JORGE GARTNER

JEFE DEL DEPARTAMENTO DE ARCHIVOS
Y DIVULGACION

ADEL LOPEZ GOMEZ

PROLOGO

Para la descripción del Observatorio y los aparatos, remitimos al lector al número 1.° de *Notas Geofísicas y Meteorológicas* que se publicó en 1924 al dar cuenta de la fundación del nuevo Observatorio.

En este volumen damos a luz detalladamente las observaciones de Bogotá hechas en 1935, siéndonos imposible el dar numéricamente los datos de los aparatos registradores, ya por falta de personal, ya por las condiciones económicas.

Desde las seis de la mañana hasta las ocho de la noche anótanse de dos en dos horas las indicaciones de los aparatos de este Observatorio Central; los promedios están calculados de esas ocho observaciones. Nuestro deseo sería utilizar todos los datos de los registradores, mas esto es imposible con el escaso personal del Observatorio.

Hemos aplicado todas las correcciones comunes de la temperatura, instrumentos, etc., incluyendo en la presión atmosférica la de la gravedad normal de la latitud de 45°, conforme explicamos en los *Anales* de 1923.

La reducción al nivel del mar, tratándose de Bogotá, cuya altura es de 2.645 metros, y no conociéndose todavía métodos satisfactorios, cuando se trata de elevaciones tan grandes, la hemos omitido, siguiendo en esto el ejemplo de otros observatorios. Remitimos al lector a lo escrito en las *Notas Geofísicas*, página 64, sobre esta debatida cuestión.

Cuenta el Observatorio con los principales aparatos de meteorología, tanto de lectura directa como registradores.

No siendo necesario conocer con toda exactitud las coordenadas del Observatorio, por no tratarse de trabajos astronómicos de precisión, hemos adoptado la latitud del Observatorio Astronómico determinada por el doctor Julio Garavito, aumentada en 4", cantidad aproximada que hemos calculado para la distancia de los observatorios.

Las coordenadas son:

Latitud del Observatorio Nacional de San Bartolomé..... 4°35'59"N

Longitud W de Greenwich..... 74°4'52"65

Altura de aparatos sobre el nivel del mar:

Barómetro Fuess y Negretti.....	2.645.00
Anemómetro Richard.....	2.655.44
Pluviómetro.....	2.651.00

Ci.....	Cirrus.
Ci-st.....	Cirro-stratus.
