P R E F A C E.

The India Meteorological Department has hitherto been compiling the rainfall tables published by the different States in India in two annual volumes entitled 'The Daily Rainfall of India' and 'The Monthly Rainfall of India'. It has now been decided to issue the Daily rainfall volume in five zonal parts, commencing from the Volume for 1952. Each part will contain the data of a Zone as detailed below :-

Part	I	Jammu and Kashmir. Punjab. Patiala and East Punjab States Union. Rajasthan. Himachal Pradesh.
Part	II	Bihar. West Bengal. Assam. Orissa.
Part	III	Bombay. Mysore.
Part	IV	Madras. Hyderabad.
Part	V	Uttar Pradesh. Madhya Pradesh. Madhya Bharat, Bhopal and Vindhya Pradesh.

This is part II of the volume 'Daily Rainfall of India' issued under the new system, for the calendar year 1952. For each State, the set of twelve Daily Rainfall Tables is followed by the Monthly and Annual Rainfall Table. The Monthly and Annual Rainfall Tables alone will also be found in the volume entitled 'The Monthly Rainfall of India', which contains this data for all the States of India.

The rainfall tables pertaining to Orissa are not included here and will be issued separately when available.

Contd.....2.

Since the inception of the system of rainfall registration in India till 31st December, 1949, the hour of rainfall measurement at the State Raingauge stations was 8 a.m. local mean time. From 1st January 1950, this has been changed to 8.30 a.m. I.S.T. (0300 hours G.M.T.). The amount indicated against any date in the tables denotes the total rainfall which occurred during the 24 hour period ending at 8.30 a.m. of that date and measured at that time. If this rainfall is a tenth of an inch or more, then, by convention, the particular date is counted as a rainy day.

In most of the cases, the $\left(\begin{matrix}\text{actual}\\ \text{normal}\end{matrix}\right)$ district average is the unweighted arithmetic mean of the $\left(\begin{matrix}\text{actual}\\ \text{normal}\end{matrix}\right)$ values for those stations in the district which possess normals and for which the actual values are recorded.

The normals used in this volume are based on the rainfall records available upto December 1940. These normals are contained in the ' Memoirs of the India Meteorological Department ' Vol. XXVII Part - V.

TABLE OF CONTENTS.

1. Preface.

2. Rainfall of 1952.

(a) Daily rainfall tables and

(b) Monthly and Annual rainfall tables for the following States.

States.	No. of stations at the end of the year. (a)	(b)
Bihar.*	292	286
(Kosi-catchment)	42	-
West Bengal.	128	128
Assam.	124	125
Total	586	539

* With supplement for two stations for the years 1948 - 1952.

DAILY RAINFALL RECORDED AT STATIONS IN BIHAR FOR THE MONTH OF JANUARY, 1952.

(H) Hydrometereological station.

* Rainfall return not received.

This sign is shown in the columns for normal number of rainy days and normal rainfall against those stations for which normals have not been established in the columns from 1st March to 31st May 1952 it means that owing to the records being incomplete the totals are not known.
