The air is relatively dry, and weal at the moment over the Transvaal and Natal and consequently fair weather conditions are expected to occur over western and northwestern border of Transvaal, and good rains are likely to occur over the western half of Transvaal within a day or so. Elsewhere over the Union it will be fair generally.

Die lug is relatief droog en koel met die gevolg dat weerstoestande oor die algemeen bestendig sal wees. Warm, vogtige lug is egter nog langs die westelike en noordwestelike grens van Transvaal teen woordig en moontlik sal goeie reëns binne 'n dag of so oor die westelike helfte van Transvaal uitsak. Elders oor die Unie sal dit effens

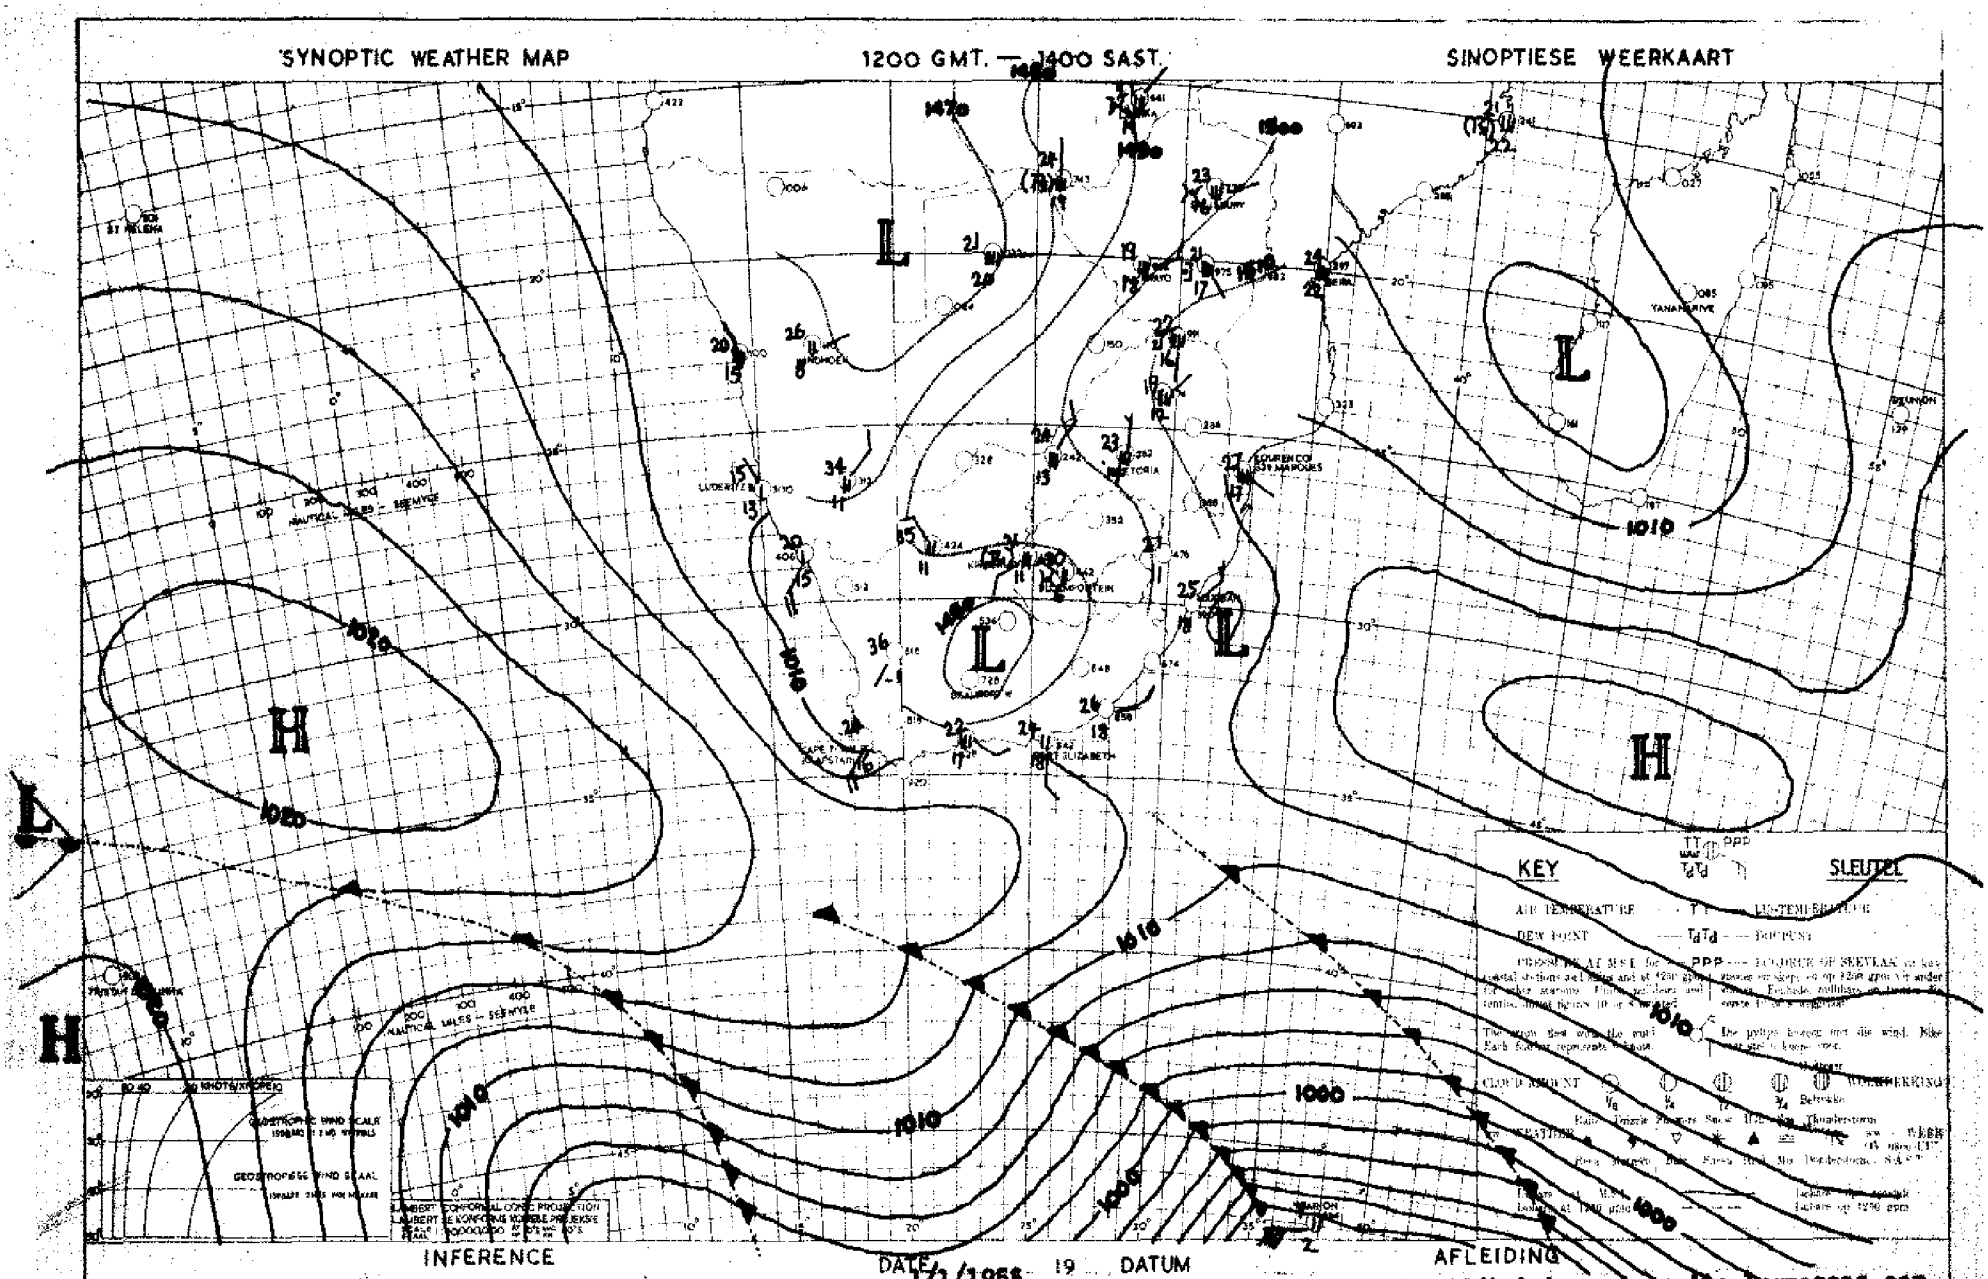
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 1/1/1955 19 DATUM AFLEIDING

From Jan. 1st. 1955 each feather represents 10 knots. Contours over Interior at 850 mbs. level drawn at 10

The situation is mainly controlled by the airmasses over the Interior. A deep low has developed over NW Bechuanaland, and there is a secondary centre over the Central Cape. Conditions will become more favourable for rain over the NE half of the Union.

Die weerstoestand word hoofsaaklik beheer deur die lugmassas oor die Binneland. 'n Diep laag het oor Betsjoeanland ontwikkel, en 'n sekondêre sentrum lê oor middel Kaapland. Toestande sal gunstiger word vir reën oor die NO-like helfte van die Unie.

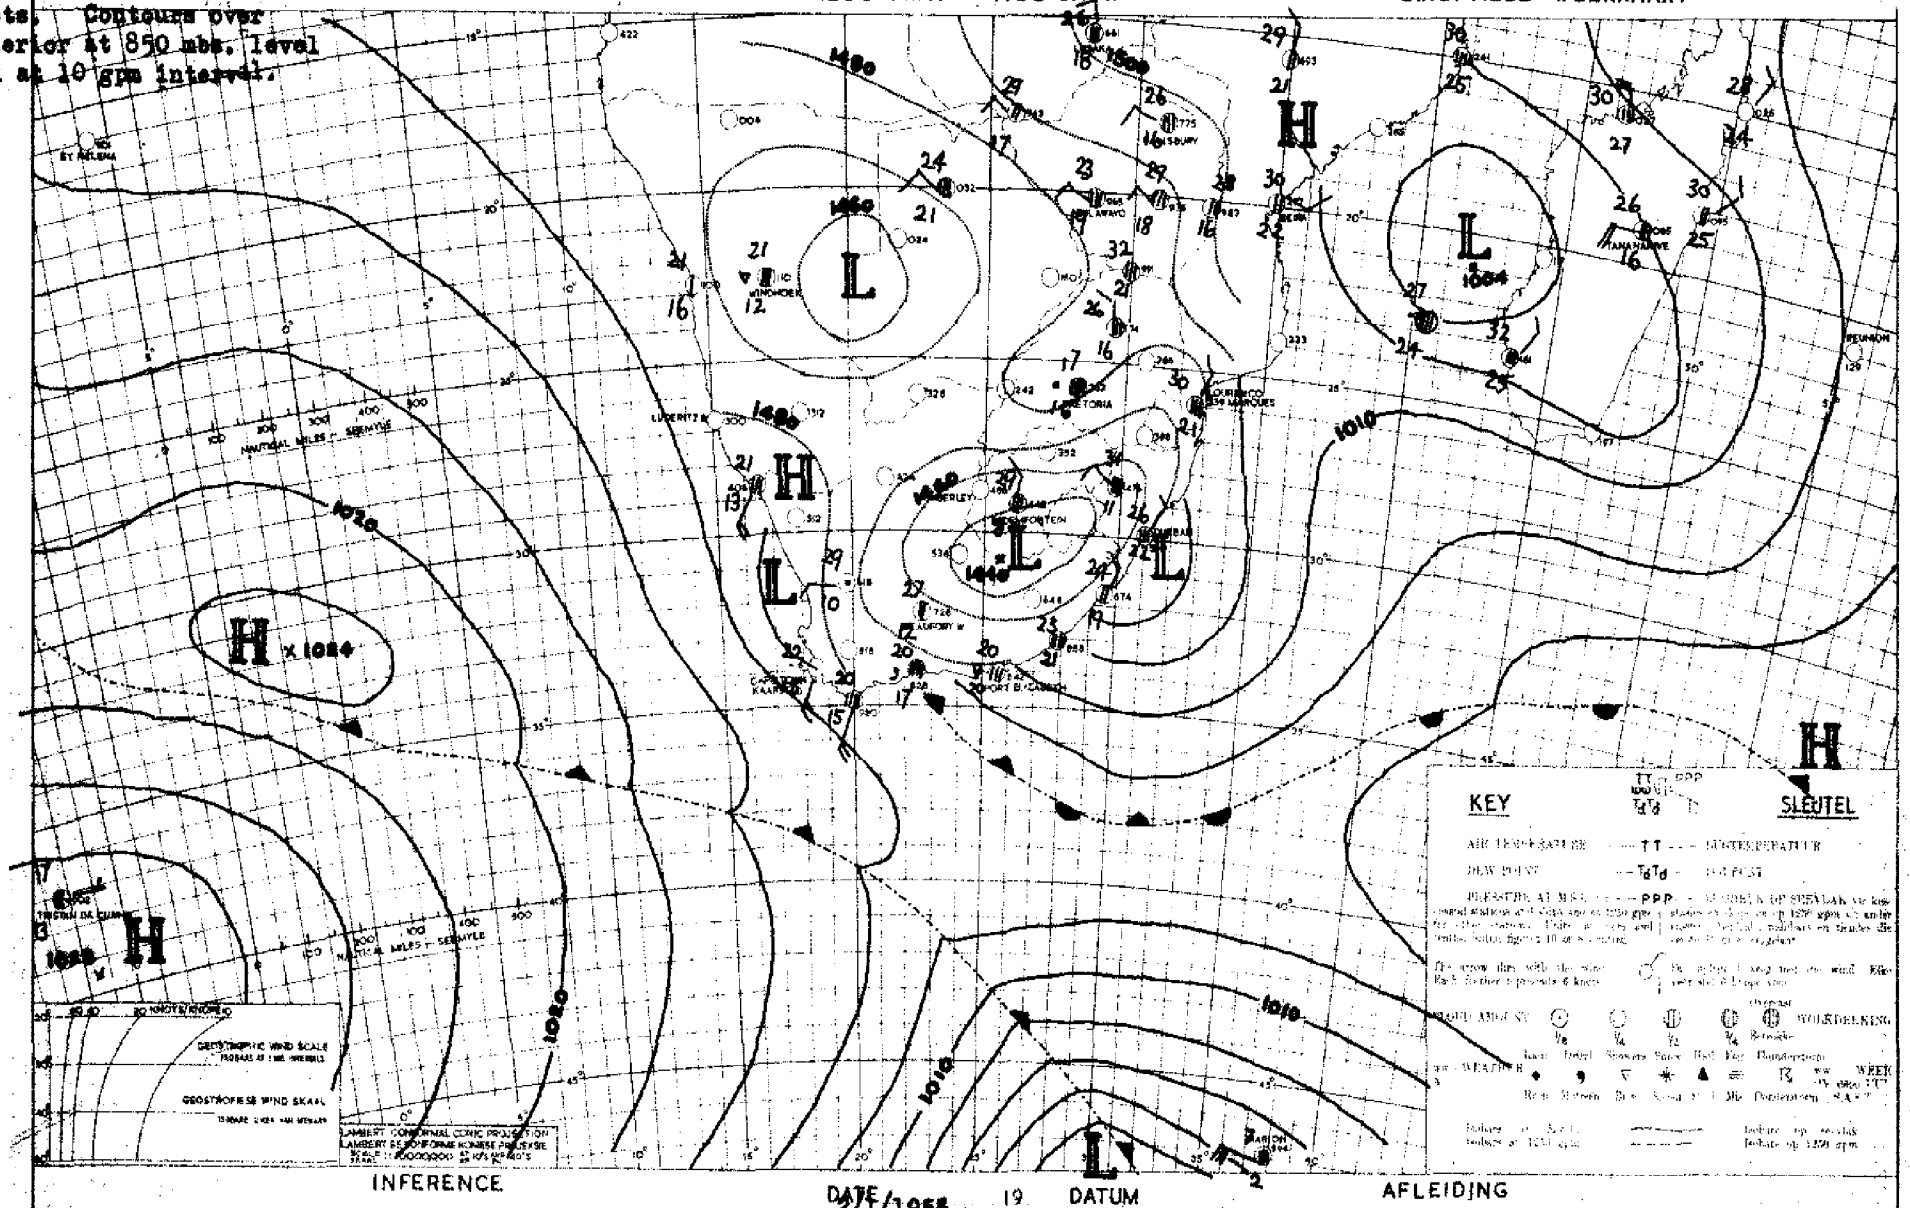
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 2/1/1955 19 DATUM AFLEIDING

Warm humid air has invaded the Transvaal from the north and northwest. Cloudy to overcast weather will occur over most of the Transvaal and continuous rain can to expected over the western half of the Province. Over the Free State, Natal and the Cape coastal regions the weather will also be cloudy. Local light rain will occur along the coast and thundershowers will develop over the interior.

Warm, vogtige lug het Transvaal vanuit die noorde en noordweste binnegestroom. Bewolkte tot betrokke weerstoestande gepaard met aanhoudende reëns sal oor die westelike helfte van die Provinsie voorkom. Oor die Vrystaat, Natal en die Kaapse kuststreke sal dit ook bewolk wees. Plaaslike buie sal langs die kuststreke voorkom en donderweer sal oor die binneland ontwikkel.

Maksimum en Minimum Temperature (°C) en Reënval (mas.) vir die 24uur wat om 0800 (SAST) eindig op 4/1/1955

INFERENCE

DATE 4/1/1955 DATUM

AFLEIDING

Drier air from the west is moving towards the Union interior and it is expected that fair to fine weather will prevail over the western half of the Union. Over the eastern half the weather will still be cloudy and local rain or thunderstorms will still occur over most districts.

Droër lug vanuit die weste beweeg na die Unie binneland en dit word verwag dat effens bewolkte of mooiweerstoestande oor die westelike helfte van die Unie sal heers. Oor die oostelike helfte van dit nog bewolk bly en reën of donderbuie sal nog plaaslik oor meeste distrikte uitsak.

Maksimum en Minimum Temperature (°C) en Reënval (mms.) vir die 24-uur wat om 0800 (SAST) eindig op **6/1/1955**

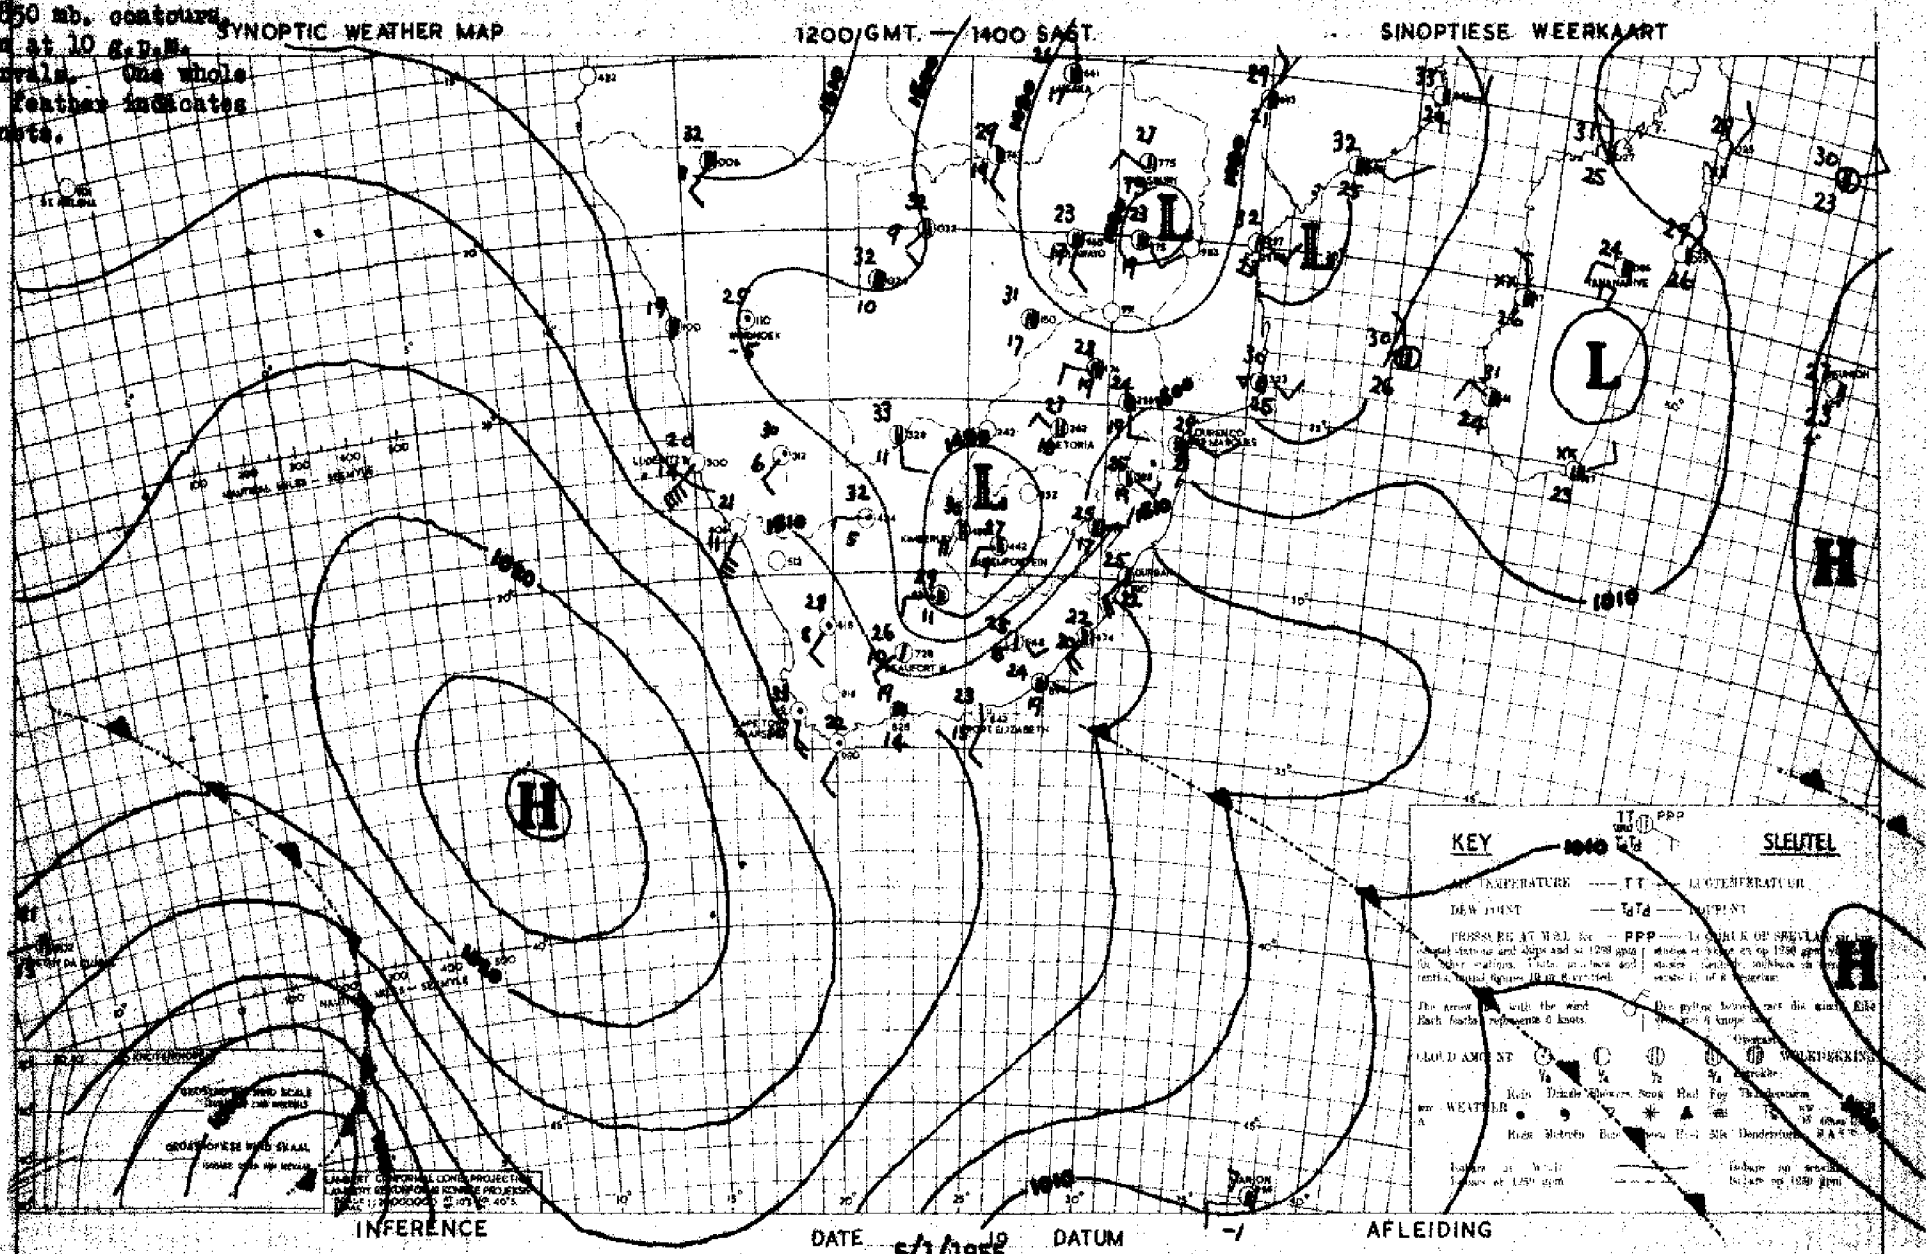
Contours over the Interior are 850 mb. contours, drawn at 10 g.p.m. intervals. One whole wind feather indicates 10 knots.



Little change is expected as regards the coastal areas. Weather will remain cloudy over the SE and E coastal belt, with light local rain. The inland weather is more dependent upon the upper air, and at the moment the upper air is becoming drier from the west, which is unfavourable for precipitation.

Wat die kusstreke betref, word min verandering verwag nie. Oor die suidoostelike en oostelike kusstreke sal dit bewolk bly, met plaaslike ligte reën. Die weer oor die binneland is meer van die bolug afhanklik en op die oomblik word die bolug droër vanuit die weste, wat ongunstig is vir neerslag.

Maksimum en Minimum Temperature (°C) en Reënval (mms.) vir die Etmaal wat om 0800 (SAST) eindig op ... 7/1/1955 ...

Drier air is still advancing eastward to the Southwestern Free State and the eastern Cape but over the Transvaal, Natal and the rest of the Free State the air is still moist. Cloudy weather accompanied by local light showers will still occur over the Transvaal, the Northeastern Free State, and Natal, but elsewhere over the Union the weather will be mainly fine.

Droeër lug beweeg nog steeds ooswaarts na die suidwestelike Vrystaat en oos Kaapland , maar oor Transvaal, Natal en die res van die Vrystaat bly die lug nog vogtig. Bewolkte weer gepaard met ligte namiddag reën of donderbuie sal plaaslik oor Transvaal, Natal en die Noordoostelike distrikte van die Vrystaat. Elders oor die Unie sal dit hoofsaaklik mooiweer

Maksimum en Minimum Temperature (°C) en Reënval (mms.) vir die 24maal wat om 0800 (SAST) eindig op **8/1/1955**

INFERENCE

DATE 8/1/1959 DATUM

AFLEIDING

As humid air is still circulating over the Transvaal and Natal province, cloudy weather associated with local afternoon thunderstorms will still prevail over these areas. Over the remainder of the Union, the intrusion of dry air from the west causes stable weather conditions, but as pressures are expected to rise along the east coast within forty-eight hours, the eastward movement of dry air will be checked.

Aangesien vogtige lug nog oor Transvaal en Natal sirkuleer, sal bewolkte weer gepaard met los namiddag donderbuie nog oor hierdie provinsies voorkom. Die res van die Unie word deur droë lugstrome vanuit die weste beheer en dus sal bestendige weerstoestande oor die streke voorkom. Na verwagting sal drukke binne 48 uur langs die oostkus styg en sal dus [illegible]

Maksimum en Minimum Temperature (°C) en Reënval (mms.) vir die 24 uur wat om 0800 (SAST) eindig op 10/1/1955

As a result of the eastward movement of the anticyclone south of the Union, the cool moist sea air which today reached the SE Cape and Natal, will invade the Transvaal tomorrow.

As gevolg van die oostwaartse beweging van die antisikloon suid van die Unie, sal die koel, vogtige seelug wat vandag SO-Kaapland en Natal bereik het, môre die Transvaal instroom.

A cold front approaches the Cape from the southwest. Prior to its arrival temporary cloudy and rainy weather will occur along the Cape coastal regions. It will remain cloudy over the north-eastern Union, and local thunderstorm development will continue. Over the remainder of the Union the weather will be fine.

'n Koue front nader die Kaap vanuit die suidweste, maar voordat dit die Kaap bereik sal bewolkte, buierige weer van tydelike aard langs die kusstreke van Kaapland voorkom. Oor die noordoostelike dele van die Unie sal dit nog bewolk bly en die ontwikkeling van plaaslike donderstorms sal bly voortduur. Oor die res van die Unie sal dit mooiweer bly.

Maksimum en Minimum Temperature (°C) en Reënval (mms.) vir die 24maal wat om 0800 (SAST) eindig op 12/1/1955

There is a trough lying SSE of the Union, of which the northern part will move eastwards. As a result of this, the sea-air which is at the moment coming in over the coastal regions of south and southeast Cape and Natal will reach the eastern Transvaal lowveld tomorrow.

'n Trog 18 SSE van die Unie, waarvan die N-like deel oostwaarts beweeg. As gevolg hiervan sal die seelug wat op die oomblik oor die kuststreke van suid- en oos-Kaapland instroom môre die O-like laeveld van Transvaal bereik.

Maksimum en Minimum Temperature (°C) en Reënval (mm.) vir die 24maal wat om 0800 (SAST) eindig op 13/1/1955..... Maximum and Minimum Temperatures (°C) and Rainfall (mm.) 24 hours ending at 0800 (SAST) on

Cooler and much drier air is spreading northeastwards over the Union and will reach the Transvaal border by tomorrow. The old humid air which existed over the Transvaal will, however, still be present tomorrow, and cloudy weather associated with afternoon thunderstorms will still prevail tomorrow. Cloudy conditions accompanied with local [illegible] will occur over Natal and the southeast Cape coastal areas.

Koeler en baie droër lug beweeg noordooswaarts oor die Unie en behoort teen môre die Transvaal grense te bereik. Die ou vogtige lug wat vir die laaste paar dae oor Transvaal gesirkuleer het sal egter nog oor hierdie provinsie teenswoordig wees en bewolkte toestande gepaard met verspreide namiddag donderbuie sal nog voorkom. Bewolkte toestande met plaaslike ligte buie of motreën sal tydelik oor Natal en die kuststreek van Suidoos

The anticyclone SSW of the Union is moving eastwards, but very slowly. Weather along the south coast will be fair tomorrow, but cloudy conditions will persist over the SE and coastal districts. Meanwhile, however, the upper air is becoming drier, and precipitation will probably be confined to the eastern escarpment of the Union.

Die antisikloon SSW van die Unie beweeg ooswaarts, maar baie stadig. Langs die Suidkus sal dit môre redelik mooiweer word, maar sal bewolkte toestande aanhou oor die suidoostelike en oostelike kusstrokke. Intussen egter word die bolug droër en neerslag sal waarskynlik tot die Unie se oostelike plato-rand beperk word.

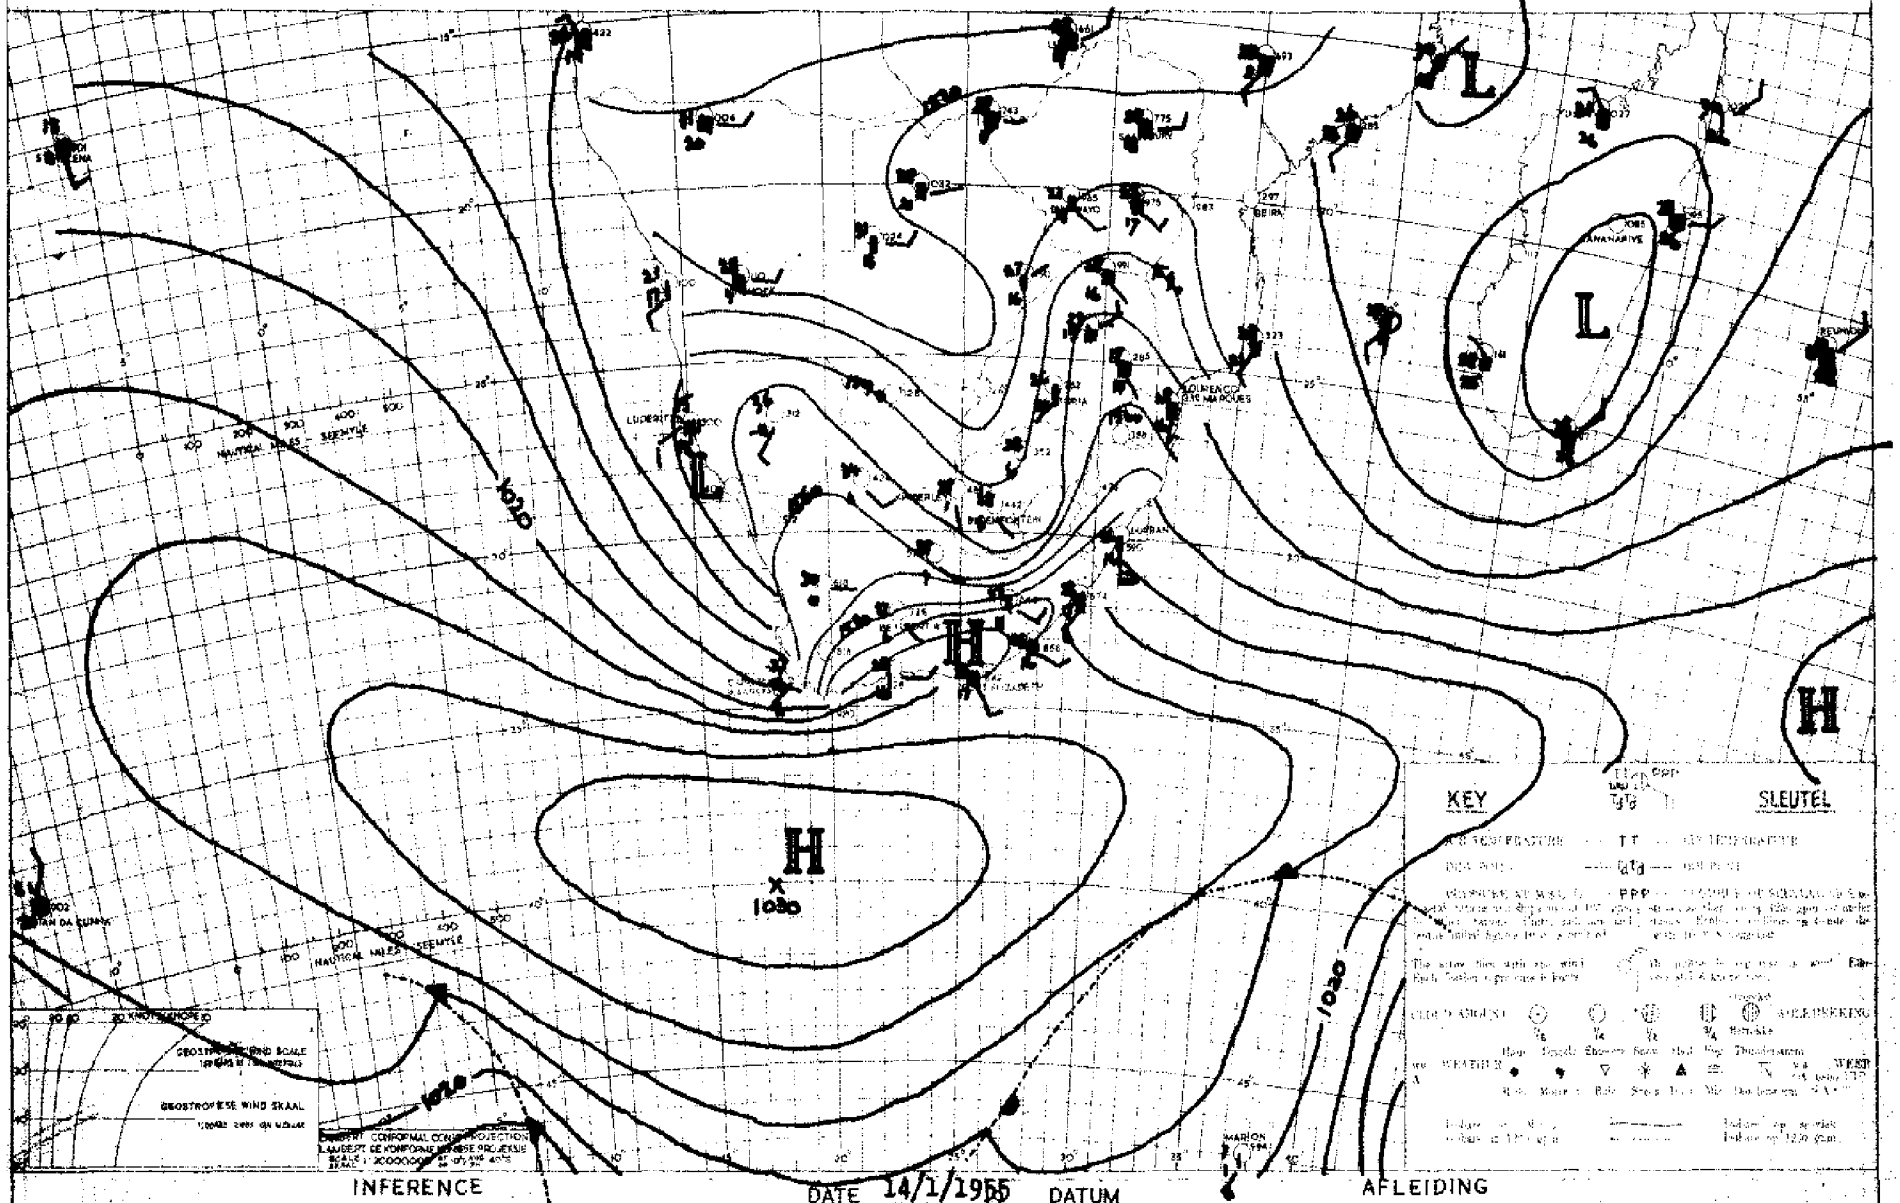
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 14/1/1955 DATUM AFLEIDING

A high pressure area south of the Cape influences the air circulation over most of the Union. Cooler and much drier air has been forced northwards the Limpopo. Cloudy weather will still occur over Natal and the Transvaal and thunderstorm development will still take place over the western Transvaal. Elsewhere over the Union it will be mainly fine.

'n Sel van hoë druk suid van die Kaap beïnvloed die lug sirkulasie oor die grootste gedeelte van die Unie. Koeler en baie droër lug word noordwaarts na die Limpopo gedryf. Bewolkte weerstoestande sal nog oor Natal en Transvaal voorkom en donderweersontwikkeling sal oor wes Transvaal plaasvind. Elders oor die Unie sal dit hoofsaaklik mooiweer wees.

Maksimum en Minimum Temperature (°C) en Reënval (mms.) vir die 24 uur wat om 0800 (SAST) eindig op **16/1/1955**

Little change is expected. The anticyclone SE of the Union will move eastwards, with the result that the showery weather over the Natal coastal area will clear. At the same time the influence of the Atlantic High will strengthen somewhat, and partly cloudy weather along the south coast is probable.

Min verandering word verwag. Die antisikloon SE van die Unie sal ooswaarts beweeg, met die gevolg dat die buierige weer oor Natal se kusstreke sal opklaar. Terselfdertyd sal die invloed van die Atlantiese Hoog ietwat versterk word en gedeeltelik bewolkte weer langs die suidkus is waarskynlik.

Maksimum en Minimum Temperature (°C) en Reënval (mms.) vir die 24uur wat om 0800 (SAST) eindig op **17/1/1955**

The depression south of the Union has caused a noticeable coastal low over the Cape Peninsula; and as a result of its eastward movement cloudy weather will extend along the sout coast tomorrow.

Die depressie suid van die Unie het 'n waarneembare kuslaag oor die Kaapse Skiereiland veroorsaak en as gevolg van die oostwaartse beweging daarvan sal bewolkte weer môre langs die suidkus uitbrei.

INFERENCE

DATE 18/1/1955

DATUM

AFLEIDING

Upper air conditions are at present favourable for light rain and thunderstorm development over the western, southwestern, southern and Central Union interior. Local thunderstorms will also develop over the southern half of the Transvaal. Cloudy weather and local light showers will also occur along the south and southeast Cape coast.

Bolug toestande is op die oomblik gunstig vir ligte reën en donderbuie oor die westelike, suidwestelike, suidelike en sentrale binneland van die Unie. Plaaslike donderbuie sal oor die suidelike helfte van Transvaal ontwikkel. Bewolkte weer gepaard met plaaslike ligte buie sal ook langs die suid en suidoos kus van Kaapland voorkom.

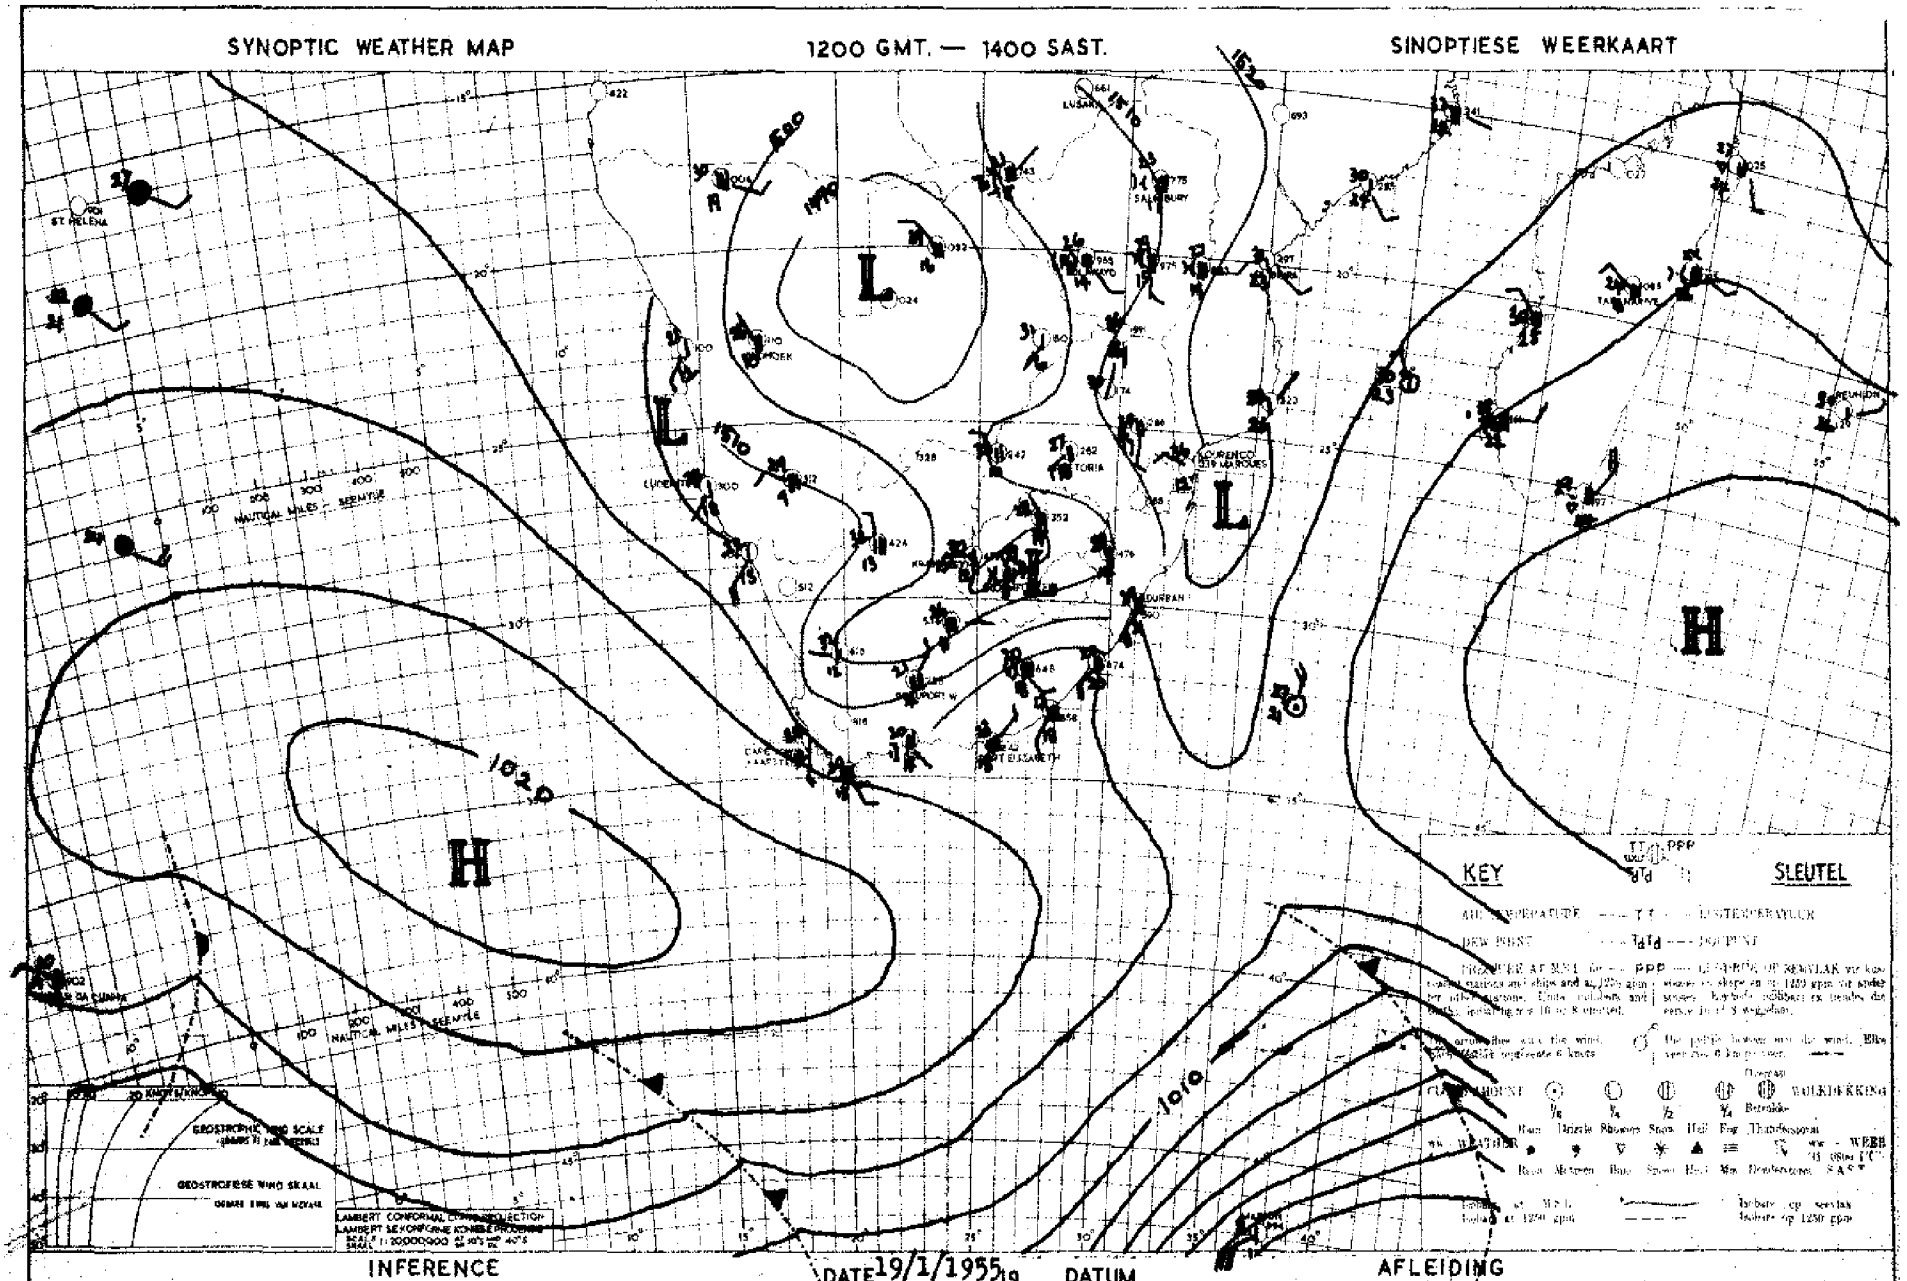
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 19/1/1955 DATUM AFLEIDING

The Atlantic High is slowly moving over the Southern Cape coasts and slowly weather will continue. Pressure tendencies indicate that there will be little change over the rest of the Union and thunderstorms will occur over the Cape interior, over the Free State, Transvaal and Natal.

Die Atlantiese Hoog beweeg stadig oor die suidelike kuststreke van Kaapland. Drukneiging dui ook aan dat daar min verandering oor die res van die Unie sal wees. Donderstorms sal voorkom oor die binneland van die Kaapprovinsie, oor die Vrystaat, Natal en Transvaal.

Maksimum en Minimum Temperature (°C) en Reënval (mms.) vir die 24maal wat om 0800 (SAST) eindig op 21/1/1955.....

Maximum and Minimum Temperatures (°C) and Rainfall (mms.) 24 hours ending at 0800 (SAST) on

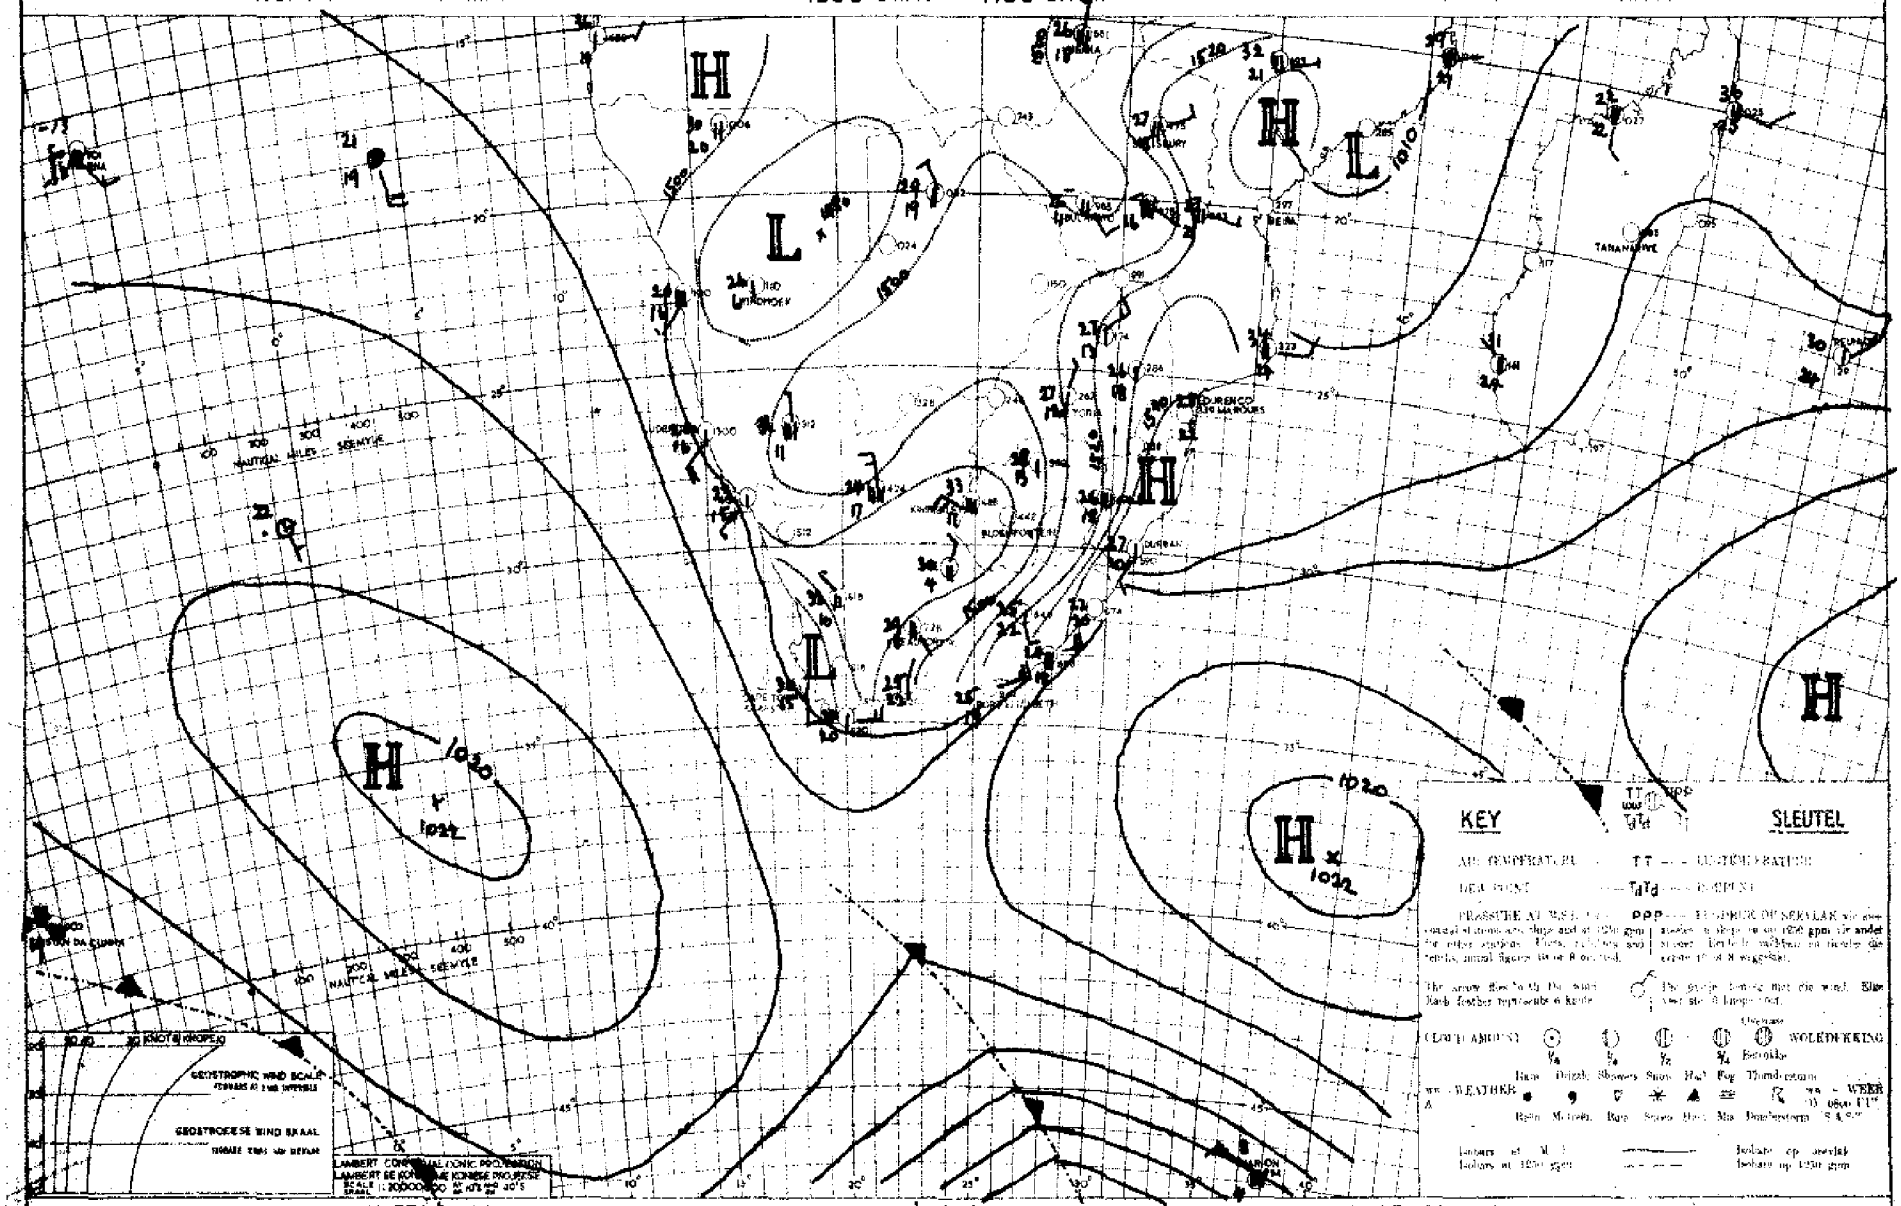
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 20/1/1965 DATUM AFLEIDING

The high pressure ridge over the Eastern Union is rapidly weakening and a low pressure area is expected to develop along the southeast coast by tomorrow. Cooler Atlantic air will therefore invade the southwestern and southern coastal areas, and consequently temporary cloudy conditions will still occur. Over the interior cloudy weather will still occur over most areas due to favourable upper air conditions, and scattered afternoon thunderstorms will develop. It will be mainly fine along the Transkei

Die rug van hoë druk oor die Unie verswak vinnig en 'n lae druk gebied sal langs die suidoos kus ontwikkel. Koeler Atlantiese lug sal dus oor die suidwestelike en suidelike kusstreke van Kaapland instroom en bewolkte toestande sal tydelik voorkom. Oor die binneland sal dit weens gunstige bolug toestande, bewolk wees en verspreide donderbuie sal gu-

gedurende die namiddag ontwikkel. Langs die Transkei sal Nata

PRESSURE AT M.S.L. in —— PPP —— LUGDRUK OP SEEVLAK in koste stasies en skepe in dekade op 1200 gmt vir ander stasies. Honderde millibars en tiendes die eerste twee syfers weggelaat.

The arrow flies with the wind. Each feather represents 10 knots. Die pyltjie beweeg met die wind. Elke veer stel 10 knope voor.

CLOUD AMOUNT Overcast WOLKDEKKING Betrokke

WEATHER Rain Drizzle Showers Snow Hail Fog Thunderstorm WEER

Isobars at M.S.L. —— Isobare op seevlak

Isobars at 1250 gpm ---- Isobare op 1250 gpm

INFERENCE DATE 21/1/1959 DATUM AFLEIDING

Rising pressure along the south coast indicate that a cell of high pressure will develop along the south or southeast coast tomorrow. Westerly upper winds over the Cape are introducing dry air, but cloudy conditions will persist over Eastern Cape and the three northern provinces and scattered showers are likely.

Stygende drukke langs die suidkus dui aan dat 'n sel van hoë druk môre langs die suid- of suidooskus aanwesig sal wees. Westelike bowinde voer droë lug in oor die Kaapprovinsie, maar bewolkte weer met verspreide buie sal nog oor die oostelike Kaapprovinsie en die noordelike drie provinsies voorkom.

SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART

'n Nuwe hoogdruk sisteem het oor die suidwestelike Indiese Oseaan ontwikkel, met die gevolg dat warm, vogtige lug weer oor die oostelike en noordelike Unie ingevoer word. Dit sal oor die algemeen bewolk bly oor Natal en Transvaal. Verspreide reën of donderbuie sal oor laasgenoemde provinsie uitsak. Enkele donderstorms sal oor die binneland van Natal ontwikkel. Oor die Vryburg - Mafeking distrikte en oor die noordooste-like dele van die Vrystaat sal dit gedeeltelik bewolk wees en plaaslike

A new high pressure system has developed over the southwestern Atlantic ocean, with the result that warm, humid air is again circulating over the eastern and northern Union. It will generally remain cloudy over Natal and the Transvaal. Scattered rain or thunderstorms will occur over the last mentioned Province. A few thunderstorms will also develop over the Natal interior. Partly cloudy weather will prevail over the districts Vryburg and Mafeking and over the north-eastern

SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART

INFERENCE

An intensifying anticyclone is approaching the Union from the west, while moist air is flowing southwards and westwards over the Union itself. Pressure is falling over the interior and hence conditions are becoming favourable for general cloudiness and widespread rain.

DATE 25/1/1955

DATUM

AFLEIDING

'n Versterkende antisikloon nader die Unie vanaf die weste terwyl vogtige lug suidwaarts en weswaarts beweeg oor die Unie. Die druk daal oor die binneland en gevolglik ontwikkel die toestand gunstig vir algemene bewolkte weer en reën.

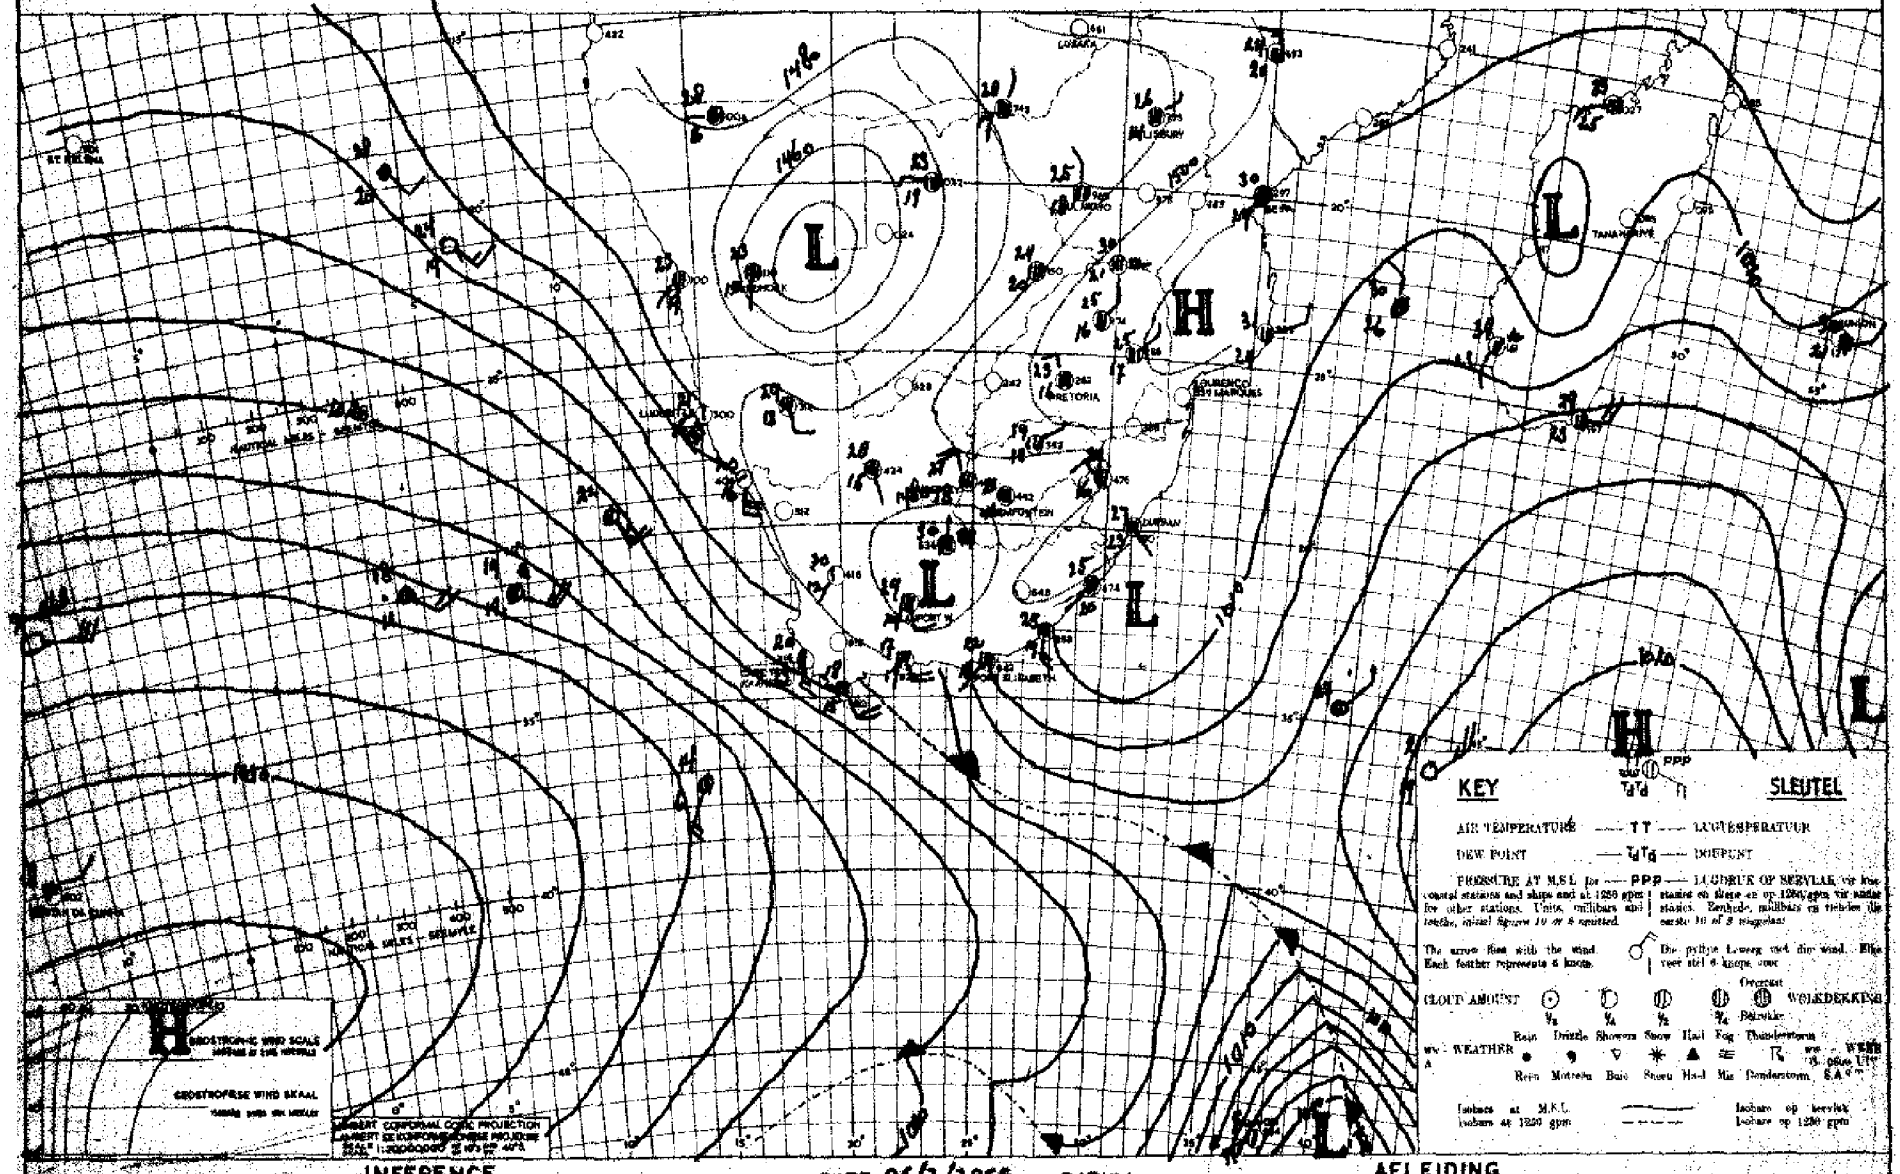
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 26/1/1956 — DATUM — AFLEIDING

The intensive high over the southern Atlantic is extending a strong wedge south of the Union, which by tomorrow will reach the Natal coast. As this wedge will extend at least over the southwestern half of the Cape, the weather will clear over these areas, but over the remainder of the Union it will remain cloudy to overcast with rain or rainshowers.

Die intensiewe hoogdruk oor die Suid Atlantiese Oseaan het 'n uitloper gevorm wat geleidelik langs die suidkus sal op beweeg. Aangesien hierdie uitloper ook teminste die suidwestelike helfte van die Kaap Provinsie sal beïnvloed, sal dit egter bewolk tot betrokke bly en verdere reën of reënbuie sal uitsak.

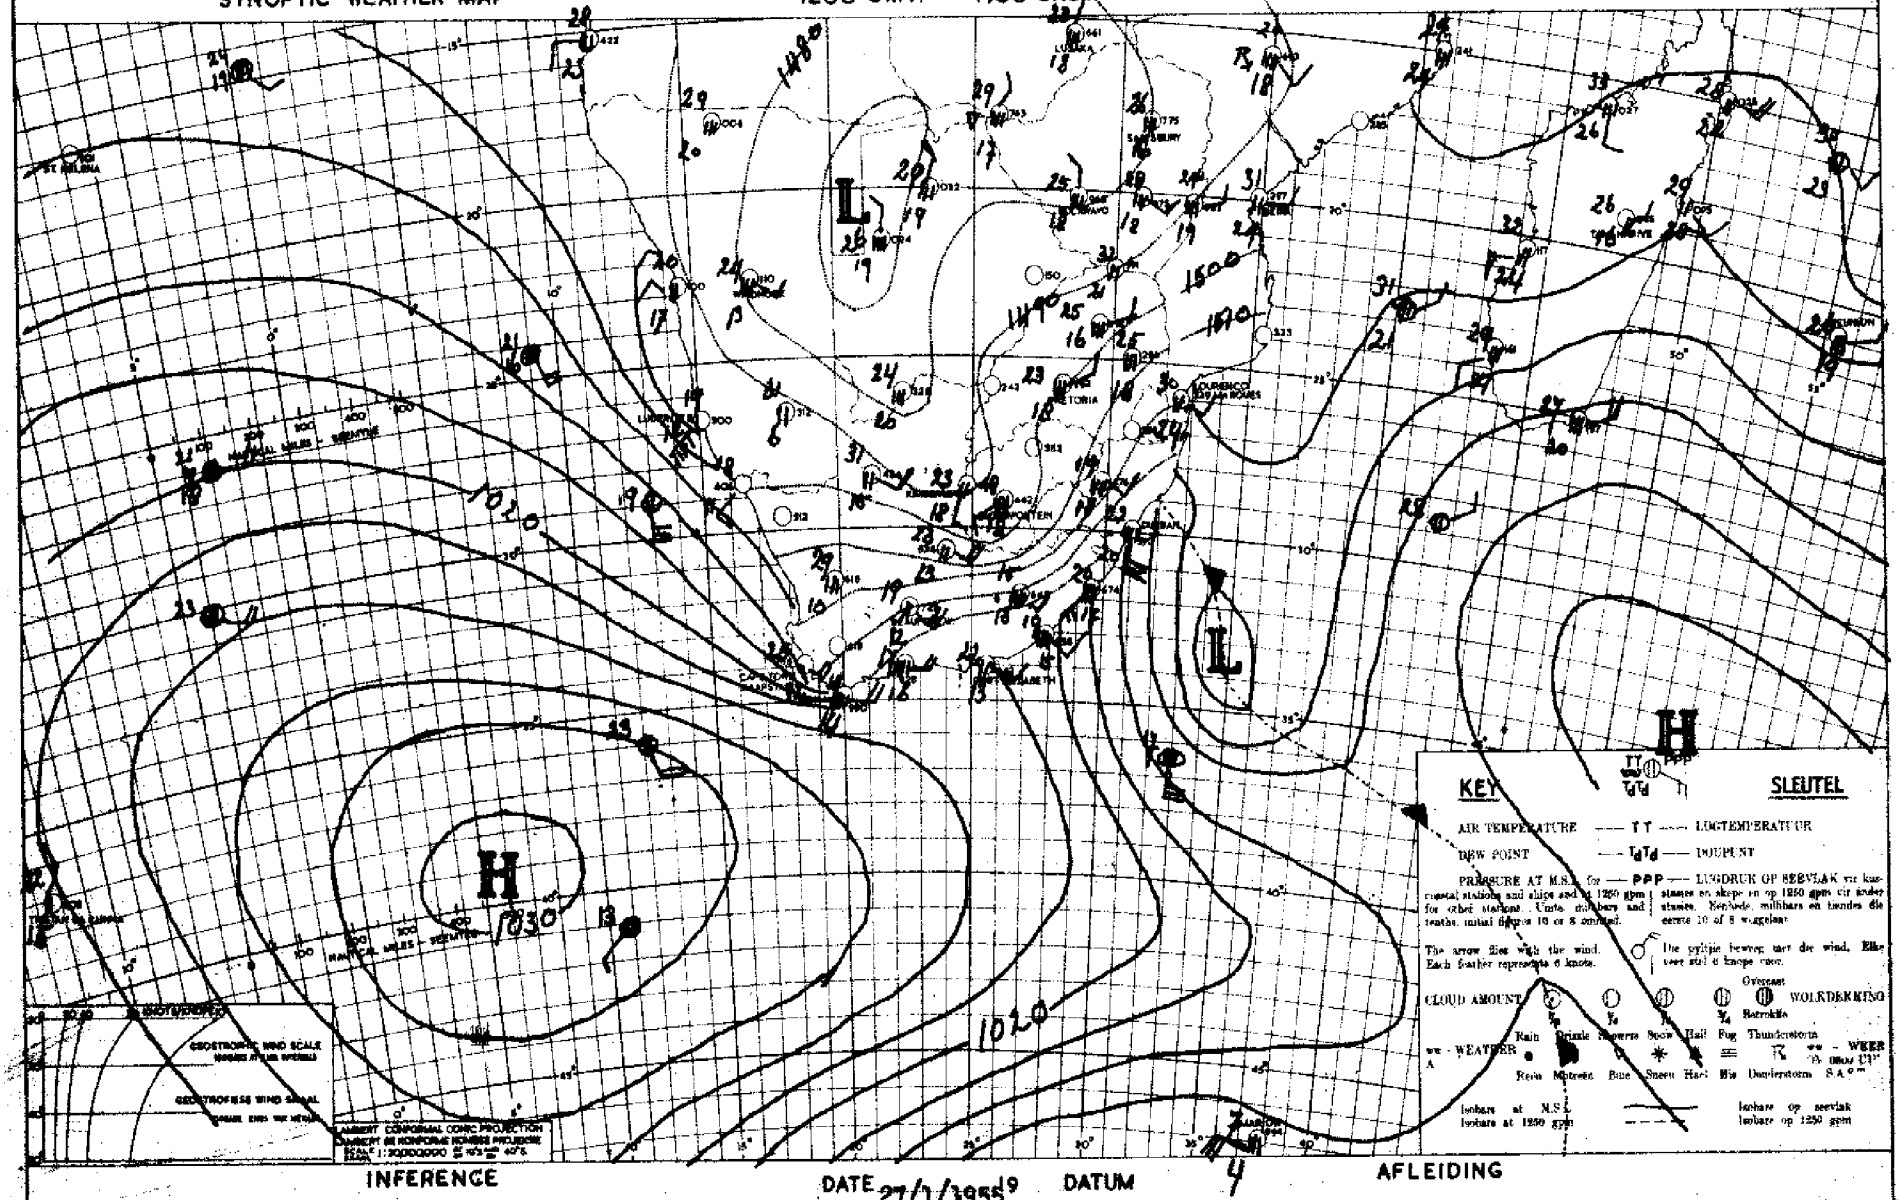
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 27/1/1955 DATUM AFLEIDING

Pressure is rising over the southeast coasts and a seperate high will form. The cooler, humid air will move over the south eastern Cape, Natal and over the eastern Transvaal. Skies will remain cloudy over the eastern half of the Union, but clearing in the west. Showers will continue over Transvaal, the Free State, northern Cape and over Natal.

Lugdrukke styg oor die suidoostelike kuststreke en 'n afsonderlike Hoog sal daar ontwikkel. Die koel, vogtige lug beweeg oor Suidoostelike Kaapland, oor Natal en oor die oostelike Transvaal. Bewolkte toestande sal voortduur oor die oostelike helfte van die Unie, maar in die weste sal dit opklaar. Buie sal voortduur oor Transvaal, die Vrystaat, noord Kaapland en oor Natal.

Meksimum en Minimum Temperature (°C) en Reënval (mms.) vir die 24-uur wat om 0800 (SAST) eindig op 29/1/1955.

AFLEIDING
Cool, moist air is now advancing southwards again to the Cape Province and cloudiness will increase over interior Cape. The elongated belt of high pressure south of the Union will split into two cells and the coastal low along the west coast will slowly move southwards. An upper low over northern S.W. Africa, will, however, maintain rain conditions mostly north of the Orange
Koel, vogtige lug stroom suidwaarts na die Kaapprovinsie weer bewolktheid sal toeneem. 'n Laagdruk stelsel in die hoëdruk oor noordelike Suidwes-Afrika sal reën toestande egter meestal tot noord van die Oranjerivier beperk. Die hoogdruk-gordel suid van die Unie sal in twee verdeel en die kuslaag sal geleidelik suidwaarts beweeg.

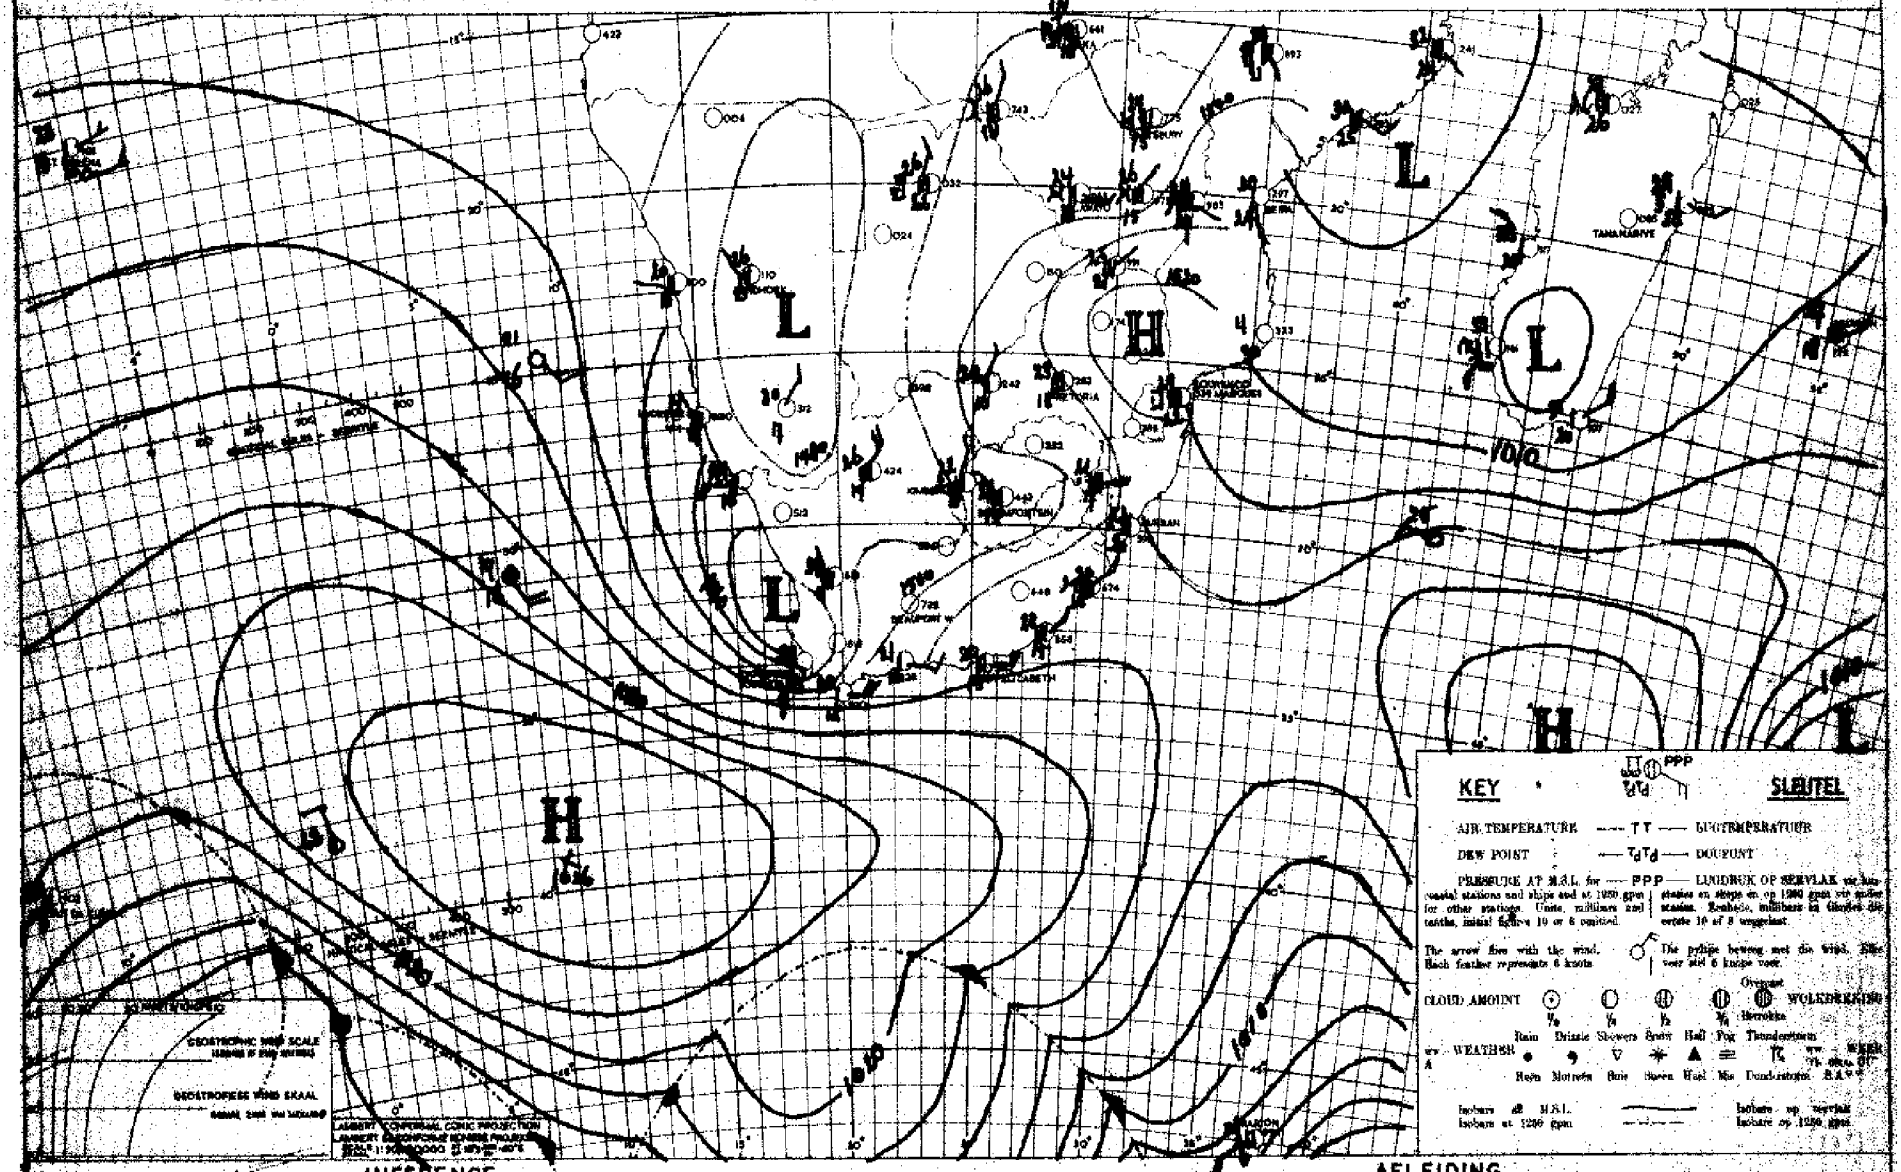
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 20.1.19 DATUM AFLEIDING

A large high pressure system is moving presently from the Atlantic to the Indian Ocean. The pressures over the Central Union will generally be low and will thus favour the influx of equatorial air from the north. Cloudy to overcast weather will generally prevail over the Cape Province, Free State and Natal. Rains will occur over Gardonia, Griqualand West, the Southwestern half of the Free State, Natal and the Transkeian Territories. Transvaal weather will mainly be cloudy and mild.

'n Uitgebreide hoogdruk gebied beweeg geleidelik van die Atlantiese na die Indiese Oseaan. Die Unie binneland is onder die beheer van 'n laagdrukgebied en dus sal warm vogtig lug na die Kaapse binnelande beweeg. Bewolkte tot betrokke weer sal oor Gardonia, Griekwaland Wes, die Suidwestelike helfte van die Vrystaat, Natal en die Transkei gebiede uitsak oor Transvaal sal dit hoofsaaklik bewolk en matig wees.

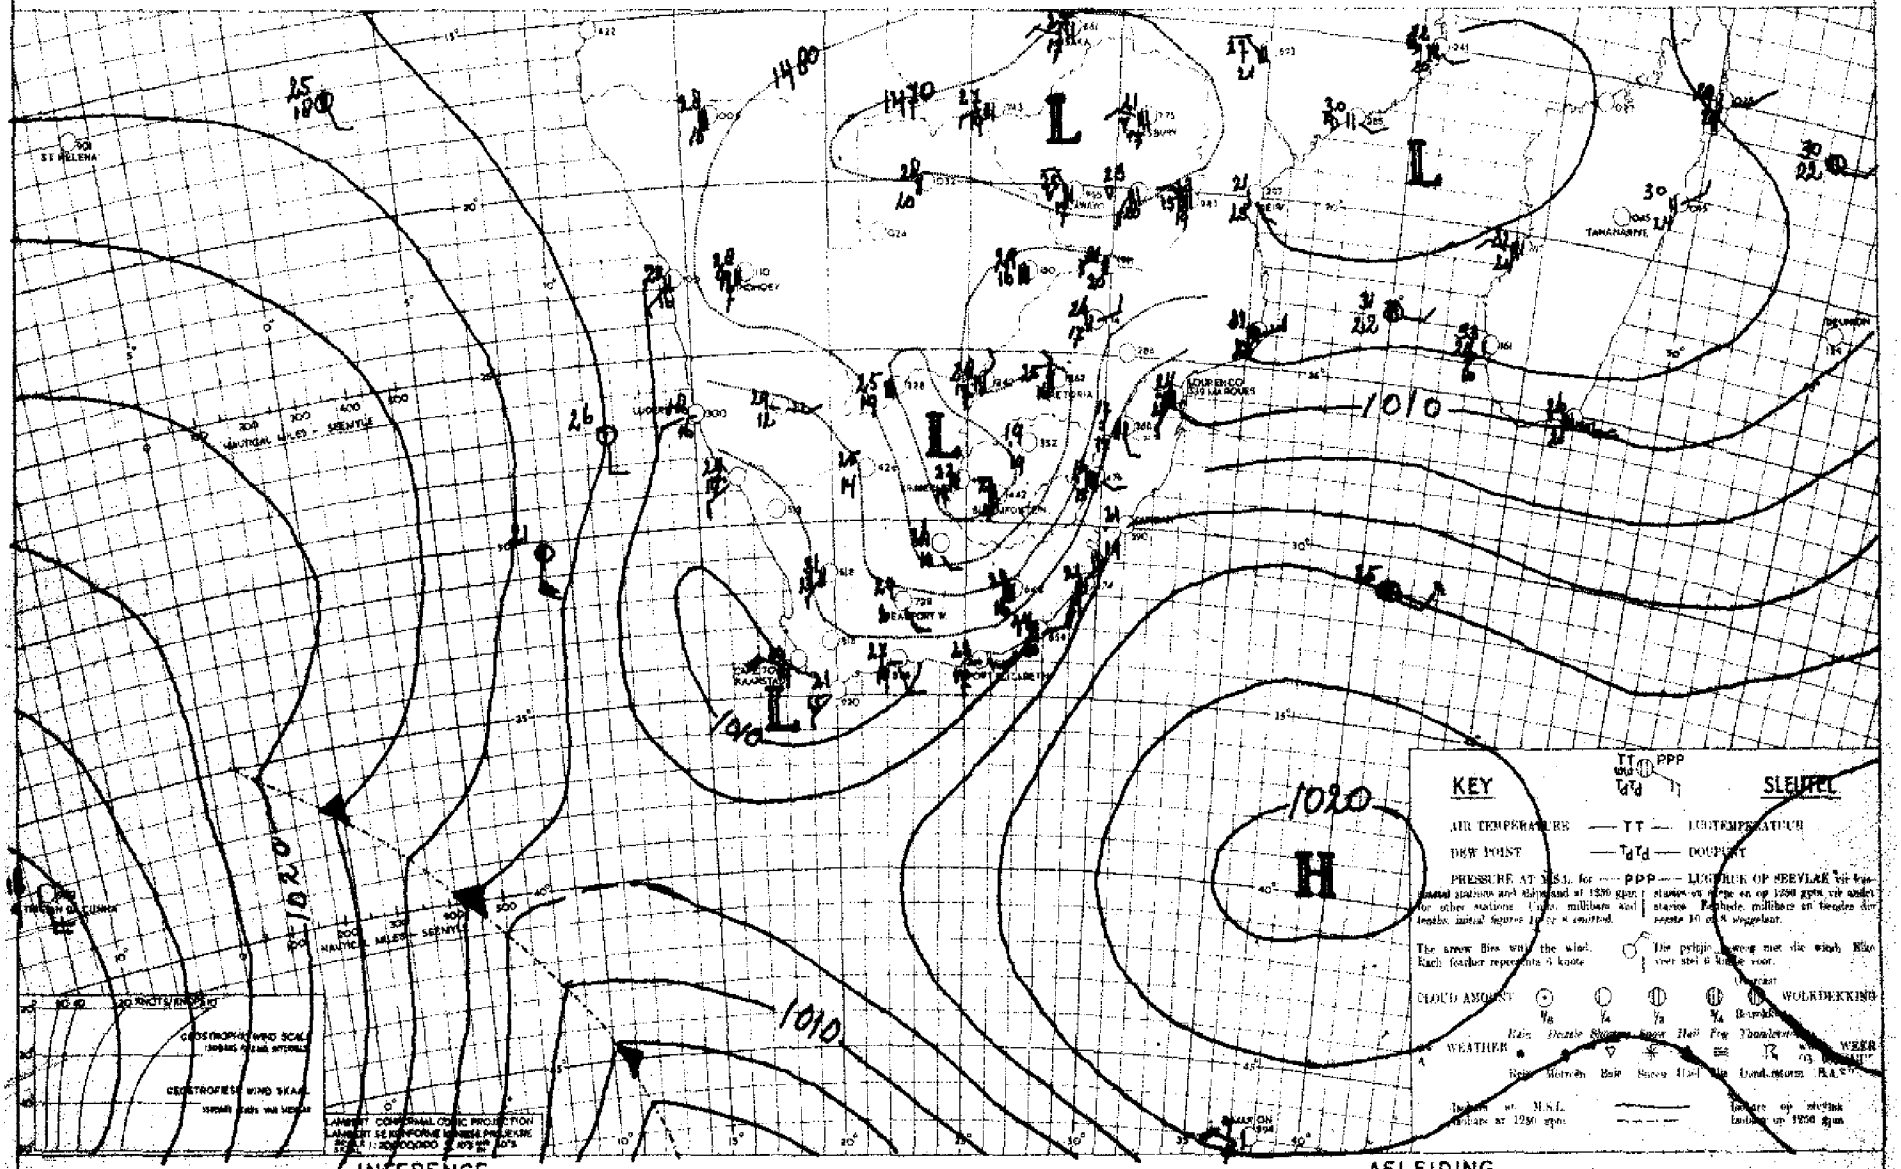
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 31 Jan 19 55 — DATUM — AFLEIDING

The low over the Cape Peninsula will move to the south coast and drier air behind it will move over the Western half of the Union. The air will remain relatively moist over the eastern half of the country and isolated thunderstorms will develop.

Die laag oor die Kaapse Skiereiland sal na die suidelike kuststreke beweeg en droër lug sal oor die westelike helfte van die Unie instroom. Die lug sal egter betreklik vogtig bly oor die oostelike helfte van die land en los donderstorms sal ontwikkel.

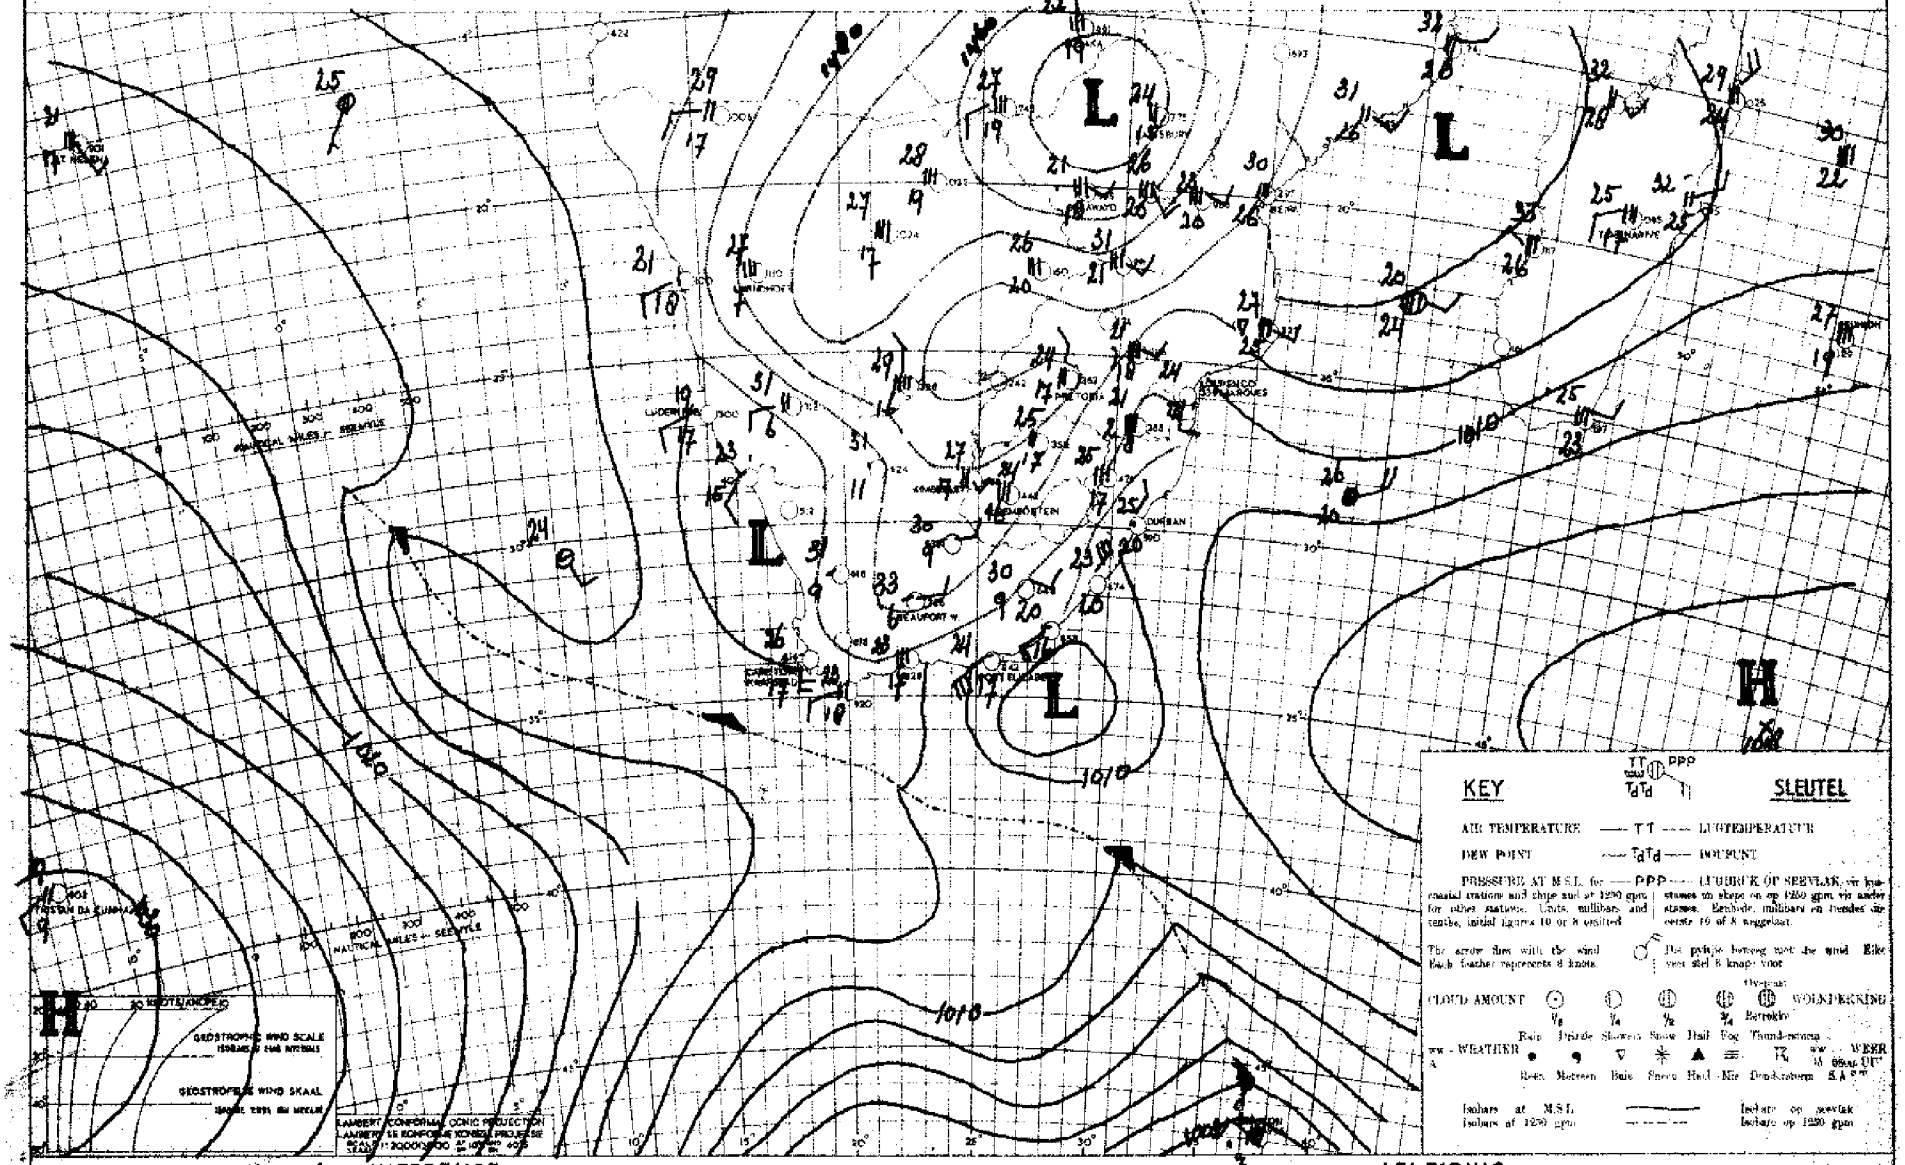
SYNOPTIC WEATHER MAP — 1200 GMT — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 1 — 2 19 55 DATUM — AFLEIDING

An intensive Cyclonic circulation is developing over Southern Rhodesia and with weak gradients along the coastal areas warm humid air will be drawn into the Central Union. Cloudy showery weather will therefore persist over the Transvaal, Free State and Northern Cape. Over the remainder of the Union it will be partly cloudy to fair.

'n Intensiewe siklioniese sirkulasie ontwikkel oor Suid Rhodesië en aangesien drukgradiente lange die kus swak is sal warm vogtige lug diep in die sentrale Unie indring. Bewolkte buierige weerstoestande sal dus oor Transvaal, Noord Kaapland en die Vrystaat bly voortduur. Oor die res van die Unie sal dit gedeeltelik of effens bewolk wees.

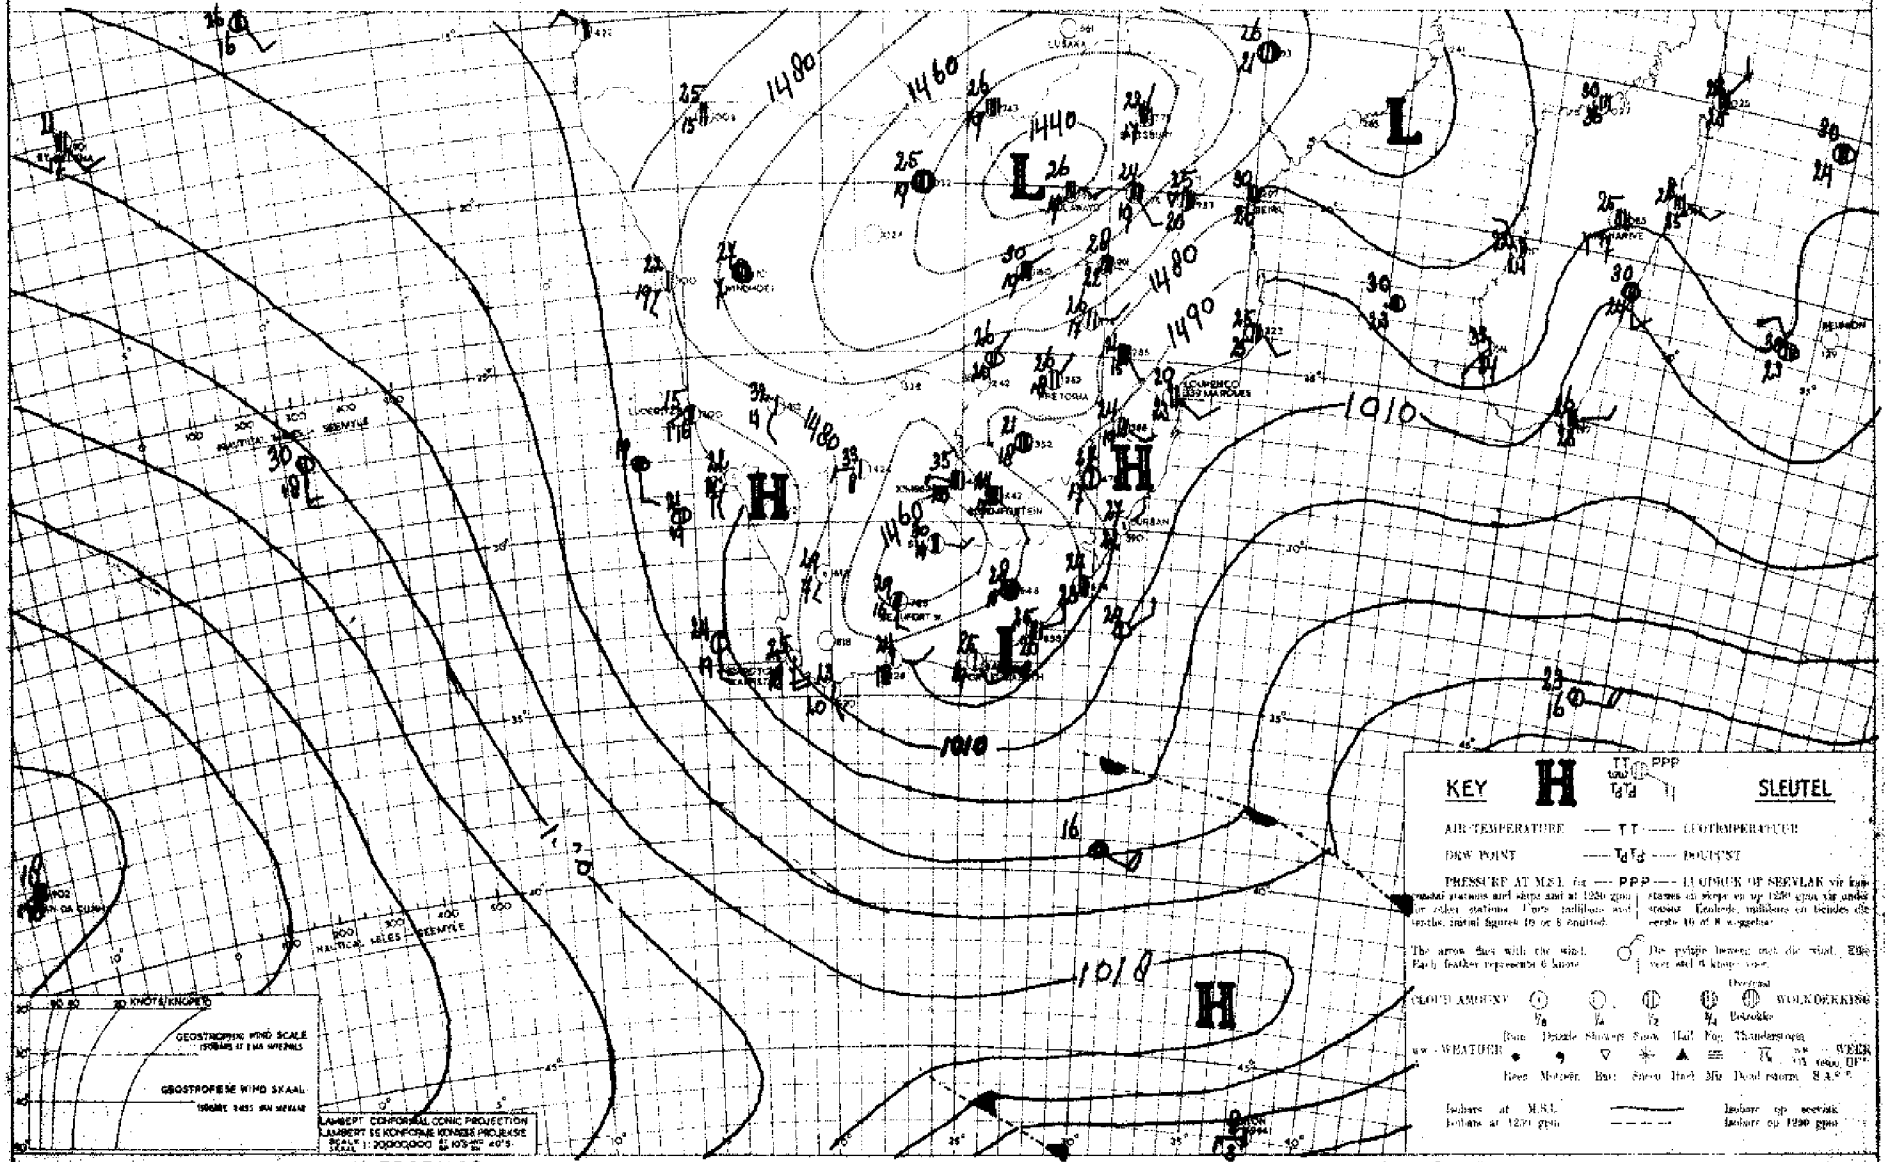
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 2 - 2 19 59 DATUM AFLEIDING

A north-south trough extends centrally over South Africa and humid air is flowing southwards on its eastern side, while drier air is present over Western Cape and South West Africa. This situation will continue and unsettled weather will persist over the Eastern half of the Union. The anticyclone West of the Union is slow moving, but the coastal low will advance to the east coast.

'n Noord-Suid gerigte trog is sentraal oor Suid-Afrika gelê en baie vogtige lug stroom Suidwaarts ten Ooste daarvan terwyl droër lug oor Suidwes-Afrika en Wes-Kaapland aanwesig is. Hierdie toestand sal voortduur en reën sal uitsak oor die Oostelike helfte van die Unie. Die antisiklone Wes van die Unie beweeg langsaam, maar die kuslaag sal na die Oskus beweeg.

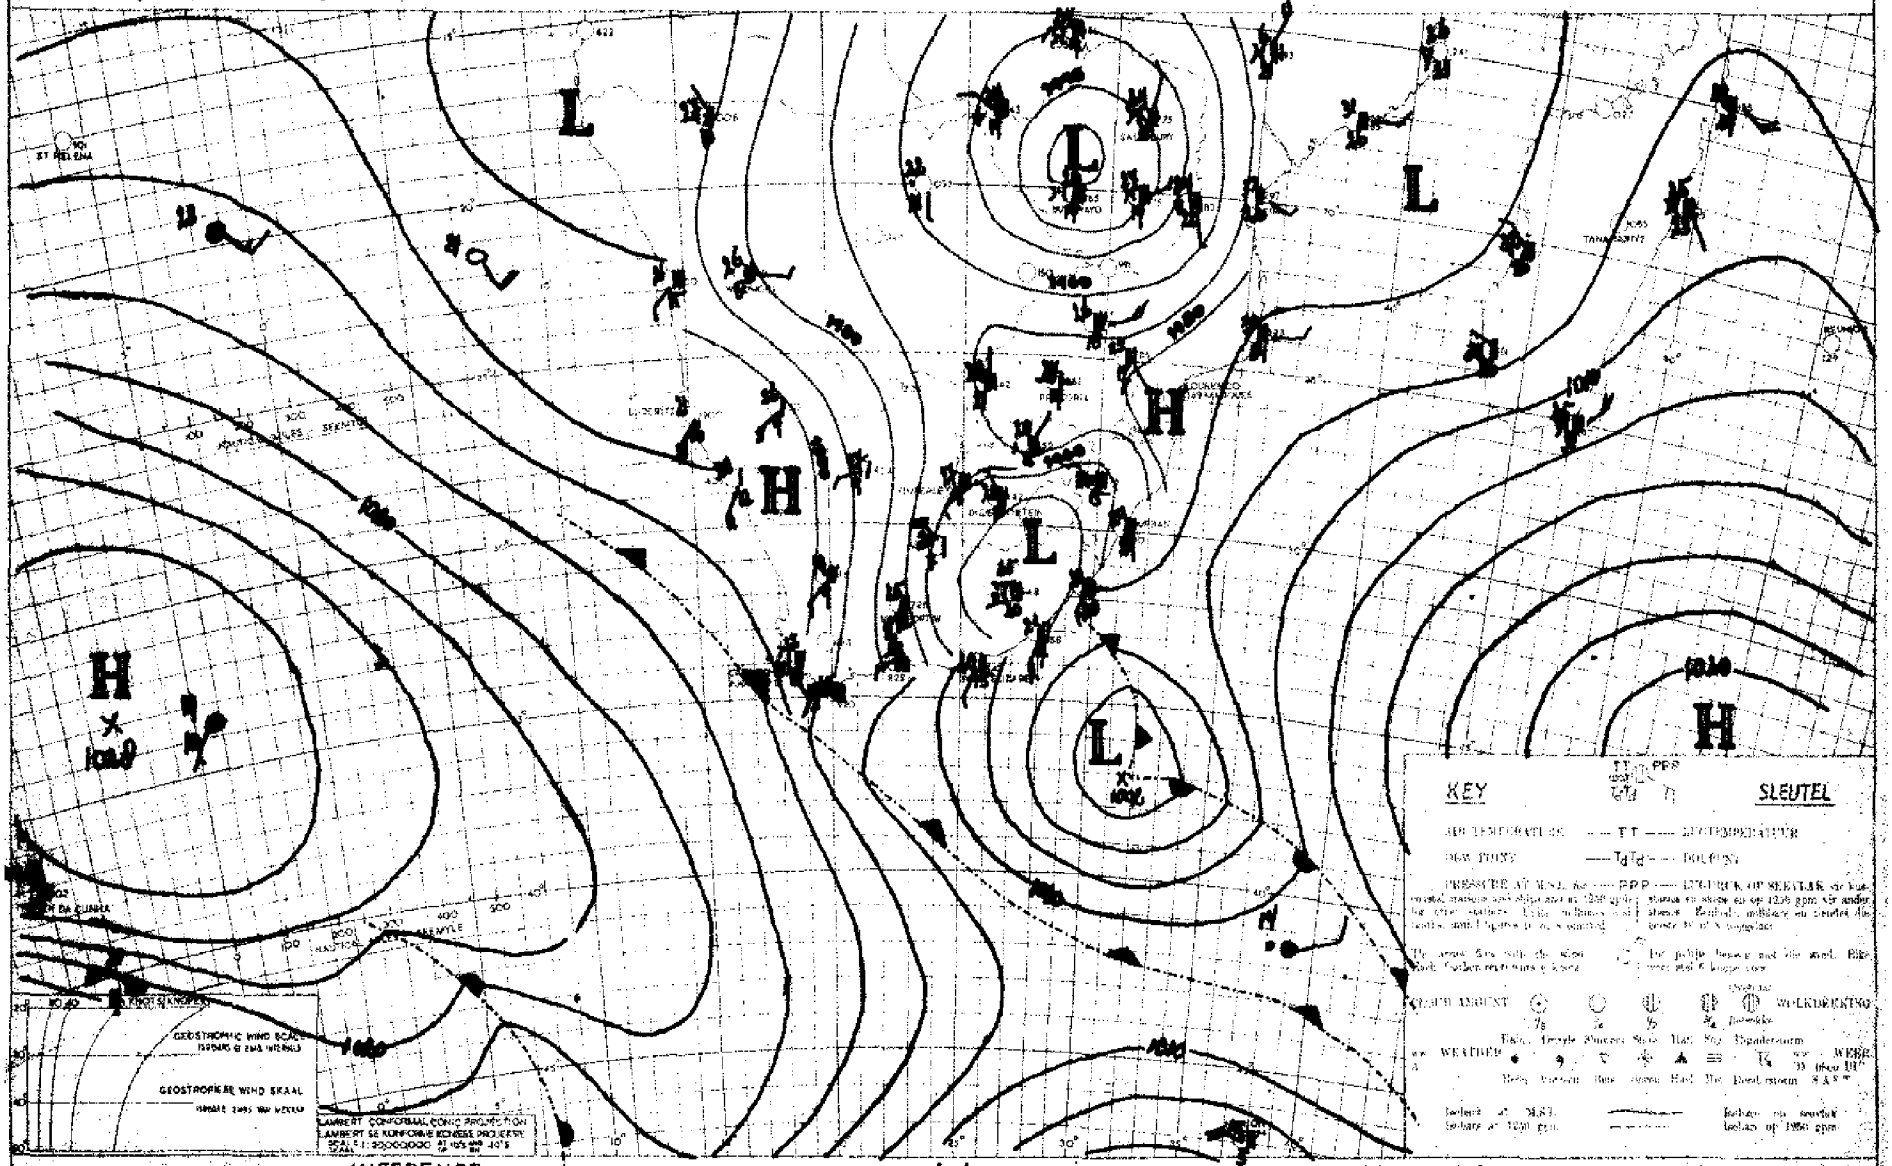
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST SINOPTIESE WEERKAART



INFERENCE DATE 3/2/1955 DATUM AFLEIDING

The southwesterly winds around the depression southeast of Port Elizabeth and around the eastern part of the Atlantic Anticyclone will bring dry cold air over the western half of the Union, and will spread gradually to the remainder of the Union. Cloudy rainy weather will still occur over the Transvaal, Natal and the northern Free State, but elsewhere over the Union it will clear to fair or fine.

Die suidweste winde aan die weste kant van die depressie suidoos van Port Elizabeth en aan die oostekant van die Atlantiese Oseaan sal koue en droër lug oor die suidwestelike helfte van die Unie invoer en sal ook geleidelik na die res van die Unie voort beweeg. Bewolkte buirige weerstoestande sal nog oor Transvaal, Natal en noordoos Vrystaat voorkom, maar elders oor die Unie sal dit effens bewolk of mooiweer word.

Pressure is rising rapidly over the Southeast coasts and cool air will move over Natal and the eastern half of Transvaal. The weather will remain cloudy over the eastern Union and light showers will continue. In the dry air over the western half of the country skies will clear.

Lugdrukke styg vinnig oor die suidoostelike kusstreke en koel lug sal oor Natal en oor die oostelike helfte van Transvaal beweeg. Die weer sal bewolk bly oor die oostelike Unie en ligte buie sal voortduur. In die droë lug oor die westelike Unie sal dit mooiweer wees.

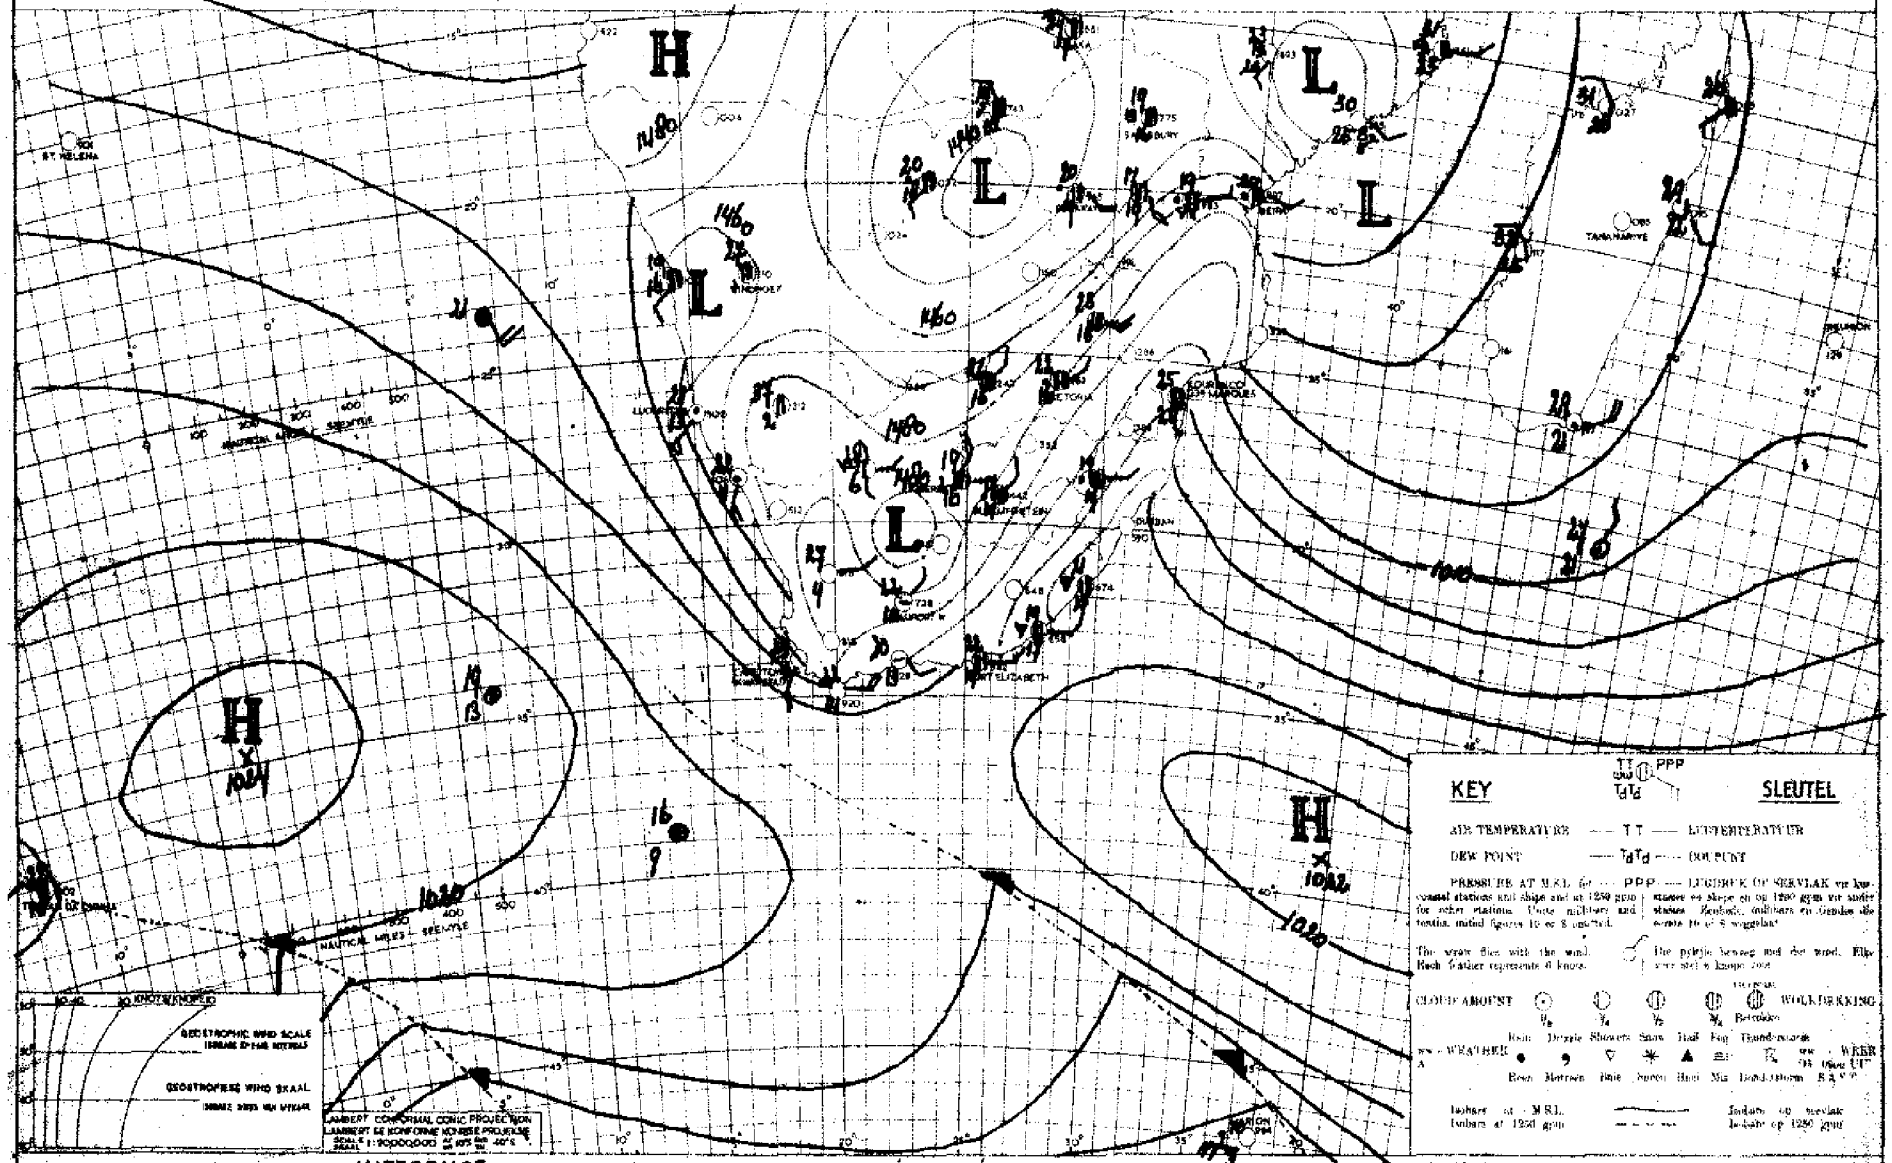
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST — SINOPTIESE WEERKAART



INFERENCE — DATE 5 - 9 - 19 55 — DATUM — AFLEIDING

A ridge of high pressure has been established over the eastern Union and this together with the low pressure region over the Rhodesia's maintains a northeasterly stream of warm humid air over the western half of the Transvaal and the northwestern Free State. Overcast skies associated with rain will occur over these areas. Over the eastern half of Transvaal, the remainder of the Free State and over Natal the weather will be overcast to cloudy and cool with local light rainshowers. Mainly fine elsewhere.

'n Rug van hoë druk het oor die oostelike Unie gevorm en dit tesame met die laagdruk gebied oor die Rhodesiës veroorsaak 'n noordoostelike lugstroom van warm vogtige lug oor die weste-

like helfte van die Unie en oor noordwes Vrystaat. Betrokke reënerige weerstoestande sal dus oor hierdie strake voorkom. Oor die res van Transvaal en Vrystaat en oor Natal sal dit be- wolkte tot betrokke en koel en buierig weer. Elders hoofsaaklik mooiweer.

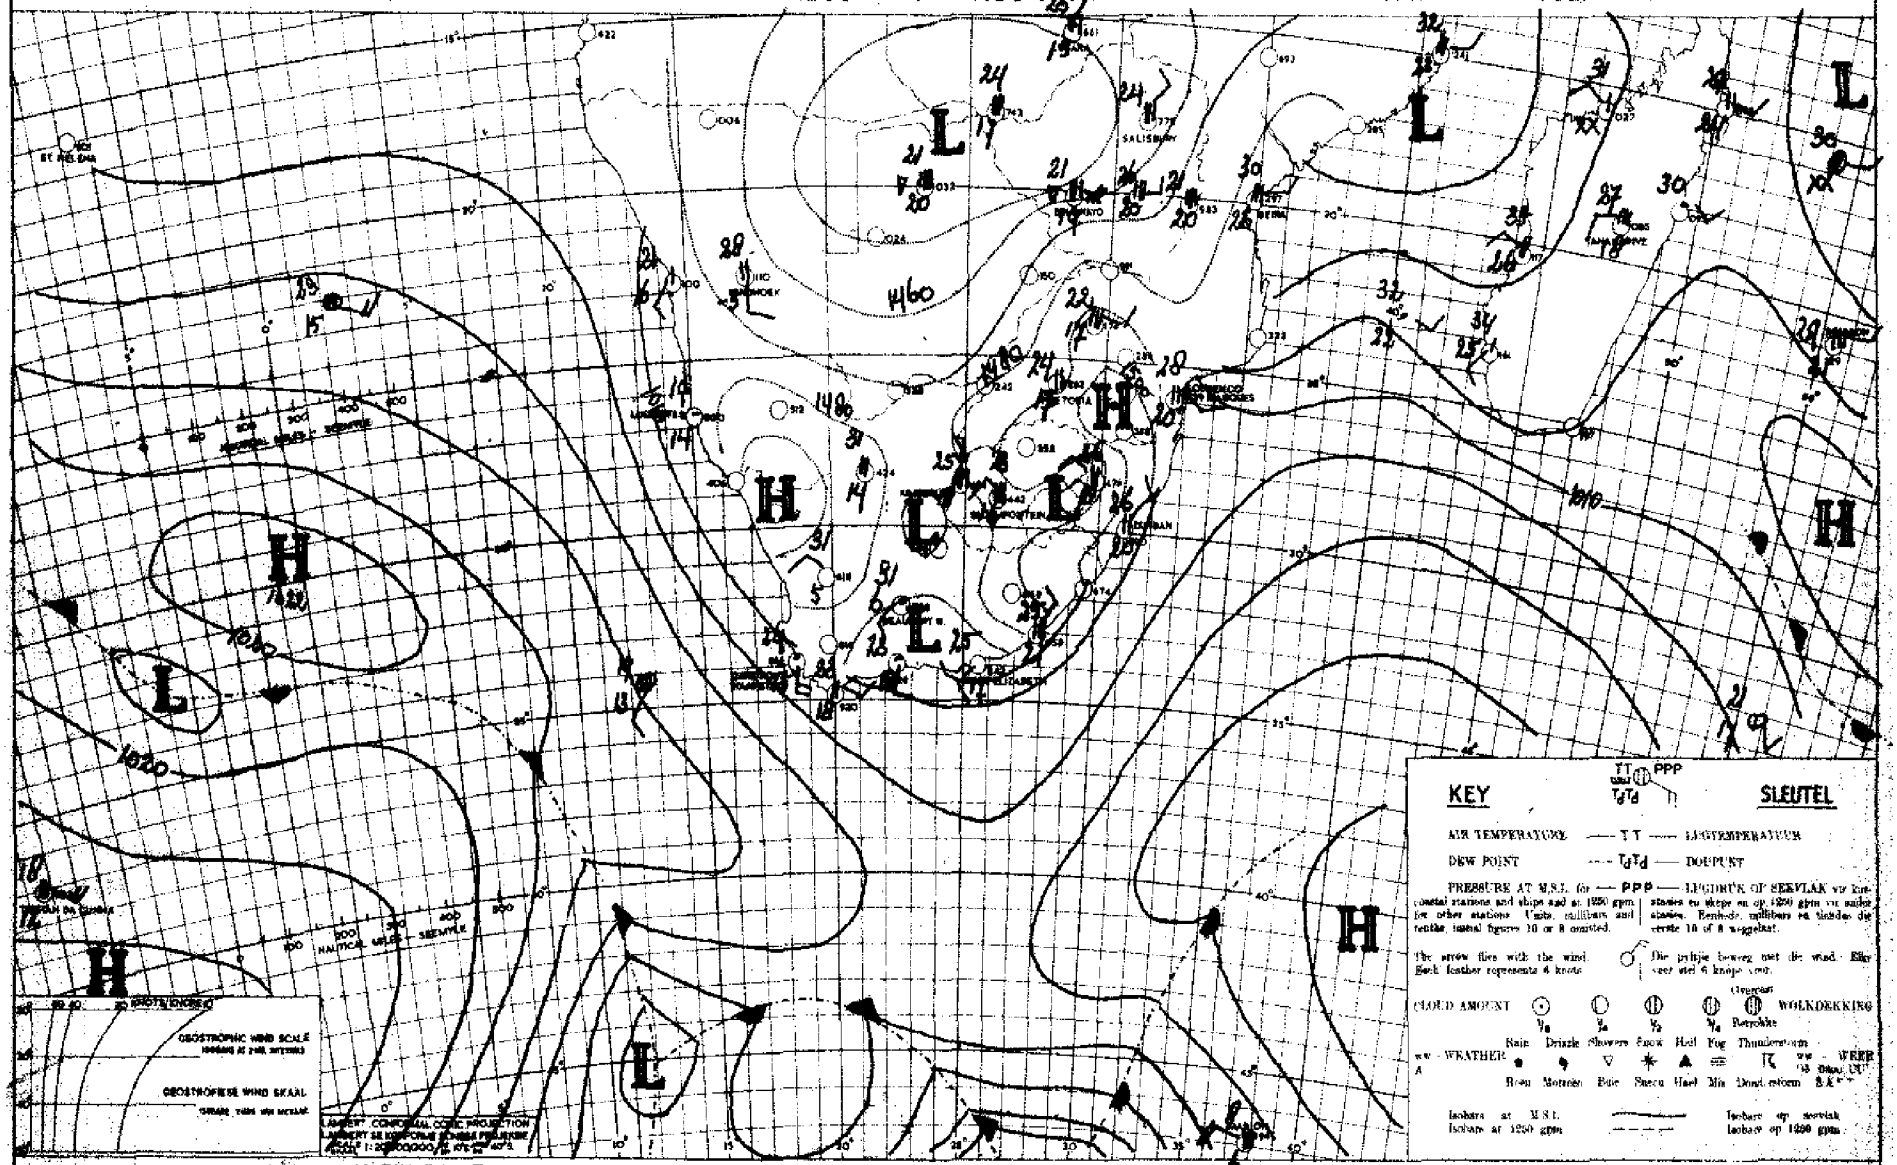
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 6 — 2 — 59 DATUM AFLEIDING

Lugdrukke oor die oostelike Unie daal vinnig met die gevolg dat tropiese lug weer na die sentrale Unie kan deurdring. 'n Effense drukstyging oor die suidwestelike Unie sal droë lug oor die westelike helfte van die Unie invoer met die gevolg dat bewolkte tot betrokke toestande oor Transvaal, Vrystaat, Noord Kaapland Natal en die oostelike helfte van Kaapland sal voorkuur. Reën sal hoofsaaklik oor die suidelike helfte van die Vrystaat voorkom.

Pressures over the eastern Union are falling rapidly with the result that tropical air can once more penetrate into the Central Union. A tendency of rising pressures can be detected over the southwestern Cape, which will encourage the influx of drier air over the western half of the Union. Cloudy to overcast skies will therefore be limited to the eastern half of the Union, with rain mainly occurring over the southern half of the Free State.

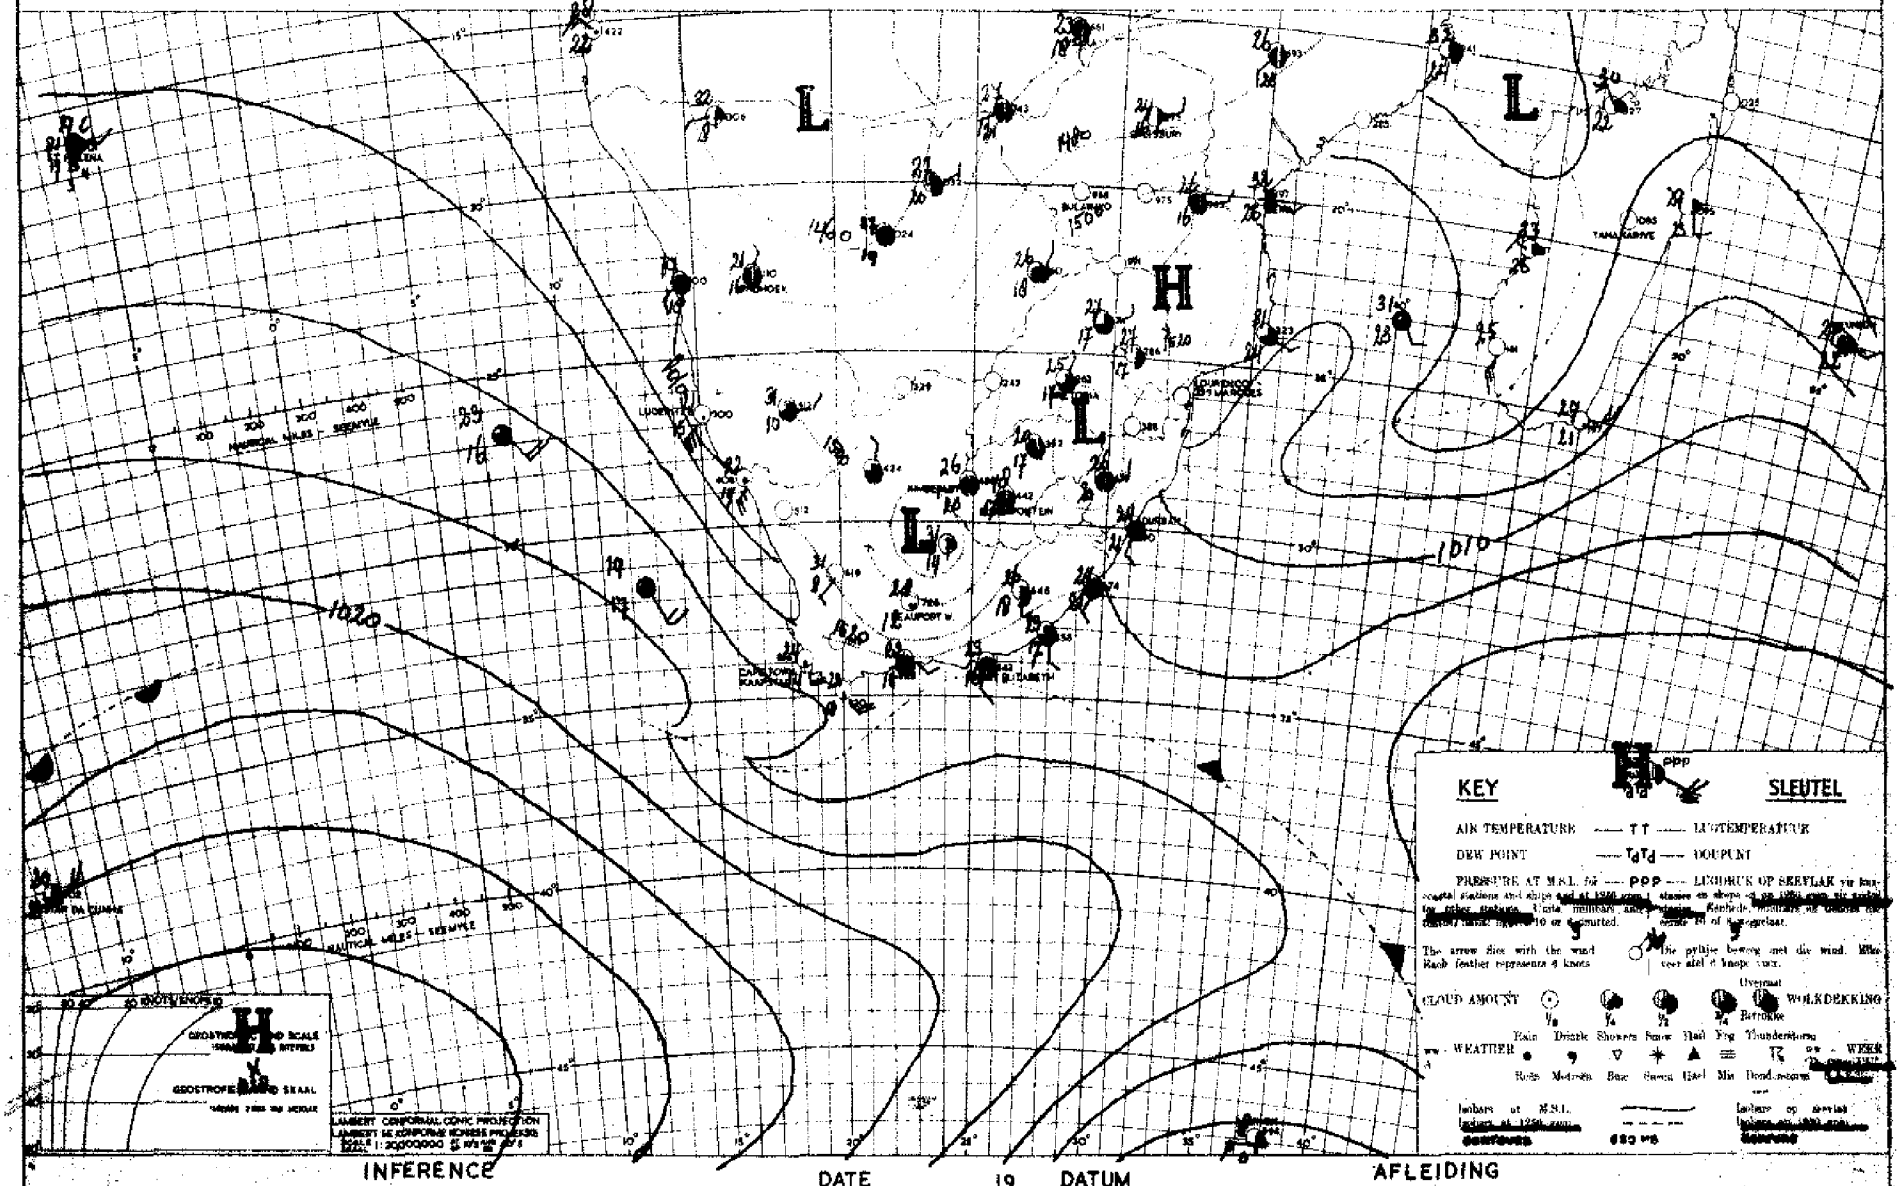
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 7 - 12 - 19 55 — DATUM — AFLEIDING

Apart from the southwestern half of the Cape Province, warm humid air is circulating over the Union under the influence of the low pressure region over S.W.A. The weather will therefore remain cloudy to overcast over the Transvaal, Free State, the Northern, Northeastern and Eastern Cape and Natal. Rain or thundershowers will occur over these areas. Over the Southwestern half of the Cape Province the weather will remain fine.

Met uitsondering van die suidwestelike helfte van Kaapland sirkuleer warm vogtige lug oor die Unie onder die invloed van die lae drukgebied van S.W.A. Bewolkte tot betrokke toestande sal dus oor Transvaal, Vrystaat, Noord, Noordoos en Oos Kaapland, en oor Natal voortduur. Reën of donderbuie sal oor hierdie gebiede uitsak. Oor die suidwestelike helfte van Kaapland sal dit mooi weer wees.

As the Atlantic High moves eastwards over the southern coastal regions, humid air from the northeast will continue over the eastern half of the Union and scattered showers will occur. It will however remain fair over the western and southwestern Cape Province.

Na mate die Atlantiese Hoog oostwaarts oor die Suidelike kuststreke beweeg, sal vogtige lug uit die noordooste voortduur oor die oostelike helfte van die Unie en verspreide buie sal uitsak. Dit sal egter mooiweer bly oor westelike en suidwestelike Kaapland.

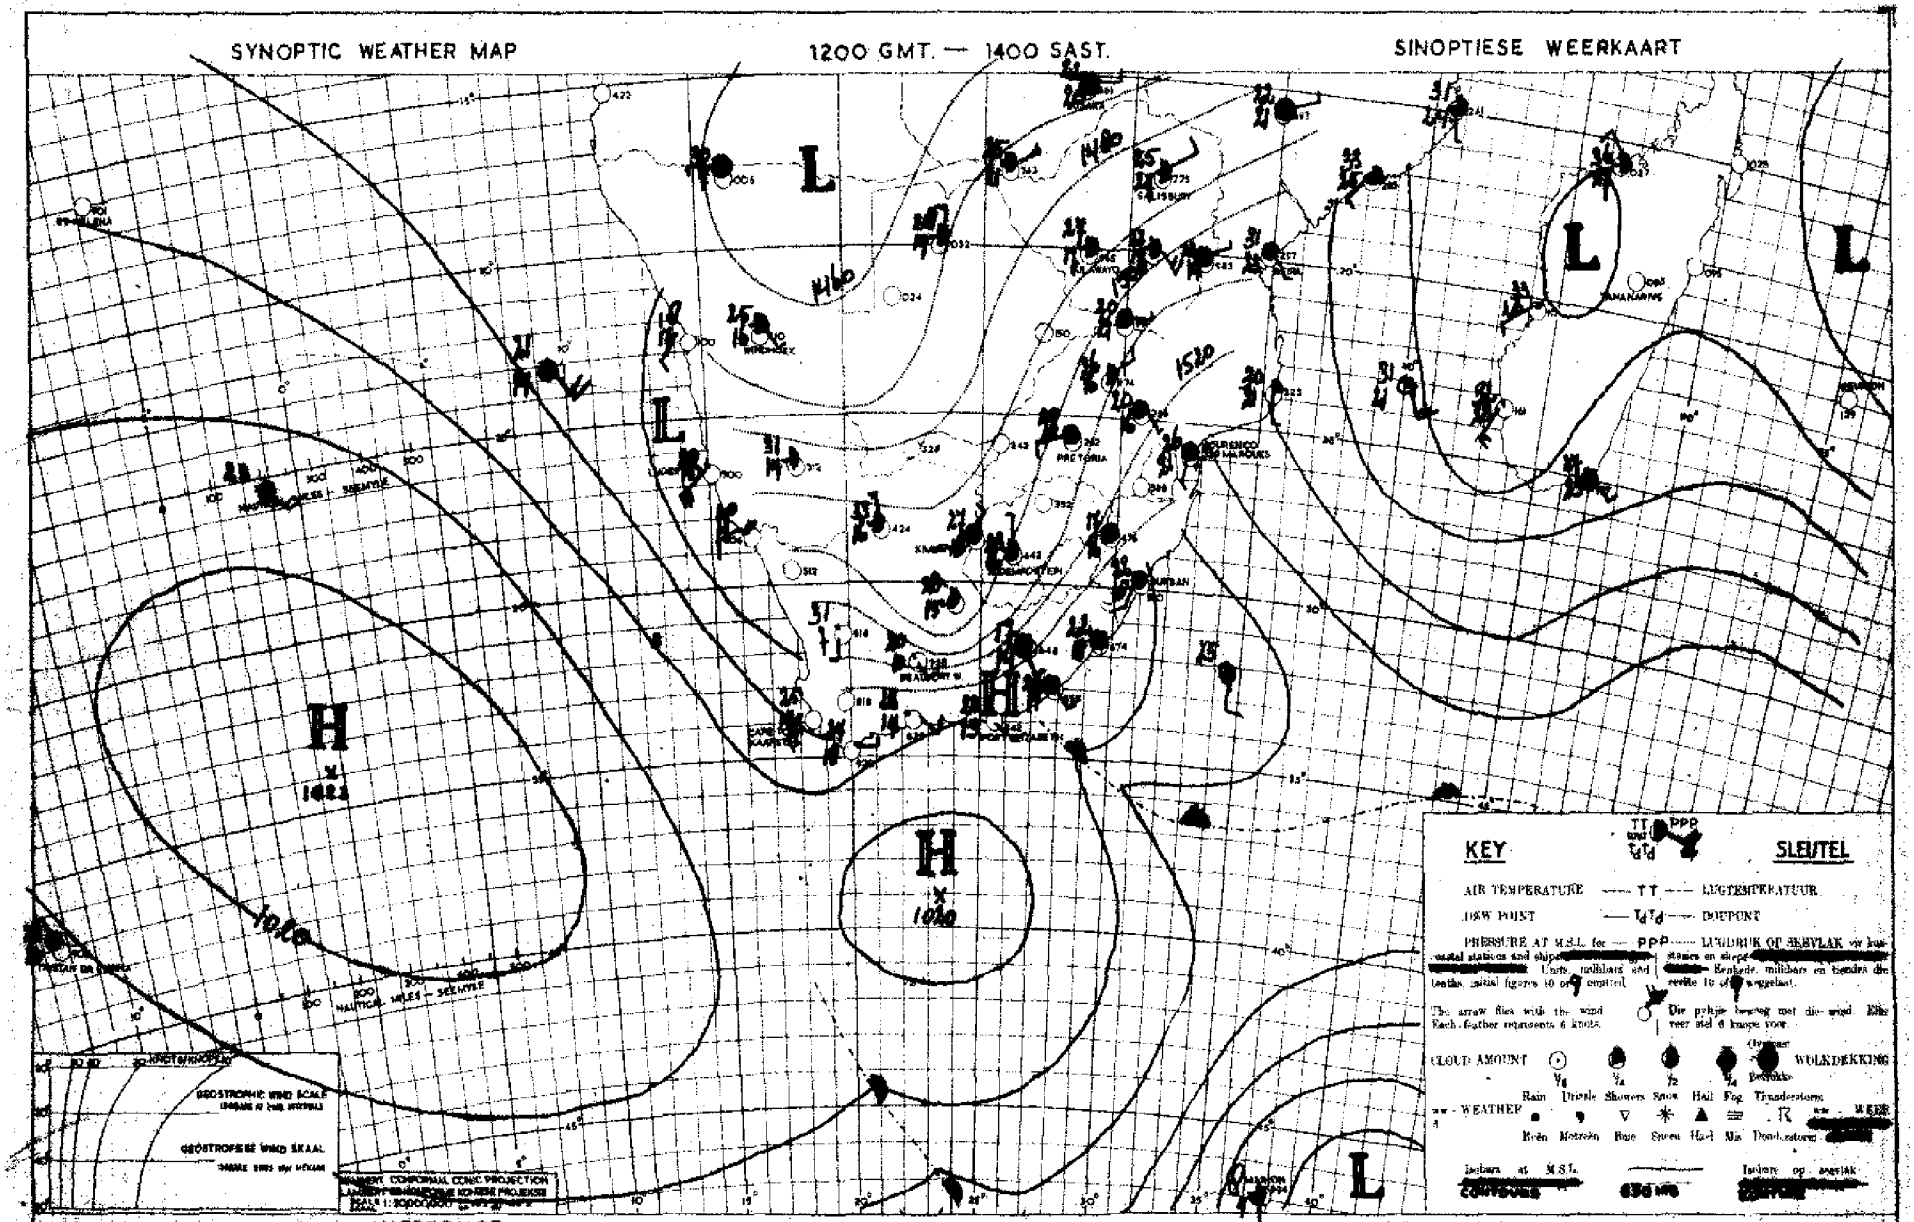
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 9 — 2 — 19 DATUM AFLEIDING

Humid air is still flowing from the northeast between the low pressure system of Northern S.W.A. and the relatively high pressure region along the east and southeast coast. Cloudy to overcast skies will continue to occur over the Transvaal, Free State, the Northern and Eastern Cape and Natal. Rain activity will continue over parts of these areas. It will be mainly over the Southwestern parts of the Cape Province.

Vogtige lug vloei nog vanaf 'n noordoostelike rigting tussen die laagdruk gebied van noord S.W.A. en die gebied van relatief hoë drukke langs die oos en suidooskus. Bewolkte tot betrokke weerstoestande sal oor Transvaal, Vrystaat, Noord en Oos Kaapland en Natal bly voortduur. Reën of reenbuie sal oor meeste streke voorkom. Oor die Suidwestelike helfte van Kaapland sal dit hoof-

The tendency for moist sea air to flow in over the southern and southeastern coastal regions of the Cape is now weak, and tomorrow it will be fair over those parts. Otherwise not much change is expected.

Die neiging van vogtige seelug om oor die suidelike en suidoostelike kuestreke van Kaapland in te stroom word nou swak en môre sal redelike mooiweer oor daardie gedeeltes voorkom. Andersins word min verandering verwag.

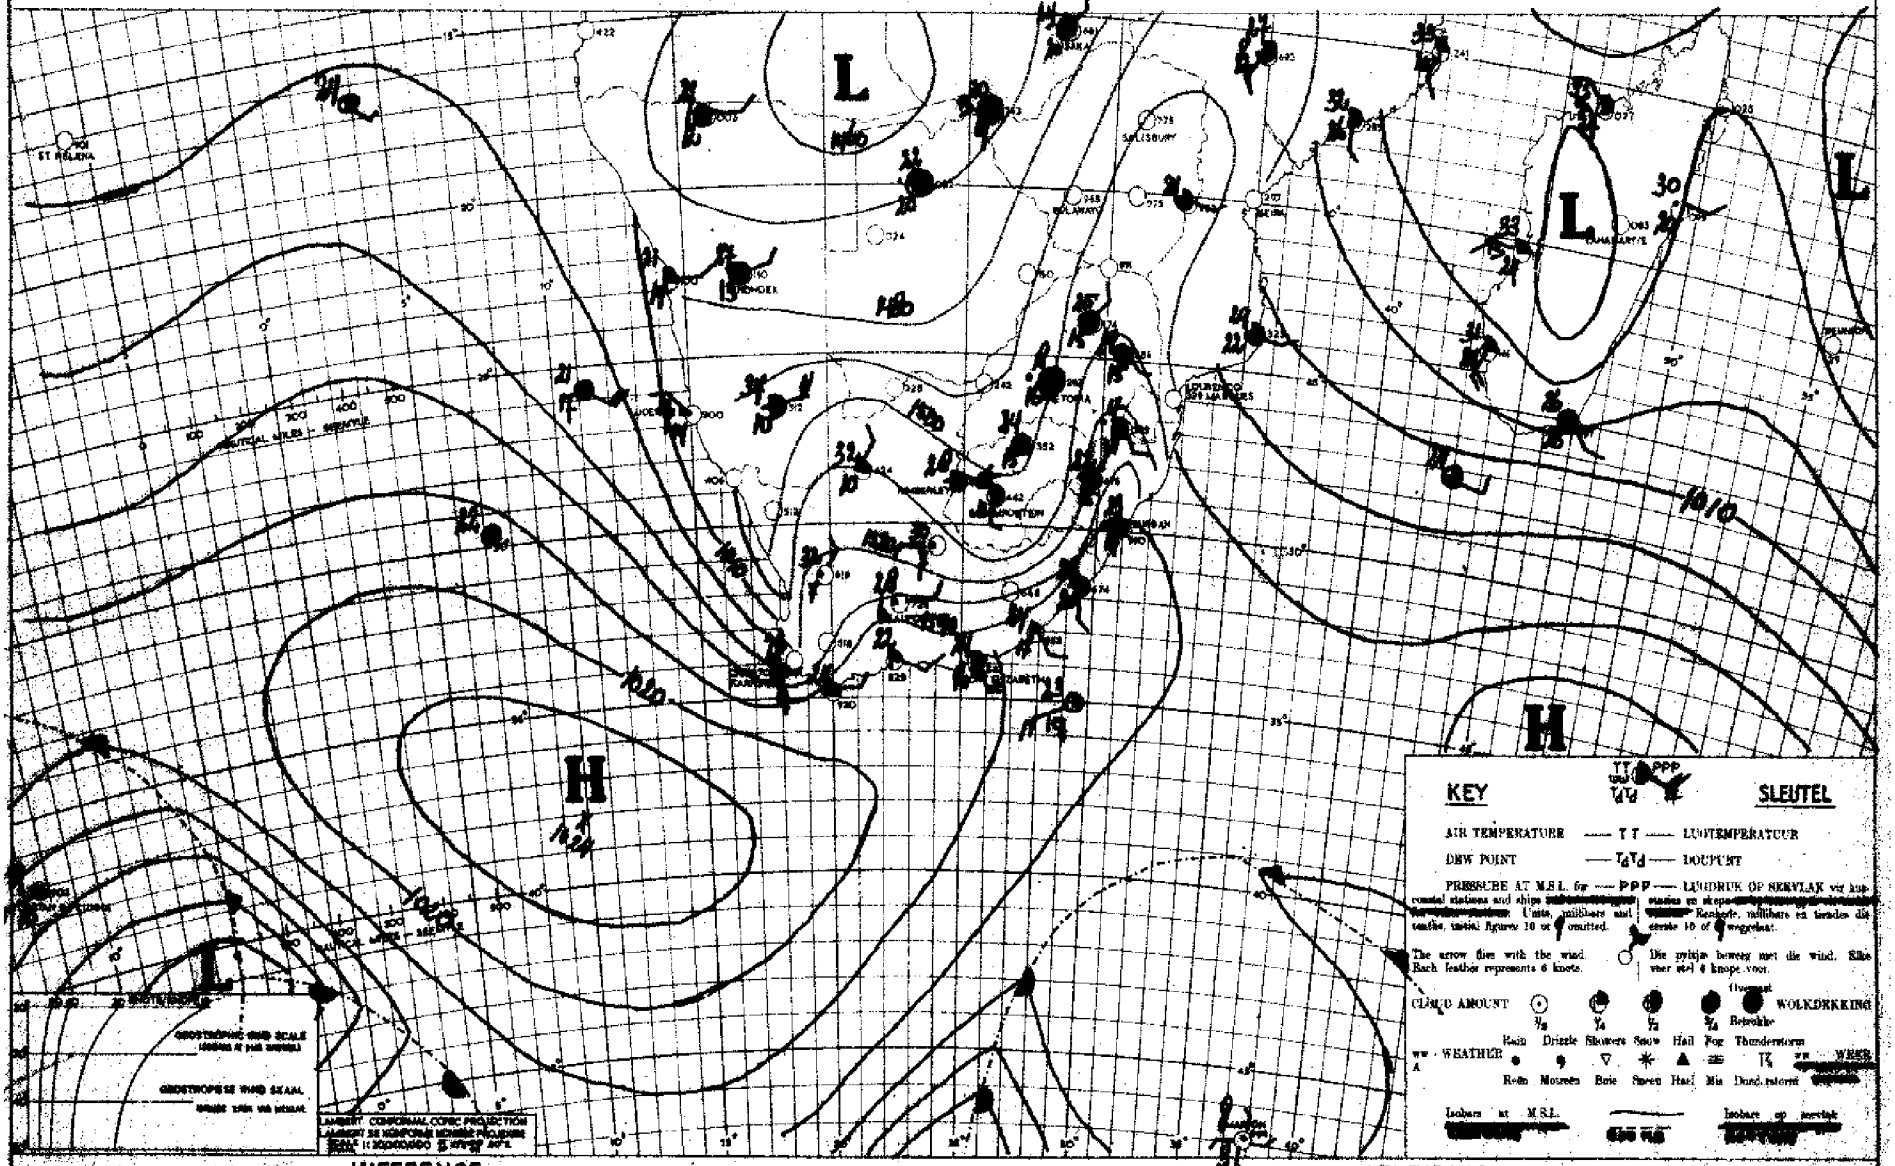
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 11 2 1955 DATUM AFLEIDING

The upper-air trough which has been lying over the Southern Transvaal has now moved somewhat further north. At the same time the anticyclone Southwest of the Union is moving eastwards.

It is therefore expected that the main rain area will move to the northern Transvaal.

Die trog in die holug wat oor Suidelike Transvaal gelê het, het nou ietwat verder noordwaarts beweeg. Terselfdertyd is die antisikloon Suidwes van die Unie besig om ooswaarts te beweeg. As gevolg hiervan word daar verwag dat die hoofreënvalgebied na noordelike Transvaal sal beweeg.

INFERENCE

DATE 12 – 9 – 19 55 DATUM

AFLEIDING

The depression south of the Union is causing a coastal low on the West coast. As a result of the eastward movement of the seaward systems, this coastal low will move to the south coast overnight. Cooler, cloudy weather will develop over the SW coastal regions, whilst over the Natal coastal areas the weather will clear from the south.

Die depressie suid van die Unie veroorsaak 'n kuslaag op die Weskus. As gevolg van die ooswaartse beweging van die seewaartse sisteme sal hierdie kuslaag oornag na die Suidkus beweeg. Koeler bewolkte weer sal oor die SW-like kusstreke voorkom, terwyl die weer oor Natal se kusstreke vanuit die suide sal ooptrek.

The upper winds, which are Westerly over the Southwest Cape, and southeasterly over the eastern half of the Union, are becoming dry, and the rain area which is still lying over Northern Transvaal will gradually disappear. Along the southern and eastern coasts the weather will remain partly cloudy.

Die bowind, wat Westelik is oor Suidwes Kaapland, en suidoostelik oor die oostelike helfte van die Unie, is besig om droog te word, en die reëngebied wat nog oor Noord Transvaal lê sal geleidelik verdwyn. Langs die Suidelike en Oostelike kuste sal die weer gedeeltelik bewolk bly.

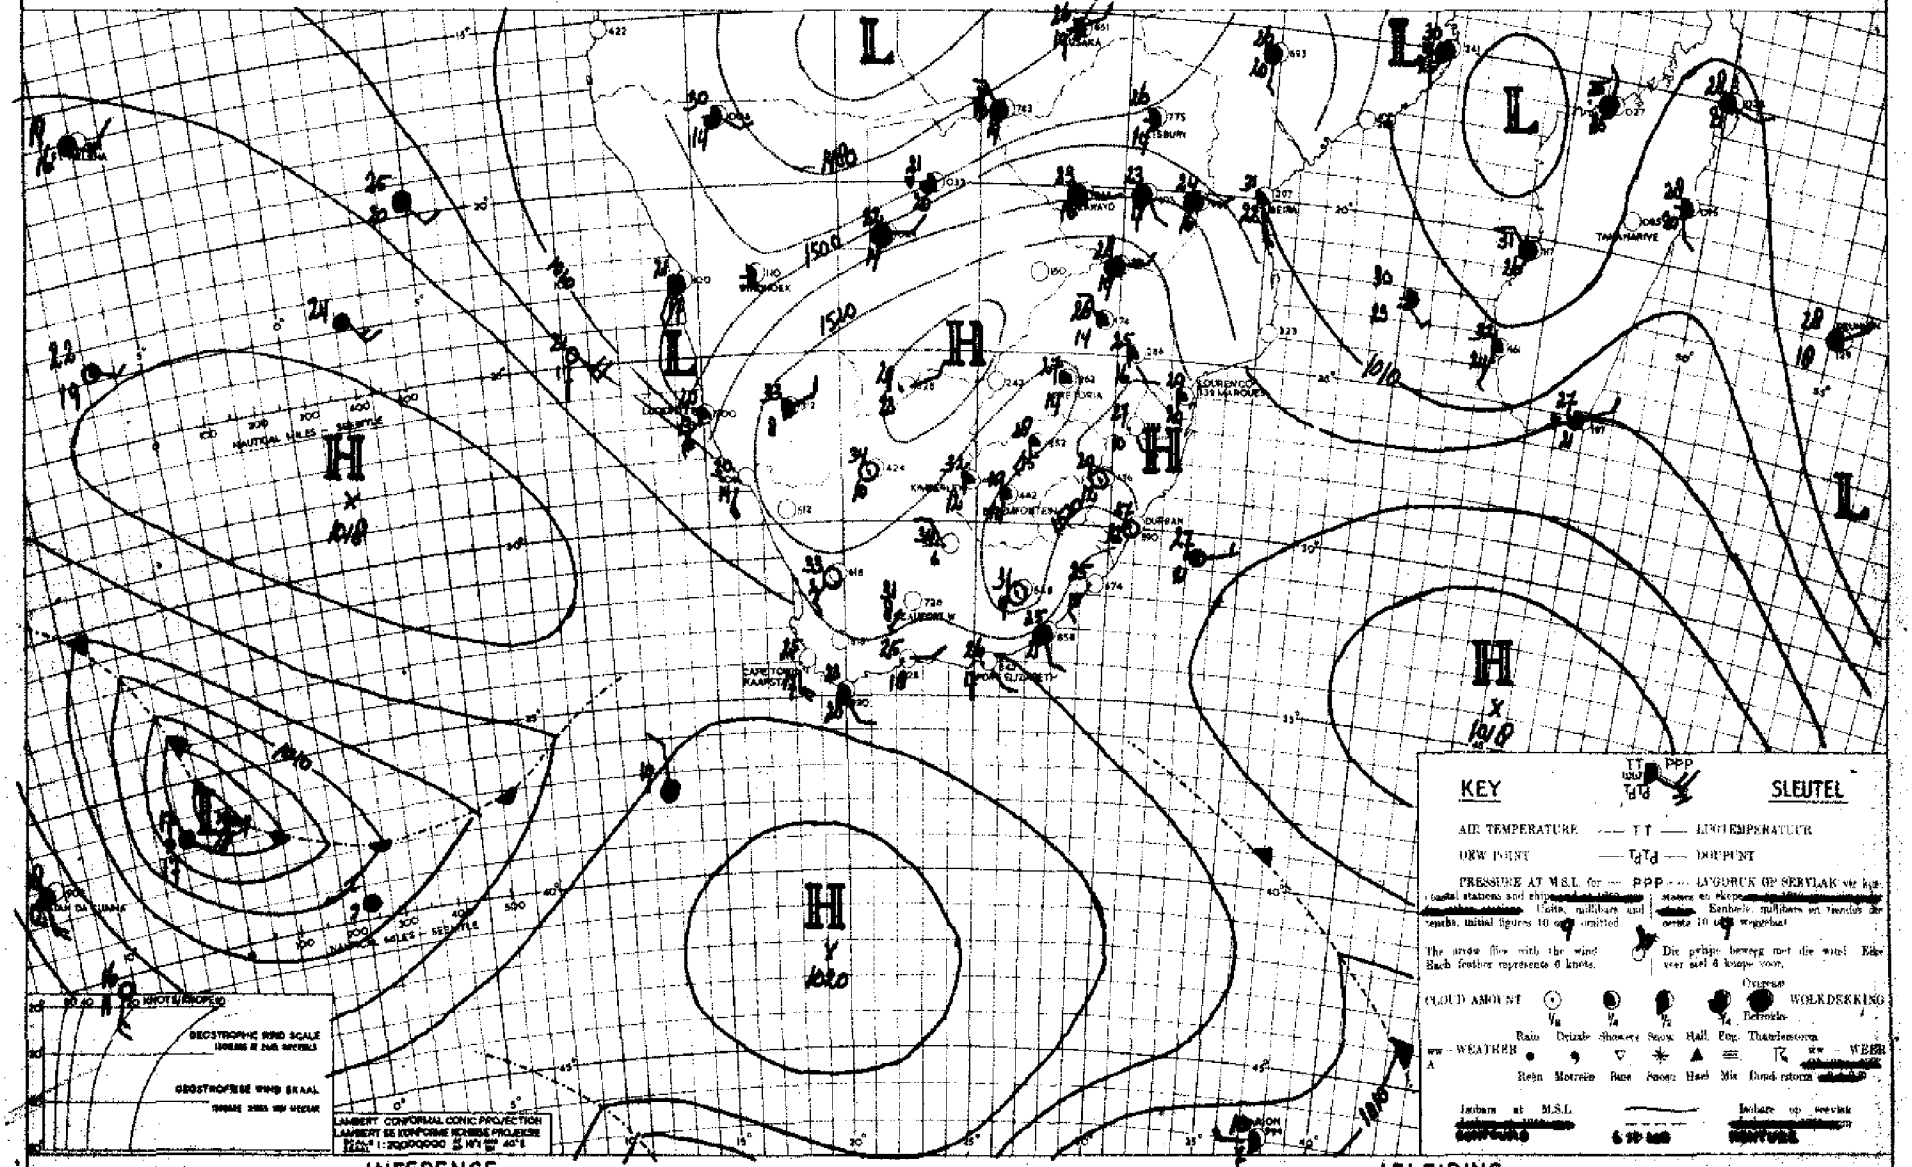
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 15 - 2 - 1965 DATUM AFLEIDING

A weak surface circulation of moderately moist air exists over the Union, and fair to partly cloudy conditions prevail throughout. The depression northeast of Tristan is expected to affect the western Union in a day or two causing more unsettled weather over these areas.

Die lug sirkulasie van matig vogtige lug is taamlik swak en dit sal oor die algemeen effens tot gedeeltelik bewolk bly. Na verwagting sal die depressie noordoos van Tristan die westelike Unie binne 'n dag of twee beïnvloed en dus sal die weerstoestande oor hierdie streke ietwat ongestadiger word.

The low southwest of the Union will cause unsettled weather over the Cape southwestern coastal regions tomorrow. At the same time northerly to northwesterly upper winds will bring moist air from Bechuanaland and South-West Africa southwards over the Cape interior and the O.F.S., and isolated thunder showers will develop over this area.

Die laag suidwes van die Unie sal môre ongestadige weer oor die Kaapse suidwestelike kusstreke veroorsaak. Terselfdertyd sal noordelike tot noordwestelike bowinde vogtige lug vanuit Betsjoeanaland en Suidwes-Afrika suidwaarts oor die Kaapse binneland en los donderbuie sal oor hierdie gebied ontwikkel.

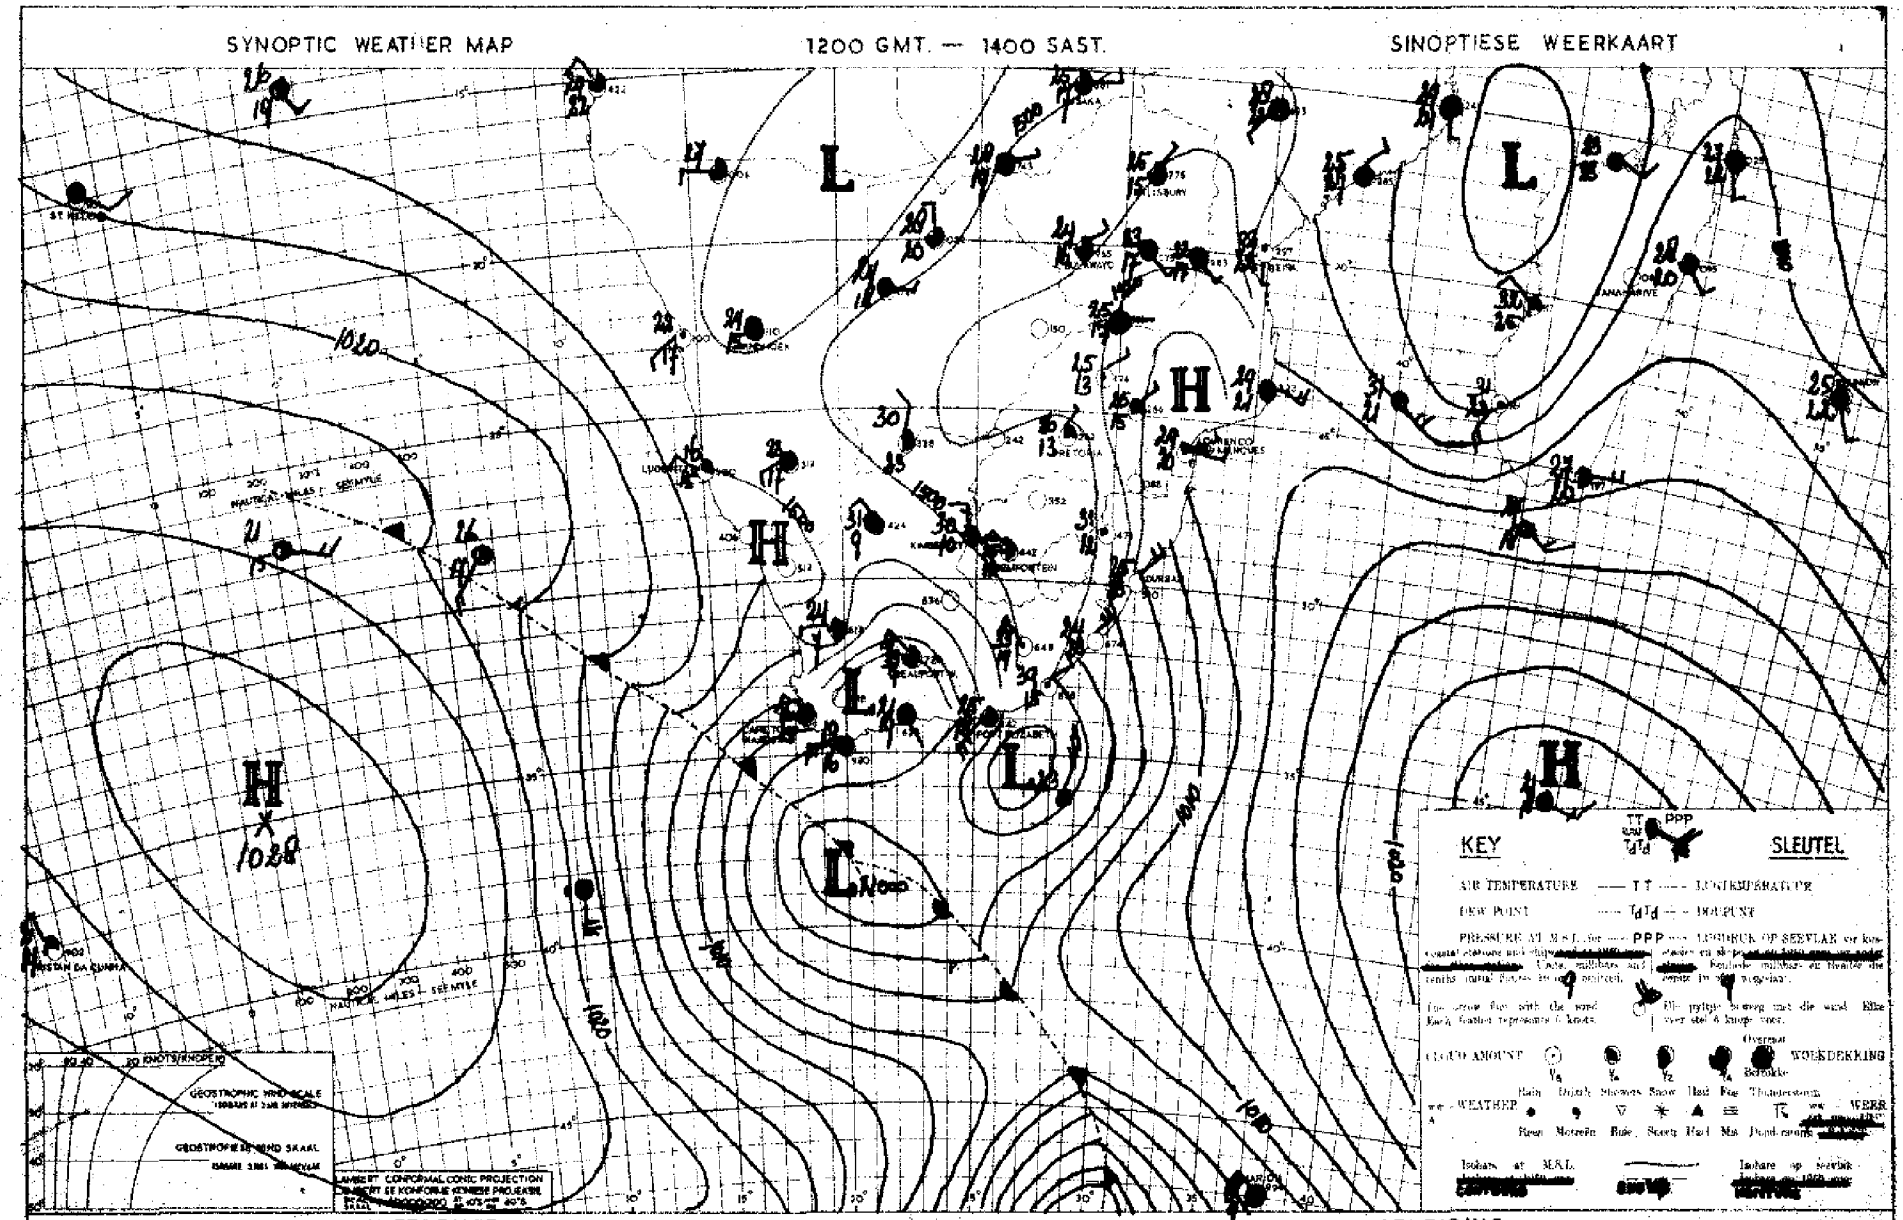
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 17-2 1955 DATUM AFLEIDING

Cloudy and unsettled weather associated with a northwesterly air stream is moving in over the western half of the Union ahead of a cold front just west of the Cape. As the systems moves eastwards unsettled weather conditions will also develop over the remainder of the Cape Province, Natal and the Free State. Thundery conditions will develop over the Southern half of Natal. With the passage of the cold front the weather will clear over the western Union but it will be cooler.

Bewolkte ongestadigde weerstoestande wat met die noordwestelike lugstroom wat die koue front, wes van die Kaap vooruit beweeg, geassosieer is, beweeg oor die westelike helfte van die Unie en sal ook geleidelik oor die res van die Unie beweeg. Met die verbygaan van die koue front sal die weer oor die westelike Unie opklaar met dit sal heelwat koeler wees.

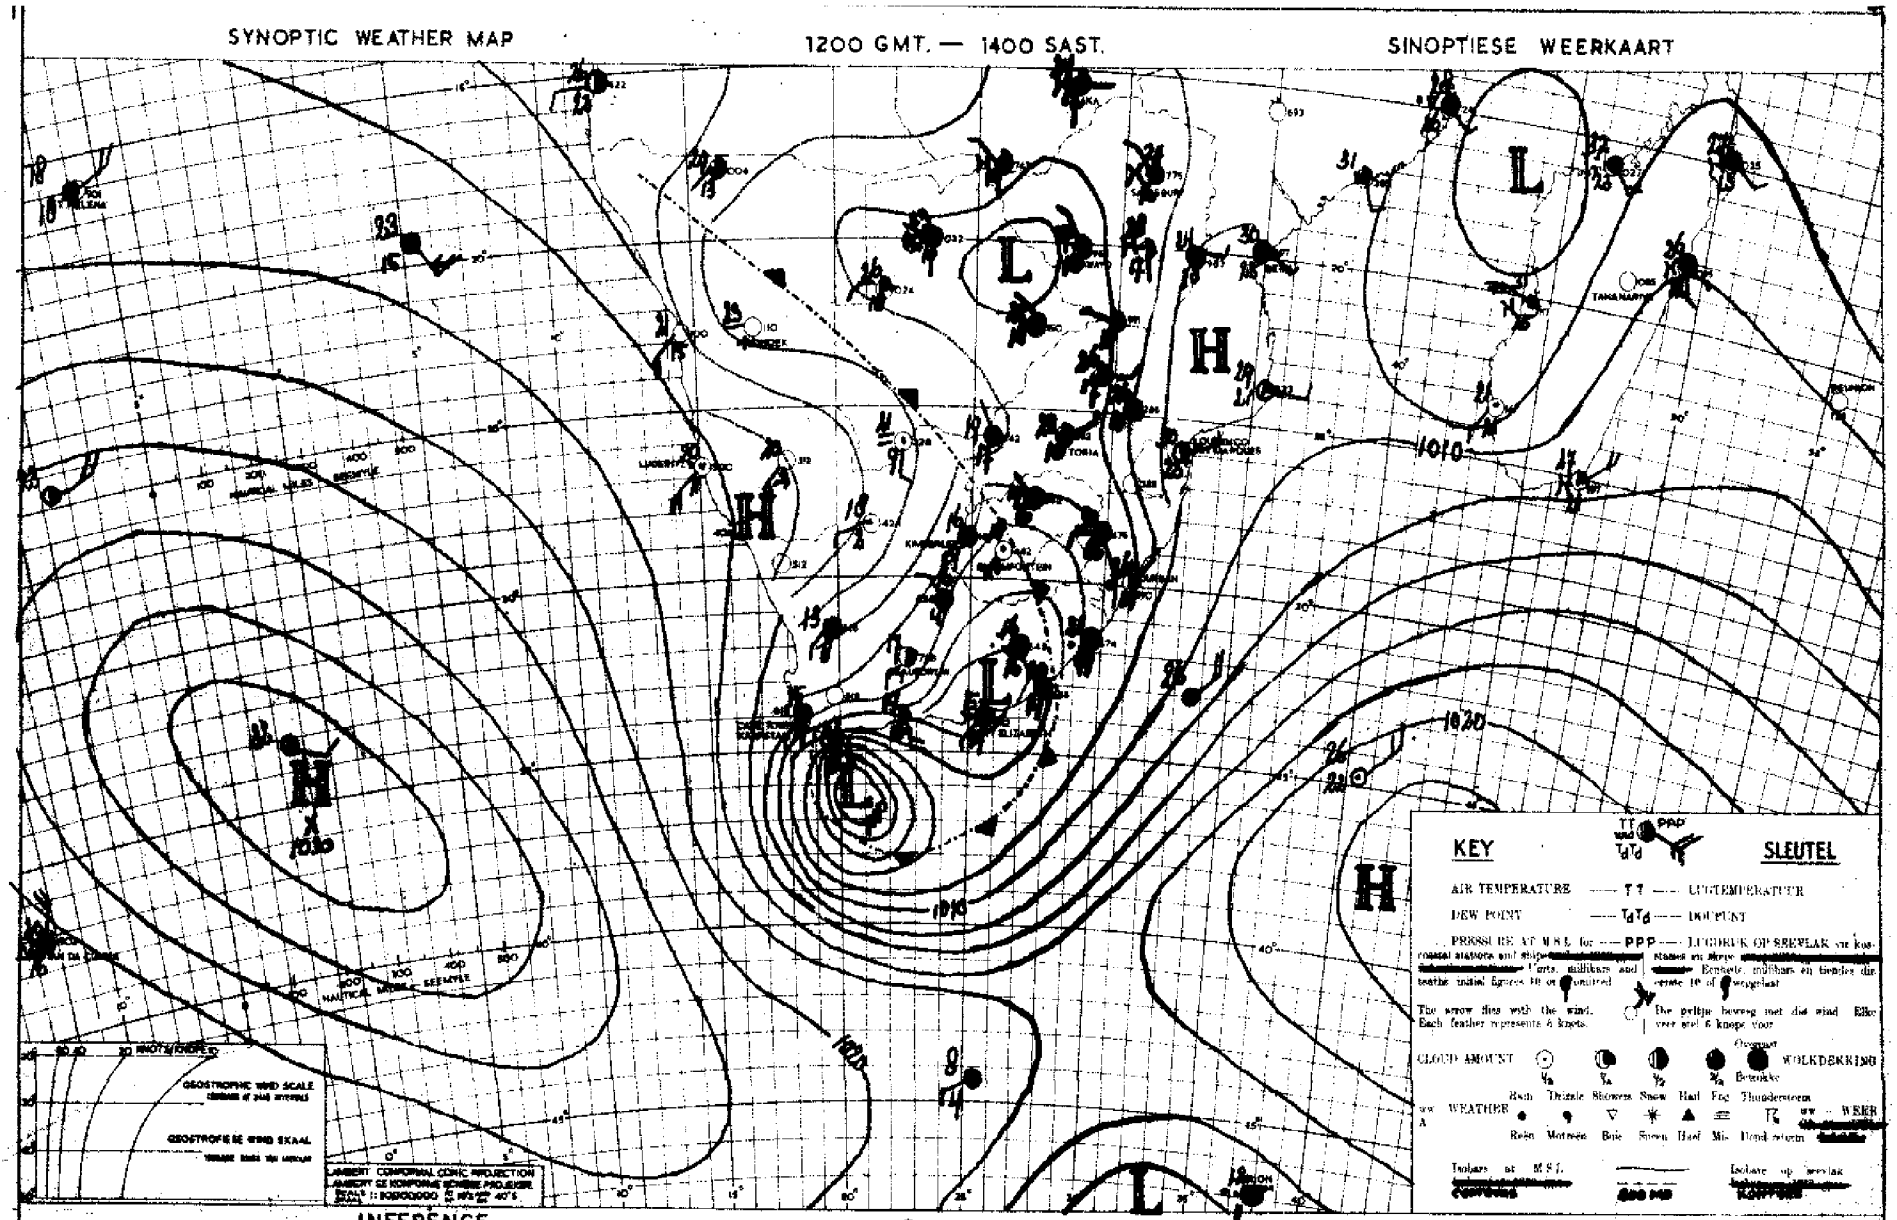
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 18-2-1958 DATUM — AFLEIDING

Colder air has now advanced over the southwestern half of the Union and apart from the southwestern Cape coastal regions, where rainy weather will continue, the weather will clear over these areas. Over the eastern half of the Union cloudy rainy weather will still continue for some time but a clearance is expected over these areas within 24 or 36 hours.

Kouer lug het oor die Suidwestelike helfte van die Unie binnegedring en met uitsondering van die kusstreke van Suidwes Kaapland sal dit oor hierdie dele opklaar. Buierige weerstoestande sal nog oor die kusstreke van Suidwes Kaapland voortduur. Oor die res van die Unie sal bewolkte reënagtige weerstoestande bly voortduur maar 'n geleidelike opklaring word na 24 of 26 uur verwag.

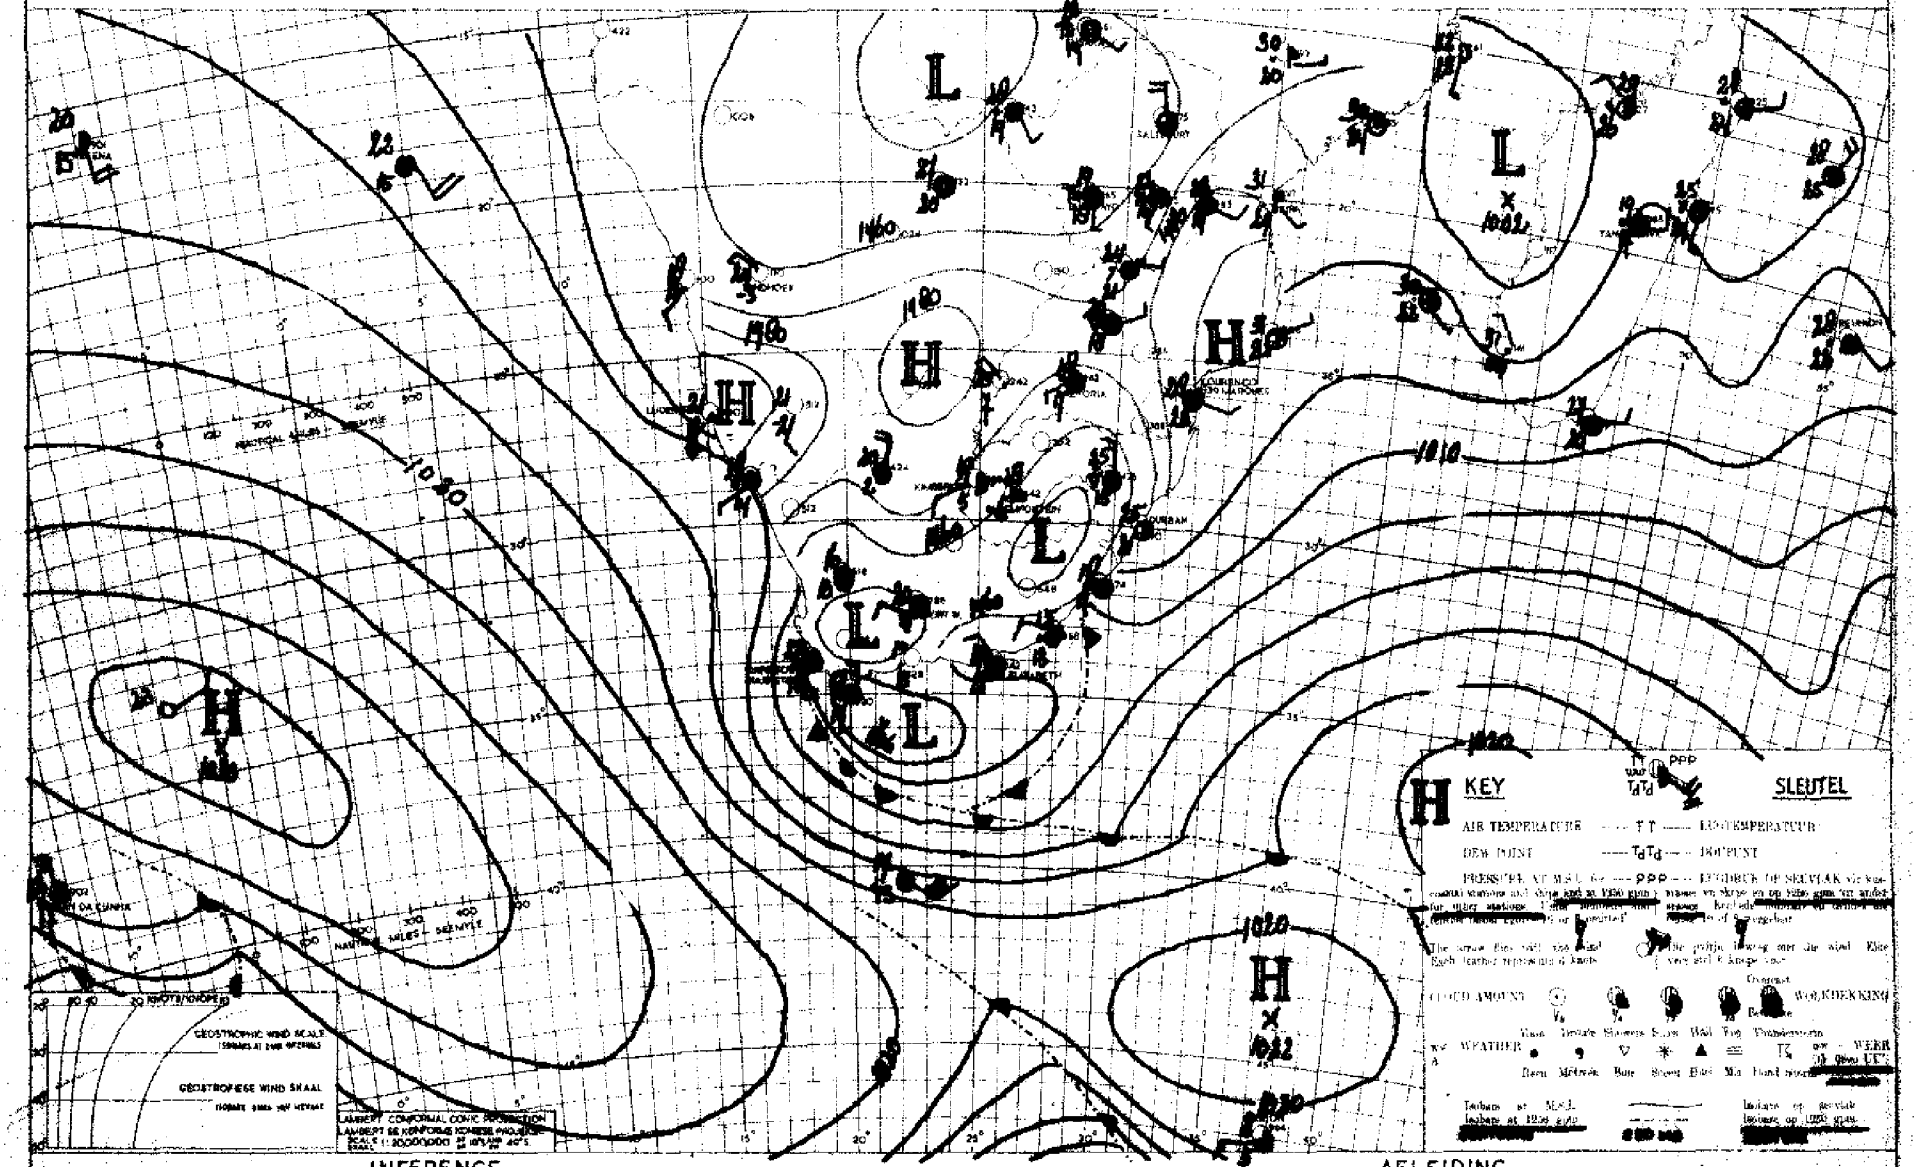
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 19 - 2 - 19 85 DATUM — AFLEIDING

A more or less stationary depression is situated over the southern and southwestern Cape. As result rather unsettled weather conditions will prevail throughout the Union and rains from light to heavy intensity will occur. The heavy rains will occur mainly over the northeastern Union.

'n M'n of meer stasionêre laagdruk sisteem met oor die suid en suidwes Kaap gelee is sal ongestadige weerstoestande oor deurgaans die hele Unie teweeg bring. Dit sal oor die algemeen bewolkte tot betrokke weer en ligte tot swaar reëns sal hoofsaaklik oor die noordoostelike Unie voorkom.

INFERENCE

A Stationary low over the southwestern Cape is causing unsettled weather over Gordonia and the southwestern half of the Cape Province. Moist air from the north is still flowing over Transvaal and Natal. If the low begins to move eastwards tomorrow, thunder conditions will extend over the remainder of the Cape Province and over southwestern O.F.S., whilst the weather over Transvaal and Natal will partly clear.

DATE 20 - 2 - 19 55

AFLEIDING

'n stasionêre laag oor suidwestelike Kaapland veroorsaak ongestadigde weer oor Gordonia en die suidwestelike helfte van Kaapland. Vogtige lug vanuit die noorde beweeg nog oor Transvaal en Natal. As die laag môre ooswaarts begin beweeg, sal donderweerstoestande oor die res van Kaapland en oor Suidwestelike O.V.S. uitbrei, terwyl die weer oor Natal en Transvaal gedeeltelik sal opklaar.

INFERENCE

DATE 21-2 1955 DATUM

AFLEIDING

Drier air is advancing steadily over S.W.A. and Bechuanaland towards Transvaal, the Free State and the Cape Province. It will therefore still be cloudy over the Transvaal, the eastern half of the Free State, Natal and the eastern Cape Province. Rain or thunderstorms will develop during the day over these areas. Over the remainder of the Union clear weather conditions will prevail.

Droër lug beweeg geleidelik oor S.W.A. en Betsjoeanaland na die Transvaal, Vrystaat en die Kaap Provinsie. Dit sal dus nog bewolk wees oor Transvaal, die oostelike helfte van die Vrystaat, Natal en die oostelike Kaap Provinsie. Reën of donderbuie sal oor hierdie streke uitsak. Oor die res van die Unie sal weerstoestande bestendig wees.

The area of low pressure in the neighbourHood of Natal is now moving north-eastwards, and tomorrow moist sea air will move in over the coastal regions of Natal. Weather there will become cloudy, with light local showers, whilst along the south coast it will clear.

Die gebied van lae druk in die omgewing van Natal is nou besig om noord-ooswaarts te beweeg, en môre sal vogtige seelug oor Natal se kuststreke instroom. Die weer daar sal bewolk word, met plaaslike ligte buie terwyl dit langs die suidkus sal opklaar.

The low south of the Union is causing cloudy weather and local showers over the coastal regions and adjacent interior of the Southern Cape Province. As a result of eastward movement of the low, these conditions will extend tomorrow to Natal.

Die laag suid van die Unie veroorsaak bewolkte weer en plaaslike reënbuie oor die kusstreke en aangrensende binneland van Suid-Kaapland. As gevolg van oostwaartse beweging van die laag, sal hierdie toestande tot Natal uitbrei.

INFERENCE

DATE 25-2 1955 DATUM

AFLEIDING

As a result of further eastward movement of the low southeast of the Union, the moist sea air which has now reached the southern half of Natal will extend overnight over the remainder of Natal and over Eastern Transvaal. Local rain will occur over these regions and conditions over the interior of Transvaal will become more favourable for thunder showers.

As gevolg van verdere ooswaartse beweging van die laag suid-oos van die Unie, sal die vogtige seelug wat nou die suidelike helf-te van Natal bereik het, oornag oor die res van Natal en oor Oos-Transvaal uitbrei. Plaaslike reën sal oor hierdie streke voor-kom, en toestande oor Transvaal se binneland sal gunstiger word vir donderbuie.

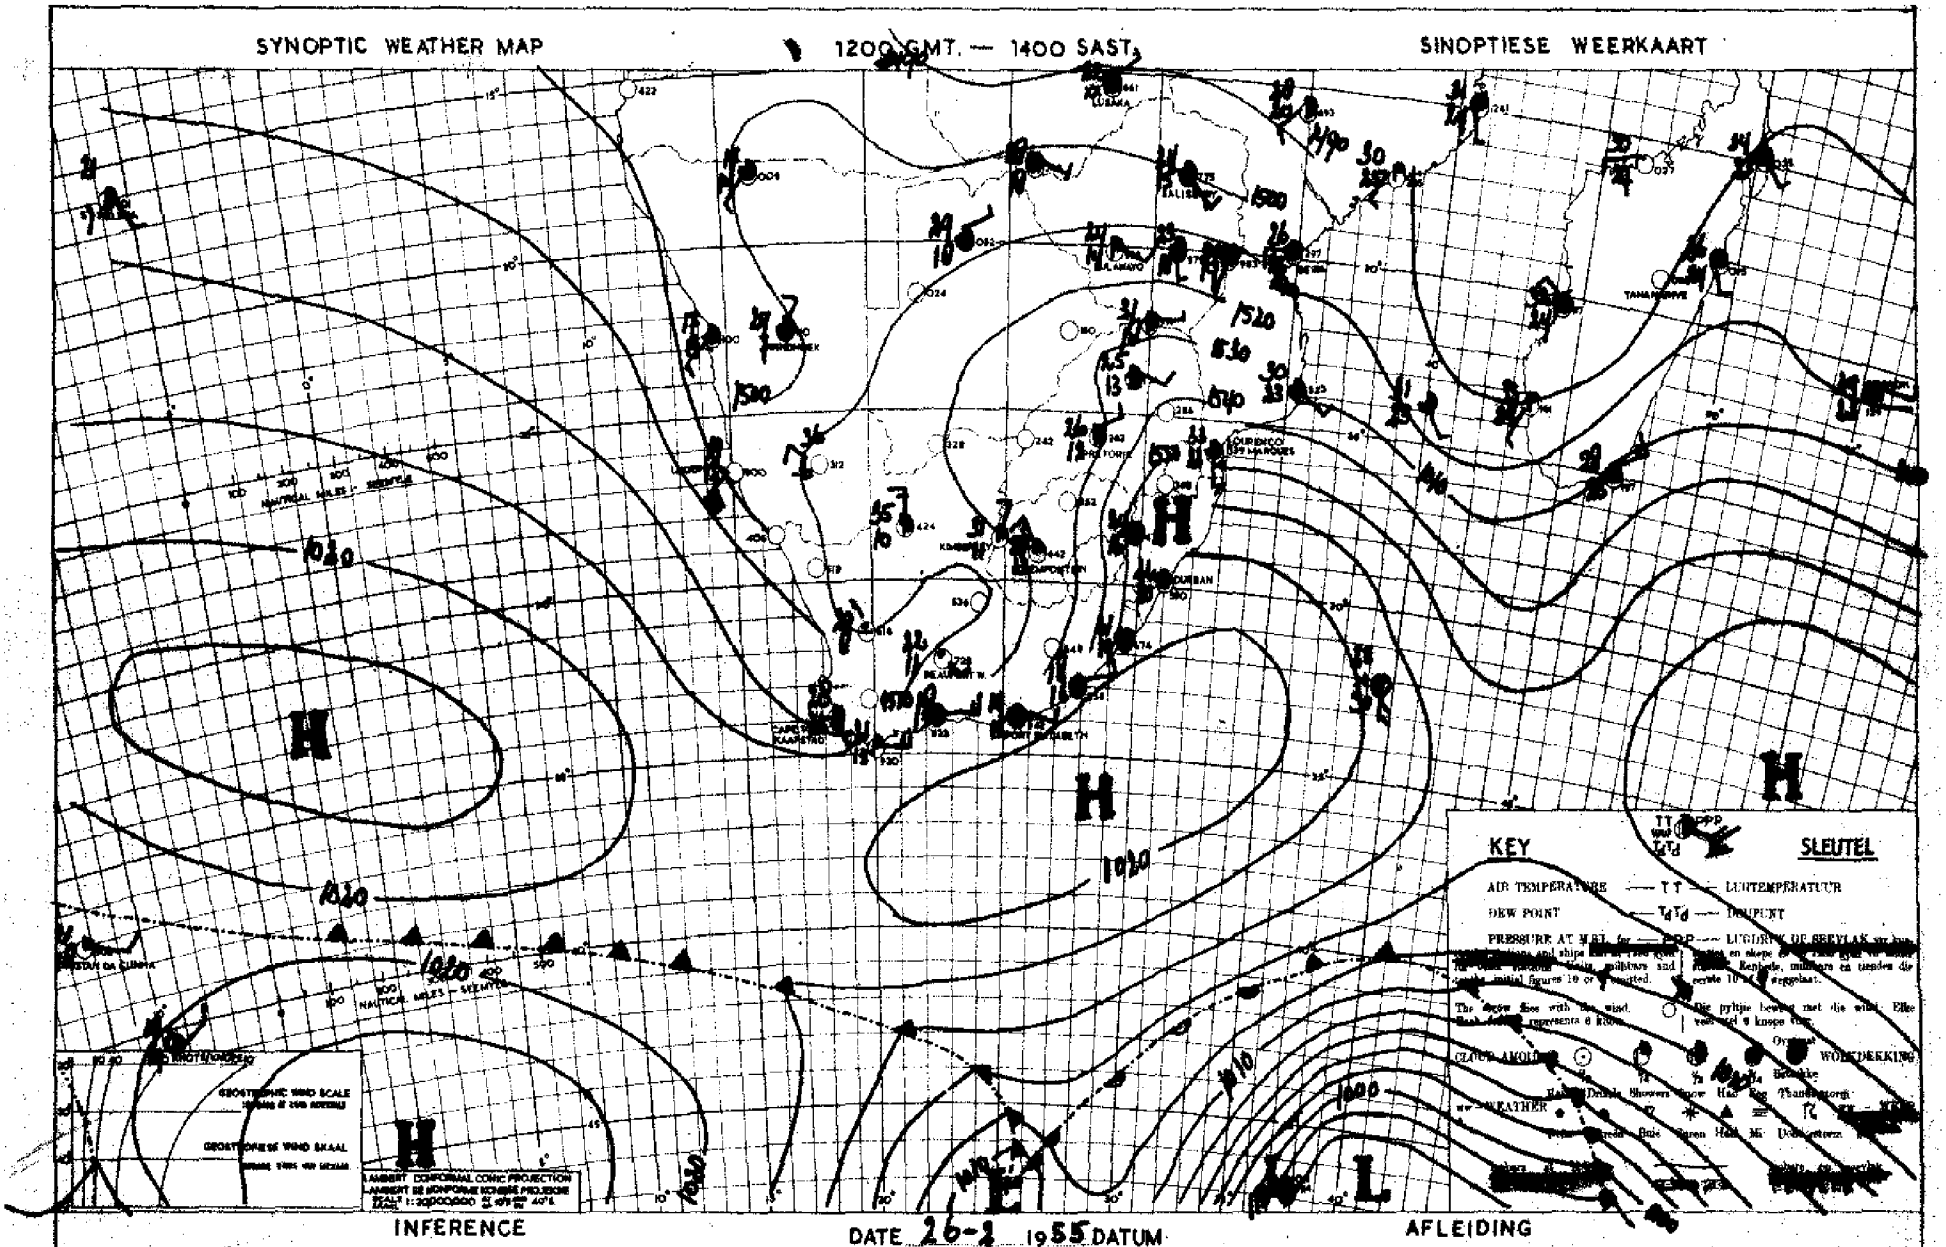
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST SINOPTIESE WEERKAART



INFERENCE DATE 26-2 1955 DATUM AFLEIDING

Not much change is expected.

The anticyclone southeast of the Union will move eastwards, with the result that there will be some clearance in the weather over the southern half of Natal.

Nie veel verandering word verwag nie.

Die antisikloon suidoos van die Unie sal oostwaarts beweeg, en as gevolg daarvan sal die weer oor die suidelike helfte van Natal ietwat ooptrek.

Cloudy weather will prevail along the south and southeast Cape coast and light thunder conditions will develop over the Central and Southeastern interior of the Union. Elsewhere it will be fair and warm.

Bewolkte weerstoestande sal langs die suid en suidooskus voorkom en donderweerstoestande sal oor die sentrale en suidoostelike binneland voorkom. Elders sal dit effens bewolk en warm weer.

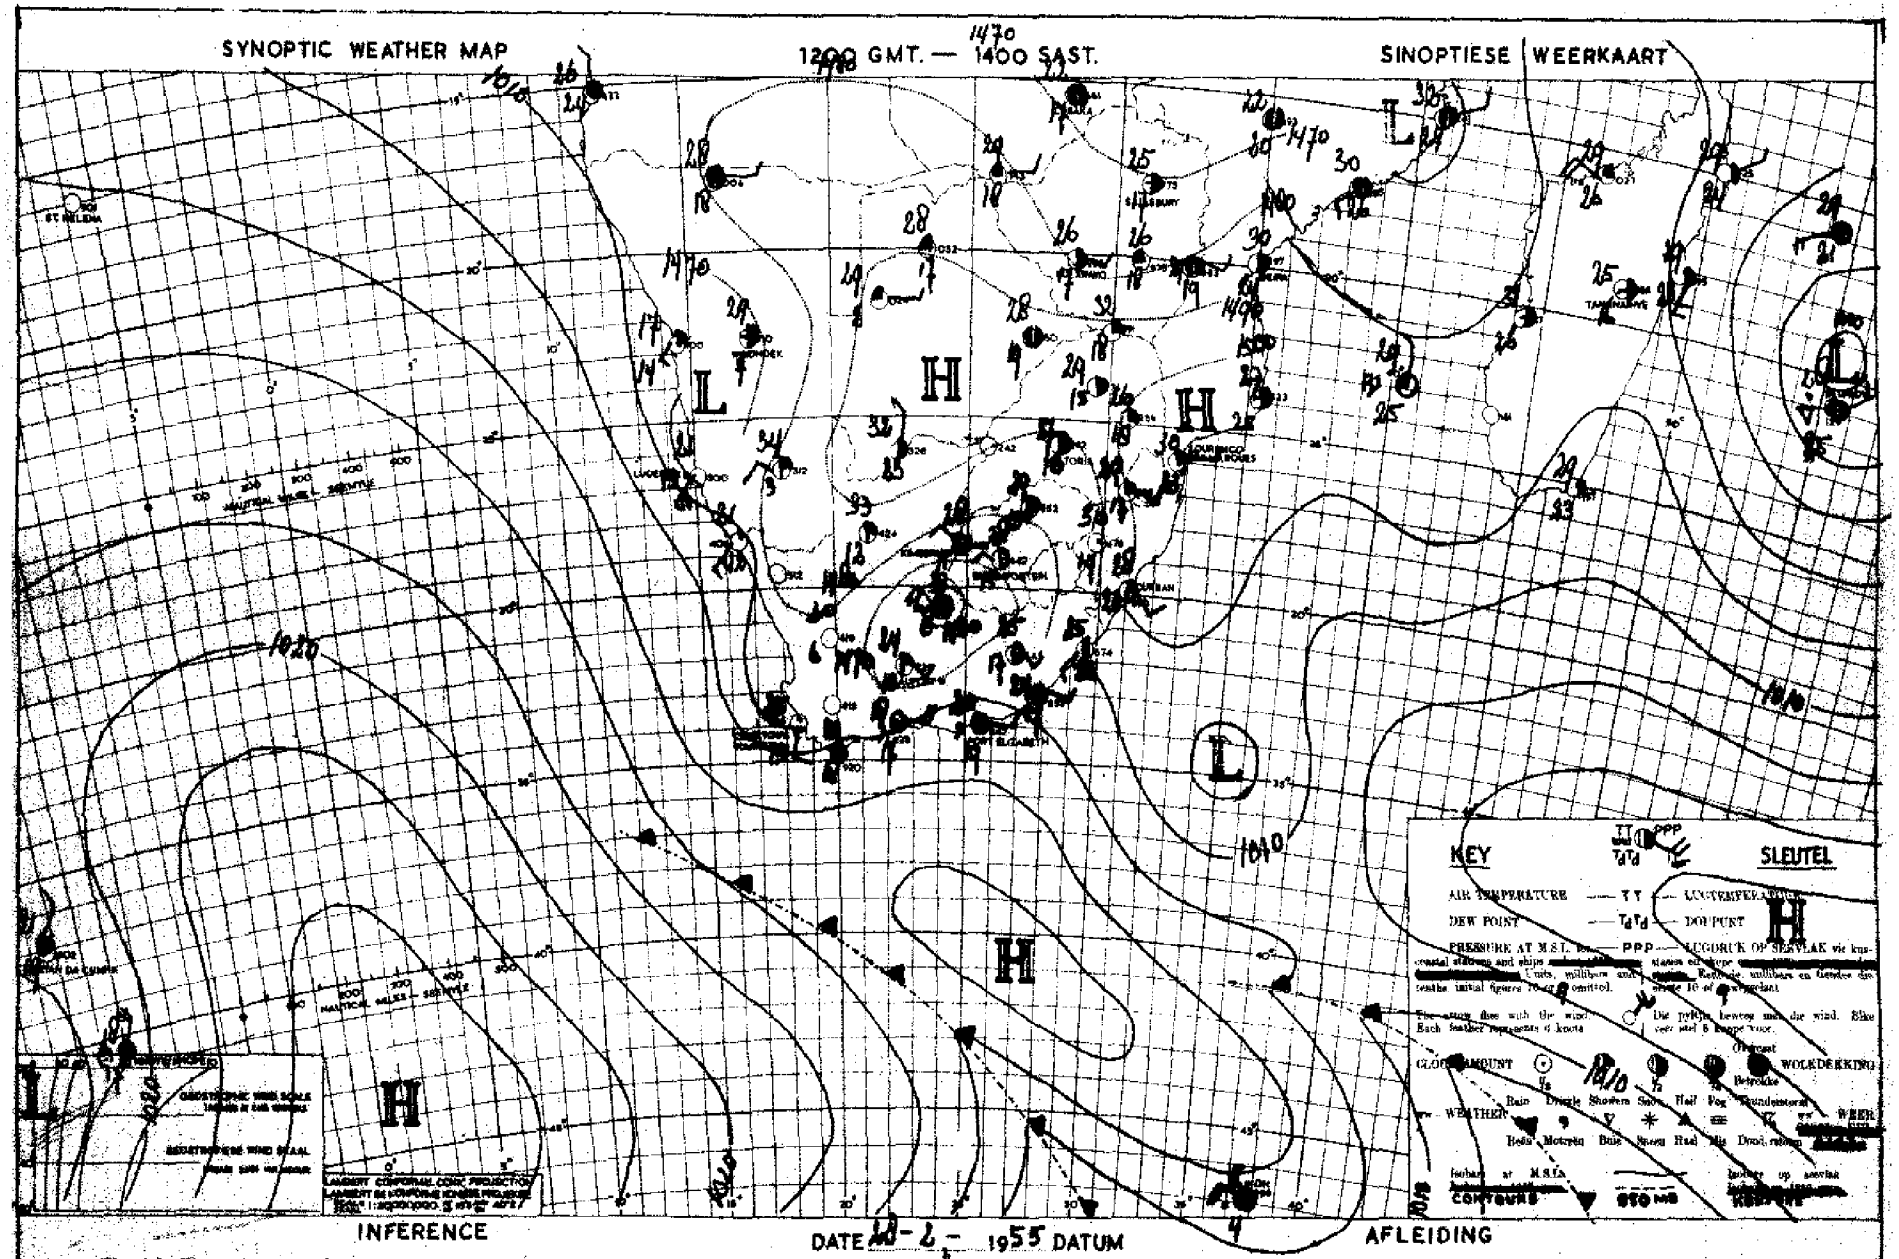
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

The Atlantic anticyclone is moving gradually eastwards. The movement of moist sea air over the south and southeast coastal regions of the Cape Province will continue, and will extend to the coastal regions of Natal. Conditions over the eastern half of the Union will become more favourable for thundershowers.

DATE 22-2-1955 DATUM

AFLEIDING

Die Atlantiese antisikloon beweeg stadigaan ooswaarts. Die instroming van vogtige seelug oor die suidelike en suidoostelike kusstreke van Kaapland sal aanhou, en sal tot Natal se kusstreke uitbrei. Toestande oor die oostelike helfte van die Unie sal gunstiger word vir donderbuie.

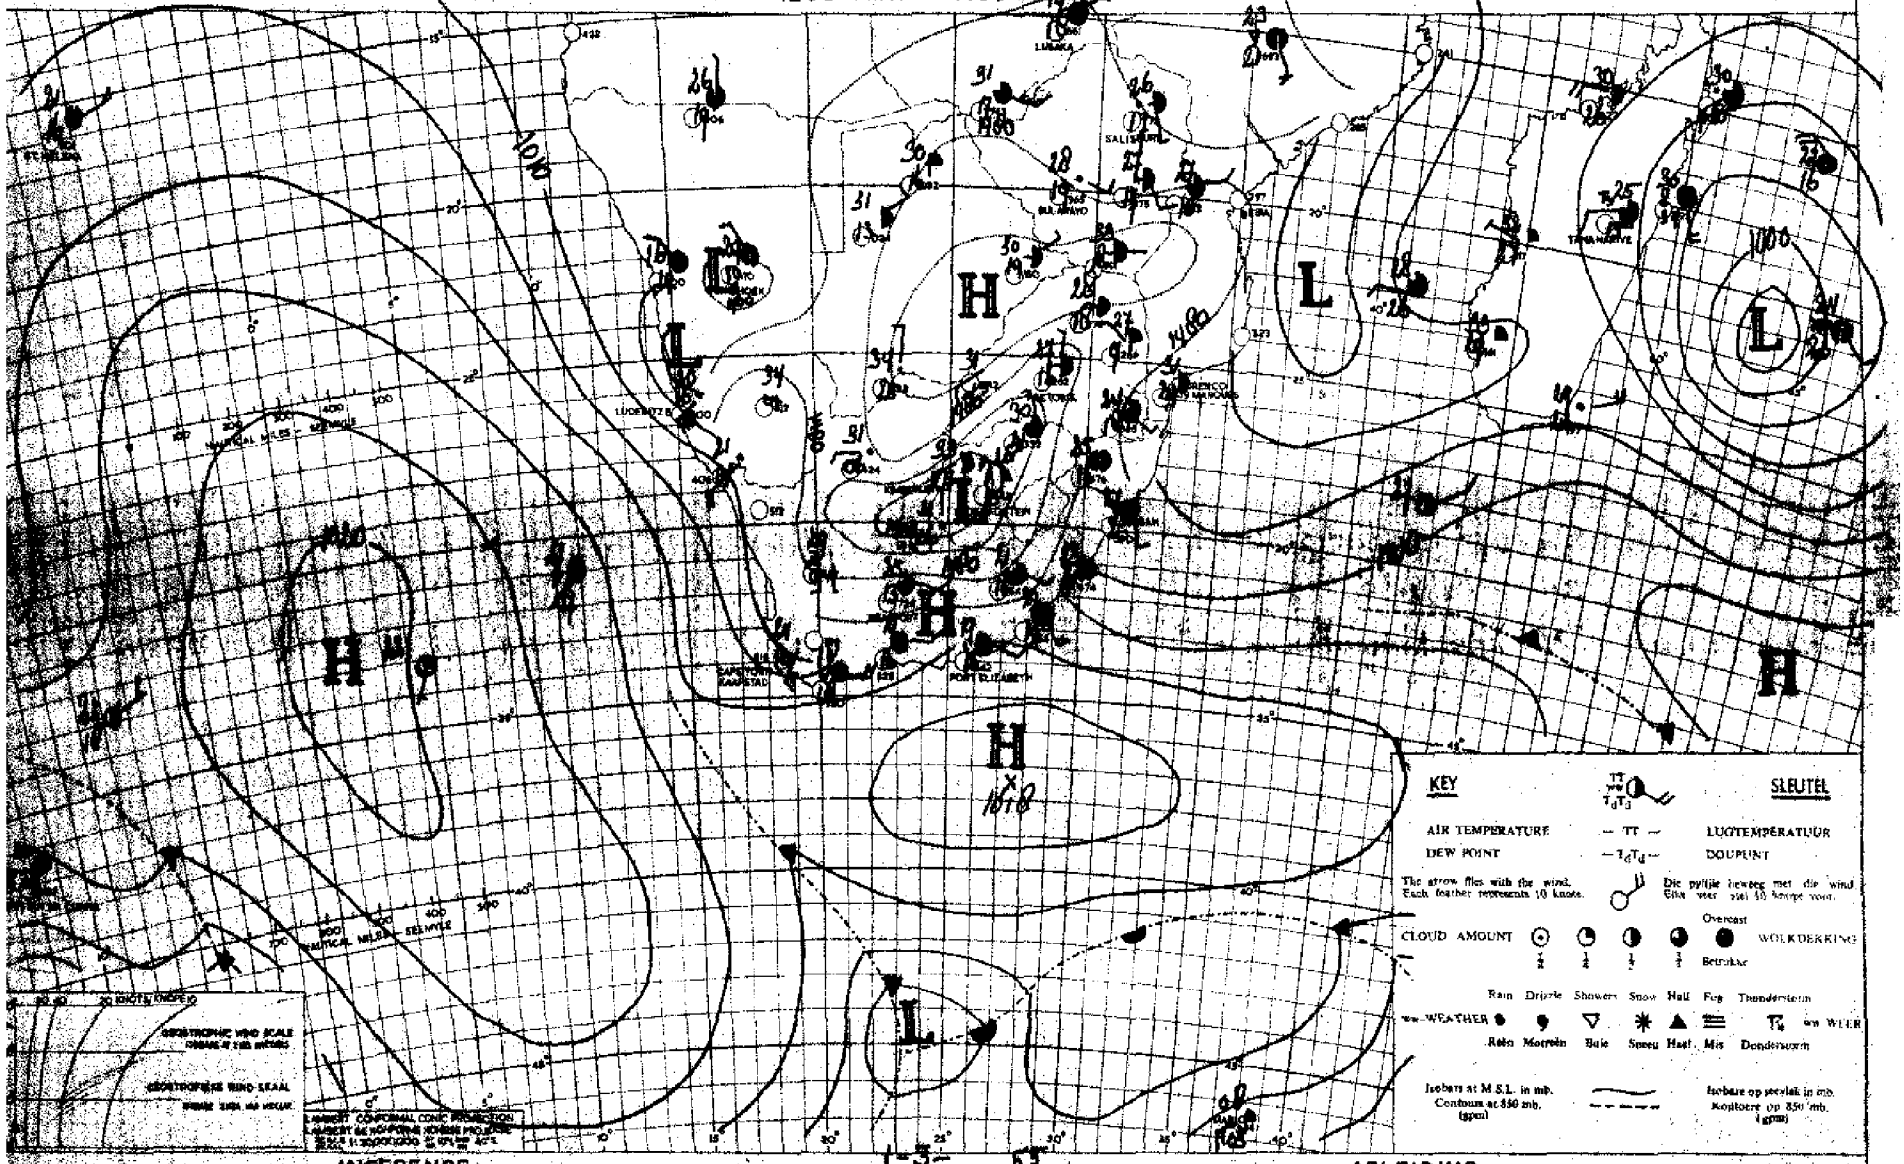
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST SINOPTIESE WEERKAART



INFERENCE

Apart from a slight rise of pressure along the east coast of the Union, little change is expected in the general pressure pattern over the Southern Continent. The weather will be partly cloudy and afternoon thunderstorms will develop over the Southern Transvaal, the Free State and the northern and eastern Cape Province.

DATE 1-3- 19 65

AFLEIDING

DATUM

Met uitsondering van 'n effense styging van lugdruk langs die ooskus van die Unie word min verandering in die lugdruk patroon van die suidelike kontinent verwag. Dit sal gedeeltelik bewolk wees en namiddag donderbuie sal oor die suidelike Transvaal distrikte, die Vrystaat en noord en oos Kaapland ontwikkel.

The anticyclone south of the Union is gradually moving eastwards, but not much change is expected for tomorrow. Cloudy conditions with local light rain will continue over the coastal regions of the southeastern Cape and Natal; and meanwhile the upper air over the northeastern parts of the Union is becoming slowly moister from the northwest.

Die antisikloon suid van die Unie beweeg geleidelik oostwaarts, maar nie veel verandering vir môre word verwag nie. Bewolkte toestande met plaaslike ligte reën sal oor die kuisstreke van suidoos-Kaapland en Natal voortduur; en intussen word die bolug oor die noordoostelike dele van die Unie stadigaan vogtiger vanuit die noordweste.

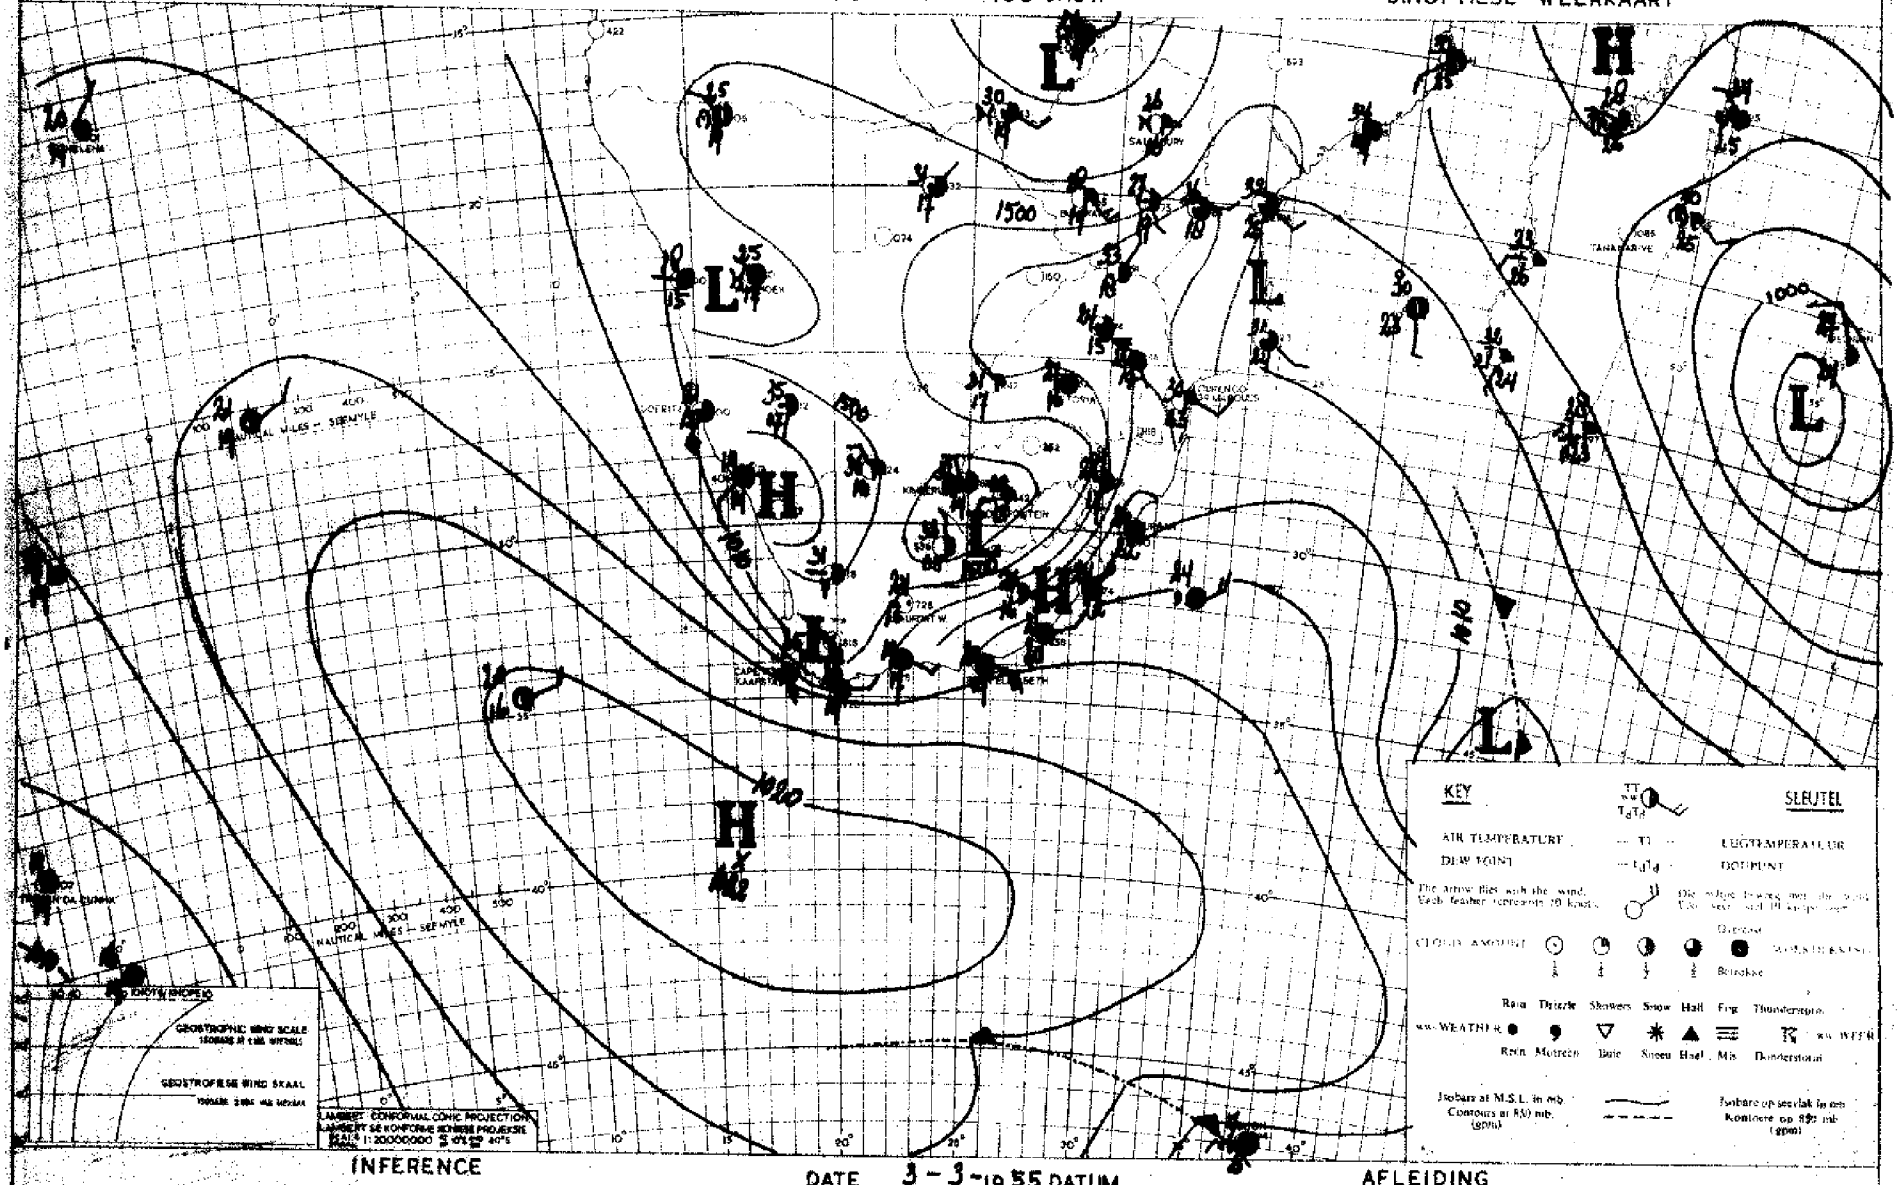
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 3-3-1955 DATUM — AFLEIDING

The Atlantic High is extending a wedge along the eastern Union, and humid air is still circulating over the northern Provinces. Cloudy weather will prevail generally and rain or thundershowers will occur over the Cape interior, the Transkei, Free State, Natal and the Transvaal.

'n Rug van hoë druk strek vanuit die Atlantiese hoogdruk gebied na die oostelike dele van die Unie. Warm vogtige lug sirkuleer nog oor die noordelike Provinsies. Dit sal oor die algemeen bewolk wees en reën of donderbuie sal oor die Kaapse binneland, die Transkei, Vrystaat, Natal en Transvaal uitsak.

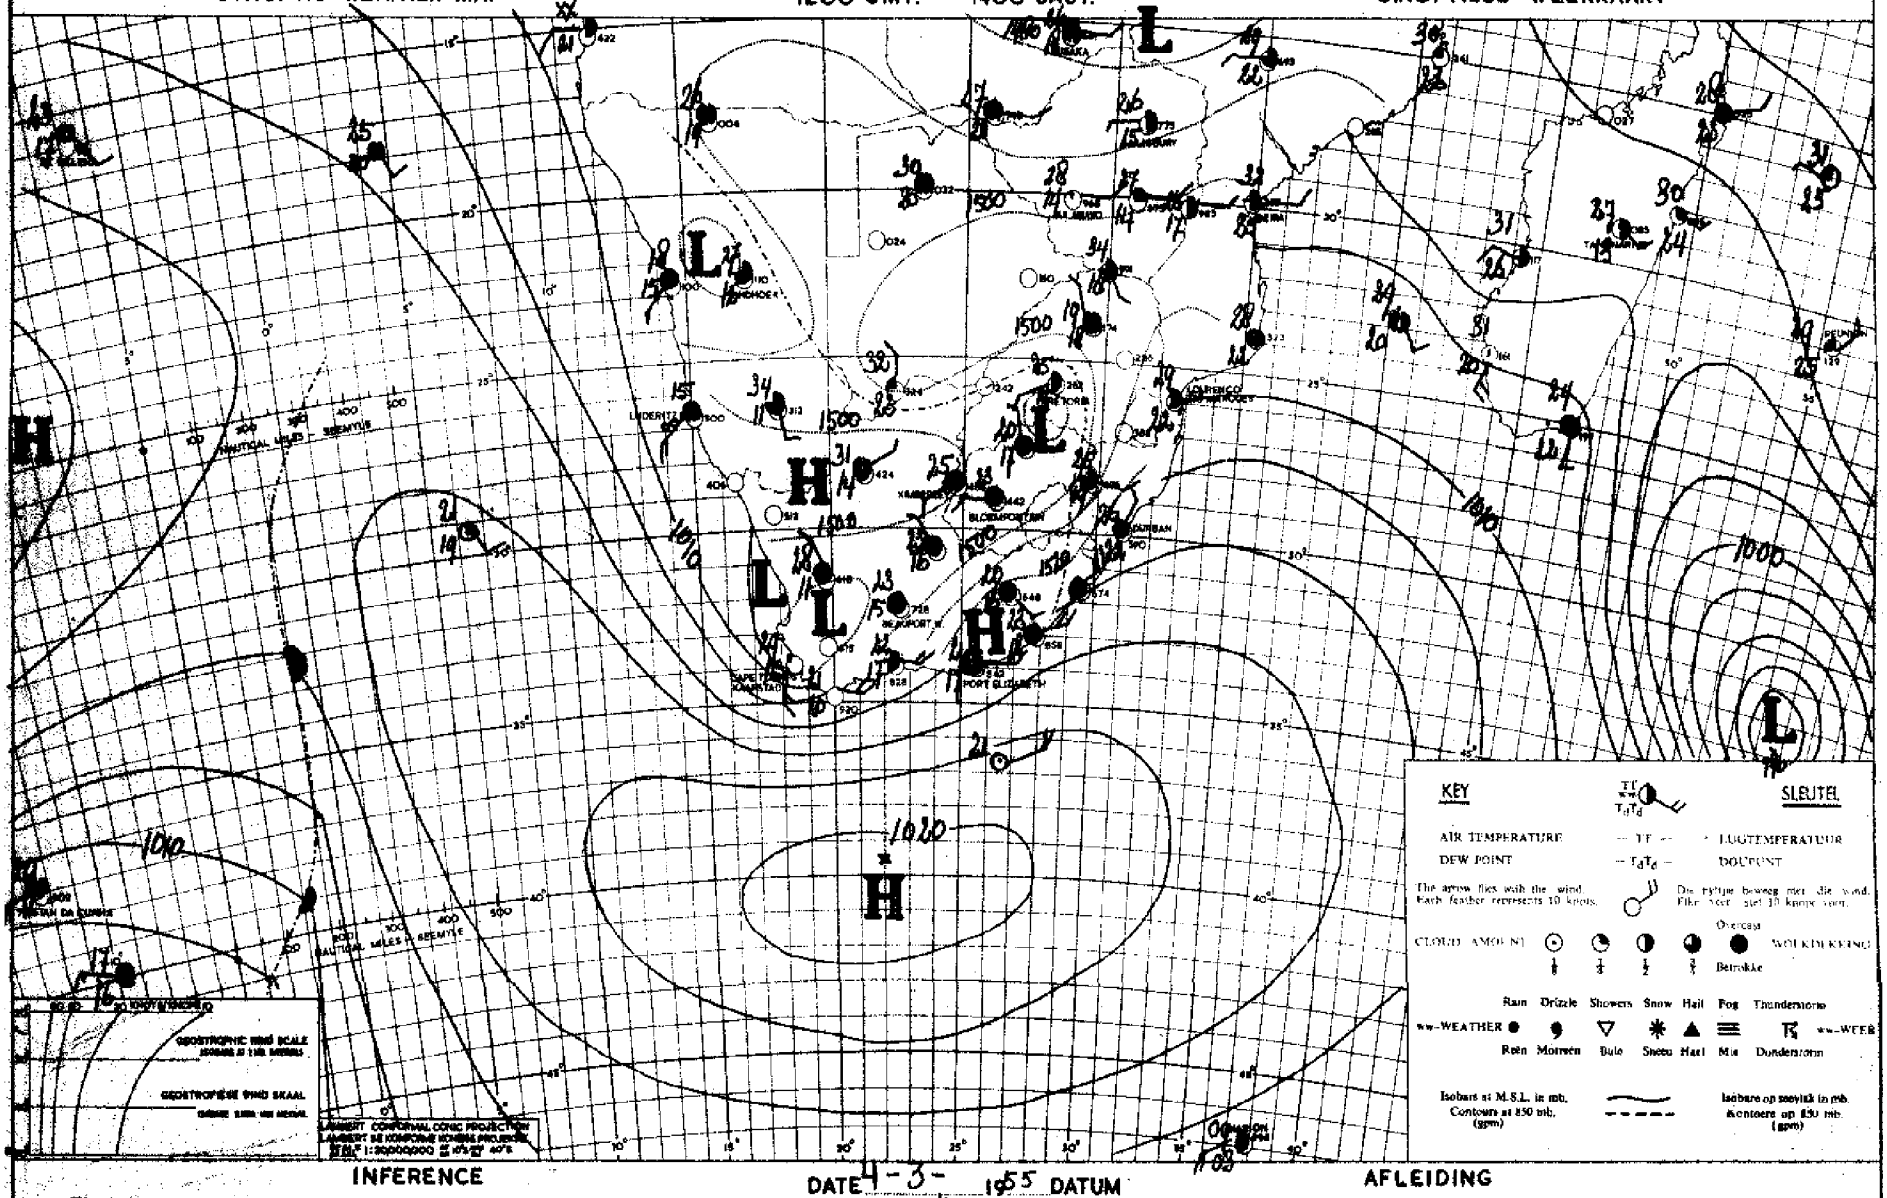
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 4-3-1955 DATUM — AFLEIDING

The Atlantic High is moving gradually eastwards into the Indian Ocean. Maritime air flows over most of the southern and southeastern Union and humid equatorial air is circulating over the northern and eastern part. Apart from the western and southwestern Cape districts, cloudy weather with rain or thundershowers will occur generally.

Die Atlantiese Hoog beweeg geleidelik ooswaarts na die Indiese Oseaan. Seelug het oor die suidelike en suidoostelike Unie ingedring terwyl vogtige ekwatoriale lug oor die noordelike en oostelike dele sirkuleer, met uitsondering van die westelike en suidwestelike distrikte van Kaapland sal bewolkte weer gepaard met reën of donderbuie taamlik algemeen voorkom.

Little change is expected in the weather conditions for the next day or two. Cloudy weather accompanied by scattered rain or thunderstorms will occur over northern, Central and Eastern Cape districts, over the Free State, Natal and the Transvaal.

Min verandering word gedurende die volgende paar dae oor die Unie verwag. Bewolkte weer gepaard met verspreide reën of donderbuie sal oor die noordelike, sentrale, en oostelike distrikte van Kaapland, en oor die Vrystaat, Natal en Transvaal voorkom.

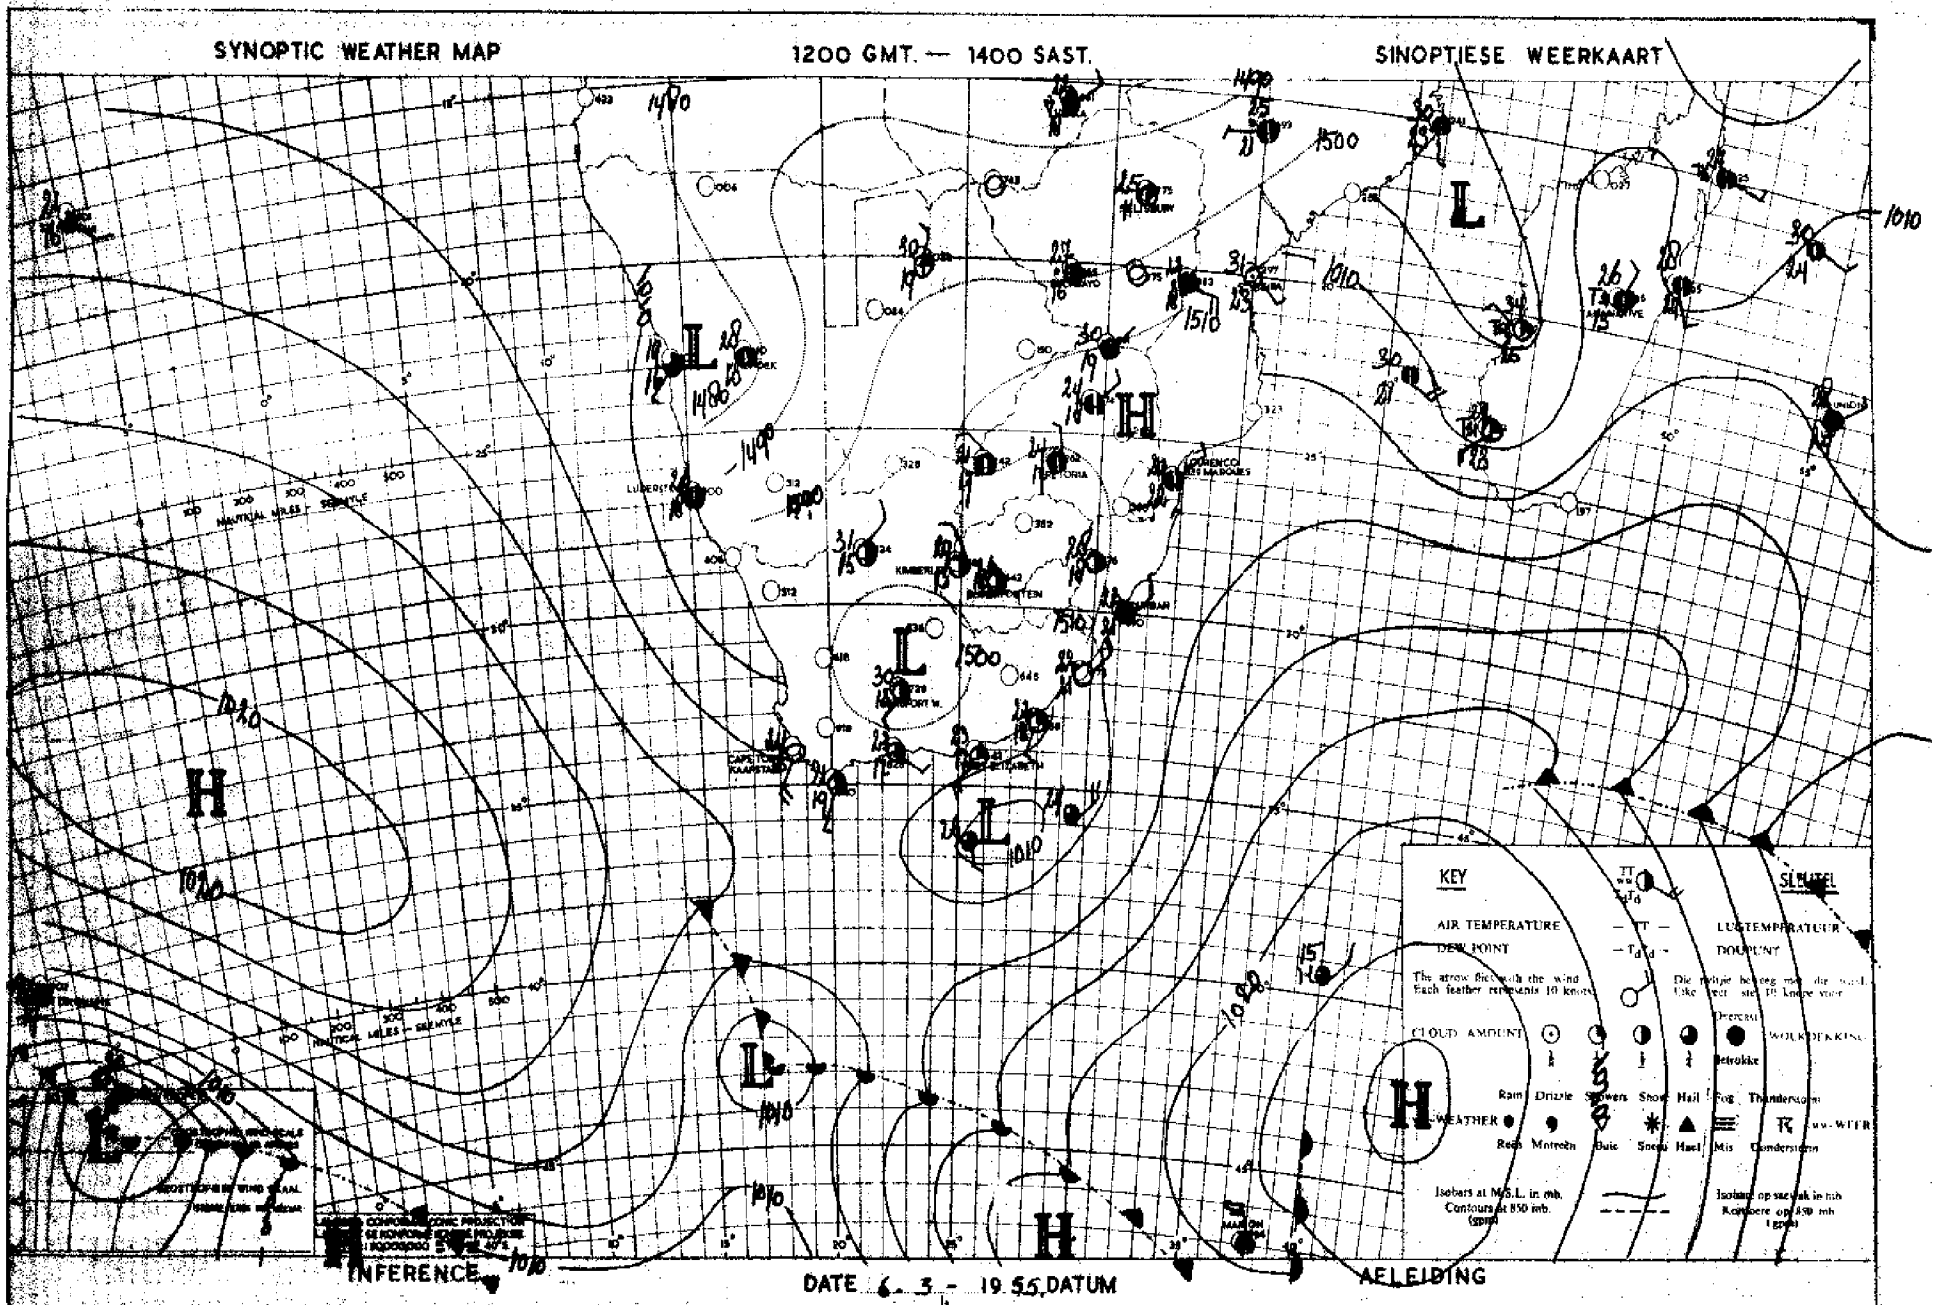
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



As a result of the eastward movement of the low pressure area south of the Union, the weather over the northern coastal regions of Natal will clear. Over the remainder of the coastal areas weather will be fair but a weak inflow of sea air will cause temporary fog and low cloud in the morning.

As gevolg van oostwaartse beweging van die lugdrukgebied suid van die Unie sal die weer oor die noordelike kusstreke van Natal opklaar. Oor die res van die kusstreke sal dit redelik mooi weer wees maar 'n swak instroming van seelug sal tydelike mistoestande in die oggend veroorsaak.

INFERENCE

The low pressure region along the south-east will move away to the Natal coast by tomorrow. The inland Low will also move over the Natal interior by tomorrow. Consequently there will be a slight inflow of drier air over the south-western Cape districts thereby clearing the weather over these areas. Over the remainder of the Union it will remain cloudy to overcast skies and rain over the [illegible]

DATE 7 - 3 - 55

19 DATUM

AFLEIDING

Die laagdruk gebied langs die suidkus sal geleidelik teen môre na die Natalse kus beweeg. Teen môre sal die binnelandse Laag posisie oor die Natal binneland inneem. As gevolg hiervan sal 'n effense invloed van droër lug oor die suid-weste van die Kaap voorkom en die weer sal oor hierdie streke opklaar. Oor die res van die Unie sal die bewolkte tot bewolkte hemel [illegible] donderbuie sal

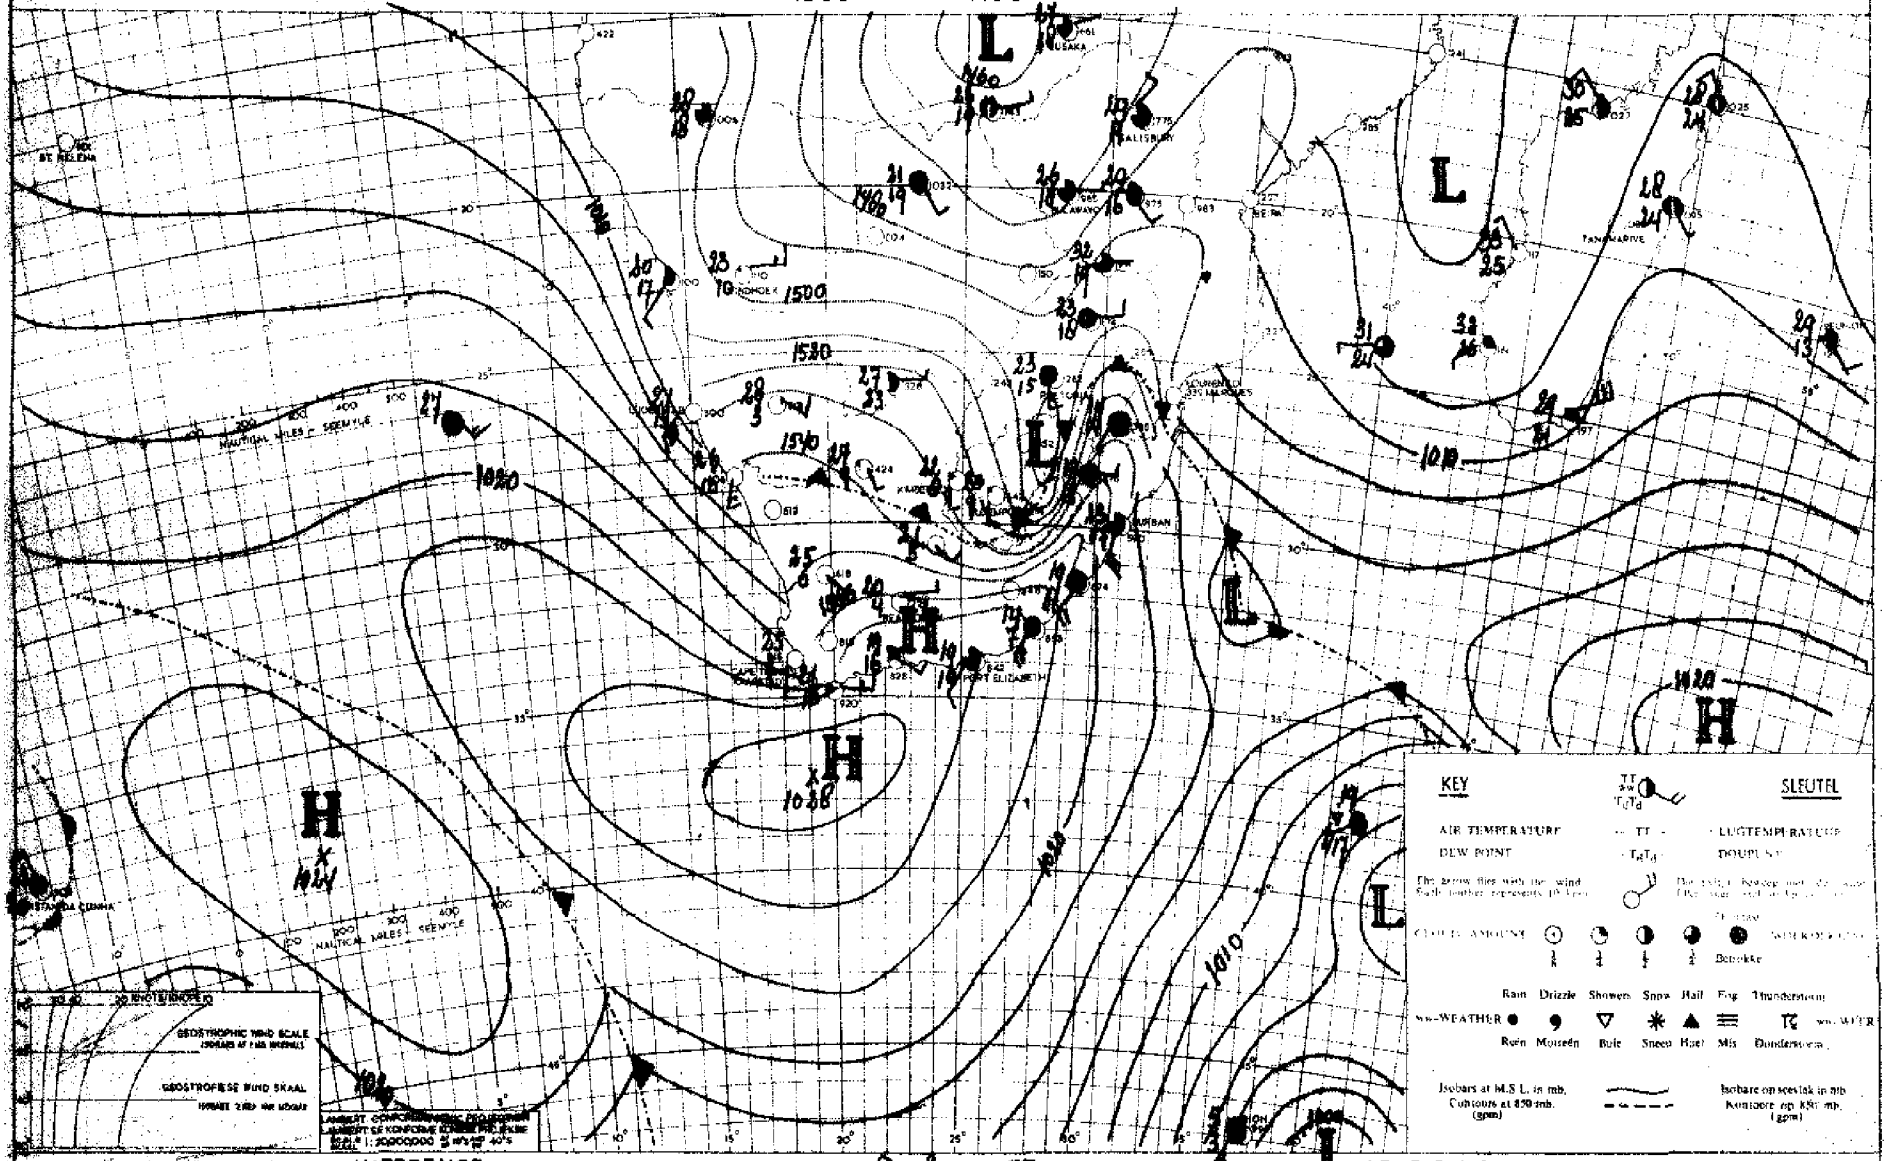
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE

The Atlantic High south of the continent is feeding colder air into the southern, central and Eastern Union. Cloudy weather will still occur over Pondoland, Natal and the Transvaal and local rain will occur over the northern and eastern Transvaal and the Natal and Pondoland coast. Over the remainder of the Union it will be fine and cool.

DATE 9-3-1955 DATUM

AFLEIDING

Die Atlantiese Hoog, suid van die kontinent stoot koue vogtige lug oor die suidelike, sentrale en Oostelike Unie. Bewolkte weerstoestande sal nog oor Transvaal, Natal en Pondoland voorkom, en plaaslike reën sal oor noord en oos Transvaal en langs die kusstreke van Natal en Pondoland voorkom. Oor die res van die Unie sal dit mooiweer en koel wees.

The antiocyclonic area south of the Union is moving rather slowly eastwards, and the weather along the southeastern and eastern coastal districts of the Union will gradually clear. Otherwise not much change is expected.

Die antisikloniese gebied suid van die Unie beweeg ietwat stadig ooswaarts, en die weer langs die suidoostelike en oostelike kuststreke van die Unie sal geleidelik opklaar. Andersins word nie veel verandering verwag nie.

INFERENCE

Owing to the influence of the tropical cyclone east of Madagascar, the further movement of the anticyclone southeast of the Union will probably be southeastwards, not eastwards. Consequently not much change in pressure distribution and weather conditions over the Union coastal regions is expected.

AFLEIDING

Weens die invloed van die tropiese sikloon oos van Madagaskar, sal die verdere beweging van die antisikloon suidoos van die Unie waarskynlik suidooswaarts wees, nie ooswaarts nie. As gevolg hiervan word nie veel verandering in drukverspreiding en weerstoestande oor die Unie se kusstreke verwag nie.

INFERENCE

DATE 12-3-1958 DATUM

AFLEIDING

Moderately moist air is flowing southwards over Southwest Africa and Bechuanaland to the Cape Province and partly cloudy weather will develop over the western and central interior Cape. Drier air circulates over Natal, Transvaal and eastern Free State around an upper anticyclone and it will be fair over these provinces.

Vogtige lug beweeg suidwaarts oor Suidwes-Afrika en Betsjoanaland na die Kaapprovinsie en gedeeltelik bewolkte weer sal oor wes- en middel Kaapland ontwikkel. Droër lug sirkuleer om 'n bolug hoog oor Natal, Transvaal en die oostelike Vrystaat en dit sal redelik mooiweer wees oor hierdie dele.

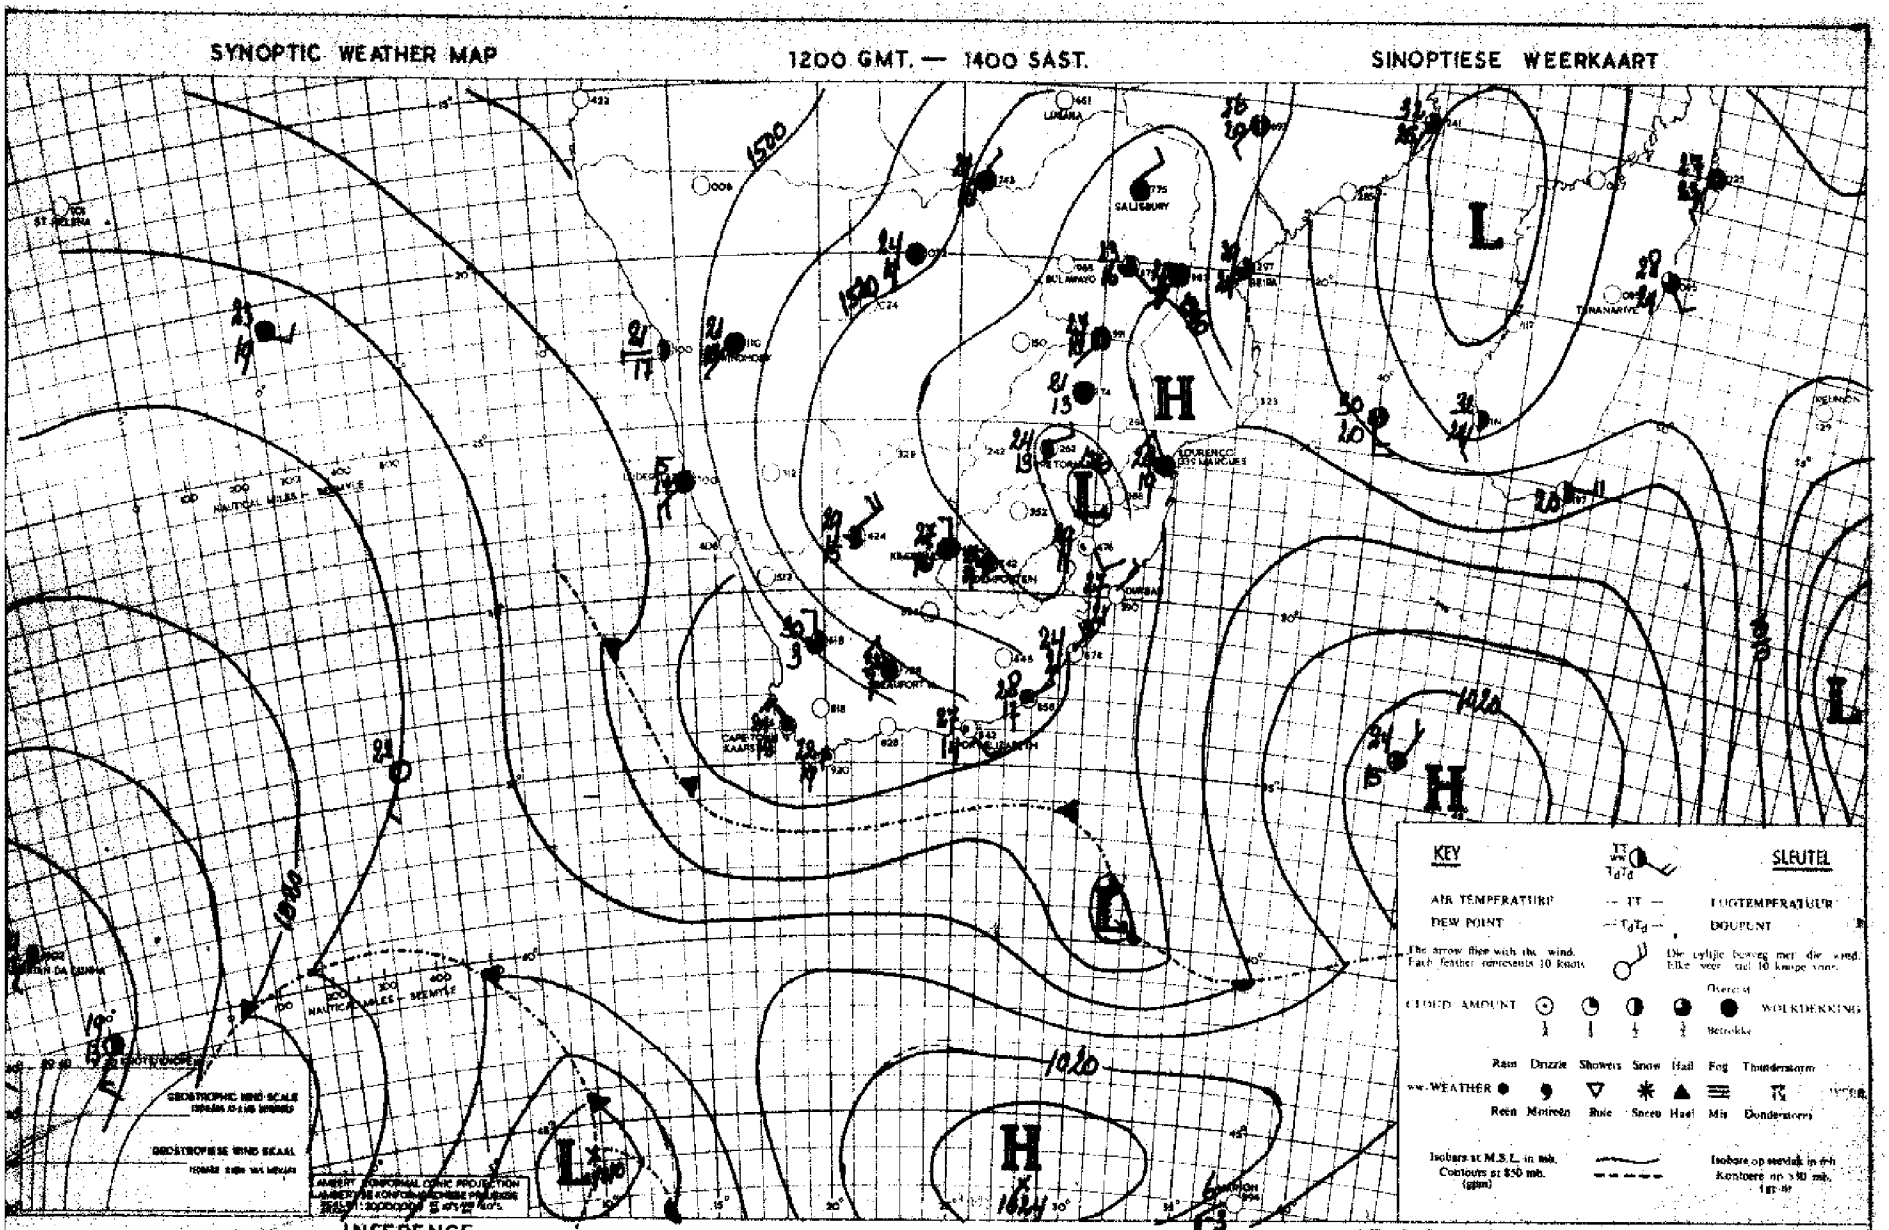
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE

DATE 13-3 1955

A gradual rise of pressure will occur along the west, southwest and south Cape coast, and cooler Atlantic air will cause cloudy weather over these areas. Over the rest of the Union partly cloudy and mild weather will persist. Local thunderstorms will develop over the Central and Southern Cape interior districts, the Transkei and the southwestern Free State.

AFLEIDING

DATUM

'n Geleidelike drukstyging sal langs die wes, suidwes en suid Kaapse kusstreke plaasvind en as gevolg van invloei van koeler atlantiese lug sal bewolkte toestande oor hierdie streke plaasvind. Oor die res van die Unie sal dit bewolk en matig bly. Donderweer sal plaaslik oor die Middel en Suidelike binnelandse distrikte van Kaapland, die Transkei en die suidwestelike Vrystaat ontwikkel.

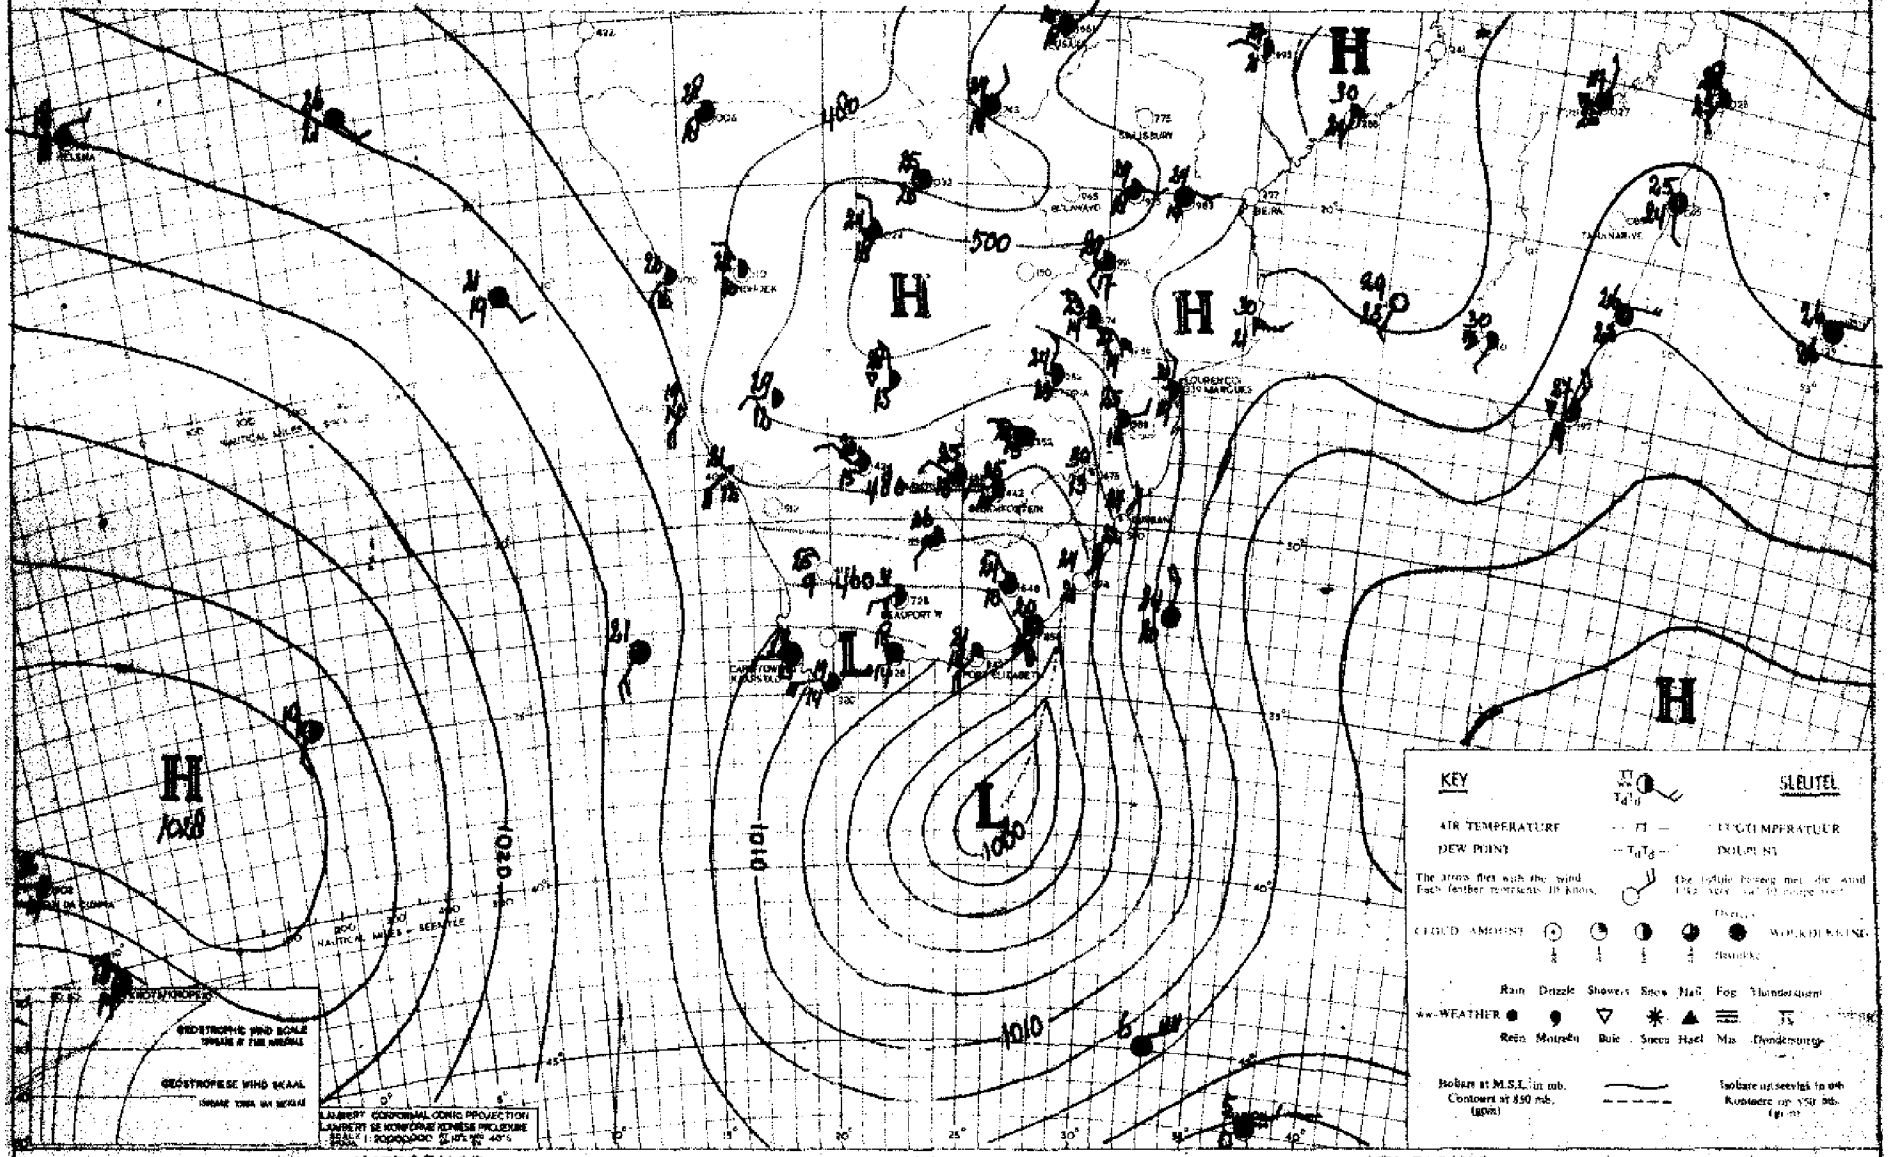
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE

DATE 14-3-1955 DATUM

A deep depression has developed between Marion and the Union, while an anticyclone of moderate intensity is approaching east of Tristan. Warm, moist air is flowing from northwest over the north of the Union and Southwest Africa, but cooler, drier air is already affecting southwestern Cape and this air will penetrate eastwards tomorrow.

AFLEIDING

'n Diep laag het tussen Marion en die Unie ontwikkel terwyl 'n hoog van matige intensiteit oos van Tristan aankom. Warm vogtige lug vloei uit die noordweste oor die binnelandse gebiede van die Unie en Suidwes, maar koeler droër lug beïnvloed reeds die suidwestelike Kaapprovinsie, en hierdie lug sal môre ooswaarts beweeg.

DATE 15-3-1955 DATUM

AFLEIDING

Dry air has moved into the Cape Province, Free State, Natal and the Southwestern Transvaal and will influence the remainder of Transvaal by tomorrow. Cloudy weather will still occur along the south and southeast coast but elsewhere over the Union it will be fine and mild.

Droër lug het oor die Kaap Provinsie, die Vrystaat, Natal en Suidwes Transvaal beweeg en sal teen môre ook die res van Transvaal beïnvloed. Bewolkte weer sal nog langs die suid en suidooskus voorkom maar elders oor die Unie sal dit mooiweer wees met matige temperature.

With the expected eastward movement of the Atlantic high a rise in pressures is expected over the eastcoast. Humid air accompanied by cloudy conditions will move over Transvaal and the north-eastern Freestate. With the drier air over the remainder of the interior it will remain fine with rising temperatures.

Met die verwagte ooswaartse beweging van die Atlantiese hoog word 'n styging in druk langs die ooskus verwag. Vogtige lug, gepaard met bewolkte toestande sal oor Transvaal en die noordoostelike Vrystaat beweeg. Met die droër lug oor die res van die binneland sal dit mooiweer bly en warmer word.

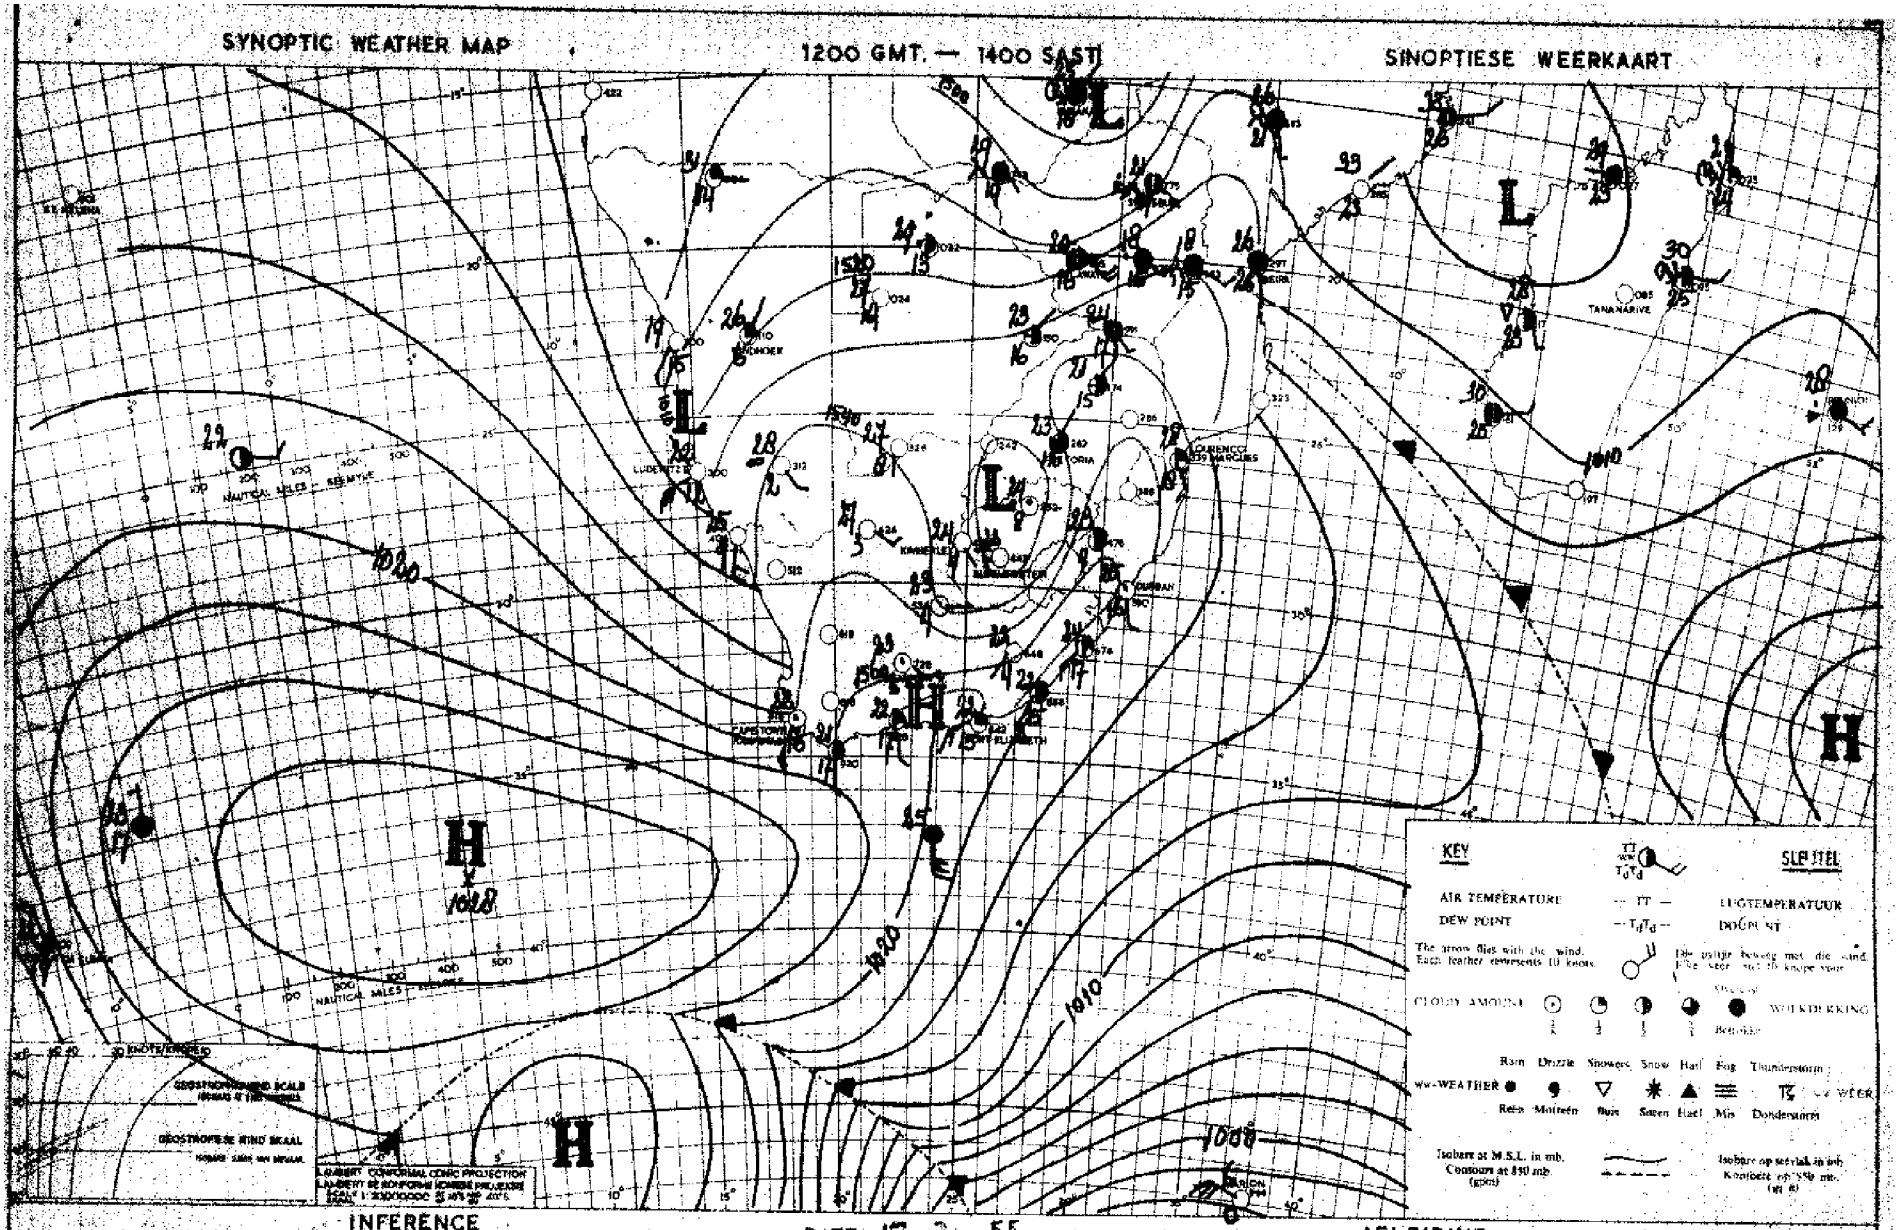
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST SINOPTIESE WEERKAART



INFERENCE

DATE 17-3-1955 DATUM

AFLEIDING

The Atlantic High will move to the southeast coast by tomorrow and thus pressure will rise over the eastern half of the Union. The weather will be cloudy over Transvaal, Natal and the Transkei. Some very light shower activity will occur along the Pondoland and Natal coast, and local thunderstorms are possible over the Southern Transvaal. Elsewhere over the Union it will be fine.

Die atlantiese Hoog beweeg geleidelik na die suidooskus en dus sal drukstygings môre oor die oostelike helfte van die Unie plaasvind. Dit sal bewolk wees oor Transvaal, Natal en die Transkei. Ligte buie van tydelike aard sal langs die Pondoland en Natal kus plaasvind en plaaslike donderbuie sal moontlik oor Suid Transvaal ontwikkel.

INFERENCE

With the movement of the high south of the Union round the east coast it will gradually clear over the Cape coasts, but the influx of moist air will continue over Natal, Transvaal and over the north-eastern Freestate, causing mild cloudy conditions.

DATE 18-3-55 DATUM

AFLEIDING

Met die beweging van die hoog suid van die Unie om die oos-kus sal dit geleidelik opklaar oor die Kaapse kuststreke, maar die invloei van vogtige lug sal voortduur oor Natal, Transvaal en die noordoostelike Vrystaat, en matige bewolkte toestande sal voorkom.

INFERENCE

DATE 19-3-1955 DATUM

AFLEIDING

The high pressure cell on the Natal coast dominates the air circulation over the Union. Apart from local cloudy weather over the northern half of Transvaal, fine weather conditions will prevail throughout the Union. Berg-winds will cause high temperatures over the west and southwest Cape.

Die sel van hoë druk langs die Natal kus beheer die lugsirkulasie oor die Unie. Met uitsondering van plaaslike bewolkte toestande oor die noordelike helfte van Transvaal, sal dit deurgaans mooiweer oor die Unie wees. Bergwinde sal hoë temperature oor wes en suidwes Kaapland veroorsaak.

INFERENCE

DATE 20-3- 1955 DATUM

AFLEIDING

The high pressure cell over the Eastern Union is moving gradually eastward but it will still dominate the circulation of air over the Union. Light cloudy conditions will occur locally but otherwise clear skies will prevail over the Union. Due to berg-wind conditions temperatures will be high over the southern Cape.

Die hoogdruk sel wat gister langs die Natal kus gelê was beweeg geleidelik oostwaarts maar dit sal nog die lugstroming oor die Unie beheer. Ligte bewolking sal plaaslik voorkom maar andersins sal die lug oor die Unie wolkloos bly. Weens bergwinde sal hoë temperature oor Suid Kaapland voorkom.

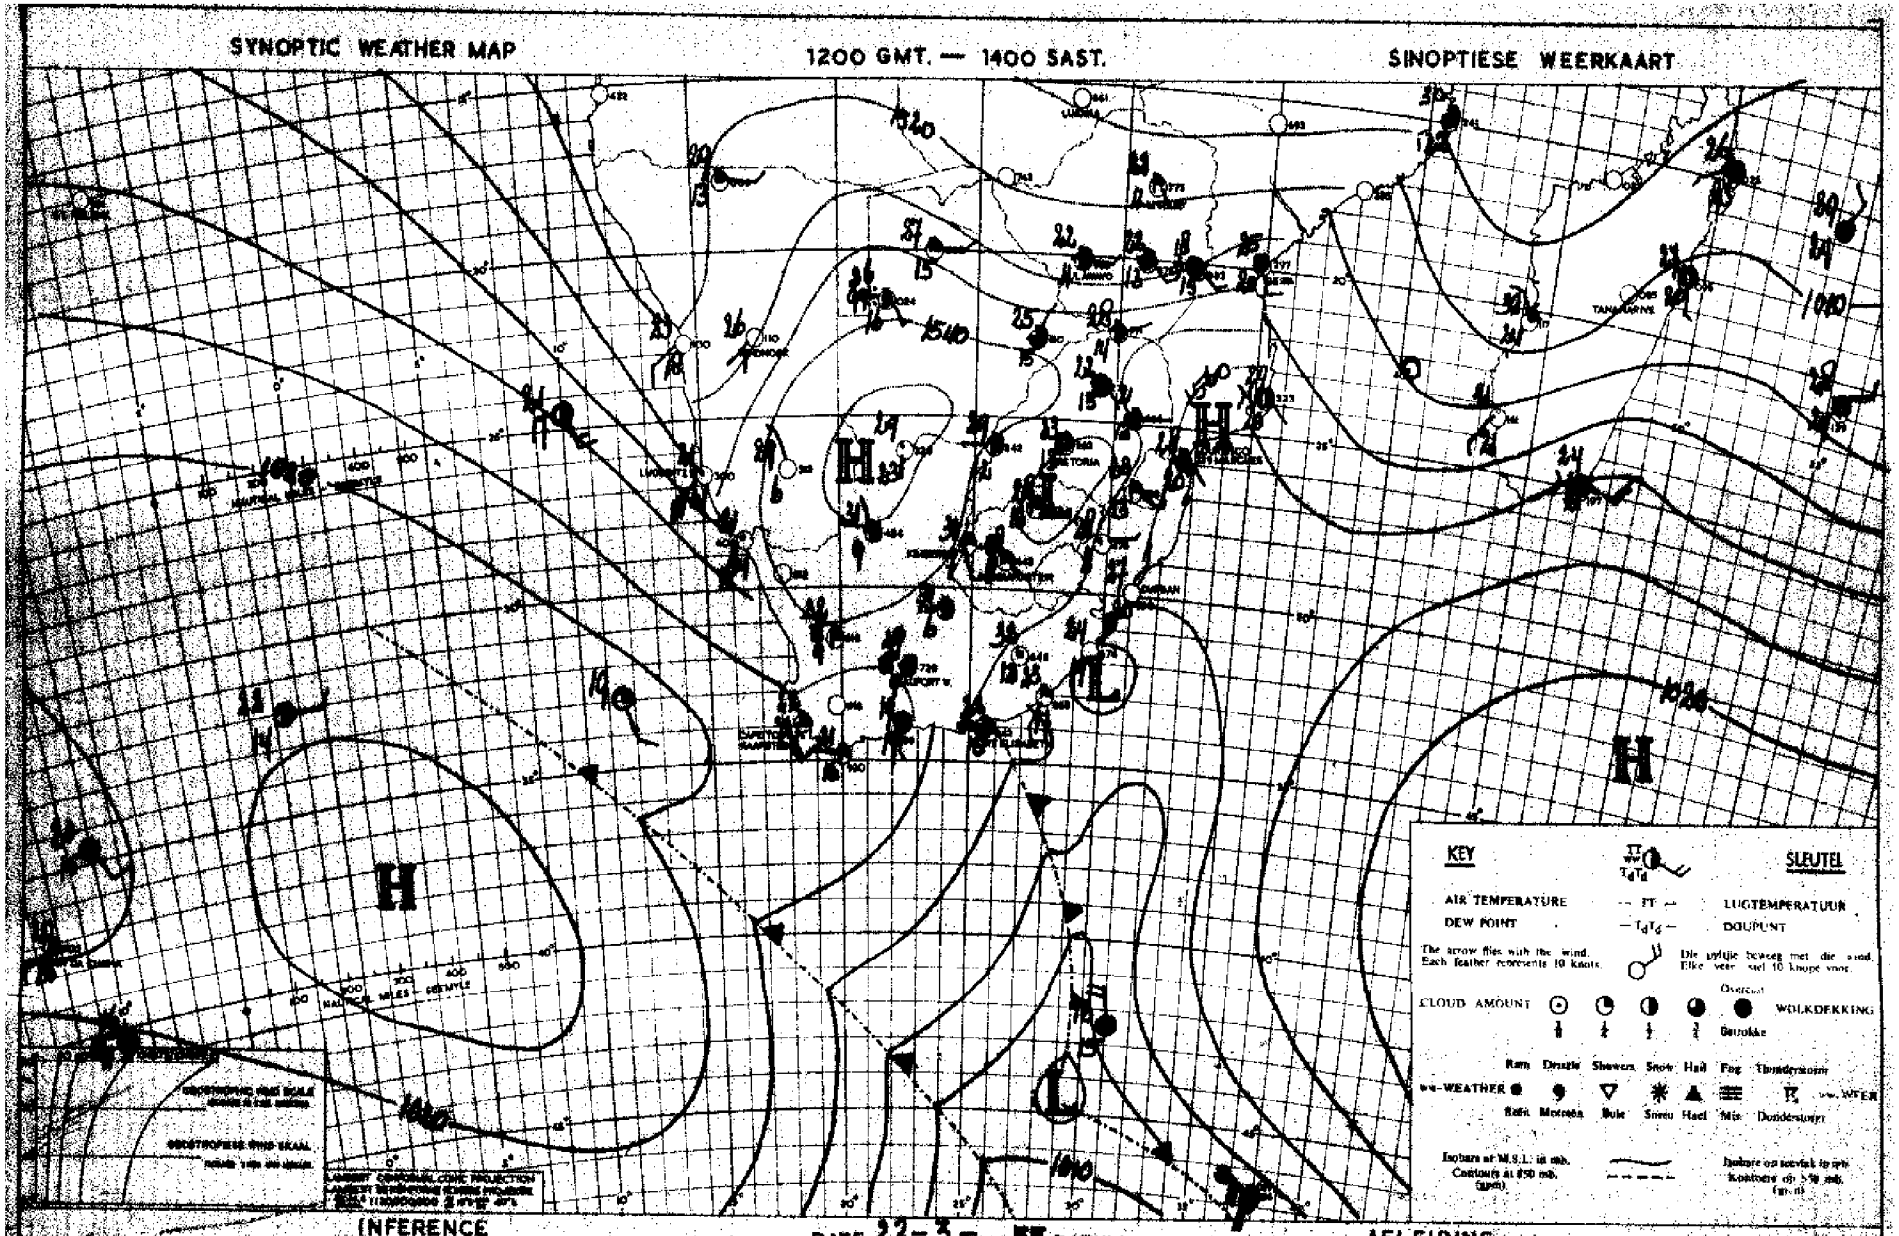
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

An influx of cooler air from the southwest caused temporary cloudy conditions and light showers over southern and south-eastern Cape. Fairly moist air is maintained over the Transvaal and partly cloudy conditions will persist. The remainder of the Union will remain fine to fair.

DATE 22-3-1955 DATUM

AFLEIDING

'n Instroming van koeler lug uit die suidweste veroorsaak tydelike bewolkte toestande en ligte buie oor suidelike en suidoostelike Kaapland. Betreklike vogtige lug bly aanwesig oor Transvaal en gedeeltelik bewolkte toestande sal voortduur. Oor die res van die Unie sal dit egter hoofsaaklik mooiweer bly.

The high south of the Union will split and part of it will move eastwards. Easterly to northeasterly winds will be maintained over the Eastern Union. Apart from moving fog over the west and south Cape coast, the weather will be fine over these areas. Cloudy weather will prevail over Zululand and Transvaal, but over the remainder of the Union it will be fair to partly cloudy.

Die hoog suid van die Unie sal splits en 'n gedeelte daarvan sal ooswaarts beweeg. Ooste tot noordooste winde sal oor die oostelike Unie gehandhaaf bly. Met uitsondering van tydelike mistige weer langs die wes en suidkus van Kaapland sal dit mooiweer wees oor hierdie gebiede. Bewolkte weer sal oor Zoeloeland en Transvaal voorkom maar oor die res van die Unie sal dit effens tot gedeeltelik bewolk wees.

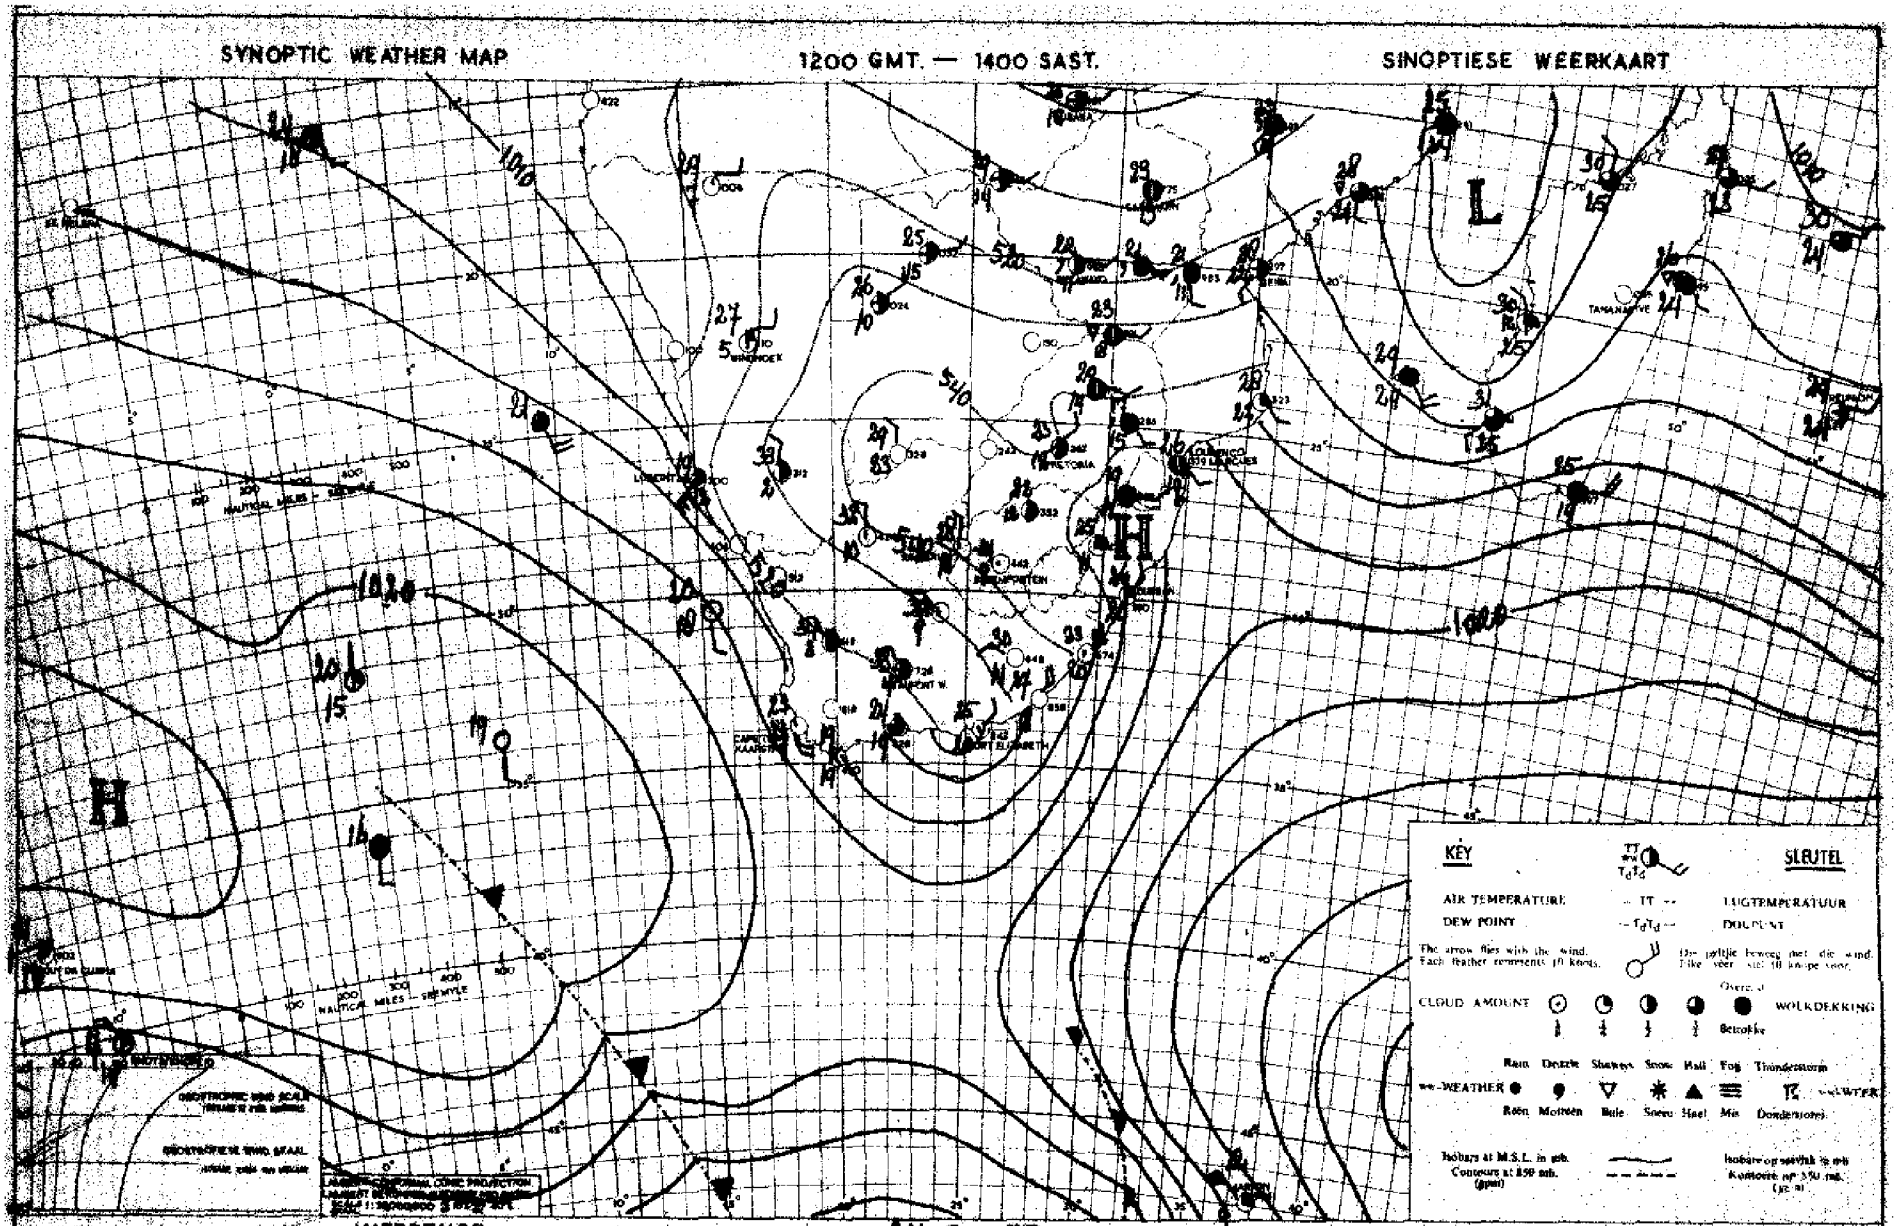
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 24-3 1955 DATUM AFLEIDING

Cloudy to overcast conditions with light rain will persist over eastern and north, eastern Transvaal, and light drizzle will occur over the mountains. The air over the remainder of the Union is not very moist, and only partly cloudy conditions will occur. There is a possibility of isolated thunder-conditions over South-ern-Cape.

Bewolkte tot betrokke toestande sal voortduur oor oostelike en noordoostelike Transvaal en ligte motreën sal oor die bergreek-se uitsak. Die lug oor die res van die Unie is nie baie vogtig nie, en slegs gedeeltelik bewolkte toestande sal voorkom. Los donderweers-toestande is egter moontlik oor suidelike Kaapland.

INFERENCE

DATE 25-3-1965 DATUM

AFLEIDING

The frontal systems west of the Cape are weak and it is not expected that they will have any effect on the weather over the Union. With the movement of the high round the east coast cooler air will once again flow over the eastern half of the Union. Partly cloudy weather will occur fairly generally and light thunder conditions are possible over southwestern Freestate and over the adjacent Cape districts.

Die fronte wes van die Kaap en dit word nie verwag dat hulle enige effek op die weer oor die Unie sal uitoefen nie. Met die beweging van die hoog om die ooskus sal koeler lug weereens oor die oostelike helfte van die Unie invloei. Gedeeltelike bewolkte weer sal taamlik algemeen voorkom en ligte donderweerstoestande is moontlik oor suidwes Vrystaat en oor die aangrensende Kaapse distrikte.

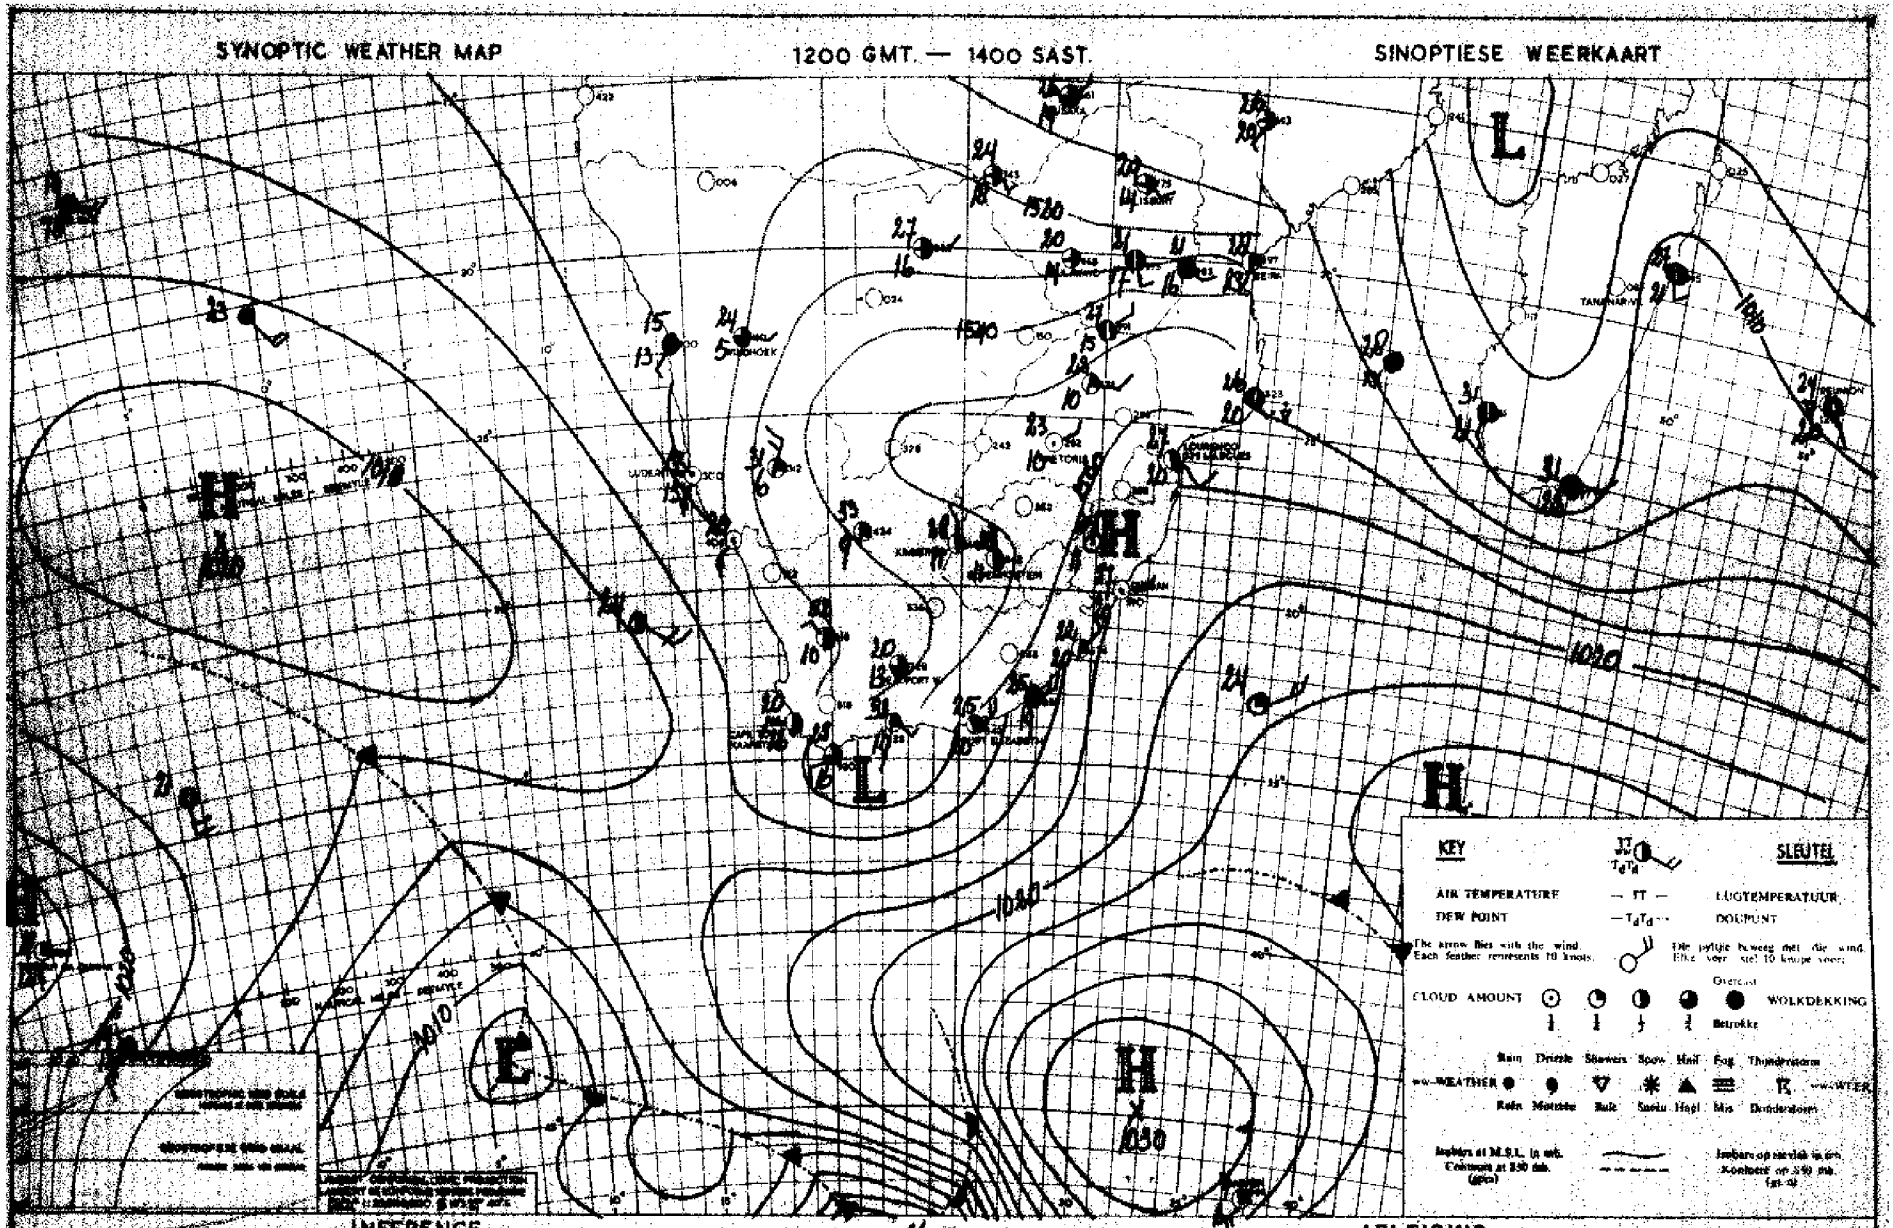
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

The rapidly intensifying high near Marion will be replaced tomorrow by a deep low due south of the Union and the trough extending northeast from this low will reach the southwest coast. Dry air is still circulating over Transvaal, Natal and the O.F.S. but slightly moist air will circulate over S.W. Africa and the Cape causing local light thundery showers.

DATE 16-3-1955 DATUM

AFLEIDING

Die intensifiserende hoog naby Marion sal môre verdring word deur 'n diep laagdrukstelsel suid van die Unie en die trog wat na noordwes strek vanaf die laagdrukstelsel sal die suidweskus bereik. Droë lug sirkuleer steeds oor Natal, Transvaal en die Vrystaat, maar effens vogtiger lug beweeg suidwaarts oor S.W. Afrika en die Kaap, waar ligtedonderbuie sal voortduur.

Cooler maritime air is invading the southwestern and southern Cape Province, and as a resu t cloudy weather and local light rain will occur over these areas. The circulation ober the remainder of the Union is still dominated by the Indian Ocean anticyclone and the tropical disturbance in the Mocambique channel. Partly cloudy to fair weather will occur generally with local afternoon thunder over the Karo the southeastern Cape and Griqualand West.

Koeler seelug dring die suidwes en suid Kaapland binne en bewolkte weer gepaard met plaaslike ligte buie sal oor hierdie streke voorkom. Die lugstroming oor die res van die Unie word beheer die Indiese Oseaan Hoog en die tropiese steuring oor die Mosambiek Kanaal. Gedeeltelik tot effens bewolkte weer sal algemeen voorkom en enkele donderbuie sal gedurende die middag oor die Karo Suidoos Kaapland en Griekwaland Wes ontwikkel.

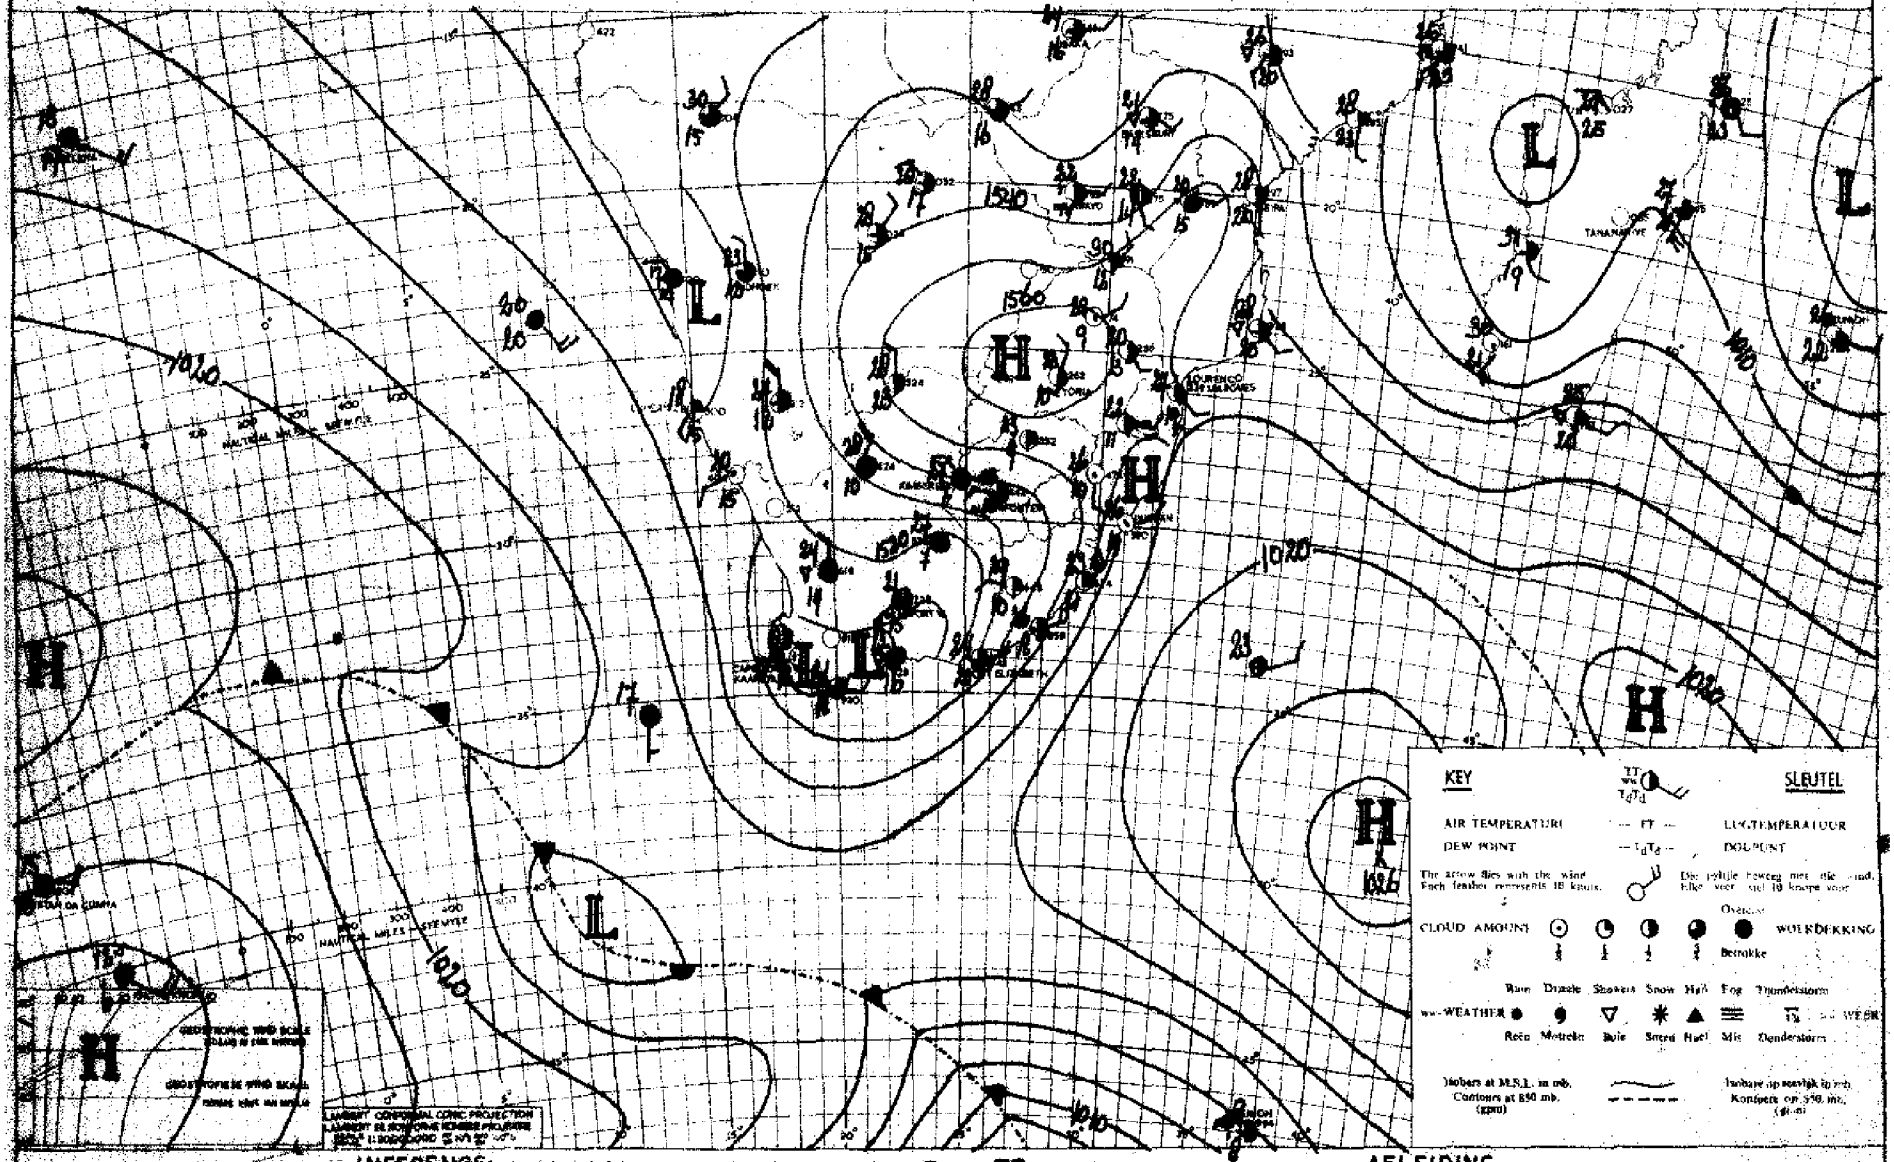
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE

As a result of sharp pressure falls over the southwest and southern Cape, more humid air is drawn in from Bechuanaland and S.W.A. towards the southern Union. Cloudy weather conditions will continue over the Cape Province and the southern half of the Free State. And local thunderstorms will develop during the afternoon or evening. Rainy weather will develop over the Cape southwest and southcoast.

DATE 28-3-55 DATUM

AFLEIDING

As gevolg van die skerp daling van lugdruk oor suidwes en suid Kaapland sal meer vogtige lug vanaf Betsjoeanaland en S.W.A. na die suidelike Unie stroom. Bewolkte toestande sal oor die Kaapprovinsie en die suidelike helfte van die Vrystaat voorkom en plaaslike donderbuie sal gedurende die namiddag of aand oor hierstreke ontwikkel. Reënagtige weer sal langs die kuststreke van

With the eastward movement of the cold front west of the Cape, colder air will move from the southwest over the Union. Unsettled weather will occur over the Cape coasts, and with the displacement of the relatively humid air over Northern Cape, the Freestate and Transvaal, showers will occur.

Met die ooswaartse beweging van die koue front wes van die Kaap sal koeler lug uit die suidweste oor die Unie beweeg. Ongestadigde weer sal oor die Kaapse kusstreke voorkom en met die verplasing van die redelike vogtige lug oor Noord-Kaapland, die Vrystaat en Transvaal sal buie uitsak.

DATE 31-3-1975 DATUM

INFERENCE

Cooler Atlantic sea-air is gradually moving along the south and southeast Cape coast towards Natal. The weather will therefore be cloudy to partly cloudy along the Cape southeast and east coast, and over Natal. Drier air has penetrated the western half of the Union resulting in fine weather with low temperatures over these areas. Cloudy to partly cloudy weather will persist over Transvaal and the northeastern Free State.

AFLEIDING

Koeler Atlantiese seelug beweeg geleidelik langs die suid en suidooskus van Kaapland na Natal. Dit sal dus gedeeltelik bewolk wees langs die Kaapse suidoos en ooskus asook oor Natal. Droër lug het die westelike helfte van die Unie binnegedring en as gevolg hiervan sal mooiweerstoestande gepaard met lae temperature oor hierdie streke voorkom. Bewolkte tot gedeeltelik bewolkte weer sal oor Transvaal en Noord Vrystaat bly voortduur.

Drier air is moving in over the Union from the west and except for scattered clouds over Transvaal it will be mainly fine. It is expected however that the front near the Cape will cause temporary unsettled conditions over the southwestern and southern coasts.

Droër lug beweeg uit die weste oor die Unie en afgesien van verspreide wolke oor Transvaal sal dit hoofsaaklik mooiweer word. Daar word egter verwag dat die front suid van die Kaap tydelik ongestadigde weer oor die suidwestelike en suidelike kuststreke sal veroorsaak.

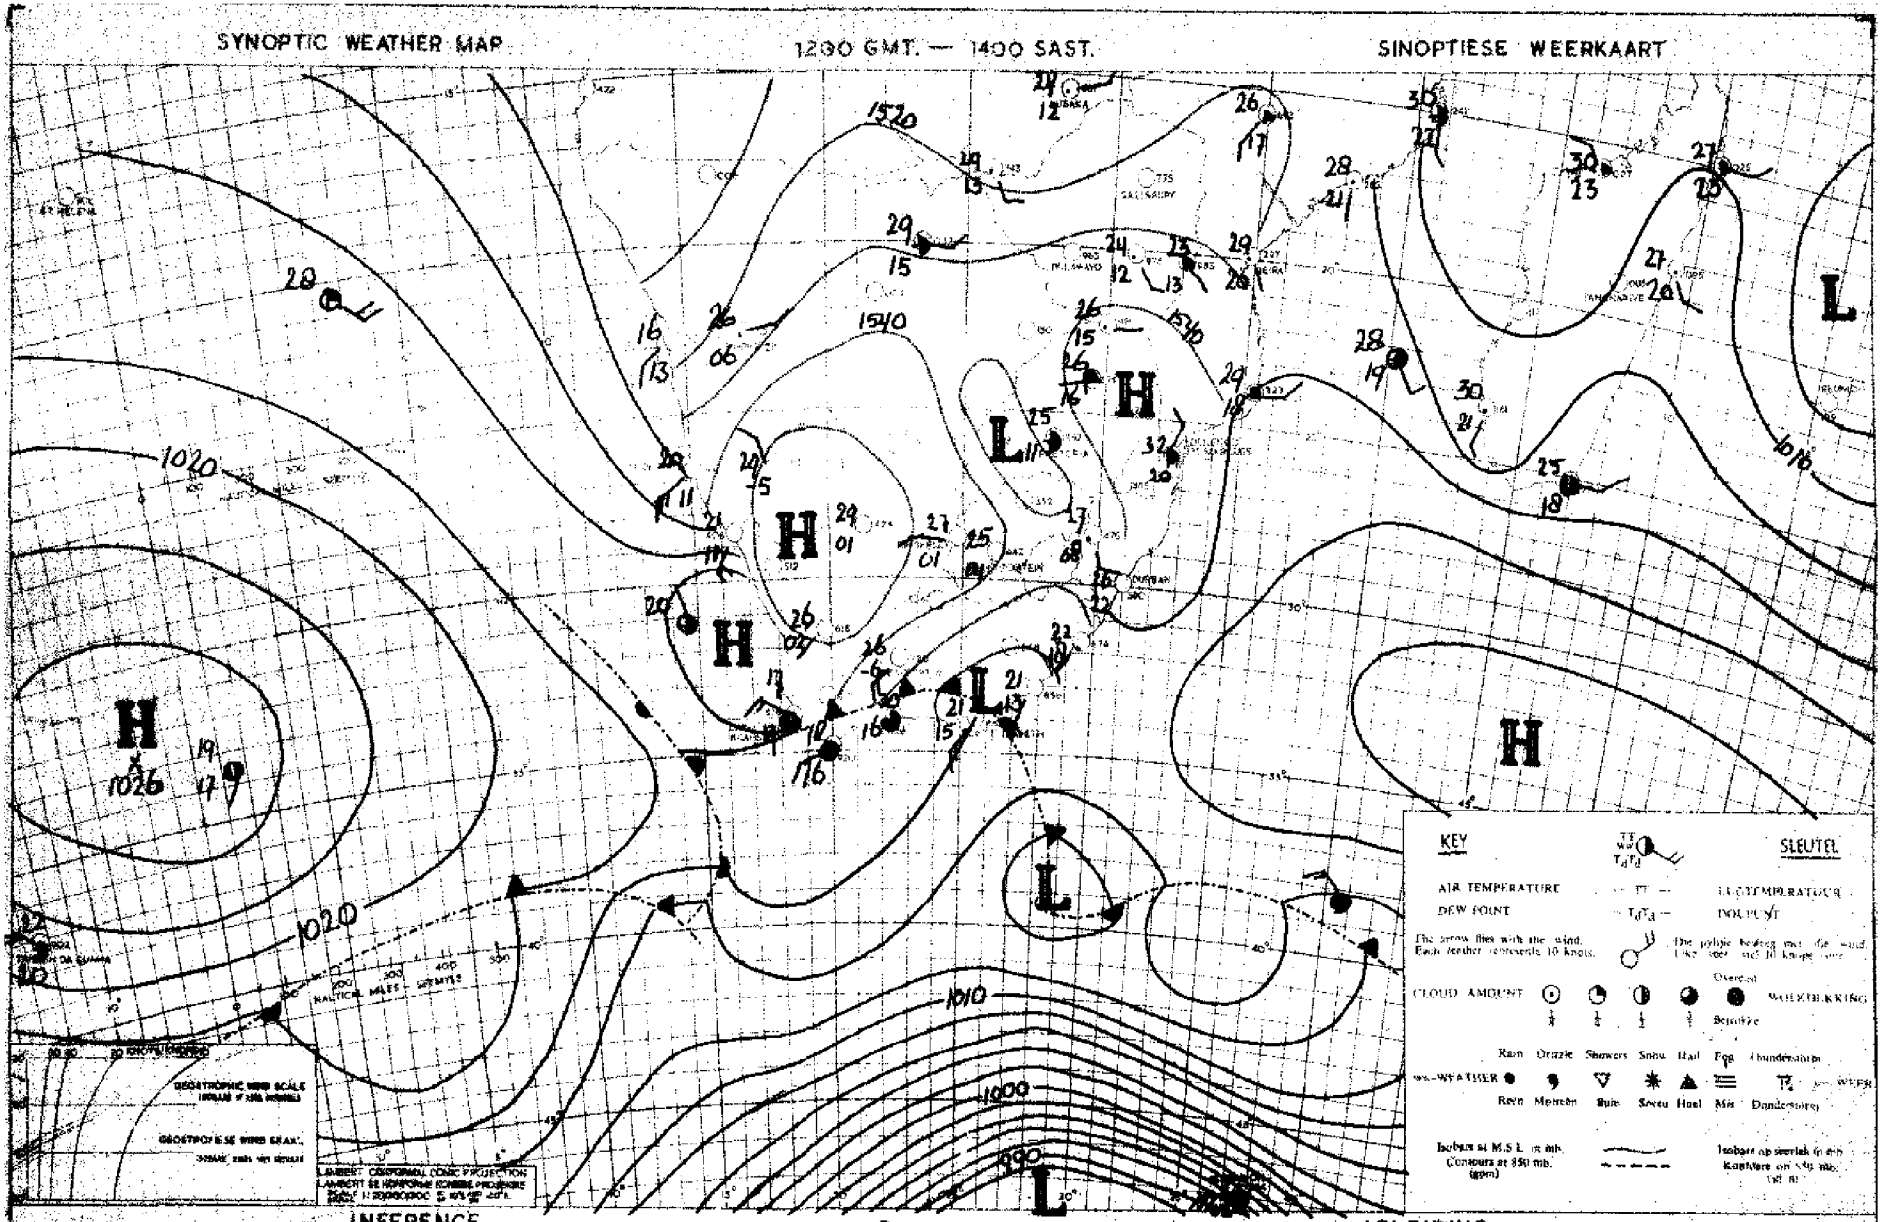
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 2-4 1955 DATUM AFLEIDING

The rear of the Indian Ocean anticyclone will encourage the influx of humid air over the Transvaal districts. Consequently cloudy weather associated afternoon thunderstorms will occur over this region. Due to a slight influx of Atlantic maritime air temporary cloudy weather will occur along the southcoast but otherwise fine dry weather will prevail over the remainder of the Union.

Weens die aanwesigheid van die westelike deel van die Indiese Oseaan antisikloon oor die noordoostelike Unie sal die invloei van warm vogtige lug oor Transvaal bevorder word. Bewolkte weer gepaard met namiddag donderbuie sal dus oor hierdie streek voorkom. 'n Swak invloei van Atlantiese seelug sal tydelike bewolkte toestande langs die suidkus veroorsaak maar oor die res van die Unie

INFERENCE

Little change compared with today is expected for tomorrow. Cloudy weather and local afternoon thunderstorms will occur over Transvaal, and partly cloudy conditions will develop along the South Cape coastal regions. Over the remainder of the Union it will remain fine.

AFLEIDING

In vergelyking met vandag sal min verandering mŏre plaasvind. Bewolkte weer en plaaslike namiddag donderbuie sal oor Transvaal voorkom, en gedeeltelik bewolkte toestande sal langs die suidkus van Kaapland ontwikkel. Oor die res van die Unie sal dit mooi-weer bly.

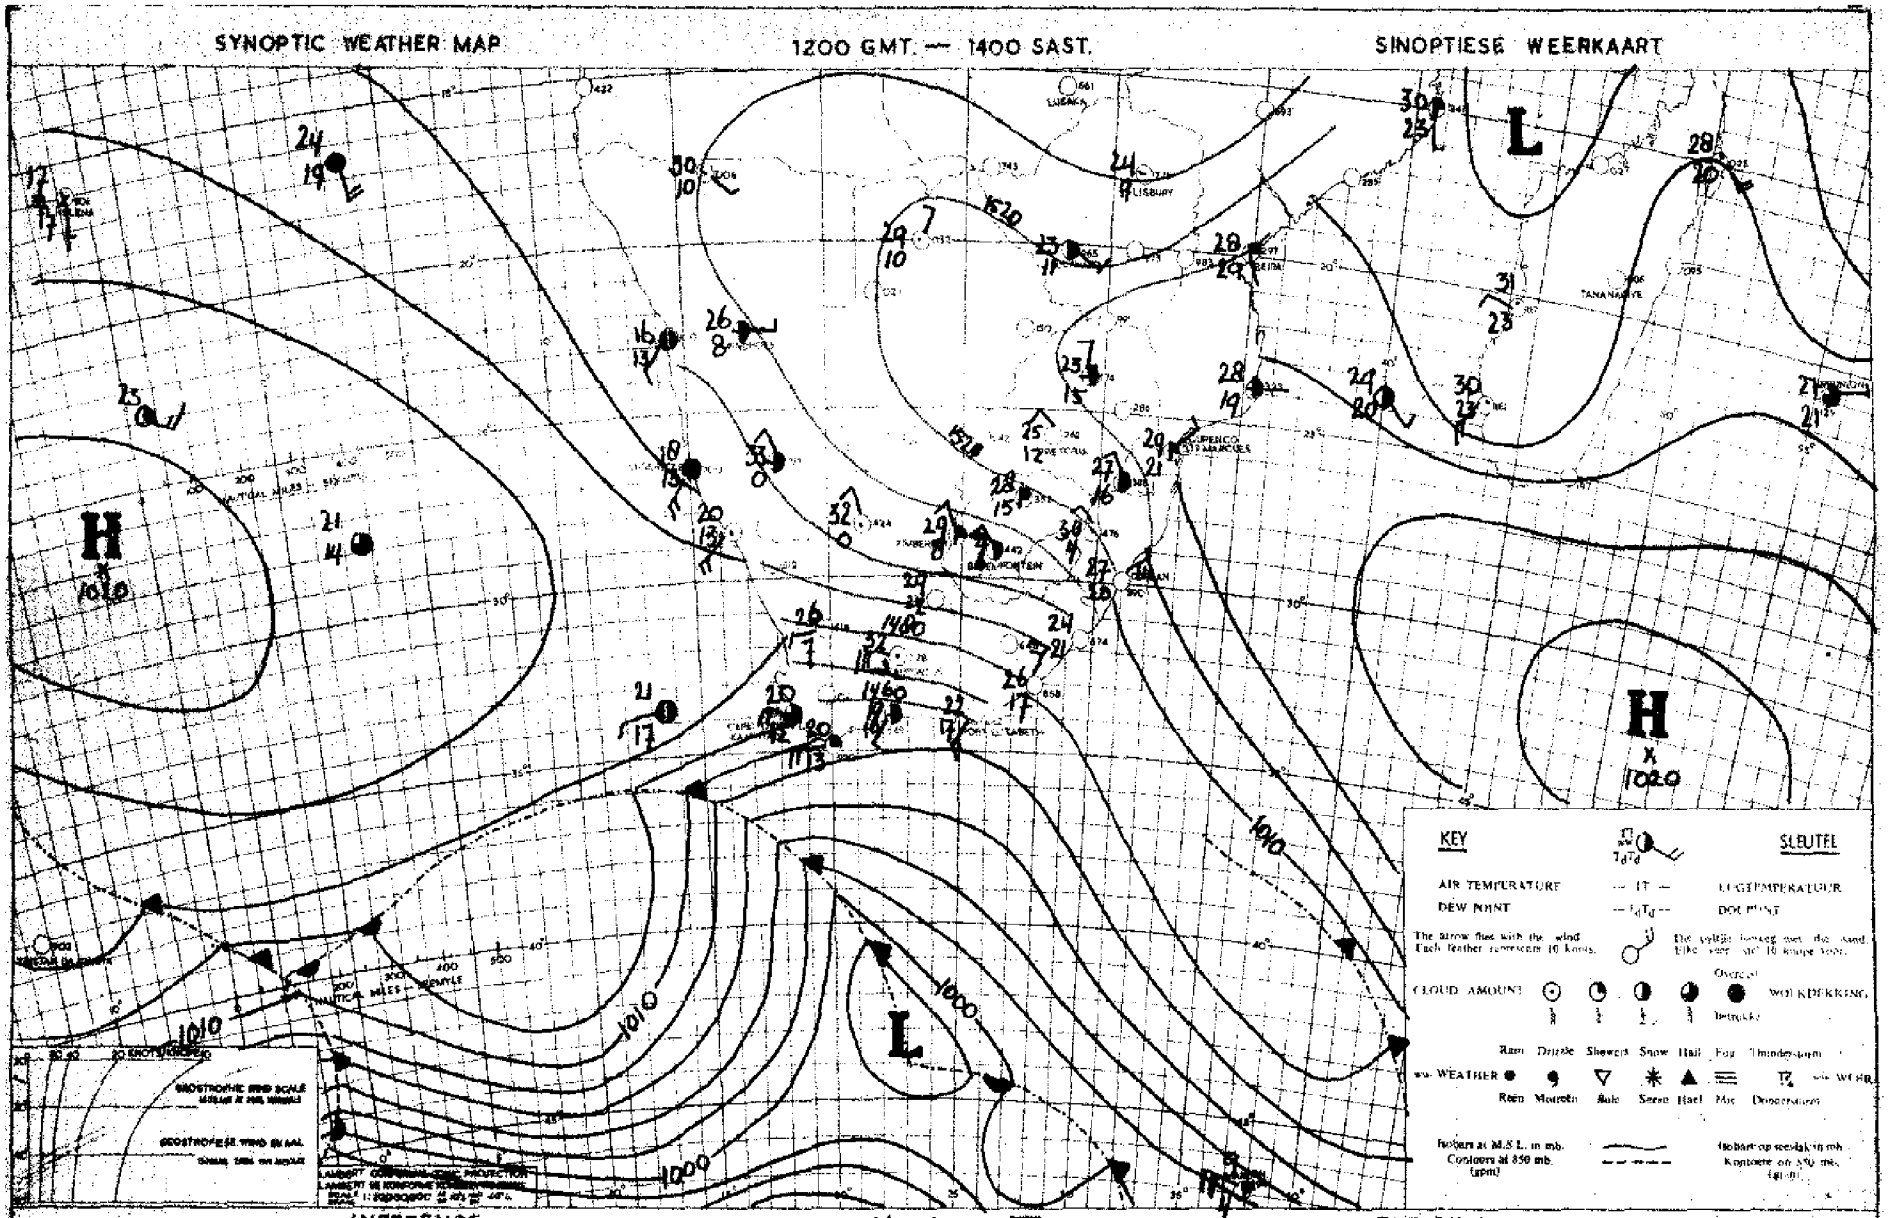
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 4-4- 1955 DATUM AFLEIDING

Westerly winds are expected to continue for some time over the Union. Cloudy weather with local light rain will occur along the southwest and south coast of the Cape Province, and fair to partly cloudy conditions will prevail over the Free State and the Transvaal. Over the remainder of the Union fine settled weather will continue.

Na verwagting sal weste winde vir geruime tyd oor die Unie bly waai. Bewolkte weer gepaard met plaaslike ligte buie sal langs die suidwes en suidkus van Kaapland voorkom. Oor Transvaal en die Vrystaat sal dit effens tot gedeeltelik bewolk wees. Oor die res van die Unie sal bestendige weerstoestande voortduur.

A cold air is invading the Union from the Southwest. It will clear over most inland areas, but cloudy weather will persist over the Cape coasts, and will later spread to Natal and the Eastern Transvaal lowveld.

Droë koue lug stroom uit die Suidweste oor die Unie. Dit sal opklaar oor die meeste binnelandse gebiede, maar bewolkte weer sal voortduur oor die Kaapse kusstreke en later uitbrei na Natal en die Oos Tvl.

With the high pressure cell along the southwest coast moving gradually eastwards, it can be expected that the weather will clear over the southeast and east Cape coastal regions. Over Natal and Transvaal the weather will be cloudy but over the remainder of the Union it will be fine. Temperatures will be below normal generally.

Met die hoogdruk sel langs die suidwes kus van Kaapland wat geleidelik ooswaarts beweeg sal die weer oor die Suidoos en Oos kusstreke van Kaapland geleidelik opklaar. Oor Natal en Transvaal sal die bewolk wees, maar oor die res van die Unie sal dit mooi weer bly. Oor die algemeen sal temperature onder normaal wees.

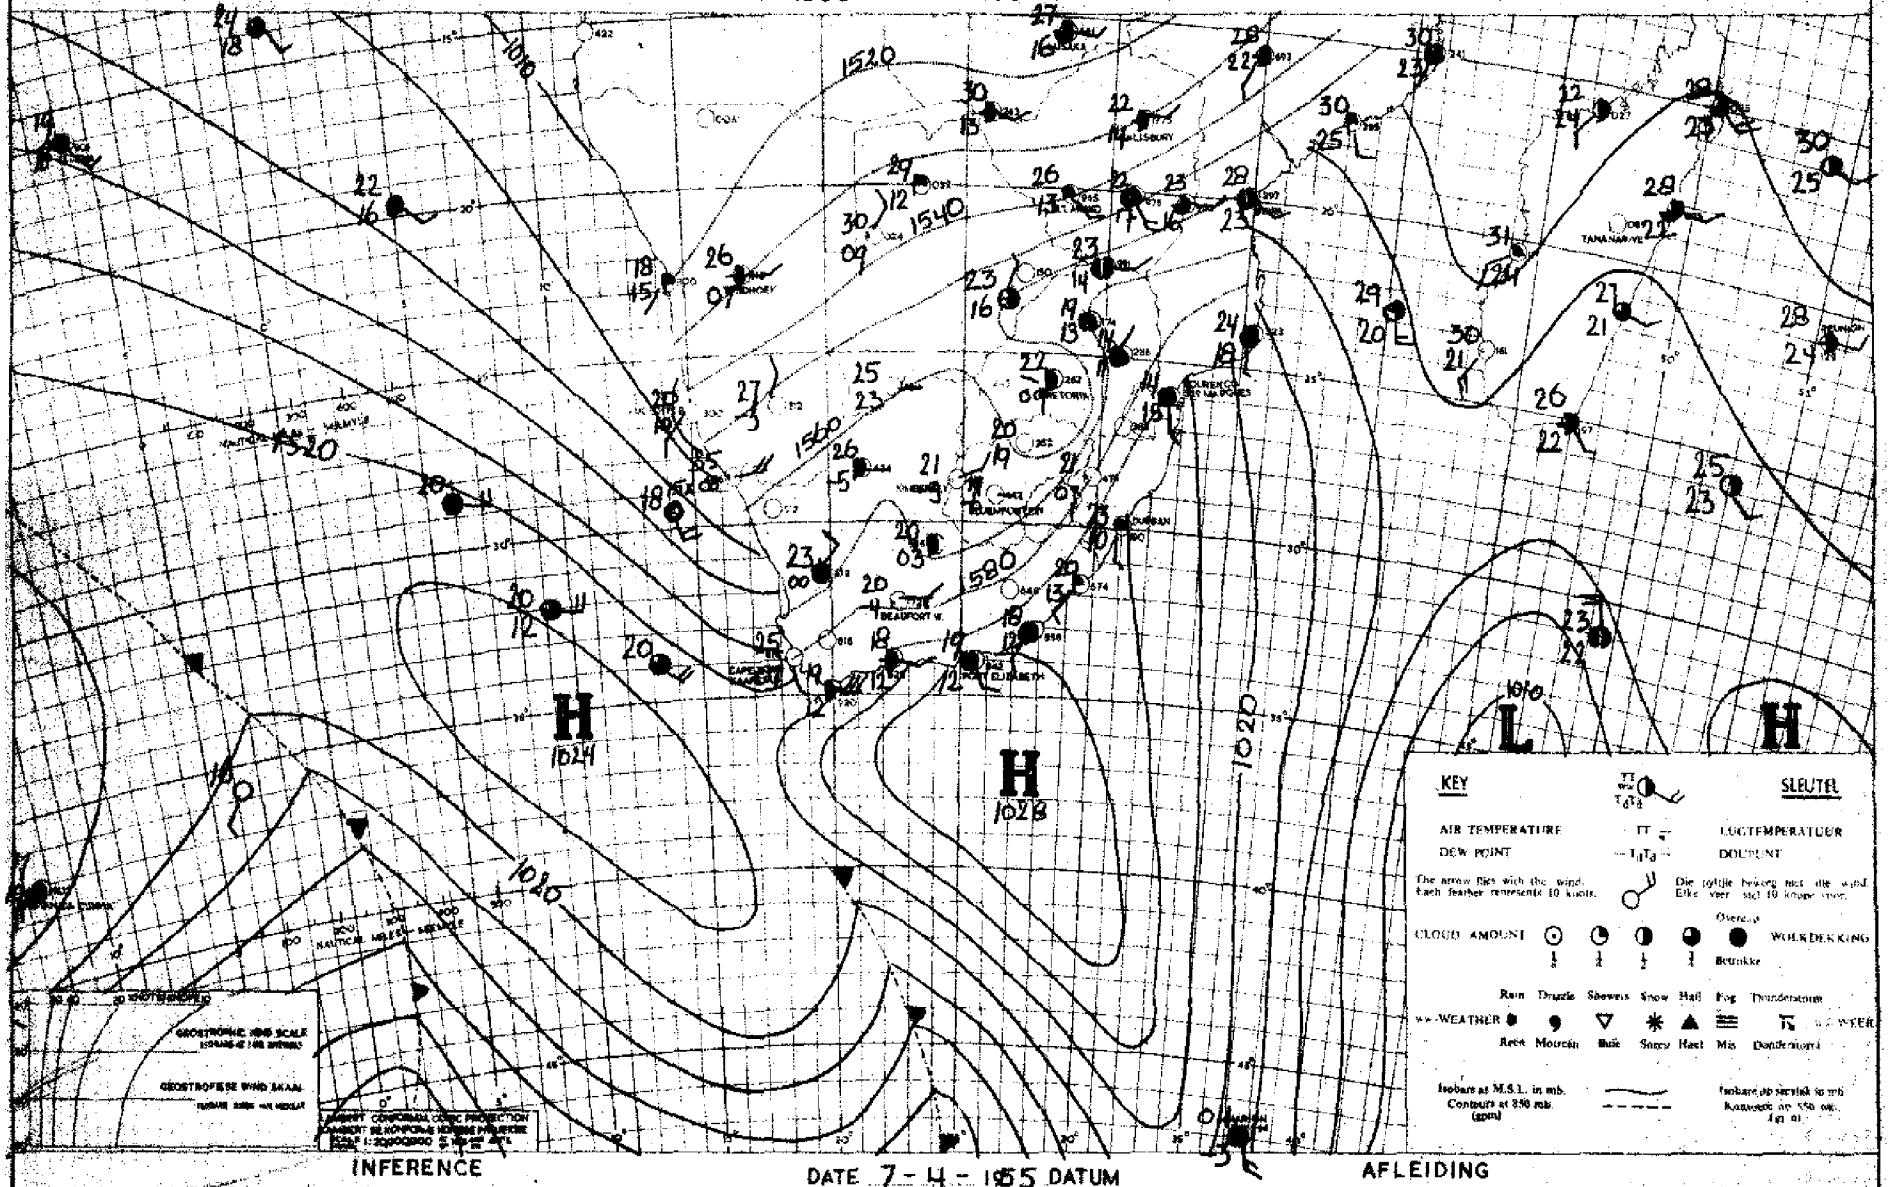
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 7 - 4 - 1955 DATUM — AFLEIDING

With the eastward movement of the high south of the Union the weather will clear over the Cape coasts but cloudy weather will occur over Natal. An inflow of a shallow layer of moist air will persist over Transvaal, and low level cloud will occur in the morning.

Met die ooswaartse beweging van die hoog suid van die Unie sal dit opklaar oor die Kaapse kusstreke, maar bewolkte weer sal oor Natal voorkom. 'n Vlak laag vogtig lug uit die ooste sal oor Transvaal instand gehou word en miswolke sal in die oggend oor die oostelike helfte voorkom.

AFLEIDING

Anticyclonic circulation dominates the Union. The cloudy conditions over the Transvaal will gradually dissipate but it will become cloudy to overcast over the western districts of the Cape Province and local thunderstorms will develop over these regions. Elsewhere over the Union it will be fair and mild to warm.

Die antisikloniese sirkulasie wat die lugstroming oor die Unie beheer sal geleidelike opklarings oor Transvaal teweeg bring. Oor die westelike distrikte van Kaapland sal dit egter bewolk tot betrokke word en plaaslike donderbuie sal oor hierdie gebiede ontwikkel. Oor die res van die Unie sal dié weer redelik mooi en matig tot warm bly.

DATE 9-4-1955

Fairly moist air is moving around the anticyclone over the Union. Cloudy conditions will occur generally and rain and thundershowers will occur over most of the Cape Province and over the southwestern half of the Free State.

AFLEIDING DATUM

Redelik vogtige lug beweeg om die antisikloon oor die Unie. Bewolkte toestande sal taamlik algemeen voorkom en reën en donderbuie sal oor die grootste deel van die Kaapprovinsie asook oor die suidwestelike helfte van die Vrystaat uitsak.

DATE 10-4-1955 DATUM

INFERENCE

Atlantic air is advancing behind the cold front over the Cape Province towards Natal and Transvaal. Cloudy weather will be experienced over the Free State, Transvaal and Natal and apart from the southwestern Free State and the northern half of Transvaal, rain and thunderstorms will develop over these regions. The weather over the western half of the Cape Province will clear to fair and mild.

AFLEIDING

Atlantiese lug beweeg agter die koue front oor Kaapland na Transvaal en Natal. Bewolkte weer sal oor die Vrystaat, Natal en Transvaal voorkom en met uitsondering van die suidwestelike Vrystaat en die noordelike helfte van Transvaal sal reën en donderbuie oor hierdie gebiede ontwikkel. Oor die westelike helfte van Kaapland sal dit hoofsaaklik mooi weer word met matige temperature.

DATE 12-4-1955 DATUM

INFERENCE

Dries air is circulating over the western half of the Union and will gradually advance to the southwestern half of the Transvaal and to Natal. Thunderstorms or rainshowers will still occur over the northeastern half of Transvaal and over Zululand. Local drizzle associated with temporary overcast skies will occur along the Cape south coast but over the remainder of the Union the weather will be fair and mild.

AFLEIDING

'n Droë lugstroming beheer die westelike helfte van die Unie en sal geleidelik na die suidwestelike helfte van Transvaal en Natal uitbrei. Donderbuie of reënbuie sal oor die noordoostelike helfte van Transvaal en oor Zoeloeland voorkom. Tydelike betrokke toestande met motreën sal langs die suidkus van Kaapland voorkom maar oor die res van die Unie sal dit hoofsaaklik mooiweer en matig wees.

INFERENCE

DATE 13-4- 1955 DATUM

AFLEIDING

With the Eastward movement of the wedge of high S and SE of the Union it is expected that weather over Transvaal and Northern Natal will remain cloudy with scattered rain or thundershowers. Over the Cape Province and South West Africa south of Windhoek it will, however be fine.

Met die ooswaartse beweging van die wig aan hoë druk suid en SO van die Unie word verwag dat die weer oor die Transvaal en Noordelike Natal bewolk sal bly met verspreide reën of donderbuie. Oor Kaapland en Suidwes Afrika suid van Windhoek sal dit egter mooi weer bly.

INFERENCE

DATE 14-4-1955 DATUM

AFLEIDING

Pressures are falling rapidly over the eastern Union and a current of moist air is being directed into the Transvaal and towards the Free State. A second current of humid air is moving southwards towards the northwestern Cape via S.W.A. Cloudy to partly cloudy weather will occur generally over the Transvaal, Free State, and over the Northern Cape, Gordonia and northern Natal ~~local thundershowers will develop over these areas, elsewhere fair~~

'n Vinnige styging in lugdruk vind plaas oor die Oostelike Unie en 'n stroom vogtige lug beweeg oor Transvaal na die Vrystaat. 'n Tweede stroom vogtige lug beweeg oor S.W.A. suidwaarts na Noordwes Kaapland. Bewolkte tot gedeeltelik bewolkte weer sal algemeen oor Transvaal en die Vrystaat en oor Noord Kaapland, Gordonia en Noord Natal voorkom. Plaaslike donderbuie sal oor hierdie streke ontwikkel. Elders mooiweer.

INFERENCE

DATE 15-4-1955 DATUM

The rear of the Indian Ocean Anticyclone dominates the air circulation over the Union but pressure are falling rapidly along the southeast coast, causing cyclonic circulation over the southern Union. Cloudy to partly cloudy weather will occur generally and thunderstorms will build up over the northern Cape, Free State, Southern Transvaal, Natal interior and the eastern Cape interior.

AFLEIDING

Die westelike deel van die Indiese Oseaan Antisikloon beheer die lug sirkulasie oor die Unie, maar weens die skerp val in lugdruk langs die suidooskus is die sirkulasie oor die suidelike Unie siklonies. Bewolkte tot gedeeltelik bewolkte weer sal algemeen voorkom en donderweerstoestande sal oor Noord Kaapland, Vrystaat, Suid Transvaal, die Natal binneland en die oostelike binneland van Kaapland ontwikkel

INFERENCE

The Atlantic High is extending a wedge to the south and south-west coast and a cold front is moving northeastwards south of the Union. A continental anticyclone dominates the circulation over most of the Union interior, the weather will be cloudy along the Cape southwest and south coast and scattered rains however will occur later tomorrow. Thunderstorm conditions will develop over the Union interior.

DATE 16-4- 1955 DATUM

AFLEIDING

'n Uitloper van die Atlantiese Hoog strek tot by die Unie suid suidooskus. Daar is 'n koue front suid van die Unie en beweeg in 'n noordoostelike rigting. 'n Kontinentale antisikloon beheer die sirkulasie oor die grootste deel van die Unie. Langs die suidwes en suid kusstreke van Kaapland sal dit bewolk wees en verspreide ligte reënbuie sal môremiddag uitsak. Donderweerstoestande sal oor die Unie binneland ontwikkel.

INFERENCE

DATE 17-4-1957 DATUM

AFLEIDING

The westerlies dominates the circulation over the Union and apart from partly cloudy weather will occur over the Free State, Natal, Transvaal and afternoon thunderconditions will develop over the southern and southeastern Transvaal and over the northeastern districts of the Free State. Cloudy weather with occasional light rain will occur along the Cape south coast.

Die westelike lugstroom domineer die lug sirkulasie oor die Unie. Gedeeltelik bewolkte weerstoestande sal oor die Vrystaat, Transvaal en Natal voorkom terwyl donderweerstoestande oor suid en suidoos Transvaal en oor die noordoostelike distrikte van die Vrystaat sal ontwikkel. Bewolkte weer gepaard met plaaslike buie sal langs die suidkus voorkom.

INFERENCE

DATE 19-4- 1955

With the high to the SE, of the Union the influx of relatively moist air over the Eastern and Northern parts of the country is maintained and weather over these regions will remain partly cloudy. The drier Atlantic high, however, extends over the Western half of the Cape Province and here it will remain fine.

AFLEIDING

DATUM

Met die hoogdruk ten suidooste van die Unie word die invloei van redelike vogtige lug oor die Oostelike en Noordelike dele van die land volgehou en die weer bly gedeeltelik bewolk oor hierdie dele. Die droër Atlantiese hoog strek egter oor die westelike helfte van Kaapland en dit bly mooiweer oor daardie deel.

INFERENCE

DATE 20-4- 1955 DATUM

AFLEIDING

The Indian Ocean anticyclone will continue to dominate the high air circulation over most of the Union. It will be cloudy to partly cloudy over the Cape Province, Free State, Transvaal and Natal interior. Thunder or shower activity will occur over the Northwestern Cape, the western half of the Free State, southern, southwestern and Central Transvaal and over the northern Natal

Die Indiese Oseaan Hoog beheer die lugstroming oor die Unie. Dit sal bewolk tot gedeeltelik bewolk wees oor die Kaap Provinsie, Vrystaat, Transvaal en oor die Natal binneland. Donderweers of buierige toestande sal oor Noorwes Kaapland, die westelike helfte van die Vrystaat, suid, suidwes, en Middel Transvaal en oor die Natal binneland voorkom.

INFERENCE

DATE 21—4— 1955 DATUM

AFLEIDING

Moist air round the high to the East of the Union has spread over most of the Union and SWA and scattered rain showers will occur. Forecasters are, however indications that drier air round the Atlantic high will spread over the Western Union and SW Africa within the next few days.

Vogtige lug rondom die hoogdruk ten Ooste van die Unie het oor feitlik die hele Unie en SWA, versprei en verspreide reënbuie kom voor. Daar is aanduidinge dat droër lug rondom die Atlantiese hoogdruk binne die volgende paar dae oor die Westelike Unie en SW Afrika sal beweeg.

A cold front is approaching the Cape from the southwest. The weather will become unsettled over the southwestern half of the Cape Province. Rain or thunderstorms will occur generally over this region and will gradually speed towards the Free State and the Eastern Cape.

'n Koue front nader die Kaap vanuit die suidweste en ongestadigde weerstoestande sal oor Suidwes Kaapland ontwikkel. Reën en donderbuie sal voorkom en sal geleidelik na die Vrystaat en Oos Kaapland uitbrei.

INFERENCE

Moist air is still present over most parts of the Union and S.W.A. but the cold front now approaching the West coast will bring colder and drier weather over the western interior and ultimately probably over the whole of the Union and South West Africa.

DATE 23-4-1955 DATUM

AFLEIDING

Vogtige lug is nog aanwesig oor die grootste deel van die Unie en Suidwes-Afrika maar die koue front wat nou die Weskus nader sal kouer, droër weer oor die westelike binneland aanbring en uiteindelik waarskynlik oor die hele Unie en Suidwes-Afrika.

DATE 24-4-1955 DATUM

INFERENCE

The cold front has passed the Cape Province and the southwestern Free State districts, and it will continue its northeastward movement towards Natal and Transvaal. The weather will be cloudy generally over Natal, Transvaal and the eastern Cape districts and scattered rain or thundershowers will occur. Over the remainder of the Union it will generally clear to fine but temperatures will remain well below normal.

AFLEIDING

Die koue front het reeds die Kaap Provinsie en die suidwestelike distrikte van die Vrystaat bereik en sal met sy noordoostwaartse beweging van Transvaal en Natal aankom. Bewolkte weer met verspreide reën en donderbuie sal oor Transvaal, Natal en die oostelike distrikte van Kaapland voorkom. Oor die res van die Unie sal dit egter tot mooiweer opklaar met temperature sal onder normaal bly.

The cold front south of the Union will influence the Southern and Southeastern Cape coastal districts. Cloudy showery weather will occur over these areas in the morning but it will clear towards noon. Over the remainder of the Union the air is dry and the circulation anticyclonic and therefore fine weather will persist.

Die koue front suid van die Unie sal die suidelike en suid-oostelike kus distrikte van die Kaap beinvloed. Bewolkte buierige weer sal gedurende die oggend voorkom maar 'n geleidelike opklaring kan teen die middag verwag word. Oor die res van die Unie is die lug droog en die stroming antisiklonies en dus sal mooi-weerstoestande voortduur.

INFERENCE

DATE 28-4-1955

Humid air from Rhodesia is moving southwards over the Transvaal towards the Free State and the Northern Cape. Scattered rain and thundershowers will develope over these regions. Over the remainder of the Union fair to fine weather will persist.

AFLEIDING

DATUM

Vogtige lug vanaf Rhodesia beweeg suidwaarts oor Transvaal na die Vrystaat en Noord Kaapland. Verspreide reën en donderbuie sal oor hierdie streke voorkom. Oor die res van die Unie sal mooiweerstoestande bly voortduur.

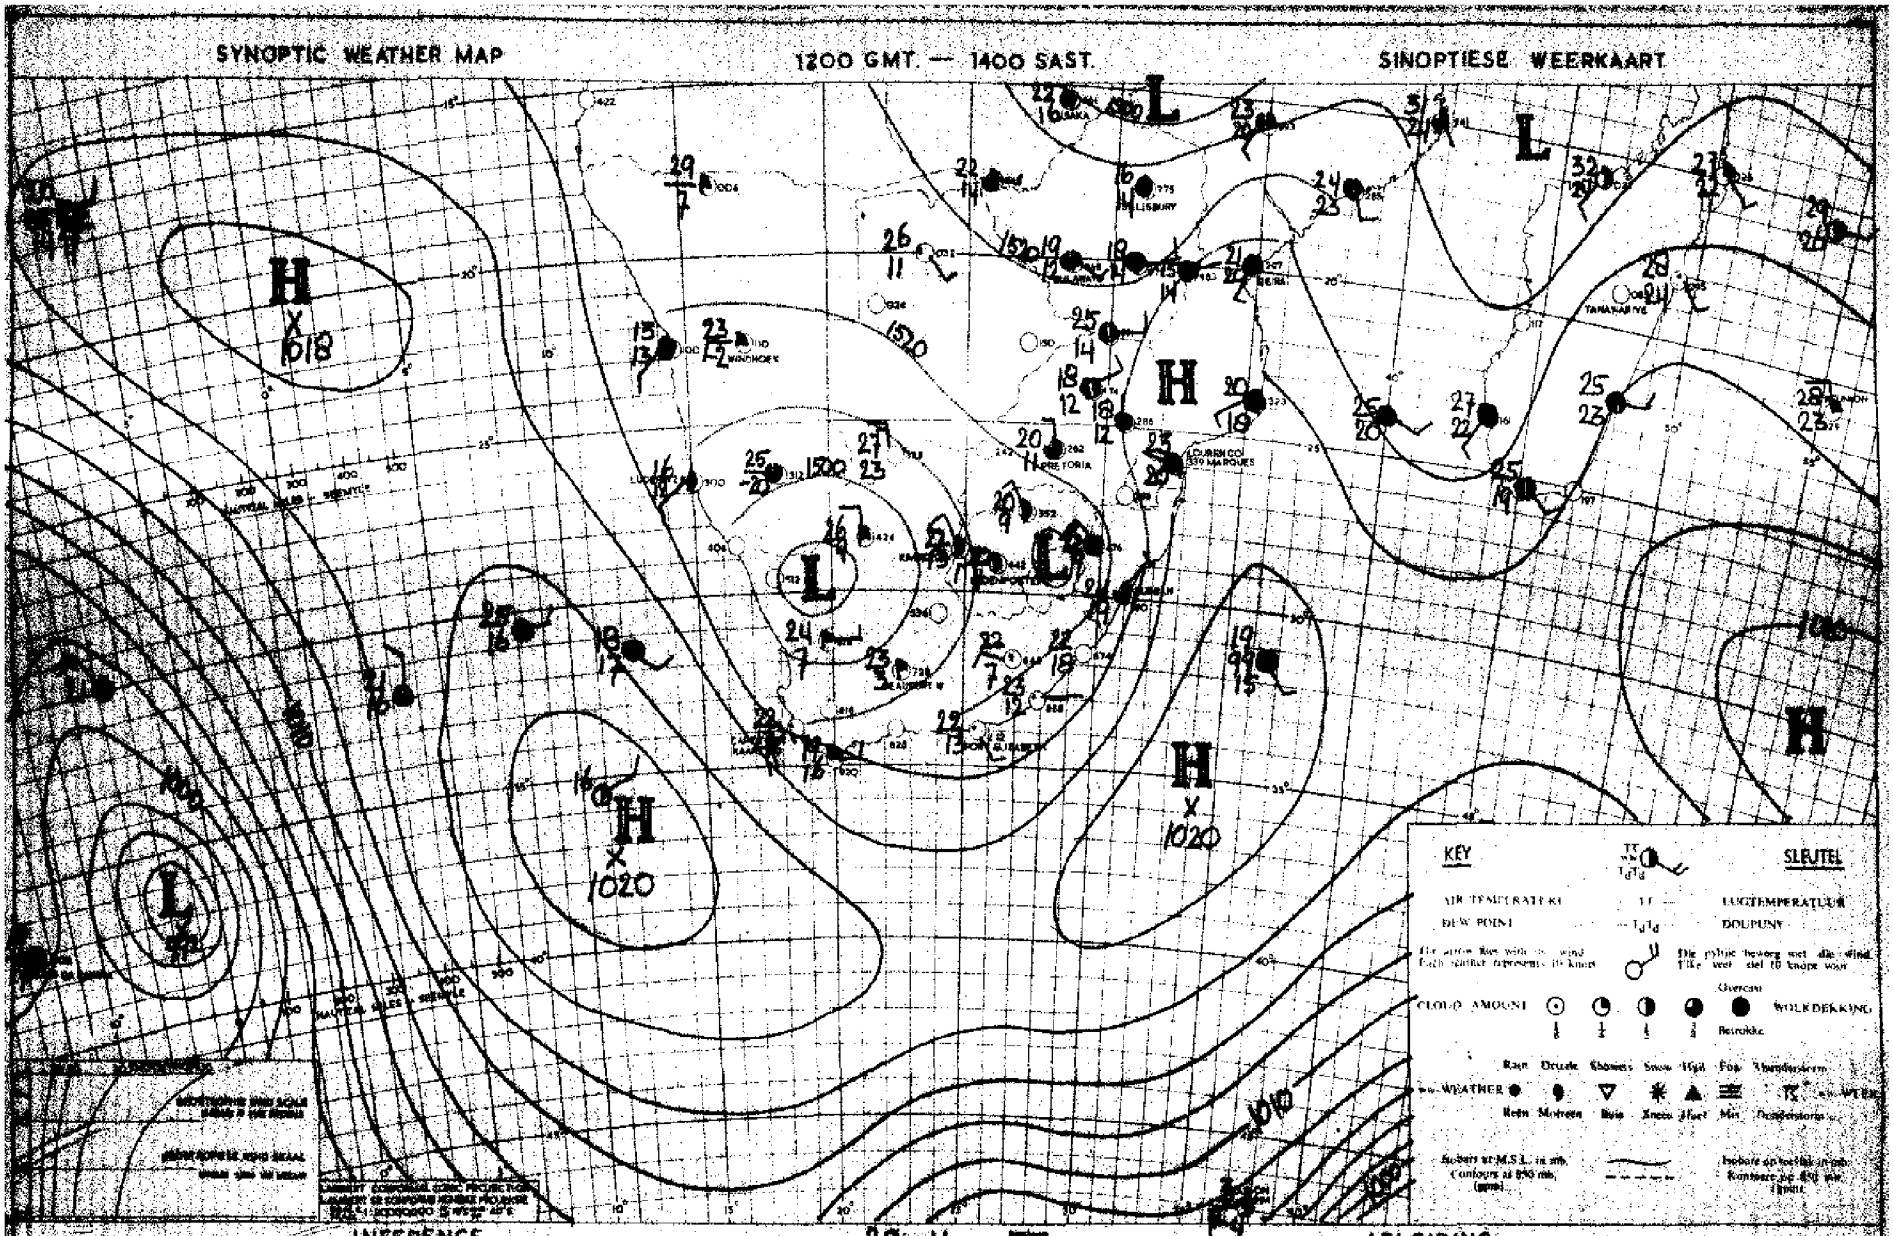
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE

Moist air from the north is still circulating over the eastern half of the Union and cloudy weather associated with local light rain or thunderstorms will thus persist over this region. The weather over the western half will remain fair.

DATE 29 - 4 - 1955 DATUM

AFLEIDING

Vogtige lug vanuit die noorde beweeg nog oor die oostelike helfte van die Unie en dus sal bewolkte weer gepaard met ligte reën of donderbuie nog oor hierdie streek voorkom. Oor die westelike helfte van die Unie sal dit mooiweer of effens bewolk wees.

The high pressure cell to the west of Cape Town will gradually move eastwards to the Natal coast. Cloudy weather with local showers will occur along the south and East Cape. Moderately moist air will continue to circulate over the eastern Union, and it will be partly cloudy over Transvaal, Natal and the Northeastern Free State. Over the remainder of the Union it will be fair.

Die hoogdruk sel ten weste van Kaapstad sal geleidelik oostwaarts na die Natal kus beweeg. Bewolkte weer gepaard met sporadiese sal dus langs die Suid en Oos kus van Kaapland voorkom. Redelike vogtige lug beweeg nog oor die oostelike Unie en dit sal dus ook gedeeltelik bewolk bly oor Transvaal, Natal en Noordoos Vrystaat. Oor die res van die Unie sal dit hoofsaaklik mooiweer

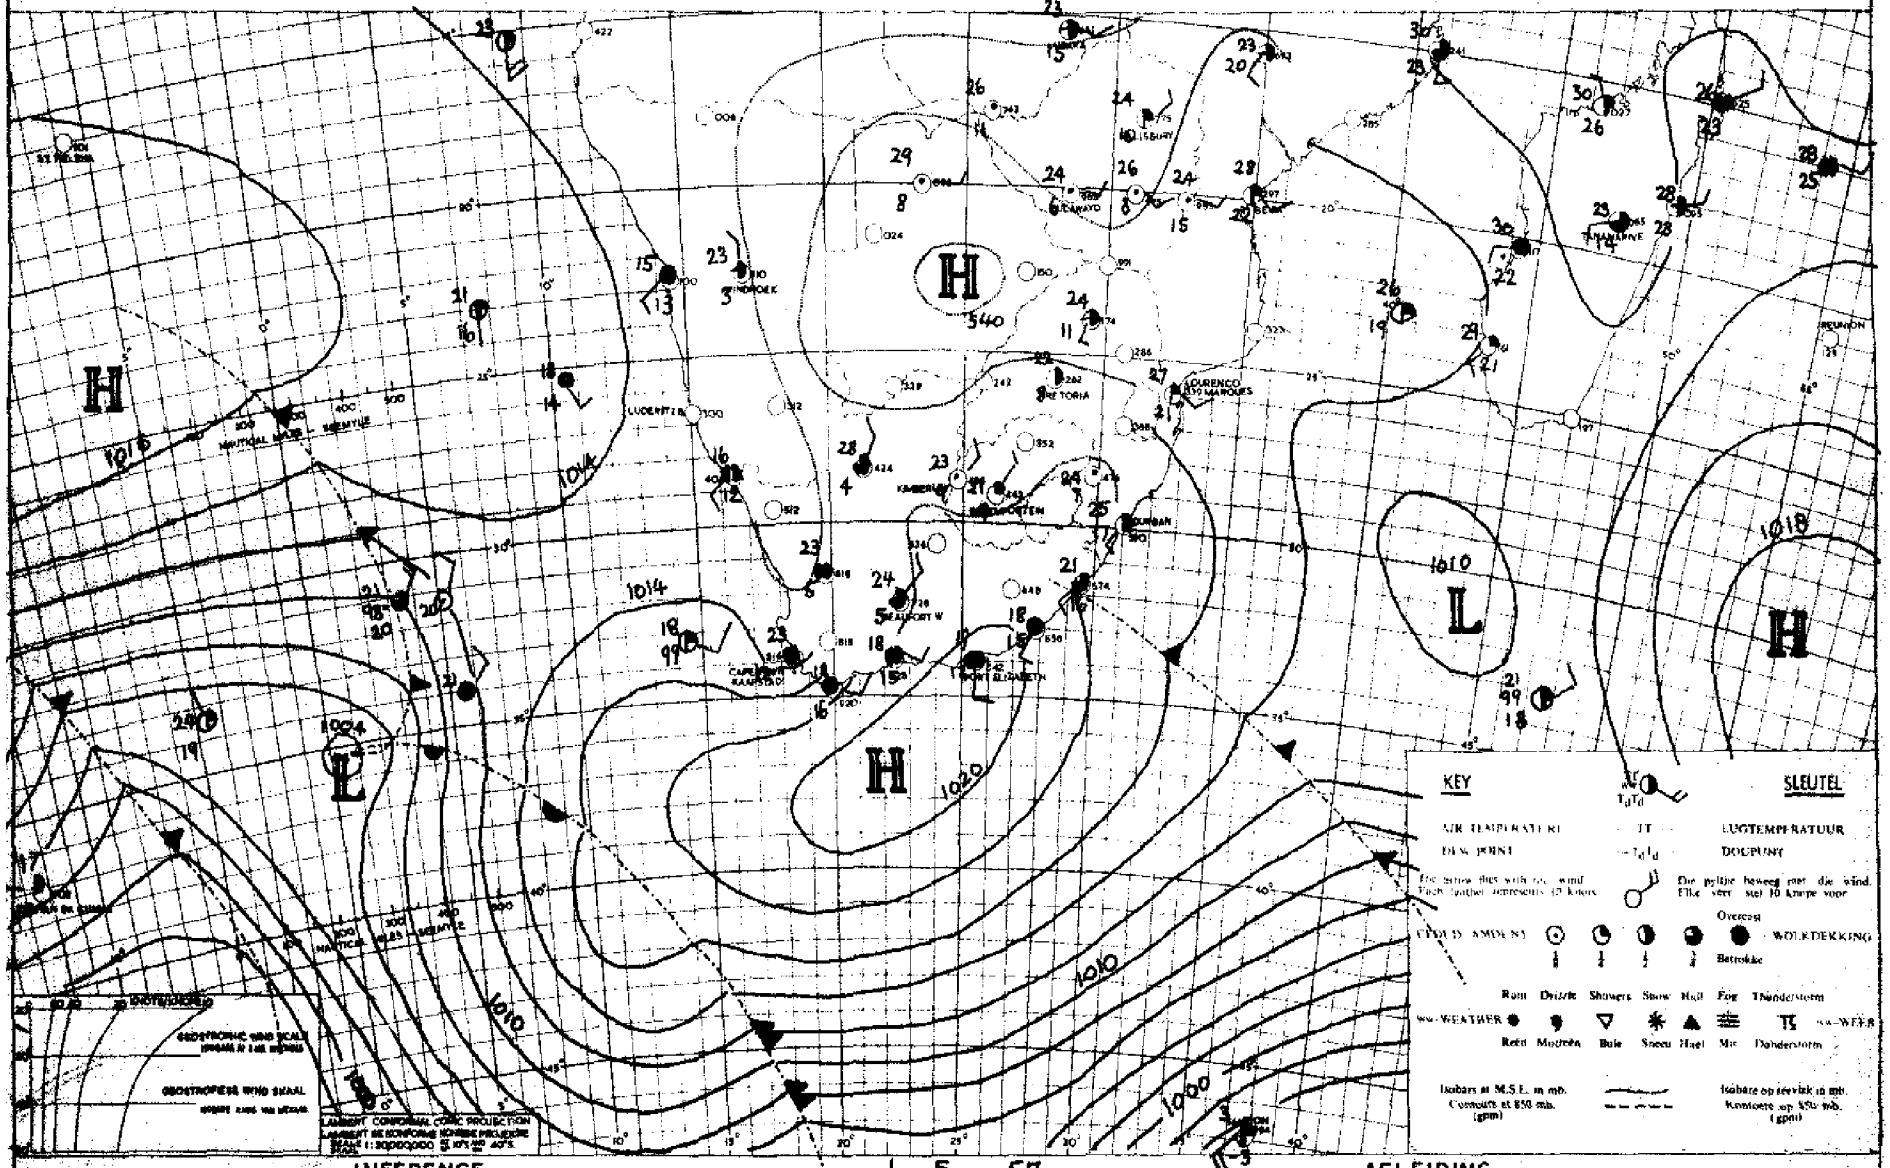
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 1 - 5 - 1955 DATUM AFLEIDING

The high to the south of the Union is advancing Eastwards and will give cooler cloudy weather over the SE and East Coasts and also over Eastern Transvaal. The trough over NW Cape and SW Africa will cause thundery conditions over Gordonia and Griqualand West.

Die hoog ten suide van die Unie beweeg Ooswaarts en gee koeler bewolkte weer oor die SO en Ooskus en ook oor Oostelike Transvaal. Die trog oor NW Kaapland en SW Afrika sal donderweertoestande oor Gordonia en Grikwaland-Wes veroorsaak.

INFERENCE DATE 2 - 5 - 1955 DATUM AFLEIDING

The Indian Ocean anticyclone, dominating the circulation over the eastern half of the Union, will continue the influx of cool moist air from a northeasterly direction over the Transvaal, Free State and Natal. It will be cloudy over these regions and rain or thundershowers will develop. The influx of some drier air over the western Union will clear the weather over these areas. Local thunderstorm development will also take place over the Eastern

Die Indiese Oseaan antisikloon, wat die sirkulasie oor die oostelike Unie domineer, sal die toevloei van koel vogtige lug oor Transvaal, Vrystaat en Natal laat aanhou. Bewolkte weer met reën of donderbuie sal oor hierdie streke voorkom. Die invloei van ietwat droër lug oor die westelike Unie sal die bestaande bewolkte toestande laat opklaar. Plaaslike donderweer sal gedurende die middag ook oor Oos Kaapland ontwikkel.

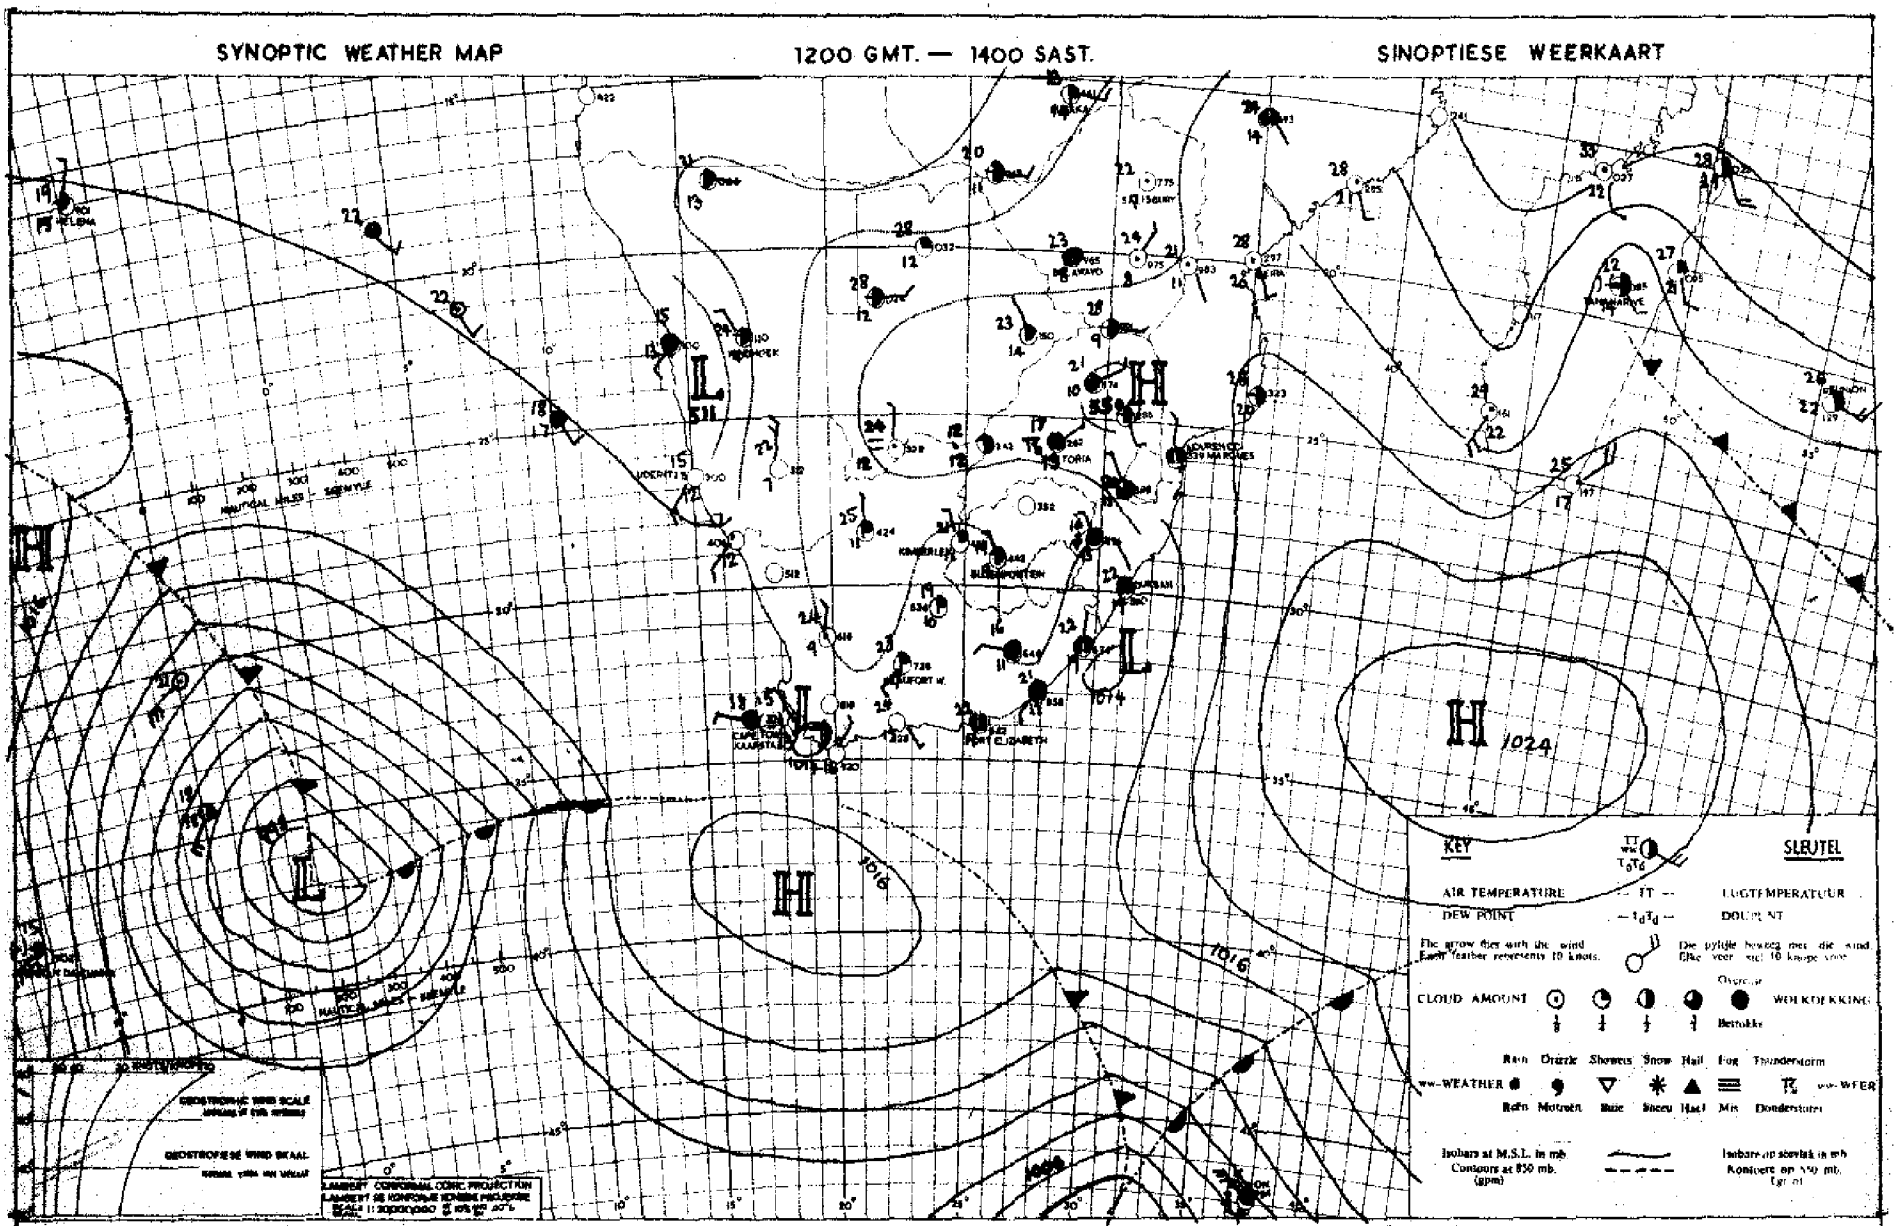
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 1 • 5 • 195 DATUM AFLEIDING

Relatively moist air is still present over most of the Union and an upper air trough is causing rain and thunder over S-Transvaal and Natal interior. The intense depression over the Atlantic Ocean is now advancing SE-wards and will bring unsettled weather over the SW Cape within the next two days.

Redelike vogtige lug is nog teenwoordig oor die hele Unie en donderweer, oor S-Transvaal en Natal se binneland. Die intense sterk laagdruk oor die Atlantiese Oseaan beweeg nou SO-waarts en bring binne die volgende twee dae ongestadige weer oor die SW Kaapland.

INFERENCE

The anticyclonic circulation over the interior is maintained and high level clouds only occur. The cold front approaching from the West will bring unsettled, showery weather to the SW coast, but as, the high near Tristan is already weakening, it is doubtful whether the cold weather will penetrate much into the interior.

DATE 6-5-1955 DATUM

AFLEIDING

Die antisiklonies sirkulasie word nog volgehou oor die hele land en slegs hoë wolke kom voor. Die koue front wat nader vanaf die Weste sal ongestadige reënweer oor die SW-kus meebring, maar aangesien die hoogdruk naby Tristan alreeds begin verswak, is dit twyfelagtig of die koue weer ver in die binneland sal indring.

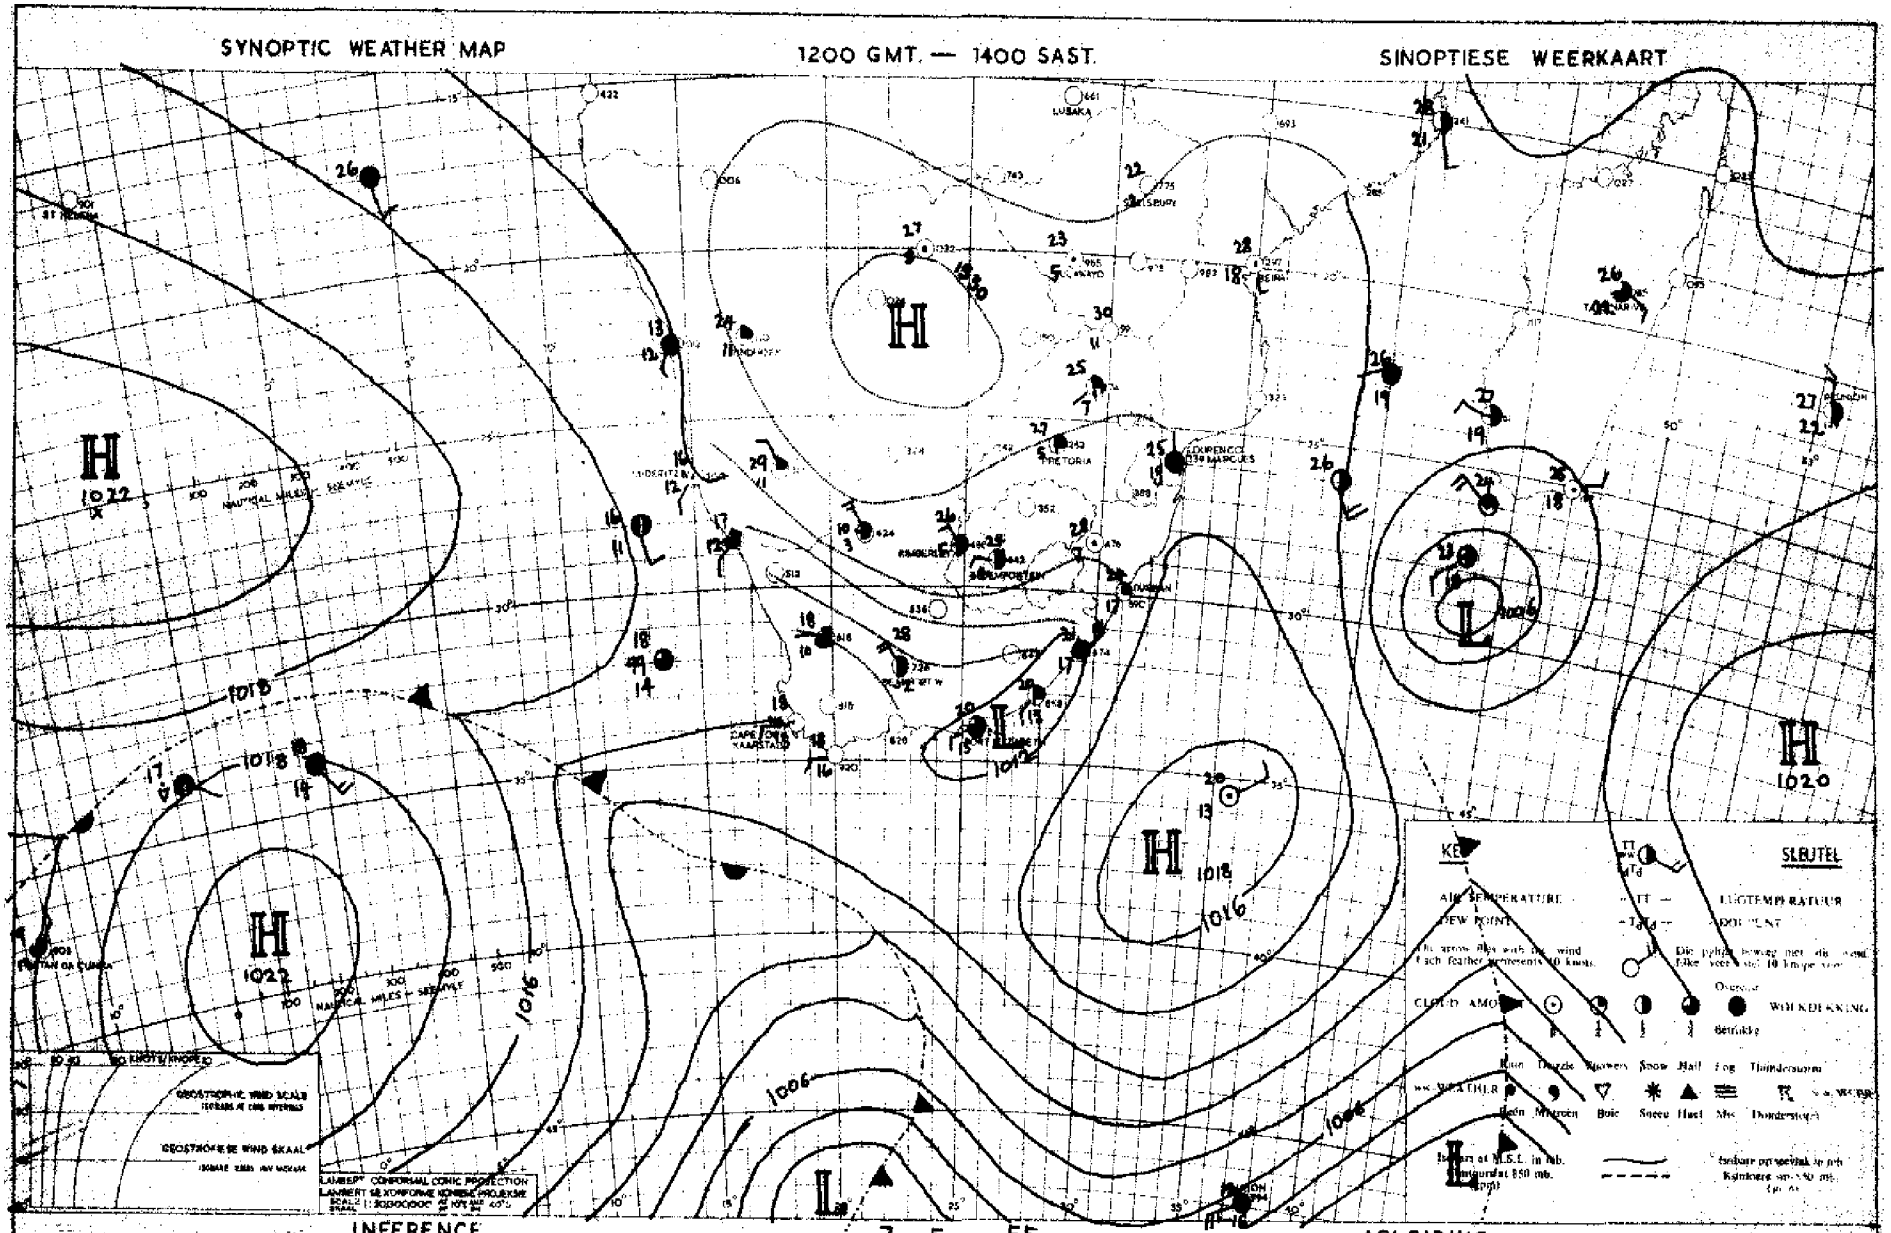
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

DATE 7 - 5 - 1955 DATUM

AFLEIDING

The circulation over the Union is still rond the continental antieyclone, and little change is expected over the interior. A shallow layer of moist air from the atlantic ocean will, however, cause rather cloudy weather over the South and West coast regions.

Die sirkulasie oor die Unie is nog rondom die kontinentale hoogdruk en min verandering word verwag oor die binneland. 'n Vlak vogtige luglaag vanaf die atlantiese oseaan sal egter taamlik bewolkte weer veroorsaak oor die Suid- en Weskusstreke.

INFERENCE

The temperature rises over the Southeastern Cape and its associated trough continue creates favourable conditions for cloud development and possible rain or thunderstorms over the Cape interior and the Southwestern Free State. Over the remainder of the Union it will be partly cloudy to fair.

DATE 8 - 5 - 1955 DATUM

AFLEIDING

Die laagdruk sisteem oor Suidoos Kaapland en die gepaarde gepaarde trog wat voortduur is bevorderlik vir bewolkingsontwikkeling en moontlike reën of donderweer oor die Kaapse binneland en Suidwes Vrystaat. Oor die res van die Unie sal dit effens tot gedeeltelik bewolk wees.

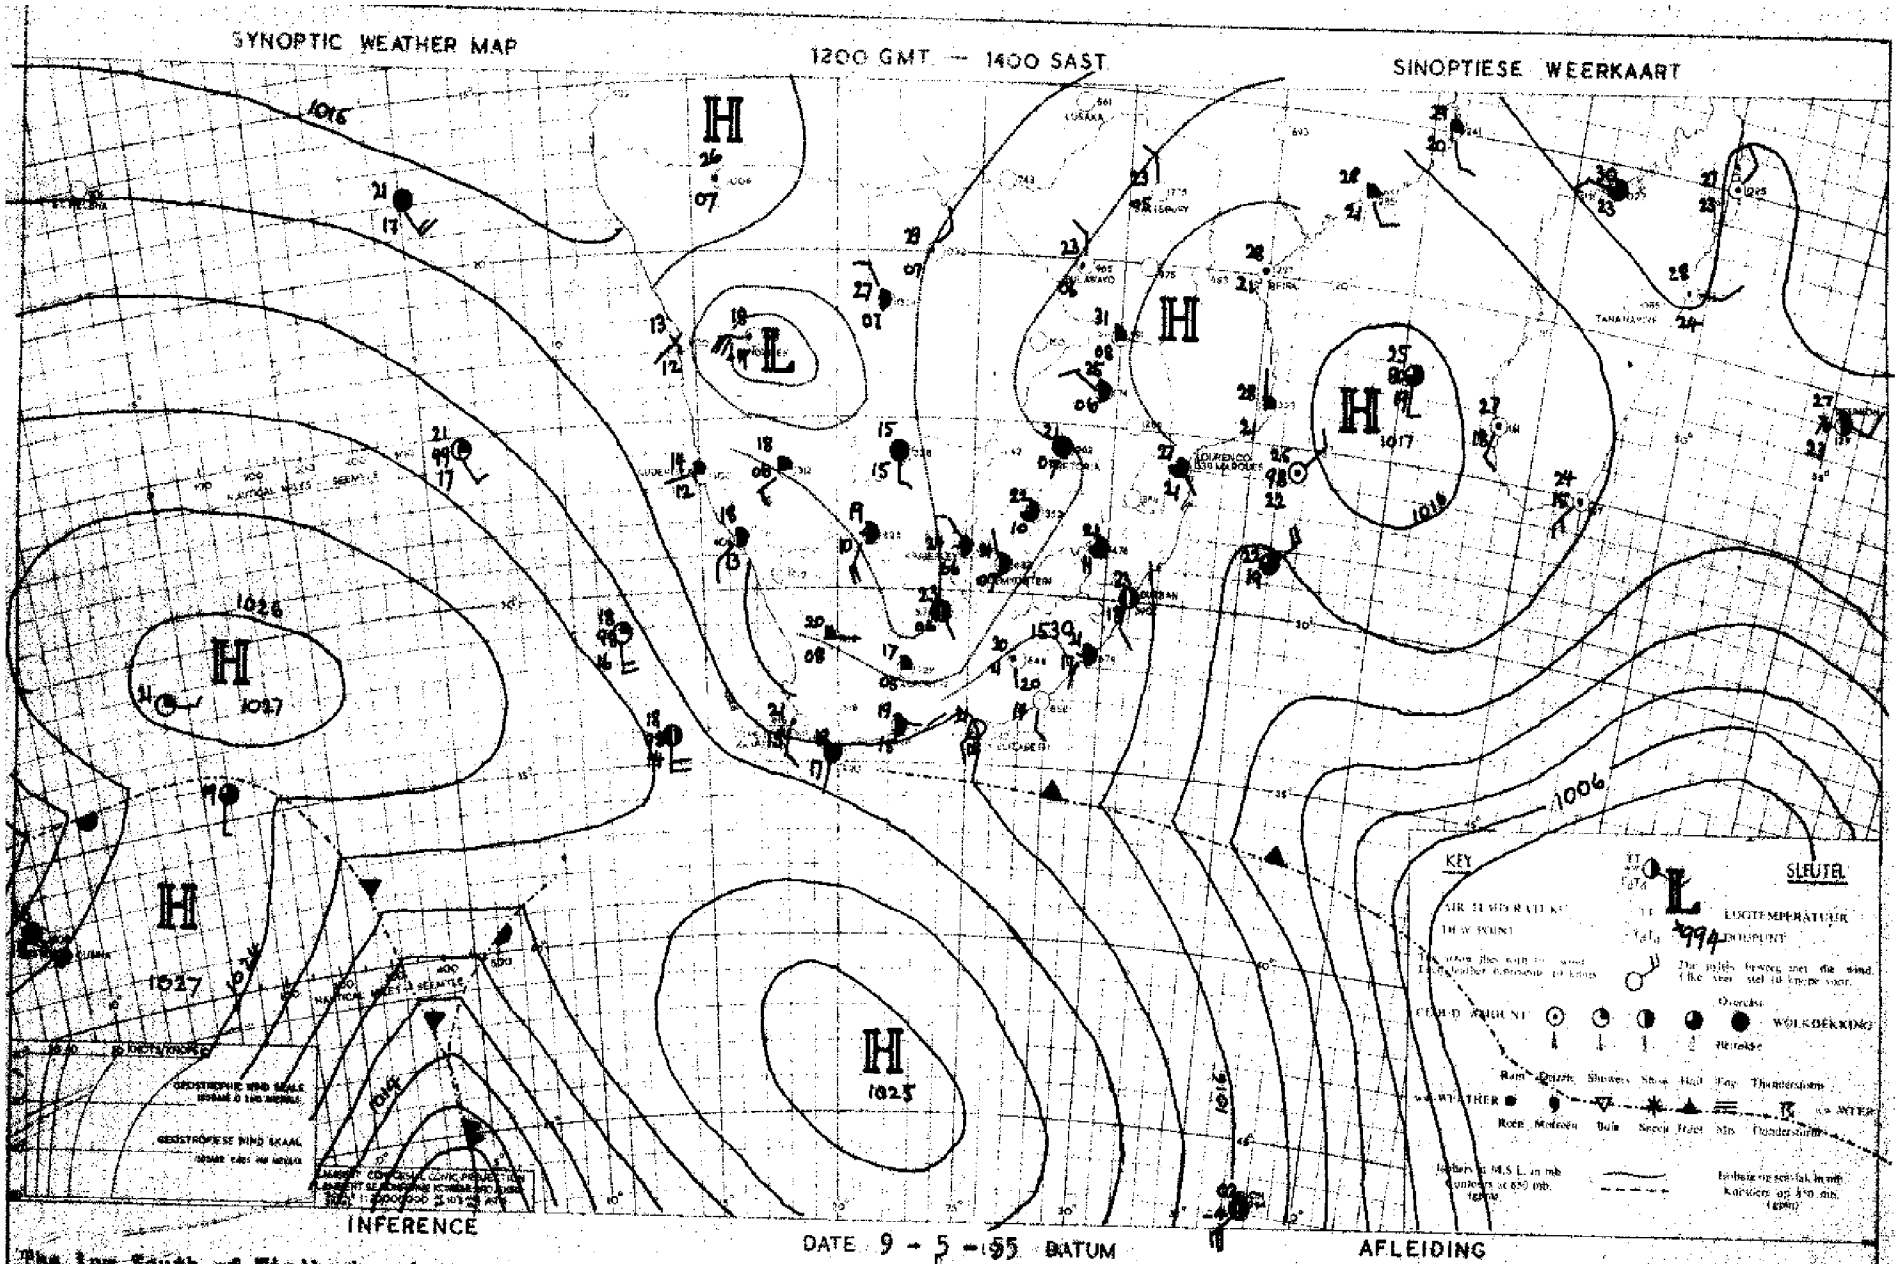
SYNOPTIC WEATHER MAP — 1200 GMT — 1400 SAST — SINOPTIESE WEERKAART



INFERENCE

DATE 9 - 5 - 55 DATUM

AFLEIDING

The low South of Windhoek and the associated trough over Central Union create favourable condition for thundery weather over the Eastern and Southern parts of the country.

Die laag net Suid vah Windhoek en daarmee verbonde trog oor die Sentrale Unie skep gunstige toestande vir ontwikkeling van donderweerbuie oor die O-like en S-like dele van die land.

INFERENCE

It will remain cloudy over the eastern half of the Union and scattered light rain or thundershowers will occur over most districts. Drier air invading S.W.A. will move gradually eastwards and will thus clear the weather over the western half of the Union.

DATE 10 - 5 - 55

AFLEIDING

DATUM

Oor die oostelike helfte van die Unie sal dit bewolk bly en verspreide ligte reën of donderbuie sal oor meeste distrikte voorkom. Droër lug wat S.W.A. binnestroom sal geleidelik oostwaarts beweeg en dit weer oor die westelike helfte van die Unie sal geleidelik opklaar.

INFERENCE

DATE 11 - 5 - 55 19

The wedge of High pressure which extends South of the Union will feed in a layer of moist air over the Eastern interior, but over the Western Union and SW Africa it will remain mainly fine as a result of subsiding air.

DATUM

AFLEIDING

Die wig van hoë druk wat ten Suide van die Unie beweeg sal 'n laag vogtige lug oor Oostelike binneland invoer, maar oor die W-like Unie en SWA bly dit hoofsaaklik mooiweer as gevolg van afsakkende lug.

INFERENCE

DATE 12- 5 - 1955 DATUM

AFLEIDING

It is expected that cold front south of the Cape will affect the Northern and Southeastern Cape coastal districts. Cloudy and rainy weather will be experienced over these regions. Over the remainder of the Union it will remain fair and mild.

Na verwagting sal die koue front, suid van die Kaap, die kuststreke van Suid- en Suidoos- Kaapland beinvloed, en bewolkte weer gepaard met reën sal oor hierdie streke voorkom. Oor die res van die Unie sal dit hoofsaaklik mooiweer en matig bly.

INFERENCE

DATE 13 - 5 1955 DATUM

AFLEIDING

Overcast and rainy weather associated with an outburst of cold air, will gradually spread northwards to the Transvaal. It will clear over the Southern and Southeastern Cape, and over the remainder of the Union it will be fine. Temperatures will generally be below normal.

Betrokke en buierige weerstoestande wat met 'n uitbarsting van koue lug gepaard gaan sal geleidelik na Transvaal uitbreid. Oor Suid- en Suidoos-Kaapland sal dit opklaar maar oor die res van die Unie sal dit mooiweer bly.

Due to influx of cold air over the Northeastern Union, cloudy to overcast and cold weather conditions will prevail generally over Zululand, Transvaal and the Northeastern Free State. Over the remainder of the Union it will be fair to fine. Apart from high temperatures along the Cape West Coast, it will be cold generally.

Weens die invloei van koue lug oor die noordoostelike Unie, sal bewolkte tot betrokke en koue weerstoestande oor Zoeloeland, Transvaal, en Noordoos-Vrystaat voorkom. Oor die res van die Unie sal dit effens bewolk of mooiweer wees. Met uitsondering van bo normale temperature langs die Weskus sal onder normale temperature oor die res van die Unie voorkom.

The cold air has now spread also over Transvaal and the Eastern half of the O.F.S. and the weather is cloudy to overcast over these regions. The trough over NW Cape Province may shortly cause thundery conditions on its Eastern side. Over the coastal regions and over the Southern half of the Cape Province it will, however, remain fine and become warmer.

Die koue lug het nou ook oor Transvaal en Noordelike O.V.S. beweeg en die weer is bewolk tot betrokke oor hierdie dele. Die trog oor Noordwes-Kaapland mag binnekort weer donderweerstoestande laat ontstaan aan sy Oostekant. Oor die kuslstreke en die Suidelike binneland van die Kaapprovinsie sal dit egter mooiweer bly en warmer word.

The Atlantic High is stationary. Humid air from the north is moving southwards over Bechuanaland, the Southwestern Transvaal, Free State and over the eastern half of the Cape. Cloudy weather and isolated showers will develop over those areas.

Daar is geen beweging van die Atlantiese Hoog nie. Vogtige lug uit die noorde beweeg suidwaarts oor Betsjoeanaland, suidwestelike Transvaal, die Vrystaat en oor die oostelike helfte van Kaapland. Bewolkte weer en los buie sal oor daardie dele voorkom.

The high East of the Union feeds in moist air over Transvaal and the Free State and cloudy weather with isolated showers may be expected over most of the Cape Province and the coastal belt of Natal fair to fine weather prevails as the air stream over the coast is from the interior to the coast.

Die hoogdruk oos van die Unie voer vogtige lug in oor Transvaal en die Vrystaat en bewolkte weer met los buie kan verwag word. Oor die grootste deel van die Kaapprovinsie en die kuststreek van Natal heers betreklike mooiweer omdat die lugstroom oor die kus hoofsaaklik vanaf die binneland kom.

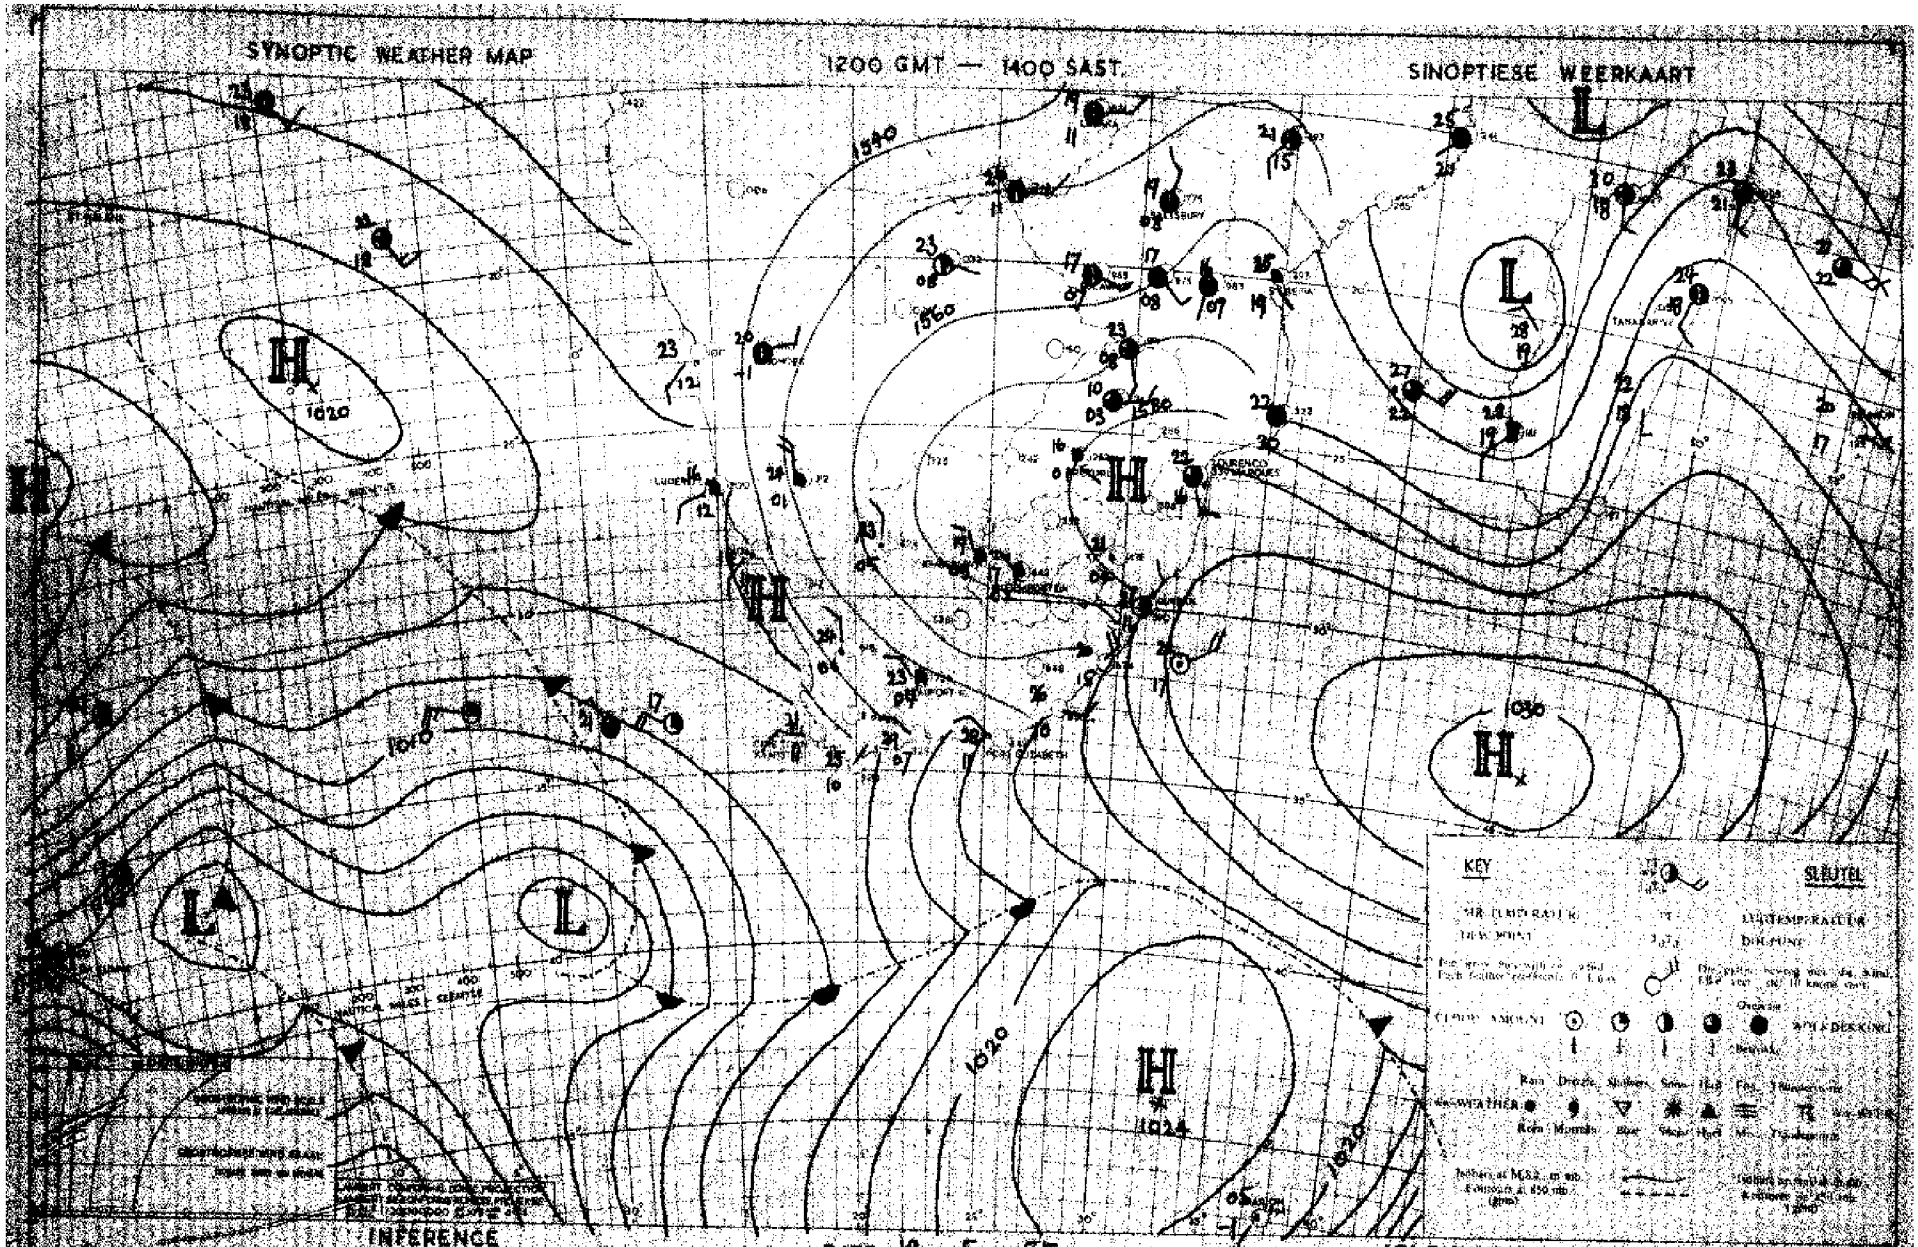
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

DATE 19- 5 -1955 DATUM

AFLEIDING

With the approach of the cold front towards the Cape the weather will become cloudy over the Southwestern and Southern Cape coastal regions and light showers will occur. Over the remainder of the Union it will be fair.

'n koue front nader die Kaap en as gevolg hiervan sal bewolkte buierige weer oor die Suidwestelike en Suidelike distrikte van Kaapland voorkom. Oor die res van die Unie sal dit redelik mooiweer wees.

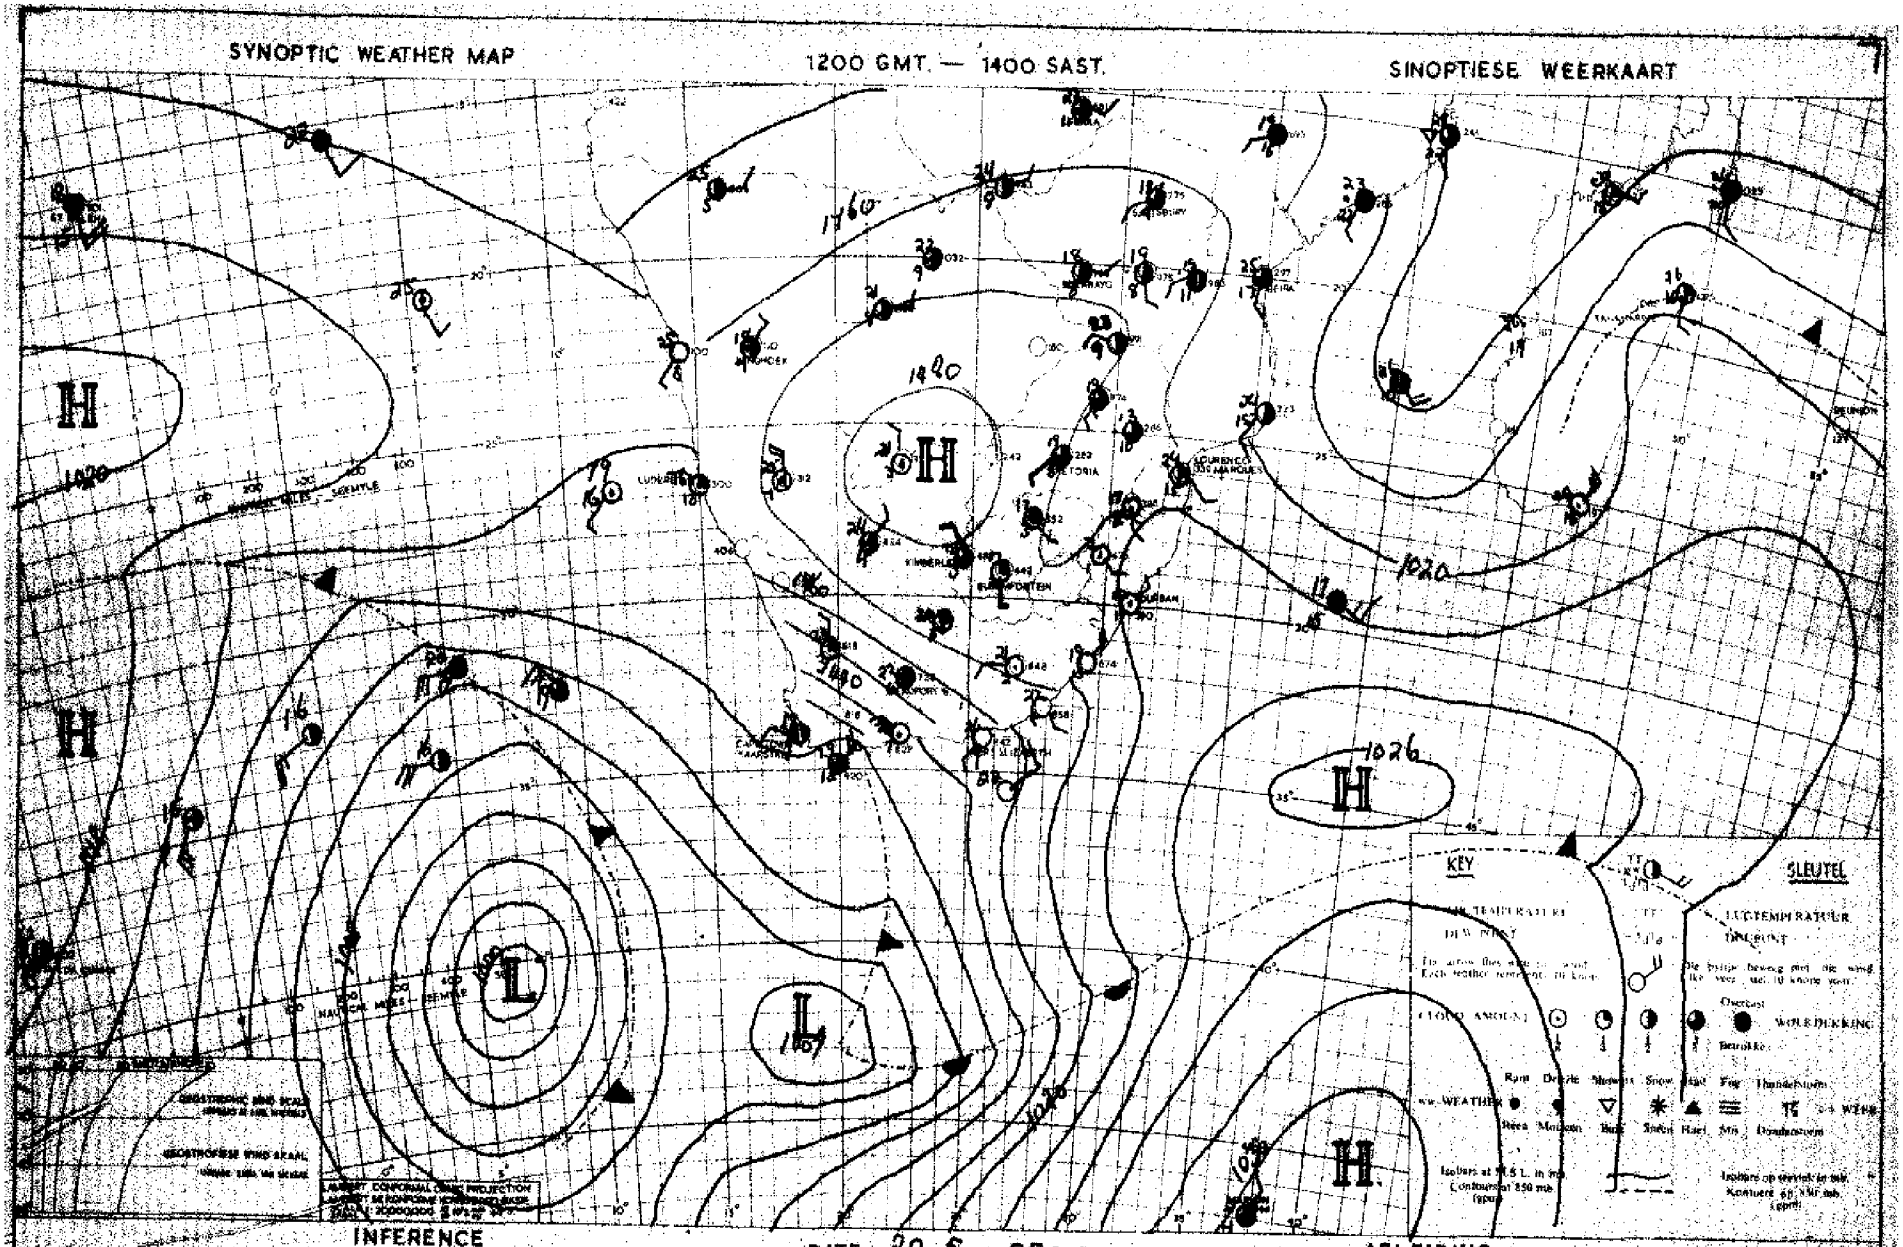
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

Cloudy showery weather will develop over the Southwestern half of the Cape Province, and the temperature will drop appreciably over this region. Fair and mild weather will continue over the remainder of the Union.

DATE 20 5 1957 DATUM

AFLEIDING

Bewolkte buierige weerstoestande sal oor die Suidwestelike helfte van Kaapland ontwikkel, en die temperatuur sal oor hierdie streek sterk daal. Oor die res van die Unie sal dit redelik mooiweer wees.

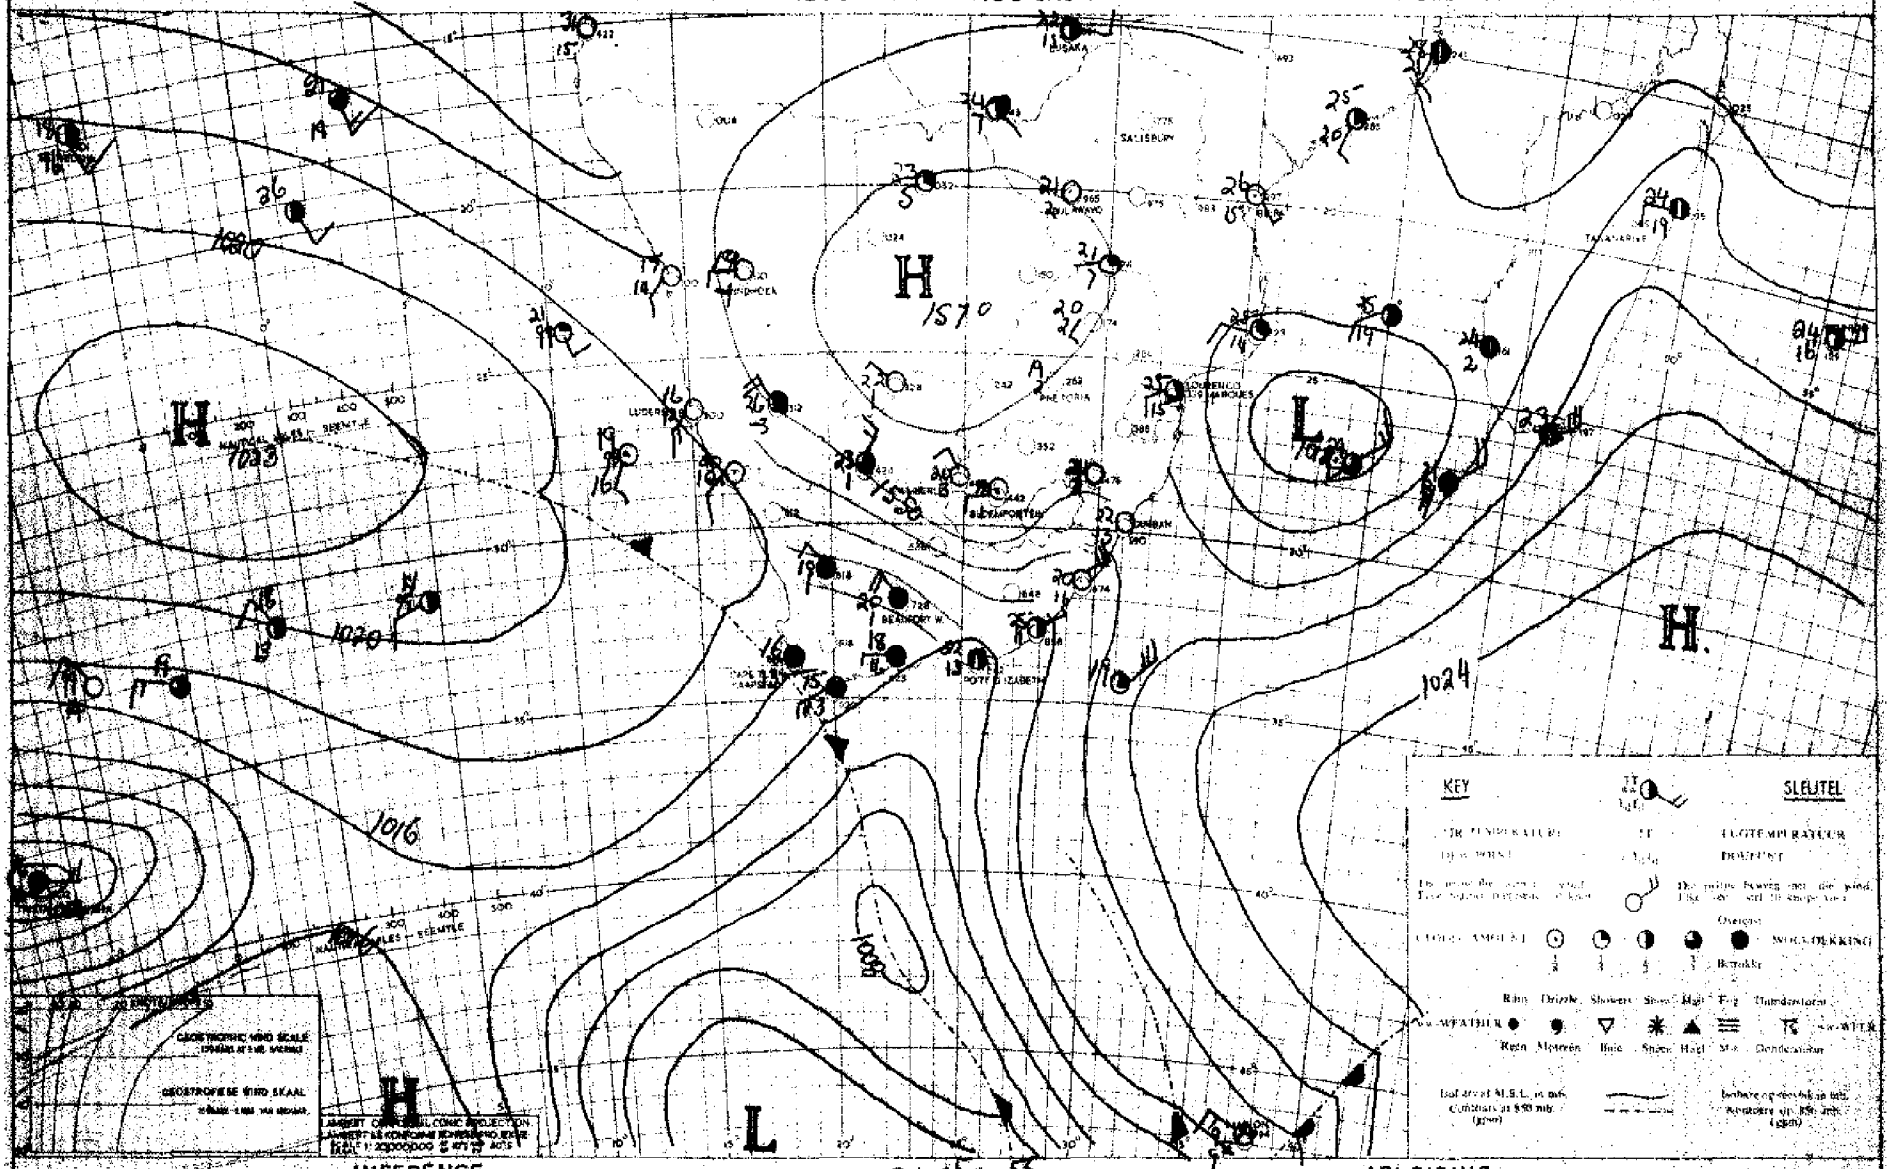
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

The cold front has now reached the Cape coast and will move Eastwards over the Western and Southern Cape Province, accompanied with rain showers. These conditions are, however, not expected to reach the Northern Province as there is no strong SW-ly, stream in the rear of the front, and fine weather will continue over these regions under the influence of the continental anticyclone.

DATE 21-5-1953 DATUM

AFLEIDING

Die koue front het nou die Kaapse kus bereik en sal Ooswaarts oor d Suidelike en Westelike Kaapland beweeg gepaard met reënbuie. Dit s egter nie, verwag dat, hierdie toestande die Noordelike Provinsies sal bereik nie, aangesien daar geen sterk Suidwestelike stroom agte front is nie, en dit sal hoofsaaklik mooiweer bly oor hierdie dele onder die invloed van die kontinentale hoogdruk.

INFERENCE

DATE 23 - 5 - 1955 DATUM

AFLEIDING

The cold front which is now approaching Lourenco Marques has faded out completely over the interior and has no influence on the weather over the Union. Consequently it will remain fine over all parts, except the Cape Southwest coast where a vague warm and cold front will cause light rain.

Die koue front wat Lourenco Marques nou nader, het oor die binneland heeltemal vervaag en het geen invloed oor die Unie se weer nie. Dit sal gevolglik mooiweer bly oor alle dele behalwe die Kaapse Suidweskus waar 'n swak warm en koue front ligte reën sal veroorsaak.

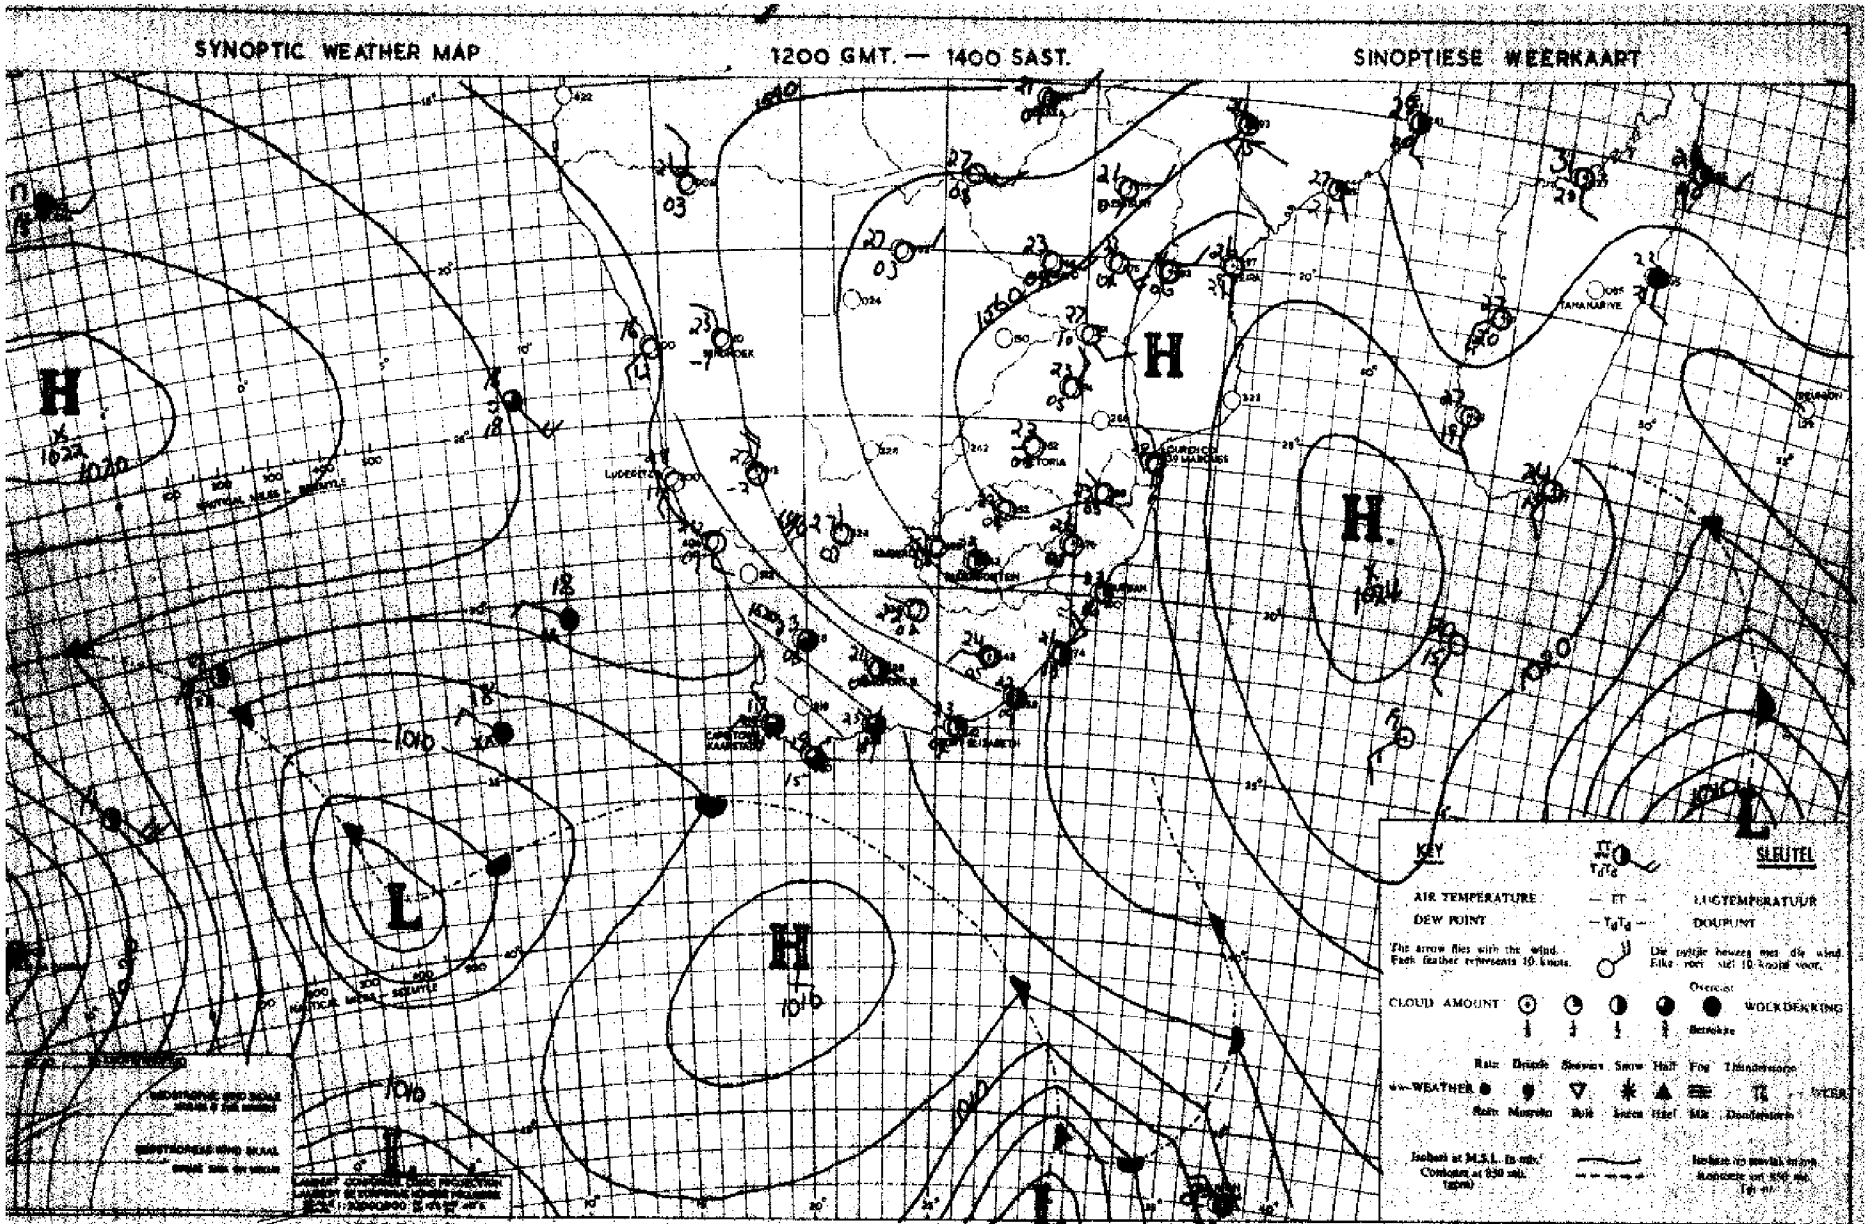
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

Although pressures will gradually drop over the S.W. Cape with the approach of the cold front west of the Cape, it is expected that the weather will remain fair and mild generally.

DATE 24-5-1955 DATUM

AFLEIDING

Alhoewel die lugdruk oor Suidwes Kaapland geleidelik sal daal vanwee die nadering van 'n koue front wes van die Kaap, sal dit oor die algemeen mooiweer en matig bly.

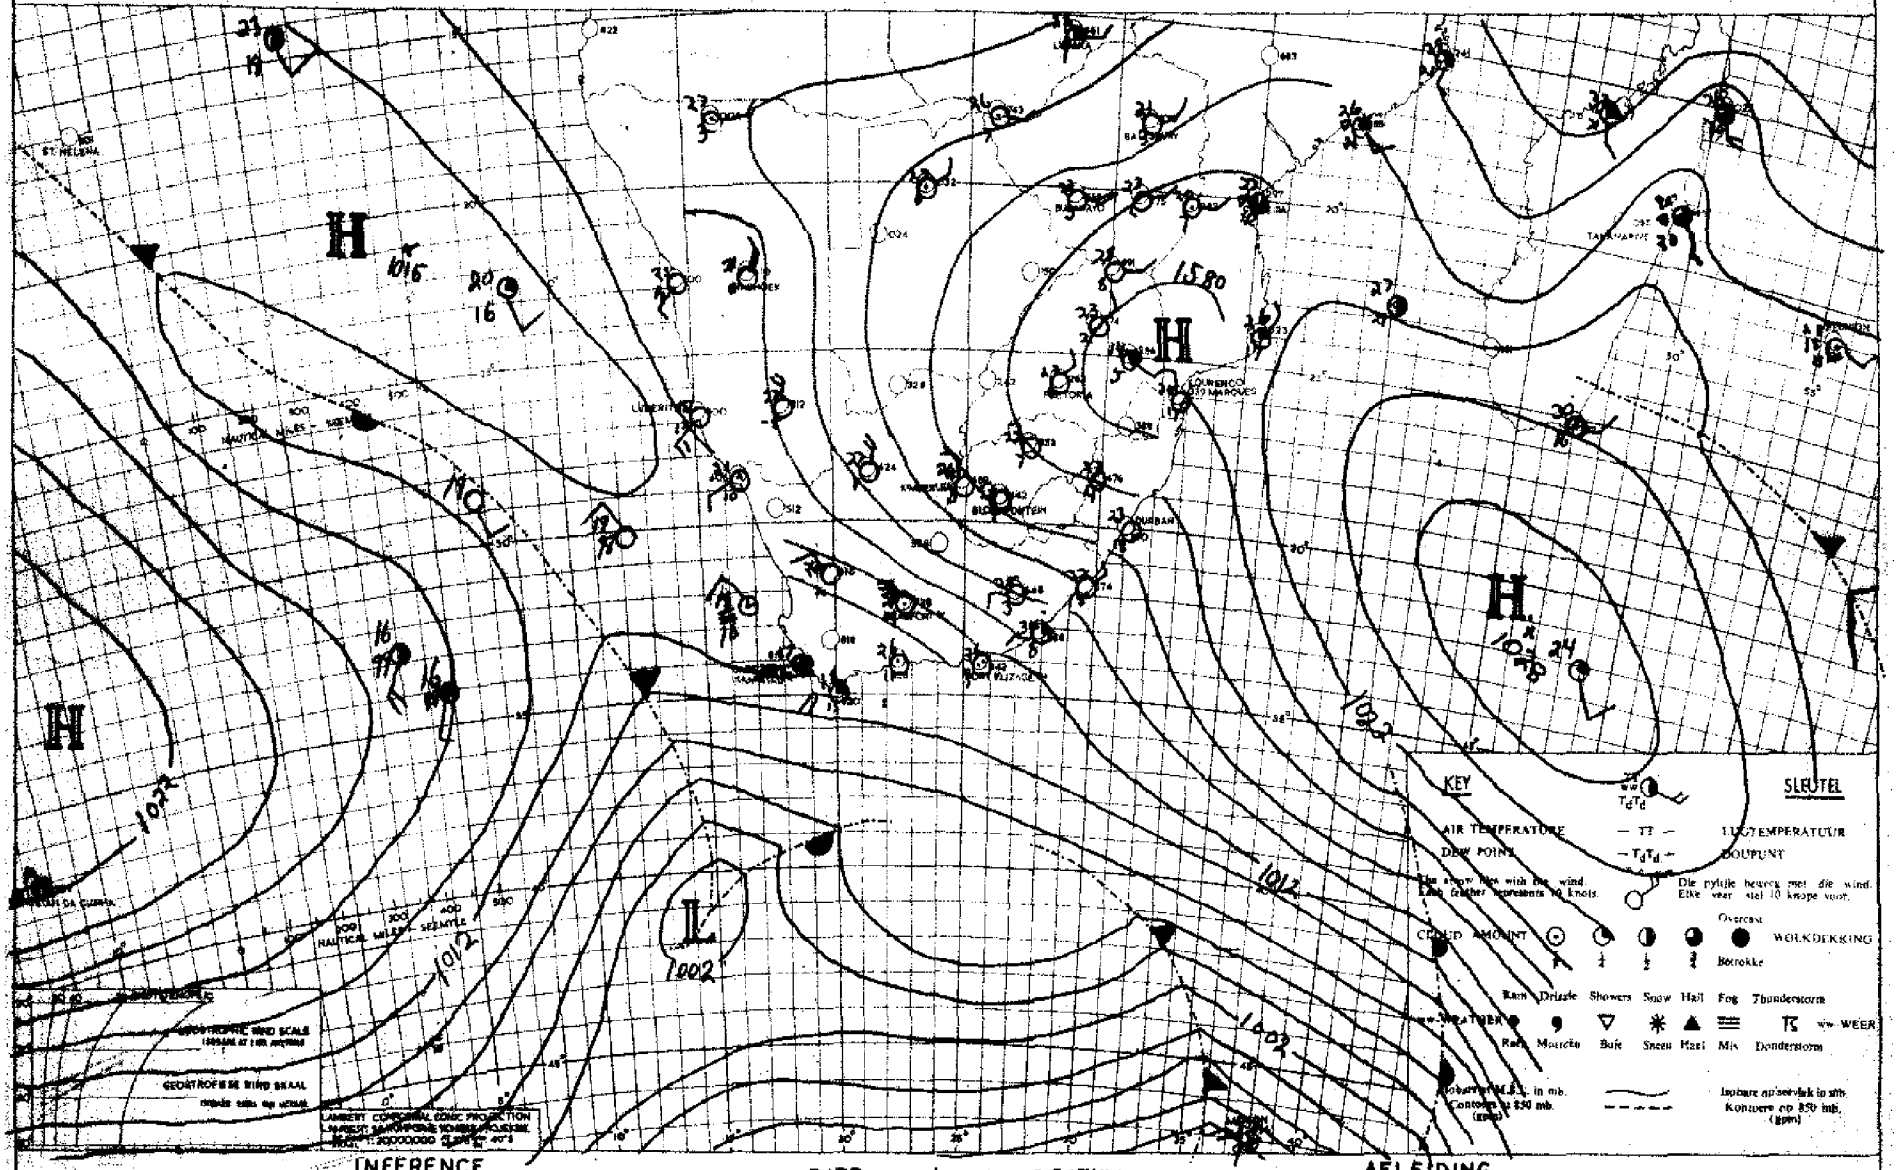
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 15/5 1955 DATUM AFLEIDING

It looks as if the cold front west of the Union will reach the Cape coast soon but it may be delayed for a day as a result of the apparent wave over the Mid-Atlantic ocean. Until it does reach the coast, the weather will remain fine and warm over the Union.

Dit skyn asof die koue front wes van die Unie die Kaapse kus gou sal bereik, maar dit mag vertraag word as gevolg van 'n golf oor die Middel-Atlantiese oseaan. Intussen bly dit dan mooiweer oor Unie en SWA en word warm.

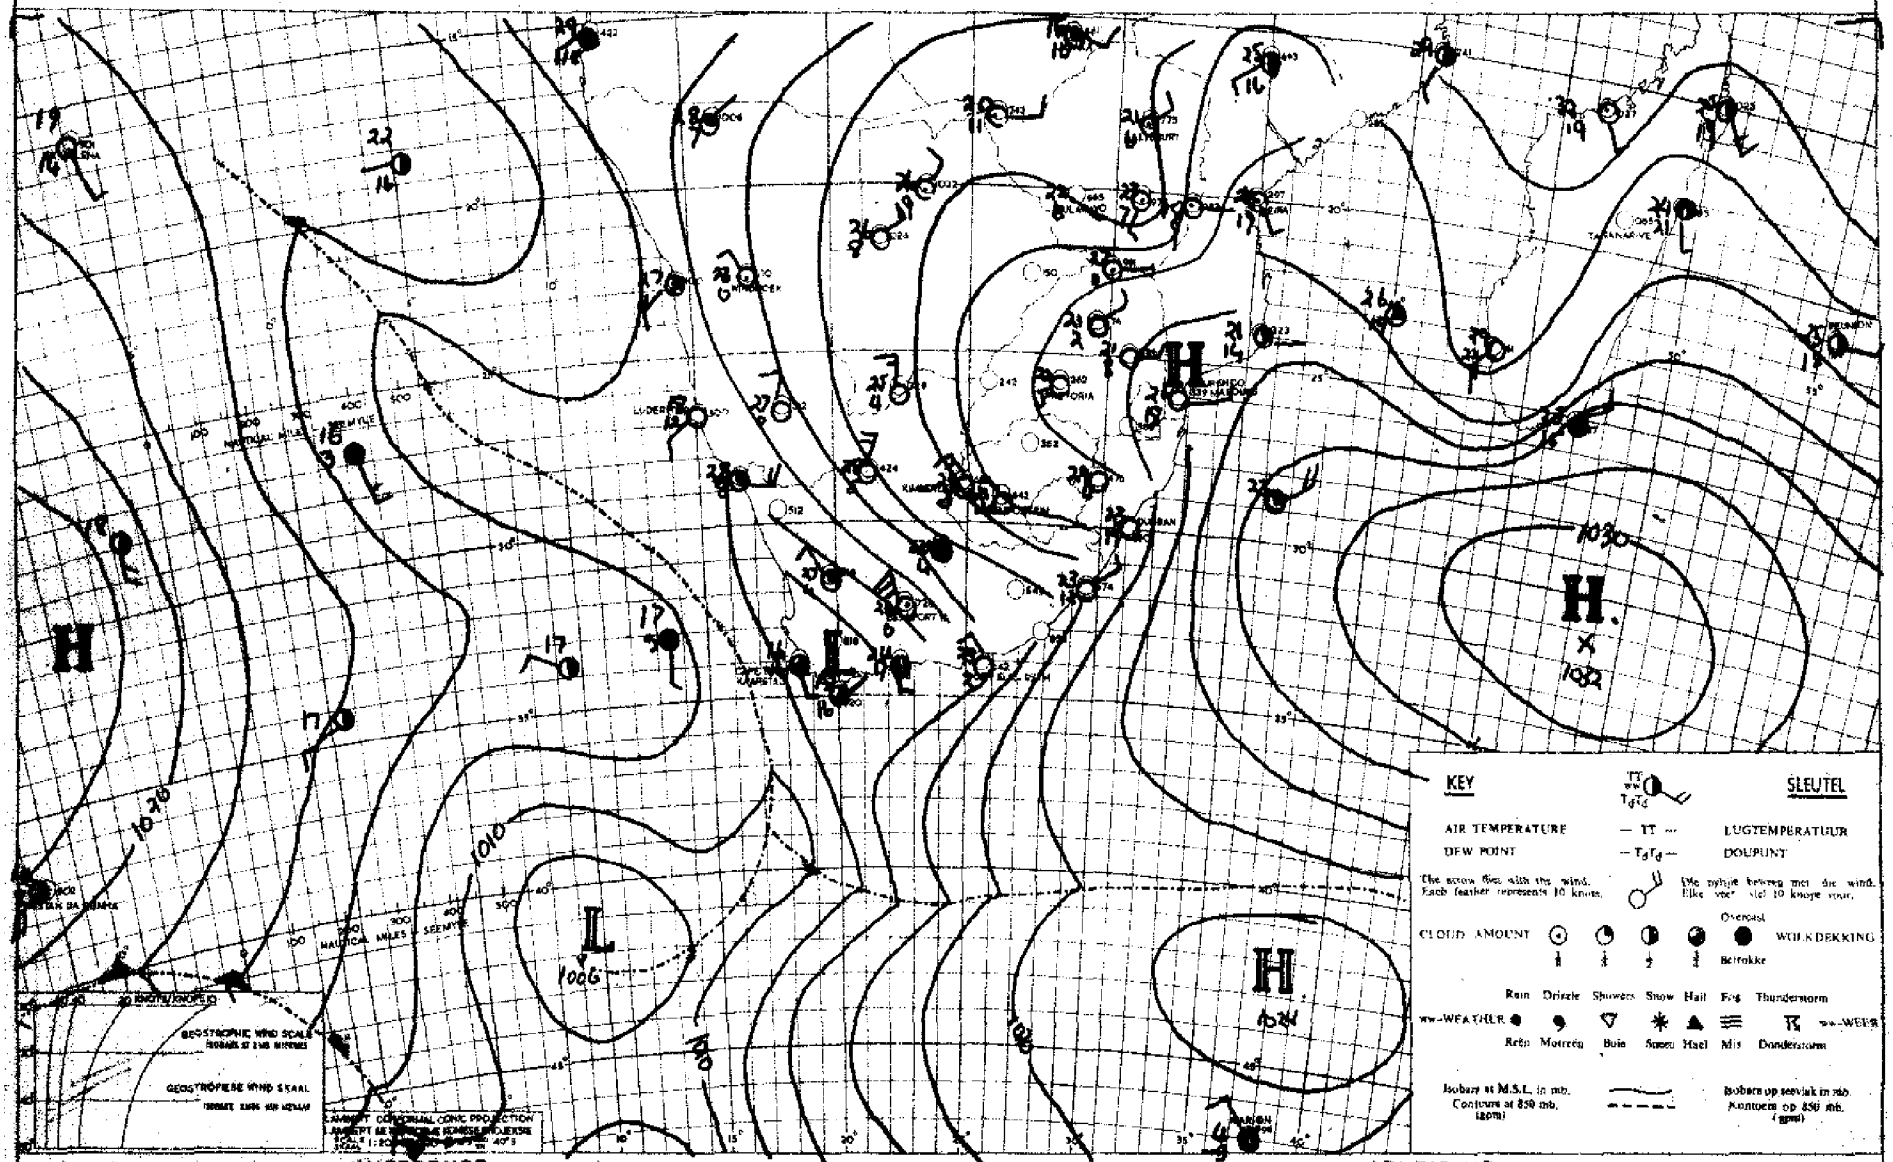
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 26 5 1955 DATUM AFLEIDING

Although the eastward movement of the cold air towards the Cape has slowed down it is expected that it will reach the South-western Cape Province later tomorrow. Cloudy weather with local rain or thundershowers will therefore occur over this region. Stable weather will occur over the remainder of the Union but winds will be fresh northwesterly over the interior.

Alhoewel die ooswaartse beweging van die koue lug na die Kaap spoed verminder, word dit tog verwag dat dit mêre later in die dag die suidwestelike distrikte van Kaapland sal bereik. Bewolkte weer gepaard met reën of donderbuie sal dus oor hierdie streek voorkom. Bestendige weerstoestande sal oor die res van die Unie bly voortduur, maar taamlike sterk winde sal oor die binneland waai.

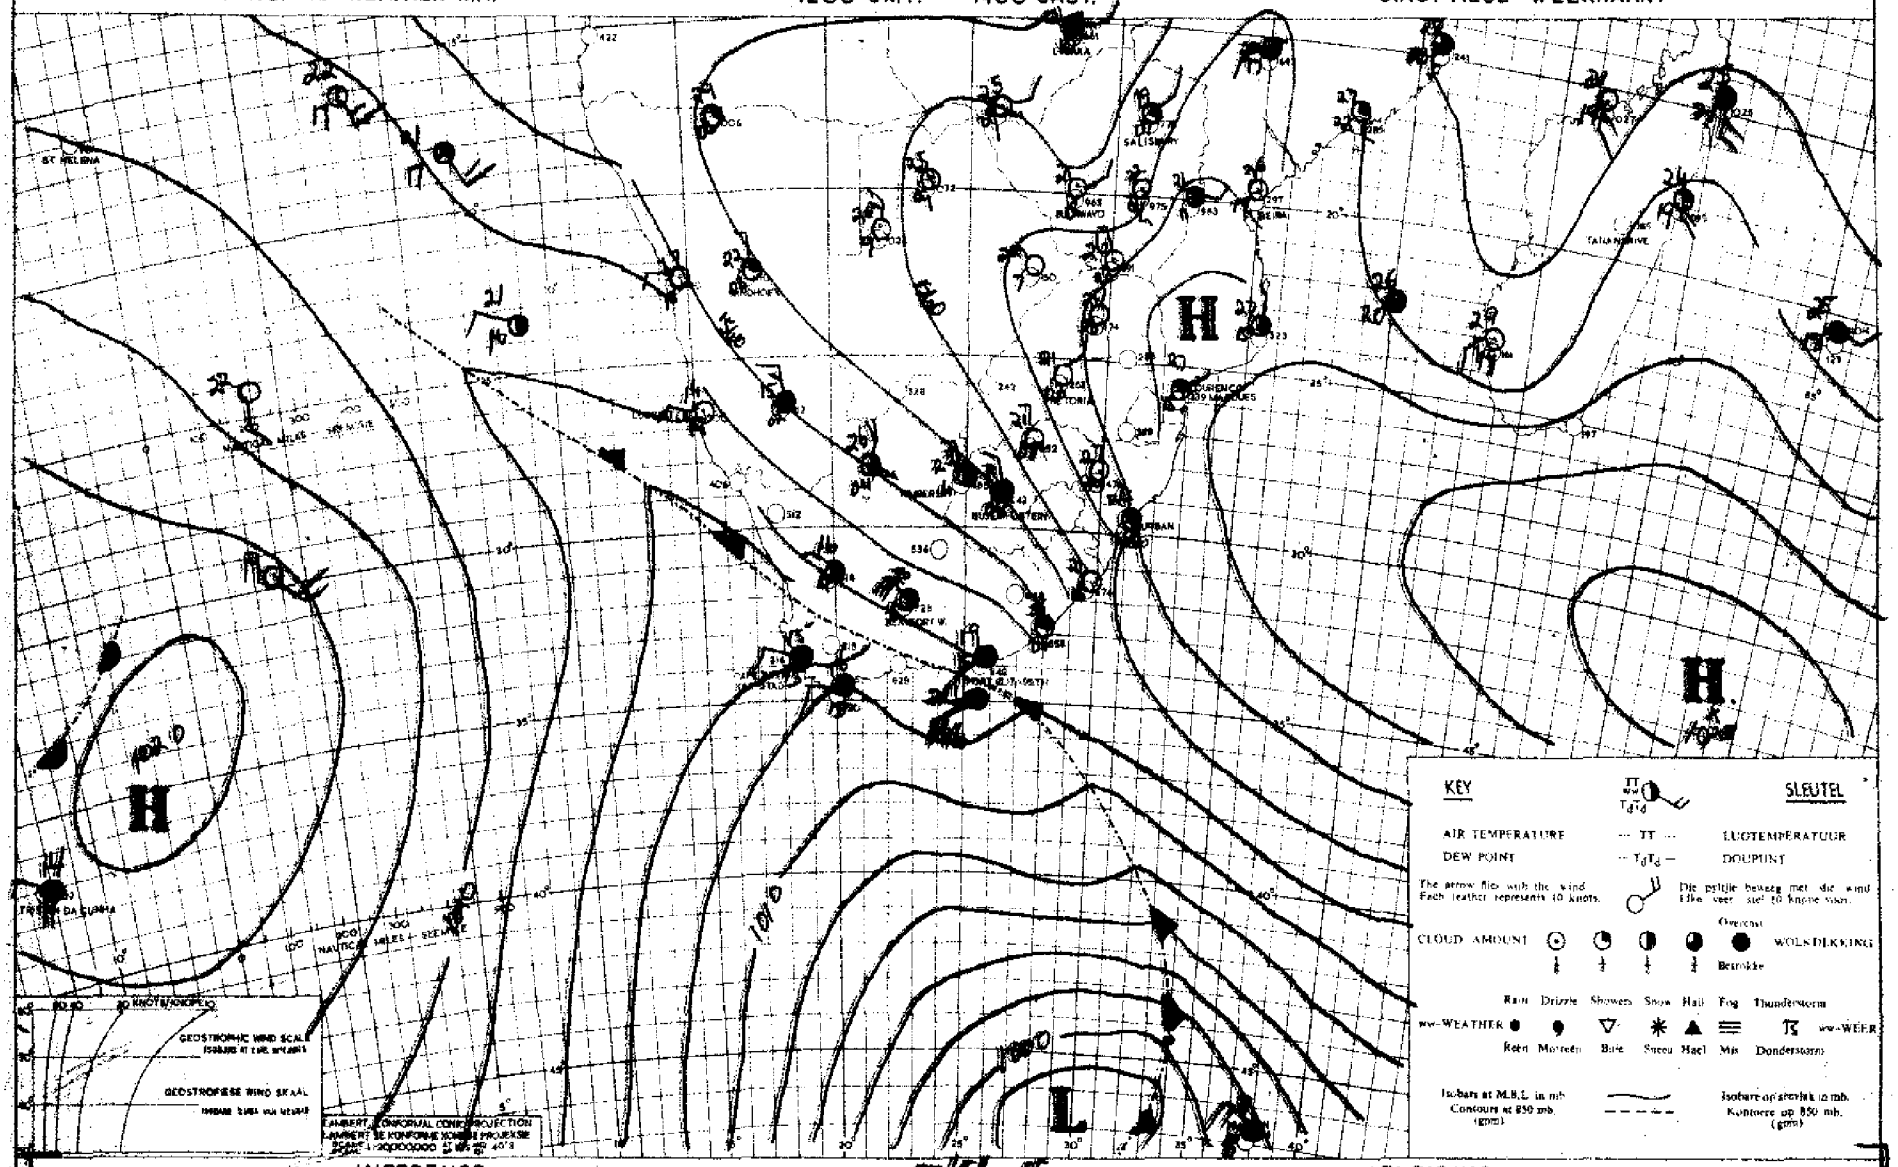
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE

DATE 27/5/19 85

A cold front with colder air in its rear has passed the south-western and southern Cape districts and will spread to the south-eastern Cape and the Cape interior. Light showers will occur these regions. Over the remainder of the Union it will remain fair and mild.

DATUM

AFLEIDING

'n Koue front gevolg deur koue lug het die suidwestelike en suidelike distrikte van Kaapland bereik en sal geleidelik ook na die suidoostelike en binnelandse distrikte van Kaapland beïnvloed. Ligte buie sal uitsak. Oor die res van die Unie sal dit heelsaamlik mooiweer en matig bly.

With the intense high to the South of the Union moist air over Natal and Eastern Transvaal will spread over most of the Union interior and local showers may be expected. Over the Southwestern coastal belt it will remain fine or slightly cloudy.

Met die sterk hoogdruk Suid van die Unie sal vogtige lug oor Natal en Oos-Transvaal uitbrei oor feitlik die hele binneland van die Unie en plaaslike reënbuie kan verwag word. Oor die SW kusstreke bly dit mooiweer of effens bewolk.

SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART

INFERENCE — DATE 16 1955 DATUM — AFLEIDING

Drier air is gradually moving eastward over S.W.A., and the northwestern Union. Fair and mild weather will prevail over these regions. Over the remainder of the Union the weather will remain cloudy and thunderstorm conditions will develop over the eastern half of the Cape Province, and the southwestern Free State.

Droër lug beweeg geleidelik ooswaarts oor S.W.A. en Noordwes-Kaapland. Redelike mooiweer en matige weerstoestande sal oor hierdie streke voorkom. Oor die res van die Unie sal dit bewolk bly en donderweerstoestande sal oor die oostelike helfte van Kaapland en die suidwestelike helfte van die Vrystaat ontwikkel.

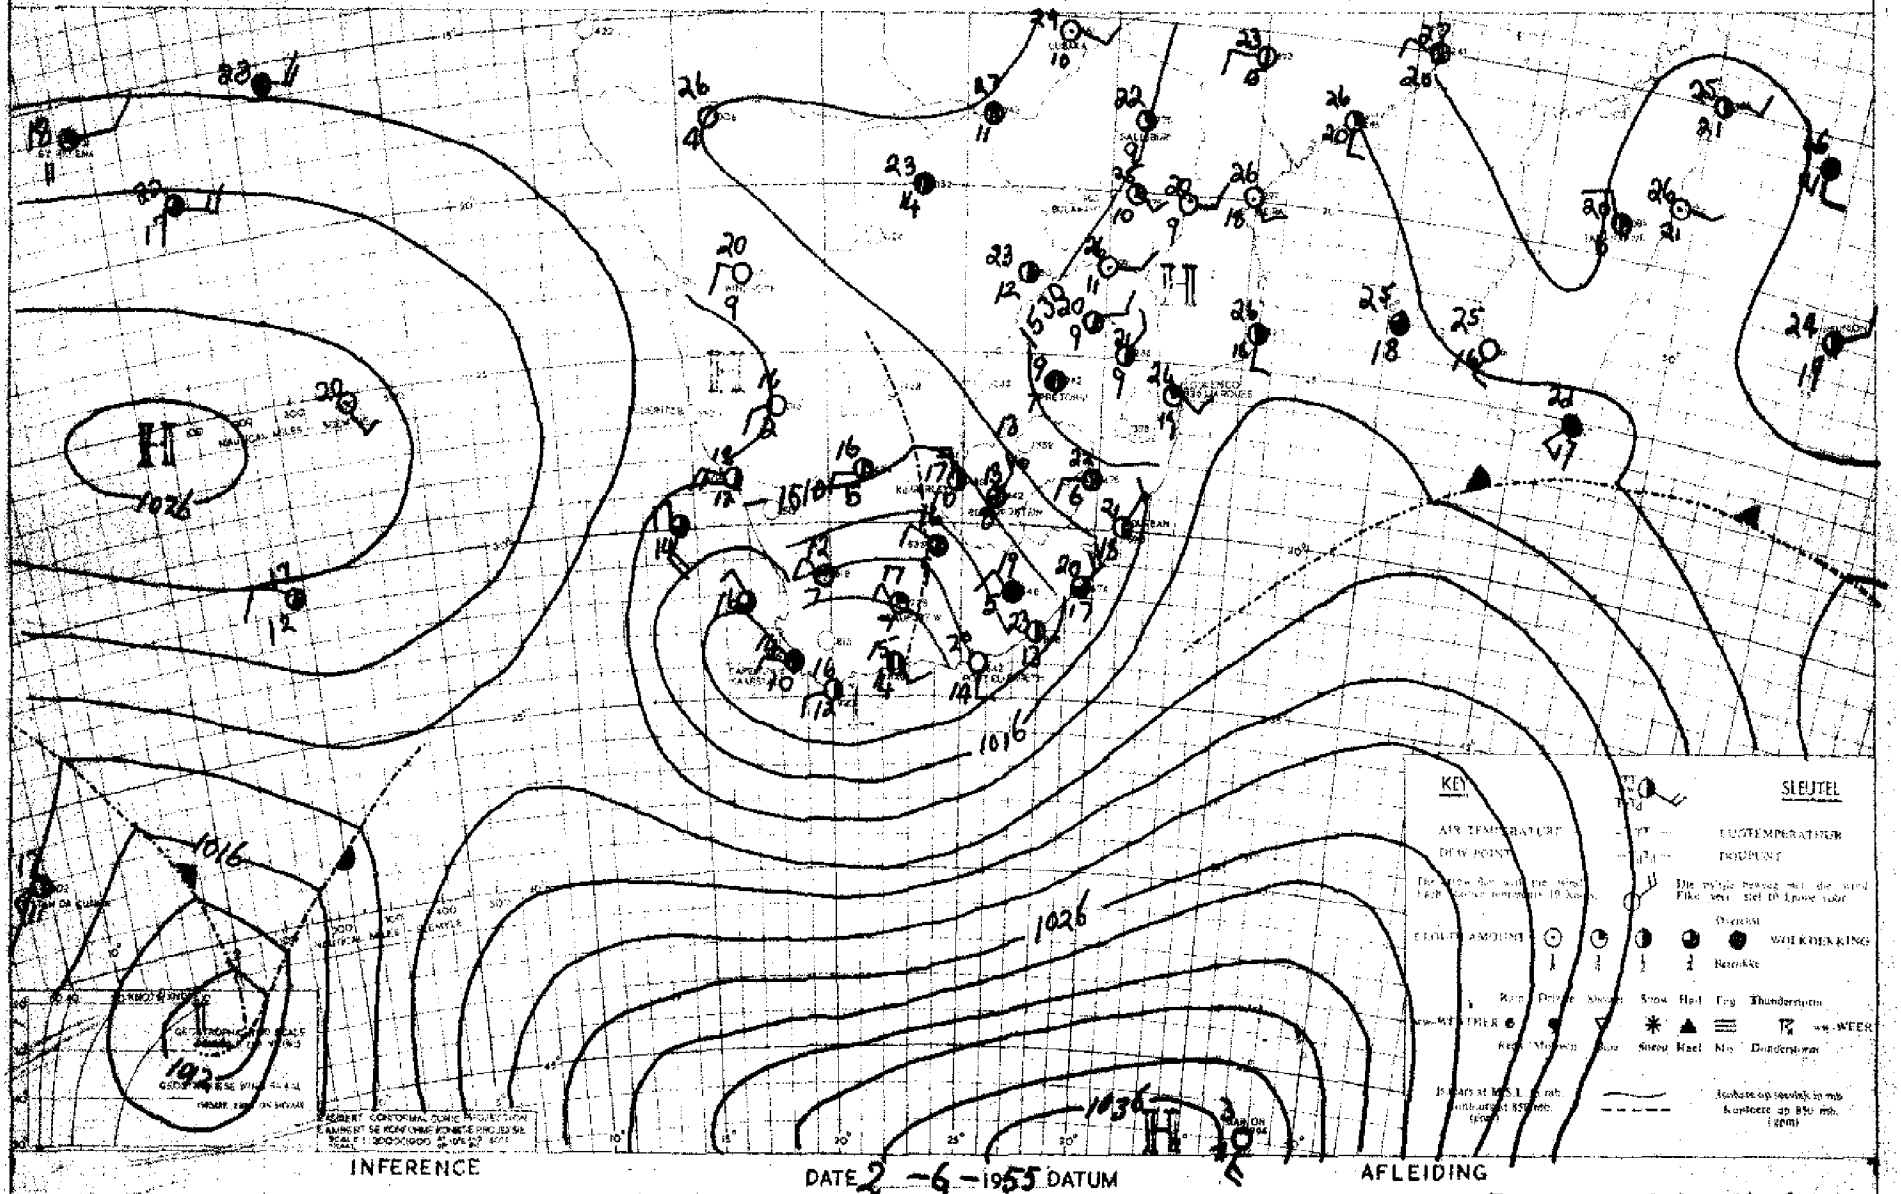
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 2 – 6 – 1955 DATUM AFLEIDING

The strong high to the South of the Union prevents the low over the Cape Province from moving Eastwards and the weather over the Union will remain cloudy. Thundery conditions will develop over the eastern Union to the east of the trough but over the western Union interior it will gradually clear up.

Die sterk hoogdruk ten Suide van die Unie verhoed dat die laag oor Kaapland oostwarts beweeg en dit weer oor die Unie sal bewolk bly. Donderweerstoestande sal ontwikkel ten Ooste van die trog oor die oostelike Unie, maar oor die westelike Unie binneland klaar dit geleidelik op.

Maksimum en Minimum Temperature (°C) en Reënval (mms.) vir die 24uur wat om 0600 (SAST) eindig op ....4-6-55....

DATE 3-6-1955 DATUM

The high centred at Marion has not moved in the past 24 hours and consequently the low over the SW Cape Province has remained stationary. Drier atlantic air has, however, spread North of the low over the Western Union interior. This atlantic air is, however, moist in the lower layers, and, gives cloudy weather over the SW coast and adjoining interior. Over the

AFLEIDING

Die hoog by Marion het nie beweeg in die afgelope 24 uur nie en dus is laag oor SW Kaapland is dan ook nog stasionêr. Droër atlantiese lug, het egter Noord van die laag oor die Westelike binneland van die Unie inbeweeg. Die atlantiese lug is egter vogtig in die onderste luglae en gee dus nog bewolkte weer langs

INFERENCE

As a result of the high over the interior it will remain fine over these regions. With the cold fronts approaching the coast it will become cloudy and cooler over the coastal regions and showers will occur on the South and East coasts.

DATE 6-6 — 1955 DATUM

AFLEIDING

As gevolg van die hoog oor die binneland bly dit mooiweer oor daardie dele. Met die twee koue fronte wat die kus nader sal dit bewolk en kool word oor die kuststreke en reënbuie sal voorkom oor die Suid- en Ooskus.

Cold air, backed by an intense high pressure system over the Southeast Atlantic, will gradually move over the whole of the Union. Shower activity will occur over the South and Southeast Cape coast but over the remainder of the Union the weather will be fair with low temperatures.

Koue lug, wat deur 'n intensiewe hoog Suidoos van die Unie ondersteun word, dring geleidelik die suidelike kontinent binne. Buierige weer sal langs die Suid en Suidoostelike kuustreke van Kaapland voorkom, maar oor die res van die Unie sal dit redelik mooiweer wees met lae temperature.

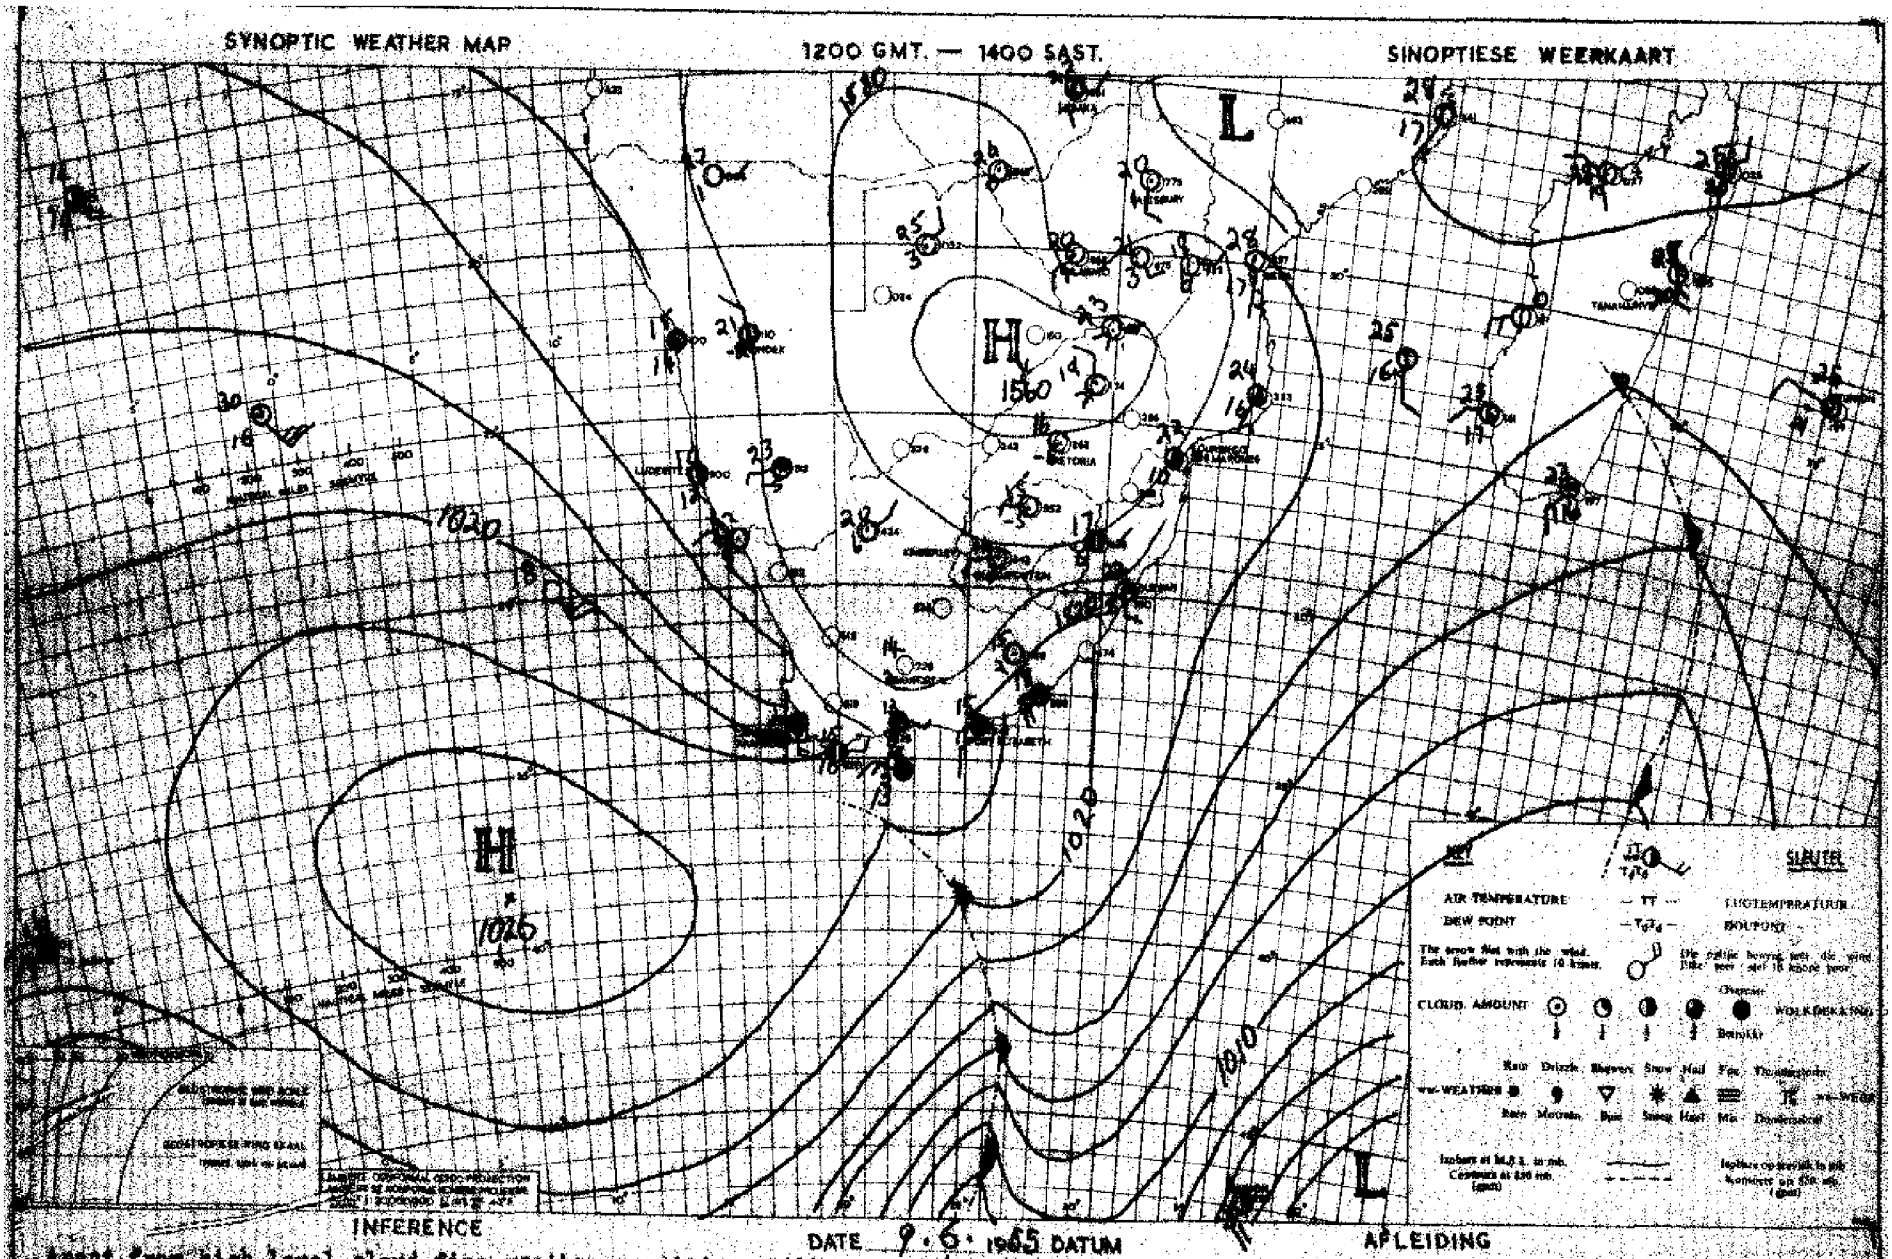
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

Due to influx of a moist tongue of air over the northwestern Cape Province from Bechuanaland, cloudy showery weather will occur over Southern S.W.A. Gordonia, Griqualand West and Southwestern Free State. Cloudy weather will also develop over the Eastern and Northern Transvaal, but over the remainder of the Union it will be fair.

DATE 10-6-1955 DATUM

AFLEIDING

Weens die invloei van 'n tong van vogtige lug oor die noordwestelike Kaap Provinsie vanaf Betsjoeanaland, sal bewolkte buierige weer oor die suidelike distrikte van S.W.A. Gordonia Grikwaland-Wes en Suidwes-Vrystaat voorkom. Bewolkte weer sal ook oor Oos en Noord Transvaal ontwikkel, maar oor die res van die Unie sal dit redelik mooiweer bly.

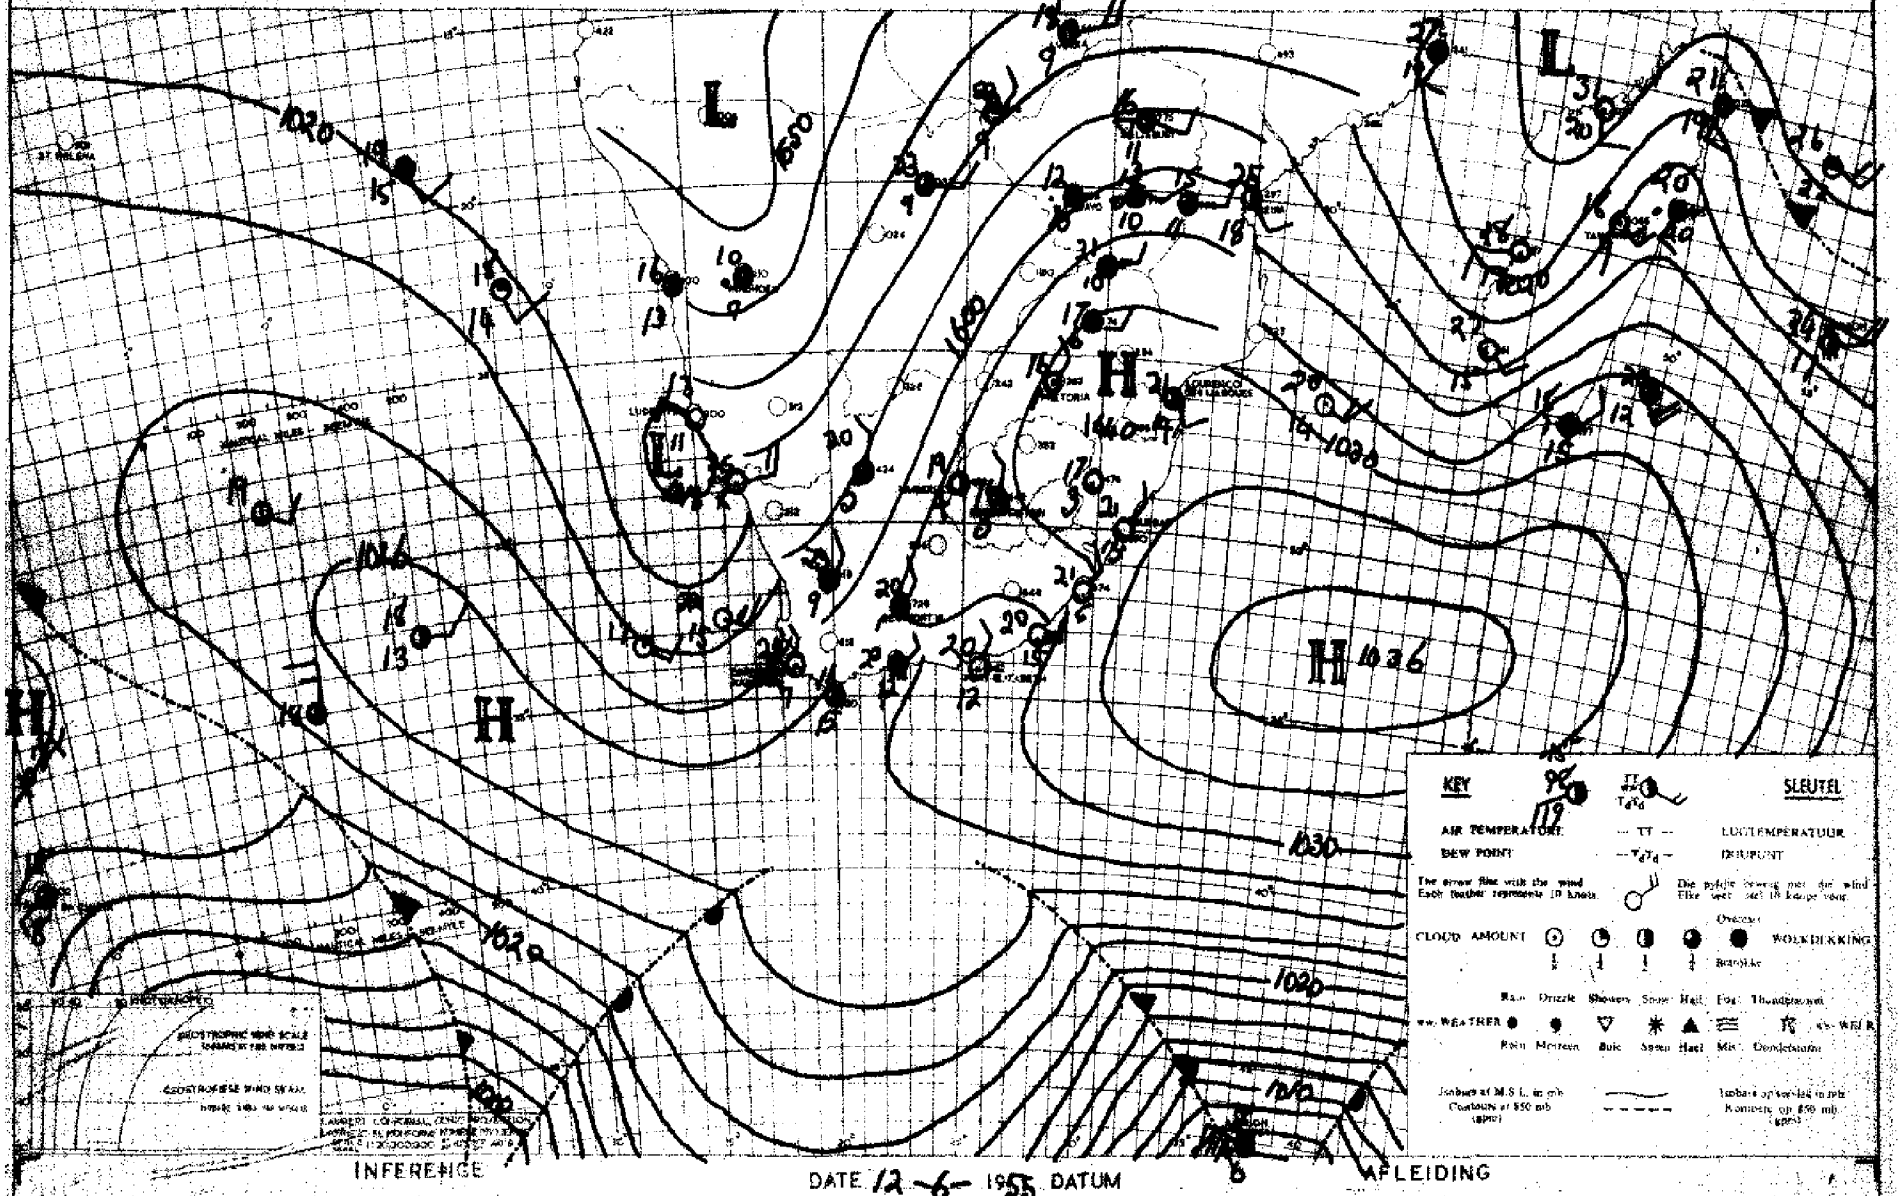
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 12-6-1955 DATUM — AFLEIDING

The strong high to the East of the Union is feeding in moist air over Transvaal and Rhodesia and the weather will be cloudy with light rain over these parts. Convergence is taking place over SW Africa and NW Cape and scattered rain or thundershowers will occur. These conditions will gradually spread to the South.

Die sterk hoogdruk ten Ooste van die Unie voer vogtige lug in oor Transvaal en Rhodesië en die weer sal bewolk wees oor daardie dele met ligte reën. Oor SW-Afrika en NW-Kaapland vind konvergensie plaas en verspreide reën of donderbuie sal voorkom. Hierdie toestande sal geleidelik Suidwaarts uitbrei.

INFERENCE

Drier air is invading the western continent in the higher levels and as a result the weather will clear over S.W.A. and the Northwestern Cape districts. Over the remainder of Union cloudy weather will generally prevail and light showers will occur locally over the Transvaal, Free State, Northern and Central Cape and Natal.

DATE 13-6-55 DATUM

AFLEIDING

Droer lug word in die hoër lugvlakke oor die westelike kontinent ingevoer en asgevolg hiervan sal die weer oor S.W.A. en Noord-wes Kaapland opklaar. Oor die res van die Unie sal dit nogal bewolk wees en ligte buie sal plaaslik oor Transvaal, Vrystaat, Noord- en Middel-Kaapland en Natal uitsak.

INFERENCE

Moist air is still present over the Union but in the upper air the circulation has became anticyclonic and the weather will be settled. The cold front approaching from the west will cause cloudy weather over the coastal areas.

DATE 14-6-1965 DATUM

AFLEIDING

Vogtige lug is nog aanwesig oor die Unie maar in die bolug het die sirkulasie nou antiklonies geword en die weer sal gestadig bly. Die koue front wat van die weste aankom sal bewolkte weer oor die kusstreke vervoorsaak.

AFLEIDING

Partly cloudy weather will continue generally and due to falling pressure over the Southwestern Cape winds will freshen from the northwest over the southwestern half of the Cape Province.

Gedeeltelik bewolkte weerstoestande sal bly voortduur maar weens die val van druk oor Suidwes-Kaapland sal die noordweste winde oor die suidwestelike helfte van Kaapland begin versterk.

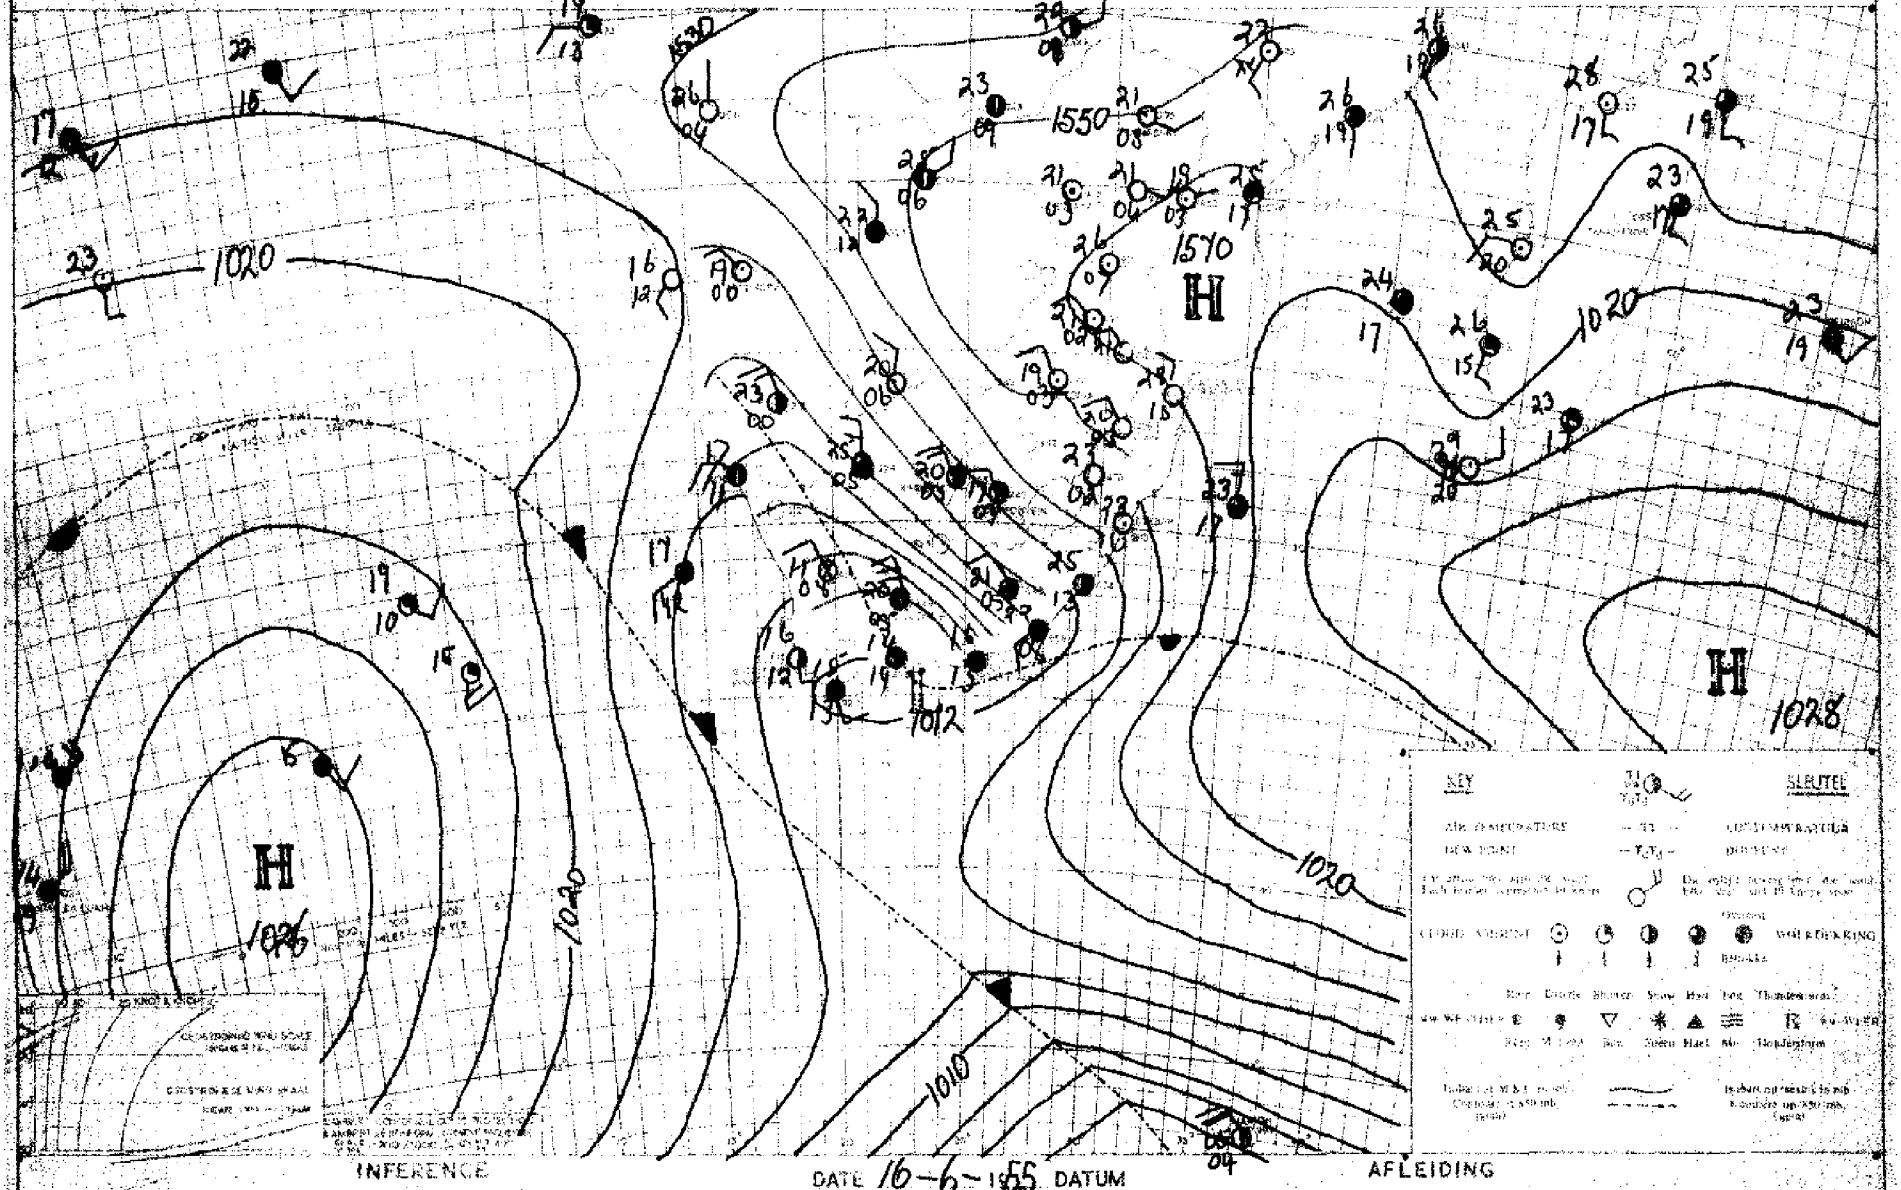
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 16-6-1955 DATUM AFLEIDING

Convergence is taking place over the Southern Union in advance of the trough which is moving Eastwards, and showers will occur. The colder air approaching from the West will, however, give clearing over the Western interior. Over the Cape coastal areas it will be cool and cloudy with showers.

Konvergensie vind plaas oor die Suidelike Unie net voor die trog wat besig is om Ooswaarts te beweeg en reënbuie kom voor. Die kouer lug, wat vanaf die Weste nader, sal egter 'n geleidelike opklaring oor die Westelike binneland veroorsaak. Oor die kusstreke van Kaapland bly dit bewolk en koel met reënbuie.

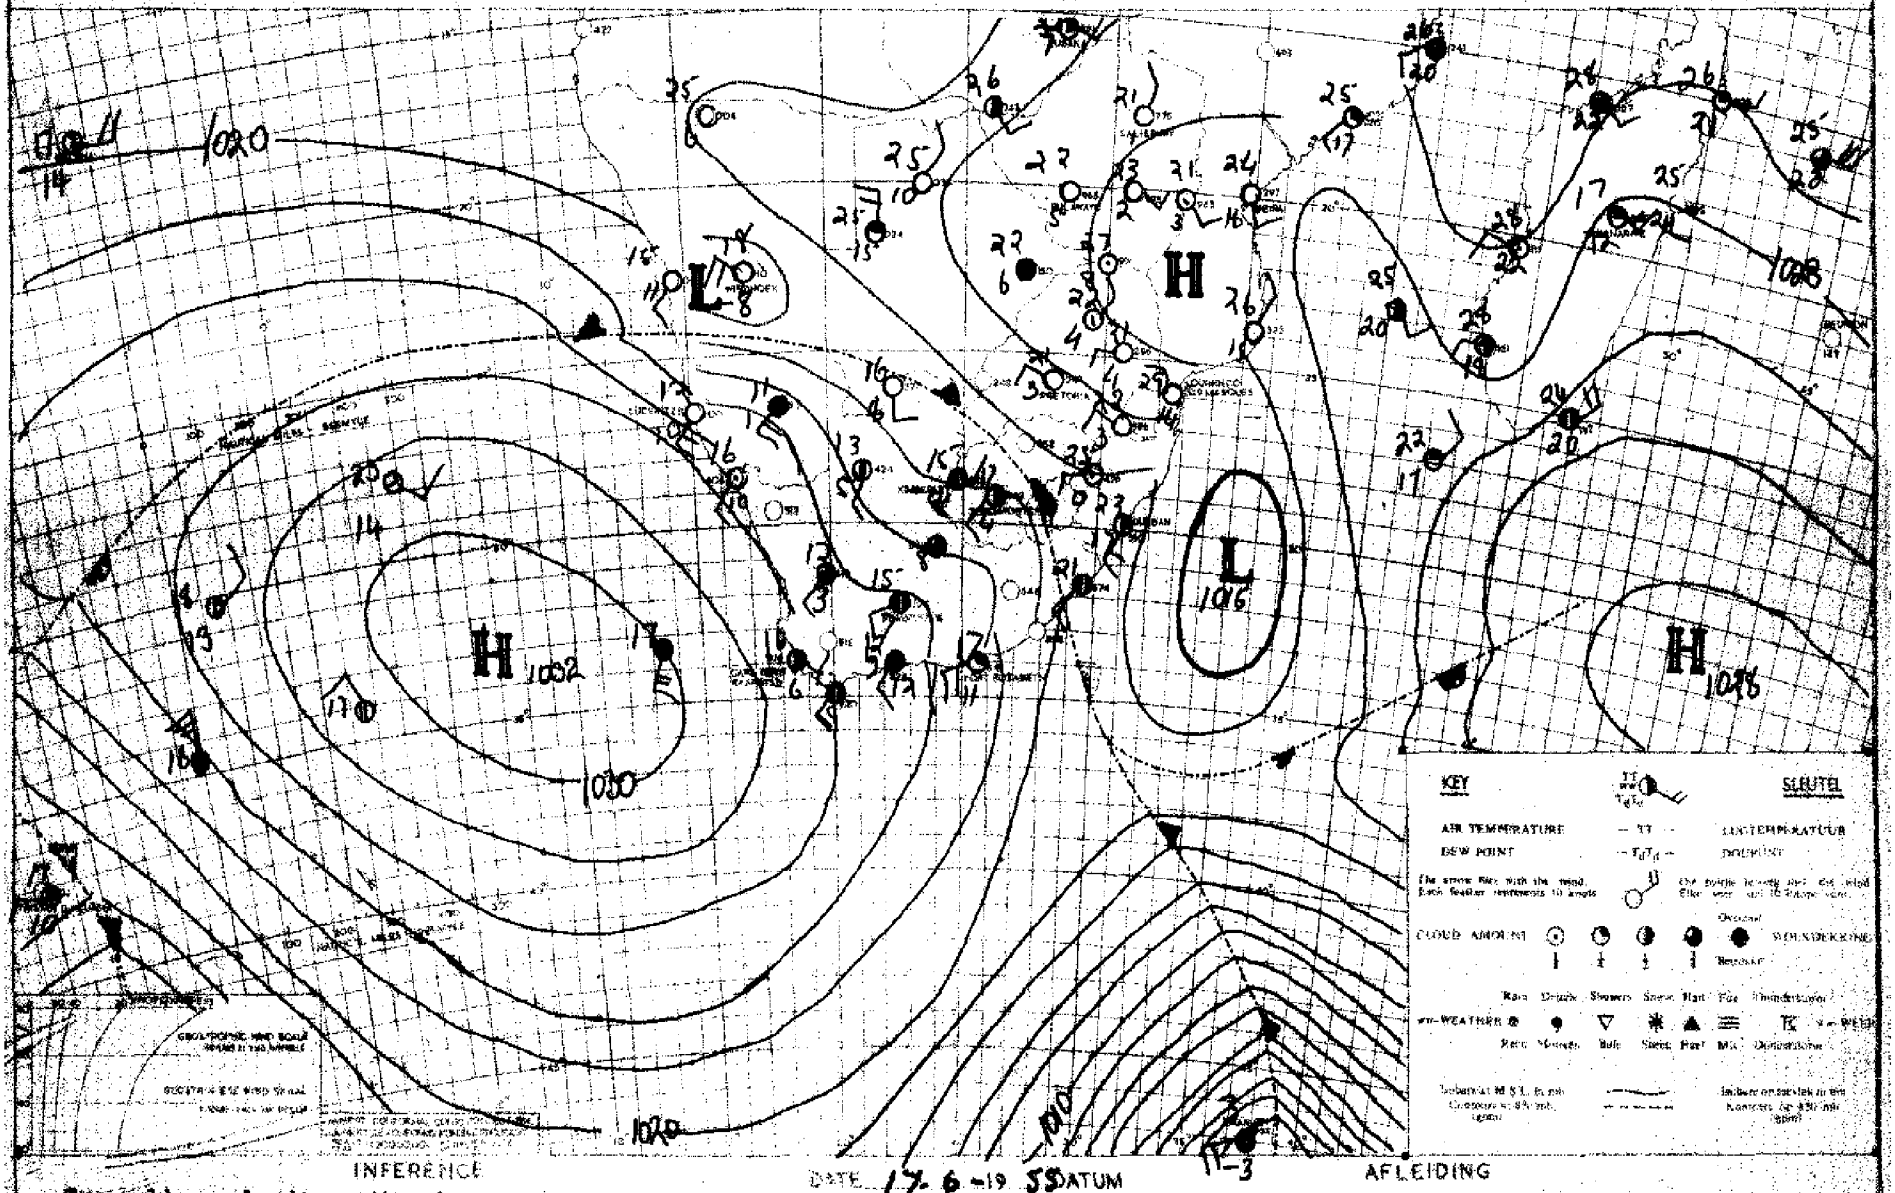
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

The colder, cloudy weather has now spread over the Cape Province, Southern OFS and Southern SW Africa. Pressures are rising steeply along the East coast and the cold air will also spread over Natal and reach Transvaal later from the Southeast. Rain will occur over the Southern and Eastern coastal regions, O.F.S., North Cape, Transvaal and Natal.

DATE 17-6-19 55 DATUM

AFLEIDING

Die kouer bewolkte weer het nou reeds uitgebrei oor Kaapland, die Suidelike OVS en Suidelike SWA. Lugdrukke styg skerp langs die Ooskus en die koue lug sal dus ook oor Natal uitbrei en Transvaal ook later uit die Suidooste bereik. Reën sal voorkom oor die Suidelike en Oostelike kuststreke, O.V.S., Noord-Kaapland, Transvaal en Natal.

INFERENCE

A wedge of the strong Atlantic Ocean anticyclone extends round the South and East coastal regions and the colder cloudy weather has also spread over Natal and Southeastern Transvaal. Over SW Africa and the greater part of the Cape Province the weather has cleared. As a result of the sharply falling pressures along the Western coast, winds over the Union are backing to Northeasterly and the cloudy weather is again advancing Southwards.

DATE 16/6 1958 DATUM

AFLEIDING

'n Wig van die sterk Atlantiese-oseaan-hoog strek om die Suid- en Ooskusstreke en die kouer bewolkte weer het dus ook oor Natal en Suidoos-Transvaal uitgebrei. Oor Suidwes-Afrika en die grootste deel van Kaapland het die weer opgeklaar. As gevolg van die sterk daling in lugdrukke oor die Westelike kus, draai die winde oor die Unie

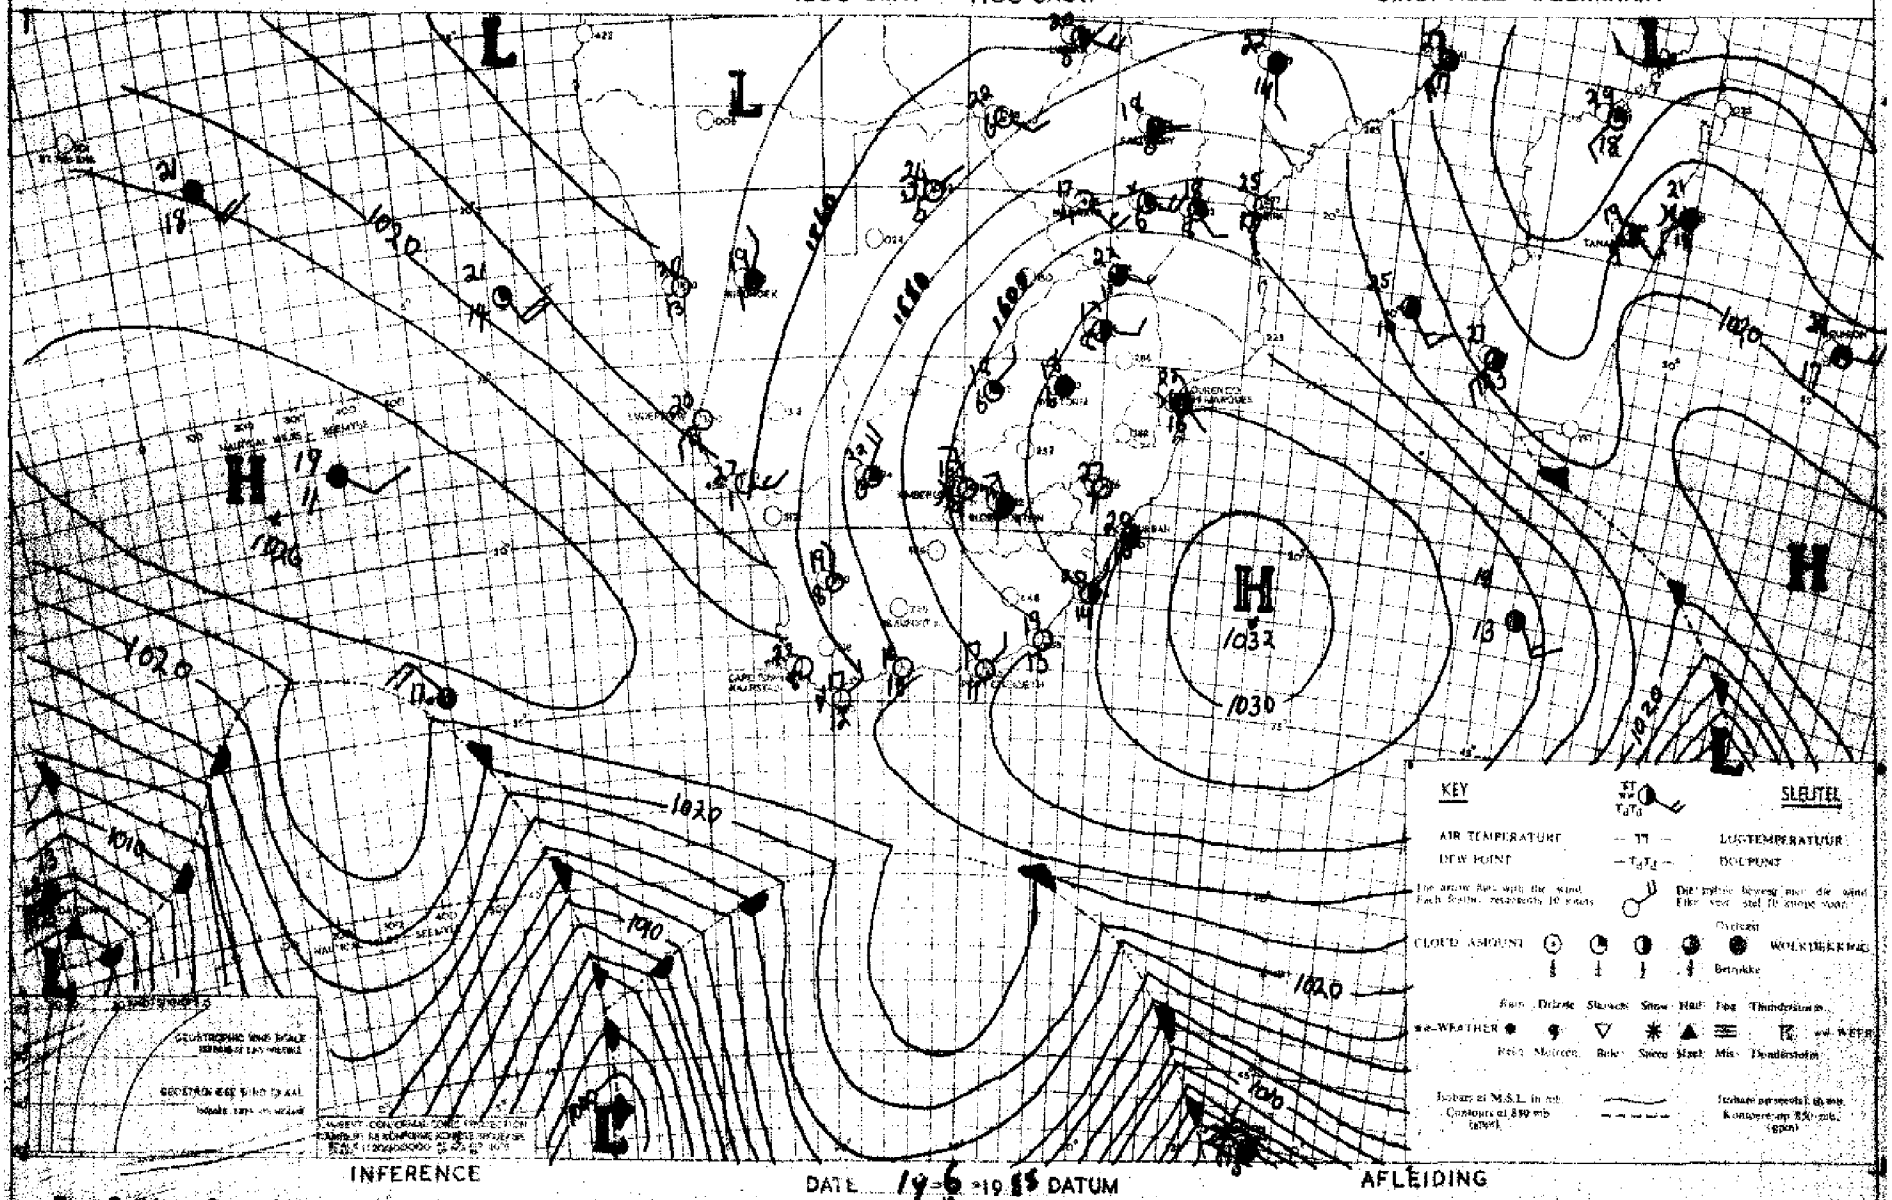
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

DATE 14-6-1995 DATUM

AFLEIDING

The Indian Ocean anticyclone dominates the air circulation over the Union. As the air is fairly moist partly cloudy weather will occur locally over Griqualand West. The coastal weather will be fine generally.

Die Indiese Oseaan antisikloon beheer die lugsirkulasie oor die Unie. Aangesien die lug vogtig is sal gedeeltelik bewolkte toestande oor die binneland voorkom, en ligte rëen sal plaaslik oor Grikwaland Wes uitsak. Langs die kuststreke sal dit mooiweer wees.

INFERENCE

As a result of the series of lows in circulation between Tristan and Marion, a westerly stream will control weather over the Southern Union so that weather over the interior will be partly cloudy but rainless for a day or two. The cold front midway between Tristan and the Cape will, however, give rain over the SW Cape coast within the next 24 hours.

DATE 20-6-1955 DATUM

AFLEIDING

As gevolg van die reeks laagdrukstelsels wat tussen Tristan en Marion van Wes na Oos beweeg kom die Suidelike Unie onder die invloed van 'n Westelike lugstroom en die weer oor die binneland sal gedeeltelik bewolk maar reënloos wees vir 'n dag of twee. Die koue front tussen Kaapstad en Tristan sal egter binne die volgende 24 uur reënweer oor die Suidwes-kus van Kaapland gee.

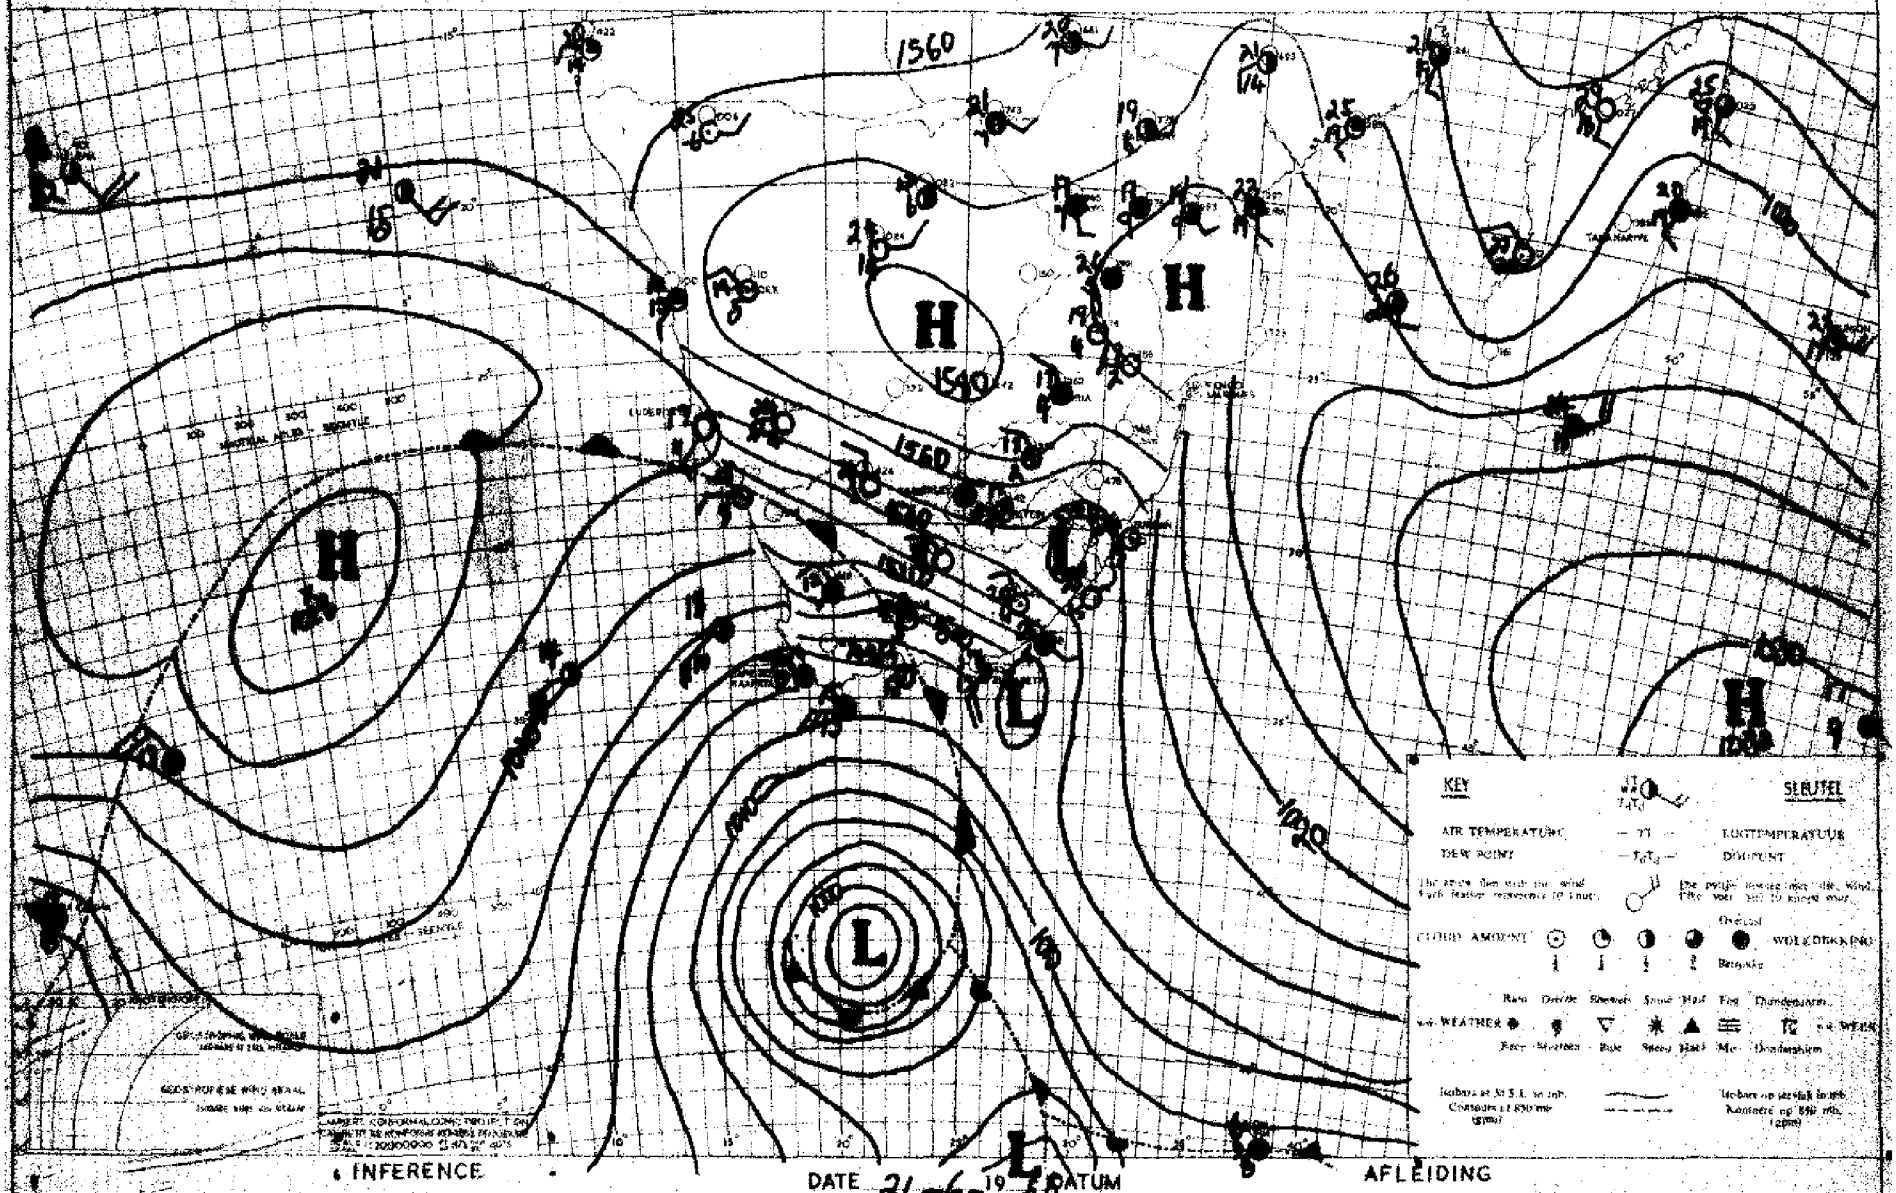
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 21-6-19 DATUM AFLEIDING

An intensive depression is moving eastward south of the Union. Cold air will penetrate the western Union and will gradually spread eastwards towards the Free State. Cloudy skies and scattered rain showers will occur along the Cape coastal regions. Cloudy weather will also occur over the Cape interior, but over the remainder of the Union it will be fair but windy.

'n Intensiewe laagdruk stelsel beweeg ooswaarts, suid van die Unie. Koue lug sal die westelike Unie binnedring en sal geleidelik in die rigting van die Vrystaat noord beweeg. Bewolkte weer sal oor Kaapland voorkom en verspreide buie sal langs die kusstreke uitsak. Oor die res van die Unie sal dit redelik mooiweer maar winderig wees

DATUM 55

AFLEIDING

The cold front west of the Cape will pass the Southwestern Cape coastal regions during the next 24 hours and cloudy rainy weather will develop over these regions. Over the remainder of the Union it will remain fair and mild.

Die koue front wes van die Kaap sal gedurende die komende 24 uur oor die kusstreke van Suidwes-Kaapland beweeg en bewolkte reënagtige weer sal oor hierdie streke ontwikkel. Oor die res van die Unie sal dit redelik mooiweer en matig bly.

A cold front penetrated the southwestern Cape Province but as the pressure gradient behind it is not very steep, the cold air is not expected to travel far inland during the next 24 hours. Cloudy to partly cloudy conditions and local light showers will occur over the southwestern and southern Cape but over the remainder of the Union it will remain fair and mild.

'n Koue front het die suidwestelike distrikte van die Kaap Provinsie binnegedring maar weens die swak drukgradient agter die front sal die koue lug gedurende die volgende 24 uur nie ver ooswaarts beweeg nie. Bewolkte tot gedeeltelik bewolkte toestande sal oor suidwes- en suid Kaapland voorkom maar oor die res van die Unie sal dit mooi weer en matig h[illegible]

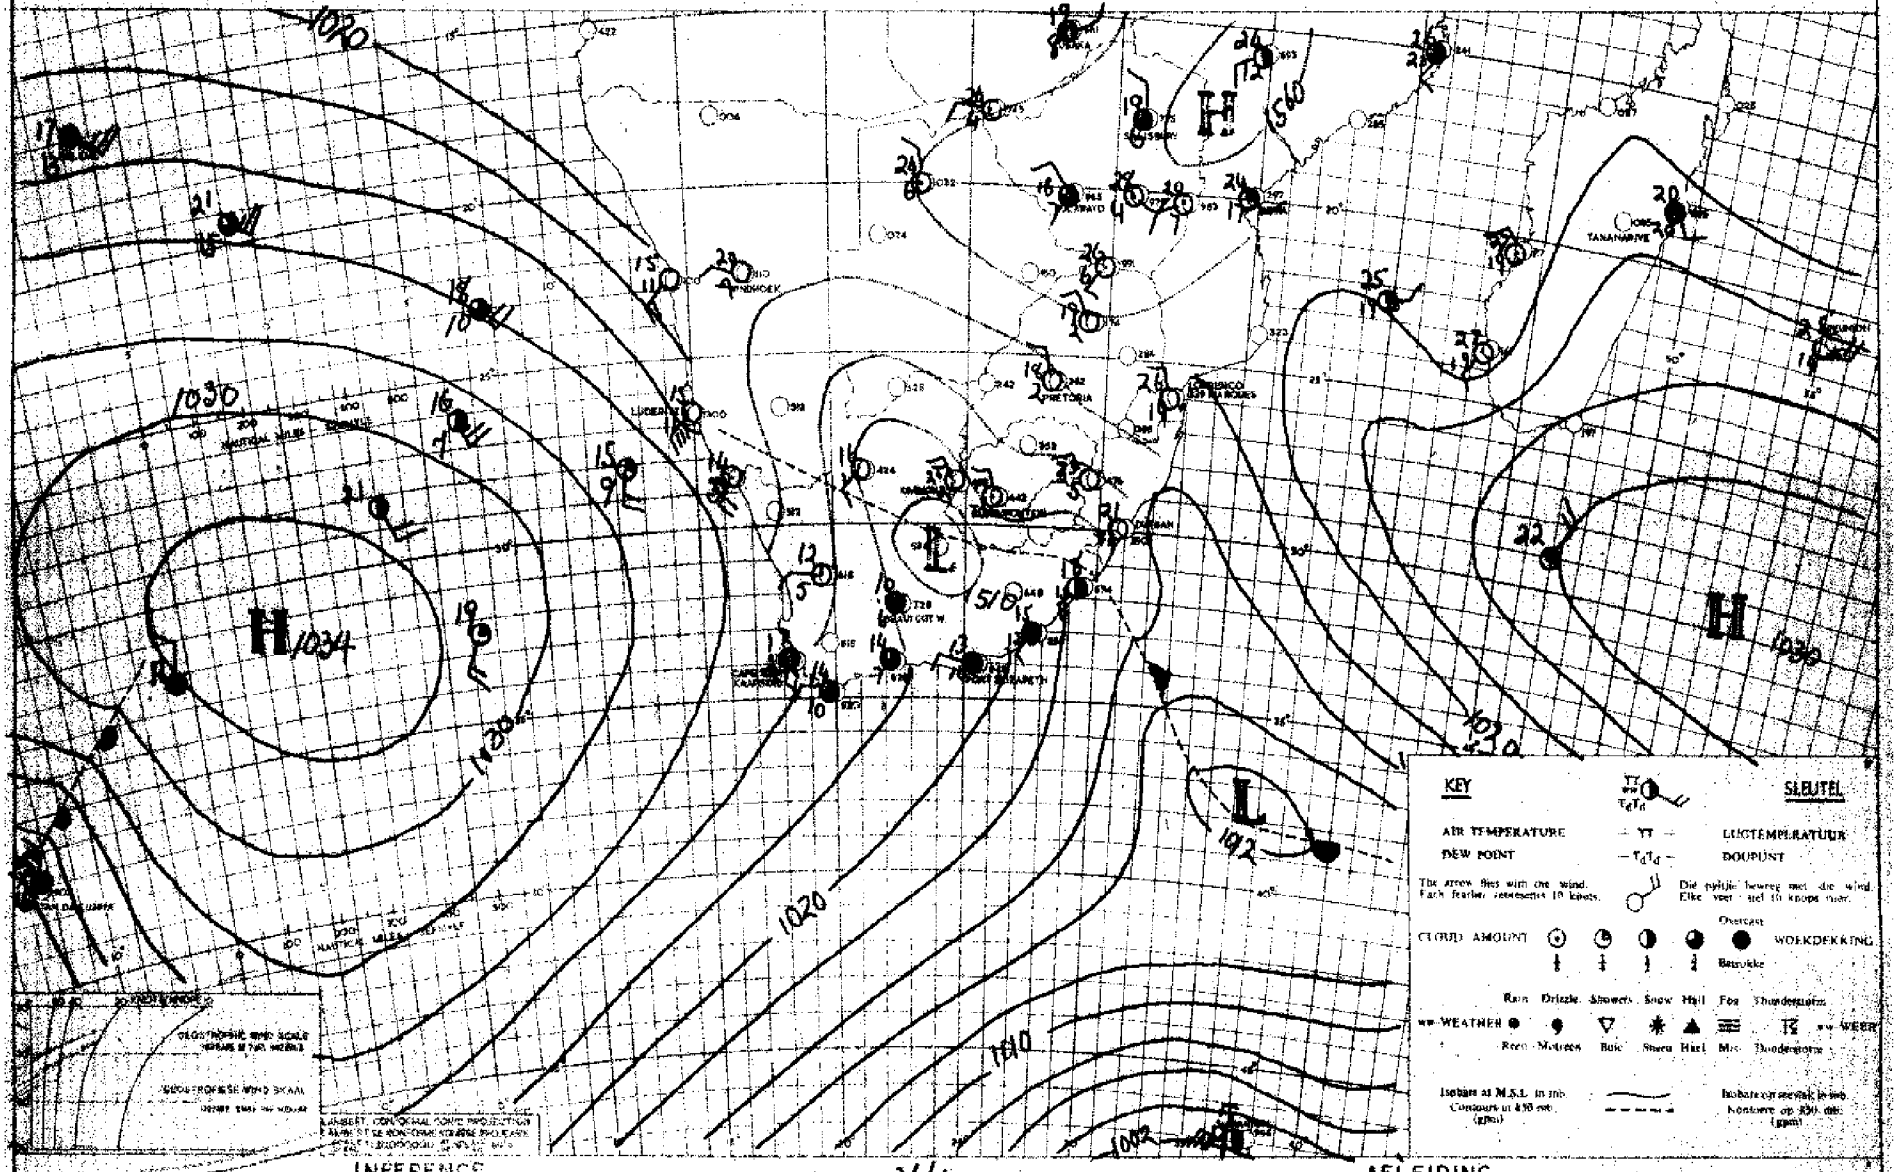
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 26/6 1965 DATUM — AFLEIDING

The high over the Atlantic ocean is almost stationary and consequently cold cloudy weather with light showers persists over the Southern and Southeastern Cape Province. These conditons will also spread over Natal but otherwise the weather over the rest of the Union and over SWA will be fine or partly cloudy. It will however became cooler over the OFS and Nothern Cape.

Die hoog oor die Atlantiese oseaan beweeg min en gevolglik bly die weer bewolk en koud oor die Suidelike en Suid-oostelike Kaapprovinsie met ligte reënbuie. Kouer bewolkte weer sal ook oor Natal beweeg, maar origens sal die weer oor die res van die Unieoen oor SWA mooiweer of gedeeltelik bewolk wees, hoewel dit koeler sal word oor OVS en Noord-Kaapland.

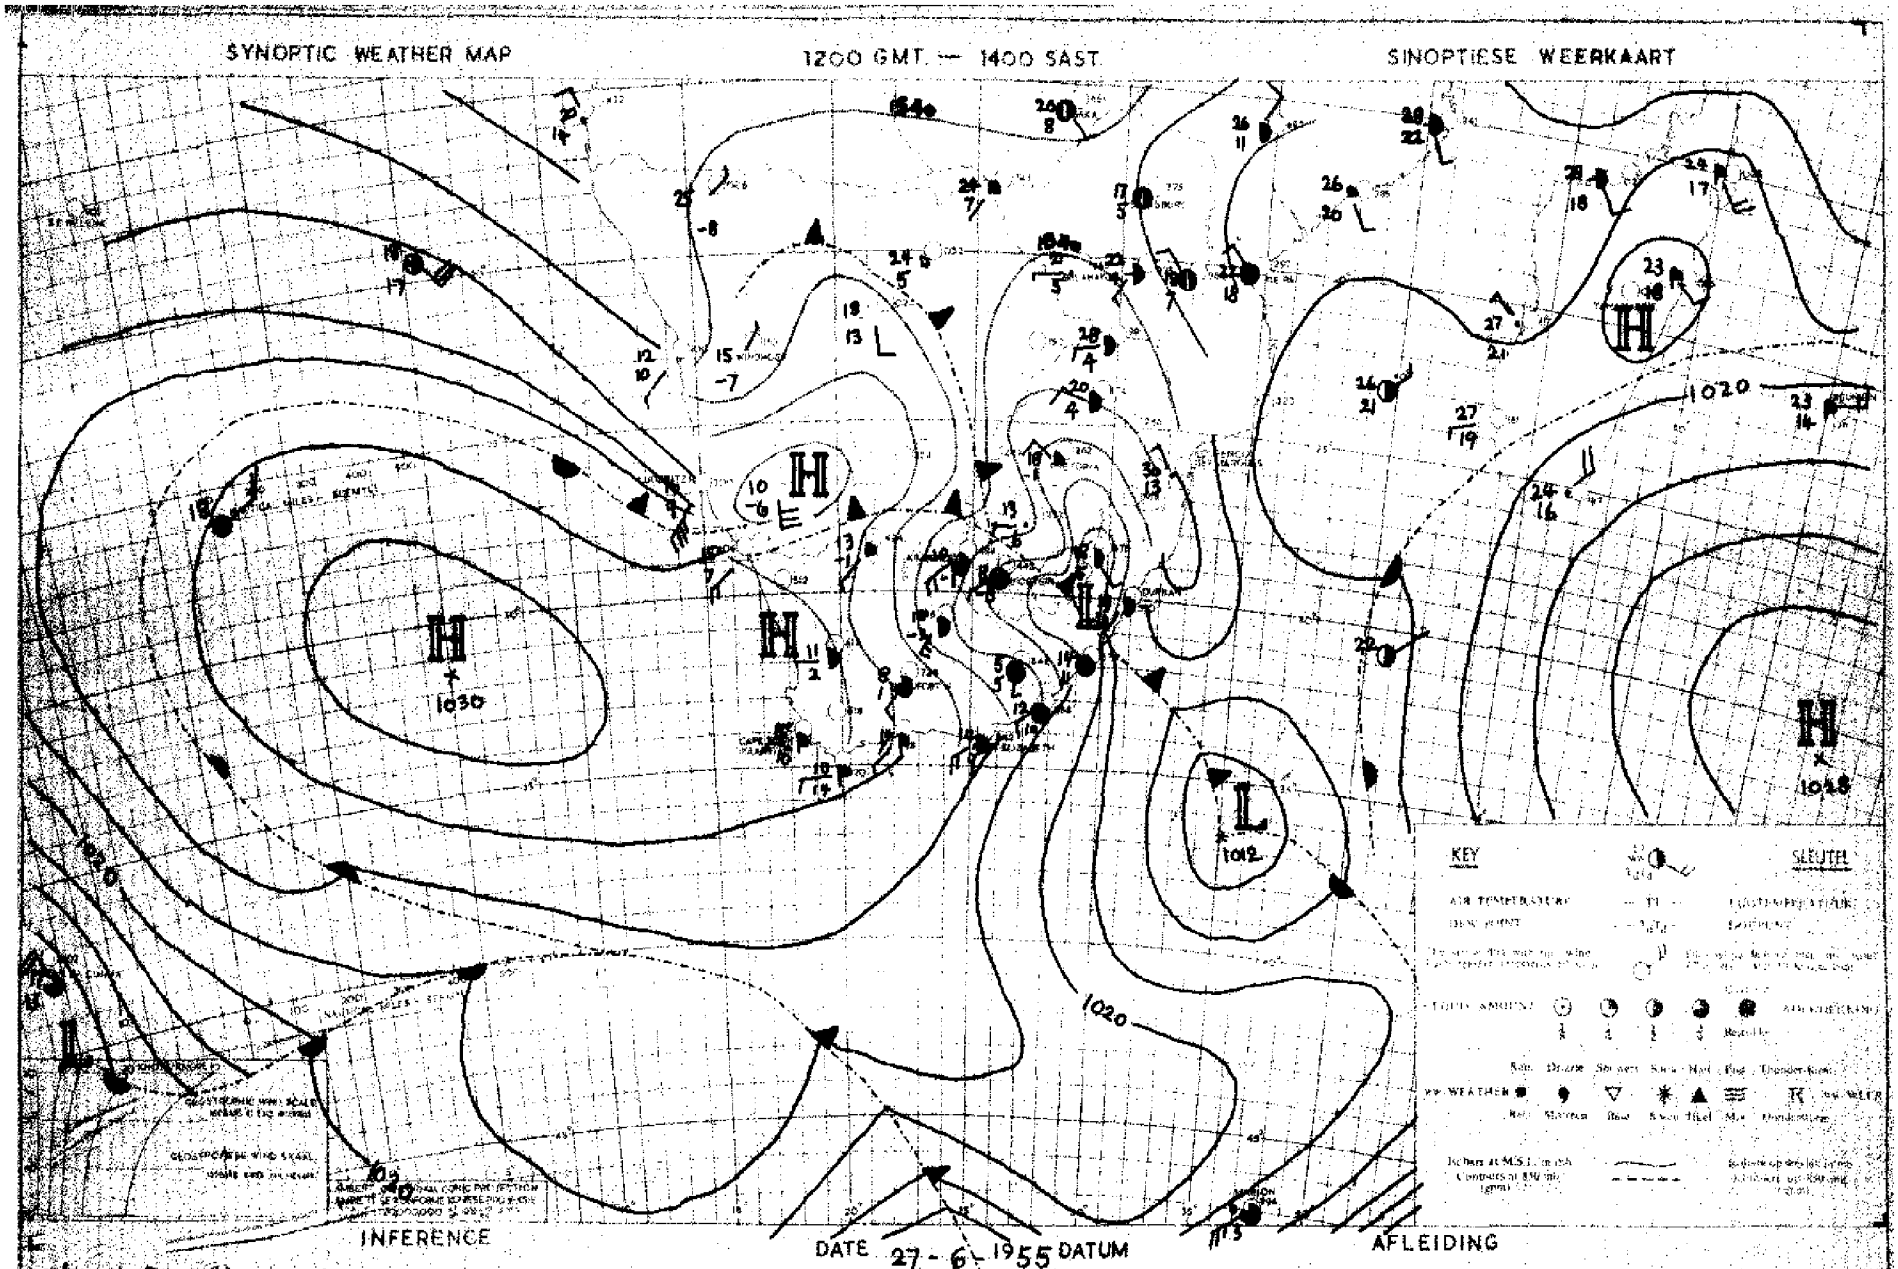
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST — SINOPTIESE WEERKAART



INFERENCE

DATE 27 - 6 - 1955 DATUM

AFLEIDING

Apart from the northern half of Transvaal the cold air will have moved right across the Union by tomorrow. It will thus be fair and mild over the northern districts of Transvaal, and cold cloudy weather will occur along the Transkei and Pondoland coast. Over the remainder of the Union it will be clear and cold.

Met uitsondering van die noordelike helfte van Transvaal sal die koue lug teen more oor die hele Unie beweeg het. Dit sal dus redelik mooiweer en matig wees oor die noordelike distrikte van Transvaal en koue buierige weerstoestande sal langs die kusstreke van Transkei en Pondoland voorkom. Oor die res van die Unie sal geen wolke voorkom nie maar dit sal koud wees.

The cold air has now spread over the whole Union. Rain is still occurring along the Natal coast but the weather there will also clear up. Pressures are falling rapidly along the West coast and it will soon become warmer over the West Cape and SW Africa.

Die koue lug het nou oor die hele Unie versprei. Reën kom nog voor langs die Natalse kus maar dit sal ook opklaar. Lugdruk val skerp langs die Weskus en dit sal vinnig warmer word oor Wes-Kaapland en SWA.

DATE 29-6-19 59

DATUM

AFLEIDING

A deep depression has formed off the southwest Cape coast and a wave of cold air is expected to invade the southwestern Cape Province by midnight. It will thus be cloudy over these regions and local light showers will occur. Over the remainder of the Union it will be fair but wind will be fresh northwesterly. High temperatures will occur along the East Cape coast.

'n Sterk laagdrukstelsel het suidwes van die Kaap ontwikkel en 'n golf koue lug sal na verwagting die suidwestelike Kaap Provinsie kort na middernag bereik. Dit sal dus bewolk wees oor die streke en ligte buie sal uitsak. Oor die res van die Unie sal dit redelik mooiweer wees maar vry sterke noordweste winde sal waai.
