This volume is a compilation of the (a) Daily Rainfall Tables and (b) Monthly & Annual Rainfall Tables for the Provinces and Indian States, for the calendar year 1948. For each Province or State, the set of twelve Daily Rainfall Tables is followed by the Monthly & Annual Rainfall Table. A smaller volume entitled "Monthly Rainfall of India" contains the Monthly & Annual Rainfall tables only.

Rainfall was measured daily at all stations at 8 a.m. local mean time, except at the Meteorological Observatories for which the time of observation was 8 hrs. I.S.T.(0230 hrs. G.M.T.). The measurement relates to the period of 24 hours preceding the time of observation of the day to which it is ascribed. A "rainy day" is conventionally taken to be that date for which rainfall of a tenth of an inch or more has been thus recorded.

In most of the cases, the $\frac{\text{(actual)}}{\text{(normal)}}$ district average is the unweighted arithmetic mean of the $\frac{\text{(actual)}}{\text{(normal)}}$ values for those stations in the district which possess normals and for which the actual values are recorded.

The normals, used in this volume, are based on the rainfall records available upto December 1940. These normals are contained in the "Memoirs of the India Meteorological Department", Vol.XXVII, Part V.

New Delhi,
Dated the 26th Nov.1954.

L. K. HANDIQUE,
Director of Agriculture, Assam

A. G. P. (D. of A.)No. 6/49—163—8-6-1949.

DIRECTORATE OF AGRICULTURE, WEST BENGAL

Calcutta, the 16th March 1949.

Final Forecast of the Sugarcane Crop of West Bengal for 1948-49.

Season.—Since the issue of the Second Forecast the weather and its effect on the crop have been favourable.

Area and yield.—The total area planted is estimated to be 65,700 acres this year compared to 63,100 acres last year.

The outturn of the crop per acre of the province is estimated at 85 per cent. of the normal this year compared to 84 per cent. of the normal last year. Taking 515 1/5 maunds as the normal yield of sugarcane per acre, the gross outturn for the province works out to 1,057,000 tons this year compared to 1,003,100 tons last year. Calculated on the basis of the gur/cane ratio 1:10 the fixed standard of the province as a whole, the gross outturn in terms of gur is estimated at 105,700 tons this year compared to 100,310 tons last year.

D. BASU,
for Director of Agriculture, West Bengal.

*Rainfall return not received.

†This sign is shown in the columns for 'normal number of rainy days and normal rainfall' against those stations for which normals have not been established; in the columns from 1st October to 30th November 1948 it means that owing to the records being incomplete the totals are not known.
