk-gordel oor die oseaan en beweeg suidooswaarts en min verandering van die heersende weerstoestande word verwag.

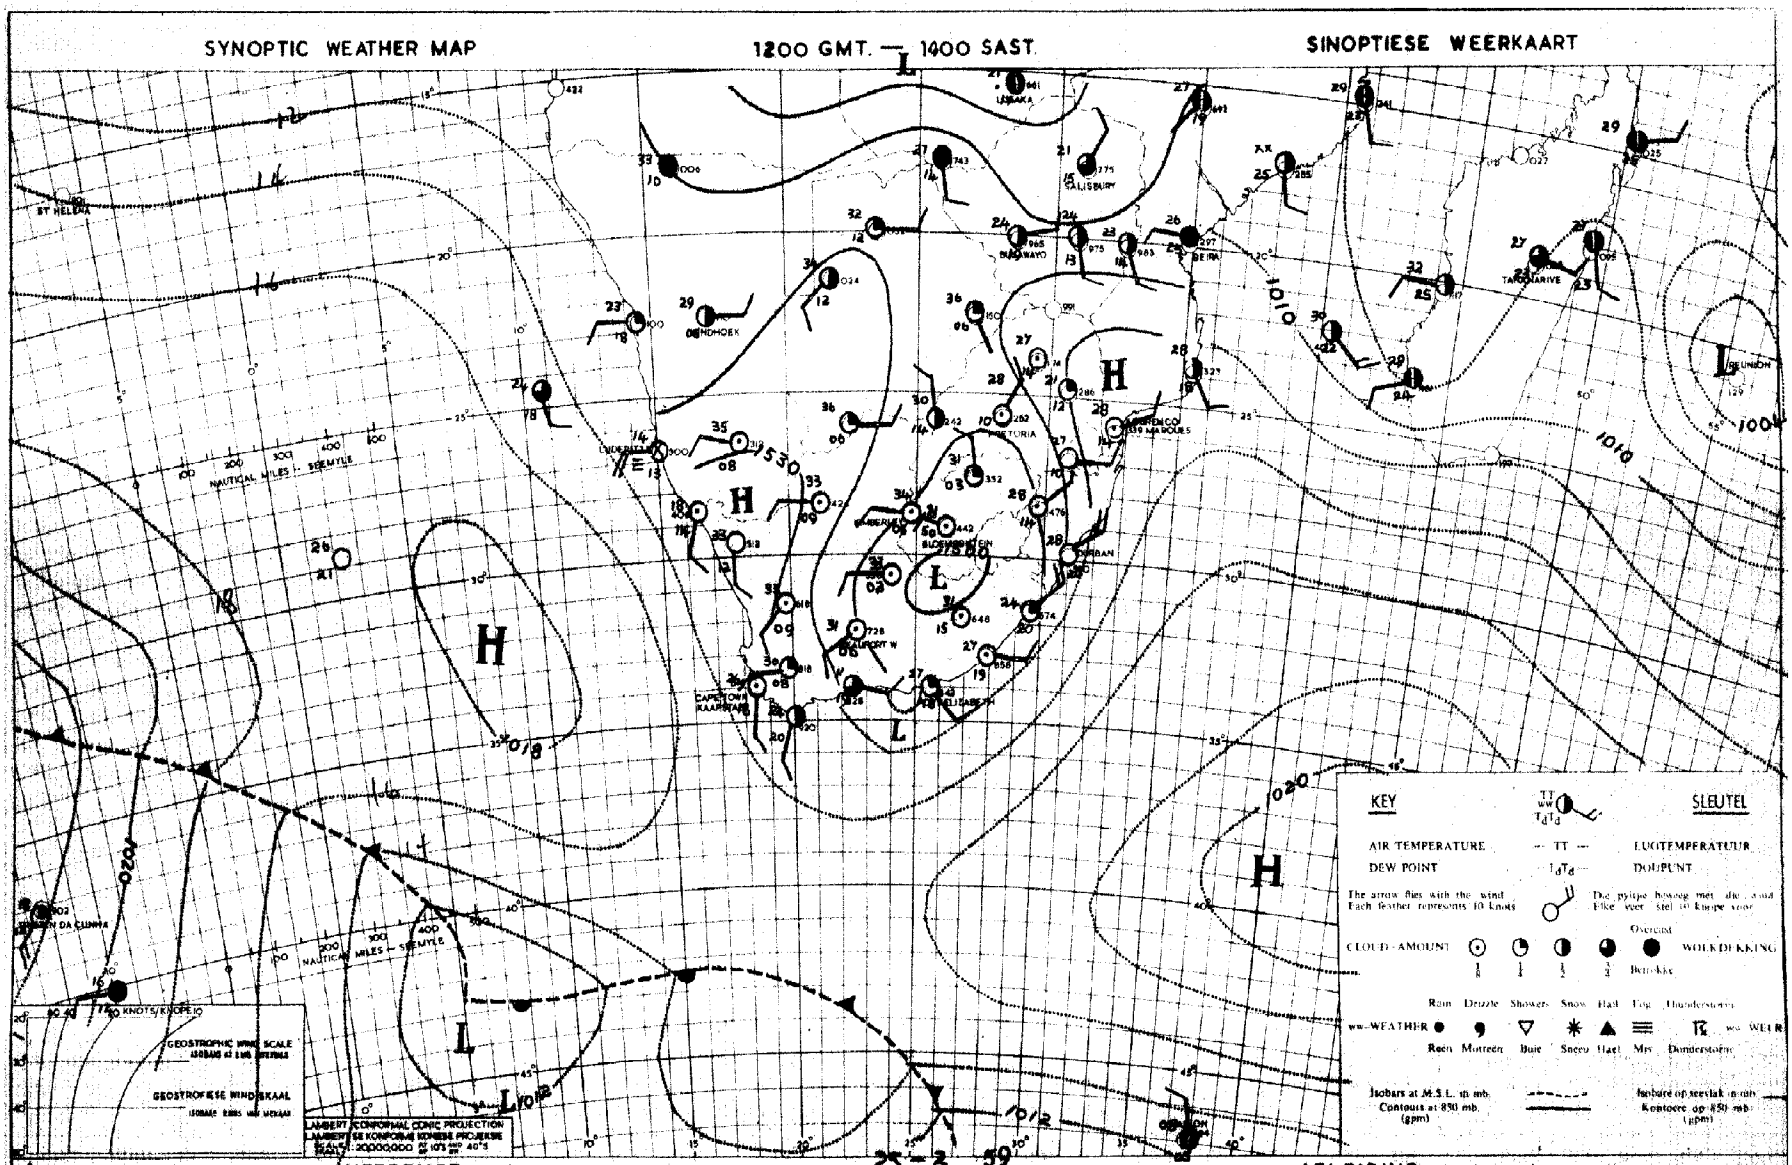
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 25 - 2 19 59 DATUM AFLEIDING

There is an upper high over the interior and conditions remain unfavourable for rain. Isolated light thundershowers are however possible over Bechuanaland and the western part of the Transvaal, but it will be mainly fine and warm to hot otherwise.

Daar is 'n bolug hoog oor die binneland en toestande bly ongunstig vir reën. Enkele ligte donderbuie is egter moontlik oor Betsjoeanaland en die westelike Transvaal maar oorigens sal dit hoofsaaklik mooi weer en warm tot baie warm wees.

INFERENCE

DATE 26 - 2 - 1959 DATUM

AFLEIDING

Somewhat cooler cloudy conditions will spread over the southeastern coastal regions and later also over Natal. It will begin to clear, however, over the southwestern and southern coastal regions.

Ietwat koeler bewolkte toestande sal uitbrei oor die suidoostelike kusgebiede en later ook oor Natal, maar dit sal begin opklaar oor die suidwestelike en suidelike kusgebiede.

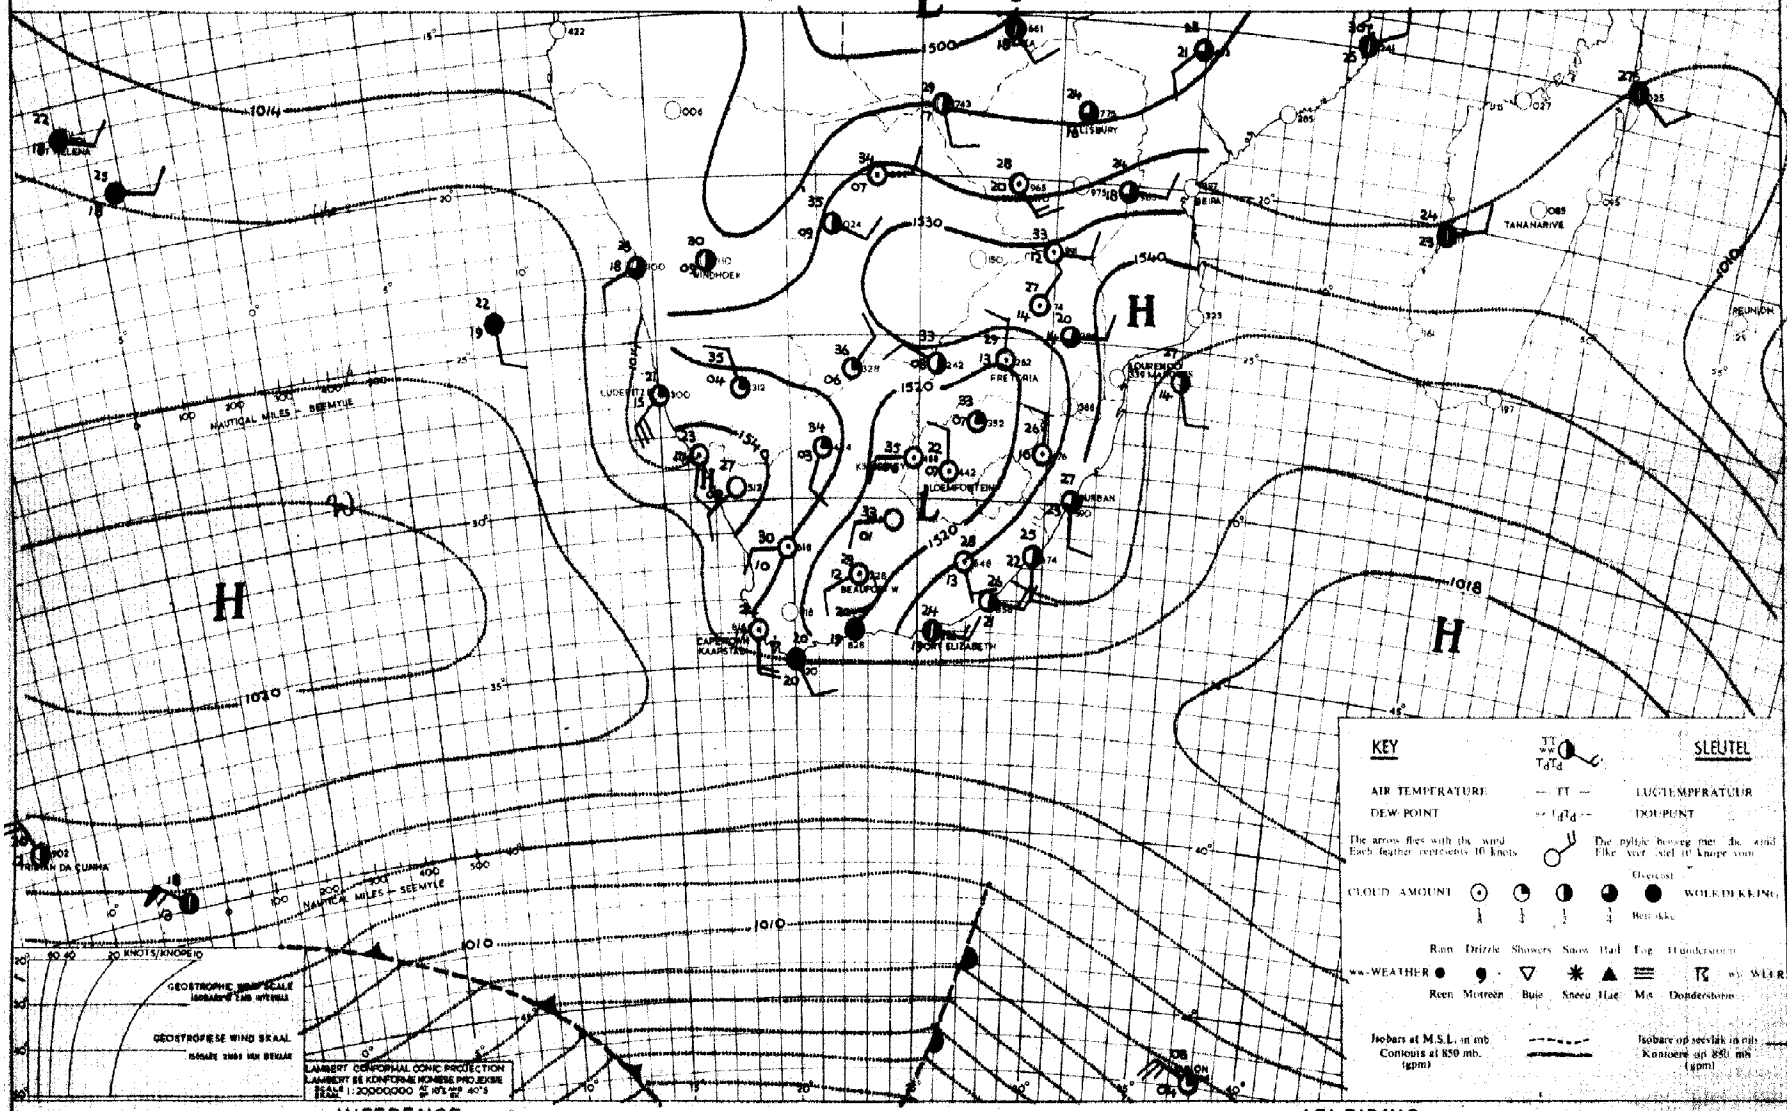
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 27 - 2 - 19 59 DATUM AFLEIDING

An upper air trough is developing over the west coast and it is expected that conditions will become more favourable for thundershowers over the Transvaal, northern Cape, Natal, the Free State and Bechuanaland. It will be fairly cloudy over the southern and south eastern coastal regions of the Union.

'n Boligtrog is skynbaar besig om oor die weskus te ontwikkel en na verwagting sal toestande geleidelik meer gunstig word vir donderbuie oor Transvaal, Noord-Kaapland, Natal, die Vrystaat en Betsjoeanaland. Oor die Suidelike en suidoostelike kusgebiede sal dit oor die algemeen taamlik bewolk wees.

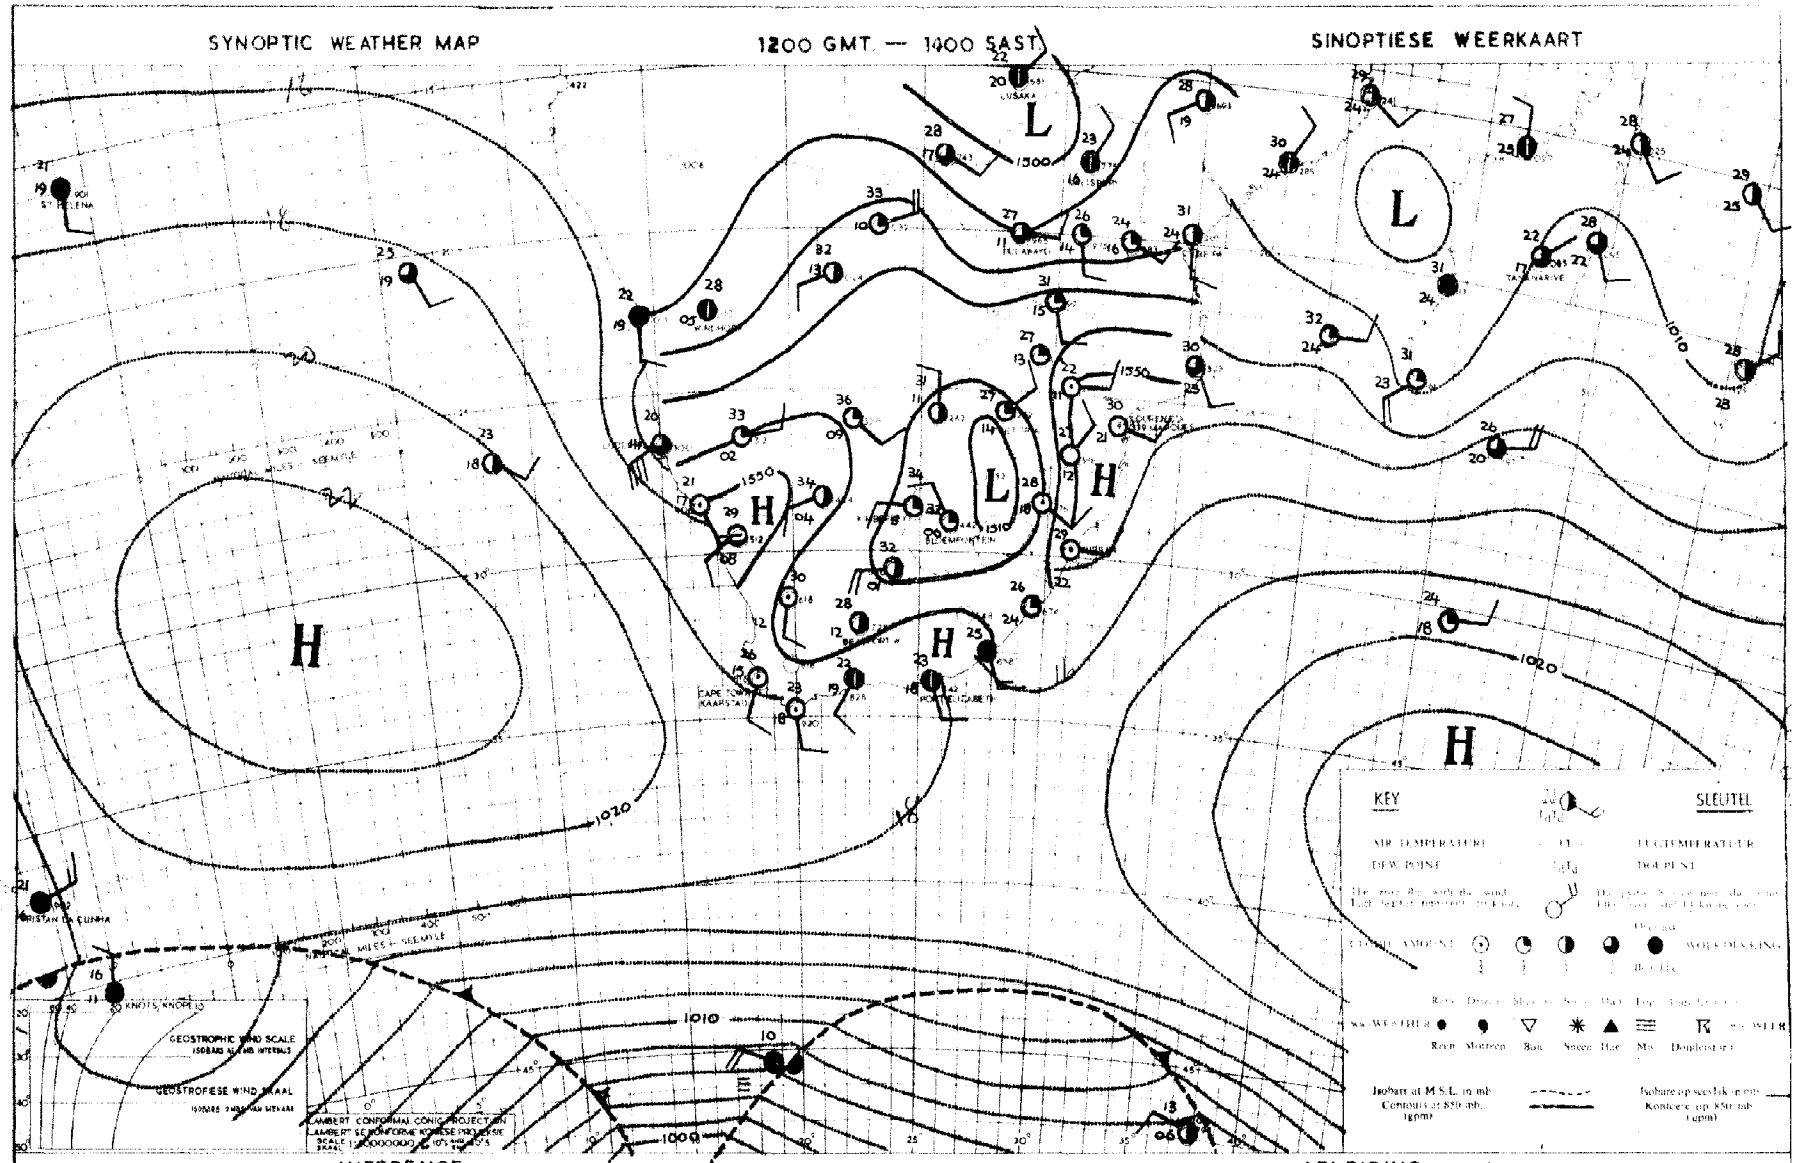
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST SINOPTIESE WEERKAART



INFERENCE

The pressure is falling along the west coast and an upper air trough is developing there. Humid air is moving slowly southwards over the south western half of the interior and it is expected that it will be cloudy over these parts and thundershowers will develop in the afternoons and evenings.

DATE 28 - 2 - 1959 DATUM

AFLEIDING

Die druk daal langs die weskus en 'n bolugtrog is besig om daar te ontwikkel. Vogtige lug beweeg stadig suidwaarts oor die suidwestelike helfte van die binneland en na verwagting sal dit gedeeltelik bewolk wees oor die dele en donderbuie sal in die namiddae en aande ontwikkel.

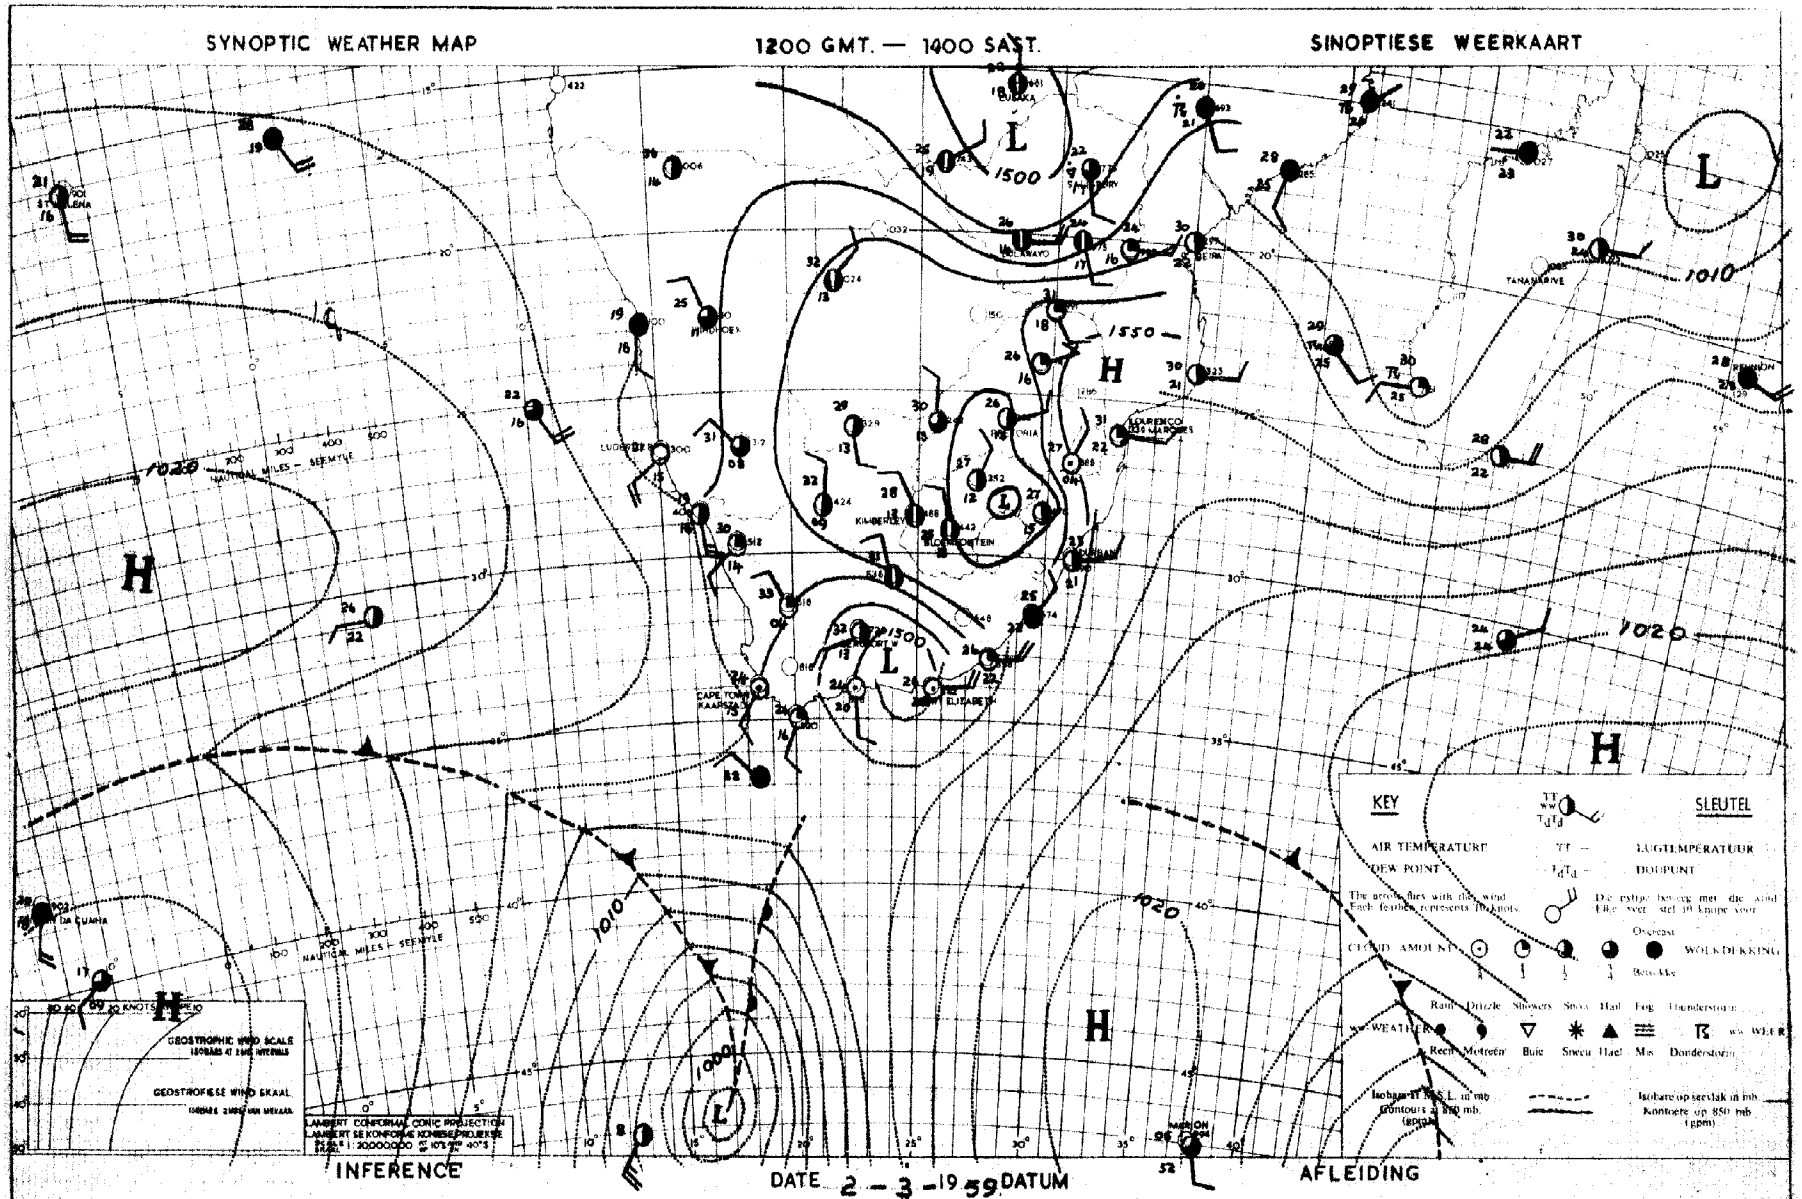
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 2 — 3 — 1959 DATUM AFLEIDING

Warm and fairly humid air, is still moving over the interior regions and thundershowers will recur. The approaching cold front will bring cooler, cloudy weather with showers over South-western Cape.

Warm en taamlik vogtige lug beweeg nog oor die binnelandse gebiede en donderbuie sal voorkom. Die naderende koufront sal koeler, bewolkte weer met buie aanbring oor Suidwes-Kaapland.

INFERENCE

DATE 3 - 3 - 19 59

AFLEIDING

With the upper air trough over the west coast and the humid air over the central part of the Union, it will be fairly cloudy over the eastern half of the Cape Province, the Northern Cape, the Free State and Bechuanaland, and scattered thundershowers will occur. It will become cloudy over the southern coastal regions and occasional rain or drizzle will occur.

Met die bolugtrog oor die weskus en die redelike vogtige lug oor die sentrale deel van die Unie, sal dit taamlik bewolk wees oor die oostelike helfte van die Kaapprovinsie, Noord-Kaapland, die Vrystaat en Betsjoeanaland en verspreide donderbuie sal uitsak. Dit sal bewolk word oor die suidelike kusgebied en afwisselende reën of motreën sal voorkom.

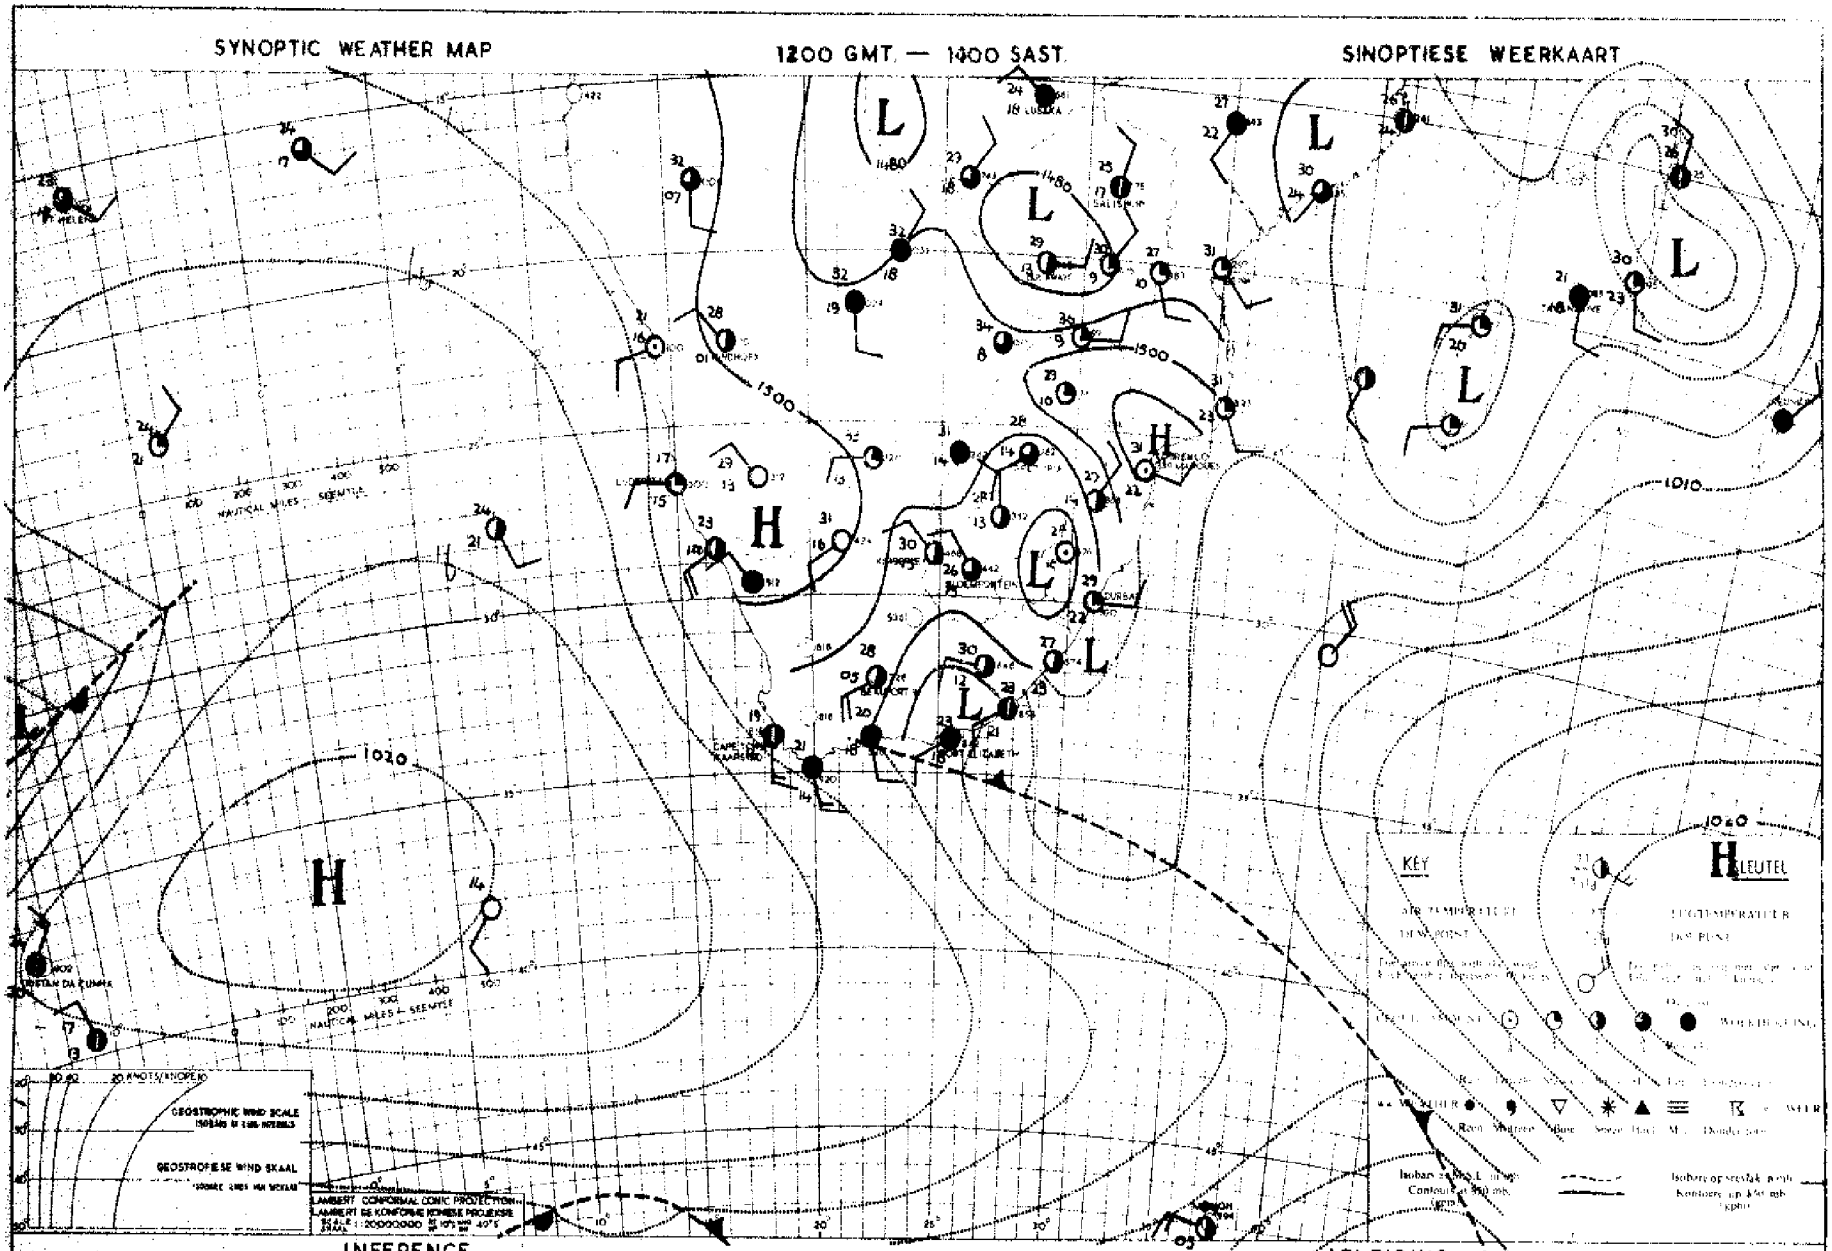
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 4 - 3 - 1959 DATUM — AFLEIDING

Cooler, cloudy conditions with rain will spread further over the southern and eastern parts of the Cape province and Natal. Warm, partly cloudy conditions with thundershowers will still occur over Bechuanaland, Transvaal, Northern Cape and the Free State.

Koeler, bewolkte toestande met reën sal verder uitbrei oor die suidelike en oostelike dele van Kaapland en Natal. Warm, gedeeltelik bewolkte toestande met donderbuie sal nog voorkom oor Betsjoeanaland, Transvaal, Noord-Kaapland en die Vrystaat.

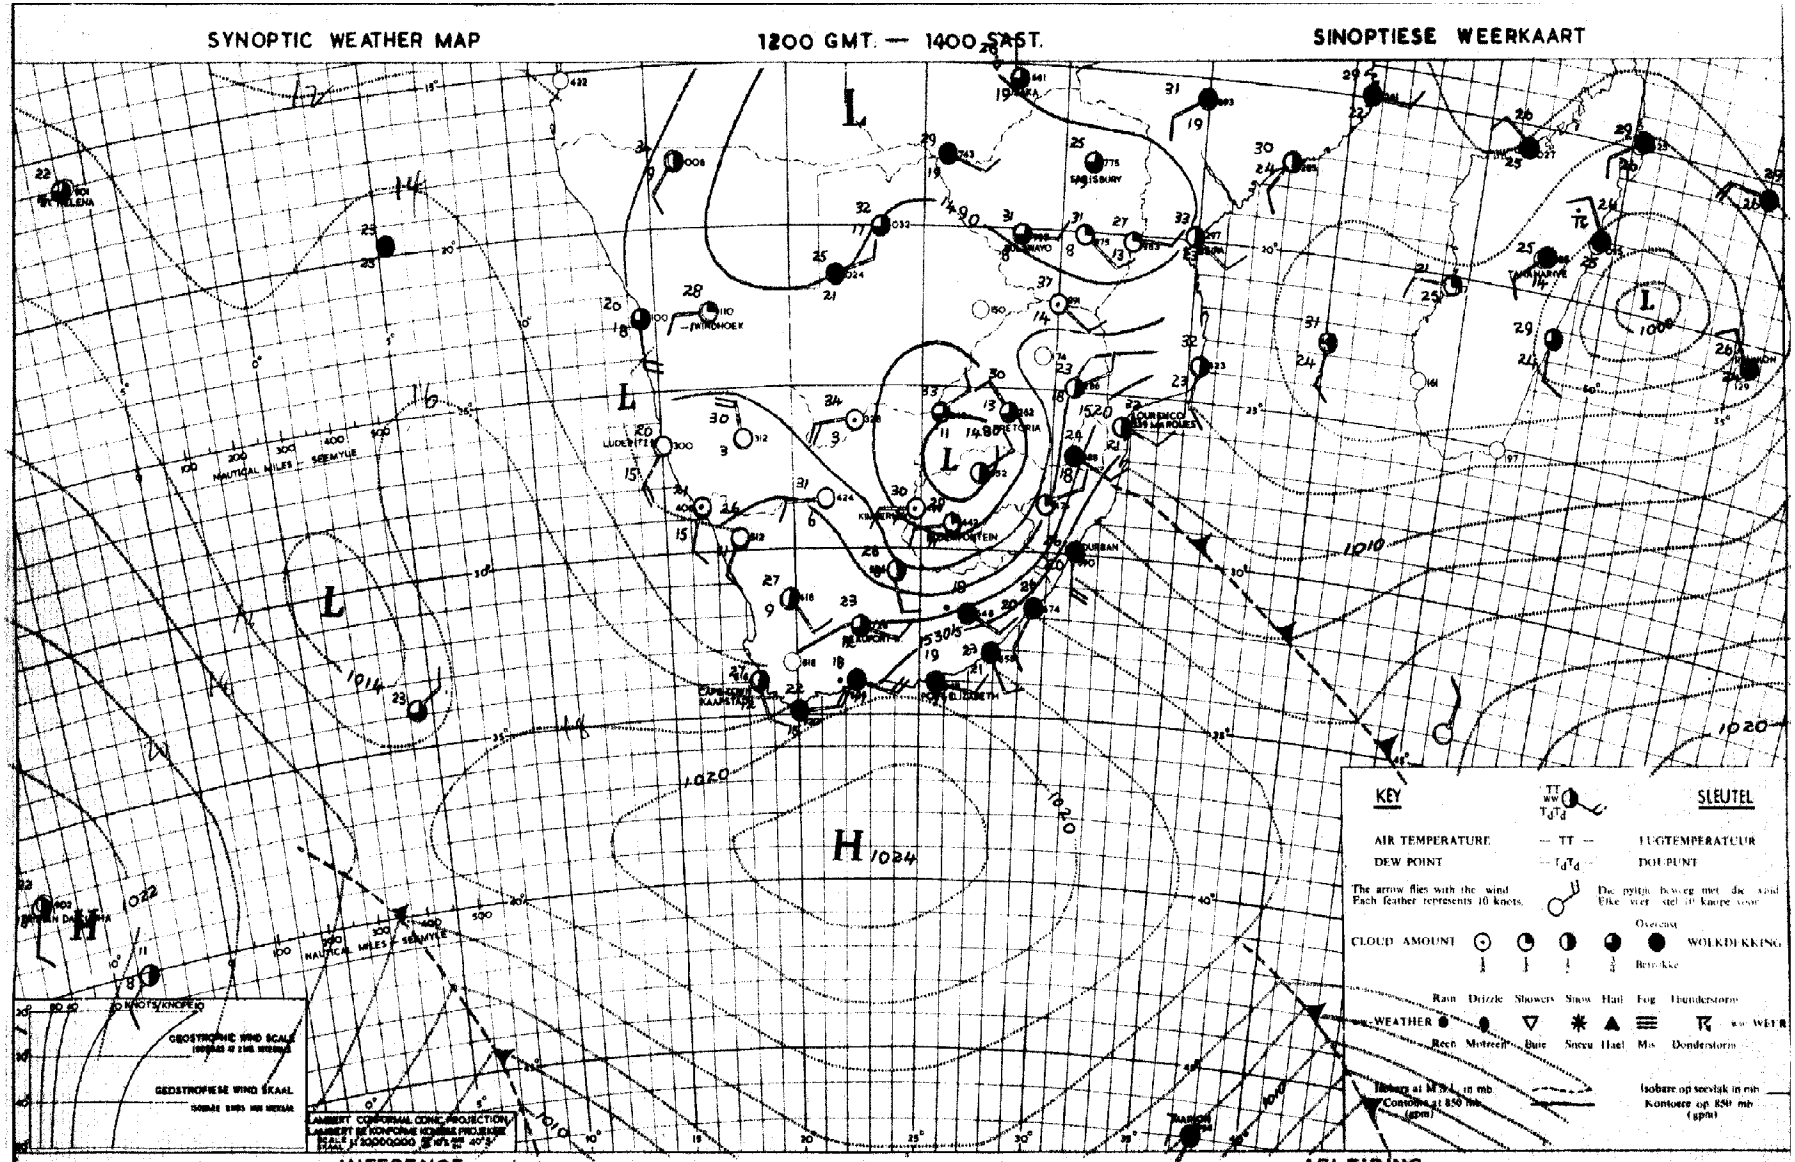
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE

DATE 5 - 3 - 1959 DATUM

With the high to the south of the continent and with the pressure rise over the south-east coast it is expected that appreciable convergence will develop over the Transvaal and the northern parts of the Free State and Northern Cape. The upper air over these parts is reasonably humid and scattered thundershowers will develop. Thundershowers will also develop over the north eastern half of Bechuanaland but it will be mainly fine over the remainder of the interior.

AFLEIDING

Met die hoog suid van die vasteland en die drukstyging langs die suidooskus sal daar na verwagting taamlik konvergensie ontwikkel oor die Transvaal en die noordelike dele van die Vrystaat en Noord-Kaapland. Die lug oor die dele is redelik vogtig en verspreide donderbuie sal uitsak. Oor Natal sal dit bewolk en koel wees met plaaslike buie. Donderbuie sal ook ontwikkel oor die noordoostelike helfte van Betsjoeanaland, maar oor die res van die binneland sal dit hoofsaaklik mooiweer wees.

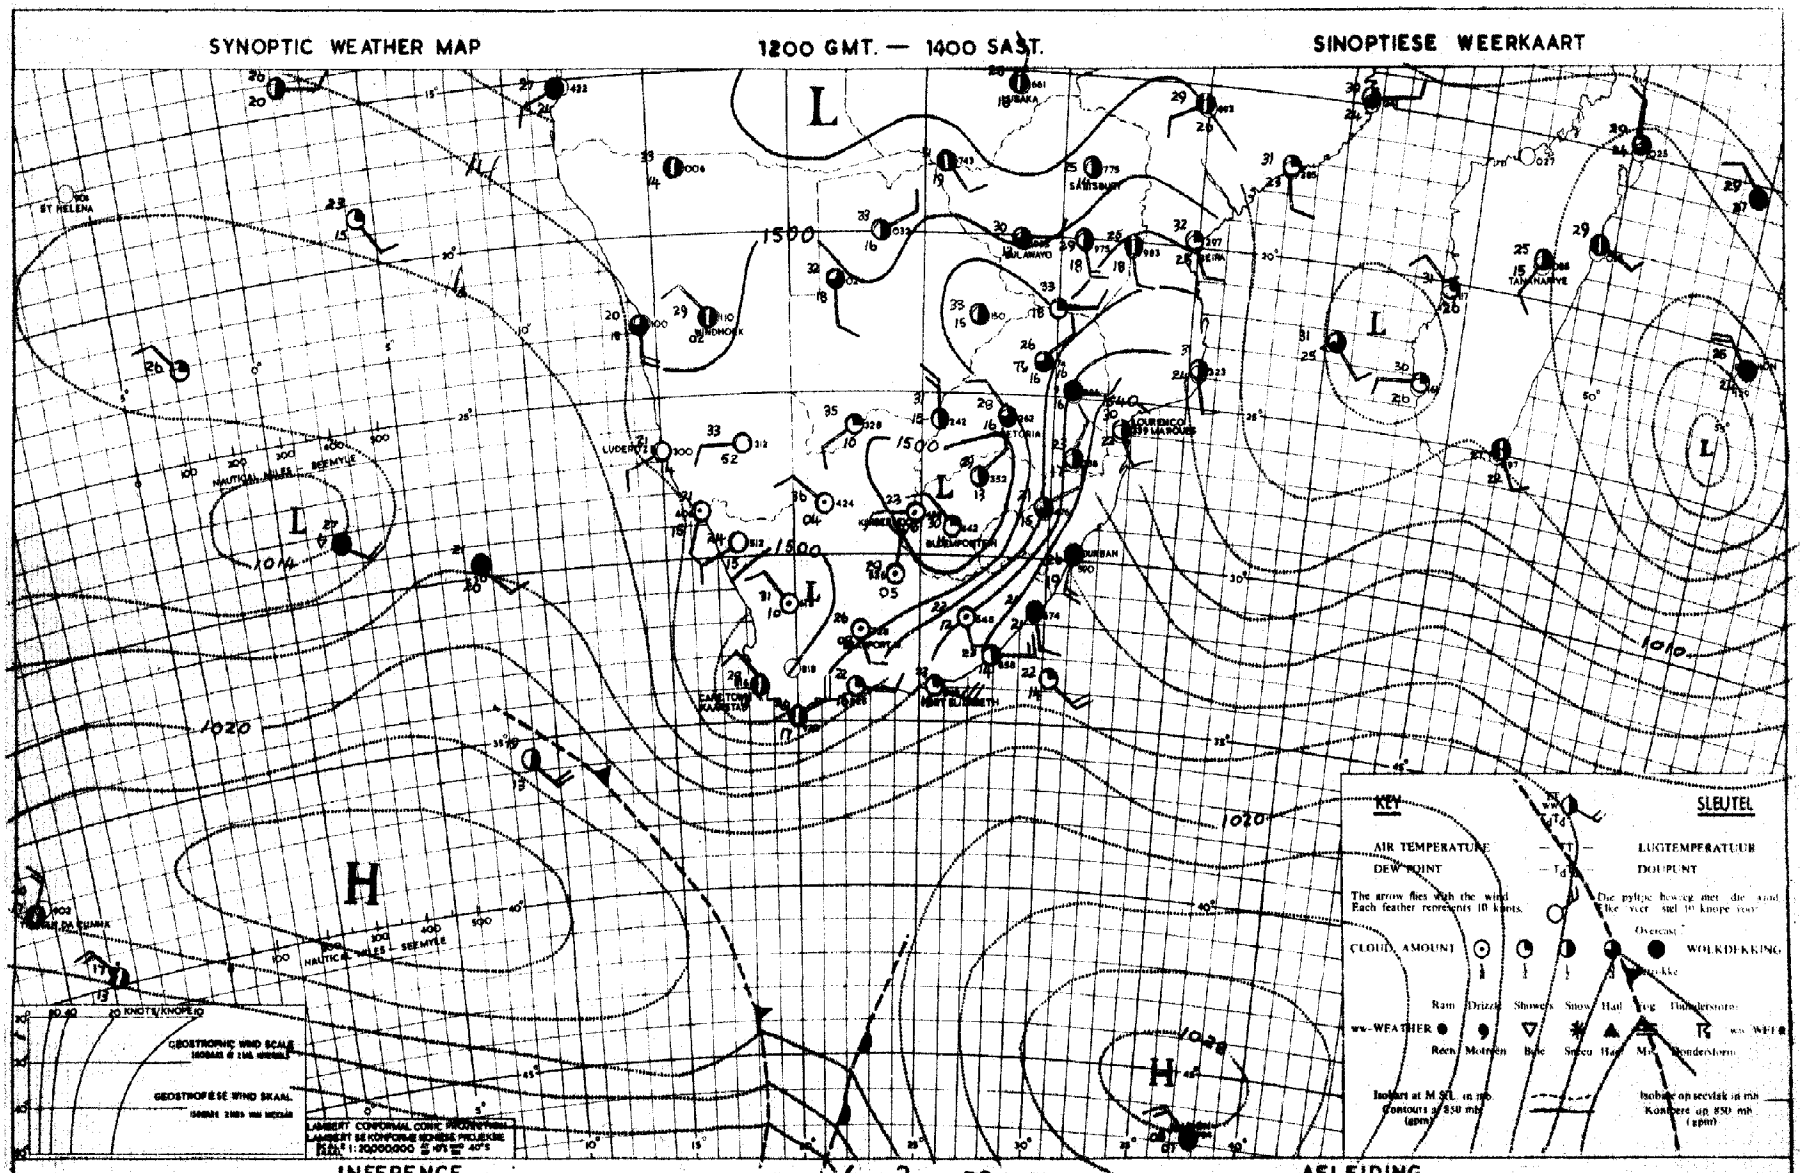
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 6 – 3 – 1959 DATUM AFLEIDING

A well marked trough is situated over the western Union and fairly moist air is moving over the eastern half of the Union, Bechuanaland and northern South-West Africa. Local thundershowers will therefor occur over these regions.

'n Duidelike bolugtrog is aanwesig oor die westelike Unie en betreklik vogtige lug beweeg oor die oostelike helfte van die Unie, Betsjoeanaland en noordelike Suidwes-Afrika. Plaslike donderbuie word dus oor hierdie gebiede verwag.

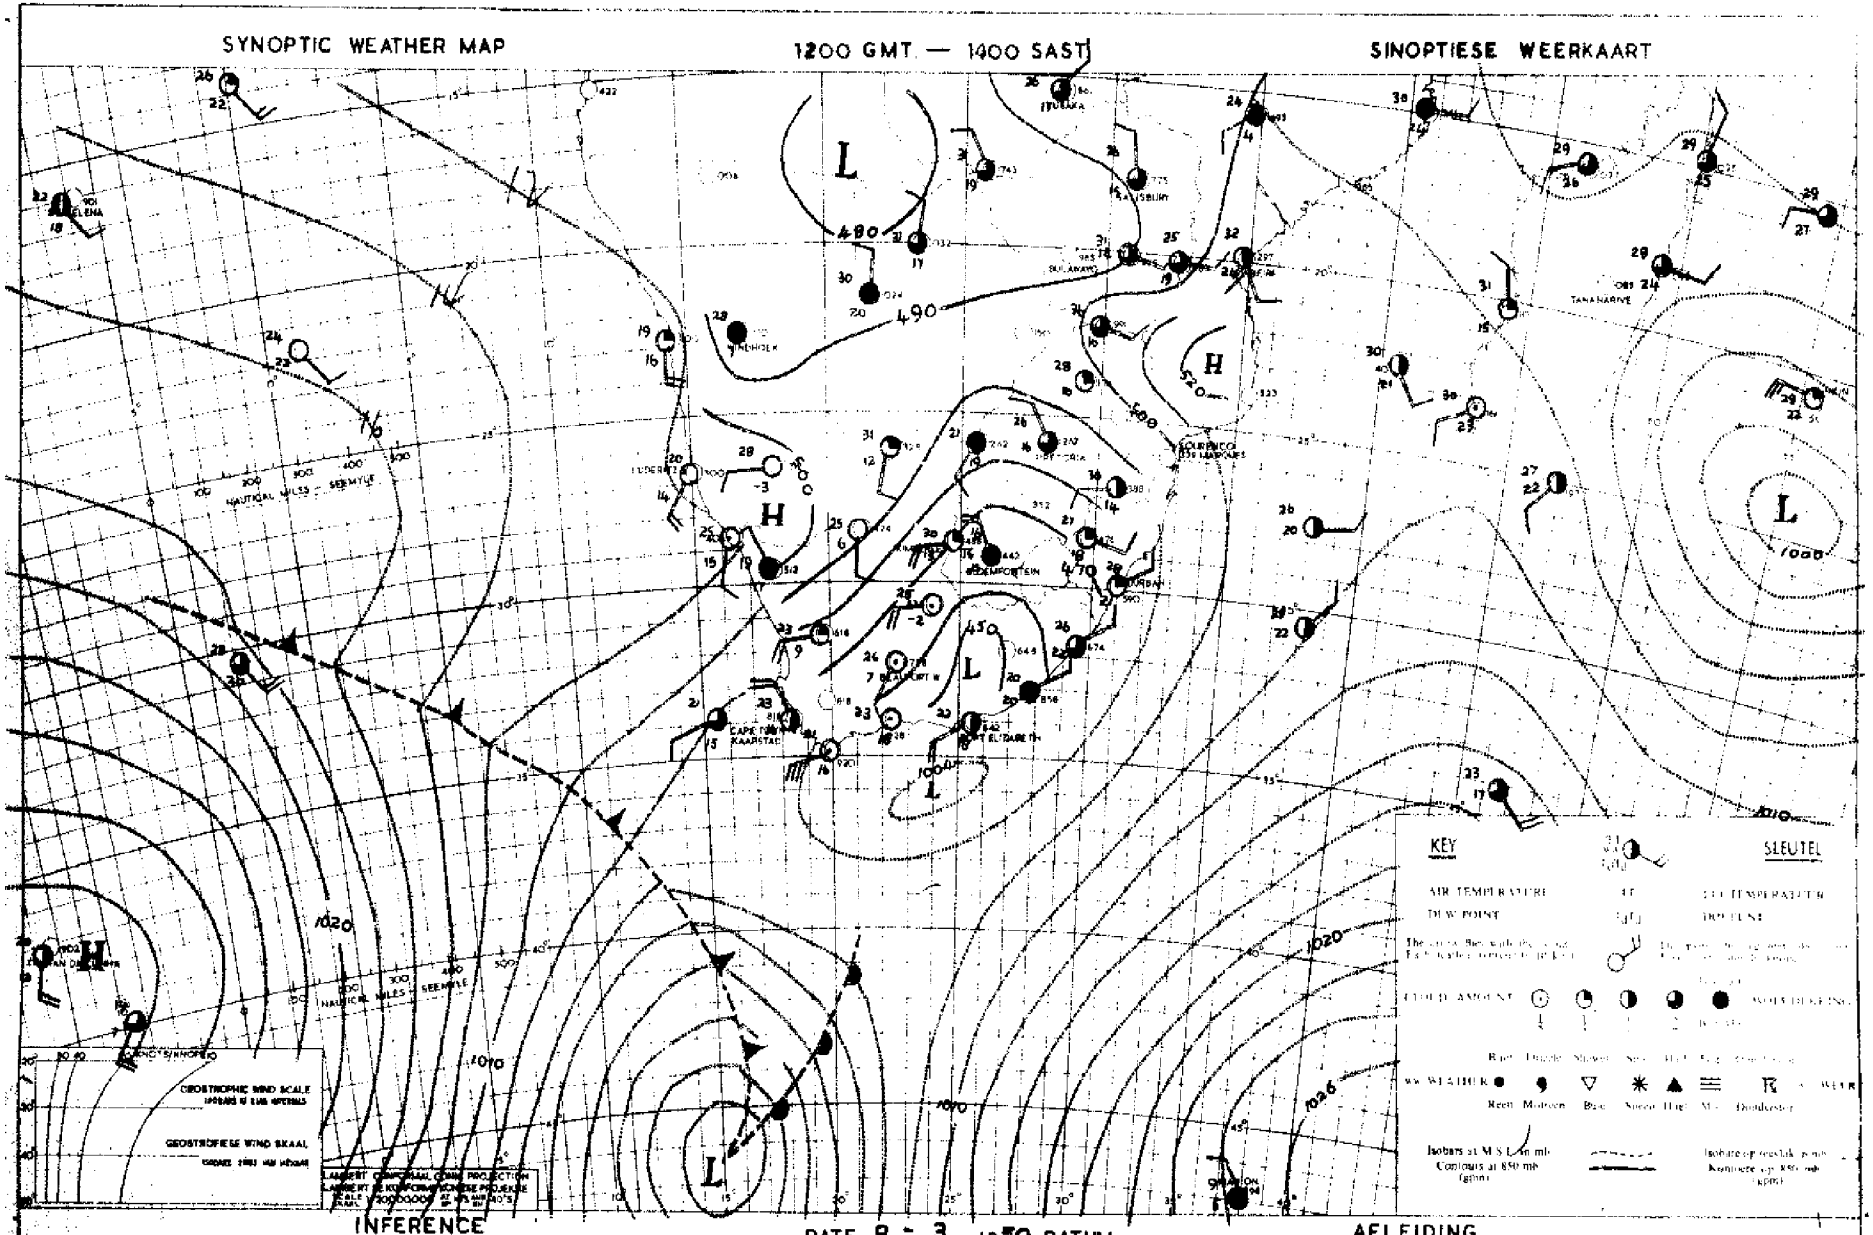
SYNOPTIC WEATHER MAP

1200 GMT — 1400 SAST

SINOPTIESE WEERKAART



INFERENCE

DATE 8 - 3 1959 DATUM

AFLEIDING

With the approaching cold front cooler, cloudy weather with showers will spread over the southwestern, southern and eastern Cape and over Natal later. Warm, moist air still moves over the northern parts of Bechuanaland and southwest Africa, Transvaal, Natal interior and the northern Free State and thundershowers will occur here.

Met die naderende koufront sal koeler, bewolkte weer met buie uitbrei oor suidwestelike, suidelike en oostelike Kaapland en later oor Natal. Warm, vogtige lug beweeg nog oor die noordelike dele van Betsjoeanaland en Suidwes-Afrika, Transvaal, Natal-binneland en noordelike Vrystaat en donderbuie sal hier voorkom.

INFERENCE

DATE 10 - 3 - 19 59 DATUM

AFLEIDING

With the ridge of high moving in south of the continent it is expected that moist air will spread over most of the interior regions and thundershowers will start occuring. Over Transvaal and Natal it will remain cloudy and cool at first.

Met die rug van hoë druk wat suid van die vasteland inbeweeg sal vogtige lug uitbrei oor meeste dele van die binneland en donderbuie sal begin voorkom. Oor Transvaal en Natal sal dit vireers nog bewolk en koel bly.

SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART

INFERENCE — DATE 12 - 3 1959 DATUM — AFLEIDING

Warm, moist air is moving southwards over South-West Africa, Bechuanaland and Northern Cape and thundershowers will occur over these regions. A cell of high will probably split off east of Natal and then the cloudy conditions over Natal and the Transvaal will gradually clear up.

Warm, vogtige lug beweeg suidwaarts oor Suidwes-Afrika, Betsjoeanaland en Noord-Kaapland en donderbuie sal oor hierdie gebiede voorkom. 'n Sel van hoë druk sal waarskynlik ontwikkel oos van Natal en dan sal die bewolkte weer oor Natal en Transvaal geleidelik opklaar.

The arrow flies with the wind. Each feather represents 10 knots. — Die pylpie beweeg met die wind. Elke vlier stel 10 knope voor.

CLOUD AMOUNT — Overcast — WOLKDEKKING — Bedekte

WEATHER — Rain, Drizzle, Showers, Snow, Hail, Fog, Thunderstorm — WEER — Reen, Motreen, Buie, Sneeu, Hael, Mis, Donderstorm

Isobars at M.S.L. in mb. — Isobare op seevlak in mb.

Contours at 850 mb. (gpm) — Kontoere op 850 mb. (gpm)

INFERENCE — DATE 13 - 3 - 1959 DATUM — AFLEIDING

A weak trough is apparently developing over the west coast and it is expected that somewhat more humid air will flow southwards over South West Africa and thundershowers will occur over South West Africa, Bechuanaland and the northern parts of the Karoo. Little change is expected elsewhere.

'N Swak trog ontwikkel blykbaar oor die weskus en na verwagting sal ietwat vogtiger lug suidwaarts beweeg oor Suidwes Afrika en donderbuie sal voorkom oor Suidwes-Afrika, Betsjoeanaland en die noordelike dele van die Karoo. Min verandering word verwag elders

INFERENCE

DATE 14 - 3 - 1959 DATUM

AFLEIDING

Fairly moist air from the north is moving over the country and isolated thundershowers will develop over most regions.

Redelike vogtige lug uit die noorde beweeg oor die land en los donderbuie sal oor die meeste dele ontwikkel.

INFERENCE

DATE 15 — 3 1959 DATUM

AFLEIDING

With the cold front to the west, it will become cloudy and cooler with light rain over the southwestern Cape. It will be partly cloudy and warm elsewhere over the country with isolated thundershowers over most regions

Met die koufront na die weste sal dit bewolk en koeler word, met ligte reën oor Suidwes-Kaapland. Oor die res van die land sal dit gedeeltelik bewolk en warm wees met los donderbuie oor die meeste dele

INFERENCE

DATE 16-3-1959 DATUM

AFLEIDING

It is expected that cloudy and cool conditions with rain will spread eastwards over the southern coastal regions. Because there is strong northwesterly upper winds ahead of the front, scattered thunderstorms will occur over the southern parts of the interior.

Na verwagting sal bewolkte en koel toestande, gepaard met reën oostwaarts uitbrei oor die suidelike kusstreke. Aangesien daar sterk noordweste winde in die bolug is, voor die koufront sal taamlike, algemene donderbuie uitsak oor die suidelike dele van die binneland.

[3] Naby Groblersdal

Colder air is expected to spread to the northern Transvaal overnight and there will be an appreciable drop in temperature. Apart from scattered clouds over the north-eastern parts of the Union it will be mainly fine and cool over the country.

Kouer lug word verwag om oornag ook oor noordelike Transvaal uit te brei, en daar sal 'n aansienlike daling in temperatuur plaasvind. Afgesien van verspreide wolke oor die noordoostelike dele van die Unie, sal dit hoofsaaklik mooiweer en koel wees oor die land.

INFERENCE — DATE 19 – 3 – 1959 DATUM — AFLEIDING

The high to the south is moving rapidly eastwards. Cool cloudy conditions will occur over Transvaal at first but it will begin to clear over the southeastern coastal regions and over Natal.

Die hoog na die suide beweeg vinnig oostwaarts. Koel, bewolkte toestande sal aanvanklik voorkom oor Transvaal maar dit sal begin ooptrek oor die suidoostelike kus-streke en oor Natal.

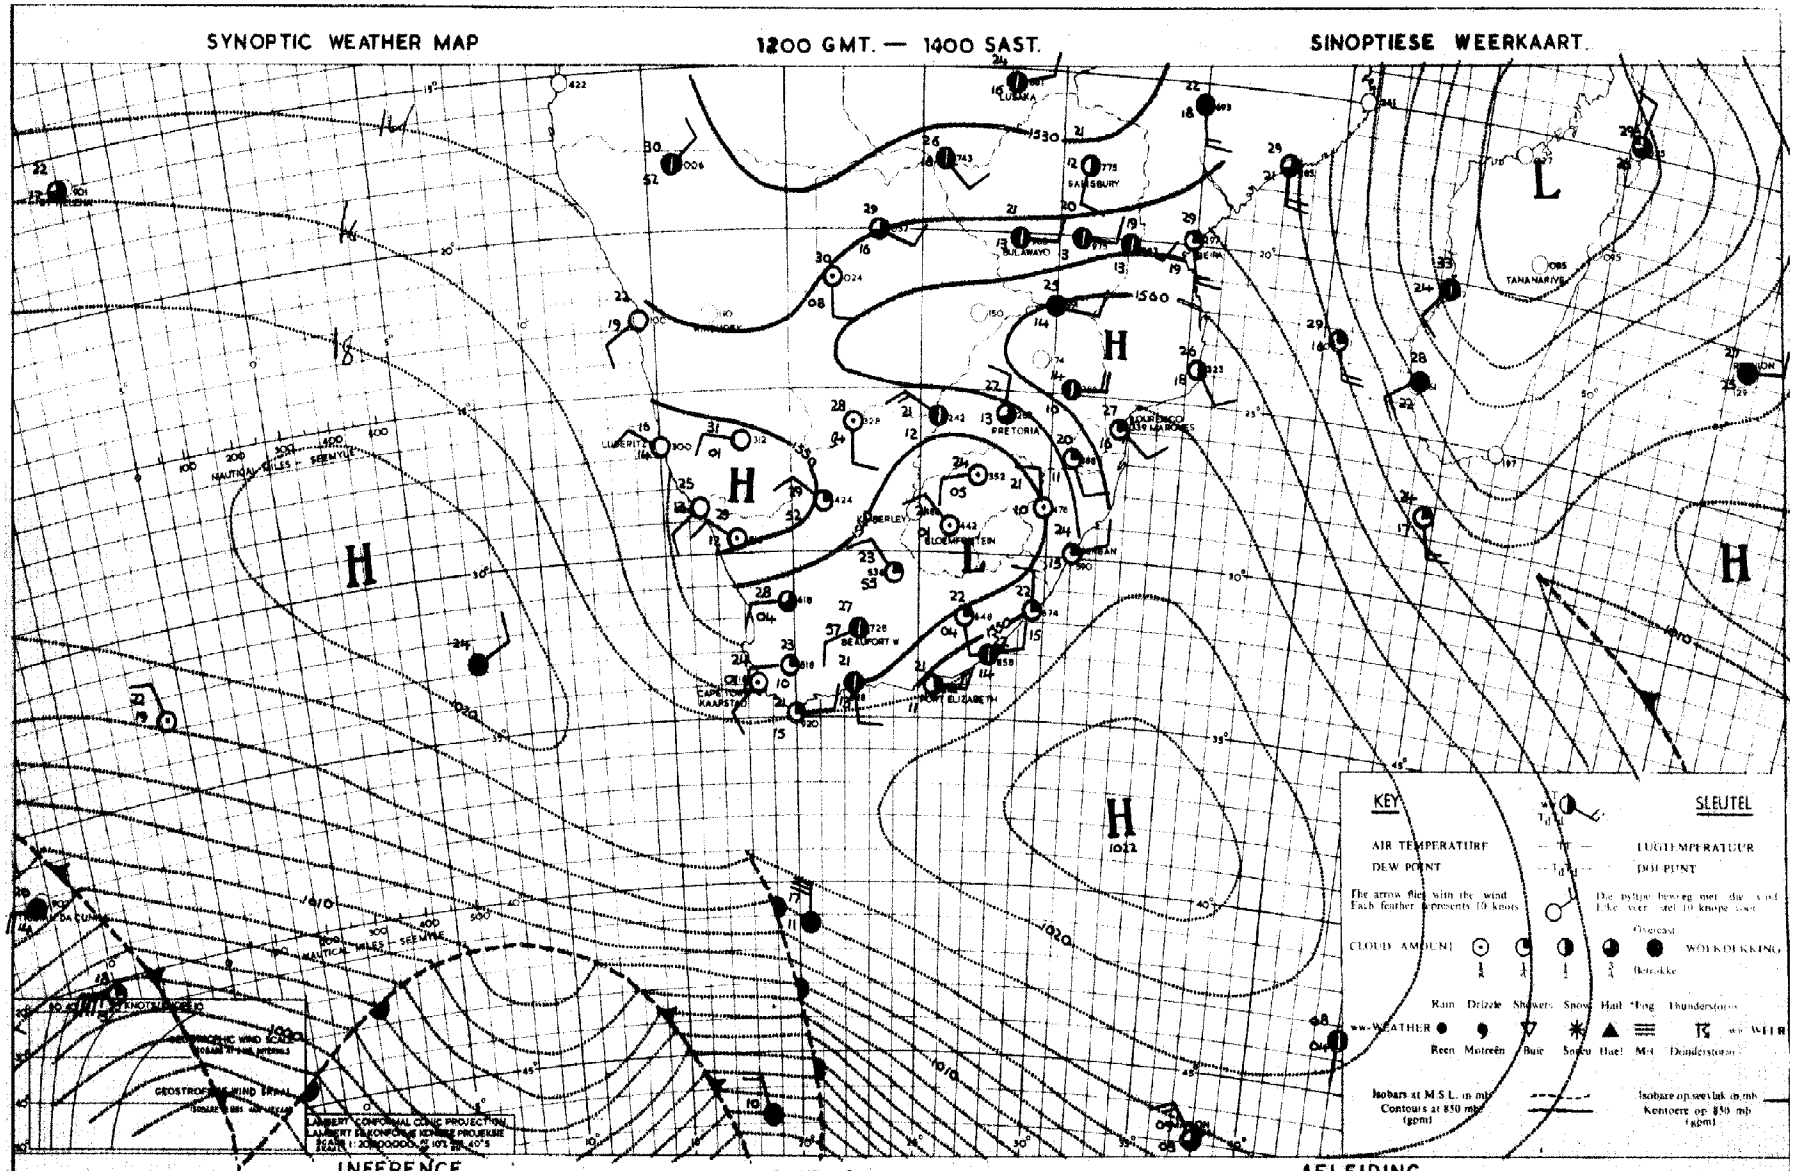
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART.



INFERENCE DATE 20 - 3 - 1959 DATUM AFLEIDING

There is a strong south-westerly upper flow over the interior and apart from scattered clouds over the Transvaal it will be fine over the interior.

There will be a further rise in temperature over the interior.

Daar is 'n sterk suidwestelike bolugstroming oor die binneland en afgesien van verspreide wolke oor Transvaal sal dit hoofsaaklik mooiweer wees oor die land. Temperatuur sal oor die algemeen verder styg oor die binneland.

SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART

INFERENCE DATE 22 - 3 - 1989 DATUM AFLEIDING

Because of a strong upper air ridge over the continent, little change is expected in the prevailing fine weather over the interior. It is expected that it will become cloudy over the south-western coastal belt later and slight rain or drizzle will occur.

As gevolg van n sterk bolugrug oor die binneland word min verandering verwag in die heersende mooi weer toestande oor die binneland. Na verwagting sal dit later bewolk en koeler word oor die suidwestelike kusgebiede en ligte reën of motreën sal voorkom.

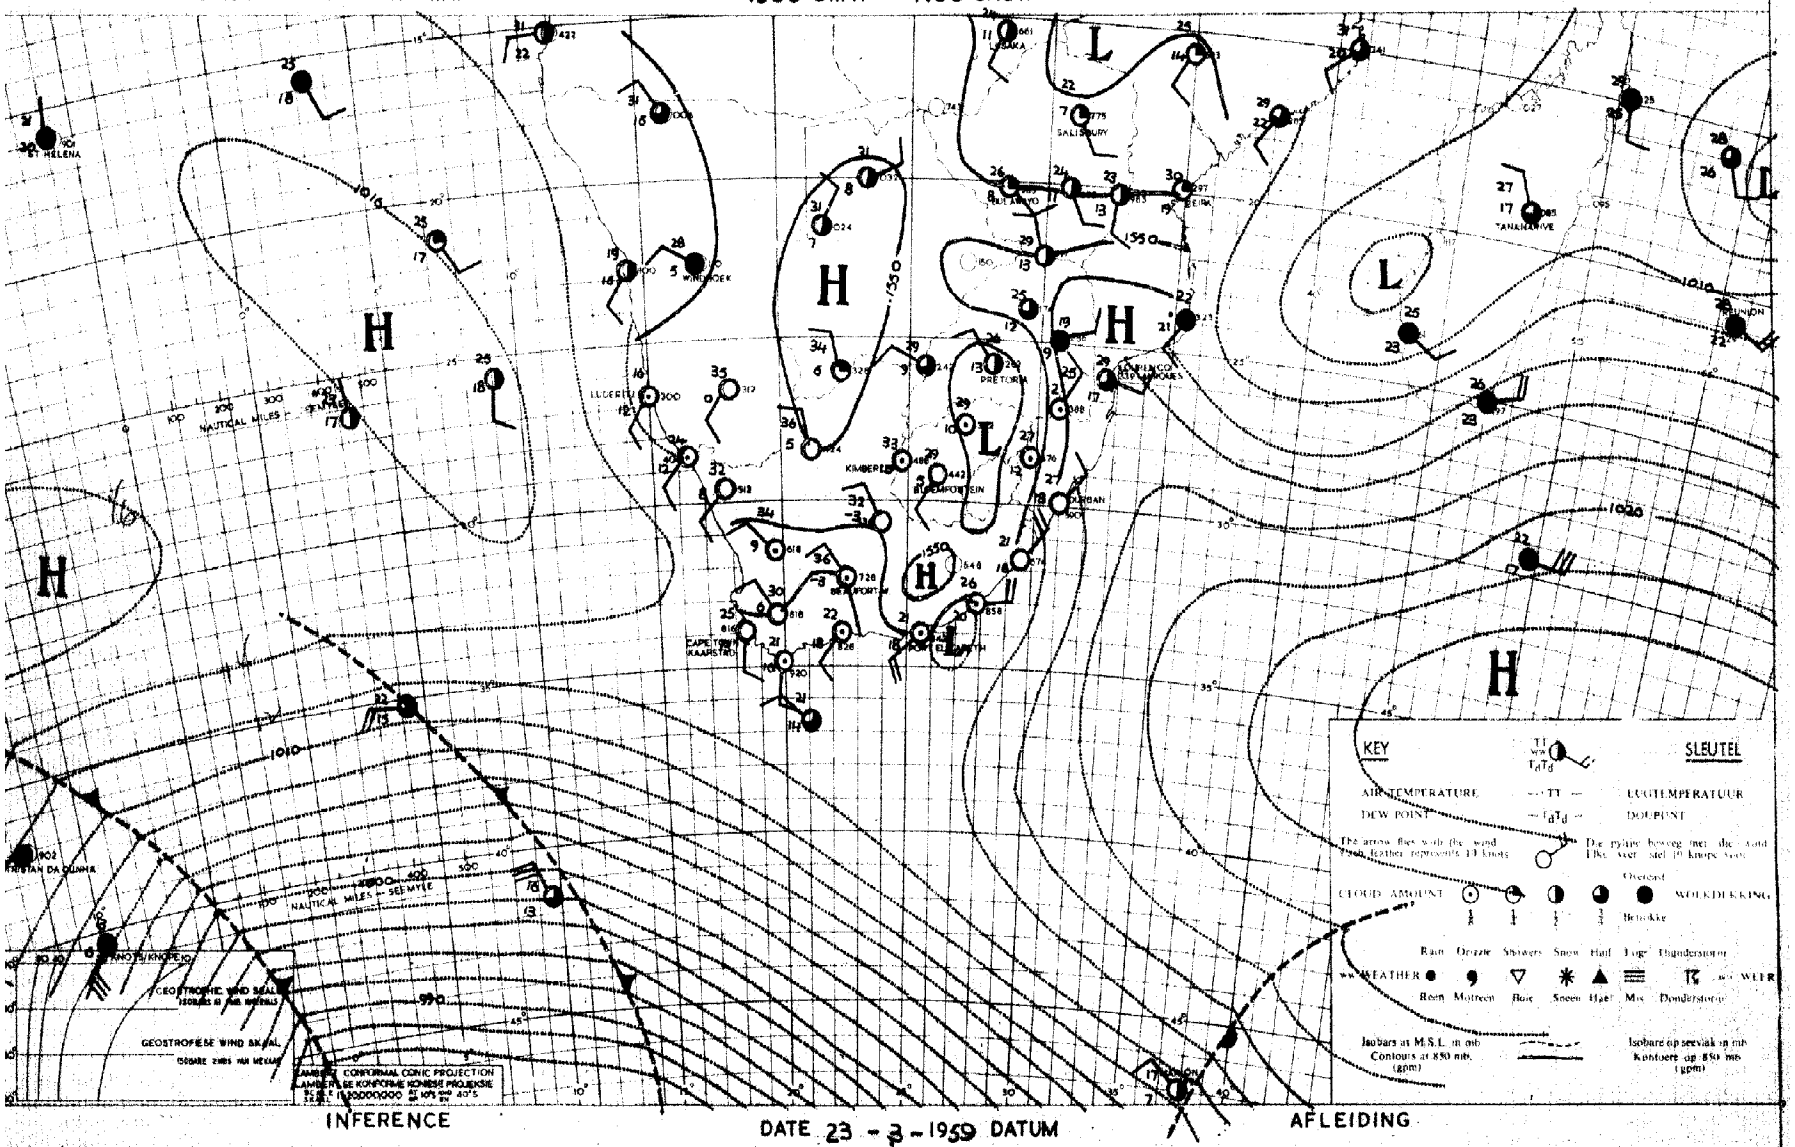
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 23 - 3 - 1959 DATUM AFLEIDING

With cyclone activity in the Mocambique channel cloudy conditions with showers will occur over the north-eastern Transvaal. Somewhat moister air is moving over the northern part of South West Africa and local thundershowers will occur over there but otherwise the weather over the country will remain warm and dry.

Met sikloonaktiwiteit in die Mosambiekkanaal sal bewolkte toestande met buie voorkom oor die noordoostelike Transvaal. Effens vogtiger lug beweeg oor die noordelike deel van Suidwes-Afrika en los donderbuie mag daar voorkom maar origens sal dit warm en droog bly.

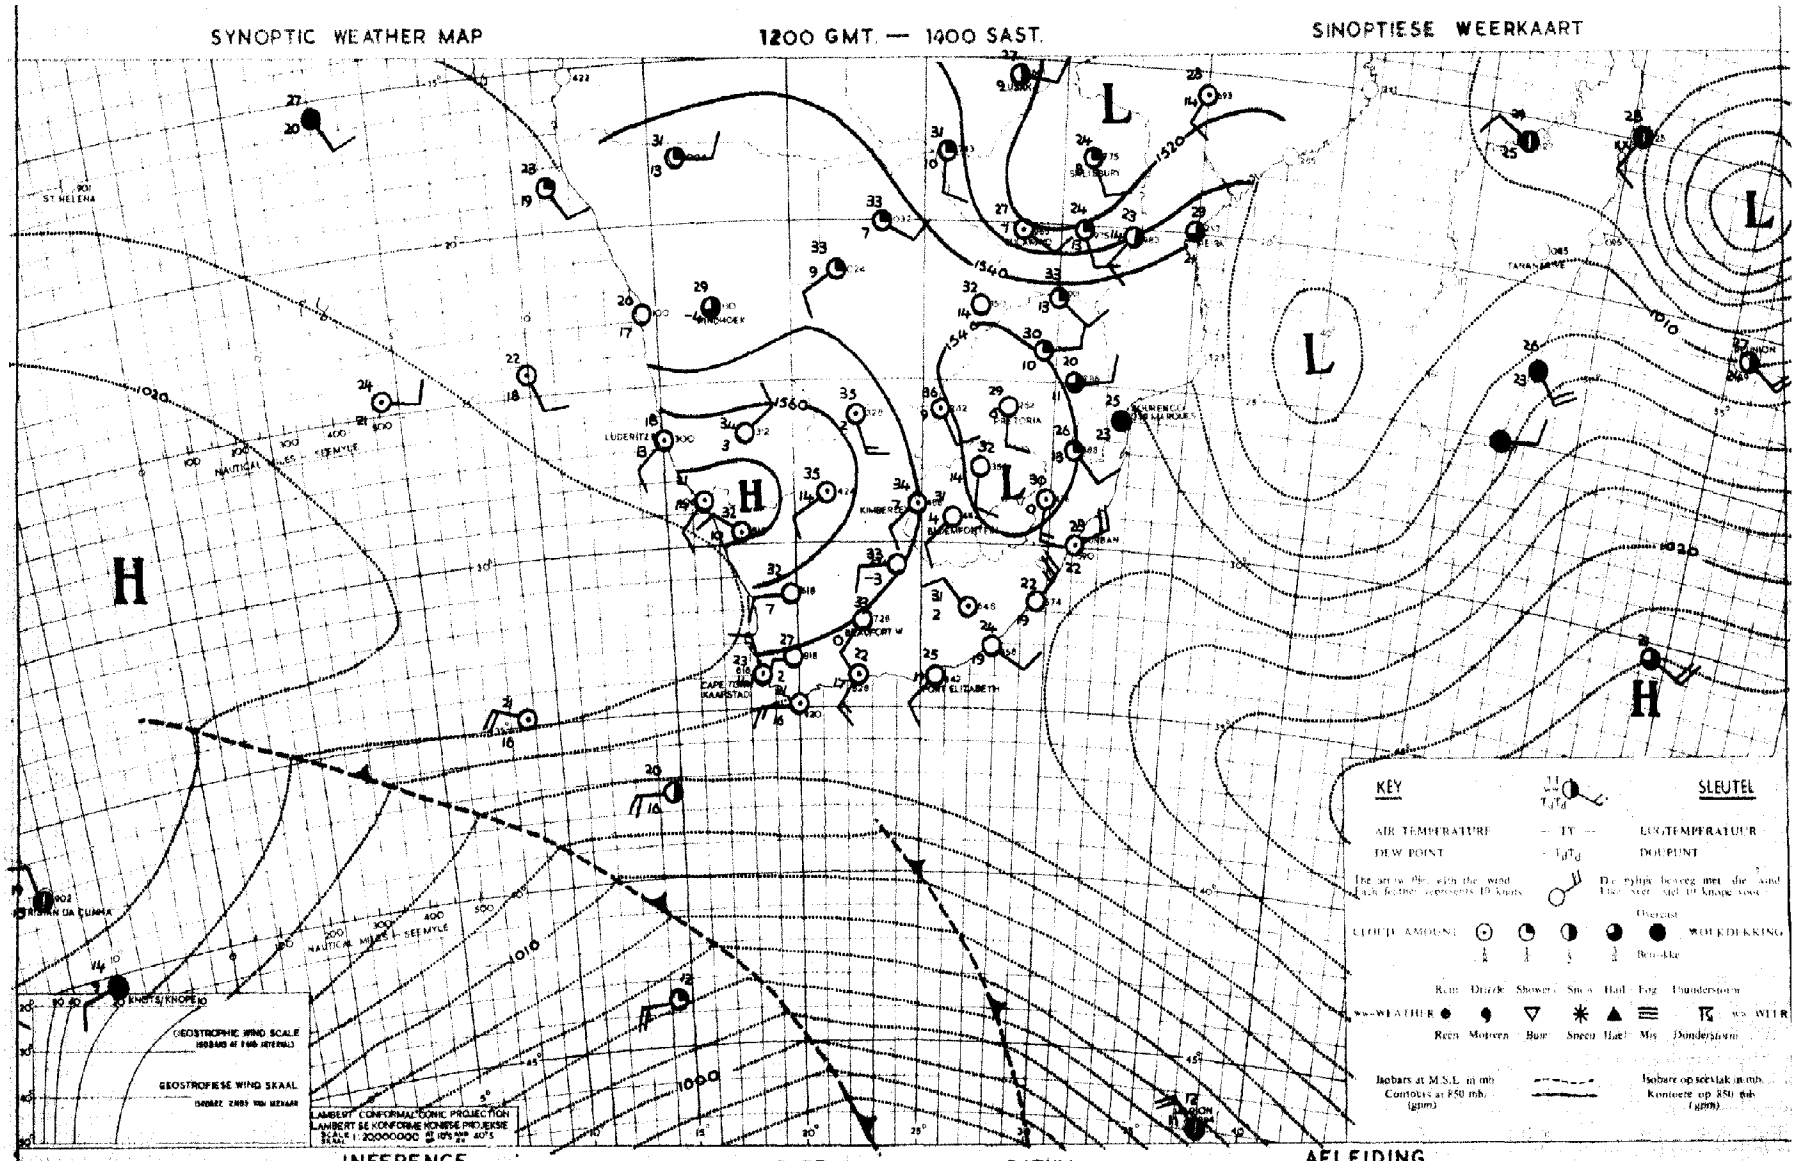
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 24 - 3 - 1959 DATUM — AFLEIDING

The tropical cyclone east of the continent dominates the circulation over the eastern part of the interior and very dry air is flowing in from the south-east. Apart from scattered clouds over the eastern lowveld of the Transvaal and the southern and south-eastern coastal regions, it will be fine and warm over the country.

Die tropiese siklone oos van die vasteland oorheers die sirkulasie oor die oostelike deel van die binneland en baie droë lug word uitgevoer vanuit die suidooste. Afgesien van verspreide wolke oor die Transvaal laeveld en oor die suidelike en suidoostelike kusgebiede sal dit mooiweer en warm tot baie warm wees oor die land.

DATE 25-3-1959 DATUM

AFLEIDING

With cyclonic activity in the Mocambique channel and the high moving in south of the continent, it is expected that cloudy conditions with local showers will occur over the Eastern Cape and Natal coastal regions and escarpment. Over the remainder of the country it will remain warm and dry.

Met sikloniese aktiwiteit in die Mosambiekkanaal en die hoog wat suid van die land in beweeg, sal bewolkte toestande met plaaslike buie voorkom oor die Oos-Kaapse en Natalse kusgebiede en die Oos-Transvaalse laeveld en platorand. Oor die res van die land sal dit warm en droog wees.

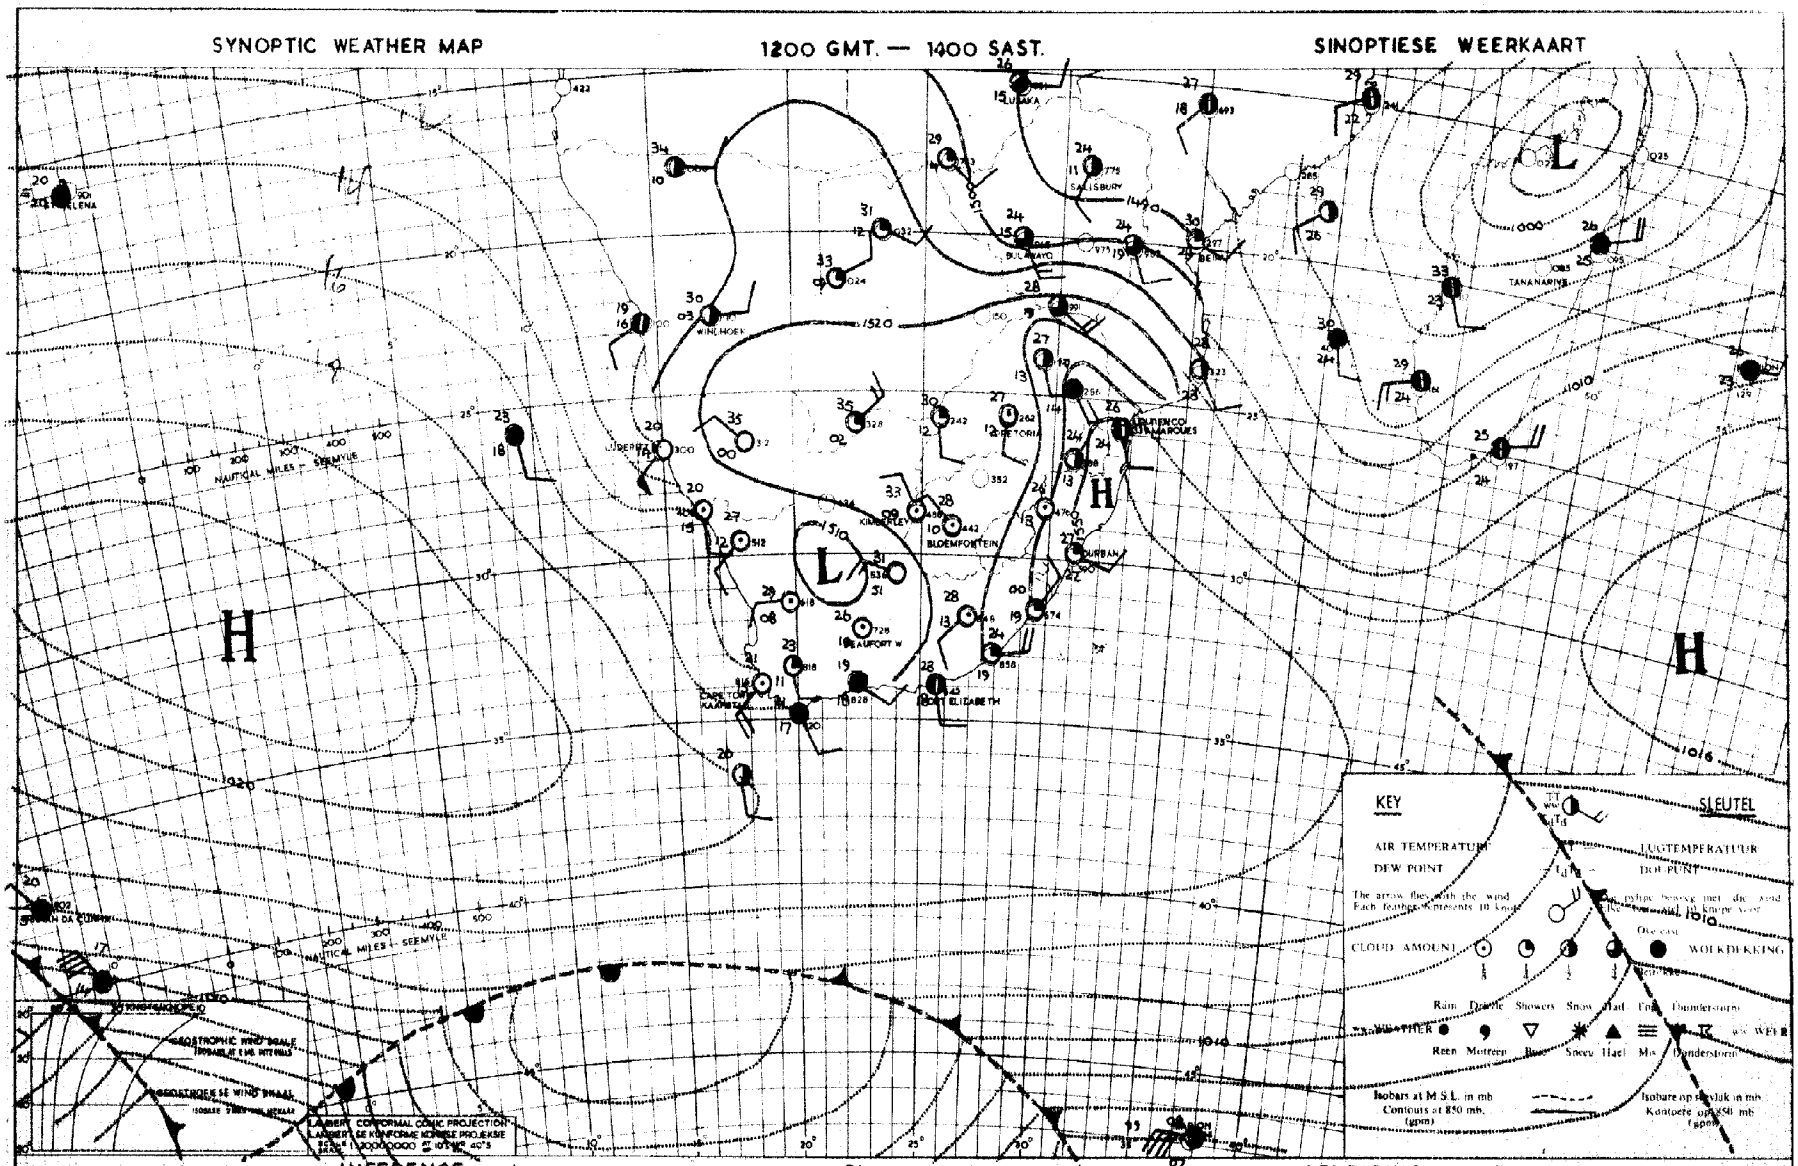
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 26 - 3 79 39 DATUM — AFLEIDING

An upper air trough has developed over the western Union and somewhat moister air is moving over South-West Africa, Bechuanaland, Free State, Northern and Eastern Cape and southern Natal. Local thunder showers will consequently develop over these regions.

'n Bolugtrog het ontwikkel oor die westelike Unie en effens vogtiger lug stroom oor Suidwes-Afrika, en Betsjoeanaland, die Vrystaat, Noord-Kaapland, Oos-Kaapland en suidelike Natal. Plaaslike donderbuie sal dus oor hierdie streke ontwikkel.

There is now a well marked upper trough over the western Union and consequently local thundershowers will occur over South-West Africa, Bechuanaland, Northern, Eastern and central Cape and southern Natal. The approaching cold front will later bring cooler, cloudy conditions to the southwestern Cape coast.

In die bolug is nou 'n duidelike trog oor die westelike Unie en gevolglik sal los donderbuie voorkom oor Suidwes-Afrika, Betsjoeanaland, Vrystaat, Noord-en Oos-Kaapland, sentrale Kaapland en suidelike Natal. Die nederende koufront sal later koeler, bewolkte weer aanbring oor die Kaapse suidweskus.

INFERENCE

DATE 30 - 3 - 39 DATUM

AFLEIDING

With the ridge to the south it will remain cloudy and cool, with showers over the southern and southeastern coastal regions. The air over the interior is rather dry, but conditions remain favourable for thundershowers over the central regions.

Met die rug suid van die land, sal dit bewolk en koel bly met buie oor die suidelike en suidoostelike kusgebiede. Die lug oor die binneland is betreklik droog, maar toestande bly gunstig vir donderstorms oor die sentrale dele.

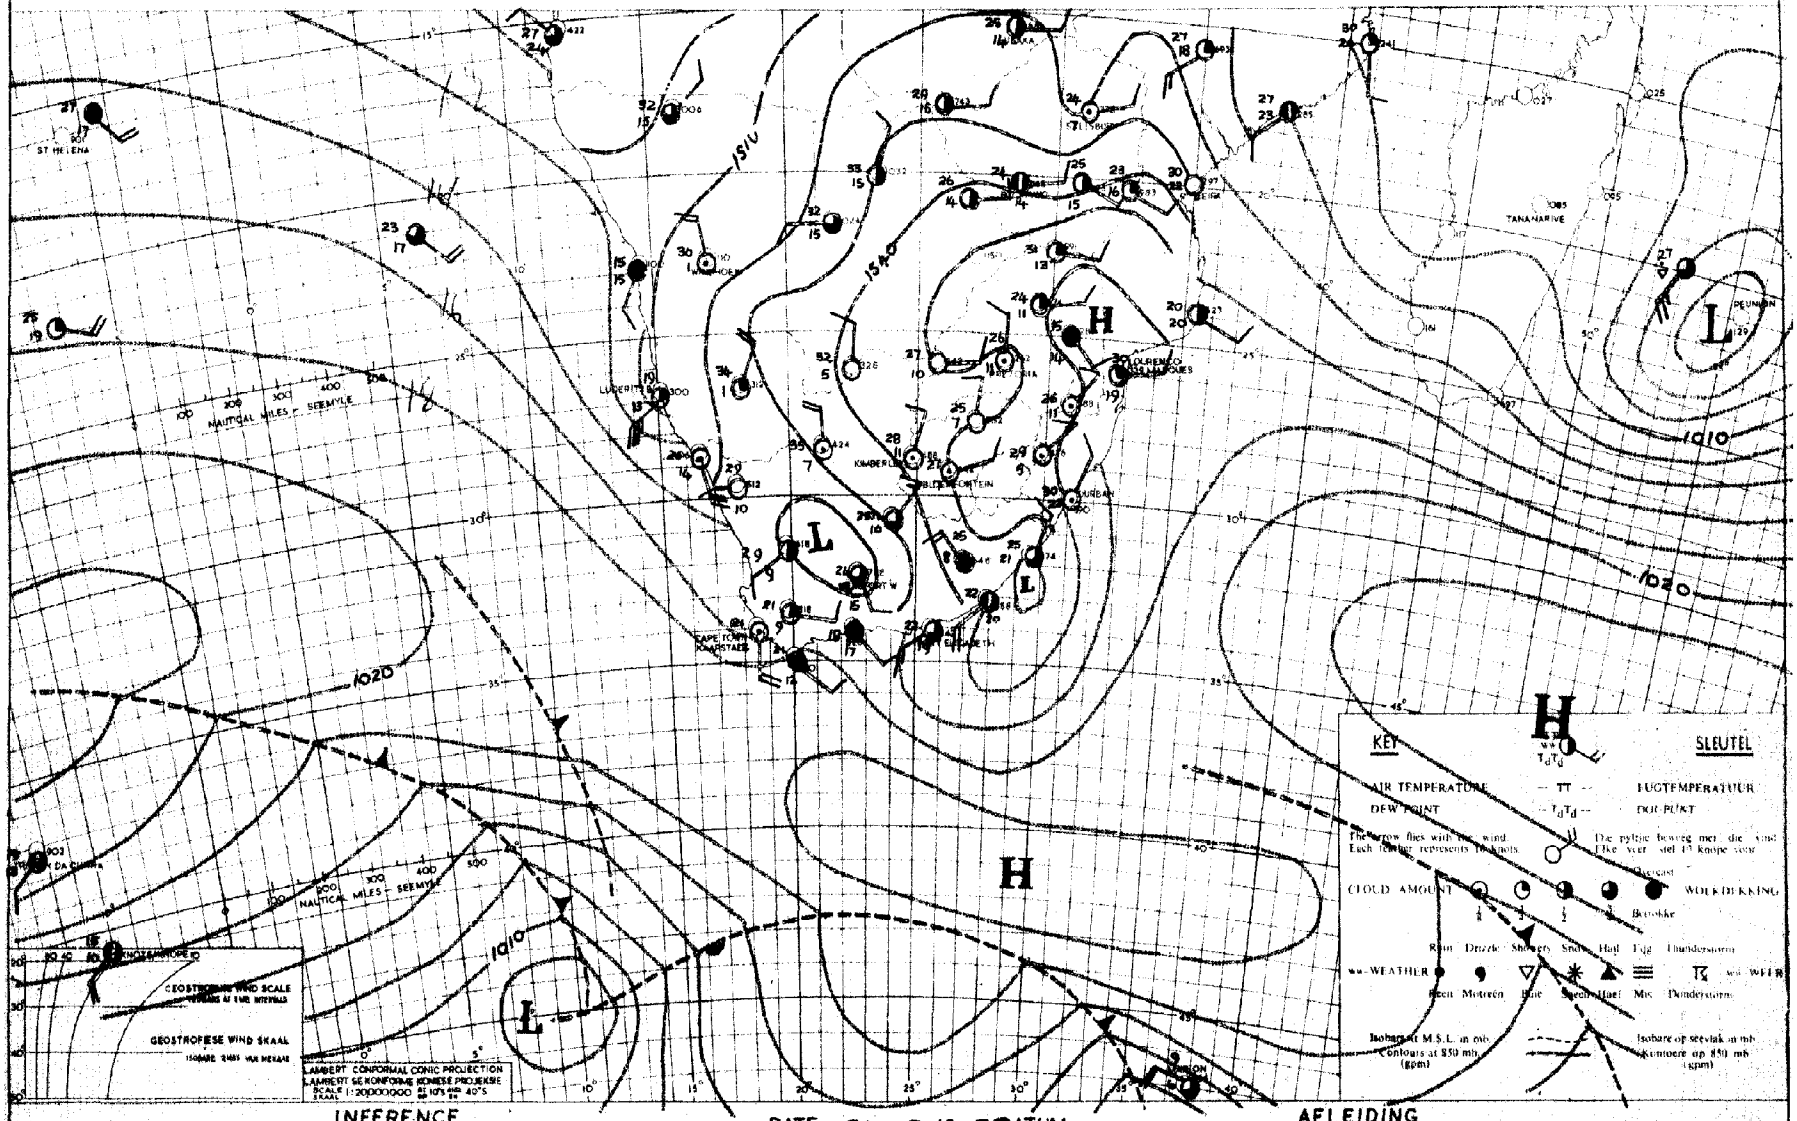
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 31 - 3 - 59 DATUM AFLEIDING

With high pressure south of the continent and low pressure over the southern interior, it is expected that cloudy weather with showers will occur over the Southern and eastern coastal regions. Thundery showers will occur over the Cape interior.

Met hoë druk suid van die vasteland en lae druk oor die suidelike binneland, sal bewolkte weer met buie voorkom oor die suidelike en oostelike kusgebiede. Donderbuie sal oor die Kaapse binneland voorkom.

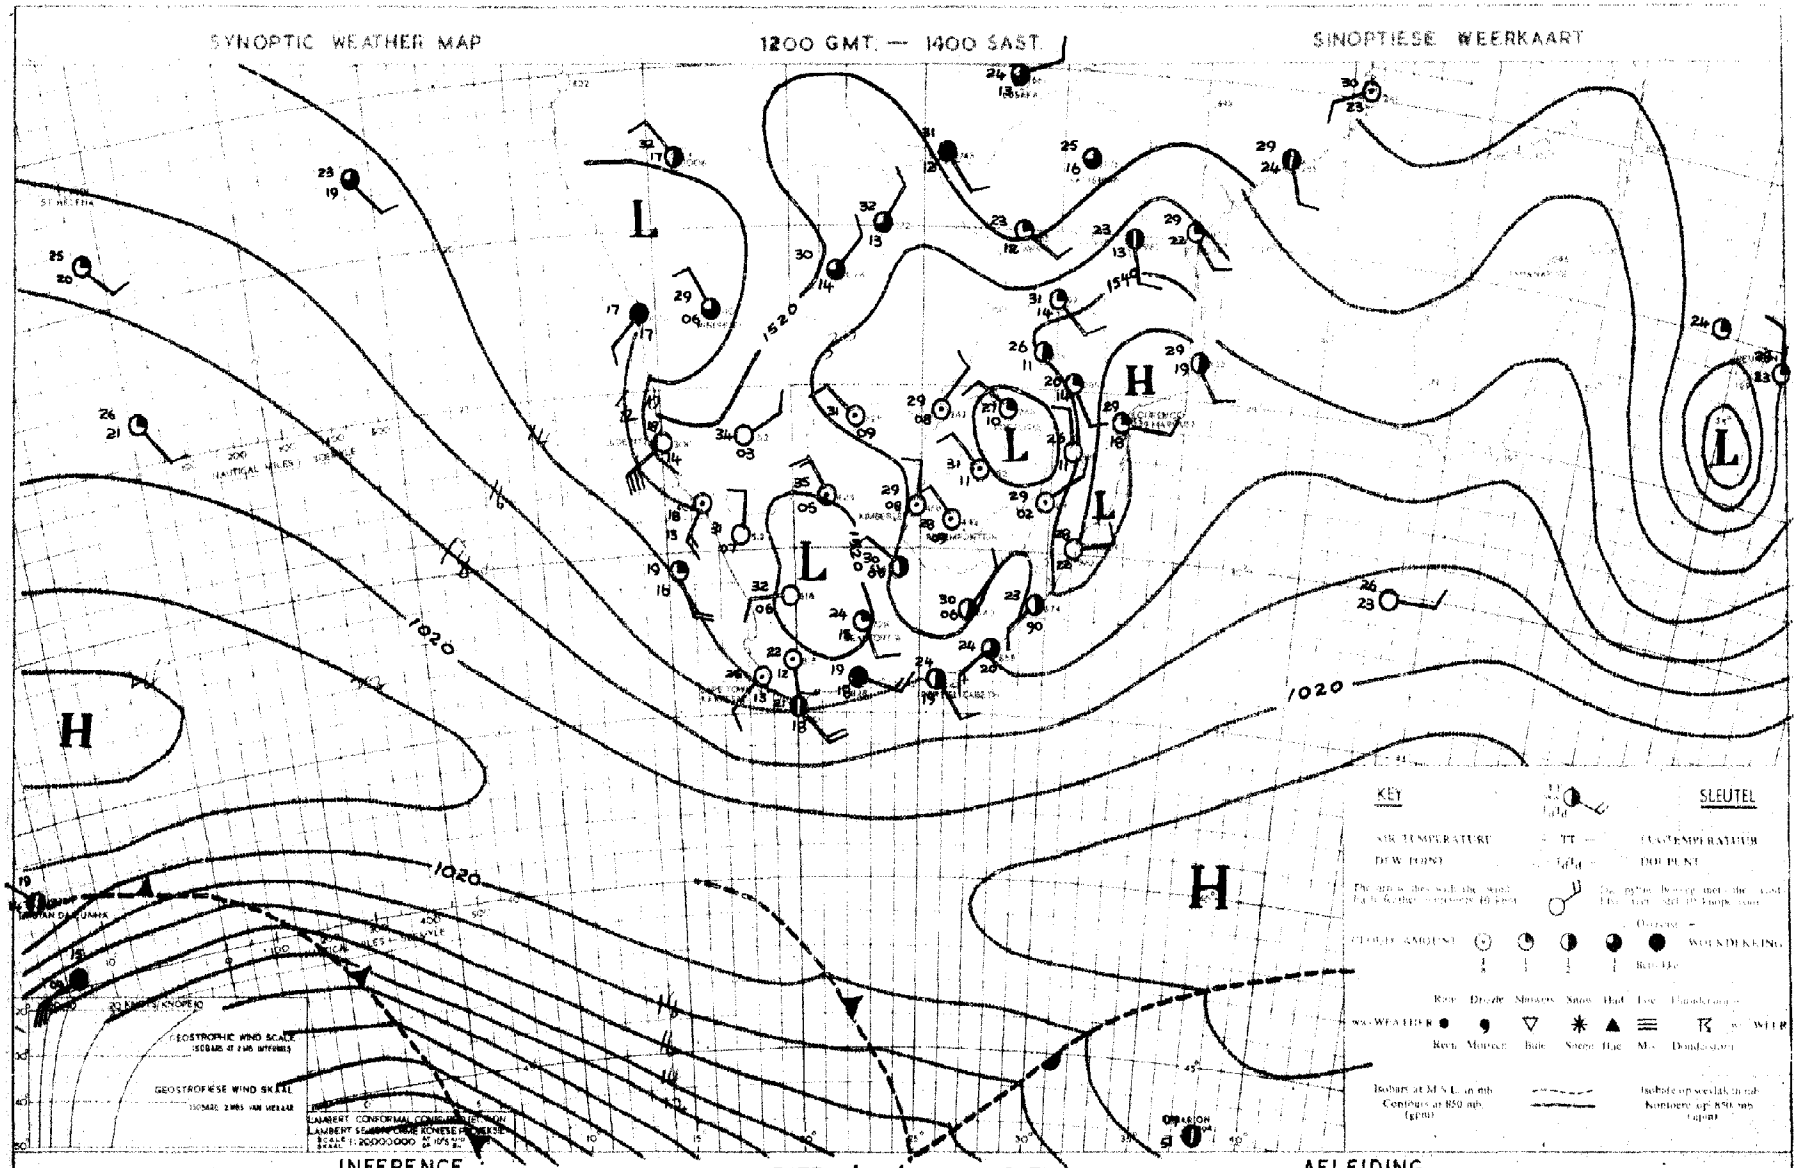
[3] Naby Groblersdal



With the low developing over the Cape interior conditions are becoming favourable for thundershowers over the eastern half of the Cape Province, but it will remain fair and warm to hot elsewhere.

Met die laag wat oor die Kaapse binneland ontwikkel word toestande gunstig vir donderbuie oor die oostelike helfte van Kaapland. Oor die res van die land sal dit egter redelik mooi weer en warm tot baie bly.

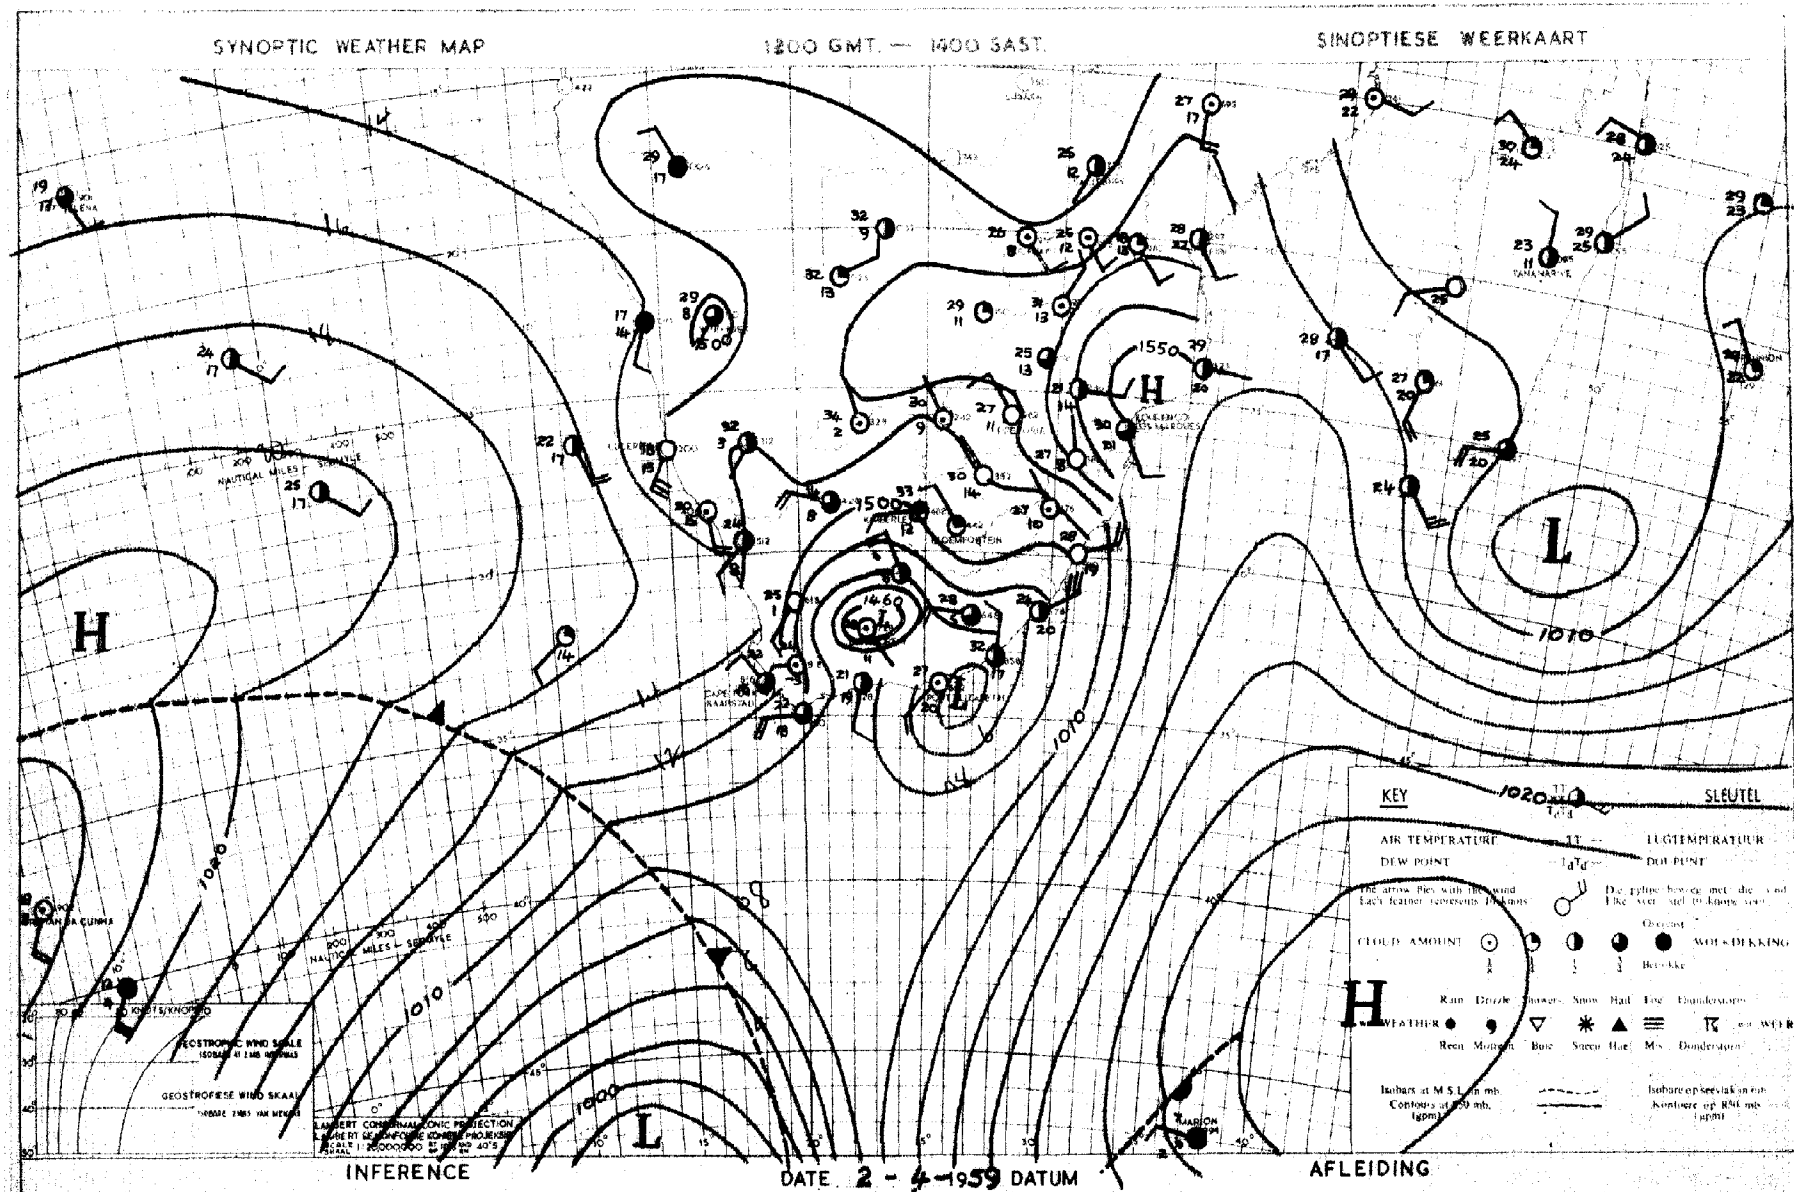
[2] Near Bothaville

[3] Naby Groblersdal



Moist air is moving southwards from South-West Africa and with a trough over the central Union, local thundershowers will develop over these regions. The approaching cold front will cause cooler, cloudy conditions over the southwestern Cape coast.

Vogtige lug beweeg suidwaarts vanaf Suidwes-Afrika en met 'n trog oor die sentrale Unie sal plaaslike donderbuie oor hierdie streke voorkom. Die naderende koue-front sal koeler, bewolkte weer aanbring oor die Kaapse suidweskus.

INFERENCE

DATE 3 - 4 - 1959 DATUM

AFLEIDING

Cooler, cloudy conditions will develop over the southern and southeastern coastal regions and later also over Natal, and showers are possible. Cool, dry air will spread over the southern half of the interior.

Koeler, bewolkte toestande sal uitbrei oor die suidelike en suidoostelike kusgebiede en later oor Natal en buie is moontlik. Koel, droë lug sal oor die suidelike helfte van die binneland beweeg.

Pressures have started falling over the western Union and moister air will start spreading southwards. As a result thundery conditions will develop over the northern parts of Bechuanaland and South-West Africa and possibly over the Transvaal.

Lugdruk begin weer val oor die westelike Unie en vogtiger lug sal suidwaarts begin beweeg en daardeur weerstoestande sal ontwikkel oor die noordelike dele van Bets'oeanaland en Suidwes-Afrika en moontlik ook oor Transvaal.

AFLEIDING

With the approaching cold front, a sharp trough is developing over the western half of the Union and consequently thundershowers will occur over South West Africa, Bechuanaland and the central and eastern parts of the Union. Colder cloudy weather with showers will spread over the south-western and southern parts of the Cape Province.

Met die naderende koufront ontwikkel 'n skerp trog oor die westelike Unie en gevolglik kan heelwat donder- buie verwag word oor Suidwes-Afrika, Betsjoeanaland en die sentrale en oostelike dele van die Unie. Koue, bewolkte weer met buie sal oor die suidwestelike en suidelike dele van Kaapland beweeg.

Colder air will spread over most of the Cape Province and the Free State and later also over Natal. Showers will occur over the coastal regions at first, but it will clear over the interior.

Kouer lug sal oor die meeste dele van Kaapland en die Vrystaat, en later ook oor Natal beweeg. Buie sal aanvanklik nog oor die kusgebiede voorkom, maar oor die binneland sal dit opklaar.

It is expected that cool and dry air will also move in over the Transvaal. With the exception of the Transvaal lowveld and Natal, where it will be cloudy, it will be mainly fine and mild over the country. Isolated thundershowers are however possible over the northern parts of South-West Africa and Bechuanaland.

Na verwagting sal koel, droë lug ook in beweeg oor Transvaal. Met uitsondering van die laerveld van Transvaal en Natal, waar dit bewolk sal wees, sal dit hoofsaaklik mooiweer en matig wees oor die land. Enkele donderbuie is egter moontlik oor die noordelike dele van Suidwes-Afrika en Betsjoeanaland.

INFERENCE

DATE 9 – 4 – 1959 DATUM

AFLEIDING

Pressures are falling over the westcoast and humid air will therefore more southwards again over Transvaal and thundershowers are possible. It will be fair and warmer elsewhere over the country.

Druk daal vinnig oor die weskus en vogtige lug sal derhalwe weer suidwaarts begin beweeg oor Transvaal en donderbuie is moontlik. Oor die res van die Unie sal dit redelik mooi weer en warmer wees.

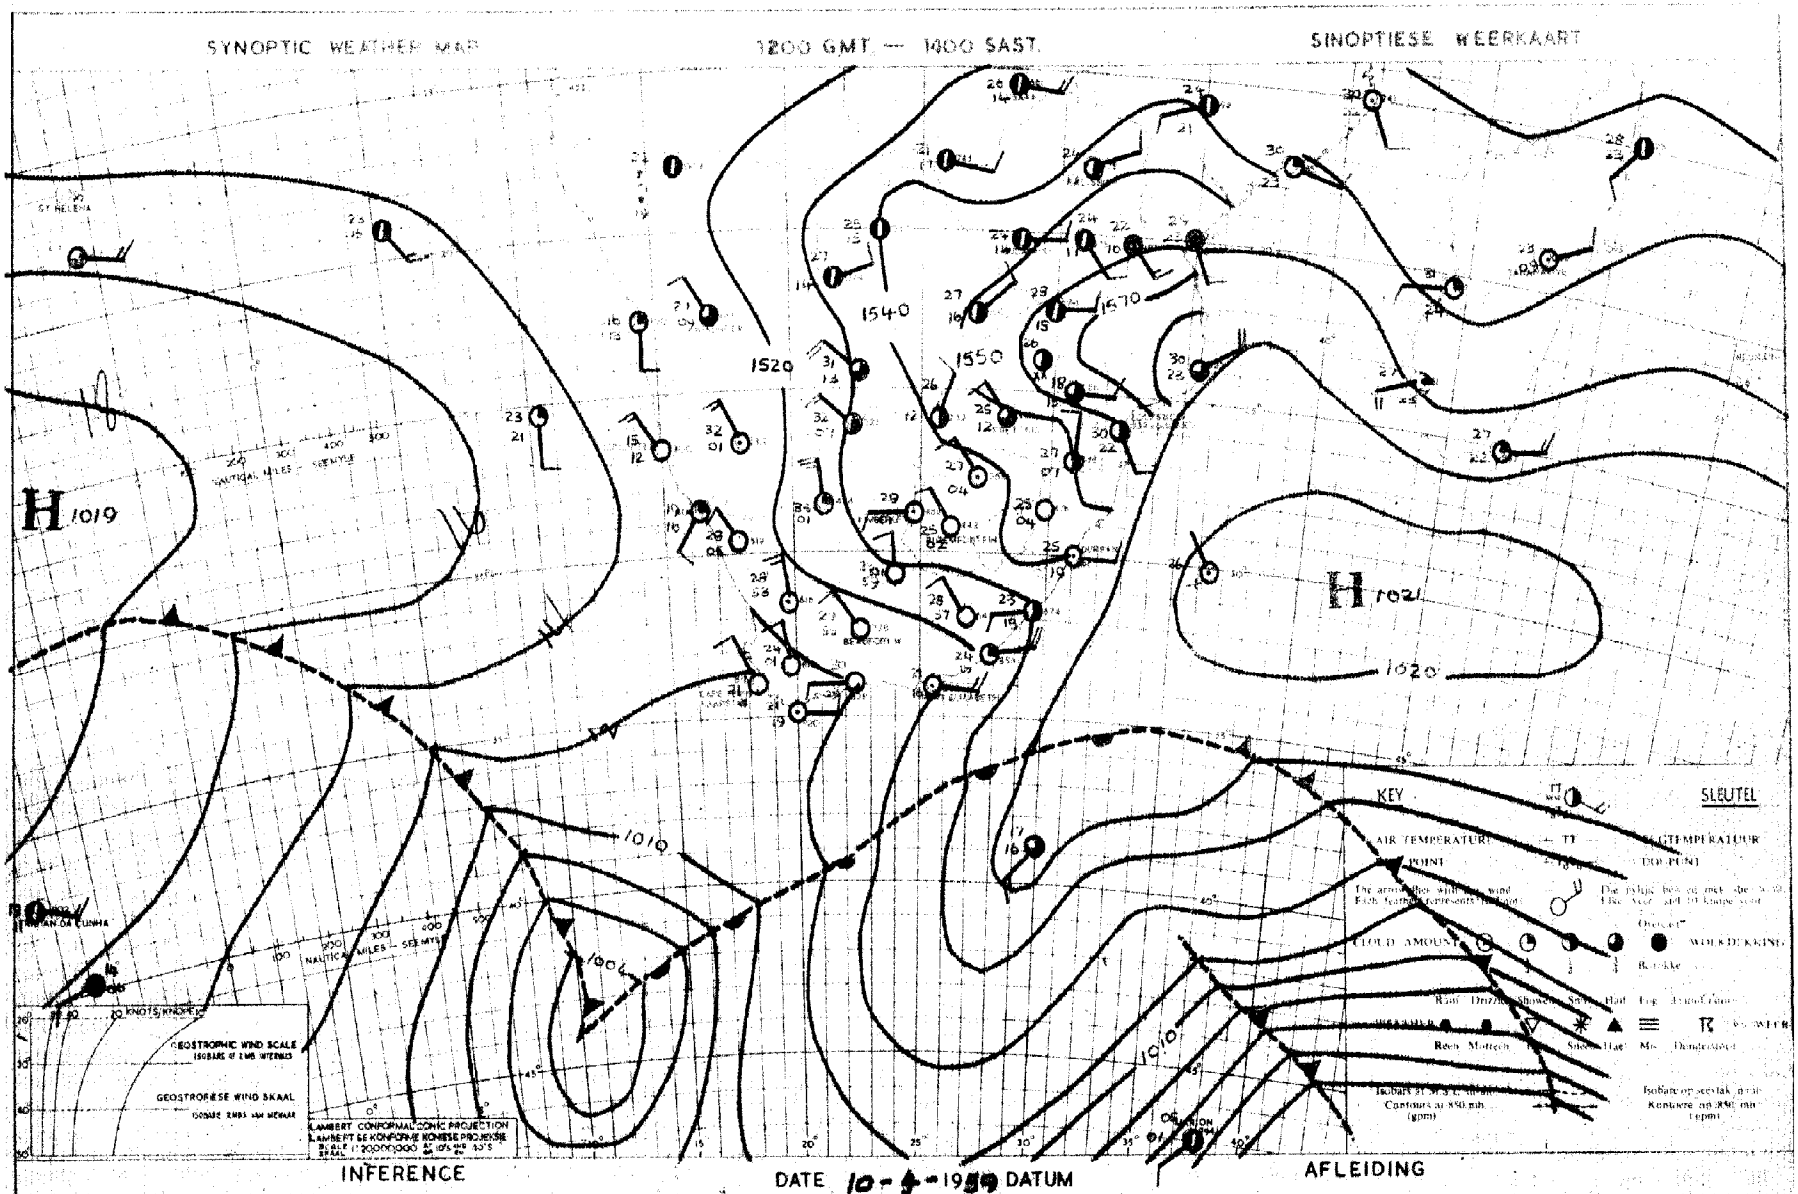
SYNOPTIC WEATHER MAP — 1200 GMT — 1400 SAST — SINOPTIESE WEERKAART



INFERENCE — DATE 10-4-1960 DATUM — AFLEIDING

A low pressure area is apparently developing over the Southern part of the continent and it is expected that moist air will move Southwards over the interior. Scattered thundershowers will occur over the greatest part of the Free State, Northern Cape, Bechuanaland, South West Africa and over the western parts of the Cape

Daar ontwikkel skynbaar 'n laag oor die Suidelike deel van die vasteland en na verwagting sal vogtige lug suidwaarts beweeg oor die binneland en verspreide donderbuie sal voorkom oor die grootste gedeelte van die Vrystaat, Noorde Kaapland, Betsjoeanaland, Suidwes-Afrika en die Noord-westelike dele van die Kaapprovinsie.

INFERENCE

DATE 11 - 4 - 19 59 DATUM

AFLEIDING

The low south of the continent is moving south - eastwards and it is expected that cool, dry air will spread eastwards over the Cape Province and the southern parts of the Northern Cape and the Free State. Over the remainder of the interior it will be partly cloudy and local thundershowers will occur.

Die laag suid van die vasteland beweeg suid - ooswaarts en na verwagting sal koel, droë lug oos - waarts uitbrei oor die Kaapprovinsie en die suidelike dele van Noord Kaapland en die Vrystaat. Oor die res van die binneland sal dit gedeeltelik bewolk wees en plaaslike donderbuie sal voorkom.

Local thundershowers are still possible over the Transvaal, Bechuanaland and the northern part of South-West Africa, but it will be fine and mild over the remainder of the country. It will become cloudy over the south-western coastal regions later.

Plaaslike donderbuie is nog moontlik oor Transvaal, Betsjoeanaland en die noordelike dele van Suidwes-Afrika, maar oor die res van die land sal dit mooi weer en matig wees. Dit sal later bewolk word oor die suidwestelike kusstreke.

INFERENCE

DATE 15-4-1959 DATUM

AFLEIDING

With the second system already in the Tristan area, not much weather is expected from the front to the west of the country. Humid air is gradually moving southwards over the interior, however.

Met die tweede sisteem reeds in die Tristan-gebied word nie veel weerverandering uit die front wes van die land verwag nie. Vogtige lug begin egter weer geleidelik suidwaarts beweeg oor die binneland.

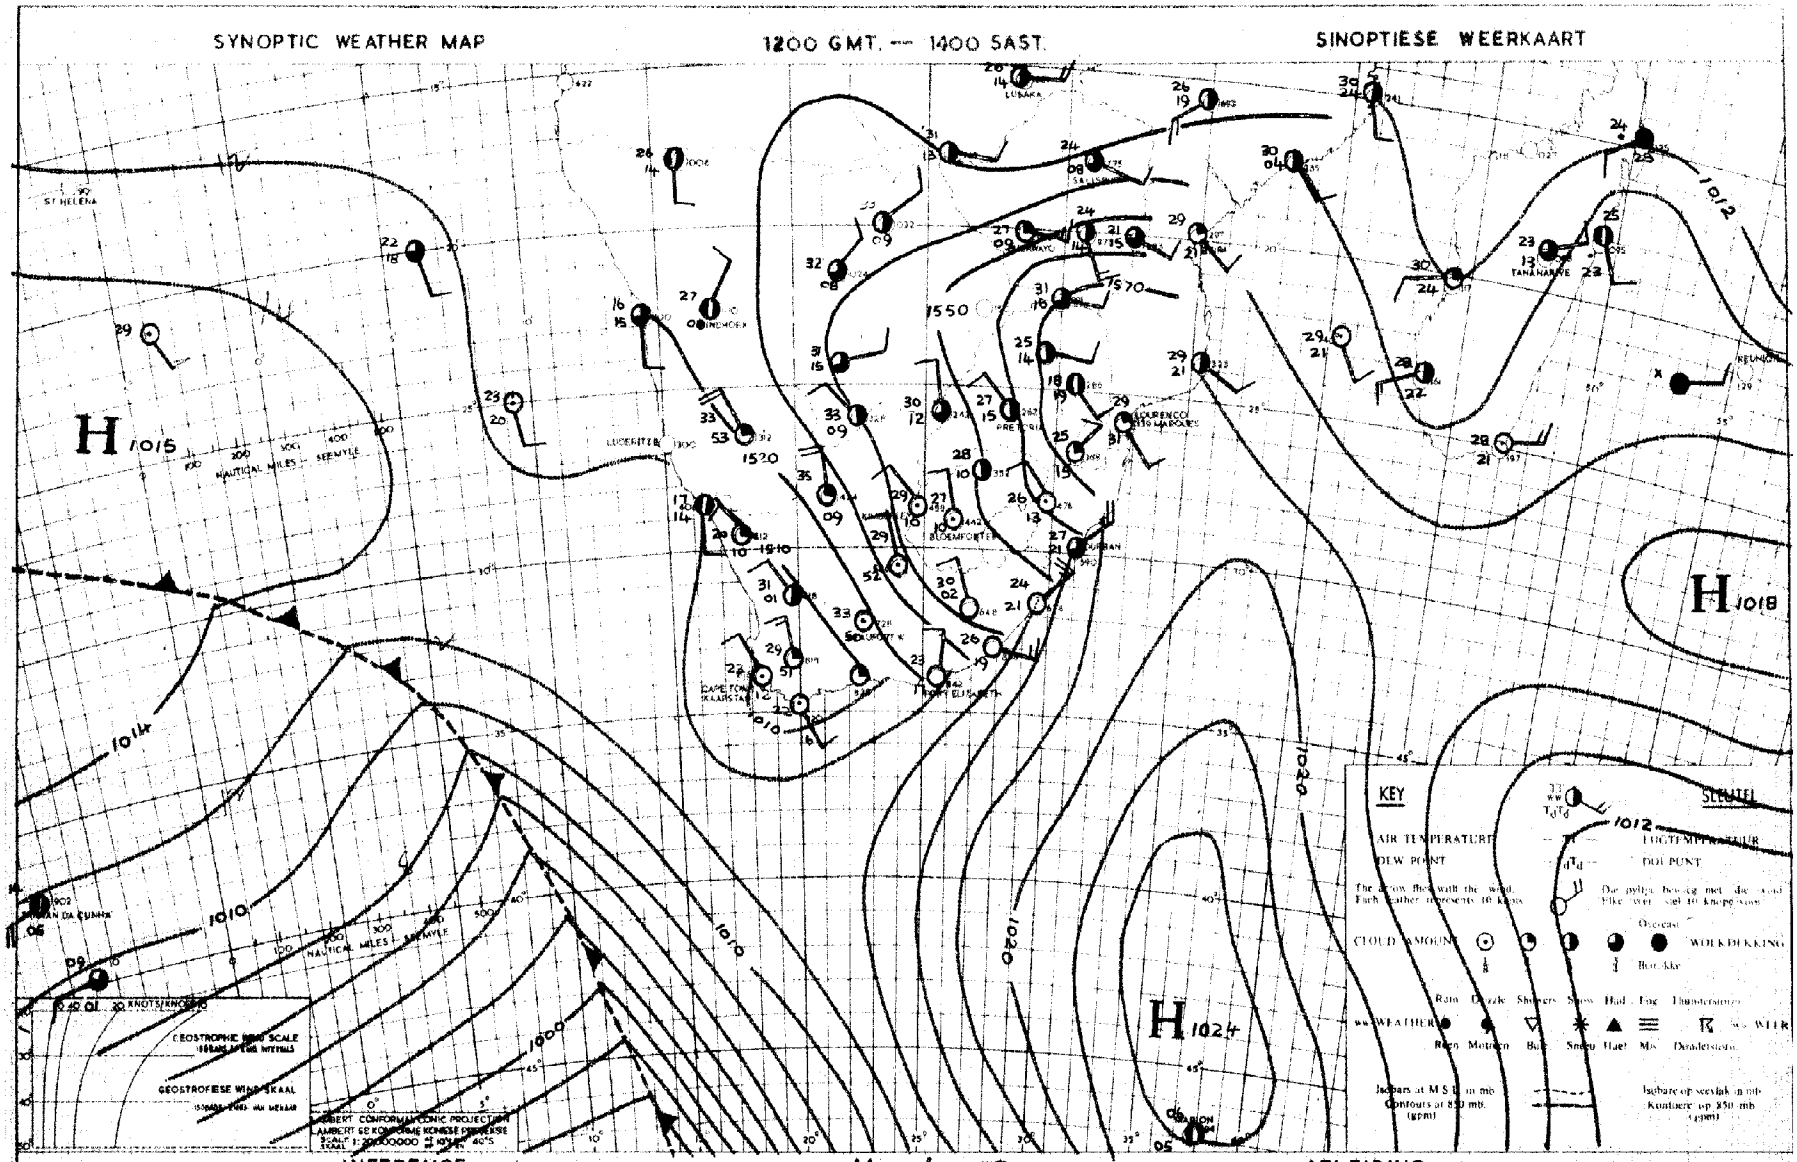
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 14 - 4 19-59 DATUM AFLEIDING

A large amplitude upper air trough has developed west of the continent and humid air is flowing southwards over the western part of the interior. It is expected that it will be partly cloudy and warm over South West Africa, Bechuanaland, Cape Province and the Free State, and scattered thundershowers will develop over these parts. Isolated thundershowers are also possible over the Transvaal.

'n Boogtrog met groot amplitude het wes van die vasteland ontwikkel en vogtige lug word suidwaarts gevoer oor die westelike dele van die binneland. Na verwagting sal dit gedeeltelik bewolk en warm wees oor Suidwes-Afrika, Betsjoeanaland, die Kaapprovinsie en die Vrystaat en verspreide donderbuie sal oor die dele uitsak. Los donderbuie is ook moontlik oor Transvaal.

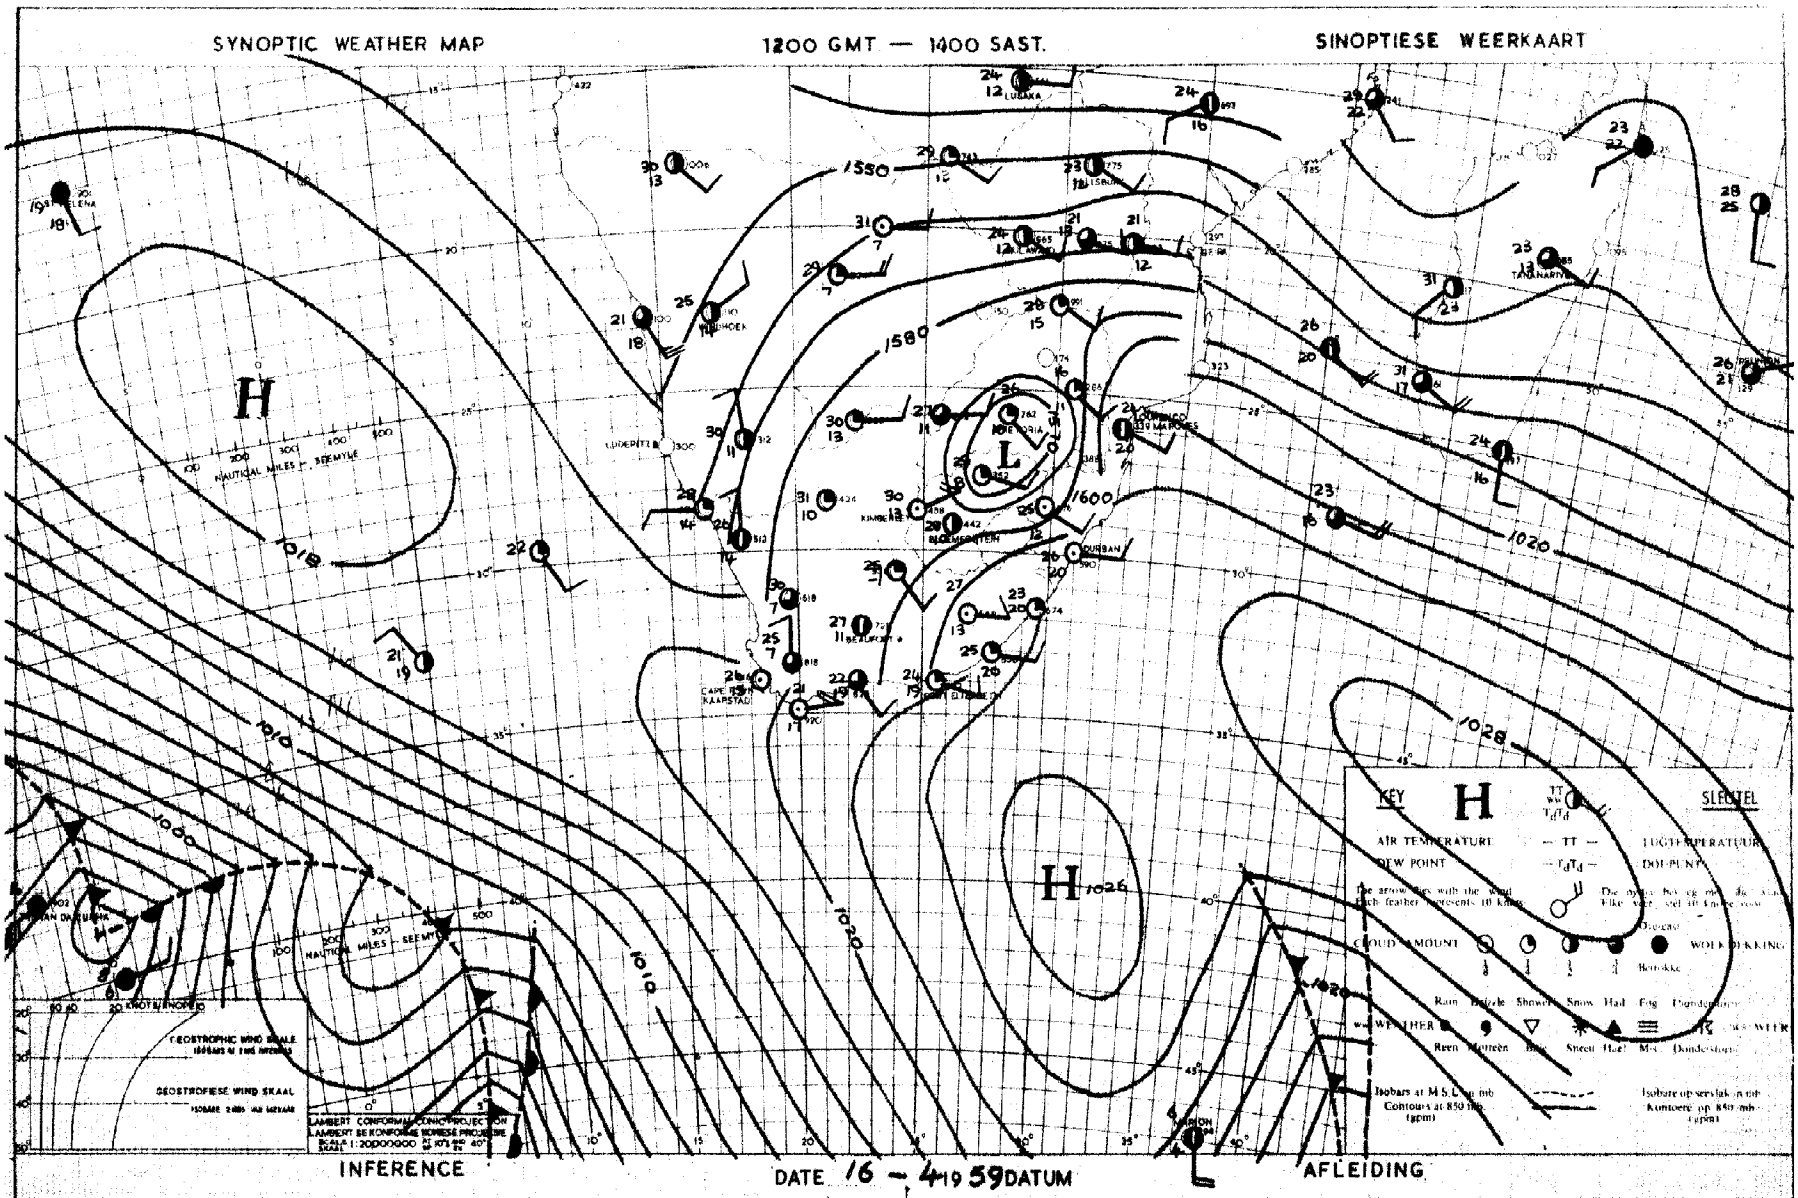
[1]Naby Kokstad

[2]Near Bothaville

[3]Naby Groblersdal



An intense upper-air high is developing over the south-eastern part of the interior, and conditions are becoming unfavourable for thundershowers over this part. Isolated thundershowers are expected to develop over Bechuana-land, South West Africa and the western part of the Cape Province.

'n Sterk bolug hoog ontwikkel oor die suidoostelike deel van die binneland en toestande word ongunstig vir donderbuie oor die deel. Los donderbuie word egter verwag oor Betsjoeanaland, Suidwes-Afrika en die westelike deel van die Kaapprovinsie.

INFERENCE

DATE 17 - 4 -49 59 DATUM

AFLEIDING

A strong surface trough is moving from the Atlantic ocean eastwards and will affect the southwestern Cape tomorrow. As a result of the high pressure over Mocambique and the SW. Indian ocean moist are flows southwards over S.W.A. and the western half of the Union.

'n Diep trog beweeg ooswaarts uit die Atlantiese Oseaan en sal die suidwestelike Kaapprovinsie môre beïnvloed. As gevolg van 'n Hoogdruksisteem oor Mosambiek en die S.W. Indiese Oseaan, beweeg vogtige lug suidwaarts oor S.W.A en oor die westelike helfte van die Unie.

INFERENCE

DATE 19 - 4 - 1959 DATUM

AFLEIDING

Cool, cloudy conditions with showers will occur over the Cape southcoast, but it will mostly partly over southwestern Cape. Thundershowers are possible over the Cape interior and over South West Africa.

Koel, bewolkte toestande met buie sal voorkom oor die Kaapse suidkus, maar dit sal gedeeltelik oop-trek oor Suidwes-Kaapland. Los donderbuie sal oor die Kaapse binneland en oor Suidwes-Afrika voorkom.

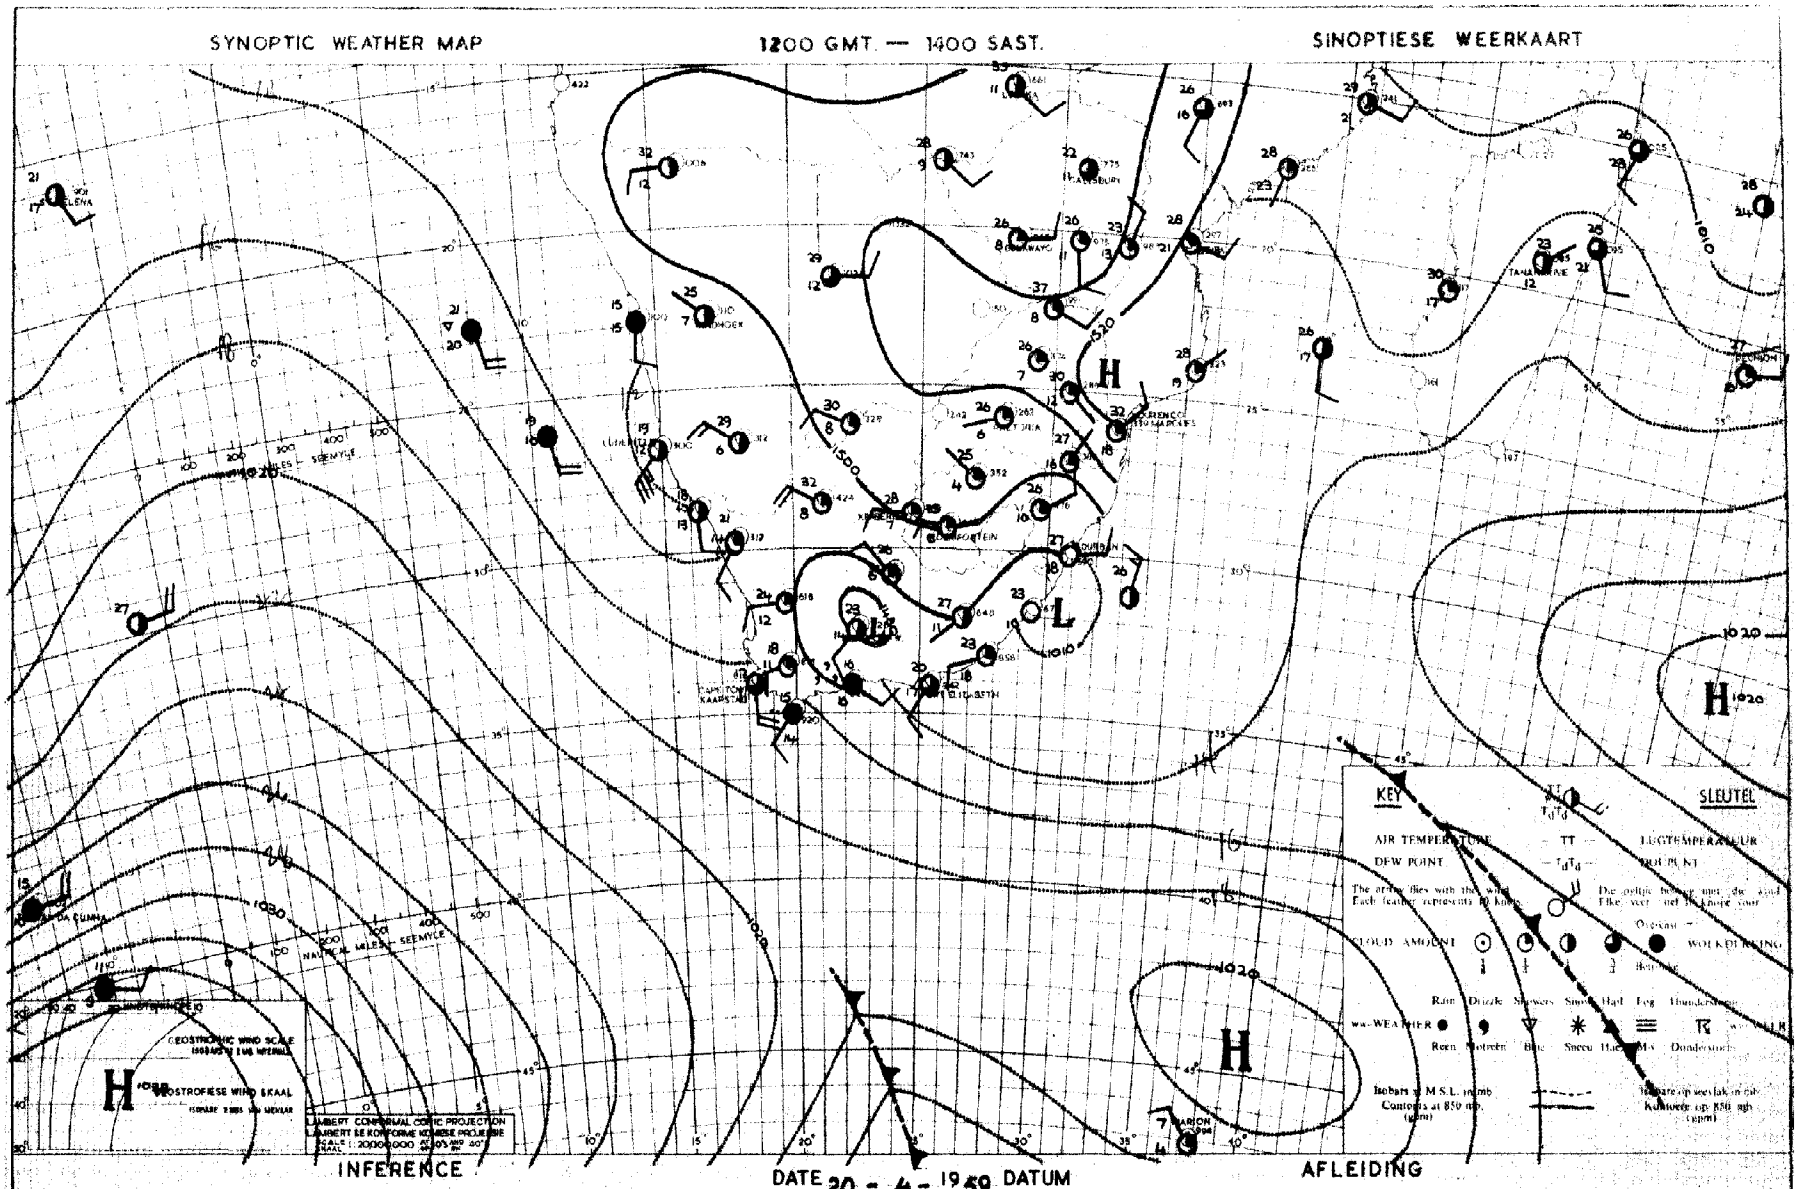
[1] Naby Kokstad [2] Near Rothesville [3] Naby Grobblersdal



The air over the interior of the Cape-Province is reasonable humid and it is expected that local thunder-showers will develop over the Eastern-Cape and the southern parts of the Free-State and Natal.

Because of the onshore pressure gradient along the south-coast it will be cloudy over these coastal areas and rain or drizzle will occur.

Die lug oor die binneland van die Kaapprovinsie is redelik vogtig en plaaslike donderbuie word verwag om oor Oos Kaapland asook oor die suidelike dele van die Vrystaat en Natal te ontwikkel. As gevolg van die heersende suidoostelike stroming ... oor die suidkus sal dit bewolk oor die deel wees en reën of motreën sal voorkom.

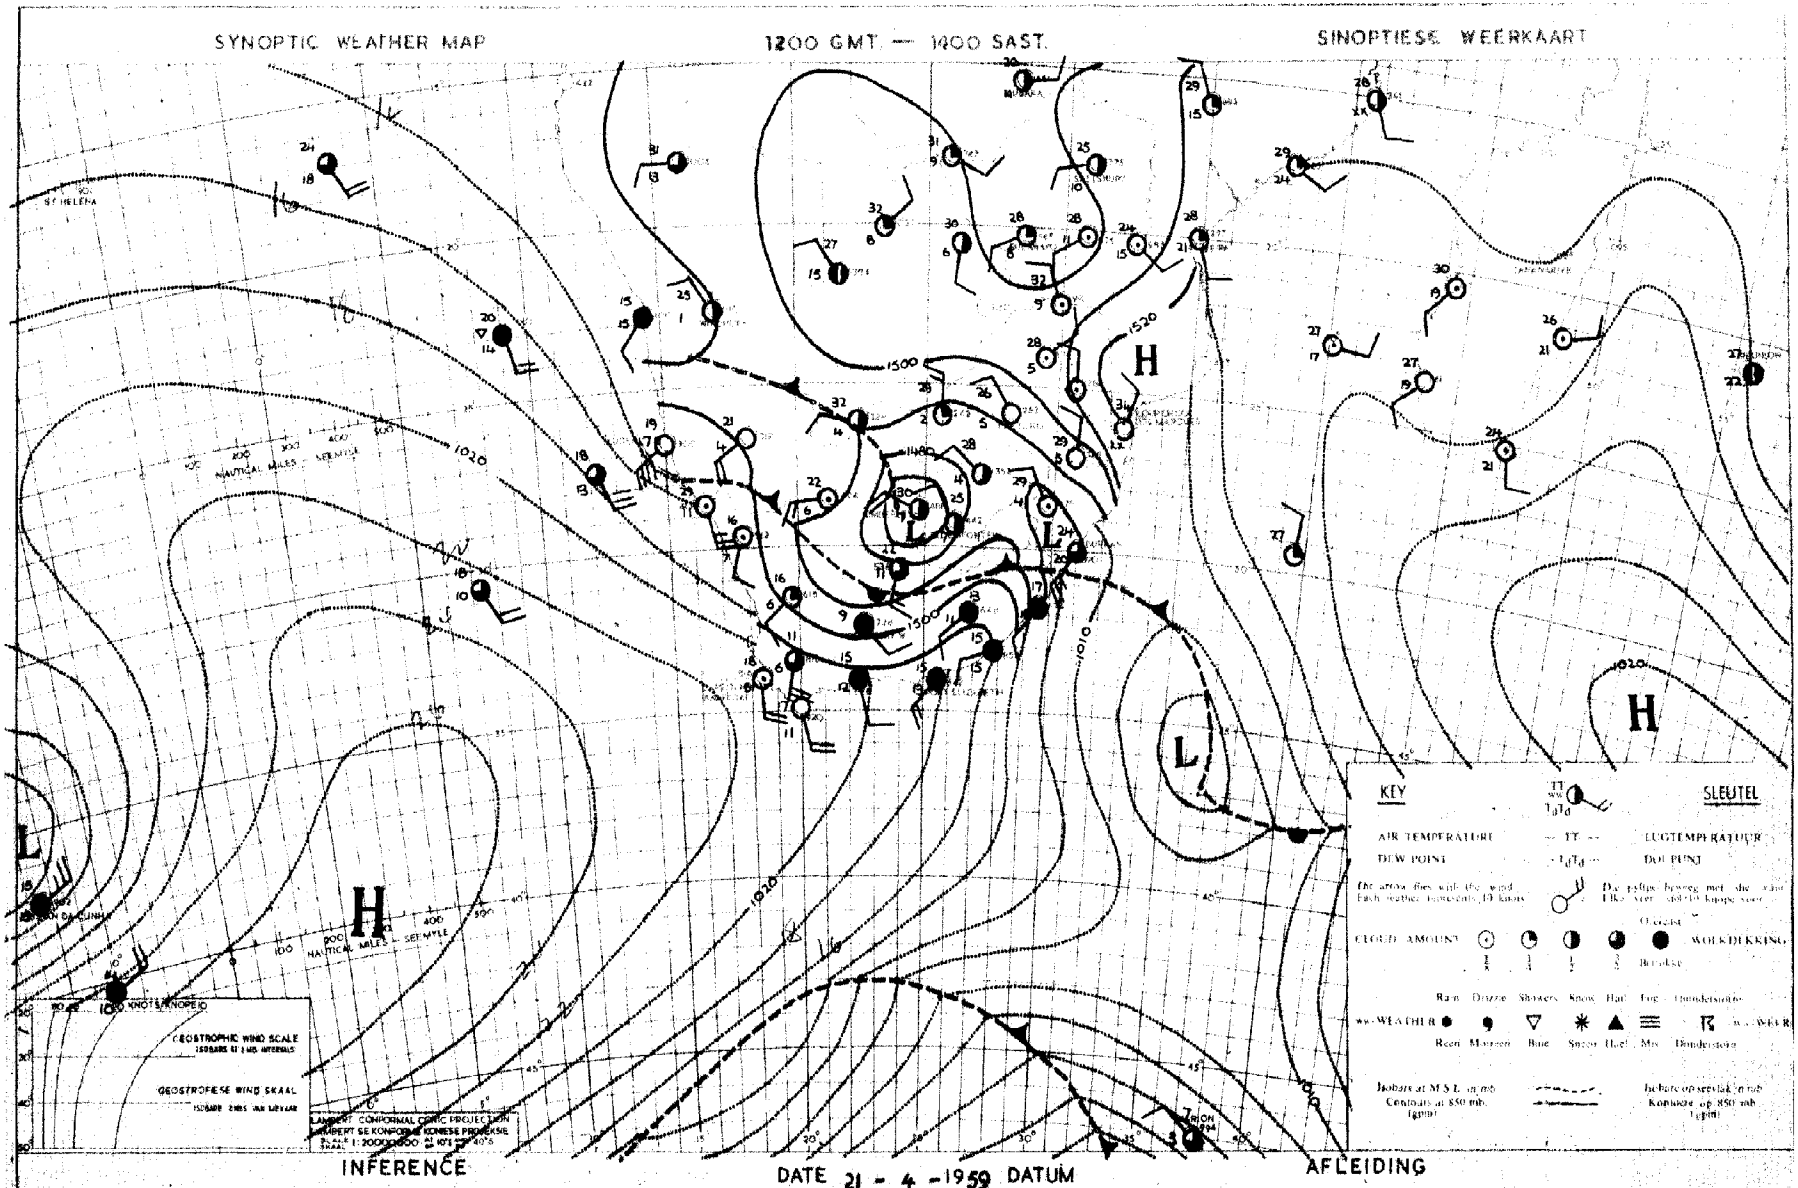
SYNOPTIC WEATHER MAP — 1200 GMT — 1400 SAST — SINOPTIESE WEERKAART



INFERENCE — DATE 21 - 4 - 1959 DATUM — AFLEIDING

Cold, cloudy conditions with rain will spread over Natal and later also over the eastern Transvaal lowveld, but it will clear gradually over southern Cape.

Thundershowers are possible over the Free State, Northern Cape and the southern half of Transvaal.

Koue, bewolkte toestande met reën sal uitbrei oor Natal en later oor oostelike Transvaal maar dit sal geleidelik opklaar oor suidelike Kaapland. Donderbuie is moontlik oor die Vrystaat, Noord-Kaapland en die suidelike helfte van Transvaal.

INFERENCE

DATE 22 - 4 - 1959 DATUM

AFLEIDING

It is expected that the low over the interior will move slowly eastwards and it will become fairly cloudy over the Transvaal and rain or thundershowers will fall.

Further rain or thundershowers are also expected over the Free-State, Northern Cape and Eastern Cape and Natal.

Na verwagting sal die laag oor die binneland stadig oostwaarts beweeg en dit sal taamlik bewolk word oor Transvaal en reën of donderbuie sal voorkom.

Verdere reën en donderbuie sal ook voorkom oor Noord-Kaapland, die Vrystaat, Oos-Kaapland en Natal.

Pressures are falling over the west coast. The air will remain humid over the eastern half of the country and showers are possible.

Druk daal oor die weskus en die lug sal vogtig bly oor die oostelike helfte van die land en las buie is moontlik.

INFERENCE

DATE 24 - 4 - 1959 DATUM

AFLEIDING

Moist and warm air flows southeastwards over Bechuanaland, the Transvaal, the Kuruman - Mafeking Territory, the northern and northeastern Free-State and the northern Natal interior. Isolated thundershowers will develop over these areas.

A cold-front will bring cooler air to the southwestern and southern Cape coastal regions and occasional rain will occur. Over the rest of the country it will be fine and warm.

Vogtige en warm lug beweeg suidooswaarts oor Bet-joeanaland, Transvaal, die Kuruman - Mafeking gebied, die noordelike en noordoostelike O.V.S. en die noordelike Natalse binneland. Los donderstorms sal oor hierdie gebiede ontwikkel. 'n Koue-front sal koeler lug oor die suidwestelike en suidelike Kaapse kusstreke bring en plaaslike reën sal voorkom. Oor die res van die land sal dit mooiweer en warm wees.

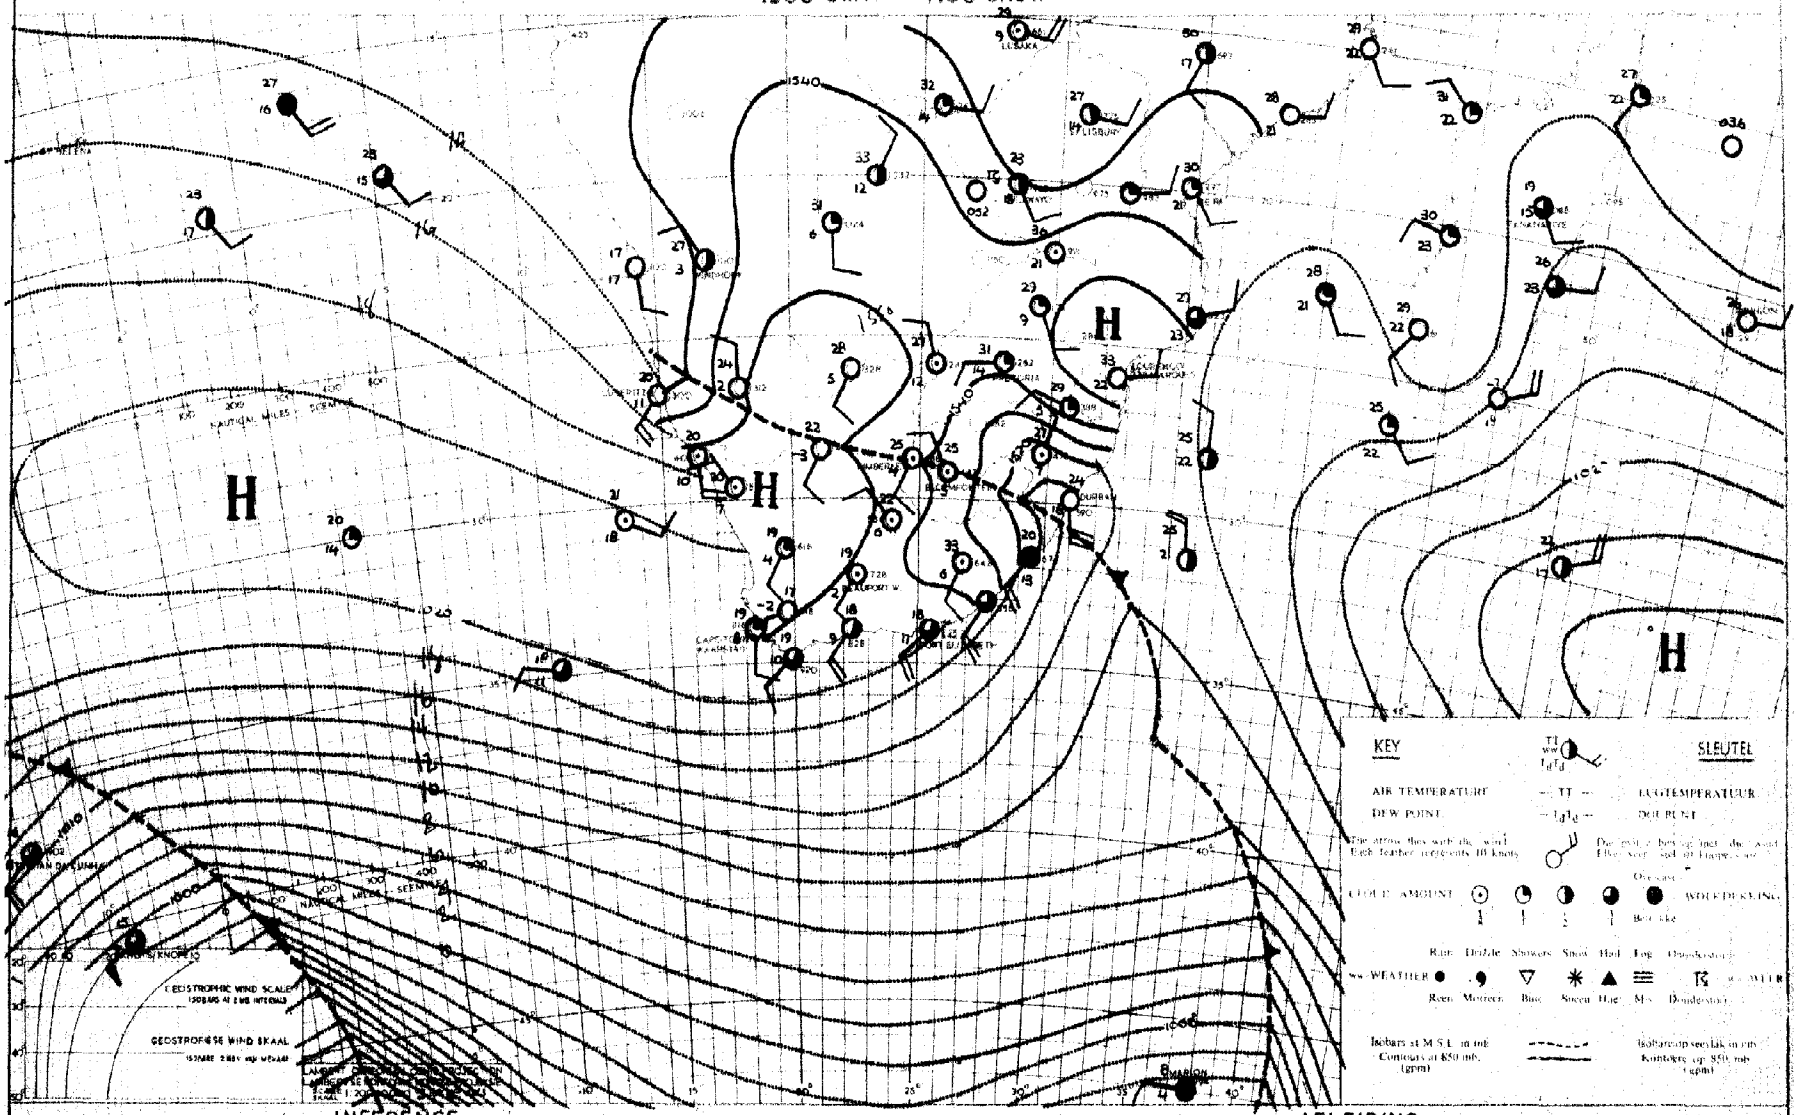
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST SINOPTIESE WEERKAART



INFERENCE DATE 25 - 4 - 1959 DATUM AFLEIDING

It is expected that it will become fairly cloudy and cool over Natal and the Transvaal lowveld. It will be mild to cool over the southern and central parts of the Cape Province but warm with isolated thundershowers over the northern parts of the interior.

Na verwagting sal dit taamlik bewolk en koel word oor Natal en die Laeveld van Transvaal. Dit sal matig tot koel wees oor die suidelike en sentrale dele van die Kaapprovinsie maar warm met enkele donderbuie sal oor die noordelike van die binneland voorkom.

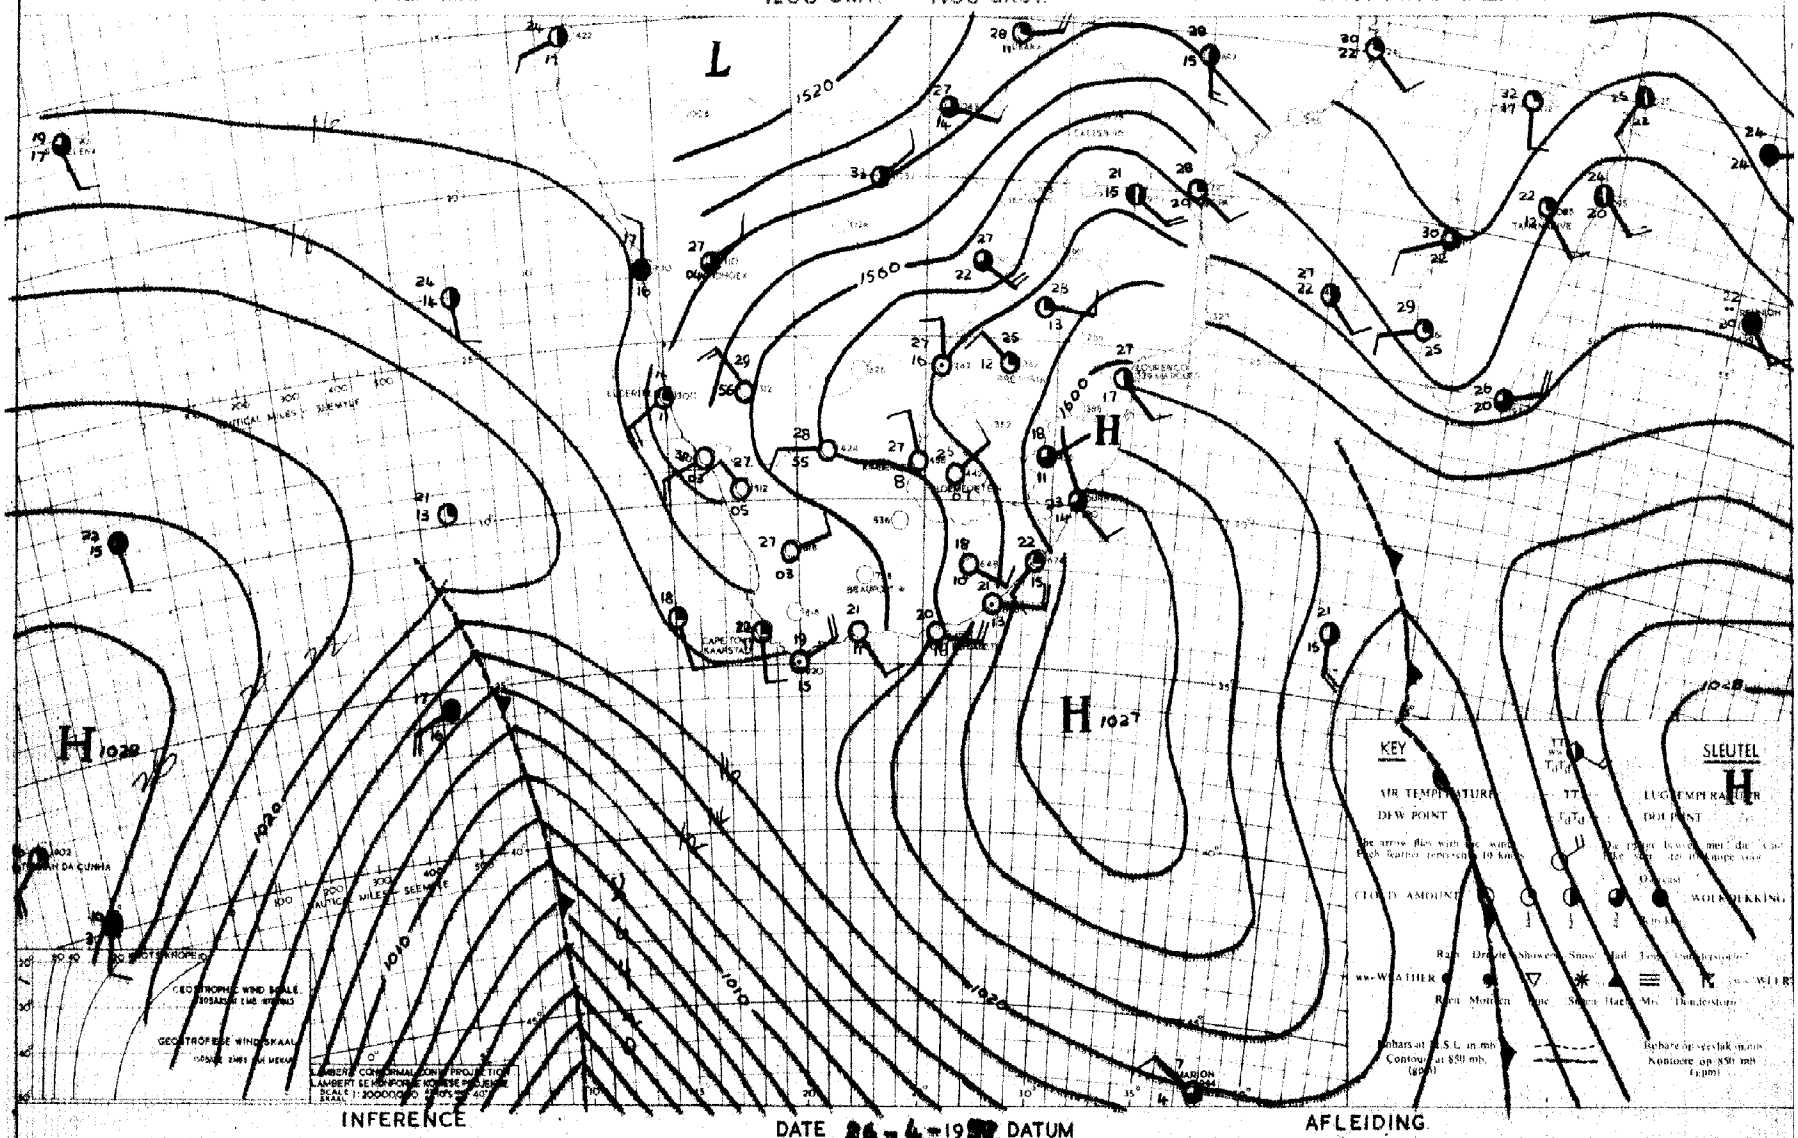
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

With the high to the south-east of the continent and the trough approaching from the west, humid air is expected to move southwards over the interior and isolated thundershowers will occur. It will become cloudy with rain over the south-western coastal regions later.

DATE 26-4-1957 DATUM

AFLEIDING

Met die hoog suidoos van die vasteland en die trog na die weste sal ietwat vogtige lug suidwaarts beweeg oor die binneland en enkele donderbuie sal voorkom. Dit sal later bewolk word oor die suidwestelike kusgebied en reën sal voorkom.

INFERENCE

DATE 27-6-59 DATUM

AFLEIDING

With the ridge to the south and the falling pressures over the west coast, cloudy conditions with rain or thundershowers will develop over most of the Cape Province and the Free State.

Met die rug suid van die land en die dalende druk oor die weskus, sal bewolkte toestande met reën of donderbuie oor die meeste dele van Kaapland en die Vrystaat ontwikkel.

INFERENCE

DATE 28 - 4 - 1959 DATUM

AFLEIDING

The low over the interior is apparently deepening and it is expected that it will be cloudy over Natal, the Eastern Cape, Northern Cape, Free State, the South-western Transvaal and South-eastern Bechuanaland and fairly general rain will fall over these parts.

Die laag oor die binneland is skynbaar besig om te verdiep en na verwagting sal dit bewolk wees oor Natal, Oos-Kaapland, Noord-Kaapland, die Vrystaat, die suidwestelike Transvaal en die suidoostelike dele van Betsjoeanaland en teamlike algemene reën sal voorkom oor die dele.

The low over the interior is moving out to the southeast. Rain will still fall over the northeastern and southeastern parts of the country, but it will clear to fair and cold over the remainder of the country.

Die laag oor die land wyk suidooswaarts uit. Reën sal nog uitsak oor die noordoostelike, oostelike en suidoostelike dele van die land, maar oor die res van die land sal dit opklaar tot redelike mooiweer en koud.

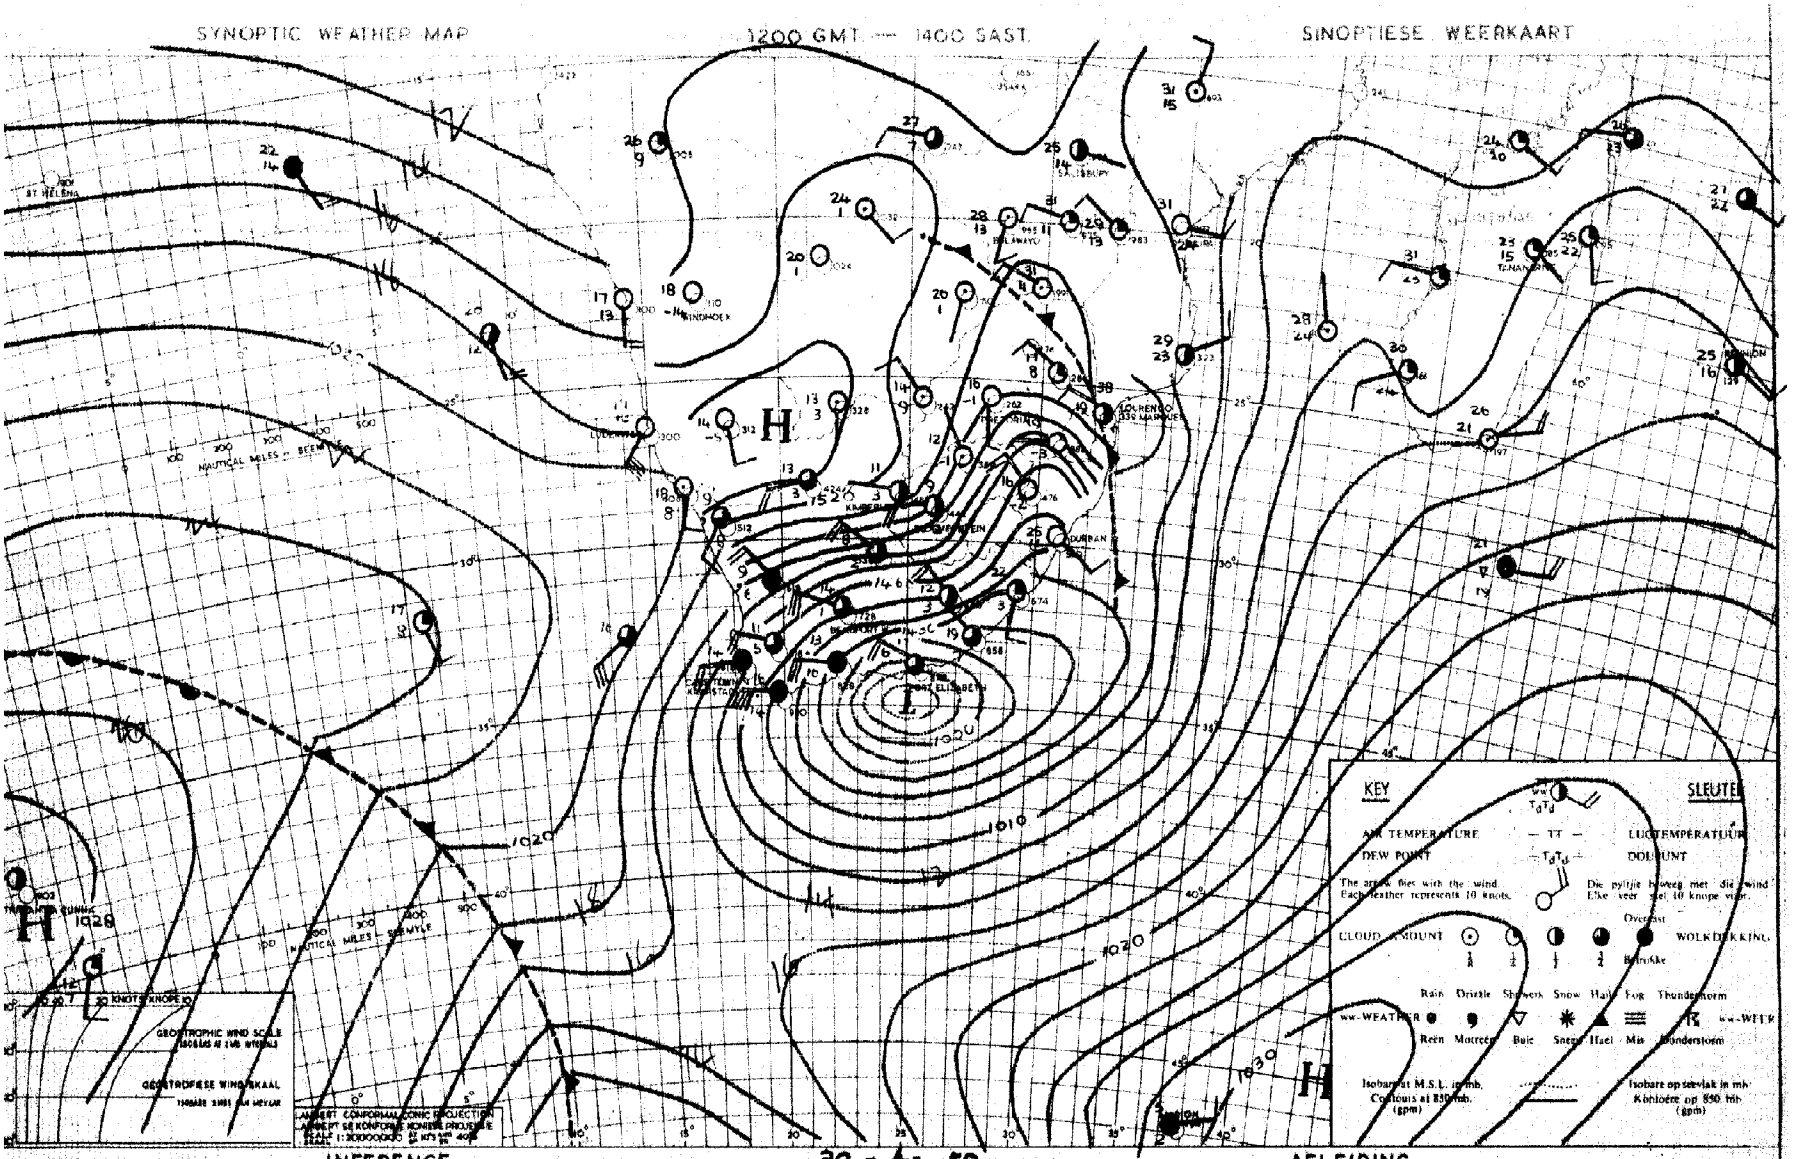
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST SINOPTIESE WEERKAART



INFERENCE DATE 30 - 4 - 1959 DATUM AFLEIDING

It is expected that the low will move slowly southeastwards and cloudiness over the Cape Province should decrease. Elsewhere it will be fine, but it will be cold over most parts.

Ne verwagting sal die laag stadig begin uitwyk na die suidooste en bewolktheid sal oor die algemeen afneem oor die Kaapprovinsie. Oor die res van die gebied sal dit mooi weer wees, maar dit sal koud wees oor meeste dele.

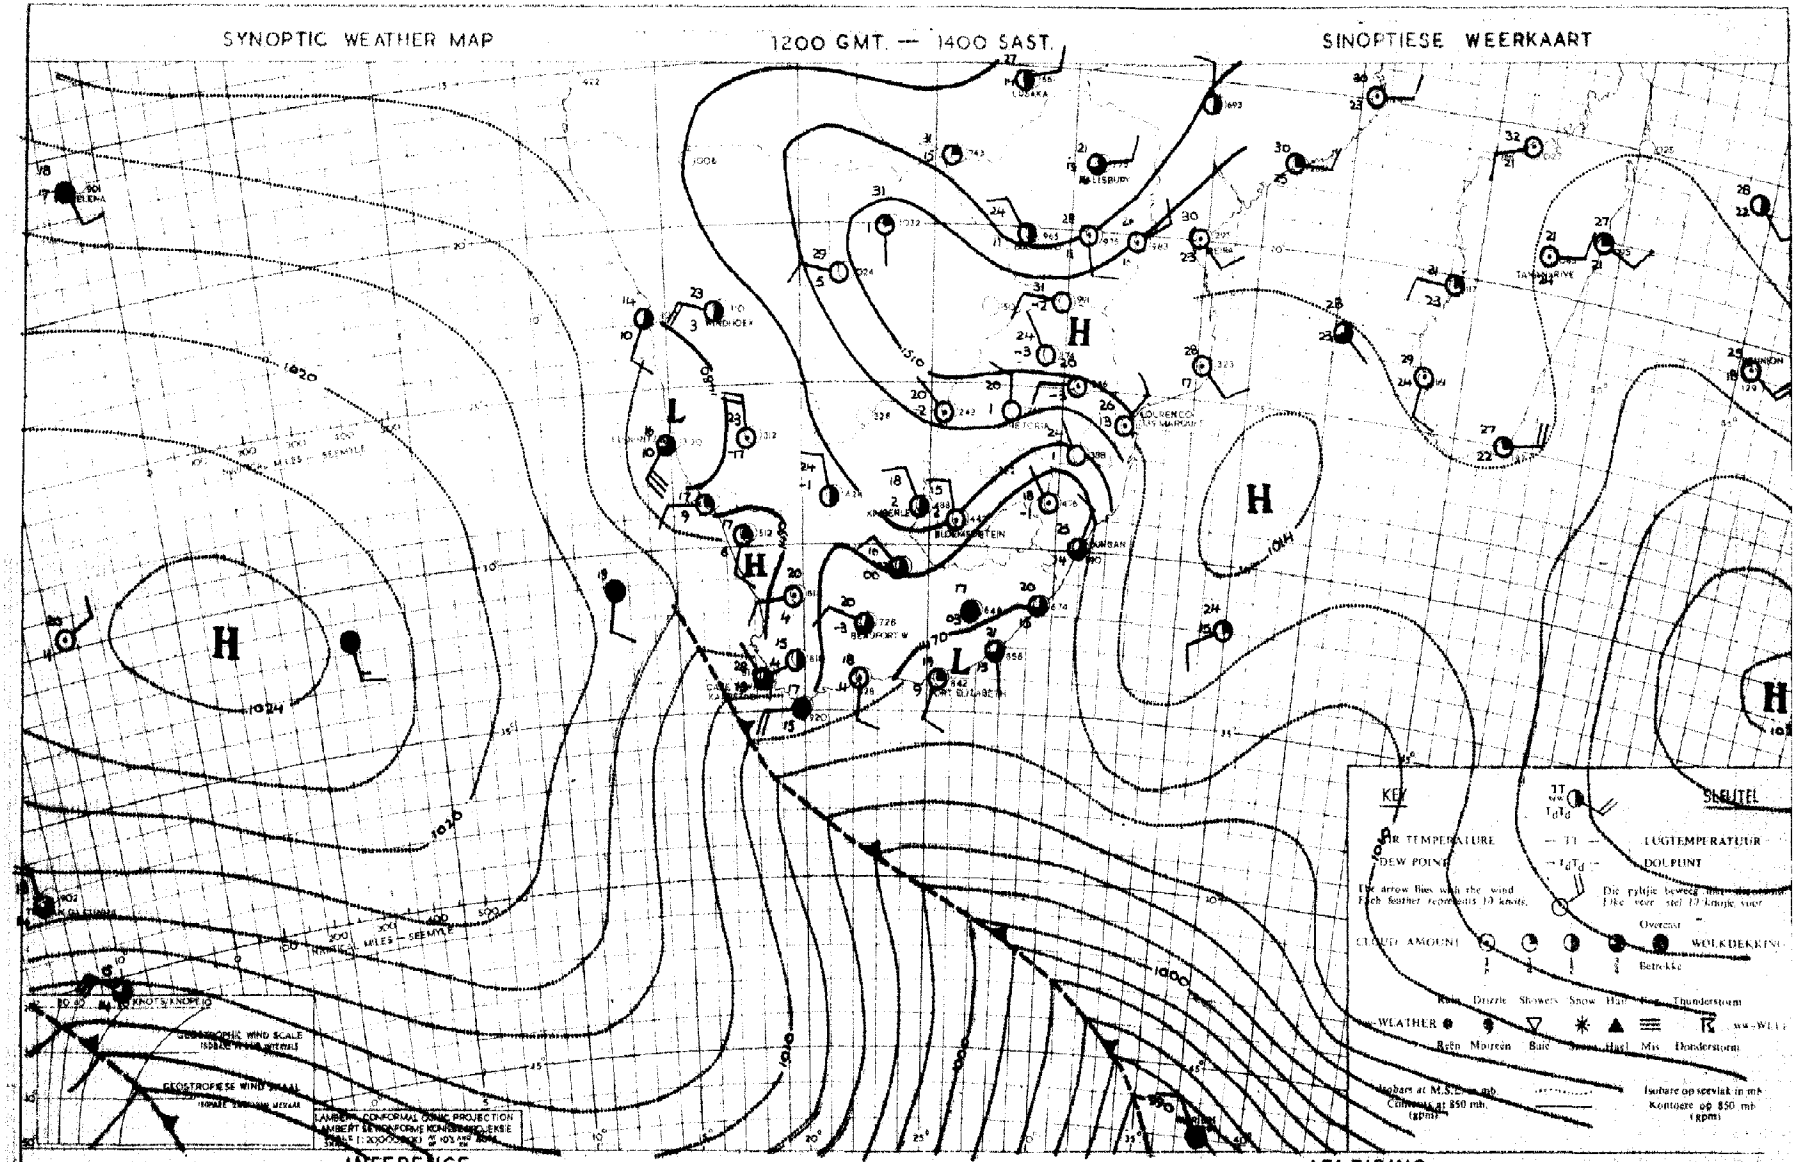
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 2 - 5 1959 DATUM AFLEIDING

With the ridge far to the south and deep upper air trough to the west, cold cloudy conditions will develop over most of the country and rain or thundershowers are possible.

Met die rug ver na die suide en 'n diep oerugtrog na die weste sal koue bewolkte toestande oor die meeste dele van die land ontwikkel en reën of donderbuie is moontlik.

INFERENCE — DATE 4 - 5 -1959 DATUM — AFLEIDING

Northerly winds are developing in the upper air over the western parts of the interior and it is expected that temperatures will rise rapidly over the interior but it will be cold in the morning and frost will occur locally over the highveld regions.

Noordelike winde ontwikkel in die bolug oor die weste-like dele van die binneland en na verwagting sal temperature weer vinnig styg oor die binneland maar dit sal koud wees in die oggend en ryp sal plaaslik voorkom oor die hoeveld streke.

INFERENCE

The low south of the Cape agulhas is moving very slowly and consequently the cold, cloudy weather with showers will still persist over Western and South-Western Cape. Over the remainder of the country it will remain mainly fine and mild but fresh northwesterly wind will blow generally.

DATE 6 - 5 - 1959 DATUM

AFLEIDING

Die laag suid van Kaap Agulhas beweeg stadig en gevolgrik sal koue, bewolkte weer met buie nog voortduur oor Wes- en Suidwes-Kaapland. Oor die res van die land sal dit hoofsaaklik mooiweer en matig wees maar taamlike sterk noordwestelike wind sal algemeen waai.

INFERENCE

The low south of the Union has moved very little and the cloudy weather with showers will persist over Western and South-western Cape. Cold air will spread also over the remainder of the Cape Province, and the Free State but otherwise it will remain fine and mild to warm.

DATE 7 - 5 - 1959 DATUM

AFLEIDING

Die laag suid van die Unie het nog maar min beweeg en die bewolkte weer met buie sal voortduur oor Wes- en Suidwes-Kaapland. Koue lug sal ook uitbrei oor die res van Kaapland en die Vrystaat, maar onigens sal dit matig tot warm bly.

INFERENCE

DATE 9 - 5 - 49 59

DATUM

AFLEIDING

A deep low has developed south-west of the continent and strong north-westerly winds are producing an inflow of humid air into the central part of the Union. It is expected that it will become cloudy over the Free-State and Northern Cape and rain or thundershowers will occur. It will be cloudy and cold over the south-western coastal regions and rain will occur

'n diep laag het suidwes van die vasteland ontwikkel en vietwat vogtiger lug word ingevoer oor die sentrale deel van die Unie, met sterk noordwestelike winde. Na verwagting sal dit bewolk word oor die Vrystaat en Noord-Kaapland en reën en donderbuie sal uitsak. Oor die suidwestelike kusgebiede sal dit bewolk en koud wees en reën sal uitsak.

The low is apparently moving south-eastwards and it is expected that the cloudy conditions and rain will spread to Natal and the south-western half of Transvaal. Cloudy and colder conditions will spread eastwards over the Cape Province and rain will occur over the coastal regions.

Die laag beweeg skynbaar stadig suidoostwaarts en na verwagting sal die bewolkte toestande en reën stadig uitbrei oor Natal en die suidwestelike helfte van Transvaal. Bewolkte kouer toestande sal ooswaarts uitbrei oor die Kaapprovinsie en reën sal voorkom oor die kusgebiede.

AFLEIDING

With the high moving in south of the Union and an upper low over South-West Africa, general rain will fall over the Transvaal, Free State, Northern Cape, Gordonia, Karoo, Natal and Bechuanaland.

Met hoogdruk wat suid van die Unie in beweeg en 'n boluglaag oor Suidwes-Afrika, sal algemene reën uitsak oor die Transvaal, Vrystaat, Noord-Kaapland, Gordonia, Karoo, Natal en Betsjoeanaland.

INFERENCE

DATE 12-5-1959 DATUM

AFLEIDING

The deep low over the interior is moving rapidly to the south-east and it will begin to clear over the western half of the country. Temperatures will remain low.

Die diep laag oor die binneland beweeg vinnig suid-oostwaarts, en dit sal begin ooptrek oor die westelike helfte van die land. Temperatuur sal laag bly.

Drier air is now spreading over the country from the west and the weather will clear gradually. There is however, another cold front west of the Union followed by a big high and cold rainy weather will persist over South-Western Cape.

Droër lug beweeg nou oor die land vanaf die weste en dit sal geleidelik opklaar. Daar is egter alweer 'n koufront wes van die Unie, gevolg deur 'n groot hoog en koue reënerige weer sal oor Suidwes-Kaapland aanhou.

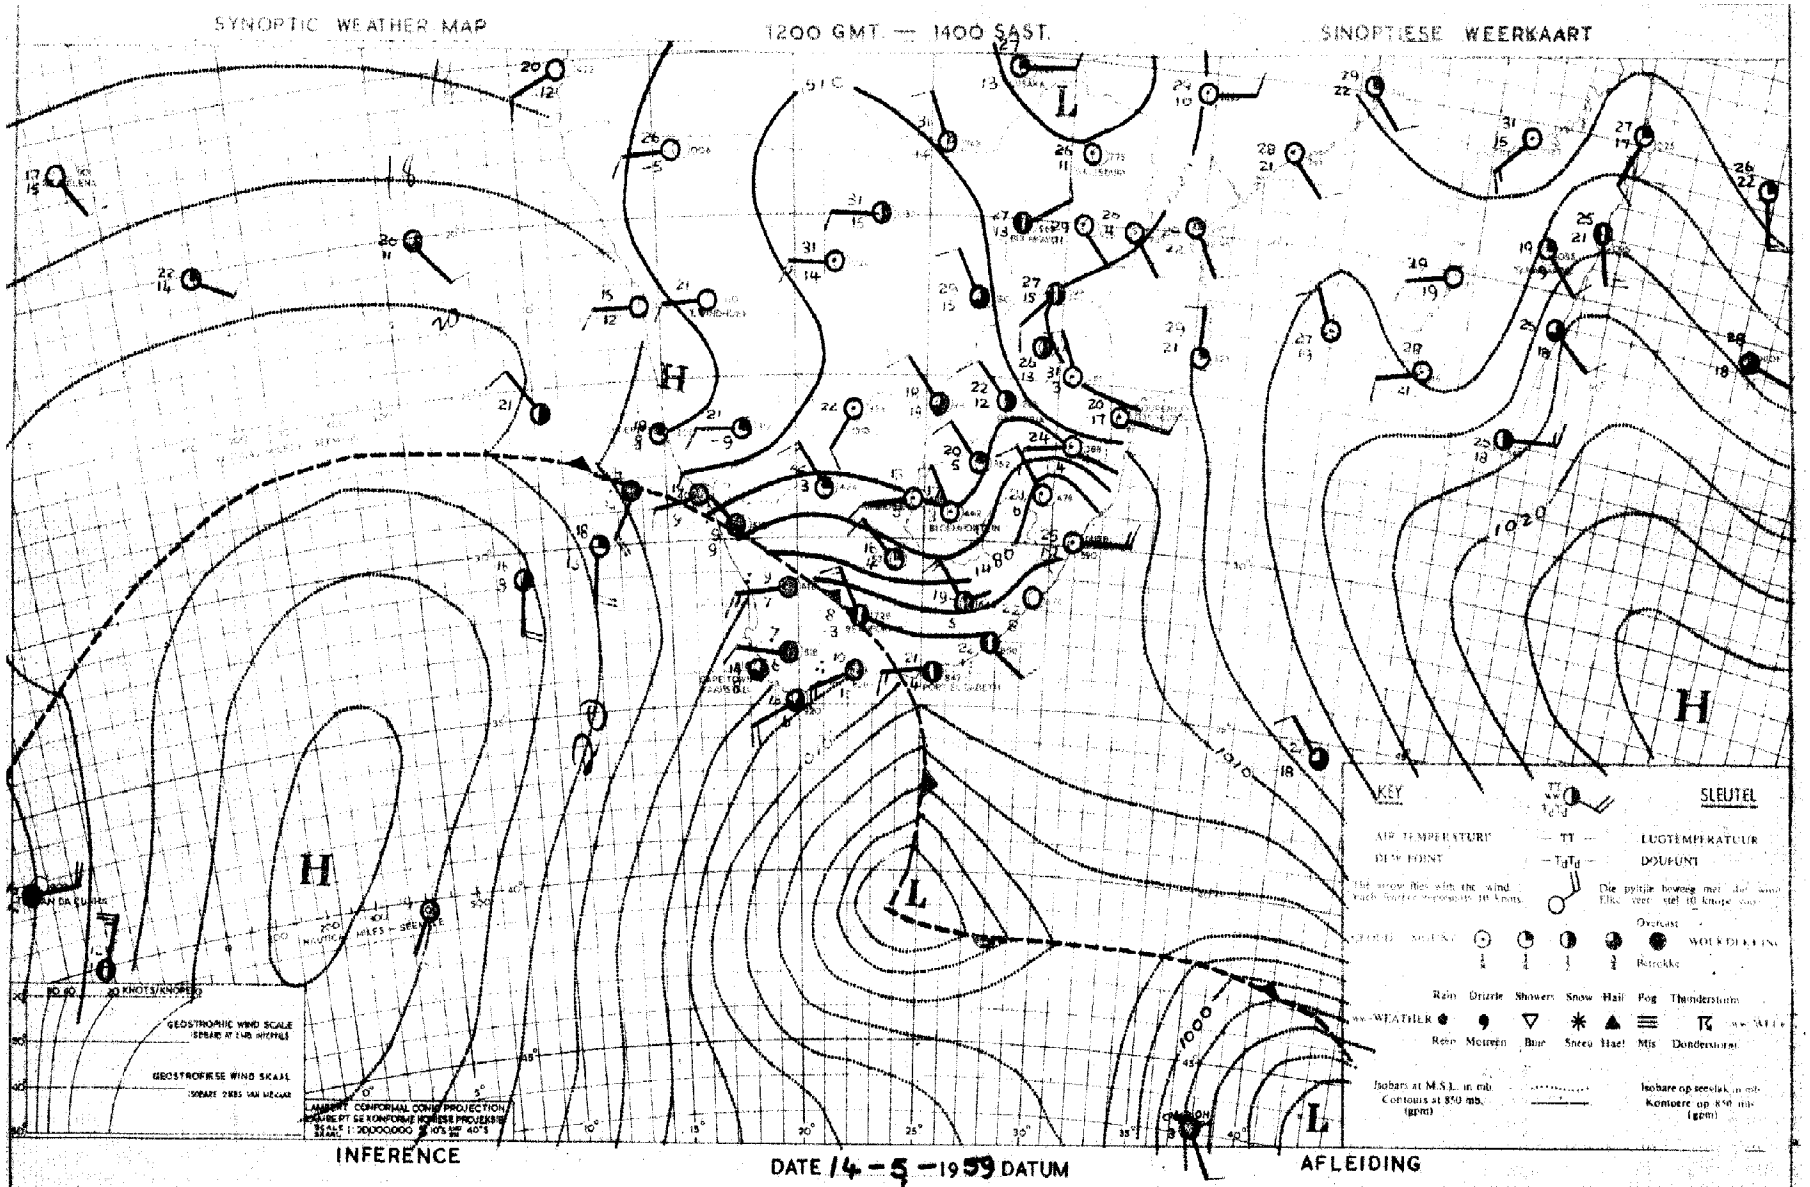
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 14-5-1959 DATUM — AFLEIDING

Cold air will spread over most of the Cape Province and the Free State and later also over Natal. It will remain mild over Transvaal and thundershowers are possible. Showers will occur over the southern and south eastern coastal regions.

Koue lug sal oor die meeste dele van Kaapland en die Vrystaat en later ook oor Natal beweeg, en buie sal oor die suidelike en suidoostelike kusgebiede uitsak. Oor Transvaal sal dit matig bly en donderbuie is moont lik.

DATE 15 - 5 - 1959 DATUM

AFLEIDING

While a strong high is lying off the Cape peninsula, the low has moved eastwards and is situated in the South western Indian Ocean At its western side very cold air moves over most parts of the Union, but there will be a slight warming over the southwestern and western Cape.

Terwyl 'n sterk hoog, suidwes van die Kaapse skiereiland lê, het die laag ooswaarts beweeg na die suidwestelike Indiese oseaan. Aan sy westekant beweeg baie koue lug oor die meeste dele van die Unie, maar dit sal 'n bietjie warmer word oor die suidwestelike en westelike Kaapland.

INFERENCE

DATE 16-5-1959

Cold air has now spread over practically the whole Union Bechuanaland and Southwest Africa, but with the cold closed low over southern Transvaal, cloudy conditions with further rain will occur over the eastern half of the Union. Snow will fall over the higher regions.

AFLEIDING

DATUM

Koue lug het nou oor die hele Unie, Betsjoeanaland en Suidwes-Afrika uitgebrei, maar met die koue, gesloten laag oor suidelike Transvaal sal bewolkte weer met verdere reën voorkom oor die oostelike helfte van die Unie. Sneeu sal oor die hoogste dele voorkom.

DATE 18-5-1959 DATUM

AFLEIDING

The low in the east is filling, and it will clear rapidly over Transvaal, Natal and Eastern Cape, but with the new low in the west, it will become cloudy with rain over western and southwestern Cape.

Die laag in die ooste verswak en dit sal vinnig opklaar oor Transvaal, Natal en Oos-Kaapland, maar met die nuwe laag in die weste sal dit bewolk word met reën oor Wes en Suidwes-Kaapland.

INFERENCE

DATE 19 - 5 - 1959 DATUM

AFLEIDING

Over most parts of the Union the dry air will warm (up), and it will be fine. A deep low west of the Cape - peninsula will move eastwards slowly and affect the western and southwestern Cape to-morrow.

Oor die meeste dele van die Unie sal die droë lug nog warmer word en dit sal mooi weer wees. 'n Diep laag wes van die Kaapse - skiereiland beweeg stadig oos - waarts en sal die westelike en suidwestelike Kaapland môre beïnvloed.

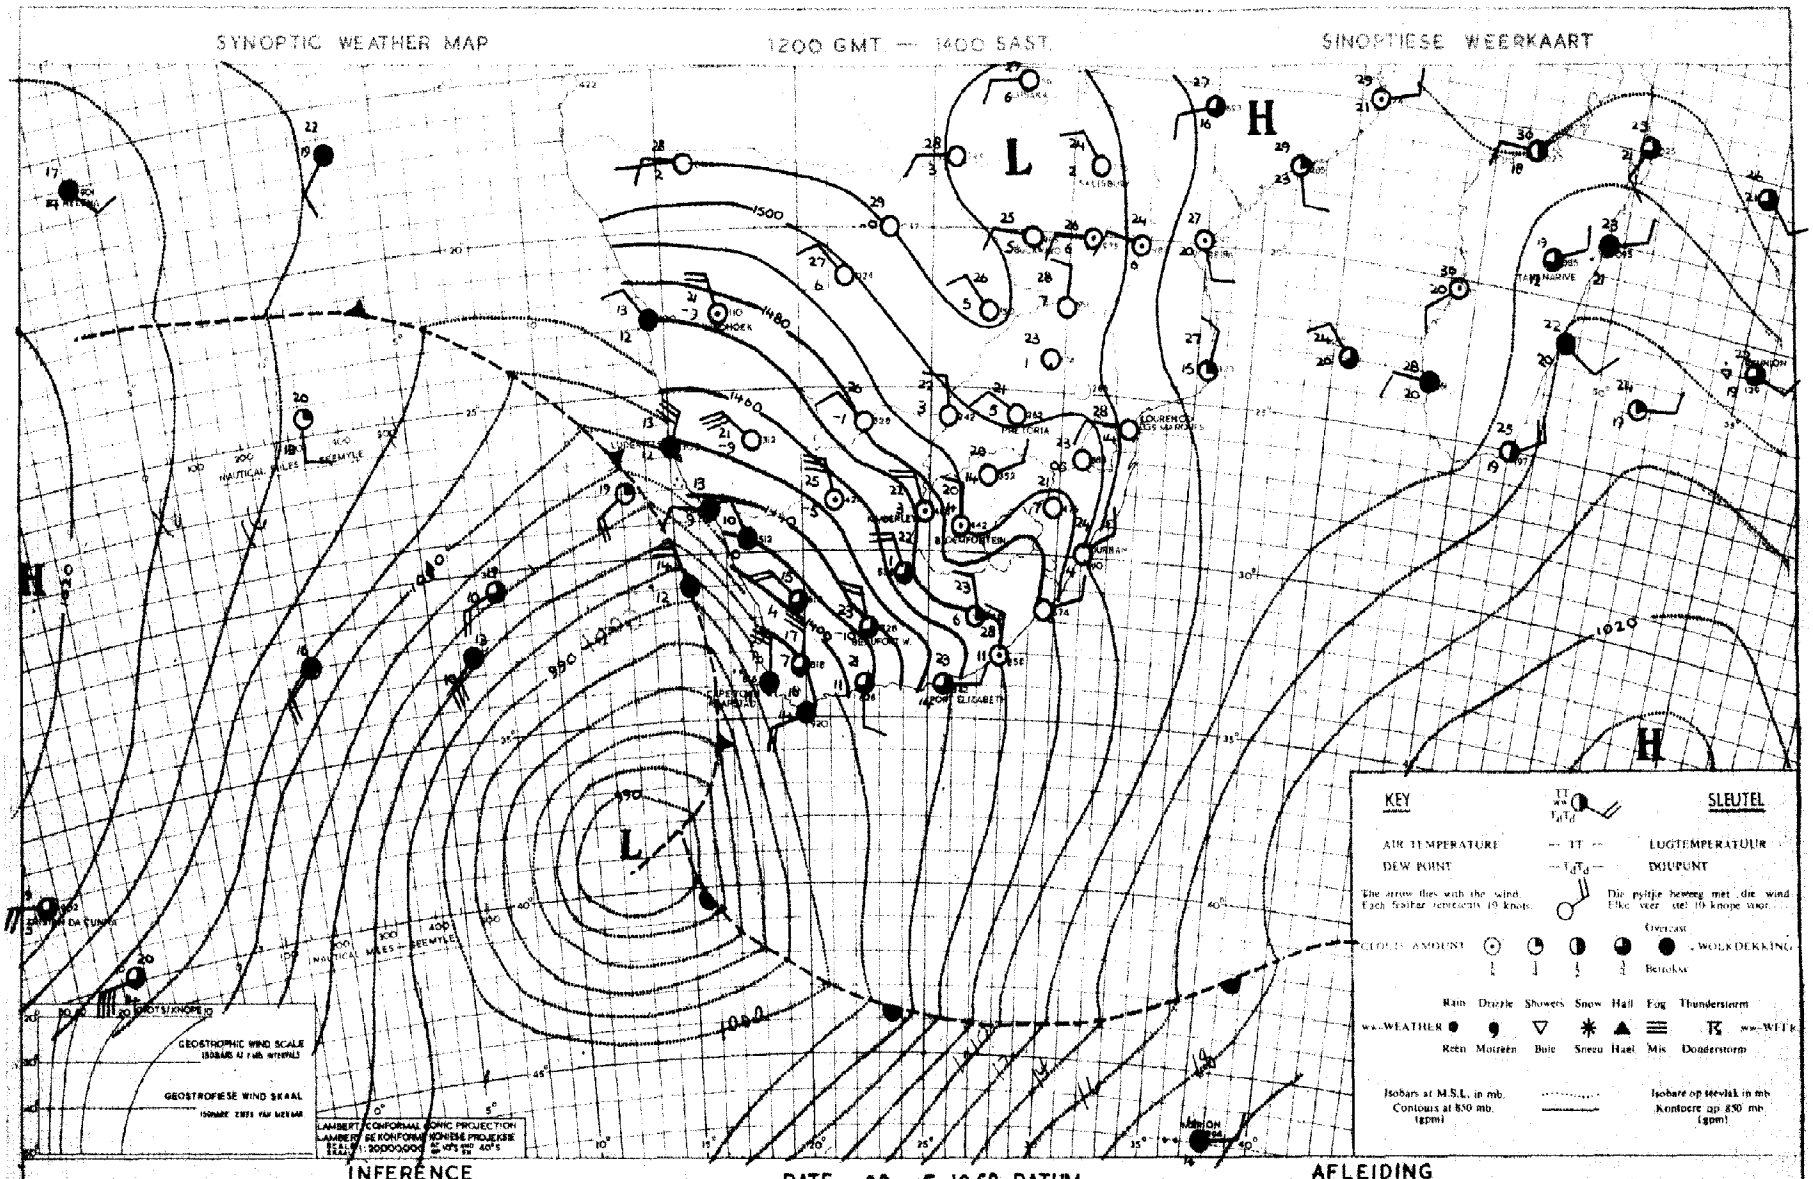
SYNOPTIC WEATHER MAP — 1200 GMT — 1400 SAST — SINOPTIESE WEERKAART



INFERENCE — DATE 20 -5-1959 DATUM — AFLEIDING

The deep low is moving slowly to the southeast. Colder air will spread over most of the Cape Province and further rain will fall over western and southwestern Cape and later also over the southern Cape.

Die diep laag beweeg stadig suidoostwaarts. Kouer lug sal oor die meeste dele van Kaapstad uitbrei en verdere reën sal oor Wes en Suidwes-Kaapland en later ook oor Suid-Kaapland uitsak.

DATE 21 - 5 - 1959 DATUM

AFLEIDING

The low south of Cape Town is moving very slowly but cold air will spread over the entire Cape Province, South West Africa, Free State, Natal and the southern half of the Transvaal. Cloudy conditions with showers will occur over the Cape Province, southern Free State and southern Natal.

Die laag suid van Kaapstad beweeg baie stadig, maar koue lug sal uitbrei oor die hele Kaapland, Suidwes-Afrika, Vrystaat, Natal en die suidelike helfte van Transvaal. Bewolkte toestande met buie sal oor Kaapland, suidelike Vrystaat en suidelike Natal voorkom.

INFERENCE

DATE 22 - 3 - 59 DATUM

AFLEIDING

Cold and fairly dry air moved over most parts of the Union, and it will clear generally to-morrow. A cold front west of the Cape will affect the weather over the southwestern Cape and also the western and southern Cape later.

Koue en taamlik droë lug het oor die meeste dele van die Unie beweeg en môre sal dit algemeen opklaar. 'n Kouefront wes van die Kaap sal die weer oor die suidwestelike Kaapland en later ook die weste- like en suidelike Kaapland beïnvloed.

INFERENCE

DATE 23 - 5 - 1950

With the trough to the west, colder cloudy conditions with rain will develop over the western and southwestern regions of the country.

It will be fair and warmer elsewhere with freshening northerly winds.

AFLEIDING

DATUM

Met die trog na die weste sal kouer bewolkte toestande met reën oor die westelike en suidwestelike dele van die land ontwikkel.

Oor die res van die land sal dit mooiweer en warmer wees maar noordelike wind sal sterker word oor die meeste dele.

INFERENCE

DATE 26 - 6 - 1959 DATUM

AFLEIDING

With the trough to the west cloudy conditions will occur over western and southwestern Cape and rain is possible. It will be fine elsewhere over the country and temperatures will rise.

Met die trog na die weste sal bewolkte toestande oor Wes- en Suidwes Kaapland voorkom, en reën is moontlik. Oor die res van die land sal dit mooiweer bly en temperature sal styg.

INFERENCE

DATE 3-6-1959 DATUM

AFLEIDING

The high is moving rapidly eastwards south of the country and warmer air will begin to move southwards again. It will be cloudy at first over Natal and Transvaal.

Die hoog stoot vinnig suid van die land verby en warmer lug sal weer suidwaarts begin beweeg. Dit sal aanvanklik bewolk wees oor Transvaal en Natal.

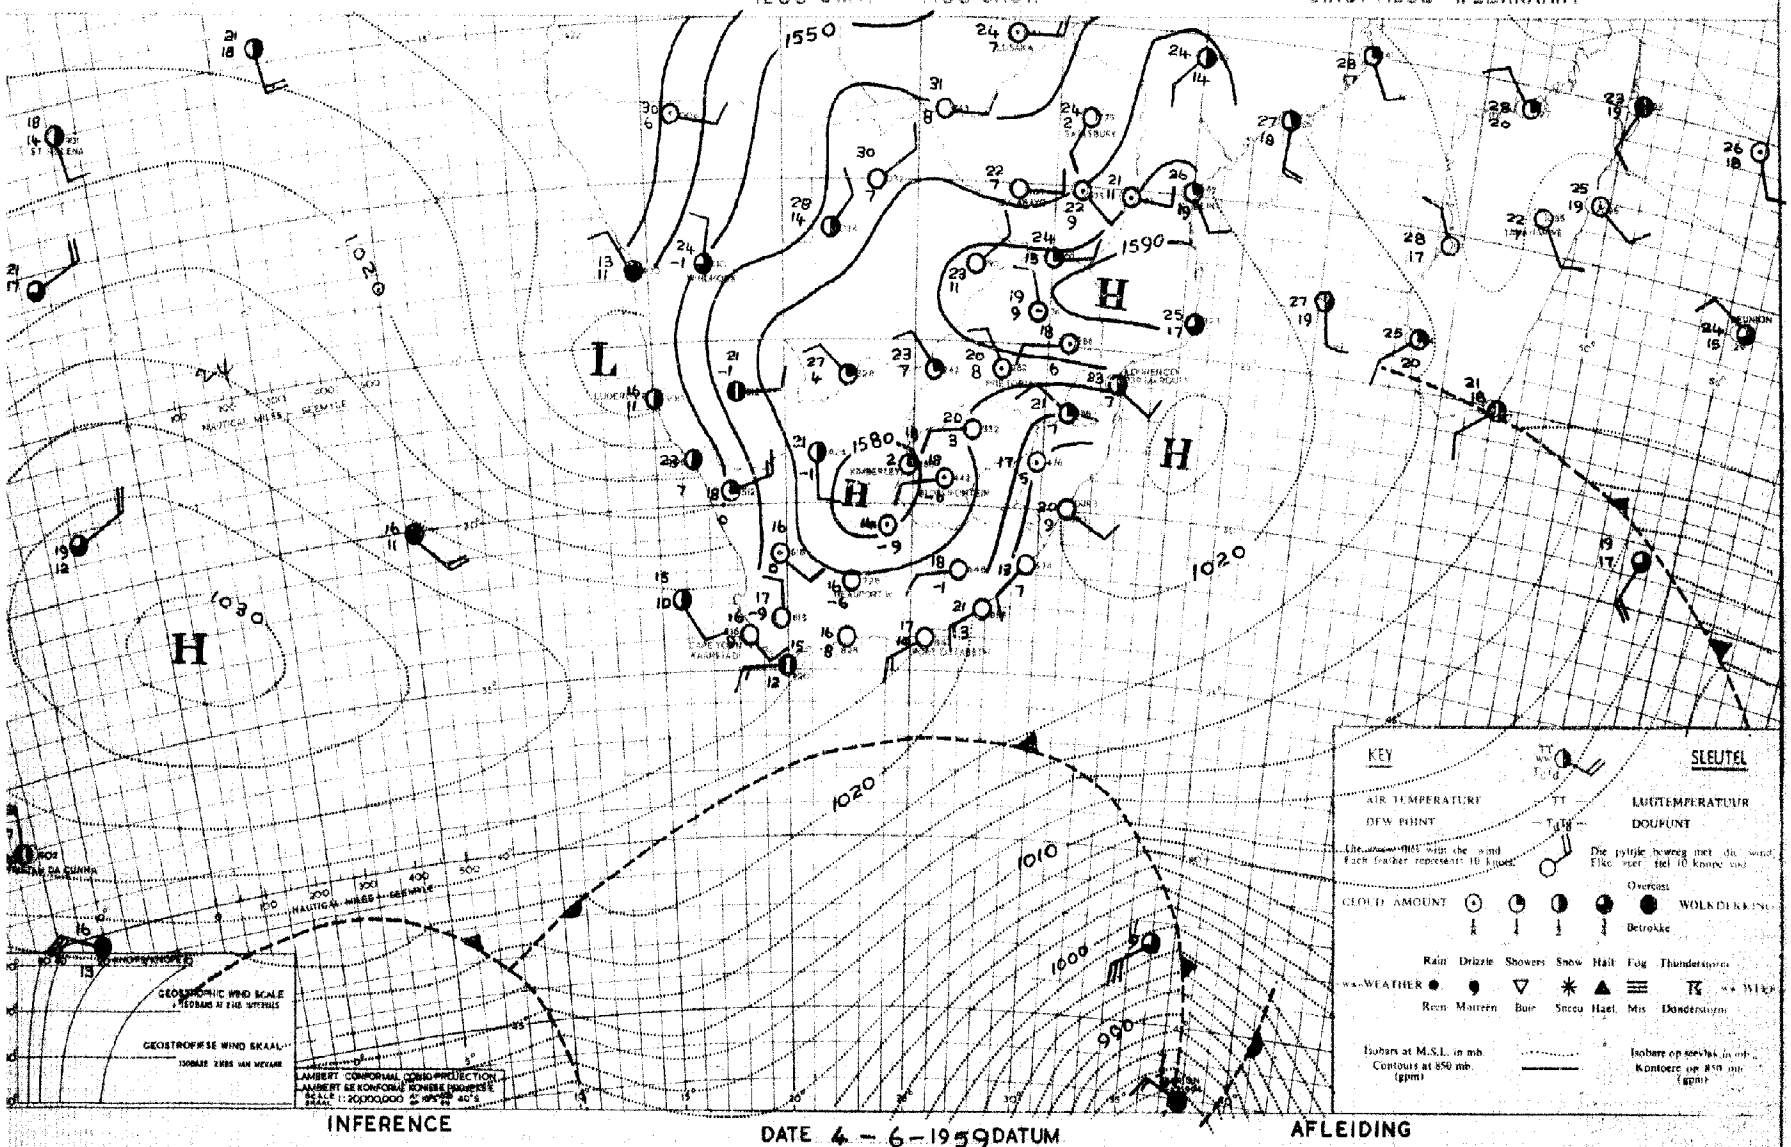
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 4 – 6 – 1959 DATUM AFLEIDING

A strong upper air and surface ridge is situated over the Union and it will remain fine. An upper air low is, however, forming over South-West Africa and thus more humid air will spread over this territory and over Bechuanaland.

'n Sterk bolug- en oppervlakterug is gevestig oor die Unie en dit sal mooiweer wees. 'n Boluglaag vorm egter oor Suidwes-Afrika en vogtiger lug sal dus oor hierdie gebied en Betsjoeanaland ingevoer word.

INFERENCE

It will be cold over the southern parts of the interior, but mild to warm elsewhere. It will be partly cloudy over Gordonia, the southern parts of Southwest-Africa and over the northern districts of the Karoo, and isolated light thunderconditions are possible. Apart from partly cloudy conditions over the south-western coastal regions it will be mainly fine over the remainder of the country.

DATE 5-6-1959 DATUM

AFLEIDING

Dit sal koud wees oor die suidelike dele van die binneland, maar elders sal dit matig tot warm wees. Dit sal gedeeltelik bewolk wees oor Gordonia, die suidelike dele van Suidwes-Afrika en die noordelike distrikte van die Karoo en los ligte donder-weerstoestande is moontlik. Afgesien van gedeeltelik bewolkte toestande oor die suidwestelike kusgebiede sal dit hoofsaaklik mooiweer wees oor die res van die land.

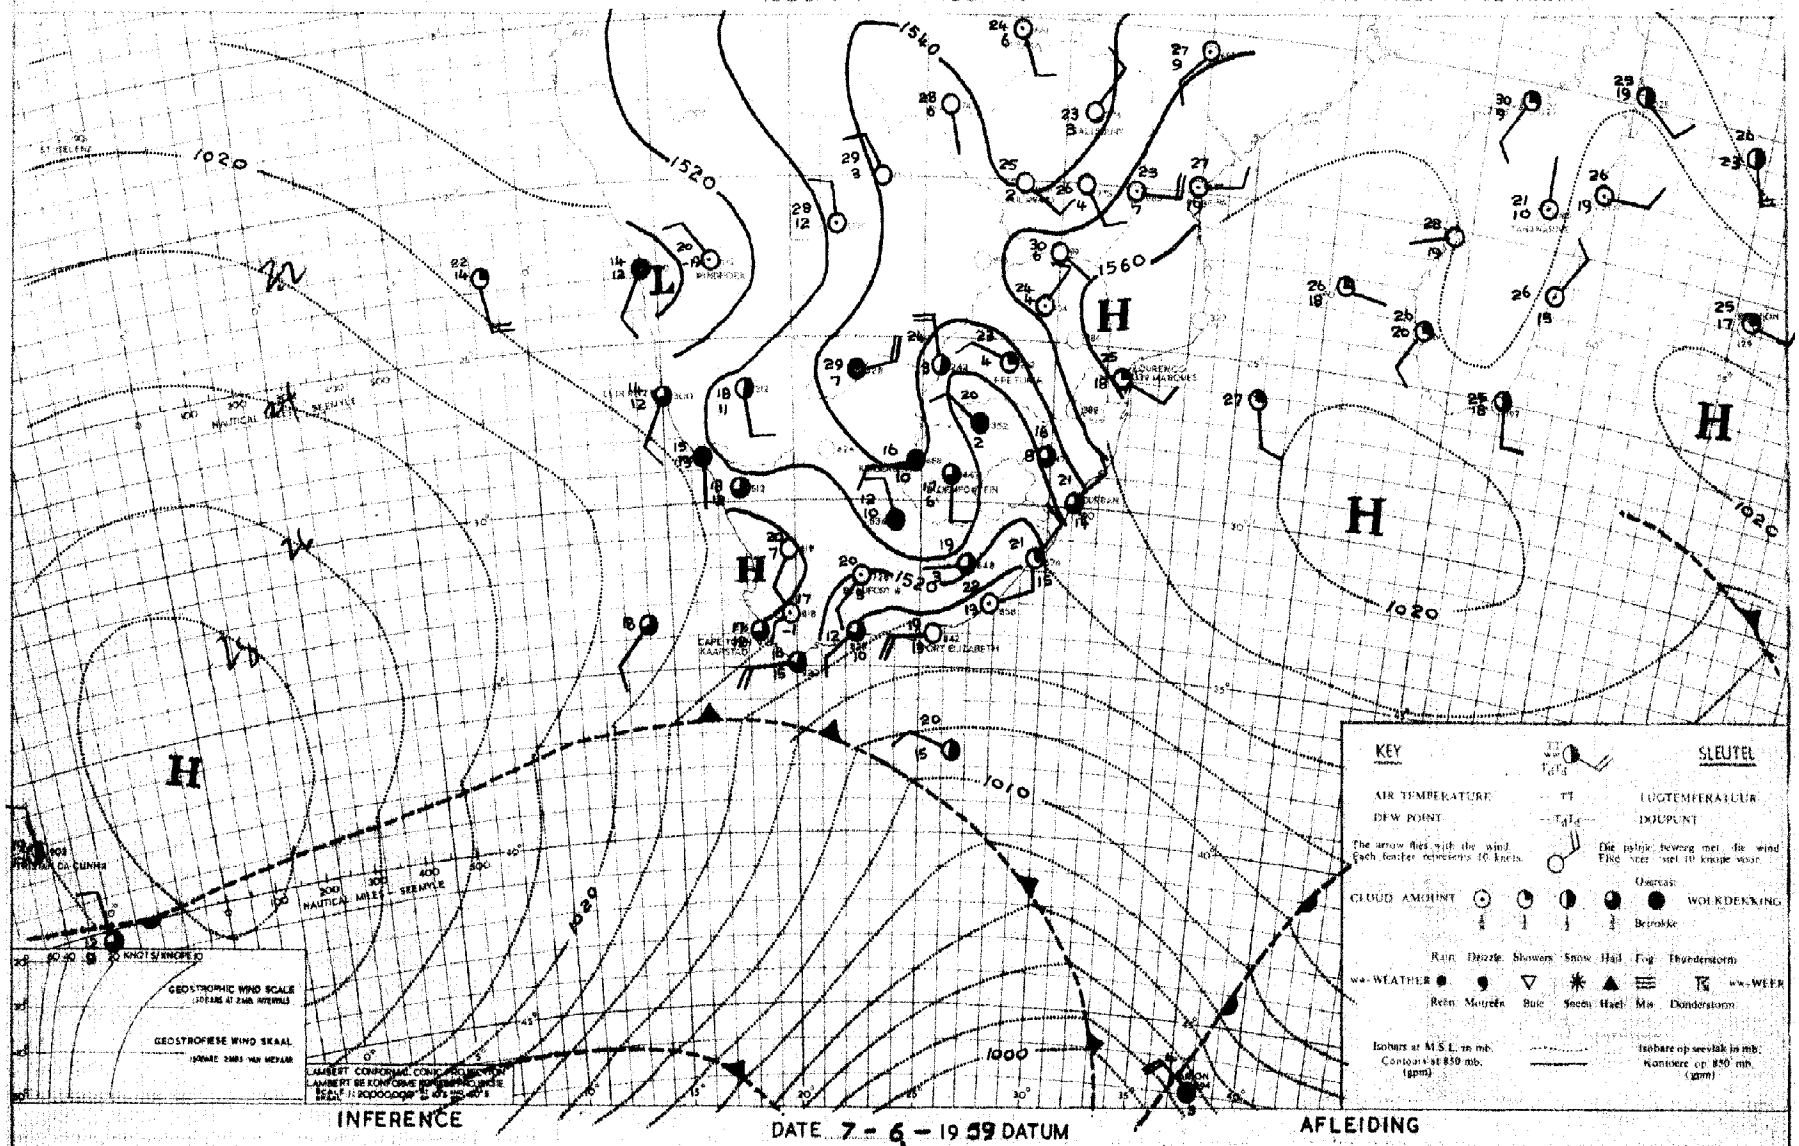
SYNOPTIC WEATHER MAP — 1200 GMT — 1400 SAST — SINOPTIESE WEERKAART



INFERENCE

DATE 7 - 6 - 1959 DATUM

AFLEIDING

With the front to the south, cloudy conditions with light rain will occur over the southern coastal regions. The low over South West Africa is moving eastwards and it will clear over the western interior.

Met die front na die suide sal bewolkte weer met ligte reën oor die suidelike kusgebiede voorkom. Die laag oor Suidwes Afrika beweeg ooswaarts en dit sal ooptrek oor die westelike binneland.

INFERENCE

DATE 8 - 6 - 1959 DATUM

AFLEIDING

The pressure is rising over the south-western part of the interior and it is expected that cool, dry air will spread over the greater part of the interior. It will be fairly cloudy over the southern coastal regions and it will also become cloudy and cold over the south-eastern coastal belt later. Local showers will occur over these parts.

Die druk styg oor die suidwestelike deel van die binneland en na verwagting sal koel, droë lug oor die grootste gedeelte van die binneland uitbreï. Dit sal taamlik bewolk wees oor die suidelike kusstreke en dit sal later ook bewolk en koud word oor die suidoostelike kusstreke. Plaaslike buie sal uitsak oor die deel.

With the strong southerly flow, it will be cold over all parts of the country. Except for scattered clouds over the southern coastal regions, the weather will be fine.

Met die sterk suidelike stroom oor die land, sal dit oral koud wees, maar afgesien van wolke oor die suidelike kusgebiede sal dit mooi weer wees.

INFERENCE

The pressure is rising along the south-eastern coastal regions and falling along the west coast and it is expected that the cloudiness over the southern and south-eastern coastal regions will decrease. Little change is expected in the prevailing fine weather conditions over the interior. It will be cold at night and frost will occur over the greater part of the interior, but it will be mild during the day.

DATE 10-6-1959 DATUM

AFLEIDING

Drukke styg ietwat oor die suidoostelike kusgebiede en daal langs die weskus en na verwagting sal die bewolktheid oor die suidelike en suidoostelike kusgebiede afneem. Min veranderinge word verwag in die heersende mooiweerstoestande oor die binneland. Dit sal koud wees snags en ryp sal oor die grootste gedeelte van die binneland voorkom, maar gedurende die dag sal dit matig wees.

Little change is expected in the prevailing fine weather conditions over the country. There will be a further slight rise in temperature, but it will be cold at night, and frost will recur over the highveld regions. Warm bergwinds will develop over the south-western and southern coastal regions.

Min verandering word verwag in die heersende mooiweerstoestande oor die land. Temperature sal oor die algemeen nog ietwat styg, maar dit sal koud wees gedurende die nag en ryp sal weer voorkom oor die hoëveldstreke. Warm bergwinde sal voorkom oor die suidwestelike en suidelike kusgebiede.

INFERENCE

There is a high over the interior, on the surface as well as in the upper air and little change is expected in the prevailing fine weather conditions. It will be mild during the day, but cold at night and frost will occur. With the trough approaching from the west, it will become partly cloudy and cooler over the south-western and southern coastal regions.

DATE 13 - 6 - 1959 DATUM

AFLEIDING

Daar is 'n hoog oor die binneland, beide op die oppervlakte en in die bolug en min verandering word verwag in die heersende mooiweerstoestande. Dit sal matig wees gedurende die dag, maar koud snags en ryp sal voorkom. Met die nadering van die trog uit die weste sal dit gedeeltelik bewolk en koeler word oor die suidwestelike en suidelike kusstreke.

Fairly moist air is now moving over the western half of the sub-continent, but the west coast trough is not yet sufficiently developed and only isolated light showers are expected.

Betreklik vogtige lug beweeg nou oor die westelike helfte van die subkontinent, maar die weskuslrog is nog nie sterk ontwikkel nie en slegs enkele ligte buitjies sal voorkom.

INFERENCE

DATE 16 – 6 – 1959 DATUM

AFLEIDING

There is a deep upper-air trough over the interior, which is expected to move slowly eastwards. It will be partly cloudy over the north-eastern half of Bechuanaland and cloudy conditions will also spread to the north-eastern half of the Transvaal overnight. Isolated light showers or thundershowers are possible over this part. Over the remainder of the country it will be fine and mild, but cold at night.

Daar is 'n diep bolugtrog oor die binneland, wat na verwagting stadig oostwaards sal uitwyk. Dit sal gedeeltelik bewolk wees oor die noordoostelike helfte van Bechuanaland en bewolkte toestande sal oornag ook uitbreid oor die noordoostelike helfte van Transvaal. Enkele ligte buie of donderbuie is moontlik oor die dele. Oor die res van die land sal dit mooiweer en matig wees, maar koud snags, met plaaslike ryp.

DATE 19-6-1959 DATUM

AFLEIDING

Cold air moves over Tristan eastwards and will affect the south western parts of the Union during the next few days. Over the rest of the Union it will remain fine and mild during day-time, but cold during the night.

Koue lug beweeg vanaf Tristan oostwaarts en sal die suidwestelike dele van die Unie gedurende die volgende paar dae beinvloed. Oor die res van die Unie sal dit gedurende die dag mooiweer en matig bly, maar koud gedurende die nag.

The first cold front is apparently weakening and not much change is expected in the weather over the Union, before the second front approaches.

Die eerste koufront is besig om te verswak en geen groot verandering word verwag in die weer oor die Unie, voordat die tweede front nader nie.

The wave that has developed on the cold front near 30 South, will prevent the cold air from reaching the Union for the next 24 hours, and the weather will thus remain fine and mild over most areas.

Die golf wat op die koue front gevorm het naby 30 Suid sal verhoed dat koue lug gedurende die volgende 24 uur die Unie bereik en dus sal die weer nog mooiweer en matig bly oor meeste dele van die land.

With the low to the west, cloudy colder conditions with light rain will occur over the southwestern coastal regions. It will remain fair elsewhere over the country.

Met die laag na die weste, sal dit bewolk en kouer word, met ligte reën oor die suidwestelike kusgebiede. Oor die res van die land, sal dit redelik mooiweer bly.

Cold air will spread over most parts of the Union, South West Africa and Bechuanaland, but the high is evidently advancing north-eastwards and cloudy conditions with showers will thus be confined to southwestern and southern Cape.

Koue lug sal uitbrei oor meeste dele van die Unie, Suidwes-Afrika en Betsjoeanaland, maar die hoog beweeg skynbaar noordwaarts en bewolkte weer met buie sal beperk wees tot suidwestelike en suidelike Kaapland.

DATE 24-6-1959 DATUM

AFLEIDING

The cold air will spread over the whole Union, and it will be fine generally except over the Transvaal - lowveld, where it will become cloudy.

Die koue lug sal oor die hele Unie uitbrei en dit sal mooiweer weer oor meeste dele, behalwe oor die Transvaalse - laeveld, waar dit bewolk sal word.

INFERENCE

DATE 25 - 6 - 1959 DATUM

AFLEIDING

With the deep trough to the west, cloudy conditions will develop over the south-western Cape Province, and rain is possible. Except for scattered clouds over Transvaal it will be fine and warmer over the remainder of the country.

Met die diep trog na die weste sal dit bewolk word oor Suidwes-Kaapland en reën is moontlik. Afgesien van verspreide wolke oor Transvaal sal dit mooiweer en warmer wees oor die res van die land.

A cold front between the Cape and Tristan moves slowly eastwards. Clouds over the southwestern Cape will not develop before tomorrow afternoon. Apart from some clouds over north-eastern Transvaal it will remain fine and mild during the day.

'n Koue front tussen Kaapland en Tristan beweeg stadig oostwaarts. Wolke sal oor die suidwestelike Kaapland nie voor more namiddag opsteek nie. Afgesien van enkele wolke oor die noordoostelike Transvaal sal dit mooiweer en matig bly gedurende die dag.

Pressures will rise further south and south-east of the Union and scattered clouds will develop over the eastern and northern parts of the Transvaal, but the upper air high is still very strong and it will remain fine over the remainder of the country.

Lugdruk sal verder styg suid en suidoos van die Unie en verspreide wolke sal vorm oor die oostelike en noordelike dele van Transvaal, maar die bolughoog oor die land is baie sterk en dit sal dus mooiweer bly oor die res van die land.

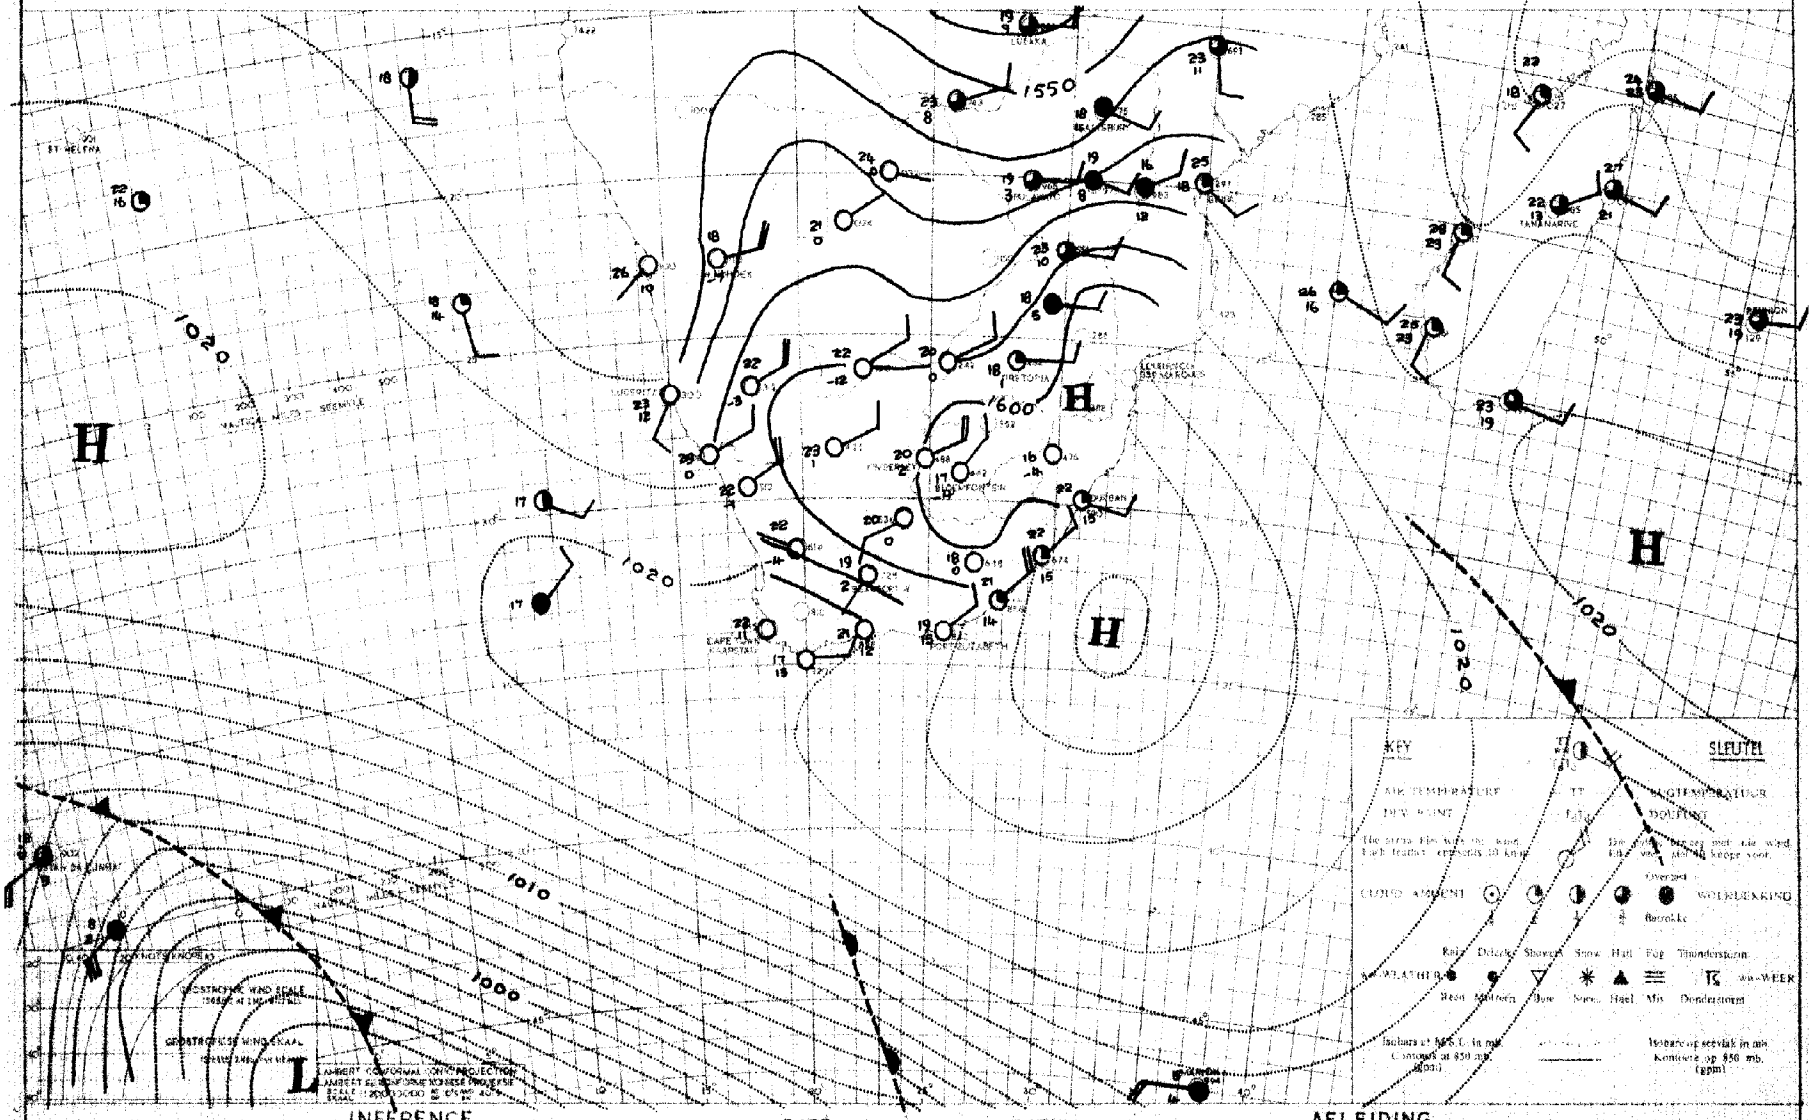
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 28 - 6 - 1959 DATUM AFLEIDING

The high over the Union remains strong and apart from cloudy conditions over northern Transvaal, the weather will remain fine and mild over the Union, South West Africa and Bechuanaland.

Die hoog oor die Unie bly nog sterk, en afgesien van bewolkte weer oor noordelike Transvaal, sal dit mooiweer en matig wees oor die Unie, Suidwes-Afrika en Betsjoeanaland.

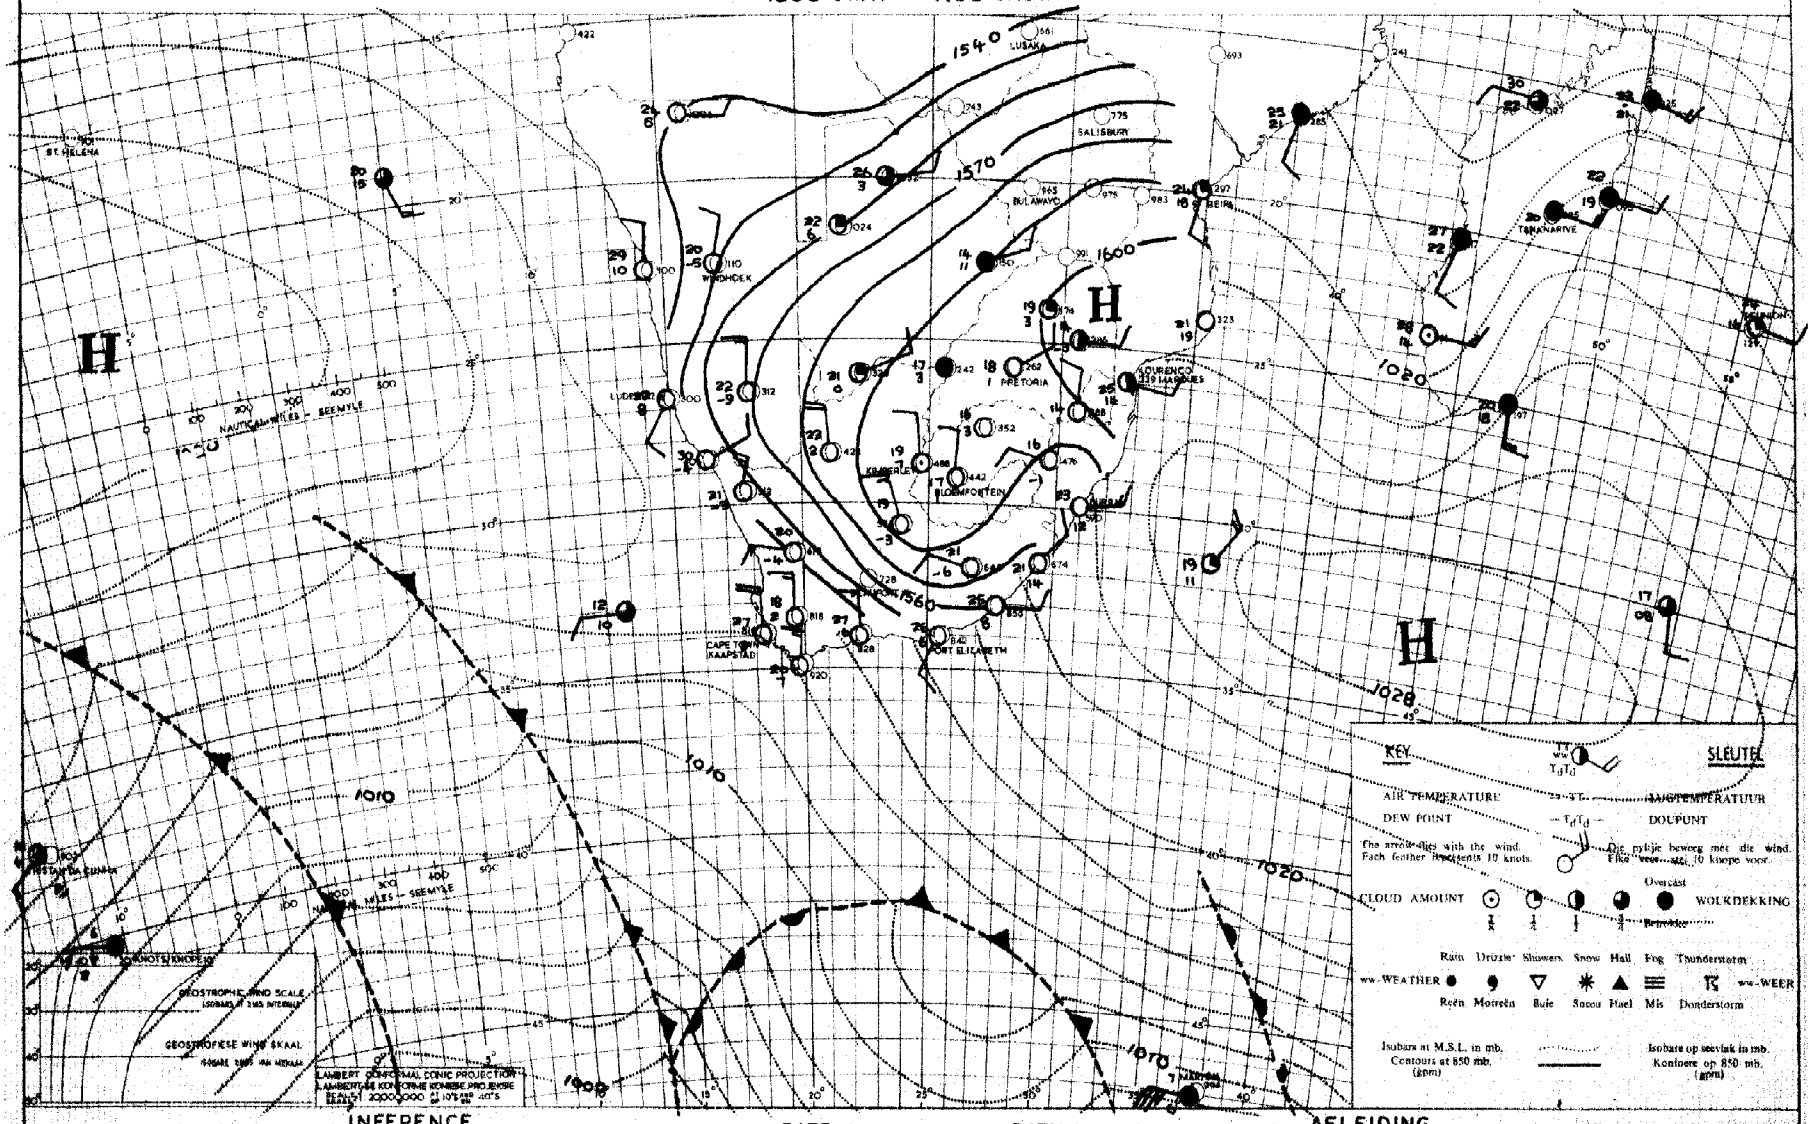
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 29-6-1959 DATUM — AFLEIDING

Slightly humid air is moving in over the central part of the interior, but apart from scattered clouds, it will remain mainly fine and mild. It will be cold at night and frost will occur over the highveld regions. It is expected that it will become cloudy later over the southwestern coastal regions and frost will occur.

Jetwat vogtiger lug beweeg in oor die sentrale deel van die land, maar afgesien van verspreide wolke, sal dit hoofsaaklik mooi-weer en matig bly. Dit sal koud wees snags en ryp sal voorkom oor die hoëveld streke. Na verwagting sal dit later bewolk word oor die suidwestelike kuststreke en reën sal plaaslik voorkom.
