Chart III. Tracks of Centers of Low Areas, September, 1919.

(Plotted by R. H. Weightman, Meteorologist.)

NOTE.—In connection with Lows IV and XVII, attention is invited to the fact that reports over the water are meager and scattered, and the pressure readings here presented do not give the minimum pressures at the center, but are merely the readings reported by a vessel which was nearest to the center at the time indicated in the several circles.
