CORRECTION NOTICE

Vol. 101, No. 2, Feb. 1973.

Page 163, right col., third text line: read $g_1(=m_3/m_2^{3/2})$ and $g_2[=(m_4/m_2^2)-3]$.

Page 165, left col.: the equation following eq (8) should read $\psi(\hat{g})=\frac{\partial \ln \Gamma(\hat{g})}{\partial \hat{g}}=$ di-gamma function.

Page 170, table 6: read as shown, corrected values are underlined.

TABLE 6.—*Parameters of gamma distribution fitted to monthly rainfall and their variance*
