On the 1st at 11.55a. The barometer has risen moderately over the E. coast of China, fallen slightly over the S. coast and the Philippines.

The low pressure area lying over N. China yesterday, appears to have moved away to the Eastward.

Pressure is highest over Central China.

The monsoon, at present interrupted in the Formosa Channel, will probably again set in there during the next 24 hours. Moderate monsoon over the N. part of the China Sea.

Forecast:— NE. or N. winds, light at first, freshening later; fine.

F. G. FIGG.

On the 6th at 11.55a. The barometer has risen generally except over the S. Philippines.
The anticyclone, which is central over China, covers also W. Japan and the Loochoos.
Pressure is relatively low to the NE. of Japan, and over the S. part of the China Sea.
Gradients continue moderate to rather steep with very strong monsoon along the China coast and over the China Sea.
Forecast:— fresh NE. winds; fair.

F. G. FIGG.

On the 7th at 11.50a. The barometer continues to rise over Japan, and has commenced to fall over N. China.

The anticyclone still covers China and the greater part of Japan.

Gradients are decreasing, and the monsoon will moderate in the Formosa Channel and N. part of the China Sea, but continue to blow strongly over the middle and S. parts of the China Sea.

Forecast:— fresh to moderate NE. winds; fair.

On the 11th at 11.20a. The barometer has risen over Japan, fallen again over N. China.
The high pressure area is central now between the E. coast of China and W. Japan.
Gradients decreasing with the monsoon moderating in the Formosa Channel, but remaining rather steep with strong monsoon over the China Sea.
Forecast — moderate NE. winds; fine.

F. G. FIGG.
Acting Director

On the 17th at 11 5a. The barometer has fallen over E. Japan, risen over N. China.
The high pressure area still lies over N. China, and pressure is relatively low to the NE. of Japan and also over the S part of the China Sea.
Gradients are rather steep with very strong monsoon in the Formosa Channel and over the N. part of the China Sea.
Forecast:— strong NE. breezes; cloudy, some rain; decreasing temperature.

F. G. FIGG.
Acting Director

On the 21st at 11.35a. The barometer has fallen much over E. Japan, risen over W. Japan and the coast of China.

A depression is moving into the Pacific to the NE. of Japan, and the high pressure area is still lying over Central China.

Gradients moderate with strong monsoon in the Formosa Channel, rather steep with heavy monsoon over the China Sea.

Forecast:— moderate N. winds; fine.

On the 22nd at 11.30a. The barometer has risen over E. Japan and N. China.

The depression is passing slowly away over the Pacific to the N.E. of Japan, and the anticyclone still covers China, the highest pressure lying over N. China.

Gradients continue moderate to rather steep, with strong monsoon in the Formosa Channel and heavy monsoon over the China Sea.

Forecast:— fresh NE. winds; fine.

F. G. FIGG.
Acting Director.

On the 25th at 11.35a. The barometer has risen over China, particularly in the North.
The anticyclone still covers China and the greater part of Japan, the central area apparently lying over N. China. Pressure is relatively low over NE. Japan and the S. part of the China Sea.
Gradients rather steep generally with and heavy monsoon in the Formosa Channel and over the China Sea.
Forecast:— fresh or strong NE. breezes; fine, colder.

On the 26th at 11.30a. The barometer has risen over Japan, fallen in N. China.
The anticyclone is moving Eastwards, the central area now lying between N. China and the Sea of Japan.
Gradients are decreasing on the China coast and the monsoon is likely to moderate in the Formosa Channel.
Steep gradients with heavy monsoon over the China Sea.
Forecast:— fresh NE. winds; fair.

On the 27th at 11.40a. The barometer has risen over E. Japan, fallen elsewhere, particularly over China and the Loochoos.

The anticyclone continues moving Eastwards and is now central over SE. Japan.

Gradients slight to moderate with fresh monsoon in the Formosa Channel, and strong monsoon over the China Sea.

Forecast:— moderate NE. winds; fair.

F. G. FIGG.
Acting Director

On the 28th at 11 40a. The barometer has fallen over Japan, risen along the China coast.

A high pressure area lies over N. China, and pressure is relatively low to the NE. of Japan and over the S. part of the China Sea.

Gradients moderate with strong monsoon in the Formosa Channel and the China Sea.

Forecast:— fresh NE. winds; fine.

On the 31st at 11.55a. The barometer has risen over China, fallen over E. Japan and the Philippines. A high pressure area lies over N. China and the shallow area of low pressure is now situated over SE. Japan. Pressure is also in considerable defect over the Philippine Archipelago, owing probably to the existence of a low area in the neighbourhood of Mindanao.

Gradients moderate to rather steep with very strong monsoon in the Formosa Channel and over the China Sea.

Forecast:— fresh NE. winds; fair.

On the 1st at 12.5p. The barometer has risen over Japan, S. China and the Philippines.
The high pressure area has moved Eastwards and is central over the Yellow Sea.
Pressure is probably low in the China Sea to the Westward of the Philippine Archipelago.
Gradients moderate with strong monsoon in the Formosa Channel, rather steep with hard monsoon over the N. part of the China Sea.
Forecast:— fresh NE. winds; fine.

On the 7th at noon. Barometric changes are slight.

A high pressure area lies over N. China and gradients continue moderate with fresh to strong monsoon in the Formosa Channel and over the N. part of the China Sea.

Forecast:— moderate to fresh NE. winds; fair.

On the 8th at 11.45a. The barometer has fallen generally, except over S. China.
A depression appears to be moving Eastwards over the Sea of Japan, and pressure is also low over the Pacific between Luzon and the Loochoos.
A high pressure area lies over central China.
Gradients are rather steep with very strong monsoon in the Formosa Channel and China Sea.
Forecast:— fresh N. winds; fine.

On the 9th at noon. The barometer has risen over Formosa, and is little changed elsewhere. Pressure is probably highest over Central China, and gradients are slight to moderate with fresh monsoon in the Formosa Channel and strong monsoon over the China Sea.

Forecast:— moderate NE. winds; fine.

Observations from the North not yet to hand.

F. G. FIGO.

On the 10th at noon. The barometer has fallen rapidly over N. China, risen slightly in S. China and the Philippines.

A depression moving Eastwards is passing from the continent into the Yellow Sea.

Moderate monsoon in the Formosa Channel, strong monsoon over the China Sea.

Forecast:— N. winds, moderate to fresh; fine.

On the 12th at 11.25a. Barometric changes in the South are unimportant.
The depression mentioned on the 10th was moving Eastwards in the N. part of the Sea of Japan yesterday.
Pressure is probably highest over Central China. Fresh to strong monsoon over the China Sea.
Forecast:— moderate NE. winds; fine.
Returns from the North are lacking.

F. G. FIGG.
First Assistant.

On the 13th at 11.56a. The barometer has fallen generally in South China and the Philippines and is probably highest over N. China.

The depression in the N. of Japan has probably passed into the Pacific.

There is no information this morning from the North of Hongkong.

Fresh to strong monsoon continues over the China Sea.

Forecast:—fresh NE. winds; fine.

J. I. PLUMMER.

Chief Assistant.

On the 14th at 11.55a. Barometric changes appear to be very slight.
The highest pressure would appear to be over the Yellow Sea; and the depression in the N. of Japan, referred to yesterday, is moving slowly in an Easterly direction.
Moderate to fresh monsoon continues over the China Sea.
Forecast:— moderate NE. winds; fine.
There is still very meagre information from the North.

J. I. PLUMMER.

On the 14th at 11.55a. The barometer has risen generally particularly in the interior of China, where the pressure is now highest.

Th depression in Northern Japan has disapperared into the Pacific.

Gradients are rather steep on the China coast and fresh monsoon may be expected in the Formosa Channel and the North part of the China Sea.

Forecast:— Fresh NE. to E. winds; fair.

The information received is still very meagre.

On the 18th at 11.45a. The barometer has fallen upon the China Coast and risen slightly in the Philippines.

Gradients are rather steep on the China Coast and the anticyclone still exists in the Yangtse valley.

Strong monsoon will prevail in the Formosa Channel and the north part of the China Sea.

Forecast:— Strong NE. winds; fine.

J. I. PLUMMER.
Chief Assistant.

On the 19th at 11.42am. The barometer has fallen at all stations but more particularly in the Yangtse valley.

The monsoon is quite interrupted upon the China coast, and light winds will prevail in the Formosa Channel and the north part of the China Sea.

A depression has formed in Central China, moving Eastward.

Forecast:— light E. winds; fair.

J. I. PLUMMER.
Chief Assistant.

On the 20th at 11.40 a.m. The barometer has fallen again at all stations, and the gradients are everywhere very slight.

The greatest pressure is probably over Central Japan, and the least over the Yellow Sea.

Light variable winds will be met with in the Formosa Channel and in the China Sea.

Forecast:— Light E. winds; fair.

J. I. PLUMMER.
Chief Assistant.

On the 21st at 11.50 a.m. The barometer has risen in North China and fallen slightly in the Philippines. The depression, referred to on the 19th, appears to have become deeper, and the centre to be situated at the south western end of the Sea of Japan.

Gradients are becoming steeper on the China coast, and moderate monsoon may be expected in the Formosa Channel, and in a less degree in the China Sea.

Forecast:— Moderate NE. winds; fair.

On the 22nd at 11.38 a.m. The barometer has risen in South China and to a less extent in the Philippines.

Gradients are slight on the China Coast, and fresh monsoon may be expected in the Formosa Channel and the northern part of the China Sea.

There are indications of a new depression over North China; but the information from the North is insufficient to establish this fact.

Forecast:— Fresh NE. winds; fine.

J. I. PLUMMER.
Chief Assistant.

On the 29th at 11.50 a.m. The barometer has risen in Central China and fallen slightly in S. China.
Pressure is highest over the Yangtse valley.
Gradients are moderate on the China Coast and slight over the Pacific and China Sea.
Increasing monsoon may be expected in the Formosa Channel and variable breezes in the north part of the China Sea.
Forecast:— Light E. winds; overcast, misty.

On the 1st at 11.42 a.m. The barometer has risen in Japan and fallen in China, especially in the north. A depression has formed to the West of Shantung, which will probably move Eastward.

Gradients are very slight on the China Coast and over the Pacific and the China Sea. Light SE. breezes may be expected to prevail generally over this region.

Forecast:— Light E. to SE. winds; overcast, dull.

On the 2nd at 11.58 a.m. The barometer has fallen considerably in Japan, slightly in S. China; and risen in N. China.

The depression noted yesterday has moved Eastward into the Yellow Sea.

Gradients are slight over the Pacific and the China Sea, and light variable breezes will prevail.

Forecast:— Light variable winds; overcast, dull.

On the 3rd at 11.30 a.m. The barometer has risen in Japan and fallen slightly in the Yangtse valley, where a new depression has probably been formed.

Gradients are moderate on the China Coast and slight over the China Sea. Moderate monsoon will prevail in the Formosa Channel.

The depression in the Yellow Sea yesterday has moved Eastward into the Pacific.

Forecast:— moderate E. winds; overcast, some light rain.

On the 4th at 11.45 a.m. The barometer has risen in Japan, where pressure is now highest, and fallen at all other stations.

An extensive area of low pressure lies over the whole of China, having its centre probably in the Yangtse valley.

Gradients are slight on the China Coast and over the China Sea. Moderate SE. winds will be met with in the Formosa Channel, and S. to SW. winds in the north part of the China Sea.

Forecast:— moderate S. winds; cloudy, fair.

On the 5th at 12.2 p.m. The barometer has risen rapidly over the Yangtse valley, and fallen at all other stations.

The depression in the interior of China has now its centre further southward.

Gradients are slight at present over the Formosa Channel, but may be expected to become steeper for NE. winds later.

Forecast:— moderate S. to SW. winds; cloudy, fair.

Information from Japan and N. China is wanting.

J. I. PLUMMER.
Chief Assistant.

On the 6th at 11.30 a.m. The barometer has risen rapidly in Central China, where pressure is now highest; and fallen in northern Japan.

Gradients are very steep on the China Coast and slight over the northern part of the China Sea.

Very strong monsoon will be met with in the Formosa Channel, and fresh NE. winds in the north part of the China Sea.

Forecast:— Fresh to strong NE. winds; cloudy, fair.

On the 7th at 10.55 a.m. The barometer has risen rapidly over Japan, the Loochoos and Formosa, and a fall has commenced in the Yangtse valley, where however pressure is at present still highest. Gradients are steep on the China Coast and strong but decreasing monsoon will be met with in the Formosa Channel. In the north part of the China Sea the gradient is less marked, and fresh E. winds will prevail.

Forecast:— Fresh E. winds; overcast, dull, some light rain.

On the 11th at 11.25 a.m. The barometer has risen in North China and fallen in Southern Japan, the changes elsewhere are slight.

A depression passed yesterday across the north part of the Gulf of Pechili moving easterly and is now over Northern Corea.

Gradients are moderate on the China Coast, but becoming steeper.

Moderate to fresh monsoon will prevail in the Formosa Channel and light NE. winds in the North part of the China Sea.

Forecast:— Light E. winds; overcast, dull.

J. I. PLUMMER.
Chief Assistant.

On the 12th at 11.35 a.m. The barometer has risen slightly on the China Coast and in the Loochoos, and fallen in N.E. Japan.

Pressure is highest in North China and lowest in Mid - Japan.

The depression, noted yesterday, now lies over central Japan.

Gradients are rather steep on the China Coast and slight over the north part of the China Sea.

Strong monsoon will be met with in the Formosa Channel, and moderate NE. winds in the China Sea.

Forecast:— Fresh NE. winds; overcast, misty.

J. I. PLUMMER.
Chief Assistant.

On the 13th at 11.38 a.m. The barometer has risen generally and the highest pressure is now found in the Yangtse valley and the north of China.

The depression noted on the 11th and 12th instant has moved into the Pacific in an ESE. direction and would appear to be near the 30th parallel and south of Tokio.

Gradients are steep on the China Coast, and moderate over the China Sea. Strong monsoon will be met with in the Formosa Channel, and fresh NE. winds in the North part of the China Sea.

Forecast:— Fresh NE. winds; overcast, fair.

J. I. PLUMMER.
Chief Assistant.

On the 16th at 11.42 a.m. The barometer has risen moderately in Japan and fallen at all other stations, particularly at those in the north of China.

Gradients are moderate on the China Coast and over the China Sea. Moderate NE. winds will prevail over the whole of this area.

Forecast:— Moderate NE. winds; overcast, occasional light rain.

J. I. PLUMMER.

On the 17th at 11.25 a.m. The barometer has risen slightly in the Philippines and fallen in China and Japan.

The highest pressure is now found in Central Japan and an area of low pressure lies over the Loochoo Islands.

Gradients are very slight on the China Coast and the China Sea.

Light variable winds will be met with in the Formosa Channel and the north part of the China Sea.

Forecast:— Light variable winds; overcast, dull.

On the 18th at 11.30 a.m. The barometer has risen considerably in Central China and fallen in Southern Japan.

A depression lies to the south of Kiusiu, which appears to be moving slowly to the north east.

Gradients are rather steep on the China Coast, and strong monsoon will be met with in the Formosa Channel and fresh NE. winds in the north part of the China Sea.

Forecast:— Fresh NE. winds; overcast, some rain.

On the 19th at 11.10 a.m. The barometer has risen at nearly all stations, particularly in the Yangtse valley, but has fallen slightly in Central Japan.

The depression noted yesterday is now eastward of Kiusiu, moving towards the north east.

Gradients are steep on the China Coast and over the north part of the China Sea. Strong monsoon will be experienced in the Formosa Channel and fresh to strong N. to NE. winds in the China Sea.

Forecast — Fresh N. to NE. winds; overcast, fair.

On the 20th at 11.50 a.m. The barometer has fallen greatly in Mid-Japan, and slightly in S. China and the Philippines.

The greatest pressure is now found in Central China, but it is not likely to be maintained.

The depression noted on the 18th and 19th, still moving NE., has reached the coast of Japan in the neighbourhood of Tokio.

Gradients are rather steep on the China Coast and over the China Sea.

Fresh to strong monsoon will prevail over this area.

Forecast:— Fresh NE winds; overcast, fair

On the 21st at 11.15 a.m. The barometer has risen slightly in S. China and the Philippines and fallen in the extreme N. of Japan.

The pressure is greatest over the Yangtse valley, and is relatively low in the Philippines.

The Japanese depression has passed into the Pacific to the East of N. Japan.

Gradients are steep on the China Coast and over the China Sea.

Fresh to strong monsoon will be met with in the Formosa Channel, and strong NE. winds in the China Sea.

Forecast:— Strong NE. winds; overcast, gloomy.

J. I. PLUMMER.
Chief Assistant.

On the 23rd at 11.25 a.m. The barometer has risen in Japan and the Philippines and fallen at all Chinese stations.

Pressure is highest in SW. Japan and an area of low pressure would appear to lie over N. China.

Gradients are slight on the China Coast and over the China Sea.

Moderate NE. winds will prevail in the Formosa Channel and moderate E. to NE. winds in the north part of the China Sea.

Forecast:— Moderate E. winds; overcast, fair.

On the 24th at 11.8 a.m. The barometer has risen in N. China and fallen at all other stations, particularly at those in SW. Japan.

The depression referred to yesterday has moved in a SE. direction and is now approaching the coast of Kiusiu.

Gradients are very slight on the China Coast and over the China Sea. Light variable winds, and foggy weather will prevail in the Formosa Channel and light E. winds in the north part of the China Sea.

Forecast:— Light E. winds; overcast, misty.

On the 26th at 11.40 a.m. The barometer has risen in Japan and fallen throughout Central and Southern China.

The greatest pressure lies over Northern China and a depression exists in the extreme N. of Japan. Gradients are very slight upon the China Coast and over the China Sea and light variable winds will be experienced over the whole of this area.

Forecast:— Light variable winds; cloudy, fine.

J. I. PLUMMER.
Chief Assistant.

On the 6th at 11.50 a.m. The barometer has risen in China and SW. Japan and fallen in NE. Japan. Pressure is highest over the Yellow Sea and relatively low in the Philippines. The depression in the Pacific is still indicated to the south east of Tokio.

Gradients are moderate on the China Coast and slight over the China Sea. Moderate to fresh NE. monsoon will be met with in the Formosa Channel and the northern part of the China Sea.

Forecast:— Fresh E. winds; overcast, light rain.

J. I. PLUMMER.
Chief Assistant

On the 7th at 10.55 a.m. The barometer has risen in Japan and fallen at all other stations, but more particularly in the Yangtse valley.

A new depression exists to the south west of Shantung moving Eastward.

Gradients are slight on the China Coast and the monsoon is for the present interrupted. Light variable winds will prevail in the Formosa Channel and the northern part of the China Sea.

Forecast:— *Light variable breezes; overcast, misty.*

On the 8th at 11.15 a.m. The barometer has risen in NE. Japan, and fallen at all other places, particularly at those in N. China.

The depression mentioned yesterday is now over Shantung, moving towards ENE.

Gradients over Southern China and the China Sea are very slight, and light westerly winds may be expected in the Formosa Channel and light variable winds in theChina Sea.

Forecast:— Light S. winds; cloudy, misty.

J. I. PLUMMER.

On the 11th at 11.30 a.m. The barometer has risen in Japan and also in S. China and the Philippines has fallen in Central China where a depression probably exists.

The high pressure has moved eastward, and is now over S. Japan.

Gradients are very slight on the China Coast, and light E. to SE. winds will prevail in the Formosa Channel and the North part of the China Sea.

Forecast:— Light E winds; fine, mist or fog later.

J. I. PLUMMER.
Chief Assistant.

On the 16th at 11.30 a.m. The barometer has risen in N. China and fallen in S. China. In the Philippines it is stationary.

The greatest pressure would appear to lie over Manchuria, while pressure is relatively low in the western part of the China Sea.

Gradients are slight on the China Coast, and light E. winds may be expected in the Formosa Channel.

Light E. to SE. winds in the northern part of the China Sea.

Forecast:— Light E. to SE. winds; fine.

J. I. PLUMMER.

On the 21st at 11.45 a.m. The barometer has risen in Japan; and also, but very slightly, in China.
The greatest pressure is found in Central China and the least in the Southern Philippines.
Gradients are moderate on the China Coast, and moderate NE. monsoon will prevail in the Formosa Channel and moderate E. winds in the northern part of the China Sea.
Forecast:— Moderate E. winds; overcast, misty.

J. I. PLUMMER.
Chief Assistant.

On the 22nd at 11.30 a.m. The barometer has risen in Japan, where the greatest pressure is now found, and fallen in China.

A depression has been formed in Northern China, and for the present the monsoon is interrupted upon the China Coast.

Light variable winds will be met with in the Formosa Channel, and light E. to SE. winds will prevail in the northern part of the China Sea.

Forecast:— Light E. winds; overcast, dull.

J. I. PLUMMER.
Chief Assistant.

On the 23rd at 11.15 a.m. The barometer has risen in NE Japan, and fallen at all other stations.
The depression noted yesterday has passed into the Yellow Sea moving in an ESE direction.
Gradients are very slight on the China Coast and over the northern part of the China Sea. Light variable winds will prevail over the whole of this region.
Forecast:— Moderate E. to SE. winds; cloudy, fair.

J. I. PLUMMER.
Chief Assistant.

On the 24th at 0.15 p.m. The barometer has risen slightly in the extreme north and fallen generally elsewhere but more particularly in the Yangtse Valley.
The greatest pressure is in N. Japan, and the least in the Philippines.
Gradients are slight upon the China Coast, and light variable winds will prevail in the Formosa Channel.
They are rather more marked in the northern part of the China Sea, and moderate to fresh E. winds will be met with in this region.
Forecast:— Moderate E. winds; cloudy, fair.

On the 26th at 11.30 a.m. The barometer has risen in China and the Philippines, and fallen greatly in the NE. of Japan, where there exists at present a well marked depression, which appears to have come from the northeast.

Gradients are moderate on the China Coast, but are increasing, and fresh N. to NE. winds may be expected in the Formosa Channel.

Over the northern part of the China Sea they are slight and light variable winds may be expected there.

Forecast:— Light N. to NE. winds; fine.

On the 27th at 11.15 a.m. The barometer has risen at all stations but more particularly in Japan. The greatest pressure is now found in the Yangtse valley and the least in the Philippines.

Gradients are moderate on the China Coast and rather less pronounced in the northern part of the China Sea. Moderate to fresh NE. winds will be experienced in the Formosa Channel and moderate E. to NE. winds in the China Sea.

Forecast:— Moderate E. to NE. winds, overcast, misty.

On the 28th at 11.45 a.m. The barometer has risen in Japan and fallen slightly in China and the Philippines. Gradients are slight on the China Coast and light E. winds will be met with in the Formosa Channel. Over the northern part of the China Sea, gradients are moderate, and moderate E. to SE. winds will prevail.

Forecast:— Moderate E. winds, overcast, fair.

On the 30th at 11.15 a.m. The barometer has fallen at all stations, but more particularly in the extreme north of Japan, where a depression has been formed. It is also low in the Yangtse valley, and a shallow depression appears to occupy this area.

Gradients are very slight on the China Coast, and the NE. monsoon is entirely interrupted. Light SW. winds may be expected in the Formosa Channel, and light E. to NE. winds in the northern part of the China Sea.

Forecast:— Light E. winds; fine.

J. I. PLUMMER.
Chief Assistant.

On the 2nd at 11 a.m. The barometer has risen in the Yangtse valley and in NE. Japan, and fallen over the Pacific to the Eastward of the Loochoos. Elsewhere changes are trivial.
The greatest pressure is in the Yangtse Valley and the least over the Pacific.
Gradients are moderate upon the China Coast, and moderate NE. winds will be met with in the Formosa Channel, and moderate E. winds in the Northern part of the China Sea.
Forecast:— Moderate E. winds; fine.

On the 3rd at 11.40 a.m. The barometer has risen in Japan, and in the neighbourhood of the Loochoos, and has fallen in the Philippines and in N. China.

The greatest pressure is in the Eastern Sea, northward of Formosa, and the least in the Philippines.

Gradients are moderate on the China Coast, and rather more steep in the Northern part of the China Sea.

Light variable winds will be met with in the Formosa Channel, and moderate to fresh E. winds in the China Sea.

Forecast:— fresh E. winds; cloudy, fine.

On the 4th at 11.25 a.m. The barometer has risen in NE. Japan, and very slightly in the Southern Philippines, and fallen at all other stations.

The greatest pressure is probably over the Pacific, east of Formosa, and the least in the western part of the China Sea.

Gradients are very slight on the China Coast, and light SW. winds may be expected in the Formosa Channel, and moderate SE. winds in the China Sea.

Forecast:— Moderate SE. to S. winds; cloudy, fine.

On the 7th at 11.48 a.m. The barometer has risen at all stations but more particularly in N. Japan, where the depression which existed yesterday has moved into the Pacific.

The greatest pressure is now found near the estuary of the Yangtse, and a large anticyclonic area covers nearly the whole of China and the Eastern Sea.

Gradients remain rather steep on the China Coast, and fresh NE. winds will prevail in the Formosa Channel and northern part of the China Sea.

Forecast:— Fresh E. winds; overcast, some light rain.

J. I. PLUMMER.
Chief Assistant.

On the 8th at 11.15 a.m. The barometer has risen at nearly all stations, but in S. China it has been practically stationary.

The greatest pressure is still found near the estuary of the Yangtse and the least in the China Sea.

Gradients are still rather steep upon the China Coast, and fresh NE. to E. winds may be expected in the Formosa Channel, and moderate E. winds in the northern part of the China Sea.

Forecast:— Moderate E. winds; cloudy, fair.

On the 9th at 11.20 a.m. The barometer has fallen at nearly all stations, but more particularly in the Yangtse valley.

The anticyclonic area has moved eastward, and its centre is now near the Loochoo Islands, and a depression has appeared to the westward of Shantung.

Gradients are slight on the China Coast, and moderate E. winds will prevail in the Formosa Channel, and fresh E. winds in the northern part of the China Sea.

Forecast:— Fresh E. winds; cloudy, fair.

On the 10th at 11.55 a.m. The barometer has again fallen generally but most rapidly in Mid-China. The depression, noted yesterday, has moved in an ESE direction, and is now South of Shantung.

The greatest pressure is now over the Pacific, eastward of the Loochoos and the least in the Southern Philippines.

Gradients are slight on the China Coast, and light variable winds will prevail in the Formosa Channel and the northern part of the China Sea.

Forecast:—Light E. winds; cloudy, fair.

On the 11th at 11.25 a.m. The barometer has risen in the north of China and fallen elsewhere, particularly near the estuary of the Yangtse.

The depression, first noted on the 9th, has moved in a SE. direction, the centre being now to the westward of Kinsin.

Gradients are moderate on the China Coast, and moderate SW. winds may be expected in the Formosa Channel, and light S. to SW. winds in the northern part of the China Sea.

Forecast:—Light S. winds; cloudy, fair.

J. I. PLUMMER.
Chief Assistant.

On the 12th at 11.30 a.m. The barometer has risen in North and Central China and fallen in Japan and the Loochoo Islands, elsewhere the changes are slight.

The depression, referred to on the 9th et seq. has moved Eastward and would appear to be central over the northern part of Kiusiu.

Gradients are slight on the China Coast, and light variable winds will be experienced in the Formosa Channel and the northern part of the China Sea.

Forecast:—Light S. winds; cloudy, fair.

J. I. PLUMMER.
Chief Assistant.

On the 13th at 11.40 a.m. The barometer has risen in China and Japan and fallen slightly in the Philippines.

The northern depression, still moving eastward, is now situate in the Pacific to the east of Kiusiu.

Gradients are moderate upon the China Coast, and moderate NE. winds may be expected in the Formosa Channel and moderate to light E. winds in the northern part of the China Sea.

Forecast:— Moderate E. winds, overcast, fair.

On the 14th at 11.30 a.m. The barometer has risen at nearly all stations but has fallen in Eastern Japan where the influence of the northern depression is still felt.

The greatest pressure is now found in the Yangtse valley and the least in the China Sea.

Gradients are rather steep on the China Coast and fresh NE. winds will be met with in the Formosa Channel and fresh E. winds in the northern part of the China Sea.

Forecast:— Frosh E. winds, overcast, fair.

On the 15th at 11 35 a.m. The barometer has risen in Japan and South China and fallen slightly in Central China.

A new depression is indicated to the SW of Shantung, probably moving eastward.

Gradients are moderate on the China Coast and moderate to light SE winds will prevail in the Formosa Channel and fresh E. winds in the northern part of the China Sea.

The greatest pressure is found in the Estuary of the Yangtse and the least still remains in the China Sea.

Forecast:— Fresh E. winds, cloudy, fair.

On the 16th, at 11.30 a.m. The barometer has risen slightly in NE Japan and fallen at all other places but more particularly in the Yangtse valley.

The northern depression, noted yesterday, has moved in an ESE direction and is now situate near the coast of China, southward of Shantung.

The southern trough-like depression continues in the China Sea with little or no change of place or direction.

Gradients are slight on the China Coast and light W. or SW. winds may be expected in the Formosa Channel and light E. winds in the northern part of the China Sea.

Forecast:— Light E. winds, cloudy, fine.

J. I. PLUMMER.
Chief Assistant.

On the 17th at 11.50 a.m. The barometer has risen slightly in NE Japan and fallen at all other stations. The northern depression has moved into the Yellow Sea, westward of Kiusiu, and the Southern depression would appear to become deeper.

Gradients are slight on the China Coast, and light variable winds will prevail in the Formosa Channel; over the China Sea they are more marked owing to the low pressure in the Philippines and moderate NE winds will be met with in the northern part of the China Sea.

Forecast:— Light to moderate E. winds, fine.

J. I. PLUMMER.
Chief Assistant.

On the 18th at 11.55 a.m. The barometer has risen throughout China and fallen in Japan.
The northern depression has entered the southern part of the Sea of Japan.
Owing to the entire absence of telegrams from the Philippines it is impossible to say in what direction the Southern depression has moved
Gradients are rather steep on theChina Coast, and moderate to fresh NE winds will prevail in the Formosa Channel and northern part of the China Sea.
Forecast:—moderate NE. winds, overcast, fair.

J. I. PLUMMER.
Chief Assistant.

On the 19th at 11.30 a.m. The barometer has risen in S.W. Japan and fallen in N. China. In S. China and the Philippines it is stationary.

Another depression has been formed S of Shantung, moving eastward.

Gradients are very slight on the China Coast, and light E winds will prevail in the Formosa Channel and northern part of the China Sea.

Forecast—light E. winds, fine.

On the 20th at 11.30 a.m. The barometer has risen slightly in N. Japan, and fallen in China generally but more particularly in the Yangtse valley, elsewhere the changes are unimportant.

The depression noted yesterday would not appear to be very deep and remains in nearly the same position as before.

Gradients are very slight and light variable winds will be met with in the Formosa Channel and the China Sea.

Forecast:—Light E. winds, fine.

J. I. PLUMMER.
Chief Assistant.

On the 23rd at 11.30 a.m. The barometer has risen in Japan and fallen in Mid- China. In S. China and the Philippines there is no change.

A new depression exists to the N.W. of Shanghai, moving Eastward.

Gradients are moderate on the S. Coast of China, and moderate to fresh S winds will prevail in the Formosa Channel and moderate to fresh SW winds in the China Sea.

Forecast:—Moderate S.W. winds, fine.

J. I. PLUMMER.
Chief Assistant.

On the 24th at 11.40 a.m. The barometer has risen rapidly in N. China and in N. Japan, and has fallen in S.W. Japan. Elsewhere the changes are trivial.

The depression referred to yesterday has moved rather rapidly to the ENE and the centre is now off the S. Coast of Corea.

Gradients are slight at present on the China Coast and variable winds tending to settle in the NE may be expected in the Formosa Channel and light S.W. winds in the China Sea.

Forecast:—Light S.W. winds, fine.

J. I. PLUMMER.
Chief Assistant.

On the 25th at 11.30 a.m. The barometer has risen at all stations but more particularly in S.W. Japan and Central China.

The depression referred to on the 23rd and 24th has moved easterly and the centre is now in the Pacific eastward of Shikoku. There are indications of another depression west of Shantung.

Gradients are moderate on the China Coast and moderate NE winds will be met with in the Formosa Channel and moderate E to SE winds in the northern part of the China Sea.

Forecast:—Moderate E to SE winds, cloudy, fine.

On the 26th at 11.45 a.m. The barometer has risen in Japan and fallen in Central China: in S. China and the Philippines the changes are unimportant.

The depression referred to on the 23rd etc. has moved into the Pacific SE of Tokio; and the second depression has entered the Yellow Sea S of the Shantung peninsula.

Gradients are slight on the China Coast and light variable winds will prevail in the Formosa Channel and light E winds in the northern part of the China Sea.

Forecast:—Light E winds, overcast, showery.

On the 27th at 11.10 a.m. The barometer has risen in N Japan and fallen throughout China: in the Philippines there is little or no change.

The depression first mentioned on the 25th is still in the Yellow Sea, westward of Kiusiu, moving Eastward.

Gradients on the China Coast are very slight, and light variable winds will prevail in the Formosa Channel and light S to SW winds in the northern part of the China Sea..

Forecast:—Light S winds, cloudy, showery.

On the 28th at 11.20 a.m. The barometer has fallen at all stations, more particularly in the neighbourhood of the Loochoos and SW. Japan.

The depression referred to on the 25th has moved only slightly eastward and appears to be filling up. The centre is indicated to the SW of Kiusiu.

Gradients are very slight on the China Coast, and light variable winds and calms may be expected in the Formosa Channel, moderate S. to SW winds in the China Sea.

Forecast.—Moderate S. to SW winds, cloudy, fair.

J. I. PLUMMER.
Chief Assistant.

On the 29th at 0.15. p.m. The barometer has risen in S China and the neighbourhood of the Loochoo Islands and fallen in Japan, in the Philippines it is stationary.

The depression in the north is still indicated in the Pacific, to the South-east of Shikoku.

Gradients are moderate on the China Coast and moderate NE winds will be met with in the Formosa Channel, and light variable winds in the northern part of the China Sea.

Forecast.—Light variable winds, overcast, some rain.

On the 31st at 11.15 a.m. The barometer has risen in Japan and fallen slightly at all other stations. Gradients are slight on the China Coast and light variable winds may be expected in the Formosa Channel and light NE winds in the northern part of the China Sea.

A trough-like area of low pressure appears to lie across the middle part of the China Sea, and it is here that the least pressure is found.

Forecast:— Light NE winds, cloudy, fine.

J. I. PLUMMER.
Chief Assistant.

On the 1st at 11.30. a.m. The barometer has risen in Japan and in Mid China and fallen in both N and S China and in the Philippines.

The depression referred to on the 30th ult. is now situated to the north of Shantung and the low pressure in the China Sea is maintained.

Gradients are very slight on the China Coast and light variable winds will continue in the Formosa Channel and moderate NE winds in the northern part of the China Sea.

Forecast:— Light E to NE winds, fine.

J. I. PLUMMER.
Chief Assistant.

On the 2nd at 11.35. a.m. The barometer has risen slightly at nearly all stations.
The greatest pressure is now found in Japan and the least in the China Sea and the Gulf of Pechili.
Gradients are still very slight on the China Coast and light variable winds will prevail in the Formosa Channel and moderate NE winds in the northern part of the China Sea.
The northern depression remains to the north of Shantung and is nearly stationary.
Forecast.— Moderate E to NE winds, fine.

On the 4th at 0.10 p. m. The barometer has risen in N China and to some extent in the Philippines, and has fallen in Japan and S China.

The depression, first referred to on the 30th ult., is now moving Eastward across the Sea of Japan.

Gradients are very slight upon the China Coast and light E winds may be expected in the Formosa Channel, and light S to SW winds in the northern part of the China Sea.

Forecast:— Light S winds, fine.

N. B. Telegraphic connection with Hongkong is interrupted.

J. I. PLUMMER.

On the 7th at 11.35 a. m. The barometer has risen throughout China and in the Philippines and has fallen in Japan.

The northern depression has now entered the Pacific to the South of Tokio moving slowly in an ESE direction.

Gradients are moderate on the China Coast and moderate NE winds will be met with in the Formose Channel. Pressure is low over the China Sea and moderate NE to E winds will be experienced in its northern portion.

Forecast:— Moderate E winds, overcast, fair.

On the 8th at 11.30 a. m. The barometer has risen in Western Japan and fallen in the Yangtse valley; elsewhere the changes are trivial.

Gradients are very slight on the China Coast and light variable winds will prevail in the Formosa Channel. Pressure is still low in the China Sea and moderate NE winds will be met with in the northern part.

Forecast:— Moderate NE winds, cloudy, some rain.

J. I. PLUMMER.
Chief Assistant.

On the 9th at 11.35 a. m. The barometer has risen in Japan and N. China and has fallen slightly in S China and in the Philippines.

The greatest pressure is found in S.W. Japan and the least in the China Sea. It is also low in the Pacific.

Gradients are slight on the China Coast and light variable winds will prevail in the Formosa Channel and light S to SW winds in the northern part of the China Sea.

Forecast:— Light S winds, overcast, showery.

On the 10th at 11.30 a. m. The barometer has risen in Japan and fallen in S. China. In the Philippines it is stationary.

The greatest pressure is now situated over SW Japan and the least in the China Sea.

Gradients are slight upon the China Coast and light E winds may be expected in the Formosa Channel, and light variable winds tending to settle to N.W. in the northern part of the China Sea.

The depression, which has existed for three days in the China Sea appears to be moving towards the NE.

Forecast:— Light N.W. winds, fine.

J. I. PLUMMER.
Chief Assistant.

On the 11th at 11.25 a. m. The barometer has risen in Northern Japan and also slightly in China, and has fallen in Southern Japan and in the Philippines.

Gradients are moderate on the China Coast and moderate NE winds will be met with in the Formosa Channel. The depression still remains in the China Sea and light E to NE winds will be met with in the northern part of the China Sea with rather strong S.W. monsoon in the southern part. There is also another depression in the neighbourhood of the Loochoos.

Forecast:— Light E winds, cloudy, fair.

J. I. PLUMMER.
Chief Assistant.

On the 12th at 11.45 a. m. The barometer has risen slightly in S China and over the Eastern Sea and fallen in Japan and in the Philippines.

Gradients are slight upon the China Coast and light NE winds will prevail in the Formose Channel.

The depression in the China Sea appears to be becoming deeper and fresh E to NE winds may be expected in the northern part of the China Sea and fresh S.W. monsoon in the more southern portion.

Forecast:— Moderate to fresh NE winds, fine.

On the 13th 11.30 at a. m. The barometer has risen slightly on the Coast of China and over the Eastern Sea, and fallen in the north of Japan. In S China and the Philippines it is stationary.
Gradients are moderate on the China Coast and moderate E to SE winds will prevail in the Formosa Channel.
A well marked depression exists in the China Sea, southward of Hongkong and strong E winds will be experienced in the north part and moderate SW winds in the South part of that sea.
Forecast:— Fresh E winds, fair at first but squally later.

J. I. PLUMMER.
Chief Assistant.

On the 14th at 11.30 a. m. The barometer has risen in SW Japan and in the Philippines. In China also there is a slight increase of pressure.

Gradients are moderate on the China Coast and moderate to fresh SE winds will prevail in the Formosa Channel. Pressure is still low in the China Sea and strong E winds will be met with in the northern part of the China Sea.

Forecast:— Fresh E winds, fine.

N. B. There are no reports from Indo China or from places westward of Hongkong.

On the 15th at 10.45 a. m. The barometer has risen in N. Japan and fallen throughout China, but more particularly in the Yangtse valley. In the Philippines it is stationary.

A depression appears to have been formed to the westward of Shantung. Pressure is also low in the China Sea, southward of Hongkong.

Gradients are rather steep on the China Coast and fresh SW winds will prevail in the Formosa Channel and fresh E to SE winds in the northern part of the China Sea.

Forecas :— Fresh E winds, cloudy, showery.

On the 16th at 11.35 a. m. The barometer has risen in the Yangtse Valley and fallen in Japan and in S China. In the Philippines it is stationary.

The depression referred to yesterday has moved rapidly in an ESE direction and is now lying over the island of Kiusiu.

Gradients are moderate over the China Coast and light E winds will be experienced in the Formosa Channel and light W winds in the northern part of the China Sea.

Forecast:— Light W winds fine.

On the 17th at 11.45 a. m. The barometer has risen in SW Japan and fallen in Mid China and also, but slightly, in the Philippines.

The depression in the north has passed into the Pacific but there are indications of another depression in Northern China.

Gradients are very slight on the China Coast, and light variable winds will prevail in the Formosa Channel.

Moderate S.W. monsoon prevails over the China Sea.

Forecast:— Moderate S.W. winds, showery.

On the 18th at 11.25 a. m. The barometer has risen in N Japan and throughout China and has fallen in S.W. Japan and in the Philippines.

The second depression mentioned yesterday has entered the Yellow Sea and is now approaching the coast of Kiusiu.

Gradients are slight on the China Coast, and light SW winds may be expected in the Formosa Channel, and moderate SW monsoon over the China Sea.

Forecast:— Moderate S.W. winds, showery.

J. I. PLUMMER.
Chief Assistant.

On the 24th at 11.35 a. m. The barometer has risen in the extreme north and fallen at all other stations. Gradients are moderate but increasing on the China Coast and strong NE winds will prevail in the Formosa Channel.

A typhoon approaches the east coast of Luzon, north east of Manila moving WNW.

Forecast:— Light SE winds, backing to NE later, fine.

J. I. PLUMMER.
Chief Assistant.

On the 25th at 11.25 a. m. The barometer has risen in Japan and fallen in Formosa and South China. The typhoon has entered the China Sea, the centre being now west of Northern Luzon and moving towards the W.N.W. Orders to hoist the red cone point downwards and the red drum were given at 10.45 a.m. Strong NE winds may be expected in the Formosa Channel.

Forecast:— Moderate N to NE winds, fine.

J. I. PLUMMER.

On the 29th at 11.35 a. m. The barometer has risen slightly in S. China and fallen in Mid China and in the Philippines.

Gradients are moderate on the China Coast and moderate S. winds will prevail in the Formosa Channel and strong S. to SW. winds in the China Sea.

The greatest pressure lies over the southern part of Japan and the least over the western side of the China Sea.

Forecast:— Fresh S winds, overcast, rain.

On the 30th at 11.20 a. m. The barometer remains stationary in Mid China and Formosa, and has fallen at all other places.

The greatest pressure is still found in southern Japan and the least in the Gulf of Tonquin.

Gradients are moderate on the East Coast of China but rather steep upon the South coast and over the China Sea. Moderate S. winds will prevail in the Formosa Channel and strong S.W. monsoon in the China Sea.

Forecast — Strong S. to SW. winds, overcast, rain.

On the 2nd at 11.50 a. m. The barometer has risen in China and in the Philippines and is stationary over the Pacific.

An area of low pressure remains in the western part of the China Sea and fresh S.W. monsoon will prevail generally over the whole of that sea.

Gradients are very slight on the China Coast and light variable winds will be met with in the Formosa Channel.

Forecast:— Moderate to fresh SE winds, cloudy, rain.

On the 3rd at 11 35 a. m. The barometer has risen in N. Japan and fallen in the neighbourhood of Formosa, in China it is stationary.

Gradients are very slight on the China Coast, and light variable winds and local thunderstorms may be expected in the Formosa Channel and the northern part the China Sea.

The least pressure still continues in the vicinity of the Tonquin Gulf, and moderate S.W. monsoon will be experienced to the Southward.

Forecast:— Light SE winds, cloudy, showery.

On the 4th at 11.45 a. m. The barometer has risen in the Philippines and fallen throughout China and Formosa.

An area of low pressure lies to the Eastward of Formosa and another in the Pacific eastward of the Southern Philippines.

Gradients are slight on the China Coast, and light variable winds will prevail in the Formosa Channel, and light S to SE winds in the northern part of the China Sea.

Forecasts—Light variable winds, fine.

J. I. PLUMMER.
Chief Assistant.

On the 5th at 11.45 a. m. The barometer has fallen at nearly all stations but more particularly in the neighbourhood of the Miaco Sima Group.

The depression mentioned as eastward of Formosa yesterday is a typhoon moving apparently to the NNE.

Moderate SW winds will prevail in the Formosa Channel, and light SE winds in the northern part of the China Sea.

Forecast:— Light E winds, fine.

On the 6th at 11.40 a. m. The barometer has risen rapidly in the neighbourhood of Miaco Sima, the changes elsewhere are slight.

The typhoon is now in the Eastern Sea moving slowly northward.

Gradients are slight on the China Coast, and light variable winds will prevail in the Formosa Channel and northern part of the China Sea. Further south fresh SW monsoon may be expected.

Forecast:— Light variable winds, fine.

On the 7th at 11.45 a. m. The barometer has fallen slightly in S China and risen in the Philippines.
The typhoon has entered the coast near Foochow yesterday morning.
Light variable winds will probably prevail in the Formosa Channel and the northern part of the China Sea with fresh monsoon to the southward.
Forecast:— Light variable winds, fine.
N. B. The information received this morning is of the most meagre description.

On the 10th at 0. 20 p. m. The barometer has risen in China and in the Philippines and fallen in S.W. Japan.

A deep depression, probably a typhoon, exists to the East of Kiusiu moving ENE.

Gradients are slight on the China Coast, and still rather steep over the China Sea. Moderate SE winds may be expected in the Formosa Channel and fresh SW winds in the China Sea.

Forecast:— Fresh S.W. winds, cloudy, fine.

J. I. PLUMMER.
Chief Assistant.

On the 11th at 11.35 a. m. The barometer has risen in China and in Formosa; in the Philippines it is stationary. In Japan it has risen in the SW and fallen in the extreme north.

The depression is now situated near the West coast of the main island (Hondo) moving towards the NE.

Gradients are slight on the China Coast, and moderate over the China Sea. Light variable winds will be met with in the Formosa Channel and moderate S.W. winds in the China Sea.

Forecast: — Light S.W. winds, cloudy, showery.

On the 13th at 11.38 a. m. The barometer has risen in Japan, and continues to fall over the Pacific, eastward of Formosa. In China and the Philippines the changes are very trivial.
Gradients are slight on the China Coast, and moderate NE winds will prevail in the Formosa Channel and northern part of the China Sea though further southward moderate S.W. monsoon may be expected.
Forecast:— Light E to NE winds, overcast, fine.

On the 14th at 11.25 a. m. The barometer has risen in Japan and in the Philippines and fallen in S. China and Formosa.

The greatest pressure is found in the extreme north and the least in the Pacific near Miaco Sima where a rather deep depression exists.

Gradients are rather steep on the China Coast and strong N. winds may be expected in the Formosa Channel and moderate W. winds in the northern part of the China Sea.

Forecast: — Light W. winds, fine.

J. I. PLUMMER.
Chief Assistant.

On the 15th at 11.30 a. m. The barometer has risen rapidly in the neighbourhood of Miaco Sima and fallen upon the Coast of China.

The depression mentioned yesterday is a typhoon at present situated at the northern end of the Formosa Channel and moving W.N.W. towards the coast to the northward of Foochow.

Strong S.W. winds may be expected in the Formosa Channel, moderate W. winds in the northern part of the China Sea and fresh S.W. monsoon in the more southern portion.

Forecast:— Moderate W. winds, fine.

J. L. PLUMMER.
Chief Assistant.

On the 16th at 11.30 a. m. The barometer has risen in Formosa and the Loochoos and has fallen in the interior of China.

The typhoon has entered the coast in the neighbourhood of Foochow and strong SE winds may be expected in the Formosa Channel.

Gradients are steep over the China Sea and strong S.W. monsoon will prevail there.

Forecast:— Moderate W to SW winds, cloudy, showery.

J. I. PLUMMER,
Chief Assistant.

On the 17th at 11.29 a. m. The barometer has fallen considerably in Japan and in a smaller degree throughout China: in the Philippines and in Formosa it is stationary.

Gradients are moderate on the China Coast and very steep over the China Sea. Fresh S. to SE. winds will prevail in the Formosa Channel and very strong S.W. monsoon over the whole of the China Sea.

Forecast:— Very strong W. to SW. winds, cloudy, showery.

J. I. PLUMMER.
Chief Assistant.

On the 22nd at 11.35 a. m. The barometer has risen slightly in W China but elsewhere the changes are trivial and unimportant.

Gradients are moderate on the China Coast and moderate SW winds may be expected in the Formosa Channel and to the northward.

They are likewise moderate over the China and fresh SW monsoon will continue in that region.

Forecast: — Fresh S to SW winds, cloudy, fair.

On the 25th at 11.0 a.m. The barometer has risen slightly in Mid China and fallen generally [illegible] but particularly over the Pacific, to the East of Formosa where a typhoon is at present raging. The direction of the typhoon is towards the N.W.

Gradients are very slight on the China Coast but may be expected to become rapidly steeper and strong NE winds may be anticipated in the Formosa Channel. Over the China Sea the same light S to SW winds will prevail

Forecast: — Light S to SW winds, fine.

J. I. PLUMMER.
Chief Assistant.

On the 26th at 11.50 a. m. The barometer has fallen upon the Coast of China and in Formosa and is stationary in the Philippines.

The typhoon still advancing in a N.W. direction has reached a point intermediate between Miaco Sima and the NE coast of Formosa.

A strong northerly gale may be expected in the Formosa Channel and light W winds in the northern part of the China Sea.

Forecast:— Light W winds, fine, hot.

N. B. The information from the north is extremely meagre.

J. I. PLUMMER.
Chief Assistant.

On the 27th at 11.50 a. m. The barometer has risen sharply in the neighbourhood of Miaco Sima owing to the receding typhoon and has fallen at all other stations.

The typhoon still moving towards the N.W. threatens to enter the coast to the northward of Foochow.

Strong W winds, backing to SW. will be experienced in the Formosa Channel and moderate S.W. winds in the northern part of the China Sea.

Forecast: — Moderate SW winds, fine.

J. I. PLUMMER.
Chief Assistant.

On the 31st at 11.40 a. m. The barometer has fallen in S China and Japan and risen slightly in the Yangtse valley: in the Philippines it is stationary.

Gradients are slight on the China Coast and light S winds will prevail in the Formosa Channel and light or moderate E winds in the northern part of the China Sea.

Forecast:— Moderate E winds, cloudy, showery.

On the 1st at 11.35 a. m. The barometer has fallen throughout China and Japan but remains statio in the Philippines.

A depression, probably a typhoon exists in the Pacific, to the eastward of the Loochoos: the direction its motion is at present unknown.

Gradients are very slight upon the China Coast and light variable winds may be expected in the Form Channel, and moderate E winds in the northern part of the China Sea.

Forecast:— Moderate E winds, cloudy, fair.

On the 1st at 11.45 a. m. the barometer has risen slightly in the Philippines and the more southern Loochoos and has fallen at all other stations but more particularly in Japan.

The typhoon is still eastward of the Loochoo Islands and is moving northward.

Gradients are slight on the China Coast and over the China Sea. Moderate SE winds will prevail over the Formosa Channel, and over the southern part of the China Sea. S and SW winds over the more Southern part.

Forecast:— Moderate SE winds, overcast, rain.

On the 3rd at 11.10 a. m. The barometer has risen over the Pacific in the neighbourhood of the Loochoo and has fallen in Japan; elsewhere the changes are unimportant.

The typhoon is now to the SE of Kiusiu moving towards the NNE.

Gradients are slight upon the China Coast and rather steeper over the China Sea. Light SW winds will prevail in the Formosa Channel and moderate S winds in the northern part of the China Sea.

Forecast:— Moderate S winds, overcast, fair.

On the 4th at 11.20 a. m. The barometer has risen in northern and western Japan and fallen very slightly at other stations.

The typhoon is now situated in the Pacific to the SE of Tokio, and is moving towards the ENE.

Gradients are very slight upon the China Coast and very moderate over the China Sea. Light S winds will prevail in the Formosa Channel and over the greater part of the China Sea.

Forecast:— Moderate S to SE winds, fine.

On the 5th at 11.40 a m. The barometer has risen throughout China and Japan, more particularly in the latter and has fallen in the Southern Philippines.

Gradients are very slight upon the China Coast and over the China Sea. Light S. winds will prevail in the Formosa Channel and over the greater part of the China Sea.

Foaecast: — Light S. winds, cloudy, local thunderstorms.

J. I. PLUMMER.
Chief Assistant.

On the 6th at 11.40 a. m. The barometer has fallen in the Philippines and in the Yangtse valley but has risen slightly at all other stations.

Gradients are slight upon the Coast of South China but more steep to the northward. Light SW winds will be met with in the Formosa Channel and fresh S to SE winds further north. In the northern part of the China Sea moderate SW winds will prevail.

Forecast:— Moderate SW winds, fine.

On the 7th at 11.45 a. m. The barometer has risen in the Philippines and in Mid China and fallen slightly in South China.

The low barometer in the Philippines yesterday would appear to have been caused by a typhoon crossing Luzon, and moving towards the N.W. at present. Light variable winds will prevail in the Formosa Channel and in the northern part of the China Sea.

Forecast — Light variable winds, fine.

On the 8th at 11.20 a. m. The barometer has fallen throughout China and SW Japan and risen slightly in NE Japan: in the Philippines it is stationary.

The typhoon has entered the China Sea still moving towards the NW. Strong N winds may be expected in the Formosa Channel and freshening NE winds in the northern part of the China Sea.

Forecast:— Fresh E to NE winds, fair.

On the 10th 5.17 p. m. The black cone and ball were ordered to be lowered.

On the 11th at 11.5 a. m. The barometer has risen in China, particularly on the south coast and falle over the Pacific to the east of Formosa.

The typhoon has entered the coast to the north of Hoihow and is probably rapidly filling up. Anothe depression is indicated to the east of the Bashee Channel.

Fresh NE winds will prevail in the Formosa Channel and moderate E to NE winds in the northern p of the China Sea.

Forecast:— Moderate E winds, showery, overcast.

J. I. PLUMMER.

On the 12th at 11.30 a. m. The barometer has risen slightly in South China, and fallen generally but slightly at all other stations.

The greatest pressure is now found in Japan and the least in the Pacific to the South East of Formosa. Gradients are slight upon the China Coast and moderate NE winds will prevail in the Formosa Channel and in the northern part of the China Sea.

Forecast:— Moderate E to NE winds, fine.

On the 13th at 10.58 a. m. The barometer has fallen at all stations.
The depression announced on the 11th inst has developed into a typhoon situated to the eastward of the Balingtang Channel and moving slowly towards the north west.
Gradients are moderate at present on the China Coast and moderate but increasing NE winds may be expected in the Formosa Channel and light variable winds in the northern part of the China Sea.
Forecast:— Light variable winds, cloudy, fine.

On the 14th at 11.25 a. m. The barometer has fallen at nearly all stations but more particularly at those in Formosa. In the Philippines it is stationary.

The typhoon continues to move in a north-westerly direction and has reached a point to the eastward of South Cape, Formosa.

Fresh to strong NE winds may be expected in the Formosa Channel and moderate W to SW winds in the northern part of the China Sea.

Forecast:— Moderate W winds, fine, hot.

On the 16th at 0.5 p. m. The barometer has risen rapidly in S Formosa and fallen over the Eastern Sea: it is stationary in the Philippines.

The typhoon is still advancing northward, rather slowly, and is now to the northeast of northern Formosa. Fresh W winds may be expected in the Formosa Channel and moderate SW winds in the northern part of the China Sea.

Forecast:— Moderate SW winds, fine.

N. B. Information from the north is very meagre.

J. I. PLUMMER.
Chief Assistant.

On the 17th at 11.25 a. m. The barometer has risen in Formosa and the neighbourhood of the Loochoos and has fallen at all other stations.

The typhoon is situated to the north west of the Loochoo Islands and is moving in a NNE direction toward the SW coasts of Japan.

Gradients are moderate on the China Coast and rather steeper over the China Sea. Moderate SW winds will prevail in the Formosa Channel and fresh S.W. monsoon over the greater part of the China Sea.

Forecast:— Moderate to fresh SW winds, fine, warm.

J. I. PLUMMER.
Chief Assistant.

On the 18th at 11.35 a. m. The barometer has risen at all stations reporting to day, more particularly at those in the rear of the retreating typhoon.

The typhoon would appear to be situated in the Yellow Sea nearly midway between Shanghai and Nagasaki and is moving northward.

Gradients are very slight on the China Coast and over the China Sea and light S.W. winds may be expected both in the Formosa Channel and the China Sea.

Forecast:— Light to moderate S.W. winds, fair.

N. B. Information from Japan and the Loochoo Islands is wanting.

J. I. PLUMMER.
Chief Assistant.

On the 19th at 11.40 a. m. The barometer has risen slightly in S China and considerably further to the northward and has fallen slightly in the Philippines.

Gradients are slight upon the China Coast and only a little steeper over the China Sea. Light S.W. or variable winds will be met with in the Formosa Channel and light S.W. winds in the northern part of the China Sea.

Forecast:— Light S.W. winds, fine.

N. B. In the absence of information from the north it is impossible to locate the typhoon. It is probably raging upon the west Coast of Korea.

J. I. PLUMMER.
Chief Assistant.

On the 20th at 11.25 a. m. The barometer has risen slightly at all stations south of Shanghai.

A new typhoon in the Pacific East of the Loochoo Islands was indicated yesterday by observations arriving too late for our remarks. It is probably situated now off the S.W. coast of Japan and moving rather rapidly northward.

Gradients are very slight on the China Coast and light variable winds with local thunderstorms will be met with both in the Formosa Channel and the China Sea.

Forecast:— Light variable winds, fair, local thundershowers.

N. B. Information from Japan and the Loochoos is again wanting.

J. I. PLUMMER.
Chief Assistant.

On the 21st at 11.22 a. m. The barometer has risen throughout China and Japan but more particularly S.W. Japan: in the Philippines it is stationary.

The greatest pressure is now found in the extreme north and the least in the Pacific, to the East of Luzon.

The typhoon has passed very rapidly northward following the track of the privious one along the west coast of Korea.

Gradients are moderate upon the coast and moderate N.E. winds may be expected in the Formosa Channel and the northern part of the China Sea.

Forecast: — Moderate E to NE. winds, fine.

J. I. PLUMMER.
Chief Assistant.

Hongkong Observatory, Sunday 21st August 1904.

On the 22nd at 11.0 a. m. The barometer has fallen in Formosa and in the neighbourhood of the Formosa Channel and risen very slightly elsewhere.

The depression referred to yesterday is caused by a typhoon at present situated near the eastern end of the Bailingtang Channel and moving towards the W.N.W.

Fresh to strong NE winds may be expected in the Formosa Channel and moderate W to NW winds in the northern part of the China Sea.

Forecast: — Moderate E to NE. winds, fine.

J. I. PLUMMER.
Chief Assistant.

On the 27th at 11.35 a. m. The barometer has risen in S. China and to a less extent in the Philippines and Formosa. It has fallen slightly in Japan and the Loochoo Islands.

The greatest pressure lies over N. Japan, and the least over the Pacific, SE of the Loochoos.

Moderate NE winds will prevail in the Formosa Channel, and moderate W to SW winds in the northern part of the China Sea.

Forecast: — *Moderate W winds, overcast, fair.*

On the 29th at 11.20 a. m. The barometer has risen slightly in S China, and fallen at all other stations, but is stationary in the Philippines.

The greatest pressure is now found in the southern Philippines, and the least in the Pacific, eastward of the Loochoos.

The typhoon, last referred to on Aug. 26th as a depression moving slowly to the NE overland, would appear to have made its way into the Formosa Channel entering it between Amoy and Swatow.

Fresh variable winds will be met with in the Formosa Channel and fresh SW winds in the northern part of the China Sea.

Forecast:— Moderate W to SW winds, fine.

J. I. PLUMMER.
Chief Assistant.

On the 30th at 11.20 a. m. The barometer has risen in the extreme north, and fallen at almost all other stations but particularly in Kiusiu.

The depression remains in the Formosa Channel having moved but slightly. It appears to be still filling up. The low pressure in the Pacific which has been remarked since Aug. 27th has now developed into a typhoon, situated at present to the SE of Kiusiu and moving northward.

Fresh variable winds will be met with in the Formosa Channel and fresh SW winds in the northern part of the China Sea.

Forecast:— Moderate to fresh S.W. winds, cloudy, fair.

J. I. PLUMMER.
Chief Assistant.

On the 31st at 11.30 a. m. The barometer has risen throughout China and in the Philippines, but more particularly in Formosa, and has fallen in S.W. Japan.

The typhoon is approaching the eastern coast of Shikoku, moving towards the NNE.

Gradients are slight on the China Coast, and light variable winds may be expected in the Formosa Chann the depression there having been entirely filled up. Fresh S.W. monsoon prevails in the China Sea.

Forecast:— Moderate S.W. winds, cloudy, fair.

On the 1st at 11.45 a. m. The barometer has risen throughout China and the Philippines, and is fallen in N Japan.

The typhoon would appear to be crossing S.W. Japan, still moving NNE.

Gradients are slight on the China Coast, and light variable winds will be experienced in the Formosa Channel.

Over the China Sea they are rather steep and strong S.W. monsoon will prevail there.

Forecast:— Fresh S winds, cloudy, fair.

N. B. The information from the north this morning is meagre.

J. I. PLUMMER.
Chief Assistant.

On the 2nd at 11.45 a. m. The barometer has risen in S China and in S.W. Japan, and fallen slightly in the Philippines.

The typhoon has passed into the Sea of Japan, moving rapidly towards the NNE.

Gradients are slight on the China Coast, and over the China Sea. Light variable winds will prevail in the Formosa Channel, and light S winds in the China Sea.

Forecast:— Light variable winds, local thundershowers.

On the 6th at 11.35 a. m. The barometer has risen slightly in S China and in the Philippines and fallen, also slightly, in Japan.

Gradients still continue very slight upon the China Coast and over the China Sea and Pacific. Light variable winds and calm weather will prevail generally with occasional local thunderstorms.

Forecast:— Light variable or E winds, fair.

N. B. Telegraphic communication with Hongkong is still interrupted.

J. I. PLUMMER.
Chief Assistant.

On the 8th at 11.35 a. m. The barometer has risen in Japan and over the Pacific in the neighbourhood of the Loochoo Islands. It has fallen slightly in S China, and still more in the Philippines.
There is a depression, probably a typhoon, to the east of Southern Luzon.
Gradients are slight on the China Coast, and light variable winds and calms will prevail in the Formosa Channel, and light E winds in the northern part of the China Sea.
Forecast:— Light E winds, fine.

J. I. PLUMMER,
Chief Assistant.

On the 9th at 11.22 a. m. The barometer has risen generally in China and in the Philippines; a slight fall is shown at Gap Rock and Macao.

The typhoon has entered the China Sea to the South of Manila. Its direction at present would appear to be nearly due westward.

Moderate to NE winds may be expected in the Formosa Channel, and fresh E winds in the northern part of the China Sea.

Forecast: — Fresh E winds, fine.

On the 10th at 10.47 a. m. orders were issued to hoist the red S. Cone.

At 11.10 a. m. The barometer has risen slightly in Mid. China and in the Philippines, and is stationary in S China.

The typhoon is now nearly Southward of Hongkong, moving towards the W.N.W.

Moderate to fresh NE winds will prevail in the Formosa Channel and stong E winds in the northern part of the China Sea.

Forecast:— Strong E winds, fine.

On the 11th at 11.45 a. m. The barometer has risen in Japan and also slightly in Southern China, and has fallen over Central China.

The typhoon is situated in the immediate neighbourhood of the Paracels, and is moving nearly due west.

It will probably strike the Annam Coast near Tourane.

Moderate NE winds will prevail in the Formosa Channel and strong E, veering to SE winds in the northern part of the China Sea.

Forecast: — Strong E to SE winds, showery, squally.

J. I. PLUMMER.
Chief Assistant.

On the 11th at 6.30 p. m. *orders were issued to take down the red S. Cone.*

On the 12th at 11.25 a. m. The barometer has risen throughout China and in N. Japan, and fallen slightly in S Japan and the Southern Philippines.

Gradients are slight on the China Coast, and light NE winds may be expected in the Formosa Channel and decreasing SE winds in the northern part of the China Sea.

Forecast: — Moderate E winds, overcast, showery.

On the 16th at 11.30 a. m. The barometer has risen in N. Japan and in the southern Philippines, and has fallen at all other stations.

The greatest pressure is now found in the extreme north, and the least in the Pacific, to the SE of the Loochoos where a depression at present exists.

Gradients are moderate upon the China Coast, and moderate N winds will prevail in the Formosa Channel, and light N to NW winds in the northern part of the China Sea.

Forecast:— Light N to NW winds, cloudy, fair generally.

J. I. PLUMMER.
Chief Assistant.

On the 17th at 11.23 a. m. The barometer has risen slightly in S China, and fallen at all other stations. The depression referred to yesterday is a typhoon at present situated to the SE of Kiusiu and moving towards the NNE.

Another depression has been formed in the China Sea to the west of central Luzon.

Moderate N to NE winds will prevail in the Formosa Channel and the northern part of the China Sea.

Forecast:—Moderate N winds, cloudy, fair.

On the 18th at 11.38 a. m. The barometer has risen throughout China and the Philippines and fallen in the north of Japan.

The typhoon has moved rapidly to the NNE, and is now situated in the northern part of the main island

The depression in the China Sea has moved but little but is probably deeper, and bad weather may be expected in the eastern part of the China Sea.

Gradients are slight on the China Coast, and light NE winds will prevail in the Formosa Channel.

Forecast:—Moderate NE winds, fine.

On the 19th at 11.40 a. m. The barometer has risen rapidly in N Japan, in the rear of the typhoon, and slightly at all other stations.

A depression is still indicated in the China Sea and moderate E to NE winds will still prevail in the northern part and SW winds in the southern part of that sea with light NE winds in the Formosa Channel.

Forecast:—Light E winds, cloudy fair.

J. I. PLUMMER.

Chief Assistant.

On the 21st at 11.30 a. m. The barometer has risen slightly in the neighbourhood of the Formosa Channel and fallen, also slightly, at all other stations.

The greatest pressure lies over N China and the least in the Pacific, eastward of Formosa.

Gradients are moderate on the China Coast, and moderate NE winds will prevail in the Formosa Channel and moderate E to NE winds in the northern part of the China Sea.

Forecast:—Moderate E to NE winds, fine.

On the 22nd at 11.20 a. m. The barometer has fallen in the NE of Japan and risen at all other stations.
A typhoon passed over the eastern shores of Japan yesterday in a NNE direction and has re-entered the Pacific, east of Hokkaido.
Gradients are slight upon the China Coast, and steeper over the China Sea. Light NE winds will prevail in the Formosa Channel and moderate to fresh E winds in the northern part of the China Sea.
Forecast:— Moderate E winds, cloudy, showery.

J. I. PLUMMER.
Chief Assistant.

On the 23rd at 11.35 a. m. The barometer has fallen slightly in the Yangtse valley and risen at all other stations.

Pressure is greatest in the neighbourhood of the Loochoo Islands and least in the China Sea.

Gradients are slight upon the China Coast but steeper over the northern part of the China Sea. Light NE winds will prevail in the Formosa Channel and fresh E winds to the Southward and Eastward of Hongkong.

Forecast:— Fresh E to NE winds, overcast, fair generally.

On the 28th at 11.40 a. m. The barometer is stationary in the extreme north and has fallen at all other stations.

The greatest pressure is now found in the north of China and the least in the Pacific, east of Luzon, where a depression is probably forming.

Gradients are moderate on the China Coast, and moderate NE winds will be met with in the Formosa Channel, and light variable winds to the southward and eastward of Hongkong.

Forecast:— Light variable winds, fine.

J. I. PLUMMER.
Chief Assistant.

On the 29th at 11.22 a. m. The barometer has risen over Japan and the Loochoo Islands, and fallen slightly in China and the Philippines.

The area of high pressure has moved eastward, and now covers the whole of Japan and Corea, and the area of low pressure remains to the eastward of Luzon.

Gradients are slight on the China Coast, and moderate NE winds will be met with in the Formosa Channel, and light SE winds in the northern part of the China Sea.

Forecast:— Light E to SE winds, overcast, some cold rain.

J. I. PLUMMER.
Chief Assistant.

On the 30th at 11.30 a. m. The barometer has fallen in Mid China and over the southern part of the Eastern Sea, and risen slightly in other directions.

The anticyclone remains practically stationary over northern Japan while the low pressure area in the Pacific has moved somewhat to the northward.

Gradients are very slight upon the China Coast, and light variable winds will prevail in the Formosa Channel and light E to SE winds in the northern part of the China Sea.

Forecast:—Light E to SE winds, cloudy, fair.

On the 4th at 11.20 a. m. The barometer has fallen rapidly in northern Japan and slightly in the Philippines; elsewhere the changes of pressure are unimportant.

The greatest pressure is now over the interior of China and the least in the China Sea.

Moderate NE winds will prevail in the Formosa Channel and fresh E winds in the northern part of the China Sea.

Forecast:— Fresh E winds, fine.

On the 8th at 11.42 a. m. The barometer has fallen in N Japan and risen at all other stations. The greatest pressure is over the north of China and the least in the Pacific, eastward of the Philippines. Strong NE monsoon prevails along the entire coast of China and over the greater part of the China Sea.

Forecast: — Fresh to strong NE winds, fine.

On the 10th at 11.35 a. m. The barometer has risen in the Philippines and in N. Japan and fallen slightly elsewhere.

The anticyclone over N. China yesterday would appear to be moving eastward. The area of low pressure remains to the east of Luzon.

Fresh NE monsoon will prevail in the Formosa Channel, and moderate NE monsoon over the greater part of the China Sea.

Forecast:— Moderate to fresh NE winds, fine.

J. I. PLUMMER.
Chief Assistant.

On the 11th at 11.30 a. m. The barometer has risen slightly throughout China and in the Philippines and has fallen in N. Japan.

The greatest pressure is still over China, to the north of the Yangtse valley, and the least in the Pacific, east of the southern Philippines.

Fresh to strong monsoon prevails along the entire coast of China and over the greater part of the China Sea.

Forecast:— Fresh NE winds, fine.

On the 1st at 11.45 a. m. The barometer has fallen sharply in the interior of China and slightly at most other places.

The monsoon may be expected to moderate considerably in the Formosa Channel and to a less extent also in the China Sea.

Forecast:— Fresh NE winds, overcast, fair.

J. I. PLUMMER.

On the 3rd at 11.35 a. m. The barometer has risen in S. China and in the Philippines, and fallen slig[illegible] over Central China.

The greatest pressure is found to lie over the estuary of the Yangtse and over the Yellow Sea towards [illegible] Japan, and the least in the Pacific to the eastward of northern Luzon.

Moderate NE winds will prevail in the Formosa Channel and moderate E winds in the northern part of China Sea.

Forecast:—Moderate E winds, cloudy, fair.

J. I. PLUMMER.
Chief Assistant.

On the 4th at 11.50 a. m. The barometer has risen slightly in S China and in the Philippines, and fallen in Central China, but these changes are of little importance, the distribution of atmospheric pressure remaining the same as yesterday.

Moderate to fresh monsoon will continue to prevail in the Formosa Channel and in the northern part of the China Sea.

Forecast:— Moderate NE winds, fine.

On the 5th at 11.50 a. m. The barometer has fallen throughout Japan and also slightly upon the coast of China, and risen very slightly in the neighbourhood of Formosa.

A rather deep depression is passing eastward across N Japan. Moderate NE monsoon continues to prevail on the coast of China and over the greater part of the China Sea.

Forecast:— Moderate NE winds, fine.

On the 6th at 11.55 a. m. The barometer has risen throughout China and over the Eastern Sea, and fallen in Japan.

The depression in N Japan is moving eastward very slowly and very strong winds prevail between Shanghai and Nagasaki. Strong NE monsoon may be expected in the Formosa Channel and the northern part of the China Sea.

Forecast:— Strong NE winds, fine.

N. B. There is no information this morning from the Philippines.

On the 7th at 11.55 a. m. The barometer has risen in S China and Formosa, and fallen in N China N Japan.

The depression in N Japan has moved slowly to the ESE and has now reached the Pacific.

Gradients are much diminished on the China Coast and a very moderate monsoon will be met with i Formosa Channel, further to the southward a fresh monsoon may still be expected.

Forecast:— Moderate NE winds, fine.

On the 11th at 11.55 a. m. The barometer has risen in N China and S W. Japan and fallen slightly in S China.

An anticyclone lies over the Yellow Sea between Shanghai and Nagasaki and a depression in the extreme northern part of the Sea of Japan. Moderate NE monsoon may be expected in the Formosa Channel and in the northern part of the China Sea.

Forecast: — Moderate NE winds, cloudy, fair.

On the 16th at 11.45 a m. The barometer has risen greatly throughout China, Japan and the neighbouring portion of the Pacific.

n anticyclone of great intensity lies over the whole of China, having its centre near the Yangtse Valley, d a depression is still indicated to the eastward of northern Japan.

ery heavy monsoon may be expected in the Formosa Channel and over the greater part of the China Sea.

orecast:— Strong NE to N winds, fine.

On the 17 h at 11.45 a m. The barometer has risen throughout China, Japan and the neighbouring portion of the Pacific and has fallen in the Northern Philippines.

Gradients are very steep upon all the coasts of China, but the gale is moderating in the Formosa Channel to a strong monsoon. In the China Sea very heavy monsoon prevails amounting to a moderate gale from the NE.

Forecast:— Strong NE wind, fine.

On the 18th at 11.55 a. m. The barometer remains stationary in the northern part of Luzon and the hbouring seas, and has fallen at all other stations.

diminution of pressure in the Southern Philippines is caused by a typhoon, situated at present to the h of Cebu and probably moving westward.

monsoon is still moderating in the Formosa Channel and will probably be interrupted shortly. Heavy her continues in the China Sea, more particularly to the southward.

cast:— Strong NE winds, fine.

On the 21st at 11.45 a. m. The barometer has fallen generally throughout China and risen slightly Luzon and eastern Japan.

The typhoon would appear to have continued its course across the China Sea, but in the absence of information from the coasts of Indo-China it is impossible to locate its present position.

Moderate NE monsoon prevails in the Formosa Channel and fresh to strong monsoon may be expecte the northern part of the China Sea.

Forecast:— Fresh NE winds, fine.

On the 23rd at 11.40 a. m. The barometer has risen generally throughout China and fallen in Japan. The depression in northern Japan has moved to the south-eastward into the Pacific, and the depression in the China Sea would appear to have moved westward and is probably filling up.

Fresh to strong NE monsoon prevails in the Formosa Channel and the northern part of the China Sea and very disturbed weather further southward.

Forecast:— Strong NE winds, fine.

On the 27th at 11.58 a. m. The barometer has risen rapidly in Japan and slightly in S China and Philippines but a rapid fall is shown in N China.

The anticyclone remarked yesterday over northern China has moved eastward and would appear to b owed by a depression near the Gulf of Pechili.

Moderate NE monsoon may be expected in the Formosa Channel and fresh monsoon in the northern of the China Sea.

Forecast:— Fresh E to NE winds, cloudy, fair.

n the 8th at 11.50 a. m. The barometer has risen rapidly in northern China, but elsewhere there is very change of pressure.

dients are becoming steeper upon the coast of China, and fresh NE monsoon may be expected in the osa Channel and moderate monsoon in the northern part of the China Sea.

ast:—Light but increasing NE winds, fine.

J. I. HUMMEL,
Chief Assistant.

On the 9th at 11.58 a. m. The barometer has risen over the Eastern Sea and fallen moderately at other stations.

A deep depression is passing across Hokkaido from the westward, accompanied by strong winds.

Gradients are moderating upon the China Coast and moderate NE monsoon will prevail in the Formosa Channel and the northern part of the China Sea.

Forecast:— Moderate NE winds, cloudy, fair.

On the 15th at 11.50 a. m. The barometer has risen generally, but a slight fall is indicated in Shan to the northward of it.

Gradients are moderating upon the east coast of China and moderate to fresh NE monsoon will prev Formosa Channel and in the northern part of the China Sea.

Forecast: — Fresh E to NE winds, cloudy, fair.

On the 17th at 11.53 a. m. The barometer has risen moderately throughout China and in S.W. Japan, and has fallen rapidly in NE Japan.

A deep depression is approaching Hokkaido from the westward accompanied by heavy gales from the southwest.

An area of high pressure lies over the Yangtse Valley and very strong NE monsoon prevails in the Formosa Channel and along the entire eastern coasts of China with strong monsoon in the China Sea.

Forecast:— Fresh to strong NE winds, fine.

J. I. PLUMMER.

On the 19th at 11.30 a. m. The barometer has risen slightly in Japan and fallen moderately in China. Gradients are still rather steep upon all the coasts of China but are becoming less so. Fresh NE monsoon may be expected in the Formosa Channel and fresh to strong monsoon in the northern part of the China Sea. Forecast:— Fresh to strong NE winds, fine.

On the 22nd at 11.15 a. m. The barometer has risen throughout China, more particularly in the Yangtse valley, and has fallen over the Pacific and in southern Japan.

Gradients are becoming steeper upon the China Coast and strong NE monsoon may be expected in the Formosa Channel and to the northward of it, with fresh monsoon in the northern part of the China Sea.

Forecast:— Fresh NE winds, cloudy, fair.

On the 23rd at 11.45 a. m. The barometer has fallen rapidly in northern Japan and has risen at all other stations. A deep depression accompanied by heavy gales from the N and NE is crossing the northern part of the main island of Japan, apparently moving towards the ENE.

Gradients are very steep upon the coasts of China and very strong monsoon prevails along the entire eastern coast and over the greater part of the China Sea.

Forecast:—Strong N to NE winds, overcast, fair.

J. A. PLUMMER.
Chief Assistant.

On the 24th at 11.45 a. m. The barometer has risen generally but has fallen at some places in Japan. The depression has passed into the Pacific, having moved towards the ENE. A large anticyclone covers the whole of China with its centre near the Yangtse Valley.

Gradients are rather less steep upon the China Coast and fresh to strong monsoon may be expected in the Formosa Channel and in the China Sea.

Forecast:— Fresh N to NE winds, overcast, some drizzling rain.

J. I. PLUMMER.
Chief Assistant.

On the 28th at 11.30 a. m. The barometer has fallen in Formosa and over the neighbouring portion of the Pacific, and has risen at all other stations.

The anticyclone continues over the interior of China and is extending eastward towards S.W. Japan.

Gradients are rather steeper upon the east coast of China and fresh NE monsoon will be continued in the Formosa Channel and to the northward, and fresh to strong monsoon in the China Sea.

Forecast:— Fresh to strong E winds, cloudy, fair.

J. I. PLUMMER.
Chief Assistant.

On the 29th at 11.45 a. m. The barometer has risen slightly in Japan and fallen throughout China, more particularly in the Yangtse Valley.

The maximum pressure is still over Central China and the least is in the southern Philippines.

Gradients are more moderate upon the China Coast, and moderate NE monsoon will be experienced in the Formosa Channel and fresh monsoon in the northern part of the China Sea.

Forecast:— Fresh E to NE winds, fine.

J. I. PLUMMER.
Chief Assistant.

On the 30th at 11.45 a. m. The barometer has risen considerably over the interior of China and fallen slightly in Japan and over parts of the Pacific.

The anticyclone lying over Central China has thus become more marked and gradients upon the coasts are in consequence steeper. Strong NE monsoon will be met with in the Formosa Channel and to the northward and strong N to NE winds in the northern part of the China Sea.

Forecast:— Strong N to NE winds, fine.

J. I. PLUMMER.
Chief Assistant.

On the 31st at 11.55 a. m. The barometer has fallen in northern Japan and has risen at all other stations. A depression passed yesterday across the extreme north of Japan in an ENE direction and has now entered the Pacific.

The anticyclone over Central China remains but is extending to the eastward. Gradients are moderate upon the east coast but are steeper to the southward. Moderate NE monsoon will prevail in the Formosa Channel and to the northward of it and strong NE winds in the northern part of the China Sea.

Forecast:—Fresh NE winds, fine.

J. I. PLUMMER.
Chief Assistant.

Hongkong Observatory, Saturday 31st December 1904.
