Stream No. 24 (2 notices) Hummer Bay, Port Wells.
The North side of stream is 27 feet wide and 8 inches deep.
The other part comes out about the center of grass flat and is 20 feet wide and 6 inches deep,--accessible about 1/2 mile.
Both have the best bottom--fine gravel.
Visit July 24th: 10,000 fish here, principally dogs in larger stream. (July 24, 1926.
Aug. 12, 1927, visit: 13,200 fish.

Stream No. 24A Pirate Cove. Large one on north side is 40 feet wide and 10 inches deep, and swift.
Accessible 300 feet above high tide line.
Is 100 feet wide above high tide line. Rough boulder and gravel bed.
Small one on south 10 feet wide and 3 inches deep.
Accessible 1,000 feet.
Fine gravel bed. No water dry weather.
Visit Aug. 12, 1927---5,000 fish.

Stream No. 25 (2 notices) Pigott Bay, Port Wells.
Stream entering at northwest corner of head is 20 feet wide and 8 inches deep.
Another one 12 feet wide and 5 inches deep enters about 1/4 mile southwest of the above mentioned stream.
Large stream bed is about 50 feet wide around mouth.
One stream on southwest side is 27 feet wide and 8 inches deep.
It follows up a meadow for about a mile, winding around a good deal, getting the most out of the level country, and its bed is from 40 to 50 feet wide for about 2,000 feet from beginning of grass banks.
All have fine gravel bottom.
The center streams are glacier and no fish in them at time of visit, July 25, 1926. I estimated there was 18,000 fish here and the run here is about done at this time.
Aug. 12, 1927, visit: 45,000 fish.

Stream No. 25A Entry Cove Passage Canal Lagoon. One stream 8 feet wide and 4 inches deep. Rough boulder bed. Aug. 16, 1927,---1,500 fish.

Stream No. 24 (2 notices) Hummer Bay, Port Wells.
