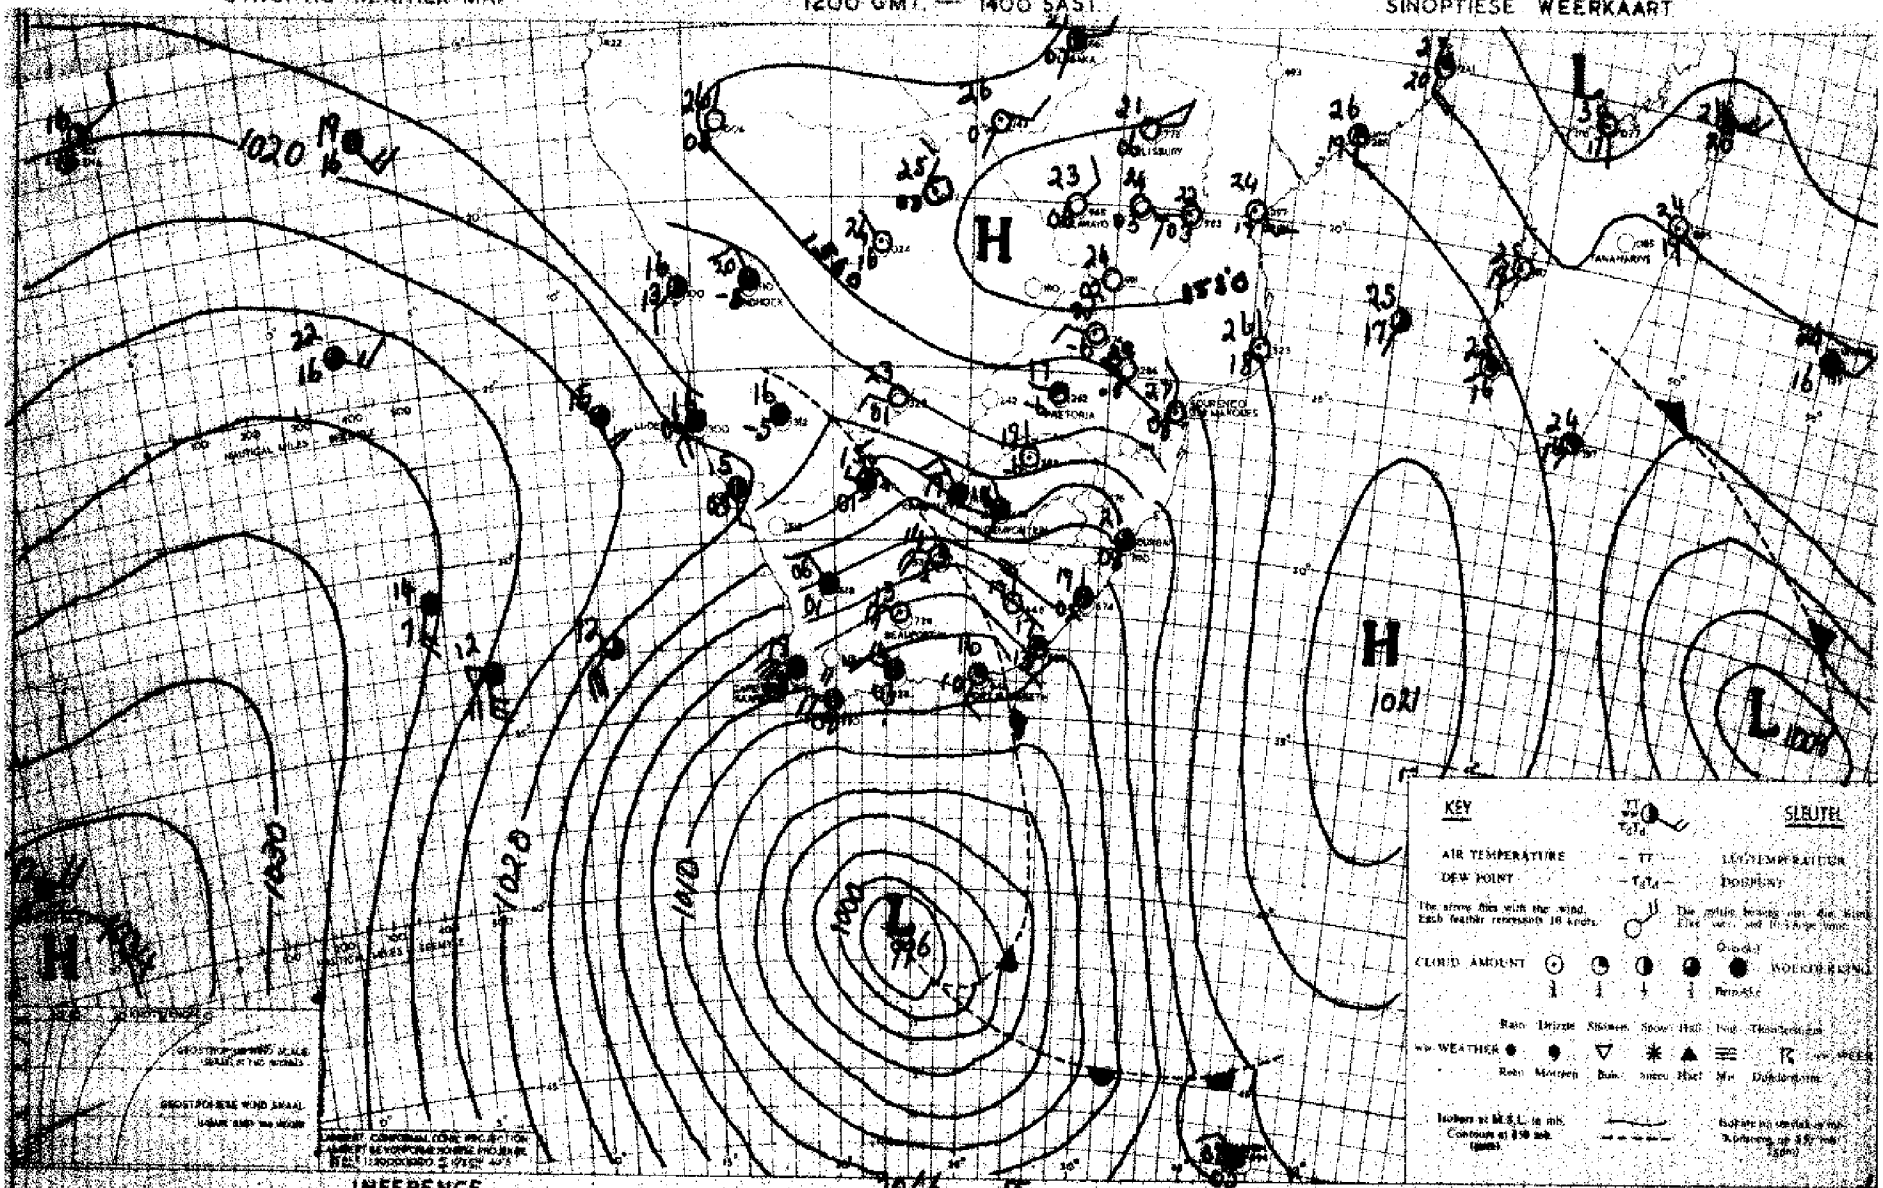
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

The cold air has already spread over the western half of the Cape Province but as the wind at Cape Town is still NW-ly, it looks as if the low South of the Union is moving slowly and the cold air will probably not penetrate much further over the interior for the next 24 hours. Over the SW Cape showery weather will persist.

AFLEIDING

Die koue lug het nou al oor die westelike helfte van Kaapland beweeg, maar aangesien die wind by Kaapstad nog NW bly, lyk dit of die laag Suid van die Unie stadig beweeg en die koue lug sal waarskynlik voorlopig nie baie verder die binneland indring nie. Reënbuie sal egter voortduur oor Suidwes-Kaapland.

INFERENCE

The low South of the Union is still stationary and the cold air reached the Union from a Westerly direction so that it cannot penetrate North. Over the SW Cape Province it is still cloudy with showers but here, the circulation will gradually become anticyclonic and the weather will improve.

DATE 1-7-1955 DATUM

AFLEIDING

Die laag ten Suide van die Unie is nog stasionêr en die koue lug bereik die Unie vanuit 'n Westelike rigting wat die gevolg dat dit nie ver Noordwaarts kan indring nie. Dit is nog bewolk met buie oor Suidwes Kaapland, maar die sirkulasie sal hier ook antisiklonies word en die weer sal geleidelik opklaar.

The low South of the Union has now moved Eastwards and the cold air associated with it, has spread over the whole of the Cape Province and OFS and will probably reach Southern Transvaal also as the low is gradually filling up, no further rain will occur over the Union coasts.

Die laag ten Suide van die Unie het nou heelwat Oostwaarts beweeg en die koeler lug gepaard daarmee het nou oor die hele Kaapland en OVS beweeg en sal waarskynlik ook oor Suid-Transvaal beweeg. Aangesien die laag nou besig is om te verswak, sal reën egter nie meer oor die Unie voorkom nie.

Cooler and moister air will move over the eastern half of Transvaal and partly cloudy conditions will develop over these regions. Over the remainder of the Union and over S.W.A. it will remain fair, but the Freestate, Natal and Cape Province temperatures will still be below normal.

Koeler vogtige lug sal oor die oostelike dele van Transvaal inbeweeg en gedeeltelik bewolkte toestande sal oor hierdie dele voorkom. Oor die res van die Unie sal dit redelik mooiweer bly maar oor die Vrystaat Kaapland en Natal sal temperature nog onder normaal bly.

INFERENCE

DATE 4/7/1955

A weak pressure rise along the southeastern and eastern coastal belts will cause cloudiness to spread to the coastal regions of the Transkei and Natal. With the warmer northerly airstream over the interior it should clear partially over the O.F.S. and temperatures will rise.

DATUM

AFLEIDING

'n Swak drukstyging langs die suidoostelike en oostelike kuststreke sal bewolkte weer laat uitbrei na die kuslgebiede van die Transkei en Natal. Met die warmer noordelike lugstroom oor die binneland behoort bewolktheid oor die O.V.S. gedeeltelik op te klaar en temperature sal styg.

A sharp fall of pressure over the southern Union will cause westerly winds to prevail generally. Cloudy weather will occur over the southwestern and western Cape coastal regions. Some rainfall is likely over the southwestern Cape. Partly cloudy weather with a few light showers will also develop over the southwestern Free State but over the remainder of the Union it

'n Skerp val van druk oor die suidelike Unie sal 'n westelike lugstroom veroorsaak. Bewolkte weer sal langs die kuststreke van Suidwes- en wes- Kaapland voorkom, en motreen sal plaaslik voorkom. Oodseltelik bewolkte weer gepaar met enkele ligte buie sal ook oor suidwes- Vrystaat ontwikkel. Oor die res van die Unie sal dit redelik mooiweer en matig bly.

It is expected that the cooler drier air now over the Free State will move over southern Transvaal and over Natal and the weather will clear generally over the interior. It will remain cloudy however over the southwestern and southern Cape coasts.

Na verwagting sal die koelr droër lug tans oor die Vrystaat, ook oor die suidelike dele van Transvaal en oor Natal beweeg en die weer sal algemeen opklaar oor die binneland. Dit sal egter bewolk bly oor die suidwestelike en suidelike Kaapse kuisstreke.

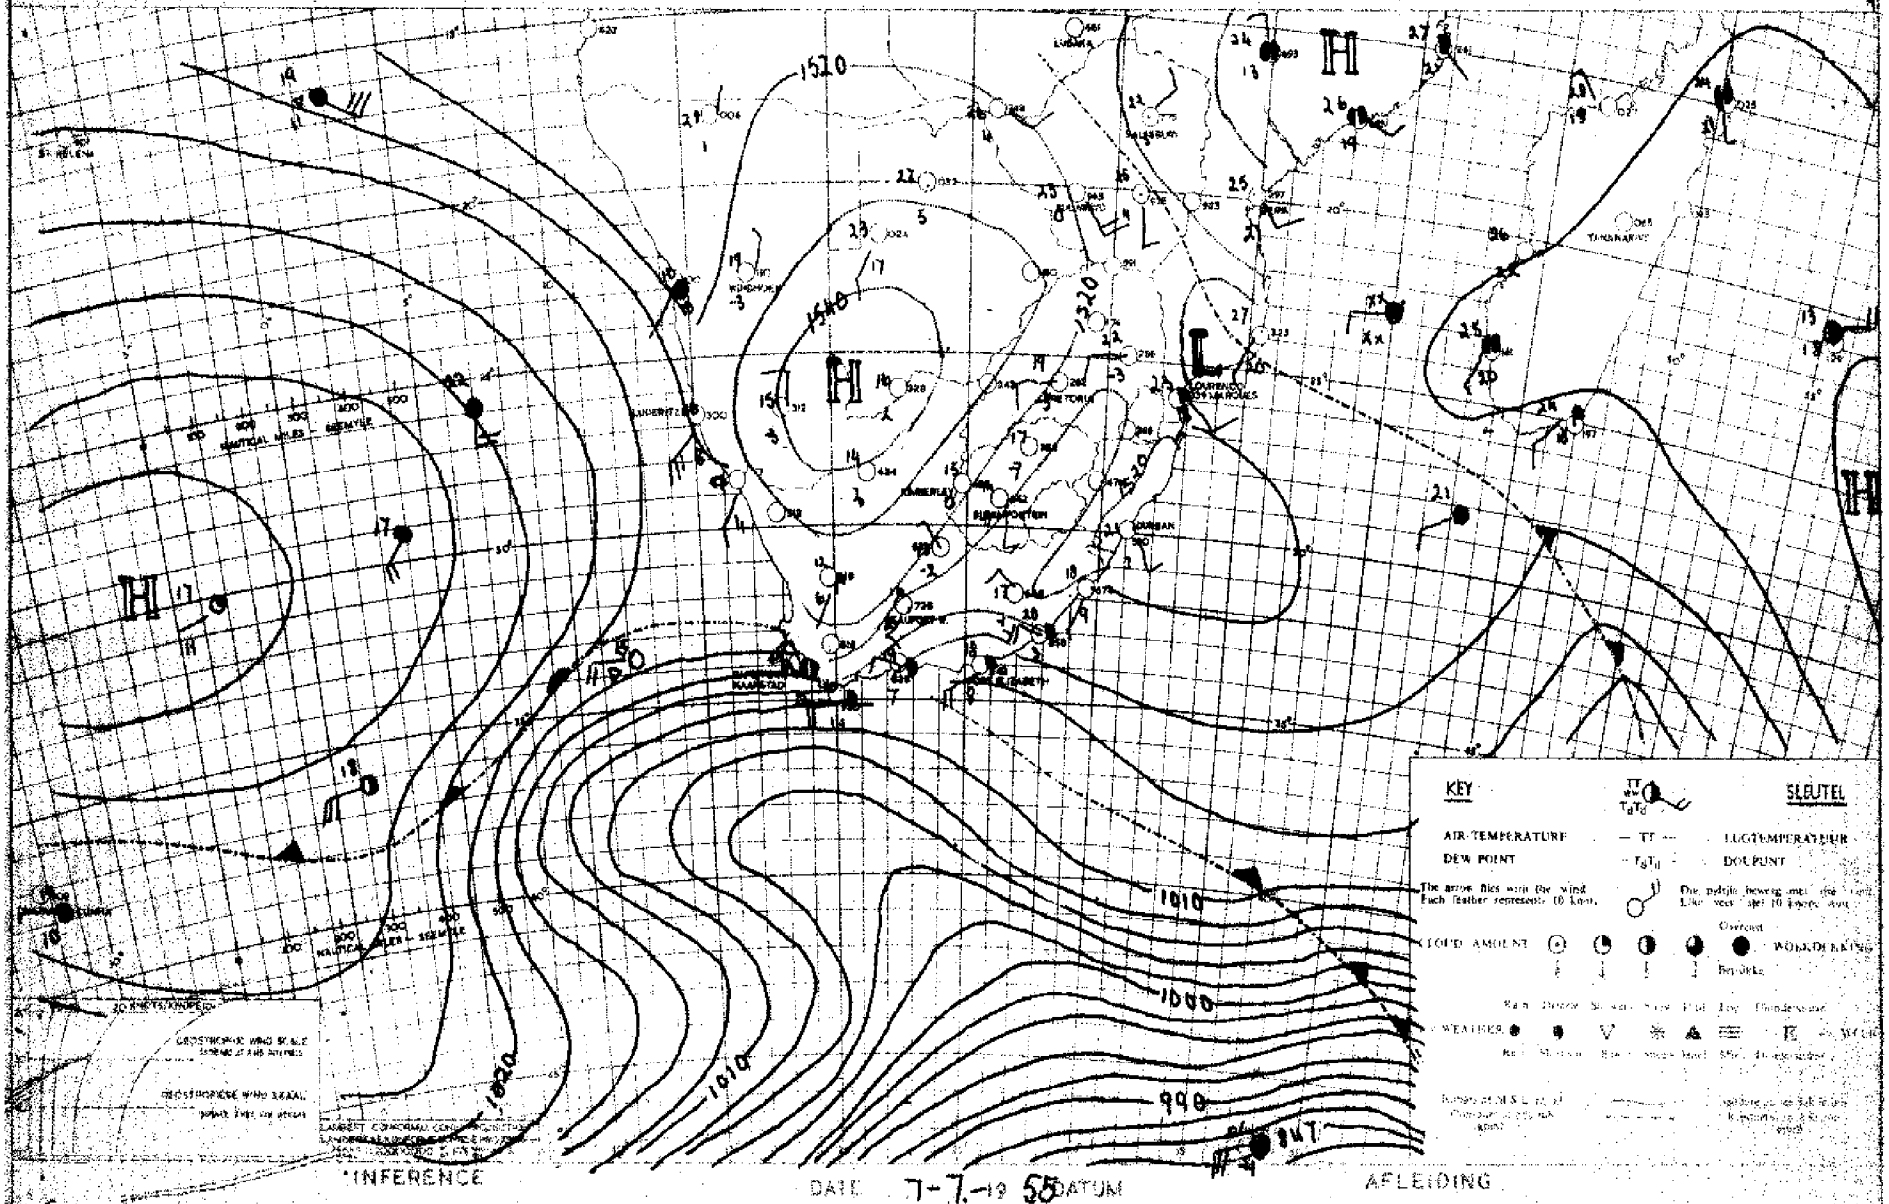
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 7-7-19 55 DATUM AFLEIDING

Cloudy showery weather will continue over the coastal regions of the Southwestern Cape, but over the remainder of the Union it will be fair. Fresh northwesterly winds will blow over the southern interior of the Union.

Bewolkte buierige weer sal oor die kuisstreke van Suidwes-Kaapland bly voortduur, maar oor die res van die Unie sal dit redelik mooiweer bly. Taamlik sterk noordwestê winde sal oor die suidelike binneland voorkom.

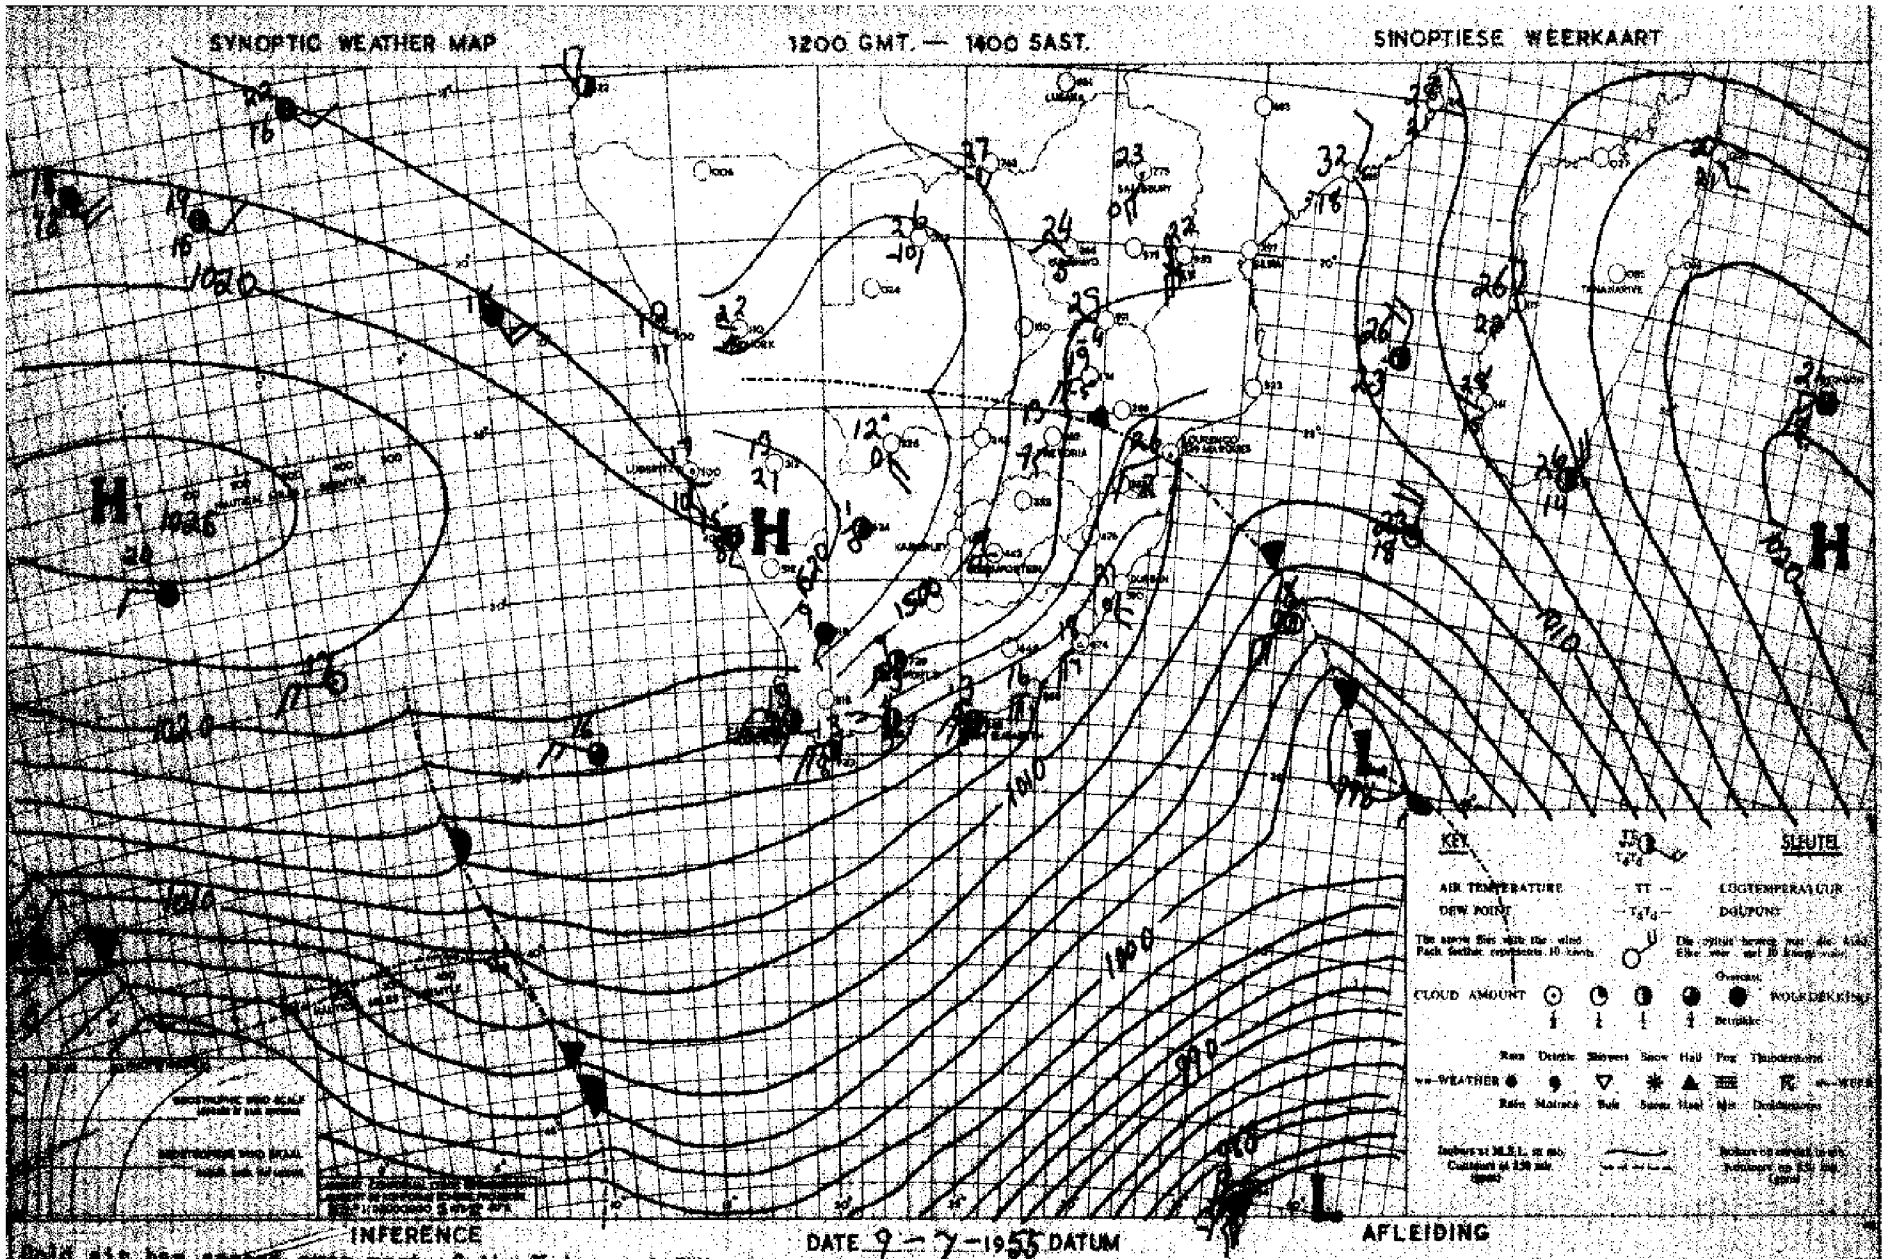
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

Cold air has spread over most of the Union and SWA. The supply of moist air from the SW has, however, been cut off with winds veering to NW to the West of Cape Town. Consequently it will be cloudy over the SW Cape Coast but fine elsewhere and becoming warmer.

DATE 9-7-1955 DATUM

AFLEIDING

Koue lug het reeds oor feitlik die hele Unie en SWA beweeg. Die toevoer van koue lug uit die Suidweste is egter alweer afgesny met dat die winde ten Weste van die Unie reeds weer Noordelik is. Die weer sal dus bewolk bly oor die SW Kaapse kus maar elders oor die Unie redelik mooiweer en dit sal warmer word.

INFERENCE

DATE 10/7/1955 DATUM

With winds over the interior now again from North and Northeast, temperatures over the interior will rise fairly sharply. Over the coastal regions little change will take place in present partly cloudy weather as a series of cold fronts is passing far South of the Union coast.

Aangesien winde oor die binneland nou weer vanuit die Noorde en Noordooste waai, sal die temperatuur oor die binneland taamlik vinnig styg. Oor die kusstreke sal ook min verandering kom in die huidige gedeeltelike bewolkte weer aangesien 'n reeks koue fronte taamlik ver Suid van die kus verbygaan.

Fair and mild weather will continue throughout the Union. Fog will occur temporarily in the morning along the west coast.

Dit sal redelik mooiweer en matig bly oor deurgaans die hele Unie. Mistige weer van tydelike aard sal in die oggend langs die weskus voorkom.

INFERENCE

DATE 12-7-1955 DATUM

AFLEIDING

The frontal system over the Atlantic Ocean will not influence the weather over the Union directly in the next 24 hours and it will remain mainly fine and become rather warm over the interior.

Die frontstelsel oor die Atlantiese Oseaan sal die Unie se weer nog nie direk beïnvloed in die volgende 24 uur nie en dit sal hoofsaaklik mooiweer bly en taamlik warm word oor die binneland.

The intensive trough to the west of the Union will induce moist air to flow over the southwestern and western Cape coastal districts. Cloudy to overcast conditions will develop over these regions and light rain can be expected late tomorrow over the southern districts. Over the remainder of the Union it will be fine and warm.

Die intensiewe trog wes van die Unie sal die invloei van vogtige lug oor die westelike en suidwestelike kusdistrikte bevorder. Bewolkte tot betrokke toestande sal oor die dele ontwikkel en reën sal later in die dag oor die suidelike streke uitsak. Oor die res van die Unie sal dit mooiweer en warm wees.

INFERENCE

Cold air round the low to the West of the Cape will spread over the West and SW Coastal belts of the Cape and it will become cloudy with showers. However, the low is moving slowly and with the Atlantic High centred so far North, it will not penetrate further inland or over the Union's Eastern coast line.

DATE

AFLEIDING

Koue lug rondom die laag ten Weste van Kaapstad sal oor die Kaapse West- en Suidwestelike vasteland en dit sal eenvik weste met reenbuie mêre. Die laag beweeg egter stadig en die Atlantiese hoog lê baie ver Noord sodat die koue lug nie verder die binneland en die Oostelike kuststreke sal binnedring nie.

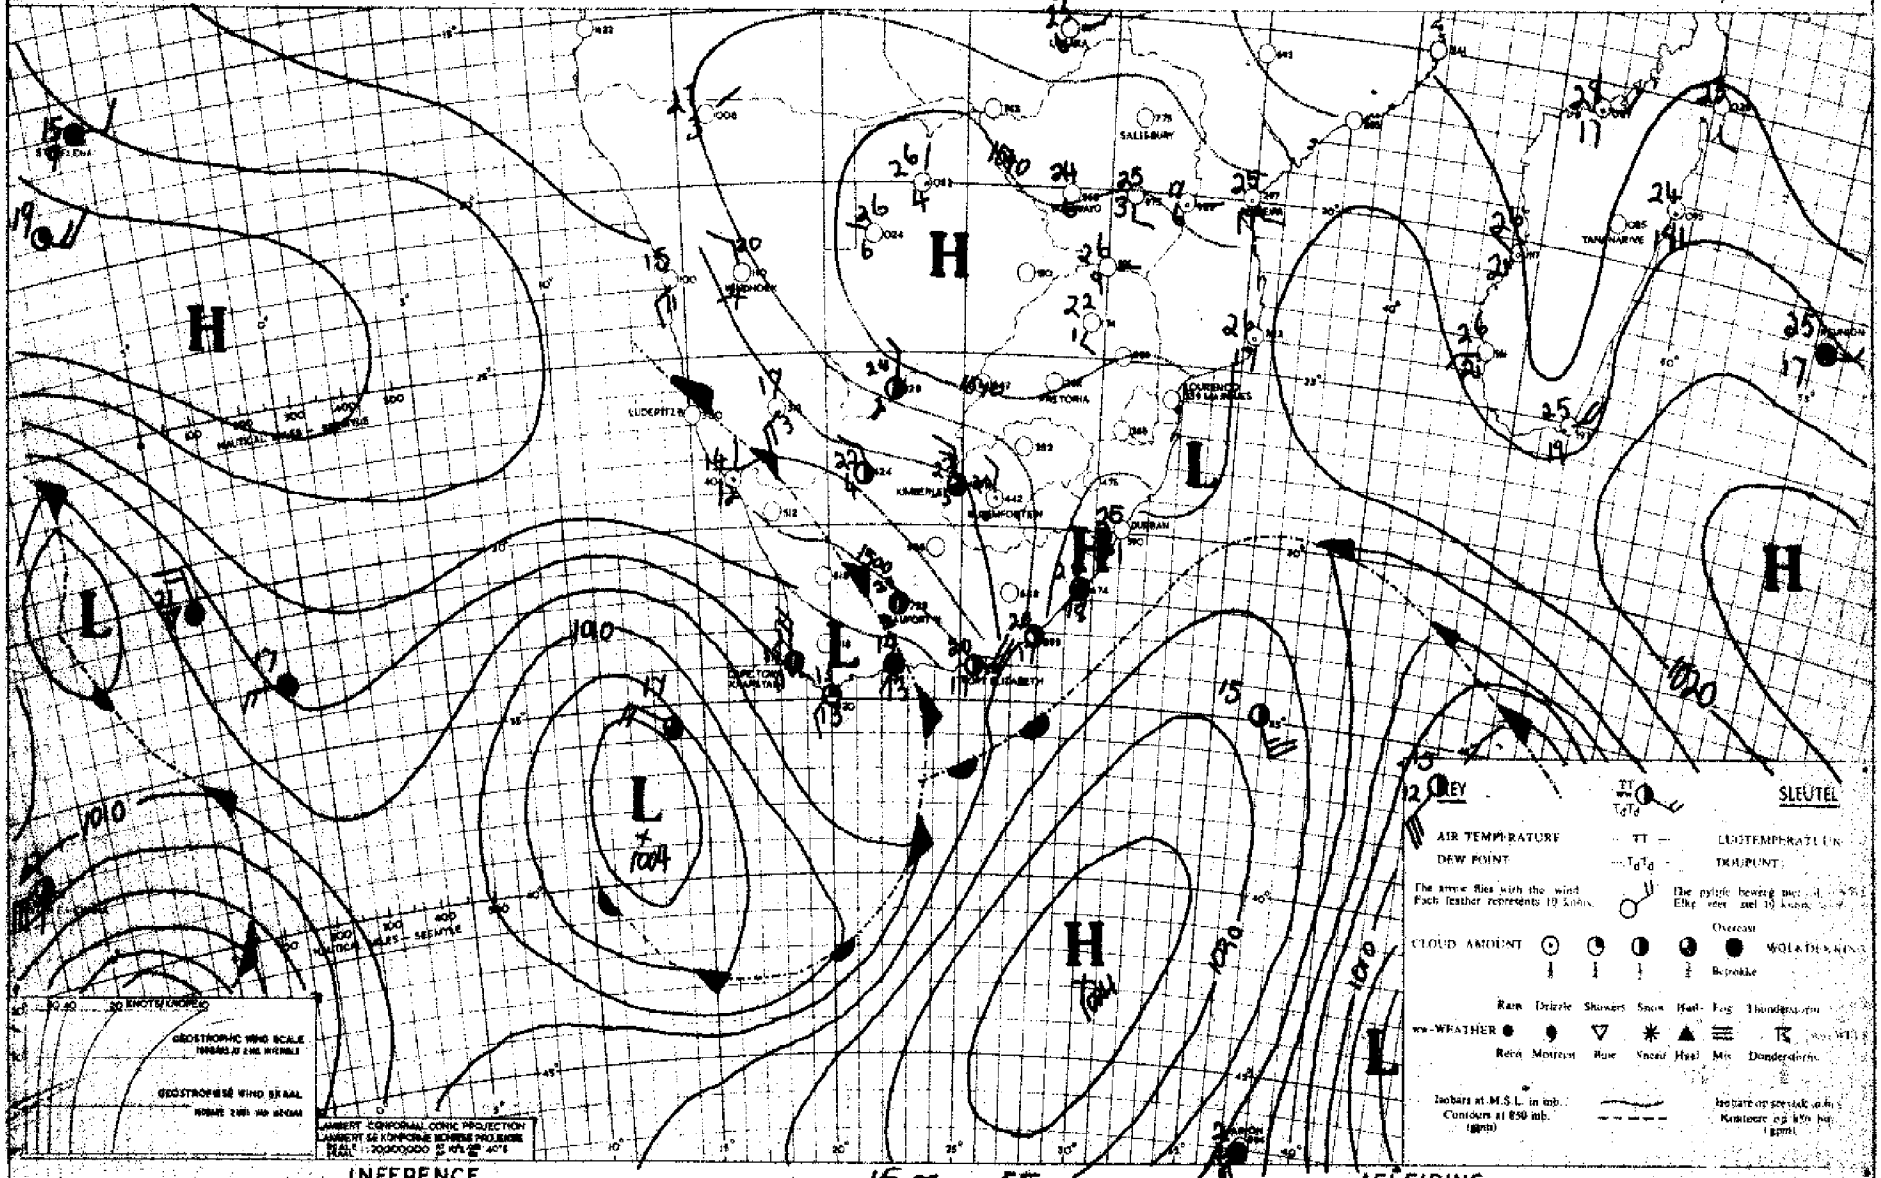
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 16-7- 1955 DATUM AFLEIDING

Although winds over the SW Cape Province have remained NW ly, the colder air has spread inland over the West Cape. It may be expected that it, will spread further Eastwards over the Cape Province but showers will be limited to the SW, South and SE coasts.

Hoewel die winde oor SW Kaapland nog NW-lik is, het die kouer lug al heelwat oor die Wes-Kaapse binneland ingedring. Dit kan verwag word dat dit nog verder oor Kaapland sal indring. Reënbuie sal egter tot die SW, Suidkus en SO-kus beperk wees.

INFERENCE

Cooler air over the Western Cape Province will spread over the rest of the Province and OFS, but it will remain mainly fine over the interior. The weak cold front of the Cape will move Eastwards and cause temporary cloudy weather with isolated showers over the South and Southeast coasts. Over the Western Cape coast it will probably remain cloudy in the general Westerly circulation.

AFLEIDING

Koeler lug oor Wes-Kaapland sal oor die res van Kaapland en die Vrystaat versprei maar dit sal mooiweer bly oor die binneland. Die swak koue front by Kaapstad sal Oostwaarts beweeg en tydelike bewolkte weer met enkele buie oor die Suid- en Suidooskus veroorsaak. Oor Wes-Kaaplandse kus sal dit waarskynlik bewolk bly in die algemene Westelike sirkulasie.

INFERENCE

The cold front approaching from the Atlantic Ocean will cause cold showery weather over the Southwest Cape Province within the next 24 hours and possibly later over the rest of the Cape. Meanwhile it will remain fine over the interior of the Union and S.W.A.

DATE 20-7-1965

AFLEIDING

DATUM

Die koue front wat nader vanaf die Atlantiese Oseaan sal binne die volgende 24 uur koue bewolkte weer met reën oor Suidwes-Kaapland veroorsaak en moontlik later oor die res van Kaapland. Intussen sal dit egter mooi weer en warm wees oor die binneland van die Unie en SW Afrika.

INFERENCE

With the exception of the Northern and Northeastern Transvaal Lowveld, cold weather conditions will occur generally throughout the Union. It will be cloudy along the southwest and south Cape coast and a few showers are likely to fall in the early morning.

DATE 23 · 7 · 55 DATUM

AFLEIDING

Met uitsondering van die noordelike en noordoostelike Transvaal Laeveld, sal koue weer oor deurgaans die hele Unie voorkom. Bewolkte weer sal oor die kuststreke van Suidwes- en Suid-Kaapland ontwikkel en enkele buie sal moontlik gedurende die oggend oor hierdie streke uitsak.

The front-west of the Cape will cause unsettled weather over the southwestern Cape later tomorrow. The northeasterly air stream over the eastern Union is moist and scattered clouds will occur over Transvaal and the northern Freestate.

Die front wes van die Kaap sal later more ongestadige weer oor suidwes Kaapland veroorsaak. Die noordoostelike lugstroom oor die oostelike Unie is vogtig, en verspreide wolke sal oor Transvaal en die noordelike Vrystaat voorkom.

INFERENCE

Shortly colder air invaded the Southwestern Cape Province but due to weak pressure rise its influence will not extend to the remainder of the Cape Province during the next 24 hours. Fair mild weather will this persist throughout the Union.

DATE 29-7-1955 DATUM

AFLEIDING

Kouer lug beinvloed Suidwes-Kaapland maar weens die feit dat die drukstyging langs die suidweskus swak is sal dit gedurende die volgende 24 uur nie verder die Unie beinvloed nie. Matige en bestendige weerstoestande sal dus voortduur.

A depression which is forming over the west coast and the Indian Ocean High, controls the air circulation over the Union which is from the north. This northerly air stream is moist and cloudy weather will develop generally throughout the Union. Light rain will occur in the west.

'n Laagdrukstelsel wat besig is om oor die weskus te vorm en die antisikloon van die Indiese Oseaan beheer die noordelike lugstroming oor die Unie. Aangesien hierdie lug vogtig is sal bewolkte weer taamlik algemeen oor die Unie voorkom. Ligte reën sal in die weste uitsak.

A low over the NW Cape is causing cloudy weather and showers over that area. It is expected to move Eastwards and showers will spread to the Southern Free State and neighbouring areas of the Cape Province. Over the rest of the country it will be partly cloudy.

'n Laagdruk oor NW-Kaapland veroorsaak bewolkte weer net binne oor daardie streke. Dit sal geleidelik ooswaarts beweeg en buie sal ontwikkel oor Suidelike OVS en aangrensende streke van Kaapland. Oor die res van die land sal dit gedeeltelik bewolk wees.

The low over the interior has now practically filled up and as a result weather will gradually clear over the interior. With a cold front approaching from the Atlantic Ocean, showers, will develop along the Cape Southwest coastal regions.

Die laag oor die binneland het nou feitlik opgevul en gevolglik sal die weer oor die binneland geleidelik opklaar. Met die naderdende koue front oor die Atlantiese Oseaan sal reënbuie ontwikkel langs die Kaapse Suidweskusstreke.

Very cold air is approaching the Union from the Atlantic Ocean and cloudy weather with heavy rain showers will occur over the Western Cape Province during the next 24 hours. Cold weather will also spread to the rest of the Cape Province and ultimately the whole Union. Strong Westerly winds will blow over the Southern Union.

Koue lug nader die Unie vanaf die Atlantiese Oseaan en bewolkte weer met swaar reënbuie sal oor die Westelike Kaapland voorkom gedurende die volgende 24 uur. Koue weer sal ook na die res van Kaapland uitbrei en uiteindelik oor die hele Unie. Sterk Westelike winde sal oor die Suidelike Unie waai.

Cold moist air will continue to move eastwards across the Union. Moderate to locally heavy rain will occur over the southwestern Cape and snow will fall over the mountain ranges. Cloudy weather with light showers will also occur along the Cape South and East coast along the Natal South coast.

Koue vogtige lug sal aanhou met sy oostwaartse beweging oor die Unie. Matige tot plaaslike swaar reëns sal oor Suidwes-Kaapland uitsak en sneeu sal oor die bergreekse val. Bewolkte weer met plaaslike buie sal ook langs die kusstreke van suid en Oos-Kaapland en langs die Suidkus van Natal uitsak.

Maximum and Minimum Temperatures (°C) and Rainfall (mms.) 24 hours ending at 0800 (SAST) on

INFERENCE

The cold air will spread further Eastwards but over the interior it will clear up rapidly. Over the Southern and Eastern coastal regions showers will still occur but here also it will gradually clear up.

DATE 4-8-1955 DATUM

AFLEIDING

Die koue lug sal nog verder Oostwarts uitbrei maar die weer oor die binneland sal vinnig opklaar. Oor die Suidelike en Oostelike kuststreke sal reënbuie nog voorkom maar ook hier sal dit geleidelik opklaar.

INFERENCE

DATE 5 - 8 -1955 DATUM

AFLEIDING

Cloudy conditions with showers still occur over the coastal regions, but with the eastward movement of the anticyclone over the Atlantic it will also gradually clear over these regions. Over the interior it remains fine and cold apart from morning low clouds over southeast Transvaal.

Bewolkte weer met reënbuie kom nog voor langs die kusstreke maar met die ooswaartse beweging van die hoog oor die Atlantiese oseaan sal dit geleidelik opklaar ook oor hierdie dele. Oor die binneland bly dit mooiweer en koud, afgesien van oggendwolke oor suidoos- Transvaal.

With the eastward movement of the high over the Union, the weather will clear over all areas. Winds will abate over the eastern Union and temperatures will rise somewhat. Bergwind-conditions will develop locally over the west coast.

Met die ooswaartse beweging van die hoog oor die Unie sal die weer oor alle dele opklaar. Die wind oor die oostelike Unie sal bedaar en dit sal ietwat warmer word. Bergwindtoestande sal plaaslik oor die weskus ontwikkel.

INFERENCE

DATE 9 - 8 - 1955 DATUM

AFLEIDING

With the high at Marion the systems west of the Cape will be retarded and not much change is expected. Appreciable high level clouds will occur over the southern half of the Union.

Met die hoog by Marion sal die sisteme wes van die Kaap vertraag word en afgesien van hoë vliegwolkies sal die weer vrymoedig plaasvind nie. Heelwat hoë wolke sal oor die suidelike helfte van die Unie voorkom.

The cold air over the Atlantic Ocean will reach the S.W. Cape within the next 24 hours and it will become cloudy with scattered showers over this region. Over the rest of the county it will remain fine and become warmer.

Die koue lug oor die Atlantiese Oseaan sal SW-Kaapland binne die volgende 24 uur bereik en dit sal bewolk en koud word oor hierdie gebied met verspreide reënbuie. Oor die res van die land bly dit voorlopig nog mooiweer.

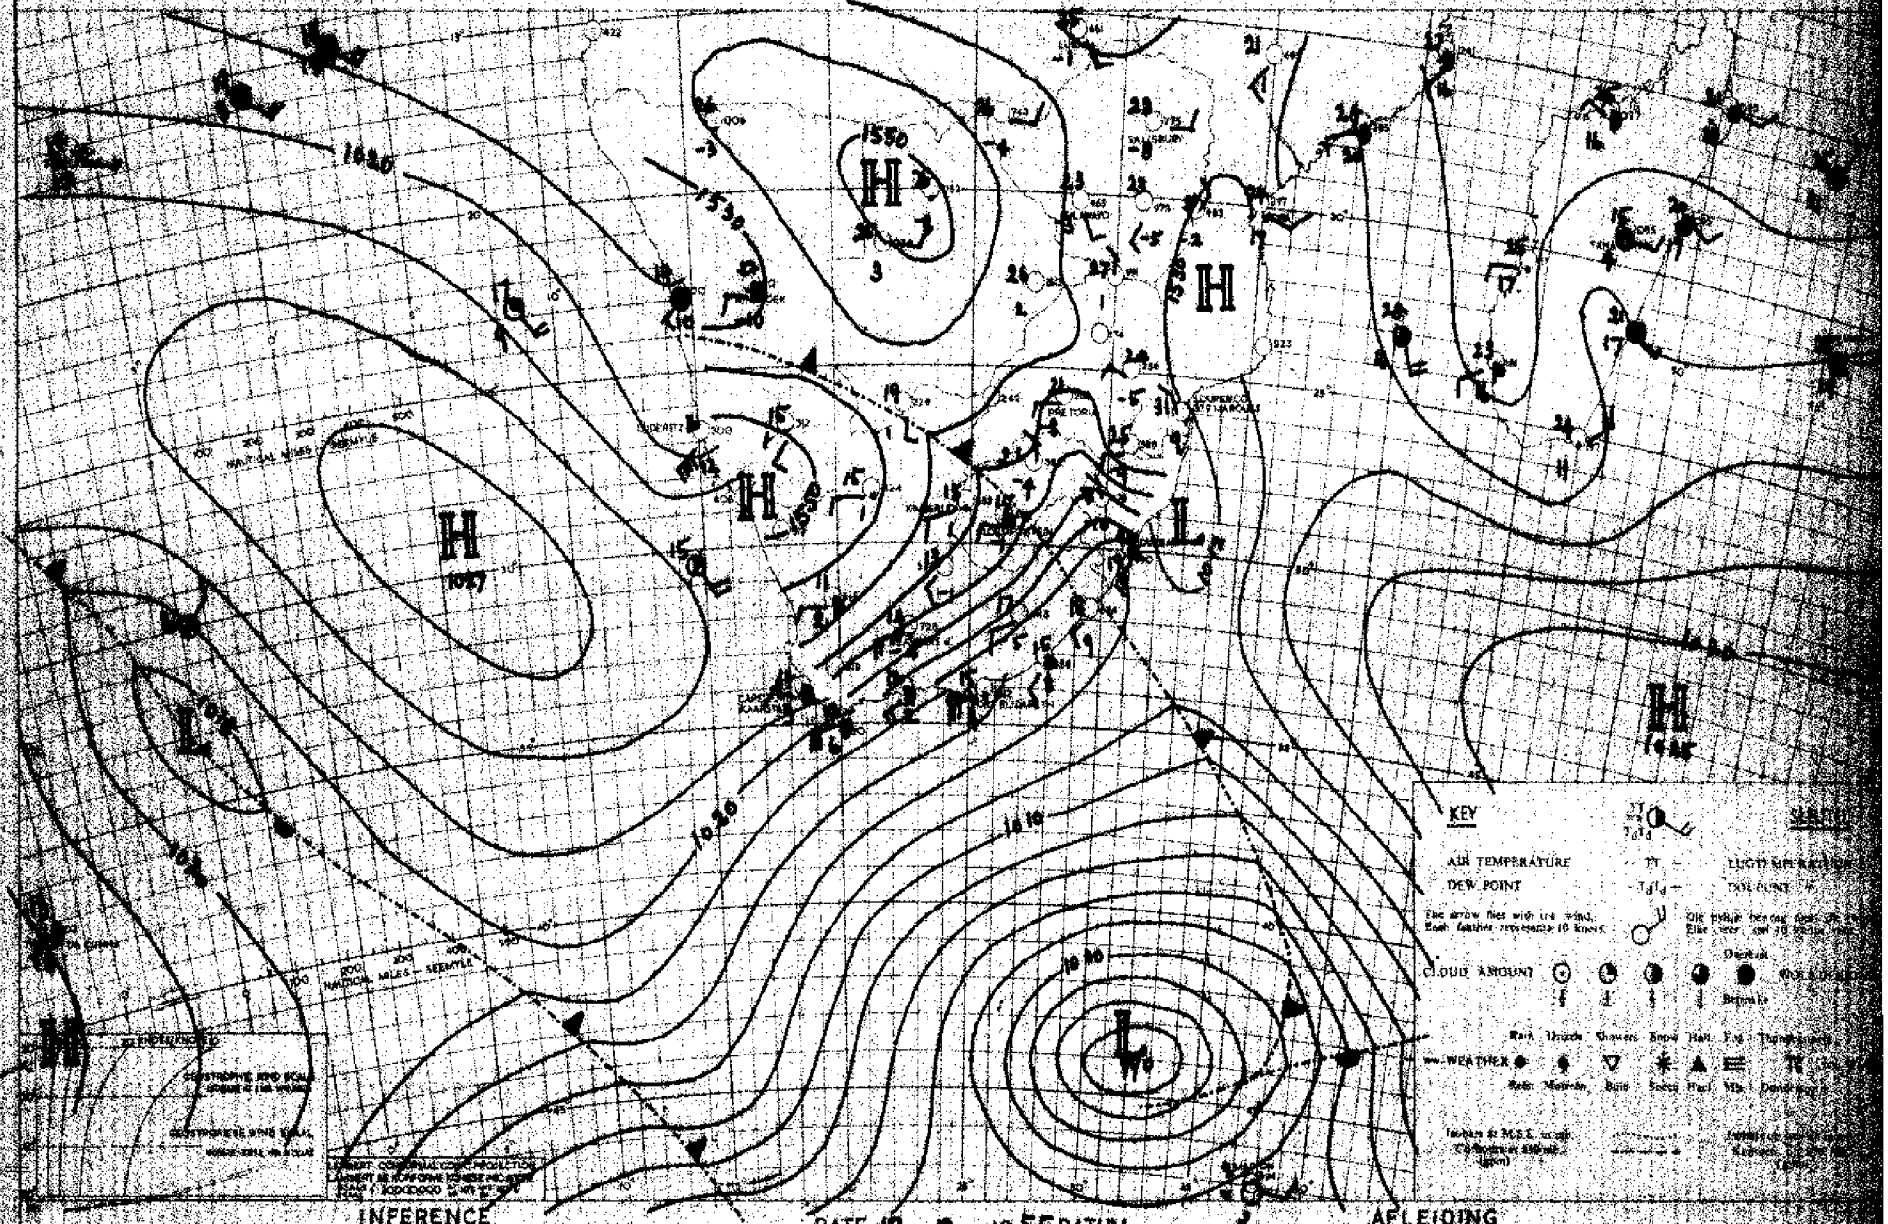
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 12 - 8 - 1955 DATUM AFLEIDING

The colder air which has already penetrated the Cape Province and southern Free State will spread also to Transvaal and Natal. As the air over the interior is very dry it will remain mainly fine but over the coastal regions a few showers may be expected.

Die kouer lug wat reeds oor die Kaapprovincie en suidelike Vrystaat uitgebrei het, sal ook na Transvaal en Natal versprei. Aangesien die lug oor die binneland egter baie droog is sal dit hoofsaaklik mooiweer bly. Langs die kuststreke kan enkele buie verwag word.

Cold air has penetrated the Cape Province and the Free State, and it is expected that it will affect Natal and the southern regions of Transvaal tomorrow. Apart from cloudy weather over the south-western Cape coastal regions the weather will be fine throughout the Union.

Koue lug het reeds oor Kaapland en die Vrystaat beweeg en sal na verwagting ook Natal en sal môre ook die suidelike streke van Transvaal beinvloed. Met uitsondering van bewolkte toestande oor die kusgebied van Suidwes-Kaapland sal dit egter mooiweer oor die Unie bly.

INFERENCE

A northeastern air-current will bring moister air to the Eastern and Northern Transvaal and partly cloudy conditions will therefore develop over these regions. Over the remainder of the Union it will be fair to fine. The temperatures, will still be somewhat below normal over the Cape Province and the southern Free State.

DATE 14 - 5 - 55

AFLEIDING

'n Noordoostelike lugstroom sal vogtiger lug oor Oos- en Noord-Transvaal invoer en dus sal gedeeltelik bewolkte weer oor hierdie streke ontwikkel. Oor die res van die Unie sal dit hoofsaaklik mooiweer bly. Oor die Kaap-Provinsie en die suidelike Vrystraat sal die temperatuur nog effens onder normaal wees.

With the dry anticyclonic circulation over the Union it will remain mainly fine and temperatures will rise generally. With the somewhat humid air over Transvaal isolated cloud development can be expected.

Met die droë antisiklonies sirkulasie oor die Unie sal dit hoofsaaklik mooi weer bly en temperatuur sal oor die algemeen styg. Met iets vogtiger lug oor Transvaal kan los wolkies verwag word.

INFERENCE

DATE 16 - 8 - 1955 DATUM

AFLEIDING

Cloudy and cooler conditions will redevelop tomorrow over the remainder of the Union fair and warm weather will continue. Winds will generally be from north to west.

Bewolkte en koeler toestande sal môre weer oor die kusstreke van Suidwes-Kaapland ontwikkel, maar oor die res van die Unie sal dit redelik mooiweer en warm wees. Die wind sal oor die algemeen van noord tot wes wees.

INFERENCE

DATE 18 - 8 - 1955 DATUM

AFLEIDING

The westerlies are predominating over the southern Union and colder air is advancing towards the eastern and northeastern Union. Warm dry air is still circulating around the ridge of high pressure over Rhodesia and Bechuanaland.

Cloudy showery weather will continue over the southwest Cape coastal regions but it will be fair over the remainder of the Union

Die westelike lugstroom beheer die sirkulasie oor die suidelike Unie en kouer lug beweeg oos- en noordoostwaarts in Transvaal en Natal. Warm lug sirkuleer nog om die rug van hoë druk oor Betsjoeanaland en Rhodesië.

Bewolkte buierige weer sal oor die kusstrke van suidwes-Kaapland bly aanhou maar oor die res van die Unie sal dit

DATE 21 - 9 - 1955 DATUM

AFLEIDING

Die laag is nou net ten weste van Kaapland en koue bewolkte toestande met reën heers oor die kusstreek van wes-Kaapland. Met die koue front wat van die weste nader, sal kouer weer ook oor die westelike en suidelike binneland indring maar gedurende die volgende 24 uur sal dit oor die oostelike Unie nog warm bly.

The low is now just west of the Cape and cool, cloudy conditions with rain prevail over the coastal belt of western Cape. With the advance of the cold front, colder conditions will spread over the western and southern interior also, but during the next 24 hours it will still be warm over the eastern Union.

INFERENCE

DATE 23 - 8 - 1955 DATUM

As a result of the anticyclone over the interior, it will be fine over most of the Union. The cold front between Cape Town and Tristan will, however, cause cloudy conditions within the next 24 hours over West and SW Cape and local drizzle may occur.

AFLEIDING

As gevolg van die antisiklone oor die binneland sal die meer oor die grootste deel van die Unie mooi bly. Die koue front tussen Tristan en Kaapstad sal egter bewolkte toestande veroorsaak binne die volgende 24 uur oor Wes- en SW- Kaapland. Motreën mag plaaslik voorkom.

INFERENCE

Colder air, from the west is moving into the Cape Province. It is expected that temporary cloudy conditions will occur over the coastal districts of the southwestern Cape and a few isolated showers are likely to occur. With the advance of the colder air inland the temperature will drop over the Cape interior. It will remain fine and mild over the remainder of the Union.

AFLEIDING

Kouer lug van uit die weste beweeg weer oor die westelike Kaap Provinsie. Bewolkte toestande en enkele buie sal tydelik oor die kusstreke van Suidwes- en Suid- Kaapland uitsak. Oor die Kaapse binneland sal die temperatuur gaan daal maar oor die res van die Unie sal dit mooiweer en matig bly.

INFERENCE

DATE 26 - 8 - 19 55 DATUM

AFLEIDING

A cold front is moving into the western Cape from the southwest Atlantic. Colder weather conditions will develop over the Cape Province and Free State and will eventually also reach Natal and and the southern regions of Transvaal. Local light showers will occur along the south and east coast and also over the Eastern interior.

'n Koue front beweeg oor die Kaap Provinsie vanaf die suidweste-like Atlantiese Oseaan. Kouer weerstoestande sal oor die Kaap Provinsie, en Vrystaat en later ook oor die suidelike streke van Transvaal en oor Natal ontwikkel. Plaaslike buie sal langs die suidelike en Oostelike kuspgebied uitsak. Oor die oostelike binneland sal enkele ligte buie ontwikkel.

It is expected that a cell of the high southwest of the Cape will move around the southeast coast. As a result it will clear over the Cape coastal regions, but it will become cloudy over the Transvaal lowveld. Otherwise fine with a general rise in temperatures.

Na verwagting sal 'n sel van die hoog suidwes van die Kaap om die suidooskus beweeg. Gevolglik sal dit opklaar langs die Kaapse kuststreke maar dit sal bewolk word oor die Transvaalse laeveld. Origens mooiweer met algemene styging in temperatuur.

INFERENCE

DATE 28 - 8 - 19 55

DATUM AFLEIDING

It is not expected that the front west of the Cape will reach the Union within 24 hours. With the drop in pressure in the west however, a strong north-south gradient will develop the Union, and warmer, humid air will move southwards over Transvaal causing cloud development.

Daar word nie verwag dat die front wes van die Kaap die Unie binne 24 uur sal bereik nie. Met die daling in druk in die weste sal 'n sterk noord- suid komponent egter oor die Unie ontwikkel en warmer, vogtiger lug sal suidwaarts oor Transvaal beweeg, en los wolke sal ontwikkel.

INFERENCE

DATE 29-8-1955 DATUM

AFLEIDING

Fairly moist air is advancing from the north and scattered clouds will form over the northern half of the Union. Cooler, cloudy conditions will develop along the west and southwest Cape coast and showers will occur.

Betreklike vogtige lug is besig om van die noorde oor die Unie te beweeg en verspreide wolke sal vorm oor SWA en die Noordelike helfte van die Unie. Koeler, bewolkte toestande sal langs die Kaapse weskus ontwikkel en reënbuie sal voorkom.

The cold front over the interior will move eastwards. Cloudiness will increase over the Freestate and over the remainder of the Cape Province and showers will occur. With the trough still west of the Cape no clearance from the west is expected.

Die koue front oor die binneland sal ooswaarts beweeg en bewolktheid sal toeneem oor die res van die Kaapprovinsie **en ook oor die Vrystaat en buie sal uitsak. Met die trog wes van die Kaap word geen opklaring uit die weste verwag nie.**

...little change is expected, and except for scattered clouds over ...the western half of Transvaal and over the southwestern Cape coasts ...it will remain fine and it will become warmer.

Min verandering word verwag, en afgesien van verspreide wolke oor ...oostelike helfte van Transvaal en oor die suidwestelike kuspe ...strooke, sal dit mooiweer bly en warmer word.

As a result of the anticyclone over the Union and the fact that the frontal systems are passing to the south of the Union, the weather over all parts will be fair to fine.

As gevolg van die antisiklcon oor die Unie en die feit dat die fronte op die oomblik ver Suid van die Unie verbybeweeg sal die weer oor alle dele hoofsaaklik mooiweer bly.

INFERENCE

DATE 4 - 9 - 1955 DATUM

AFLEIDING

Colder air from the west has now advanced to almost halfway between Tristan and Cape Town and consequently it will become cloudy tomorrow over SW Cape and rain will develop towards evening. Over the rest of the Union it still remains fine.

Kouer lug vanuit die weste het nou al byna halfpad tussen Tristan en Kaapstad en more sal dit gevolglik al bewolk word oor suidwes-Kaapland met reën teen die aand. Oor die res van die Unie bly dit nog mooiweer.

Verwagtede Minimum Temperatuur (°C) en Reënval vir die 24 uur wat om 08h00 (SAST) eindig op ..... 6 - 9 - 55.

INFERENCE
DATE 5 - 9 - 1955 DATUM
AFLEIDING
The polar air has now advanced to just west of the Union and will reach the Cape southwest coast this evening accompanied by rain showers. These conditions will spread tomorrow to the southern Cape Province. It will also become cooler over the interior Cape Province but otherwise it will be fine over the Union.
Die koue lug is nou net Wes van die Unie en sal vanaand met die Kaapse suidwestkus bereik gepaard met reënbuie. Hierdie toestande sal môre ook uitbrei na suidelike Kaapland. Dit sal ook koeler word oor die binnelani van Kaapland maar origens sal dit hoofsaaklik mooiweer bly oor die Unie.

7 - 9 - 55.

INFERENCE

The Atlantic high is extending a wedge to the southeast coast. Cloudy conditions of a temporary nature will occur along the coastal regions of the Cape and over Natal and the Eastern Transvaal Lowveld. Over the remainder of the Union it will remain fine.

DATE 6-9-1955 DATUM

AFLEIDING

Die Atlantiese hoogdrukgebied steek 'n uitloper uit na die suidoostelike kusgebied van Kaapland. Bewolkte toestande sal tydelik langs die Kaapse kusgebiede en oor Natal en Oos Transvaal voorkom. Oor die res van die Unie sal dit mooiweer bly.

DATUM

AFLEIDING

A cold front is approaching the Cape from the southwest and wetter weather will develop over the southwestern half of the Cape Province. Local showers associated with cloudy conditions will occur along the southwest and south coast. Over the remainder of the Union it will be fair and mild to warm.

'n Koue front nader die Kaap vanuit die suidweste en kouer weer sal môre oor die suidwestelike helfte van Kaapland ontwikkel. Plaaslike buie wat saamgaan met bewolkte toestande sal langs die suidwes- en suidkus van Kaapland voorkom.

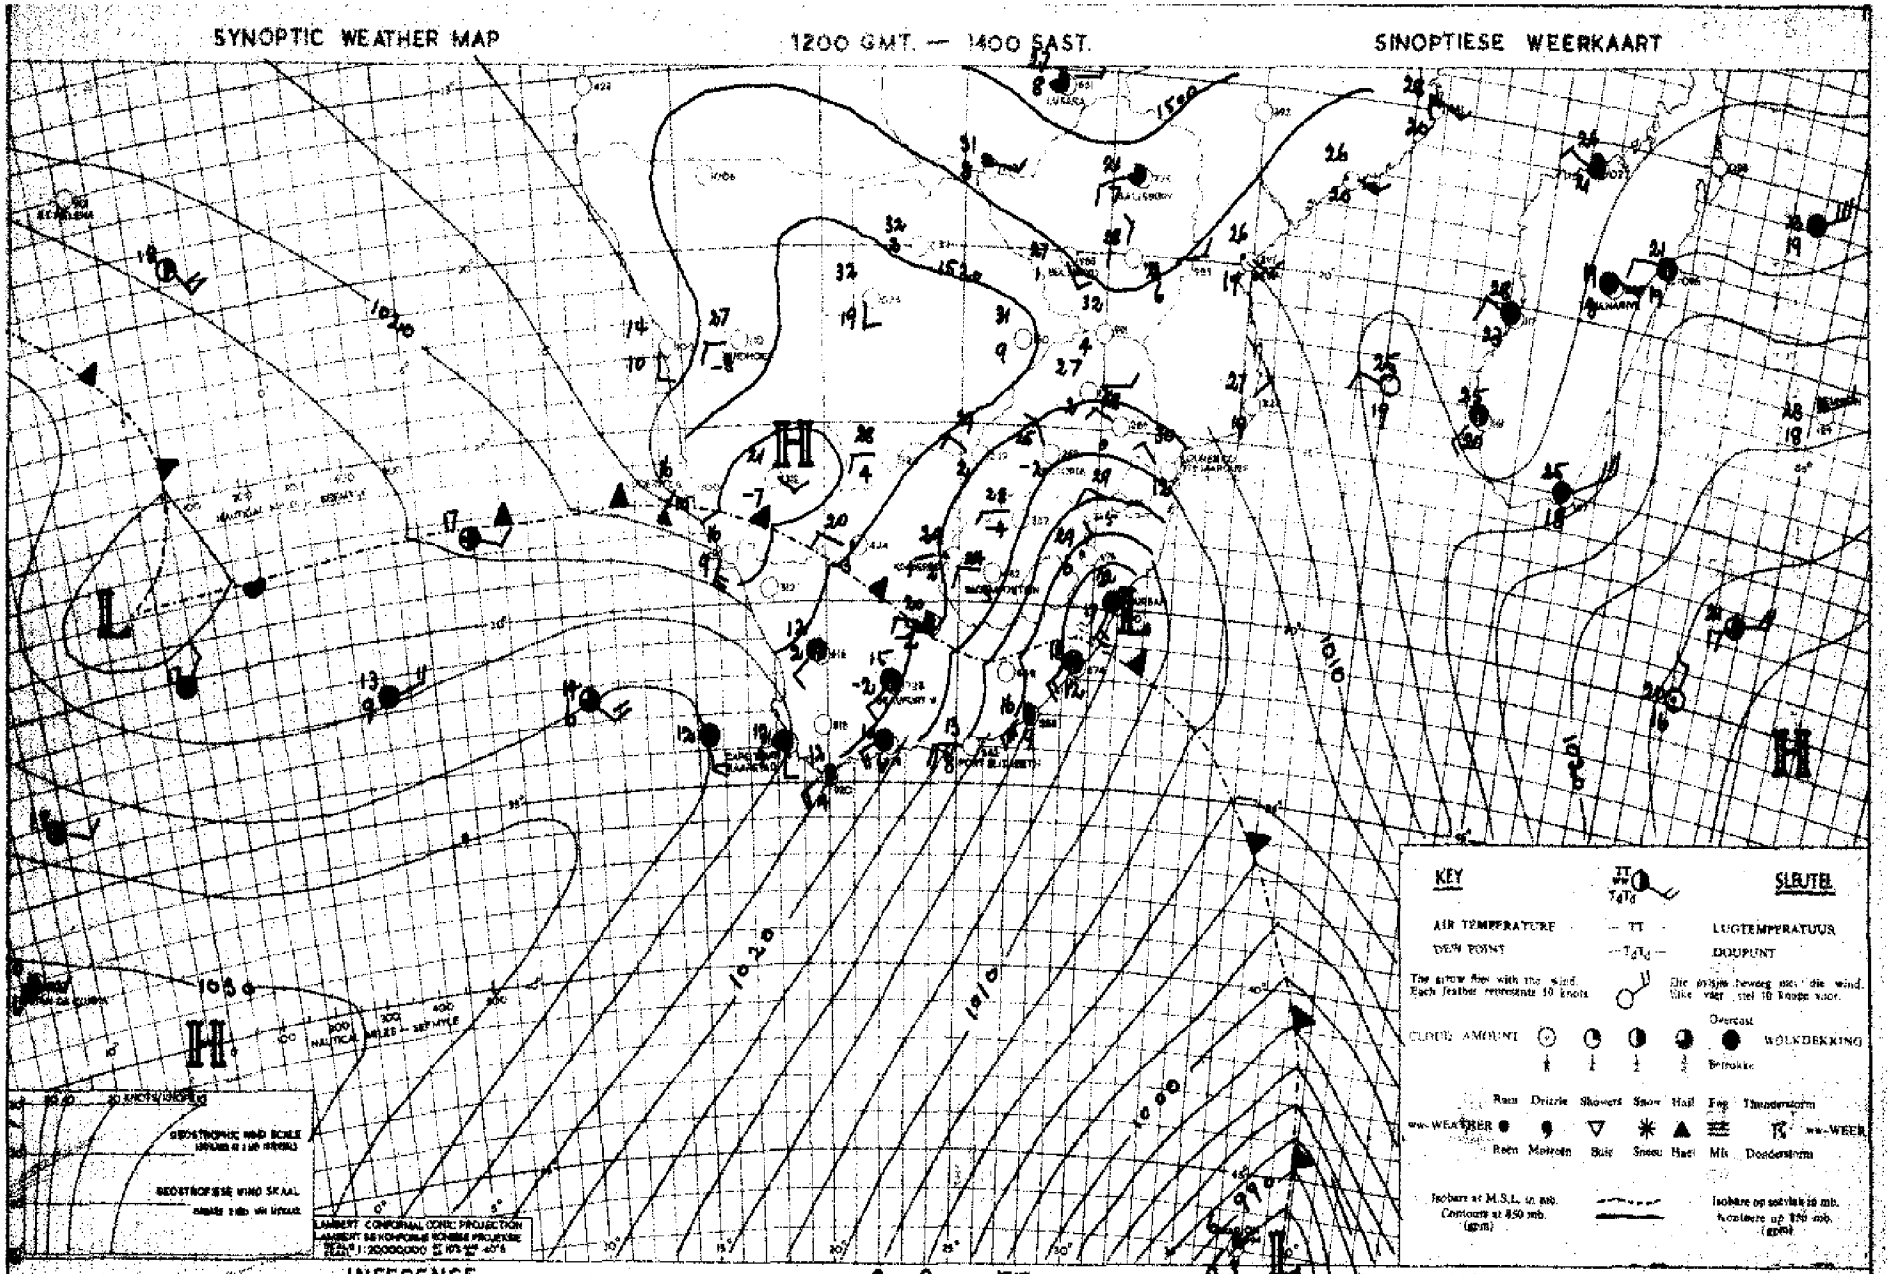
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

With the rise in pressure behind the cold front, cool cloudy conditions will spread over Natal and the Transvaal lowveld. It will also remain cloudy over the southern and eastern coastal regions of the Union, and showers will occur.

DATE 9 - 9 - 1955 DATUM

AFLEIDING

Met die drukstyging agter die koue front sal koel bewolkte toestande uitbrei oor Natal en die Transvaalse laeveld. Dit sal ook bewolk bly oor die suidelike en oostelike kuststreke van die Unie, en buie sal uitsak.

INFERENCE

The high which is now centred southwest of the Union will advance further eastwards and will feed in moist air in the lower layers over Natal and Transvaal from the southeast. It will consequently be cloudy tomorrow over these regions but over the rest of the country it will be fair or fine.

DATE 10 - 9 - 55 DATUM

AFLEIDING

Die hoogdruk wat nou suidwes van die Unie gelee is, sal oostwaarts beweeg en sal vogtige lug in die onderste lae inveer oor Natal en Transvaal uit die suidooste. Dit sal gevolglik bewolk weer more oor hierdie dele maar oor die res van die land sal dit hoofsaaklik mooi weer wees.

The high is now already southeast of the Union and is still moving eastwards with consequent clearing weather over Transvaal and Natal. The low over the Atlantic ocean will now advance closer to the Union and cause cloudy weather over the southwestern Cape Province with rain developing.

Die hoog is nou-al suidoos van die Unie en beweeg nog taemlik vinnig ooswaarts sodat die weer oor Natal en Transvaal almeer vinnig opklaar. Die laag oor die Atlantiese oseaan sal nader na die Unie beweeg en sal bewolkte weer veroorsaak oor suidwes-Kaapland met reën later.

Somewhat cooler air will spread over the western Union. Temporary cloudy conditions and light rain or drizzle will occur over the southwest Cape coastal regions and adjoining interior. Over the remainder of the Union it will continue to be fine and warm.

Ietwat koeler lug sal oor die westelike Unie indring. Tydelike bewolkte toestande ligte reën of motreën sal oor die kuststreke van suidwes-Kaapland en die aangrensende distrikte voorkom. Oor die res van die Unie sal dit mooiweer en warm wees.

INFERENCE

DATE 13 - 9 - 1955

Colder air has spread over the Cape Province, Natal and southern Free State. Cloudy conditions with showers occur over the coastal regions of the Cape. The colder air will spread also to the rest of the Union and showers will occur tomorrow over the southern and eastern coastal regions. Cloudy conditions will also develop over Eastern Transvaal.

AFLEIDING

DATUM

Kouer lug het alreeds oor Kaapland, Natal en suidelike Vrystaat beweeg. Bewolkte toestande met reënbuie kom voor oor die kuststreke van Kaapland. Die koeler lug sal ook eindelik na die res van die Unie en bewolkte weer met buie sal môre voorkom oor die suidelike en oostelike kuststreke. Bewolkte toestande sal ook oor Oos-Transvaal ontwikkel.

The pressure will rise steeply over the southern and eastern Union with the result that cool maritime air will flood Natal and the eastern half of Transvaal. Cloudy conditions will thus generally develop over these regions. Over the remainder of the Union the sky will remain clear. The temperature will remain well below normal generally.

Oor die suidoostelike en oostelike Unie sal 'n skerp styging in lugdruk plaasvind en as gevolg hiervan sal koel maritieme lug oor Natal en die oostelike helfte van Transvaal invloei. Bewolkte toestande sal dus oor hierdie gebiede ontwikkel. Oor die res van die Unie sal geen wolke ontwikkel nie. Die temperatuur sal oor die algemeen tamelik onder die gemiddelde wees.

INFERENCE

DATE 15-9-1955

High South of the Union is feeding in moist air from the south-east Transvaal and this moist air will tomorrow also spread to Free State. Cloudy conditions will develop and orographic rain occur over the northern and eastern Transvaal mountains. Over rest of the country it will remain mainly fine. Warm berg winds blow over Cape west coast.

Inland, cloudy conditions with light rain will spread over the south Western Cape coastal, but it will remain fine and warm elsewhere with fresh northwesterly winds over the southern parts. It will inland become cooler later over the western half of the Cape.

Binnelands sal bewolkte toestande met ligte reën oor die suid-westelike Kaapse kuststreke uitbreek maar elders sal dit mooi en warm bly met matige stark noordwestelike winde oor die suidelike dele. Dit sal egter later koeler word oor die westelike helfte van die Kaapprovinsie.

INFERENCE

Cool, cloudy weather persists over southwest Cape as a result of the extended low pressure area south of the Union. These conditions will, however, not spread to the rest of the Union until the cold front which is now just east of Tristan, reaches the west coast of South Africa.

DATE 19 - 9 - 1955 DATUM

AFLEIDING

Bewolkte koel weer duur voort oor Suidwes-Kaapland asgevolg van die uitgestrekte laagdrukgebied ten suide van die Unie. Hierdie toestande sal egter nog nie uitbrei na die res van die Unie voordat die koue front wat nou net oos van Tristan is, die Weskus van Suid-Afrika berik nie.

Colder air has spread over the entire Cape Province and is expected to spread also over the rest of the Union. Cloudy conditions over the Cape South and southeast coastal regions will clear but over Northern Natal and the Eastern half of Transvaal it will be cloudy with local drizzle in the morning.

Kouer lug het die hele Kaapland en suidelike O.V.S. uitgebreid en word verwag om more oor die res van die Unie uit te breï. Bewolkte toestande oor die Kaaplandse kuststreke sal opklaar, maar oor Noord-Natal en Oostelike helfte van Transvaal [illegible] bewolk word met plaaslike motregte in die oggend.

The cold front associated with the low south of the Union will cause cloudy weather with scattered showers tonight and tomorrow over the coastal regions of the Cape Province. Colder conditions will also spread over the southern interior of the Union. Fairly moist air is present over Transvaal and isolated showers may occur over this province with the passage of the trough now over the

Die koue front verbonde aan die laag suid van die Unie sal bewolkte weer met reënbuie veroorsaak vanmag en more oor die kuststreke van Kaapland. Kouer weer sal ook oor die suidelike binneland beweeg. Betreklik vogtige lug is aanwesig oor Transvaal en enkele ligte buie kan oor die provinsie verwag word met die deurgang van die trog nou oor sentrale Unie.

INFERENCE

The Atlantic high southwest of the Cape extends a ridge of high pressure over the southwestern and eastern Union. Cool sea air will then invade Transvaal and the northeastern Free State from the east and cloudy weather will develop locally over these regions. A gradual clearance will take place over Pondoland and Natal. Over the remainder of the Union it will be fair and mild, but warm over the Cape west coast.

DATE 24-9-1955 DATUM

AFLEIDING

'n ditloper van hoë lugdruk strek van die Atlantiese hoog suidwes van die Unie na die suidoos- en oostkus van die Unie uit. Koel seelug sal dus oor Transvaal en die noordoostelike distrikte van die Vrystaat invloei en plaaslike bewolkte toestande sal oor hierdie gebeide voorkom. Oor Natal en Pondoland sal dit geleidelik opklaar. Oor die res van die Unie sal dit mooiweer en matig wees, maar warm oor die westelike distrikte van [illegible]

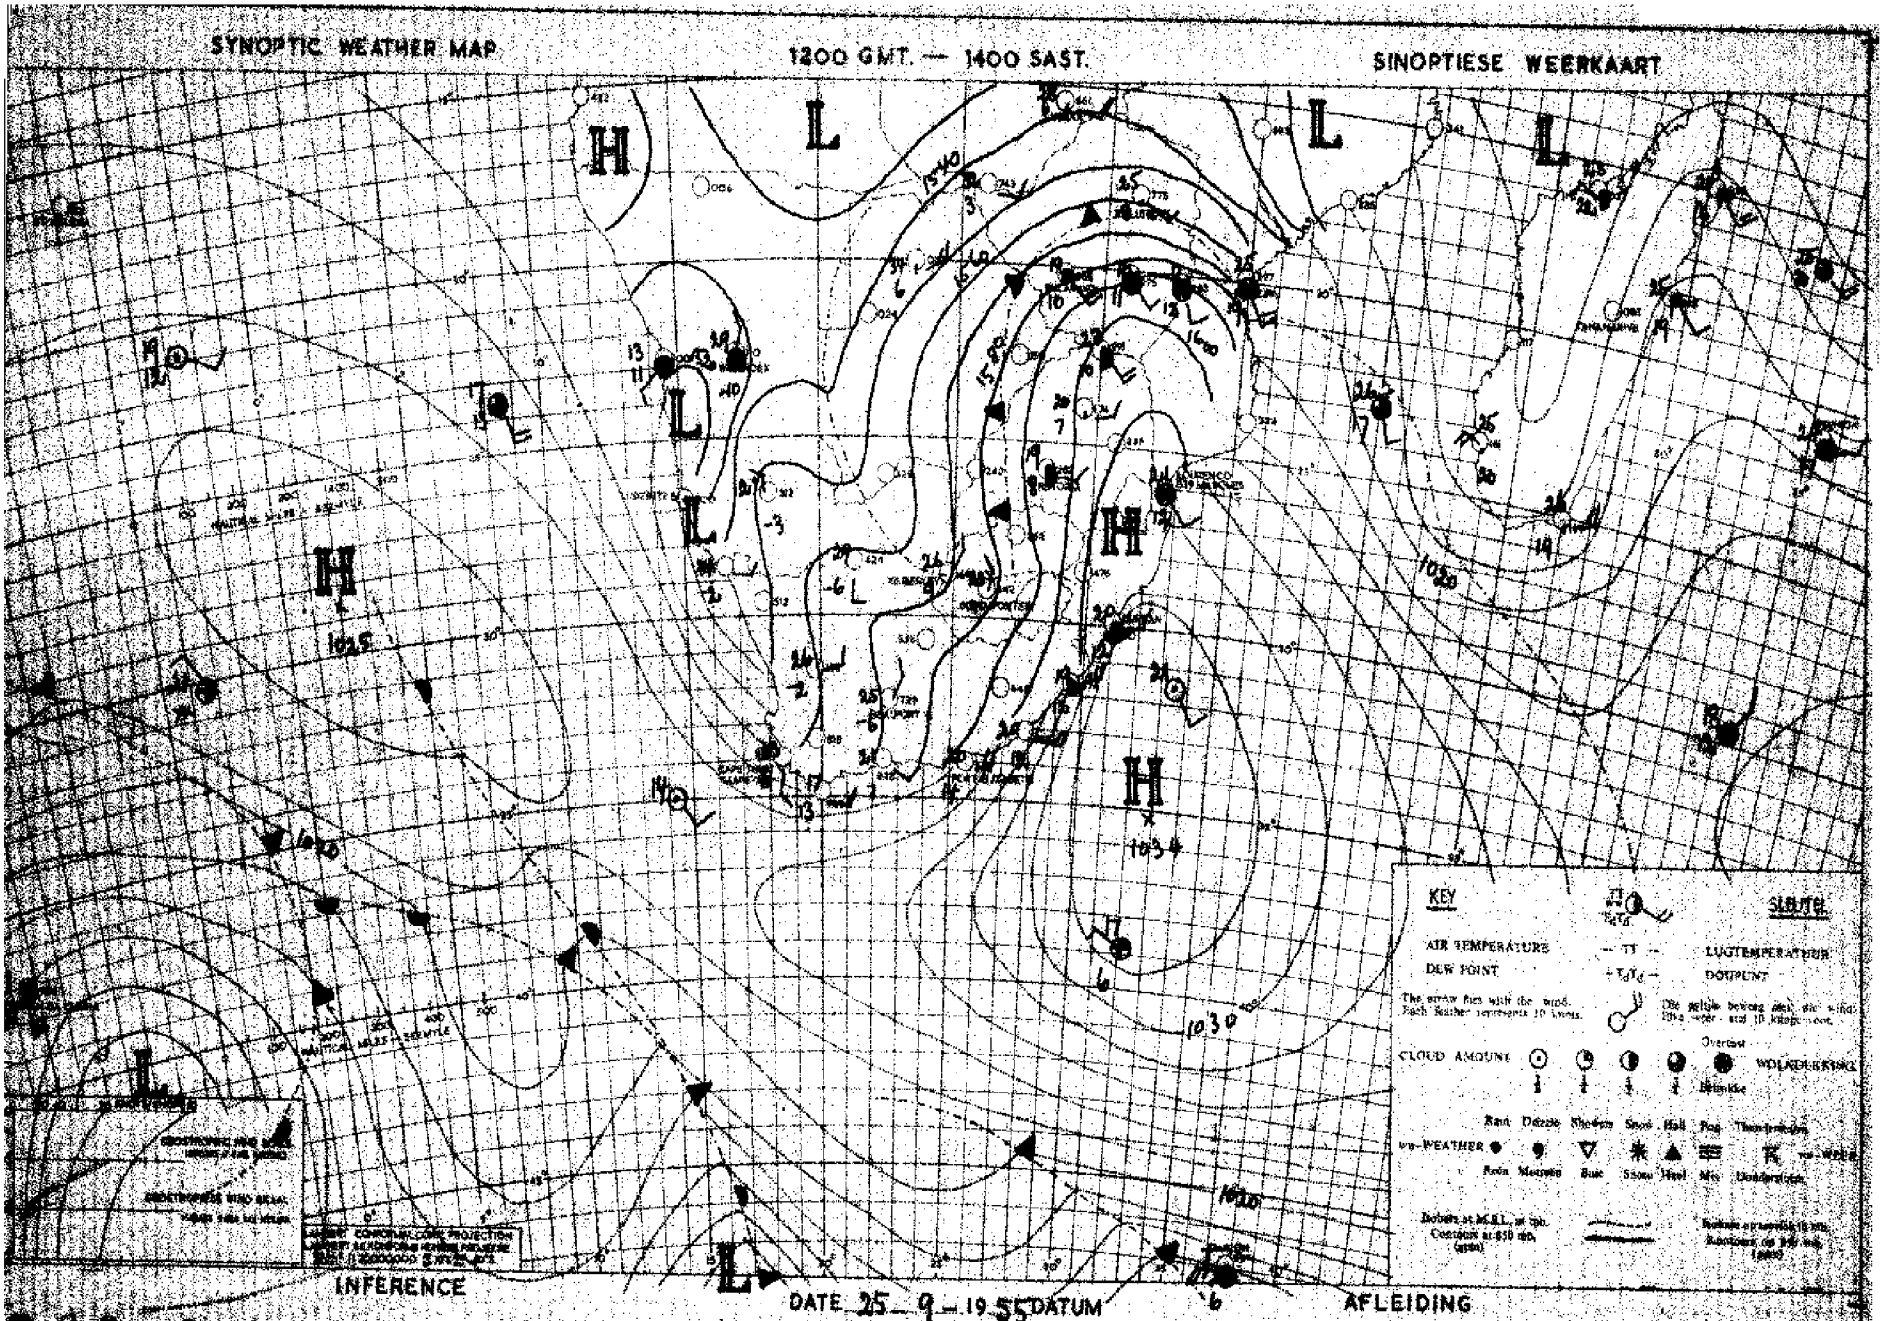
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 25-9-1955 DATUM — AFLEIDING

The influx of moist air over Transvaal and the Free State continues but due to the heavy fall of pressure along the south and southeast coast it will recurve rapidly eastwards. Partly cloudy conditions will occur over Transvaal, Free State and Natal and local thunder conditions will develop over Griqualand west and southwestern Free State. Cloudy cooler weather will also develop over the southwest Cape coast.

Die invloei van vogtige lug vanuit die noordooste oor die Vrystaat bou nog aan maar weens die skerp val van lugdruk langs die suidooskus sal die vogtige lug weer vinnig oor die suidooskus uitswoom. Gedeeltelik bewolkte weer sal oor Transvaal, Vrystaat, Noord-Kaapland en Natal en plaaslike donderweertoestande sal oor Grikwaland-wes en Suidwes-Vrystaat ontwikkel. Koeler en bewolkte

INFERENCE

The northern airstream over the Union is fairly moist and a trough moves eastwards in the upper air. Thundershowers will develop over the central parts of the Union, and the front west of the Cape will cause cloudy weather with occasional light rain over the southwestern Cape.

DATE 26 - 9 - 1955 DATUM

AFLEIDING

Die noordelike lugstroom oor die Unie is redelik vogtig en 'n trog beweeg in die bolug oostwaarts. Donderbuie sal ontwikkel oor die sentrale dele van die Unie, terwyl die front wes van die Kaap bewolkte weer oor die suidwestelike Kaapprovinsie sal veroorsaak, en ligte reën sal uitsak.

INFERENCE

The centre of the Atlantic anticyclone is gradually moving eastwards and colder drier air will invade the southwestern and southern areas. Rain and thunderstorms associated with cloudy skies will occur ahead of this colder air-flow over the northeastern half of the Free State, the southern regions of Transvaal, Natal and the Eastern and Southeastern Cape Province.

DATE 27 - 9 - 55 DATUM

AFLEIDING

Die Atlantiese hoogdrukgebied beweeg geleidelik oostwaarts en kouer droër lug sal oor die suidwestelike en suidelike dele beweeg. Verspreide reën en donderbuie wat met bewolkte toestande gepaard gaan sal voor hierdie koue lug oor noordoos-Vrystaat, die suidelike gebiede van Transvaal, Natal en Oos- en Suider-Kaapland ontwikkel.

INFERENCE

The Atlantic high southwest of the Union will move further eastwards and overcast and rainy weather will continue to occur over Natal and Pondoland and will spread to the southeastern Transvaal. Local thunderstorms development will occur over the central Transvaal. It will be fair and cold over the Cape Province and the Free State.

AFLEIDING

Die Atlantiese hoog, suidwes van die Unie sal verder ooswaarts beweeg en betrokke buierige toestande sal oor Natal en Pondoland voortduur, en sal ook na suidoos-Transvaal uitbrei. Donderweerstoestande sal oor Middel-Transvaal ontwikkel. Oor Kaapland en die Vrystaat sal dit redelik mooiweer maar koud wees.

DATE 30-9-1955 DATUM

AFLEIDING

Exceptionally cold air has spread over Eastern Cape, Natal and [illegible] Transvaal. Cloudy conditions with rain prevail over [illegible]. The cold cloudy weather will spread also to the remainder of Transvaal but as the high South of the Union is advancing Eastwards fairly rapidly it will clear tomorrow over [illegible] Eastern Cape, Natal and Southeast Transvaal. Over the rest of the country fair and warmer.

Besonder koue lug het oor Natal, Oos-Kaap en Suidoos-Transvaal versprei. Bewolkte toestande met reën kom voor oor hierdie streke. Die koue bewolkte weer sal ook uitbrei na die res van Transvaal maar aangesien die hoog taamlik vinnig ooswaarts beweeg sal dit môre alweer opklaar oor Oos-Kaap, Natal en Suidoos-Transvaal.

INFERENCE

The frontal system approaching the West Coast will cause cloudy cooler weather with local light rain along the Cape S.W. coast. Some cloud will also develop in the relatively moist air over Transvaal, OFS and Northern Cape.

AFLEIDING

Die frontestelsel wat die Weskus nader, sal bewolkte weer met plaaslike ligte reën veroorsaak oor die S.W. Kaapse kus. Los wolke sal ontwikkel oor Transvaal, OVS en Noord-Kaap, waar betreklik vogtige lug aanwesig is.

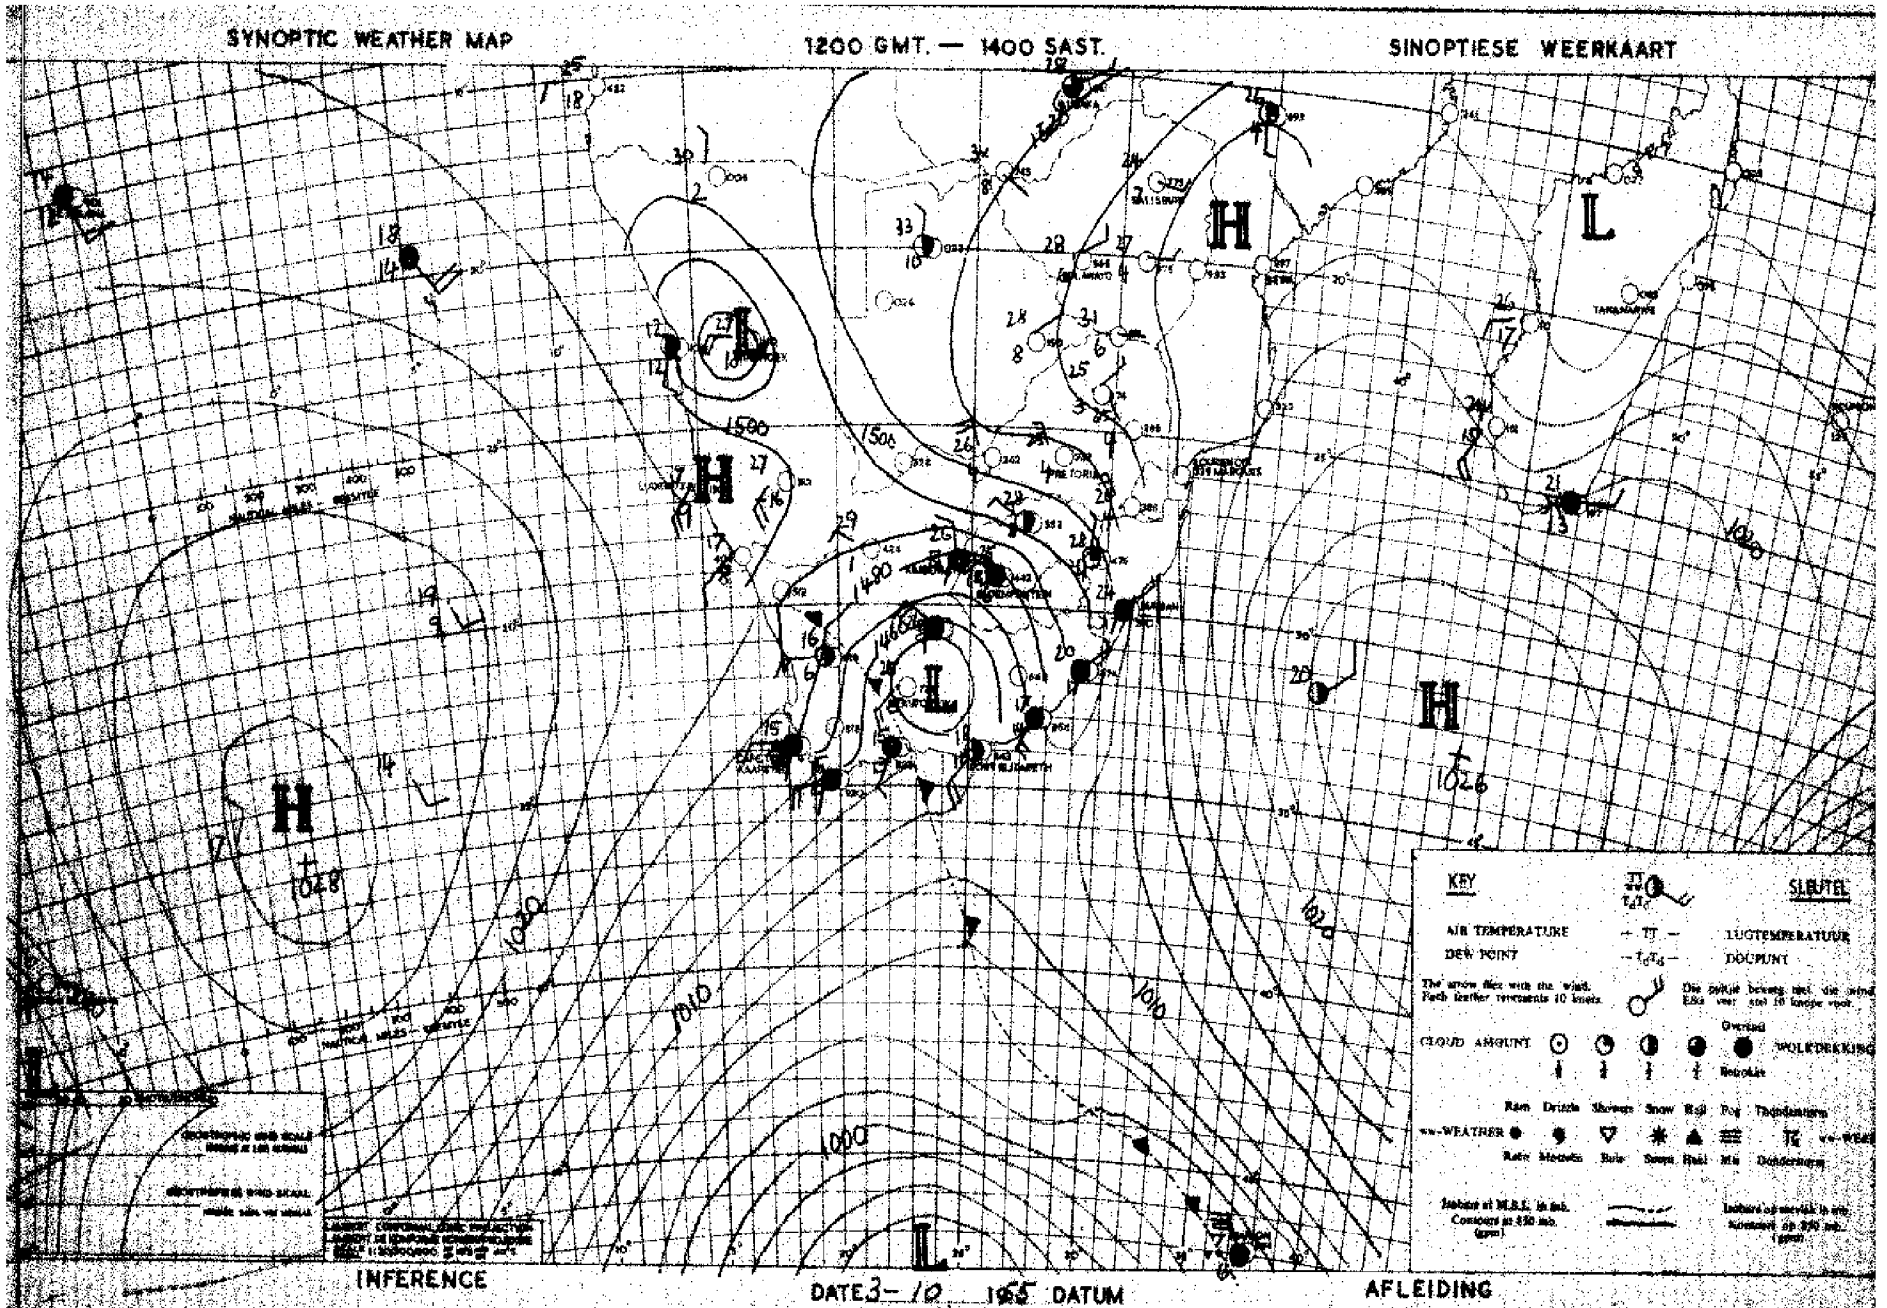
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

Cold air is again moving into the Southwestern Union and clear but somewhat cold weather will occur over the Southwestern Cape Interior. Along the Cape coastal regions it will be cloudy and scattered showers will occur. Warm moist air will circulate over Transvaal and Natal and scattered thunderstorms will occur over these regions. Rainshowers will fall along the Natal coast.

DATE 3-10 1955 DATUM

AFLEIDING

Koue lug beweeg weer oor die Suidwestelike Unie en redelik mooier maar ietwat kouerige weerstoestande sal oor die Suidwestelike binneland van die Unie voorkom. Oor die Kaapse kusstreke sal dit bewolk wees en verspreide reenbuie sal uitsak. Warm vogtige lug sirkuleer oor Transvaal en Natal en verspreide donderbuie sal oor hierdie dele ontwikkel. Verspreide reënbuie sal oor die Natal

INFERENCE

The high West of the Union is moving rapidly Eastwards and will cause an influx of colder but moist air over the Eastern half of the Union. Warm and relatively moist air is already present over this region and with interaction of the two moist air masses moderate to heavy rain may be expected. Over the Western half of the Union it will be fair and cool.

DATE 4-10-1955 DATUM

AFLEIDING

Die hpogdruk Wes van die Unie beweeg vinnig ooswaarts en sal kouer vogtige lug invoer oor die Oostelike helfte van die Unie. Warm en redelike vogtige lug is reeds aanwesig oor hierdie gebied en met die samevloeiing van die twee lugmassas kan goeie neerslae verwag word. Oor die Westelike helfte van die Unie sal dit redelike mooi

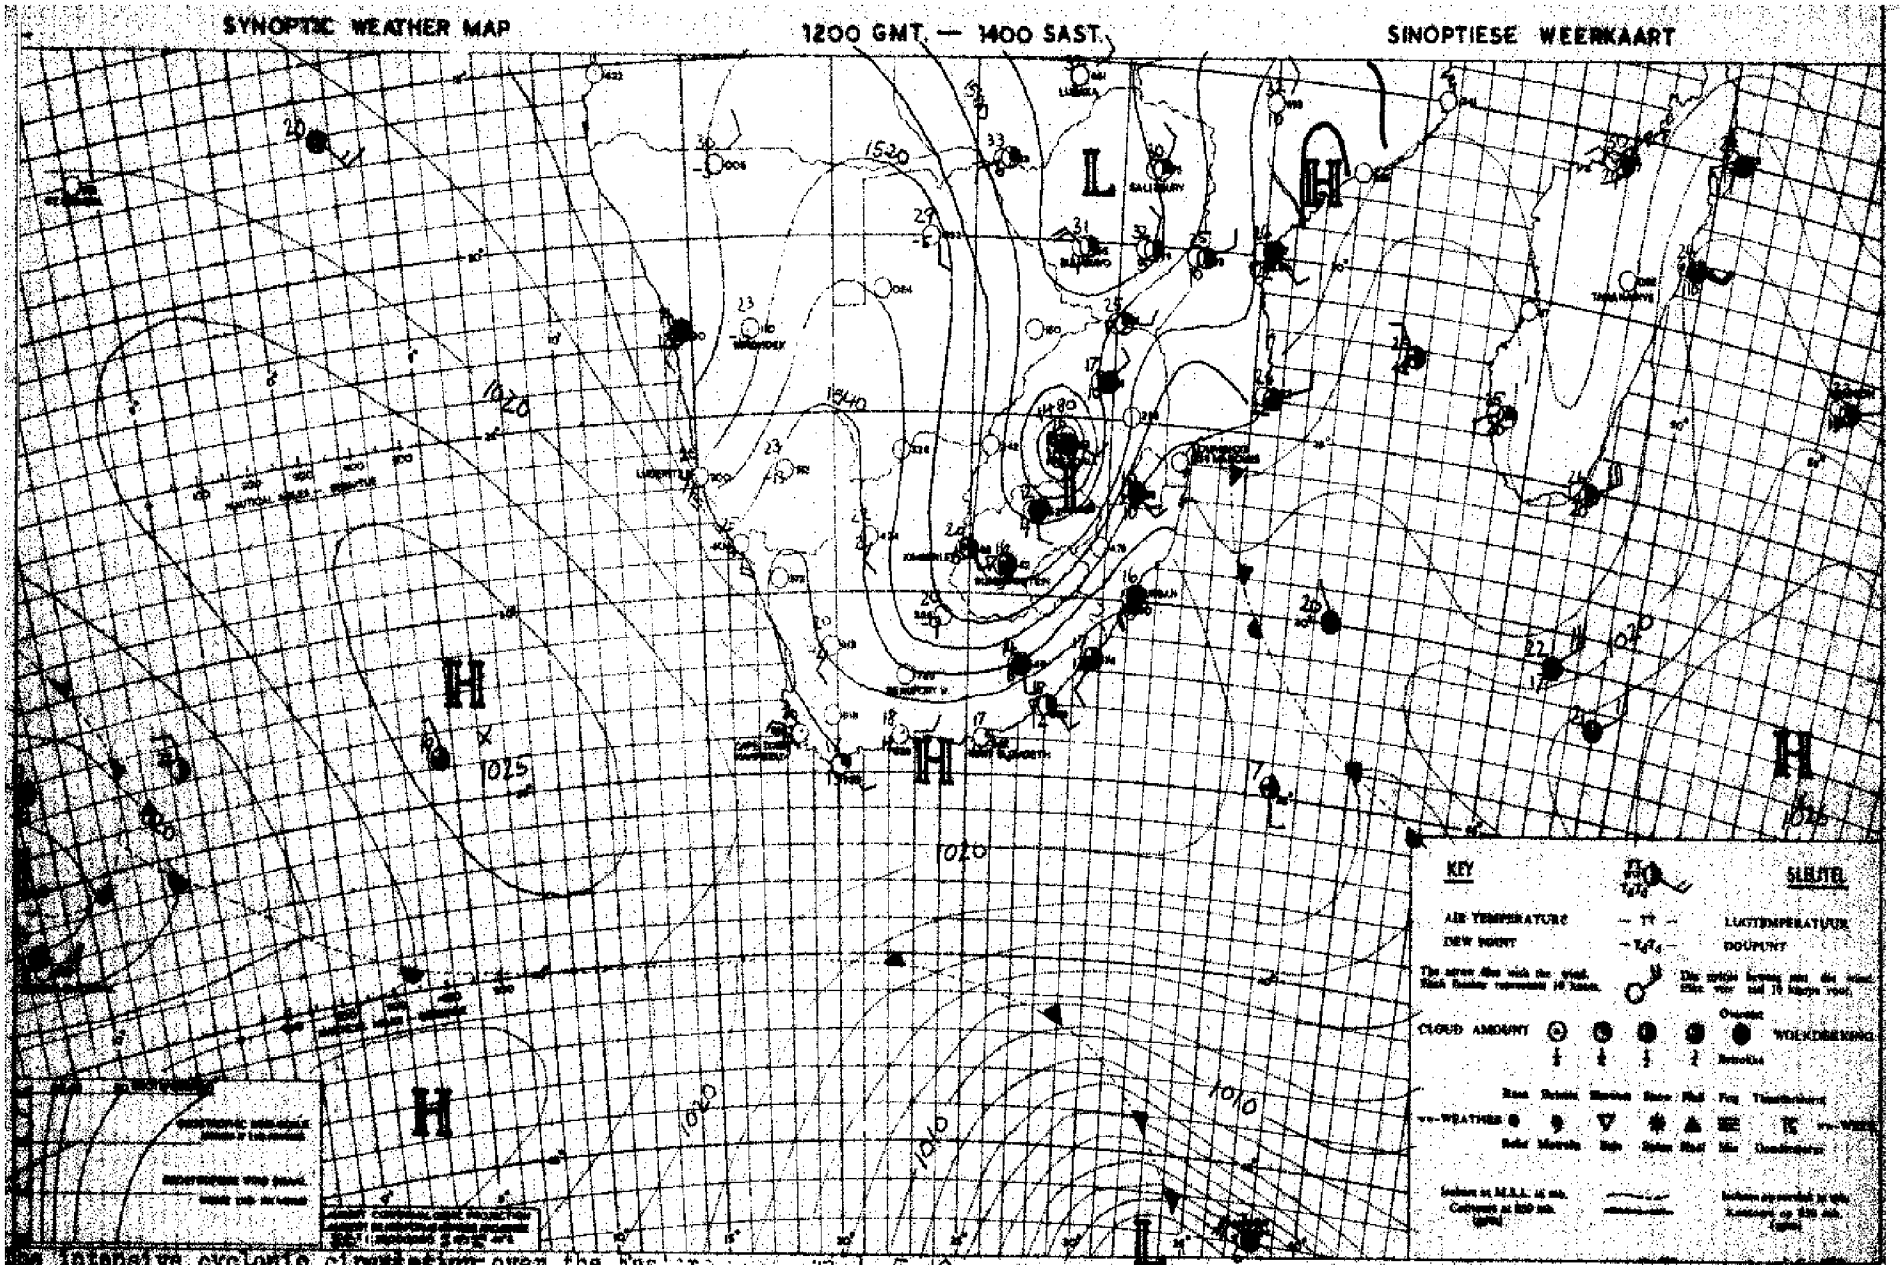
SYNOPTIC WEATHER MAP — 1200 GMT — 1400 SAST — SINOPTIESE WEERKAART



The intensive cyclonic circulation over the Eastern [illegible] will weaken and disappear. The air over Transvaal, Natal and the Free State will, however remain relatively moist and partly cloudy conditions will occur through most of the day. Light showers are still likely over the Zululand coast. Over the remainder of the Union it will be fine but cloudy conditions will begin to redevelop over the Cape southwest coast

REFERENCE DATE 5-10-1955

Die intensiewe siklonale sirkulasie oor die oostelike Unie sal verminder en verdwyn. Die lug oor Transvaal Vrystaat en Natal sal egter vogtig genoeg bly om gedeeltelik bewolkte toestande te veroorsaak. Enkele buie sal waarskynlik nog oor die Soeloeland.kusstreke uitsak. Oor die res van die Unie sal dit mooiweer bly maar oor die kusgebied van Suidwes-Kaapland sal dit weer geleidelik bewolk word

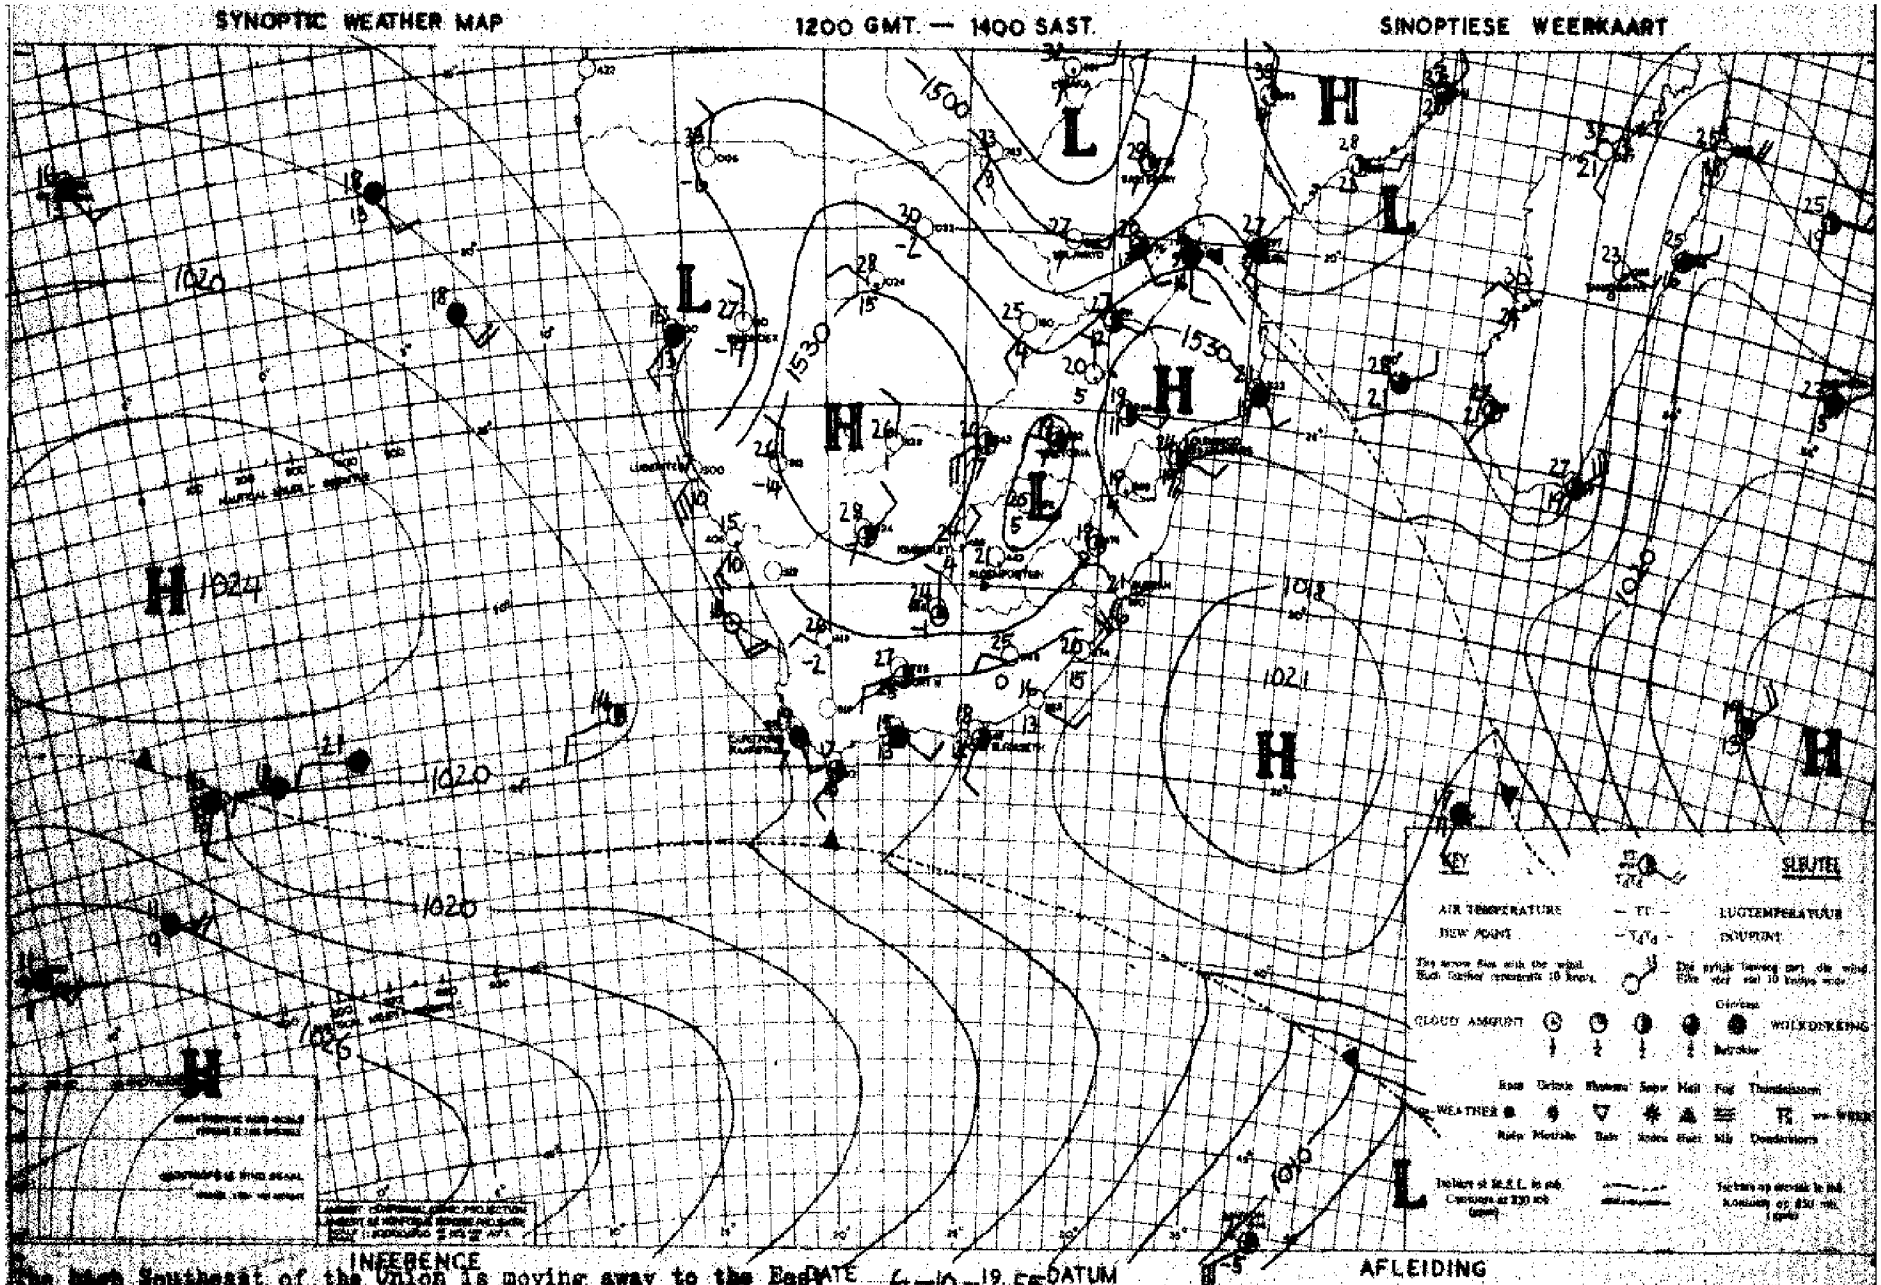
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

The high Southeast of the Union is moving away to the East and it will be fair tomorrow over most parts of the country. The high extending from Tristan to Marion may, however, cause cloudy conditions with local rain along the Southwest and South Coastal regions.

DATE 6—10—1955 DATUM

AFLEIDING

Die Hoogdruk Suidoos van die Unie beweeg weg na die Ooste en lit sal dus môre betreklike mooi weer wees oor die meeste dele van die land. Die hoog wat strek van Tristan na Marion mag egter weer bewolkte toestande met plaaslike reën veroorsaak langs die Suidwes- en Suidkusstreke.

AFLEIDING

Fair all the spread over the Cape Province and is expected to spread further to the Southern, O.F.S., Natal and Southeastern Transvaal. Cloudy conditions with showers will occur over the coastal belts of Southern and Eastern Cape and Natal. Elsewhere fair weather.

Koue lug het oor feitlik die hele Kaapland uitgebrei en word verwag om later ook oor Suidelike Vrystaat, Natal en Suidoos-Transvaal uit te brei. Bewolkte weer met reënbuie sal voorkom oor die kuststreke van Suid- en Oos-Kaapland en Natal. Elders betreklike mooi weer.

As a result of the high pressure the Union rather cloudy weather will occur tomorrow over Southeast Cape, Natal and Southeast Transvaal. A few showers may occur. The air over the rest of Transvaal will also become more moist and isolated afternoon thunderstorms will develop. Over the remainder of the country it will be fair and warm.

As gevolg van die aanwesigheid van die hoë sal waarskynlik bewolkte weer meer voorkom oor Suidoos-Kaap, Natal en Suidoos Transvaal. Enkele reënbuie mag voorkom. Die lug sal ook vogtiger word oor die res van Transvaal en namiddag-donderweer sal hier en daar opgeteek. Oor die res van die land sal redelike mooi weer en warm.

AFLEIDING

...ern sector will move from the north over S.W.A. and will reach the northern parts of the Cape Province and also the Free State and ...easterly rain and thundershowers will develop. The cold front ...st of the Cape is weak and will not cause much weather.

...ste, vogtige lug beweeg uit die noorde oor S.W.A. en sal die Noordelike dele van Kaapland asook die Vrystaat en Transvaal bereik en reën en donderbuie sal uiteak. Die koue-front wes van die Kaap is swak en sal nie veel weer veroorsaak nie.

Cold air is present over Transvaal, Free State, Natal and the eastern parts of the Cape Province. As a result of the trough over the Central Union scattered thundershowers will occur over these provinces. The extensive high over the Atlantic ocean will however lead in drier air over the Western interior. The cold front approaching the coast will cause cooler, cloudy conditions with rain along the Southwestern and Southern coastal regions.

12 - 10 - 1955

Koue lug is aanwesig oor Transvaal, Vrystaat, Natal en die oostelike dele van Kaapland. As gevolg van die trog oor die sentrale Unie sal verspreide donderbuie oor genoemde provinsies voorkom. Die sterk hoog oor die Atlantiese oseaan sal egter droër lug oor die westelike binneland invoer. Die kouefront wat die kus nader, sal koeler bewolkte toestande met reën langs die suid-westelike en suidelike kusstreke veroorsaak.

It is expected that drier weather behind the trough over the interior will advance northeastwards and weather will clear over the Free State and the southwestern Transvaal. Further rain will however fall over the remainder of Transvaal and over Natal.

DATE 13-10-1955 DATUM

Die verwagting sal dat droër weer agter die trog oor die binneland noordoostwaarts beweeg, en dit sal opklaar oor die Vrystaat en suidwes Transvaal. Verdere reën sal egter oor die res van Transvaal en oor Natal uitsak.

Synoptic map showing the eastward and cold inland weather will spread over Transvaal and the northeastern Transkei. Light rain will occur over Natal and the eastern escarpment areas. It will remain fair elsewhere but temperatures will remain well below normal.

DATE 14-10-1955 DATUM

Sinoptiese kaart wys die oostwaarts en koue binneland weer sal oor Transvaal en die noordoostelike Transkei beweeg. Ligte reën sal uitsak oor Natal en die Oostelike Platorand-gebied. Dit sal redelik mooiweer bly elders maar temperature oor die algemeen heelwat onder normaal.

The influx of humid air will continue over the Northeastern and Eastern Union and over Bechuanaland and will spread to the eastern districts of S.W.A. Cloudy to overcast weather will thus occur over these regions. The air is dry over the remainder of the Union and fair mild weather will continue to prevail.

Die invloei van vogtige lug oor die Noordoostelike en oostelike Unie en oor Betsjoeanaland sal aanhou en sal ook na die oostelike distrikte van S.W.A. uitbrei. Bewolkte tot betrokke toestande sal dus oor hierdie gebiede voorkom. Droë lug sirkuleer oor die res van die Unie en mooimer en matige weerstoestande sal bly voorkom.

INFERENCE

16 - 10 - 1955

AFLEIDING

[illegible] centres of low pressure over the central [illegible] is gradually moving in a southerly direction. Cloudy weather will develop east of this trough and scattered rain or thunder storms occur. West of this trough the weather will be fair but the approaching cold front southwest of the Cape will give temporary cloudy and showery weather over the Cape Southcoast.

[illegible] sentrums van lae druktes oor die sentrale dele van die [illegible] beweeg geleidelik noordwaarts. Bewolkte toestande sal oos van hierdie troglyn voorkom en verspreide buie of donderbuie sal uitval. Wes van die trog sal dit mooiweer bly maar die koue front wat suidwes van die Kaap gelê is sal tydelik bewolkte en buierige toestande oor die Kaapse Suidkus veroorsaak.

With the high moving round the coast east and the trough over the interior the influx of moist air will continue over the western half of the Union and rain will occur over the Transkei, Natal and Transvaal, and possibly also over the Free State.

Met die hoog wat om die oostkus beweeg en die trog oor die binneland sal die invloei van vogtige lug voortduur oor die westelike helfte van die Unie, en reën sal uitval oor die Transkei, Natal en Transvaal en moontlik ook oor die Vrystaat.

Drier air is moving gradually eastward over the Western Districts of the Transvaal, Free State and Natal and the weather is expected to clear gradually over these regions. Cloudy and cooler and showery weather will redevelop over the Coastal regions of the Southwest and South Cape. It will be fair over the remainder of the Union.

Droër lug beweeg geleidelik oostwaarts oor Transvaal, Vrystaat en Natal en die slegte weerstoestande oor hierdie streke sal geleidelik opklaar. Bewolkte buierige en koeler weerstoestande sal weer oor die kusgebiede van Suidwes- en Suid-Kaapland ontwikkel. Oor die res van die Unie sal dit redelik mooimaar wees.

Cooler air will move over the Cape Province from the west and cloudy weather will develop over the western and southern parts and rain will fall over the coastal belts. It will remain fine to fair and warm over the remainder of the Union and over South West Africa, but cooler air will later also reach the Natal coast.

19-10-1955 DATUM

Koeler lug sal die Kaapprovinsie uit die weste binnestroom en bewolkte weer sal oor die westelike en suidelike dele voorkom en reën sal oor die kuststreke uitsak. Oor die res van die Unie en Suidwes-Afrika sal dit egter redelik mooiweer en warm bly maar koeler lug sal later ook tot by die Natalse kusgebied uitbrei.

Cold moist air is moving over the west and Southwest Cape and will continue to move eastwards towards the Southern Cape. It will be cloudy and cold over these regions and scattered showers will fall over the coastal districts. Some moist air will also move in over the Cape East and Natal coast and cloudy mild weather will occur. Apart from local thunderstorms over the Transvaal Escarpment there will be fine over the remainder of the Union.

20-10-1965 DATUM

Koue vogtige lug beweeg oor Wes- en Suidwes-Kaapland en sal geleidelik ook na Suid-Kaapland uitbrei. Oor hierdie dele sal dit bewolk wees en verspreide reënbuie sal oor die kusgebied uitsak. Vogtiger lug sal ook oor die kusgebiede van Oos-Kaapland en Natal inbeweeg en bewolkte toestande sal ook hier voorkom. Met uitsondering van los donderbuie oor die Platorand van Transvaal sal mooiweer wees oor die res van die Unie.

Fine cold unsettled conditions over Southwestern and Southern Cape Province will spread to Natal and Southeastern Transvaal. Over the Free State and Cape interior it will also become colder but remain mainly fine. Thundery conditions will again develop over Transvaal and Northern Natal.

23-10-1965

Koue onbestendige toestande oor Suidwestelike en Suidelike Kaapland sal uitbrei na Natal en Suidoostelike Transvaal. Oor die Vrystaat en Kaapse binneland sal dit ook kouer word maar hoofsaaklik mooiweer bly. Donderweertoestande sal weer oor Transvaal en noordelike Natal ontwikkel.

Pressures are rising sharply behind the east coast trough and a cold front, and cooler, overcast weather will spread over Transvaal and the northeastern Free State and light rain will occur over the escarpment areas. It will clear however over the Cape coasts and over southern Natal.

DATE 24-10-1955 DATUM

Die druk styg skerp agter die oostelike laagte en koue front, en koeler, bewolkte weer sal oor Transvaal en die noordoostelike Vrystaat beweeg en ligte reën sal oor die platorand-gebiede uitsak. Dit sal egter opklaar oor die kuststroke van die Kaapprovinsie en oor suidelike Natal.

INFERENCE

DATE 19

Cold moist air is being fed in over Natal, Transvaal and northeastern Free State and it will be cloudy with scattered light rain over these provinces. Warm moist air is present over Southwest Africa and will extend southwards over northern and northwestern Cape province. Thundershowers will develop over these regions.

Koue vogtige lug word oor Transvaal, noordoostelike O.V.S. en Natal ingevoer uit die ooste en dit sal bewolk wees oor hierdie provinsies met verspreide ligte reën. Warm vogtige lug is aanwesig oor Suidwes-Afrika en sal suidwaarts beweeg oor noordelike en en noordwestelike Kaapland. Donderbuie sal oor genoemde dele uitsak.

The low over the eastern interior is moving away to the east and the accompanying thundery conditions will cease tomorrow over most parts of the country as a result of the high South of the Union cloudy conditions with rain will however persist over the over the coastal regions of Natal and Southeastern Cape and will spread later to southeastern Transvaal.

28 - 10 - 55. Die laagdruk oor die oostelike binneland beweeg oostwaarts en die gepaardgaande donderweertoestande sal môre verdwyn oor meeste dele van die land. As gevolg van die hoogdruk suid van die Unie sal bewolkte weer met reën egter voortduur oor die Natalse en suidoostelike Kaapse kusgebiede en sal later uitbrei na suidoostelike Transvaal.

When the pressure rise over the east coast colder, cloudy weather will spread over the Transvaal and the northeastern Free State. It will clear and it will become warmer than the south over Natal and it will remain mainly fine and warm elsewhere.

Wanneer die drukstyging langs die Oos-kus sal koue bewolkte weer uitbrei oor Transvaal en die noordoostelike Vrystaat. Dit sal uit die suide opklaar en warmer word oor Natal en oor die res van die Unie sal dit redelik mooiweer en warm bly.

INFERENCE

Small isol clouds will develop over Transvaal, the Free State, Northern-Cape and over South West Africa. Low clouds with possible [illegible] will occur over the coastal regions of the Cape Province.

DATUM 30-10-65

AFLEIDING

Deurmekaar wolke sal ontwikkel oor Transvaal, die Vrystaat, Noord-Kaapland en oor die noordelike dele van Suidwes-Afrika. Lae wolke met moontlike ligte reën sal oor die kuststreke van Kaapland voorkom.

A deep trough stretches from Windhoek to Port Elizabeth and thundershowers associated with it will spread during the night over the Free State, Griqualand West and eastern Cape. Drier air is following the trough and will give clearing weather. The high between Cape Town and Tristan is moving eastwards and as a result cloudy weather with local rain will occur over the southern and eastern coastal districts.

'n Diep trog strek van Windhoek na Port Elizabeth en donderbuie gepaard daarmee sal gedurende die nag oor die Vrystaat Griekwaland-wes en oostelike Kaapland beweeg. Droër lug volg agter die trog en dit sal dus daarna opklaar. Die hoogdruk tussen Kaapstad en Tristan beweeg oostwaarts en gevolglik sal bewolkte toestande oor die suidelike en oostelike kusstreke voorkom en reën sal plaaslik uitsak.

The air over the interior is fairly moist, and with pressures falling over both east- and west coasts the low over the interior will intensify and convergence will take place. Radar and thundershowers will develop over Transvaal and the Northern Free State.

Die lug oor die binneland is redelik vogtig en met die drukdalings oor beide wes en ooskus sal die laag oor die binneland verdiep en konvergensie sal plaasvind. Reën en donderbuie sal ontwikkel oor Transvaal en die noordelike Vrystaat.

The extensive high centred ESE of Cape Town is moving eastwards and as a result the Southeasterly air flow will cause cooler windy conditions over the eastern and northeastern parts of the Union. Rain will occur generally. The drier air over the western regions will also gradually be replaced but tomorrow it will still be fair over these parts.

Die groot hoogtruk ESE van Kaapstad beweeg oostwaarts en gevolglik sal 'n suidoostelike stroming bewolkte koeler weer oor die oostelike en noordoostelike dele van die Unie veroorsaak. Reën sal algemeen voorkom. Die droër lug oor die westelike dele sal ook geleidelik teruggestoot word maar dit sal more nog redelike mooi weer bly oor hierdie gebiede.

Cold cloudy weather will move over Transvaal and the Free State from the east. It will begin to clear however over Natal from the South, and it will be fine to fair elsewhere.
Koue bewolkte weer sal oor Transvaal en die Vrystaat beweeg. Dit sal egter uit die suide begin opklaar oor Natal en oor die res van die Unie sal dit redelike mooiweer wees.

INFERENCE

Rain is covering most parts of the Union and scattered thunder showers will occur over Transvaal, Free State, Natal and Northern and eastern Cape province. Drier air is present over South-West-Africa and western Cape province and will extend eastwards tomorrow over the interior.

DATE 19

AFLEIDING

DATUM

Vogtige lug bedek die grootste deel van die Unie en verspreide donderbuie sal voorkom oor Transvaal, O.V.S., Natal en noordelike en oostelike Kaapland. Droër lug is aanwesig oor Suidwes-Afrika en westelike Kaapland en sal môre ooswaarts uitbrei oor die binneland.

INFERENCE

A low pressure system west of the Cape will cause cloudy weather with possible rain over the southwestern Cape coast. Drier air is however flowing over remainder of the Union and it will remain mainly fine and temperature will recover rapidly to normal.

DATE 7 / 11 / 1955 DATUM

AFLEIDING

'n Laagdrukstelsel wes van die Kaap sal bewolkte weer met moontlike ligterreën oor die suidwestelike kuststreke veroorsaak. Droër lug beweeg egter oor die res van die Unie en dit sal hoofsaaklik mooiweer bly en temperature sal vinnig herstel tot normaal.

INFERENCE

Dense air is still flowing southwards over Transvaal. Partly cloudy conditions will develop during the day and isolated thunderstorms will occur over the Highveld districts. With the eastward movement of the weak cold front southwest of the Cape will cloudy showery conditions develop over the coastal districts of the south-western and southern Cape. Over the remainder of the Union it will be fine and warm to hot.

DATE 10-11 1955

AFLEIDING

Koue vogtige lug beweeg dog suidwaarts oor Transvaal en gedeeltelik bewolkte weer sal ontwikkel. Plaaslike donderbuie sal oor die Hoëveld distrikte voorkom. Met die oeswaartse beweging van die swak koue front suidwes van die Kaap sal bewolkte buierige toestande oor die kusgebiede van suidwes- en suid Kaapland voorkom. Oor die res van die Unie sal dit mooiweer en warm tot baie warm wees.

INFERENCE

DATE 4/11 — 19 DATUM

Pressure is rising along the east coast and cloudy weather with light local rain will occur over the Natal coastal belt. Thunderstorms will develop over Transvaal and the northeastern Free State during the afternoon, but otherwise fair and warm elsewhere.

AFLEIDING

Die druk styg langs die ooskus en bewolktesweer met ligte plaaslike reën sal oor die kusgebied van Natal voorkom. Donderstorms sal oor Transvaal en die noordoostelike Vrystaat voorkom in die namiddag maar andersins redelik mooiweer en warm oor die res van die land.

The cold front approaching the coast will bring cooler conditions to southwestern and southern Cape province. Showers will occur over the coastal areas. Over Transvaal and Natal interior thundery conditions will develop and isolated showers will occur. Elsewhere it will be fair.

DATE 12-11-19 DATUM

Die koue front wat die kus nader sal koeler weer bring oor suidwestelike en suidelike Kaapland. Buie sal uitsak oor die kusgebiede. Oor Transvaal en Natal binneland sal donderweerstoestande weer ontwikkel en enkele buie sal uitsak. Elders sal dit redelike mooi weer wees.

The cold front has now moved over the greatest part of the Cape province and will extend further also over the Free State, Natal and Southeastern Transvaal. Light showers will fall over the coastal regions. Thundery conditions will develop over the rest of Transvaal and local showers will occur.

DATE 13-11-19 DATUM

Die koufront het nou al oor 'n groot deel van Kaapland beweeg en sal verder uitbrei ook oor die Vrystaat, Natal en Suidoostelike Transvaal. Ligte buie sal voorkom oor die kuststreke. Donderweertoestande sal oor Transvaal ontwikkel en plaaslike buie sal uitsak.

DATE 15-11-19 55

DATUM

AFLEIDING

Cold air has now spread over the whole Union and South West Africa. The sea air from the southeast is causing cloudy conditions over Natal, Transvaal, and northern FreeState. As a result of an upper air low general rain and showers are falling over these areas but will be limited to eastern and northern Transvaal tomorrow.

Koue lug het nou oor die hele Unie en Suidwes Afrika beweeg. Die seelug uit die suidooste veroorsaak bewolkte toestande oor Natal, Transvaal en noordelike Vrystaat. As gevolg van n bolug-laag kom reën en buie algemeen voor maar sal môre tot noordelike en oostelike Transvaal beperk wees.

INFERENCE

Cloudy and rainy weather conditions, associated with a cold front west of the Cape, will develop over the coastal regions of the southwestern and southern Cape during the night. It will clear gradually over the eastern Transvaal but over the remainder of the Union it will be fine and mild to warm.

DATE 19

AFLEIDING

DATUM

Bewolkte buierige toestande, wat met die koufront wes van die Kaap gepaard gaan, sal vannag oor die kusstreke van Suidwes- en Suid-Kaapland voorkom. Oor Oos-Transvaal sal dit geleidelik opklaar maar oor die res van die Unie sal dit mooiweer en matig tot warm wees.

Slightly cooler air is spreading along the Cape South coast and will extend further to the southwest coast, Natal coast and south-eastern Transvaal lowveld. Cloudy conditions will occur and scattered showers will fall over these regions. Over the remainder of the country it will remain mainly fine.

Effens koeler lugfiltrasie sal voorkom oor die suidkus en sal verder beweeg oor die suidoostelike kus, Natal kus en suidoostelike Transvaalse laeveld. Wolke sal voorkom oor hierdie dele en los buie sal uitsak. Oor die res van die land sal dit egter hoofsaaklik mooiweer bly.

The cell of high pressure close to the East Coast of the Union and the low pressure system over the Free State will cause a moist northeasterly air flow over the eastern Union. It will thus be partly cloudy and mild generally over the eastern half of Transvaal, and over Natal and Pondoland. Over the remainder of the Union it will be fair and warm.

Die hoogdruk sisteem oor die Oostkus van die Unie en die laagdruk sel oor die Vrystaat sal 'n koel vogtige noordoostelike lugstroom oor die oostelike Unie veroorsaak. As gevolg hiervan sal gedeeltelik en matige weerstoestande oor die oostelike helfte van Transvaal en oor Natal en Pondoland voorkom. Oor die res van die Unie sal dit mooiweer en warm wees.

With the eastward movement of the Atlantic high, cooler cloudy conditions with occasional rain will move firstly over the Cape South coast and later also over the southeast coast and Natal. The air over the interior is dry and in spite of the trough not much rain or thundershqwers are expected.

19 – 11 – 55

Met die oostwaartse beweging van die Atlantiese hoog sal koeler bewolkte weer met reën eers oor die Kaapse suidkus en later oor die suidooskus en oor Natal beweeg. Die lug oor die binneland is droog en ten spyte van die trog sal nie veel reën of donderbuie voorkom nie.

Cooler, cloudy weather with rain or drizzle will spread further over Natal and also over eastern and northern Transvaal. With the low over the interior isolated thundershowers will develop over the remainder of Transvaal and over the northeastern Free State.

Koeler bewolkte weer met reën of motreën sal verder oor Natal asook oor oostelike en noordelike Transvaal beweeg. Met die laag oor die binneland sal los donderbuie oor die res van Transvaal en oor die noordoostelike Vrystaat ontwikkel.

Cold moist air which is present over Natal and Southeastern Transvaal is spreading over the rest of Transvaal and northern Free State, while warm moist air from Rhodesia is fed in from the North. As a result overcast conditions with intermittent rain will occur over Transvaal, northern Free State and Northern Cape.

Koue vogtige lug wat oor Natal en suidoostelike Transvaal aanwesig is, is besig om uit te brei oor Transvaal en noordelike Vrystaat, terwyl warm vogtige lug uit Rhodesië van die Noorde af instroom. Gevolglik sal betrokke toestande met afwisselende reën oor Transvaal noordelike Vrystaat en Noord-Kaapland voorkom.

INFERENCE

Moist air is present over Transvaal, O.F.S., Natal and Northern Cape. With the eastward movement of the trough stretching from Windhoek to Port Elizabeth thundery conditions may develop over above mentioned regions. Drier air west of the trough will cause clearing over the western parts of the country. Cooler cloudy conditions will develop over the western and southern

DATE 23-11-1955

AFLEIDING

Vogtige lug is aanwesig oor Transvaal, Vrystaat, Natal en Noord-Kaapland. Met die ooswaartse beweging van die trog wat van Windhoek na Port Elizabeth strek kan donderweerstoestande oor genoemde streke verwag word. Droë lug wes van die trog sal opklaring gee oor die westelike dele van die land. Bewolkte koeler weer sal ontwikkel oor die westelike en suidelike kusstreke van Kaapland.

DATE 27-11-1975 DATUM

AFLEIDING

Cool cloudy weather with rain or drizzle will occur over southern and southeastern Cape and will later also spread over Natal and the Transvaal lowveld areas. With the trough over the interior thundershowers will develop over the northern half of the Free State and over the southern half of Transvaal and over the Natal interior.

Koel bewolkte weer met reën sal oor suid- en suidoos Kaapland voorkom en later ook uitbrei na Natal en die Transvaalse laevelde. Met die trog oor die binneland sal donderbuie ontwikkel oor die noordelike helfte van die Vrystaat, die suidelike helfte van Transvaal en oor die Natalse binneland.

Cold air has already spread over southern and eastern Cape, over Natal and eastern Transvaal. It will advance further westwards over Transvaal, and over northeastern Free State, accompanied by cloudy conditions with light rain. Warm moist air is spreading from the North over S.W.Africa, and Bechuanaland and thundershowers will develop over these regions.

DATE 25-11-55 Koue lug het reeds oor suidelike en oostelike Kaapland, Natal en oostelike Transvaal beweeg. Dit sal verder weswaarts uitbrei oor Transvaal en noordoostelike Vrystaat gepaard met bewolkte toestande en ligte reën. Warm vogtige lug is besig om vanuit die noorde oor Betsjoeanaland en S.W.Afrika te beweeg en donderbuie sal oor hierdie gebiede voorkom.

INFERENCE

Over the Southwestern Southern and Eastern Cape and Natal it will be partly cloudy and mild. Over the remainder of the Union however it will be cloudy and warm and thunderstorms will develop over the Northern Central and Northeastern Cape, over the Free State and over the southern half of Transvaal.

26-11-1955 Middelike mooiweerstoestande sal oor Suidwes- suid en Oos-Kaapland en oor Natal voorkom. Oor die res van die Unie sal dit bewolk en matig tot warm wees en reën of donderbuie sal oor Noord-middel en Noordoos-Kaapland en oor die Vrystaat en die suidelike van Transvaal ontwikkel.

The air over the Union is very moist and with the low over the interior widespread rain will occur. Drier air is however flowing in the higher layers over South West Africa and it will gradually clear from the west.

Die lug oor die Unie is baie vogtig en met die laag oor die binneland sal reën taamlik algemeen uitval. Droër lug vloei egter in die boonste lae oor Suidwes-Afrika en dit sal geleidelik uit die weste begin opklaar.

The depression over the Cape Province controls the circulation over the Union and moves slowly southeastwards. Drier air is at present moving from the west into Transvaal. It will remain

Cloudy over the southern eastern Union and scattered showers or thundershowers will occur. Cloudy weather and local light showers will also occur over the southern and southwestern Cape coastal regions but over the remainder of the Union it will be fair and

DATE 29-11-1955

Die lae lugdruk sisteem oor die Kaap Provinsie wat die lugstroming oor die Unie beheer beweeg stadig suidooswaarts. Droër lug vanuit die weste stroom nou ook Transvaal binne. Bewolkte toestand sal oor die suidoostelike Unie voorkom en verspreide reën of donderbuie sal ontwikkel. Oor die kuststreke van Suidwes- en Suid-Kaapland sal dit ook nog bewolk wees en plaaslike buie sal uitsak. Oor die res van die Unie sal dit hoofsaaklik mooiweer en matig

The front systems west of the Cape will cause temporary cloudy conditions over southwestern Cape and later also over the southern and southeastern coastal belts. Drier air is however moving over the remainder of the country, and it will be mainly fine and mild

Die front stelsels wes van die Kaap sal tydelik bewolkte weer met reën oor suidwes Kaapland en later oor die suidelike en suidoostelike kuststreke veroorsaak. Droër lug beweeg egter oor die res van die land en dit sal hoofsaaklik mooiweer en warm wees.

INFERENCE

DATE 1-12-1955 DATUM

The low south of Port Elisabeth will move southeastwards and cooler moist air will invade the coastal regions of Natal. It will thus be cloudy over Pondoland, Natal and the southeastern districts of Transvaal, and over the coastal districts of the southwestern Cape, but over the remainder of the Union it will be fine and warm.

Die laag suidwes van Port Elizabeth beweeg geleidelik suidoostwaarts met die gevolg dat vogtiger en koeler lug oor die kuststreke van Natal ingevoer sal word. Dit sal dus bewolk en koel wees oor Pondoland, Natal, die suidwestelike distrikte van Transvaal, en die kusgebiede van Suidwes-Kaapland, maar oor die res van die Unie sal dit mooiweer en warm wees.

The Atlantic High is extending a ridge over the southern and eastern districts of the Union. It will thus be cloudy with local showers over the coastal belt of the south and east Cape and Natal. It will clear gradually over the southern Cape. It will also be cloudy over Transvaal and the northeastern Free State but over the remainder of the Union it will be fine.

Die Atlantiese Hoog strek sy kruin oor die suidelike en oostelike distrikte van die Unie. Oor die kuslande van Suid-en Oos-Kaapland en Natal en enkele ligte buie sal uitmaak. Oor suidelike Kaapland sal dit egter geleidelik opklaar. Oor Transvaal en Noordoos-Vrystaat sal dit ook bewolk wees maar oor die res van die Unie sal mooiweerstoestande voortduur.

INFERENCE

Moist air is now covering most of the Union and further rain or showers will fall tomorrow over the eastern and northern areas. The drier air which is already covering Southwest Africa will however, spread to the western interior of the Union. Fog and low clouds will form over the southwestern Cape coast.

DATE 4 - 12 - 1955

Vogtige lug bedek nou die hele Unie en verdere reën of buie sal môre voorkom oor die oostelike en noordelike gebiede. Die droër lug wat reeds oor Suidwes-Afrika aanwesig is, sal egter uitbrei na die westelike binneland van die Unie. Mis en lae wolke sal oor die suidwestelike Kaapse kus vorm.

Drier air is crossing Bechuanaland from the west, and is expected to reach the Northern Cape and the Western Free State by tomorrow. Cloudy weather with thunderstorms will occur over Transvaal, Natal, and the Northeastern-districts of the Cape Province. A Cold front will cross the southwestern and southern Cape coastal regions and cloudy showery weather will prevail.

DATUM: 5 - 12 - 1963

Droër lug beweeg oor Betsjoeanaland en sal mor Noord-Kaapland en die westelike Vrystaat bereik. Oor Transvaal, Vrystaat, Natal en die noordoostelike distrikte van Kaapland sal dit bewolk wees en donderbuie sal ontwikkel. 'n Koufront sal oornag oor die kusgebiede van suidwes- en suid-Kaapland beweeg en oor hierdie gebiede sal dit bewolk en buierig wees.

INFERENCE

Drier air has spread over Southwest-Africa and the western half of the Cape province but in view of steeply rising pressures along the Southern and eastern coastal regions, the dry air is not expected to advance further eastwards and cloudy conditions with rain or showers will persist over the Eastern Union. Colder air will spread over Natal and southeastern Transvaal.

DATE: 6 - 12 1955 DATUM

AFLEIDING

Droër lug het oor Suidwes-Afrika en Wes-Kaapland beweeg maar aangesien lugdruk nou vinnig begin styg langs die suidelike en oostelike kuststreke word dit nie verwag om verder ooswaarts te beweeg nie en bewolkte toestande met reën of donderbuie sal voortduur oor die oostelike Unie. Kouer toestande sal oor Natal en suidoostelike Transvaal uitbrei.

Moist air is present over Transvaal, Free State and natal with stable upper air, only partly conditions are expected. The high which is moving in south of the Union will cause cloudy conditions along the coastal regions and local drizzle may occur.

Uit 8-12-55 Vogtige lug is aanwesig oor Transvaal, O.V.S. en Natal maar die bolug is stabiel en slegs gedeeltelik bewolkte weer sal voorkom. Die hoogdruk wat suid van die Unie inbeweeg sal bewolkte toestande langs die kusstreke veroorsaak en plaaslike motreën mag voorkom.

Somewhat cooler cloudy weather will spread over Natal and the eastern Transvaal lowveld. Isolated thundershowers are possible over the remainder of Transvaal, the northeastern Free State and over the Natal interior.

10-12-1955

Effens koeler bewolkte weer sal oor Natal en die oostelike Transvaalse laeveld beweeg. Los donderbuie is moontlik oor die res van Transvaal, die noordoostelike Vrystaat en oor die Natalse binneland.

As the result of higher pressures over the Southeastern and eastern Union warm moist air will be induced to flow from the northeast to the western and southwestern Union. Cloudy weather will thus occur generally and local rain or thundershowers will occur over the interior districts.

As gevolg van die hoë druk oor die suidoostelike en oostelike Unie sal warm vogtige lug weer suidwestwaarts na die westelike en suidwestelike Unie stroom. Bewolkte toestande sal algemeen voorkom en reën of donderbuie sal plaaslik uitsak.

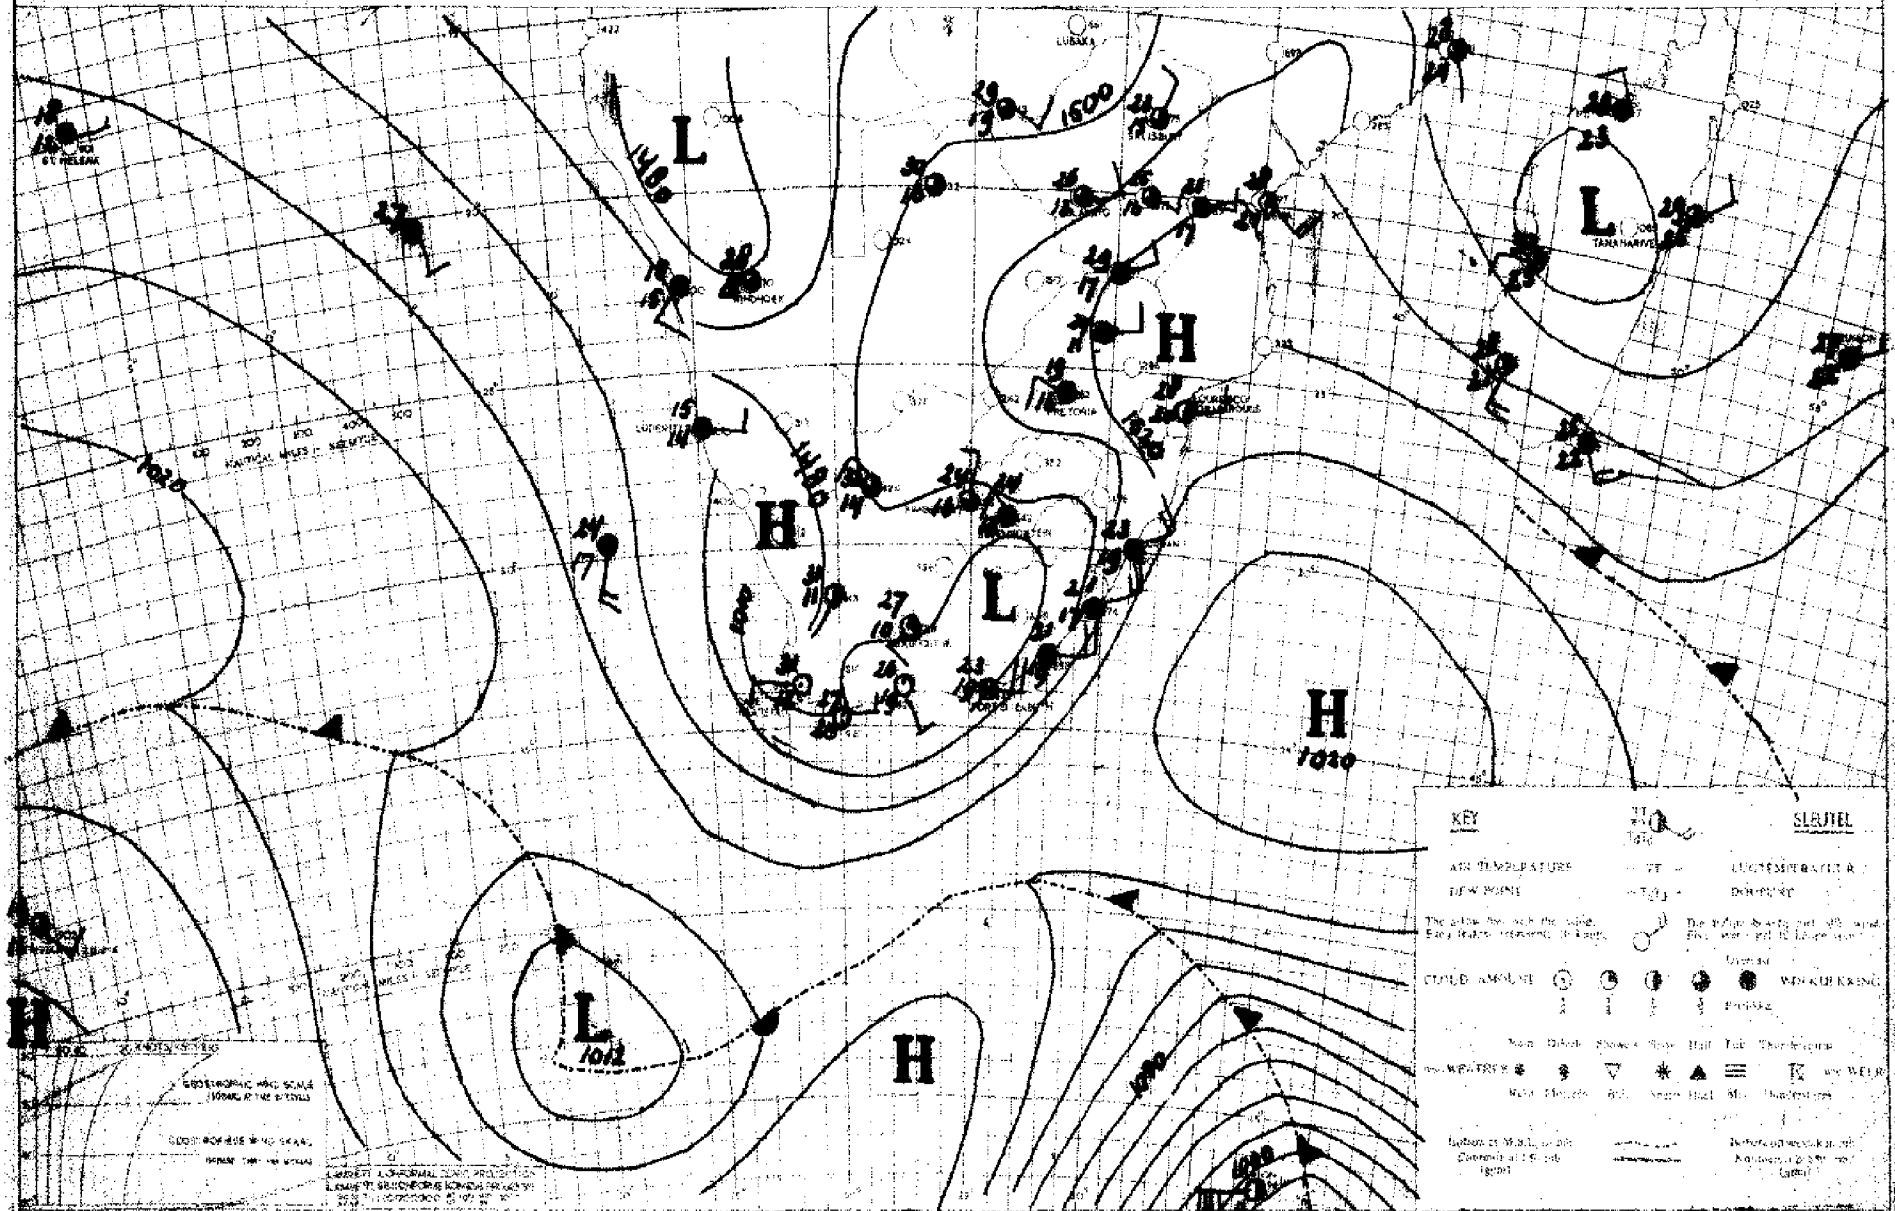
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



There will be little change in the circulation over the Union. The air will remain humid and cloudy to partly cloudy conditions with local afternoon thunderstorms will occur generally.

Min verandering sal in die sirkulasie oor die Unie voorkom. Die lug sal vogtig bly en as gevolg hiervan sal gedeeltelik bewolkte to bewolkte toestande met plaaslike namiddag donderstorms algemeen voorkom.

INFERENCE

The front west of the Cape should reach the western and south-western coast during the night and cooler cloudy weather with light rain will occur. These conditions will also spread over the remainder of the Cape coasts and over Natal. With the trough in the upper air thundershowers and rain will develop over the eastern half of the interior of the Union, but it will clear from the west.

DATE 12 19 — 53 DATUM

AFLEIDING

Die front wes van die Unie behoort gedurende die nag die Suidweskus te bereik en koeler bewolkte weer met ligte reën sal voorkom en later ook oor die res van die Kaapse kuststreke en Natal beweeg. Met die trog in die bolug sal reën en donderbuie oor die oostelike helfte van die Unie se binneland ontwikkel maar dit sal uit die weste opklaar.

A cyclonic circulation controls the various airmasses over the Union interior. Drier air is present over the western half of Union whilst colder air is moving in over the southeastern and eastern Union. Over Transvaal, Natal and the Northeastern Free State it will remain humid and cloudy to overcast and rainy weather will occur. It will be fair over the remainder of the Union.

DATE 20-12-1955 DATUM

'n Siklonieë sirkulasie oor die Unie binneland beheer die verskillende lugstrome. Droë lug beweeg oor die westelike helfte van die Unie terwyl koue lug die suidoostelike en oostelike Unie beïnvloed. Oor Transvaal, Natal en Noordoos-Vrystaat sal die lug warm en vogtig bly en betrokke toestande met reën sal voorkom. Oor die res van die Unie redelik mooiweer.

With the pressure rise over the east coast and the low over the interior, the in flow of moist air will persist over the eastern Union. Cloudy to overcast weather with rain or drizzle will occur over Northern Natal, Transvaal and the north-eastern Free State.

Met die drukstyging langs die oostkus en die laag oor die binneland sal die invloei van vogtige lug voortduur oor die oostelike Unie. Bewolkte tot betrokke weer met reën of motreën sal oor Transvaal en die noordoostelike Vrystaat en oor Noord-Natal voorkom.

INFERENCE

The flow of humid air from the north will continue over Transvaal, the northeastern Free State and northern Natal. Cloudy skies and occasional light rain, will occur. Partly cloudy conditions will occur over the southeastern and southern Cape coastal region but over the remainder it will be fine.

AFLEIDING

Die vloei van vogtige lug uit die noorde sal oor Transvaal, Natal en noordoos-Vrystaat voortduur en bewolkte toestande met plaaslike reën sal voorkom. Gedeeltelik bewolkte toestande sal oor die suidwestelike en suidelike kusdistrikte van Kaapland sal dit gedeeltelik bewolk weesmaar oor die res van die Unie sal dit mooiweer bly.

INFERENCE DATE 23 - 12 - 55 DATUM

Cooler cloudy weather with light local rain will move over Natal and the eastern Transvaal lowveld. Drier air is moving over the western interior but the air over Transvaal is still moist and thunderstorms will occur.

AFLEIDING

Koeler bewolkte weer met ligte plaaslike reën sal oor Natal en die Oos-Transvaalse laeveld beweeg. Droër lug beweeg oor die westelike binneland, maar oor Transvaal is die lug nog vogtig en donderbuie sal voorkom.

DATE 24-12-1955 DATUM

AFLEIDING

Thundery conditions prevail over Transvaal and northern Natal and northern Natal and with the expected rise in pressure along the eastern coast, further showers will occur over these provinces. Isolated showers will also fall over northern Southwest Africa but over the remainder of the country it will be fair.

Donderweerstoestande kom reeds voor oor Transvaal en noordelike Natal en met die verwagte drukstyging langs die oostelike kus, sal bewolkte weer met plaaslike donderbuie mêre weer oor hierdie streke uitsak. Los buie sal ook weer oor noordelike Suidwes-Afrika uitsak, maar oor die res van die land sal dit redelike mooiweer bly.

DATE 25-12-1955 DATUM

Moist air is still present over the eastern part of the Union and thundery conditions will develop in the afternoon, also over Northern Southwest Africa. The cold front over the Atlantic ocean will bring cooler, cloudy conditions to the southwestern Cape coast but over the remainder of the Union and Southwest Africa it will remain fair and warm.

Vogtige lug is nog aanwesig oor die oostelike dele van die Unie en donderweerstoestande sal in die namiddag ontwikkel, ook oor noordelike Suidwes-Afrika. Die koufront oor die Atlantiese oseaan sal koeler bewolkte toestande veroorsaak oor die suidwestelike kus van Kaapland, maar oor die res van die Unie en Suidwes-Afrika dit redelik mooiweer en warm

INFERENCE

DATE 28 — 12 — 1955 DATUM

AFLEIDING

With the eastward passage of the cold front at the Cape, the pressure will rise over the southern and eastern Union and the flow of moist air over Natal, Transvaal and the northeastern half of the Free State will be maintained. It will thus remain cloudy over these regions and the occurrence of rain or thundershowers will continue.

Met die ooswaartse beweging van die koue front oor Kaapstad, sal die lugdruk oor die suidelike en oostelike Unie styg en die vloei van vogtige lug sal oor Natal, Transvaal en die noordoostelike helfte van die Vrystaat aankom.. Oor hierdie streke sal dit dus bewolk wees en verdere reën of donderbuie sal uitsak.

INFERENCE

DATE 29-12-55 DATUM

AFLEIDING

Moist air is present over Transvaal, Natal and northern Free State and with rising pressure along the East coast, rain and showers will occur generally over these regions. The moist air will also gradually start spreading southwards over the Freestate and northern Cape. Over the remainder of the Union and over Southwest Africa, it will remain fine for tomorrow.

Vogtige lug is aanwesig oor Transvaal, Natal en noordelike Vrystaat en met die stygende lugdrukke langs die oostkus sal reën en buie algemeen voorkom môre oor hierdie dele. Die vogtige lug sal ook geleidelik suidwaarts begin uitbrei oor die Vrystaat en Noord-Kaapland. Oor die res van die Unie en Suid-wes-Afrika sal dit voorlopig nog mooiweer bly.
