PAKISTAN DAILY WEATHER REPORT.

Reg No S-1467
Volume No.

SATURDAY THE 1st APRIL, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's secondary western disturbance is now moving across Kashmir. The complex western disturbance is moving across the central and Northern divisions of west Pakistan. Under their influence rain/thundershowers have been widespread in Lahore, Sargodha and Peshawar divisions fairly widespread in Rawalpindi division, local in D.I. Khan and Quetta divisions. A few falls of rain/showers have also been reported from Karachi, Multan, Bahawalpur divisions. Weather remained dry elsewhere in West Pakistan. The low pressure area over coastal Oman has become unimportant.

Data absent from East Pakistan but neighbouring observations indicate that the westerly low pressure wave is m ving across East Pakistan and adjoining Assam. Another westerly low pressure wave lies over North Bihar and neighbourhood.

Chief amounts of rainfall are: Murree 1½" Cherat and Landi Kotal 1" each, Chakdara, Kakul and Parachinar 3/4" each and Sialkot, Islamabad, Rawalpindi, Drosh and Peshawar 1/4", Bannu, Harnai and Chaman ½", Lahore, Jehlum, Sargodha, Lyallpur, wana, Fort Sandeman and Samungli ¼" each.

Night tempertures were generally 3—12 °F (2—7°C) below normal in West Pakistan outside Karachi division, where these were nearly normal.

Forcast valid until the evening of 2nd March 1967 :— Fairly widespread rain/thundershowers with locally moderate to heavy falls are likely to occur in Lahore, Rawalpindi, Peshawar and Sargodha divisions and in Kashmir local rain/thundershowers in D. I. Khan, Quetta, Multan, Bahawalpur and Chittagong divisions and scattered elsewhere in the country outside southern ports of Kalat and Karachi divisions.

† Given in Code.
* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.
** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.
RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs G.M.T of the same day.
Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PPP—Pressure in hundreds tens and units of millibars.

TTT; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.)

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulbtemperatures in °C,

50 has been added to the numbers When temperatures. are negative

SUNDAY THE 2nd APRIL, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's scondary western disturbance has moved away across Kashmir. The complex western disturbance is now moving across the northern divisions of west Pakistan and adjonining Kashmir. Under their influence rain/thundershowers have been local over Peshawar and Rawalpindi divisions, Thunderstorms/light showers have also been reported from a number of places in Sargodha, Lahore, Bahawalpur Multan and Quetta divisions. Weather remained dry elsewhere in the country.

The westerly low pressure wave over East Pakistan and adjoining Assam has moved away Northeastwards. The other westerly low pressure wave over North Bihar is feeble and now moving across Northern parts of East Pakistan and adjoining Assam.

Chief amounts of rainfall are: Jhelum 1", Murree, Drosh and Landikotal (upto 0000£) ¼" each.

Night tempertures were generally 3—12 °F (2—7°C) below normal over the country outside Chittagong, Khulna, Lahore, Bahawalpur divisions where these were nearly normal.

Forcast valid until the evening of 3rd APRIL 1967 :— Local rain/thundershowers are likely to occur in Rawalpindi, Lahore, Peshawar, divisions and in Kashmir, scattered in Sargodha, D. I Khan and Multan divisions and in East Pakistan. Dry weather will prevail elsewhere in the country.

rachi-11
2nd April, 1967.

OBSERVATIONS

(N. A. QURESHI)
for Director, Meterological Services.

PAKISTAN DAILY WEATHER REPORT

MONDAY THE 3rd APRIL, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over Northern divisions of West Pakistan has moved away Northeastwards across Kashmir. It has caused scattered rain/thundershowers over Peshawar, D.I. Khan and Quetta divisions. A few falls of light rain or drizzle have also been reported from Rawalpindi and Multan divisions. Weather remained dry elsewhere in the country.

A western disturbance lies over Afghanistan and adjonining Quetta and D.I. Khan divisions. Another western disturbance lies over northeast Iran.

The feeble westerly low pressure wave is moving across Northeastern parts of East Pakistan and adjoining Assam.

Chief amounts of rain fall are :- Kakul, Bannu and Loralai 1/" eaeh.

Night temperatures were 3—11°F(2—6°C)below normal in East Pakistan.

Forcast valid until the evening of 4th APRIL 1967 :— Local rain/thundershowers are likely to occur in D.I. Khan, Peshawar and Rawalpindi divisions and in Sargodha, Multan, Lahore Quetta and upper Chittagong divisions. Dry weather will prevail elsewhere in the country.

chi-11
3rd April, 1967.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

WEDNESDAY THE 5th APRIL, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance is moving away across Kashmir. Under its influence rain/thundershowers have been local over Peshawar and Sargodha divisions and scattered over D.I. Khan division. A few falls of light showers have also been reported from Rawalpindi division. Weather remained dry elsewhere in the country.

The western disturbance over Northeast Iran is moving across Northeast Iran and adjoining Russian Turkistan.

The western disturbance over Iraq now lies over southeast Iraq and adjoining southwest Iran.

Chief amounts of rain fall are :- Drosh and Chakdara ½" each, Sargodha, Kakul and D.I. Khan ¼" each.

Night temperatures were 6—13°F (3—7°C) below normal in Lahore, Rawalpindi, Multan, Peshawar, Quetta and Kalat divisions and 3—5°F (2—3°C) so in Karachi, Hyderabad, Khairpur, Bahawalpur divisions and 3°F (2°C) above normal in Rajshahi division and nearly normal elsewhere in the country.

Forcast valid until the evening of 6th APRIL 1967:— Scattered rain/thundershowers may occur over Peshawar and Rawalpindi divisions and Kashmir. Dry weather will prevail elsewhere in the country.

Karachi-11
The 5th April, 1967.

† Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs G.M.T of the same day.

Wherever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

WEDNESDAY THE 5th APRIL, 1967.

P P—Pressure in hundreds tens and units of millibars.

T, T, TdTdTd; Dry Bulb; Dew Point temperature (in tenths of °C.)

—Character of tropopause.

HHH HHHH (heights)—Tens of geoptential metres.

TT—Dry Bulbtemperatures in °C.

50 has been added to the numbers When temperatures. are negative

PAKISTAN DAILY WEATHER REPORT

Reg. No S-1467
Volume No. 21

THURSDAY THE 6th APRIL, 1967

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over Kashmir moved away Northeastwards

The western disturbance over Northeast Iran and adjoining Russian Turkistan moved away slightly Northeastwards. Under their influence scattered rain has fallen in Peshawar division. Peshawar has reported 1/4" of rain.

Western disturbance over s uthwest Iran has moved to southeast Iran.

Weather remained dry in East Pakistan.

Night temperatures were 7—15°F (4—8°C) below normal in Lahore, Rawalpindi, Sargodha, Multan, Bahawalpur, Peshawar, Quetta and Kalat divisions and 3—5°F (2—3°C) so elsewhere in the country outside Chittagong and Khulna divisions where these were normal.

Forcast valid until the evening of 7th APRIL 1967:— Scattered rain/thundershowers are likely to occur in Quetta, D.I. Khan and Peshawar division. Dry weather will prevail elsewhere in the country.

Karachi-11
The 6th April, 1967.

† Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs G.M.T. of the same [illegible]

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

THURSDAY THE 6th APRIL, 1967.

P P—Pressure in huudreds tens and units of millibars.

T. T; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.)

—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C.

50 has been added to the numbers When temperatures. are negative

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

FRIDAY THE 7th APRIL, 1967.

Summary of observations recorded at 0300 Hrs. G.M T.

Yesterday's western disturbance is moving across Russian Turkistan north of Afghanistan.

The western disturbance over southeast Iran is moving across northern and central divisions of West Pakistan. Under its influence a few falls of light rain has fallen in Quetta division.

Weather remained dry elsewhere in the country.

Night temperatures were 3—11°F (2—6°C) below normal in the whole of country outside Chittagong and Khulna divisions. In Chittagong these were 3—5°F (2—3°C) above normal and nearly normal in Khulna divisions.

Forecast valid until the evening of 8th APRIL 1967:— Scattered thunderstorm/shower are likely to occur in Peshawar, D.I. Khan and Rawalpindi divisions and in Kashmir. A few dust thunderstorm are also likely to occur in Multan, Bahawalpur and Lahore divisions.

Karachi-11
The 7th April, 1967.

OBSERVATIONS

(N. A. QURESHI)
for Director, Meterological Services.

PPP—Pressure in hundreds tens and units of millibars.

TT; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.)

—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C.

50 has been added to the numbers When temperatures, are negative

PAKISTAN DAILY WEATHER REPORT

Reg. No. S-1467
Volume No. 21

SATURDAY THE 8th APRIL, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance north of Afghanistan has moved away across Russian Turkistan. The western disturbance over Northern and central divisions of West Pakistan is feeble and is now moving northeastwards.

A fresh western disturbance lies ver central Iran. Another western disturbance lies over southeast Iraq

Isolated thunderstorm or light showers has been reported from Peshawar and Rawalpindi divisions. Weather remained dry elsewhere in West Pakistan.

Data from East Pakistsn is absent but it is believed weather remained dry there.

Night temperatures were 3—5°F (2—3°C) above normal in D. I. Khan division and have fallen by 3—8°F (2—4°C) in Rawalpindi, Sargodha, Multan, Bahawalpur, Peshawar, Quetta, Kalat, Hyderabad divisions and nearly normal elsewhere in West Pakistan.

Forecast valid until the evening of 9th APRIL 1967:— Scattered thunderstorm/showers may occur in Quetta, D.I. Khan, Peshawar and Rawalpindi divisions and in Kashmir. Mainly dry weather will prevail elsewhere in the country.

Earth Quake Report:- Seismograph of Geophysical Institute Quetta recorded on earthquake of moderate intensity on 6th April 1967 at 18 hrs. 00 mts. W. P. S. T. The Epicentre lies 930 miles west of Quetta in western Iran.

Karachi-11
The 8th April, 1967.

Given in Code
These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.
These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.
R at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs. G.M.T. of the same day.
However 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

SATURDAY THE 8th APRIL, 1967.

P P—Pressure in hundreds tens and units of millibars.

T. T; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.

—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C,

50 has been added to the numbers When temperatures are negativ*

P P—Pressure in hundreds tens and units of millibars.
T T; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.)
—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.
TT—Dry Bulb temperatures in °C,
50 has been added to the numbers When temperatures, are negative

PAKISTAN DAILY WEATHER REPORT

Reg. No. S-1467
Volume No. 21

TUESDAY THE 11th APRIL, 1967

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday western disturbance over northern and central divisions of West Pakistan has moved slightly northeast wards.

Western disturbance over southeast Iran is now moving across northwest of Afghanistan under their influence a few falls of light rain/drizzle have fallen in Sargodha Multan, Bahawalpur, Peshawar and Quetta divisions.

Last evening westerly low pressure wave is moving across sub-Himalayan West Bengal.

Weather remained dry in East Pakistan.

Night temperatures were 3—11° F (2—6°C) below normal in the country out side Peshawar, Quetta and Kalat divisions where these were 3—7°F (2—4°C) above Normal.

Forecast valid until the evening of 12th APRIL 1967:- Local rain/thundershowers are likely to occur in Quetta division and in Kashmir, scattered in D. I. Khan, Peshawar and Rawalpindi division and in the northern districts of East Pakistan. A few dust/thunderstorms are also likely to occour elsewhere in West Pakistan outside Kalat and Karachi divisions.

Karachi-11
The 11th April, 1967.

OBSERVATIONS

† Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs G.M.T. of the same day.

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

TUESDAY THE 11th APRIL, 1967.

P. P—Pressure in hundreds tens and units of millibars.

T; T: TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.

—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulbtemperatures in °C,

50 has been added to the numbers When temperatures, are negativ*

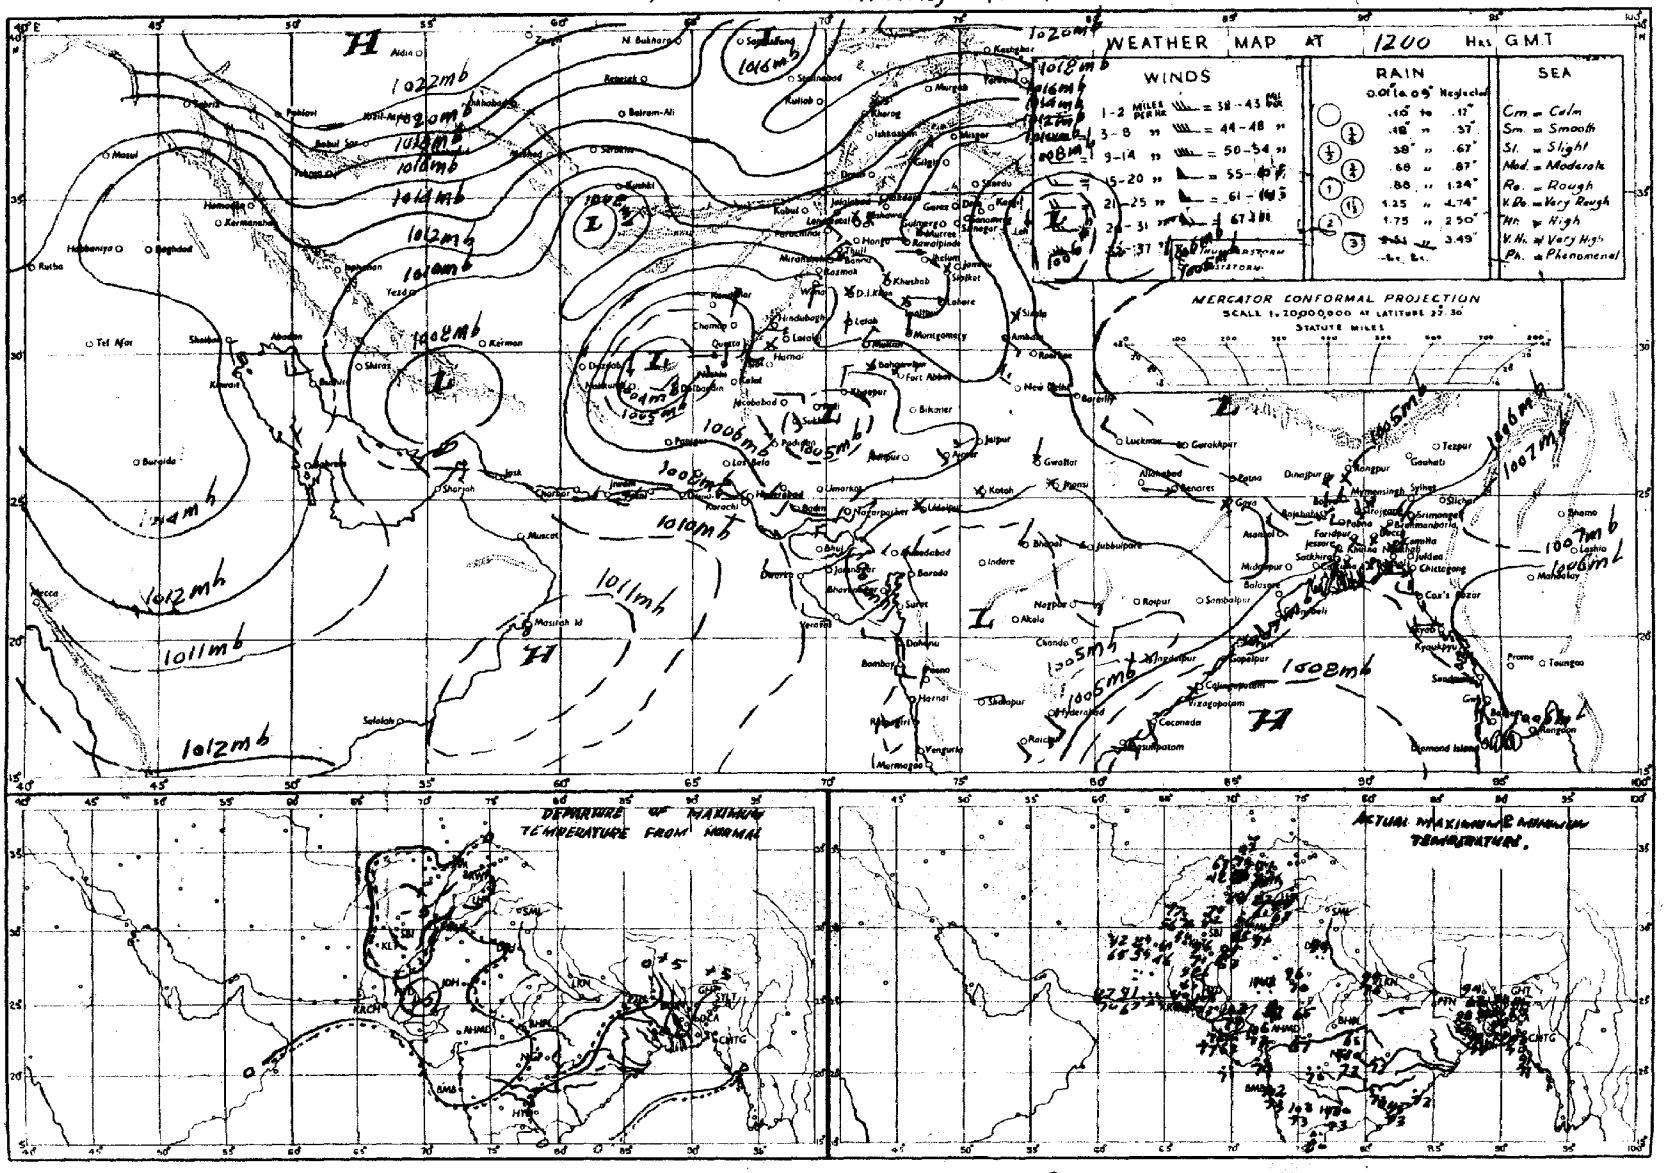
PAKISTAN DAILY WEATHER MAP

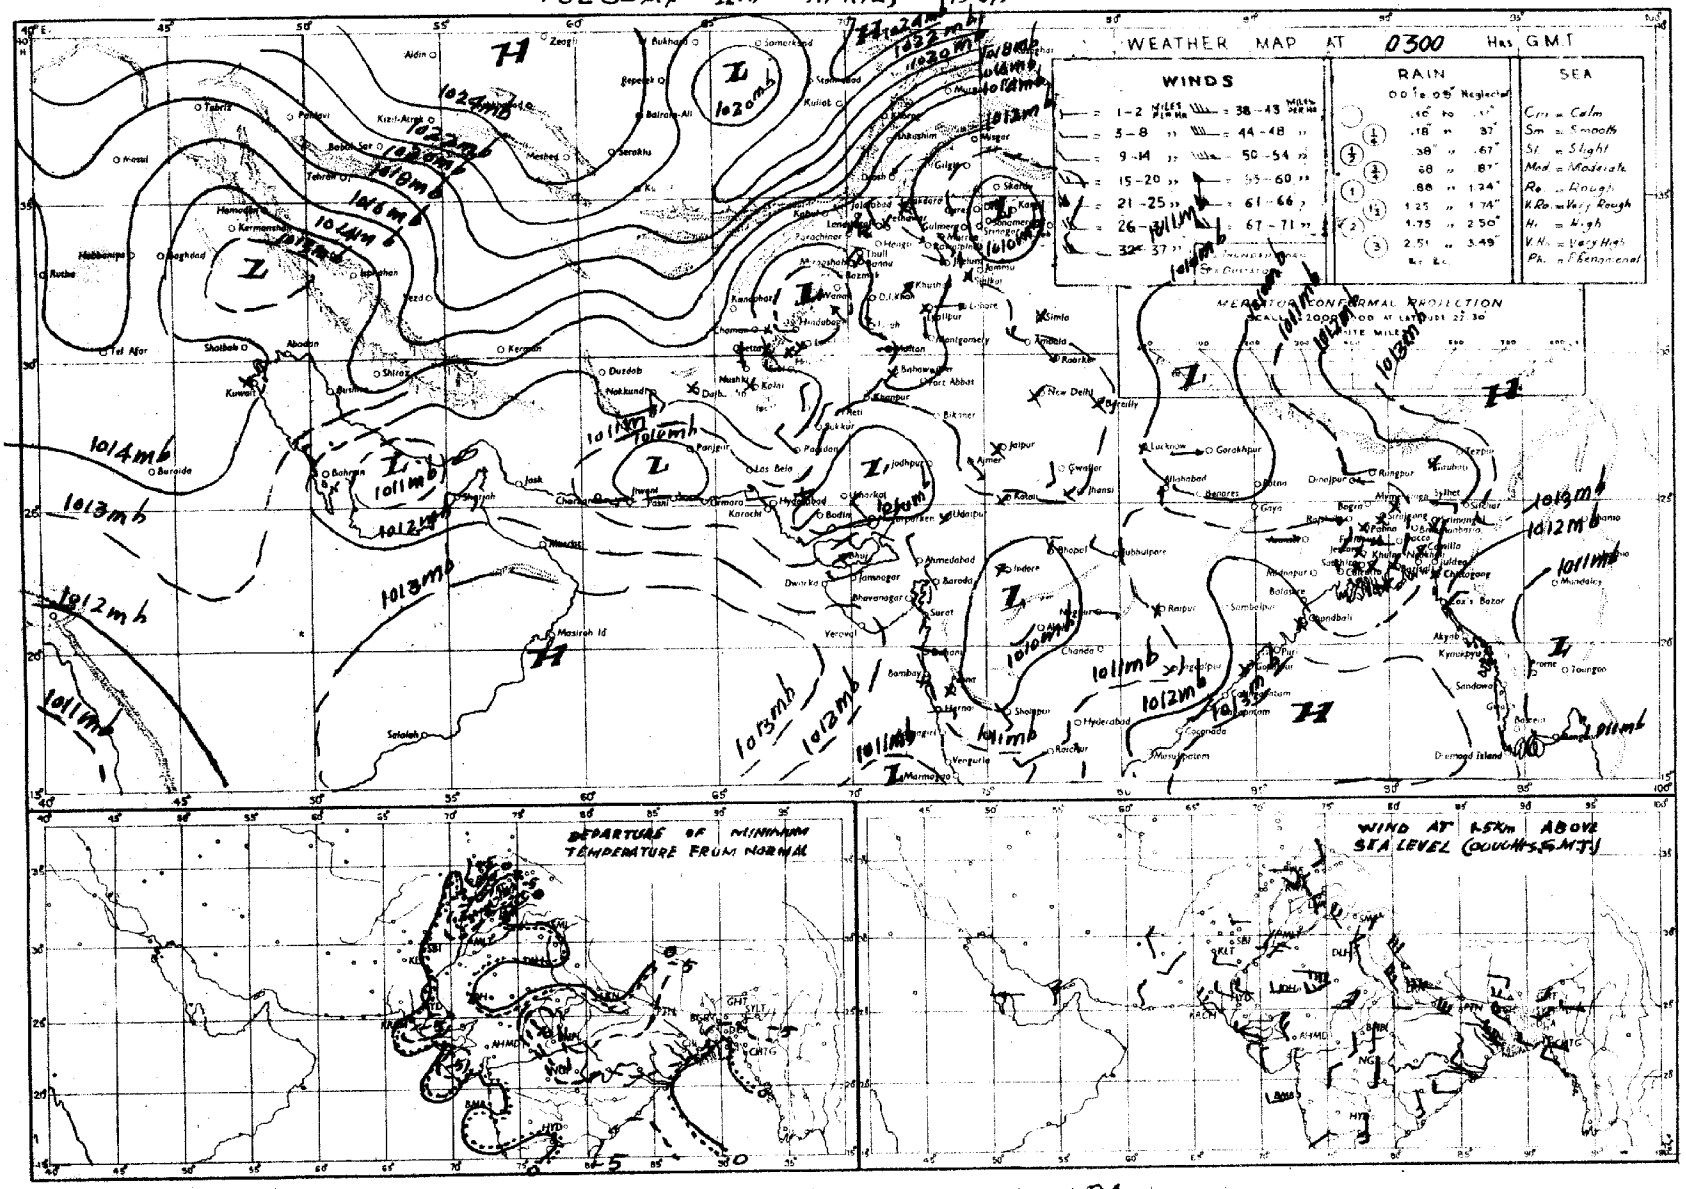
MONDAY 10th APRIL, 1967.



Rainfall amounts indicated in the above chart refer to past 12 hours.

PAKISTAN DAILY WEATHER MAP

TUESDAY 11th APRIL, 1967.



Rainfall amounts indicated in the above chart refer to past 24 hours

PAKISTAN DAILY WEATHER REPORT

Peges 1—2 Rs. 3/-
Peges 1—4 Rs. 5/-

Reg. No S-146
Volume No. 21

TUESDAY THE 12th APRIL, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance has weakened and moved away northeastwards.

The other western disturbance north of Afghanistan is moving across East Russian Tukistan. It has induced a Secondary over Quetta, Kalat divisions and Southeast Iran. Under their influence a few falls of light rain/drizzle has fallen in Peshawar and Quetta divisions.

The westerlly low Pressure wave is now moving across northern divisions of East Pakistan and West Bengal.

Weather remained dry in East Pakistan.

Night temperatures were 3—11° F (2—6°C) below normal in Rajshahi; Lahore, Rawalpindi, Sargodha, Bahawalpur and Hyderabad divisions and were to same extent above normal in Peshawar, D.I. Khan, Quetta, Kalat and Kairpur divisions.

Forecast valid until the evening of 13th APRIL 1967:- Scattered thunderstorm/showers are likely to occur in Quetta, D. I. Khan, Peshawar, Rawalpindi, Rajshahi and Chittagong divisions and in Kashmir.

Karachi-11
The 12th April, 1967.

OBSERVATIONS

(N. A. QURESHI)
for Director, Meterological Services.

† Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs; is rainfall since 0000 hrs. G M.T. of the same day.

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

WEDNESDAY THE 12th APRIL, 1967.

P. P—Pressure in hundreds tens and units of millibars.

T; T; TdTdTd; Dry Bulb; Dew Point temperatures (In tenths of °C.

—Character of tropopause.

HHH.HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C.

50 has been added to the numbers When temperatures. are negativ*

PAKISTAN DAILY WEATHER REPORT

THURSDAY THE 13th APRIL, 1967

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over East Russian Tukistan is moving away northeastwards. Its secondary over Quetta and Kalat divisions persists and is less marked. Under its influence a few falls of drizzle or dust/thunderstorms have occured in Sargodha, Peshawar, D.I. Khan and Quetta divisions.

Westerly low pressure wave over northern divisions of East Pakistan has moved away after accentuating seasonal trough of low pressure over West Bengal and neighbourhood. Under its influence a few dust/thunderstorms have occured in Chittagong and Dacca divisions.

Night temperatures were 3—8°F (2—4°C) above normal practically in whole of countrý.

Forecast valid until the evening of 14th APRIL 1967:- Scattered thunderstorms/showers are likely to occur in Hyderabad, Khairpur, Kalat, Quetta, D. I. Khan, Peshawar, Bahawalpur, Dacca and Chittagong divisions and in Kashmir.

Karachi-11
The 13th April, 1967.

† Given in Code

** These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

* These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs. G.M.T. of the same day.

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

THURSDAY THE 13th APRIL, 1967.

P. P—Pressure in hundreds tens and units of millibars.

T; T; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C,)

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulbtemperatures in °C,

50 has been added to the numbers When temperatures, are negative

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

FRIDAY THE 14th APRIL, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's secondary western disturbance is moving as a trough of low pressure across West Pakistan. Under its influence a few falls of drizzle have fallen in D.I. Khan and Quetta divisions.

An active western disturbance lies over west and central Iran with its secondary over Persian Gulf and adjoining Arabia.

Seasional trough of low pressure over West Bengal and neighbourhood is move marked.

It has caused scattered rain in Chittagong division Sylhet has reported 1" of rain and Sarimangal 1/2" (upto 1800£).

Day temperatures were 3—9°F (2—5°C) above normal in the country.

Forecast valid until the evening of 15th APRIL 1967:- Local thunderstorm/showers are likely to occur in Dacca, Chittagong divisions. Scattered in Rajshahi, Khulna, Kalat, Quetta, D. I. Khan, Peshawar and Rawalpindi divisions and in Kashmir.

Karachi-11
The 14th April, 1967.

¶ Given in Code

Those stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

Those stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs. G.M.T of the same day.

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

FRIDAY THE 14th APRIL, 1967.

P P—Pressure in huudreds tens and units of millibars.

T, T; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C,

50 has been added to numbers When the temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

SATURDAY THE 15th APRIL, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over west and central Iran has moved slightly northeaswards. Its secondary now lies as a complex low extending from Quetta division to southeast Iran. Under their influence a few falls of light rain/thundershowers have occured in Bahawalpur and Quetta divisions.

Seasonal trough of low over West Bengal continues to be well marked. It has caused local rain/thundershowers in Dacca division, scattered in Chittagong and Rajshahi divisions, Rangpur has reported ¼" rain.

Day temperatures were 3—9°F (2—5°C) above normal in practically whole of the country.

The highest maximum temperatures of 105°F (41°C) was recorded at Lasbela

Forecast valid until the evening of 16th APRIL 1967:- Scattered rain/thundershowers are likely to occur in Quetta, Kalat, D. I. Khan, Peshawar, Chittagong and Dacca divisions and in Kashmir.

Karachi-11
The 15th April, 1967.

† Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0300 hrs. G.M.T of the same day.

Whenever 999 given for RRR see the summary above is for the actual amount of rainfall.

PAKISTAN DAILY WEATHER REPORT

SATURDAY THE 15th APRIL, 1967.

P, P—Pressure in hundreds tens and units of millibars.
T, T_d; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.
—Character of tropopause.

HHH, HHHH (heights)—Tens of geopotential metres.
TT—Dry Bulb temperatures in °C.
50 has been added to numbers When the temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No S-1467
Volume No. 21

SUNDAY THE 16th APRIL, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over central Iran now lies over central Russian Turkistan. Its secondary lies over North Afghanistan and adjoining Peshawer division. Under its influence a few falls of light rain or thunderstorms have occured in Quetta and Multan divisions.

A fresh western disturbance lies over southeast Iran.

The seasonal trough of low pressure continues to be well marked. It has caused local rain/thundershowers in Chittagong division.

Chief amounts of rainfall are:- Brahmanbaria 2", Commila 3/4" and Sylhet 1/2".

Day temperatures were 3—10°F(2—6°C) above normal practically over the whole country.

Forecast valid until the evening of 17th APRIL 1967:- Local thunderstorms/showers will occur in Chittagong division and in the northern districts of Rajshahi and Dacca divisions and scattered in Quetta, D. I. Khan, Peshawar and Rawalpindi division and in Kashmir.

Squell warning:- A few northwesterly squell with wind speed reaching 50 krots are likely to occur in the northern districts of East Pakistan during the next 36 hours.

Karachi-11
The 16th April, 1967.

OBSERVATIONS

(N. A. QURESHI)
for Director, Meterological Services.

† Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs. G.M.T of the same day

Wherever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

SUNDAY THE 16th APRIL, 1967.

P P—Pressure in hundreds tens and units of millibars.

T. T; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C.

50 has been added to numbers When the temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No. S-1467
Volume No. 21

MONDAY THE 17th APRIL, 1967

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance is moving away across east Russian Turkistan. Its secondary is moving across northern divisions of West Pakistan.

Western disturbance over southeast Iran is moving across north of Afghanistan. Under their influence local rain/thundershowers have occured in Rawalpindi and Peshawar divisions, scattered in Sargodha and Quetta divisions. A few falls of light rain/drizzle have also fallen in D. I. Khan division.

Seasonal trough of low pressure over West Bengal and neighbourhood continues well marked. It has caused local rain/thundershowers in Chittagong division and scattered in Dacca division.

Chief amounts of rainfall are:- Chittagong, Maijdi Court, Sylhet 3/4" each, Parachinar 1/4".

Day temperatures were 4—12°F(2—7°C) above normal in the country outside Quetta and Kalat divisions where these were 2—3°F (1—2°C) below normal.

Forecast valid until the evening of 18th APRIL 1967:- Fairly widespread rain/thundershowers are likely to occur in Dacca, Chittagong divisions, local in Rajshahi, Peshawar and Rawalpindi divisions and in Kashmir. Scattered thunderstorm/showers are alsol ikely to occur in Khulna, Quetta, D.I. Khan, Sargodha, Lahore, Multan and Bahawalpur divisions.

Karachi-11
The 17th April, 1967.

† Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs. G.M.T of the same day

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

MONDAY THE 17th APRIL, 1967.

P, P—Pressure in huudreds tens and units of millibars.

T, T; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geoptential metres.

TT—Dry Bulb temperatures in °C.

50 has been added to numbers When the temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

TUESDAY THE 18th APRIL, 1967

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's secondary western disturbance is moving away across Kashmir with its associated trough extending to north Rajisthan. It has caused fairly widespread rain or thundershowers in Sargodha division and local in Peshawar division. A few falls of light rain or thunderstorm have also occured in Lahore, Rawalpindi and D.I. Khan divisions and dust/thunderstorm in Bahawalpur division.

The western disturbance over north of Afghanistan has moved away.

The Seasonal trough of low pressure over West Bengal and neighbourhood is more marked. Under its influence fairly widespread rain/thundershowers with locally heavy falls have occurred in Chittagong division, local in Dacca division and scattered elsewhere in East Pakistan.

Chief amounts of rainfall are:- Sylhet 3", Comilla 2" Maijdee Court, Srimangal and Narayanganj 1" each Mymensingh and Drosh 3/4" Khulna 1/2" and Cox's Bazar, Bogra and Brahmanbaria (upto 1200£) 1/4" each.

Day temperatures were 3—6°F(2—3°C) above normal in Rawalpindi; Sargodha and Peshawar and D.I. Khan divisions.

Forecast valid until the evening of 19th APRIL 1967:- Thunderstorm/showers will be fairly widespread with a few heavy falls in Chittagong and Dacca division; local elsewhere in East Pakistan and scatteread in Peshawar, Rawalpindi division and in Kashmir.

Squall Warning:- A few north westerly squalls with wind speed ranehis 50 knt are likely to occur in East Pakistan during the next 36 hrs.

Karachi-11
The 18th April, 1967.

(N. A. QURESHI)
for Director, Meterological Services.

† Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs, Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs, is rainfall since 0000 hrs. G M.T of the same day

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

TUESDAY THE 18th APRIL, 1967.

P, P—Pressure in hundreds tens and units of millibars.

T, T: TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C,

S:—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulbtemperatures in °C,

50 has been added to numbers When the temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No. S-1467
Volume No. 21

TUESDAY THE 4th APRIL, 1967

Summary of observations recorded at 0300 Hrs G.M.T.

Yesterday's western disturbance over Quetta and D.I. Khan divisions is moving away across Northern divisions of West Pakistan and adjoining Kashmir. Under its influence rain/thundershowers have been scattered in D.I. Khan and Quetta divisions A few falls of light showers have also been reported from Rawalpindi, Sargodha, Multan and Peshawar divisions. Weather remained dry elsewhere in the country.

The western disturbance over Northeast Iran has moved slightly Northeastwards. A fresh western disturbance lies over Iraq.

The western low pressure wave over the northern parts of East Pakistan has moved away.

Chief amounts of rain fall are :- Fortsandeman 1", Miranshah 1/2" and Loralai ¼".

Night temperatures were 3—12°F (2—7°C) below normal in Khulna, Rajshahi, Lahore, Rawalpindi, Sargodha, Multan, Bahawalpur, Peshawar, Quetta, Karachi, Kalat, Hyderabad and Khairpur divisions and were 3—5°F (2—3°C) above normal in Chittagong and D.I. Khan divisions.

Forcast valid until the evening of 5th APRIL 1967:— Scattered rain/thundershowers are likely to occur in Peshawar Rawalpindi, D.I. Khan, Quetta, Sargodha and Multan divisions and in East Pakistan and Kashmir.

Karachi-11
The 4th April, 1967.

† Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs G.M.T of the same day

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

TUESDAY THE 4th APRIL, 1967.

P P—Pressure in hundreds tens and units of millibars.

T; T; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.

—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C.

50 has been added to the numbers When temperatures. are negativ*

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

WEDNESDAY THE 20th APRIL, 1967
Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over Kashmir has moved away northeastwards.
A fresh western disturbance is moving across northeast Iran and adjoining Russain Turkistan.
Weather remained dry over West Pakistan.
A westerly low pressure wave lies over Bihar, Orissa and neighbourhood.
Thunderstorm/showers have been widespread in Dacca division and fairly widespread elsewhere in East Pakistan.
Chief amounts of rainfall are:- Chittagong, Brahmanbaria, Srimangal, Jessore, Sirajgang and Bogra 2" each, Mymensingh, Faridpur, Pabna and Dinajpur 1½" each, Narayanganj 1", Dacca, Barisal (upto 19,000Z) Khulna and Rajshahi 3/4" each and Chittagong, Maijdee Court (upto 18,1200Z) and Sylhet (upto 18,1200Z) 1/2" each.
Day temperatures were 5—12°F (3—7°C) below normal in East Pakistan and 3—5°F (2—3°C) above normal in Peshawar, D.I. Khan, Khairpur and Hyderabad divisions.

Forecast valid until the evening of 20th APRIL 1967:- Fairly widespread rain/thundershowers will locally moderate to heavy falls are likely to occur in East Pakistan. Dry weather will prevail over West Pakistan and Kashmir.

Karachi-11
The 19th April, 1967.

P; P—Pressure in hundreds cons and units of millibars.

T; T; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C,)

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulbtemperatures in °C,

50 has been added to numbers When the temperatures are negative.

† Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0900 hrs. G.M.T. of the same day

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

THURSDAY THE 20th APRIL, 1967.

P, P—Pressure in huudreds tens and units of millibars.

T, T, TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geoptential metres.

TT—Dry Bulb temperatures in °C,

50 has been added to numbers When the temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No S-1467
Volume No. 21

FRIDAY THE 21st APRIL, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over east Russian Turkistan has moved slightly eastwards with its trough extending to D.I. Khan and Peshawar divisions. Another western disturbance lies over East Iran and adjoining Afghanistan. Under their influence a few falls of light rain have fallen in Quetta division.

The seasonal trough of low pressure over Orissa and Bihar is less marked. It has caused scattered rain/thundershowers in Chittagong, Khulna and Rajshahi divisions.

A few falls of light rain or thunderstorms have also occurred in Dacca division. Sylhet reported 3/4" and Satkhaira ½" of rain.

Day temperatures were 10—14°F (6—8°C) below normal in Rajshahi division and 3—6°F (2—3°C) so elsewhere in East Pakistan and were 3—9°F (2—5°C) above normal in West Pakistan outside Karachi division.

Forecast valid until the evening of 22nd APRIL 1967:- Local rain/thundershowers are likely to occur in Chittagong and Dacca divisions, scattered in Rajshahi, Khulna, Quetta, Peshawar D.I. Khan and Rawalpindi divisions and in Kashmir.

Karachi-11
The 21st April, 1967.

† Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs. G.M.T. of the same day

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

FRIDAY THE 21st APRIL, 1967.

P. P—Pressure in huudreds tens and units of millibars.

T. T; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C.

50 has been added to numbers When the temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

SATURDAY THE 22nd APRIL, 1967

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over East Russian Turkistan with its trough extending to D.I. Khan and Peshawar divisions has moved away. The western disturbance over East Iran and adjoining Afghanistan has moved to north West Afghanistan and adjoining Russian Turkistan.

A fresh western disturbance lies over Persian Gulf and south Iran.

A few falls of drizzle or thunderstorms have occurred in Lahore. Rawalpindi, Peshawar, D.I. Khan and Quetta divisions.

The seasonal trough of low pressure has shifted south wards and runs across Orissa to head Bay of Bengal. It has caused scattered rain in Chittagong division. Comilla has recorded ½" of rain.

Day temperatures were 5—11°F (3—6°C) below normal in Khulna Rajshahi and Rawalpindi divisions and 4—6°F (2—3°C) above normal in Multan, Bahawalpur, D.I. Khan and Hyderabad divisions.

Forecast valid until the evening of 23rd APRIL 1967:- Scattered rain/thundershowers are likely to occur in East Pakistan and in Quetta, D.I. Khan, Peshawar and Rawalpindi divisions and in Kashmir. A few dust/thunderstorms may also occur in Khairpur and Bahawalpur divisions.

Squall Warning: A few north westerly squalls with wind speed reaching 40 knts are likely to occur in East Pakistan during next 36 hrs.

Karachi-11
The 22nd April, 1967.

(N. A. QURESHI)
for Director, Meterological Services.

† Given in Code.

✱ These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

✱✱ These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs. G.M.T. of the same day.

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

SATURDAY THE 22nd APRIL, 1967.

PAKISTAN DAILY WEATHER REPORT

SUNDAY THE 23rd APRIL, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over East Iran and adjoining Afghanistan lies northeast of Afghanistan.
The western disturbance over Persian Gulf and adjoining south Iran now lies over south east Iran and adjoining Kalat and Quetta divisions.
Another western disturbance lies west of Iran
Weather remained dry in West Pakistan. Observations meagre but believe seasonal trough of low pressure over Bihar and adjoining areas Persists. It has caused fairly widespread thunderstorms/rain in Dacca division local in Rajshahi divisions
Chief amounts of rainfall are: Dacca 1/2" and Rangpur 1/4".
Day temperatures were 3—7°F (2—4°C) below normal in East Pakistan and to the same extent above normal in West Pakistan.
Forecast valid until the evening of 24th APRIL 1967:- Scattered rain/thundershowers are likely to occur over East Pakistan, Quetta, Kalat D.I. Khan and Peshawar divisions and in Kashmir. Dry weather likely to prevail elsewhere over west Pakistan.

Karachi-11
The 23rd April, 1967.

† Given in Code.
* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.
** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.
RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs; is rainfall since 0000 hrs. G.M.T of the same day.
Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

SUNDAY THE 23rd APRIL, 1967.

P: P—Pressure in hundreds tens and units of millibars.

T: T; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C.

50 has been added to the numbers When temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

MONDAY THE 24th APRIL, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over northeast Afghanistan is moving away across Russian Turkistan.

Western disturbance over southeast Iran is moving across Afghanistan and adjoining western divisions of West Pakistan. Under its influence scattered rain/thunder-showers have occured in Quetta division. Quatta has reported 1/4" of rain.

A well marked low pressure area lies over central India. Scattered rain/thnderstorm have occured in Dacca and Khulna divisions.

Day temperatures were 3—10°F (2—6°C) above normal in West Pakistan and 4—10°F (2—6°C) below normal in East Pakistan outside Chittagong division.

Forecast valid until the evening of 25th APRIL 1967:- Local thunderstorm/showers are likely to occur in Quetta, D.I. Khan and Peshawar divisions and scattered elsewhere over the country outside South Kalat, Karachi and Hyderabad divisions.

Karachi-11
The 24th April, 1967.

† Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs. G.M.T of the same is

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

Reg. No. S-1467
Volume No. 21

TUESDAY THE 25th APRIL, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over Afghanistan and adjoining western divisions of west Pakistan has moved slightly eastwards and extends from Peshawar division and adjoining areas to Khairpur division. It has caused scattered thundershower in Quetta and Peshawar divisions and a few falls of light rain or thunderstorm in Bahawalpur and D.I Khan divisions.

Observations from Iran are lacking but believe a western disturbance lies over West Iran with its trough extending to Persian Gulf.

Observations from East Pakistan are absent and from northern India meagre but believe yesterday's low pressure area now lies over Vindhya Pradesh.

Based on observations upto 24,1200Z scattered thunderstorm/showers have occured in East Pakistan outside Khulna division.

Chief amounts of rainfall are. Parachinar 3/4, Sylhet (upto 24,1200Z) ½" and Rangpur (upto 24,1200Z,) ¼".

Day temperatures were 6 – 8°F (3—4°C) below normal in Rajshahi divisions and 3—9°F (2—5°C) above normal in West Pakistan outside Karachi and Hyderabad divisions.

Forecast valid until the evening of 26th APRIL 1967:- Local rain/thundershowers will occur in Rawalpindi and Peshawar divisions and Kashmir and scattered elsewhere in the country outside Kalat, Karachi, Hyderabad and Khairpur divisions.

Squall Warning:- A few north westerly squells with wind speed reaching upto 40 kn ts may occur in the northern districts of East Pakistan during the next 48 hrs.

Earth Quake Report:- The Sismograph at G.I. Quetta has recorded an earthquake of moderate intensity on 24th April 1967 at 13 hrs 53 mts. W. P. S. T. The epicentre by 570 miles NE of Quetta and latitude 37½°N and longitude 72½°E in Hindu Kush region.

Karachi-11
The 25th April, 1967.

† Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs; is rainfall since 0000 hrs. G.M.T of the same is

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

P, P—Pressure in hundreds tens and units of millibars.
T, T; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.)
St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.
TT—Dry Bulb temperatures in °C.
50 has been added to the numbers When temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No S-1467
Volume No. 21

WEDNESDAY THE 26th APRIL, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance extending from Peshawar division to Khairpur division has moved northeast wards and extends from Kashmir to Lahore division under its influence fairly widespread thunderstorms/showers have occured in Peshawar and Sargodha divisions, local in Rawalpindi and D.I. Khan divisions and scattered in Multan, Bahawalpur and Quetta divisions.

The western disturbance over west Iran now lies over northeast Iran and adjoining Russian Turkistan with its trough extending to south east Iran.

Observations from East Pakistan are absent and from northeast India meagre but believe the low pressure area over Vindhya Pradesh has moved to Bihar and Orissa.

Based on observations upto 25,1200Z local thunderstorms/showers have occured in Chittagong and Dacca and scattered in Rajshahi divisions.

Chief amounts of rainfall are: Narayanganj (upto 25,1200Z) and Parachinar 1½" each, Landi Kotal and Miran Shah 1" and Dinajpur (upto 25,1200Z) 1", Fort Sandeman 3/4", Peshawar, Brahmanbaria (upto 25,1200Z) Pabna (upto 25,1200Z) ½" each.

Day temperatures were 3—9°F (2—5°C) below normal in East Pakistan and in Hyderabad division and were 3—7°F (2—4°C) above normal in Lahore, Rawalpindi, Sargodha, Multan, Bahawalpur and D.I. Khan divisions.

Forecast valid until the evening of 27th APRIL 1967:- Thunderstorms/showers will be local in Rawalpindi and Peshawar divisions and in Kashmir and scattered elsewhere in the country outside Kalat, Karachi and Hyderabad divisions.

Karachi-11
The 26th April, 1967.

Given in Code

These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

* These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs; is rainfall since 0000 hrs. G.M.T. of the same is

Whatever 999 given for RRR use the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

THURSDAY THE 27th APRIL, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over Kashmir and adjoining areas remained practically stationary.

The western disturbance over northeast Iran is moving across north of Peshawar division and has induced a well marked secondary over Quetta division and adjoining areas. Under their combined influence thunderstorms/showers have been widespread in Peshawar division, fairly widespread in Rawalpindi and Sargodha divisions, local in Quetta division and scattered in D.I. Khan division. A few falls of light rain or thunderstorms occurred elsewhere in West Pakistan.

Inversion of moist southerlies is becoming more marked in East Pakistan.

Scattered thundershowers have occurred in Khulna division and a few falls of light rain or thunderstorms in Chittagong division.

Chief amounts of rainfall are: Barisal (upto 26,1200Z) and Drosh 1" each, Parachinar (upto 27,0000Z) 3/4", Landikotal and Fort Sandeman ½" each, and Islamabad, Murree, Haripur and Hindubagh ¼" each.

Day temperatures were 10—19°F (6—11°C) below normal in Rawalpindi and Peshawar divisions and 7—9°F (2—5°C) so practically elsewhere in the country.

Forecast valid until the evening of 28th APRIL 1967:- Fairly widespread rain/thundershowers with locally heavy falls are likely to occurre in D.I. Khan, Peshawar, Rawalpindi, divisions and in Kashmir, local in East Pakistan and in Quetta, Sargodha, Lahore and Multan divisions and scattered elsewhere in West Pakistan.

Karachi-11
The 27th April, 1967.

PAKISTAN DAILY WEATHER REPORT

Reg. No. S-1467
Volume No. 21

FRIDAY THE 28th APRIL, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over Kashmir and adjoining areas has moved away.

The western disturbance over north of Afghanistan is now moving across Kashmir with its trough extending to Lahore division. The secondary western disturbance over Quetta division and adjoining areas remained practically stationary and has induced a trough extending to south western sector north Arabian Sea.

Under their combined influence widespread rain/thundshowers fairly widespread in D.I. Khan local in Multan, Quetta and Karachi divisions have occured in Peshawar and Sargodha divisions and scattered in Rawalpindi and Kalat divisions. A few falls of light rain or thunderstorms have also occurred in Lahore, Bahawalpur and Hyderabad divisions.

Observations from India are absent but believe the seasonal trough of low pressure is well marked. It has caused fairly widespread rain/thundershowers in Rajshahi and Khulna divisions scattered in Chittagong division and a few falls of light rain or thunderstorms in Dacca division.

Chief amounts of rainfall are: Comilla 3", Rajshahi and Lahdikotal 2" each, Murree, Parachinar (upto 28,0000Z) 1½" each, Sirajgang, Chakdam Kakul and Pabna (upto 28,0000Z) 1" each, Fort Sandeman 3/4", and Satkhaira (upto 28,0000Z) Khushab, Layallpur, Haripur, Hindubagh, Samungli and Kalat ½" each.

Day temperatures were 10—17°F (6—9°C) below normal in Hyderabad, Khairpur, Bahawalpur, Multan, Peshawar and Rawalpindi divisions and 3—9°F (2—5°C) so elsewhere in the country.

Forecast valid until the evening of 29th April 1967:- Rain/thundershowers will be fairly widespread in Peshawar, Rawalpindi and Hyderabad divisions and in Kashmir, local in East Pakistan and in Karachi, Multan, Quetta, Lahore and Sargodha divisions and scattered elsewhere in West Pakistan.

Heavy Rainfalls Warning:- Locally moderate to heavy falls are likely to occur in Karachi, Hyderabad, Peshawar and Rawalpindi divisions.

Karachi-11
The 28th April, 1967.

O B S E R V A T I O N S

(N. A. QURESHI)

PAKISTAN DAILY WEATHER REPORT

SATURDAY THE 29th APRIL, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over Kashmir with its trough extending to Lahore division has moved away.

The western disturbance over Quetta division now lies over East Afghanistan and adjoining Peshawar division. Its associated trough lies over northeast sector North Arabian Sea and is becoming less marked.

Under their combined influence fairly widespread rain/thundshowers have occured in Sargodha and Peshawar divisions, local in Rawalpindi, Karachi and Hyderabad divisions and scattered in D.I. Khan, Quetta and Kalat divisions. A few thunderstorms also occurred in Lahore division.

The seasonal trough of low pressure extends from Bihar to East Pakistan. Under its influence local rain/thundershowers have occurred in Chittagong division and scattered in Dacca and Rajshahi divisions.

Chief amounts of rainfall are: Murree 2", Drosh 1", Ranjpur, Rawalpindi, Chakdara and Karachi (Airport) 3/4" each, Khushab, Sargodha, Cherat, Landikotal, Karachi (Manora) and Badin ½" each.

Day temperatures were 10—19°F (6—11°C) below normal in West Pakistan out side Karachi and Lahore divisions where there were 7—9°F (4—5°C) below normal Day temperature were 3—5°F (2—3°C) below normal in East Pakistan.

Forecast valid until the evening of 30th April 1967:- Rain/thundershowers will be local in East Pakistan and in Peshawar and Rawalpindi divisions and in Kashmir and scattered elsewhere in West Pakistan.

Karachi-11
The 29th April, 1967.

† Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs G.M.T. of the same day.

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

Reg. No. S-1467
Volume No. 21

SUNDAY THE 30th APRIL, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over East Afghanistan and adjoining Peshawar division today lies over Kashmir with its trough extending to Multan division. It has caused local rain/thundershowers in Rawalpindi and Quetta divisions, scattered in Lahore, Sargodha, Peshawar and Hyderabad d visions and a few falls of light rain or thunderstorms in Multan, Bahawalpur, D I. Khan and Khairpur divisions.

Observations from East Pakistan and India are lacking but believe the seasonal trough of low pressure continues to extend from Bihar to East Pakistan.

Rain/thundershowers have been fairly widespread in Dacca division, local in Chittagong division and scattered in Rajshahi division.

Chief amounts of rainfall are: Faridpur 1½", Srimangal, Narayanganj 1" each; Dacca, Loralai 3/4" each, Chittagong, Sylhet, Kakul, Sibi and Harnai 1/2" each.

Day temperatures were 10—22°F (6—12°C) below normal in Khairpur, Quetta, Multan, Sargodha and Peshawar divisions and 3—9°F (2—5°C) so elsewhere in the country.

Forecast valid until the evening of 1st May 1967:- Local thunderstorms/showers may oceurr in East Pakistan, Kashmir and in Peshawar and Rawalpindi divisions and scattered elsewhere in West Pakistan outside Kalat and Karachi divisions.

Karachi-11
The 30th April, 1967.

† Given in Code.
* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.
** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.
RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs. G M.T of the same day.
Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

SUNDAY THE 30th APRII , 1967.

PPP—Pressure in hundreds tens and units of millibars.

TTT; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.)

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulbtemperatures in °C.

50 has been addedto the numbersWhentemperatures are negative.

PAKISTAN DAILY WEATHER REPORT

MONDAY THE 1st MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's **western** disturbance over Kashmir is moving away eastwards. Under its influence fairly widespread rain/thundershowers have occured in Peshawar division. A few falls of light rain/thunderstorms have also occurred in Lahore, Sargodha, D.I. Khan, Quetta and Kalat divisions.

A fresh western **disturbance** lies over central and east Iran

Seasonal trough of low pressure over Bihar, west Bengal and nighbourhood has become more marked. It has caused **local** rain/thundershowers in Chittagong division.

Chief amounts of rainfall are: Sylhet 1½",(upto 1800Z) Peshawar 3/4" Murree, Drosh, Chakdara and Landikotal 1/2" each Rawalpindi, Cherat and **Kakul** 1/4" each.

Day temperatures were 10—16°F (6—9°C) below normal in Lahore, Rawalpini, Sargodha, Peshawar, Quetta Kalat Hyderabad and Khairpur, divisions and 3—9°F (2—5°C) So elsewhere over the country.

Forecast valid until the evening of 2nd May 1967:- Fairly widespread rain/thundershowers with locally moderate to heavy falls are likely to occur in Dacca, and Chittagong divisions. Local in Rajshahi division. Scattered in Quetta D I. Khan , Peshawar, Rawalpindi and Khulna divisions and in Kashmir.

Karachi-11
The 1st May, 1967.

(N. A. QURESHI)
for Director, Meterological Services.

PAKISTAN DAILY WEATHER REPORT

TUESDAY THE 2nd MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over East and Central Iran now lies over Afghanistan and adjoining areas. Under its influence scattered rain has fallen in Rawalpindi division. Murree has reported 1/4" of rain. A few falls of light rain/thunderstorms have also occurred in Bahawalpur, Peshawar, D. I. Khan and Quetta, divisions.

Seasonal trough of low pressure over West Bengal and neighbourhood is less marked. It has caused fairly widespread rain/thundershowers in Dacca division, scattered in Chittagong division. Chief amounts of rainfall recorded are Dacca 1½" (upto 0000Z), Srimangal 3/4" (upto 1200Z). A few thunderstorms have als occurred in Rajshahi division.

Day temperatures were 10—13°F (6—7°C) below normal in whole of West Pakistan outside Hyderabad and Khairpur division and 4—8°F (2—4°C) above normal in East Pakistan.

Forecast valid until the evening of 3rd May 1967:- Local rain/thundershowers are likely to occur in Chittagong divisions, scattered elsewhere in East Pakistan, Quetta, D.I. Khan, Peshawar, Rawalpindi divisions and in Kashmir.

Karachi-11
The 2nd May, 1967.

† Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs; is rainfall since 0000 hrs. G M.T of the same day.

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

WEDNESDAY THE 3rd MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over Afghanistan is moving away across Kashmir.
Scattered rain/thundershowers have occurred in Peshawar division and a few falls of light rain or thunderstorms in Rawalpindi and Sargodha divisions.
A fresh western disturbance lies over Russian Turkistan north of Afghanistan.
Observations from East Pakistan are lacking but believe the seasonal through of low pressure extends from Bihar and East Pakistan.
Based on observations upto 03,000Z G. M.T. a few falls of light rain or thunderstorms have occurred in Chittagong and Dacca divisions.
Chakdara has recorded 1/4" of rainfall.
Day temperatures were 10 – 15°F (6—8°C) below normal in Lahore, Sargodha, Multan and Quetta div sions and 3—9°F (2—5°C) so elsewhere in the country.
Forecast valid until the evening of 4th May 1967:- Thunderstorms/ bowers will be local in Chittagong and Dacca divisions and scattered elsewhere in East Pakistan, Kashmir and in Peshawar and Rawalpindi divisions. A few dust/thunderstorms may also occur in Sargodha division.

Karachi-11
The 3rd May, 1967.

Given in Code

These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs; is rainfall since 0000 hrs. G.M.T of the same day.

However 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

WEDNESDAY THE 3rd MAY, 1967.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

THURSDAY THE 4th MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over north of Afghanistan now lies over Kashmir and has induced a secondary over D. I. Khan division. Under its influence scattered rain/thundershowers have fallen in Rawalpindi and Peshawar divisions. A few thunderstorms with a few falls of light rain/drizzle have also occurred in Lahore, Sargodha and Bahawalpur divisions.

Seasonal trough of low pressure over Madya Pradesh, Bihar and West Bengal is well marked. It has caused local rain/thundershowers in Dacca division. Narayanganj has reported ½" of rain (upto 1200Z) and Dacca ¼" (upto 1800Z).

Day temperatures were 10 – 16°F (6—9°C) below normal in Quetta, Kalat divisons and 4—9°F (2 – 6°C) so elsewhere in West Pakistan and 4—7°F (2—4°C) above normal in East Pakistan.

Forecast valid until the evening of 5th May 1967:- Scattered thunderstorms/showers are likely to occur in East Pakistan and in Kashmir, Rawalpindi and Peshawar divisions. A few dust/thunderstorms are also likely to occur in Lahore, Multan and Sargodha, divisions.

Karachi-11
The 4th May, 1967.

Gives in Code

These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

At 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs is rainfall since 0900 hrs. G.M.T. of the same day.

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

THURSDAY THE 4th MAY, 1967.

P, P—Pressure in hundreds tens and units of millibars.

T, T; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.)

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C,

50 has been added to the numbers When temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

FRIDAY THE 5th MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

The secondary western disturbance over D.I. Khan division is moving away accross Kashmir. Under its influence scattered rain/thundershowers have occured in Peshawar division. A few falls of light rain/drizzle have also fallen in Rawalpindi division.

A feeble western disturbance lies over south Iran and adjoining Persian Gulf. Observation from East Pakistan are lacking but believe a well marked low pressure area lies over Chota Nagpur and adjoining Madyapradesh scattered rain/thundershowers have occured in East Pakistan.

Chief amounts of rainfall are: Haripur 1½" Jessure 1" (upto 0000Z) Sylhet ½", Khulna 3/4" (upto 0000Z) Comilla, Narayanganj and Chakdara 1/4" each.

Day temperatures were 10—17°F (6—9°C) below normal in Lahore, Rawalpindi, Multan, Peshawer, Quetta and Kalat divisions and 4—8°F (2—4°C) so elsewhere in West Pakistan and 2—4°F (1—2°C) above normal in East Pakistan.

Forecast valid until the evening of 6th May 1967:- Local rain/thundershowers are likely to occur in East Pakistan and scattered in Peshawar division and Kashmir. Isolated dust/thunderstorms may also occur in Multan and Sargodha divisions.

Karachi-11
The 5th May, 1967.

OBSERVATIONS

(N. A. QURESHI)
for Director, Meterological Services.

† Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs is rainfall since 0900 hrs. G.M.T. of the same d

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

SATURDAY THE 6th MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over Kashmir moved away.

A western disturbance is moving across East Rusian Turkistan and has indced a secondary over Quetta division.

The system has caused scattered thunderstorm/showers in Rawalpindi and Peshawar divisions.

Western disturbance over south Iran has moved to southeast Iran.

The low pressure area over Chota Nagpur has moved to west Bengal. Under its influence local thunderstorm/showers have occurred in Chittagong and Dacca divisions and scattered in Rajshahi divisions.

Chief amounts of rainfall are: Ishurdi 3" Sylhet, Pabna and Sirajgang 2" each, Dacca and Satkhira 1½" each, Comilla 3/4" Brahmanbaria, Mymensingh and Faridpur 1/2" each, Sirmangal, Narayanganj, Murree and Parachinar 1/4" each.

Day temperatures were 5—10°F (2—6°C) below normal in Lahore, Rawalpindi, Sargodha, Multan, Bahawalpur, Peshawar, Quetta, Hyderabad and northern Kalat divisions and to the same extent above normal in Karachi division.

Forecast valid until the evening of 7th May 1967:- Fairly widespread thunderstorm/howers will occur in Chittagong division, Local in Dacca division and scattered in Rajshahi, Khulna, D.I. Khan, Peshawar and Rawalpindi divisions and in Kashmir.

Karachi-11
The 6th May, 1967.

OBSERVATIONS

(N. A. QURESHI)
for Director, Meterological Services.

Given in Code

These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

At 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs G.M.T. of the same d

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

P, P—Pressure in hundreds tens and units of millibars.

T) T; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C.

50 has been added to the numbers When temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

SUNDAY THE 7th MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over East Russian Turkistan moved away. Its secondary over Quetta division has become unimportant. Under its influence a few falls of light rain/drizzle has fallen in Peshawar division.

The western disturbance over south east Iran moved slightly east wards.

Well marked low over west Bengal persists. Scattered rain/thundershowers have fallen in Chittagong and Dacca divisions, Brahmanbaria has reported 3" of rain (upto 0000Z) and Sirajgang 1/4" of rain.

Day temperatures were 3—9°F (2—5°C) below normal in West Pakistan and to the same extent above normal in East Pakistan.

Forecast valid until the evening of 8th May 1967:- Local rain/thundershowers are likely to occur over East Pakistan, scattered Quetta and Kalat divisions. Dry weather is likely to prevail elsewhere over West Paktstan.

Karachi-11
The 7th May, 1967.

OBSERVATIONS

(N. A. QURESHI)
for Director, Meterological Services.

† Given in Code
* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.
** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.
RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs; is rainfall since 0000 hrs. G M.T. of the same day.
Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

TUESDAY THE 9th MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over east Iran, now lies over northwest Afghanistan.

Westher remained dry in west Pakistan. Seasonal trough of low pressure over Bihar and west Bengal continues to be well marked.

Scattered rain/thundershowers have occured in Dacca and Rajshahi divisions. A few falls of light rain/thunderstorms have also occured in Chittagong division. Mymensingh has reported 1½" of rain and Bogra 1".

Day temperatures were 3—6°F (2—3°C) above normal in the country outside Karachi division.

Forecast valid until the evening of 10th May 1967:- Fairly widespread thunderstorms/showers are likely to occur in Rajshahi and Dacca divisions, local in Chittagong division, scattered in Khulna, Peshawar and Rawalpindi divisions and in Kashmir.

Squall Warning:- Northwesterly squall with speed reaching 50 Kts. likely effect Northern districts of East Pakistan during the next 24 hrs.

Karachi-11
The 9th May, 1967.

† Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs. G.M.T. of the same d

Whatever 999 given for RRR on the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

TUESDAY THE 9th MAY, 1967.

PAKISTAN DAILY WEATHER REPORT

WEDNESDAY THE 10th MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over northwest Afghanistan now lies over north Afghanistan and adjoining Russian Turkistan. In its association local thunderstorms/showers have occured in Peshawar division, scattered in Rawalpindi and Sargodha divisions.

The seasonal trough of low pressure over Bihar and West Bengal is well marked and has caused scattered rain/thundershowers in Chittagong and Rajshahi divisions. Chief amounts of rainfall are: Srimangal 1", Sirajgang 3/4", Sylhet ½" and Drosh and Kakul ¼" each.

Day temperatures have risen by 3—7°F (2—4°C) in Kalat, Karachi, Hyderabad and Khulna divisions.

Forecast valid until the evening of 11th May 1967:- Local thunderstorms/showers are likely to occur in Chittagong division, scattered elsewhere East Pakistan, Kashmir and in Peshawar and Rawalpindi divisions and isolated dust/thunderstorms in Lahore and Sargodha divisions.

Karachi-11
The 10th May, 1967.

† Given in Code
* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.
** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.
RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs. G.M.T. of the same d[ay]
Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

PPP—Pressure in hundreds tens and units of millibars.

TT; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C.

50 has been added to the numbers When temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

THURSDAY THE 11th MAY, 1967

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over North Afghanistan and adjoining Russian Turkistan moved away northeast wards across north of Kashmir after causing scattered rain in Rawalpindi division.

A western disturbance is moving across north of Punjab (India) has accentuated the seasonal trough of low pressure extending from South Uttar Pradesh to Bihar. Under its influence fairly widespread rain/thundershowers have fallen in Dacca division, scattered in Chittagong and Rajshahi divisions. A few falls of light rain/drizzle have also fallen in Khulna division.

Chief amounts of rainfall are: Mymensingh (upto 10,1200 GMT) Brahmanbaria and Dacca 1" each, Narayanganj, Sylhet (upto 10,1200Z) Sirajgang upto (0000Z) Rangpur (upto 0000Z) ½" each.

Day temperatures were: 3—8°F (2—4°C) below normal in Rajshahi, Multan and Quetta divisions and were to the same extent above normal in Chittagong, Dacca, Khulna, Karachi and Hyderabad divisions.

Forecast valid until the evening of 12th May 1967:- Local thunderstorms/showers are likely to occur in Chittagong division and scattered elsewhere in East Pakistan. Dry weather will prevail over West Pakistan.

Karachi-11
The 11th May, 1967.

† Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs G.M.T. of the same day.

Whenever 999 given for RRR see the summary above it for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

THURSDAY THE 11th MAY, 1967.

PPP—Pressure in hundreds tens and units of millibars.
TTT; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.)
St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.
TT—Dry Bulb temperatures in °C.
50 has been added to the numbers When temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

FRIDAY THE 12th MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

A western disturbance moving across Russian Turkistan has induced a secondary over Kashmir and adjoining areas.

Weather remained dry in West Pakistan.

The seasonal trough of low pressure extending from Rajisthan to Madhya Pradesh is well marked.

Scattered rain/thundershowers have occurred in Chittagong, Dacca and Rajshahi divisions.

Chief amounts of rainfall are: Sylhet 3/4" Srimangal, Mymensingh (upto (0000Z) and Rangpur (upto 0000Z) ¼" each.

Day temperatures have fallen by 3—8°F (2—4°C) in the country outside Rajshahi and Dacca divisions.

Forecast valid until the evening of 13th May 1967:- Local thunderstorm/showers are likely to occur in Chittagong and Dacca divisions and scattered in Khulna, Rajshahi, Peshawar and Rawalpindi divisions and in Kashmir. A few dust/thunderstorms are also likely to occur in Lahore, D.I. Khan, Multan, Sargodha and Bahawalpur divisions.

Karachi-11
The 12th May, 1967.

Given in Code

These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs. G.M.T. of the same

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

FRIDAY THE 12th MAY, 1967.

PPP—Pressure in hundreds tens and units of millibars.

T_sT_s: $T_dT_dT_d$; Dry Bulb; Dew Point temperatures (in tenths of °C.)

St—Character of tropopause.

HHH, HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C,

50 has been added to the numbers When temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

SATURDAY THE 13th MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's secondary western disturbance over Kashmir has moved slightly east wards.

A western disturbance lies over Iraq and west Iran.

Weather remained dry in West Pakistan. The seasonal trough of low pressure is well marked and continues to extend from Rajisthan to Madhya Pradesh and is causing in cusion of easterlies into Punjab (India) and neighbourhood.

Scattered rain/thundershowers have occured in Chittagong division. A few dust/thunderstorms have also occured in Dacca division.

Chief amounts of rainfall are: Sylhet 1".

Day temperatures have fallen by 3—9°F (2—5°C) in Chittagong, Dacca, Rajshahi, Lahore, D.I. Khan and Quetta divisions and risen by 6—7°F (3—4°C) in Sargodha and Peshawar divisions.

Forecast valid until the evening of 14th May 1967:- Local thunderstorms/showers are likely to occur in Rajshahi and Khulna divisions, scattered in Chittagong and Dacca divisions and in Kashmir. A few dust/thunderstorms are also likely to occur in Lahore, Rawalpindi, Peshawar and Sargodha divisions.

Karachi-11
The 13th May, 1967.

Given in Code

These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0900 hrs. G.M.T. of the same day

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

SATURDAY THE 13th MAY, 1967.

P; P—Pressure in hundreds tens and units of millibars.

T; T; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C.

50 has been added to the numbers When temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

SUNDAY THE 14th MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

The secondary western disturbance over Kashmir has moved away. Weather remained dry over West Pakistan.
Yesterday's western disturbance over Iraq now lies over north west Iran.
The seasonal trough of low pressure continues to be well marked and extends from Rajasthan to Madhya Pradesh.
An easterlies low pressure area has entered in to southeast and adjoining central Bay of Bengal. It is likely to concentrate into a depression.
Thunderstorms/showers have been local in Chittagong and Dacca divisions and scattered in Rajshahi division.
Chief amounts of rainfall are: Mymensingh 2", Sylhet (upto 13,1200Z) 1", Dinajpur (upto 14,0000Z) ½" and Srimangal (upto 14,0000Z) and Dacca ¼" each.

Day temperatures were 8—13°F (4—7°C) above normal in Hyderabad and Karachi divisions and along coastal Kalat divisions and 3—6°F (2—3°C) so in Chittagong and Dacca division and 3—5°F (2—3°C) below normal elsewhere in the country.

Forecast valid until the evening of 15th May 1967:- Local thunderstorms/showers will occur in East Pakistan. A few dust/thunderstorms may also occur in Multan and Bahawalpur divisions.

Karachi-11
The 14th May, 1967.

Given in Code

These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

At 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs is rainfall since 0000 hrs. G.M.T. of the same day

999 given for RRR are the summary above is for the actual amounts of rainfall;

P) P—Pressure in hundreds tens and units of millibars.

T) T; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.)

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C.

50 has been added to the number s When temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

MONDAY THE 15th MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Observations are lacking but beleive yesterday's well marked low pressure area in southeast and adjoining central Bay of Bengal has concentrated into a depression centred at 15,0300 G.M.T. within one degree of Lat. 12½°N and long. 90½°E. Likely intensify and move in a northerly direction.

Rain/thundershowers have been scattered in Chittagong and Rajshahi divisions.

A well marked low pressure area has developed in southeast Arabian Sea.

A trough of low pressure extends from Khairpur division to west Bengal.

Weather remained dry over West Pakistan.

Day temperatures were 8—11°F (4—6°C) above normal in Hyderabad and coastal Kalat divisions and 2—7°F (1—4°C) so in Chittagong, Sargodha, Peshawar and Karachi division and 1—3°F (1—2°C) below normal elsewhere over the country outside Bahawalpur and D. I. Khan.

Forecast valid until the evening of 16th May 1967:- Local thunderstorms/showers are likely to occur over East Pakistan. A few dust/thunderstorms may also occur over Multan, Bahawalpur and Khairpur divisions.

Karachi-11
The 15th May, 1967.

OBSERVATIONS

(N. A. QURESHI)
for Director, Meterological Services.

Given in Code

These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

At 0300 hrs. G.M.T. is rainfall since 0300 hrs G.P.L.T. of the previous day and RRR or 1200 hrs. is rainfall since 0600 hrs. G M.T. of the same day

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

TUESDAY THE 16th MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Ships observations are lacking but believe last mornings depression moved north wards intensified into a deep depression and lay at 15,1200 G.M.T. within one degree of latitude 13¾°N and longitude 90½°E. It then moved NNE-wards and is centred at 16,0300 G.M.T. within one degree of latitude 14°N and longitude 91°E. It is likely to intensify further and continue to move NNE-wards.

The seasonal trough of low pressure extends from Hyderabad to West Bengal.

Thunderstorms/showers have been local in Rajshahi division and scattered in Dacca division. Mymensingh has recorded ½" of rain.

The well marked low pressure area in south east Arabian Sea persists.

Weather remained dry over West Pakistan.

Day temperatures were 3—7°F (2—4°C) above normal in Chittagong. Kalat, Karachi and Hyderabad divisions.

Forecast valid until the evening of 17th May 1967:- Scattered thunderstorms/showers may occur in East Pakistan. A few dust/thunderstorms may also occur in Hyderabad, Khairpur and Bahawalpur divisions.

Karachi-11
The 16th May, 1967.

† Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs; is rainfall since 0000 hrs. G.M.T. of the same day

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall;

PP—Pressure in hundreds tens and units of millibars.

TT T; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.)

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C.

50 has been added to the numbers when temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No. S-1467
Volume No. 21

WEDNESDAY THE 17th MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Observations lacking but believe last morning's deep depression remained practically stationery and intensified into a cyclonic storm centred at 16,1200 G.M.T. within one degree of latitude 14°N and longitude 91°E. It then moved northwards and intensified further and lay as a severe cyclonic storm prabably with a samall core of hurnicane winds, this morning at 17,0300 G M.T. within one degree of latitude 15°N and longitude 91°E. It is likely to move north northeastwards·

Seasonal trough of low pressure extends from Hyderabad division to Madhya Pradesh.

Scattered rain/thundershowers have occured in Dacca division. A few falls of light rain/drizzle have also fallen in Khulna and Rajshahi divisions.

The low pressure area over southeast Arabian Sea bas moved inland and lies over Mysore and adjoining areas.

Weather remained dry in West Pakistan.

Day temperatures were 3—7°F (2—4°C) above normal in the country outside Rajshahi and Lahore divisions where these were nearly normal.

Forecast valid until the evening of 18th May 1967:- Fairly widespread rain/thundershowers are likely to occur in Chittagong division, local in Khulna division and scattered elsewhere over East Pakistan: A few dust/thunderstorms are also likely to occur in Hyderabad, Khairpur, Peshawar and Rawalpindi divisions.

Karachi-11
The 17th May, 1967.

OBSERVATIONS

(N. A. QURESHI)
for Director, Meterological Services.

† Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

† RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs. G.M.T. of the same day

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

P, P—Pressure in hundreds tens and units of millibars.

T, T: TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.)

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C.

50 has been added to the numbers When temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

THURSDAY THE 18th MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Observations from Burma and Bay of Bengal lacking but believe last morning's severe cyclonic storm moved NNE wards and was centred at 17,1200Z within one degree of latitude 17°N and longitude 92.5°E. It continued moving in the same direction and is crossing Arakan coast at 18,0300Z near latitude 19½°N. It is likely to weaken rapidly and continue move in the same direction. Under its influence a few falls of light rain/thunderstorms have occured in Chittagong division.

Seasonal trough of low pressure extends from Kalat to Madhya Pradesh.

Low pressure area over Mysore and adjoining areas is becoming unimportant.

Weather remained dry in West Pakistan.

Day temperatures were 3—9°F (2—5°C) above normal practically in the whole country.

Forecast valid until the evening of 19th May 1967:- Local rain/thundershowers are likely to occur in Chittagong division, scattered elsewhere over East Pakistan. A few dust/thunderstorms are also likely to occur in Bahawalpur and Multan divisions.

Karachi-11
The 18th May, 1967.

OBSERVATIONS

(N. A. QURESHI)
for Director, Meterological Services.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

FRIDAY THE 19th MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Observations lacking but believe last morning's severe cyclonic storm weakened repidly after crossing the Arakan coast and lay as a depression centred at 18,12(G.M.T. above 140 miles east of Akyab. It weakened further and moved away northeast wards.

The seasonal trough of low pressure extends across Rajasthan to west Bengal.

A few thunderstorms/showers have occured in Chittagong and Rajshahi divisions.

A feeble western disturbance lies over southeast Iran.

Day temperatures were 3—8°F (2—4°C) above normal practically over the whole country.

Forecast valid until the evening of 20th May 1967:- Thunderstorms/showers will be local in Chittagong, Dacca and Rajshahi divisions and scattered in Khuln division. Weather will dry over West Pakistan.

Squall Warning. A few north westerly squalls with wind speed reaching 40 Kts. are likely to affect the northern districts of East Paikstan during the next 48 hours.

Karachi-11
The 19th May, 1967.

Winds in Knots

These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0900 hrs. G.M.T. of the same day

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

SATURDAY THE 20th MAY, 1967

Summary of observations recorded at 0300 Hrs G.M.T.

A western disturbance is moving across north of Afghanistan and has accentuated the seasonal low extending from Kalat division to Multan division. Under i influence a few falls of light rain/thunderstorms have occurred in Peshawar division.

The seasonal trough over West Bengal is well marked and is causing incursion of moist air from Bay of Bengal and has caused fairly widespread rain/thundershowe in Chittagong division, local in Dacca division. A few falls of light rain/thunderstorms have also occurred in Khulna and Rajshahi divisions.

Chief amounts of rainfall are: Rangamati and Narayangang 3/4" each, Majidi Court (upto 0000 GMT) Cox's Bazar, Comilla and Dacca 1/4" each.

Day temperatures were 3—5°F (2—3°C) below normal in Hyderabad division and 3—9°F (2—5°C) above normal practically elsewhere in the country.

Forecast valid until the evening of 21st May 1967:- Fairly widespread thunderstorms/showers are likely to occur in Chittagong and Dacca divisions, local in Rajsha division and scattered in Khulna, Peshawar, Rawaipindi divisions and in Kashmir. A few dust/thunderstorms are also likely to occur in Sargodha, Multan ar Lahore divisions.

Heavy Rainfall Warning. Locally moderate to heavy falls may occur at a few places in the northern districts of East Pakistan during the next 48 hrs.

Karachi-11
The 20th May, 1967.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

SUNDAY THE 21st MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance north of Afghanistan now lies northeast of Afghanistan and adjoining areas. Under its influence scattered ain/thunderstorms have occurred in Peshawar division. A few falls of light rain/thundershowers have also occurred in Lahore and Rawalpindi divisions.

Seasonal trough over West Bengal continues to be well marked and is causing incression of moist air from the Bay of Bengal. It has caused scattered thunder storms/showers in Chittagong and Rajshahi divisions. A few falls of light rain/thunderstorms have also occurred in Khulna division.

Chief amounts of rainfall are: Comilla ½", Sylhet ½" Dinajpur and Drosh 1/4" each.

Day temperatures were 3—10°F (2—6°C) above normal practically over the whole country.

Forecast valid until the evening of 22nd May 1967:- Local rain/thundershowers are likely to occur in Chittagong division and scattered over Khulna, Rajshahi, Peshawar and Rawalpindi divisions and in Kashmir. A few dust/thunderstorms are also likely to occur in Lahore, Sargodha and Multan divisions.

Karachi-11
The 21st May, 1967.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

MONDAY THE 22nd MAY, 1967

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over northeast Afghanistan now lies over Kashmir with its associated trough extending to Multan division and adjoining areas. fresh western disturbance lies over Afghanistan. Under their influence scattered rain/thundershowers have occurred in Peshawar division.

Seasonal trough over West Bengal and Bihar continues to be well marked. It has caused scattered rain/thundershowers in Chittagong and Khulna divisions. A fe falls of light rain have occured in Rajshahi division.

Chief amounts of rainfall are: Khulna 3/4", Sylhet, Drosh and and Chakdara 1/4" each.

Day temperatures were 3—4°F (2°C) below normal in Hyderabad division and were 3—8°F (2—4°) above normal elsewhere in the country outside Karachi divisio where these were normal.

Forecast valid until the evening of 23rd May 1967:- Local thunderstorms/showers are likely to occur in Rajshahi and Chittagong divisions and scattered in Dacca Khulna, Peshawar and Rawalpindi divisions and in Kashmir. A few dust/thunderstorms are also likely to occur in Sargodha, Rawalpindi, Lahore, Quetta, D.I. Kha and Multan divisions.

Karachi-11
The 22nd May, 1967.

Given in Code

These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs. G.M.T. of the same day

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

MONDAY THE 22nd MAY, 1967.

PAKISTAN DAILY WEATHER REPORT

Reg. No. S-1467
Volume No. 21

TUESDAY THE 23rd MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over Kashmir has slightly moved northeastwards, while its associated trough lies over Lahore and Multan divisions. The western disturbance over central Afghanistan now lies over northeast Afghanistan and adjoining Peshawar division. Under their combined influence local rain/thundershowers have occurred in Peshawar division and a few falls of light rain or thunderstorms in Lahore, Rawalpindi, Quetta and Khairpur divisions.

The seasonal trough of low pressure over Bihar and West Bengal persists. It has caused widespread rain/thundershowers in Dacca division, fairly widespread in Khulna divison, local in Chittagong division and scattered in Rajshahi division.

Chief amounts of rainfall are: Khulna and Drosh 1½" each, Faridpur 1", Jessore and Bogra 3/4" each and Majidi Court, Comilla and Sirajganj ½" each.

Day temperatures were 7—10°F (4—6°C) below normal in Peshawar, Quetta and Khulna divisions and 3—6°F (2—3°) above normal in Sargodha and Rawalpindi divisions.

Forecast valid until the evening of 24th May 1967:- Thunderstorms/showers will be fairly widespread in Chittagong and Dacca divisions, local in Rajshahi and Peshawar division and in Kashmir and scattered in Khulna and Rawalpindi divisions. A few dust/thunderstorms may also occur in Multan, Sargodha and Lahore divisions.

Karachi-11
The 23rd May, 1967.

OBSERVATIONS

(N. A. QURESHI)

Gives in Code

These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

At 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs. G.M.T. of the same day

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

TUESDAY THE 23rd MAY, 1967.

P: P—Pressure in hundreds tens and units of millibars.

T, T; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.)

St.—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C,

50 has been added to the numbers When temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

WEDNESDAY THE 24th MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over east Kashmir with its trough extending to Lahore division has moved away.

Western disturbance over northeast Afghanistan and adjoining Peshawar division now lies over Kashmir with its trough extending to D. I. Khan division. Under their combined influence local rain/thundershowers have occurred in Rawalpindi and Peshawar divisions. A few falls of light rain or thunderstorm have also occured in D. I. Khan and Khairpur division.

Seasonal trough of low pressure over West Bengal and Bihar persists. It has caused scattered rain/thundershowers in Chittagong and Khulna division. A few falls of drizzle have also occured in Dacca division.

Chief amounts of rainfall are: Jessore (upto 1200Z) Murree (upto 0000Z) ½" each, Rawalpindi and Khulna 1/4" each.

Day temperatures were 10—14°F (6—8°C) below normal in Quetta and Kalat divisions and 3—7°F (2—4°C) so elsewhere over the country.

Forecast valid until the evening of 25th May 1967:- Local thunderstorms/showers are likely to occur in Chittagong and Dacca divisions, scattered in Khulna, Rajshahi, Peshawar and Rawalpindi divisons and in Kashmir. A few dust/thunderstorms are also likely to occur in Sargodha, Lahore and Multan divisions.

Karachi-11
The 24th May, 1967.

OBSERVATIONS

(N. A. QURESHI)
for Director, Meterological Services.

1/ Given in Code

2/ These stations reports for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted

3/ These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs. G.M.T. of the same day

Whenever 999 given for RRR use the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

WEDNESDAY THE 24th MAY, 1967.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

THURSDAY THE 25th MAY. 1967.

Summary of observations recorded at 0300 Hrs. G.M.T

Yesterday's western disturbance over Kashmir has slightly moved eastwards. Under its influence local rain or thundershowers have occured in Rawalpindi division, scattered in Lahore, Sargodha and Peshawar divisions. A few falls of light rain have also fallen in D. I. Khan division.

Seasonal trough of low pressure over West Bengal and Bihar is well marked. In its association moist air is penetrating into East Pakistan and has caused widespread rain or thundershowers in Dacca division, fairly widespread in Chittagong and Khulna divisions and local in Rajshahi divisions.

Chief amounts of rainfall are: Maijidi Court 6", Brahamanbaria 3", Chittagong and Narayanganj 2" each, Dacca, Faridpur and Murree 1½" each, Comilla and Kakul 1" each, Rangamati, Cox's Bazar and Mymensingh 3/4" each, Barisal, Khulna, Satkhira, Bogra, Rawalpindi and Haripur ½" each.

Day temperatures were 10—18°F (6—10°C) below normal in Peshawar, Quetta, Kalat and Khairpur divisions and 3—9°F (2—5°C) so elsewhere over the country outside Karachi division.

Forecast valid until the evening of 26th May 1967:- Fairly widespread rain or thundershowers are likely to occur in East Pakistan and scattered thunderstorms or showers in Peshawar and Rawalpindi divisions and in Kashmir. A few dust or thunderstorms are also likely to occur in Sargodha and Lahore divisions.

Heavy Rainfall Warning: Locally heavy falls may occur in Chittagong and Dacca divisions during next 48 hrs.

Karachi-11
The 25th May, 1967.

PPP—Pressure in hundreds tens and units of millibars.

TTT; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.)

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C.

50 has been added to the numbers When temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

FRIDAY THE 26th MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over Kashmir moved away after causing scattered rain or thundershowers in Rawalpindi and Peshawar divisions and a few falls o light rain in D. I. Khan division.

A western disturbance lies over Russain Turkistan with its trough extending to north Afghanistan.

Seasonal trough of low pressure over West Bengal and Bihar persists. Under its influence scattered rain or thundershowers have oecured in Chittagong, Khulna and Rajshahi divisions.

Chief amounts of rainfall are: Sylhet 1½"Rangpur ½" Satkhira, Dinajpur, Drosh and Kakul ¼" each.

Day temperatures were 10—15°F (6—8°C) below normal in Rawalpindi, Multan, Sargodha, Peshawar, Quetta, and Kalat divisions and 3—7°F (2—4°C) sc in Chittagong, Lahore, Bahawalpur and D.I. Khan divisions and were nearly normal elsewhere over the country.

Forecast valid until the evening of 27th May 1967:- Local rain or thundershowers likely to occur in Chittagong division, scattered in Rajshahi, Khulna, Peshawar, Rawalpindi, D.I. Khan and Quetta divisions and in Kashmir.

A few dust/thunderstorms may also occur in Khairpur and Multan divisions.

Karachi-11
The 26th May, 1967.

OBSERVATIONS

(N. A. QURESHI)
for Director, Meterological Services.

1 Given in Code

* These stations report for PPP, the geopotential of the 500 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs is rainfall since 0000 hrs. G.M.T. of the same day

"+" sign over 999 given for RRR see the summary above for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

FRIDAY THE 26th MAY, 1967.

P, P—Pressure in hundreds tens and units of millibars.

T T: TdTdTd: Dry Bulb; Dew Point temperatures (in tenths of °C.

St—Character of tropopause

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C.

50 has been added to the numbers When temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

SATURDAY THE 27th MAY, 1967

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over Russian Turkistan north of Afghanistan is moving away across East Russian Turkistan. It's associated trough has accentua ted and now lies as a well marked low over Quetta and Khairpur divisions. Under their combined influence thunderstorms/showers have been scattered in Rawalpind and Peshawar divisions. A few dust/thunderstorms have also occured in Quetta, Kalat, Khairpur and Karachi divisions.

The seasonal trough of low pressure extends to central Bay of Bengal.

Rain/thundershowers have been local in Chittagong and Dacca divisions and scattered in Rajshahi division.

Chief amounts of rainfall are: Sylhet 2", Dacca 1", Srimangal and Narayanganj 3/4" each Rangamati, Sirajganj and Chakdara ½" each and Comilla, Brahmanbari and Kakul ¼" each.

Day temperatures were 10—14°F (6—8°C) below normal in Lahore, Rawalpindi, Peshawar, Sargodha, Multan and D. I. Khan divisions and 3—8°F (2—4°C) s elsewhere in West Pakistan outside Karachi division and were 3—6°F (2—3°C) above normal in Chittagong and Rajshahi divisions.

Forecast valid until the evening of 28th May 1967:- Rain/thundershowers will be fairly widespread in Chittagong and Dacca divisions and scattered in Rajshahi Khulna, Quetta, Peshawar, Rawalpindi, divisions and in Kashmir. A few dust/thunderstorms may also occur in Khairpur division.

Karachi-11
The 27th May, 1967.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

SUNDAY THE 28th MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over East Kashmir has moved away. The western disturbance over Quetta and Khairpur divisions persists. Under their ombined influence scattered rain/thundershowers have occured in Rawalpindi and Peshawar divisions and a few dust/thunderstorms in Quetta division. Murree has recorded ½" of rain.

The seasonal trough of low pressure extends accross Orisa to central Bay of Bengal.

Weather remained dry in East Pakistan.

Day temperatures were 4—8°F (2—4°C) above normal in East Pkistan and 10—13°F (6—7°C) below normal in Peshawar, Rawalpindi, D. I. Khan and Sargodha division and 3.9°F (2.5°C) so elsewhere in West Pakistan outside Karachi division.

Forecast valid until the evening of 29th May 1967:- Local thunderstorms/showers may occur in Chittagong division and scattered elsewhere in East Pakistan and in Kashmir and in Quetta and Peshawar divisions. A few dust/thunderstorms may also occur in Khairpur and Bahawalpur divisions.

Karachi-11
The 28th May, 1967.

OBSERVATIONS

(N. A. QURESHI)
for Director, Meterological Services.

† Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs. G.M.T. of the same day

Weather 999 given for RRR are the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

SUNDAY THE 28th MAY, 1967.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

MONDAY THE 29th MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over Quetta and Khairpur divisions now lies over Quetta and adjoining D.I. Khan division. Under its influence scattered thunder storms or rain have occured in Multan, Peshawar and Quetta divisions. A few falls of light rain have also occured in D. I. Khan divisions,

The seasonal trough of low pressure continues to extend across Bihar to east central Bay of Bengal.

Weather remained dry in East Pakistan.

Day temperatures were 3—9°F (2—5°C) below normal in West Pakistan and 3.9°F (2.5°C) above normal in West Pkistan.

Forecast valid until the evening of 30th May 1967:- Scattered thunderstorms/showers are likely to occur in East Pakistan, Quetta, D.I. Khan and Peshawar divisions and in Kashmir. A few dust/thunderstorms are likely to occur in Multan, Bahawalpur, Sargodha and Khairpur divisions.

Karachi-11
The 29th May, 1967.

Given in Code

These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs; is rainfall since 0000 hrs. G.M.T. of the same day

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

TUESDAY THE 30th MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over Quetta and adjoining D.I. Khan divisions persists. Under its influence scattered rain/thunderstorms have occured in Quetta and Kalat divisions. Panjger has reported 3/4" of rain.

A fresh western disturbance lies over south east Iran.

Seasonal trough of low pressure continues to extend across Orissa to east central Bay of Bengal.

Weather remained dry in East Pakistan.

Day temperatures were 3—6°F (2—3°C) below normal in West Pakistan and 3—8°F (2—4°C) above normal in East Pkistan.

Forecast valid until the evening of 31st May 1967:- Scattered thunderstorms/showers may occur in East Pakistan and in Quetta, D.I. Khan and Peshawar divisions. A few dust/thunderstorms are also likely to occur in Multan and Khairpur divisions.

Karachi-11
The 30th May, 1967.

Station Code

These stations reports for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

At 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs is rainfall since 0000 hrs. G.M.T. of the same day

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

TUESDAY THE 30th MAY, 1967.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

SATURDAY THE 10th JUNE, 1967

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over east Russian Turkistan has moved away.

The seasonal trough of low pressure continues to extend from Kalat division to Sargodha division. A few falls of light rain or thunderstorms have occured in Lahore and Rawalpindi division.

A well marked low pressure area lies over east Madhya Pradesh and neighbourhood. In its association Monsoon has advenced into the eastern divisions of East Pakistan and has caused widespread rain/thundershowers in Chittagong, Dacca and Khulna divisions and scattered in Rajshahi division.

Chief amounts of rainfall are: Comilla (upto 09,1200Z) 2" Cox's Bazar, Faridpur and Satkhira 1½" each, Narayanganj 1", Dacca and Khulna and Barisal (upto 10,000Z) 3/4" each, Rangamati; Chittagong, Sylhet Mymensingh and Jessore ½" each.

Day temperatures were 3—9°F (2—5°C) below normal in East Pakisian and in Quetta, Kalat and Hyderabad divisions and were to the same extent above normal elsewhere in West Pakistan outside Karachi and Khairpur divisions.

Forecast valid until the evening of 11th June 1967:- Rain/thundershowers will be fairly widespread in East Pakistan local in Lahore and Rawalpindi divisions and scattered in Kashmir and in Peshawar and Sargodha divisions. A few dust/thunderstorms may also occur in Hyderabad Khairpur, Multan and Bahawalpur divisions.

Karachi-11
The 10th June, 1967.

Given in Code

These stations report for FFF, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted

These stations report for FFF, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0900 hrs. G.M.T. of the same day

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

SATURDAY THE 10th JUNE, 1967.

P; P—Pressure in hundreds tens and units of millibars.

T; T; TdTdTd: Dry Bulb; Dew Point temperatures (in tenths of °C.)

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C.

50 has been added to the numbers When temperatures are negative

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

SUNDAY THE 11th JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

The seasonal trough of low pressure continues to extend from Kalat division to Sargodha division.

A feeble western disturbance lies over Russian Turkistan north of Peshawar division.

The Moonsoon continues to prevail over the eastern divisions of East Pakistan. It is likely to extend westwards. It has caused widespread rain/thundershowers in Chittagong and Dacca divisions, local in Rajshahi division and a few thunderstorms in Khulna division.

Chief amounts of rainfall are: Sylhet 3", Comilla and Dinajpur 2" each, Maijdee Court, Srimangal and Mymensingh 1½" each, Faridpur 1" Bogra (upto 11,0000Z) 3/4" and Rangpur ½".

Day temperatures were 3—6°F (2—3°C) above normal in Dacca, Khulna, Lahore, Rawalpindi and Peshawar divisions and 3—8°F (2—4°C) below normal in Multan, Bahawalpur, Quetta, Kalat, Karachi, Hyderabad and Khairpur divisions.

Forecast valid until the evening of 12th June 1967:- Rain/thundershowers will be fairly widespread in East Pakistan and scattered in Kashmir and Peshawar division. A few dust/thunderstorms may also occur in Rawalpindi, Lahore and Sargodha division.

Karachi-11
The 11th June, 1967.

Given in Code

These stations report for PPP, the geopotential of the 500 mbs. Pressure level in geopotential metres, the thousands figure omitted.

These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs. G.M.T. of the same day

Whenever 999 given for RRR see the remarks above in for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

SUNDAY THE 11th JUNE, 1967.

P: P—Pressure in hundreds tens and units of millibars.

T\ T; TdTdTd: Dry Bulb; Dew Point temperatures (in tenths of °C.)

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C.

50 has been added to the numbers When temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

MONDAY THE 12th JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

The seasonal trough of low pressure continues to extend from Kalat division to Sargodha division.
Yesterday's feeble western disturbance now lies over east Russian Turkistan.
Weather remained dry over West Pakistan.
A trough of low pressure lies off Konkan-Kanora coast.
Monsoon has advanced west-wards and now prevails over whole of East Pakistan. Under its influence rain/thundershowers have been widespread in Chittagong division, fairly widespread in Dacca division and local in Rajshahi and Khulna divisions.
Chief amounts of rainfall are: Cox's Bazar, and Srimangal 3" each, Rangamati, Chittagong, Comilla, Brahmanbaria, Narayanganj, Dacca and Bogra 2" each, Maijdi Court, Sylhet, Khulna and Sirajgang 1½" each and Faridpur, Jessore and Rangpur 3/4" each.
Day temperatures were 3—10°F (2—6°C) below normal in Rajshahi, Kalat, Hyderabad and Khairpur divisions.
Forecast valid until the evening of 13th June 1967:- Rain/thundershowers will be fairly widespread in East Pakistan. A few dust/thunderstorms may also occur in Rawalpindi division.

Karachi-11
The 12th June, 1967.

* Given in Cods
* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted
** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.
RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0000 hrs. G M.T. of the same day
Whenever 999 given for RRR use the summary shows is for the actual amounts of rainfall.

P, P—Pressure in hundreds tens and units of millibars.

T, T; TdTdTd; Dry Bulb; Daw Point temperatures (in tenths of °C.

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C,

50 has been added to the numbers When temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

TUESDAY THE 13th JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over east Russian Turkistan has moved away after accentuating the seasonal trough of low pressure extending from Kalat division to Sargodha division. A few thunderstorms have occured in Peshawar division.

The trough of low pressure of Maharashtra coast has developed into a well marked low pressure area over east central Arabian Sea. It is likely to concentrate into a depression.

Monsoon is genrally moderate over East Pakistan and has caused widespread rain or thundershowers in Chittagong and Dacca divisions, fairly widespread in Khulna division and scattered in Rajshahi division.

Chief amounts of rainfall are: Faridpur 5", Sylhet 4", Khulna 3", Pabna 2", Brahmanbaria (upto 12,1200Z), Dacca and Jessore 1½" each, Narayanganj 1" and Chittagong 3/4".

Day temperatures were 3—6°F (2—3°C) below normal in Chittagong, Rajshahi, Khairpur and Karachi divisions and 3—9°F (2—5°C) above normal in Rawalpindi, Peshawar and D.I. Khan divisions.

Forecast valid until the evening of 14th June 1967:- Rain/thundershowers will be fairly widespread in Chittagong and Dacca divisions, local in Rajshahi division and scattered in Khulna division. A few dust/thunderstorms may also occur in Peshawar, Rawalpindi, Sargodha and Lahore divisions and in Kashmir.

Karachi-11
The 13th June, 1967.

OBSERVATIONS

(N. A. QURESHI)
for Director, Meterological Services.

P, P—Pressure in hundreds tens and units of millibars.
T1 T; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.
St—Character of tropopause.

HHHLHHHH (heights)—Tens of geopotential metres.
TT—Dry Bulb temperatures in °C.
50 has been added to the numbers When temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

WEDNESDAY THE 14th JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Seasonal trough of low pressure extending from Kalat to Sargodha division continues to be well marked. Scattered rain/thunderstorms have occured in Peshawar division.

The well marked low pressure area over east central Arabian Sea has moved north wards and now lies off south Gujrat and north Maharashtra coast.

Monsoon continues to be well marked over East Pakistan and has caused local rain/thundershowers in Chittagong division, scattered in Dacca and Rajshahi divisions. A few falls of light rain have also fallen in Khulna division.

Chief amounts of rainfall are: Sylhet 2", Mymensingh 1½", Brahmanbaria and Rangpur ½" each, Cox's Bazar, Srimangal and Bogra ¼" each.

Day temperatures were 3—8°F (2—4°C) below normal in Chittagong, Kalat and Hyderabad divisions and were 3—6°F (2—3°C) above normal in Khulna, Lahore, Rawalpindi, Sargodha, Multan, Peshawar, D.I. Khan and Quetta divisions.

Forecast valid until the evening of 15th June 1967:- Local rain/thundershowers are likely to occure in Chittagong, Dacca and Rajshahi divisions, scattered in Khulna, Peshawar, Rawalpindi, Karachi and Hyderabad divisions and in Kashmir. A few dust/thunderstorms are also likely to occur in Lahore, Multan, D. I. Khan and Sargodha divisions.

Karachi-11
The 14th June, 1967.

Given in Code

These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

R is © 300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1300 hrs. is rainfall since 0900 hrs. G.M.T. of the same day

However 999 given for RRR, as the summary shows is for the actual amounts of rainfall

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

THURSDAY THE 15th JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's low pressure area in East Central Arabian Sea moved westwards, weakened and now lies as a trough over west central Arabian Sea.

Seasonal trough of low pressure extends from Kalat division to D.I. Khan division.

A western disturbance lies over Russian Turkistan north of Afghanistan. Under its influence scattered rain/thunderstorm has occured in Lahore, Rawalpindi, Sargodha and Peshawar divisions.

Monsoon continues to be moderate in East Pakistan and has caused widespread rain/thundershowers in Dacca division, fairly widespread in Khulna division and local in Chittagong and Rajshahi division.

Chief amounts of rainfall are: Sylhet 3", Dacca, Faridpur, Bogra 2" each, Cox's Bazar, Narayanganj, Sathkira, Jessore and Pabna ½" each, Maijdee court 3/4" Barisal and Rangpur ¼" each.

Day temperatures were 3—10°F (2—6°C) below normal in Multan, Peshawar, Kalat. Hyderabad and Khairpur divisions and 3—4°F (2°C) above normal in East Pakistan and in Quetta, Rawalpindi and Lahore divisions.

Forecast valid until the evening of 16th June 1967:- Fairly widespread rain/thundershowers are likely to occure in Chittagong and Dacca divisions, local elsewhere in East Pakistan and scattered in Kashmir and in Peshawar, Rawalpindi, Sargodha and Lahore divisions. Isolated dust/thunderstorms are also likely to occur in Multan, Bahawalpur, D. I. Khan, Quetta and Kairpur divisions.

Karachi-11
The 15th June, 1967.

OBSERVATIONS

(N. A. QURESHI)
for Director, Meterological Services.

Rain in Code

Upper stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted

Upper stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and 222 or 1200 hrs. is rainfall since 0900 hrs. G.M.T of the same day

However, 999 given for RRR are the summary above is for the total amounts of rainfall

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

FRIDAY THE 16th JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance now lies over east Russian Turkistan north of Peshawar division.

The seasonal trough of low pressure has shifted southwards and extends from Kalat division to Madhya Pradesh.

Rain/thuudershowers have been local in Rawalpindi and Peshawar divisions, scattered in Sargodha, Multan, D.I. Khan and Quetta divisions and a few falls of ligh rain or thunderstorms in Lahore and Khairpur divisions.

Monsoon has weakend over East Pakistan and has caused local rain or thundershowers in Chittagong division and scattered in Dacca and Rajshahi divisions.

Chief amounts of rainfall are: Sylhet 4", Maijdee court 3/4", Rangamati, Rangpur, Rawalpindi, Murree, Drosh, Haripur and Kakul ½" each and Chittagong, Mymansingh, Dinajpur, Khushab and Sahiwal ¼" each.

Day temperatures:- These were 3—9°F (2—5°C) below normal in Wast Pakistan outside Karachi division and 2—3°F (1—2°C) above normal in Dacca and Khulna divisions.

Forecast valid until the evening of 17th June 1967:- Fairly widespread rain/thundershowers will occur in Lahore, Rawalpindi and Chittagong divisions, local elsewhere in East Pakistan, Kashmir and in Peshawar, Sargodha and Multan divisions and scattered in Bahawalpur, Khairpur, D. I. Khan, Hyderabad and Quetta divisions.

Karachi-11
The 16th June, 1967.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

SATURDAY THE 17th JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over north of Peshawar division is moving away north east wards across east Russian Turkistan. Another western disturbance lies over Russian Turkistan north of Afghanistan.

The seasonal trough of low pressure continues to extend from Kalat division to Madhya Pradesh.

Under their combined influence rain/thundershowers have been scattered in Rawalpindi, Multan, Peshawar, D.I Khan and Hyderabad divisions. A few falls of light rain or thunderstorms have also occured in Sargodha, Bahawalpur and Quetta divisions.

Monsoon is weak over East Pakistan and has caused local rain/thundershowers in Chittagong division, scattered in Dacca and Rajshahi division and a few falls of light rain in Khulna divisions.

Chief amounts of rainfall are: Cox's Bazar (upto 16,1200Z) 1½", Chittagong, Rangamati ½" and Maijdee court Mymensingh, Murree, Sahiwal and Hyderabad ¼" each.

Day temperatures:- were 10—18°F (6—10°C) below normal in West Pakstan outside the southern divisions and were 3—4°F (2°C) above normal in Rajshahi and Khulna division.

Forecast valid until the evening of 18th June 1967:- Rain/thuudershowers will be fairly widespread in Chittagong division, local in Dacca division, scattered in Rajshahi, Khulna, Peshawar, Rawalpindi, Khairpur and Hyderabad divisions and Kashmir. A few dust/thunderstorm may also occur in Multan and Bahawalpur and Karachi divisions.

Karachi-11
The 17th June, 1967.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

SUNDAY THE 18th JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance now lies over Russian Turkistan north of Peshawar division.

The seasonal trough of low pressure is re-establishing itself from Kalat division to Multan division.

Scattered thundershowers have occured in Peshawar and D.I. Khan divisions and a few thunderstorms in Rawalpindi, Multan and Sargodha divisions.

The monsoon is active over East Pakistan and has caused widespread rain/thundershowers with locally heavy to very heavy falls in Chittagong and Rajshahi divisions and fairly widespread elsewhere in the province.

Chief amounts of rainfall are: Sylhet 5", Cox's Bazar and Pabna 4" each, Comilla, Dacca and Dinajpur 2" each, Maijedee Court and Brahmanbaria 2" each, Jessore and Sirajgong 1½" each, Chittagong 1", Barisal (upto 18,1200Z) Satkhira and Rajshahi 3/4" and Rangpur ½".

Day temperatures:- These were 10—17°F (6—9°C) below normal in Rawalpindi, Sargodha, Multan and Peshawar divisions and 3—9°F (2—5°C) so in Rajshahi division and elsewhere in the west Pakistan outside Karachi and Hyderabad divisions and were 3—4°F (2°C) above normal in Dacca, Khulna and Hyderabad divisions.

Forecast valid until the evening of 19th June 1967:- Rain/thuudershowers will be fairly widespread in Chittagong, Dacca and Khulna divisions, local in Rajshahi division and scattered in Kashmir. Isolated dust/thunderstorm may also occur in Bahawalpur, Multan and Khairpur divisions.

Karachi-11
The 18th June, 1967.

¶ Given in Code

These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0900 hrs. G.M.T. of the same day.

Whenever 999 given for RRR use the summary above is for the total amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

MONDAY THE 19th JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance moved away after causing scattered thunderstorm/rain in Quetta division.

Another lies over central and East Iran. A trough of low pessure lies over Kutch and neighbourhood.

Monsoon is moderate over East Pakistan. It has caused local rain/thundershowers in Chittagong, Dacca and Khulna divisions. A few falls of light rain have also occurred in Rajshahi division.

Chief amounts of rainfall are: Cox's Bazar 1½" Chittagong and Mymensingh 1" each, Sylhet and Satkhira (upto 1200 G.M.T.) ½" each, and Rangamati (upto 1200 G.M.T.) ¼".

Day temperatures:- These were 3—6°F(2—3°C) above normal in Hyderabad division and 3—9°F (2—5°C) below normal elsewhere in the country outside Karachi divisions.

Forecast valid until the evening of 20th June 1967:- Local rain/thuudershowers are likely to occur in Dacca Chittagong divisions, scattered in Khulna and Rajshahi divisions. A few dust/thunderstorms are also likely to occur in Quetta, D.I. Khan, Peshawar and Hyderabad divisions and in Kashmir.

Karachi-11
The 19th June, 1967.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

TUESDAY THE 20th JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's feeble western disturbance over central Iran today lies over East Iran. A few thunderstorms have occured in Peshawar division. The trough of low pressure has moved northwards and now lies over saurasthra. Under its influence scattered rain/thunderstorms have occured in Hyderabad division.

Monsoon countinues to be moderate in East Pakistan and is likely to Strengthen. It has caused widespread rain/thundershowers in Khulna divisions, fairly widespread in Dacca division and local in Chittagong division. A few falls of light rain/thunderstorms have occured in Rajshahi division.

Chief amounts of rainfall are: Maijdee Court 2", Sylhet and Mymensingh 1½" each, Cox's Bazar 1" Dacca and Faridpur ½" each and Khulna and Jessore ¼" each:

Day temperatures:- were 3—6°F (2—3°C) above normal in East Pakistan and in Hyderabad division and 3-7°F (2-4°C) below normal elsewhere over West Pakistan.

Forecast valid until the evening of 21st June 1967:- Widespread rain/thundershowers are likely to occur in Chittagong and Dacca divisions and fairly widespread elsewhere over East Pakistan. Scattered rain/thundershowers may also occur in Hyderabad, Peshawar, D.I. Khan and Quetta divisions and in Kashmir.

Heavy Rainfall Warning:- Locally heavy to very heavy falls may occur in Chittagong division during the next 36 hours.

Karachi-11
The 20th June, 1967.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

WEDNESDAY THE 21th JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over east Iran now lies over south East Russain Turkistan. Under its influence a few thunderstorms have occured in Peshawar division.

The trough of low pressure over Saeshtra persists.

Monsoon continues to be moderate in East Pakistan and has caused fairly widespread rain/thundershowers in Khulna divisions, local in Chittagong division and scattered Rajshahi and Dacca divisions.

Chief amounts of rainfall are: Srimangal and Bogra 1" each, Khulna ¼", Mymensingh, Satkhira and Jessore ¼" each.

Day temperatures:- These were 2—3°F (2°C) below normal in Rajshahi, Quetta, Kalat and Khairpur divisions and 3—9°F (2—5°C) above normal in Multan, Bahawalpur, Peshawar, Karachi and Hyderabad divisions.

Forecast valid until the evening of 22st June 1967:- Fairly widespread rain/thundershowers are likely to occur in Chittagong, Dacca and Rajshahi divisions, local elsewhere over East Pakistan, scattered rain/thundershowers may also occur in Quetta, D.I. Khan, Peshawar and Rawalpindi divisions and in Kashmir. A few dust/thunderstorm may also accur in Hyderabad divisions.

Karachi-11
The 21th June, 1967.

Given in Code.

These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

At 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and 500 or 1200 hrs. is rainfall since 0000 hrs. G.M.T. of the same day.

Whenever 999 appears for RRR the summary shows no or trace amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

WEDNESDAY THE 21st JUNE, 1967.

Quetta													

PPP—Pressure in millibars.
TTT; T$_d$T$_d$T$_d$; Dry Bulb; Dew Point temperatures (in tenths of °C.)
St—Character of tropopause.

HHH, HHHH (heights)—Tens of geopotential metres.
TT—Dry Bulb temperatures in °C,
50 has been added to the numbers when temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

THURSDAY THE 22nd JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

The trough of low pressure over Saureshtra and adjoining northeast Arbian Sea has become well marked.

Yesterday's western disturbance is now moving away accross East Russain Turkistan. Another western disturbance lies over Russian Turkistan north east of Afghanistan.

Weather remained dry over West Pakistan. Conditions have become un-settled over north west and adjoining west central Bay of Bengal, where a depression may form.

Rain/thundershowers have been fairly widespread in Chittagong and Dacca divisions and scattered in Khulna division. A few falls of light rain or thunderstorms have also occured in Rajshahi division.

Chief amounts of rainfall are: Rangamati and Cox's Bazar and Majidee Court (upto 21,1200 G,M.T.) 3/4" each, Jessore ½" and Chittagong and Sylhet and Mymensingh (upto 21,1200 G.M.T.) ¼" each.

Day temperatures:- These were 3—7°F (2—4°C) above normal in East Pakistan and in Lahore, Rawalpindi, Sargodha, Multan. Bahawalpur, Peshawar, D.I. Khan and Hyderabad divisions.

Forecast valid until the evening of 23rd June 1967:- Local rain/thundershowers will occur in Khulna and Chittagong divisions and scattered in Rajshahi, Dacca, Hyderabad, Karachi and Rawalpindi divisions and in Kashmir.

Karachi-11
The 22nd June, 1967.

P P P—Pressure in hundreds and units of millibars.
T T T; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.)
St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.
TT—Dry Bulb temperatures in °C.
50 has been added to the numbers When temperatures are negative.

* The first two figures in each column give the wind direction "dd" in tens in degrees reckoning from North clockwise. Thus The next two figures give the wind speed "ff" in knots. If wind speed "ff" exceeds 99 knots, 50 is added to "dd" and the hundred figures for wind speed "ff" is omitted.

Cloud observation Data (GGiii Cdd vvvv etc.)

The accuracy of individual station height values cannot be guaranteed. Corrections can be obtained if necessary on application to the Meteorological Observatory, Meteorological Research, Air Force Headquarters

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

FRIDAY THE 23rd JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance now lies over Russain Turkistan north of Afghanistan. The well marked trough of low pressure over Saurashtra has moved slightly northwards.

Weather remained dry over West Pakistan.

The unsettled condition in the northwest Bay of Bengal has concentrated into a depression centered this morning at 0300 GMT. within a degree of latitude 19½°E and longitude 87°E. It is likely to intensify further and move in a northwesterly direction. Under its influence widespread rain/thundershowers have occured in Khulna division and scattered elsewhere in the East Pakistan.

Chief amounts of rainfall are: Sylhet and Khulna (upto 22,1200 G,M.T.) 3/4" each, Barisal (upto 23,0000 G.M.T.) ½" and Jessore and Pabna and Rajshahi (upto 22,1200 GMT.) ¼" each.

Daytemperatures:- These were 3—9°F (2—5°C) above normal over the country.

Forecast valid until the evening of 24th June 1967:- Rain/thundershowers will be fairly widespread in Khulna division, local elsewhere in East Pakistan and scattered in Hyderabad, Karachi, Lahore, Rawalpindi divisions. A few dust/thunderstorms may also occure in Khairpur, Quetta and Peshawar divisions and in Kashmir.

Karachi-11
The 23rd June, 1967.

OBSERVATIONS

(N. A. QURESHI)
for Director, Meterological Services.

P P—Pressure in hundreds tens and units of millibars.

T, T; TdTdTd: Dry Bulb; Dew Point temperatures (in tenths of °C.

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C.

50 has been added to the numbers When temperatures are negative.

* The first two figures in each column give the wind direction "dd" in tens in degrees counting from North throughout East. The next two figures give the wind speed "ff" in knots. If wind speed "ff" exceeds 99 knots, 50 is added to "dd" and the hundred figures for wind speed "ff" is omitted.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

SATURDAY THE 24th JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's depression over northwest Bay of Bengal moved inland, weakened and now lies as a diffused low pressure area over Orissa and adjoining northwest Bay of Bengal.

Under its influence scattered rain/thundershowers have occured in Chittagong and Khulna divisions.

A few thunderstorms have also occured in Dacca and Rajshahi divisions. Khulna has reported ¼" of rain.

The trough of low pressure over Saurashtra remained practically stationary and has slightly weakened.

Yesterday's western disturbance now lies north of Peshawar division.

Weather remained dry in West Pakistan.

Day temperatures were 3—8°F (2—4°C) above normal in the country outside Khairpur and Kalat divisions.

Forecast valid until the evening of 25th June 1967:- Local rain/thundershowers are likely to occur in East Pakistan, scattered in Rawalpindi and Lahore divisions and in Kashmir.

A few dust/thunderstorms may also occur in Hyderabad, Sargodha and D. I. Khan divisions.

Karachi-11
The 24th June, 1967.

OBSERVATIONS

(N. A. QURESHI)
for Director, Meterological Services.

Groups Code

These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

At 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0300 hrs. G.M.T. of the same day

Dashes over dives for RRR are the stations above is for the last amount of rainfall.

PAKISTAN DAILY WEATHER REPORT

SATURDAY THE 24th JUNE, 1967.

Quetta													

P; P—Pressure in hundreds tens and units of millibars.

T) T; TdTdTd: Dry Bulb; Dew Point temperatures (in tenths of °C.)

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulbtemperatures in °C.

50 has been added to the numbers When temperatures are negative.

* The first two figures in each column give the wind direction "dd" in tens in degrees counting from North throughout East. The next two figures give the wind speed "ff" in knots. If wind speed "ff" exceeds 99 knots, 50 is added to "dd" and the hundred figure, for wind speed "ff" is omitted.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

SUNDAY THE 25th JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's diffused low pressure area moved northwestwards and has merged with the seasonal trough extending from south Utter Pradesh and neighbourhood to northwest Bay of Bengal. Under its influence rain/thundershowers have been scattered in Chittagong, Dacca and Khulna divisions, Sylhet has recorded ½" and Narayanganj and Satkhira ¼" each of rainfall.

The trough of low pressure over Saurashtra has become unimportant.

Yesterday's western disturbance now lies north of Kashmir.

Weather remained dry over West Pakistan.

Day temperatures were 3—8°F (2—4°C) above normal over the country outside Khairpur and Karachi divisions.

Forecast valid until the evening of 26th June 1967:- Fairly widespread rain/thundershowers are likely to occur in Chittagong division and scattered elsewhere in East Pakistan and Kashmir. A few dust/thunderstorms may also occur in Rawalpindi and Peshawar divisions.

Karachi-11
The 25th June, 1967.

OBSERVATIONS

(N. A. QURESHI)
for Director, Meterological Services.

? Given in Code

* These stations report for PPP, the geopotential of the 900 mbs. Pressure level in geopotential metres, the thousands figure omitted.

* These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0900 hrs. G.M.T. of the same day.

Figures given for RRR are the summary shown is for the actual amounts of rainfall

PPP—Pressure in hundreds tens and units of millibars.

TTT; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulbtemperature in °C,

50 has been added to the number When temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

MONDAY THE 26th JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance north of Kashmir has moved away.
A fresh western disturbance is moving across the north west of Afghanistan.
The seasonal trough of low pressure extending from Kalat division to Multan division has become concentrated.
Weather remained dry over West Pakistan Axis of Monsoon trough runs from Utter Predesh to north west Bay of Bengal.
Rain/thundershowers have been local in Chittagong division and scattered elsewheer over East Pakistan.
Chief amounts of rainfall are: Maijdee Court, Brahmanbaria, Srin angal, Mymensingh and Pabna ½" each, and Cox's Bazar ¼".
Day temperatures:- These were 3—5°F (2—3°C) above normal in East Pakistan and in Karachi and Hyderabad divisions and 6—12°F (3—7°C) so elsewhere over West Pakistan outside Khairpur division.
Forecast valid until the evening of 27th June 1967:- Local rain/thundershowers are likely to occur in East Pakistan and scattered in Lahore, Rawalpiandi division and in Kashmir. A few dust/thunderstorms may also occur in Multan and Sargodha divisions.

Karachi-11
The 26th June, 1967.

P, P—Pressure in hundreds tens and units of millibars.

T, T; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.)

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C.

50 has been added to the numbers When temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

TUESDAY THE 27th JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance is now moving away across Russian Turkistan north of Peshawar division.

Seasonal trough of low pressure extending from Kalat division to Sargodha division continues to be well marked.

Weather remained dry in West Pakistan.

Axis of Monsoon trough runs from south Utter Pradesh to north west Bay of Bengal where conditions are becoming unsettled. Rain/thundershowers have been scattered in East Pakistan.

Chief amounts of rainfall are:- Faridpur 1", Rangamati 3/4", Satkhira ½" and Majidee Court 1/4".

Day temperatures:- These were 7—12°F (4—7°C) above normal in Peshawar, Rawalpindi, Sargodha, Lahore, Multan and Bahawalpur divisions, and 3—6°F (2—3°C) so elsewhere over the country.

Forecast valid until the evening of 28th June 1967:- Local rain/thundershowers are likely to occur in Khulna division, scattered elsewhere in East Pakistan. A few dust/thunderstorms may also occur in Lahore and Rawalpiandi divisions.

Karachi-11
The 27th June, 1967.

OBSERVATIONS

(N. A. QURESHI)
for Director, Meterological Services.

Given in Code

These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0900 hrs. G.M.T. of the same day

Whenever given for 850 see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

TUESDAY THE 27th JUNE, 1967.

P! P—Pressure in hundreds tens and units of millibars.
T! T; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.)
St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.
TT—Dry Bulb temperatures in °C.
50 has been added to the numbers When temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

WEDNESDAY THE 28th JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance is now moving across Russian Turkistan north of Kashmir. A fresh western disturbance lies nortwest of Afghanistan.

The seasonal trough of low pressure extends from Kalat division to D. I. Khan division. Moist easterlies in shallow layers are penetrating into north eastern division of West Pakistan. Under their continued influence local thunderstorms/showers have occured in Rawalpindi division and scattered in Peshawar division.

A well marked low pressure area has developed over north west Bay of Bengal. It is likely to concentrate into a depression. It has caused local rain/thundershower in Chittagong division and light rain in Dacca and Khulna divisions.

Chief amounts of rainfall are:- Haripur 1", Brahmanbaria (upto 27,1200 GMT. ½") and Kakul, Rangamati, Faridpur and Sargodha 1/4" each.

Day temperatures:- These were 3—8°F (2—4°C) above normal over the country outside Khairpur division.

Forecast valid until the evening of 29th June 1967:- Rain/thundershowers well be fairly widespread in Rawalpindi and Lahore divisions, Local in Chittagong and Khulna divisions and scattered in Rajshahi, Dacca, Peshawar, Sargodha divisions and in Kashmir. A few dust/thunderstorms may also occur in Lahore and Sargodha divisions.

Karachi-11
The 28th June, 1967.

OBSERVATIONS

(N. A. QURESHI)
for Director, Meterological Services.

Given in Cents.

These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

If at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0900 hrs. G.M.T. of the same day

Whenever given for RRR use the summary above is for the total amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

THURSDAY THE 29th JUNE, 1967.

Summary of observations recorded at 0300 Hrs G.M.T.

Yesterday's western disturbance over northwest of Afghanistan now lies over north of Afghanistan.

Moist easterlies in shallow layers continues to penetrate into the northern divisions of West Pakistan.

Under their continued influence local rain/thundershowers have occurred in Rawalpindi division and scattered in Peshawar division.

Observations from India are lacking but believe yesterday's well marked low pressure area now lies over Orissa and adjoining north west Bay of Bengal. It has caused widespread rain/thundershowers in Khulna division, local in Chittagong division and scattered elsewhere in East Pakistan.

A well marked trough of low pressure has developed over northeast Arabian Sea off Gujrat Coast.

Chief amounts of rainfall are: Sylhet 4", Rangamati 2", Faridpur, Barisal, Pabna and Murree ½" each and Khulna, Satkhira, Jessore. Rawalpindi and Cherat ¼" each.

Day temperatures: were 3—7°F (2—4°C) above normal in East Pakistan and in Kalat, Karachi and Hyderabad divisions and 3—6°F (2—3°C) below normal in Lahore, Rawalpindi and Peshawar divisions.

Forecast valid until the evening of 30th June 1967:- Rain/thundershowers will be fairly widespread in Khulna and Chittagong divisions, local in Rajshahi, Dacca, Peshawar, Rawalpindi, Lahore and Sargodha divisions and in Kashmir. A few dust/thunderstorms may also occur in Hyderabad, Multan, Bahawalpur and Khairpur divisions.

Karachi-11
The 29th June, 1967.

Given in Code

These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted

These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs is rainfall since 0000 hrs. G.M.T. of the same day

Power given for RRR are the necessary above is for the actual amounts of rainfall

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

FRIDAY THE 30th JUNE, 1967.

Summary of observations recorded at 0300 Hrs G.M.T.

Moist easterlies in shallow layers continues to penetrate into the northern divisions of West Pakistan.

Yesterday's western disturbance now lies over Russian Turkistan north of Peshawar divisions. Under their influence scattesed rain/thundershowers have occurred in Rawalpindi and in Peshawar divisions, and a few thunderstorms in Sargodha, Bahawalpur and Quetta divisions.

Observations megre but believe the trough of low pressure area over northeast Arabian Sea has dveloped into a well marked low pressure area over there. It has caused local rain/thundershowers in Karachi divisions, scattered in Hyderabad division and a few thunderstorms in Khairpur division.

The well marked low pressure area over northwest Bay of Bengal and Orissa today lies over Orissa and Chota Nagpur. Under its influence widespread rain/thunder showers have occured in Dacca divlsion and locol elsewhere in East Pakistan.

Chief amounts of rainfall are: Cox's Bazar and Karachi (Manora) 1" each, Bogra and Chochro 3/4" each and Mymensingh, Neryangang, Faridpur and Karachi (Airport) ½" each.

Day temperatures: These were 3—10°F (2—6°C) above normal in East Pakistan and in Kalat, Karachi, Hyderabad, Bahawalpur divisions.

Forecast valid until the evening of 1st July 1967:- Rain/thundershowers will be fairly widespread in East Paskistan, local in Rawalpindi and Lahore divisions, and scattered in Kashmir and in Peshawar, Sargodha, Karachi and Hyderabad divisions. A few dust/thunderstorms may also occur elsewhere in West Pakistan outside Kalat division.

Karachi-11
The 30th June, 1967.

† Given in Code.

** These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0300 hrs. G.M.T. of the same day.

Whenever given for RRR are the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-146
Volume No. 7

WEDNESDAY THE 31st MAY, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over Quetta division has moved away north eastwards after accentuating the seasonal trough of low pressure extending from K division to Multan division.

Weather remained dry over West Pakistan.

The trough of low pressure over Orissa and neighbourhood is more marked. It has caused scattered rain in Rajshahi division. Rangur has reported ½" of rain.

Day temperatures were 3—8°F (2—4°C) above normal in East Pkistan and in Peshawar, D.I. Khan and Quetta divisions and 3—7°F (2—4°C) below normal Quetta, Kalat, Hyderabad.

Forecast valid until the evening of 1st June 1967:- Local thunderstorms/showers are likely to occur in Rajshahi and Chittagong divisions and scattered elsewher East Pakistan. A few dust/thunderstorms may also occur in Quetta, D.I. Khan, Multan, Sargodha Bahawalpur, Khairpur and Hyderabad divisions.

Karachi-11
The 31st May, 1967.

1 Station not Listed

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs. is rainfall since 0300 hrs. G.M.T. of the same day

A figure of 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-
Volume No

THURSDAY THE 1st June, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

ATMOSPHERIC SCIENCES LIBRARY
OCT 2 1967
E.S.S.A.
U.S. Dept. of Commerce

The seasonal low pressure area extending from Kalat division to Sargodha division is well marked. Under its influence a few thunderstorms have occured in Pe and Quetta divisions.

The trough of low pressure over Bihar and neighbourhood has accentuated. It has caused scattered thundershowers in Rajshahi division and a few thunderst Chittagong division, Rangur has reported ½" of rain.

Day temperatures were 3—7°F (2—4°C) above normal in East Pkistan and in Lahore, Rawalpindi, Sargodha, Multan, Peshawar, D.I. Khan and Quetta di and 3—4°F (2°C) below normal in Hyderabad and Khairpur divisions.

Forecast valid until the evening of 2nd June 1967:- Scattered thunderstorms/showers are likely to occur in Rajshahi, Dacca, Chittagong divisions. dust/thunderstorms may also occur in Lahore, Sargodha, Rawalpindi and Peshawar divisions.

Karachi-11
The 1st June, 1967.

† Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs is rainfall since 0900 hrs. G.M.T. of the same day

Whenever 000 given for RRR on the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1
Volume No.

FRIDAY THE 2nd JUNE, 1967

Summary of observations recorded at 0300 Hrs. G.M.T.

The seasonal low pressure area extending from Kalat division to Sargodha division continues to be well marked. Weather remained dry over West Pakistan. The trough of low pressure over Bihar and neighbourhood has accentuated. Under its influence scattered thunderstorms/showers have occured in Chittagong, and Rajshahi divisions. Pabna and Bogra have each reported ¼" of rain.

Day temperatures were 4—9°F (2—5°C) above normal in East Pakistan and in Lahore, Rawalpindi, Sargodha, Peshawar and D.I. Khan divisions and 3 (2—3°C) below normal in Quetta, Kalat, Karachi, Hyderabad and Khairpur divisions.

Forecast valid until the evening of 3rd June 1967:- Thunderstorms/showers will be local in Rajshahi division and scattered in Dacca and Chittagong di Isolated dust/thunderstorms may also occur in Quetta, Sargodha, Rawalpindi, Peshawar divisions and in Kashmir.

Karachi-11
The 2nd June, 1967.

PPP—Pressure in hundreds tens and units of millibars.

TTT; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.)

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C.

50 has been added to the numbers When temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 2

SATURDAY THE 3rd JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's well marked seasonal trough of low pressure has shifted northwards and extends from Quetta division to East Punjab. Under its influence scatte thunderstorms have occured in Peshawar and D.I. Khan divisions.

The trough of low pressure over Bihar and neighbourhood has become more marked. Scattered thundershorms/showers have occured in Chittagong divisi Sylhet recorded 3/4" of rain and Cox's Bazar ½".

Day temperatures were 7—15°F (3—8°C) above normal in Rajshahi and Khulna divisions and 3—5°F (2—3°C) so elsewhere in East Pakistan and Laho Rawalpindi, Peshawar and D.I. Khan divisions and 3—8°F (2—4°C) below normal in Karachi, and Hyderabad divisions.

Forecast valid until the evening of 4th June 1967:- Local thnnderstorms/showers are likely to occur in Rajshahi and Chittagong divisions and scattered in Dac Khulna, D.I. Khan, Peshawar, Rawalpindi and Sargodha divisions and in Kashmir. A few dust/thunderstorms may also occur in Bahawalpur and Multan divisions.

Karachi-11
The 3rd June, 1967.

† Given in Code.

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR or 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR or 1200 hrs. is rainfall since 0000 hrs. G.M.T. of the same day

Whenever 999 given for RRR see the summary above is for the actual amount of rainfall.

PP P—Pressure in hundreds mm and units of millibars.
T) T; TdTdTd; Dry Bulb; Dew Point temperature (in tenths of °C.)
St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.
TT—Dry Bulb temperature in °C.
50 has been added to the numbers When temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-14
Volume No.

SUNDAY THE 4th JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

The seasonal trough of low pressure extends from Kalat division to Sargodha division.
A feeble western disturbance lies over Kashmir and adjoining Peshawar division.
A few thunderstorms have occured in Lahora, Rawalpindi, Sargodha, Peshawar and Quetta divisions.
The trough of low pressure over Bihar and neighbourhood continues to be well marked. Scattered thunderstorms have occured in Chittagong division.
Day temperatures were 3—8°F (2—4°C) above normal in East Pakistan and in Lahore, Rawalpindi, Peshawar, D.I. Khan and Multan divisions and 3-(2—3°C) below normal in Quetta and Hyderabad divisions.
Forecast valid until the evening of 5th June 1967:- Scattered thunderstorms/showers will occur in Rajshahi Dacca and Chittagong divisions. Isolated dust/thu storms may also occur in Kashmir and in Peshawar, Rawalpindi and Lahore divisions.

Karachi-11
The 4th June, 1967.

† Given in Code.

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs; is rainfall since 0900 hrs. G.M.T. of the same day

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

SUNDAY THE 4th JUNE, 1967.

(#) P—Pressure in hundreds cons and units of millibars.

T, T; TdTdTd; Dry Bulb; Dew Point temperatures (in centha of °C.

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C,

50 has been added to the numbers When temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-14
Volume No.

MONDAY THE 5th JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over Kashmir has moved away after causing scattered thundershowers in Rawalpindi division and a few falls of light ra thundestorms in Lahore and Peshawar divisions.

The seasonal trough of low pressure extends from Kalat division to Sargodha division.

The trough of low pressure over Bihar and neighbourhood continues to be well marked under its influence fairly widespread rain/thundershowers have occure Rajshahi division and local in Chittagong division. A few falls of light rain or thunderstorms have also occured elsewhere in East Pakistan.

Chief amounts of rainfall are:- Sylhet 1¼". Majidi Court, Rajshahi and Dinajpur (upto 05,000Z) 3/4" each, Jhelum 1/2" and Sirajgung and Rangpur 1/4" each.

Day temperatures were 4—8°F (2—5°C) above normal in East Pakistan and 3—4°F(2—3°C) in D.I. Khan Multan, Hyderabad, divisions and 3—8°F (2—4°C) b normal in Quetta and Kalat divisions.

Forecast valid until the evening of 6th June 1967:- Local rain/thundershowers will occur in Rajshahi and Chittagong divisions and scattered elsewh re in East Pak Isolated dust/thnderstorms may also occur in Peshawar, Sargodha and Multan divisions.

Karachi-11
The 5th June, 1967.

† Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1500 hrs. is rainfall since 0000 hrs. G.M.T. of the same day

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

MONDAY THE 5th JUNE, 1967.

PP P—Pressure in hundreds tens and units of millibars.

TT; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.)

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C.

50 has been added to the numbers When temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-141
Volume No.

TUESDAY THE 6th JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

The seasonal trough of low pressure continues to extend from Kalat division to Sargodha division.
A western disturbance lies over Russian Turkistan north of Afhanistan.
Weather remained dry over West Pakistan.
The trough of low pressure over Bihar and neighbourhood has further accentuated. Under its influence scattered rain/thundershowers have occured in Chitta; and Kkulna divisions and isolated thunderstorms in Rajshahi division. Cox's Bazar has recorded 4" and Khulna 1/4" of rainfall.
Day temperatures were 3—6°F (2—3°C) above normal in East Pakistan and in Sargodha, Multan, Peshawar, D.I. Khan and Bahawalpur divisions and 3—(2°C) below normal in Quetta, Kalat, Karachi and Hyderabad divisions.
Forecast valid until the evening of 7th June 1967:- Fairly widespread rain/thundershowers will occur in Chittagong division and scattered elsewhere in East Paki Isolated dust/thnderstorms may also occur in Peshawar division and in Kashmir.

Karachi-11
The 6th June, 1967.

† Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted.

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and 999 at 1200 hrs is rainfall since 0300 hrs. G.M.T. of the same day

Whenever 999 given for RRR use the summary above is for the actual amounts of rainfall.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-146
Volume No.

WEDNESDAY THE 7th JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

The seasonal trough of low pressure continues to extend from Kalat division to Multan division.
Yesterday's western disturbance over north of Afhanistan has moved slightly north eastwards.
Weather remained dry over West Pakistan.
The trough of low pressure extends across Orissa to head Bay of Bengal. Under its influence widespread rain/thundershowers have occured in Rajshahi divisi local in Chittagong and Dacca divisions.
Chief amounts of rainfall are: Rajshahi 3", Brahmanbaria 2", Majidi Court 1½", Srimangal 1", Sylhet and Sirajgang 3/4" each, Pabna, Bogra, Dinajpur a Rangpur ½" each.
Day temperatures were 3—6°F (2—3°C) below normal in Kalat, Karachi and Hyderabad divisions and were 3—9°F (2—5°C) above normal elsewhere over country.
Forecast valid until the evening of 8th June 1967:- Local rain/thundershowers will occur in East Pakistan. Isolated dust/thnderstorms may also occur in Multan a Sargodha divisions.

Karachi-11
The 7th June, 1967.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 2

THURSDAY THE 8th JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance now lies over East Russian Turkistan.

The seasonal trough of low pressure extending from Kalat division to Sargodha division continues to be well marked.

Weather remained dry over West Pakistan.

The trough of low pressure has shifted southwards and now extends from Uttar Pradesh to head Bay of Bengal. Under its influence fairly widespread rain/thundershowers have occured in Khulna division, local in Chittagong division and scattered in Rajshahi divisions.

Chief amounts of rainfall are: Satkhira 1", Rangamati, Sylhet and Pabna and Cox's Bazar (upto 08,0000Z) ½" each and Majidi Court ¼".

Day temperatures were 3—8°F (2—4°C) above normal in the country outside Kalat, Karachi and Hyderabad divisions when these were 3—6°F (2—3°C) below normal.

Forecast valid until the evening of 9th June 1967:- Rain/thundershowers will be local in East Pakistan. Isolated dust/thnderstorms may also occur in Rawalpindi, Peshawar and Sargodha divisions.

Karachi-11
The 8th June, 1967.

OBSERVATIONS

(N. A. QURESHI)
for Director, Meterological Service

AT 1200 Hrs. G.M.T. of Previous day

* Given in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs is rainfall since 0000 hrs. G.M.T. of the same day

Whenever 999 given for RRR see the summary above is for the actual amounts of rainfall

P/ P—Pressure in hundreds tens and units of millibars.

T/ T; TdTdTd; Dry Bulb; Dew Point temperatures (to tenths of °C.)

St—Character of tropopause.

HHH,HHHH (heights)—Tens of geopotential metres.

TT—Dry Bulb temperatures in °C.

50 has been added to the numbers When temperatures are negative.

PAKISTAN DAILY WEATHER REPORT

Reg. No.S-1467
Volume No. 21

FRIDAY THE 9th JUNE, 1967.

Summary of observations recorded at 0300 Hrs. G.M.T.

Yesterday's western disturbance over East Russian Turkistan persists.

The seasonal trough of low pressure continues to extend from Kalat divlsion to Sargodha division.

Weather remained dry over West Pakistan.

The trough of low pressure extends from South Uttar Pradesh to head Bay of Bengal. Under its influence, fairly widespread rain/thundershowers have occured in Rajshahi division, local in Chittagong division and scattered in Khulna division.

Chief amounts of rainfall are: Dinajpur 5", Bogra (upto 09,0000Z) and Rangpur 2" each, Srimangal 3/4" and Sylhet, Barisal, Sirajganj and Rajshahi ¼" each.

Day temperatures were 3—9°F (2—5°C) above normal in the country outside Kalat, Karachi, Hyderabad and Khairpur divisions where these were 3—5°F (2—3°C) below normal.

Forecast valid until the evening of 10th June 1967:- Rain/thundershowers will be fairly widespread in Rajshahi division and local elsewhere in East Pakistan. A few dust/thunderstorms may also occur in Peshawar, Rawalpindi, Lahore and Sargodha divisions and in Kashmir.

Karachi-11
The 9th June, 1967.

¶ Written in Code

* These stations report for PPP, the geopotential of the 850 mbs. Pressure level in geopotential metres, the thousands figure omitted

** These stations report for PPP, the geopotential of the 700 mbs. Pressure level in geopotential metres, the thousands figure omitted.

RRR at 0300 hrs. G.M.T. is rainfall since 0300 hrs G.M.T. of the previous day and RRR at 1200 hrs is rainfall since 0900 hrs. G.M.T. of the same day

Whenever 000 shown for RRR on the summary above is for the actual amount of rainfall.

PAKISTAN DAILY WEATHER REPORT

FRIDAY THE 9th JUNE, 1967.

PPP—Pressure in hundreds tens and units of millibars.
T; T; TdTdTd; Dry Bulb; Dew Point temperatures (in tenths of °C.)
St—Character of tropopause.

HHHHHHH (height)—Tens of geopotential metres.
TT—Dry Bulb temperature in °C,
50 has been added to the numbers When temperatures are negative.
