Belize
Mexico

Video Tape Log for the Monitor NMS, Islands in the Stream Mission October 3-4, 2001

Date:	Dive No.:	JSL-II Dive No.:	Hi-Definition:	3-Chip Digital:	Low Light:
10/03/2001	1	4371	Tape 1 Tape 2	Tape 3 Tape 4	Tape 5 Tape 6

Dive Summary:

Tapes 1,3,5

Video opens with view of stern, turret and then moves forward along the armor belt. Grount bags and a large turtle are visible as the camera moves forward to the bow. Transponder is placed on the bow. Video moves back towards the stern on the high side of the wreck, viewing the interior. Close up of armor belt above turret and cut. Close up of turret area and interior of wreck in stern, boilers, galley, and forward crew area. Video moves to the low side of the wreck's interior and moves aft to the stern debris area. Downward views of turret and armor belt moving forward to the bow.

Tapes 2,4,6

Video opens with views of grount bags and armor belt, turret, and stern. Wide view of stern that closes in on armor belt cut and interior of wreck above the turret. Good interior shots of debris from engine removal. Moves along interior of armor belt and atop the hull above the galley. Shots above the armor belt and turret. Video moves from aft forward scanning the deck above the turret. Close up of the turret and around it's base. Another slow pass of the armor belt, the cut, and where the Navy has removed some of the armor plates. downward view of the armor belt moving forward towards the bow.

10/03/2001	2	4372	Tape 7 Tape 8	Tape 9 Tape 10	Tape 11

Dive Summary:

Opens with transponder on the armor belt above the turret then moves down to focus on the interior of the turret. Camera moves around the base of the turret and stays up close on it. Sub moves aft to the stern and shoots above the armor belt looking down and moves around the turret. Moves forward along armor belt to the bow. Looks at debris in the forward part of the site and slowly moves towards stern looking at the interior of the vessel from the high side of the ship. Another close up of the turret and a look underneath the armor belt and decking by the turret. Sub backs off and the look at the turret in full view. Camera moves behind turret then up and back inside it again.

The second hi-def tape opens with a view of the turret and moves along forward with the armor belt. Some close up of the grout bags. At the bow the camera moves to the center line of the wreck and moves towards the stern shooting the debris in the center and on the low side of the site. Sub then moves to the high side of the wreck at the stern and gets the turret and armor belt above it. Sub moves forward again and camera shoots the interior of the vessel along the armor belt and then moves aft again. The turret is shot once more as well as the armor belt and cut. Sub moves across the boilers and shots the hull underneath, then slowly moves forward along the low side of the site. At the bow the camera moves to the centerline of the site and moves aft and then way above the wreck to look down at the turret. Moves above turret and into the wreckage. More downward shots of turret and armor belt, picks transponder and ascends to the surface.

10/04/2001	3	4373	Tape 12 Tape 13	Tape 14 Tape 15 Tape 16	Tape 17 Tape 18

Dive Summary:

Tape 12 opens with shots of the bow and deployment of transponder on bow. Sub then moves down the low side and off into the sand. Sub comes back for a head on shot of the bow and two giant Manta Rays swim past and camera swings back into the sand. Shots of the tires around site. Another bow on shot with a small Manta swimming over followed by a giant Manta. Another bow shot. Sub moves along low side of wreck, above the galley and into the stern debris area. Close up looks at deck and interior of armor belt above the turret. Moves off into the low side debris field and then a close-up of the galley and amidships on the low side. Moves to stern with a great view of the armor belt and decking above the turret. Sub is in the sand and locates one of the pyramid markers. Back to the bow and another Manta swimming over it. Camera stays on the bow for awhile then moves along the outskirts of the low side of the wreck moving aft. At the stern the sub swings around to the low side and gets close look at the turret from the aft side. Camera moves to JSL and looks at occupants, then back to the turret again.

Tape 13 overlaps tape 12 with shots of the subs occupants and lingering views of the turret. Sub moves out and away then back to the turret on the forward side with a prolonged look at that. Moves up and looks at cut in the armor belt then down the high side of the wreck with views of the interior towards the bow. Subs sits on the bow with camera facing aft with a great view of the interior of the wreck on the high side. Sub then makes ascent.

Date:	Dive No.:	JSL-II Dive No.:	Hi-Definition:	3-Chip Digital:	Low Light:	Surface Shots:
10/04/2001	4	4374	Tape 19		Tape 20 Tape 21	Tape 22

Dive Summary:

Tape 19 starts with sub out in sand then focuses in on a steam pipe laying off the wreck. Sub picks up the pipe with the arm and moves to the stern of the low side of the wreck. Sub moves to the high side and looks at the turret. Gets a good view of armor belt from the stern and moves forward along its top edge to the bow. Sub moves off into the sand and looks at the three tires off the bow. Looks at bow for awhile then moves down the low side of the wreck and into the stern. Looks down at decking and the debris on top of it above the armor belt. Subs swings out and back to the low side and looks down at the stern area once more, decking, armor belt all the way to the tip of the stern. Good cross-section look at the stern from the high side, then down to the turret. Close up of turret and hole dug underneath. Sub moves forward along armor belt on the high side.
