SCH. LUCANIA'S BIG FARE.

Has 20,000 Fresh Mackerel
at Boston Today.

STRUCK FISH ON GEORGES.

Reliable Report Received of Big
Schools on the Rips.

Another big trip of fresh mackerel reached T wharf, Boston, last night when sch. Lucania. Capt. Martin L. Welch, came in with 20,000 in count of these most desirable fish. The fare was taken on the southeast part of Georges and some other vessels were there at the time. This is the second fare Capt. Welch has landed at Boston within a week, so he is fast rolling up a fine stock. The fish sold at 17 cents each.

At Boston yesterday by steamer from Nova Scotia were 138 barrels of salt mackerel.

Mr. A. Ernest Walen received a letter last evening from Capt. James Goodwin of sch. Edward A. Rich, which arrived at T wharf yesterday from the Rips with a fare of fresh codfish. Capt. Goodwin stated that a day or so ago southwest of Sankaty Head and from there out to the very southern edge of the Rips he had seen the largest body of mackerel he ever saw in all his fishing experience. Coming from such a reliable source, the report is credited on all sides, for Capt. Goodwin has been seining and knows what mackerel are and is a very careful man in all his statements. In the letter he said he was sure they were mackerel, and for Mr. Walen to spread the news all he could to whatever seiners he could reach. It is a coincidence that the Rips fishermen reported these fish schooling there all last summer and that no seiners went out there till late and then those that did go got fish. Capt. Goodwin says that no seiners were there when he saw the fish.

NEW FISH FIRM.

Lane & Smith Succeed Old Concern
of Samuel Lane & Bro.

The old concern of Samuel Lane & Bro., after a long and honorable record in the fish business, retired from the list of Gloucester business concerns yesterday. The business of the concern will be continued by the junior member of the old concern, Mr. George E. Lane, and Mr. Frank F. Smith, the latter having been with the old concern for 24 years as confidential clerk and head salesman on the road. Mr. Smith, like Mr. Lane, is well known to the fishing interest, and for years has held a high reputation as a salesman and business man. With the established record of the old concern behind it and an up-to-date plant, the new concern starts off under most favorable auspices.

A Telephone Fishing Appliance.

An English paper reports that a Norwegian has invented a telephone by which the noise made by fish in the depths of the sea can be heard. The instrument consists of a microphone in a hermetically sealed steel box. It is connected with a telephone on shipboard by electric wires, each sound in the water being identified by the microphone. The inventor asserts that with its aid the presence of fish, and approximately their number and kind, can be recognized. When herrings or smaller fish are encountered in large numbers they make a whistling noise, and the sound made by codfish is more like howling. If they come near the submarine telephone their motion can be distinguished. The flow of water through the gills produces a noise similar to the labored breathing of a quadruped, and the motion of the fins produces a dull rolling sound.

IN SHOAL WATER.

Sch. Corona Got Big Halibut Fare
on Grand Bank.

Reports French Salt Bankers
Getting Good Fishing.

Sch. Corona, Capt. Augustus Peterson, arrived this morning with a big halibut fare, having 50,000 pounds, and also 10,000 pounds of salt cod. The fare was taken on Grand Bank, to the eastward of the shoal water in 27 fathoms. The fish are of fine quality and of medium size and the trip is mostly white.

The Corona was one of the last vessels to get a baiting at the Magdalene Islands, there being ten vessels there waiting when Capt. Peterson got his baiting and bait was scarce. Bad weather was encountered the first of the trip, but afterward it came fine and good fishing was struck. The passage home was a fine one for this time of the year, the vessel being but six days on the passage.

Capt. Peterson saw a large number of the French fishing fleet, but no American vessels. He spoke several of the French fishermen and they all reported that they were doing well on cockle bait. Among the French fleet Capt. Peterson spoke the big fishing craft Marie of St. Male. Her commander, Capt. Conault, who is on his first trip as skipper, wished to be reported. He had 40,000 mornes of fish and had done well considering the time he had been gone and was then finding good fishing. He was spoken in latitude 44.24, longitude 50.12 Greenwich and 52.22 Paris.
