INFERENCE With the low south of the land and the approaching cold front, cold cloudy weather with showers will persist over the southern areas of the Cape, but over the rest of the country the weather will clear from the west as the upper-air trough passes eastwards.

AFLEIDING Met die laag suid van die land en in koufront wat aankom, sal koue bewolkte weer met buie voortduur oor die suidelike dele van Kaapland, maar oor die res van die land sal dit uit die weste opklaar namate die bolugtrog deur beweeg.

INFERENCE The cold front west of the land will reach the west coast tonight, resulting in cold, cloudy weather with showers over the south-western and southern areas of the Cape Province. It will also be cold over the rest of the Cape Province and the O.F.S., but remain mild over Transvaal and Natal.

AFLEIDING Die koueftont wes van die land sal die weskus vanaand bereik sodat koue bewolkte weer met buie sal voorkom oor die suidwestelike en suidelike dele van Kaapland. Dit sal ook koud wees oor die res van Kaapland en die Vrystaat, maar matig bly oor Transvaal en Natal.

INFERENCE The cold front over the Cape Province will advance further eastwards so that cold, cloudy weather with showers will spread over most of this province and over the Southern O.F.S., but over the northern regions of the country it will remain fine and mild.

AFLEIDING Die koufront oor die Kaapprovinsie sal verder ooswaarts beweeg sodat koue, bewolkte weer met buie oor die meeste dele van dié provinsie en oor die Suid-Vrystaat sal uitbrei, maar oor die noordelike dele van die land sal dit nog mooi-weer en matig bly.

INFERENCE The low south of the land is moving off to the east and therefore the weather over the coastal regions will clear further. Over the interior it will be mainly fine and cold with severe frost over the central and southern regions.

AFLEIDING Die laag suid van die land beweeg weg na die ooste en dus sal die weer oor die kusgebiede verder opklaar. Oor die binneland sal dit hoofsaaklik mooiweer en koud wees met strawwe ryp oor die sentrale en suidelike gebiede.

INFERENCE

The circulation over the whole interior is anticyclonic and therefore fine weather is forecast for most regions. The high south of the continent will, however, cause cloudy weather over the eastern and northern regions of Transvaal

AFLEIDING

Die sirkulasie oor die hele land is antisiklonaal en dus word mooiweer oor die meeste gebiede voorspel. Die hoog suid van die vasteland sal egter bewolkte weer veroorsaak oor die oostelike en noordelike dele van Transvaal.

INFERENCE

Little change is expected in the prevailing conditions and it will remain fine over most regions but, with a second high moving in south of the continent, cloudy weather will develop over the east coastal regions and over Eastern Transvaal.

AFLEIDING

Daar word min verandering verwag in die heersende toestande en dit sal mooiweer bly oor die meeste gebiede maar met 'n tweede hoog wat suid van die land instoot, sal bewolkte weer oor die ooskus-gebiede en oor Oos-Transvaal ontwikkel.

INFERENCE The cold front that is causing light rain over the east coast, will also bring cooler, cloudy weather over Eastern Transvaal but the cloudy weather along the coast will clear as the high south of the land advances further east.

AFLEIDING Die koufront wat ligte reën oor die ooskus veroorsaak, sal ook koeler, bewolkte weer oor Oos-Transvaal veroorsaak, maar die bewolkte weer langs die ooskus sal opklaar namate die hoog suid van die land verder oos beweeg.

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

INFERENCE The cold front near Cape Agulhas will advance along the southern and eastern coasts and will be accompanied by cool, cloudy weather with showers, but over the rest of the country dry, anticyclonic conditions will persist.

AFLEIDING Die koufront net wes van Kaap Agulhas sal more bewolkte, koue weer met ligte buie oor die suid- en ooskuskstreke laat uitbrei, maar oor die oorblywende gebiede sal droë antisiklonale toestande nog voortduur.

INFERENCE Between the low south-east of Durban and high pressure further south, cool and relatively moist air is being advected from the south over the Natal coast where it will be partly cloudy and these conditions will advance also over the Eastern Transvaal Lowveld but over the rest of the country it will remain fine.

AFLEIDING Tussen die laag suidoos van Durban en die hoë druk verder suid, word koel en effense vogtige lug uit die suide ingevoer oor die Natalkus, waar gedeeltelik bewolkte weer sal voorkom wat later ook oor die Oos-Transvaalse Laeveld sal uitbrei, maar oor die res van die land sal dit mooiweer bly.

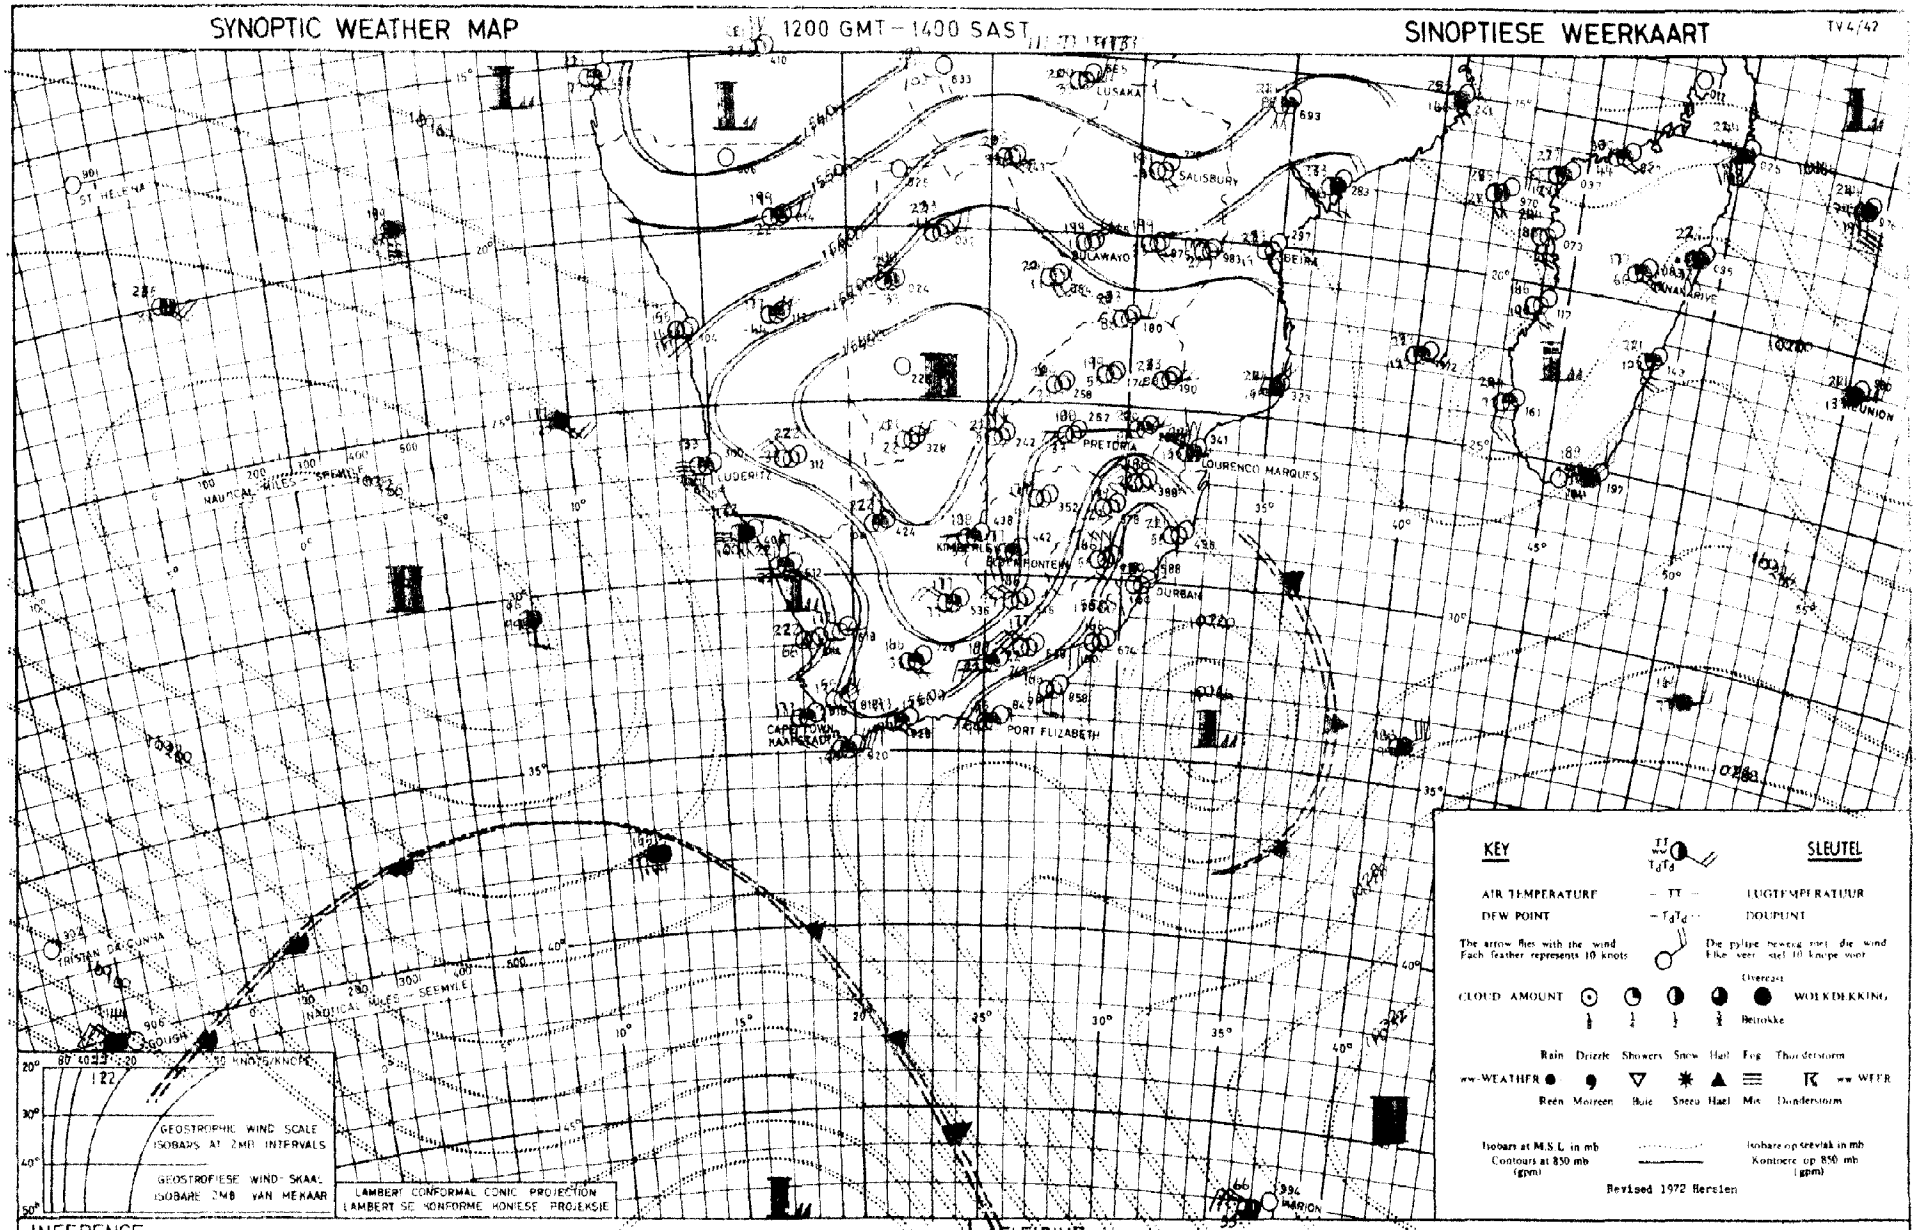
Tshabong	22	-3	
Tshane			



INFERENCE

The intense high pressure system over the interior will maintain fine weather over most of the country. The cold front south-west of the Cape will pass south of the country.

AFLEIDING

Die sterk hoedrukstelsel oor die binneland sal mooi weer oor die meeste dele van die land handhaaf. Die koufront suidwes van die Kaap sal suid van die land verbyy beweeg.

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

INFERENCE As a result of the strong anticyclone over the interior fine weather will persist over most regions, but the cold front approaching from the west will cause cold, rainy weather tomorrow evening over the South-Western Cape.

AFLEIDING As gevolg van die sterk hoëdrukstelsel oor die binneland sal mooiweerstoestande oor die meeste gebiede voortduur, maar die koufront wat uit die weste nader, sal teen more-aand koue reënweer oor Suidwes-Kaap veroorsaak.

INFERENCE A wave has developed on the cold front west of the land and therefore cold, cloudy weather with strong north-westerly winds will occur tomorrow over the western and south-western areas of the Cape Province, but over the rest of the country it will still be fine and mild.

AFLEIDING 'n Golf het ontwikkel op die koufront wes van die land en gevolglik sal koue, bewolkte weer met reën en sterk noordwestewind more oor die westelike en suidwestelike dele van Kaapland voorkom, maar oor die res van die land sal dit nog mooiweer en matig bly.

INFERENCE

With a frontal depression along the west coast and another cold front approaching from the west, the cloudy weather with rain will persist over Western and South-western Cape, spreading gradually to the Southern Cape.

AFLEIDING

Met 'n laag en kouefront langs die weskus en nog 'n kouefront wat uit die weste nader, sal die bewolkte weer met reën voortduur oor Wes- en Suidwes-Kaapland en geleidelik uitbrei oor Suid-Kaapland.

INFERENCE

The deep low pressure system and associated trough west of the country is moving eastwards and will cause cold, cloudy weather with rain tomorrow over Western and South-Western Cape. Over the rest of the country, however, the weather will remain fine and mild as a result of the intense anticyclone over the interior.

AFLEIDING

Die diep laedrukstelsel en gepaardgaande kouefront wes van die land beweeg ooswaarts en sal more koue reënweer oor Wes- en Suidwes-Kaapland teweegbring. Oor die res van die land sal dit egter nog mooiweer en matig wees as gevolg van die antisiklonale sirkulasie oor die binneland.

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

INFERENCE

As a result of the wave forming on the cold front over the Atlantic ocean, the eastern section of the front will pass south of the continent and therefore the relatively warm weather will persist over most of the country.

AFLEIDING

Weens die vorming van 'n golf op die koufront oor die Atlantiese oseaan sal die voorste gedeelte van die front suid van die land verby trek en dus sal die betreklik warm weer oor die meeste dele van die land voortduur.

INFERENCE

The depression south west of the weather ship ZSAL is moving eastwards and the associated trough will cause cloudy, colder weather, with rain over the South-Western and Southern Cape Province, but little change is expected over the rest of the country.

AFLEIDING

Die laedrukstelsel suidwes van die weerskip ZSAL beweeg ooswaarts en die gepaardgaande trog sal bewolkte, koue weer met reën oor Suidwes- en Suid-Kaapland veroorsaak, maar oor die res van die land word min verandering verwag.

INFERENCE The cold front off Cape Town is being followed by a fairly strong ridge of high pressure and therefore cool, cloudy weather with rain in places, will advance over the southern and eastern coastal regions but over the remainder of the country it will still be mild to warm tomorrow.

AFLEIDING Die koufront naby Kaapstad word gevolg deur 'n redelike sterk rug van hoë druk en gevolglik sal koel, bewolkte weer, met reën plek-plek, oor die suid- en ooskusstreke uitbrei, maar oor die res van die land sal dit more nog matig tot warm bly.

INFERENCE

The intense high that has developed south of the continent will cause cool, cloudy weather to spread also over the eastern and northern areas of the Transvaal but over the rest of the country it will remain mainly fine.

AFLEIDING

Die sterk hoëdrukstelsel wat suid van die vasteland opgebou het, sal koel, bewolkte weer ook oor die oostelike en noordelike dele van Transvaal laat uitbrei maar oor die res van die land sa dit hoofsaaklik mooiweer bly.

INFERENCE The intense high south-east of the continent will maintain the inflow of cool, moist air over the north-eastern areas of Transvaal and over Rhodesia, but over the remaining areas the weather will be fine and hot bergwinds will persist over the west coast regions.

AFLEIDING Die groot hoog suidoos van die vasteland sal die invloei van koel, vogtige lug laat voortduur oor die noordooste like dele van Transvaal en oor Rhodesië, waar dit bewolk sal bly. Oor die res van die land sal dit egter mooiweer bly en warm bergwinde sal voortduur oor die weskusgebiede.

INFERENCE The exceptionally strong high over the Indian ocean will maintain the inflow of cool, moist air over North-Eastern Transvaal and Rhodesia, where it will remain cloudy with light showers. The cold front approaching from the west will reach the coast later tomorrow and will cause light showers over the south-west coast but hot berg winds will persist along the southern and south eastern coastal regions.

AFLEIDING Die besondere sterk hoog oor die Indiese oseaan sal die invloei van koel, vogtige lug laat voortduur oor Noordoos-Transvaal en Rhodesië, waar dit bewolk sal bly met ligte buie. Die koufront wat uit die weste nader, sal later more die kus bereik en buie veroorsaak oor die suidweskus, maar warm bergwinde sal nog voorkom langs die suid- en suidooskuskstreke.

INFERENCE *The cold frontal system over the Atlantic ocean will bring cool, cloudy weather with rain tomorrow over the western and south-western Cape coastal regions, but over the remainder of the country, there will be little change in the prevailing conditions.*

AFLEIDING *Die koufrontstelsel oor die Atlantiese oseaan sal more koel, bewolkte weer met reën teweegbring oor die westelike en suidwestelike Kaapse kusstreke, maar oor die res van die land sal daar min verandering wees in die heersende toestande.*

INFERENCE

The intense high over the Atlantic ocean will cause the cold front west of the land to advance across the interior and cold weather with showers will prevail tomorrow already over most of the Cape Province and later also over the southern O.F.S. Snow may be expected on the mountains in the Southern and Eastern Cape

AFLEIDING

Die sterk hoog oor die Atlantiese oseaan sal die koufront wes van die land oor die binneland instoot en dit sal more reeds bewolk en koud wees met buie oor die meeste dele van Kaapland en later ook oor die Suid-Vrystaat. Sneeu kan oor die berge van Suid- en Oos-Kaapland verwag word.

INFERENCE The cold air that has now spread over the Cape Province will advance further eastwards also over the Free State, Natal and the southern areas of the Transvaal. Cloudy weather with showers will occur over the Cape south of the Orange, the southern O.F.S. and Natal and snow will fall on the mountains.

AFLEIDING Koue lug wat reeds oor Kaapland inbeweeg het, sal verder uitbrei ook oor die Vrystaat, Natal en die suidelike dele van Transvaal. Bewolkte toestande met buie sal daarmee gepaard gaan oor die Kaap suid van die Oranje, Suid-Vrystaat en Natal en sneeu sal oor die berge val.

INFERENCE

The intense high south of the continent is causing an inflow of cold, moist air from the south-east over Natal and Eastern Transvaal where light showers will occur. The cloudy weather will also advance over the rest of the Transvaal and the Northern and Eastern Free State.

AFLEIDING

Die sterk hoog suid van die vasteland veroorsaak 'n instroming van koue, vogtige lug uit die suidooste oor Natal en Oos-Transvaal en verdere ligte buie sal oor hierdie gebiede voorkom. Die bewolkte weer sal ook uitbrei oor die res van Transvaal en Noord- en Oos-Vrystaat.

INFERENCE *The depression and associated cold front west of the continent will cause cloudy weather with rain tomorrow over Western and South-Western Cape. The intense high south-east of Durban will maintain the inflow of cool, moist air over Transvaal and the Northern O.F.S. where cool, cloudy weather will persist.*

AFLEIDING *Die laedrukstelsel en gepaardgaande koufront wes van die land sal more bewolkte weer met reën oor Wes- en Suidwes-Kaapland veroorsaak. Die sterk hoog suidoos van Durban laat die invloei van koel, vogtige lug oor Transvaal en Noord-Vrystaat voortduur, sodat dit bewolk en koel sal bly oor hierdie gebiede.*

INFERENCE *The slow-moving low pressure system over the Atlantic ocean will cause cloudy weather with showers over the western Cape coast. Light showers are also possible over the western interior in the relatively moist northerly airstream prevailing over these regions.*

AFLEIDING *Die stadig bewegende laedrukstelsel oor die Atlantiese oseaan sal bewolkte weer met buie teweegbring oor die Kaapse weskus. Ligte buie is ook moontlik oor die westelike binneland in die betreklik vogtige noordelike lugstroom wat oor dié gebiede heers.*

INFERENCE The low pressure trough and cold front which have caused rain over the Cape Province and Free State, are moving eastwards fairly rapidly and the weather will clear over most regions, but it will remain cold over the southern half of the country

AFLEIDING Die laedruktrog en koueftront wat reën oor die Kaapprovinsie en die Vrystaat veroorsaak, beweeg redelik vinnig ooswaarts en die weer sal oor die meeste dele opklaar, maar dit sal koud bly oor die suidelike helfte van die land

INFERENCE

The cold front south of Cape Town will cause light rain tomorrow over the Cape south coast, but over the rest of the country it will be fine and warmer as a result of the anticyclone over the interior.

AFLEIDING

Die koufront suid van Kaapstad sal more ligte reën oor die Kaapse suidkus veroorsaak, maar met 'n hoog oor die res van die land sal dit oor die meeste gebiede mooiweer wees en dit sal warmer word.

INFERENCE

The intense high moving in south of the continent will cause cold, cloudy weather with rain to advance over Eastern Cape, Natal and Eastern Transvaal. At the same time a low pressure trough is developing over the central interior and therefore thundershowers may be expected over the O.F.S., Northern Cape and Western Transvaal.

AFLEIDING

Die sterk hoog wat suid van die land inbeweeg, sal koue, bewolkte weer met reën laat uitbrei oor Oos-Kaap, Natal en Oos-Transvaal. Terselfdertyd is 'n laedruktrog besig om oor die sentrale binneland te vorm en dus kan donderbuie ook oor die Vrystaat, Noord-Kaapland en Wes-Transvaal verwag word.

INFERENCE The second cold front of yesterday's weather chart has intensified, as has the high pressure area following closely on its heels, so that cold air is rushing in across the Free State, Natal and the Transvaal from the South-east. Together with the low pressure area in the upper-air over the western parts, it is creating favourable conditions for rainy weather and possibly snow showers over the named provinces.

AFLEIDING Die koufront van gister se weerkaart het verskerp en die hoëdruk wat dit vinnig opvolg het intenser geword, sodat koue lug uit die Suidooste vinnig oor Natal, Vrystaat en Transvaal instroom. Tesame met 'n boluglaedruk oor die Westelike dele skep dit gunstige toestande vir koue reënweer en moontlik ook sneeubuie oor die genoemde provinsies.

INFERENCE

The low pressure system over the central interior is also evident in the upper air as a deep cut-off low and is causing rain over the areas east of it with snow on the mountains and high ground. The system is, however, now moving eastwards and partial clearance will take place from the west.

AFLEIDING

Die laedrukstelsel oor die sentrale binneland gaan gepaard met 'n diep boluglaag en veroorsaak reën oor die gebiede oos daarvan met sneeu oor die berge en hoogliggende gebiede. Die stelsel beweeg egter nou ooswaarts en gedeeltelike opklaring sal uit die weste intree.

INFERENCE

The low pressure system over the interior shows little sign of movement and therefore scattered showers and thundershowers will still occur over the Free State, North-eastern Cape, Natal and the southern half of the Transvaal.

AFLEIDING

Die laedrukstelsel oor die binneland toon min tekens van beweging en dus sal verspreide buie en donderbuie nog voorkom oor die Vrystaat, Noordoos-Kaap, Natal en die suidelike helfte van Transvaal.

INFERENCE

The frontal systems west of the land will cause rain over the South-Western Cape, spreading to Southern Cape later, but over the rest of the country it will be mainly fine as the upper-air low has now moved out over the sea.

AFLEIDING

Die frontale stelsels wes van die land sal reën veroorsaak oor Suidwes-Kaapland wat later ook oor Suid-Kaapland sal uitbrei, maar oor die res van die land sal dit hoofsaaklik mooiweer wees aangesien die boluglaag nou uit beweeg het oor die see.

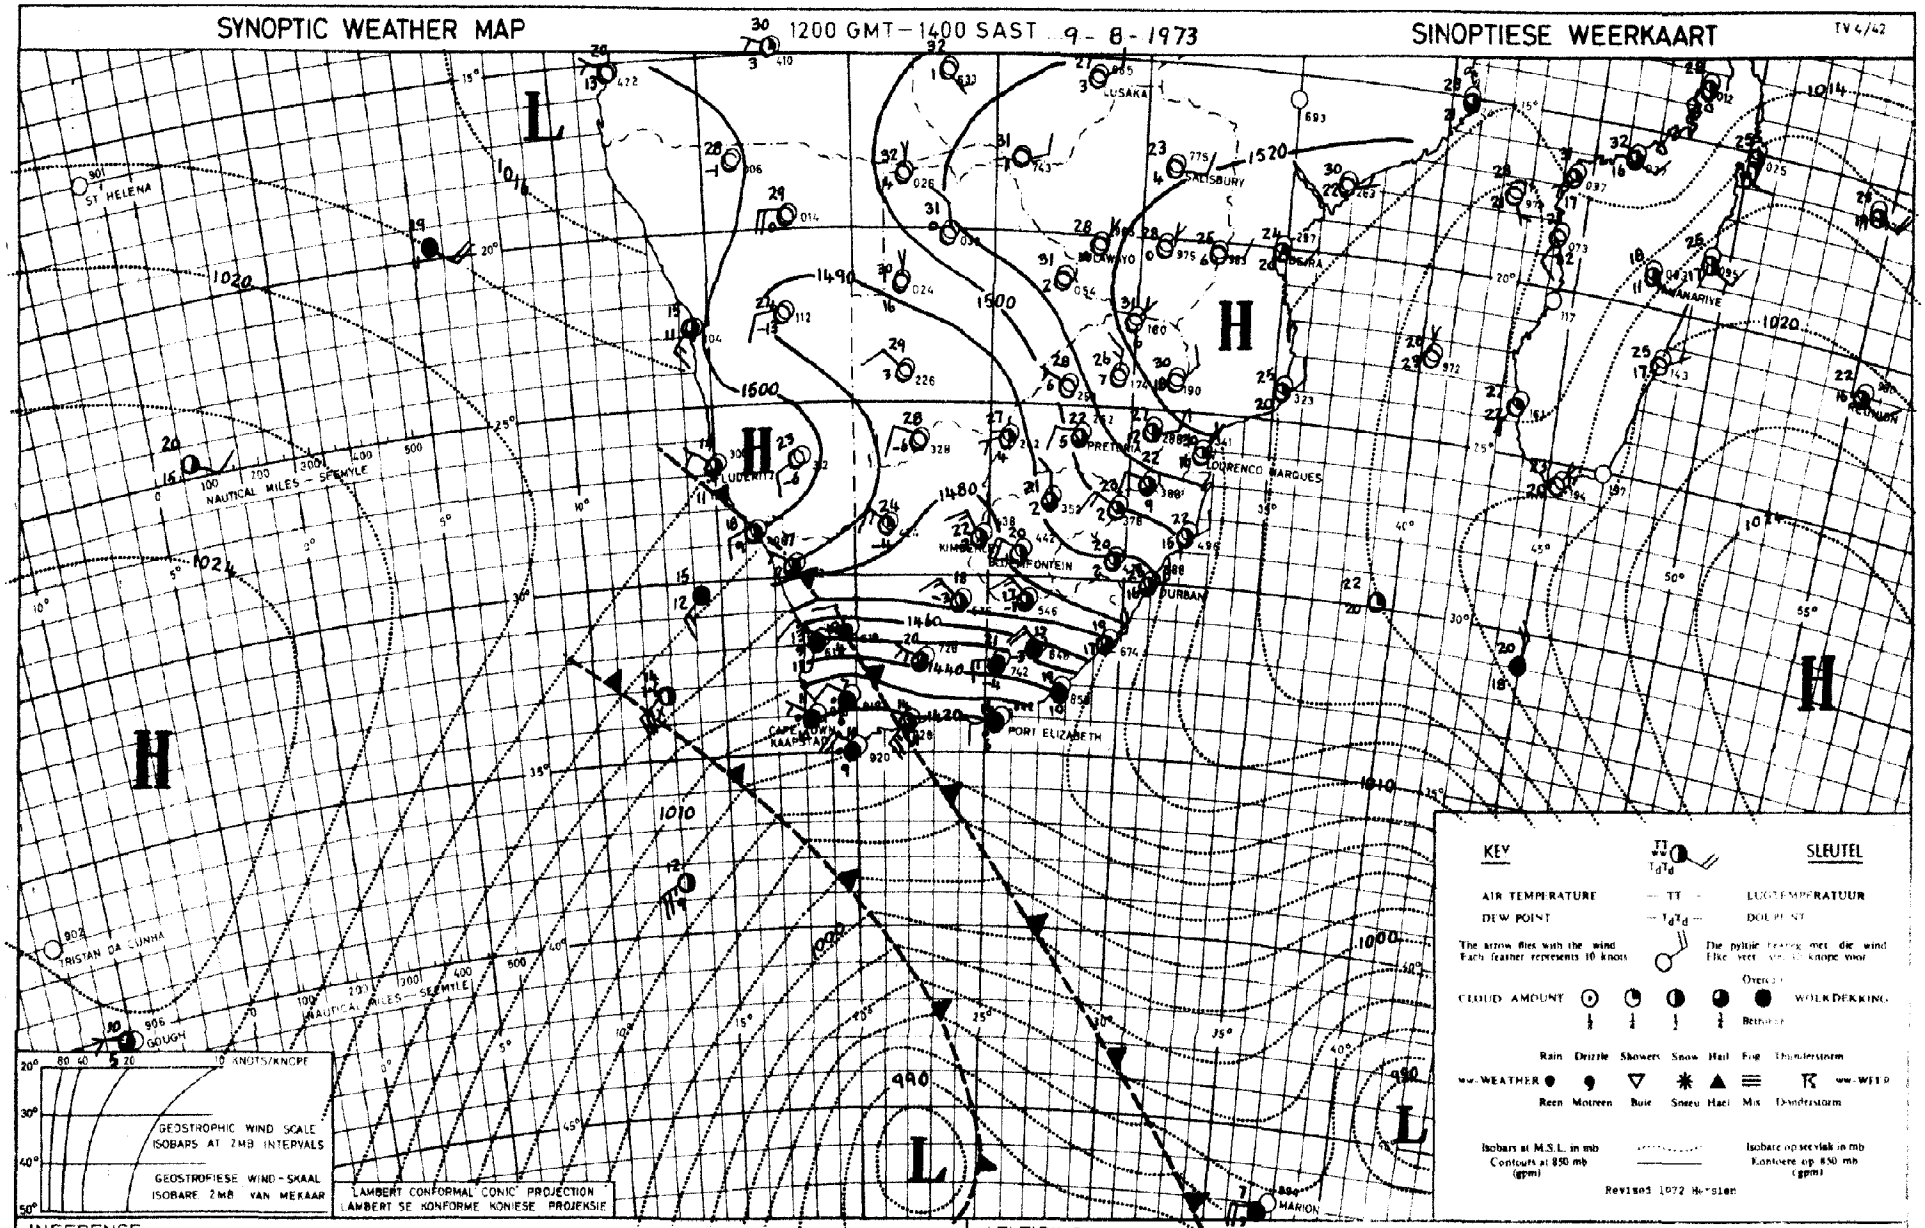
Tshane	29	5	



INFERENCE

The cold fronts near Cape Town will advance eastwards and very cold air will spread over the Cape Province, Free State, Natal and Southern Transvaal. Cloudy weather with rain and snow over high ground, will occur over the Cape Province, Southern O.F.S. and Southern Natal.

AFLEIDING

Die kouefronte naby Kaapstad sal ooswaarts oor die land beweeg en baie koue lug sal oor Kaapland, die Vrystaat, Natal en Suid-Transvaal uitbrei. Bewolkte weer met reënbuie en sneeu oor hoogliggende dele, sal voorkom oor Kaapland, Suid-Vrystaat en Suid-Natal.

INFERENCE

An intense high has now settled over the interior and therefore fine weather will prevail over most regions while day-temperatures will rise gradually.

AFLEIDING

'n Sterk hoëdrukstelsel het nou oor die land inbeweeg en dus sal mooiweerstoestande oor die meeste dele heers terwyl die dagtemperature geleidelik sal styg.

INFERENCE *The cold front to the west is being followed by a strong high pressure system and therefore cooler, cloudy conditions with rain will develop over Western Cape tomorrow and advance over Southern Cape later. Over the rest of the country it will be mainly fine and mild but fresh to strong northerly winds will blow over the Cape Province and the O.F.S.*

AFLEIDING *Die koufront na die weste word gevolg deur 'n sterk hoëdruk-stelsel en dus sal kouer, bewolkte weer met reën more oor Wes-Kaapland intree en later ook oor Suid-Kaapland uitbrei. Oor die res van die land sal dit hoofsaaklik mooiweer en matig- maar taamlik sterk noordewind sal oor Kaapla- waai.*

INFERENCE Two cold fronts in the vicinity of the west coast will move eastwards so that cold weather will spread over the entire Cape Province, Southern O.F.S and Southern Natal. Further showers will occur over Western and Southern Cape and later along the east coast.

AFLEIDING Twee koufronte in die omgewing van die weskus sal oostwaarts beweeg sodat koue weer oor die hele Kaapprovinsie, Suid-Vrystaat en Suid-Natal sal uitbrei. Verdere buie sal voorkom oor Wes- en Suid-Kaapland en later die ooskus bereik.

INFERENCE The strong high moving in south of the land behind the cold front will cause cool, cloudy weather to advance over Eastern Cape, Natal and the Eastern half of Transvaal and light rain will occur in places.

AFLEIDING Die sterk hoog wat nou suid van die land indruk agter die koufront sal veroorsaak dat koel, bewolkte weer oor Oos-Kaapland, Natal en die oostelike helfte van Transvaal uitbrei en ligte reën sal plek-plek voorkom

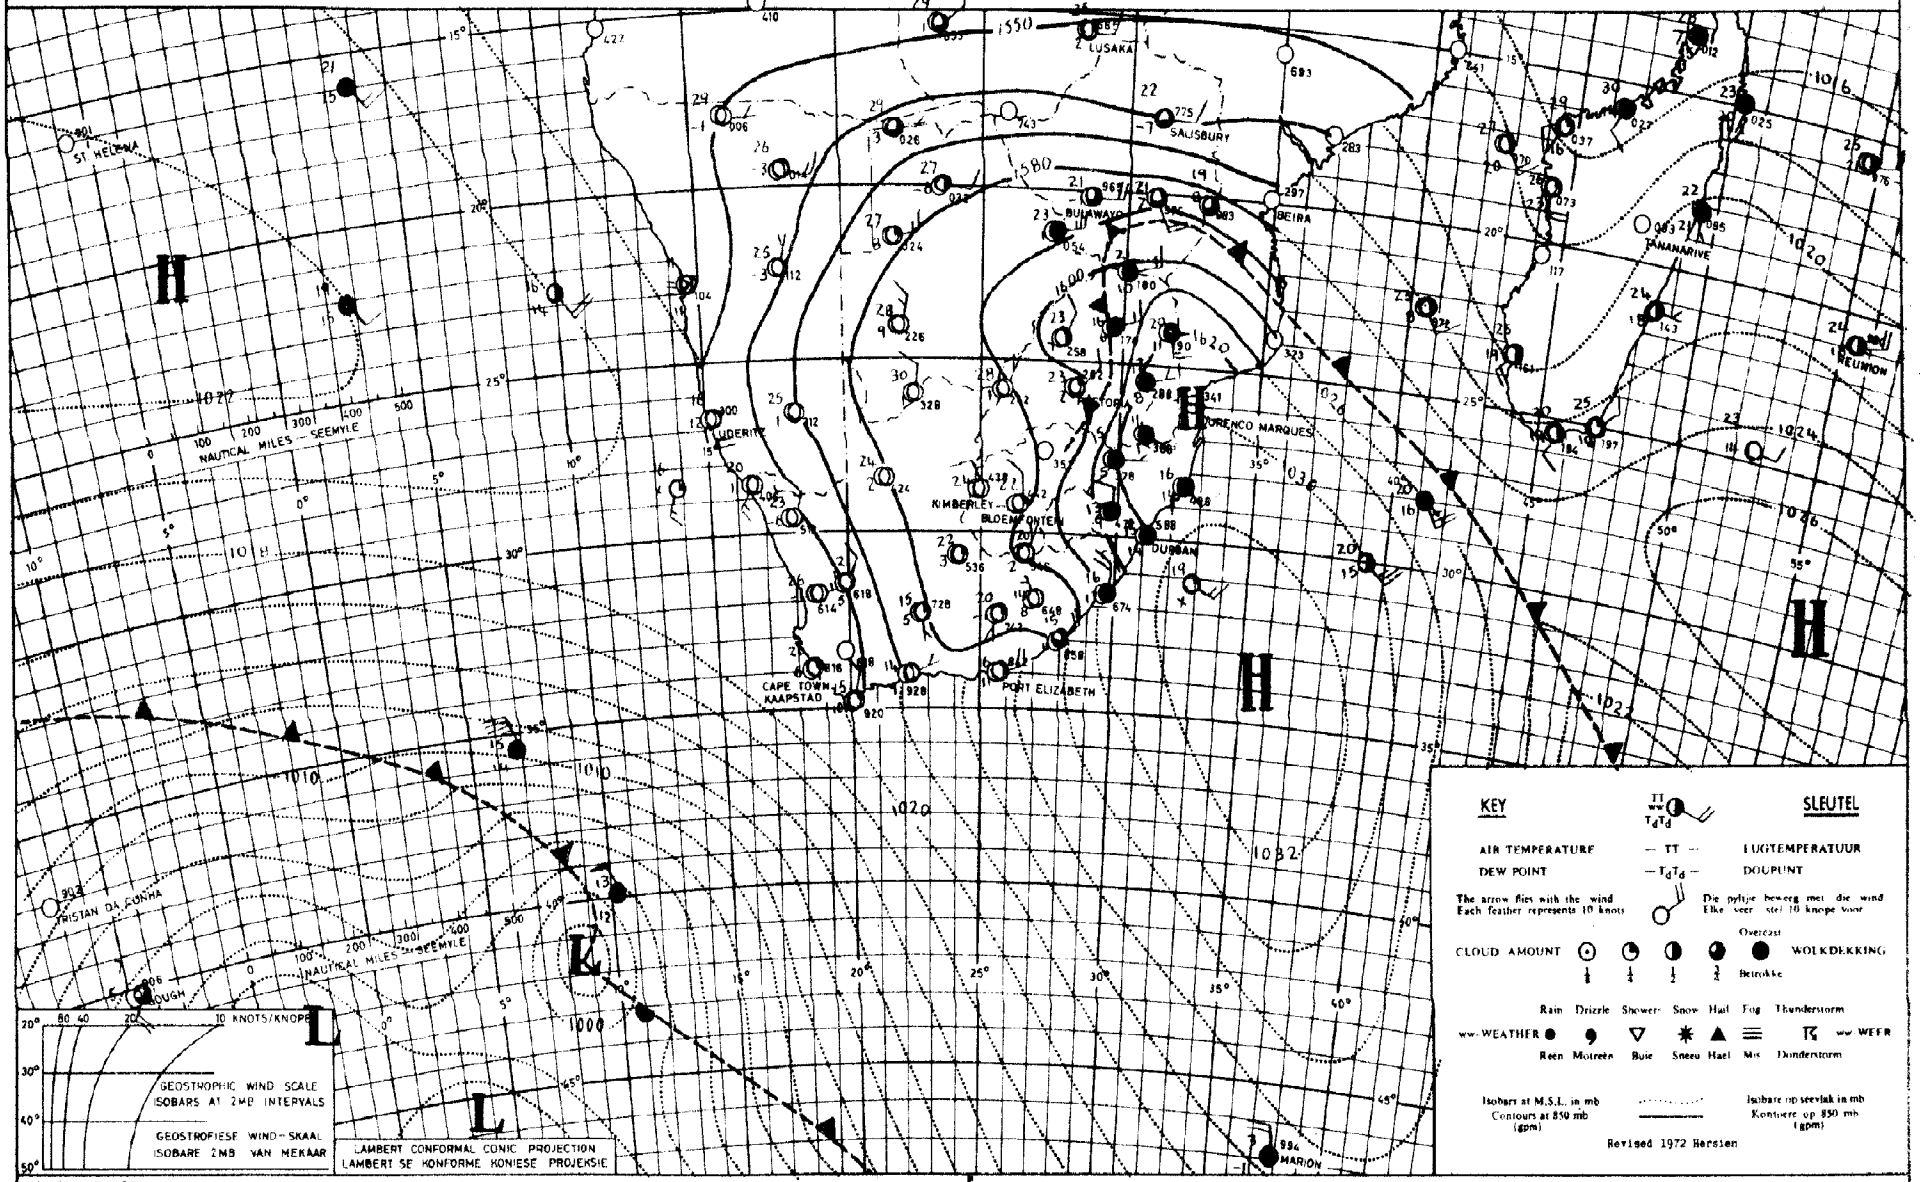
SYNOPTIC WEATHER MAP — 1200 GMT – 1400 SAST 17-8-1973 — SINOPTIESE WEERKAART

TV 4/42



KEY — SLEUTEL

AIR TEMPERATURE	— TT —	LUGTEMPERATUUR
DEW POINT	— T_dT_d —	DOUPUNT

The arrow flies with the wind. Each feather represents 10 knots. — Die pyltjie beweeg met die wind. Elke veer stel 10 knope voor.

CLOUD AMOUNT — Overcast — WOLKDEKKING — Bedekte

ww-WEATHER — Rain Reen; Drizzle Motreën; Shower Buie; Snow Sneeu; Hail Hael; Fog Mis; Thunderstorm Donderstorm — ww WEER

Isobars at M.S.L. in mb — Isobare op seevlak in mb
Contours at 850 mb (gpm) — Kontoere op 850 mb (gpm)

Revised 1972 Hansen

INFERENCE *The cloudy weather over Eastern Transvaal and Natal will clear as the high south-east of the continent moves away. Over the rest of the country it will be mainly fine and warmer but the cold front to the west will cause cloudy weather with rain over the South Western Cape later.*

AFLEIDING *Namate die hoog suidoos van die land weg beweeg, sal die bewolkte weer oor Oos-Transvaal en Natal opklaar. Oor die res van die land sal dit mooiweer en warmer wees, maar die koufront na die weste sal later more bewolkte weer met reën oor Suidwes-Kaap veroorsaak.*

INFERENCE

The cold front west of the land will reach the coast tonight so that cold, cloudy weather with rain will advance over the Cape Province tomorrow but over the rest of the country it will remain fine to partly cloudy and warm.

AFLEIDING

Die koufront wes van die land sal die kus vanaand bereik sodat koue bewolkte weer met reën more sal uitbrei oor die Kaapprovinsie maar oor die res van die land sal dit mooiweer tot gedeeltelik bewolk en warm wees.

INFERENCE The cold air that has already spread over Western Cape will advance eastwards tomorrow over the entire Cape Province, southern Free State and Natal. Rain will fall over southern and eastern Cape and Natal, with snow likely over the mountains and high ground.

AFLEIDING Koue lug wat reeds oor Wes-Kaapland ingedring het, sal more ooswaarts uitbrei oor die hele Kaapprovinsie, Natal en die Suid-Vrystaat. Reën sal voorkom oor die suidelike en oostelike dele van Kaapland en Natal en sneeu sal oor die berge en hoogliggende gebiede val.

INFERENCE *The cold front over the interior will advance further so that cold air will spread also over Transvaal and Northern Natal. Further showers are expected along the south and east coasts, but over the interior the weather will clear up.*

AFLEIDING *Die koueftront oor die binneland sal verder inbeweeg sodat dit ook kouer sal word oor Transvaal en Noord-Natal. Verdere buie word langs die suid- en ooskus verwag, maar oor die binneland sal dit opklaar.*

INFERENCE Pressures are still rising along the east coast and therefore cool, cloudy weather will persist over Northern Natal and spread also to the Eastern Transvaal Lowveld. Over the rest of the country it will remain fine and warm [illegible] along the west coast.

AFLEIDING [illegible] langs die ooskus en dus sal koel, bewolkte weer oor Noord Natal voortduur en uitbrei oor die Oos-Transvaalse Laeveld. Oor die res van die land sal dit mooiweer wees en warm bergwinde sal langs die weskus waai.

INFERENCE *The strong high pressure system south-east of the continent extends a ridge over the land and therefore it will be fine over most of the Republic. Hot bergwinds occurring along the Cape west coast will spread to the south coast later*

AFLEIDING *Die sterk hoëdrukstelsel suidoos van die land strek 'n rug uit oor die land en gevolglik sal dit mooiweer wees oor die meeste dele van die Republiek. Warm bergwinde kom voor oor die Kaapse weskus en sal ook na die suidkus uitbrei*

INFERENCE With the predominantly anticyclonic circulation, little change is expected in the general weather, but it will gradually become warmer and bergwinds will blow over the southern and south-eastern coastal regions.

AFLEIDING Met die oorheersend antisiklonale sirkulasie word min verandering in die weer verwag, maar dit sal geleidelik warmer word en bergwinde sal oor die suid- en suidoos-kusgebiede waai.

INFERENCE

The circulation over the Republic is anticyclonic and the weather will remain mainly fine and mild. The cold front to the west will reach the southwestern Cape coast later and light showers are possible over this region.

AFLEIDING

Die sirkulasie oor die Republiek is antisiklonaal en dit sal hoofsaaklik mooiweer en matig wees. Die koufront na die weste sal later die Kaapse suidweskus bereik en ligte buie is moontlik.

INFERENCE

The cold fronts in the vicinity of Southern Cape will advance north eastwards and will cause cool, cloudy weather with rain to spread over Eastern Cape and Natal and later over Eastern Transvaal but over the rest of the country it will remain fine and warm.

AFLEIDING

Die koufronte in die nabyheid van Suid-Kaapland sal noordooswaarts beweeg en gevolglik sal koel, bewolkte weer met reën uitbrei oor Oos-Kaapland en Natal en later ook oor Oos-Transvaal maar oor die res van die land sal dit mooi weer en warm wees.

INFERENCE Between the low near Bloemfontein and the ridge of high pressure south of the continent, cool moist air is being advected over Eastern Cape and Natal, where cloudy weather with rain will persist. It will also become cloudy and cooler later over the eastern Transvaal Lowveld

AFLEIDING Tussen die laag by Bloemfontein en die rug van hoë druk suid van die land, word koel, vogtige lug oor Oos-Kaapland en Natal ingevoer en bewolkte weer met reën sal oor hierdie streke voorkom. Dit sal later ook bewolk en koeler word oor die oostelike laevelde van Transvaal

INFERENCE A weak ridge of high pressure is building up south of the continent and therefore cloudy weather will develop over the Natal coast and the Eastern Transvaal lowveld, but over the rest of the country it will be mainly fine and mild to warm.

AFLEIDING 'n Swak rug van hoë druk is besig om suid van die vasteland op te bou en dus sal bewolkte weer oor die Natalkus en die Oos-Transvaalse laeveld voorkom, maar oor die res van die land sal dit hoofsaaklik mooiweer en matig tot warm bly.

INFERENCE

As the high pressure extends eastwards, it will cause cloudy weather along the eastern coastal belt. Along the West Coast where pressures are already falling, bergwinds will develop.

AFLEIDING

Namate die hoëdruk ooswaarts uitbrei, sal dit bewolkte toestande oor die Ooskusstreke veroorsaak. Met lugdrukke wat reeds aan die Weskus daal sal bergwinde daar ontstaan.

INFERENCE *The low pressure system at Cape Town will advance eastwards along the coast and cause partly cloudy weather over Southern and Eastern Cape, but over the rest of the country it will remain mainly fine and warm.*

AFLEIDING *Die laedruksteelsel by Kaapstad sal ooswaarts langs die kus beweeg en gedeeltelik bewolkte weer veroorsaak oor Suid- en Oos-Kaapland, maar oor die res van die land word min verandering verwag in die heersende warm weerstoestande*

INFERENCE The cold front extending far to the north over the Atlantic ocean will cause cloudy weather with rain tomorrow over the western and south-western regions of the Cape Province, but over the rest of the country there will be little change.

AFLEIDING Die koufront wat ver noord oor die Atlantiese oseaan strek, sal more bewolkte weer met reën veroorsaak oor die westelike en suidwestelike gebiede van Kaapstad, maar oor die res van die land sal daar min verandering wees

INFERENCE The cold front over Western Cape is moving eastwards and therefore cold air will advance over the entire Cape Province and the southern Free State. Rain will, however, be confined to the South Western Cape. The coastal low on the south coast will move up the coast, followed by cooler, partly cloudy weather

AFLEIDING Die kouefront oor Wes-Kaapland beweeg ooswaarts en dus sal koue lug more oor die hele Kaapland en Suid-Vrystaat uitbrei. Reën sal egter beperk wees tot Suidwes-Kaapland. Die kuslaag aan die suidkus sal langs die kus op beweeg en gevolg word deur koeler, gedeeltelik bewolkte weer

INFERENCE A weak ridge of high pressure is developing along the east coast and therefore cloudy weather will develop over Northern Natal and Eastern Transvaal, but over the rest of the country it will remain fine. With further cold fronts over the Atlantic ocean, showers will again occur over South western Cape tomorrow.

AFLEIDING 'n Swak rug van hoë druk bou langs die ooskus op en dus sal bewolkte weer oor Noord-Natal en Oos-Transvaal uitbrei, maar oor die res van die binneland sal dit mooiweer bly. Met verdere koueftonte oor die Atlantiese oseaan sal reënbuie weer voorkom oor Suidwes-Kaapland more

INFERENCE The cold front west of the land will reach the coast tomorrow morning and cause rain over the western and south-western coastal regions and later also over the south coast. Over the central and northern regions of the country it will, however, remain fine or only partly cloudy and warm to hot.

AFLEIDING Die koufront wes van die land sal die kus more-oggend bereik en reën veroorsaak oor die wes- en suidwestkusstreke en later ook oor die suidkusgebied. Dit sal egter mooiweer of net gedeeltelik bewolk en warm wees oor die sentrale en noordelike dele van die land.

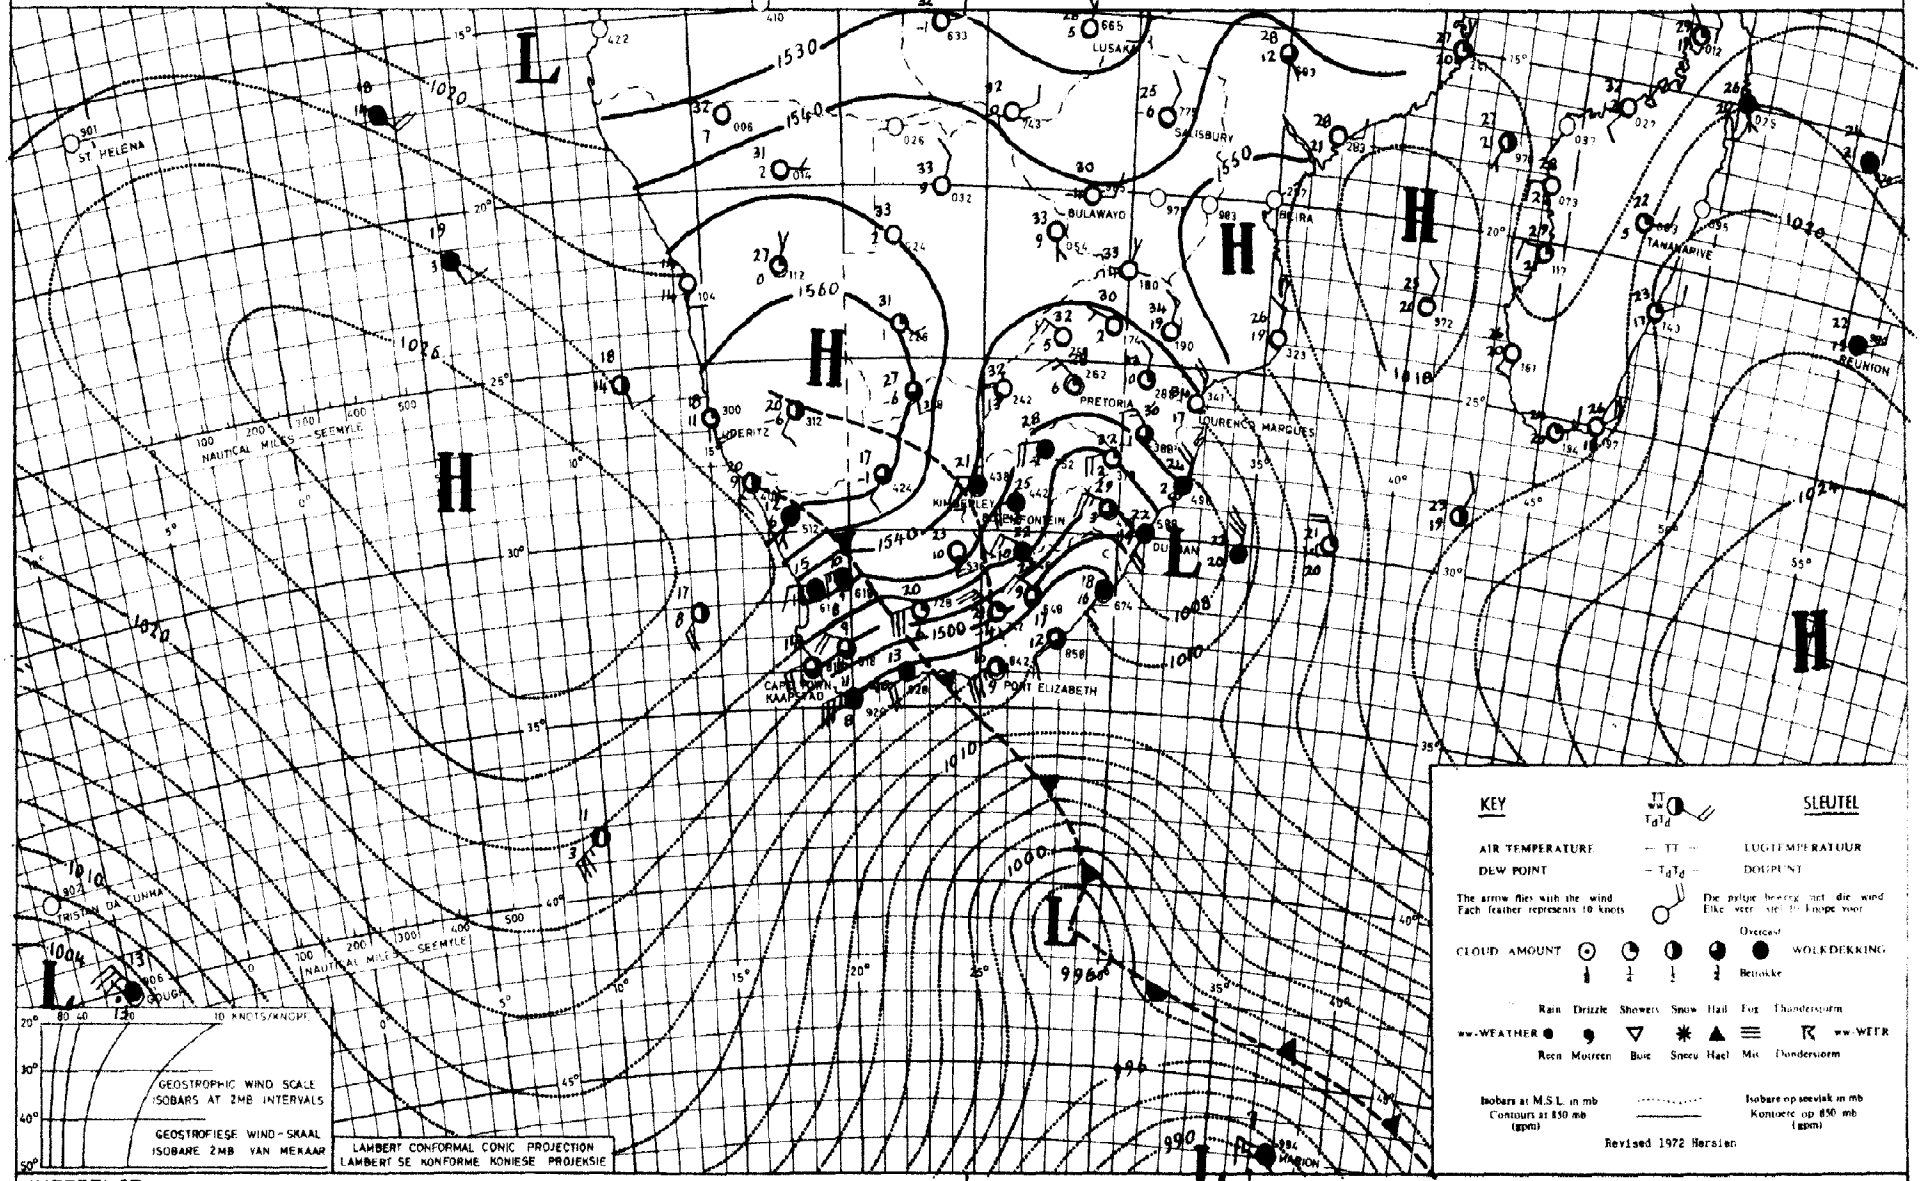
SYNOPTIC WEATHER MAP 1200 GMT – 1400 SAST 7 - 9 - 1973. SINOPTIESE WEERKAART TV 4/42



KEY — SLEUTEL

AIR TEMPERATURE	TT	LUGTEMPERATUUR
DEW POINT	T_dT_d	DOUPUNT

The arrow flies with the wind. Each feather represents 10 knots. Die pyltjie beweeg met die wind. Elke veer stel 10 knope voor.

CLOUD AMOUNT — WOLKDEKKING: Overcast; 7/8 Bewolkte; 5/8; 3/8; 1/8

ww-WEATHER — ww-WEER: Rain Reën; Drizzle Motreen; Showers Buie; Snow Sneeu; Hail Hael; Fog Mis; Thunderstorm Donderstorm

Isobars at M.S.L. in mb — Isobare op seevlak in mb
Contours at 850 mb (gpm) — Kontoere op 850 mb (gpm)

Revised 1972 Hersien

INFERENCE The cold front over the Cape Province will advance further eastwards so that cold weather will spread over the entire province and also over the O.F.S. and Natal. Cloudy conditions with showers will occur over the southern and eastern coastal regions and later also over the Transvaal Lowveld.

AFLEIDING Die koufront oor Kaapland sal verder ooswaarts beweeg sodat kouer weer oor die hele provinsie asook oor die Vrystaat en Natal sal uitbrei. Bewolkte toestande met buie sal oor die suidelike en oostelike kusgebiede uitbrei en later ook oor die Transvaalse Laeveld.

INFERENCE The ridge of high pressure that has built up along the south and east coasts, is still moving rapidly eastwards and therefore the cloudy weather over Natal and Eastern Transvaal will start clearing. Over the rest of the country it will be mainly fine and it will become warmer.

AFLEIDING Die rug van hoë druk wat langs die suid-en ooskus opgebou het, beweeg nog vinnig ooswaarts en gevolglik sal die bewolkte toestande oor Natal en Oos-Transvaal begin opklaar. Oor die res van die land sal dit hoofsaaklik mooiweer bly en warmer word

INFERENCE

Owing to the strong high pressure system, fine weather conditions will persist over most regions. The cold front approaching from the west will reach the coast tomorrow and may cause rain over the south-west coast.

AFLEIDING

Met 'n sterk hoëdrukstelsel oor die binneland sal mooi-weerstoestande oor die meeste gebiede voortduur. Die koue-front wat uit die weste nader, sal egter later more die kus bereik en kan moontlik reën oor die suidweskus veroorsaak

INFERENCE

An upper-air low pressure system is centred over S.W.A. where light thundershowers may be expected. These conditions will spread to Gordonia and Griqualand West tomorrow, but over the remaining areas it will still be fine and warm.

AFLEIDING

'n Boluglaedrukstelsel is oor Suidwes-Afrika aanwesig en ligte donderbuie kan oor hierdie gebied verwag word en more ook oor Gordonia en Griekwaland-Wes, maar oor die res van die land sal dit mooiweer en warm bly.

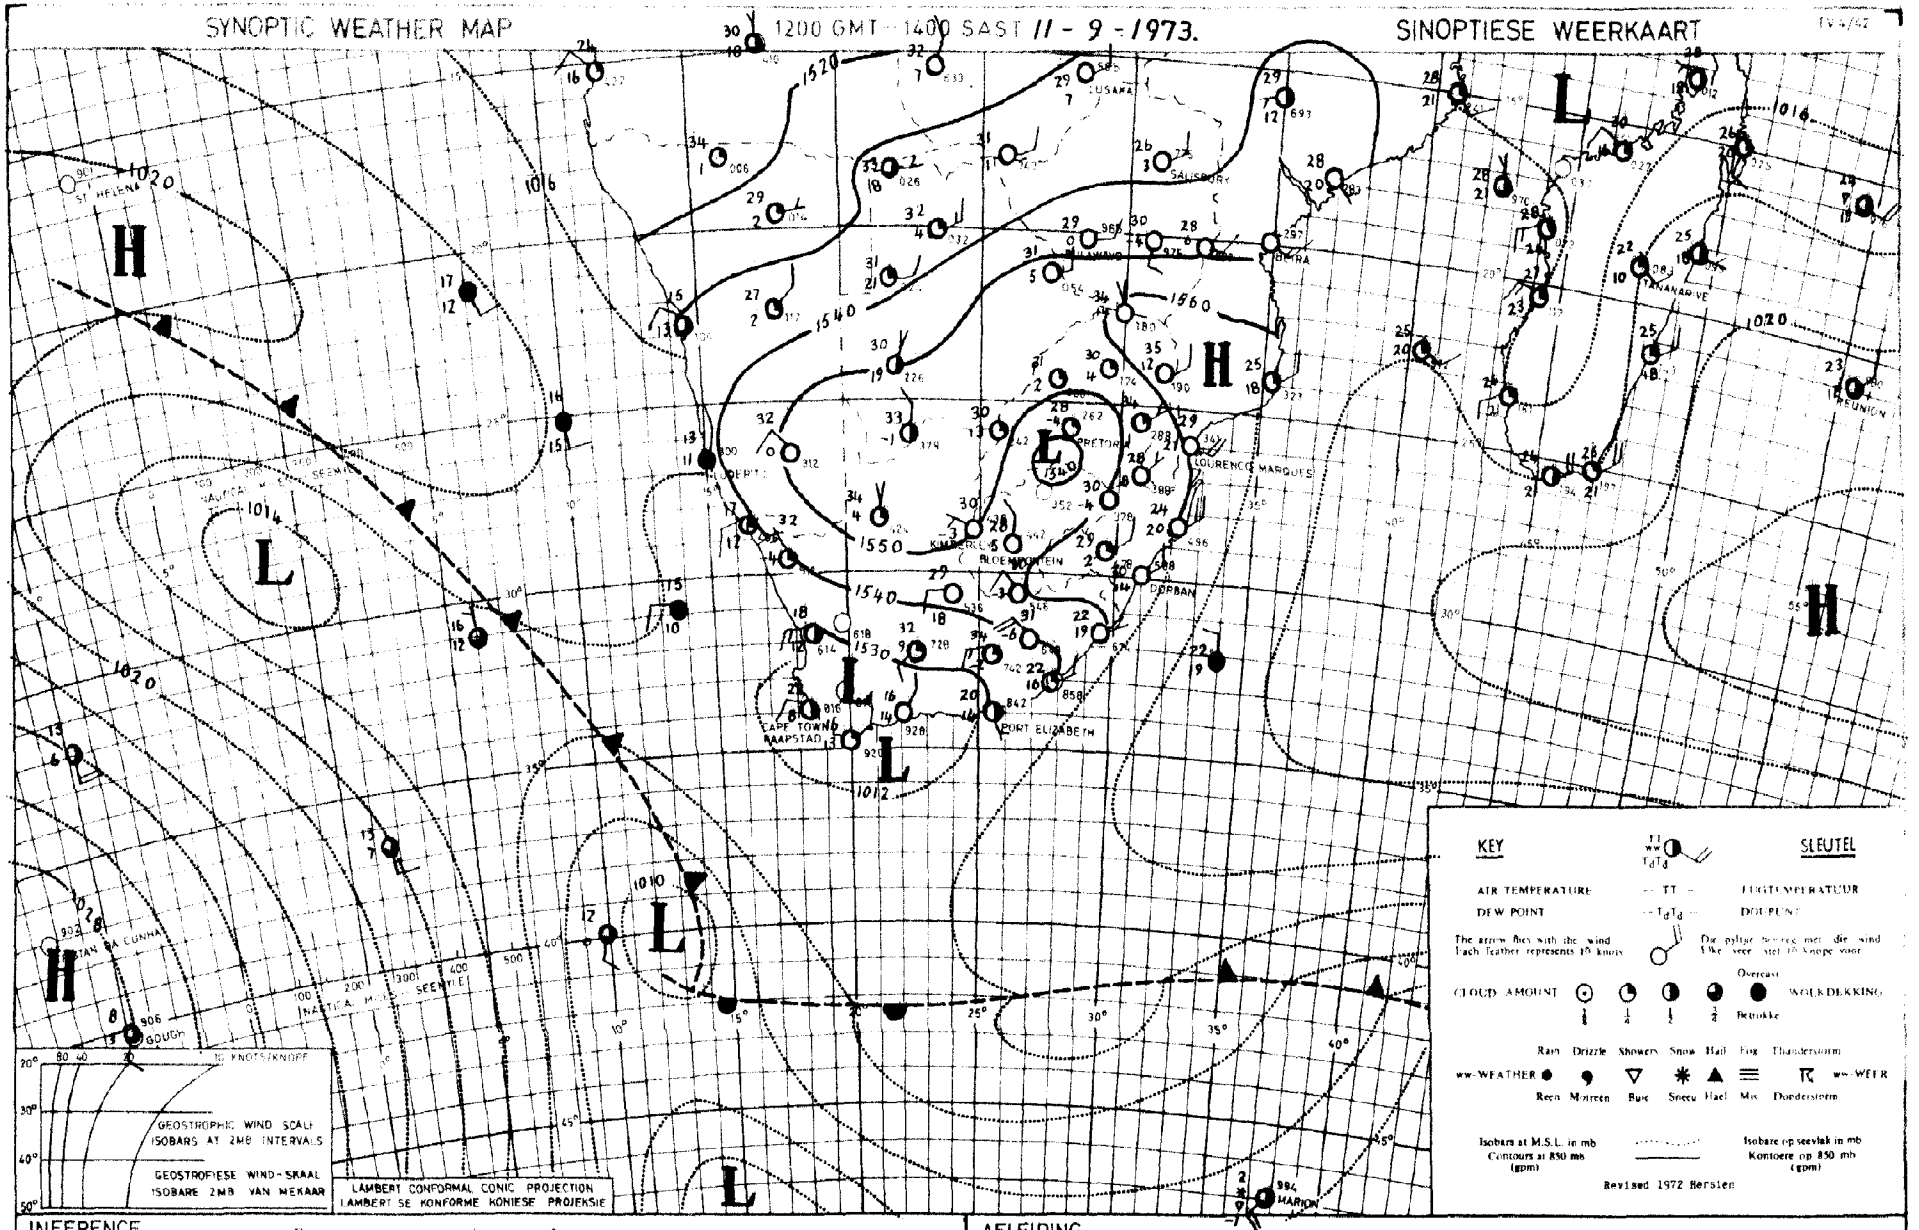
Tshane	31	14	



INFERENCE *The cold front approaching from the west will cause cloudy weather with rain over the western and south-western coastal regions and advance eastwards later over the Cape Province, but over the rest of the country no change is expected in the prevailing warm weather.*

AFLEIDING *Die koufront wes van die land sal bewolkte weer met reën teweegbring oor die wes- en suidweskusgebiede en geleidelik ooswaarts oor Kaapland uitbrei, maar oor die res van die land sal daar min verandering intree in die heersende warm weer.*

INFERENCE

The cold front which has already reached the Orange River will advance further northwards. Over the Cape Province and Natal it will be mainly cloudy and cold with showers, especially over the Eastern Cape. Over the Free State and the Southern and Eastern Transvaal it will become partly cloudy and considerably cooler.

AFLEIDING

Die koufront wat reeds die Oranjerivier bereik het, sal nog verder noordwaarts vorder. Oor Kaapland en Natal sal dit meestal bewolk en koud wees met buie, veral oor Oos-Kaapland. Oor die Vrystaat en Suid- en Oos-Transvaal sal dit gedeeltelik bewolk en heelwat koeler word.

INFERENCE

The first cold front will advance further north-eastwards and cooler air will spread also over Southern Transvaal. A second cold front is approaching the land and will cause even colder weather over the Cape Province where showers will occur, with a possibility of snow on the mountains and high ground.

AFLEIDING

Die eerste koufront sal verder noordoos beweeg en koeler lug sal oor Suid-Transvaal uitbrei. 'n Tweede koufront nader die land en sal more nog kouer weer oor Kaapland veroorsaak, gepaard met reënbuie en die moontlikheid van sneeu oor die hoër gebiede.

INFERENCE

The second cold front is moving in forcefully, followed by an intense high. It will therefore be cold over the entire country with strong southerly winds. Over the Cape Province and Natal there will be showers and also snowfalls over higher areas, and light snowfalls are also possible over the Free State. It will warm up rapidly along the West Coast.

AFLEIDING

Die tweede koufront is besig om kragtig in te stoot gevolg deur 'n intense hoëdruk. Dit sal dus oor die hele land koud wees met sterk suidewinde. Oor Kaapland en Natal sal daar reënbuie wees en ook sneeu oor hoër dele, en sneeu is moontlik oor dele van die Vrystaat. Aan die Weskus sal dit vinnig warm word.

INFERENCE The cold air behind the second front that has already advanced over the Cape Province, Natal and the O.F.S. will also spread over Transvaal and cloudy weather will develop over Eastern and Northern Transvaal with light rain along the escarpment.

AFLEIDING Die koue lug agter die tweede koufront wat reeds oor Kaapland, Natal en die Vrystaat uitgebrei het, sal ook oor die hele Transvaal inbeweeg en bewolkte weer sal oor Oos- en Noord-Transvaal voorkom met ligte reën langs die Platorand.

INFERENCE The low on the south coast will move eastwards along the coast, followed by cooler, cloudy weather. Warm, bergwind conditions will, however, still occur on the east coast tomorrow. Over the remainder of the country it will be mainly fine and warm.

AFLEIDING Die laag langs die suidkus sal oosweerts langs die kus beweeg en gevolg word deur koeler, bewolkte weer. Warm bergwindtoestande sal egter more nog langs die ooskus voorkom. Oor die res van die land sal dit ... saaklik mooiweer en warm wee...

INFERENCE *The low pressure system over Natal will still cause light showers overnight over this province and Eastern Cape, but otherwise it will be fair and warm over the interior. The cold front and low pressure system to the west will cause cooler weather with rain later over the South-Western Cape.*

AFLEIDING *Die laedrukstelsel oor Natal sal oornag nog ligte buie oor dié provinsie en Oos-Kaap veroorsaak, maar andersins sal dit mooiweer en warm wees oor die binneland. Die koufront en laedrukstelsel na die weste sal egter later koeler weer met reën oor Suidwes-Kaapland teweegbring.*

INFERENCE *The cold front near Cape Town is moving eastwards and therefore cold weather will advance over the Cape Province south of the Orange River tomorrow. Cloudy conditions with showers will occur over the south-western, southern and eastern areas. Over the rest of the country it will still remain fine and warm.*

AFLEIDING *Die koufront by Kaapstad beweeg ooswaarts en dus sal koue weer more uitbrei oor Kaapland suid van die Oranje. Bewolkte toestande met buie sal oor die suidwestelike, suidelike en oostelike gebiede voorkom. Oor die res van die land sal dit voorlopig nog warm bly.*

INFERENCE

The cold front will advance further eastwards so that cold air will also spread over the O.F.S. and Natal. Cloudy weather with rain will still occur over Natal and Eastern Cape and spread to Eastern Transvaal later but over the rest of the country the weather will clear.

AFLEIDING

Die koufront sal verder ooswaarts beweeg sodat koue lug ook oor die Vrystaat en Natal sal uitbrei. Bewolkte weer met reën sal nog oor Natal en Oos-Kaap voorkom en later oor Oos-Transvaal versprei maar oor die res van die land sal dit opklaar.

INFERENCE Behind the cold front, the high pressure system extending eastwards around the coast will cause cooler cloudy weather over Natal and the eastern Transvaal. The new approaching cold front will bring cooler cloudy weather with rain to the South-west Cape from about tomorrow night.

AFLEIDING Agter die koue front sal die hoëdrukstelsel wat ooswaarts om die kus stoot, koeler bewolkte weer oor Natal en Oos-Transvaal veroorsaak. Die nuwe koue front wat nader sal van ongeveer môre nag koeler bewolkte weer met reën oor Suidwes-Kaapland veroorsaak.

INFERENCE

The cloudy weather over Natal and Eastern Transvaal will clear as the high south-east of Durban moves further to the east. The cold front west of the continent will cause cooler weather with rain over South-western and Southern Cape tomorrow.

AFLEIDING

Die bewolkte weer oor Natal en Oos-Transvaal sal opklaar namate die hoog suidoos van Durban verder oos beweeg. Die koue-front wes van die land sal more koeler weer met reën oor Suid-wes- en Suid-Kaapland veroorsaak.

INFERENCE

As the cold front advances eastwards, cold weather will spread over the entire Cape Province, southern O.F.S. and Natal. Cloudy conditions with showers will occur over the southern and eastern parts of the Cape Province and later over Natal.

AFLEIDING

Namate die koufront oostwaarts beweeg, sal koue weer uitbrei oor die hele Kaapprovinsie, Suid-Vrystaat en Natal. Bewolkte weer met buie sal daarmee gepaard gaan oor die suidelike en oostelike dele van Kaapland en later oor Natal

INFERENCE

The low over the interior is deepening while the Atlantic high is ridging in south of the land. Consequently favourable conditions will develop for rain over Eastern Cape and Natal. Cool, cloudy weather with light rain will occur over Eastern Transvaal while thunder-showers may be expected over the rest of the province.

AFLEIDING

Die laag oor die binneland is besig om te verdiep terwyl die Atlantiese hoog suid van die land indruk. Gevolglik sal toestande gunstig wees vir reën oor Oos-Kaapland en Natal. Koel, bewolkte toestande met ligte reën sal oor Oos-Transvaal voorkom terwyl donderbuie oor die res van die provinsie verwag kan word.

INFERENCE

The deep low on the surface and in the upper-air centred over the interior, will cause further general rain over Transvaal, the Free State, Natal, Northern and Eastern Cape and good falls will occur at many places.

AFLEIDING

Die diep laedrukstelsel aan die oppervlakte en in die bolug wat oor die sentrale binneland gevestig is, sal verdere algemene reën oor Transvaal, die Vrystaat, Natal, Noord- en Oos-Kaap veroorsaak en goeie neerslae sal op baie plekke voorkom.

INFERENCE

With the low over the central interior, conditions still favour general rains and thundershowers over the Transvaal, Free State and Natal, but there are indications that the low will move out eastwards, in which case it should clear

AFLEIDING

Met die laedrukstelsel oor die sentrale binneland bly dit gunstig vir algemene reëns en donderbuie oor Transvaal, die Vrystaat en Natal. Daar is egter tekens dat die laag ooswaarts sal weg beweeg en dan behoort dit oop te trek.

INFERENCE

The surface and upper-air low that has already moved into Natal, will advance further eastwards, so that the weather will clear over all areas and it will become warmer generally.

AFLEIDING

Die oppervlakte - en boluglaag wat reeds tot oor Natal gevorder het, sal verder ooswaarts beweeg, sodat opklaring oor alle gebiede sal intree en dit sal vinnig warmer word.

INFERENCE With the high south of the land cool, cloudy weather will persist over Natal and the eastern half of Transvaal, where light showers are possible. Over the rest of the country it will be mainly fine but the hot bergwinds along the west coast will be replaced by cooler, cloudy conditions behind the coastal low.

AFLEIDING Met die hoog suid van die land sal bewolkte en koel weer voortduur oor Natal en die oostelike helfte van Transvaal, waar ligte buie ook moontlik is. Oor die res van die land sal dit hoofsaaklik mooiweer wees. Die warm bergwinde langs die weskus sal egter vervang word deur koeler, bewolkte weer agter die kuslaag.

INFERENCE

The complex system of lows west of the country will cause cloudy weather over the western and south-western coastal regions tomorrow and rain will occur later. Over the rest of the country there will be little change, but hot bergwinds will start blowing over the southern and south-eastern coastal regions.

AFLEIDING

Die komplekse stelsel van lae druk wes van die land sal more bewolkte weer oor die wes- en suidweskusstreke veroorsaak en reën sal later voorkom. Oor die res van die land word min verandering verwag, maar warm bergwinde sal oor die suid- en suidooskus begin waai.

INFERENCE As the low south of Port Elizabeth advances further along the coast, hot bergwinds will spread to the Natal coast but will be followed by cooler, cloudy weather. The cold front west of the continent will cause cool, cloudy weather with rain to spread over the south-western and southern areas of the Cape.

AFLEIDING Namate die laag suid van Port Elizabeth verder langs die kus op beweeg, sal warm bergwinde uitbrei na die Natalkus maar gevolg word deur koeler, bewolkte weer. Die kouefront wes van die land sal kouer, bewolkte weer met reën laat uitbrei oor die suidwestelike en suidelike dele van Kaapland.

INFERENCE Behind the cold front of the intense low near Marion Island, cool showery weather will spread eastwards along the Southwest and South Cape Coasts and these conditions will also reach Natal later. The SW'ly winds spreading over the interior are dry and therefore it should remain fine over those parts, although much cooler in the South.

AFLEIDING Agter die koufront, wat gepaard gaan met die diep laag naby Marioneiland, sal koel weer met buie ooswaarts oor die Suidwes- en Suidkusstreke van Kaapland uitbrei en later ook Natal bereik. Die Suidwestewinde wat oor die binneland beweeg is droog en dus sal dit daar mooiweer bly, hoewel baie koeler in die Suide.

INFERENCE

The new approaching cold front and low pressure wave thereon near the Cape will again bring light showers to the Boland area. Over the remaining coastal regions it is, however, clearing rapidly and it remains fine over the interior.

AFLEIDING

Die nuwe naderende koufront en laedrukgolf daarop naby die Kaap sal weereens buie oor die Boland veroorsaak, maar oor die ander kusstreke trek dit vinnig oop en oor die binneland bly dit mooiweer.

INFERENCE

A ridge of high pressure edging around the coast will cause cool cloudy conditions to extend to the eastern coastal belt and later also to the Transvaal Lowveld. Otherwise it will be mainly fine.

AFLEIDING

'n Rug van die hoë druk wat om die kus stoot sal veroorsaak dat koel bewolkte weer na die Ooskusstreke en later na die Transvaalse Laeveld uitbrei. Origens sal dit meesal mooiweer wees.

INFERENCE With rising pressures, cool cloudy weather with showers along the coasts will spread around the coast to Natal and Transvaal. In the upper air there is a low over the western parts which will allow moist air to move in from the North and this together with the lower cooler influx from the East, will cause good thundershowers over the Transvaal and Northern Free State and Northern Natal.

AFLEIDING Gepaard met stygende drukke sal koel bewolkte weer oos-waarts om die kus na Natal en Transvaal uitbrei met buie oor die kusstreke. In die hoog is daar 'n laag oor die westelike dele wat warm vogtige lug uit die noorde sal laat instroom en dit tesame met die onderste koel instroming uit die ooste sal goeie donderbuie oor Transvaal, Noord-Vrystaat en Noord-Natal veroorsaak.

INFERENCE

The high is still ridging strongly eastwards around the coast and is causing cool cloudy weather over the eastern parts of the country, where scattered rain and thundershowers will occur as the upper air low is still situated over the western and central interior

AFLEIDING

Die hoog rug nog sterk ooswaarts om die kus en veroorsaak koel bewolkte toestande oor die oostelike dele waar reën en verspreide donderbuie sal voorkom aangesien die boluglaag nog oor die westelike en sentrale binneland gelee is.

INFERENCE

With the continued inflow of cool moist air from the east and the trough of low pressure over the central interior, it will remain favourable for at least another day for showers over the Transvaal, Natal, the Northern Cape and the Northern O.F.S.

AFLEIDING

Met die voortgesette invoer van koel vogtige lug uit die ooste en die trog van lae druk oor die sentrale binneland, sal dit vir tenminste nog 'n dag gunstig wees vir reenbuie oor die Transvaal, Natal, Noord-Kaapland en Noord-Vrystaat.

INFERENCE

The low north of Gough Island is of the almost stationary type, so that the high ought to ridge eastwards strongly around the coast as the Marion Island low retreats. This, and the trough of low pressure over the interior, will cause good thundershowers over the eastern parts of the country.

AFLEIDING

Die laedrukstelsel noord van Gougheiland sal uiters stadig beweeg en dus behoort die hoog vinnig om die kus in te rug soos die Marioneilandlaag verbybeweeg. Dit, tesame met die trog van lae druk oor die binneland, sal goeie donderbuie oor die oostelike dele van die land veroorsaak.

INFERENCE The high which is ridging strongly eastwards around the country is advancing cool, cloudy weather and showers over the Cape South and East Coasts to Natal and later to the Transvaal. In advance of this influx, good thundershowers will occur over the Transvaal, especially as the trough of low pressure over the interior is being maintained.

AFLEIDING Die hoog wat skerp ooswaarts om die land rug, staat koel, bewolkte weer en reënbuie oor die Kaapse Suid- en Ooskusstreke na Natal en later ook na Transvaal. Aan die voorpunt van die instroming sal goeie donderbuie oor Transvaal uitsak, veral aangesien die laedruktrog oor die binneland nog stand hou.

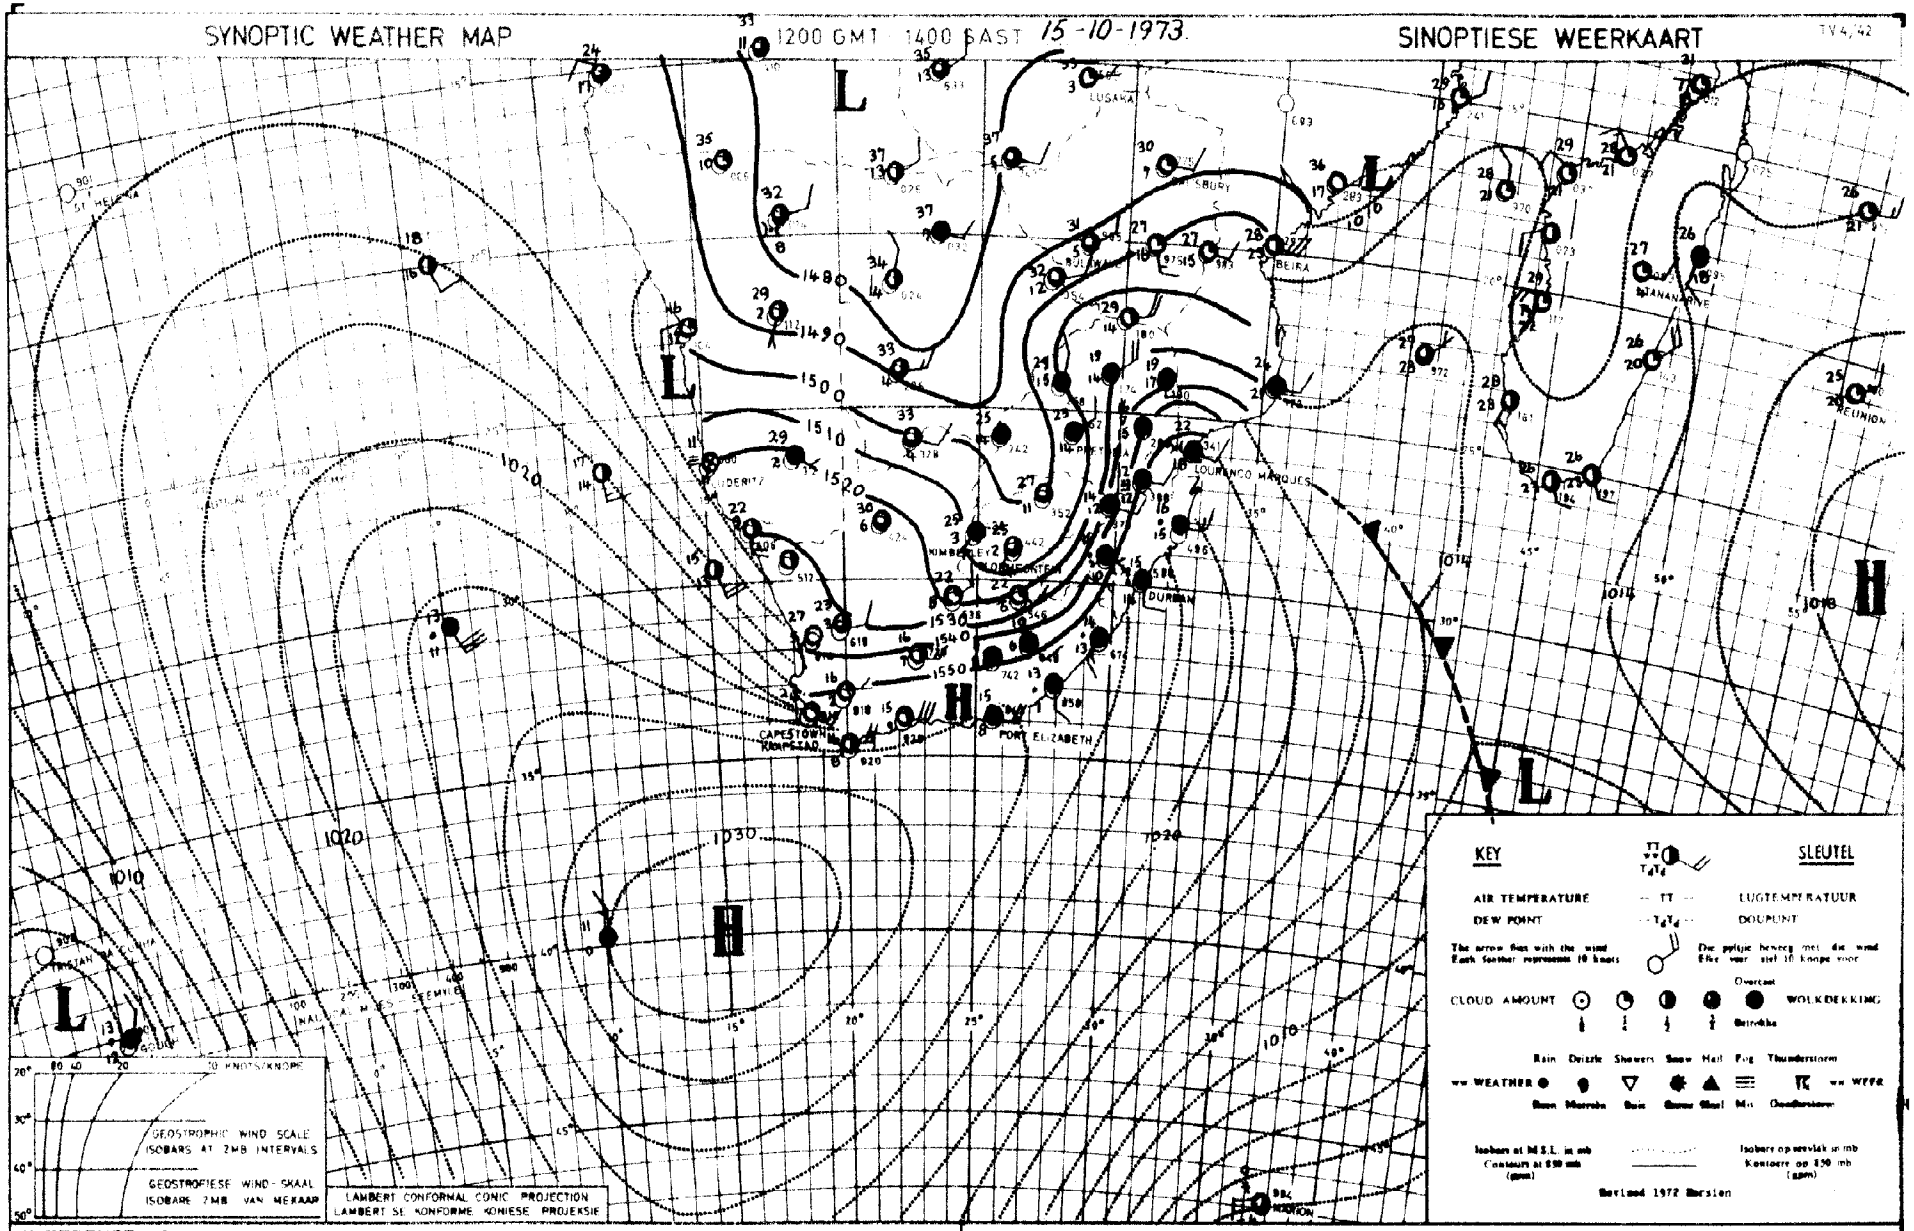
SYNOPTIC WEATHER MAP 1200 GMT 1400 SAST 15-10-1973. SINOPTIESE WEERKAART TV4/42



INFERENCE Conditions remain much the same, i.e. unsettled and cold with general rains, possibly heavy at places over Natal, the Transvaal and the northern Free State. The interior low pressure trough is inclined to move westwards so that cloudy weather with showers should spread to the Northern Cape and the rest of the Free State.

AFLEIDING Toestande bly ongeveer onveranderd, d.w.s. koue, onweer en algemene reens, moontlik swaar op plekke, oor Natal, Transvaal en Noord-Vrystaat. Die binnelandse laedruktrog is geneig om weswaarts te beweeg en dus behoort bewolkte weer met buie ook na Noord-Kaapland en die res van die Vrystaat uit te brei.

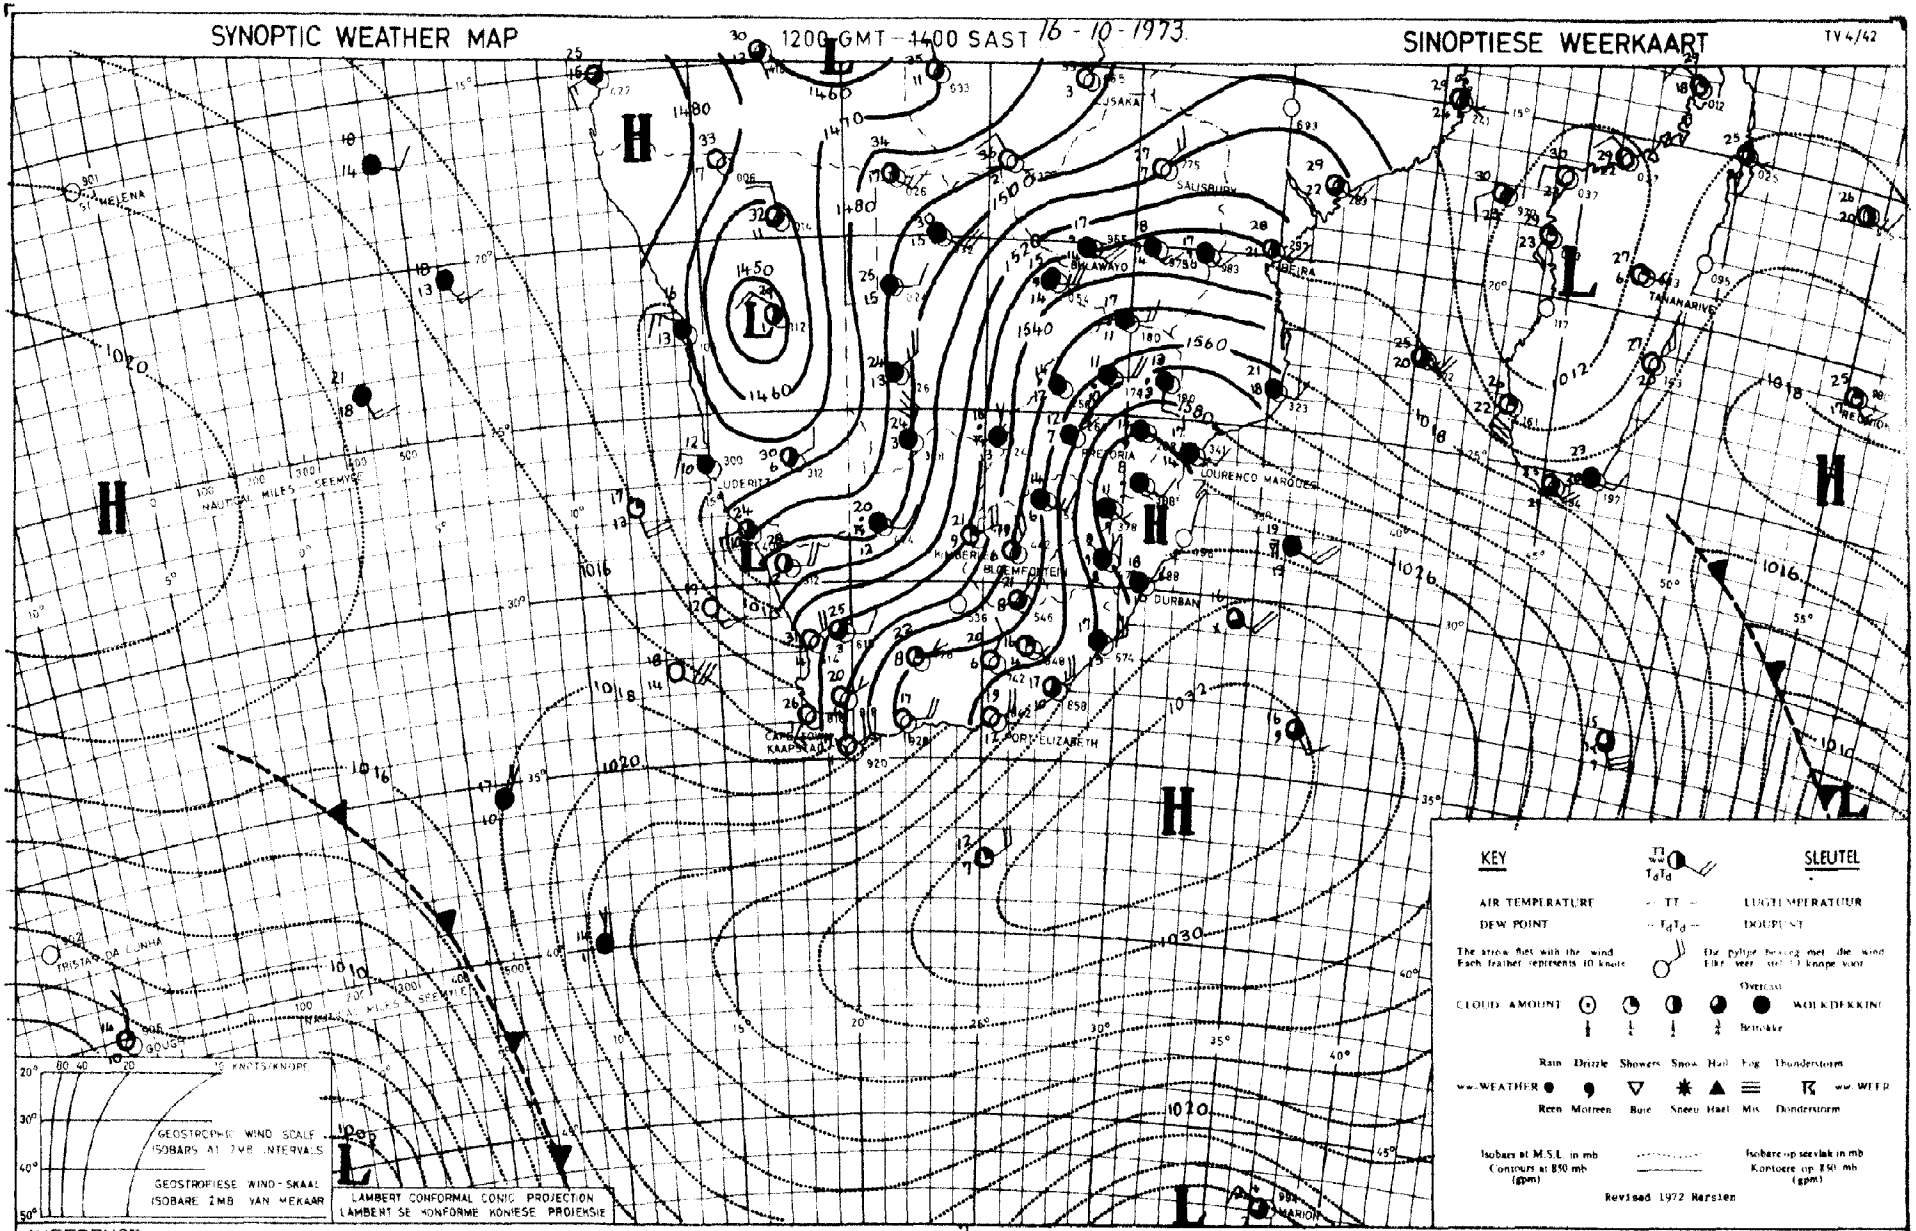
Shakawe	35	16	1,0
Tshabong	25	13	34,4
Tshane	26	11	23,3



INFERENCE The surface and upper-air low is prominent over S.W.A. with a strong airflow south-westwards over the entire country. Unsettled weather with rain and thundershowers will now spread westwards and southwards, while it should start clearing over Natal and Transvaal by the day after tomorrow.

AFLEIDING Die oppervlakte- en boluglaag is prominent oor S.W.A. met 'n sterk lugstroming suidweswaarts oor die hele land. Onweerstoestande met reën en donderbuie skuif dus nou meer weswaarts en suidwaarts terwyl 'n opklaring teen oormôre oor Transvaal en Natal behoort in te tree.

Revised 1972 Version

INFERENCE

The low pressure system over S.W.A. remains the dominating factor and it will cause rain and thundershowers over eastern S.W.A., Botswana, Gordonia, Bushmanland and Namaqualand. Cold, moist air is still being fed in from the north-east over the Transvaal and the O.F.S., where a clearance will thus be very gradual.

AFLEIDING

Die laedrukstelsel oor S.W.A. bly oorheersend en sal reën en donderbuie veroorsaak oor oostelike S.W.A., Botswana, Gordonia, Boesmanland en Namakwaland. Die koel, vogtige lug stroom nog uit die noordooste oor Transvaal en die O.V.S., waar dit dus maar baie stadig sal ooptrek.

Contours at 850 mb (gpm) — Konture op 850 mb (gpm)

Revised 1972 Barsten

INFERENCE

Although no striking changes have taken place, the high east of the country is no longer strong enough to feed in much air from the east, while an anticyclonic circulation has established itself over the Republic. It will therefore clear over most parts.

AFLEIDING

Hoewel nog geen groot verandering ingetree het nie, is die hoog oos van die land se oostelike instroming nou swak, terwyl 'n antisiklonale sirkulasie oor die Republiek ontstaan het. Gevolglik sal dit oor meeste dele ooptrek.

INFERENCE

The clearing tendency is continuing, but as it will become considerably warmer, isolated light thundershowers will develop over the Transvaal and over the northern Free State and northern Natal.

AFLEIDING

Die neiging tot opklaring duur nog voort, maar aangesien dit nou heelwat warmer sal wees, sal enkele ligte donderbuie oor Transvaal en oor Noord-Natal en Noord-Vrystaat voorkom

INFERENCE

The low over northern S.W.A. extends a trough to the south-east so that further thundershowers will occur over the areas to the east of it. A ridge of the Atlantic high is moving in south of the continent and will cause cool, cloudy weather over the south coastal areas.

AFLEIDING

Die laag oor noordelike S.W.A. stoot 'n trog uit na die suidooste sodat verdere donderbuie oor die gebiede oos daarvan sal voorkom. 'n Rug van die Atlantiese hoëdrukstelsel sal suid van die vasteland inbeweeg en koel, bewolkte weer uit die suidooste sal oor die suidkusgebied uitbreï.

INFERENCE
The ridge of high extending south of the continent and low pressures over Western and Southern Cape will create favourable conditions for rain over these regions. Warm, moist air is in circulation over the rest of the country where scattered thundershowers will occur.
AFLEIDING
Die rug van hoë druk wat suid van die vasteland inbeweeg en die lae druk oor Wes- en Suid-Kaapland sal gunstige toestande skep vir reën oor hierdie gebiede. Oor die res van die land is warm, vogtige lug in sirkulasie en sal verspreide donderbuie voorkom

INFERENCE

With the ridge of high pressure extending south of the continent and the low along the west coast, conditions will remain favourable for further rain over the southern and eastern areas of the Cape. Warm, moist air is still advancing from the north over the rest of the country, where scattered thundershowers will occur.

AFLEIDING

Met die rug van hoë druk wat suid van die land instoot en die laedrukstelsel aan die weskus, sal toestande gunstig bly vir verdere reën oor die suidelike en oostelike dele van Kaapland. Warm, vogtige lug beweeg nog uit die noorde in oor die res van die land, waar verspreide donderbuie sal voorkom.

INFERENCE *Moist air is in circulation over most of the country and a low pressure area extends from the Atlantic ocean to the Southern Cape Province. Scattered showers will therefore occur over nearly all areas of the country, except North-Eastern Transvaal, where the circulation is still anticyclonic.*

AFLEIDING *Vogtige lug is oor die meeste dele van die land aanwesig en 'n laedrukgebied strek vanaf die Atlantiese oseaan tot oor Suid-Kaapland. Gevolglik kan verspreide buie verwag word oor feitlik die hele land, behalwe Noordoos-Transvaal, waar die sirkulasie nog antisiklonaal is.*

INFERENCE

The lows on the south coast and west of the continent are moving eastwards and therefore rain and showers will fall over most of the Cape Province, Southern Natal and Southern Free State. Scattered thundershowers will also still occur over the rest of the country where unstable, moist air is circulating.

AFLEIDING

Die laedrukstelsels aan die suidkus en wes van die land beweeg ooswaarts sodat reën en buie oor die meeste dele van Kaapland, Suid-Natal en Suid Vrystaat sal voorkom. Verspreide donderbuie sal ook nog voorkom oor die res van die land waar vogtige, onstabiele lug aanwesig is.

INFERENCE The low south of the land is moving south-eastwards and the weather will clear further over the Cape Province. It is expected, however, that a weak low pressure trough will form over the central interior and thundershowers will occur over Transvaal, Natal, North-Eastern O.F.S. and the northern areas of Botswana and S.W.A.

AFLEIDING Die laedrukstelsel suid van die land beweeg suidooswaarts en die weer oor Kaapland sal verder opklaar. Na verwagting sal 'n swak laedruktrog egter vorm oor die sentrale binneland en onderbuie sal more nog voorkom oor Transvaal, Natal, Noordoos-Vrystaat en die noordelike gebiede van Botswana en S.W.A.

INFERENCE The ridge of high pressure over the western interior will cause dry air to advance eastwards and therefore only isolated thundershowers will still occur over Transvaal and Northern Natal tomorrow, while it will be fine and warm to hot over the rest of the country.

AFLEIDING Die rug van hoë druk oor die westelike binneland sal droë lug ooswaarts laat uitbrei, sodat slegs enkele donderbuie more nog oor Transvaal en Noord-Natal sal voorkom, terwyl dit oor die res van die land mooiweer en warm sal wees.

INFERENCE The cold front approaching from the west will cause cloudy weather with light rain over the South-Western Cape later, but over the rest of the country it will be mainly fine and warm, although isolated thundershowers may still be expected in the moist air-mass over Northern Transvaal and Northern Botswana.

AFLEIDING Die koufront wat uit die weste aankom, sal later bewolkte weer met ligte reën oor Suidwes-Kaapland veroorsaak, maar oor die res van die land sal dit hoofsaaklik mooiweer en warm wees, hoewel enkele donderbuie nog verwag word in die vogtige lugmassa oor Noord-Transvaal en noordelike Botswana.

INFERENCE *Pressures are now rising steeply along the east coast while a low pressure area extends from the Free State to northern S.W.A. and consequently conditions are becoming favourable for rain and thundershowers over Natal, Transvaal, Northern O.F.S. and North-Eastern Botswana.*

AFLEIDING *Die lugdruk styg nou vinnig langs die ooskus terwyl 'n laedrukgebied vanaf die Vrystaat tot oor noordelike S.W.A. strek en gevolglik word toestande gunstig vir reën en donderbuie oor Natal, Transvaal, Noord-Vrystaat en Noordoos-Botswana.*

INFERENCE A low pressure trough extends from the Free State north-westwards to SWA and moist air is flowing over the areas north-east of it. Consequently scattered showers may be expected over these regions. A cold front, followed by a strong high, south-west of the continent, will cause cloudy weather with light rain over the south coast tomorrow.

AFLEIDING 'n Laedruktrog strek van die Vrystaat noordweswaarts na SWA en vogtige lug vloei oor die gebiede noordoos daarvan. Gevolglik word verspreide buie verwag oor hierdie gebiede. 'n Koufront, gevolg deur 'n redelike sterk hoog, suidwes van die land sal more bewolkte weer met ligte reën oor die suidkus veroorsaak.

INFERENCE

A complex low pressure system is present over the interior while the Atlantic high is extending a ridge south of the continent. Consequently conditions will develop favourably for scattered rain and showers over most parts of the country, excluding the western parts of the Cape Province.

AFLEIDING

'n Komplekse laedrukstelsel is oor die binneland aanwesig terwyl die Atlantiese hoëdrukstelsel in rug suid van die vasteland instoot. Gevolglik sal toestande betreklik gunstig ontwikkel vir verspreide reën en buie oor die meeste dele van die land, uitgesonderd die westelike helfte van Kaapland.

INFERENCE An extended low pressure trough is evident over the interior with warm, moist air north and east of it, while the strong high south of the continent is advecting cool, moist air from the southeast over Natal and Transvaal. Consequently fairly general rain and showers may be expected over the above mentioned areas.

AFLEIDING 'n Uitgestrekte laedrukstrog is oor die binneland aanwesig met warm, vogtige lug noord en oos daarvan, terwyl die sterk hoog suid van die land koel, vogtige lug uit die suidooste oor Natal en Transvaal invoer. Gevolglik kan redelik algemene reën en buie verwag word oor al die bogenoemde gebiede.

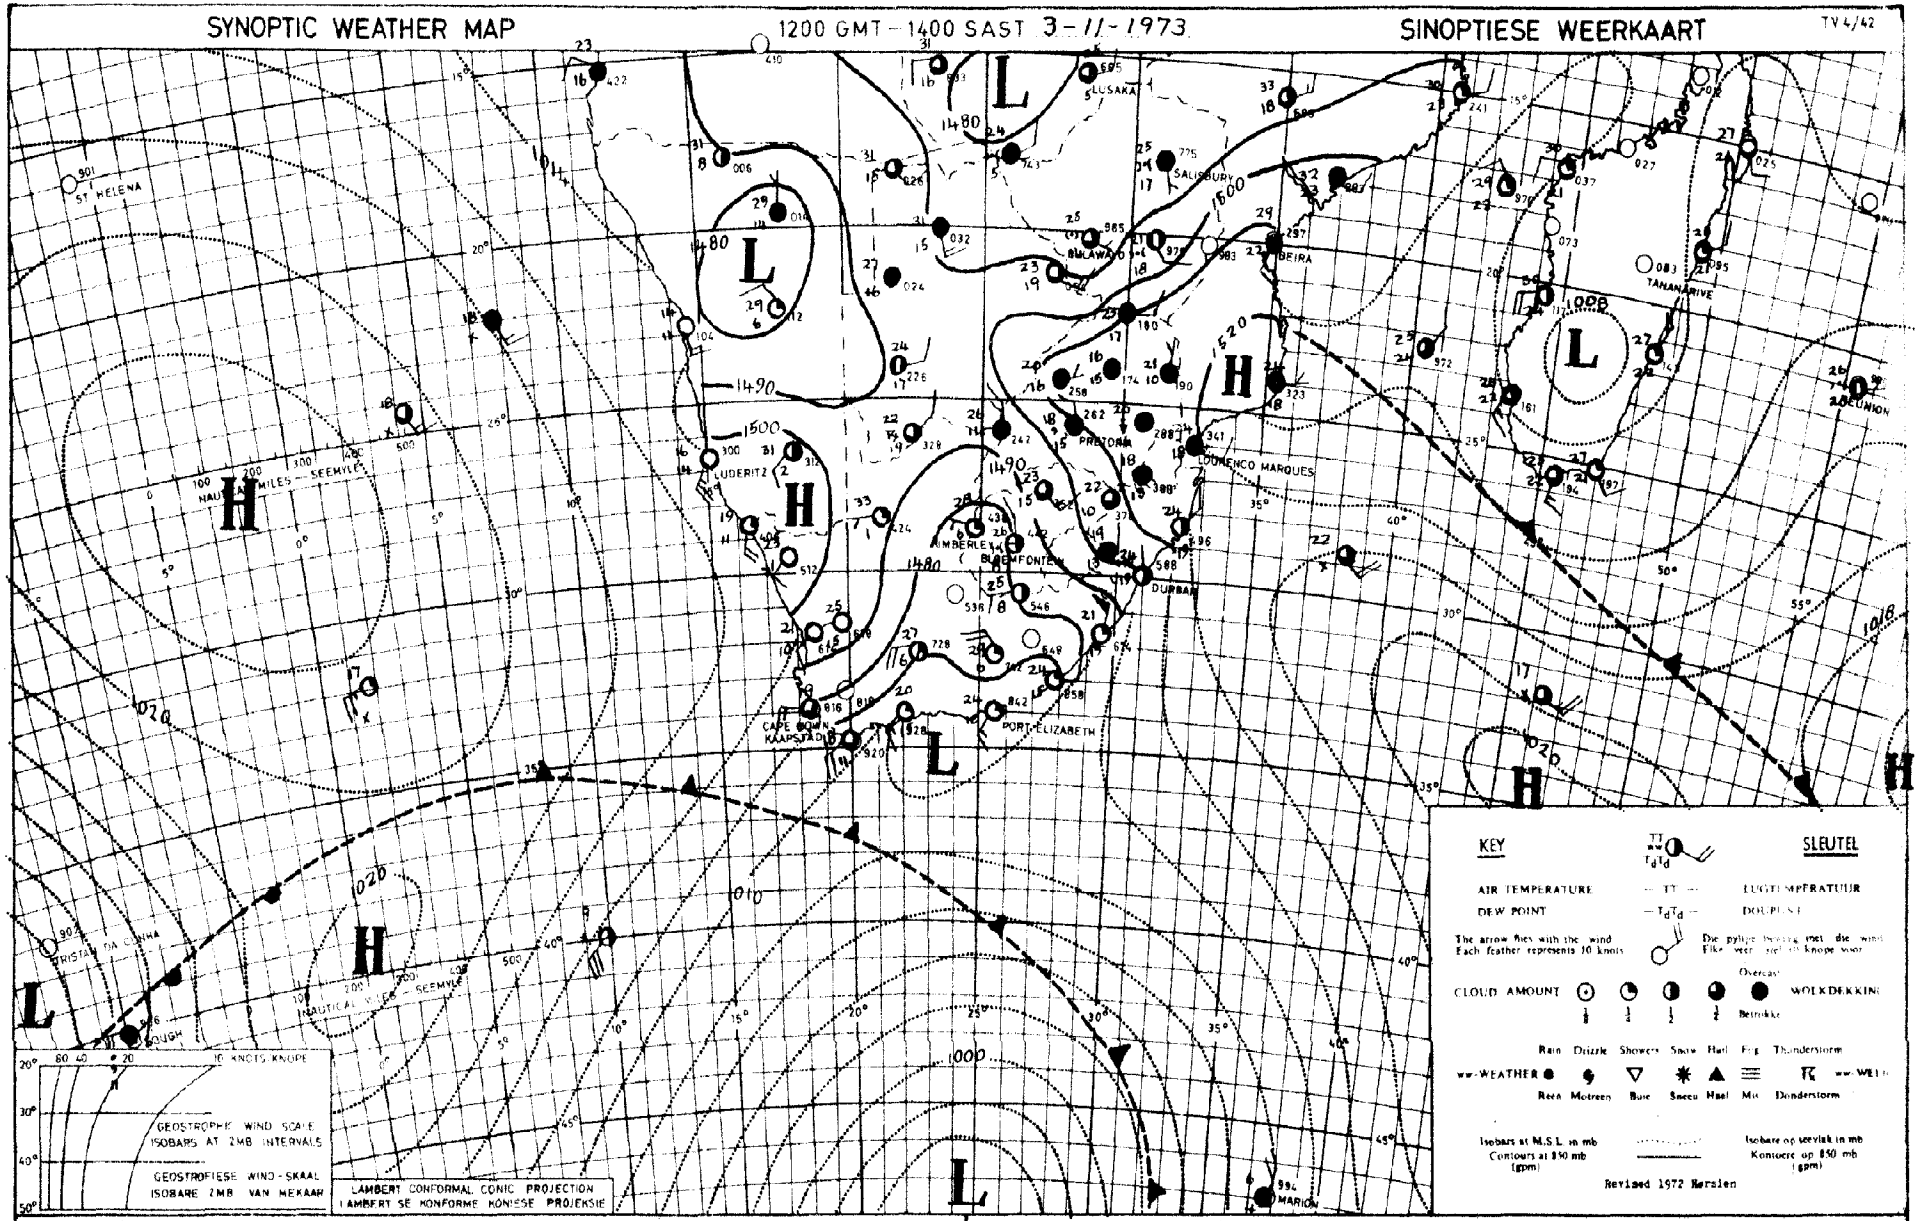
SYNOPTIC WEATHER MAP 1200 GMT – 1400 SAST 3-11-1973 SINOPTIESE WEERKAART TV 4/42



INFERENCE *Further rain will fall over the areas east of the low pressure trough over the interior, but gradual clearance will take place from the west as the trough slowly advances eastwards. The cold front south-west of the Cape will cause cloudy weather with showers over South Western and Southern Cape.*

AFLEIDING *Verdere reen sal voorkom oor die gebiede oos van die lae-druktrog oor die binneland, maar geleidelike opklaring sal uit die weste begin intree namate die trog stadig ooswaarts verplaas word. Die koufront suidwes van die land sal bewolkte weer met buie oor Suidwes- en Suid-Kaapland laat uitbrei.*

INFERENCE Cool, cloudy weather with rain will advance over Natal behind the front, but the ridge of high now moving in over-land from the west will bring clearance over the Free State and the western half of the Transvaal.

AFLEIDING Koel, bewolkte weer met reën sal agter die front uitbrei oor Natal, maar die rug van hoë druk wat nou van die weste af oor die land instoot, sal opklaring teweegbring oor die Vrystaat en die westelike helfte van Transvaal.

INFERENCE *The high pressure system over the western interior will advect dry air further north eastwards, so that fine weather will prevail over most regions, except Northern Transvaal. The cold front in the south-west will cause cloudy weather with light rain later over the south western and southern Cape coasts.*

AFLEIDING *Die hoëdrukstelsel oor die westelike binneland sal droë lug verder ooswaarts laat uitbrei, sodat mooiweerstoestande oor die meeste gebiede behalwe Noord-Transvaal, sal voorkom. Die koufront in die suidweste sal later bewolkte weer met ligte reën oor die suidwes- en suidkus teweegbring.*

INFERENCE *Pressures are rising again on the south coast behind a cold front and therefore cloudy weather with light showers will spread over the east coast and the Transvaal Lowveld. Isolated thundershowers will develop over Northern and Central Transvaal tomorrow, but over the rest of the country it will remain mainly fine and warm.*

AFLEIDING *Lugdruk styg weereens aan die suidkus agter 'n koufront, sodat bewolkte weer met ligte buie oor die ooskus en Transvaal se Laeveld sal uitbrei. Enkele donderbuie sal more ook oor Noord- en Middel-Transvaal voorkom, maar oor die res van die land sal dit hoofsaaklik mooi weer en warm bly.*

INFERENCE The trough over the interior is slowly moving westwards while a cell of high pressure has formed south of the land. Consequently isolated thundershowers may again be expected over Transvaal, Northern O.F.S. and the Natal interior. Cool, cloudy weather will occur in the morning over the Natal coast and the Transvaal Lowveld.

AFLEIDING Die trog oor die binneland beweeg stadig weswaarts terwyl 'n sel van hoë druk suid van die land vorm. Gevolglik kan enkele donderbuie nou weer verwag word oor Transvaal, die Noord-Vrystaat en Natalbinneland. Koel, bewolkte weer sal in die oggend oor die Natalkus en die Transvaallaeveld voorkom.

Revised 1972 Kersten

INFERENCE A low pressure trough extends from Kimberley northwards and warm moist air is present over the areas east of it. Consequently scattered thundershowers will occur over Northern Botswana, Transvaal, Northern Free State, Natal and Northern Cape. The cold front to the west will cause cloudy weather with light rain later over the southern Cape coastal regions.

AFLEIDING 'n Laedrukstrog strek vanaf Kimberley noordwaarts en warm, vogtige lug is aanwesig oor die gebiede oos daarvan. Gevolglik sal verspreide donderbuie voorkom oor Noord-Botswana, Transvaal, Noord-Vrystaat, Natal en Noord-Kaapland. Die koufront na die weste sal later bewolkte weer met ligte buie oor die suidelike Kaapse kusstreke veroorsaak

INFERENCE

The cold front extending across the Cape Province will advance eastwards, so that colder air will spread over the entire province, the Free State and Natal, accompanied by showers along the coast. The low pressure trough over the interior will still cause thundershowers over the O.F.S, Natal and Southern Transvaal, but the weather will clear over these regions later.

AFLEIDING

Die koufront wat oor die Kaapprovinsie gelê is, sal ooswaarts beweeg sodat kouer lug oor die hele provinsie, die Vrystaat en Natal sal uitbrei, gepaard met buie langs die kus. Die laedrukkrog oor die binneland sal nog donderbuie veroorsaak oor die O.V.S., Natal en Suid-Transvaal, maar dit sal later opklaar oor hierdie gebiede.

Revised 1972 Version

INFERENCE

A steep pressure gradient has developed between the deep low south-east of the continent and the intense high to the west, which will cause cold, dry air to advance from the west over the whole interior. Along the east coast it will, however, still be partly cloudy with light showers.

AFLEIDING

Die diep laag suidoos van die vasteland, tesame met die sterk hoog wes van die land, sal veroorsaak dat koue, droë lug uit die weste oor die hele binneland instroom. Langs die ooskus sal dit egter nog gedeeltelik bewolk wees met ligte buie.

INFERENCE

Cool, dry air has now spread over the entire Republic, but the high south-west of Cape Town is now raging in south of the continent so that cloudy weather will spread from the south-east over Natal and Eastern Transvaal. Hot bergwind conditions will develop along the west coast.

AFLEIDING

Koel, droë lug het nou oor die hele Republiek ingebeweeg, maar die hoog suidwes van Kaapstad beweeg nou suid van die land in, sodat bewolkte toestande oor Natal en Oos-Transvaal sal uitbrei vanaf die suidooste. Warm bergwinde sal langs die weskus begin waai

Revised 1972 Version

INFERENCE The strong high south of the continent will maintain the inflow of cool, moist air over Natal, Transvaal and North-Eastern O.F.S., where rain and showers will occur as a result of the low pressure trough over the central interior. Fine weather will, however, persist over the rest of the country.

AFLEIDING Die sterk hoog suid van die land sal die invloei van koel, vogtige lug oor Natal, Transvaal en Noordoos-Vrystaat laat voortduur. Reën en buie sal voorkom oor hierdie gebiede as gevolg van die laedruktrog wat oor die sentrale binneland geleë is. Oor die res van die land sal dit egter mooiweer wees.

INFERENCE

A low pressure trough is situated over the central interior and therefore scattered thundershowers will occur in the fairly moist air-mass to the east over Transvaal, Free State, Northern Cape and Natal. Little change is expected over the rest of the country.

AFLEIDING

'n Trog is oor die sentrale binneland gelee en dus sal verspreide donderbuie uitsak in die betreklik vogtige lugmassa oos daarvan d.w.s., oor Transvaal, die Vrystaat, Noord- Kaapland en Natal. Min verandering word oor die res van die land verwag.

INFERENCE

The circulation over the interior has now become mainly anticyclonic so that only isolated light thundershowers will still occur over Transvaal, Natal and Northern Free State, while temperatures will rise further over most areas.

AFLEIDING

Die sirkulasie oor die binneland het nou hoofsaaklik antisiklonaal geword en nog net enkele ligte donderbuie sal oor Transvaal, Natal en Noord-Vrystaat voorkom, terwyl temperature verder sal styg oor die meeste gebiede.

INFERENCE Hot, dry weather will prevail over most of the interior regions as a result of the strong anticyclonic circulation but a weak surface trough of low pressure extends from the east coast towards Pretoria so that isolated thundershowers will still occur over the eastern half of Transvaal. The cold front in the south will cause cloudy weather with light rain over the south coast later.

AFLEIDING Warm, droë weer sal oor die meeste dele van die binneland voortduur as gevolg van die sterk antisiklonale sirkulasie. 'n Swak oppervlaktetrog van lae druk strek egter vanaf die ooskus na Pretoria sodat enkele donderbuie nog oor die oostelike helfte van Transvaal sal voorkom. Die kouefront in die suide sal later bewolkte weer met ligte reën oor die suidkus veroorsaak.

INFERENCE *The cold front south of the continent, which is being followed by an intense high, will advance north-eastwards along the coast, causing cool, cloudy weather with rain, spreading to the Eastern Transvaal Lowveld later.*

AFLEIDING *Die koufront suid van die land wat gevolg word deur 'n sterk hoëdrukstelsel sal noordooswaarts langs die kus op beweeg, gepaard met koel, bewolkte weer en reën wat later ook na die Oos-Transvaalse Laeveld sal uitbrei.*

INFERENCE The cut-off low over the interior extends to great altitudes in the upper air, while the belt of high pressure persists south of the continent. Consequently fairly general rain and thundershowers will occur over the Free State, Northern and Eastern Cape, Natal and the southern half of Transvaal.

AFLEIDING Die geslote lasy oor die binneland strek tot groot hoogtes in die bolug, terwyl die gordel van hoë lugdruk suid van die land stand hou. Gevolglik sal betreklik algemene reën en donderbuie voorkom oor die Vrystaat, Noord- en Oos-Kaapland, Natal en die suidelike helfte van Transvaal.

INFERENCE *The cut-off low over the interior is now moving somewhat westwards and therefore further rain and showers will occur over most parts of the country, with the exception of the Cape west coast region and the southern area of S.W.A.*

AFLEIDING *Die afgeslote laedrukstelsel oor die binneland beweeg ietwat weswaarts en dus kan verdere reën en buie verwag word oor die meeste dele van die land, met die uitsondering van die Kaapse weskusgebied en die suidelike gedeelte van S.W.A.*

INFERENCE

A portion of the interior low is moving out to sea east of Port Elizabeth but there remains a clear-cut low pressure centre over Botswana which will cause further thundershowers over the eastern half of the Republic.

AFLEIDING

'n Gedeelte van die binnelandse laag is besig om oos van Port Elizabeth uit te beweeg na die see maar daar is nog 'n duidelike laedruksentrum oor Botswana wat verdere donderbuie sal veroorsaak oor die oostelike helfte van die Republiek.

INFERENCE The cold front south west of the continent is being preceded by a deep low and followed by an intense high and will cause cloudy weather with rain to advance over the southern and eastern coastal regions. Scattered thundershowers will still occur over the areas east of the interior trough of low pressure.

AFLEIDING Die koufront suidwes van die land, vooraf gegaan deur 'n diep laag en gevolg deur 'n sterk hoog, sal bewolkte weer met reën oor die suid- en ooskusstreke laat uitbrei, terwyl verspreide donderbuie nog oor die gebiede oos van die binnelandse laedruktrog sal voorkom.

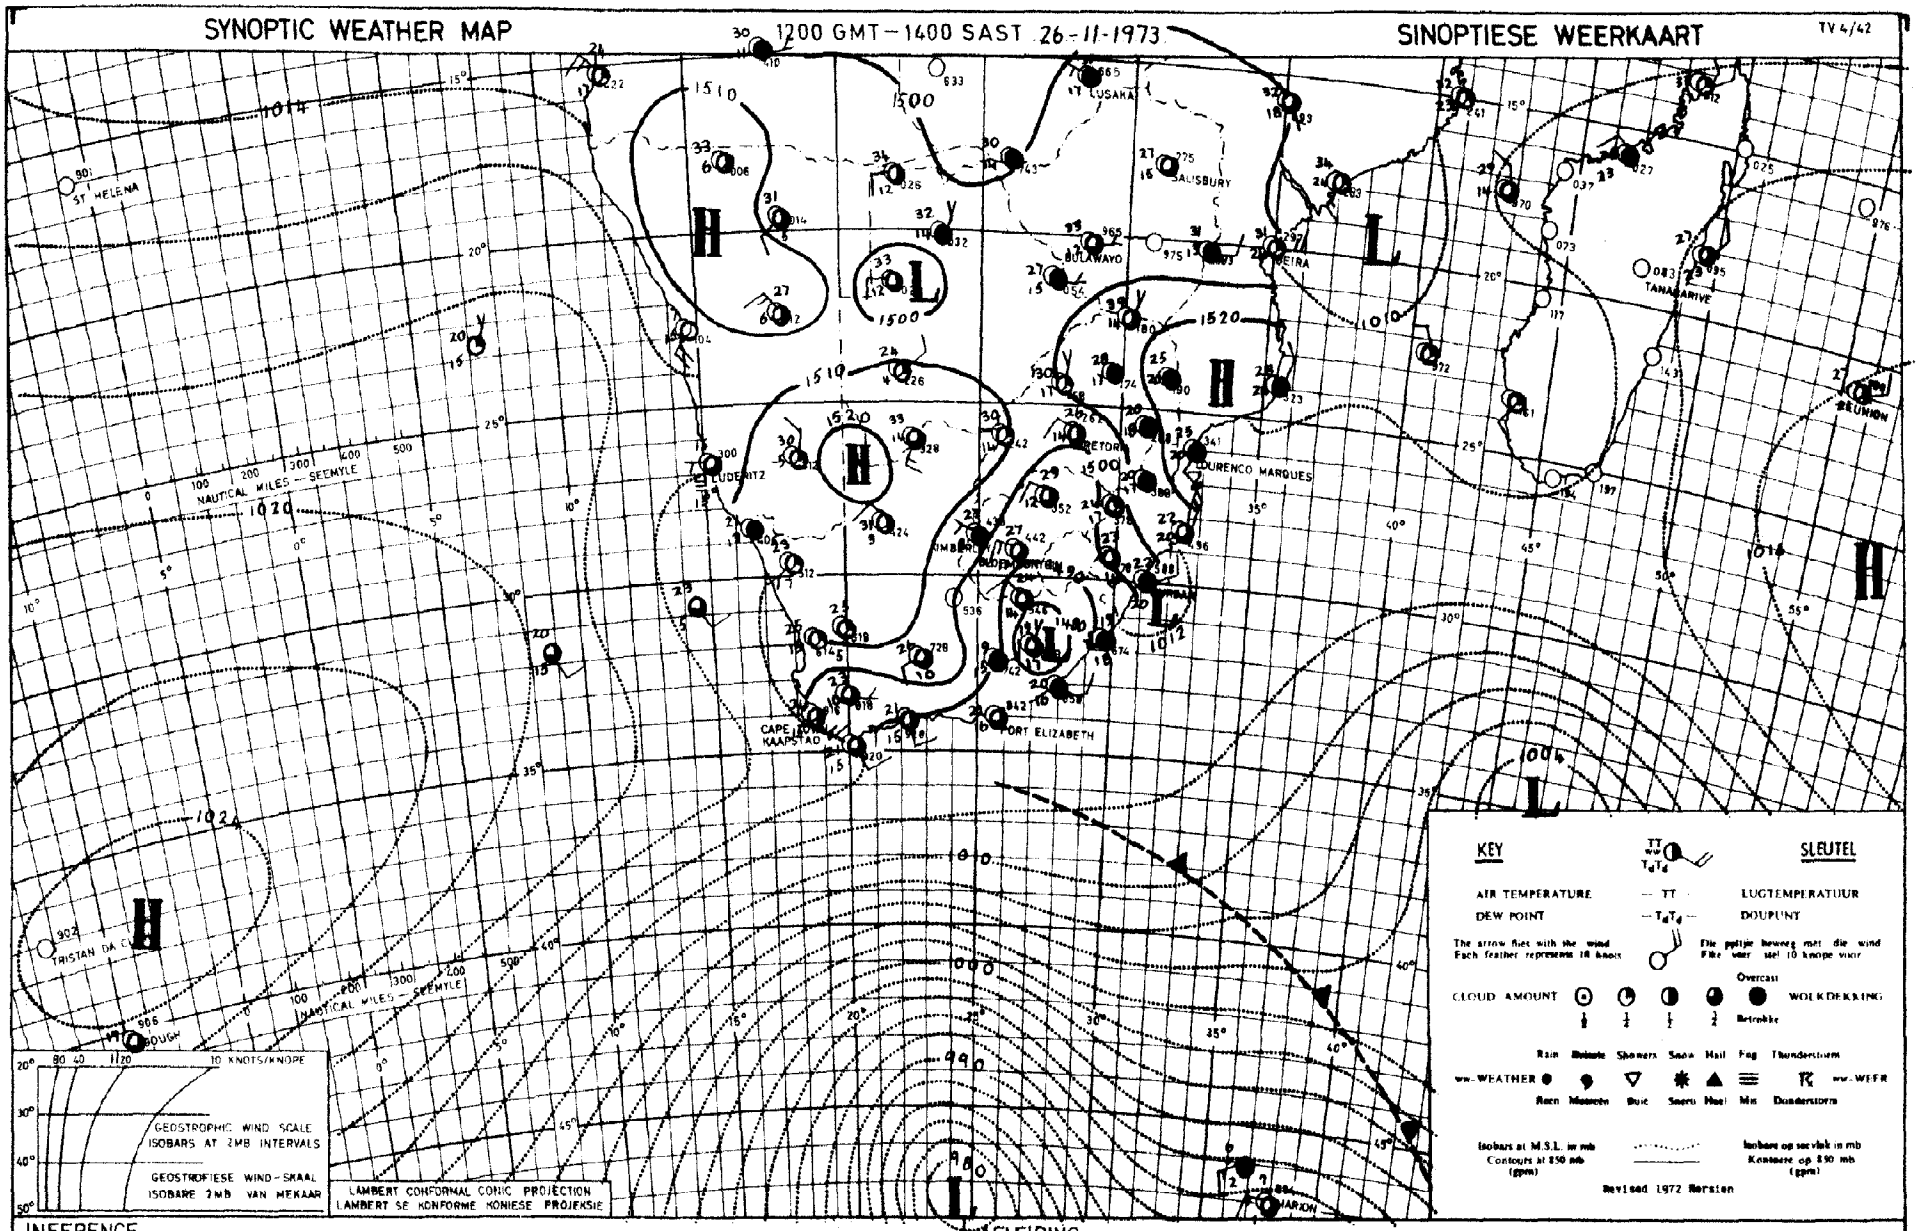
Tshane	35	17	



INFERENCE

The low pressure trough over the interior is slowly shifting eastwards and dry air is moving in over the western interior so that thundershowers will now occur only over the eastern half of Transvaal and over Natal.

AFLEIDING

Die laedrukttrog oor die binneland is stadig besig om ooswaarts te skuif en droë lug beweeg in oor die westelike binneland, sodat donderbuie net nog oor die oostelike helfte van Transvaal en oor Natal sal voorkom.

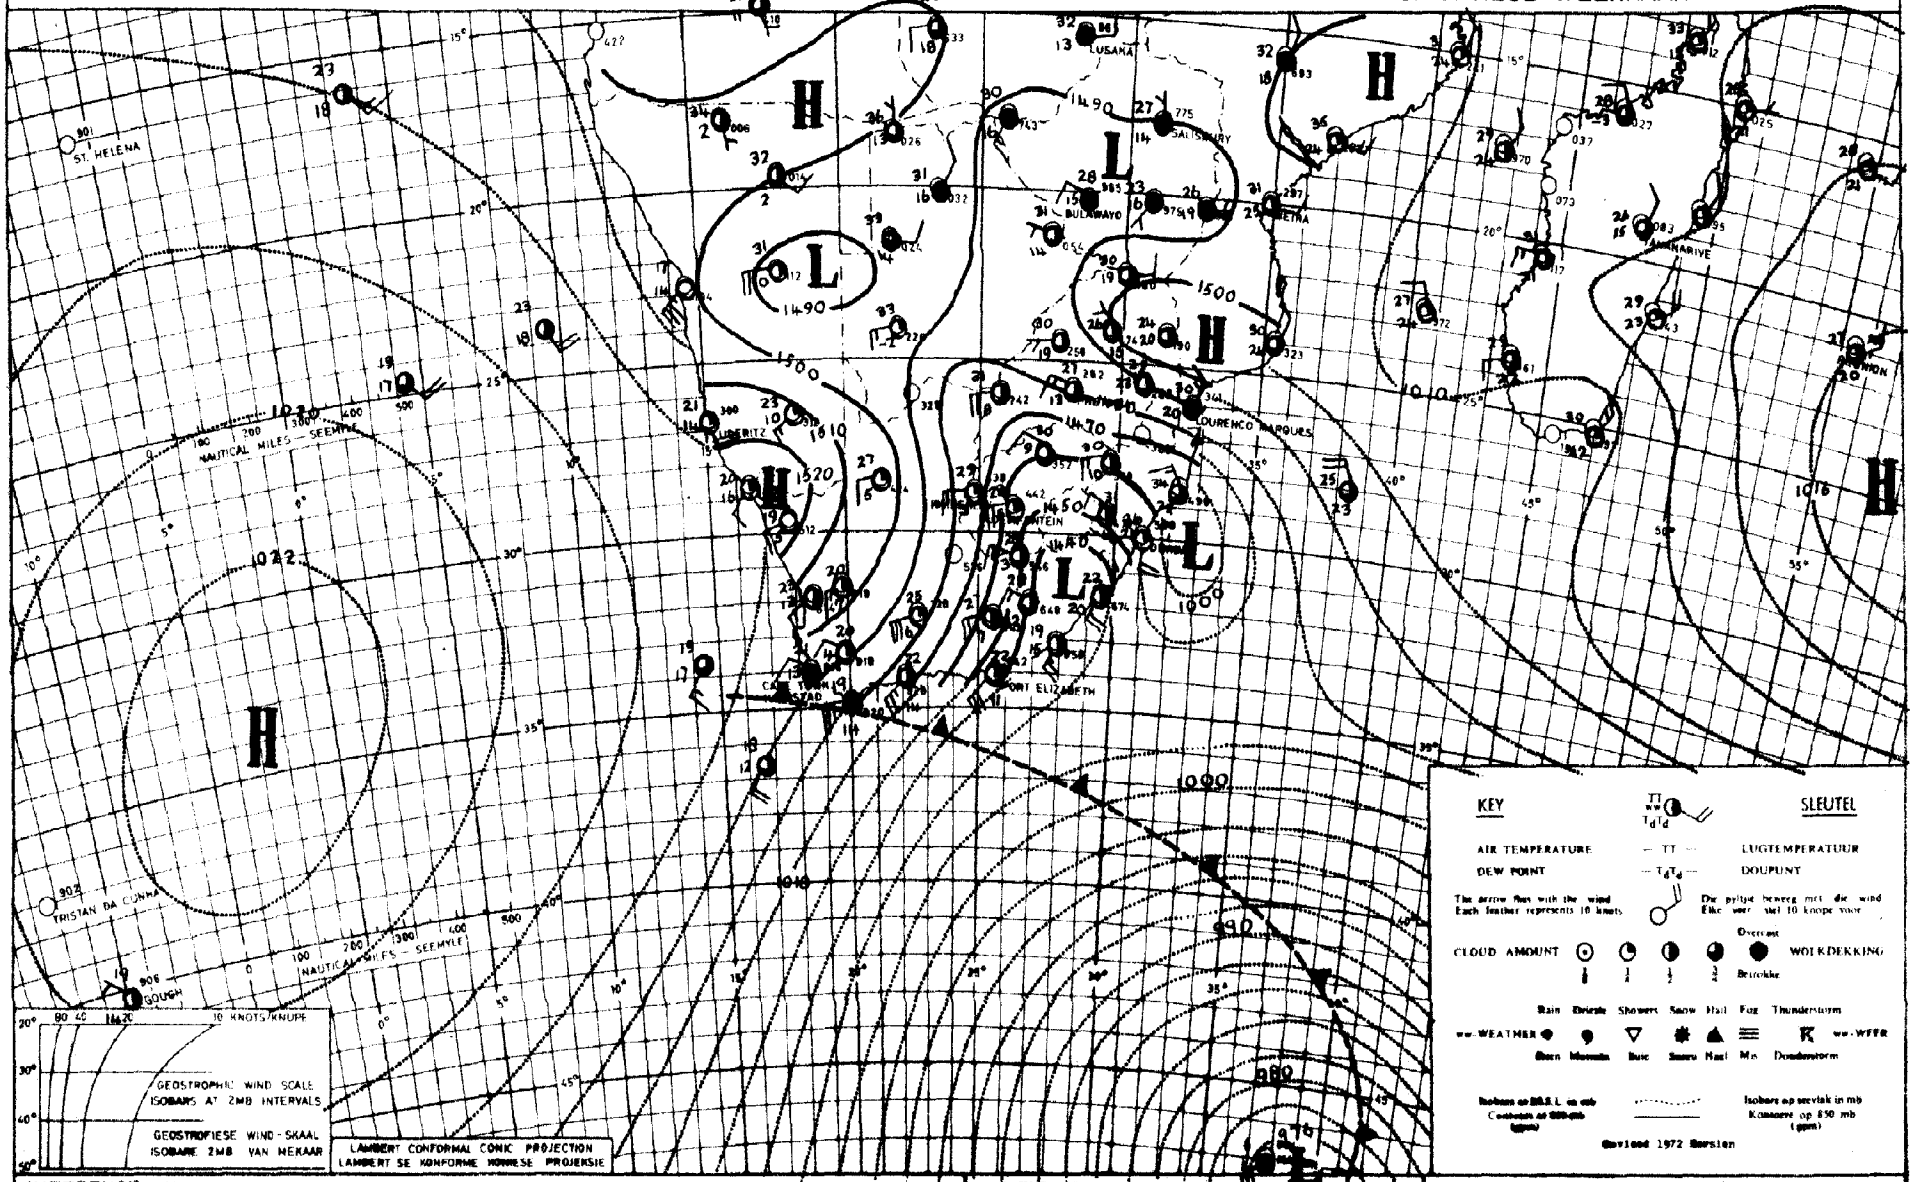
SYNOPTIC WEATHER MAP 1200 GMT – 1400 SAST 27-11-1973. SINOPTIESE WEERKAART TV 4/42



KEY SLEUTEL

AIR TEMPERATURE	TT	LUGTEMPERATUUR
DEW POINT	T_dT_d	DOUPUNT

The arrow flies with the wind. Each feather represents 10 knots.
Die pyltjie beweeg met die wind. Elke veer stel 10 knope voor.

CLOUD AMOUNT — Overcast — WOLKDEKKING — Bewolkte

ww-WEATHER — Rain, Drizzle, Showers, Snow, Hail, Fog, Thunderstorm — ww-WEER — Reën, Motreën, Buie, Sneeu, Hael, Mis, Donderstorm

Isobars at 850 L. as mb. Contours at 850 mb (gpm)
Isobare op 850 L. as mb. Kontoere op 850 mb (gpm)

Revised 1972 Revisie

INFERENCE *The cold front that has reached the coast from the south is advancing north-eastwards and therefore cold, cloudy weather with showers will advance over the south and east coasts and reach the Transvaal Lowveld later. Thundershowers will still occur over Central and Northern Transvaal, but cooler, dry air will spread over the rest of the interior.*

AFLEIDING *Die koueftont wat die kus uit die suide bereik het, beweeg noordooswaarts en dus sal koue, bewolkte weer met buie oor die suid- en ooskus uitbrei en later die Transvaalse Laeveld bereik. Donderbuie sal ook nog oor Middel- en Noord-Transvaal voorkom, maar koeler, droë lug sal oor die res van die land uitbrei.*

INFERENCE The wedge of high pressure now building up along the east coast will cause cool, cloudy weather over the whole Natal, Transvaal and Northern Free State and light showers will occur, but over the rest of the country the air is still dry and the weather will remain fine.

AFLEIDING Die wig van hoë druk wat nou langs die ooskus indruk, sal koel, bewolkte weer oor die hele Natal, Transvaal en Noord-Vrystaat laat uitbrei en ligte buie sal uitsak, maar oor die res van die land is die lug nog droog en dit sal mooiweer bly.

INFERENCE

A low pressure trough extends from the south east coast towards S.W.A. and fairly moist air is circulating over the areas east of it. Consequently scattered thundershowers will occur over Transvaal, Natal, Northern O.F.S. and Botswana. The cold front south of the continent will advance northwards and cause light rain over the southern and eastern coasts later.

AFLEIDING

'n Laedruktrog strek vanaf die suidooskus na S.W.A. en betreklik vogtige lug is aanwesig oor die gebiede oos daarvan. Gevolglik sal verspreide donderbuie voorkom oor Transvaal, Natal, Noord-Vrystaat en Botswana. Die koufront suid van die land sal noordwaarts beweegen ligte reën oor die suid- en ooskus aanbring.

INFERENCE

With low pressure over the land and a high moving in south of the continent, cloudy weather with rain will occur over the eastern regions of the Republic. Warm, moist air is in circulation over the northern and western interior, where scattered thundershowers will occur.

AFLEIDING

Met lae druk oor die land en 'n hoëdrukstelsel wat weer suid van die vasteland indruk, sal bewolkte toestande met reën oor die oostelike dele van die Republiek voorkom. Warm, vogtige lug is in sirkulasie oor die noordelike en westelike binneland, waar verspreide donderbuie sal uitsak.

INFERENCE The high south of the continent will advance further north-eastwards, causing cool, cloudy weather to spread over the whole Transvaal. Pressures are, however, falling over the western regions which will result in a southward flow of the warm, moist air from northern S.W.A. to the entire Cape Province and southern O.F.S. where scattered showers will occur.

AFLEIDING Die hoëdrukstelsel suid van die land sal verder noordoos beweeg sodat die koel, bewolkte weer oor die hele Transvaal sal uitbrei. Die lugdruk daal egter oor die westelike dele, wat sal veroorsaak dat die warm, vogtige lug oor noordelike S.W.A. suidwaarts sal uitbrei sodat verspreide buie later oor die hele Kaapland, S.W.A. en Suid-Vrystaat sal voorkom.

INFERENCE A surface and upper-air low has developed over the western regions, causing fairly general rain and thundershowers already over S.W.A., Northern and Western Cape and the southern O.F.S. and these conditions will extend gradually over the rest of the Cape, Free State, Natal and the southern half of the Transvaal.

AFLEIDING 'n Oppervlak- en boulugaedruksteisel het oor die westelike gebied ontwikkel sodat betreklik algemene reën en donderbuie reeds voorkom oor S.W.A., Noord- en Wes-Kaapland en die Suid-Vrystaat en hierdie toestande sal geleidelik uitbrei oor die res van Kaapland, Vrystaat, Natal en die suidelike helfte van Transvaal.

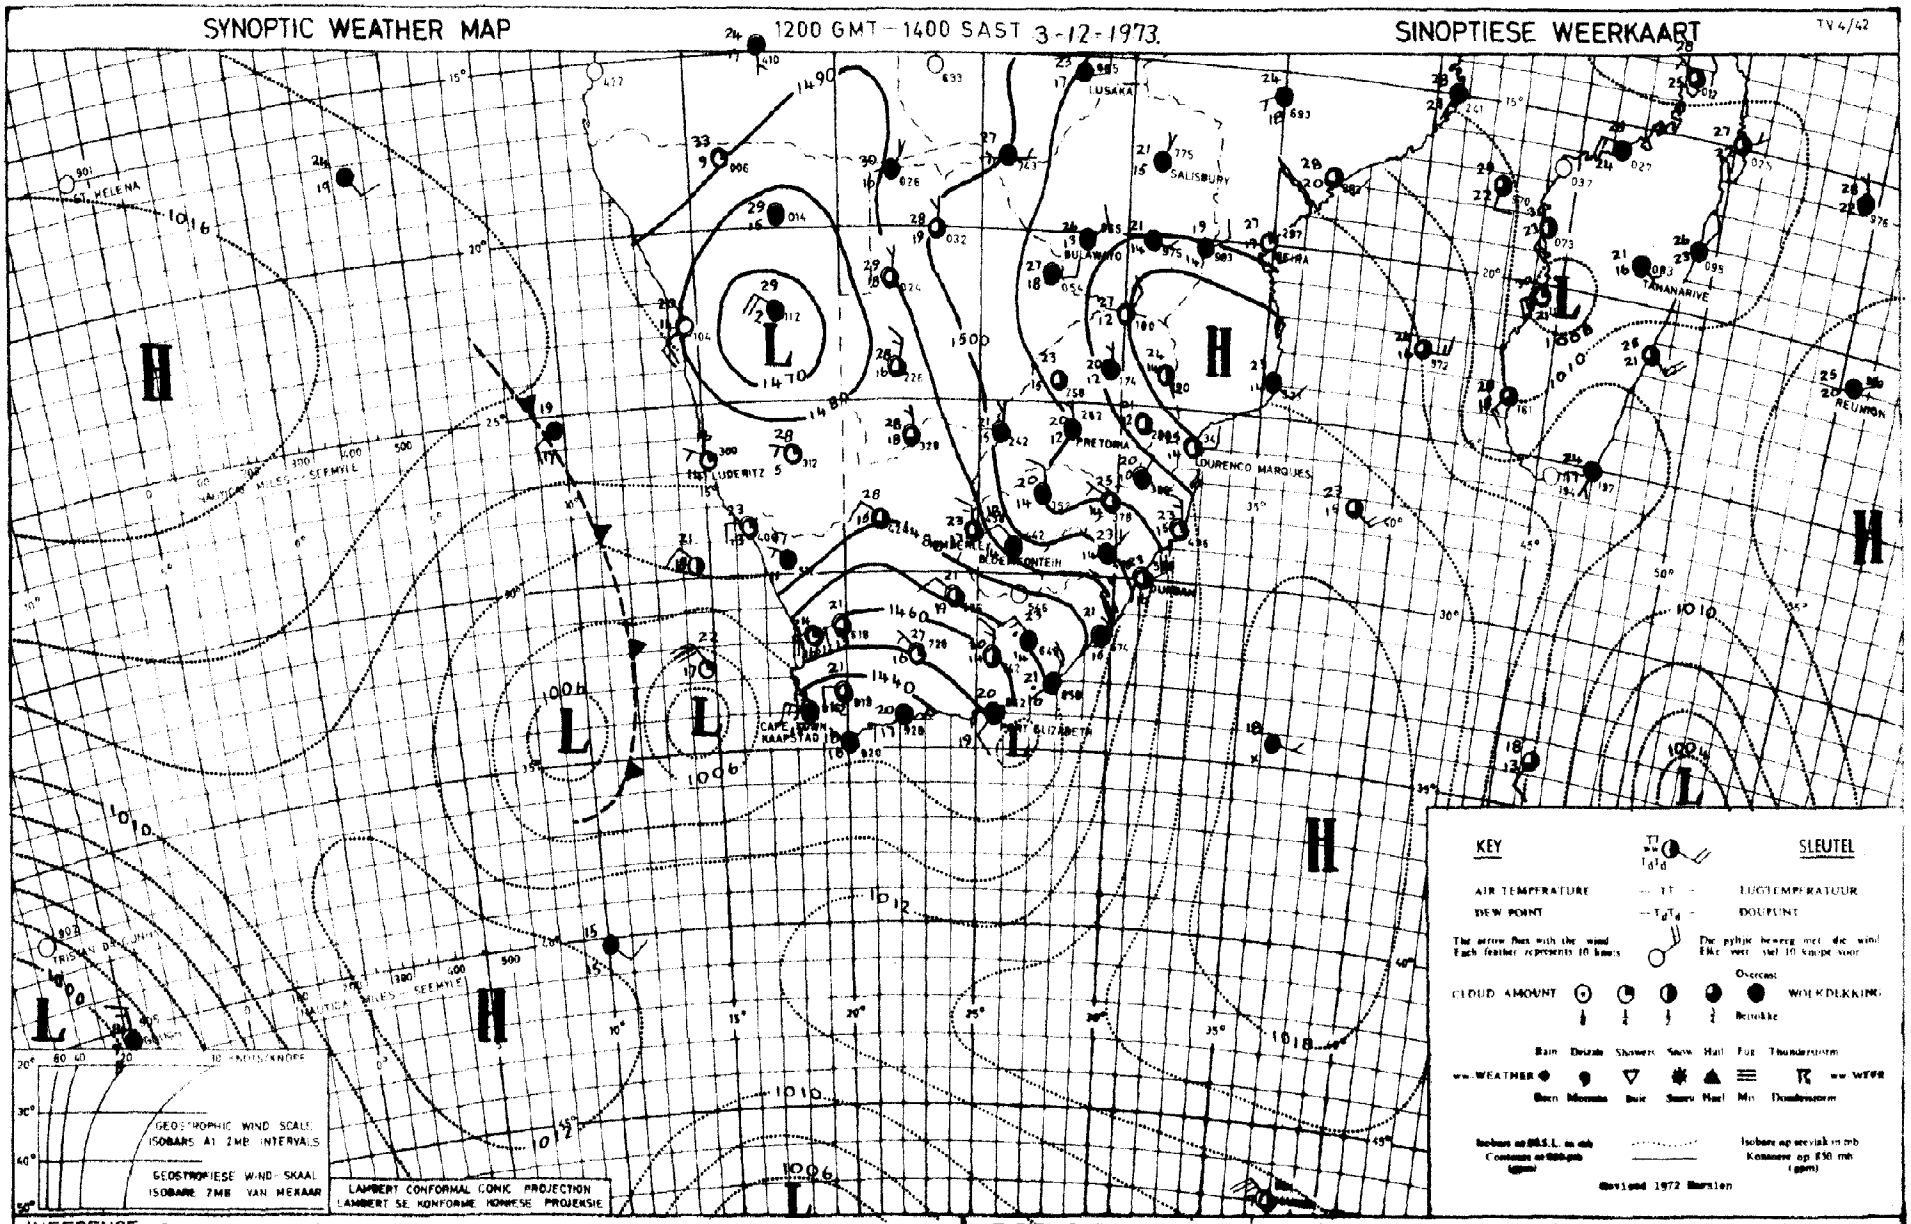
Tshane	30	18	1,0



INFERENCE A complex low pressure area evident over the Cape Province, S.W.A. and also west of the continent is almost stationary and therefore the inflow of moist air will persist over most areas of the Republic. Further scattered showers will occur over the Cape Province, the Free State, Natal and the southern half of the Transvaal.

AFLEIDING Daar is 'n komplekse laedrukgebied oor Kaapland, S.W.A. en ook wes van die land wat feitlik stasionêr is en dus sal die toevloei van vogtige lug voortduur oor die meeste dele van die Republiek. Verspreide buie sal weer voorkom oor Kaapland, die Vrystaat, Natal en die suidelike helfte van Transvaal.

INFERENCE

The low pressure trough over the interior will advance further eastwards so that thundershowers will be confined to the eastern half of Transvaal, North-eastern O.F.S. and Natal tomorrow. The low south of Cape Town and the cold front further west will, however, cause cloudy weather with light rain over the Cape south-west coast.

AFLEIDING

Die laedruktrog oor die binnelandt sal verder ooswaarts beweeg sodat donderbuie more nog net oor die oostelike helfte van Transvaal, Noordoos-Vrystaat en Natal sal voorkom. Die laag suid van Kaapstad en die koufront verder wes sal egter bewolkte weer met ligte reën veroorsaak oor die Kaapse suidweskus

INFERENCE

Dry air has now spread over most parts of the interior but warm, moist air will still be maintained over most of Transvaal and north-eastern Botswana, where further thundershowers will occur. The cold front near Cape Town will cause cloudy weather with showers to advance over the Cape South coast.

AFLEIDING

Droë lug het oor die grootste gedeelte van die binneland inbeweeg, maar warm, vogtige lug sal nog stand hou oor die meeste dele van Transvaal en noordoostelike Botswana, waar verdere donderbuie sal voorkom. Die koufront naby Kaapstad sal bewolkte weer met buie oor die Kaapse suidkus laat uitbrei

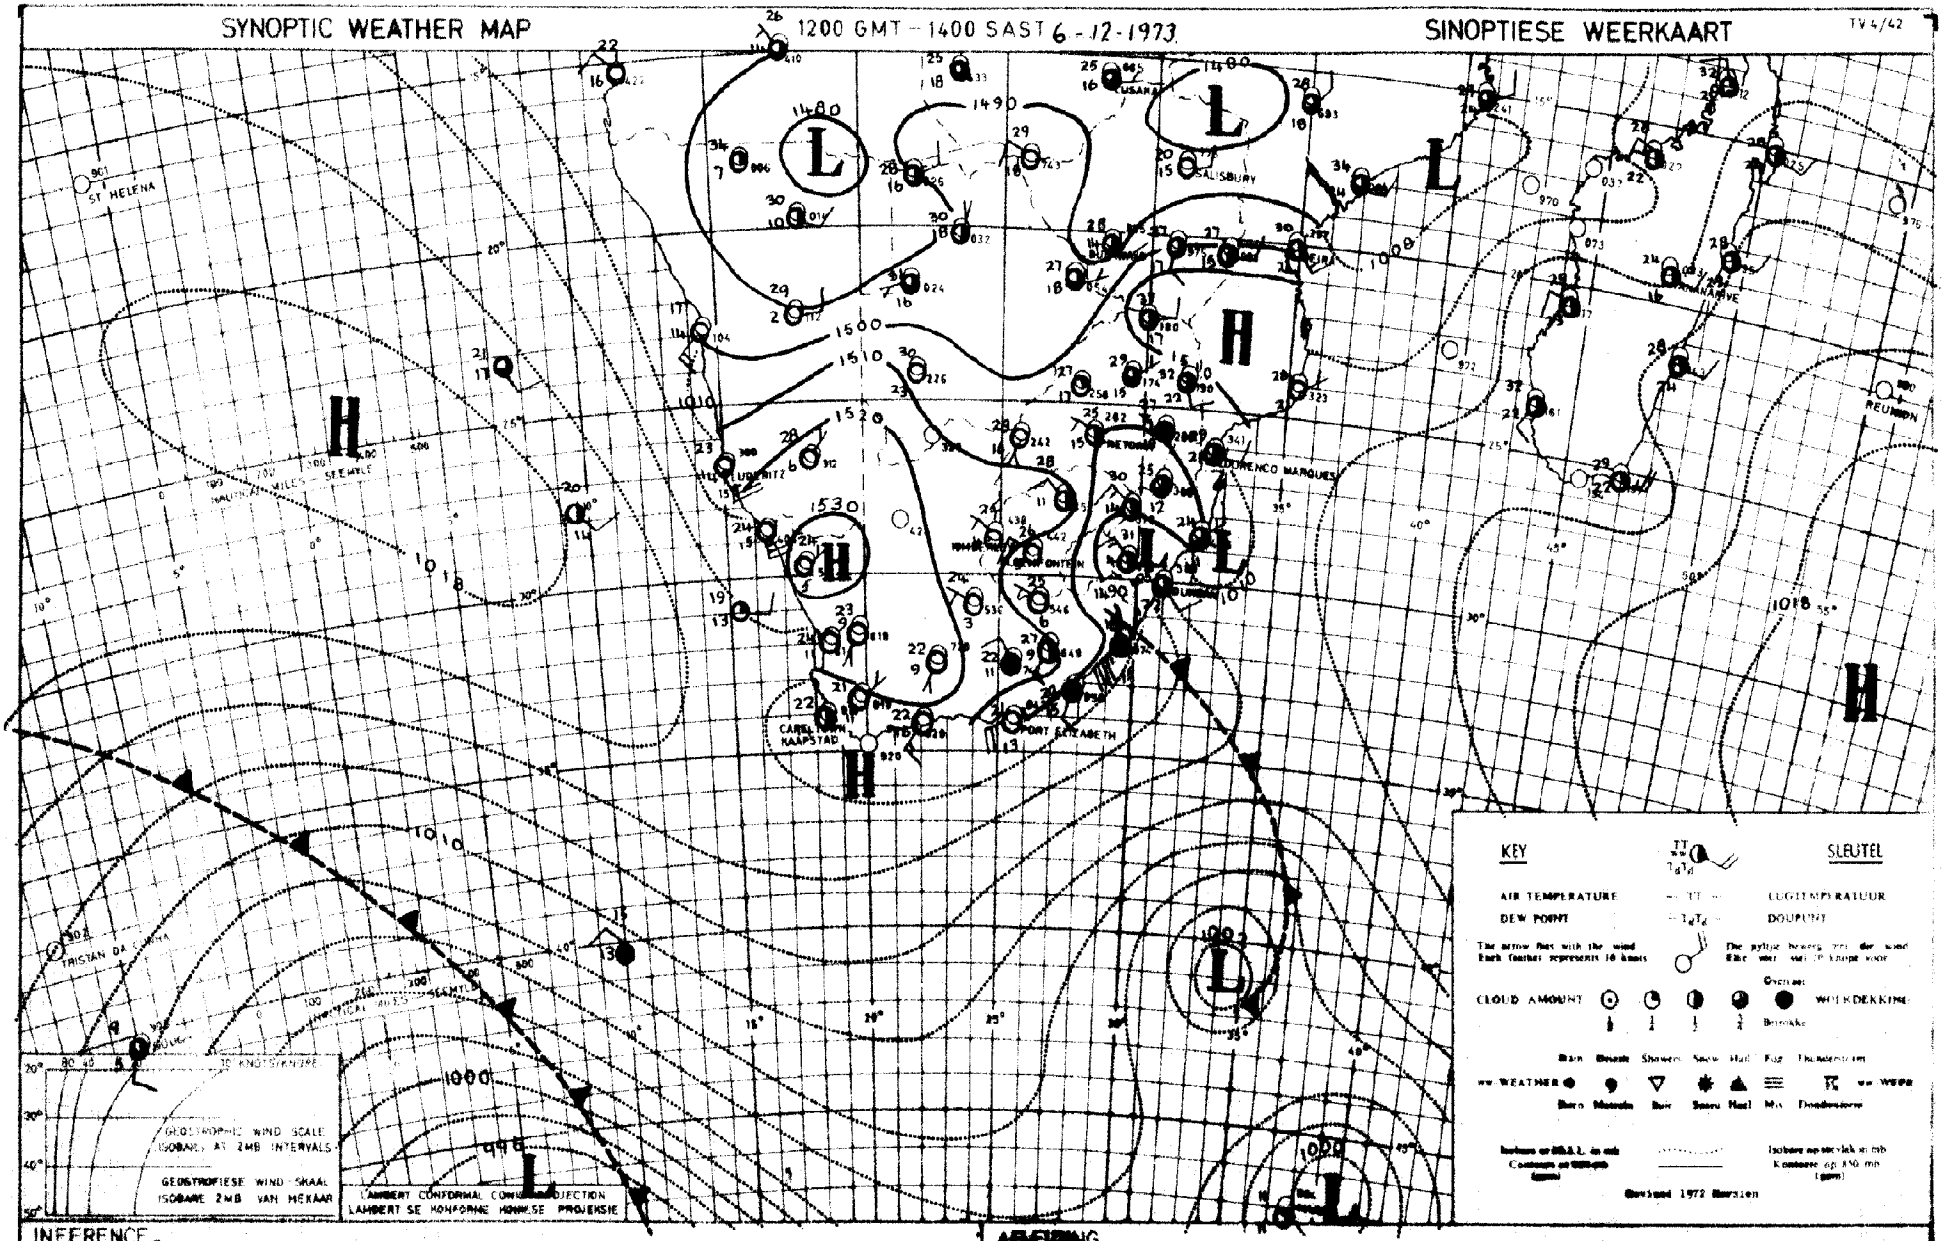
SYNOPTIC WEATHER MAP 1200 GMT – 1400 SAST 6-12-1973 SINOPTIESE WEERKAART TV 4/42



INFERENCE Scattered thundershowers will occur over the areas east of the low pressure trough extending from Natal to northern S.W.A., but over the western and central interior it will remain fine and warm. The cold front east of Gough will reach the coast later tomorrow, accompanied by cloudy weather and rain over South-Western Cape

AFLEIDING Verspreide donderbuie sal voorkom oor die gebiede oos van die laedruktrog wat vanaf Natal deurstrek na noordelike S.W.A., maar oor die westelike en sentrale binneland sal dit mooiweer en warm bly. Die koufront oos van Gough sal later more die kus bereik en bewolkte weer met reën oor Suidwes-Kaapland aanbring.

INFERENCE Scattered thundershowers will still occur over the areas east of the low pressure trough extending north-westwards from Kimberley. The cold front will reach the coast overnight and will cause cool, cloudy weather with showers to extend over the south-western and southern coastal regions.

AFLEIDING Verspreide donderbuie sal nog voorkom oor die gebiede oos van die laedruktrog wat vanaf Kimberley noordwaarts uitstrek. Die koufront sal die land oornag bereik en koel, bewolkte weer met buie veroorsaak oor die suidwes- en suidkusgebiede.

INFERENCE

The cold front will advance farther along the coast and cool rainy weather will spread also over Eastern Cape and later over Eastern Transvaal. Thundershowers will recur in the warm, moist air-mass covering the Transvaal, northern O.F.S. and Botswana.

AFLEIDING

Die koufront sal verder langs die kus beweeg en koel reënweer sal uitbrei oor Oos-Kaapland en later oor Oos-Transvaal. Donderbuie sal nog voorkom in die warm, vogtige lugmassa wat oor Transvaal, Noord-Vrystaat en Botswana aanwesig is.

INFERENCE The high south-west of Cape Town is now moving in south of the continent and therefore the cold, cloudy weather with rain will persist over Natal and also advance over Eastern Transvaal. East of the interior trough, scattered showers will still occur over the rest of the Transvaal, Northern O.F.S. and Botswana.

AFLEIDING Die hoog suidwes van Kaapstad druk nou suid van die vasteland in en dus sal die koue, bewolkte weer met reën oor Natal voortduur en ook oor Oos-Transvaal uitbrei. Oos van die binnelandse laedruktrog, sal verspreide buie voorkom oor die res van Transvaal, Noord-Vrystaat en Botswana.

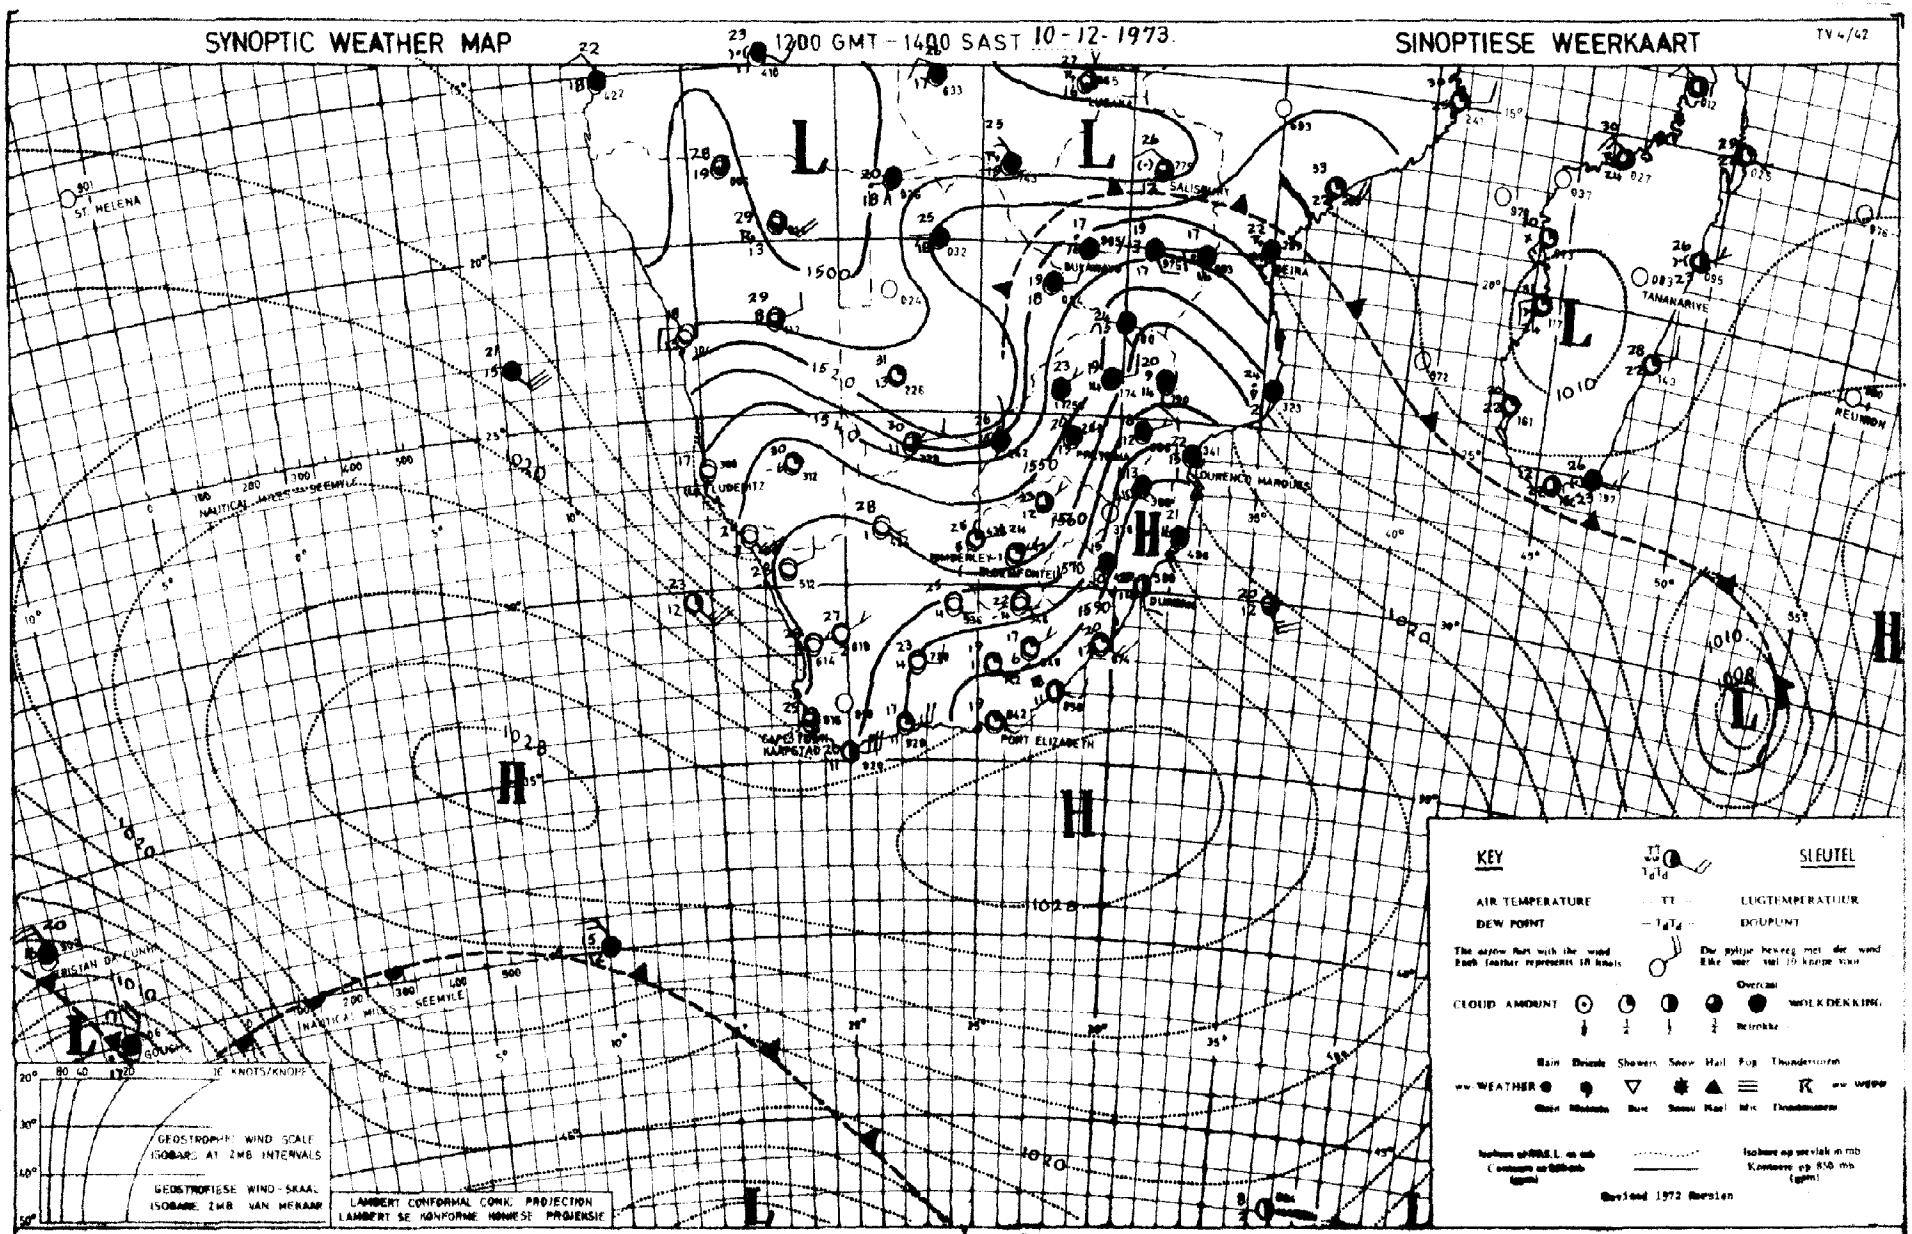
SYNOPTIC WEATHER MAP — 1200 GMT – 1400 SAST 10-12-1973. — SINOPTIESE WEERKAART

TV 4/42



INFERENCE As a result of the high south of the continent the inflow of cold, moist air will continue over Northern Natal and the Transvaal where further rain will fall. The V-trough over Botswana will cause scattered thundershowers over Western Transvaal, Northern Cape and the eastern half of Botswana.

AFLEIDING As gevolg van die sterk hoëdrukstelsel suid van die vasteland sal die invloei van koue, vogtige lug oor Noord-Natal en Transvaal voortduur en verdere reën sal oor hierdie gebiede voorkom. Die V-trog oor Botswana sal verspreide donderbuie veroorsaak oor Wes-Transvaal, Noord-Kaapland en die oostelike helfte van Botswana.

INFERENCE The high south of Durban is moving slowly eastwards and therefore gradual clearance will take place over Natal and Transvaal. Warm moist air is circulating around the low over northern S.W.A. and therefore scattered showers will occur over the central and northern areas of S.W.A. and Botswana.

AFLEIDING Die hoog suid van Durban beweeg stadig ooswaarts en dus sal geleidelike opklaring plaasvind oor Natal en Transvaal. Warm vogtige lug sirkuleer rondom die laag oor noordelike S.W.A. en dus sal verspreide buie voorkom oor die noordelike en sentrale gebiede van S.W.A. en Botswana.

INFERENCE

The cold front south of the continent is advancing northwards and will cause cool, cloudy weather with rain over the southern and eastern coastal regions. Over the remainder of the Republic it will be mainly fine, but scattered showers will occur over the northern areas of S.W.A. and Botswana.

AFLEIDING

Die koufront suid van die land sal noordwaarts beweeg en koel, bewolkte weer met reën veroorsaak oor die suid- en oskusstreke. Oor die res van die Republiek sal dit hoofsaaklik mooiweer wees, maar verspreide buie sal oor die noordelike dele van S.W.A en Botswana voorkom.

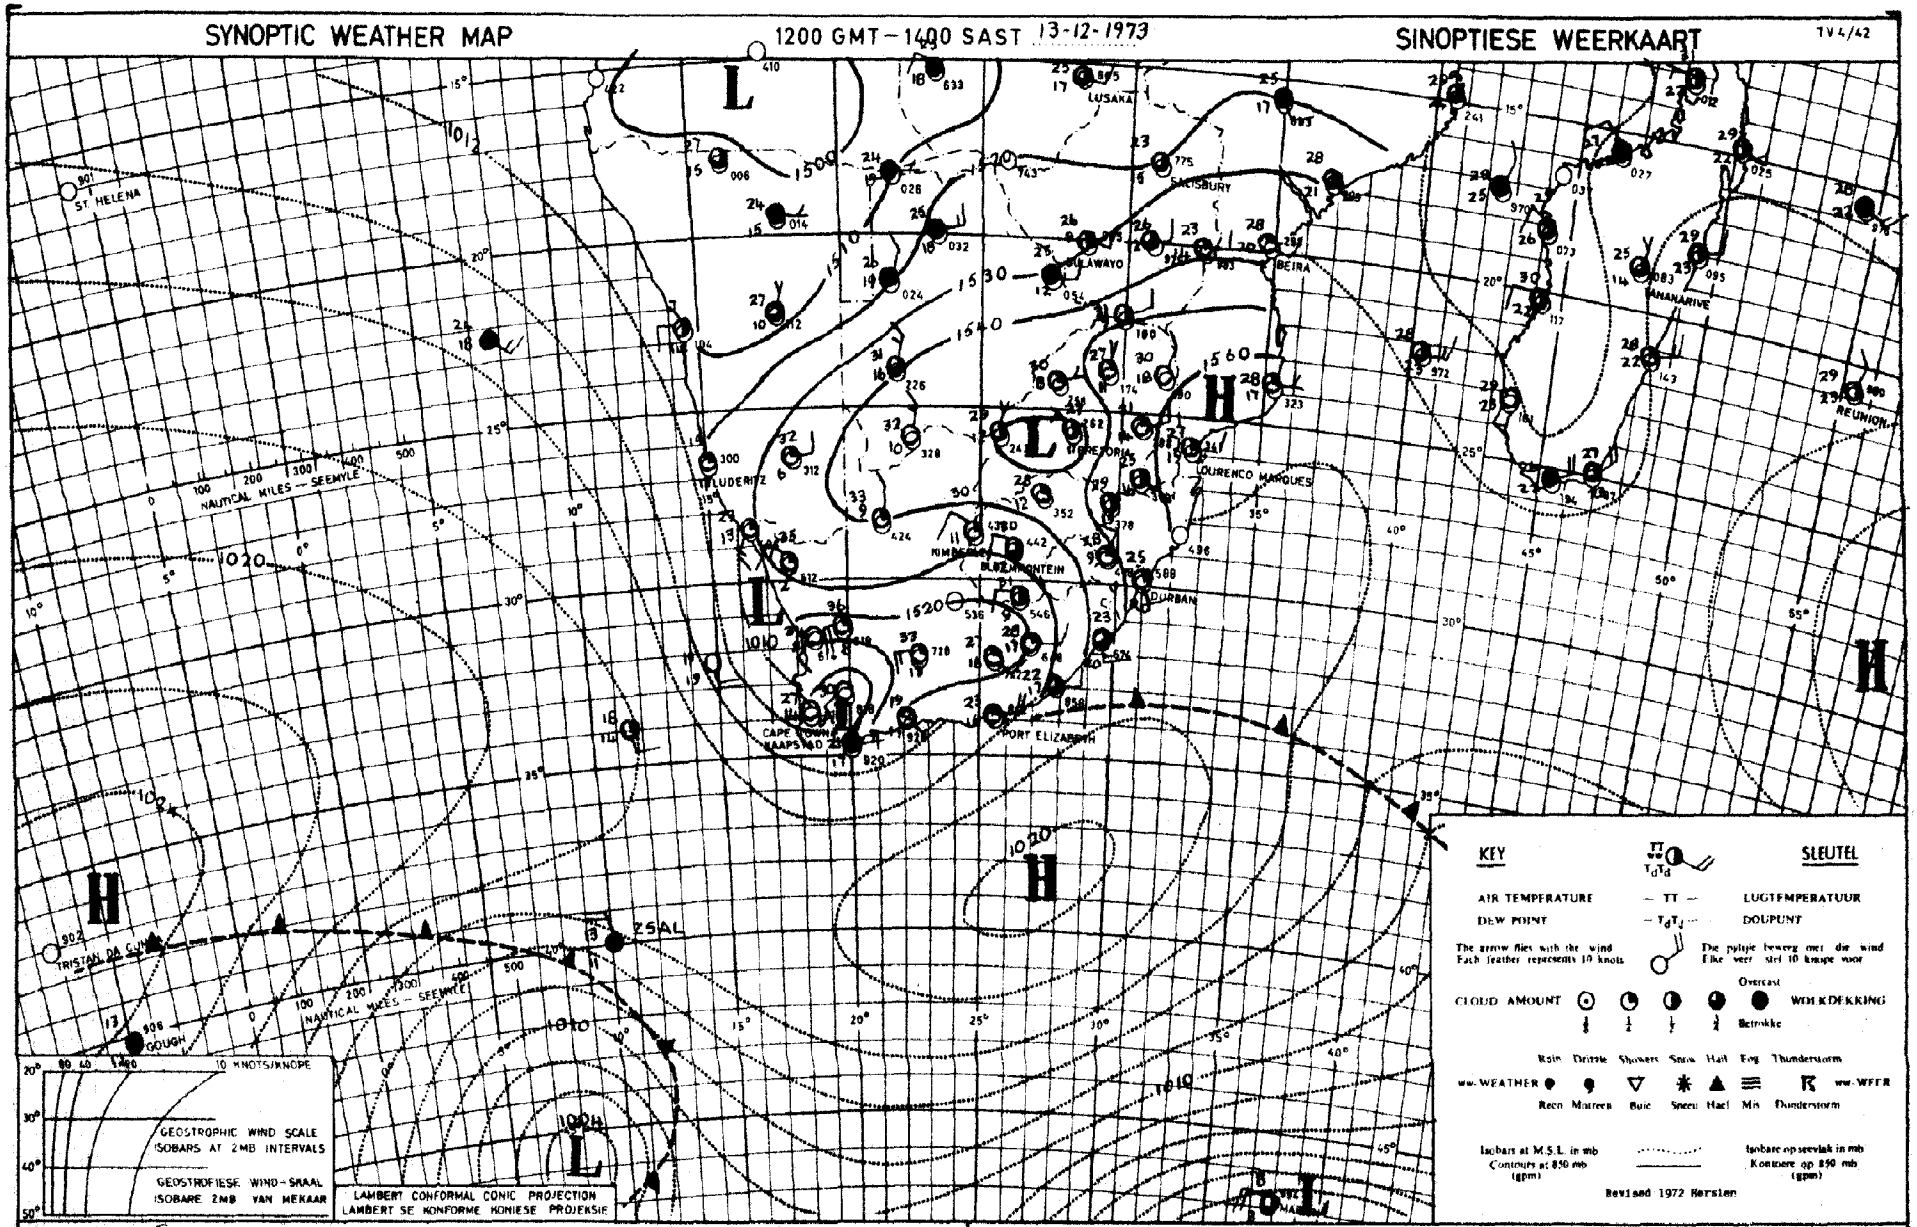
SYNOPTIC WEATHER MAP 1200 GMT – 1400 SAST 13-12-1973 SINOPTIESE WEERKAART TV4/42



INFERENCE Scattered showers will occur over the northern areas of S W A and Botswana as a result of the low over southern Angola. The upper circulation over the Republic is mainly anticyclonic and therefore the surface low over the southern interior will cause isolated, light showers only. The cold front near the weather ship ZSAL will reach the south coast tomorrow, accompanied by light rain.

AFLEIDING Verspreide buie sal oor die noordelike gebiede van S.W.A. en Botswana voorkom as gevolg van die laag oor Suid-Angola. Die bolugstroming oor die Republiek is hoofsaaklik antisiklonaal en die laag oor die suidelike binneland sal slegs enkele ligte buie veroorsaak. Die koufront by die weerskip ZSAL sal more die suidkus bereik en ligte reen teweegbring.

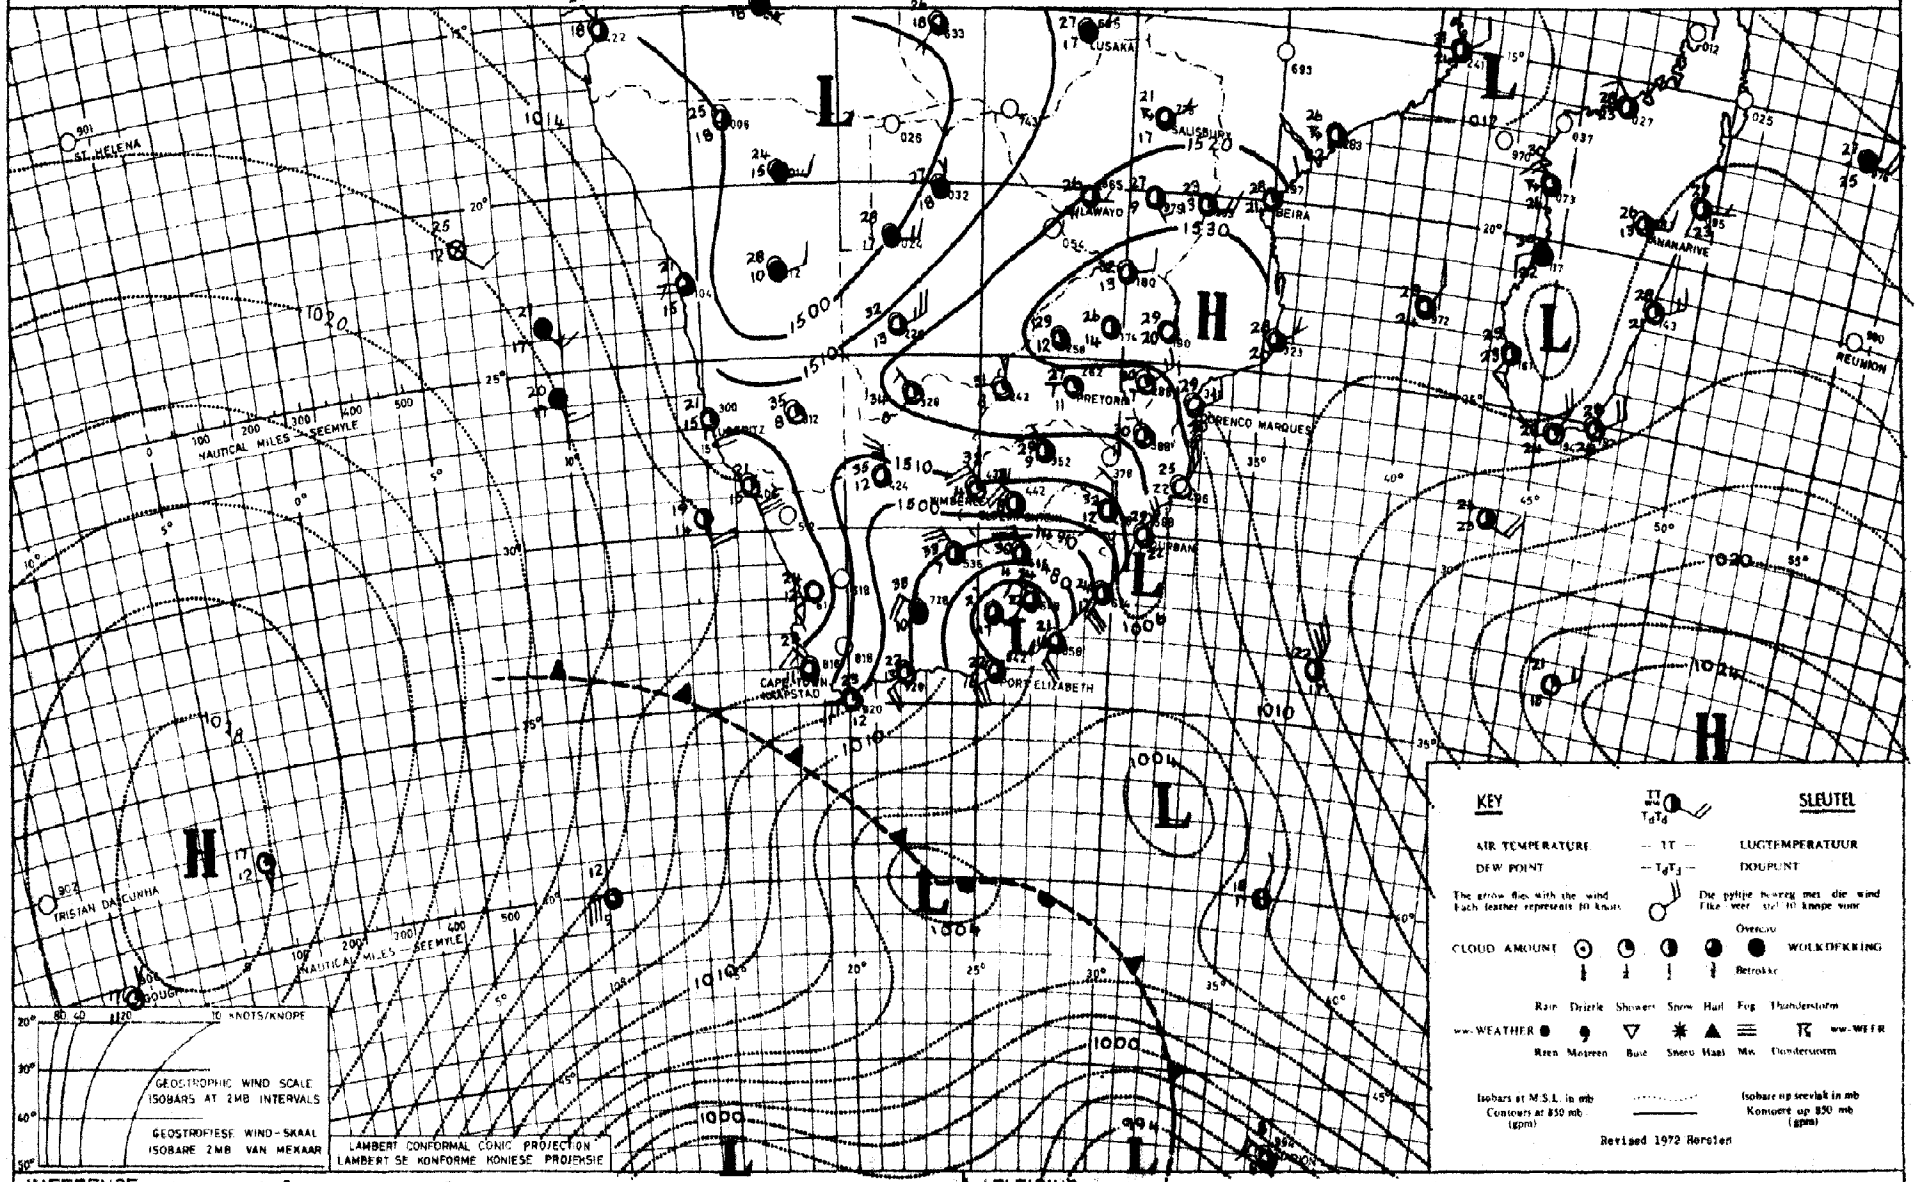
SYNOPTIC WEATHER MAP 1200 GMT – 1400 SAST 14-12-1973. SINOPTIESE WEERKAART TV 4/42



INFERENCE The cold front west of Cape Town will advance along the eastern and southern coastal regions, accompanied by cooler, cloudy weather with light showers. Over the rest of the Republic the air is relatively dry and isolated thundershowers are expected over the north-eastern areas only. The low over northern S.W.A. will cause scattered showers over this region.

AFLEIDING Die koufront wes van Kaapstad sal koeler, bewolkte weer met ligte buie laat uitbrei oor die suidelike en oostelike kusgebiede. Oor die res van die land is lug betreklik droog en slegs entele donderbuie word oor die noordoostelike gebiede verwag. Die laag oor noordelike S.W.A. sal verspreide donderbuie veroorsaak oor die gebied.

INFERENCE

Pressures have risen rapidly behind the cold front near Durban and therefore cool, cloudy weather with light rain will advance also over Transvaal and North-eastern O.F.S. The V-trough over the interior will be intensified so that scattered thundershowers will occur tomorrow afternoon over these areas.

AFLEIDING

Die lugdruk het vinnig gestyg agter die koufront by Durban en dus sal koeler, bewolkte weer met ligte reën ook oor Transvaal en die Noordoos-Vrystaat uitbrei. Die V-trog oor die binneland sal daardeur versterk word sodat verspreide donderbuie moremiddag oor hierdie gebiede sal uitsak.

INFERENCE *The trough of low pressure over the central interior and the inflow of cooler air from the east have established conditions which are very favourable for rain and thundershowers over the eastern parts of the country.*

AFLEIDING *Die trog van lae druk oor die sentrale binneland en instroming van koeler lug uit die ooste skep oor die oostelike dele van die land toestande wat uiters gunstig is vir reën en donderbuie.*

Revised 1972 Hersien

INFERENCE

Scattered thundershowers will still occur over the areas east of the low pressure trough extending from northern S.W.A. towards the Free State, but over the western regions of the Republic, little change is expected.

AFLEIDING

Verspreide donderbuie sal nog voorkom oor die gebiede oos van die laedruktrog wat vanaf noordelike S.W.A. deurstrek na die Vrystaat, maar oor die westelike dele van die Republiek word min verandering verwag.

INFERENCE

There are several low pressure systems over the interior and moist air is flowing in from the north over Botswana, Transvaal, Northern Cape, the Free State and Natal, so that fairly general rain will occur over these regions, while local thundershowers will fall also over S.W.A. and the northern Karoo.

AFLEIDING

Daar is verskeie laedrukstelsels oor die binneland aanwesig en vogtige lug stroom uit die noorde in oor Botswana, Transvaal, Natal, die Vrystaat en Noord-Kaapland, sodat taamlik algemene buie oor hierdie gebiede verwag kan word, terwyl los donderbuie ook oor S.W.A. en die noordelike Karoo sal uitsak.

INFERENCE *The low pressure system over Botswana is persisting and therefore further rain and thundershowers will occur over this country as well as the Transvaal, Free State, Northern Cape and Natal. The weak cold front south of the continent will bring cool, cloudy weather with light rain over the south and east coast regions.*

AFLEIDING *Die laedrukstelsel oor Botswana hou nog stand en dus sal verdere reën- en donderbuie voorkom oor dié gebied asook oor Transvaal, die Vrystaat, Noord- Kaapland en Natal. Die swak kouefront suid van die land sal koel, bewolkte weer met ligte reën veroorsaak oor die suid- en ooskusstreke.*

INFERENCE The low over Northern Botswana is slowly moving eastwards so that further rain will occur over Northern Transvaal and Rhodesia. A seperate upper air low is situated over North Western Cape, causing scattered showers over this region which will spread to the Karoo, Northern and Eastern Cape and Southern O F S later.

AFLEIDING Die laag oor Noord Botswana beweeg stadig ooswaarts sodat verdere reën oor Noord-Transvaal en Rhodesië sal voorkom. 'n Aparte boluglaedrukstelsel is oor Noordwes-Kaap aanwesig en sal verspreide buie oor dié gebied veroorsaak wat later ook oor die Karoo, Noord-en Oos-Kaap en die Suid-Vrystaat sal uitbrei.

INFERENCE The surface and upper-air low pressure system causing rain over most of the Cape Province, is moving eastwards so that the rain belt will advance over the entire Free State, Western Transvaal and Southern Natal.

AFLEIDING Die oppervlakte- en boulaagdrukstelsel wat reën oor die meeste dele van Kaapland veroorsaak, beweeg verder oostwaarts sodat reën sal uitbrei oor die hele Vrystaat, Wes-Transvaal en Suid-Natal.

INFERENCE There are indications that the surface and upper-air trough will now shift eastwards and consequently rainy weather will spread to the Transvaal, but it will clear over the central and western parts

AFLEIDING Daar is aanduidings dat die trog van lae druk, beide in die bolug en aan die oppervlakte nou ooswaarts gaan beweeg en daarmee sal reënweer na Transvaal uitbrei, maar oor die sentrale en westelike binneland sal dit ooptrek.

INFERENCE

The low pressure trough extending from Rhodesia to Western Transvaal will cause further thundershowers over Transvaal, Natal and the North-eastern Free State but over the rest of the Republic it will be fine or only partly cloudy.

AFLEIDING

Die laedrukfrog wat vanaf Rhodesië deurstrek na Wes-Transvaal sal verdere donderbuie veroorsaak oor Transvaal, Natal en Noordoos-Vrystaat maar oor die res van die Republiek sal dit mooiweer of net gedeeltelik bewolk wees.

INFERENCE

Little change is expected in the prevailing conditions and scattered thundershowers will recur over the eastern parts of the Republic. The cold front in the south-west will reach the south coast later tomorrow with a possibility of light rain.

AFLEIDING

Min verandering in die heersende toestande word verwag en verspreide donderbuie sal nog voorkom oor die oostelike dele van die Republiek. Die koufront in die suidweste sal later more die suidkus bereik met 'n moontlikheid van ligte reën.

INFERENCE

The ridge of high pressure following the cold front will cause cool cloudy weather to spread from the Eastern Cape to Natal, the Transvaal and the North-eastern Free State. Over these areas there will be isolated thundershowers as they lie east of the interior trough.

AFLEIDING

Die rug van hoë druk wat op die koufront volg sal koel bewolkte toestande van Oos-Kaap na Natal, Transvaal en Noordoos-Vrystaat laat uitbrei. Los donderbuie sal in die namiddag oor hierdie dele wat oos van die binnelandse trog geleë is, voorkom.

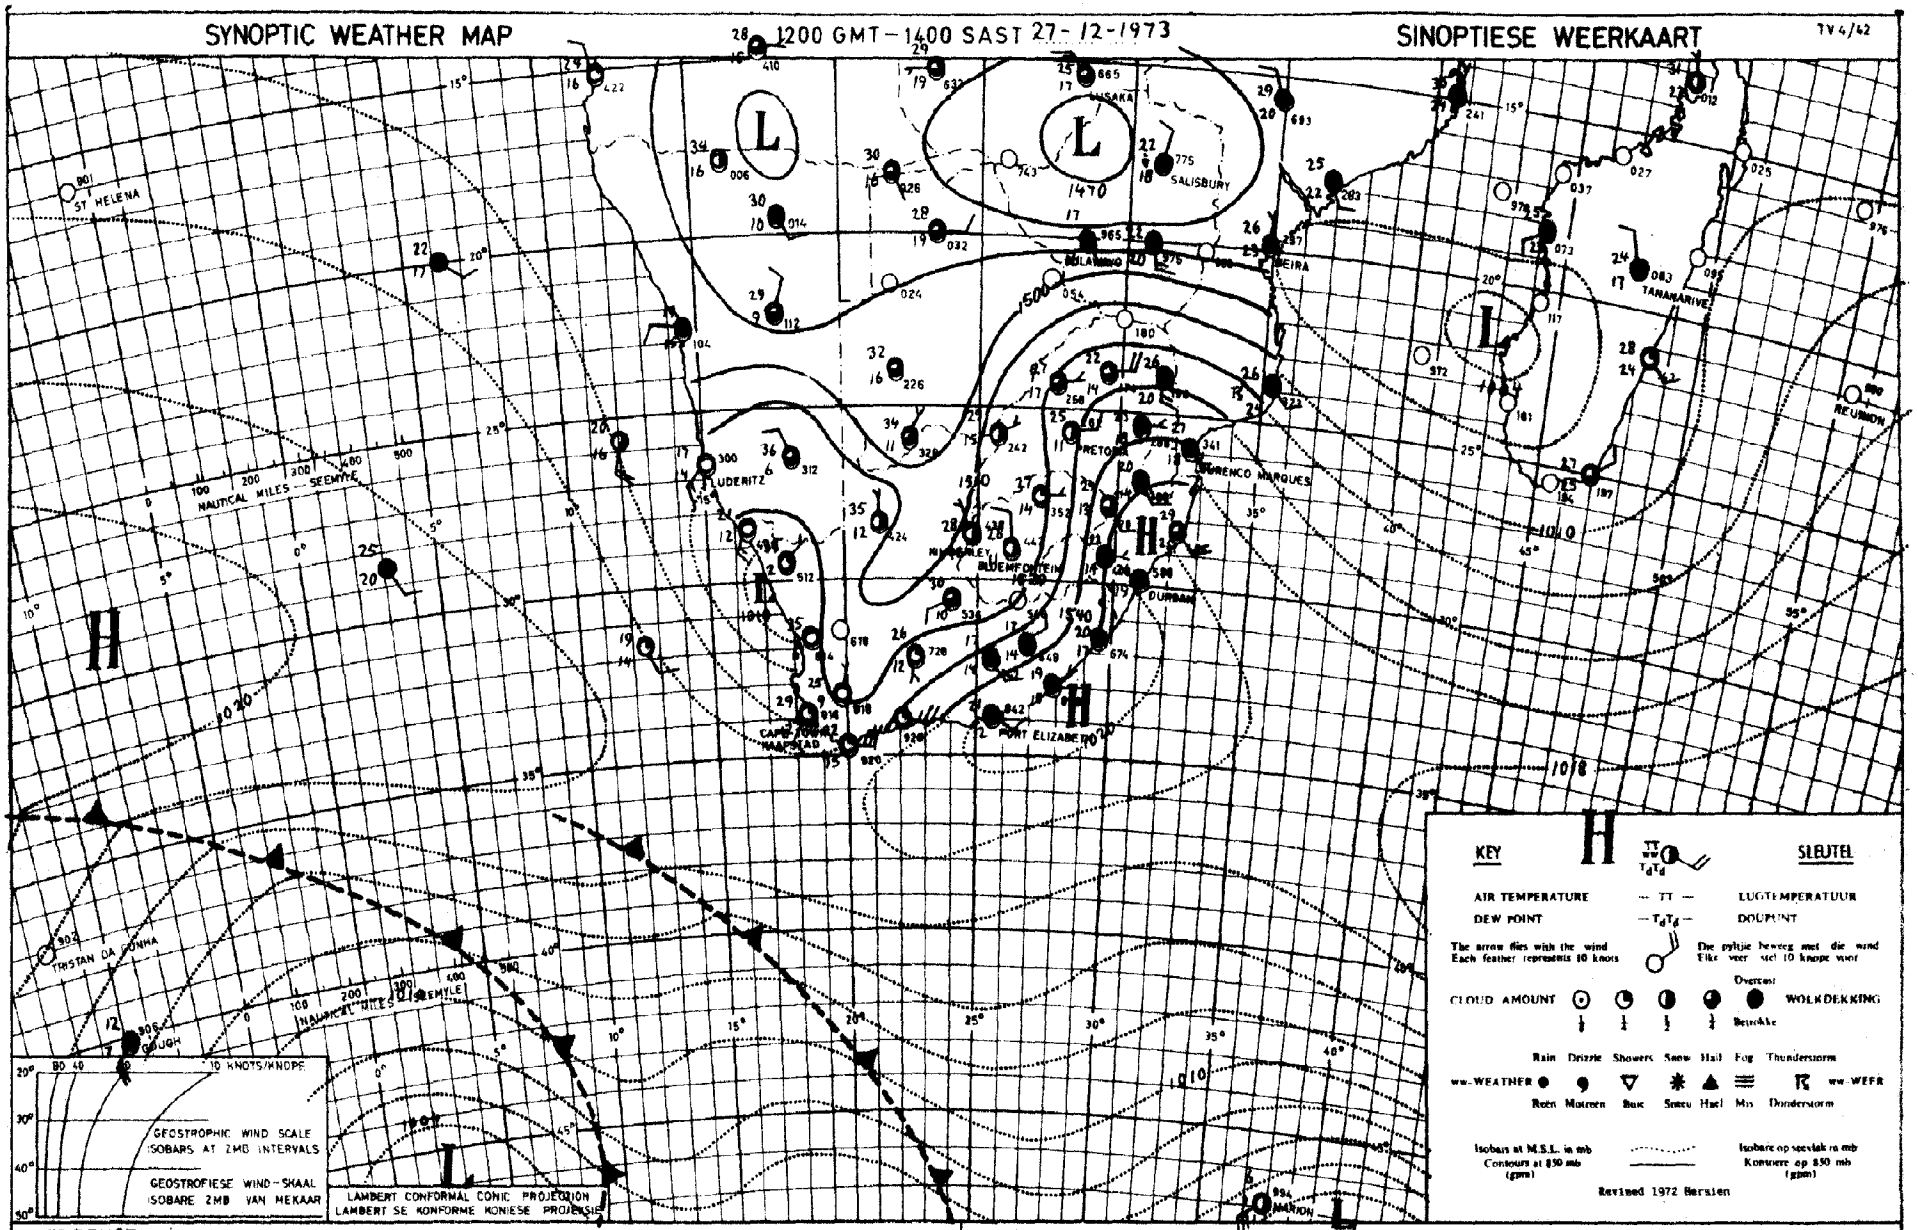
Kanye			4,0



INFERENCE *The low over Rhodesia will cause further rain over that country as well as over the adjacent areas of Botswana and Transvaal but over the rest of the Republic the circulation has become mainly anticyclonic and therefore only isolated thundershowers will occur over the Transvaal, O.F.S. and Northern Cape.*

AFLEIDING *Die laag oor Rhodesië sal verdere reën oor dié land en aangrensende gebiede van Transvaal en Botswana veroorsaak maar oor die res van die Republiek het die sirkulasie nou antisiklonaal geword en dus sal net enkele donderbuie nog voorkom oor Transvaal, O.V.S. en Noord-Kaapland.*

INFERENCE *There are weak low pressure troughs over S.W.A. and Southern Cape so that isolated thundershowers may be expected over S.W.A, Botswana, Northern and Eastern Cape, the Upper Karoo and the Free State. The upper-air circulation over Transvaal has, however, become intensely anticyclonic and little precipitation is expected over this province and Natal.*

AFLEIDING *Daar is swak laedruktrôe oor S.W.A. en Suid-Kaapland, sodat enkele donderbuie verwag kan word oor S.W.A., Botswana, Noord- en Oos-Kaapland, die Bo-Karoo en die Vrystaat. Die bolugsirkulasie oor Transvaal het egter sterk antisiklonaal geword en min neerslag word oor die provinsie en Natal verwag.*

INFERENCE

Scattered thundershowers will still occur over the areas east of the low pressure trough extending from S.W.A. towards Southern Cape but over Natal and Transvaal the circulation is anticyclonic and there will be little change. The cold front west of the continent will cause cool, cloudy weather with light showers over the south coastal regions tomorrow.

AFLEIDING

Verspreide donderbuie sal nog voorkom oor die gebiede oos van die laedruktrog wat vanaf S.W.A. deurstrek na Suid-Kaapland maar oor Transvaal en Natal is die sirkulasie antisiklonaal en sal daar min verandering wees. Die koufront wes van die land sal môre koel, bewolkte weer met ligte buie oor die suidkusstreke veroorsaak.

INFERENCE

A ridge of high pressure will move in behind the cold front south of the continent, causing an intensification of the low pressure trough over the central interior and consequantly scattered thundershowers will again occur tomorrow over Transvaal, O.F.S., Natal and Northern Cape. Cloudy weather with rain will also spread over the east coast regions.

AFLEIDING

'n Rug van hoë druk sal agter die koufront suid van die land inbeweeg en sodoende die laedruktroq oor die sentrale binneland laat verskerp sodat verspreide donderbuie môre weer oor Transvaal, Vrystaat, Natal en Noord-Kaapland sal uitsak. Koeler, bewolkte weer met ligte reën sal ook oor die ooskusstreke uitbrei.
