INFERENCE

A trough is situated over the central interior and will result in thundershowers and showers over the Transvaal, Northern Free State and the Natal interior. The Front to the south-west of Cape Town will move eastwards and cooler cloudy weather with rain will spread along the southern and south-eastern coastal areas and over the adjacent interior.

AFLEIDING

'n Trog is gelee oor die sentrale binnaland en sal donderbuie en buie oor Transvaal, Noord-Vrystaat en die Natalse binnaland veroorsaak. Die front suidwes van Kaapstad sal ooswaarts beweeg en koeler bewolkte weer met reën sal langs die suid-en suidoos kusstroke en oor die aangrensende binnaland uitbreï.

INFERENCE A low is situated over the eastern interior and thundershowers will therefore develop over Natal and parts of the Transvaal. The strong ridge of high pressure south of the country is moving eastwards and the influx of cooler moist air will spread to Natal and the Eastern Transvaal where it will also become cloudy with rain.

AFLEIDING 'n laag is oor die oostelike binneland aanwesig en donderbuie sal dus oor Natal en dele van Transvaal ontwikkel. Die sterk rug van hoëdruk suid van die land beweeg ooswaarts en die invloei van koeler vogtige lug sal na Natal en Oos-Transvaal uitbrei waar dit ook bewolk sal word met reën.

INFERENCE The strong high south of the continent is feeding in relatively cold moist air over the eastern parts of the country where it will be cloudy and cool with light rain along the Natal north coast and the North-Eastern Transvaal. The circulation over the remainder of the country is anticyclonic and therefore unfavourable for the development of thundershowers.

AFLEIDING Die sterk hoog suid van die kontinent veroorsaak 'n invloei van betreklike koue vogtige lug oor die oostelike dele van die land waar dit bewolk en koel sal wees met ligte reën langs die Natalse noordkus en oor Noordoos Transvaal. Die sirkulasie oor die res van die land is anti-siklonaal en dus ongunstig vir die ontwikkeling van donderstorms.

INFERENCE

The Atlantic High is feeding in moist air over the south-eastern and eastern regions of the country causing cloudy cool conditions with rain. These conditions will later spread to the Eastern Transvaal. With a low over the central interior isolated thundershowers will occur over the eastern interior.

AFLEIDING

Die Atlantiese Hoog voer vogtige lug oor die suid oostelike streke van die land in en veroorsaak koelar bewolkte toestande met reën. Hierdie toestande sal later na Oos-Transvaal uitbrei. Met 'n laag oor die binneland sal enkele donder-buie oor die oostelike binneland voorkom.

INFERENCE

Moist air is moving southwards over the country and the trough of low pressure over the western parts is moving eastwards so that scattered showers will develop over the Free State and eastern parts of Cape Province, spreading further eastwards tomorrow.

AFLEIDING

Vogtige lug beweeg suidwaarts oor die binneland en die trog van lae druk oor die westelike dele beweeg ooswaarts sodat verspreide buie oor die Vrystaat en die oostelike dele van die Kaapprovinsie sal voorkom wat môre verder ooswaarts sal uitbrei.

INFERENCE

The trough over the interior has moved somewhat eastwards. Drier air has pushed in over the western parts but fairly general rain and showers will occur over the Free State and Natal.

AFLEIDING

Die trog van lae druk het effens oostwaarts bewoeg. Droër lug het oor die westelike dele ingestoot maar redelik algemene reën en buie sal oor die Vrystaat en Natal voorkom.

INFERENCE

Moist air is still being advected in the lower air layers over the country and with the weak trough of low pressure extending north-westwards from Eastern Cape light thundershowers are expected over the interior except over Western Cape where it will remain fine and hot.

AFLEIDING

Vogtige lug word steeds in die onderste lug lae oor die land ingevoer en met die swak trog van lae druk wat oor Oos-Kaap noordweswaarts strak word ligte donderbuie oor die binneland verwag behalwe oor Wes-Kaap waar dit mooiweer en baie warm sal bly.

INFERENCE

The air in the upper layers is fairly dry and very little development is expected over the whole country. The trough over the eastern Karoo, however, is expected to deepen tomorrow.

AFLEIDING

In die hoër luglae is die lug betreklik droog en weinig weersontwikkeling word oor die hele land verwag. Die trog oor die oostelike Karoo sal egter more verdiep.

INFERENCE The air in circulation over the country is still moist and scattered thunderstorms will occur over most regions. The cold front at the Cape is moving slowly south-eastwards but cooler conditions will move in over the South coast tomorrow.

AFLEIDING Die lug in sirkulasie oor die land is steeds vogtig en verspreide donderbuie sal oor die meeste gebiede voorkom. Die koufront by die Kaap beweeg stadig suidooswaarts maar koeler toestande sal môre oor die Suidkus inbeweeg.

INFERENCE The strong cell of high pressure is feeding in moist air over the northern parts. This moist air is moving southwards over the interior and scattered showers will develop over southern S.W.A, Free State and the northern parts of the Cape Province tomorrow. The low at the Cape is moving eastwards

AFLEIDING Die sterk sel van hoë druk voer vogtige lug in oor die noordelike dele wat dan suidwaarts oor die binneland beweeg sodat verspreide buie mored ook oor suidelike S.W.A, die Vrystaat en die noordelike Kaapprovinsie sal ontwikkel. Die laag by die Kaap beweeg oostwaarts

INFERENCE The trough over the eastern parts of the Cape Province is moving eastwards and cool rainy weather will spread to northern Free-State but it will clear in the west. A strong ridge is pushing into the south of the continent and cool unsettled weather will move in over Natal and South-eastern Transvaal.

AFLEIDING Die trog oor die oostelike dele van die Kaapprovinsie beweeg stadig ooswaarts en die koel reënweer sal na die noordelike Vrystaat uitbrei maar dit sal in die weste opklaar. 'n Sterk wig stoot suid van die land in en koel ongestadigde weer sal oor Natal en Suidoos-Transvaal inbeweeg.

INFERENCE

The strong high-pressure system south of the continent is moving eastwards and is feeding in moist air over the northeastern regions where scattered showers will occur. It will remain hot over the western parts of the country.

AFLEIDING

Die sterk hoëdrukstelsel suid van die land beweeg oswaarts en voer vogtige lug in oor die noordelike strake waar verspreide buie sal voorkom. Dit sal baie warm bly oor die westelike dele van die land.

INFERENCE

The air over the interior is still moist and further showers will occur over the central parts. The cold front is moving slowly eastwards and cooler showery weather will move in over the South-Westerly Cape tomorrow.

AFLEIDING

Die lug oor die binnaland is steeds vogtig en verdere buie sal oor die sentrale dele voorkom. Die koue front beweeg stadig oostwaarts en koeler weer met buie sal eers more oor Suidwes-Kaap intree.

INFERENCE

The trough over the central interior is moving westwards and moist air is moving southwards over the western parts of the country so that thundershowers will occur tomorrow also over most parts of the Cape Province. The cold front south-west of the Cape is moving north eastwards.

AFLEIDING Die trog oor die sentrale binneland beweeg weswaarts en terselfdertyd beweeg vogtige lug suidwaarts oor die westelike dele sodat donderbuie more ook oor die meeste dele van die Kaapprovinsie sal voorkom. Die kouefront suidwes van die Kaap beweeg noordwaarts.

INFERENCE A strong ridge of high pressure is pushing in over the southern parts of the country behind the cold front. Cold showery weather will move in over Southern and South-eastern Cape spreading to Natal later but cool dry air will push in over the interior towards the Free State.

AFLEIDING 'n Sterk wig van hoë druk stoot in oor die suide-like dele van die land agter die koue front. Koue weer met buie sal oor Suid- en Suidoos-Kaapland inbeweeg en later na Natal uitbrei maar koel droë lug sal oor die binneland na die Vrystaat instoot.

INFERENCE Cool dry air from the west has moved in over the country and light rain is expected only over the north-eastern regions. The cold front is moving eastwards to the south of the continent and light showers will occur over the southern coastal regions overnight, spreading eastwards tomorrow.

AFLEIDING Koel droë lug het vanuit die weste oor die land inbeweeg en ligte reën word slegs oor die noordoostelike dele verwag. Die koufront beweeg suid van die land verby en ligte buie sal oornag oor die suidelike kusstreke voorkom, wat more

INFERENCE

Another cold front is moving eastwards to the south of the continent and cooler air will again push in over Southern and Eastern Cape with light showers along the coast. These conditions will spread to Natal later.

AFLEIDING

Nog 'n koufront beweeg suid van die land verby sodat koeler lug weer eens oor Suid-en Oos-Kaap sal instoot met ligte buie langs die kus en hierdie toestande sal later na Natal uitbrei.

INFERENCE

Moist air is in circulation over the whole country and with the deepening trough over the western parts thundershowers will develop over most regions. The front at the Cape is weakening.

AFLEIDING

Vogtige lug is in sirkulasie oor die hele land en met die trog oor die westelike dele van die land wat verdiep kan donderbuie oor die meeste gebiede voorkom. Die front by die Kaap is besig om te verswak.

INFERENCE

The cold front at the Cape is moving rapidly eastwards to the south of the continent and is being followed by a strong cell of high pressure. The trough over the West coast is deepening and scattered showers are expected east of this system.

AFLEIDING

Die kouefront by die Kaap beweeg vinnig oos-waarts suid van die land verby en word gevolg deur 'n sterk sel van hoë druk. Die trog oor die Weskus verdiep en verspreide buie word oos van die stelsel verwag.

INFERENCE

A trough is developing over the western parts of the country and scattered showers will once again spread eastwards over the country. Scattered thundershowers will occur also over Natal in the vicinity of the low-pressure system.

AFLEIDING

'n Trog is besig om oor die westelike dele van die land te ontwikkel sodat verspreide buie weer aans ooswaarts oor die land sal uitbrei. Verspreide donderbuie sal ook oor Natal voorkom in die omgewing van die laedrukstelsel.

INFERENCE

With the air fairly moist light showers will occur east of the trough extending north-westwards over Natal. A weak ridge of high pressure will push in south of the continent and will bring cooler conditions to the southern coastal regions.

AFLEIDING

Met die lug redelik vogtig sal ligte buie voorkom oos van die trog wat oor Natal noordweswaarts strek. 'n Swak wig van hoë druk sal suid van die land instoot en koeler weer sal oor die suidelike kuststrake inbeweeg.

INFERENCE

The frontal systems are moving eastwards mainly to the south of the continent causing only cloudy conditions along the southern coastal regions. Dry air is in circulation over the interior.

AFLEIDING

Die frontale stelsel beweeg hoofsaaklik suid van die land verby en veroorsaak slegs bewolkte toestande oor die suidelike kusstreke. Droë lug is oor die binneland in sirkulasie.

INFERENCE

The strong cell of high pressure is moving eastwards to the south of the continent and very cold conditions will push in also over Transvaal overnight. Further showers are expected over the eastern parts with snow on high ground but it will clear over Eastern Cape tomorrow.

AFLEIDING

Die sterk sel van hoë druk beweeg ooswaarts net suid van die land verby en besonder koue lug sal oornag ook oor Transvaal instoot. Verdere buie word oor die oostelike dele verwag met sneeu op hoë grond maar dit sal môre oor Oos-Kaap ooptrek.

INFERENCE

The strong high-pressure system South-west of the Cape is still advecting very cold air over most of the country and further showers will occur over the north-eastern parts. Warm bergwinds are developing over the West coast.

AFLEIDING

Die sterk hoëdrukstelsel suidwes van die Kaap voer steeds besonder koue lug in oor die meeste dele van die land en verdere buie sal oor die noordoostelike streke uitsak. Warm bergwinde ontwikkel oor die Weskus.

INFERENCE The strong high south-east of the continent is moving eastwards and the weather will remain fine over most of the country. The deep frontal system is moving eastwards and hot bergwinds will spread also to the southern and south-eastern coastal regions tomorrow.

AFLEIDING Die sterk hoog suidoos van die land beweeg ooswaarts en dit sal mooiweer bly oor die meeste dele van die land. Die diep frontale stelsel beweeg ooswaarts en baie warm bergwinde sal môre ook na die suid-en suidoostkusstreke uitbrei.

INFERENCE

As a result of the strong high over the Indian ocean the cold front at the Cape is moving mainly south-eastwards. Although colder conditions will move in over the Cape Province showers are expected only over the south-ern parts and it will remain warm elsewhere over the country

AFLEIDING

As gevolg van die sterk hoog oor die Indiese oseaan sal die koue front by die Kaap hoofsaaklik suidoos-waarts beweeg. Alhoewel kouer toestande oor die Kaapprovinsie sal inbeweeg word buie stegs oor die suidelike dele verwag en oor die res van die land sal dit warm bly

INFERENCE

The cold front far south of the continent is moving rapidly north-eastwards and will be south-east of the continent tomorrow. It will thus clear over Natal but it will become cloudy again over the southern coastal regions.

AFLEIDING

Die koufront ver suid van die land beweeg vinnig noordooswaarts en sal môre suidoos van die land wees. Die weer oor Natal sal dus opklaar maar dit sal weer bewolk word oor die suidelike kusgebiede.

INFERENCE

The low over South-west Cape is moving south-eastwards associated with general rain and showers over Southern and Eastern Cape with good falls at places. Light showers will occur north of the system and will spread to Free State and Natal tomorrow but drier air will move in over the western parts

AFLEIDING

Die laag oor Suidwes-Kaap beweeg suidooswaarts en veroorsaak algemene reën en buie oor suid- en Oos-Kaap met goeie neerslae op plekke. Ligte buie sal ook noord van die stelsel voorkom en môre na Vrystaat en Natal uitbrei maar droër lug sal oor die westelike dele inbeweeg

INFERENCE

The high-pressure system over the Indian Ocean is still feeding in moist air over the north-eastern parts of the country and the cloudy cool weather over the Northern and Eastern Transvaal will persist. Warm moist air is moving southwards over the western regions of the country, and associated with an upper-air trough along the west coast, isolated showers will develop over the

AFLEIDING

Die hoadruksel oor die Indiese Oseaan voer nog steeds vogtige lug oor die noordoostelike dele van die land in en die bewolkte koel weer sal oor Noord-en Oos-Transvaal voortduur. Warm vogtige lug beweeg suidwaarts oor die westelike streke van die land en tesame met 'n bo-lugtrog langs die weskus, sal enkele buie oor die Wes-Kaapse hinderland uitreik

INFERENCE The low pressure system over the Atlantic Ocean is associated with a strong upper-air trough and, with warm moist air in circulation over the western and southern region of the country, showers and thundershowers will develop over S.W.A. and over the Western and Southern Cape.

AFLEIDING Die laedrukstelsel oor die Atlantiese Oseaan gaan gepaard met 'n sterk bolugtrog en, met warm en vogtige lug aanwesig oor die westelike en suidelike strek van die land, sal buie en donderbuie oor S.W.A. en oor Wes- en Suid-Kaapland ontwikkel.

INFERENCE The high pressure system over the western interior is moving eastwards and cooler air will spread over the Free State, Natal and the Southern parts of Transvaal. The air is fairly dry but light showers are still possible over the coastal areas of Natal.

AFLEIDING Die hoëdrukstelsel oor die westelike binneland beweeg oostwaarts en koeler lug sal uitbrei oor die hele Vrystaat, Natal en die suidelike dele van Transvaal. Die lug is betreklik droog maar ligte buie is tog moontlik oor Natalse kusstrooke.

INFERENCE

Cooler air over the southwestern parts of the interior will spread to the southern parts of Free State and Natal. The frontal system west of the country is moving eastwards and cloudy colder conditions with rain and snow will spread over most parts of the Cape province. Gale

AFLEIDING

Koeler lug oor die suidwestelike dele van die binneland sal uitbrei na die suidelike dele van die Vrystaat en Natal. Die frontale stelsel wes van die land beweeg ooswaarts en bewolkte kouer toestande met reën en sneeu sal uitbrei oor die meeste dele van die Kaap

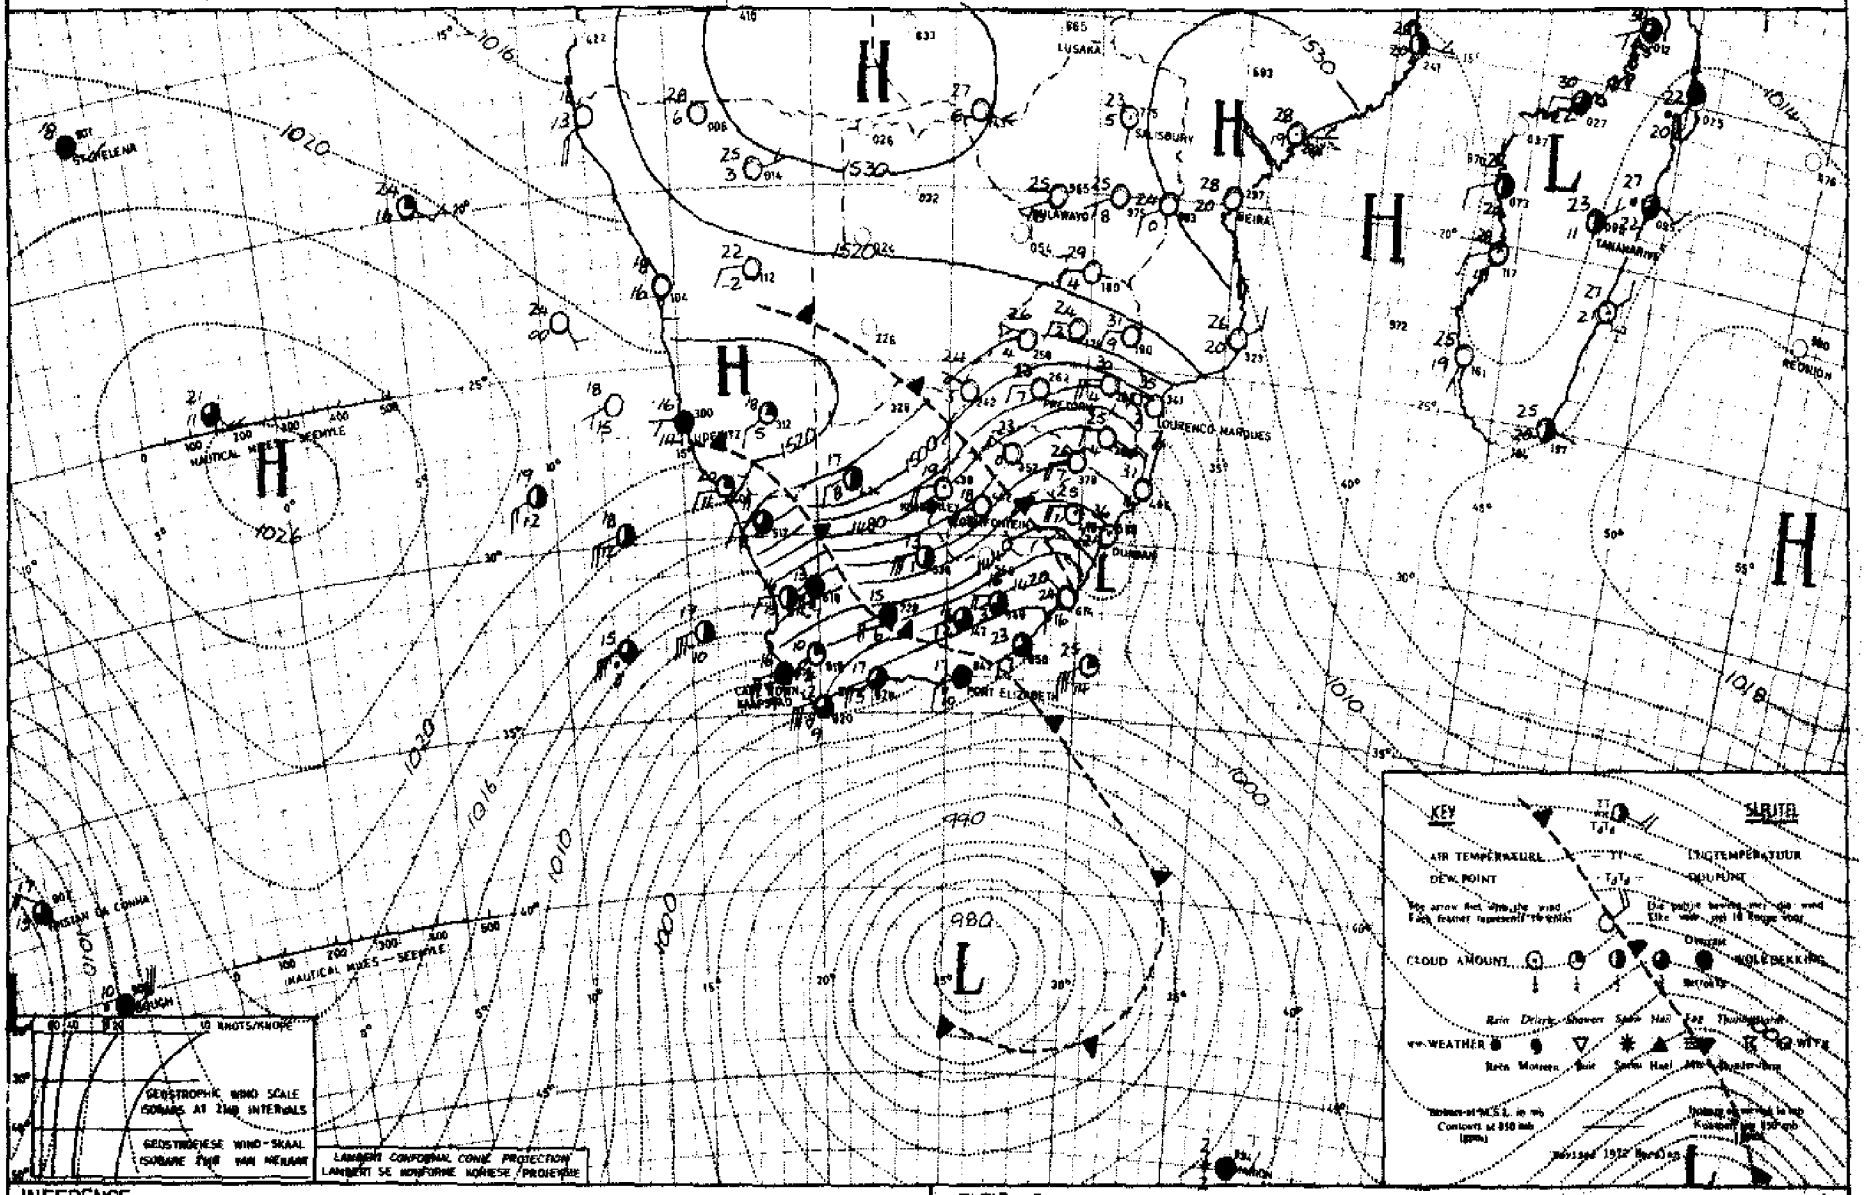
G.P.-S. (L) **SYNOPTIC WEATHER MAP** 12h00 GMT–14h00 SAST/979-06-10 **SINOPTIESE WEERKAART** TV 4/42



INFERENCE The cold front over the western interior is moving eastwards and is associated with gale force north-westerly winds, showers and snow falls. Dry colder air ahead of the front will move in over the remainder of the Free State and Southern Transvaal overnight.

AFLEIDING Die koue front oor die westelike binneland beweeg ooswaarts en gaan gepaard met stormsterk noordwestewinde, buie en sneeuvalle. Koue droë lug voor die front sal oornag oor die res van die Vrystaat en Suid-Transvaal instroom.

INFERENCE The strong high-pressure system is causing a influx of moist air over the eastern parts of Transvaal. The bergwind conditions along the western coastal regions will spread towards the Southern Cape coastal areas. Night temperatures will remain low over the inland

AFLEIDING Die stark hoëdrukstelsel veroorsaak vogtige lug in oor die oostelike dele van Transvaal. Die bergwind toestande langs die weskuslokasies sal uitbreid na die suidelike Kaapse kusstreke. Nag temperature sal laag bly oor die binneland

INFERENCE

The moist air over the northern parts of Transvaal is moving southwards and light showers are expected over most parts of the province. Bergwinds will persist along the western and southern coastal regions.

AFLEIDING

Die vogtige lug oor die noordelike dele van Transvaal beweeg suidwaarts en ligte buie word verwag oor die meeste dele van die provinsie. Bergwinde sal voortduur langs die westelike en suidelike kuststreke.

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 08 h 00 SAST op

INFERENCE Fine and mild to warm conditions will persist over the interior. The cold front west of the country is moving rapidly eastwards and will cause cold, rainy weather over Southwestern Cape tomorrow.

AFLEIDING Mooiweer en matig tot warm toestand sal voortduur oor die binneland. Die koue front wes van die land beweeg vinnig ooswaarts en sal koue reënerige weer oor Suidwes-Kaap veroorsaak.

INFERENCE An upper-air low is developing over the western parts of the country and with fairly warm and moist air in circulation, isolated showers or thundershowers will develop over S.W.A. and the North-Western Cape. The strong high over the Indian Ocean is still feeding in moist air over the eastern parts where cloudy to partly cloudy weather will occur

AFLEIDING 'n Boulaag ontwikkel oor die westelike dele van die land en met taamlike warm en vogtige lug in sirkulasie sal enkele buie en donderbuie oor S.W.A. en Noordwes-Kaapland ontwikkel. Die sterk hoog oor die Indiese Oseaan voer nog steeds vog-tige lug oor die oostelike dele in waar bewolkte tot gedeeltelik

INFERENCE The low along the west coast is moving slowly south-eastwards and cloudy weather with isolated showers and thundershowers will therefore spread eastwards over the Cape Province and the southern parts of the Free State. The influx of moist air from the east over the Transvaal will persist and it will

AFLEIDING Die laag langs die weskus beweeg stadig suidoos-waarts en bewolkte weer met enkele buie en donderbuie sal dus ooswaarts oor Kaapland en die suidelike state van die Vrystaat uitbrei. Die invoer van vogtige lug vanuit die ooste sal oor Transvaal voortduur, en dit sal oor hierdie streek

INFERENCE

The air in circulation over the interior is moist and it will remain partly cloudy. Light showers are expected over the southeastern parts of the country. The approaching cold front will cause cold weather with rain over the southwestern parts of the Cape

AFLEIDING

Die lug in sirkulasie oor die binneland is vogtig en dit sal gedeeltelik bewolk bly. Ligte buie kan oor die suidoostelike dele van die land verwag word. Die nadarende koufront sal koue weer met reën oor die suidwestelike dele van die Kaapprovinsie

INFERENCE

The air in circulation is dry over the interior and it will be fine and mild over most parts. The coastal low along the western coast will move to the south coast. Partly cloudly cooler weather is expected over the southwestern dhd southern coastal areas.

AFLEIDING

Die lug in sirkulasie oor die binneland is droog en dit sal mooiweer en matig wees oor die meeste dele. Die kuslaag langs die weskus sal na die suidkus beweeg. Gedeeltelik bewolkte koeler weer word verwag oor die suidwestelike en suidelike kusgebiede.

INFERENCE

The high-pressure system south of the country is moving eastwards and will cause cloudy weather with showers over the coastal areas of Natal. It will remain fine and mild over the interior.

AFLEIDING

Die hoëdrukstelsel suid van die land beweeg ooswaarts en sal bewolkte weer met buie langs die Natalse kusgebiede veroorsaak. Dit sal mooiweer en matig bly oor die binneland.

INFERENCE The high is causing an influx of moist air over the north-eastern parts and the cloudy cold conditions will spread further westwards. A low pressure system is developing in the upper-air along the west coast and will cause cloudy weather with showers over the northwestern parts of the Cape Province and ~~Southern S.W.A.~~

AFLEIDING Die hoog veroorsaak 'n invloeing van vogtige lug oor die noordoostelike dele en bewolkte koue toestande sal verder weswaarts uitbrei. 'n Laedrukstelsel ontwikkel langs die weskus. in die bolug en sal bewolkte weer met buie tot gevolg hê oor die noordwestelike dele van die Kaapprovinsie en suidelike SWA

INFERENCE The low over the central parts weakened further. Isolated showers may be expected over the western parts of Transvaal and southern Botswana. The high-pressure system south of the country will cause cloudy weather with rain over the extreme eastern parts of the Republic.

AFLEIDING Die laag oor die sentrale dele van die land het verder verswak. Enkele buie kan nog verwag word oor die westelike dele van Transvaal en suidelike Botswana. Die hoëdrukstelsel suid van die land sal bewolkte weer met reën veroorsaak oor die verre oostelike dele van die

The low over Botswana is moving eastwards and dry air will therefore spread over the western parts of the Transvaal and the Free State. A second low-pressure region is situated over the Transkei and with a strong inflow of moist air from the east, further rain will fall over Natal, the Eastern Free State and the Eastern and Southern Cape.
AFLEIDING
Die laag oor Botswana beweeg oostwaarts en droë lug sal dus oor die westelike dele van Transvaal en die Vrystaat inbeweeg. 'n Tweede laedrukgebied is oor die Transkei gelee en met 'n sterk invoer van vogtige lug vanuit die ooste, sal verdere reën oor Natal, die Oos-Vrystaat en Oos- en Suid-Kaapland uitsak.

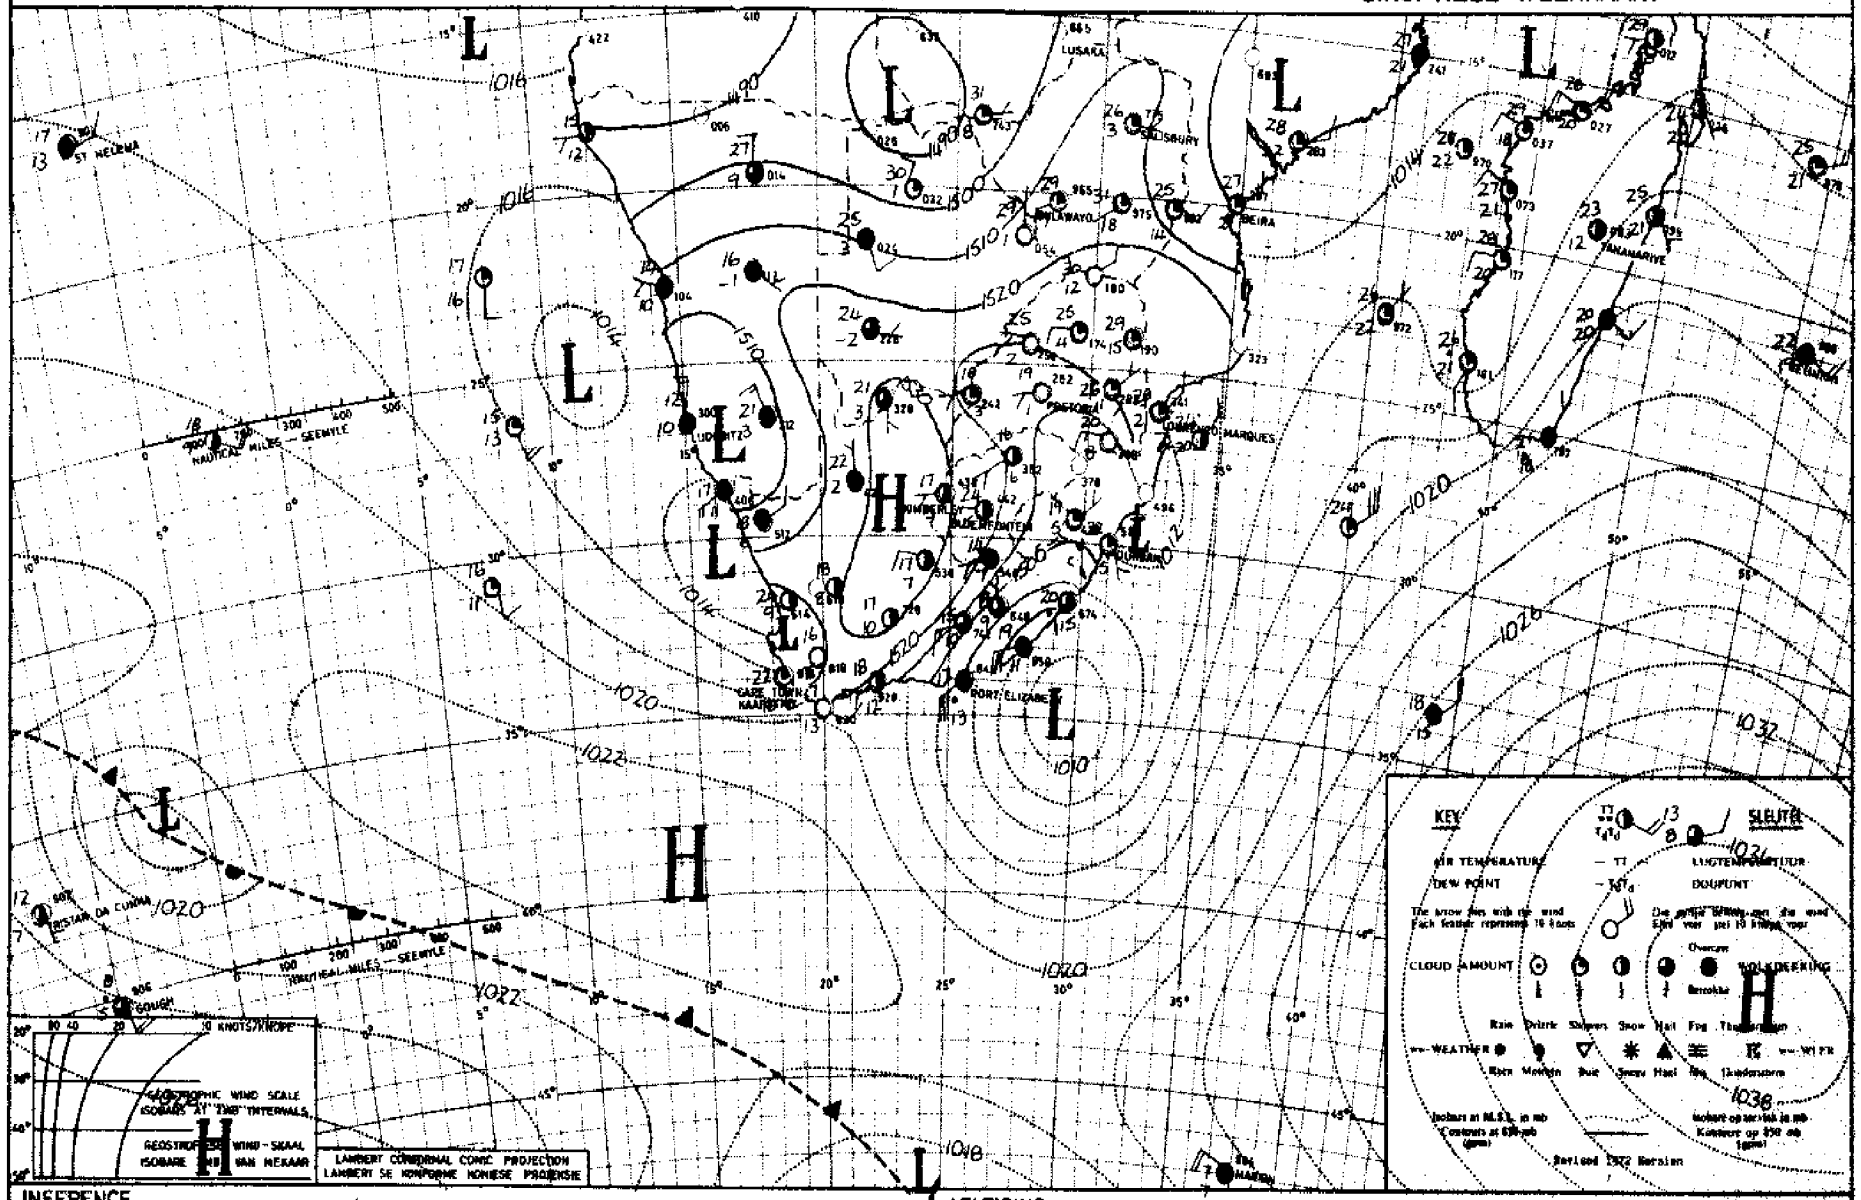
G.P.S (L) **SYNOPTIC WEATHER MAP** 12h00 GMT – 14h00 SAST/1979-08-22 **SINOPTIESE WEERKAART** TV 6/42



INFERENCE The low along the east coast is moving south-eastwards and the rainy weather over the Eastern Cape coast will begin to clear. The low-pressure region over S.W.A. will move rapidly eastwards and cloudy conditions will spread to the central and eastern parts of the Republic and isolated light showers will occur.

AFLEIDING Die laag langs die ooskus beweeg suidooswaarts en die reënweer langs die Oos-Kaapse kus sal dus begin opklaar. Die laedrukgebied oor S.W.A. sal vinnig ooswaarts beweeg en bewolkte toestande sal na die sentrale en oostelike dele van die Republiek uitbrei en enkele ligte buie sal uitval.

INFERENCE A weak upper-air trough is situated over the central parts of the country and is causing cloudy weather with isolated showers and thundershowers over the central and eastern region. This system is moving rapidly eastwards and it will therefore clear over all these areas.

AFLEIDING 'n Swak boluug trog is oor die sentrale dele van die land gelee en veroorsaak bewolkte toestande met enkele buie en donderbuie oor die sentrale en oostelike gebiede. Die stelsel beweeg vinnig ooswaarts en dit sal dan oor hierdie streke opklaar.

INFERENCE

The low-pressure system west of the country is moving towards Cape Town and it will become cloudy with rain over the southwestern parts of the Cape Province. An upper air trough over the western parts of the country is causing showers over Transvaal Free State and Eastern Cape

AFLEIDING

Die laedrukstelsel wes van die land beweeg in die rigting van Kaapstad en dit sal bewolk word met reën oor die suid westelike dele van die Kaapprovinsie. 'n Bolug trog oor die westelike dele van die land veroorsaak buie oor Transvaal

INFERENCE The trough of low-pressure is still situated over central interior and thundershowers are expected over the northeastern parts of the Republic. The strong high at Gough is expected to ridge in behind the new frontal system south of the country causing colder conditions with rain along the southern coastal regions.

AFLEIDING Die trog van lae druk is nog oor die sentrale binneland gebied en donderbuie kan nog verwag word oor die noordoos telike dele van die Republiek. Die sterk hoog by Gough sal na verwagting agter die nuwe frontale stelsel suid van die land inval en koue toestande met buie langs die suidelike

INFERENCE The low south of Port Elizabeth will deepen further and cloudy weather with showers will spread over the southern and southeastern coastal areas. Thundershowers will occur over the northeastern parts but drier air is fed in over the central area and these conditions will clear over Free State and Northern Cape.

AFLEIDING Die laag suid van Port Elizabeth sal verder verdiep en bewolkte koue weer met reën sal oor die suidelike en suidoostelike kusstreke uitbrei. Donderbuie sal nog voorkom oor die noordoostelike dele maar droë lug beweeg in oor die sentrale dele en die donderweer toestande oor die Vrystaat en Noord-Kaapland sal opklaar.

INFERENCE

The cold front over the interior will move further northwards and it will become colder over Central Transvaal. The low southeast of the country is moving southeastwards and a new low will develop south of the country. It will be cloudy and cold over the southern and eastern parts with rain and snow over the mountains.

AFLEIDING

Die koufront oor die binneland sal verder noordwaarts beweeg en dit sal ook kouer word oor die sentrale dele van Transvaal. Die laag suidoos van die land beweeg suidooswaarts en 'n nuwe laag sal suid van die land ontwikkel. Dit sal bewolk en koud wees oor die suidelike en oostelike dele van die land met reën en sneeu oor die berge

INFERENCE

The high is ridging in behind the cold front and is feeding in moist air over the eastern parts of the country. The cold front will therefore move further northwards. The cloudy cold weather over the eastern parts will clear over Eastern Cape.

AFLEIDING

Die rug van hoë druk langs die Natalkus wig in agter die koufront en voer vogtige lug in oor die oostelike dele van die land. Die koufront sal dus verder noordwaarts beweeg. Die bewolkte koue weer met reën sal opklaar oor Oos-Kaapland.

INFERENCE

A coastal low will develop near East London with a surface trough extending towards Windhoek. A trough of low pressure in the upper air is situated west of the country. It will therefore become cloudy over the western and central parts of the Cape Province with isolated showers.

AFLEIDING

'n Kuslaag sal ontwikkel naby Oos Londen met 'n oppervlakte trog wat sal strek vanaf die kuslaag na Windhoek. 'n trog van lae druk in die boklug is wes van die land se lae. Dit sal gevolglik bewolk word oor die westelike en sentrale dele van Kaapland met enkele buie.

INFERENCE The high-pressure system is causing an influx of moist air over the eastern parts of the country. Cloudy cold weather over Natal will spread over most parts of Transvaal. Light rain will occur over Natal. Light showers will occur over the southern and central parts of SWA due to the upper air low west of this area.

AFLEIDING Die hoëdrukstelsel veroorsaak vogtige lug in oor die oostelike dele van die land. Bewolkte koue weer oor Natal sal uitbrei oor die meeste dele van Transvaal. Ligte reën sal oor Natal voorkom. Ligte buie sal oor die suidelike en sentrale dele van

INFERENCE Isolated showers may be expected over S.W.A. due to the upper-air low west of the area. The coastal low near Port-Elizabeth will move towards Durban and the bergwind conditions will moderate. The frontal system is moving past the country to the south and will not influence our weather.

AFLEIDING Enkele buie kon verwag word oor S.W.A. met die hoë laag wes van die gebied. Die kuslaag naby Port Elizabeth beweeg na Durban en die bergwinde toestande sal opklaar. Die frontale stelsel beweeg suid van die land verby en sal nie die weer oor die land beïnvloed nie.

INFERENCE *The low over the southwestern interior will move southeastwards and the high pressure system will ridge in behind the cold front. Light showers are expected over most parts of the Cape Province and it will become cloudy and colder with rain over the southern and eastern parts of this province.*

AFLEIDING *Die laag oor die suidwestelike binneland sal suidoostwaarts beweeg en die hoedrukstelsel sal agter die koue front inwig. Ligte buie word verwag oor die meeste dele van die Kaapprovinsie en dit sal bewolk en kouer word met reën oor die suidelike en oostelike dele van die provinsie.*

INFERENCE

The trough of low-pressure over the interior is moving southeastwards. The cloudy weather with thundershowers over Natal, Free State and the southern parts of Transvaal will clear from the west. The front southwest of Cape Town is moving southeastwards and it will become cloudy with rain over Southwestern Cape later tomorrow.

AFLEIDING

Die trog van lae druk oor die binneland beweeg suidooswaarts. Die bewolkte weer met donderbuie oor die Vrystaat, Natal en die suidelike dele van Transvaal sal geleidelik van die weste af opklaar. Die front suidwes van Kaapstad beweeg suidooswaarts en dit sal later môre bewolk word met reën oor Suidwes-Kaapland.

INFERENCE

Moist air is in circulation over the northeastern parts of the country and isolated thundershowers may occur over Transvaal. The cold front west of the country is moving rapidly eastwards and will cause cloudy weather with rain over the southwestern parts of the Cape Province tomorrow.

AFLEIDING

Vogtige lug is in sirkulasie oor die noordoostelike dele van die land en enkele donderbuie kan oor Transvaal voorkom. Die koufront wes van die land beweeg vinnig oos-waarts en kan alreeds môre bewolkte weer met reën oor die suidwestelike dele van die Kaapprovinsie veroorsaak.

INFERENCE

A trough of low-pressure is situated over the central parts of the interior and thundershowers will occur east of its axis. The cold front near Cape Town is moving eastwards and cloudy weather with rain will spread along the southwestern and southern coastal regions of the Cape Province.

AFLEIDING

'n Trog van lae druk is oor die sentrale binneland gelê en donderbuie sal oos van die trogas voorkom. Die koue front naby Kaapstad beweeg oostwaarts en bewolkte weer met reën sal langs die suidwestelike en suidelike kusgebiede van die Kaapprovinsie uitbrei.

INFERENCE

A cell of high pressure will develop along the Natal coast and the trough over the interior will move somewhat westwards. Further scattered showers will therefore occur over the Transvaal, Natal and the northern parts of the Free State and over Botswana.

AFLEIDING

'n Sel van hoë druk sal langs die Natalkus ontwikkel en die trog oor die binneland sal ietwat na weswaarts beweeg. Verder verspreide buie sal dus voorkom oor Transvaal, Natal, die noordelike dele van die Vrystaat en oor Botswana.

INFERENCE The front over the interior will move southeastwards and will weaken. The next cold front will cause cloudy weather with rain over South western Cape tomorrow. The partly cloudy weather with thundershowers over the central parts of the country will clear partially and spread eastwards.

AFLEIDING Die front oor die binneland sal verswak en suidoos waarts beweeg. Die volgende koufront sal more bewolk weer met reën oor die suidwestelike dele van die Kaapprovinsie veroorsaak. Die gedeeltelike bewolkte toestande met donderbuie oor die sentrale dele van die land sal ook ooswaarts uitbreid en geleidelik afneem

DAILY WEATHER BULLETIN

INFERENCE

Moist air is in circulation over the northeastern parts of the country and thundershowers will recur over these areas. The cold fronts are moving eastwards and cold air will move in over the Cape Province and the southern parts of S.W.A, Free State and Natal. Cloudy weather with rain will spread eastwards over the southern parts of the Cape Province.

AFLEIDING

Vogtige lug is nog in sirkulasie oor die noordoostelike dele van die land en donderbuie sal weer voorkom oor die meeste dele van Transvaal. Die koue front beweeg oostwaarts en koue lug sal inbeweeg oor die Kaapprovinsie en die suidelike dele van S.W.A. die Vrystaat en Natal. Bewolkte weer met reën sal oostwaarts oor die suidelike dele van die Kaapprovinsie voortduur.

INFERENCE

The upper air low is still situated near CapeTown. Dry air is moving in over the country from the west. It will clear partially over Free State while general rain and showers will recur over Transvaal and Natal

AFLEIDING

Die bolug laag is steeds naby Kaapstad gelee. Droe lug beweeg van die weste af oor land. Dit sal dus gedeeltelik opklaar oor die Vrystaat terwyl algemene reën en donderbuie nog sal voorkom oor Transvaal en Natal. Reën

DAILY WEATHER BULLETIN

INFERENCE

The weak cold front is moving east wards and the high will ridge in behind it. Cloudy cooler weather with light showers will spread along the southern coastal regions. The air in circulation north of the trough over the interior is fairly dry and only isolated thunder-showers may occur

AFLEIDING

Die swak koufront wes van die land beweeg ooswaarts en die hoëdrukstelsel sal agter hierdie front inbeweeg. Bewolkte koeler weer met ligte reën sal langs die suidelike kusstreke uitbrei. Die lug in sirkulasie noord van die trog oor die binneland is relatief droog en slegs enkele donderbuie kan moontlik voorkom.

INFERENCE The ridge of high-pressure over Natal will cause the cold cloudy weather with rain to spread over most of Transvaal, preceded by scattered thundershowers owing to the low-pressure system south-west of Pretoria. The second cold front south of the continent will bring light showers again to the southern and eastern coastal regions.

AFLEIDING Met die wig van hoë druk wat oor Natal instoot, sal die koue bewolkte weer met reën oor die meeste dele van Transvaal uitbrei, voorafgegaan deur verspreide donderbuie weens die lae druk stelsel suidwes van Pretoria. Die tweede koue front suid van die land sal ook weer ligte buie oor die suid- en oostelike [illegible]

INFERENCE

The high-pressure system southwest of the country is moving eastwards and will intensify while a low pressure system will develop over the interior. It will become cloudy with rain along the southern and southeastern coastal regions and adjacent interior. Thundershowers will occur over the eastern half of the country.

AFLEIDING

Die hoëdruksisteem suidwes van die land beweeg oostwaarts en sal verder versterk terwyl 'n laedruksisteem oor die binneland ontwikkel. Dit sal bewolk word langs die suidelike en suidoostelike kusgebiede en aangrensende

INFERENCE The high east of the country is causing an influx of moist air over the northern parts of Transvaal resulting in cloudy conditions with rain over these areas. Thundershowers will occur over the interior east of the trough of low pressure which is expected to move somewhat eastwards.

AFLEIDING Die hoë drukstelsel oos van die land veroorsaak vogtige lug in oor die noordelike dele van Transvaal waar dit dus bewolk en koel sal bly met reën. Donderbuie sal oor die binneland voorkom oos van die trog van lae druk wat na verwagting weswaarts sal verskuif.

INFERENCE

The coastal low west of Port Elizabeth will move towards Durban resulting in partly cloudy cooler conditions along the southern and south eastern coastal regions. A trough of low pressure is situated over the western parts of the country and thundershowers can be expected over the northeastern half of the country.

AFLEIDING

Die kuslaag wes van Port Elizabeth sal langs die kus op beweeg na Durban. Dit sal dus gedeeltelik bewolk en koeler word langs hierdie kuststreke. 'n Trog van lae druk is oor die westelike dele van die land gelee en donderbuie kan oor die noordelike helfte van die land verwag word.

INFERENCE.

A high-pressure system in the upper air is situated over the country and is causing subsidence. It will therefore be mainly fine and warm to hot over most parts of the country.

AFLEIDING.

'n Hoedrukstelsel in die bolug is oor die land gelee en veroorsaak daling van die lugmassa. Dit sal gevolglik mooi-weer en warm tot baie warm wees oor die meeste dele van die land.

INFERENCE.

A trough of low pressure is situated over the interior and moist air is in circulation over most parts of the country. Isolated thundershowers are expected over the interior except over the southwestern half of the Cape Province and the northern half of Transvaal

AFLEIDING.

'n Trog van lae druk is oor die sentrale dele van die land gelee en die lug in sirkulasie oor die meeste dele is vogtig. Enkele donderbuie word verwag oor die binneland behalwe oor die suidwestelike helfte van Kaapland en die noordelike helfte van Transvaal.

INFERENCE

The frontal system south of Cape Town will move eastwards while the coastal low along the southeastern coast will intensify. A ridge of high pressure in the upper air however, is situated over the interior and little change in the present weather conditions is expected.

AFLEIDING.

Die frontele stelsel suid van Kaapstad beweeg oos-waards terwyl die kuslaag langs die suidoos-kus na verwagting sal verdiep. 'n Rug van hoëdruk is egter in die bolug oor die binneland gelee en min veranderinge in die huidige weer-toestande word verwag.
