Dec. 28, 1917.

Commissioner of Fisheries,
Washington, D.C.

Dear Sir:-

Referring to your letter of Dec. 21st regarding our statistical report of operations at Nushagak, Alaska, for 1917, would advise that our pack of 1110 cases of $\frac{1}{2}$ # cans King Salmon, 8 doz. and 4857 cases of $\frac{1}{2}$ # cans Red Salmon, 8 doz. is correct.

The values, however, are wrong, as they were evidently figured on the basis of 4 doz. Therefore, please change the values to read as follows:-

King Halves	-	\$ 14,652.00
Red Halves	-	<u>64,125.00</u>
Total		\$ 78,777.00

Yours truly,

ALASKA-PORTLAND PACKERS ASS'N.

Per

Secy.
