MONTHLY METEOROLOGICAL BULLETIN, 1920.

INTRODUCTION.

§ 1. *Buildings and Instruments.*

A detailed description of the Observatory and Instruments is contained in the Introductions for 1913 and 1914.

In March, 1917, a Richard dry and wet bulb thermograph was substituted for the old Kew thermograph, as the latter was found unsuitable for use in an open shelter. The shelter is of the "Indian" pattern with improved ventilation, and double thatching with an air space of 6 inches between the inner and outer thatch. The eaves are 3 feet from the ground.

§ 2. *Reduction of the Observations.*

The continuous records of barometric pressure, temperature of the air and of evaporation, and direction of the wind are measured at each hour of the day, from 1h to 24h of Hongkong standard time. Those of wind velocity and amount of rainfall are measured at 30 minutes before the above hours, so as to obtain the value of these elements at the hour. The records of the duration of sunshine are measured so as to include the amount of sunshine recorded from 30 minutes before to 30 minutes after each hour of local apparent time.

Registration with the Kew barograph was discontinued on November 16, 1919. A marvin compensated syphon barograph is on order from America.

The hourly values of the principal meteorological elements are given in Tables I to VII. Three-hourly observations of the character and direction of motion of the clouds are given in Table VIII and a list of phenomena observed during the month at the foot of Table IX. The daily values of the meteorological elements are collected in Table IX and the mean hourly values for the month in Table XI. The normals given in Tables IX and X refer to the period 1884–1918.

Eye observations of the barometer are made hourly. The results in Tables I, IX and XI are not reduced to sea level, nor to the gravity at latitude 45°. The height of the barometer cistern above mean sea level is 109 feet.

The temperature of the air and of evaporation (Tables II and III) are derived from the hourly measures of the Richard dry and wet bulb thermograph. The records are obtained on plain paper, on which a base-line for each day's register is laid down from the eye observations of rotating thermometers. The registers are time-scaled electrically ; the pens being lifted from the paper for the first three minutes of each hour by an electro-magnet, operated by a make-contact on one of the electric dials. The thermometers are aspirated from the 59th to the 60th minute of each hour by an electric fan, operated by a similar contact on

another dial, air being drawn into the shelter through a 14-inch zinc pipe. The highest and lowest temperatures given in Tables IX and X are the highest and lowest points on the thermograms.

The index corrections of all thermometers in use are determined near mid-summer and mid-winter, by comparison in water with a Standard thermometer (Kew No. 647) constructed at the Kew Observatory. Comparisons with a Griffin standard thermometer, purchased in the year 1914, indicate that Kew No. 674 reads 0°·10 F. too high. No correction has been applied on this account, however.

The vapour tension and relative humidity given in (Tables IX and XI) have been derived from the Hygrometric Tables in use in the India Meteorological Department.

In Table VIII the cloud classification adopted by the London Meteorological Office is used. Where the names of upper and lower clouds are given, but only one direction, the latter refers to the lower clouds.

The amount of sunshine given in Table V is derived from the hourly measures of the Campbell-Stokes Universal Sunshine Recorder. The percentage of possible sunshine given in Tables IX and XI is obtained by dividing the observed amount by the number of hours the Sun's centre is above the horizon, using 34′ as the mean refraction on the horizon.

The Shadow of the Wireless Mast, erected in the summer of 1917, falls on the sunshine recorder for a few minutes in the afternoon from January 16 to March 29 and September 16 to November 28. The mast has a skeleton frame the ribs of which partially eclipse the Sun and occasionally cause a slight loss of register. A more serious loss occurs when the sun passes behind the joints of the mast (which are steel plates 3 feet square) or when the Sun sets behind the mast. A list of corrections to the sunshine values in Tables V and IX of the Monthly Meteorological Bulletin, for the years 1917–19, on account of this interruption, is given in the Bulletin for December, 1919. The correction is never large enough to affect the values given in Table XI. The printed values for the year 1920 will be corrected for this interruption.

The amount of rainfall given in Table VI is derived from the hourly measures of the Nakamura pluviograph, corrected when necessary by observation of the Standard rain-gauge. In order to contrast the dry and wet hours the former are indicated by three dots, thus, ... and the same symbol has been used to indicate clear sky (Table IV), no sunshine (Table V), and calms (Table VII). In Table VI the letter *d* indicates that drizzle occurred but that the amount was too small to be recorded on the pluviogram. As regards the duration of rain given in Tables IX—XI, it should be mentioned that frequently in the winter months very fine drizzle occurs at intervals during the day, but the amount collected in the gauge is less than 0.005 inch.

The direction and velocity of the wind (Table VII) are derived from the hourly measures of the Beckley anemograms. These measures are resolved into north and east components by the aid of a table giving the components for every point of direction and every mile of velocity, the values in the table being increased by 100 to avoid minus signs. The mean daily direction and velocity, and the mean hourly values in each month, given in Tables IX—XII, are derived from the north and east components by the aid of Table III (B) in Chapter VI of the International Meteorological Tables. The direction is first sought from a table giving the wind direction to the nearest degree (0° = North, 90° = East, 180° = South and 270° = West) for every mile of north and east component, from − 20 to + 20 miles. The correct quadrant is thus obtained without any thought on the part of the computer. The results derived from this table are seldom more than 1° in error except in that part of the table where the

direction is changing rapidly. The values finally adopted are in each case derived from the International Tables. For the sake of continuity Dr. Robinson's factor (3) has been retained for converting the velocity of the cups into wind velocity, in the above Tables.

Beginning with the year 1916, the daily and mean hourly values of the principal Meteorological elements in each month have been published in both C.G.S. and British Units. (Tables IX—XII). It should be noted that before converting the barometric pressure given in Tables IX and XI into millibars the readings have been reduced to sea level and gravity at 45°, and also that the vapour tension has been reduced to latitude 45°. The wind components and velocity have been multiplied by $\frac{22}{30}$ before converting them into C.G.S. Units, in order to reduce them to the International Standard.

The C.G.S. Units adopted by the London Meteorological Office will undoubtedly come into general use sooner or later ; but it was thought inadvisable to discontinue the use of the old British Units until the public had become accustomed to the C.G.S. Units.

The conversion tables following the Introduction have been extracted from the *British Meteorological and Magnetic Year-Book for 1913.*

The unit of atmospheric pressure in the C.G.S. system is the megadyne per square centimetre, which is called the "bar" and is equivalent to a pressure of 750.076 millimetres of mercury (or 29.5306 inches) at the freezing point of water in latitude 45°.

The unit of rainfall measurement is the millimetre of rain.

The unit of wind velocity is the metre per second.

Temperature is measured in Centigrade degrees from the absolute zero, or 273° below the zero of the Centigrade scale.

T. F. CLAXTON.

ROYAL OBSERVATORY, HONGKONG.

TABLES FOR CONVERTING FROM BRITISH TO C.G.S. UNITS.

Table I.—Pressure.

Inches of mercury (at 32° F. and 45° Latitude) to Millibars.

The fundamental equations are:—

acceleration of gravity in latitude 45° = 980·617 cm./sec².
density of mercury at normal freezing-point of water = 13·5955.
1 mercury-inch = 33·8632 millibars.
1000 millibars = 1 bar = 29·5306 mercury inches = 750·076 mercury millimetres
using 1 inch = 2·54000 cm.

TABLE VII.—DIRECTION and VELOCITY of the WIND at every HOUR of the DAY, in the MONTH of JANUARY, 1920.

(The Direction is given in points, and the Velocity in miles per hour.)

(8 = East. 16 = South, &c. ... = Calm.)

Hours, Hongkong Standard Time.

Days of the Month.	1		2		3		4		5		6		7		8		9		10		11		Noon.		Days of the Month.

Phenomena :—

Fog :—on the 28th and 29th.

Slight fog :—on the 19th and 24th.

Haze :—on the 6th, 9th, 11th, 17th, 21st, 22nd and 25th.

Rain fell on 1 day. The mean hourly intensity was 0·007 ins., and the maximum fall in one hour was 0·015 ins. at 15h and 20h on the 31st.

The maximum squall velocity, as recorded by the Dines-Baxendall anemograph, was at the rate of 46 miles per hour at 7h 15m on the 12th.

* 0° = N., 90° = E., &c. † Maximum velocity in one hour.

January 7*d*. 12*h*. 10*m*.—No returns from Wladivostock or Japanese stations.

Pressure has decreased considerably at Weihaiwei, and slightly to moderately at other reporting stations. The anticyclone has probably moved eastward and another anticyclone has developed over China. Fresh to strong monsoon will prevail along the China coast and over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 inch. Total since January 1st, 0·00 inches, against an average of 0·16 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 8TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	N. and N.E. winds, fresh to strong; fine.
2.—Formosa Channel,	N. winds, strong to a gale.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

January 20*d.* 12*h.* 33*m.*—No returns from Vladivostock, Japan or the Marianas. Pressure has decreased considerably over N.E. China, and increased slightly from Hongkong to Tourane.

An anticyclone is central to the south of the Yangtze Valley, and a depression to the north-east of Shantung.

Fresh monsoon may be expected along the south-east coast of China and over the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 inch. Total since January 1st, 0·00 inches, against an average of 0·63 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 21st.

District.	Forecast.
1.—Hongkong to Gap Rock,	N. winds, fresh; fine, colder.
2.—Formosa Channel,	N.E. winds, strong.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

T. F. CLAXTON, *Director.*

January 26d. 12h. 32m.—No returns from Vladivostock, Shanghai, Japan or Indo-China. Apparently pressure has decreased over the whole of China. It is nearly stationary over the Philippines.

The anticyclone has moved eastward.

The monsoon is interrupted to the north of Swatow. It has probably moderated over the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 inch. Total since January 1st, 0·00 inches, against an average of 1·02 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 27TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	N.E. winds, moderate ; fair.
2.—Formosa Channel,	The same as No. 1.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

T. F. CLAXTON, *Director.*

Phenomena :—

Thick fog :—on the 2nd.

Fog :—on the 5th, 17th and 27th.

Slight fog :—on the 18th.

Rain fell on 14 days. The mean hourly intensity was 0·019 ins., and the maximum fall in one hour was 0·380 ins. at 18h on the 14th.

The maximum squall velocity, as recorded by the Dines-Baxendell anemograph, was at the rate of 48 miles per hour at 6h 42m on the 21st.

* 0° = N., 90° = E., &c.

† Maximum velocity in one hour.

February 10*d.* 11*h.* 37*m.*— No returns from Vladivostock, Japan, Indo-China or the Marianas. Pressure has increased considerably at Weihaiwei, and slightly at other reporting stations.

The anticyclone has strengthened.

Strong monsoon may be expected along the south-east coast of China and over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·03 inch. Total since January 1st, 0·27 inches, against an average of 1·04 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 11TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	N.E. winds, strong; overcast, some drizzling rain or [mist.
2.—Formosa Channel,	The same as No. 1.
3.—South coast of China between Hongkong and Lamooks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

T. F. CLAXTON, *Director.*

February 13*d.* 11*h.* 45*m.*—No returns from Japan or Wladivostock. Pressure has decreased slightly to moderately at all reporting stations. The anticyclone is now central over S. Manchuria and has weakened slightly.

Fresh to strong monsoon will prevail along the China coast, and over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·01 inch. Total since January 1st, 0·35 inches, against an average of 2·19 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 14TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	N.E. winds, fresh; cloudy, drizzling rain.
2.—Formosa Channel,	The same as No. 1.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

February 19*d*. 12*h*. 22*m*.—No returns from Vladivostouk, Shanghai, Indo-China or Japan. Pressure has increased slightly at Chinese stations and is nearly stationary over the Philippines.

The anticyclone is probably moving eastward.

Strong monsoon may be expected along the south-east coast of China and over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·22 inch. Total since January 1st, 2·37 inches, against an average of 2·53 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 20TH.

District.	Forecast.
1.—Hongkong to Gap Rock, ...	N.E. winds, strong; overcast, occasional rain.
2.—Formosa Channel, ...	**The same as No. 1.**
3.—South coast of China between Hongkong and Lamooks,	**The same as No. 1.**
4.—South coast of China between Hongkong and Hainan, .	**The same as No. 1.**

TABLE VII.—DIRECTION and VELOCITY of the WIND at every HOUR of the DAY, in the MONTH of MARCH, 1920.

(The Direction is given in points, and the Velocity in miles per hour.)

(8 = East. 16 = South, &c. ... = Calm.)

Hours, Hongkong Standard Time.

Phenomena :—

Lunar halo :—on the 1st.
Thick fog :—on the 11th.
Fog :—on the 8th, 9th, 10th, 12th, 21st, 22nd, 23rd, 25th, 30th and 31st.
Rainbow :—on the 30th.
Lightning :—on the 8th and 11th.
Thunder :—on the 13th.

Rain fell on 8 days. The mean hourly intensity was 0·018 ins., and the maximum fall in one hour was 0·230 ins. at 19h on the 12th.

The maximum squall velocity, as recorded by the Dines-Baxendell anemograph, was at the rate of 46 miles per hour at 9h 50m on the 12th.

* 0° = N., 90° = E., &c. † Maximum velocity in one hour.

March 4*d.* 12*h.* 28*m.*—No returns from Japan, Wladivostock and the Philippines.

Pressure has decreased considerably at Weihaiwei and slightly at Shanghai; it has increased slightly elsewhere, the anticyclone having extended southwards. Fresh to strong monsoon will continue along the China coast, and over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·03 inch. Total since January 1st, 3·07 inches, against an average of 3·41 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 5TH.

District.	Forecast.
1.—Hongkong to Gap Rock, ...	N. and N.E. winds, fresh; fair.
2.—Formosa Channel, ...	Northerly gale.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan, .	The same as No. 1.

March 20*d.* 12*h.* 10*m.*—No returns from Japan and Wladivostock. Pressure has increased slightly over the Philippines, and decreased slightly to moderately elsewhere. The anticyclone is probably passing into the Pacific, and there are indications of the formation of another over N. China.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 inch. **Total since January 1st,** 4·03 inches, against an average of 4·88 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 21st.

District.	Forecast.
1.—Hongkong to Gap Rock,	N.E. winds, moderate to fresh; fair.
2.—Formosa Channel,	N. winds, fresh.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

March 23*d*. 12*h*. 20*m*.—No returns from Japan, Wladivostock and Indo-China. Pressure has increased slightly to moderately at all stations reporting, an anticyclone of moderate intensity having developed to the north of the Yangtse. Fresh monsoon may be expected along the China coast, and over the north China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 inch. **Total since January 1st,** 4·03 **inches, against an average of** 5·24 **inches.**

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 24TH.

District.	Forecast.
1.—**Hongkong to Gap Rock,**	N.E. winds, fresh; cloudy, drizzling rain or mist.
2.—**Formosa Channel,**	N. winds, fresh to strong.
3.—**South coast of China between Hongkong and Lamooks,**	The same as No. 1.
4.—**South coast of China between Hongkong and Hainan,**	The same as No. 1.

Phenomena :—

Solar halo :—on the 18th.
Fog :—on the 1st, 2nd, 3rd, 12th, 16th, 18th, 19th and 21st.
Slight fog :—on the 11th, 13th and 20th.
Unusual Visibility :—on the 8th and 15th.
Lightning :—on the 5th, 7th, 11th, 18th, 19th, 20th and 22nd.
Thunder :—on the 5th, 18th, 20th and 24th.

Thunderstorms as follows :—

18d 5h 45m to 6h 15m N to S ; distant.
20d 12h 50m to 16h 15m SW to NE ; nearest at 13h 20m (5s).
23d 12h 40m to 15h 10m WSW to ENE ; nearest at 12h 56m (8s).
30d 1h 40m to 5h 20m NW to SE ; nearest at 5h 8m (20s).

Rain fell on 16 days. The mean hourly intensity was 0·092ins., and the maximum fall in one hour was 1·230ins. at 14h on the 25th.

The maximum squall velocity, as recorded by the Dines-Baxendell anemograph, was at the rate of 45 miles per hour at 23h 5m on the 22nd.

* 0° = N., 90° = E., &c. † Maximum velocity in one hour.

April *6d.* 12*h.* 25*m.*—No returns from Japan and Wladivostock. Pressure has increased moderately at Weihaiwei, and slightly at other stations on the China coast; it has decreased slightly over the Philippines. The anticyclone remains stationary and has gained further intensity. Fresh monsoon will continue along the China coast, and over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 1·22 **inch. Total since January 1st,** 5·35 **inches, against an average of** 6·98 **inches.**

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 7TH.

District.	Forecast.
1.—**Hongkong to Gap Rock,**	N.E. winds, strong; cloudy, occasional rain.
2.—**Formosa Channel,**	Northerly gale, moderating.
3.—**South coast of China between Hongkong and Lamocks,**	The same as No. 1.
4.—**South coast of China between Hongkong and Hainan,**	The same as No. 1.

April 22*d.* 12*h.* 17*m.*—No returns from Japan and Wladivostock. Pressure has increased considerably at Shanghai, and slightly to moderately over Formosa, and the east coast generally; it has decreased slightly elsewhere. The anticyclone has strengthened, and appears to have moved into the Yellow Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 **inch. Total since January 1st,** 9·06 **inches, against an average of** 9·88 **inches.**

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 23RD.

District.	Forecast.
1.—Hongkong to Gap Rock,	N.E. winds, strong, moderating; fair.
2.—Formosa Channel,	The same as No. 1.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

Phenomena :—

Solar halo :—on the 14th.
Lunar halo :—on the 22nd and 23rd.
Fog :—on the 11th, 15th and 16th.
Slight fog :—on the 19th, 22nd, 23rd and 27th.
Unusual Visibility :—on the 14th.
Dew :—on the 19th, 21st, 22nd and 23rd.

Rainbow :—on the 23rd.
Lightning :—on the 5th, 11th, 15th, 21st, 26th, [27th, 28th and 31st.
Thunder :—on the 23rd, 24th, 25th, 26th, 28th [and 31st.

Thunderstorms as follows :—

1d 00h 54m to 4h 12m SW to NE; nearest at [1h 15m (8s).
10d 9h 32m to 11h 30m in WSW; distant.
10d 13h 40m to 14h 50m in NW; distant.
10d 17h 43m to 23h 56m NW to SE; nearest at [23h 39m (5s).
14d 8h 5m to 10h 45m W to E; nearest at [9h 45m (9s).
16d 9h 15m to 11h 15m W to E; distant.
23d 16h 40m to 17h 15m in SSE; distant.
25d 1h 53m to 2h 30m in ENE; distant.
25d 6h 20m to 7h 30m SSW to NNE; distant.
26d 10h 45m to 11h 50m W to E; distant.
27d 5h 24m to 9h 15m NW to SE; nearest at [7h 36m (4s).
28d 4h 2m to 6h 15m S to N; nearest at [4h 45m (4s).
28d 12h 54m to 15h 30m WSW to ENE; nearest [at 13h 7m (3/4s).
28d 19h 57m to 22h 40m NW to SE; nearest at [20h 8m (4s).

Rain fell on 19 days. The mean hourly intensity was 0·120ins., and the maximum fall in one hour was 1·170ins. at 13h on the 28th.

The maximum squall velocity, as recorded by the Dines-Baxendell anemograph, was at the rate of 51 miles per hour at 10h 35m on the 5th.

* 0° = N., 90° = E., &c. † Maximum velocity in one hour.

May 1*d.* 12*h.* 25*m.*—No returns from Japan, Wladivostock and Indo-China. Pressure has increased slightly over N. China, and decreased slightly elsewhere. The depression over Annam and the China Sea has probably become deeper.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·74 **inch. Total since January 1st,** 13·10 **inches, against an average of** 11·90 **inches.**

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 2ND.

District.	Forecast.
1.—Hongkong to Gap Rock,	E. and N.E. winds, fresh; cloudy, rain.
2.—Formosa Channel,	N.E. winds, strong.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

C. W. JEFFRIES,—*Director.*

May 7*d.* 12*h.* 19*m.*—No returns from Japan, Wladivostock and Indo-China. Pressure has increased considerably over Formosa, and in the vicinity of Shanghai; it has increased slightly to moderately elsewhere, except at Weihaiwei, where a slight decrease has occurred. The depression has probably moved eastward into the Pacific, a shallow secondary remains in the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·20 inch. **Total since January 1st,** 16·91 inches, **against an average of** 13·44 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 8TH.

District.	Forecast.
1.—**Hongkong to Gap Rock,**	N.E. or variable winds, fresh; cloudy, occasional rain.
2.—**Formosa Channel,**	Variable, probably freshening from North.
3.—**South coast of China between Hongkong and Lamocks,**	The same as No. 1.
4.—**South coast of China between Hongkong and Hainan,**	The same as No. 1.

Phenomena :—

Solar halo :—on the 4th, 17th and 28th.
Solar corona :—on the 21st.
Lunar halo :—on the 23rd, 27th and 28th.
Lunar corona :—on the 26th.
Fog :—on the 11th and 12th.
Unusual Visibility :—on the 9th, 10th, 11th, 19th, 20th, 21st, 23rd, 29th and 30th.

Dew :—on the 4th, 5th and 6th.
Rainbow :—on the 19th.
Lightning :—on the 8th, 9th, 11th, 12th, 13th, 15th, 16th, 17th, 18th, 21st, 23rd, 24th, 25th, 26th and 27th.
Thunder :—on the 2nd, 9th, 10th, 12th, 15th, 16th, 25th and 26th.

Thunderstorms as follows :—

1^d 3^h 15^m to 5^h 20^m in S ; distant.
10^d 11^h 51^m to 12^h 30^m in NW ; distant.
12^d 6^h 40^m to 13^h 15^m SSE to NNW ; distant.
14^d 9^h 20^m to 10^h 20^m SSW to NNE ; nearest [at 9^h 41^m (6*).
18^d 5^h 15^m to 6^h 20^m in NW ; distant.
27^d 13^h 5^m to 15^h 15^m in NW ; distant.

Rain fell on 20 days. The mean hourly intensity was $0{\cdot}216^{ins.}$, and the maximum fall in one hour was $1{\cdot}200^{ins.}$ at 8^h on the 12th.

The maximum squall velocity, as recorded by the Dines-Baxendell anemograph, was at the rate of 51 miles per hour at 9^h 45^m on the 15th.

* 0° = N., 90° = E., &c.

† Maximum velocity in one hour.

TABLE VII.—DIRECTION and VELOCITY of the WIND at every HOUR of the DAY, in the MONTH of JULY, 1920.

(The Direction is given in points, and the Velocity in miles per hour.)

(8 = East. 16 = South, &c. ... = Calm.)

Hours, Hongkong Standard Time.

Days of the Month.	1		2		3		4		5		6		7		8		9		10		11		Noon.		Days of the Month.

Phenomena :—

Solar halo :—on the 7th and 24th.
Lunar halo :—on the 6th, 7th and 8th.
Lunar corona :—on the 25th and 26th.
Slight fog :—on the 26th and 27th.
Haze :—on the 22nd and 25th.

Unusual Visibility :—on the 1st, 8th, 9th, 28th and 29th.
Dew :—on the 28th.
Rainbow :—on the 1st, 6th, 9th, 11th, 12th and 13th.
Lightning :—on the 9th, 10th, 12th, 13th, 14th, 15th, 19th, 23rd and 29th.
Thunder :—on the 10th, 13th and 22nd.

Thunderstorms as follows :—

$13^d\ 18^h\ 44^m$ to $19^h\ 50^m$ in NE ; distant.
$13^d\ 22^h\ 55^m$ to $00^h\ 00^m$ in NNE ; nearest [at $22^h\ 59^m$ (5^s).
$18^d\ 8^h\ 48^m$ to $12^h\ 30^m$ NW to SE ; nearest [at $11^h\ 7^m$ (7^s).
$19^d\ 3^h\ 30^m$ to $4^h\ 50^m$ SE to NW ; distant.
$19^d\ 12^h\ 24^m$ to $13^h\ 35^m$ NE to SW ; distant.
$31^d\ 15^h\ 22^m$ to $16^h\ 45^m$ NW to SE ; nearest [at $15^h\ 39^m$ (12^s).

Rain fell on 18 days. The mean hourly intensity was $0{\cdot}243^{ins.}$, and the maximum fall in one hour was $1{\cdot}120^{ins.}$ at 10^h on the 19th.

The maximum squall velocity, as recorded by the Dines-Baxendell anemograph, was at the rate of 61 miles per hour at $22^h\ 58^m$ on the 30th.

* 0° = N., 90° = E., &c.

† Maximum velocity in one hour.

July 1*d.* 5*h.* 05*m.*—Warning to Hongkong:—Depression in Lat. 19° N. Long. 114° E., stationary or very slow.

July 1*d.* 12*h.* 05*m.*— No returns from Japanese stations. Pressure has again decreased slightly in the vicinity of Hongkong, and increased slightly elsewhere. The depression or typhoon is situated to the south of Hongkong within 200 miles; it is probably moving slowly to the W.N.W.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·04 inch. Total since January 1st, 46·07 inches, against an average of 39.57 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 2ND.

District.	Forecast.
1.—Hongkong to Gap Rock,	E. and N.E. winds, strong; cloudy, occasional rain.
2.—Formosa Channel,	The same as No. 1.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

C. W. JEFFRIES,—*Director.*

July *6d. 12h. 07m.*— No returns from Japanese stations. Pressure has decreased considerably at Wladivostock; other changes are slight. The northern depression has probably moved into the Sea of Japan; the southern depression remains over Tongking, and the low pressure area in the Pacific.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·10 inch. Total since January 1st, 50·19 inches, against an average of 41·61 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 7TH.

District.	Forecast.
1.—Hongkong to Gap Rock, ...	S. winds, moderate; fair.
2.—Formosa Channel, ...	The same as No. 1.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan, .	The same as No. 1.

July 15*d*. 11*h*. 35*m*.—Warning to Hongkong and Coast Ports:—A Typhoon within 60 miles of Lat. 26° N. Long. 124° E., moving N.W.

July 15*d*. 1:*h*. 43*m*.—No returns from Japan and Weihaiwei. Pressure has decreased slightly to moderately along the south-east coast of China, and increased slightly elsewhere. The typhoon is situated to the north of Formosa; it appears to have resumed a N.W. track and to threaten the coast to the north of Foochow.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 inch. Total since January 1st, 51·20 inches, against an average of 44.54 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 16TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	W. and S.W. winds, moderate; fine to cloudy, probably [some rain.
2.—Formosa Channel,	S. and S.W. winds, strong.
3.—South coast of China between Hongkong and Lamooks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

July 18*d*. 8*h*. 40*m*.—Local signal No. 5 hoisted.

July 18*d*. 12*h*. 45*m*.—Returns from the majority of stations are lacking this morning. Pressure is considerably below normal over south-east China and strong south-westerly winds are indicated over the north part of the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·10 inch. Total since January 1st, 51·30 inches, against an average of 45.79 inches.

N.B.—No weather map will be issued.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 19TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	S.W. winds, strong, moderating; cloudy, rain.
2.—Formosa Channel,	The same as No. 1.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

July 18*d*. 15*h*. 56*m*.—Warning to Hongkong:—Continental depression in Lat. 26° N. Long. 115° E.

July 19*d*. 12*h*. 18*m*.— No returns from Japan and Weihaiwei. Pressure has decreased slightly over Indo-China, the south coast of China, and the Philippines; it has increased slightly to moderately elsewhere. The typhoon, which entered the coast on the 15th inst. is situated to the north of Canton in the form of a depression of considerable intensity.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 4·21 inch. Total since January 1st, 55·51 inches, against an average of 46.22 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 20TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	S.W. gale, moderating; cloudy, squally, rain.
2.—Formosa Channel,	S. winds, strong.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

July 23*d*. 17*h*. 25*m*.—Warning to Hongkong and Coast Ports:—A Typhoon within 60 miles of Lat. 23° N. Long. 116° E., moving N.W.

July 24*d*. 6*h*. 05*m*.—Local signal No. 1 lowered.

July 24*d*. 11*h*. 20*m*.—Warning to Hongkong and Coast Ports:—A Typhoon in Lat. 23° N. Long. 118° E., recurving.

July 24*d*. 11*h*. 48*m*.—No returns from Japan, Wladivostock and Weihaiwei. Pressure has decreased moderately over Formosa and the east coast of China: it has increased slightly to moderately elsewhere. The typhoon appears to be stationary or recurving in Lat. 23° N. Long. 118° E.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 inch. Total since January 1st, 64·14 inches, against an average of 48·46 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 25TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	N.W. winds, moderate; fair.
2.—Formosa Channel,	Cyclonic gales.
3.—South coast of China between Hongkong and Lamooks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

Phenomena :—

Solar halo :—on the 6th, 8th, 22nd and 31st.
Lunar corona :—on the 28th.
Fog :—on the 28th and 29th.
Slight fog :—on the 10th, 17th and 18th.
Dew :—on the 15th, 16th and 20th.
Rainbow :—on the 28th.
Lightning :—on the 2nd, 3rd, 4th, 5th, 8th, 9th, 15th, 16th, 19th, 24th and 27th.
Thunder :—on the 2nd, 3rd, 4th, 9th, 10th, and 24th.

Thunderstorms as follows :—

3d 18h 28m to 21h 34m NW to SE ; nearest [at 18h 56m (8s).
4d 0h 35m to 2h 50m in SE ; distant.
10d 15h 53m to 17h 20m NW to SE ; nearest [at 16h 3m (5s).
12d 6h 25m to 7h 15m in NW ; distant.
17d 8h 2m to 8h 40m in SW ; distant.
24d 2h 50m to 3h 20m in E ; distant.
24d 6h 45m to 8h 32m in ESE ; distant.
27d 15h 25m to 15h 45m in NNW ; distant.

Rain fell on 20 days. The mean hourly intensity was 0·161ins., and the maximum fall in one hour was 1·035ins. at 1h on the 26th.

The maximum squall velocity, as recorded by the Dines-Baxendell anemograph, was at the rate of 57 miles per hour at 13h 40m on the 25th.

* 0° = N., 90° = E., &c.

† Maximum velocity in one hour.

July 31*d.* 16*h.* 52*m.*—Warning to Hongkong:—A Typhoon within 30 miles of Lat. 22° N. Long. 112° E., moving N.W.

August 1*d.* 00*h.* 40*m.*—Local signal No. 4 lowered.

August 1*d.* 12*h.* 45*m.*—Warning to Hongkong:—A Continental depression in Lat. 23° N. Long. 111° E., filling up.

August 1*d.* 12*h.* 45*m.*— No returns from Japanese stations. Pressure has decreased slightly at Wladivostock, Weihaiwei and Shanghai, and increased slightly to moderately elsewhere. The typhoon is situated in the vicinity of Wuchow, probably filling up.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 3·16 inch. Total since January 1st, 70·17 inches, against an average of 52·10 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 2ND.

District.	Forecast.
1.—Hongkong to Gap Rock,	S. and S.E. winds, fresh; cloudy, occasional rain.
2.—Formosa Channel,	The same as No. 1.
3.—South coast of China between Hongkong and Lamooks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

C. W. JEFFRIES,—*Director.*

August *2d.* 11*h.* 35*m.*— No returns from Japan, Wladivostock and Weihaiwei. Pressure has increased slightly at Shanghai, and decreased slightly elsewhere. The typhoon now exists as a depression to the north of Haiphong; there are also indications of the formation of a typhoon in the Pacific between Luzon and Guam.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 inch. Total since January 1st, 70·17 inches, against an average of 52·59 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 3RD.

District.	Forecast.
1.—Hongkong to Gap Rock,	S. winds, fresh, squally; cloudy, occasional rain.
2.—Formosa Channel,	The same as No. 1.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

August 3*d.* 12*h.* 25*m.*—No returns from Japanese stations. Pressure has decreased slightly to moderately at all reporting stations; it is below normal over China generally. A typhoon is indicated to the N.E. of Luzon, but owing to lack of observations from the northern part of that island, no definite position can be given.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·05 inch. **Total since January 1st,** 70·22 inches, **against an average of** 53·08 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 4TH.

August *9d. 11h. 14m.*—No returns from Japan and Weihaiwei. Pressure has increased slightly at Shanghai, and decreased slightly elsewhere; it remains lowest over S. China. A depression is indicated in the vicinity of Naha, but in the absence of returns from the Loochoo Islands, this lacks confirmation.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·01 inch. **Total since January 1st,** 72·51 inches, **against an average of** 56·12 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 10TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	S.W. winds, moderate; cloudy, occasional rain.
2.—Formosa Channel,	The same as No. 1.
3.—South coast of China between Hongkong and Lamooks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

C. W. JEFFRIES,—*Director.*

August 18*d.* 12*h.* 10*m.*—No returns from Japan and Wladivostock. Pressure has decreased moderately at Haiphong, and slightly at other reporting stations. The trough remains stationary and a depression has developed in the western extremity *i.e.* over Tonking.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·65 inch. Total since January 1st, 75·91 inches, against an average of 65·71 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 19TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	Light westerly or variable winds, probably freshening later from S. or S.E.; cloudy, rain.
2.—Formosa Channel,	N.E. winds, moderate.
3.—South coast of China between Hongkong and Lamooks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

C. W. JEFFRIES,—*Director.*

August 27*d*. 11*h*. 10*m*.—No returns from Japanese stations. Pressure has decreased moderately at Wladivostock and Guam, and slightly at Weihaiwei; it has increased slightly elsewhere. The typhoon has entered the Annam coast and filled up. Another typhoon is indicated in the Pacific to the south-east of Guam.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·43 inch. Total since January 1st, 80·70 inches, against an average of 64·48 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 28TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	S. winds, moderate; cloudy, occasional rain.
2.—Formosa Channel,	The same as No. 1.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

Phenomena :—

Solar halo :—on the 24th and 30th.
Lunar halo :—on the 2nd, 3rd, 21st, 22nd, 23rd and 24th.
Lunar corona :—on the 1st.
Haze :—on the 15th, 16th, 18th and 25th.
Unusual Visibility :—on the 11th.
Dew :—on the 1st and 17th.
Rainbow :—on the 22nd.
Lightning :—on the 2nd, 6th, 7th, 12th, 15th, 16th, 17th, 20th, 21st, 23rd, 24th and 25th.
Thunder :—on the 8th, 12th and 25th.

Thunderstorms as follows :—

6d 1h 50m to 3h 22m in SSW ; distant.
12d 18h 57m to 20h 45m NW to SE ; nearest [at 20h 29m (8s).
13d 12h 00m to 13h 50m in NE ; distant.
18d 2h 40m to 4h 30m in N ; distant.
23d 5h 03m to 5h 10m in WSW ; distant.

Rain fell on 15 days. The mean hourly intensity was 0·206ins., and the maximum fall in one hour was 1·435ins. at 21h on the 12th.

The maximum squall velocity, as recorded by the Dines-Baxendell anemograph, was at the rate of 45 miles per hour at 10h 12m on the 22nd.

* 0° = N., 90° = E., &c. † Maximum velocity in one hour.

September 1*d.* 12*h.* 20*m.*—No returns from Japanese stations; Manila is the only station reporting from the Philippines. Pressure has increased considerably at Wladivostock, and slightly at Weihaiwei and Shanghai; it has decreased slightly to moderately elsewhere; the depression remains over Tongking. The typhoon continues on a W.N.W. track; its approximate position at 6 a.m. being Lat. 20° N. Long. 124° E.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·03 inch. Total since January 1st, 81·08 inches, against an average of 66·33 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 2ND.

District.	Forecast.
1.—Hongkong to Gap Rock,	N.E. winds, fresh to strong; fair.
2.—Formosa Channel,	N. winds, strong to a gale.
3.—South coast of China between Hongkong and Lamooks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

September 1*d.* 14*h.* 40*m.*—Warning to Hongkong, Phulien, Manila and Coast Ports:—A severe typhoon within 60 miles of Lat. 20° N. Long. 123° E., moving W.N.W.

September 2*d.* 12*h.* 25*m.*—No returns from Japan and Weihaiwei; Manila is again the only station reporting from the Philippines. Pressure has decreased slightly to moderately at all stations; the Tongking depression appears to have merged into an area of relatively low pressure covering the north part of the China Sea. Belated returns from the Loochoos indicate that the typhoon has pursued a more northerly track than that assumed hitherto; a probable position at 6 a.m. this morning wrs Lat. 22° N. Long. 124° E., moving northwards; in the absence of returns from the Loochoos, it lacks confirmation.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 inch. Total since January 1st, 81·08 inches, against an average of 66·67 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 3RD.

District.	Forecast.
1.—Hongkong to Gap Rock,	W. and N.W. winds, moderate; fine to cloudy, probably some rain.
2.—Formosa Channel,	N. winds, strong.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

W. JEFFRIES,—*Director.*

September 4*d.* 10*h.* 45*m.*—Local signal No. 1 hoisted.

September 4*d.* 11*h.* 55*m.*—Warning to Hongkong, Manila and Coast Ports:—A severe typhoon within 60 miles of Lat. 25° N. Long. 121° E., stationary or very slow.

September 4*d.* 12*h.* 01*m.* Returns from Japan are lacking, Formosa, Indo-China and the Philippines report from a single station only. Pressure has increased moderately at Wladivostock, and slightly at Weihaiwei and Manila; it has decreased considerably at Taihoku and stations on the east coast of China. The typhoon is probably situated over or near northern Formosa, moving slowly westwards.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inch. Total since January 1st, 81.08 inches, against an average of 67.31 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 5TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	W. and N.W. winds, fresh to strong; cloudy, squally, [rain.
2.—Formosa Channel,	Cyclonic gales.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

September 17*d.* 12*h.* 08*m.*—Pressure has increased considerably over central Japan, moderately over South Manchuria, and slightly elsewhere; except over Indo China where a slight decrease has occurred. The depression over Japan yesterday has moved into the Pacific, a shallow depression is situated to the west of Haiphong, and an irregular area of relatively low pressure extends from the Visayas to the Bonins. A weak anticyclone has developed over South Manchuria.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 inch. Total since January 1st, 90·67 inches, against an average of 71·80 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 18TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	W. or variable winds, light to moderate; fair.
2.—Formosa Channel,	The same as No. 1.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

September 21*d.* 11*h.* 57*m.*—Warning to Hongkong, Phulien, Manila and Coast Ports:—A typhoon forming in Lat. 15° N. Long. 113° E., position uncertain.

September 21*d.* 11*h.* 58*m.*—No returns from Japanese stations. Pressure has decreased considerably at Weihaiwei, and slightly to moderately elsewhere. The anticyclone has moved eastward and weakened; a depression appears to be developing in the China Sea to the south-east of the Paracels and there are also indications of a typhoon to the south of Guam.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·05 inch. Total since January 1st, 90·72 inches, against an average of 73·12 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 22ND.

September 27*d*. 12*h*. 30*m*.—Warning to Hongkong, Phulien, Manila and Coast Ports:—A typhoon within 60 miles of Lat. 20° N. Long. 117° E., moving N.N.E.

September 27*d*. 14*h*. 50*m*.—Warning to Hongkong:—A typhoon within 60 miles of Lat. 23° N. Long. 129° E., moving N.N.E.

September 28*d*. 12*h*. 15*m*.—Warning to Hongkong, Phulien, Manila and Coast Ports:—A typhoon within 60 miles of Lat. 15° N. Long. 113° E., moving W.

September 28*d*. 12*h*. 20*m*.—No returns from Japanese stations. Pressure has increased slightly over Formosa and the Philippines, and decreased slightly to moderately elsewhere. The position of the typhoon in the Pacific is uncertain this morning owing to lack of returns from the Loochoos; it is probably situated near Oshima, moving N. or N.N.E. A depression or typhoon is situated in the China Sea to the S.E. of the Macclesfield Bank, probably moving W.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 inch. Total since January 1st, 92·83 inches, against an average of 75·10 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 29TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	E. and N.E. winds, fresh; fine.
2.—Formosa Channel,	N.E. winds, strong.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

September 29*d*. 11*h*. 40*m*.—Warning to Hongkong, Phulien, Manila and Coast Ports:—A typhoon within 60 miles of Lat. 17° N. Long. 113° E., stationary or very slow.

September 29*d*. 12*h*. 10*m*.—No returns from Japan. Pressure has increased slightly over the Philippines, and decreased slightly to moderately elsewhere, a weak anticyclone covers North China. The depression of the China Sea is situated between the Paracels and the Macclesfield Bank, nearly stationary or recurving to the N.E. The typhoon of the Pacific is probably approaching South Japan on a N.N.E. track.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 inch. Total since January 1st, 92·83 inches, against an average of 75·37 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 30TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	N.E. winds, fresh to strong; fine at first, cloudy and [rainy later.
2.—Formosa Channel,	N.E. winds, strong.
3.—South coast of China between Hongkong and Lamooks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

September 29*d*. 16*h*. 10*m*.—Local signal No. 1 hoisted.

September 29*d*. 19*h*. 35*m*.—Warning to Hongkong:—A typhoon within 60 miles of Lat. 18° N. Long. 114° E., moving N.

September 30*d*. 11*h*. 15*m*.—Warning to Hongkong, Phulien, Manila and Coast Ports:—A typhoon within 60 miles of Lat. 20° N. Long. 117° E., moving N.E.

September 30*d*. 11*h*. 40*m*.—No returns from Japanese stations. Pressure has decreased slightly to moderately at the majority or reporting stations. The typhoon of the Pacific is probably near or over South Japan. The depression of the China Sea has recurved; it is situated to the immediate S.E. of Pratas Shoal, moving N.E.; it does not yet appear to be of great intensity.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 inch. Total since January 1st, 92·83 inches, against an average of 75·65 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON OCTOBER 1st.

District.	Forecast.
1.—Hongkong to Gap Rock, ...	N.W. or variable winds, moderate to fresh; cloudy, [occasional rain.
2.—Formosa Channel, ...	N. winds, fresh to strong.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan, .	The same as No. 1.

Phenomena :—

Lunar halo :—on the 1st, 5th and 24th.
Unusual Visibility :—on the 13th and 17th.
Lightning :—on the 2nd, 3rd, 4th, 5th, 11th and 27th.

Thunderstorms as follows :—

2d 14h 6m to 15h 40m SE to NW ; nearest at 14h 42m (6s).
12d 6h 15m to 6h 50m in WSW ; distant.

Rain fell on 14 days. The mean hourly intensity was 0·121ins., and the aximum fall in one hour was 0·670ins. at 15h on the 2nd.

The maximum squall velocity, as recorded by the Dines-Baxendell anemograph, was at the rate of 50 miles per hour at 7h 50m on the 8th.

* 0° = N., 90° = E., &c.

† Maximum velocity in one hour.

October 1*d.* 5*h.* 00*m.*—Local signal No. 1 lowered.

October 1*d.* 11*h.* 31*m.*—No returns from Japan and Shanghai. Pressure has increased moderately at Weihaiwei, and slightly elsewhere; an anticyclone is probably developing over N. China. The track of the depression in the China Sea since yesterday is very uncertain; local observations indicate the resumption of a westerly track and subsequent filling up to the south-east of the Colony.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·06 inch. Total since January 1st, 92·89 inches, against an average of 75·93 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 2ND.

District.	Forecast.
1.—Hongkong to Gap Rock,	E. and N.E. winds, fresh; cloudy, occasional rain.
2.—Formosa Channel,	N.E. winds, strong.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

C. W. JEFFRIES,—*Director.*

October 3*d.* 12*h.* 30*m.*—No returns from Japanese stations. Pressure has decreased considerably at Wladivostock, and moderately at Weihaiwei; it has increased slightly over S. China and Tongking. The anticyclone has moved into the Pacific. Pressure is still relatively low over the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 1·06 inch. Total since January 1st, 93·95 inches, against an average of 76·52 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 4TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	N.E. winds, moderate; fair.
2.—Formosa Channel,	The same as No. 1.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

October 5*d.* 20*h.* 27*m.*—Warning to Hongkong:—A typhoon or depression within 60 miles of Lat. 18° N. Long. 113° E., moving W.

October 6*d.* 11*h.* 28*m.*—Warning to Hongkong:—A typhoon or depression in Lat. 18° N. Long. 113° E., stationary or very slow.

October 6*d.* 11*h.* 38*m.*—No returns from Japanese stations. Pressure has decreased slightly at Wladivostock and Weihaiwei, and increased slightly elsewhere; the anticyclone remains stationary. The depression which formed in the China Sea yesterday has not yet shown signs of movement; it will probably fill up.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·75 inch. Total since January 1st, 94·70 inches, against an average of 77·40 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 7TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	E. and N.E. winds, fresh; cloudy, showery.
2.—Formosa Channel,	N. and N.E. winds, fresh.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

October 13*d.* 11*h.* 29*m.*—No returns from Japan and Weihaiwei. Pressure has decreased slightly at Wladivostock, and over the Visayas; it has increased slightly elsewhere, a weak anticyclone having developed over N. China. The typhoon has probably recurved to the N.E., but a fresh centre is indicated to the east of S. Luzon; its direction of motion is at present unknown.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 inch. Total since January 1st, 98·52 inches, against an average of 78·99 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 15TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	N. and N.E. winds, moderate to fresh; fine.
2.—Formosa Channel,	N. winds, strong.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

October 21*d.* 12*h.* 34*m.*—Pressure has decreased considerably over Japan and moderately at Wladivostock and Weihaiwei, and increased moderately at Ishigakijima and the Bonin Island; other changes are slight. The anticyclone has moved eastward and another anticyclone is probably developing over N. China. A typhoon is situated near Oshima, moving N.N.E.. Moderate to fresh monsoon will prevail along the China Coast, and over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 inch. Total since January 1st, 98·97 inches, against an average of 79·75 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 22ND.

District.	Forecast.
1.—Hongkong to Gap Rock,	N. and N.E. winds, moderate; fine.
2.—Formosa Channel,	N. winds, strong.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

October 25*d.* 12*h.* com.—No returns from Japan and Indo-China. The anticyclone has decreased slightly in intensity and moved northwards. Pressure has decreased moderately at Vladivostock and slightly at Shanghai; changes at other reporting stations are slight. Fresh monsoon will prevail along the China Coast and over the north part of the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 inch. **Total since January 1st,** 98·97 inches, **against an average of** 80·10 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 26TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	N.E. winds, fresh; fine.
2.—Formosa Channel,	The same as No. 1.
3.—South coast of China between Hongkong and Lamooks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

October 28*d*. 11*h*. 19*m*.—No returns from Japan. Pressure has increased slightly to moderately at all reporting stations. An anticyclone has again developed over N. China, and moderate to fresh monsoon will prevail along the China Coast, and over the north part of the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 inch. Total since January 1st, 98·97 inches, against an average of 80·34 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 29TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	N.E. winds, moderate to fresh; fine.
2.—Formosa Channel,	N. winds, fresh to strong.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

C. W. JEFFRIES,—*Director*.

Phenomena :—

Solar halo :—on the 27th.
Lunar halo :—on the 23rd and 24th.
Slight fog :—on the 11th and 19th.
Haze :—on the 4th.
Unusual Visibility :—on the 11th.
Dew :—on the 9th.
Rainbow :—on the 7th.

Rain fell on 8 days. The mean hourly intensity was 0·098ins., and the maximum fall in one hour was 0·645ins. at 17h on the 17th.

* The maximum squall velocity, as recorded by the Dines-Baxendell anemograph, was at the rate of 41 miles per hour at 1h 56m on the 17th.

* 0° = N., 90° = E., &c. † Maximum velocity in one hour.

November 1*d.* 11*h.* 25*m.*—No returns from Japanese stations. Pressure has increased slightly to moderately at all stations reporting. The anticyclone has increased in intensity, and moderate to fresh monsoon will prevail along the China Coast, and over the north part of the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·06 inch. Total since January 1st, 99·03 inches, against an average of 80·62 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 2ND.

District.	Forecast.
1.—Hongkong to Gap Rock,	N.E. winds, fresh; fine.
2.—Formosa Channel,	N. winds, fresh to strong.
3.—South coast of China between Hongkong and Lamooks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

C. W. JEFFRIES,—*Director.*

November *2d. 11h. 55m.*—No returns from Japanese stations. Pressure has decreased slightly over the Philippines, and increased slightly elsewhere; the anticyclone appears to be moving eastwards. Moderate to fresh monsoon will prevail along the coast to the south of Foochow, and over the north part of the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 inch. Total since January 1st, 99·03 inches, against an average of 80·67 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 3RD.

District.	Forecast.
1.—Hongkong to Gap Rock,	N.E. winds, fresh; fine.
2.—Formosa Channel,	The same as No. 1.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

November 8*d.* 11*h.* 53*m.*—No returns from Japan and Indo-China. Pressure has increased considerably at Wladivostock, and decreased slightly elsewhere. The anticyclone has moved into the Pacific, and another may be expected to develop over N. China.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·10 inch. Total since January 1st, 99·29 inches, against an average of 80·98 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 9TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	N.E. winds, moderate; cloudy, occasional rain.
2.—Formosa Channel,	N. winds, fresh.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

November 11*d.* 11*h.* 55*m.*—No returns from Japan and Indo-China. Pressure has increased slightly to moderately at all stations reporting. The anticyclone remains stationary over N. China and S. Manchuria; the typhoon appears to be filling up to the east of S. Formosa; in the absence of returns from the Loochoos this lacks confirmation.

Fresh monsoon will prevail along the China Coast, and over the north part of the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 1·62 inch. Total since January 1st, 100·91 inches, against an average of 81·15 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 12TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	N.E. winds, fresh; cloudy, rainy, improving later.
2.—Formosa Channel,	N. winds, strong to a gale.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

November 14*d.* 10*h.* 45*m.*— No returns from Japan, Wladivostock and Indo-China. The anticyclone has commenced to move eastward and pressure has decreased slightly at the majority of reporting stations. Fresh to strong monsoon will continue along the coast to the south of Foochow, and over the north part of the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 inch. Total since January 1st, 100·96 inches, against an average of 81·33 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 15TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	N.E. winds, fresh; fair.
2.—Formosa Channel,	N. winds, strong.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

November 30*d.* 12*h.* 05*m.*—No returns from Japan and Indo-China. Presure has increased slightly at the majority of reporting stations. The anticyclone continues to move slowly eastward, and another will probably develop over N. China.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·04 **inch. Total since January 1st,** 106·07 **inches, against an average of** 81·98 **inches.**

FORECAST FOR THE 24 HOURS ENDING AT NOON ON DECEMBER 1st.

District.	Forecast.
1.—Hongkong to Gap Rock,	N. and N.E. winds, moderate; fair.
2.—Formosa Channel,	The same as No. 1.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

MONTHLY METEOROLOGICAL BULLETIN.

DECEMBER, 1920.

INTRODUCTION.

In this Bulletin an annual summary of the Hongkong Observations for the year 1920 is given in Tables XIII to XX, following the usual monthly Tables. They contain mean and extreme values of the principal Meteorological Elements, in British and C.G.S. Units, and of the prevalence of different phenomena for each month, and for the year, together with the normal values (for the period 1884-1918 unless otherwise stated). Also five-day means of the principal meteorological elements for the year 1920 and the period 1884-1918.

The readings of the barometer in British Units are *not* reduced to sea-level, or to the gravity at latitude 45°.

In the column headed "Days of rain" only those days have been counted on which the fall amounted to or exceeded 0·01 inch.

The remaining columns in the Tables require no special remark, the necessary explanations having been given in the Introduction to the Bulletin for the month of January.

The tracks of the typhoons and principal depressions which occurred in the Far East during the year 1920 are shown on two plates following the five-day means.

The results of Magnetic Observations made in the year 1920 are given at the end of the Bulletin.

T. F. CLAXTON.

ROYAL OBSERVATORY, HONGKONG.

Phenomena :—

Lunar halo :—on the 17th.

Lunar corona :—on the 18th, 19th, 22nd and 27th.

Slight fog :—on the 5th and 6th.

Haze :—on the 2nd.

Lightning :—on the 6th.

Rain fell on 8 days. The mean hourly intensity was 0·026ins., and the maximum fall in one hour was 0·400ins. at 9h on the 30th.

The maximum squall velocity, as recorded by the Dines-Baxendell anemograph, was at the rate of 39 miles per hour at 10h 25m on the 1st.

* 0° = N., 90° = E., &c. † Maximum velocity in one hour.

December 3*d*. 12*h*. 08*m*.—No returns from Japan and Indo-China. Presure has decreased considerably at Wladivostock; changes at other stations are slight. The anticyclone has moved into the Pacific, and another has developed over N. China. The monsoon will probably freshen along the coast during the next twenty-four hours.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·05 inch. Total since January 1st, 106·14 inches, against an average of 82·09 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 4TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	N.E. winds, moderate to fresh; cloudy, rain later.
2.—Formosa Channel,	The same as No. 1.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

C. W. JEFFRIES,—*Director.*

December 10*d.* 12*h.* 32*m.*—No returns from Indo-China. Pressure has increased considerably over Japan, and decreased slightly at the majority of stations in the west and south-west.

The anticyclone is now central over mid-Japan.

The monsoon is interrupted to the north of Foochow. It will probably remain fresh over the western portion of the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 inch. Total since January 1st, 106·63 inches, against an average of 82·38 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 11TH.

District.	Forecast.
1.—Hongkong to Gap Rock, ...	N. winds, moderate; fair.
2.—Formosa Channel, ...	N.E. winds, fresh.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 2.
4.—South coast of China between Hongkong and Hainan, .	The same as No. 1.

T. F. CLAXTON, *Director.*

December 22*d.* 11*h.* 30*m.*—Warning to Hongkong, Phulien, Manila and Coast Ports:—A typhoon or depression within 120 miles of Lat. 10° S. Long. 130° E., direction unknown.

December 22*d.* 11*h.* 38*m.*—Pressure has decreased slightly over the Philippines and Formosa, and along the south coast of China.

Another anticyclone has formed over N. China.

Depressions are shown to the east of the southern Visayas and to the south of Guam. They may become typhoons.

The monsoon will freshen along the east coast of China and over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·03 inch. Total since January 1st, 107·06 inches, against an average of 82·84 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 23RD.

District.	Forecast.
1.—Hongkong to Gap Rock,	N.E. winds, moderate to fresh; fair.
2.—Formosa Channel,	N.E. winds, fresh to strong.
3.—South coast of China between Hongkong and Lamooks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

T. F. CLAXTON, *Director.*

December 23*d.* 11*h.* 02*m.*—Warning to Hongkong, Phulien, Manila and Coast Ports:—A depression within 120 miles of Lat. 11° N. and Long. 128° E., filling up.

December 23*d.* 11*h.* 05*m.*—No returns from Wladivostock or Japanese stations. Pressure has increased moderately from Shanghai to Haiphong, and slightly over Formosa and the Philippines. It has decreased slightly at Guam.

The depression to the east of the Visayas appears to be filling up.

The other depression has moved to the north of Guam.

Strong monsoon may be expected along the south-east coast of China and over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 inch. Total since January 1st, 107·06 inches, against an average of 82·88 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 24TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	N. winds, strong; fine.
2.—Formosa Channel,	The same as No. 1.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	N.E. winds, fresh.

December 25*d*. 11*h*. 15*m*.—No returns from Japan or S. Indo-China. Pressure has decreased moderately at Wladivostock, and increased slightly from Shanghai to Hongkong, and from Formosa to the Visayas.

The anticyclone has increased in intensity.

Fresh monsoon may be expected along the south-east coast of China and over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 inch. Total since January 1st, 107·06 inches, against an average of 82·96 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 26TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	N.E. winds, fresh; fine.
2.—Formosa Channel,	N.E. winds, strong.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

December 28*d*. 11*h*. 46*m*.—No returns from Wladivostock, Guam or Japanese stations.

Pressure has increased moderately along the east coast of China. It is nearly stationary at other reporting stations.

The anticyclone over N. China has increased in intensity.

Conditions are still unsettled over the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 inch. Total since January 1st, 107·06 inches, against an average of 83·08 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 29TH.

District.	Forecast.
1.—Hongkong to Gap Rock,	N.E. winds, fresh; fine to cloudy.
2.—Formosa Channel,	N.E. winds, strong.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

December 30*d.* 11*h.* 58*m.*—No returns from Japanese stations. Pressure has decreased considerably along the east coast of China, and increased slightly at Wladivostock. It has decreased slightly at other reporting stations.

A strong anticyclone is central to the north of Wladivostock.

The monsoon is interrupted along the south-east coast of China, and has probably moderated over the N. China Sea, where conditions are unsettled.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·77 inch. Total since January 1st, 107·83 inches, against an average of 83·16 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 31st.

District.	Forecast.
1.—Hongkong to Gap Rock,	N.E. winds, moderate; fair.
2.—Formosa Channel,	Variable winds, freshening later from N.E.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 2.
4.—South coast of China between Hongkong and Hainan,	East winds, moderate.

December 31*d.* 11*h.* 53*m.*—No returns from Wladivostock or Japanese stations.

Pressure has increased considerably at Shanghai, and slightly from Amoy to Kwong Chau Wan. It has decreased slightly over the Philippines.

A new anticyclone has formed over N. China. Fresh monsoon may be expected along the east coast of China. Conditions remain unsettled over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·05 inch. Total since January 1st, 107·88 inches, against an average of 83·20 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON JANUARY 1st, 1921.

District.	Forecast.
1.—Hongkong to Gap Rock,	N.E. winds, fresh; generally cloudy, some drizzle or [mist later.
2.—Formosa Channel,	N.E. winds, strong.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

T. F. CLAXTON, *Director.*

January 1*d*. 11*h*. 32*m*.—No returns from Wladivostock, Japanese stations or Borneo.

Pressure has decreased slightly at Shanghai, and increased slightly from Formosa to Hongkong. Elsewhere changes since yesterday are slight.

The anticyclone has weakened and moved eastward.

The monsoon is interrupted to the north of Swatow. Conditions over the N. China Sea remain unsettled.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0·00 inch. Total since January 1st, 0·00 inches, against an average of 0·03 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON ON THE 2ND.

District.	Forecast.
1.—Hongkong to Gap Rock, ...	E. winds, moderate; fine to cloudy, some rain later.
2.—Formosa Channel, ...	N.E. winds, strong, moderating.
3.—South coast of China between Hongkong and Lamocks,	The same as No. 1.
4.—South coast of China between Hongkong and Hainan, .	The same as No. 1.

T. F. CLAXTON, *Director.*

ROYAL OBSERVATORY, HONGKONG.

RESULTS

OF

MAGNETIC OBSERVATIONS,

1920.

ROYAL OBSERVATORY, HONGKONG.

RESULTS

OF

MAGNETIC OBSERVATIONS,

1920.

Observations of magnetic declination and horizontal force are made each month with the Kew pattern unifilar magnetometer, Elliott No. 55, and observations of magnetic dip with the Kew pattern dip circle, Dover No. 71 ; four dip needles being used in rotation. The instruments are mounted 116 feet above mean sea level.

A complete determination of horizontal force consists of one set of vibrations taken between two sets of deflection, so that the time at which the vibrations are observed may be considered as the time of observation of the force. A complete determination of dip consists of two observations with different needles, in the following order : Needle 1, end A dipping ; needle 2, end A dipping ; needle 2, end B dipping ; needle 1, end B dipping. The vertical and total forces are derived from the observed values of horizontal force and dip in each month.

In all published results the following formulæ have been used in computing the horizontal force. The letters are those of the original Kew notation.

$$T_{,} = T_{\circ} \ (1 - S/86400 - \alpha\alpha'/16).$$
$$T^2 = T_{,}^2 \ (1 + H/F + \mu X_{\circ}/m_{\circ} - qt - q't^2).$$
$$mX = \pi^2 K/T^2 \qquad m_{\circ}/X_{\circ} = \tfrac{1}{2} r^3 \text{ Sin } U_{\circ}.$$
$$m_{,}/X_{,} = m_{\circ}/X_{\circ} \ (1 + 2\mu/r_{\circ}^3 + qt + q't^2).$$
$$m/X = m_{,}/X_{,} \ (1 - P/r_{\circ}^2).$$
$$P = (A - A') \div (A/r^2 - A'/r_{,}^2).$$

Beginning with the year 1912 the observations of horizontal force have been reduced by the aid of three tables ; the first giving the correction to log. T for varying chronometer rates and arcs of vibration (mean of the arcs at beginning and end of the observations), the second giving the values of log. $\pi^2 K$ − log. $(1 + H/F + \mu X_{\circ}/m_{\circ} - qt - q't^2)$ at varying values of t, when $(1 + H/F + \mu X_{\circ}/m_{\circ}) = 1{\cdot}00354$, with a subsidiary table of corrections for any departure from this value, and the third giving the values of log. $(1 + 2\mu/r_{\circ}^3 + qt + q't^2)$ + log. $\frac{1}{2}r^3$ + log. $(1 - P/r_{\circ}^2)$ for varying values of t, and two values of r, namely, 30 cms. and 40 cms. The value of P used in this table was 7·05 (the mean for the three years 1909-11).

The calculated values of P for the years 1912-20 are given below, together with the corrections applicable to the published values of log. m/X, m, and X, had these values of P been used instead of the value (7·05) adopted in the above mentioned table.

Year.	Mean value of P for year.	Correction to published values of log. m/X.	Correction to published values of m.	Correction to published values of X.

The adopted constants of this instrument are as follows :—

Deflection apparatus.

Angular value of one scale division = 1′·008.

Collimator magnet 55.

Angular value of one scale division = 1′·844.

Temperature co-efficients.

$q = 0{\cdot}000260 \qquad q' = 0{\cdot}00000244.$

Induction co-efficient.

$\mu = 5{\cdot}189.$

Log. $\pi^2 K = 3{\cdot}44899 + {\cdot}00001\,t.$

Auxiliary inertia cylinder, No. 55.

Mass = 62·63 grammes.
Length = 9·4214 cms. at 0°, C.
Diameter = 1·0006 ,, ,,

Deflection Bar

Graduation correct throughout. (Bending effect of deflecting magnet and carriage not allowed for.)

Values of $1 + 2\mu/r^3$ $\begin{cases} 1{\cdot}00038 \text{ at } 30 \text{ cms.} \\ 1{\cdot}00016 \text{ at } 40 \text{ cms.} \end{cases}$

The results of the observations made in the year 1920 are given on the following page. The initials C.W.J. and B.D.E. are those of Mr. Jeffries and Mr. Evans respectively.
