

D I C K M A N B A Y

* * * * *

Located at the extreme end of Moira Sound,
West of 132nd Meridian of West Longitude,
North of 55th Parallel of North Latitude.

* * * * *

There are three creeks tributary to this bay.

There were but few fish seen in the bay until August 4 and none seemed to reach the streams.

August 11, I recorded 15 chums in the creek inside of lagoon and on August 12, the rainfall, together with an easterly wind increased the run of chums to about 500, which were all found in the creek inside of the lagoon and no fish were seen in the other two creeks.

As this bay was not considered of sufficient importance to warrant watching I was transferred to Moira Sound to assist in patrolling.
