INFERENCE

The tropical cyclone over the Mosambique channel is not moving much with the result that the upper-air high will remain stationary and therefore only isolated thundershowers will occur over the eastern parts of the country due to the surface low over the central interior.

DATE 1 - 1 - 1966 DATUM

AFLEIDING

Die tropiese sikloon oor die Mosambiek kanaal toon min beweging sodat die bolughoog nie sal beweeg nie en slegs enkele donderbuie oor die oostelike dele verwag kan word met die laag aan die oppervlakte oor die sentrale binneland.

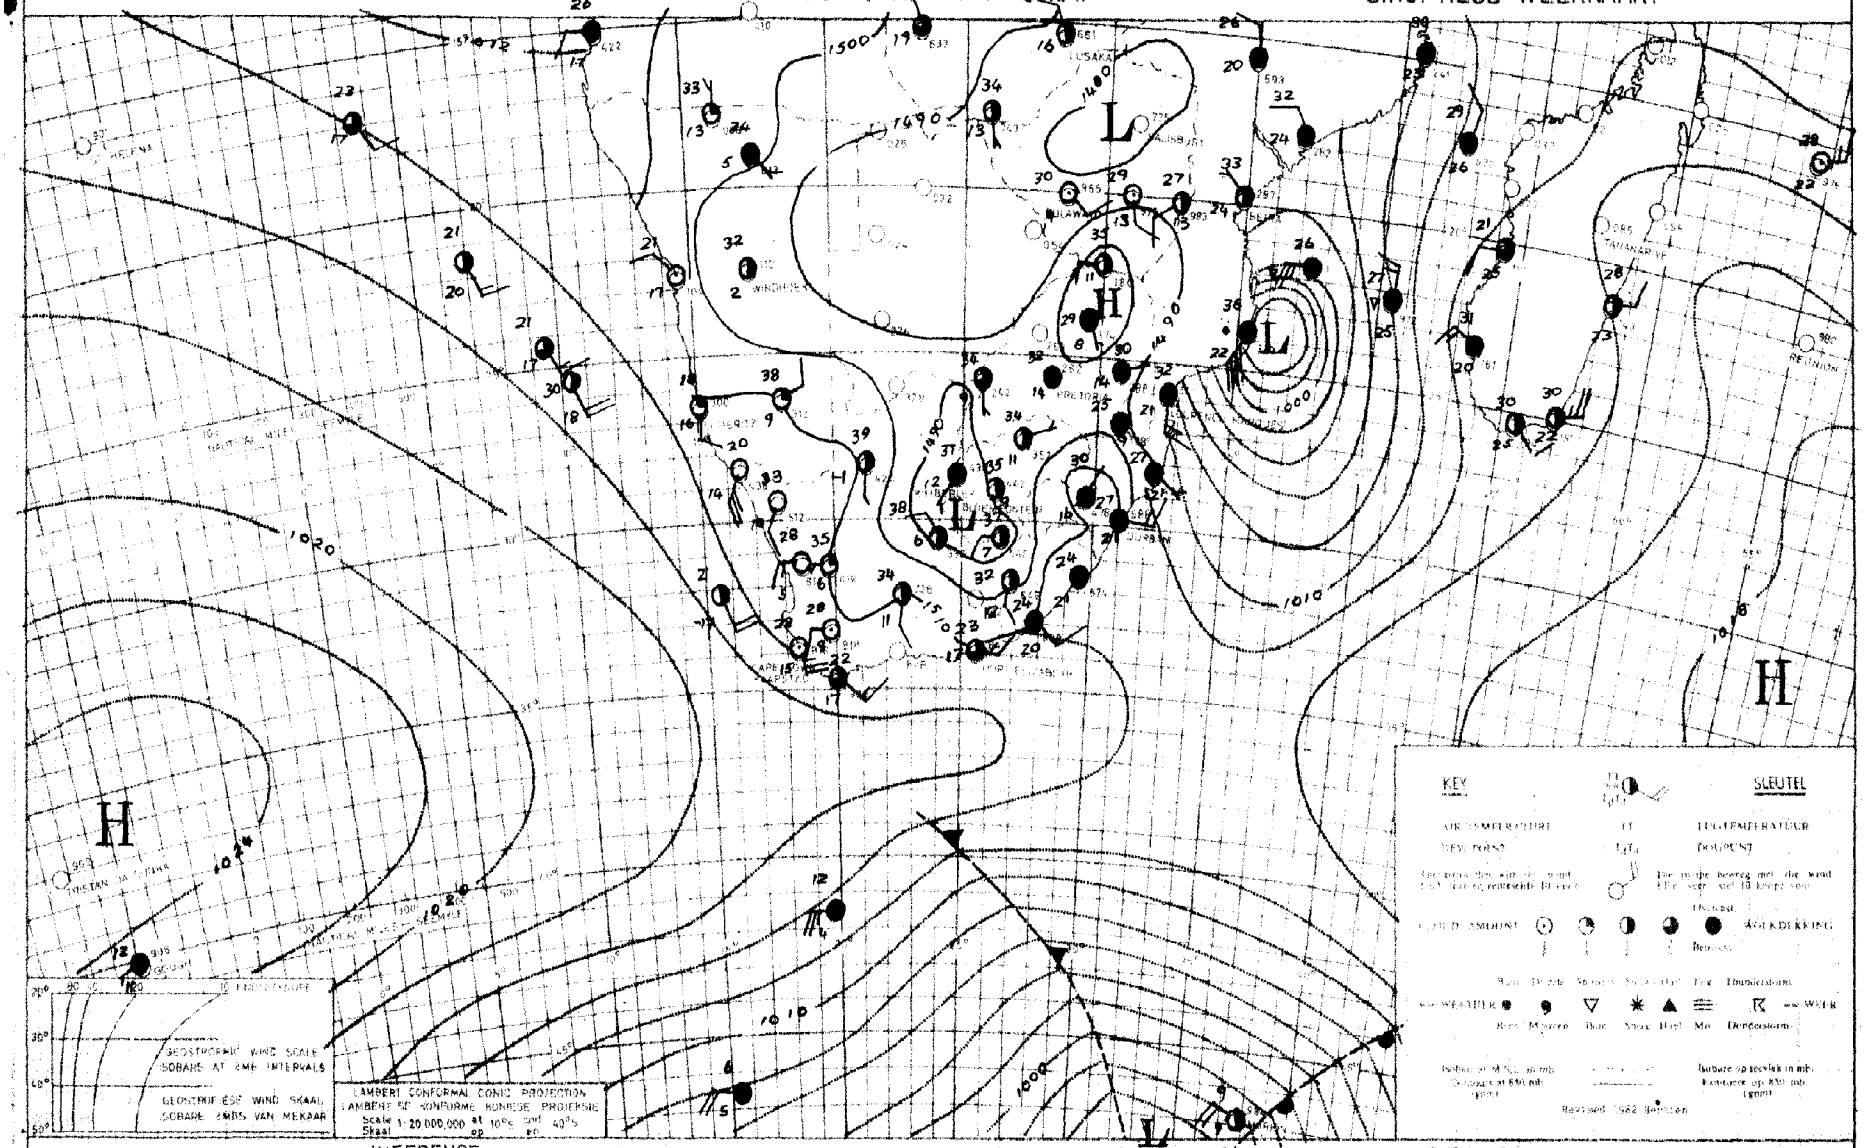
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

The tropical cyclone Claude is moving southwards and is not expected to influence the weather over the Republic to any large extent. However, with moist south-easterly winds along the south-eastern coastline it will be cloudy along this region with light rain in the morning and evening. The air over the interior is sufficiently moist to cause partly cloudy weather and a few thundershowers will occur.

DATE 3-1-1966 DATUM

AFLEIDING

Die tropiese sikloon Claude beweeg suidwaarts en dit word nie verwag dat dit die weerstoestande oor die Republiek tot 'n groot mate sal beïnvloed nie. Met die vogtige suidoostelike winde langs die suidoostelike kus egter word bewolkte toestande met ligte reën in die oggend en aand oor hierdie streke verwag. Die lug oor die binneland het genoeg vog om gedeeltelik bewolkte weer en 'n paar donderstorms te laat voorkom.

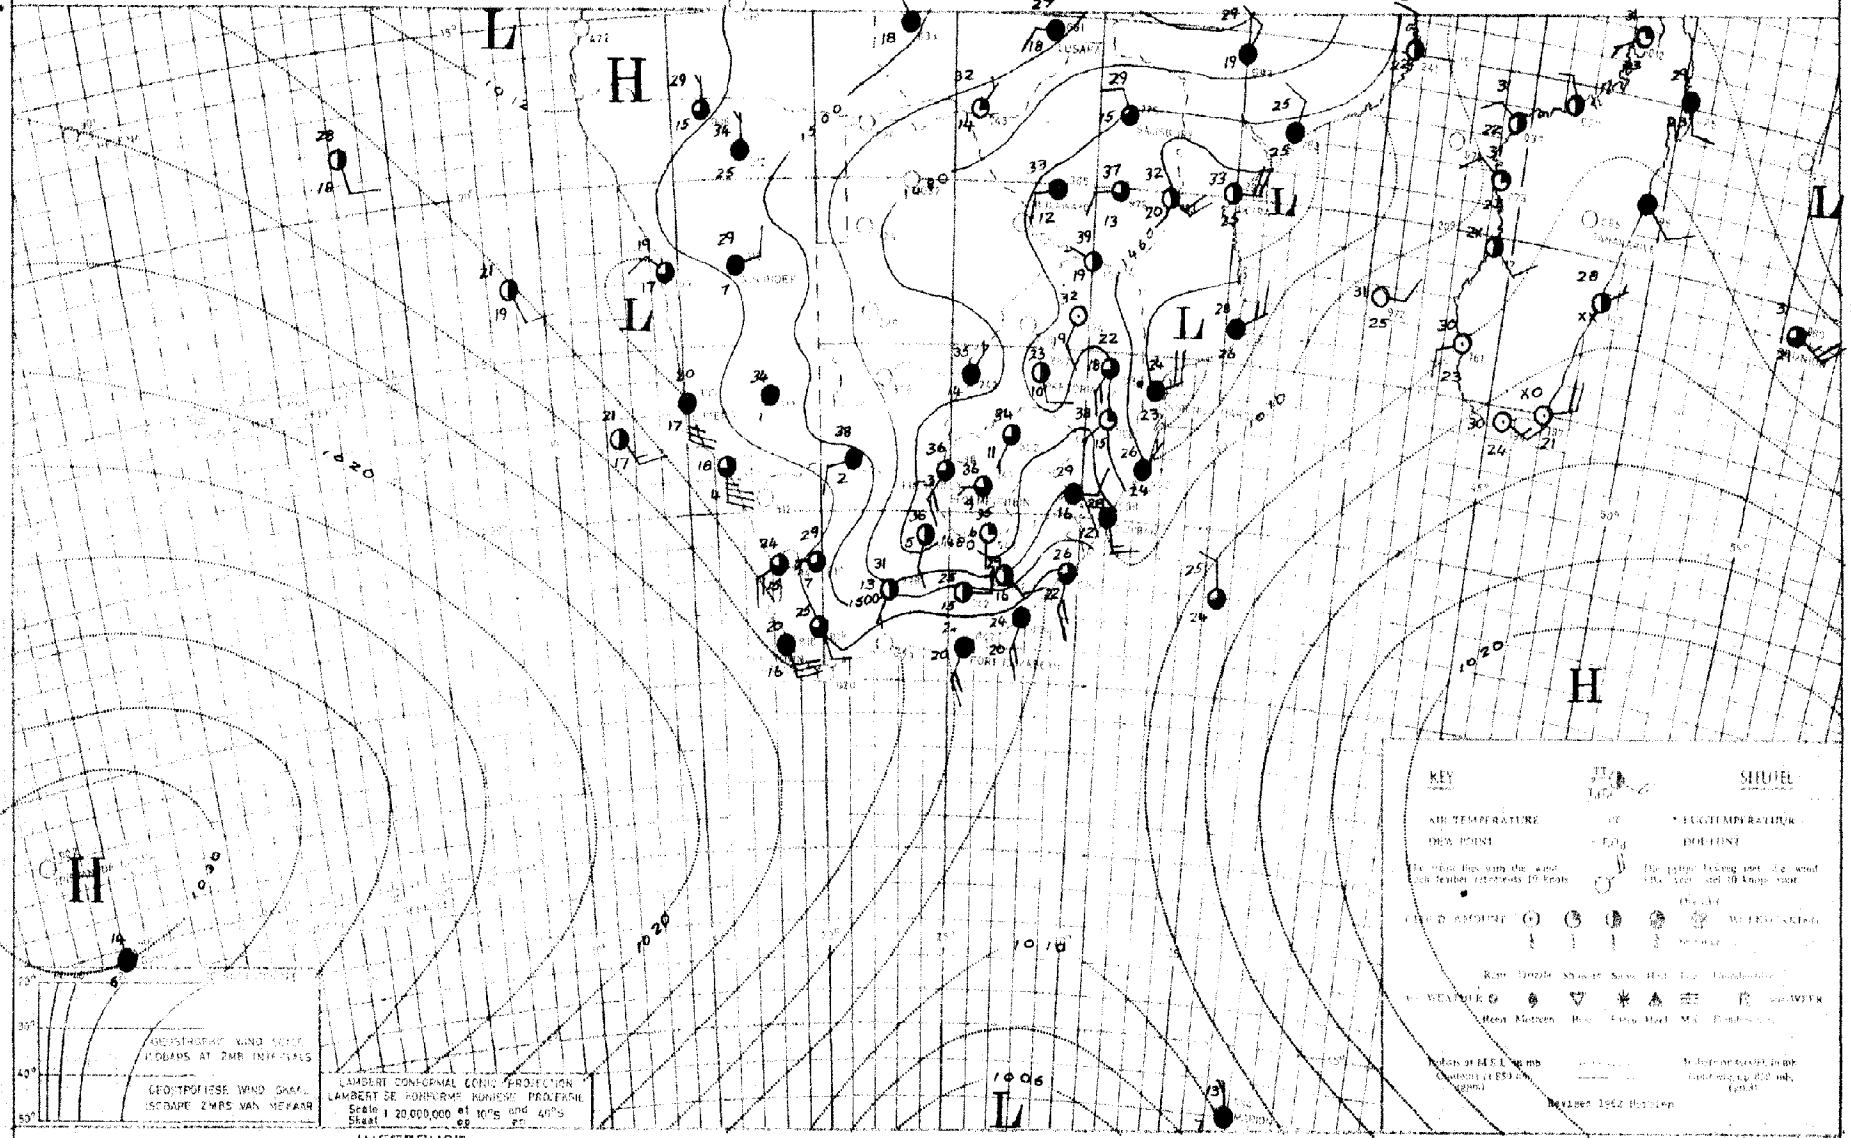
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

Pressures are rising along the east coast as the Atlantic high ridges in. Consequently cloudy, cooler weather will spread to the Natal interior and the Eastern Transvaal and rain will occur at places. The tropical cyclone Claudé over the South-Eastern Transvaal has weakened considerably.

DATE 6 - 1 - 1966 DATUM

AFLEIDING

Drukke styg langs die ooskus terwyl die Atlantiese Hoog inrug. Gevolglik sal bewolkte, koeler weer na die Natalse binneland en Oos-Transvaal uitbrei waar reën plek-plek sal voorkom. Die tropiese sikloon Claudé, oor Suidoos-Transvaal het aansienlik verswak.

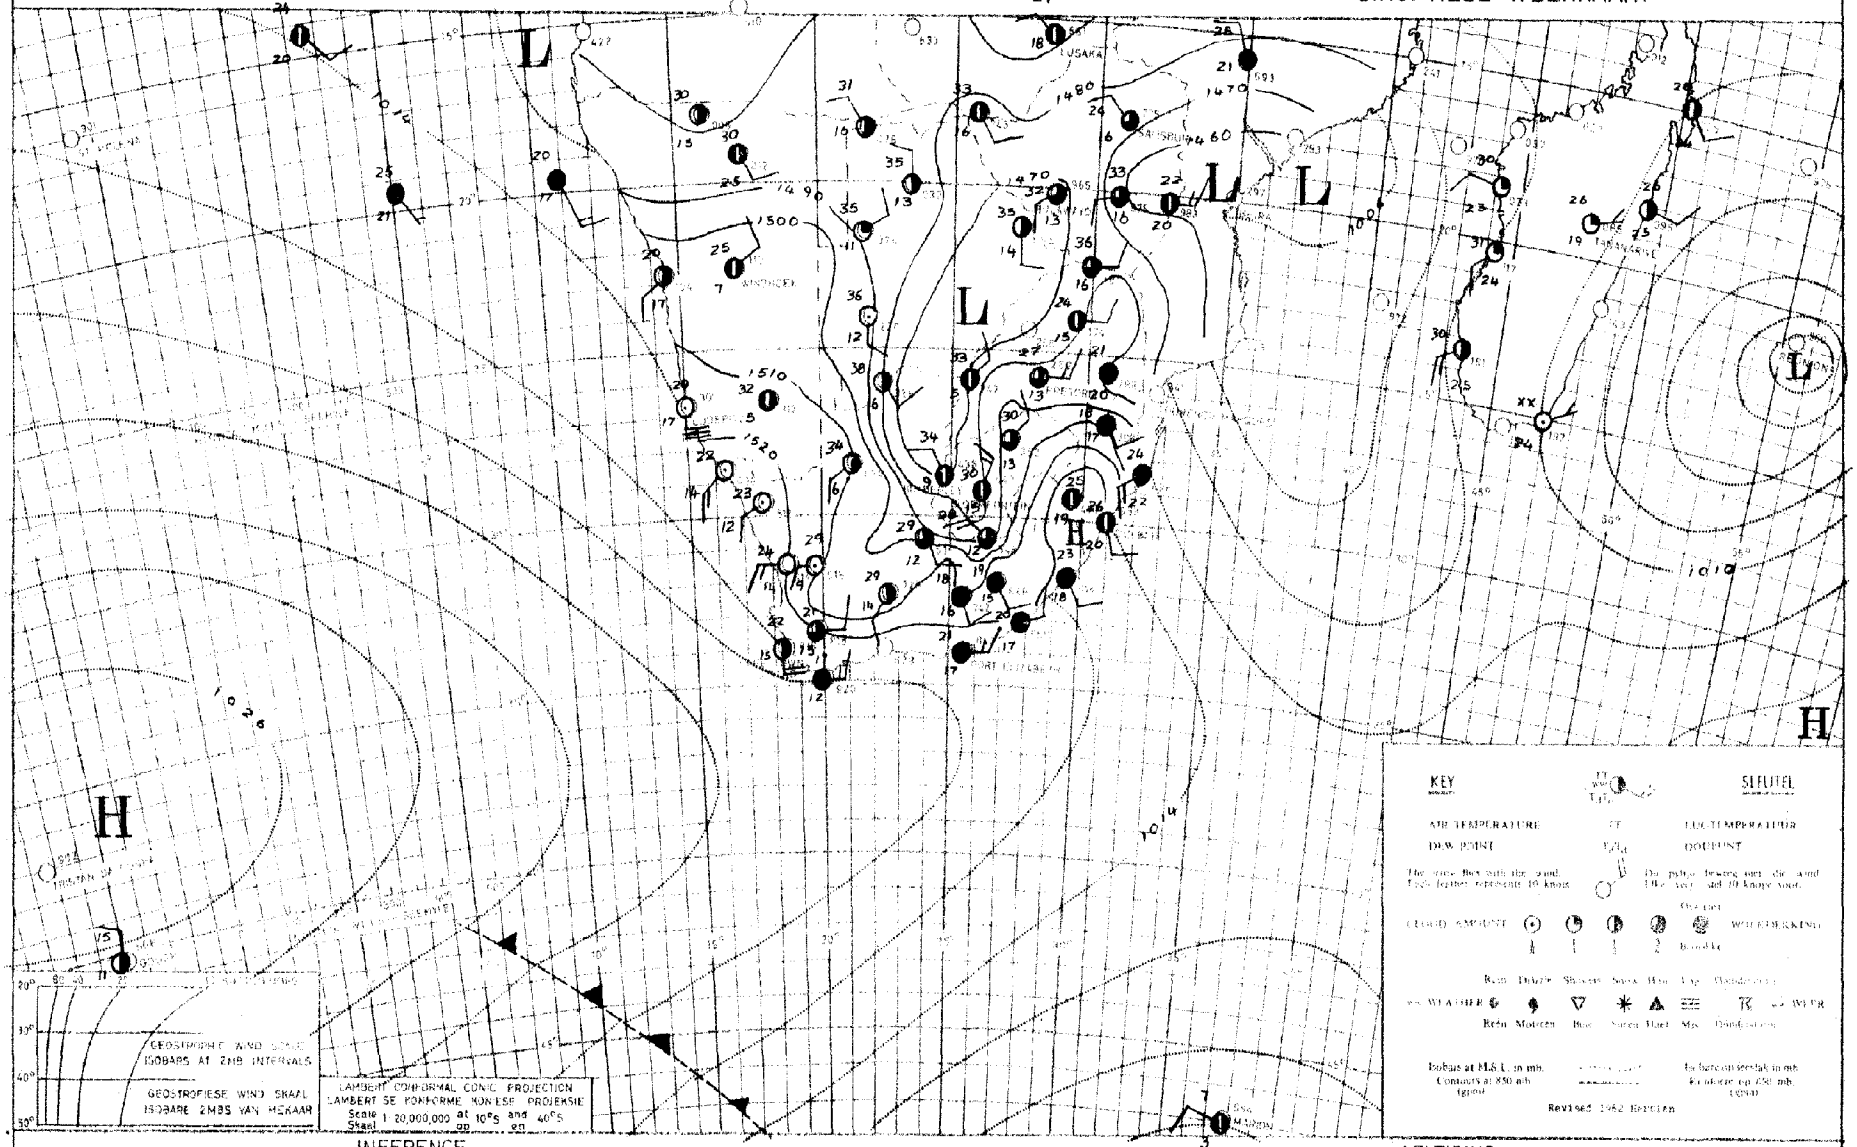
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

The Atlantic High ridging in south of the continent is causing moist air to flow in over the eastern half of the country where rain will occur. With a low over the interior the thundershowers will fall over the central regions.

DATE 7 — 1 — 1966 DATUM

AFLEIDING

Die Atlantiese Hoog rug suid van die land in en veroorsaak 'n invloei van vogtige lug oor die oostelike helfte van die land waar reën sal voorkom. Met 'n laag oor die binneland sal donderbuie daar uitsak.

DAAGLIKSE WEERBULLETIN

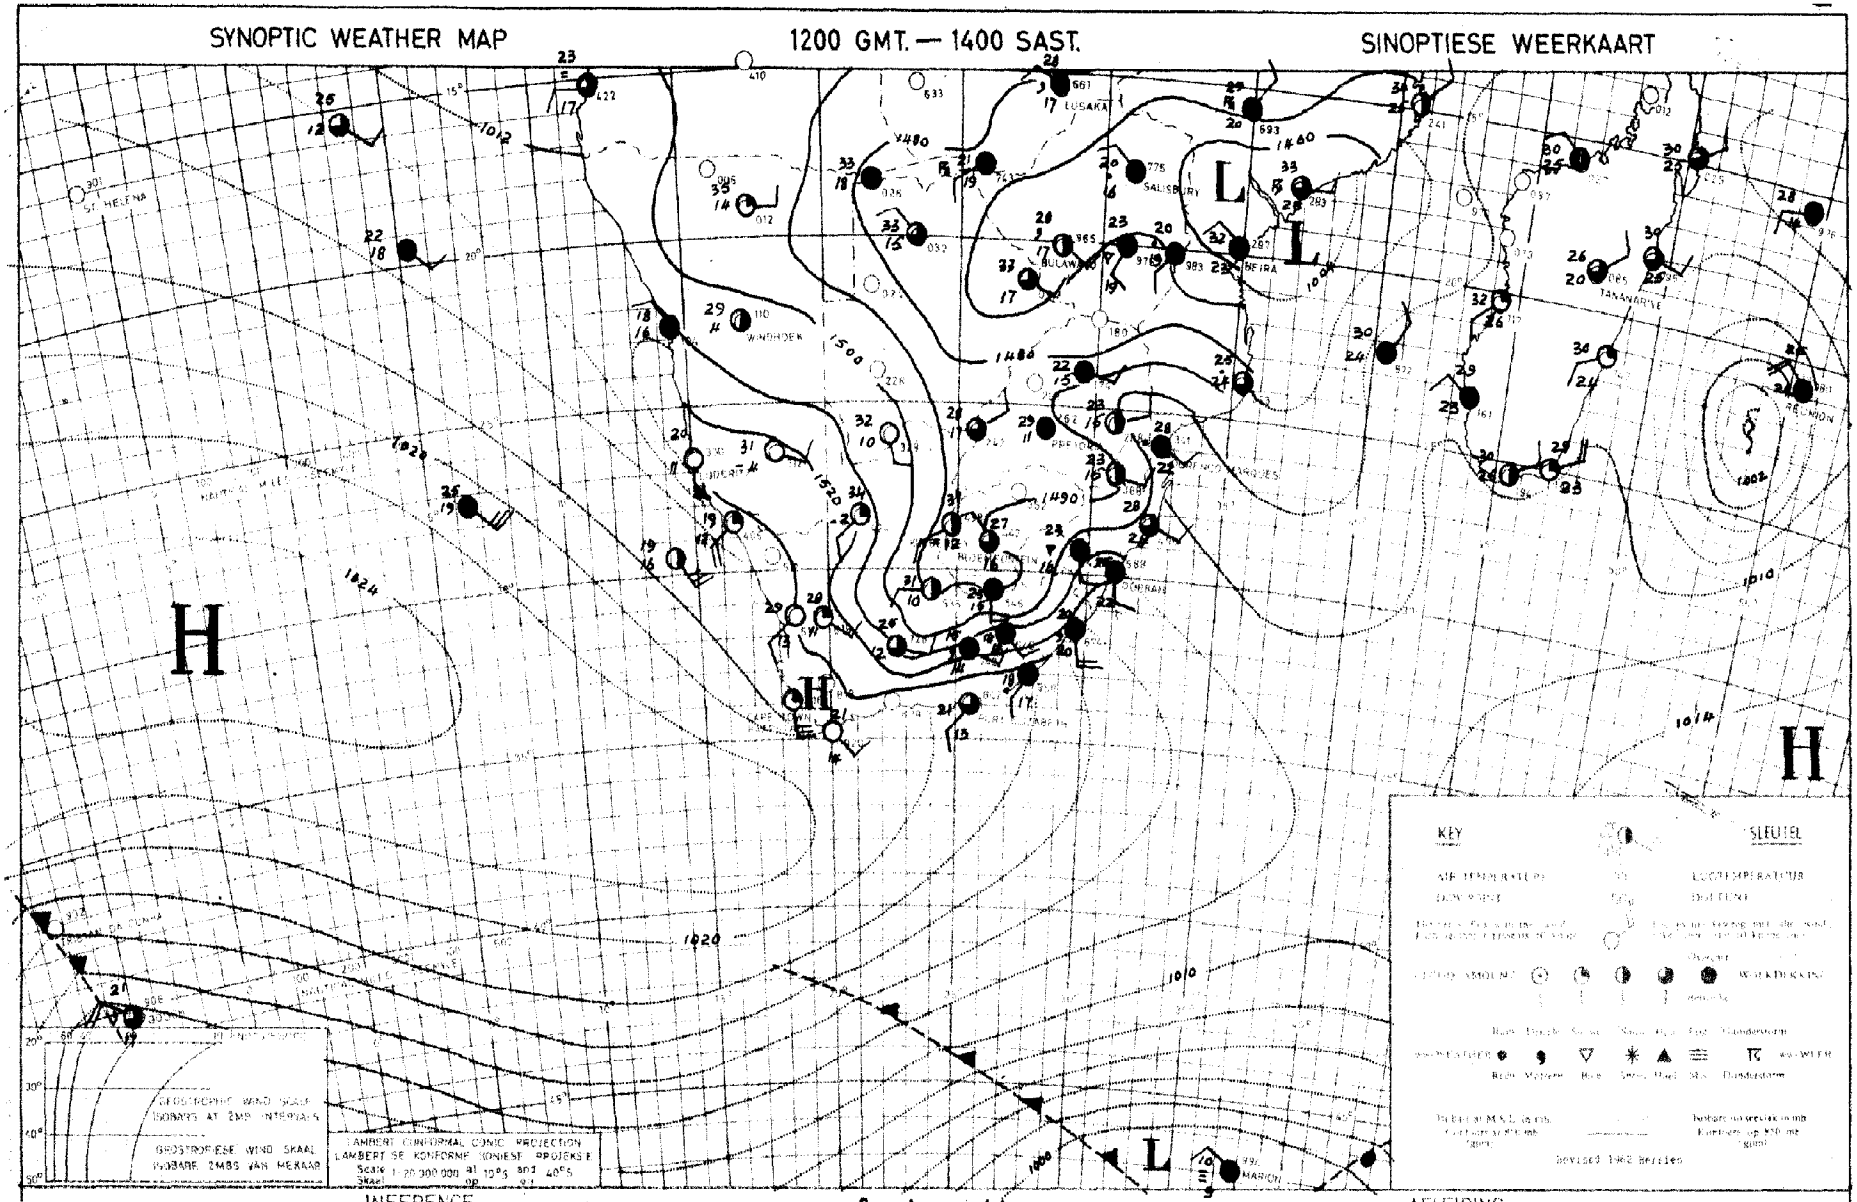
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

The moist southerly winds are causing the cloudy weather with rain to persist over the Eastern Cape and Natal. Thundershowers remain likely over the Free State and Transvaal.

DATE 8 - 1 - 1966 DATUM

AFLEIDING

As gevolg van die vogtige suidewinde duur die bewolkte weer met reën oor Oos-Kaapland en Natal voort. Donderbuie is nog waarskynlik oor die Vrystaat en Transvaal.

DAAGLIKSE WEERBULLETIN

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

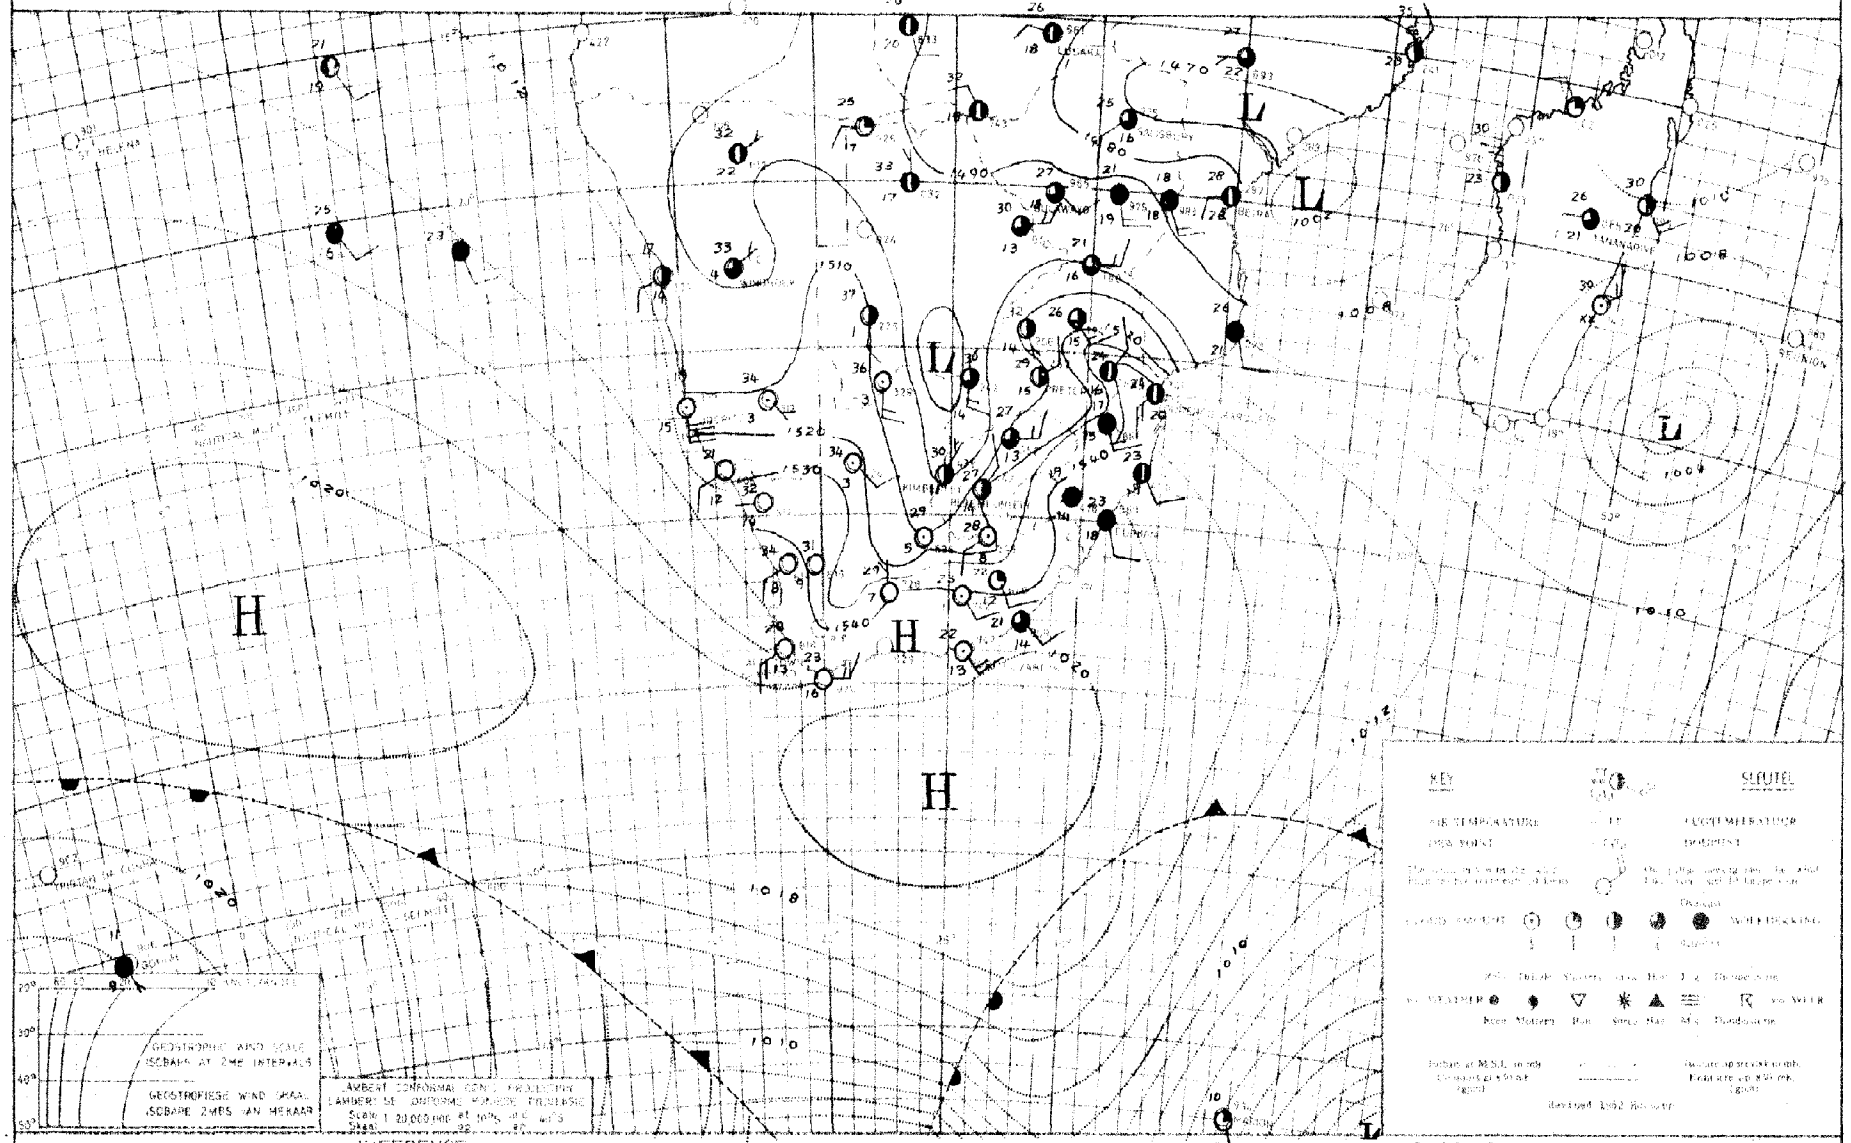
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

A high cell has formed off the south-east coast and it will clear over the Eastern Cape. With moist air coming in from the north-east and the presence of a low over the interior showers and thundershowers can be expected over the Transvaal and O.F.S.

DATE 9 - 1 - 1966 DATUM

AFLEIDING

'n Hoogdrukstelsel het langs die suidooskus ontwikkel en dit sal oor Oos-Kaapland opklaar. Met 'n instroming van vogtige lug vanuit die noordooste en 'n laag oor die binneland kan buie en donderbuie oor Transvaal en die OVS verwag word.

INFERENCE

DATE 10-1-1986 DATUM

AFLEIDING

The series of coastal lows moving around the coastal areas of the country will cause cloudy weather over the southern and eastern coastal regions. The air is moist over the eastern interior, where isolated thundershowers will develop.

Die reeks kuslae wat om die land se kusgebied beweeg sal bewolkte weer oor die land se suidelike en oostelike kusgebiede veroorsaak. Die lug oor die oostelike binneland is vogtig en los donderbuie sal ontwikkel.

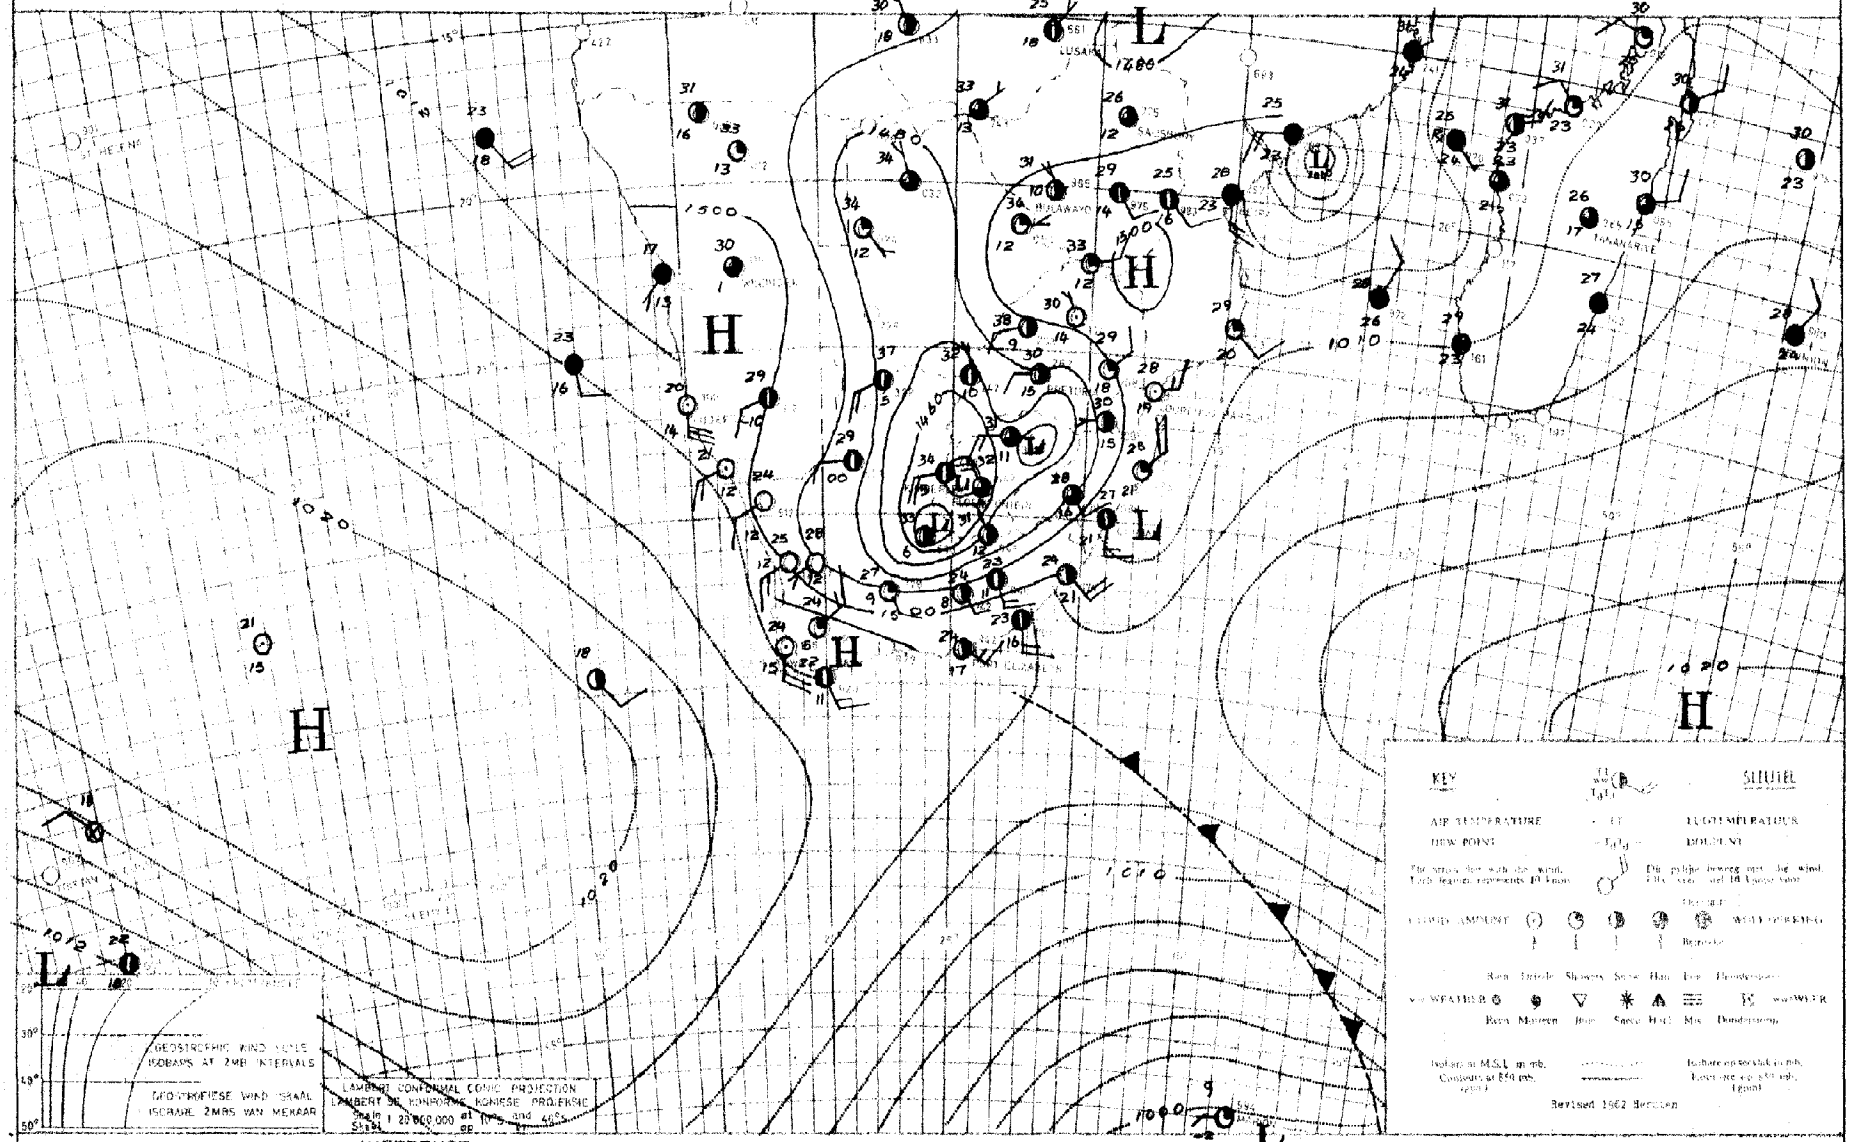
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST SINOPTIESE WEERKAART



INFERENCE DATE 11 - 1 - 1966 DATUM AFLEIDING

Moist air is still in circulation over the northern and eastern parts of the country and with the presence of the low over the central interior thundershowers will occur over these regions. Over the remainder of the country it will be fine to partly cloudy.

Vogtige lug is nog aanwesig oor die oostelike en noordelike dele van die land en met die laag wat oor die sentrale binneland geleë is sal donderbuie oor die dele uitsak. Oor die res van die land sal dit mooiweer tot gedeeltelik bewolk wees.

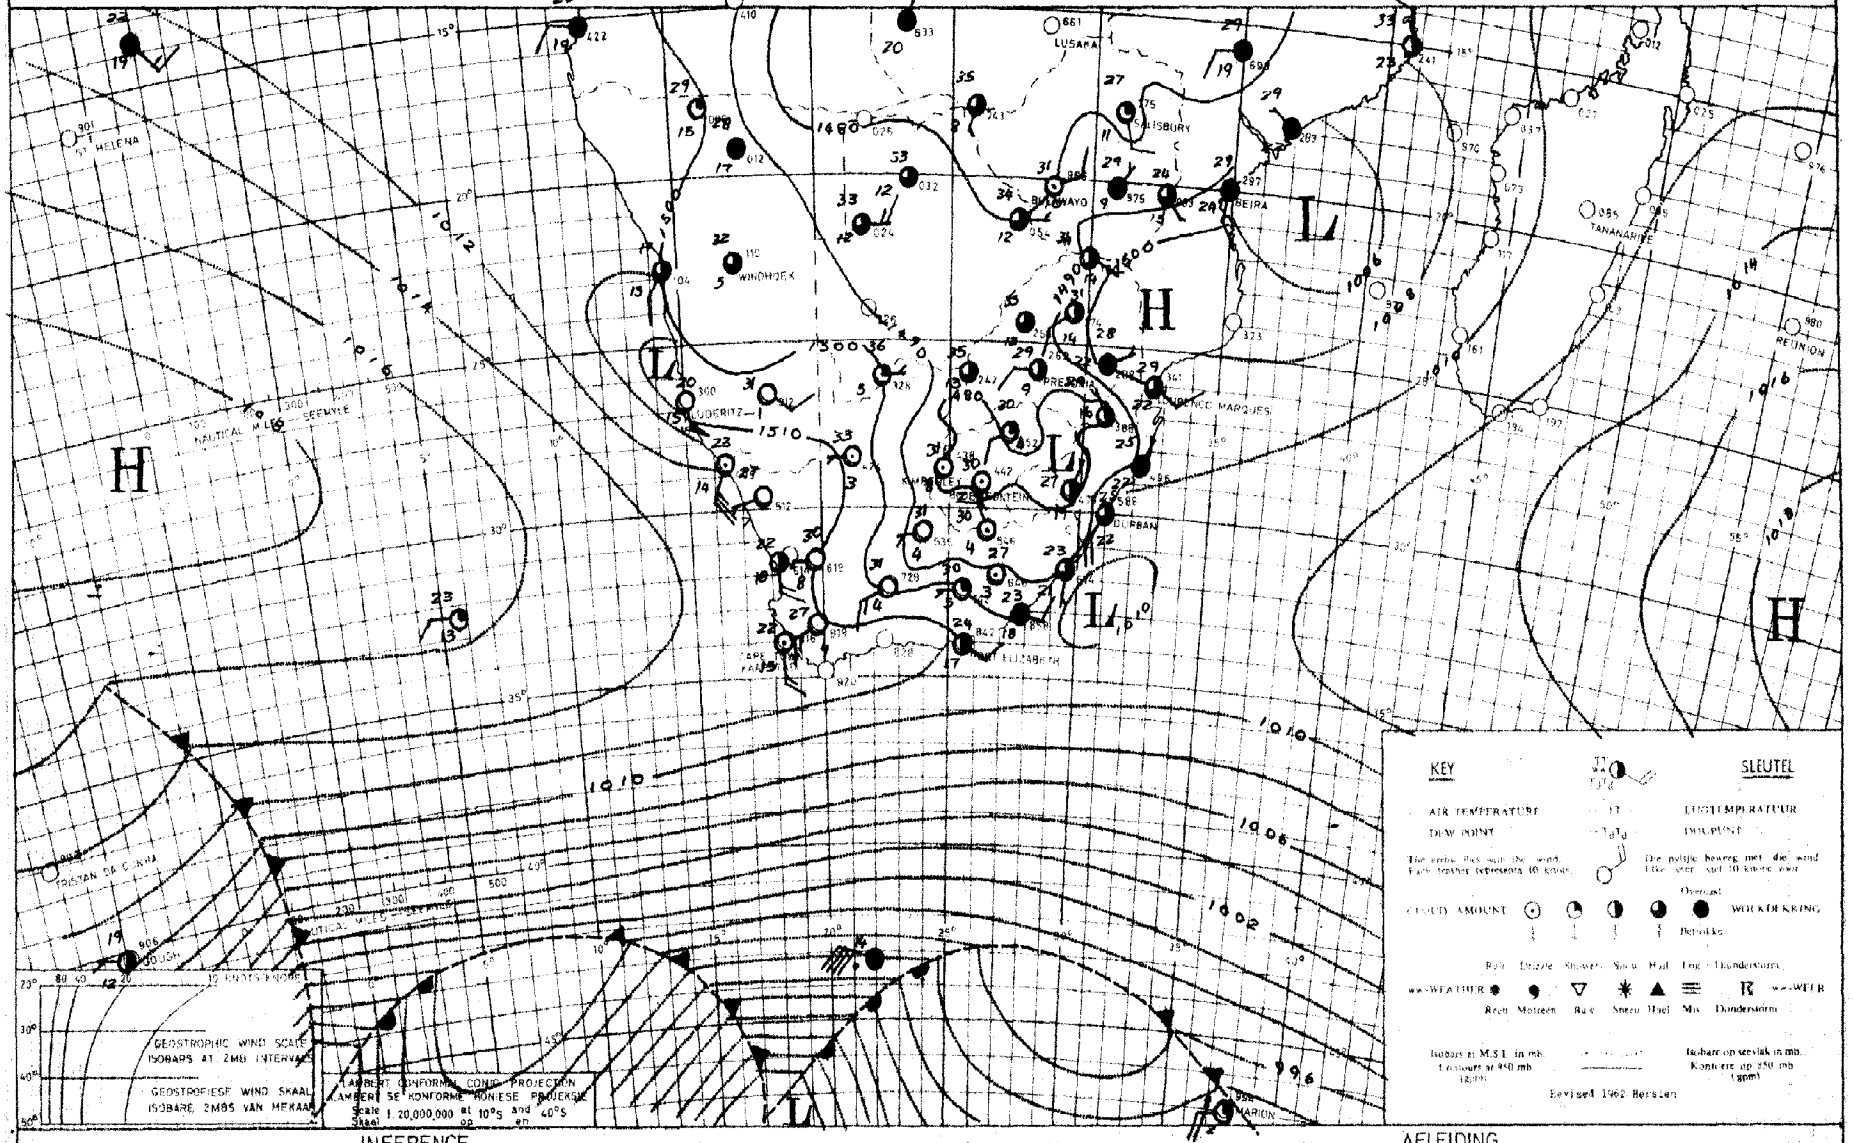
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 12 - 1 - 1966 DATUM AFLEIDING

There is no marked onshore component of moist air along the coastal regions, where it will be fair. Moist air flowing in from the north will cause partly cloudy weather over the eastern areas where isolated thundershowers will occur.

Daar is geen sterk vogtige aanslag langs die kusstreke nie waar dit redelik mooiweer sal wees. Vogtige lug wat vanuit die noorde ingevoer word sal gedeeltelik bewolkte weer oor die oostelike dele veroorsaak waar los donderbuie sal voorkom.

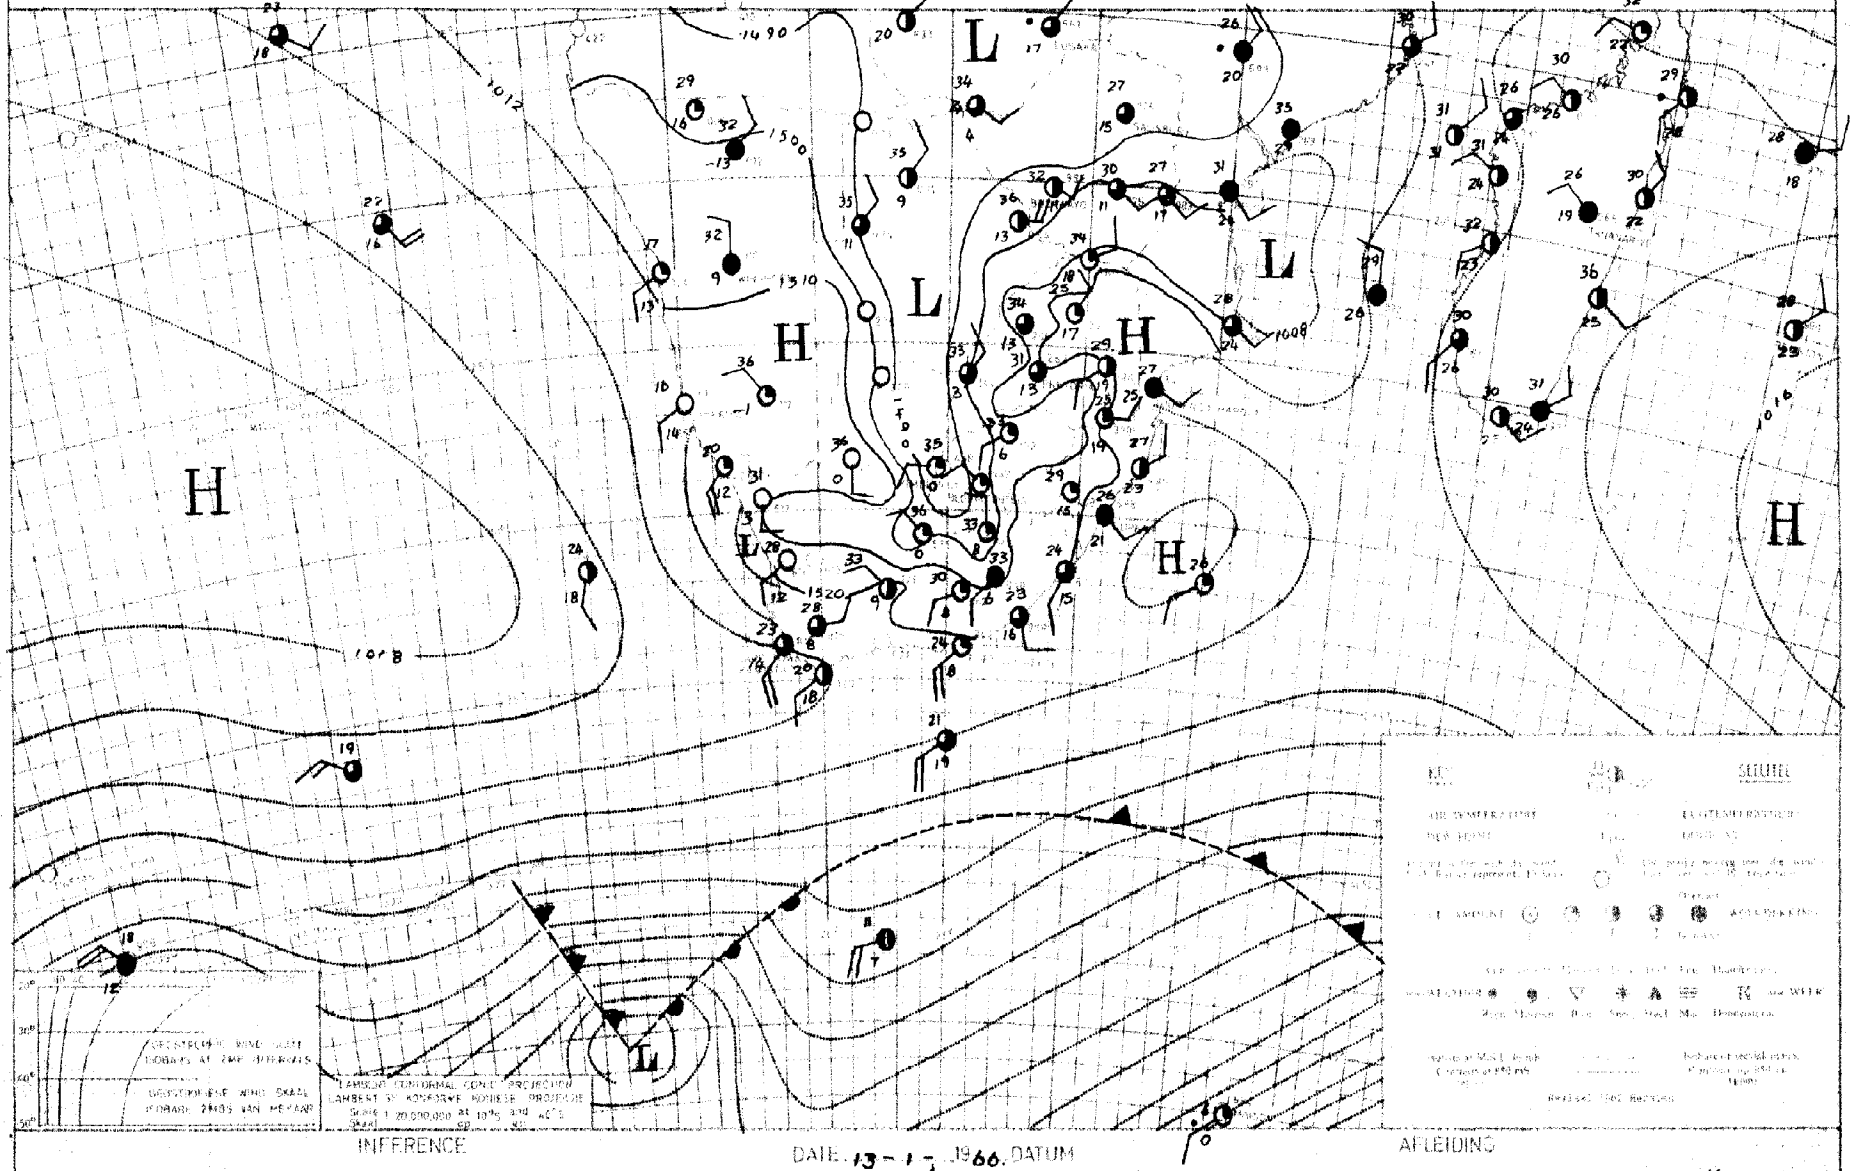
SYNOPTIC WEATHER MAP 1200 GMT = 1400 SAST SINOPTIESE WEERKAART



INFERENCE DATE: 13 - 1 - 1966. DATUM AFLEIDING

The coastal low situated on the Cape west coast will move around the Cape south-west coast and will cause the usual fog and low clouds. Moist air is moving southwards over South-West Africa and thus thunderstorms will occur over most of the interior. The existence of the low south-west of the Cape is doubtful.

Die kuslaag aan die wes-kus gelee sal om die Kaapse suidweskus beweeg en die gebruiklike mis en lae wolke veroorsaak. Vogtige lug beweeg suidwaarts oor Suidwes-Afrika en dus sal donderbuie oor meeste dele van die binneland ontwikkel. Die bestaan van die laag suidwes van die Kaap is twyfelagtig.

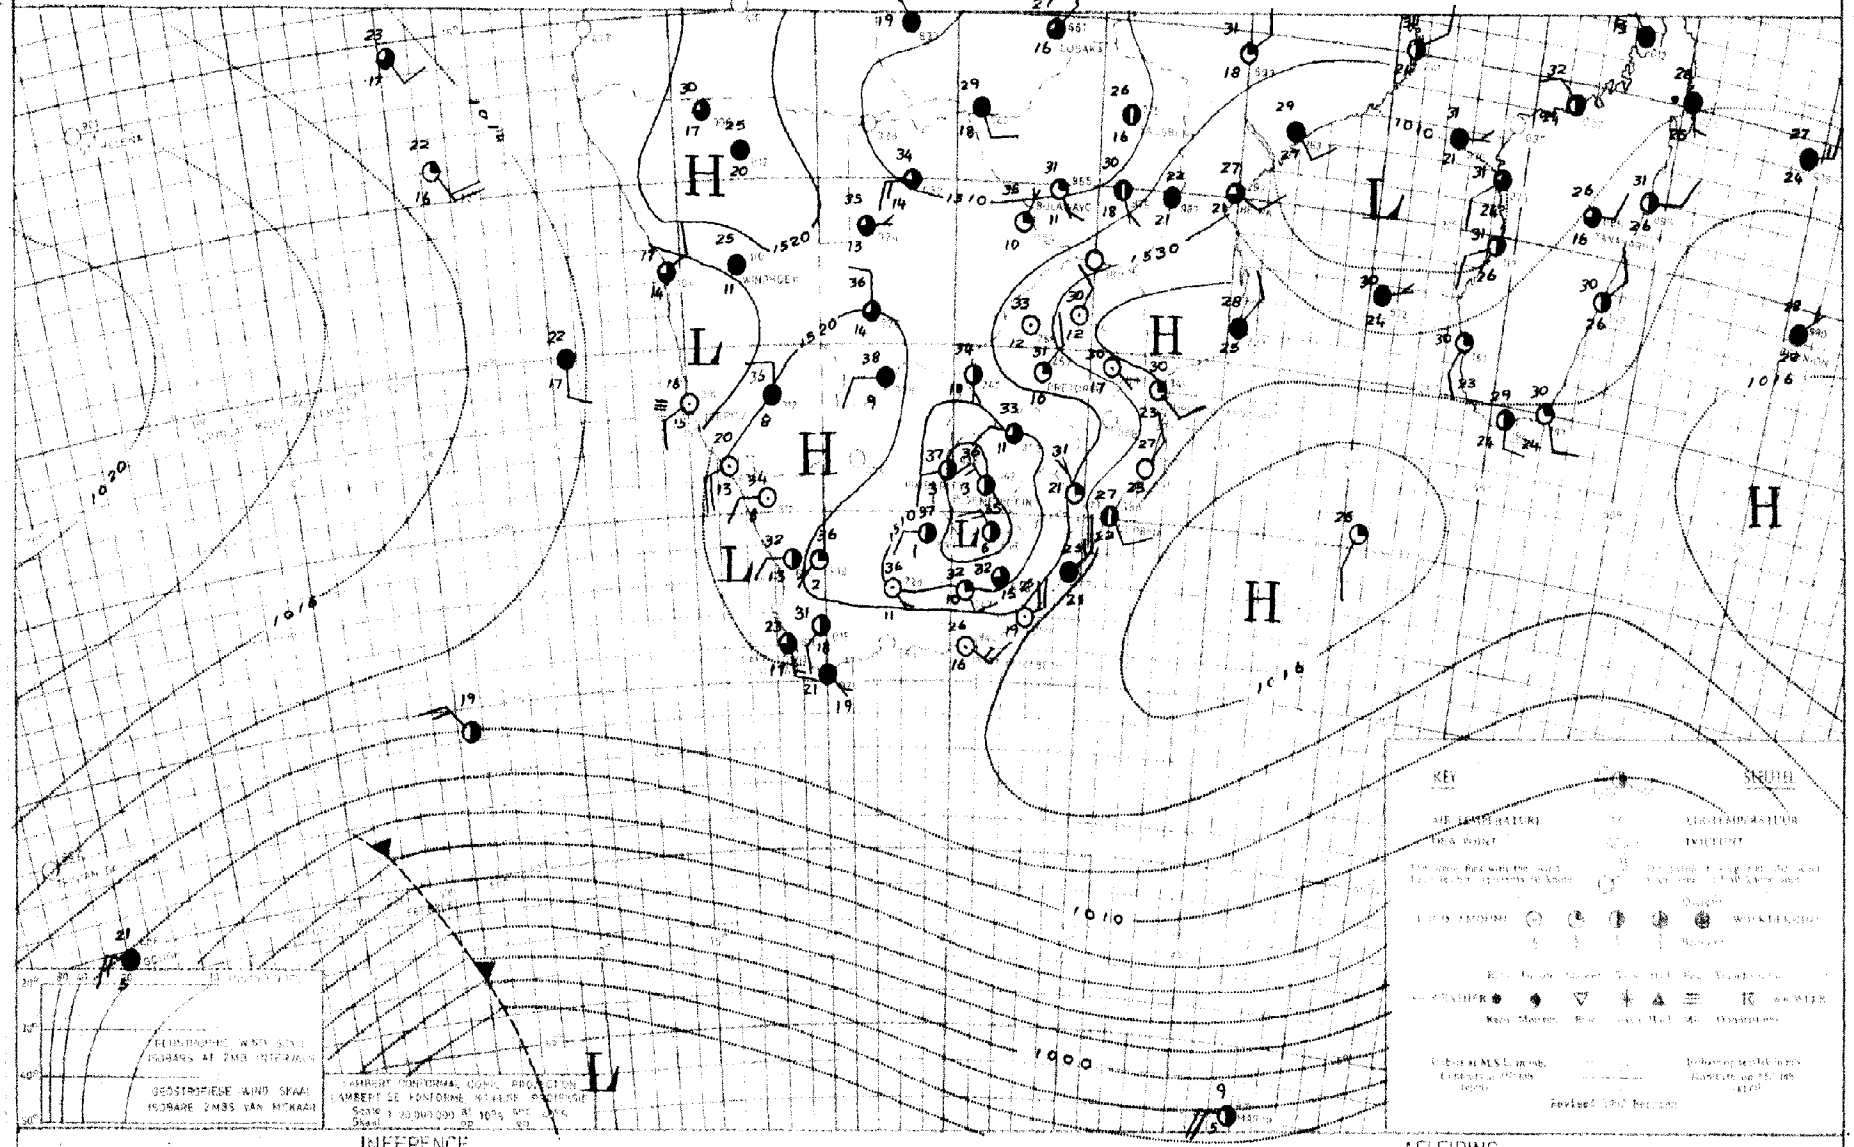
SYNOPTIC WEATHER MAP — 1200 GMT — 1400 SAST — SINOPTIESE WEERKAART



INFERENCE

DATE 14 - 1 - 1966 DATUM

AFLEIDING

The coastal low situated along the Cape West Coast will move around the south coast and will cause cloudy weather over these regions. With a low over the central interior and moist air in circulation, thundershowers will develop over the eastern interior.

Die kuslaag langs die Kaapse weskus sal om die suidkus beweeg en bewolkte weer oor daardie gebiede veroorsaak. Met 'n laag oor die sentrale binneland en vogtige lug in sirkulasie sal donderbuie oor meeste dele van die oostelike binneland ontwikkel.

DAAGLIKSE WEERBULLETIN

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

INFERENCE

DATE 15 - 19 6 6 DATUM

AFLEIDING

A trough of low pressure and moist air over the eastern interior will cause thundershowers to develop over those parts. Elsewhere it will be mainly fine and warm.

'n Trog van lae druk en vogtige lug oor die oostelike binneland sal donderbuie oor daardie dele veroorsaak. Oorgens sal dit hoofsaaklik mooiweer en warm wees.

DAAGLIKSE WEERBULLETIN

DATE 16 - 1 19 66 DATUM

AFLEIDING

The cold front nearing the country from the west will cause cloudy weather with light rain at places over the western and south-western Cape coastal areas. The air over the interior is moist, and thundershowers will develop over most parts.

Die koufront wat die land vanuit die weste nader, sal bewolkte weer met ligte reën op plekke langs die Kaapse wes en suidwestkus veroorsaak. Die lug oor die binneland is vogtig, en donderbuie sal oor meeste dele ontwikkel.

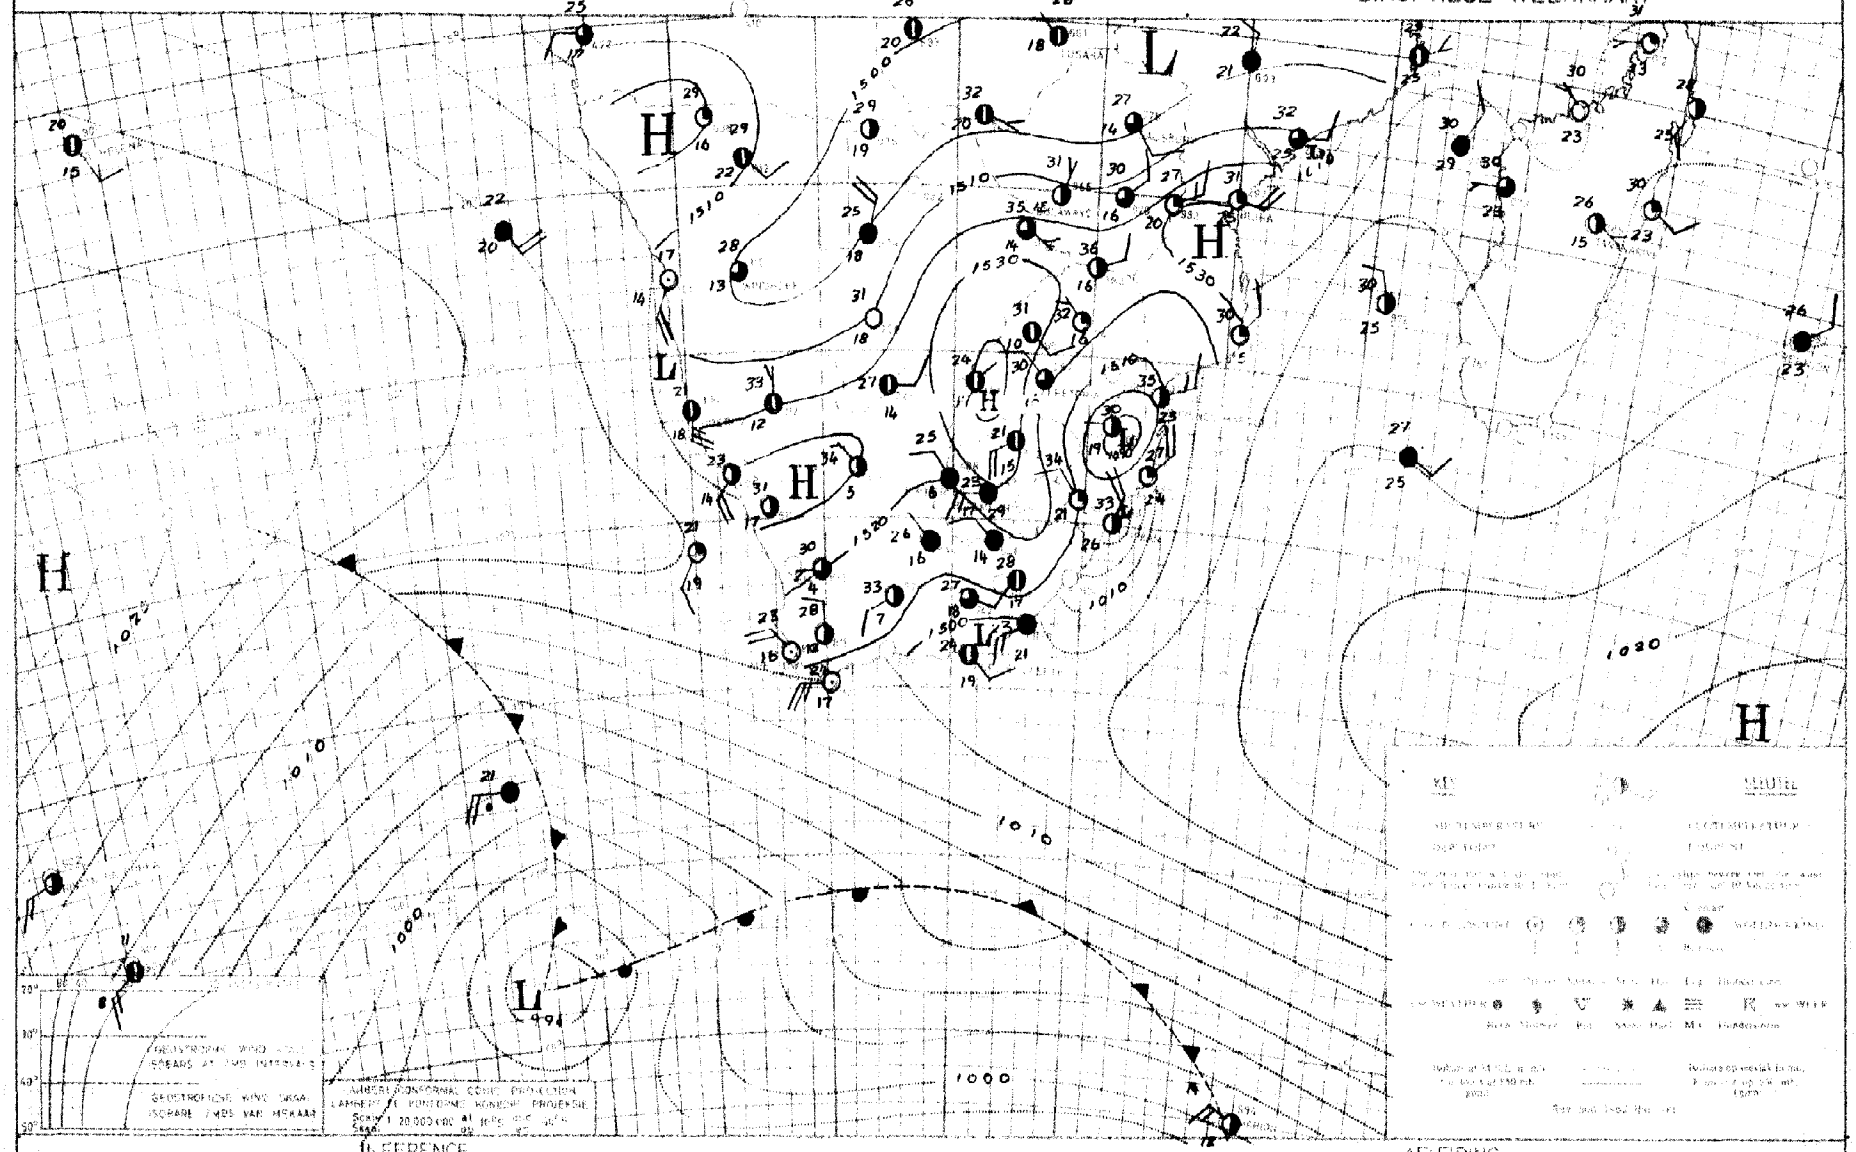
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST SINOPTIESE WEERKAART



INFERENCE

The trough over the central interior, which is deepening, and moist air in circulation, will cause scattered rain over most parts with the exception of the western districts of the Cape province. With the cold front approaching, cloudy cooler weather with light rain will spread over the Southern and Southwestern Cape coastal areas.

DATE 17 - 1 - 19 66 DATUM

AFLEIDING

Die trog oor die sentrale binneland verdiep en met vogtige lug in Sirkulasie sal verspreide reën oor die meeste dele uitsak behalwe oor die westelike dele van die Kaapprovinsie. Met die naderende koufront sal koeler bewolkte weer met ligte reën oor die suidelike en suidwestelike kusstreke van Kaapland uitbrei.

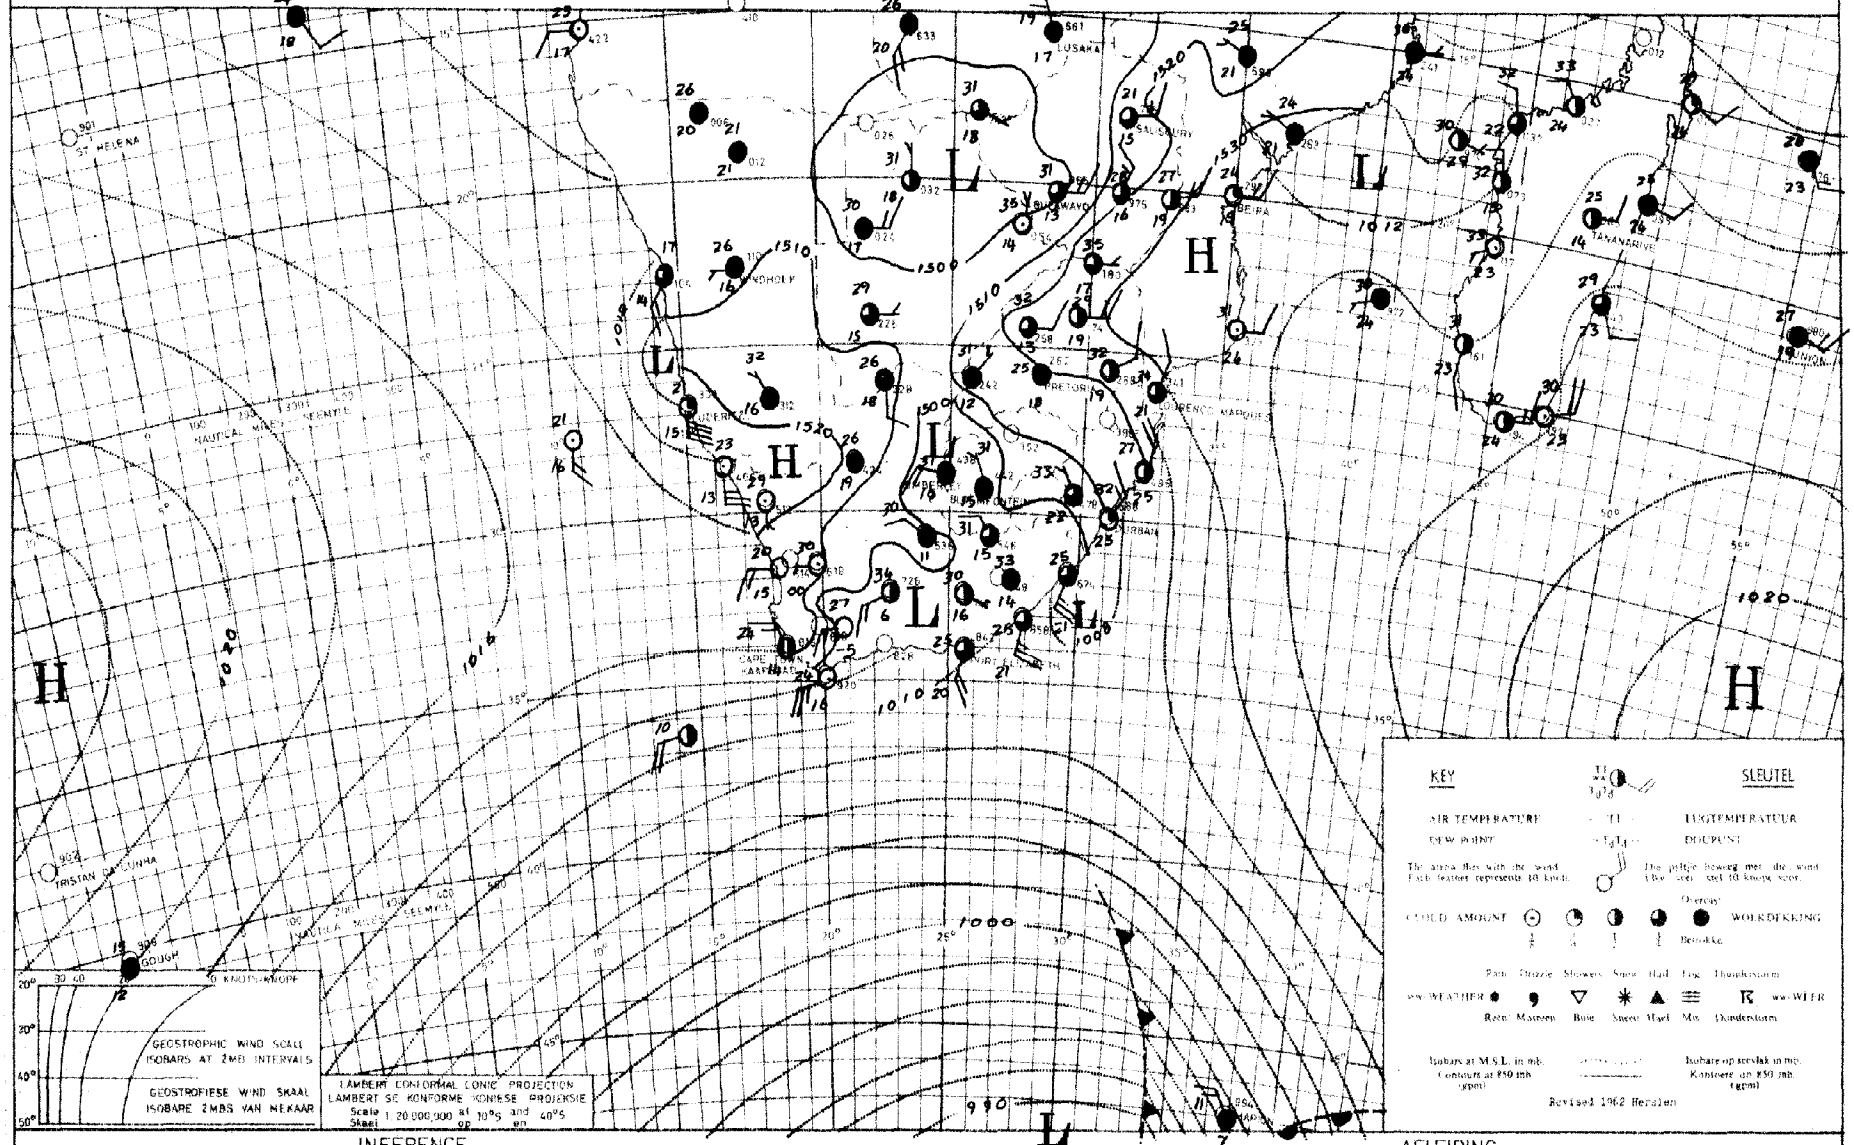
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 18 - 1 - 1966 DATUM AFLEIDING

Warm moist air is circulating over the interior and showers or thundershowers will develop over most parts, mainly over the central regions. The Atlantic high is slowly pushing a ridge around the south coast and thus cloudy conditions will persist along the southern and eastern coastal areas.

Warm vogtige lug sirkuleer oor die binneland en buie of donderbuie sal oor die meeste dele voorkom, hoofsaaklik oor die sentrale gebiede. Die Atlantiese hoog stoot 'n rug stadig om die suidkus en dus sal bewolkte weer langs die suidelike en oostelike kusgebiede voortduur.

DAAGLIKSE WEERBULLETIN

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

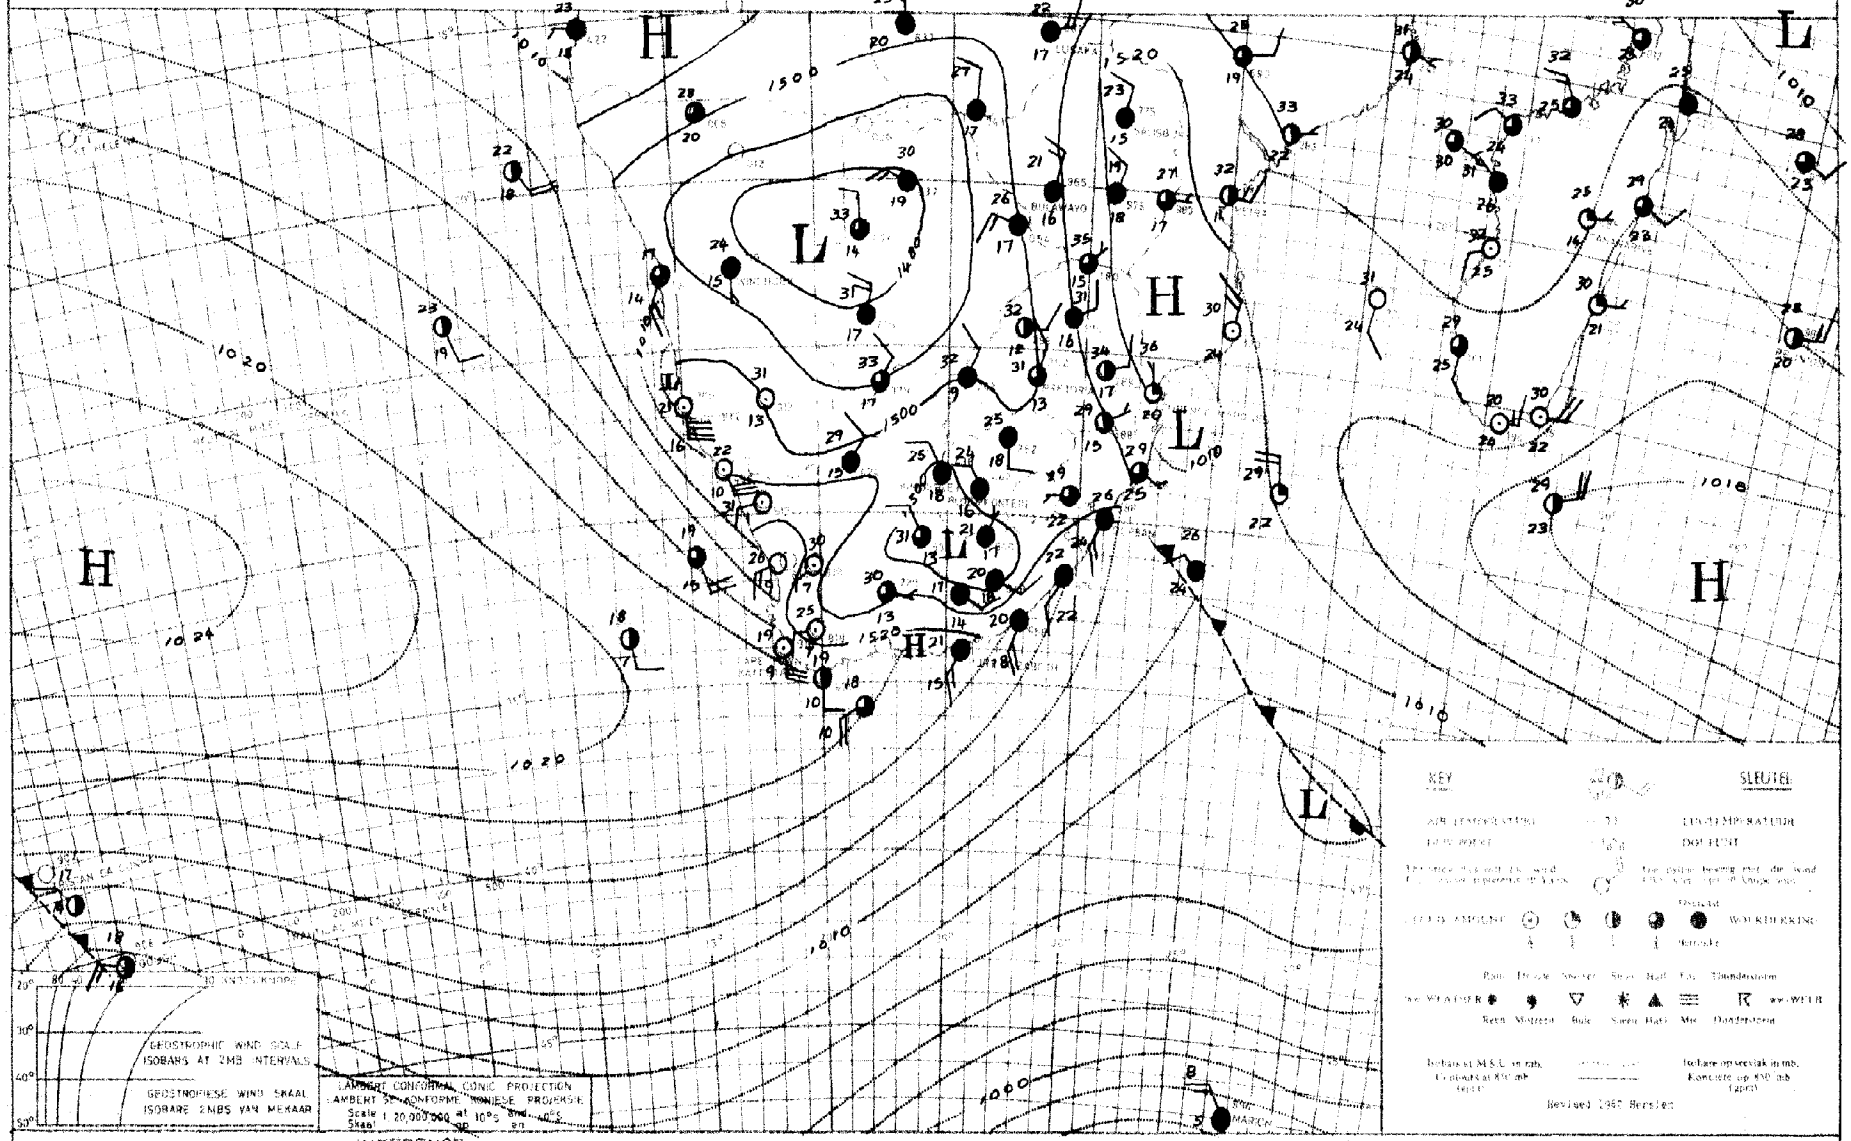
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST SINOPTIESE WEERKAART



INFERENCE

The Atlantic high is ridging in south of the country and the low over the interior will strengthen. Thus fairly general rain will occur over the central and eastern interior with scattered thundershowers over the remainder of the country except for the western parts of the Cape Province where it will be fine.

DATE 19 - 1 - 1966 DATUM

AFLEIDING

Die Atlantiese hoog beweeg suid van die land in sodat die laag oor die binneland sal versterk. Taamlik algemene reën sal as gevolg daarvan oor die sentrale en oostelike binneland voorkom met verspreide reën oor die res van die land behalwe die westelike dele van Kaapland waar dit mooiweer sal wees.

DAAGLIKSE WEERBULLETIN

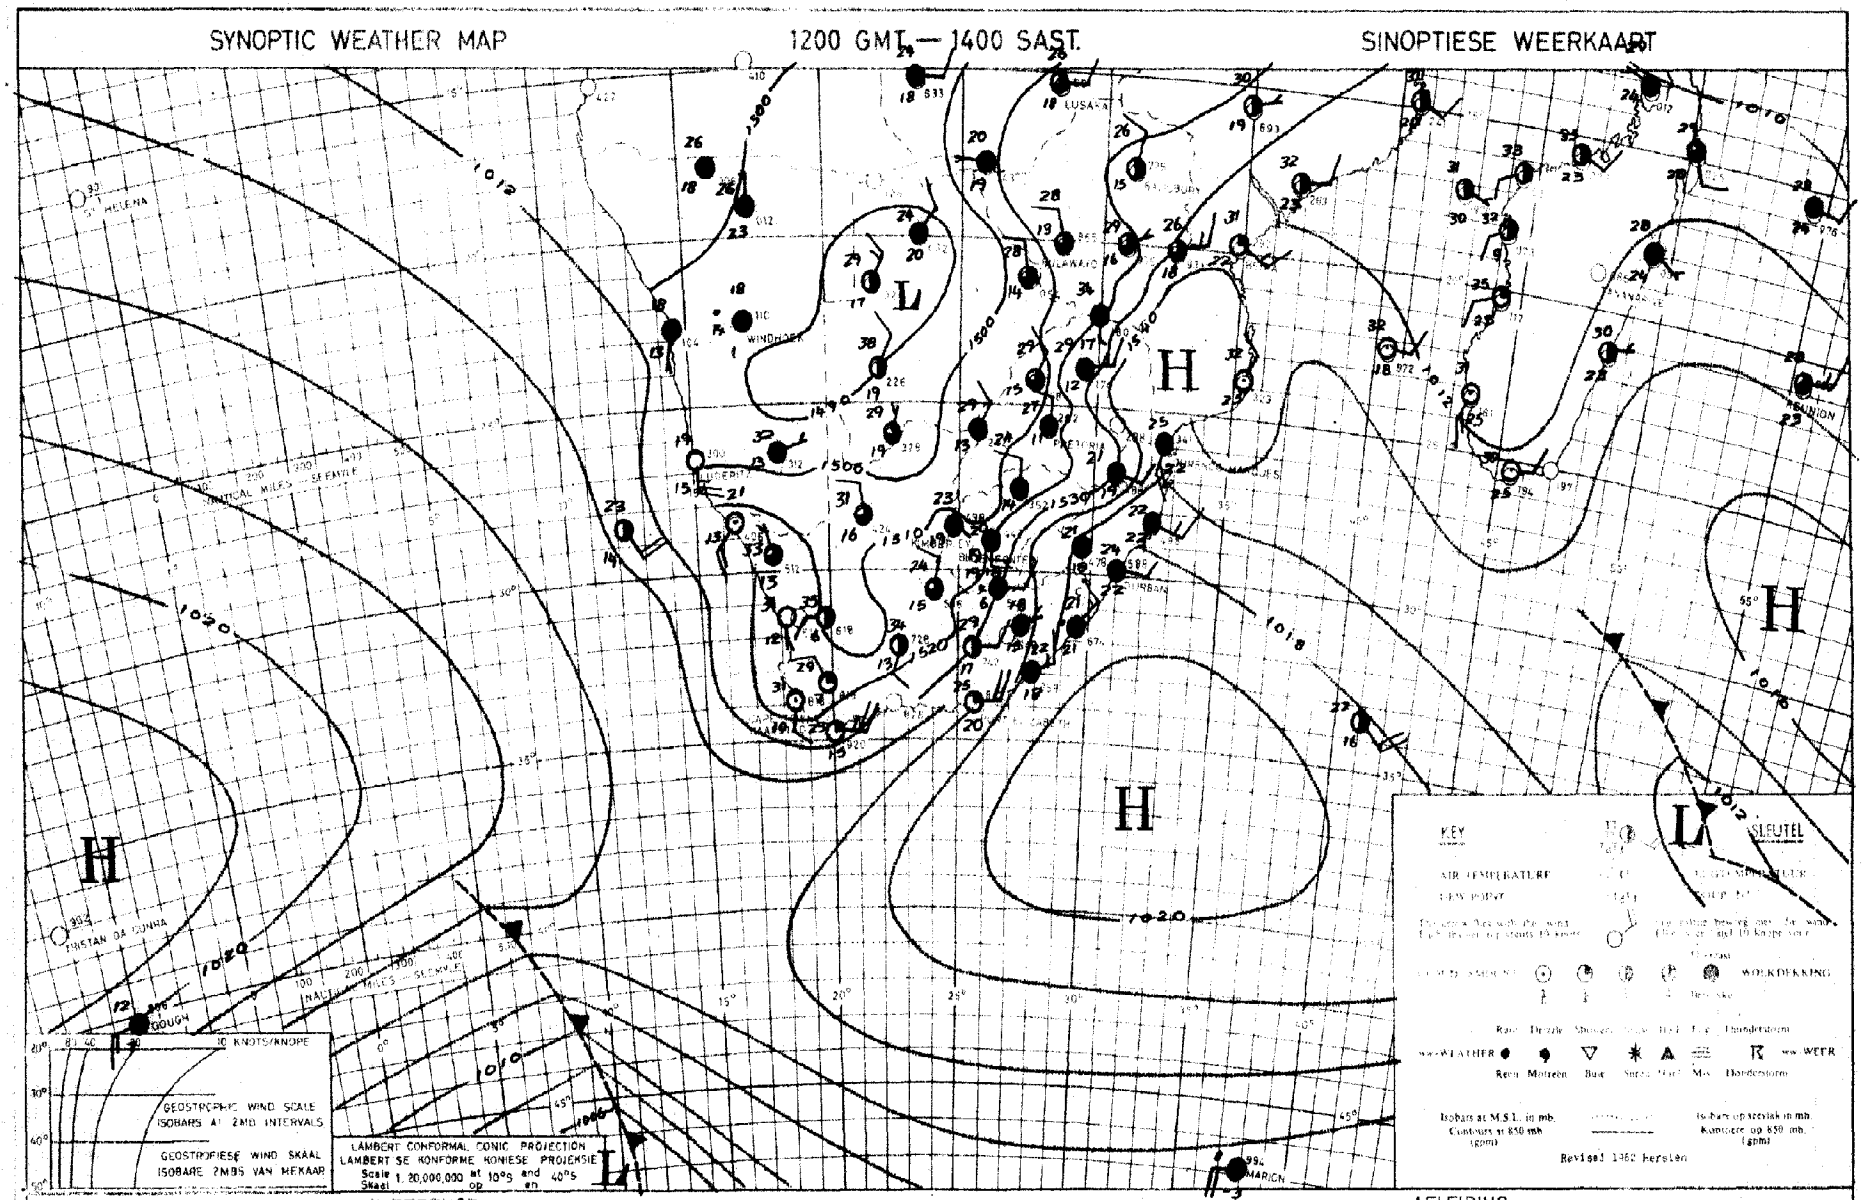
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

With a high off the Natal coast and a low over Behuanaland moist air is flowing from the north over the interior, and showers or thundershowers will occur over most regions. The coastal low on the south-western Cape coast is moving around the coast and cloudy, cooler weather with light rain will spread along the southern Cape coast.

DATE 20 - 1 - 19 66 DATUM

AFLEIDING

Met 'n laag oor Betsjoeanaland en 'n hoog langs die Natalse kus word vogtige lug oor die binneland ingevoer, en buie of donderbuie sal oor die meeste dele voorkom. Die kuslaag by die Kaapse suidweskus beweeg om die suidkus en bewolkte koeler weer met ligte reën sal ooswaarts uitbrei langs die Kaapse suidkus.

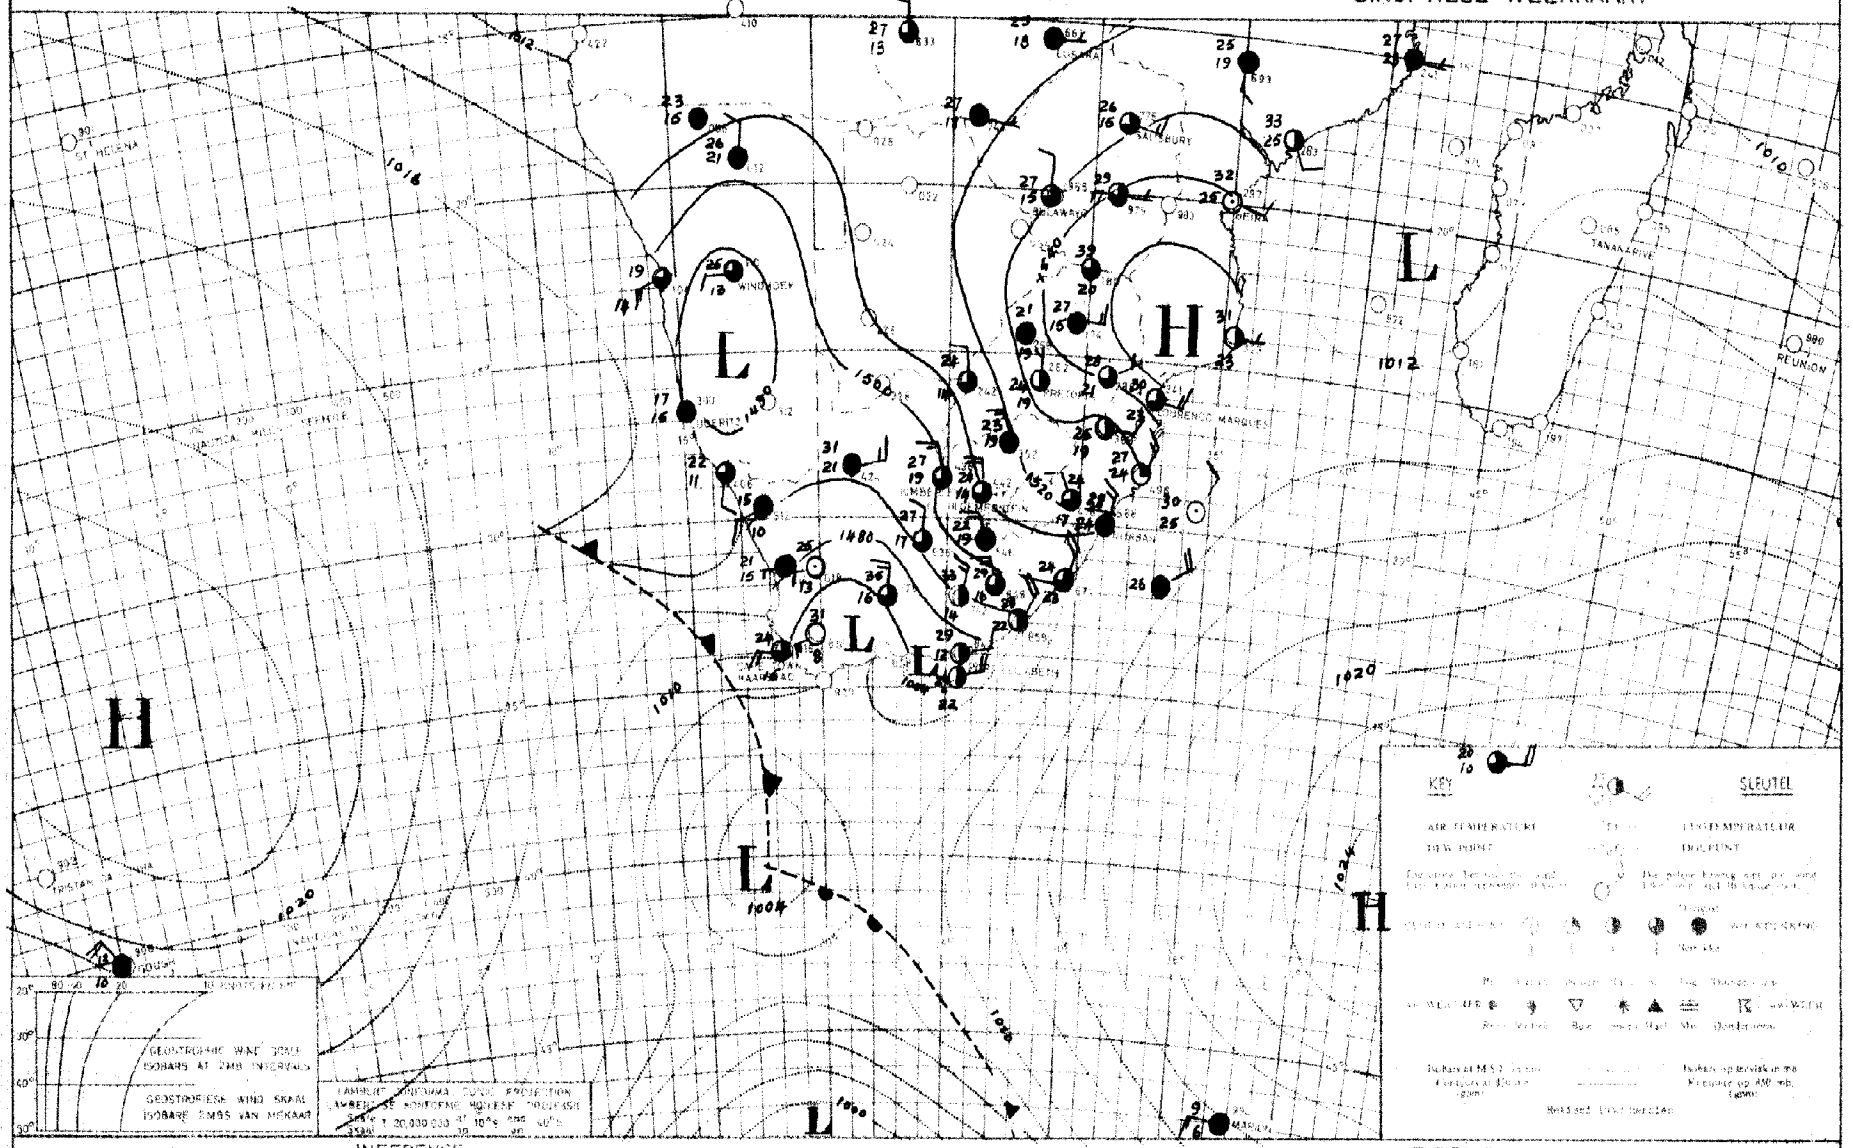
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 21-1-1966 DATUM AFLEIDING

Pressures are rising rapidly along the south-western Cape coast with the result that the trough over the western parts will move eastwards and thundershowers will be confined to the eastern and northern parts while it will clear over the western and southern parts. Behind the cold front, which is also moving eastwards, cloudy weather with showers will spread over the Cape coastal regions.

Drukke styg vinnig langs die Kaapse suidweskusstreke en gevolglik sal die trog oor die westelike dele ooswaarts beweeg sodat donderweertoestande nog oor die oostelike en noordelike dele sal voorkom terwyl dit sal opklaar oor die westelike en suidelike dele. Agter die koufront wat ook ooswaarts beweeg sal bewolkte weer met buie oor die Kaapse kusstreke uitbrei.

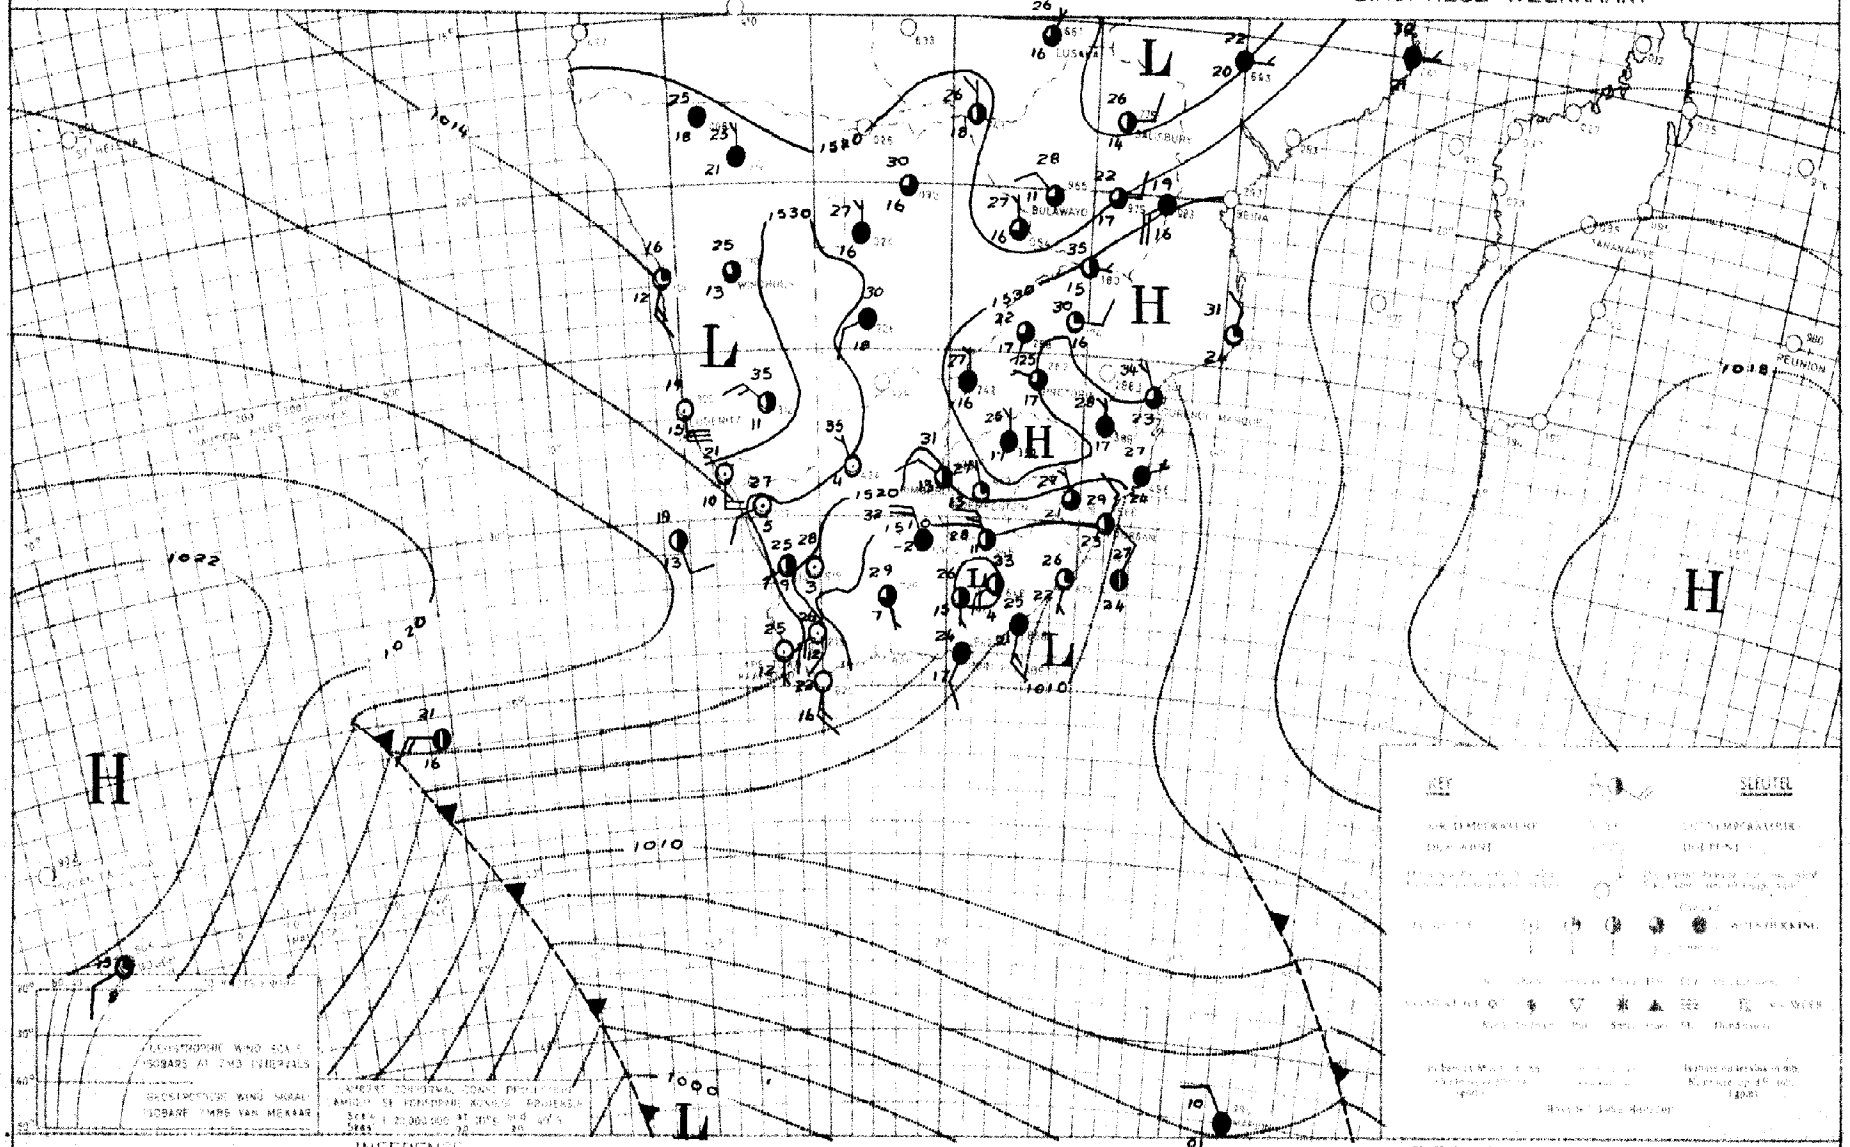
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

The cold front approaching the Cape from the west will cause cloudy weather with light rain or drizzle over the south-western Cape coastal areas. Conditions remain uncharged over the interior and thundershowers will develop over the eastern interior.

DATE 24 - 1 - 1966 DATUM

APLEIDING

Die koufront wat die Kaap vanuit die weste nader, sal bewolkte weer met ligte reën of motreën oor die suidwes-telike Kaapse kusgebiede veroorsaak. Oor die binneland is toe-stande nog onveranderd en donderbuie sal oor die oostelike binneland ontwikkel.

DAAGLIKSE WEERBULLETIN

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

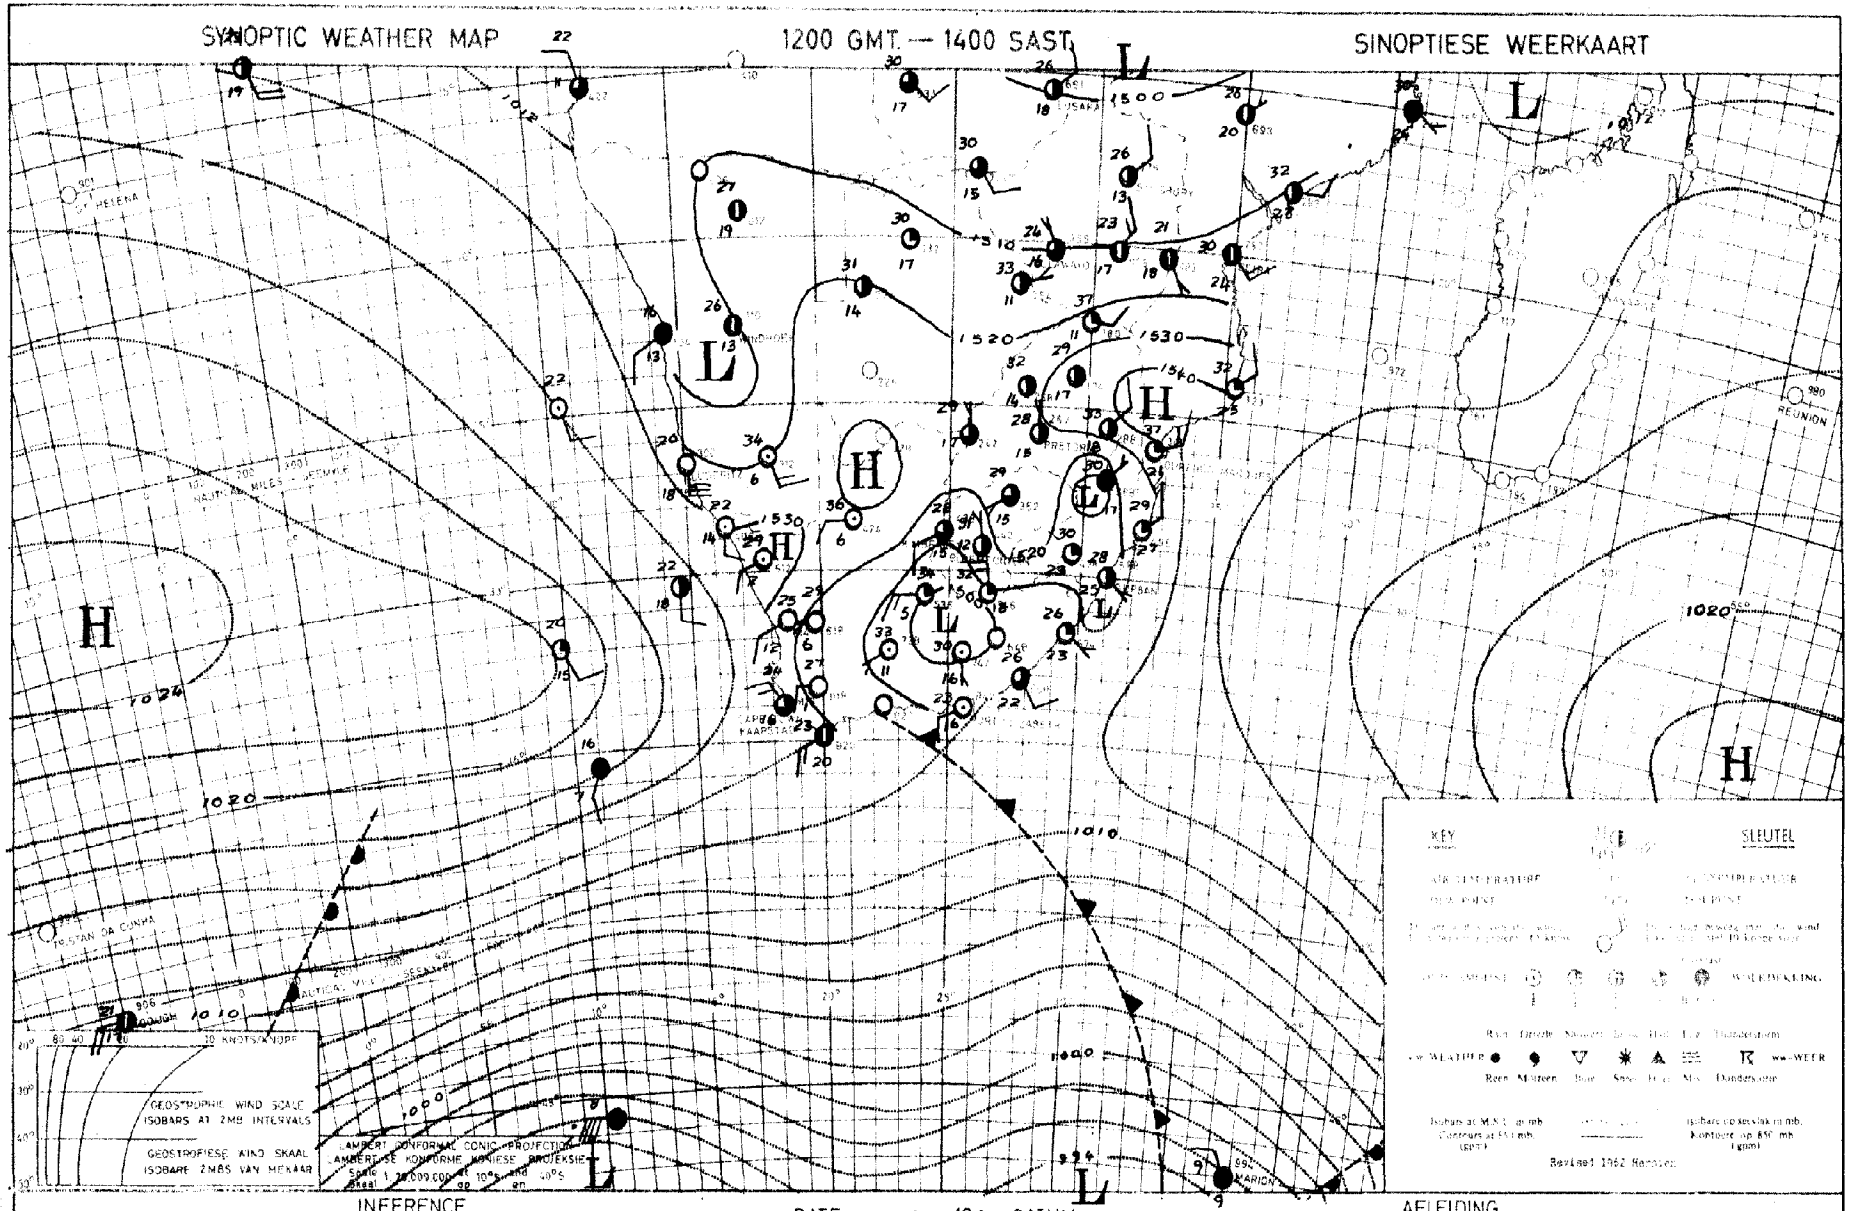
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST SINOPTIESE WEERKAART



INFERENCE

The trough over the central interior is moving but little and thundershowers will recur over the northern, eastern and central parts of the country. Cloudy weather will occur over the southern and eastern coastal regions with light rain as result of the cooler air moving in from the south-west behind the cold front.

DATE 25-1-1966 DATUM

AFLEIDING

Die trog oor die sentrale binneland toon geen beweging nie en donderbuie sal weer oor die noordelike, oostelike en sentrale dele van die land uitsak. Bewolkte weer sal oor die suidelike en oostelike kusstreke voorkom met ligte reën, as gevolg van die koeler lug wat agter die koufront inbeweeg.

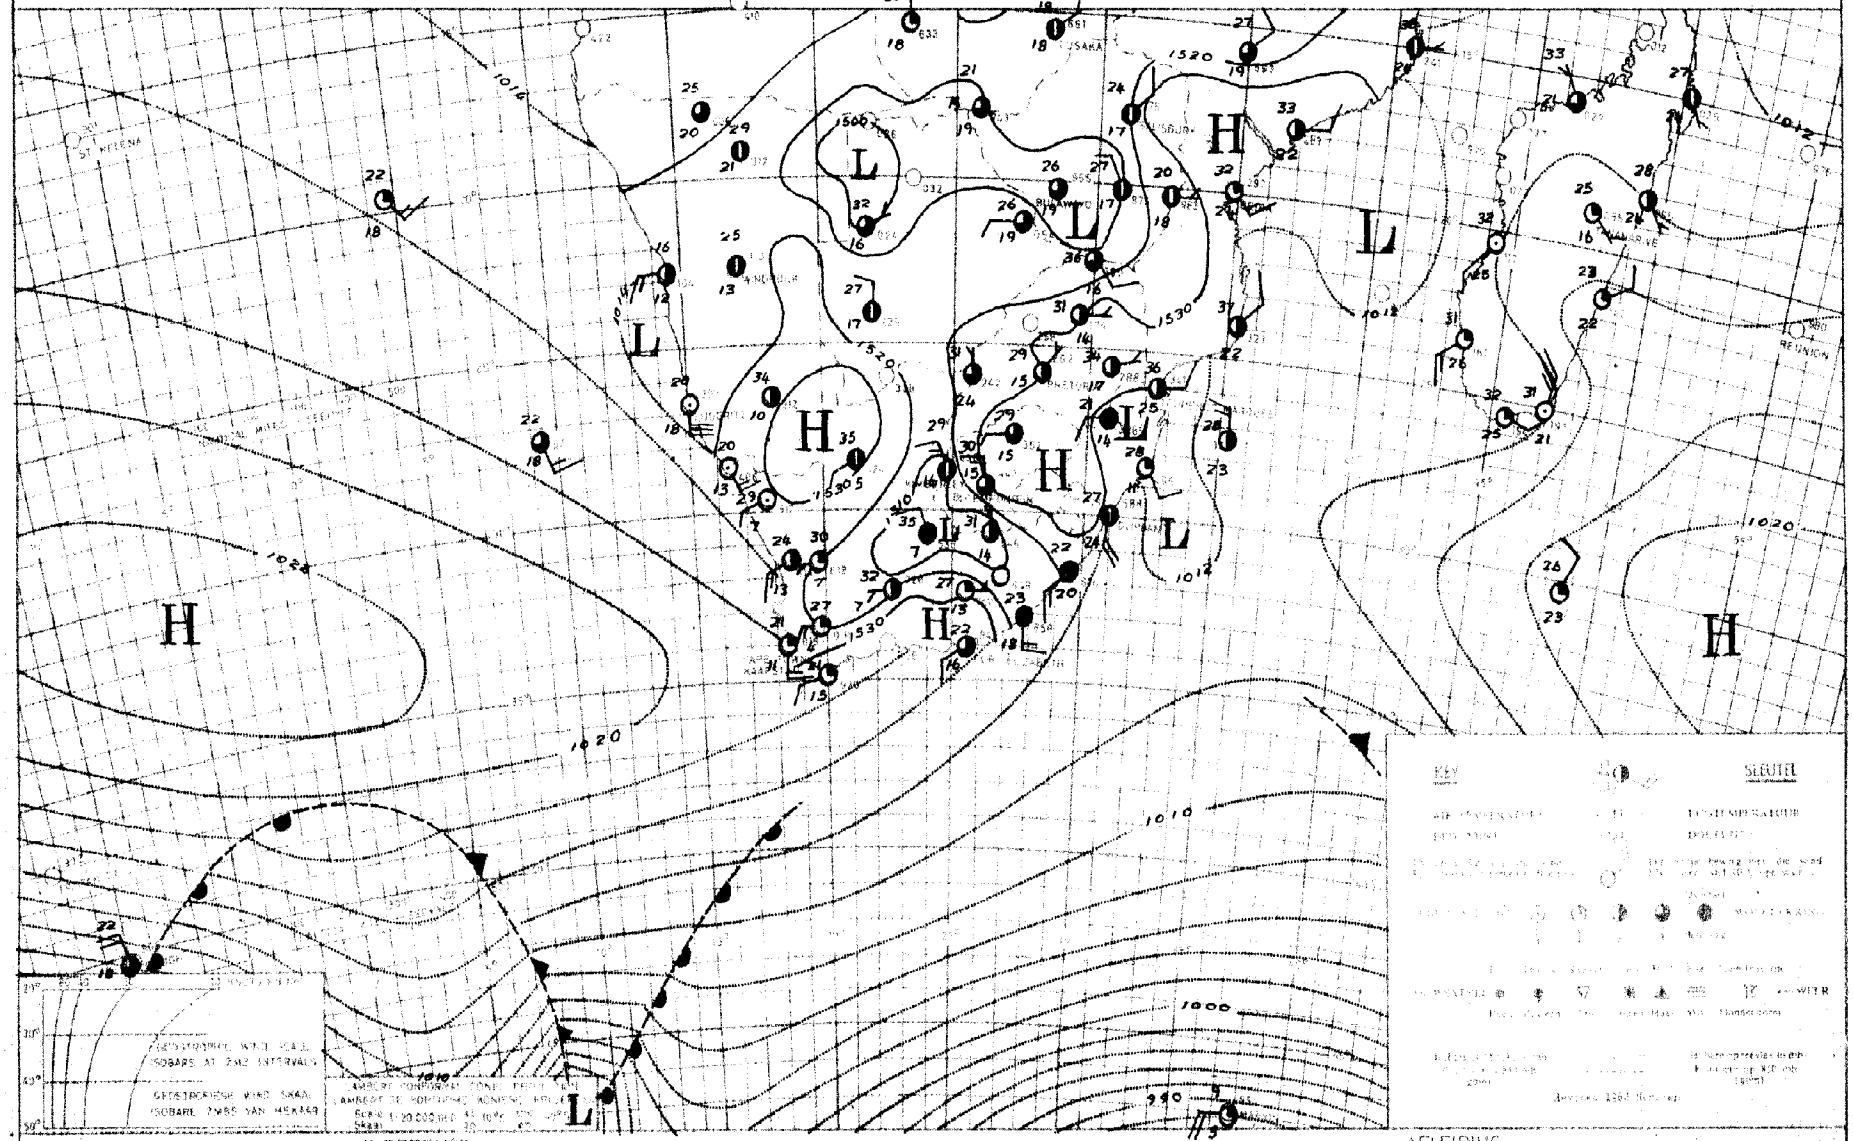
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

DATE 26 - 1 - 1966. DATUM

AFLEIDING

The Atlantic high is ridging around the south coast and it will remain cloudy with light rain at places along the south-eastern and eastern coastal areas. The air is moist over the interior and, with a low over the central parts, conditions remain favourable for thundershowers over the northern and eastern interior.

Die Atlantiese hoog stoot 'n rug om die suidkus en dit sal bewolk bly oor die suidoostelike en oostelike kusgebiede, met ligte reën op plekke. Oor die binneland is die lug vogtig en met 'n laag oor die sentrale dele, bly toestande gunstig vir donderbuie oor die noordelike en oostelike binneland.

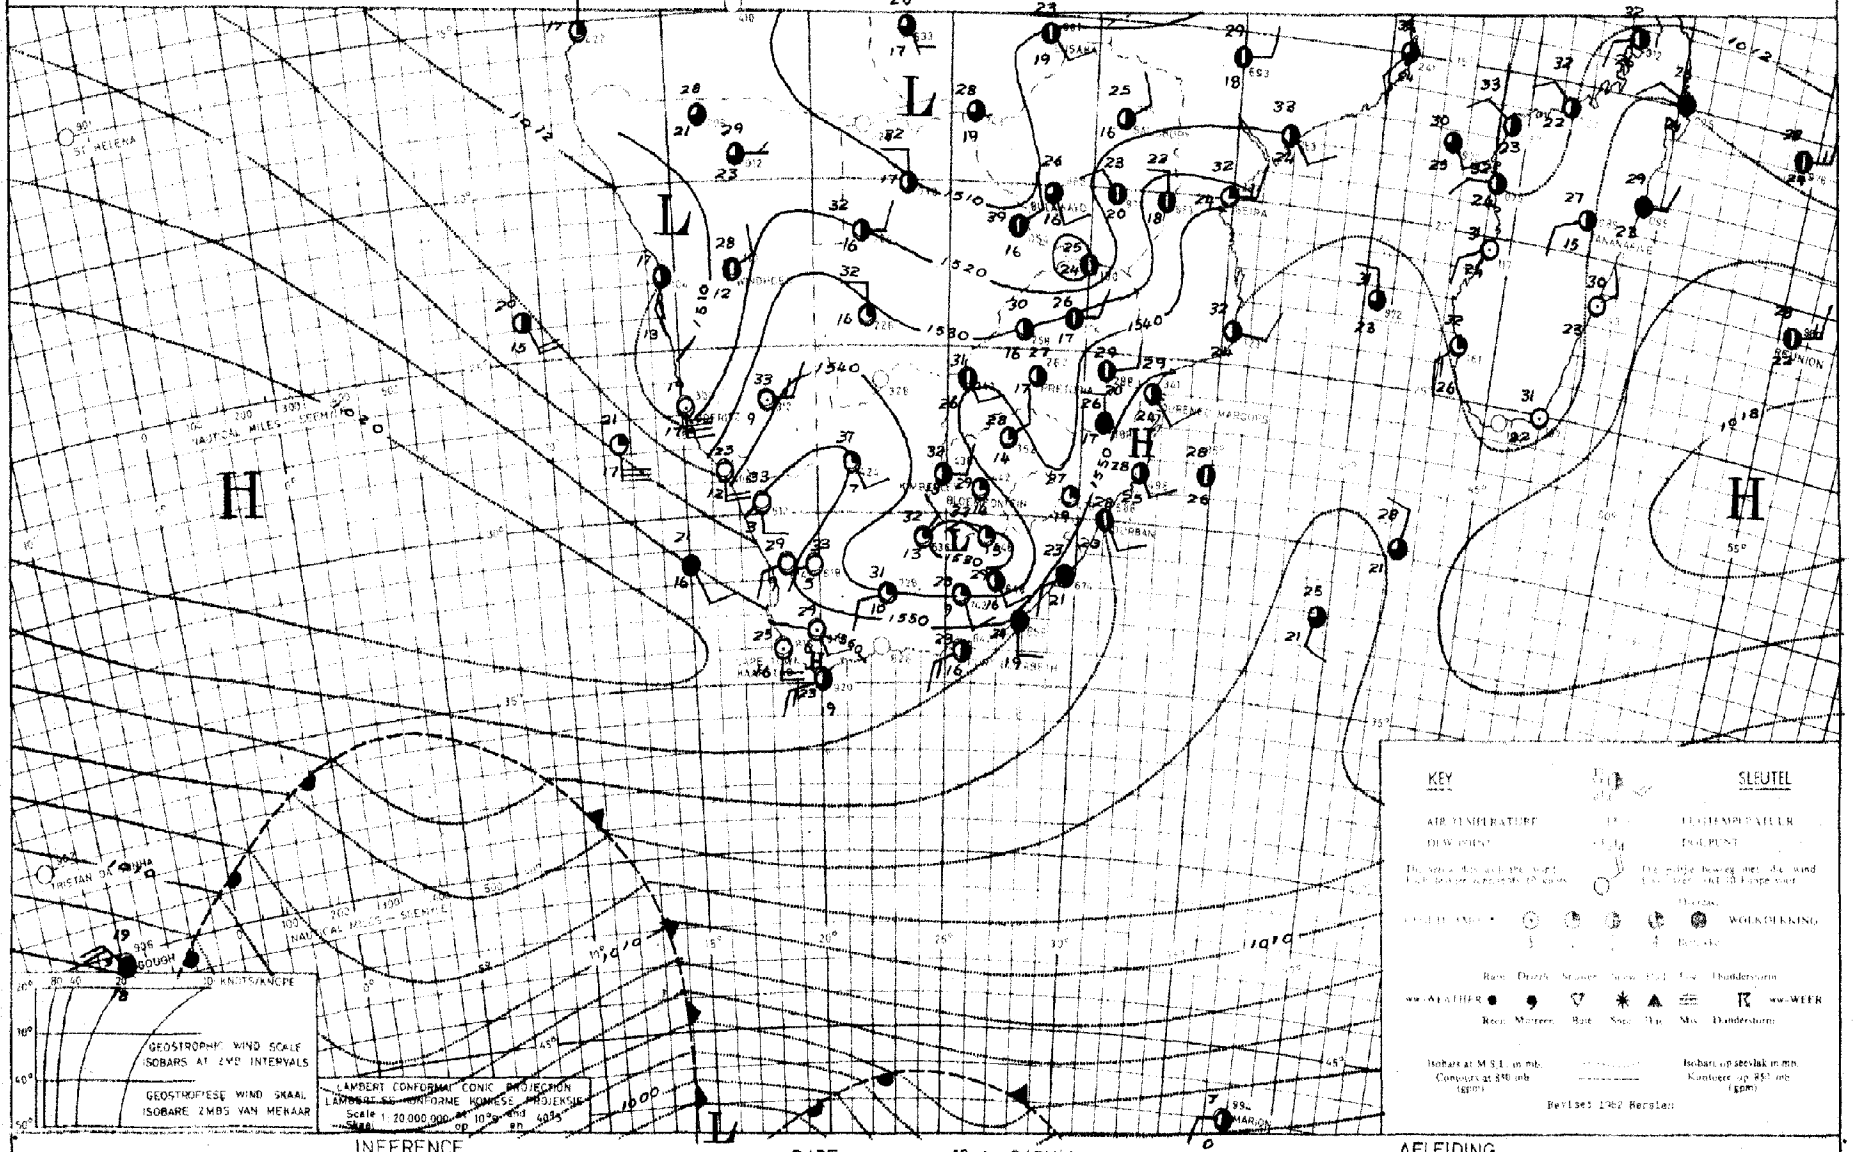
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 27-1-1966 DATUM AFLEIDING

With the trough over the central and northern interior, and moist air over most regions, scattered thundershowers are expected over nearly the whole interior, except the southern and western parts of the Cape Province.

Met die trog oor die sentrale en noordelike binneland en die lug nog vogtig oor die meeste dele word verspreide donderbuie verwag oor feitlik die hele binneland, uitgesonderd die suidelike en westelike gebiede van Kaapland.

DAAGLIKSE WEERBULLETIN

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

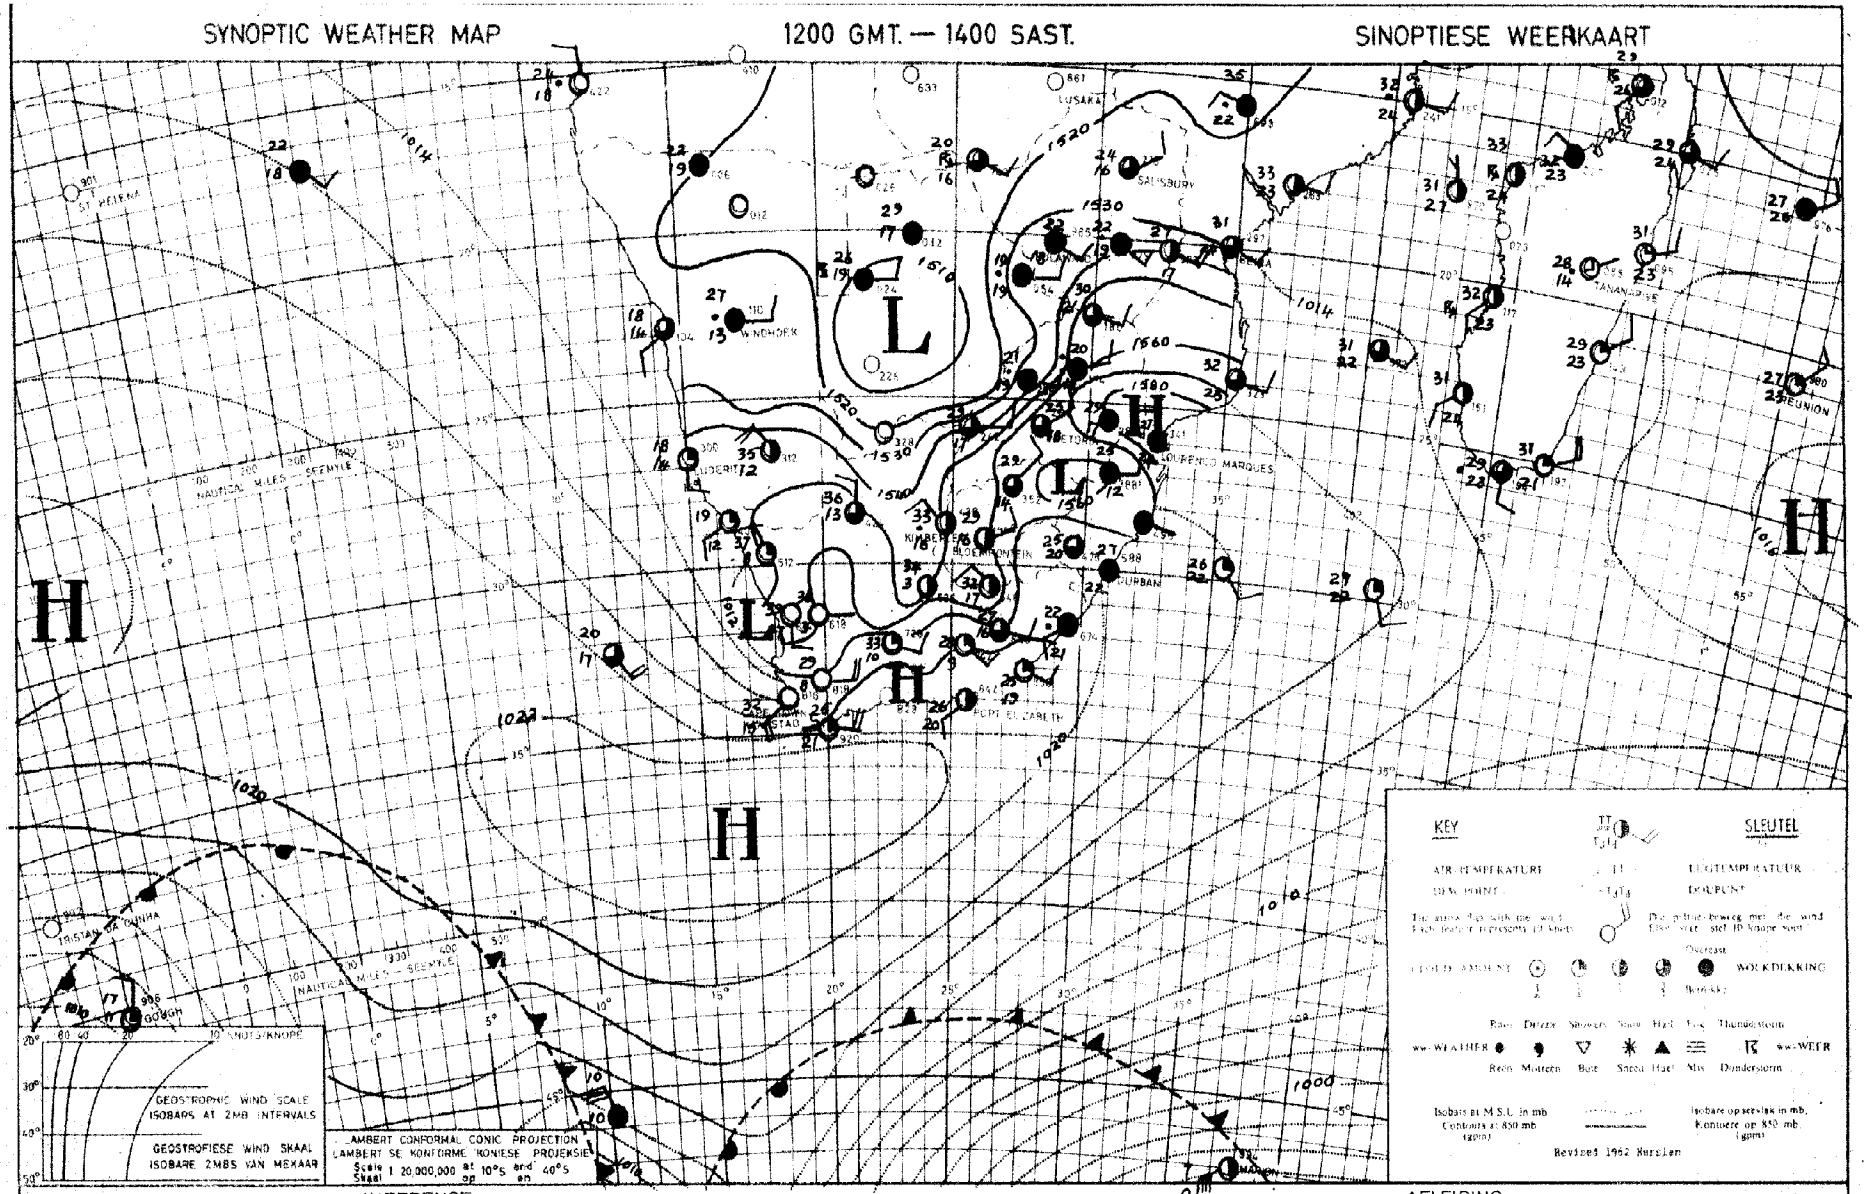
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 28 - 1 - 1966 DATUM AFLEIDING

The Atlantic high is pushing a strong ridge around the south coast and thus it will remain cloudy over the coastal areas of the eastern Cape and Natal. With a trough over the central interior and moist air in circulation, thundershowers will develop over most of the interior.

Die Atlantiese hoog stoot 'n sterk rug om die suidkus en dus sal bewolkte toestande voortduur langs die Oos-Kaapse en Natalse kusgebiede. Met 'n trog oor die sentrale binneland en vogtige lug in sirkulasie sal donderbuie oor die meeste dele van die binneland ontwikkel.

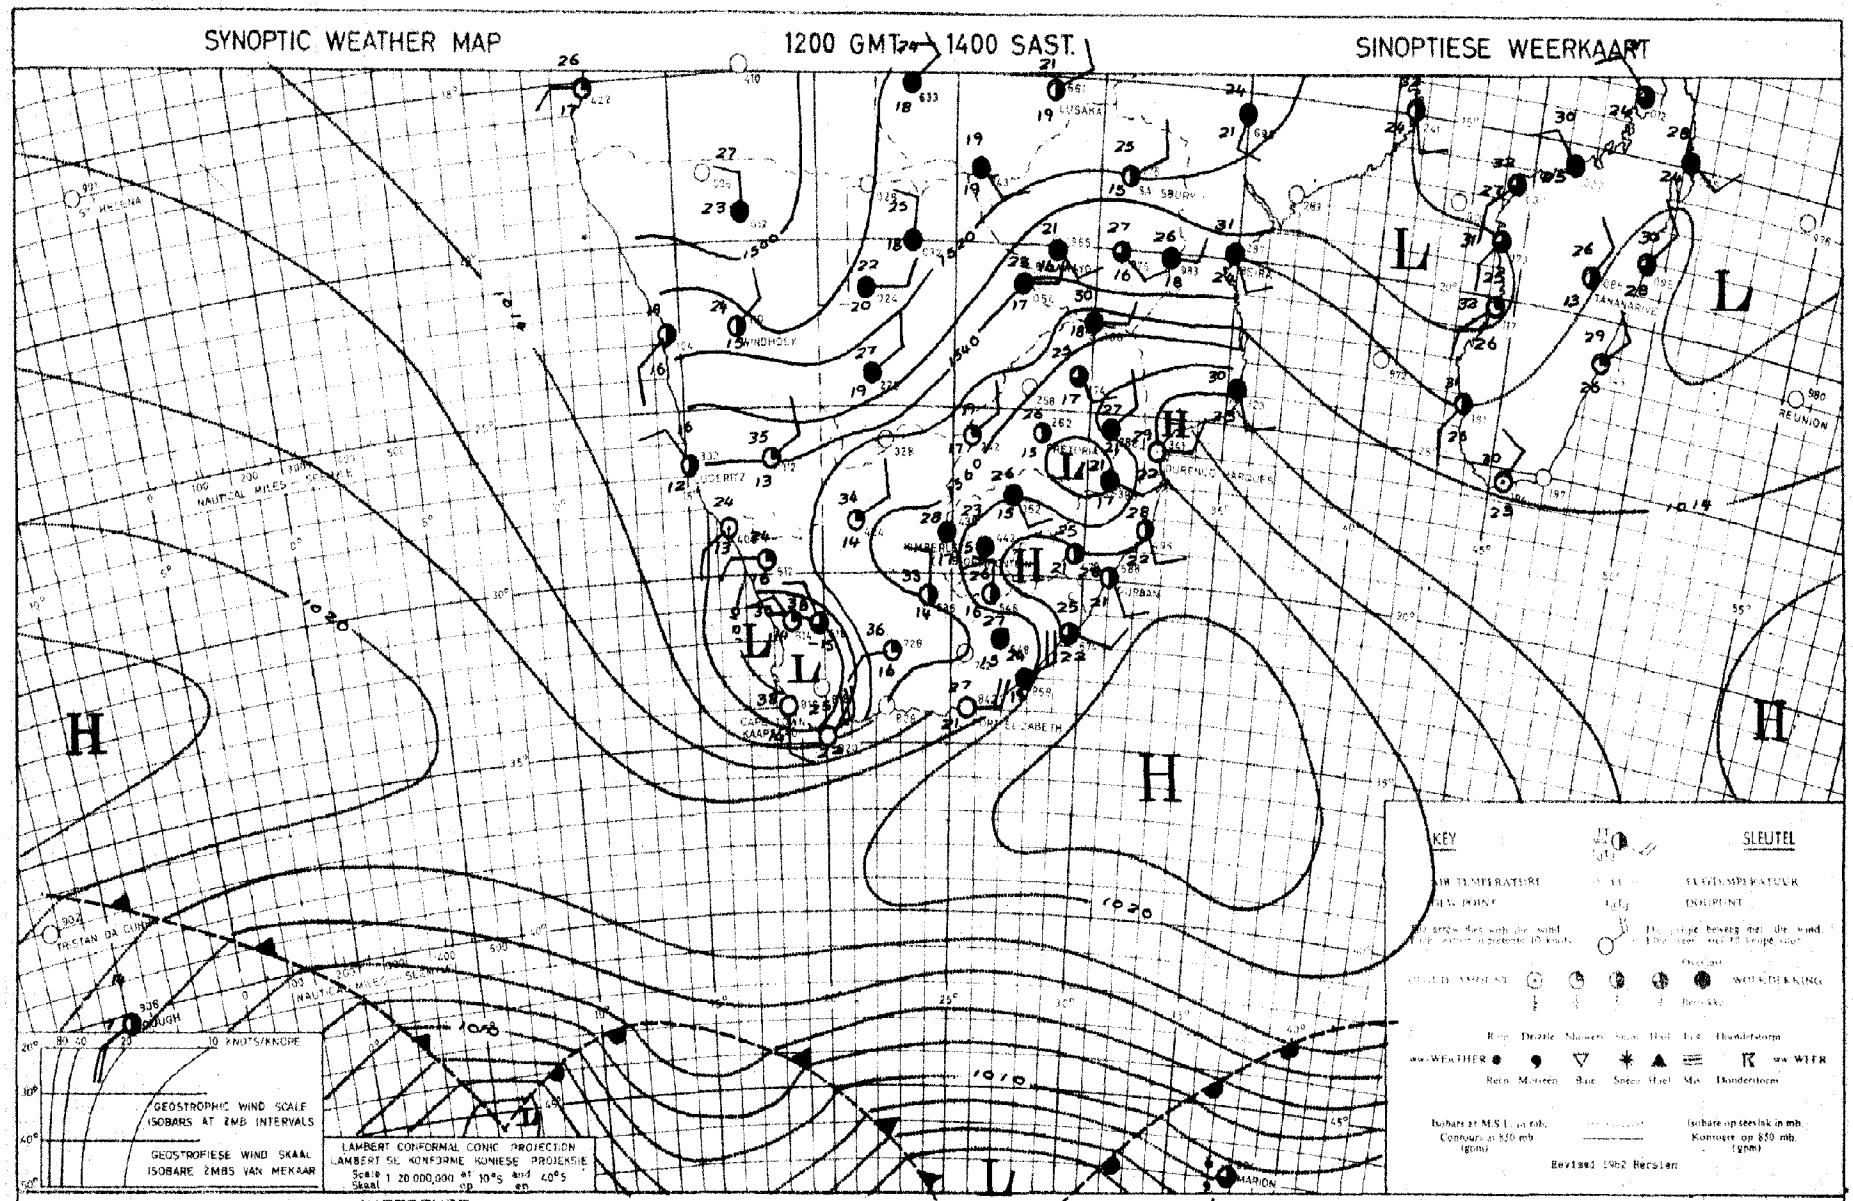
SYNOPTIC WEATHER MAP 1200 GMT 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

The coastal low situated on the west coast is moving very slowly and will not affect the weather on the south coast. The air over the interior is moist and unstable, so that thundershowers will develop over the interior, mainly over the southern and central parts.

DATE 29 - 1 - 1966 DATUM

AFLEIDING

Die kuslaag wat langs die Kaapse weskus geleë is, beweeg baie stadig en sal nie die weer oor die suidkus affekteer nie.

Die lug oor die binneland is vogtig en onstabiel en dus sal buie en donderbuie ontwikkel, hoofsaaklik oor die suidelike en sentrale dele.

DAAGLIKSE WEERBULLETIN

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

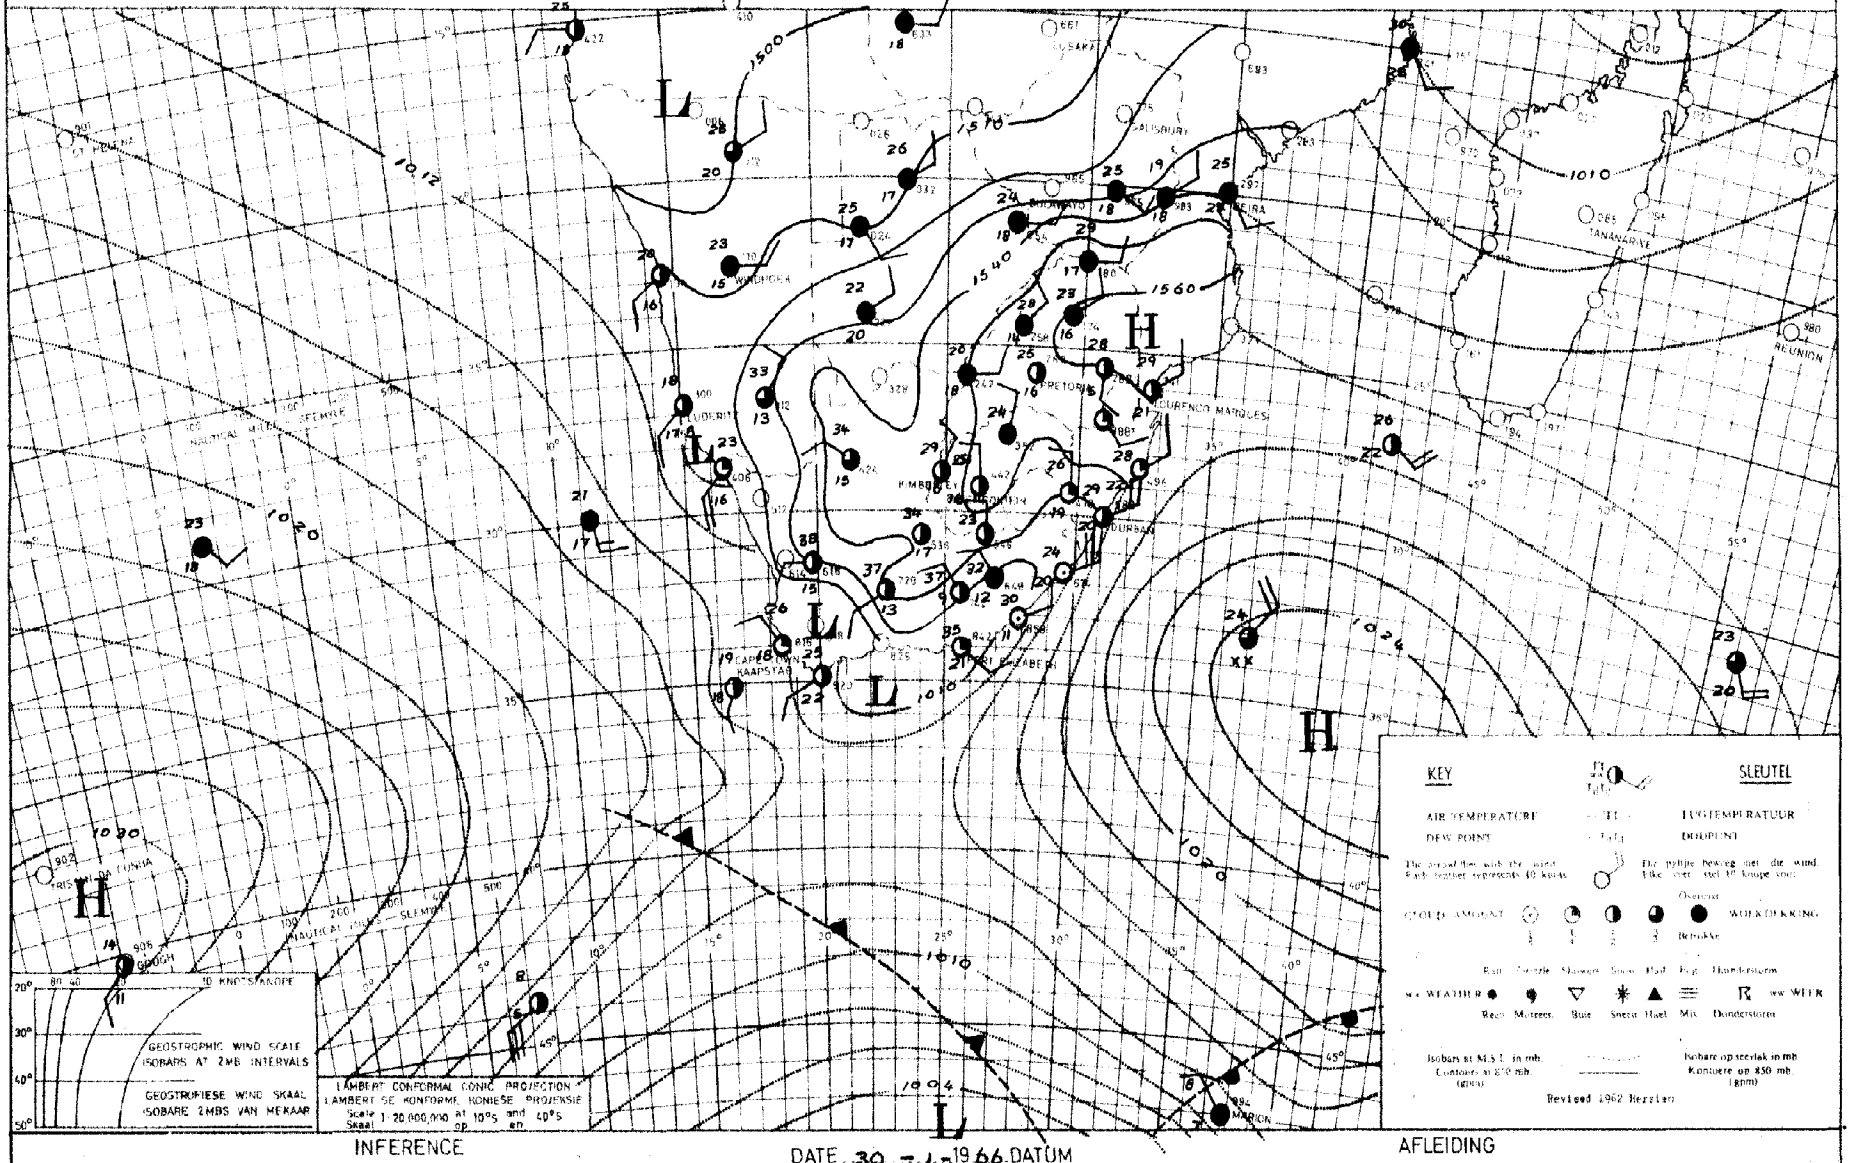
SYNOPTIC WEATHER MAP 1200 GMT 27 — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 30 - 1 - 1966 DATUM AFLEIDING

The coastal low is moving slowly around the south coast and will cause cloudy, cooler weather with fog patches. The air over the interior remains moist and unstable, and thundershowers will develop, mainly over the southern half.

Die kuslaag beweeg stadig langs die suidkus en sal bewolkte weer met misbanke veroorsaak. Die lug oor die binneland is nog steeds vogtig en onstabiel, en donderbuie sal gevolglik ontwikkel, hoofsaaklik oor die suidelike helfte.

DAAGLIKSE WEERBULLETIN

INFERENCE

DATE 31.-1.-1966 DATUM

AFLEIDING

The Atlantic high is ridging in south of the country and is strengthening the effect of the low over the interior and as the air is moist over most parts of the country, fairly general rain or thundershowers will occur, except for Transvaal where the weather is still under the influence of the high over the north-eastern interior and only isolated thundershowers are expected.

Die Atlantiese hoog druk suid van die land in en versterk die effek van die laag oor die binneland, en aangesien die lug vogtig is oor die meeste dele van die land sal taamlik algemene reën en donderbuie voorkom, behalwe oor Transvaal waar die weer nog onder die invloed van die hoog oor die noordoostelike dele is sodat enkele donderbuie sal voorkom.

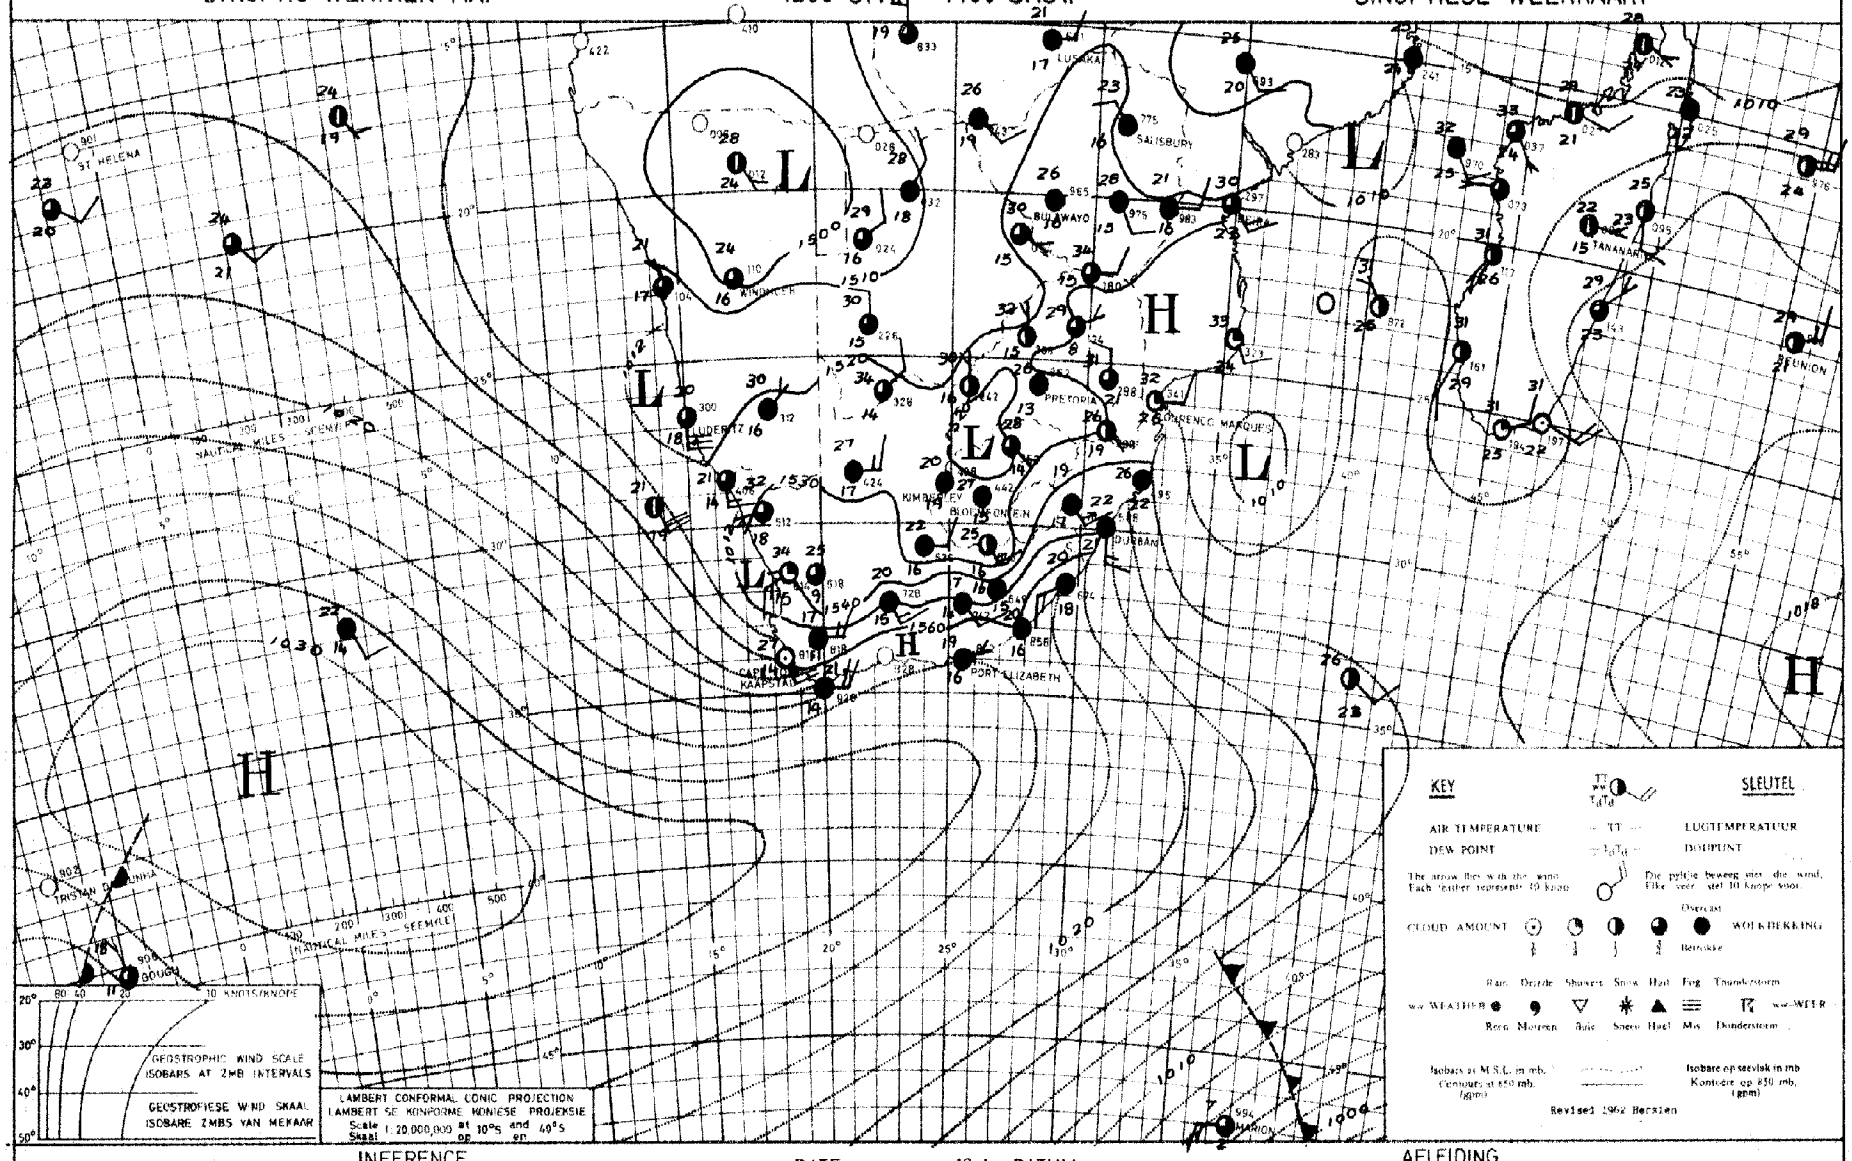
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

The Atlantic high is pushing a strong ridge around the south coast. Thus it will clear over the western coastal areas, and remain cloudy with light rain over the remaining coastal areas.

The air over the interior is moist and unstable, and conditions remain favourable for rain and thundershowers.

DATE 1-2-1966 DATUM

AFLEIDING

Die Atlantiese hoog stoot 'n sterk rug suid van die land om. Dit sal dus opklaar oor die westelike kusgebiede, en bewolk bly met ligte reën oor die res van die kusgebiede. Oor die binneland is die lug voglig en onstabiel, en toestande bly dus gunstig vir reën en donderbuie.

INFERENCE

DATE 2 - 2 - 1966 DATUM

AFLEIDING

The coastal low along the Cape West coast will move rapidly around the coast to the Natal South coast. Fog will occur along the Cape West coast and showers will fall over the remaining coastal regions of the Cape. The low over the interior will move south-eastwards, but with moist air present over the interior, further showers and thundershowers will occur over most parts.

Die kuslaag langs die Kaapse Weskus sal vinnig om die kus beweeg na die Natalse Suidkus. Misbanke sal langs die weskus voorkom en buie sal uitsak oor die oorblywende dele van die Kaapse kusgebiede.

Die laag oor die binneland sal suidooswaarts beweeg maar met die vogtige lug aanwesig oor die binneland sal verdere buie en donderbuie voorkom oor die meeste dele.

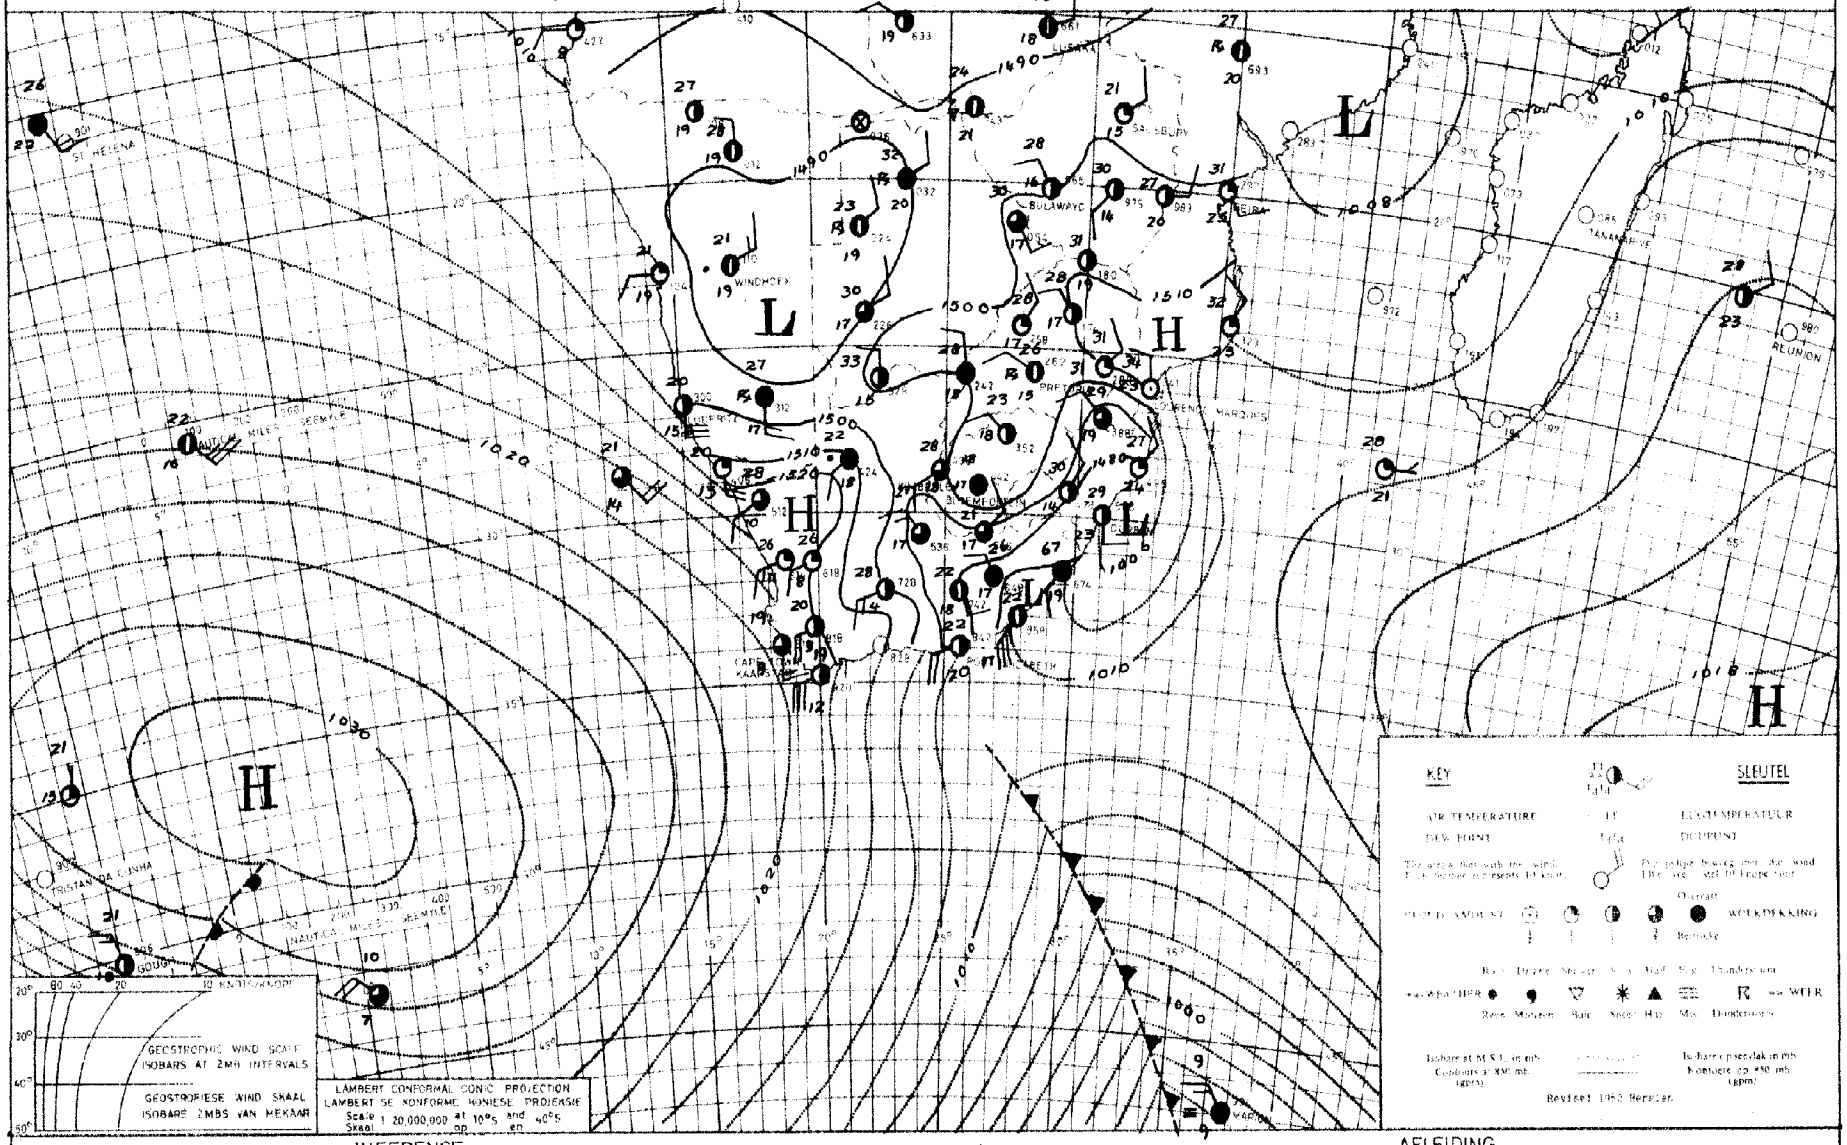
SYNOPTIC WEATHER MAP — 1200 GMT — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 3-2-1966 DATUM — AFLEIDING

The Atlantic high is strongly ridging in south of the country, as well as over the western interior. It will thus clear over the western areas and remain cloudy over the eastern parts. The air over the interior is moist and a trough is situated over the central interior, so that conditions remain favourable for showers and thundershowers over the eastern interior.

Die Atlantiese hoog stoot 'n sterk hoog suid van die land om, asook oor die westelike binneland. Dit sal dus opklaar oor die westelike dele en bewolk bly in die ooste. Met vogtige lug oor die binneland en 'n trog oor die sentrale dele, bly toestande gunstig vir buie of donderbuie oor die oostelike binneland.

Stegi			

The trough is still situated over the central interior and, with moist air in circulation, scattered to fairly general rain will recur over the eastern and northern parts of the country.

Die trog is nog steeds oor die sentrale binneland en met vogtige lug in sirkulasie sal verspreide tot taamlik algemene reën oor die oostelike en noordelike dele van die land voortduur.

INFERENCE

DATE 7 - 2 1966 DATUM

AFLEIDING

The high ridging in south of the continent is causing fine weather over the western part of the country. With a moist inflow in the east and a trough over the interior, showers will occur over the eastern half of the country.

Die hoog wat suid van die vasteland inbeweeg, veroorsaak opklaring oor die westelike dele van die land. Met 'n vogtige instroming in die ooste en 'n trog oor die binneland sal buie voorkom oor die oostelike helfte van die land.

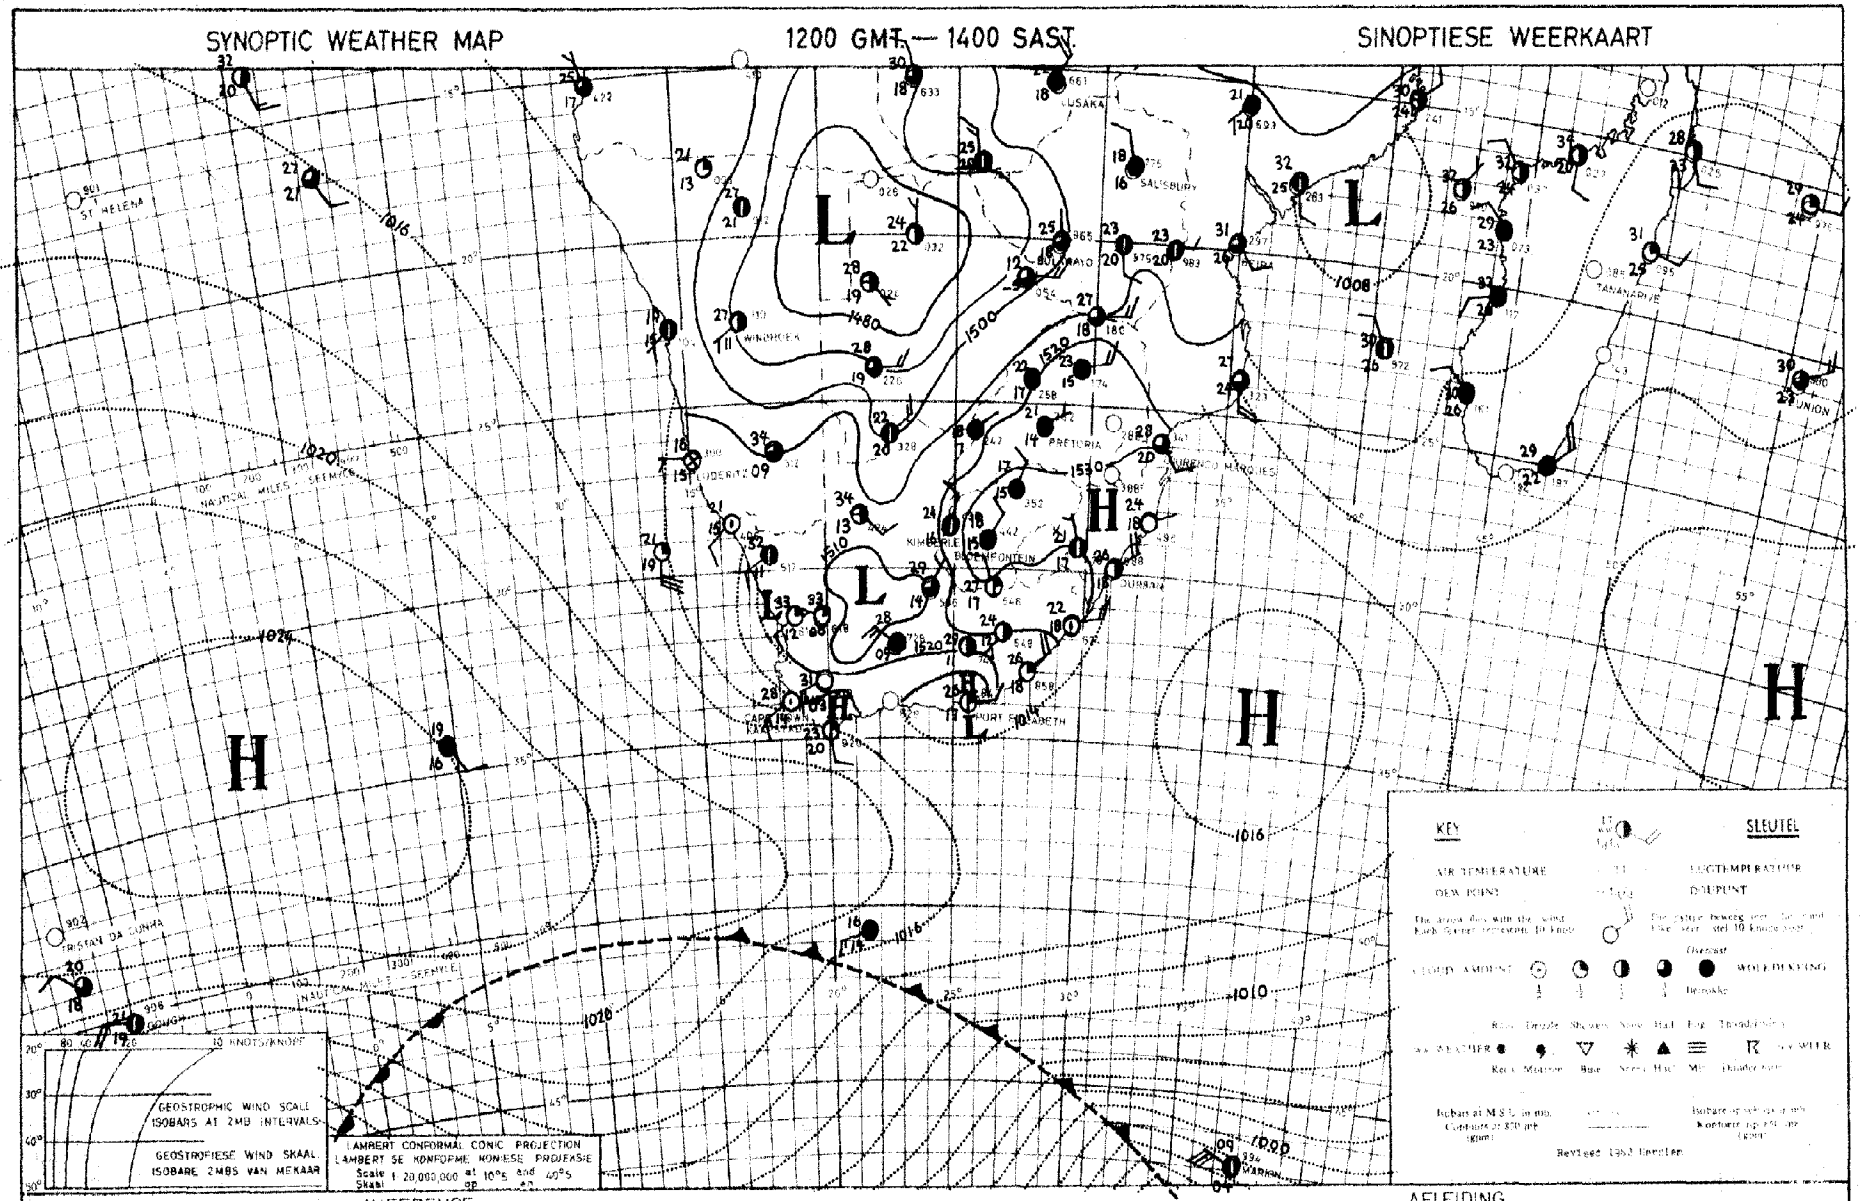
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST SINOPTIESE WEERKAART



INFERENCE DATE 8 - 2 - 19 66 DATUM AFLEIDING

The Atlantic high is once again ridging around the south coast, so that it will clear over the western parts and remain cloudy over the eastern parts of the country. The air over the interior is moist and showers and thundershowers will occur to the east of the trough over the central interia.

Die Atlantiese hoog stoot weereens 'n rug om die suidkus, sodat dit sal opklaar oor die westelike dele en bewolk bly in die ooste. Die lug oor die binneland is vogtig en verspreide reën of buie sal oos van die trog oor die sentrale binneland voorkom.

INFERENCE

DATE 9-2 19 66 DATUM

AFLEIDING

The Atlantic high is ridging in over the western parts of the country with the result that the trough over the interior will move eastwards. Thus rain or thundershowers will occur only over the eastern and north-eastern interior while it will clear over the central interior.

Die Atlantiese hoog druk oor die westelike dele van die land in sodat die trog oor die binneland ooswaarts sal beweeg. Gevolglik sal buie of donderbuie slegs oor die oostelike en noordoostelike binneland voorkom terwyl dit sal opklaar oor die sentrale binneland.

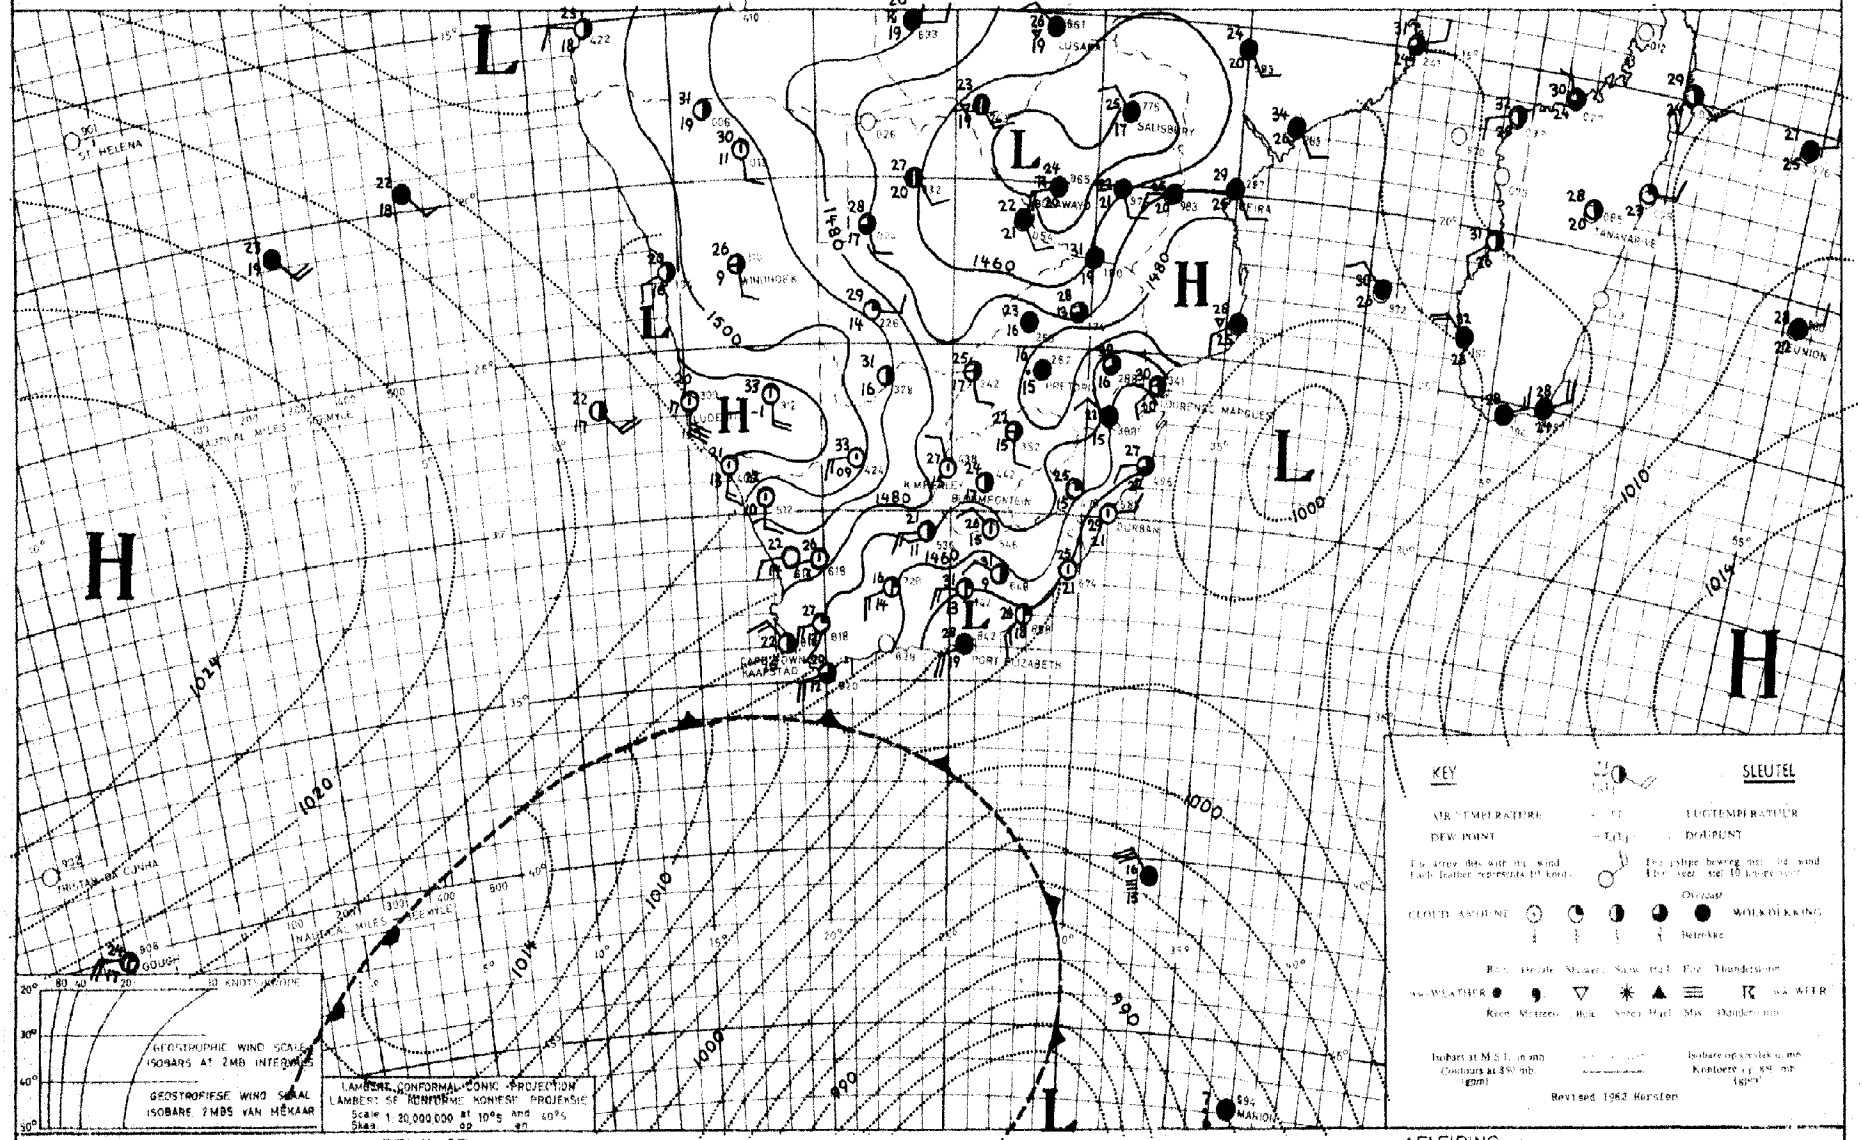
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 10-2 1966 DATUM AFLEIDING

The eastwards movement of the Atlantic high is causing cloudy cooler weather to spread along the southern and eastern coastal regions. Dry air associated with a high pressure system over the western interior is moving eastwards and will cause partial clearance over the Transvaal.

Die Atlantiese hoog beweeg ooswaarts en bewolkte weer sal langs die suid- en ooskusgebiede uitbrei. Droë lug wat gepaard gaan met 'n hoogdrukstelsel oor die westelike binneland beweeg ooswaarts en sal gedeeltelike opklaring oor Transvaal veroorsaak.

DAAGLIKSE WEERBULLETIN

'The Atlantic high which moves in over the western parts of the country is causing an inflow of dry air from the south over the interior, with the result that it will be fine over most parts except for Northern Transvaal and the northern parts of Bechuanaland where scattered showers will occur.

Die Atlantiese hoog wat oor die westelike dele van die land inbeweeg, veroorsaak 'n stroom van droë lug vanaf die suide oor die binneland. sodat dit mooiweer sal wees oor die meeste dele behalwe oor Noord-Transvaal en die noordelike dele van Betsjoeanaland waar verspreide buie sal uitsak.

INFERENCE

DATE 12 — 2 1966 DATUM

AFLEIDING

Moist air is moving southwards again as a result of the ridge which moves in over the eastern interior, and showers or thundershowers will recur over Northern Transvaal and will spread to Western Tranvaal, the Vryburg Mafeking area and Bechuanaland.

Vogtige lug stroom weer suidwaarts as gevolg van die rug wat oor die oostelike dele inbeweeg het en buie of donderbuie sal weer oor Noord-Transvaal uitsak en uitbrei na Wes-Transvaal, die Vryburg Mafekinggebied en Betsjoeanaland.

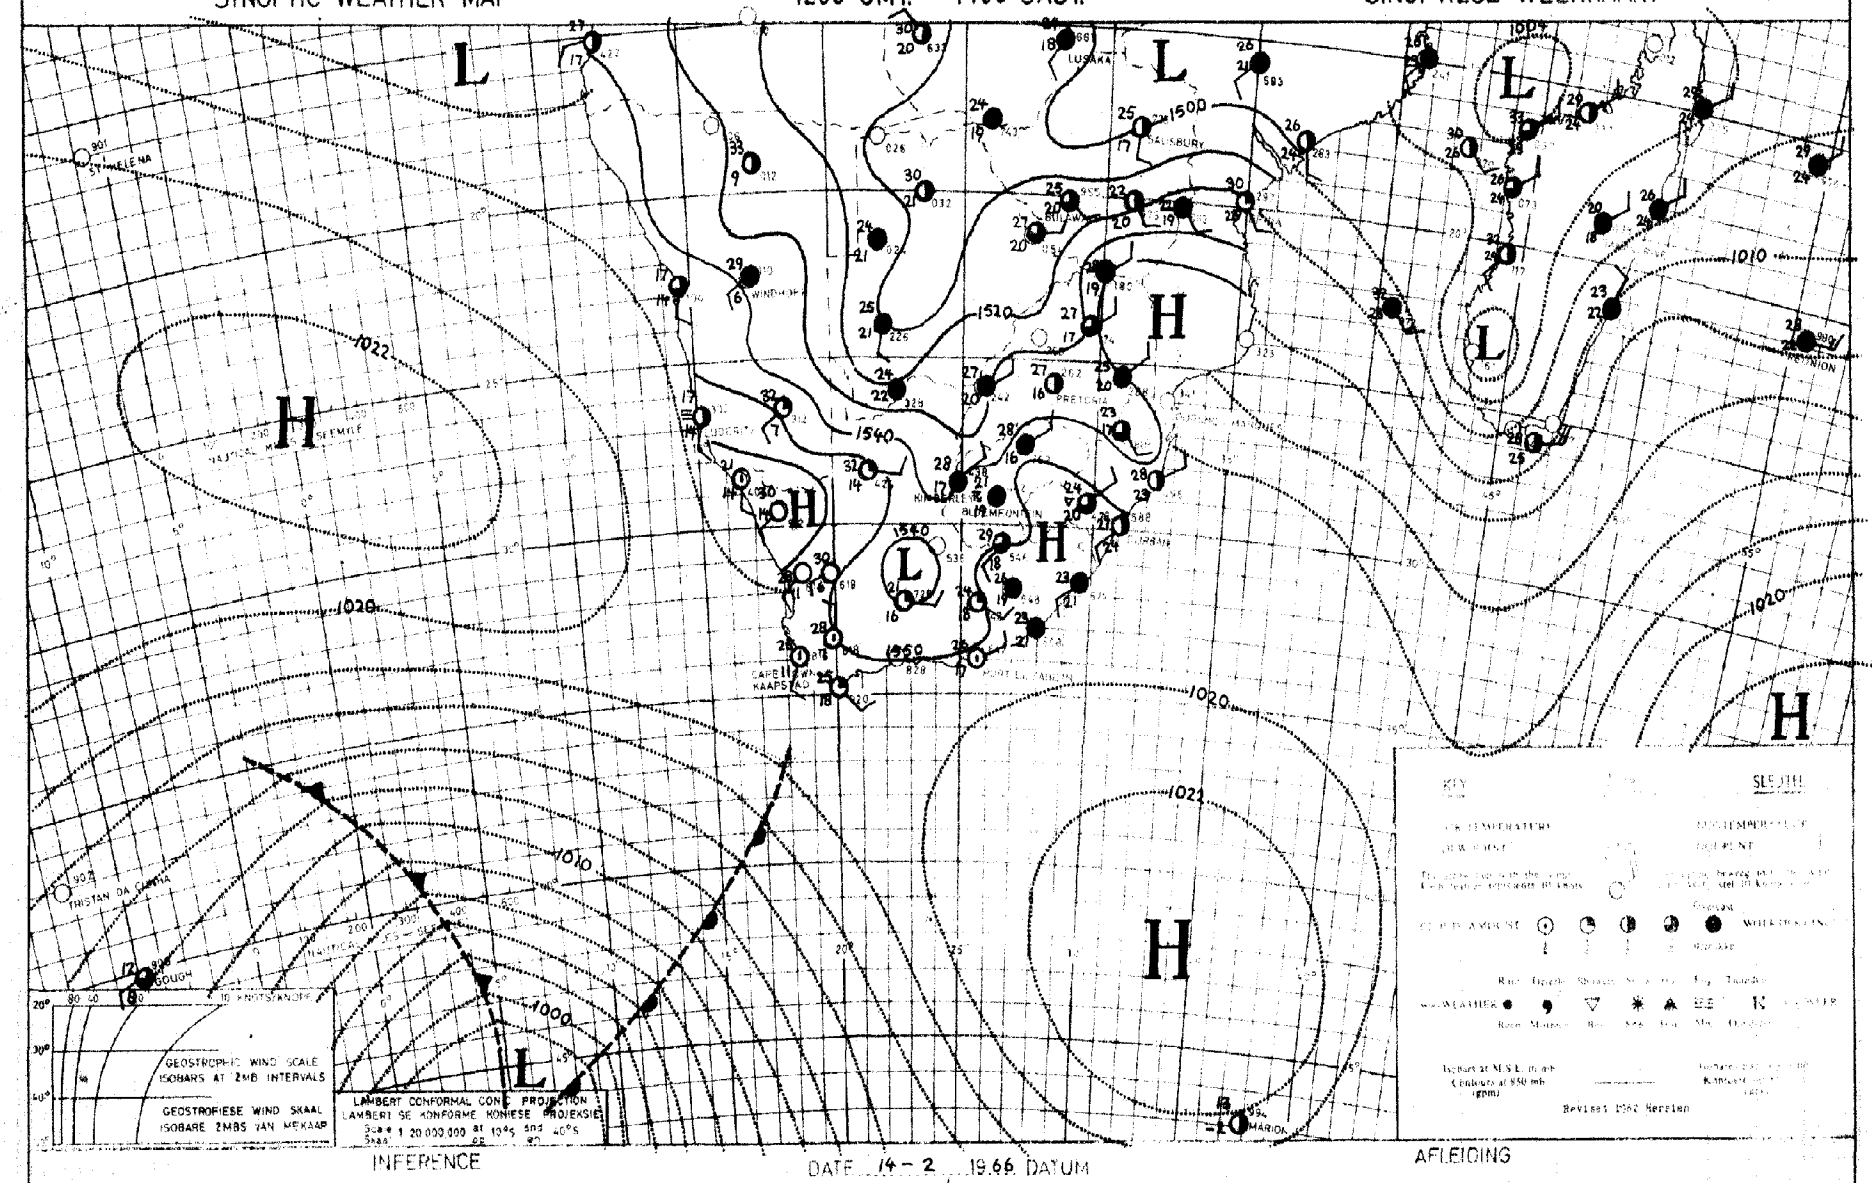
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 14 - 2 19.66 DATUM AFLEIDING

The high south-east of the continent is causing moist air to flow in over the eastern areas of the country where it will be cloudy to partly cloudy. The trough over the central interior will cause thundershowers to develop over the central and eastern areas

Die hoog suidoos van die vasteland voer vogtige lug oor die oostelike dele van die land in waar dit bewolk tot gedeeltelik bewolk sal wees. Die trog oor die sentrale binneland sal donderbuie oor die sentrale en oostelike gebiede veroorsaak.

DAAGLIKSE WEERBULLETIN

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

INFERENCE

DATE 16-2-1966 DATUM

AFLEIDING

The Atlantic high is ridging in south of the country and the low over the northeastern interior will move westwards to the northern interior with the result that scattered thundershowers will occur over the northern and north-western interior. Cloudy weather with showers will spread over the eastern coastal regions and the eastern lowveld areas.

Die Atlantiese hoog druk 'n rug van hoë druk suid van die land in en die laag oor die noordoostelike binneland sal weswaarts beweeg na die noordelike dele sodat verspreide donderbuie oor die noordelike en noordwestelike dele sal voorkom. Bewolkte weer met buie sal oor die oostelike kusgebiede en die oostelike laeveldstreke voorkom.

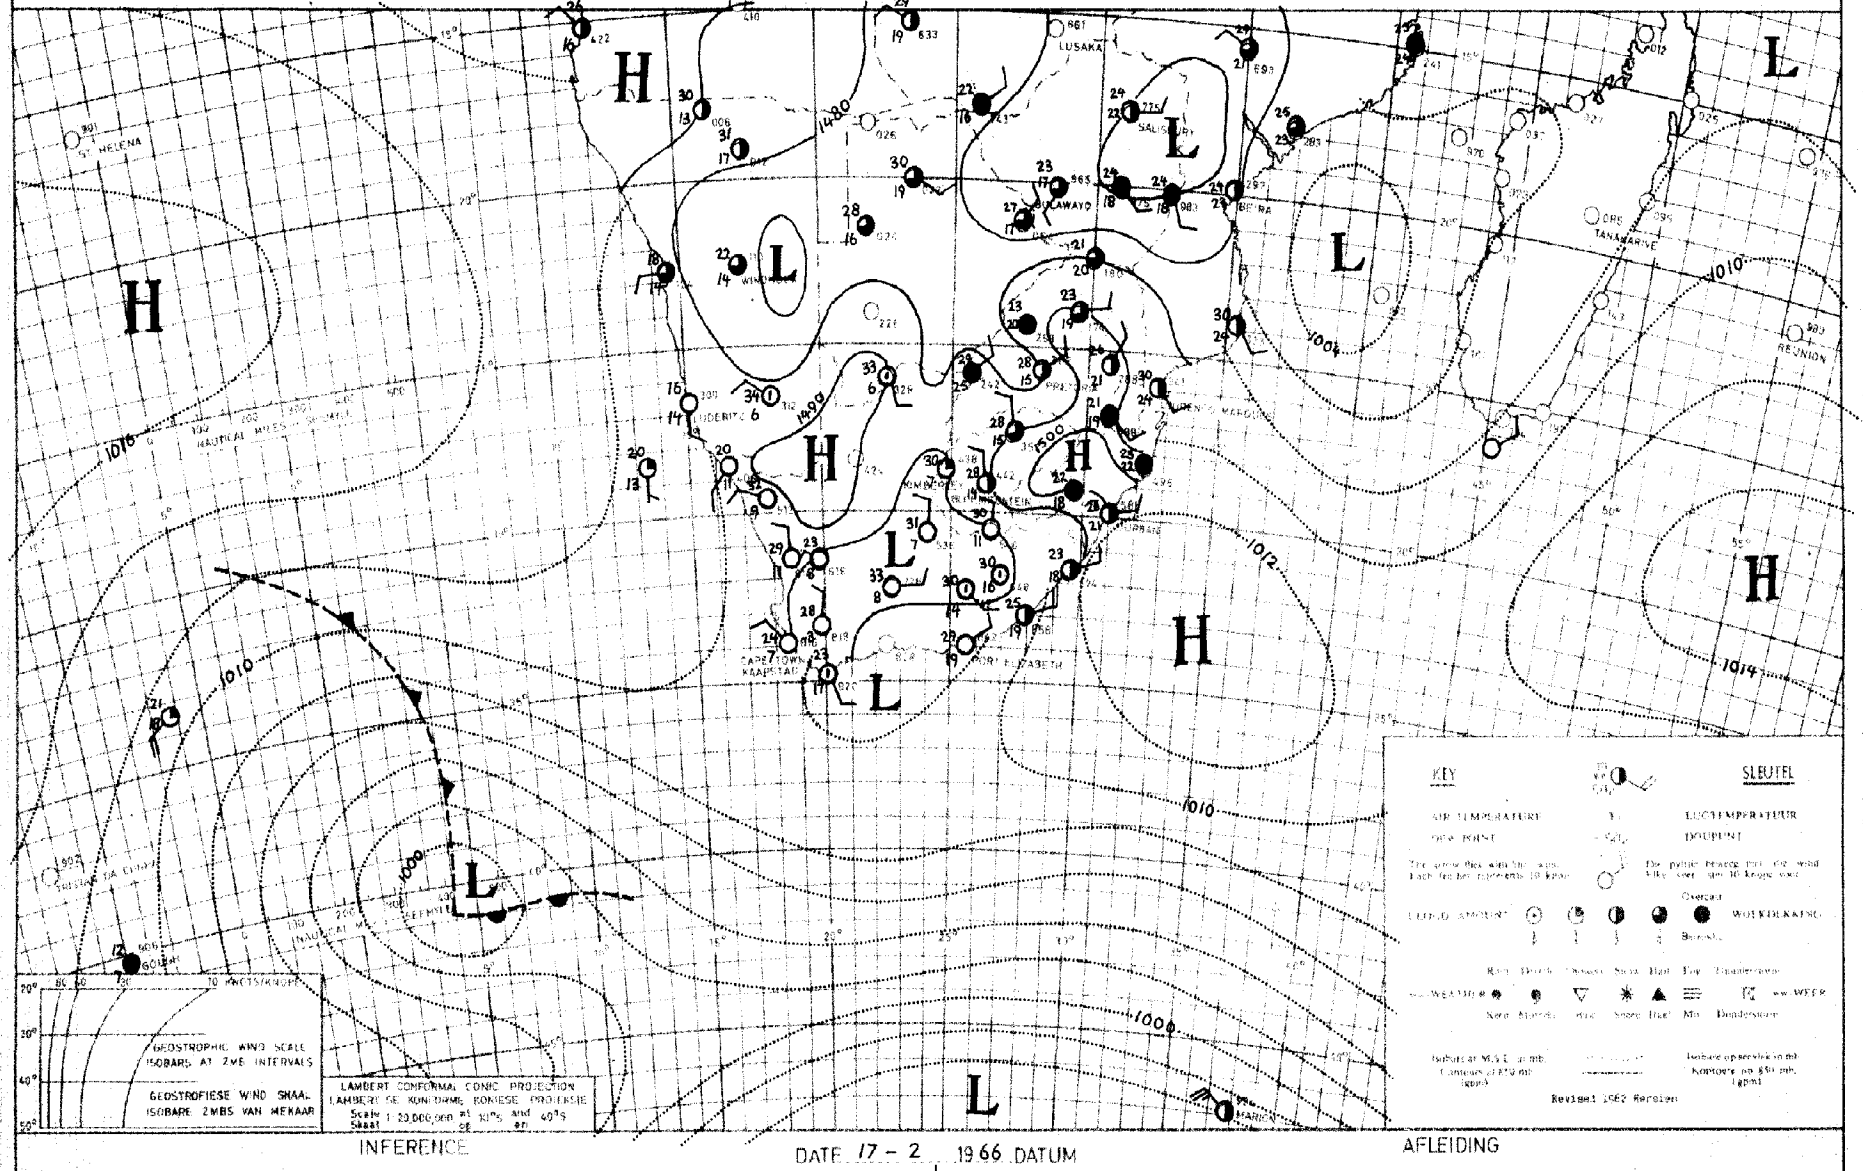
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 17 - 2 1966 DATUM AFLEIDING

The eastwards moving cold front over the Atlantic Ocean will later cause cloudy weather over the Cape south-western coastal regions where light rain will occur. Over the eastern parts of the country with moist air in circulation it will be partly cloudy to cloudy with thundershowers.

Die koue front oor die Atlantiese oseaan beweeg ooswaarts en sal bewolkte weer later oor die Kaapse suidweskusstreke veroorsaak en ligte reën sal voorkom. Vogtige lug is aanwesig oor die oostelike dele waar dit gedeeltelik bewolk tot bewolk sal wees met donderbuie.

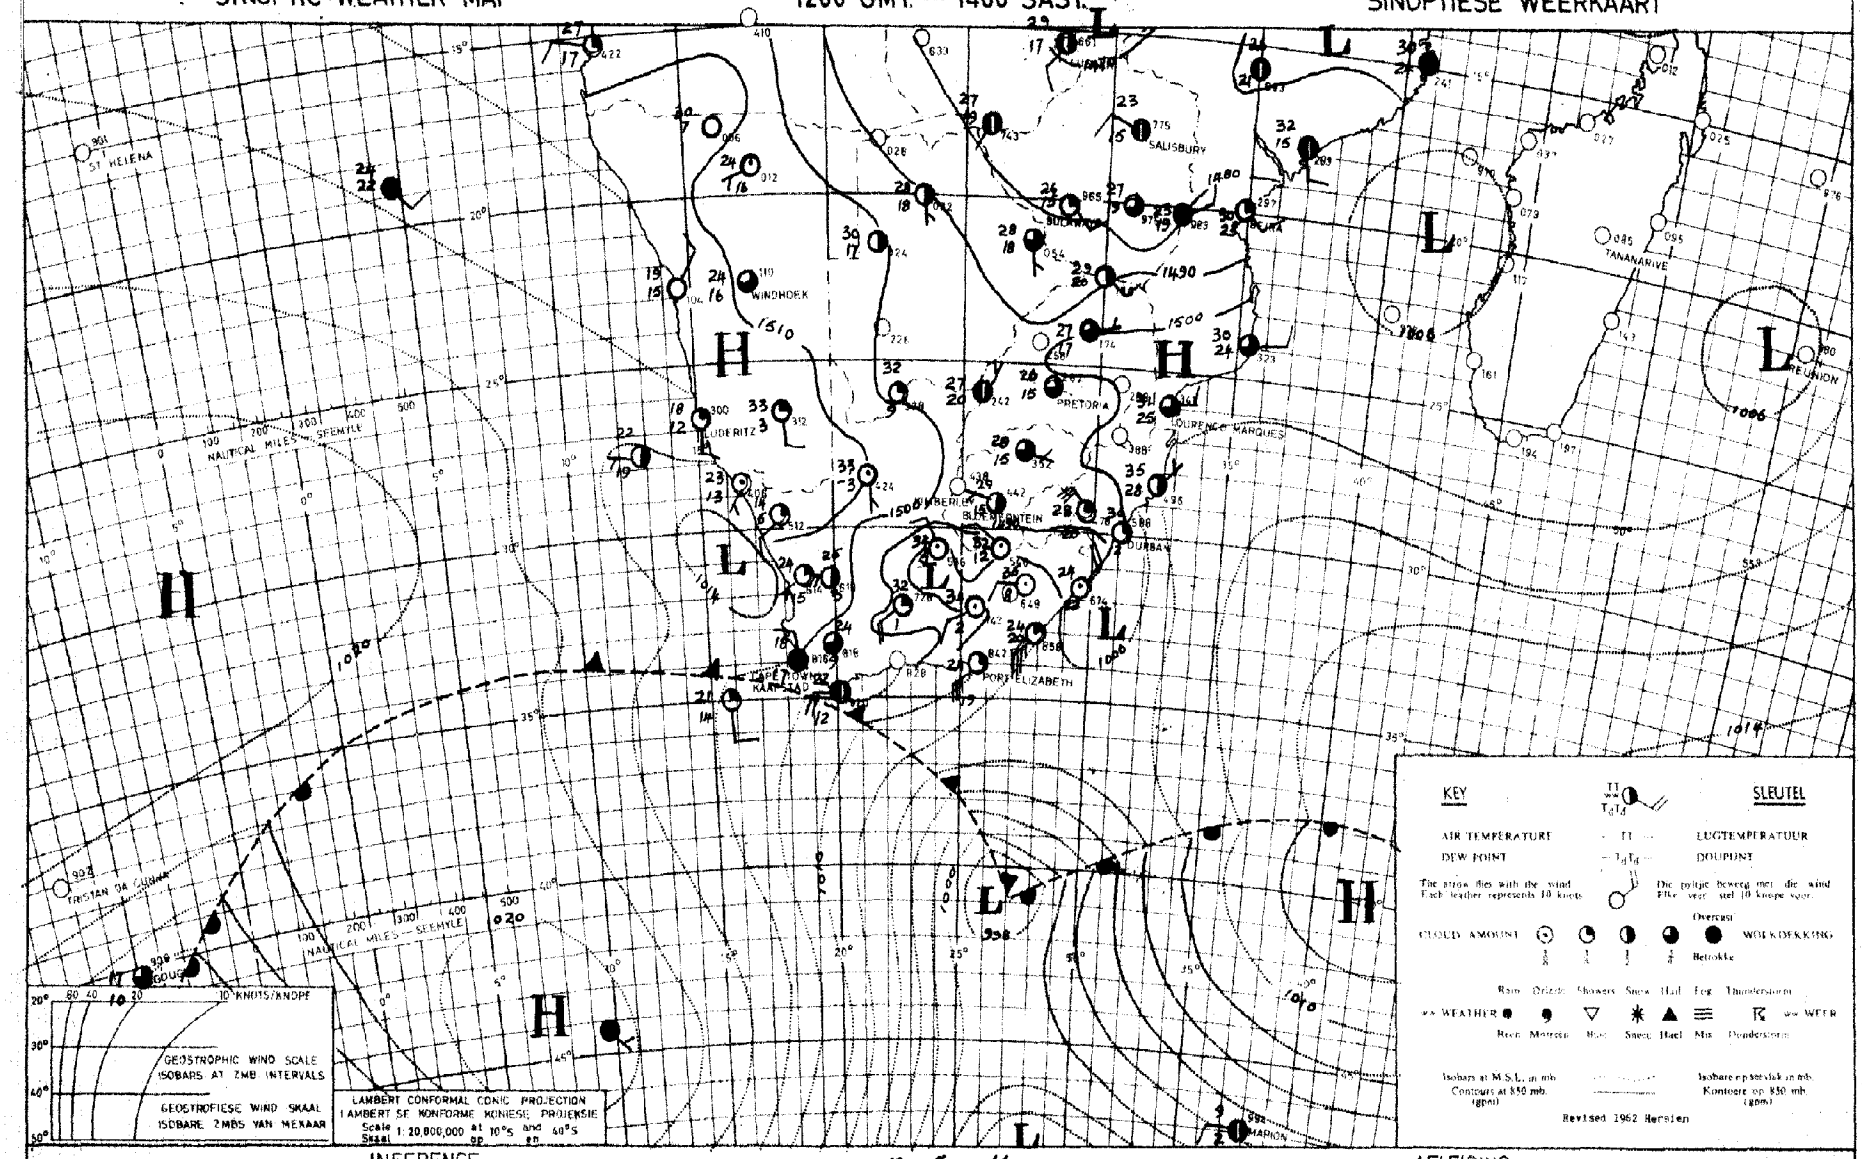
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

DATE 18 - 2 - 1966 DATUM

AFLEIDING

Moist air is present over the eastern and north-eastern interior and with the trough, stretching northwards from the eastern Cape towards south-western Transvaal isolated showers and thundershowers will occur over the eastern and north-eastern interior. Cooler, cloudy weather will spread along the Cape coastal regions behind the weak cold front near the south-western coast.

Vogtige lug is oor die oostelike en noordoostelike binneland aanwesig en met die trog wat vanaf Oos-Kaapland na Wes-Transvaal strek, sal los buie of donderbuie oor die oostelike en noordoostelike binneland voorkom. Koeler bewolkte weer sal langs die Kaapse kusstreke uitbreid agter die swak koufront wat naby die suidwestkus gelee is.

INFERENCE

DATE 19 - 2 19 66 DATUM

AFLEIDING

Moist air is present over the eastern parts of the country and with the trough over the central interior, thundershowers will occur over the central, eastern and south-eastern interior.

Vogtige lug is oor die oostelike dele van die land aanwesig, en met die trog oor die sentrale dele sal donderbuie oor die sentrale, oostelike en suidoostelike binneland voorkom.

INFERENCE

DATE 20 – 2 1966 DATUM

AFLEIDING

Moist air is present over the eastern half of the country, and with the trough over the central interior thundershowers will occur over the eastern half of the country. The weak cold front south-west of the country will not influence the Cape weather but the Atlantic high, ridging in behind the cold front will cause cloudy weather over the southern and eastern coastal regions.

Vogtige lug is oor die oostelike dele van die land aanwesig en met die trog oor die sentrale binneland sal donderbuie oor die oostelike helfte van die land voorkom. Die swak kouefront suidwes van die land sal nie die Kaapse weer beïnvloed nie, maar as gevolg van die Atlantiese hoog wat agter die kouefront inbeweeg, sal bewolkte weer oor die suidelike en oostelike kusstreke uitbrei.

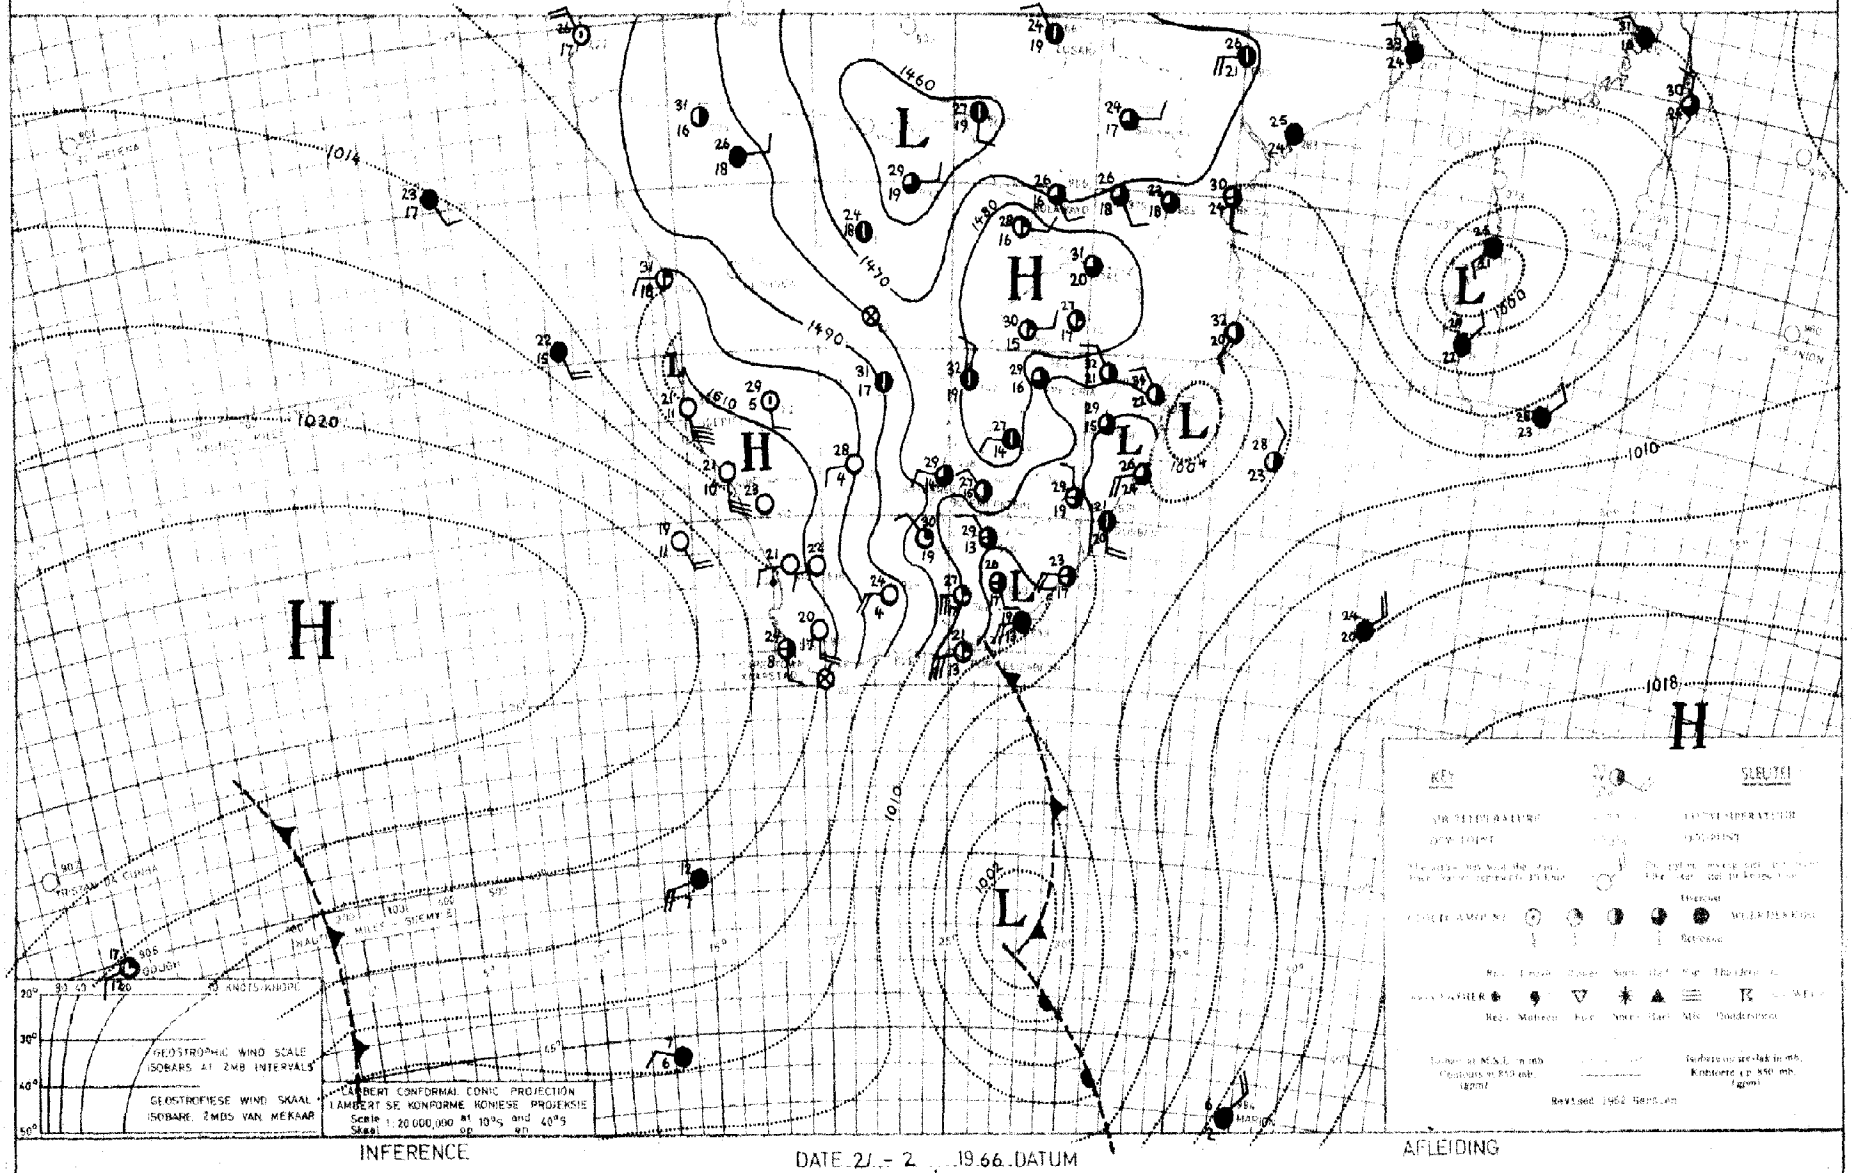
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST SINOPTIESE WEERKAART



INFERENCE DATE 21 - 2 19 66 DATUM AFLEIDING

The Atlantic high is ridging in around the south coast, and also over the western interior, so that it will clear over the western regions of the country, and remain cloudy over the eastern coastal areas. Thunder showers will develop over the eastern interior.

The Atlantiese hoog stoot 'n rug om die suidkus en ook oor die westelike binneland. Dit sal dus opklaar oor die westelike dele van die land en bewolk bly oor die oostelike kusgebiede, met donderbuie oor die oostelike binneland.

INFERENCE

DATE 22 - 2 1966 DATUM

AFLEIDING

The high pressure ridge off the south-eastern coast is causing moist air to flow in over the eastern regions where it will be cloudy and cooler. With a dry anticyclonic circulation in the west it will be fine over this region. Warm moist air present in the north will give rise to thundershowers.

Die hoogdrukgebied langs die suidooskus veroorsaak 'n instroming van vogtige lug oor die oostelike gebiede waar dit bewolk en koeler sal wees. Met 'n droë antisiklonale sirkulasie oor die westelike dele sal dit mooiweer oor hierdie streek wees. Warm vogtige lug is aanwesig in die noorde en sal donderbuie veroorsaak.

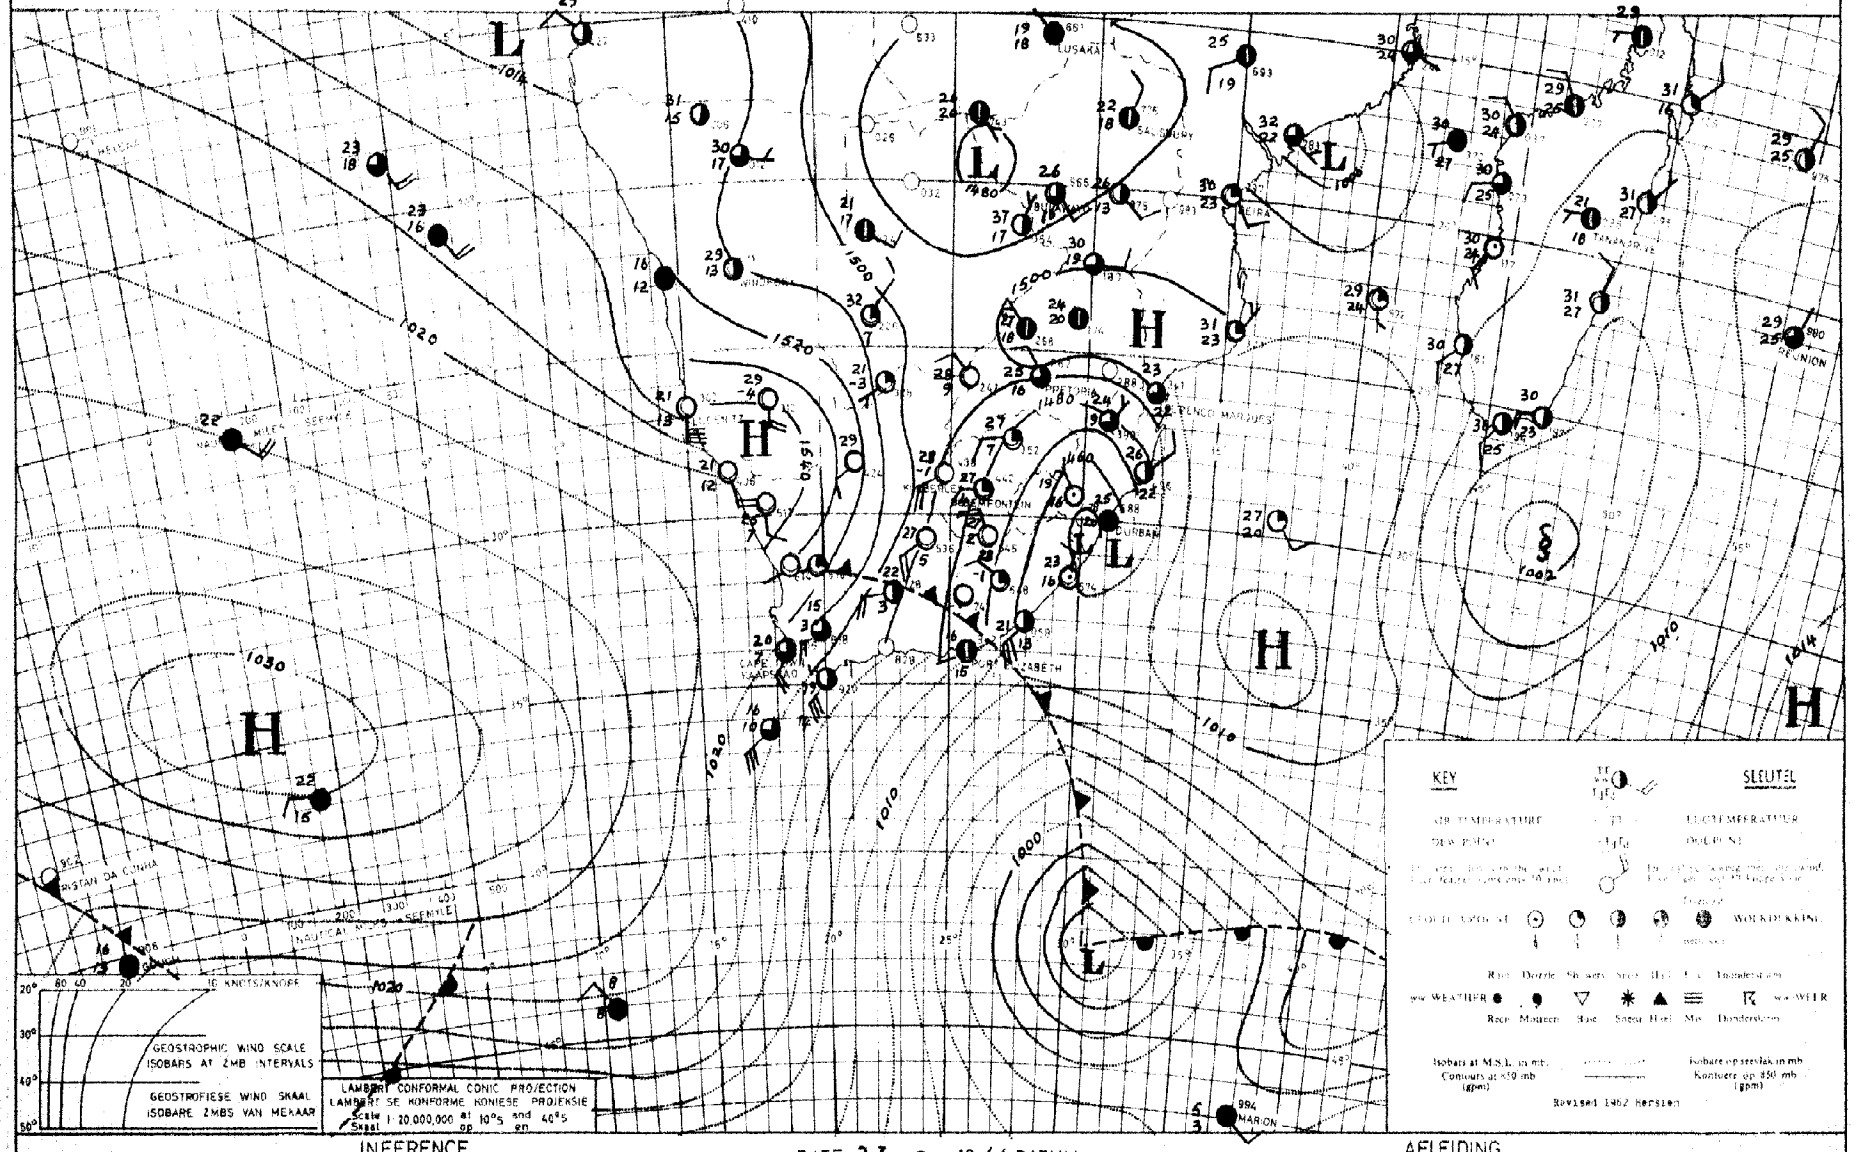
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 23 - 2 - 1966 DATUM AFLEIDING

The cold front situated over the south-western Cape Province will move north-eastwards with the result that cooler cloudy weather with showers will spread over the coastal regions, while it will be fine over most interior regions as a result of the dry air moving in from the south over the country. Isolated thundershowers will still occur over the north-eastern Transvaal.

Die koufront wat oor die suidwestelike dele van Kaapland gelee is sal noordooswaarts beweeg sodat koeler bewolkte weer met buie langs die kusstreke sal uitbreek terwyl dit mooiweer sal wees oor die meeste binnelandse streke as gevolg van die droë lug wat vanuit die suide oor die land inbeweeg. Enkele donderbuie sal nog oor die Noordoos-Transvaal voorkom.

INFERENCE

DATE 24 - 2 - 1966 DATUM

AFLEIDING

A weak cell of the Atlantic high is expected to split off and move around the south coast, so that it will clear over the southern and south-eastern coastal areas. Moist air will flow in over the north-eastern interior, where a few thundershowers will develop.

'n Swak sel van die Atlantiese hoog word verwag om om die suidkus te beweeg sodat dit sal opklaar oor die suidelike en suidoostelike kusgebiede. Vogtige lug sal dan oor die noordoostelike binneland inbeweeg, waar enkele donderbuie moontlik is.

The high off the east coast is causing moist air to flow in over Northern and Eastern Transvaal where it will be cloudy. Cloudy weather will also occur over the south-western coast as the cold front over the Atlantic Ocean moves eastwards.

Die hoog langs die Ooskus veroorsaak 'n invloei van vogtige lug oor Noord- en Oos-Transvaal waar dit bewolk sal wees. Bewolkte weer sal ook langs die suidwestelike kusgebiede voorkom as gevolg van die ooswaartse beweging van die kouefront oor die Atlantiese oseaan.

Revised 1962 Hensen

INFERENCE DATE 26- 2- 1966 DATUM AFLEIDING

The cold front moving along the south coast will cause cloudy, cooler weather with showers along this region as well as over the eastern coastal areas. Cooler air will also flow in over the southern interior.

Die koufront wat langs die suidkus beweeg, sal bewolkte, koeler weer met buie oor hierdie gebied veroorsaak asook langs die oostus-streke. Bewolkte weer sal ook oor die suidelike binneland inbeweeg.

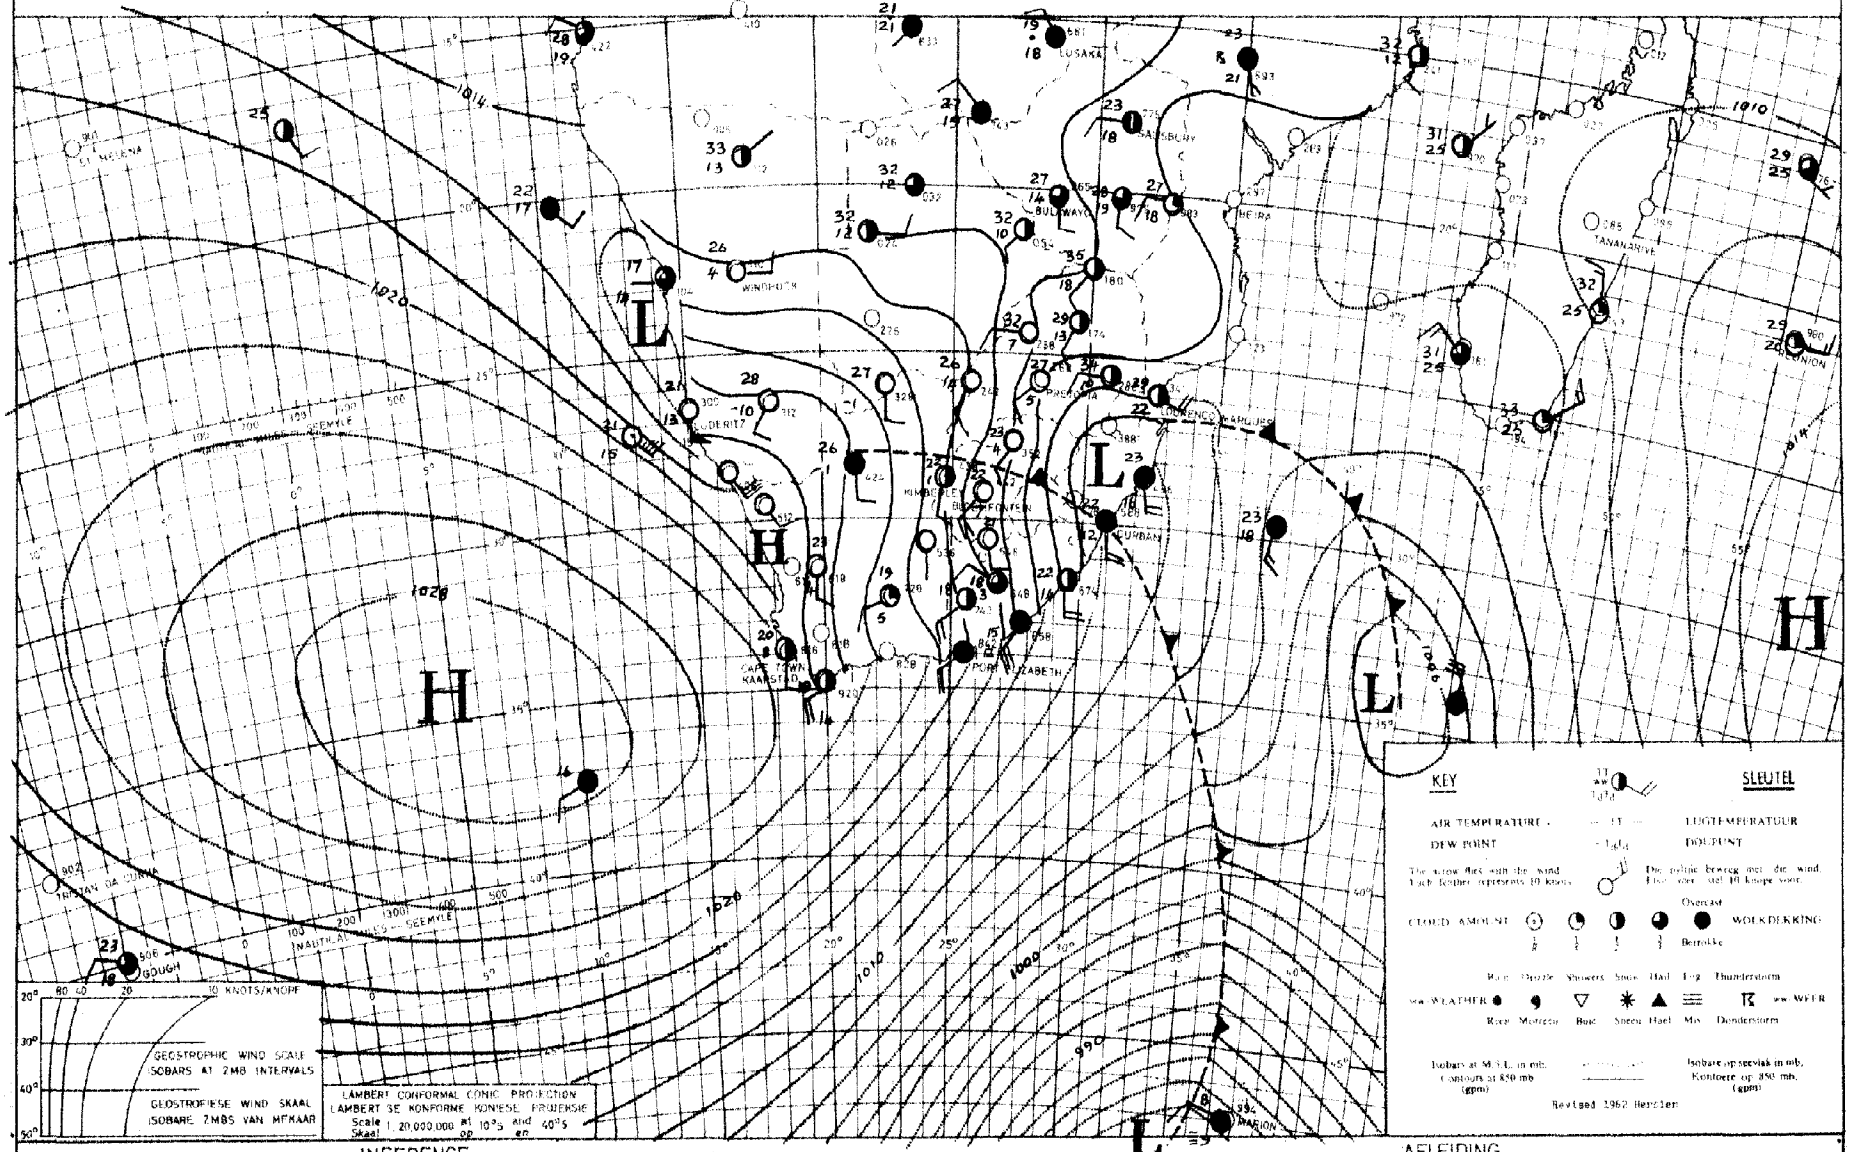
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 27 - 2 - 1966 DATUM — AFLEIDING

The Atlantic high is ridging in south of the continent causing clearance over the south-western coasts while cloudy weather is spreading to the eastern parts.

Die Atlantiese hoog druk suid van die vasteland in en veroorsaak opklaring oor die suidwestelike kusgebiede terwyl bewolkte weer na die oostelike dele sal uitbrei.

INFERENCE

DATE 28 - 2 - 1966 DATUM

AFLEIDING

The Atlantic high is ridging around the south coast, and a cell is expected to form off the Natal coast. Thus it will be cloudy over the Southern Cape coast, and temporary cloudy conditions will also spread over the north-eastern interior.

Die Atlantiese hoog stoot 'n rug om die suidkus en 'n sel word verwag om later langs die Natalse kus te vorm. Dit sal dus bewolk wees oor die Kaapse suidkus en tydelike bewolkte toestande sal oor die noordoostelike binneland uitbrei.

INFERENCE

DATE 1 - 3 - 1966 DATUM

AFLEIDING

The coastal low along the Cape West Coast is moving around the coast and consequently cloudy, cooler weather will spread to the coastal regions of the Cape Province. The air over the interior is dry and the circulation anticyclonic so that it will be fair over these regions.

Die kuslaag langs die Kaapse Weskus sal om die kus beweeg sodat bewolkte, koeler weer langs die kusgebiede van die Kaapprovinsie sal uitbrei. Die lug oor die binneland is droog en die sirkulasie antisiklonaal sodat dit hoofsaaklik mooiweer sal wees oor hierdie gebiede

INFERENCE

The air is dry over the interior where it will be fine, except for the northern parts where it will be partly cloudy. Isolated thundershowers will occur over the northern regions of South-West Africa and Bechuanaland where the air is still rather moist. Cloudy, cooler weather with light rain will spread over the southern and eastern coastal regions behind the cold front situated near the south-western Cape coast, which will move eastwards.

DATE 2 - 3 - 1966 DATUM

AFLEIDING

Die lug is droog oor die binneland waar dit mooi-weer sal wees, behalwe oor die noordelike dele waar dit gedeeltelik bewolk sal wees. Enkele donderbuie sal oor die noordelike dele van Suidwes-Afrika en Betsjoeanaland uitsak, waar die lug nog vogtig is. Bewolkte koeler weer met ligte buie sal langs die suidelike en oostelike kusstreke uitbrei, agter die koufront wat net voor die Kaapse suidweskus gelê is en ooswaarts sal beweeg.

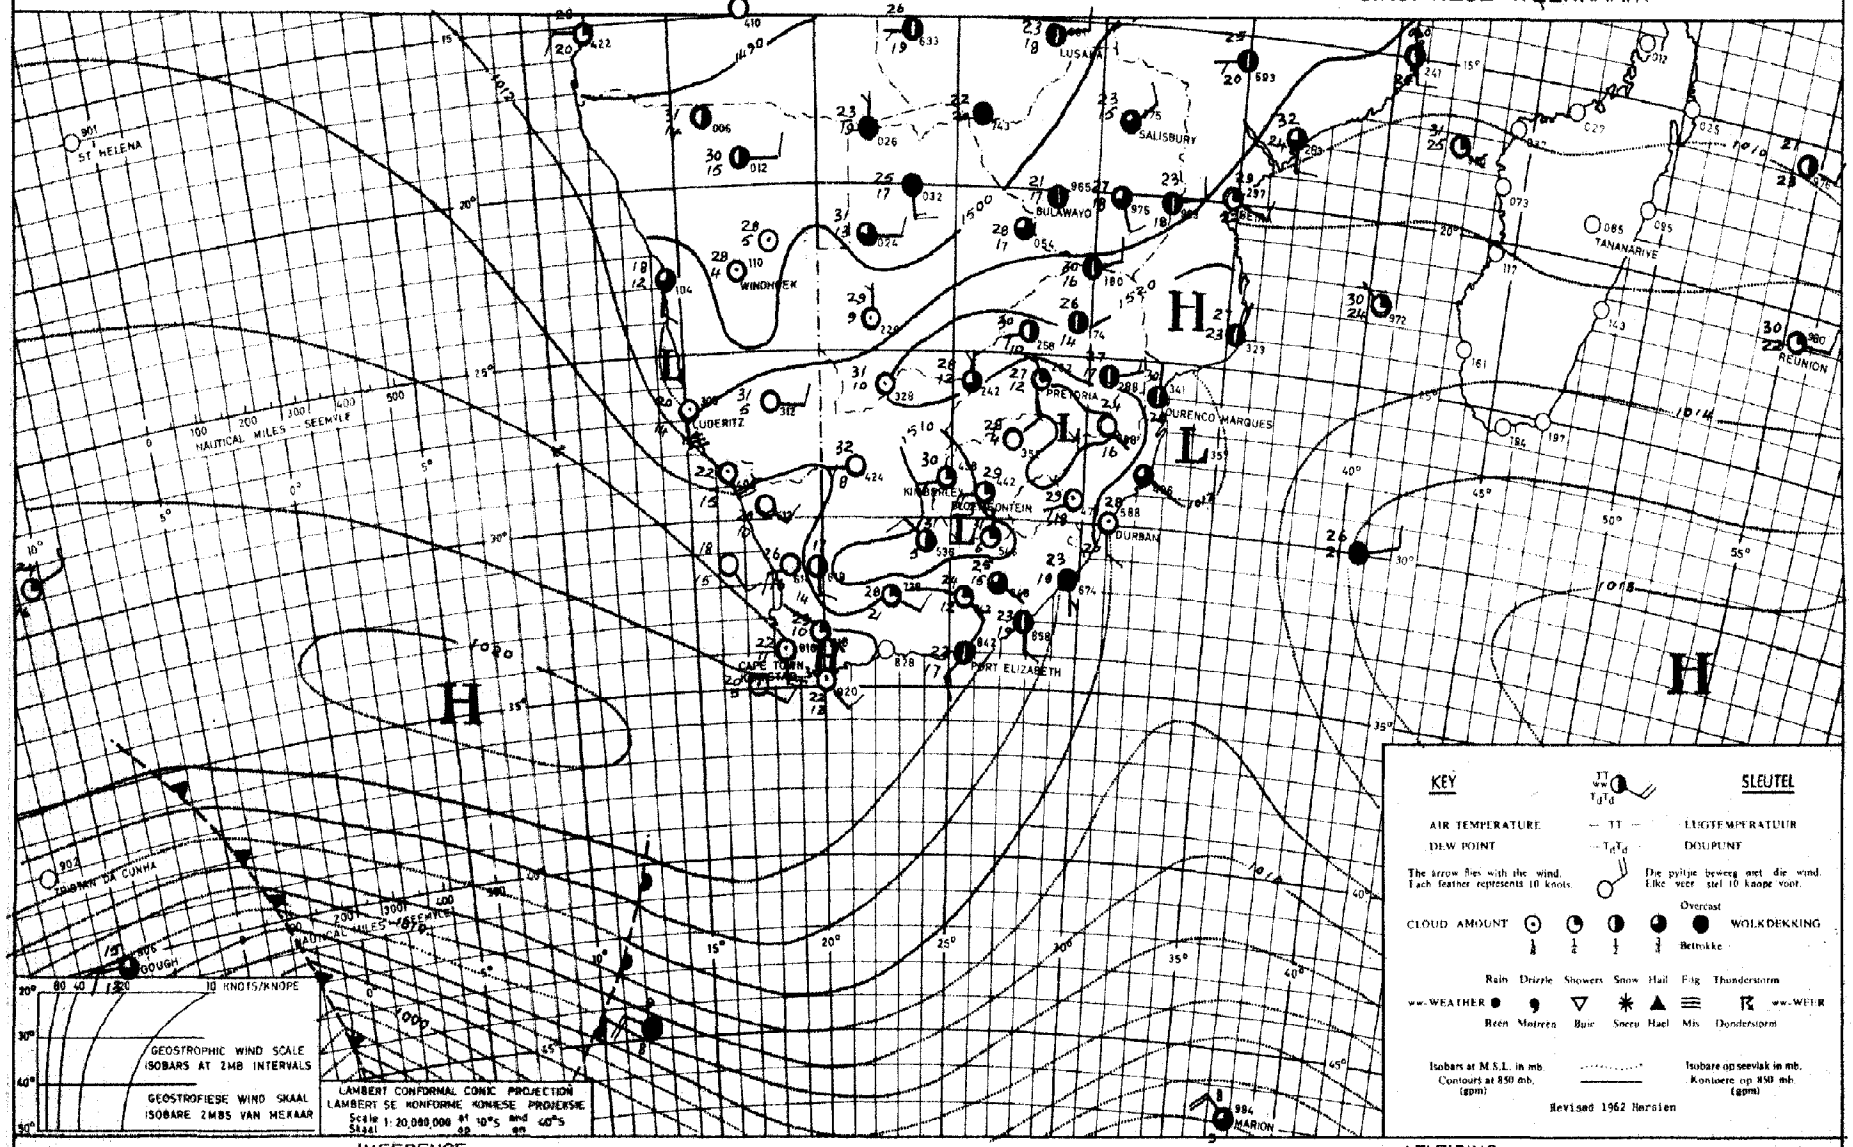
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

DATE 3-3-19 66 DATUM

AFLEIDING

A separate cell of high pressure is expected off the Natal coast, thus conditions will improve for thundershowers over the eastern interior. It will remain cloudy with showers over the eastern coastal areas. Over the remainder of the country the air is dry and thus the present fine weather will persist.

'n Aparte sel van hoë druk word langs die Natalse kus verwag en dus sal toestande gunstiger word vir donderbuie oor die oostelike binneland. Dit sal oor die oostelike kusgebiede bewolk bly met buie. Oor die res van die land is die lug droog en die mooiweerstoestande sal voortduur.

SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART

INFERENCE DATE 5 - 3 - 19 46 DATUM AFLEIDING

Moist air from the east has penetrated large regions of the interior where partly cloudy weather with isolated thundershowers will occur.

Vogtige lug vanuit die ooste het oor groot dele van die binneland inbeweeg waar dit gedeeltelik bewolk sal wees met los donderbuie.

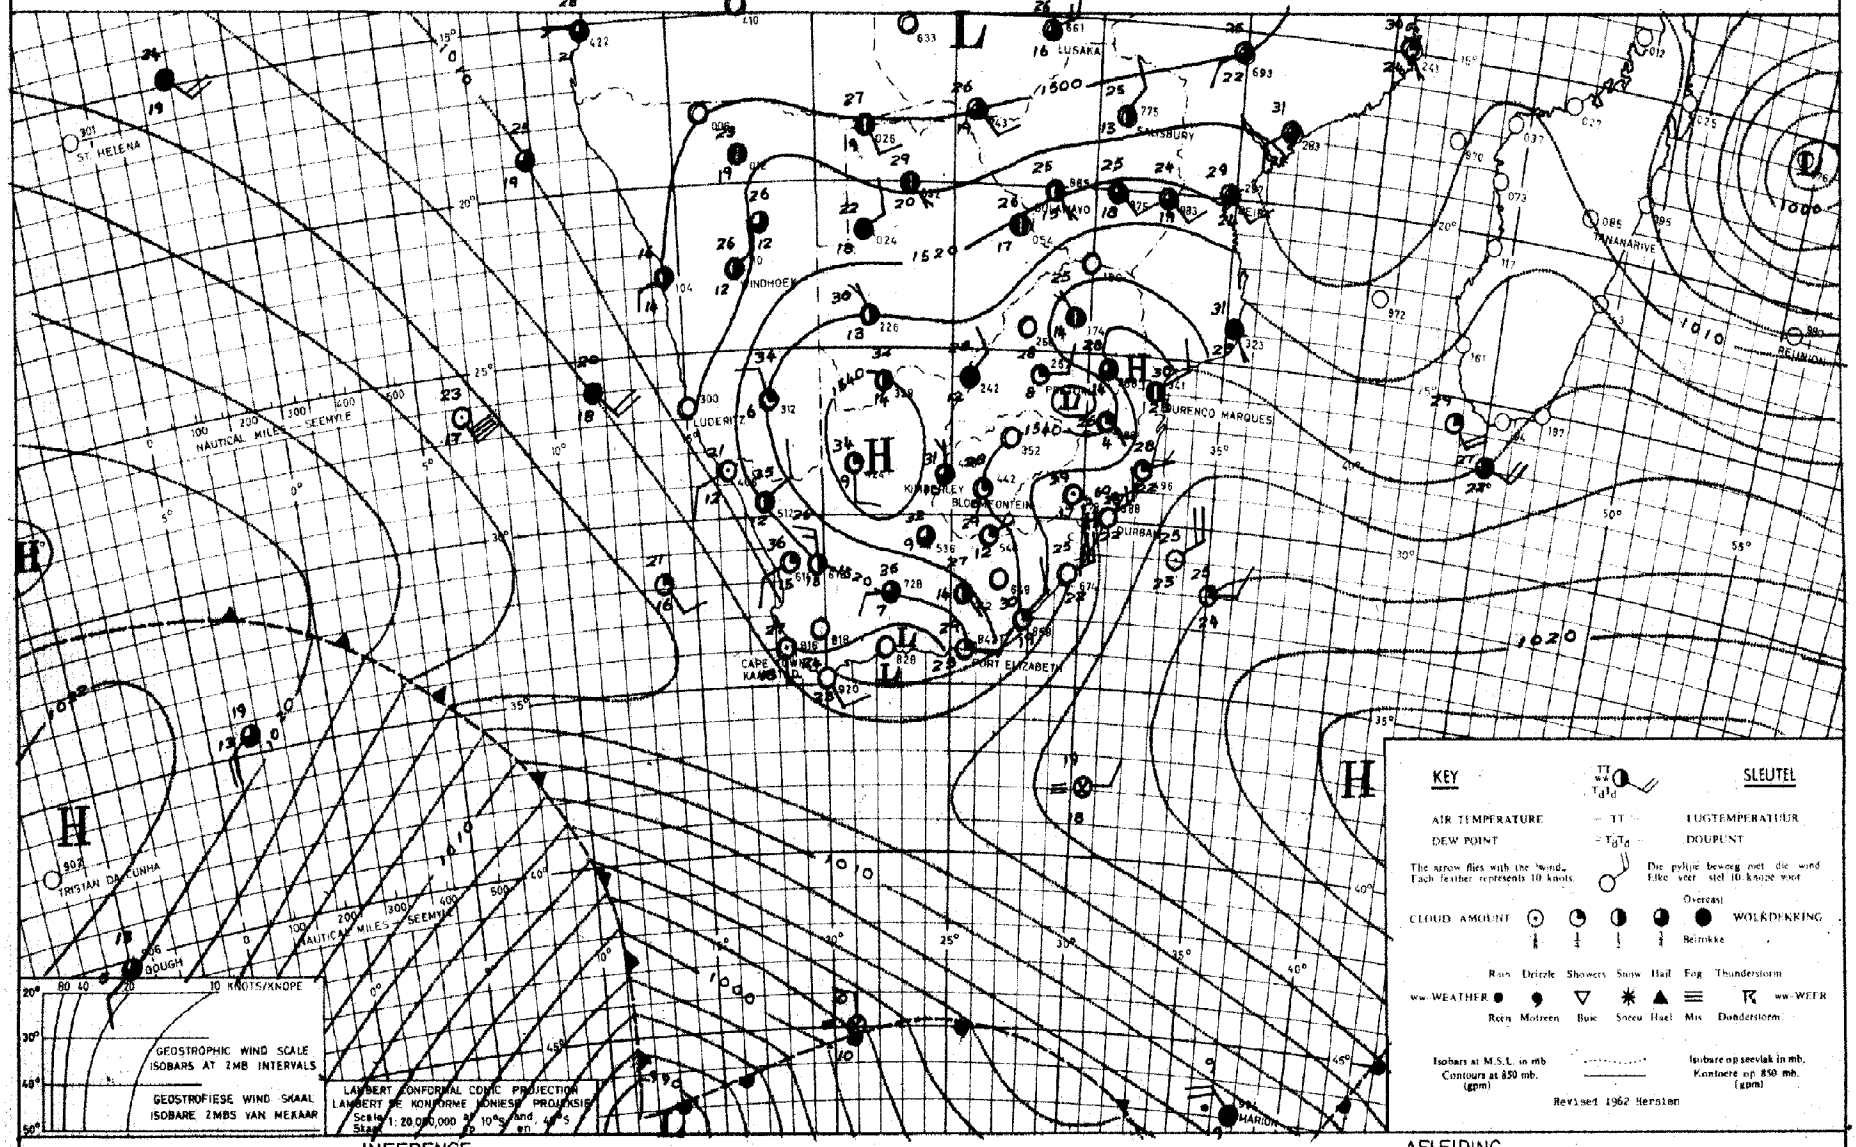
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



KEY — SLEUTEL

AIR TEMPERATURE	TT	LUGTEMPERATUUR
DEW POINT	T_dT_d	DOUPUNT

The arrow flies with the wind. Each feather represents 10 knots.
Die pyltjie beweeg met die wind. Elke veer stel 10 knope voor.

CLOUD AMOUNT — Overcast — WOLKDEKKING — Betrokke

ww-WEATHER — Rain, Drizzle, Showers, Snow, Hail, Fog, Thunderstorm — ww-WEER — Reën, Motreën, Buie, Sneeu, Hael, Mis, Donderstorm

Isobars at M.S.L. in mb — Isobare op seevlak in mb.
Contours at 850 mb. (gpm) — Kontoere op 850 mb. (gpm)

Revised 1962 Hersien

INFERENCE

The low pressure area along the Cape south coast will cause cloudy to partly cloudy weather along thus regions. Conditions over the interior have not changed much and isolated thundershowers will occur as dew points are fairly high.

DATE 6 - 3 - 1960 DATUM

AFLEIDING

Die laagdrukgebied langs die Kaapse suidkus sal bewolkte tot gedeeltelik bewolkte weer langs hierdie streek veroorsaak. Toestande oor die binneland het nie veel verander nie en los donderbuie sal ontwikkel aangesien doupunte taamlik hoog is.

DAAGLIKSE WEERBULLETIN

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

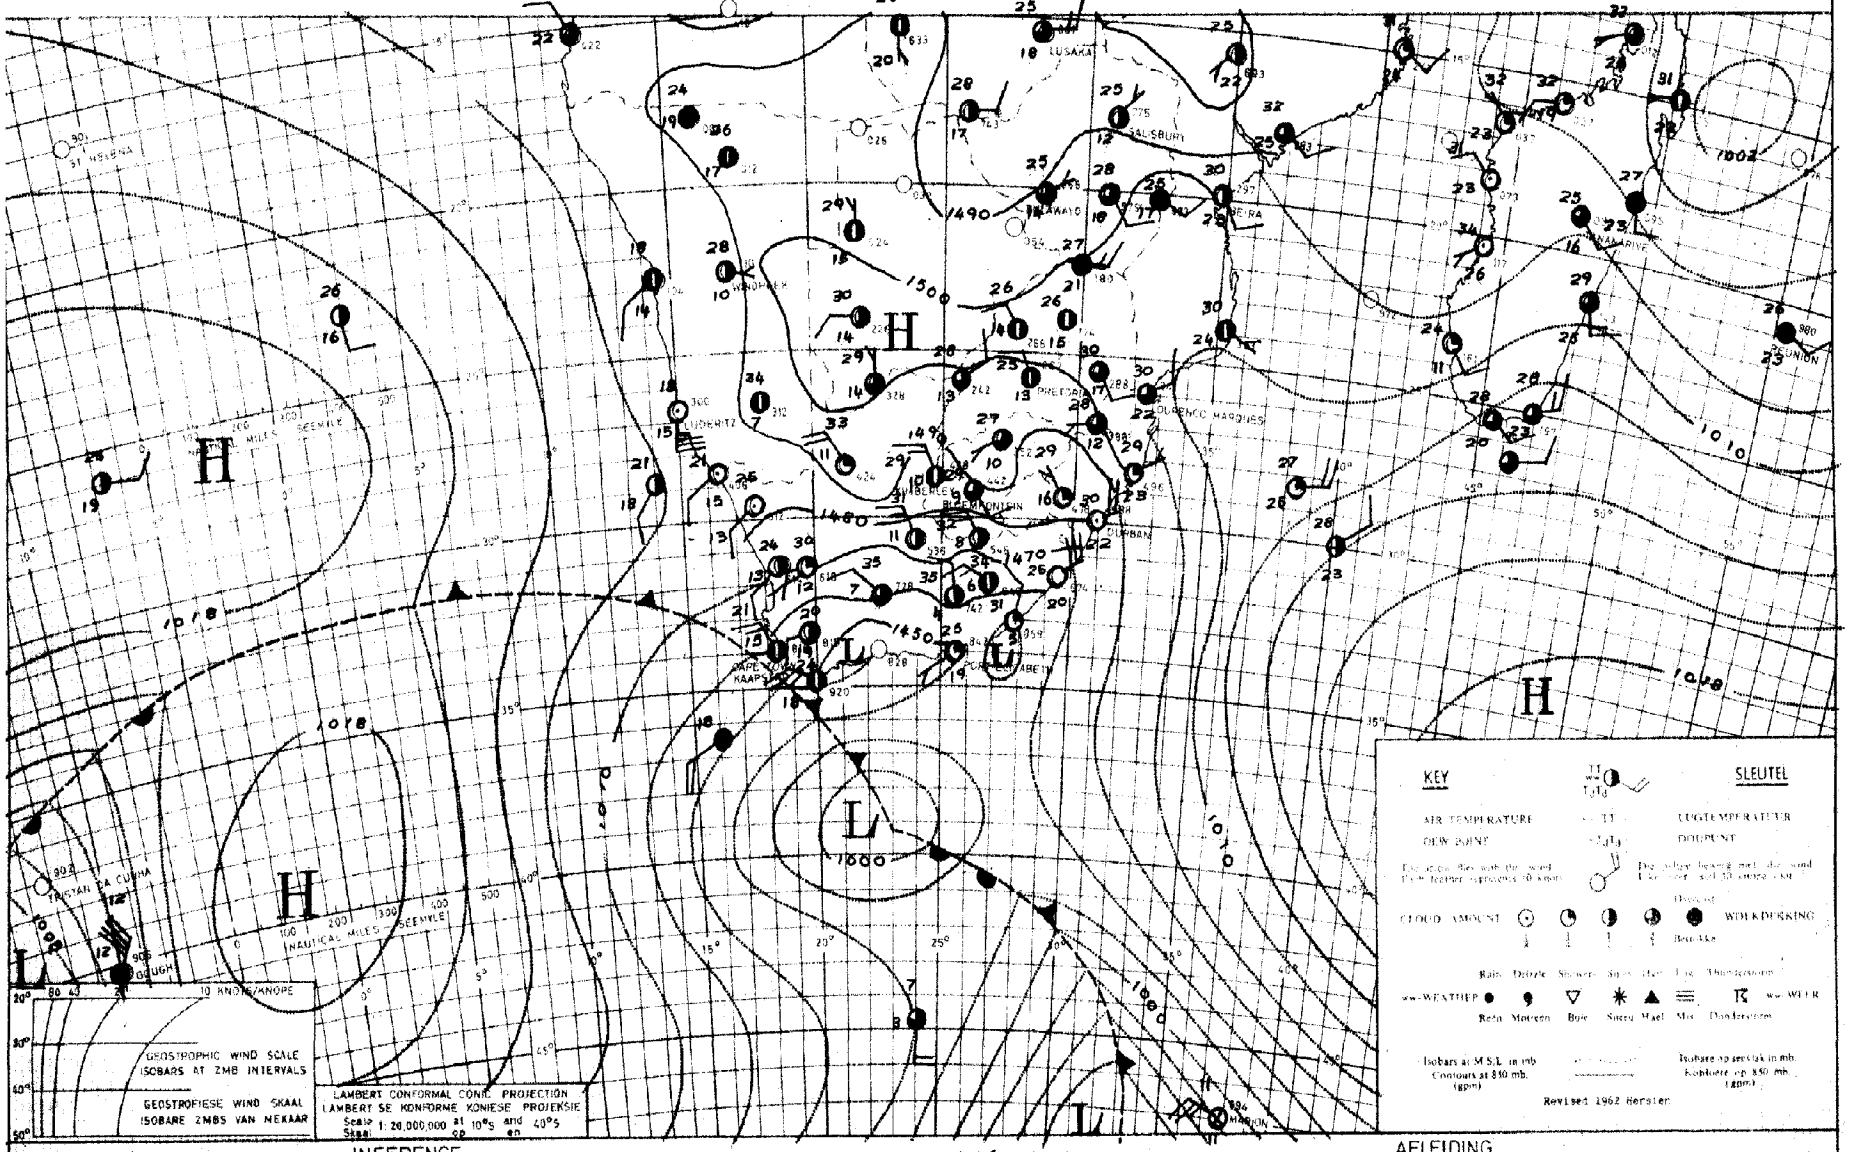
SYNOPTIC WEATHER MAP 31 1200 GMT$_0$ — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

The cold front off the south-western Cape coast is moving eastwards and cloudy cooler weather will spread over the Cape coastal regions, while cooler air will spread over the south-western interior. The trough over the southern interior will move eastwards and scattered thundershowers will occur over the eastern, northern and central interior.

DATE 7 - 3 - 1966 DATUM

AFLEIDING

Die kouefront net wes van Kaapstad sal ooswaarts beweeg sodat koeler bewolkte weer met reën oor die Kaapse kusgebiede sal uitbrei, terwyl koeler lug oor die suidwestelike binneland sal uitbrei. Die trog oor die suidelike binneland sal ooswaarts beweeg en verspreide donderbuie sal oor die oostelike, noordelike en sentrale binneland voorkom.

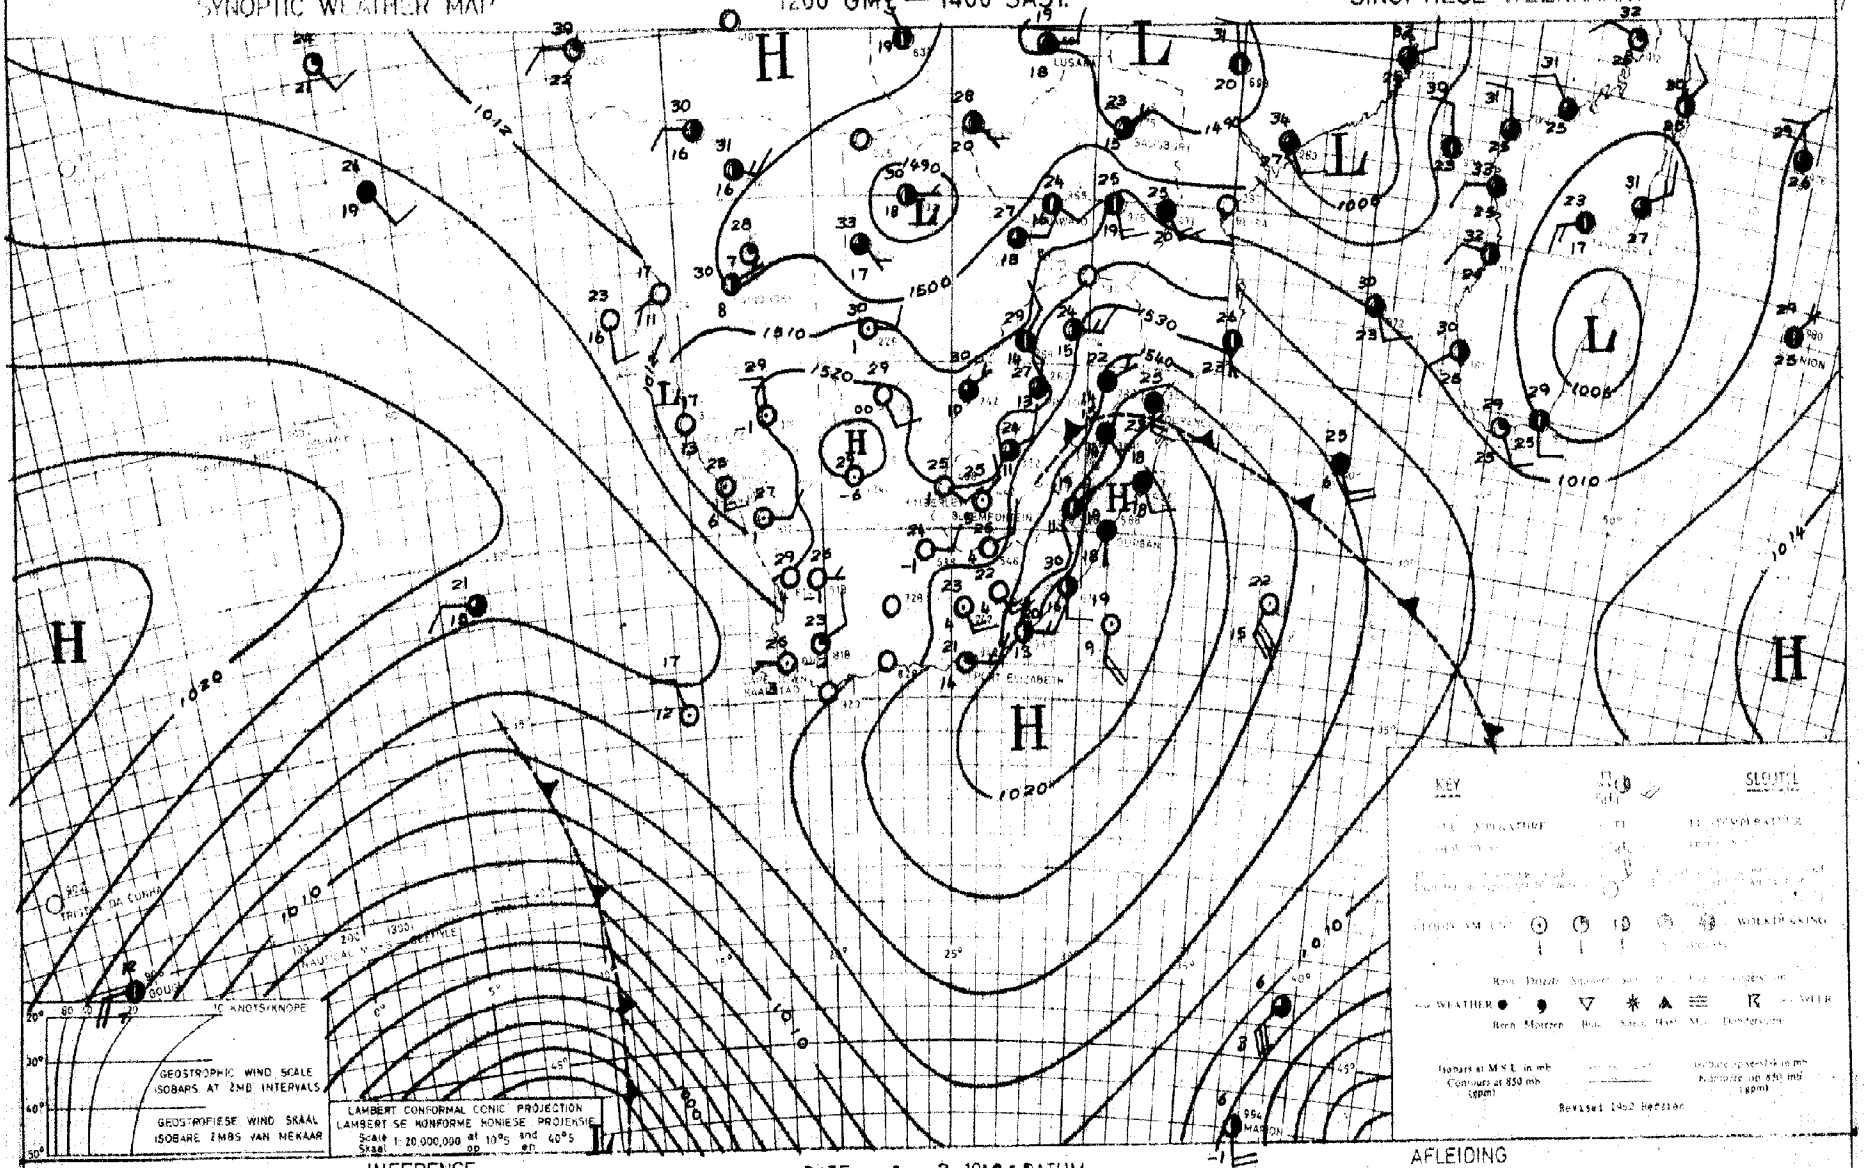
SYNOPTIC WEATHER MAP — 1200 GMT — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE

DATE 9 - 3 - 1966 DATUM

AFLEIDING

The high off the Natal coast is advecting moist air over the north-eastern interior, where it will be cloudy. Isolated thundershowers will develop over western Transvaal, the northern Free State and the Mafeking area. The cold front to the west of the Cape is moving south-eastwards and will later cause cloudy weather with rain over the south-western Cape coast.

Die hoog langs die Natalse kus voer vogtige lug oor die noord-oostelike binneland in, waar dit dus bewolk sal wees. Los donder-buie sal ontwikkel oor die westelike dele van Transvaal, Noord-Vrystaat en die Mafeking-gebied. Die koufront, ten weste van die Kaap gelee, beweeg suidooswaarts en sal later bewolkte weer met reën oor die suidwestelike Kaapse kusgebiede veroorsaak.

INFERENCE

Moist air is still in circulation over the eastern and northern interior and with the low over the southern interior, isolated thundershowers will occur over the central and eastern parts. Scattered thundershowers will occur over South-West Africa and Bechuanaland as a result of the low over Angola.

DATE 10 - 3 - 1966. DATUM

AFLEIDING

Vogtige lug is nog in sirkulasie oor die oostelike en noordelike binneland en met die laag oor die suidelike binneland sal enkele donderbuie oor die sentrale en oostelike dele voorkom. Verspreide donderbuie sal oor Suidwes-Afrika en Betsjoeanaland uitsak as gevolg van die laag oor Angola.

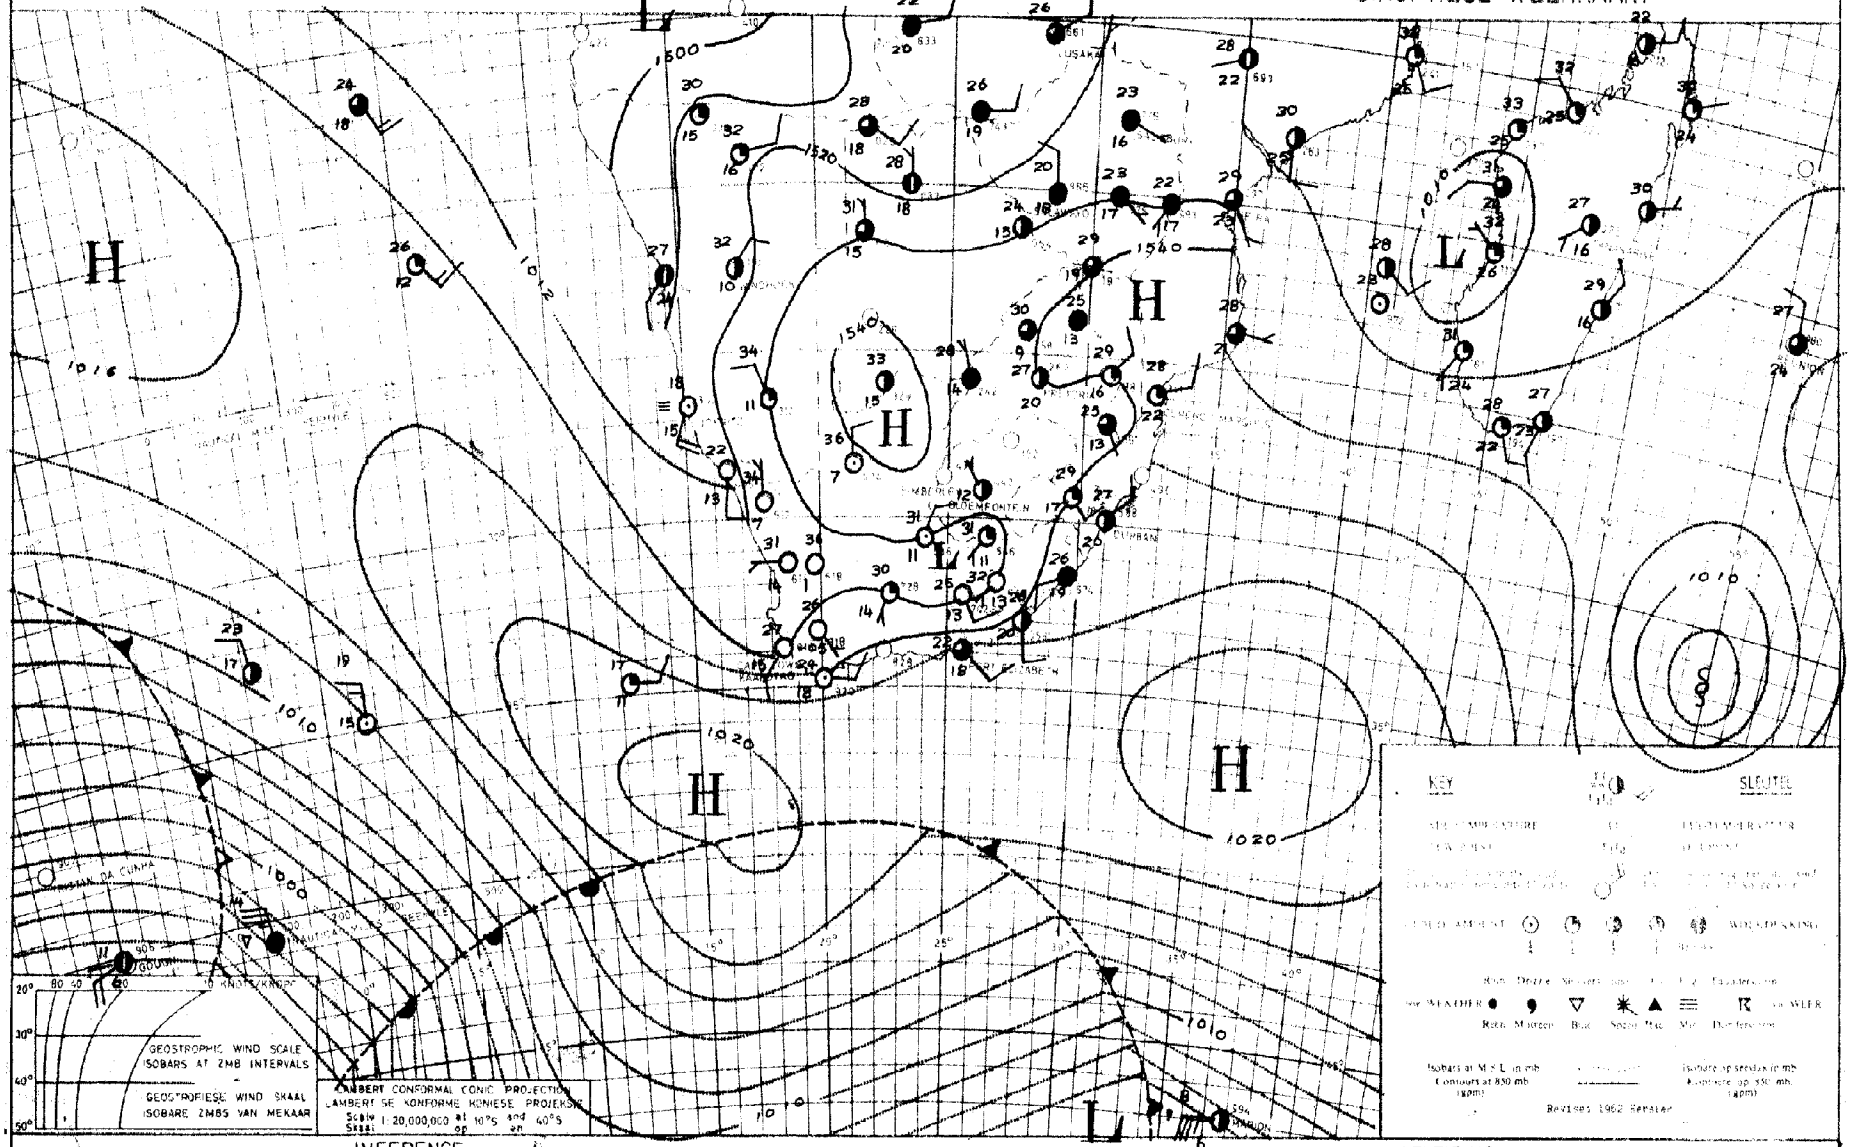
SYNOPTIC WEATHER MAP 1200 GMT = 1400 SAST SINOPTIESE WEERKAART



DATE 11 - 3 - 1966 DATUM

INFERENCE

As a result of the high south-east of the country, moist air will move in over the eastern lowveld regions where it will be cloudy with light rain. Over the remainder of the country it will be fine to partly cloudy with isolated light thundershowers over the Karoo and Bushmanland as a result of the weak low over the Cape interior.

AFLEIDING

As gevolg van die hoog suidoos van die land sal vogtige lug oor die oostelike laeveld gebiede inbeweeg waar dit bewolk sal wees met ligte reën. Oor die res van die land sal dit mooiweer tot gedeeltelik bewolk wees met enkele ligte donderbuie oor die Karoo en Boesmanland, as gevolg van die swak laag oor die Kaapse binneland.

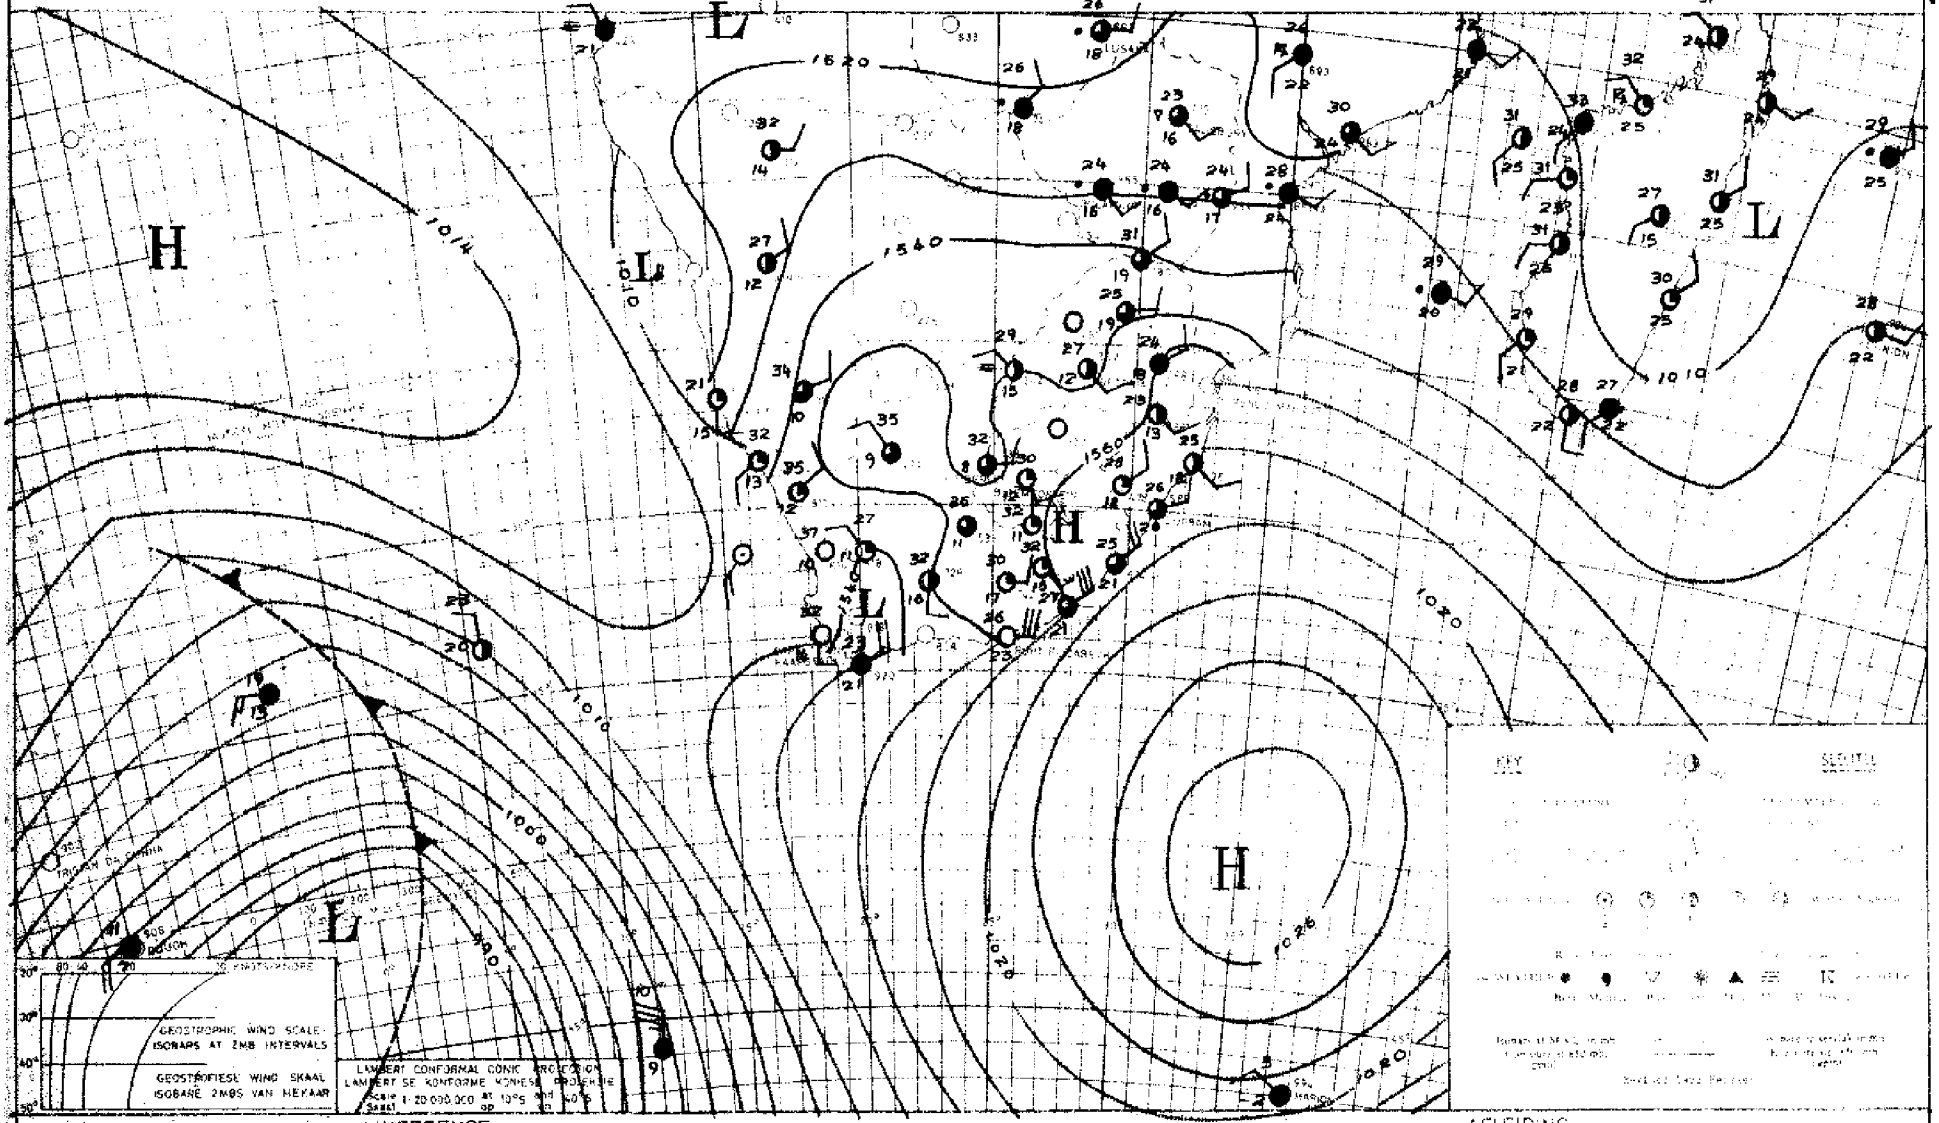
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

The high south-east of the country is causing cloudy weather over the northern and eastern parts of Transvaal, with light rain over the escarpment. As a result of the trough over the western parts, it will be partly cloudy and warm with isolated thundershowers over the southern regions of the Cape Province and the northern regions of South-West Africa.

DATE 12 - 3 - 1966 DATUM

AFLEIDING

Die hoog suidoos van die land veroorsaak bewolkte weer oor die noordelike en oostelike dele van Transvaal met ligte reën oor die Platorand. As gevolg van die trog oor die westelike dele sal dit gedeeltelik bewolk en warm wees met enkele donderbuie oor suid Kaapland en die noordelike dele van Suidwes-Afrika.

DAAGLIKSE WEERBULLETIN

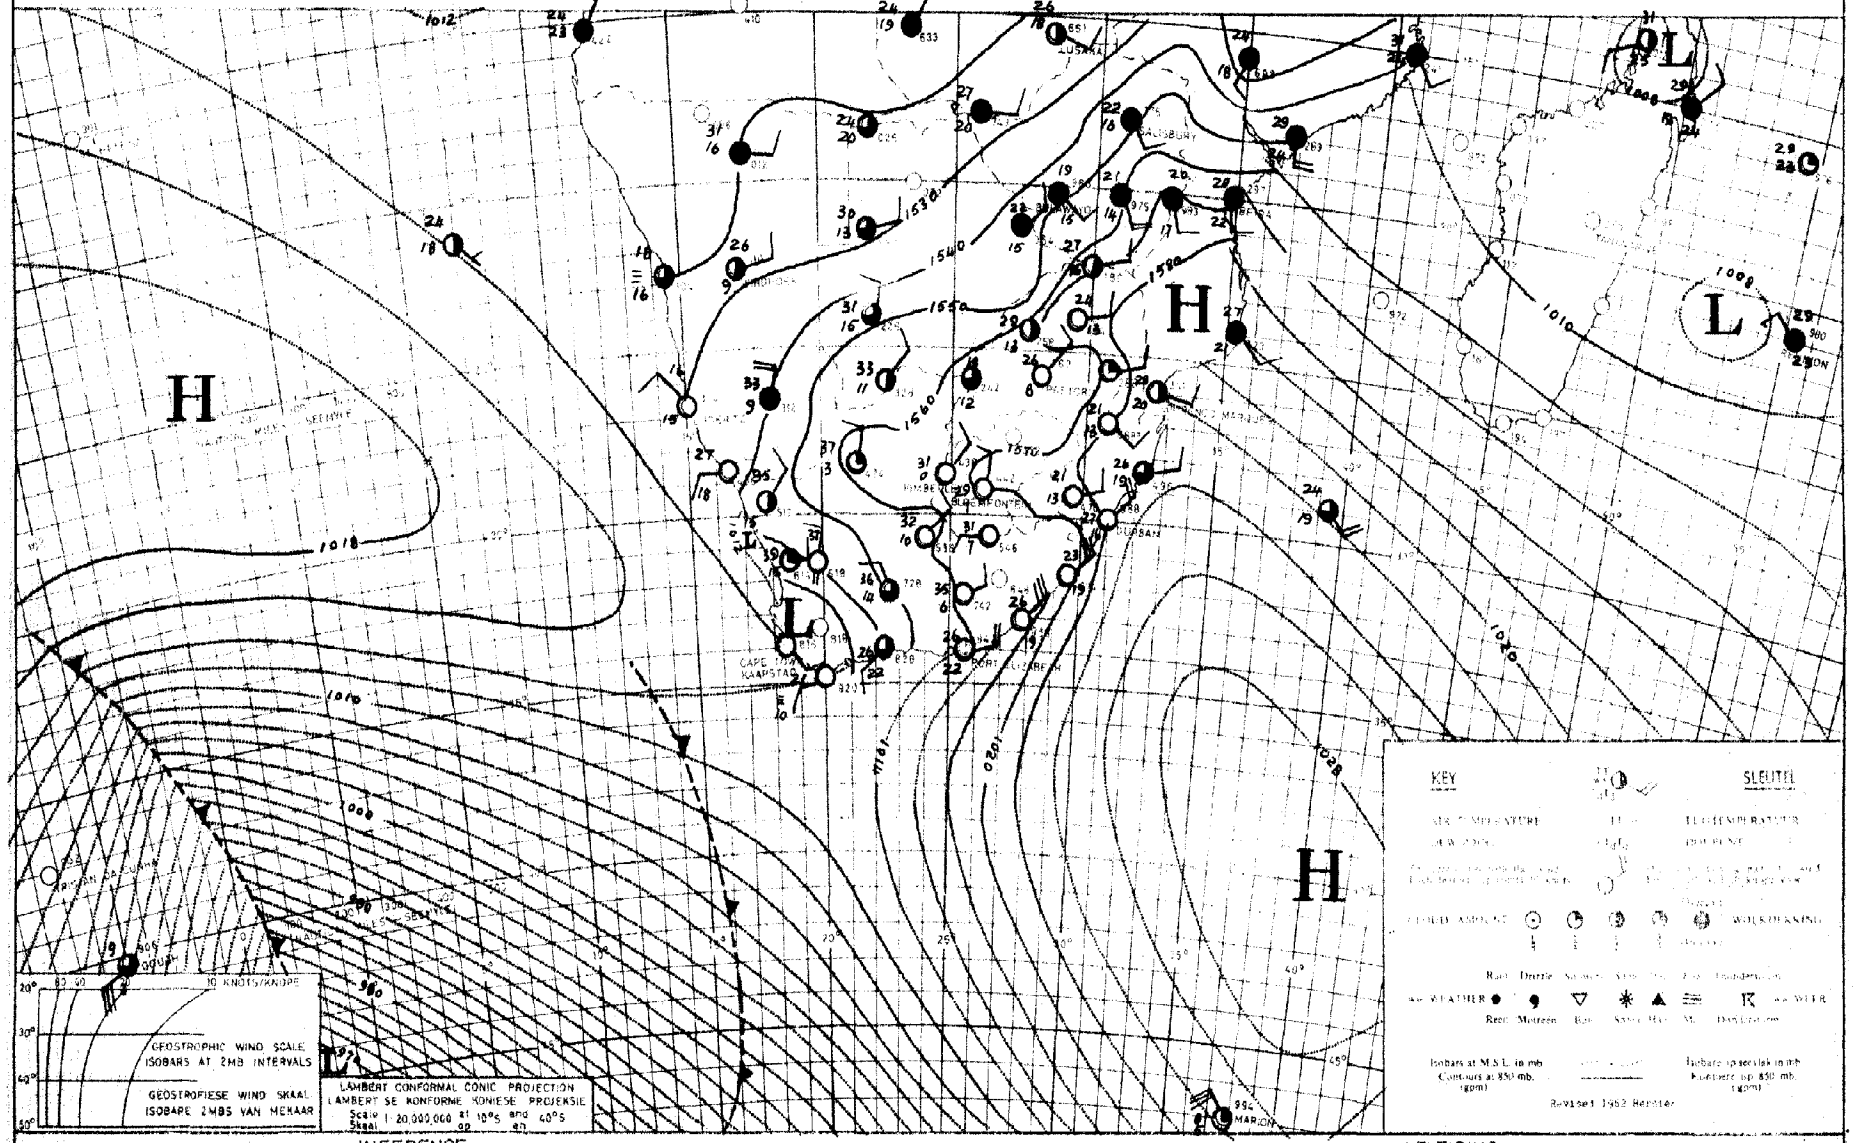
SYNOPTIC WEATHER MAP 1200 GMT. = 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 13.-3.-19.66 DATUM AFLEIDING

A trough is situated over the western parts of the country and with moist air in circulation thundershowers will occur over most parts of the Cape Province and South West Africa. The high over the eastern parts is causing subsidence and it will be mainly fine over the remainder of the country.

'n Trog is aanwesig oor die westelike dele van die land, en met vogtige lug in sirkulasie sal donderbuie uitsak oor die meeste dele van die Kaapprovinsie en Suidwes-Afrika. Die hoog oor die oostelike dele veroorsaak afsakking en dit sal hoofsaaklik mooiweer wees oor die res van die land.

INFERENCE

DATE 14 - 3 - 1966 DATUM

AFLEIDING

The cold front situated to the west of the Cape is moving south-eastwards and will have little influence on the weather at the Cape.

Thundershowers will develop over South-west Africa, but over the remainder of the country the air is dry and stable and little development is expected.

Die koufront ten weste van die Kaap geleë beweeg suidoos-waarts en sal min invloed op die Kaapse weer uitoefen. Donderbuie sal oor Suidwes-Afrika ontwikkel, maar oor die res van die land is die lug droog en stabiel en min ontwikkeling word verwag.

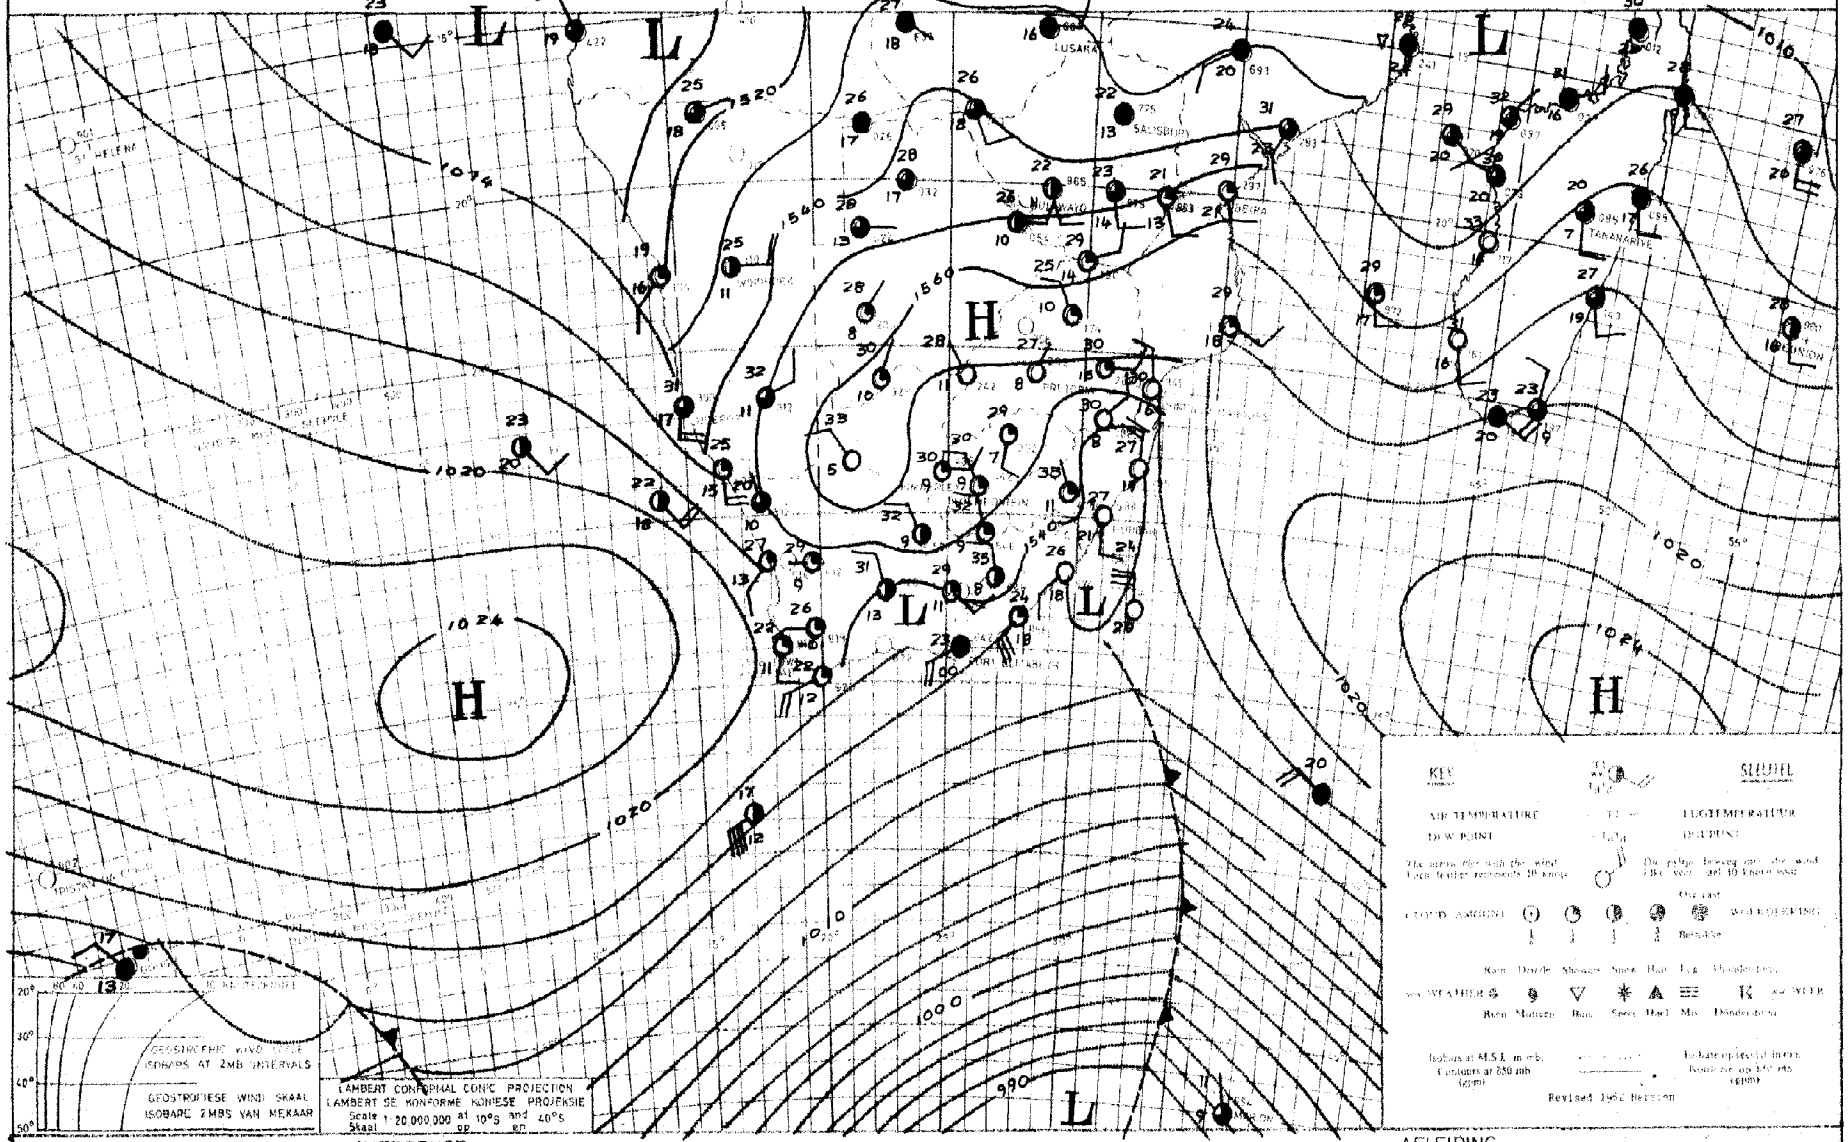
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

DATE 15 - 3 - 1966. DATUM

AFLEIDING

The coastal low situated off the Natal coast will cause cloudy to partly cloudy weather with light rain at places over the eastern coastal regions. The circulation over the interior is anticyclonic. Subsidence is taking place over the Transvaal where it will be fine but moist air coming in from the north will cause partly cloudy conditions elsewhere with thundershowers in the west and over the central areas.

Die kuslaag langs die Natalse kus sal bewolkte tot gedeeltelike bewolkte weer met ligte reën plek-plek langs die oostelike kusgebiede veroorsaak. Die sirkulasie oor die binneland is antisiklonaal. Afsakking vind plaas oor Transvaal waar dit mooiweer sal wees maar as gevolg van 'n instroming van vogtige lug vanuit die noorde sal gedeeltelike bewolkte toestande oor die res van die land voorkom met donderbuie oor die westelike en sentrale streke.

INFERENCE

DATE 16 - 3 - 1966 DATUM

AFLEIDING

Pressures are falling over the southern interior where a trough is developing, and with relatively moist air over the southern and south-eastern interior, isolated thundershowers will develop over these regions. The high south of the country will cause cloudy weather with light rain over the eastern coastal regions.

Drukke daal oor die suidwestelike binneland waar 'n trog ontwikkel, en met redelike vogtige lug oor die suidelike en suidoostelike binneland sal enkele donderbuie oor dié dele uitsak. As gevolg van die hoog suid van die land sal bewolkte weer met ligte reën oor die oostelike kusgebiede voorkom.

INFERENCE

DATE 17 - 3 - 1966 DATUM

AFLEIDING

The cold front situated to the south of the country is moving eastwards, so that it will be cloudy with rain over the southern and eastern coastal areas, but it will clear over the western coastal areas. The air over the interior is too dry for development except over the eastern Cape, Natal and South-West Africa, where thundershowers can develop.

Die koufront suid van die land geleë, beweeg oostwaarts en dus sal bewolkte toestande met reën langs die suidelike en oostelike kusgebiede voorkom, terwyl dit oor die westelike kusgebiede sal opklaar. Oor die binneland is die lug te droog vir ontwikkeling, behalwe oor die Oos-Kaap en Natal, asook Suidwes-Afrika, waar donderbuie wel kan ontwikkel.

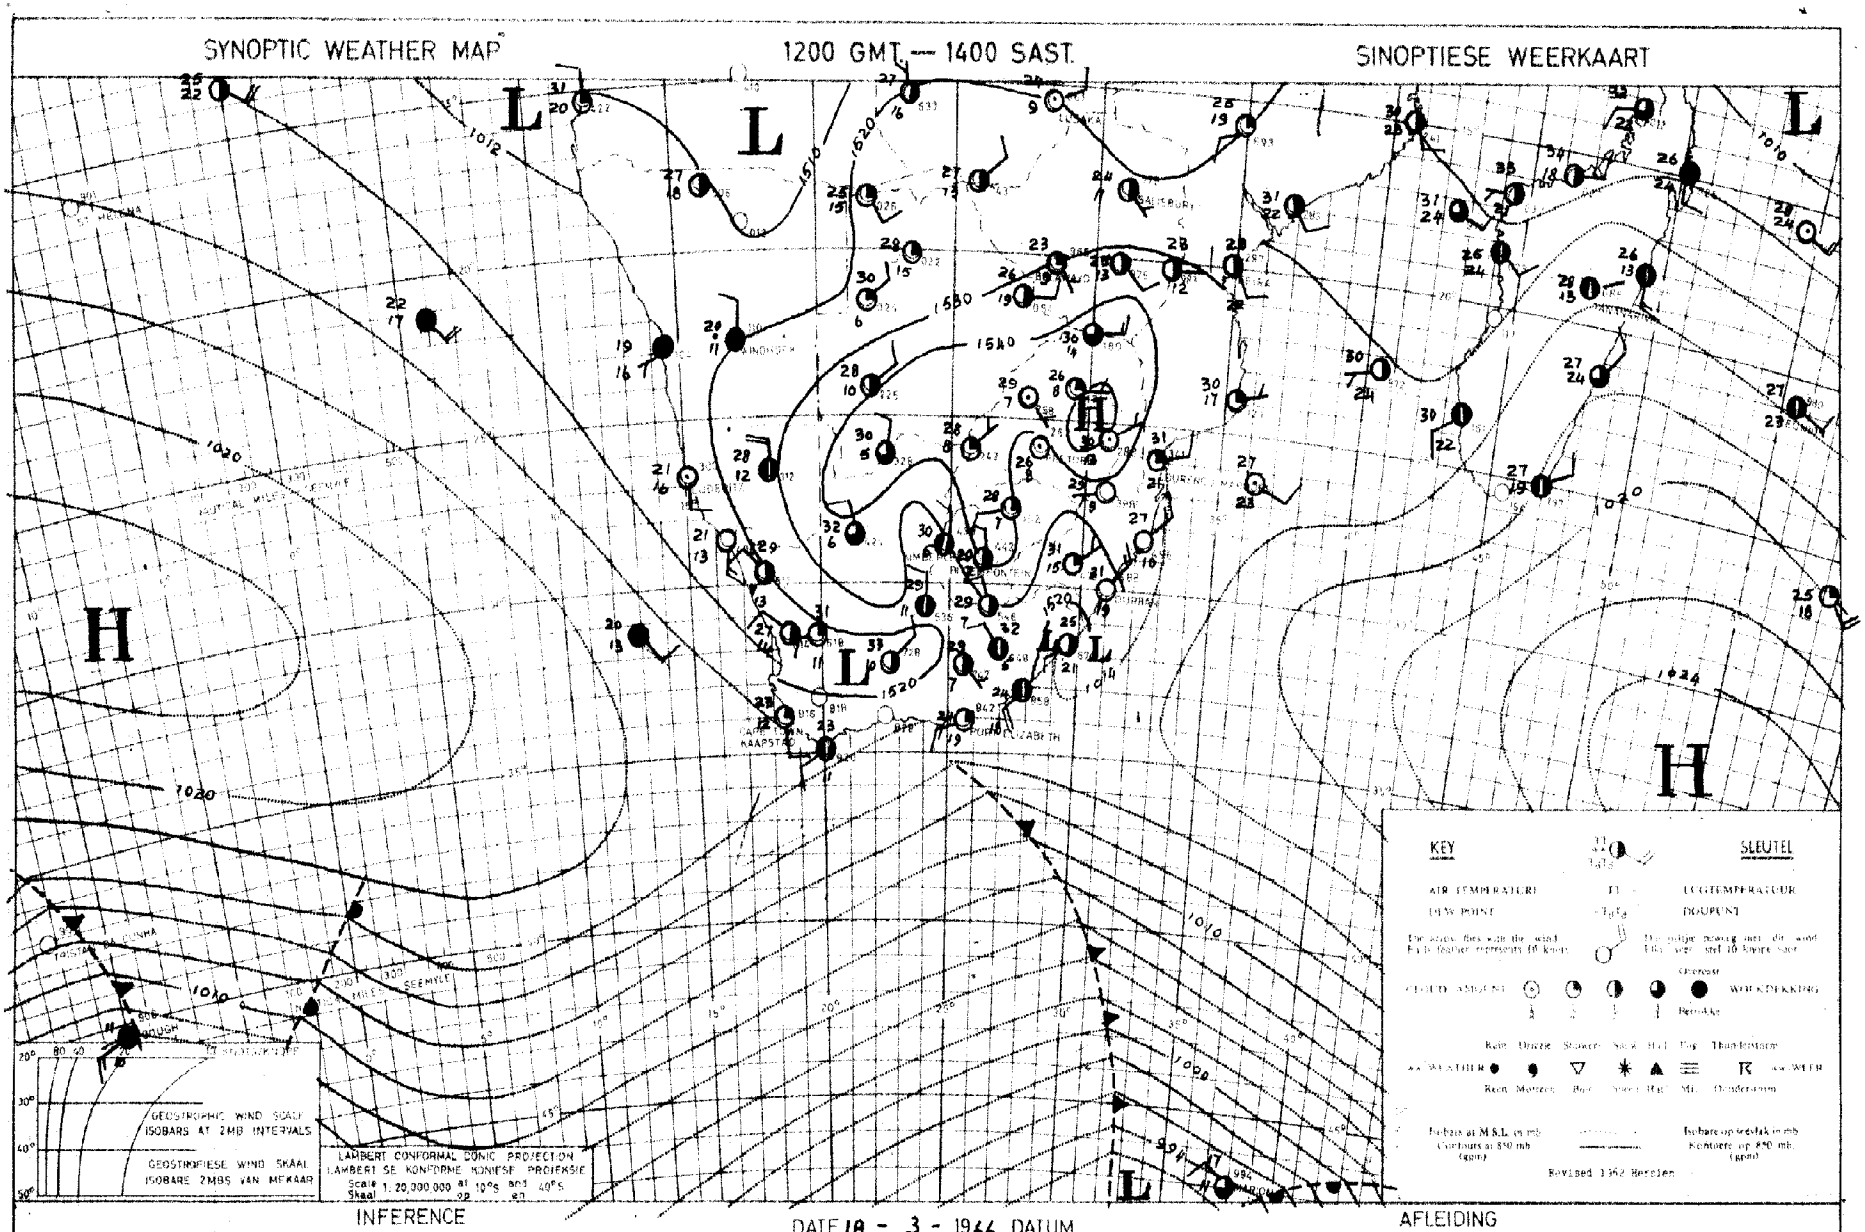
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST SINOPTIESE WEERKAART



INFERENCE DATE 18 - 3 - 1966 DATUM AFLEIDING

The Atlantic high extends a ridge around the south coast so that it will become cloudy over the north-eastern interior. It will clear over the south-western coastal areas, and later also over the south coast. A few thundershowers will develop over most parts of the interior, but scattered thundershowers will occur over South-West Africa.

Die Atlantiese hoog stoot 'n rug om die suidkus, en dus sal dit bewolk raak oor die noordoostelike binneland. Dit sal opklaar oor die suidwestelike kusgebiede, en later ook oor die suidelike kusgebiede. Enkele donderbuie sal oor die meeste dele van die binneland ontwikkel, terwyl verspreide donderbuie oor Suidwes-Afrika sal voorkom.

INFERENCE

DATE 19 - 3 - 1966 DATUM

AFLEIDING

A high pressure system situated over the eastern interior is causing moist, warm air from the north to flow in over the western, central and southern regions, where thundershowers will occur.

'n Hoogdrukstelsel oor die oostelike binneland gelee, veroorsaak 'n instroming van warm, vogtige lug oor die westelike, sentrale en suidelike streke waar donderbuie sal voorkom.

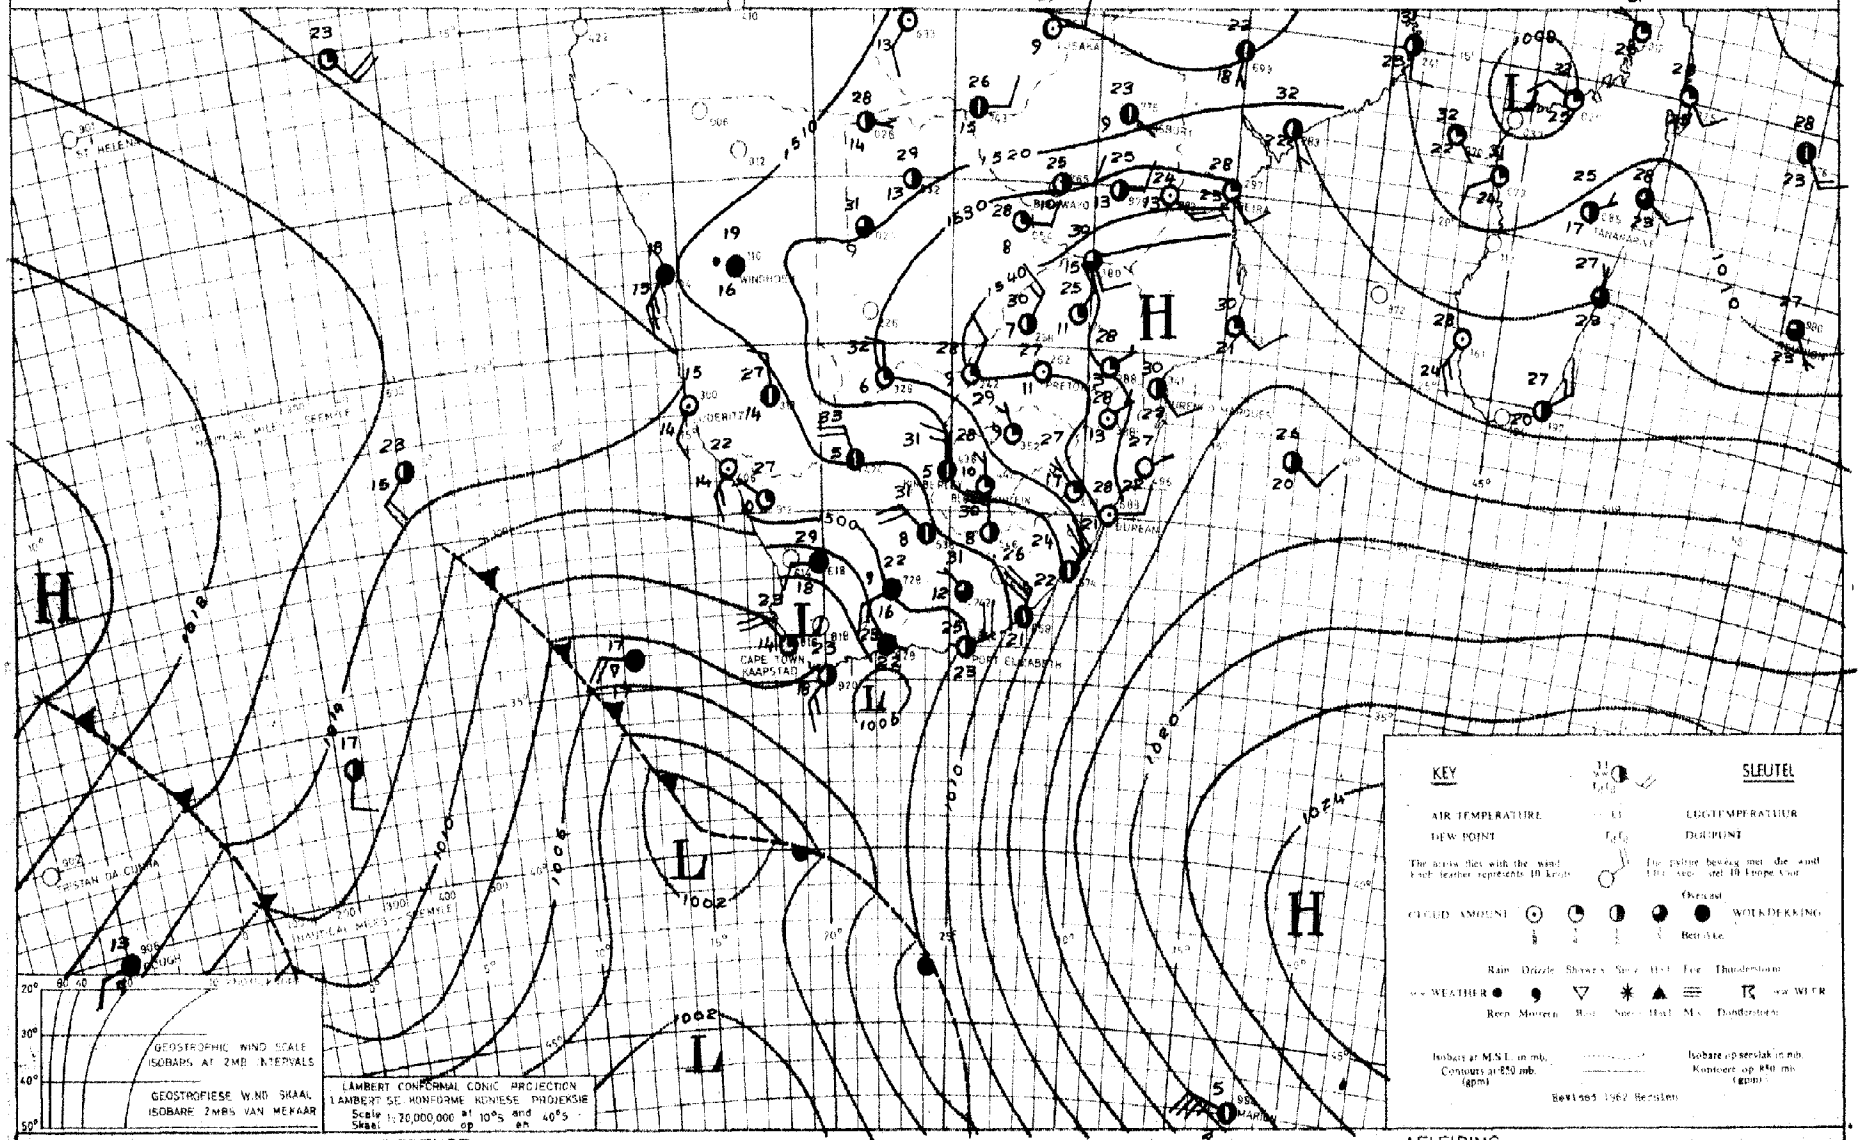
SYNOPTIC WEATHER MAP — 1200 GMT$_{28}$ — 1400 SAST — SINOPTIESE WEERKAART



INFERENCE — DATE 20-3-1966 DATUM — AFLEIDING

The approaching cold front from the west will cause cloudy, cooler weather with rain over the south-western coastal belt. The circulation over the interior has changed very little and, except for the north-eastern parts where the air is dry and subsiding, thundershowers will occur over the remaining regions.

Die koufront wat vanuit die weste aankom sal bewolkte, koeler weer met reën langs die suidwestelike kusstreke veroorsaak. Die sirkulasie oor die binneland het min verander en, afgesien van die noordoostelike dele waar droë afsakkende lug aanwesig is, sal donderbuie oor die res van die land voorkom.

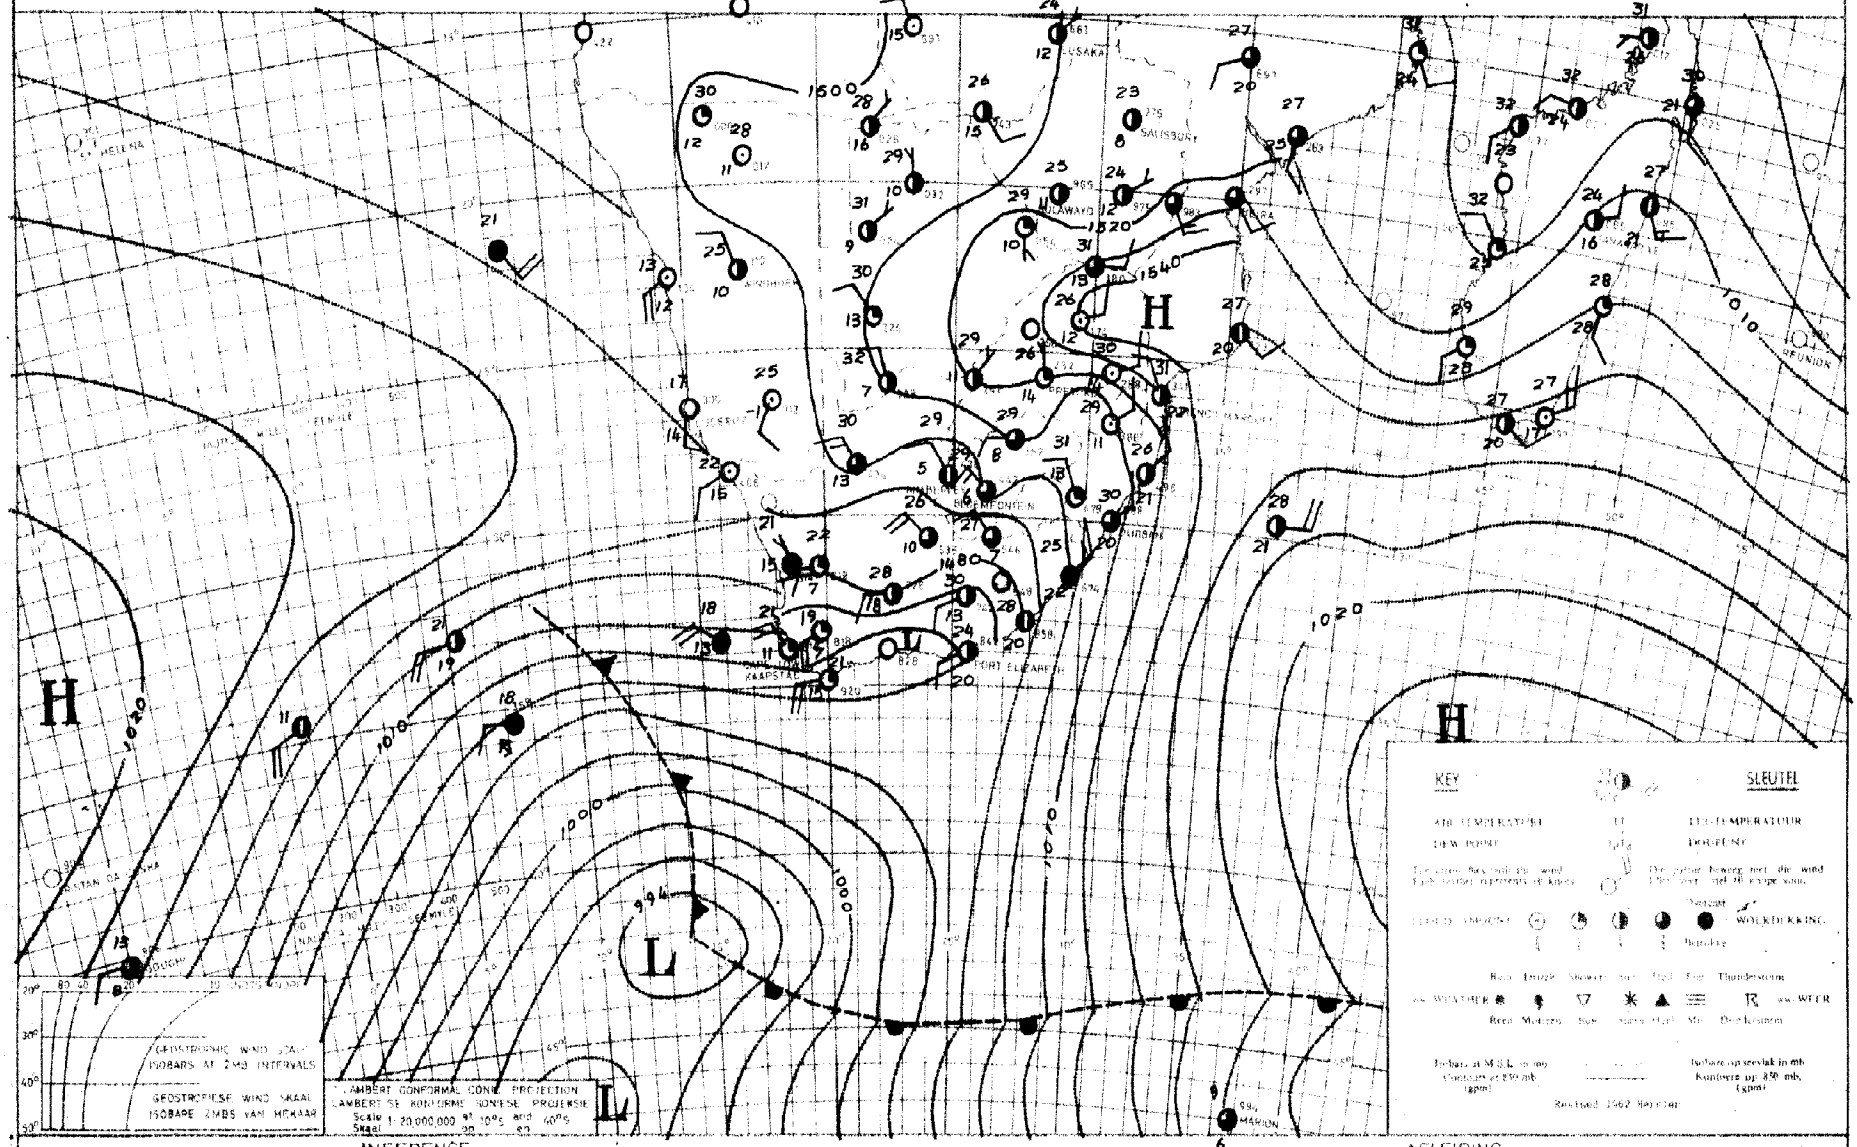
SYNOPTIC WEATHER MAP 1200 GMT = 1400 SAST SINOPTIESE WEERKAART



INFERENCE DATE 21 - 3 - 1966 DATUM AFLEIDING

With a trough to the west of the Cape, cloudy conditions with rain will persist over the south-western parts of the country. The trough over the interior is moving eastwards, and thus scattered thundershowers will occur in the south and isolated showers in the north.

Met 'n trog wes van die Kaap sal bewolkte toestande met reën oor die suidwestelike dele van die land voortduur. Die trog oor die binneland beweeg ooswaarts, en dus sal verspreide donderbuie in die suide voorkom en los buie in die noorde.

DAAGLIKSE WEERBULLETIN

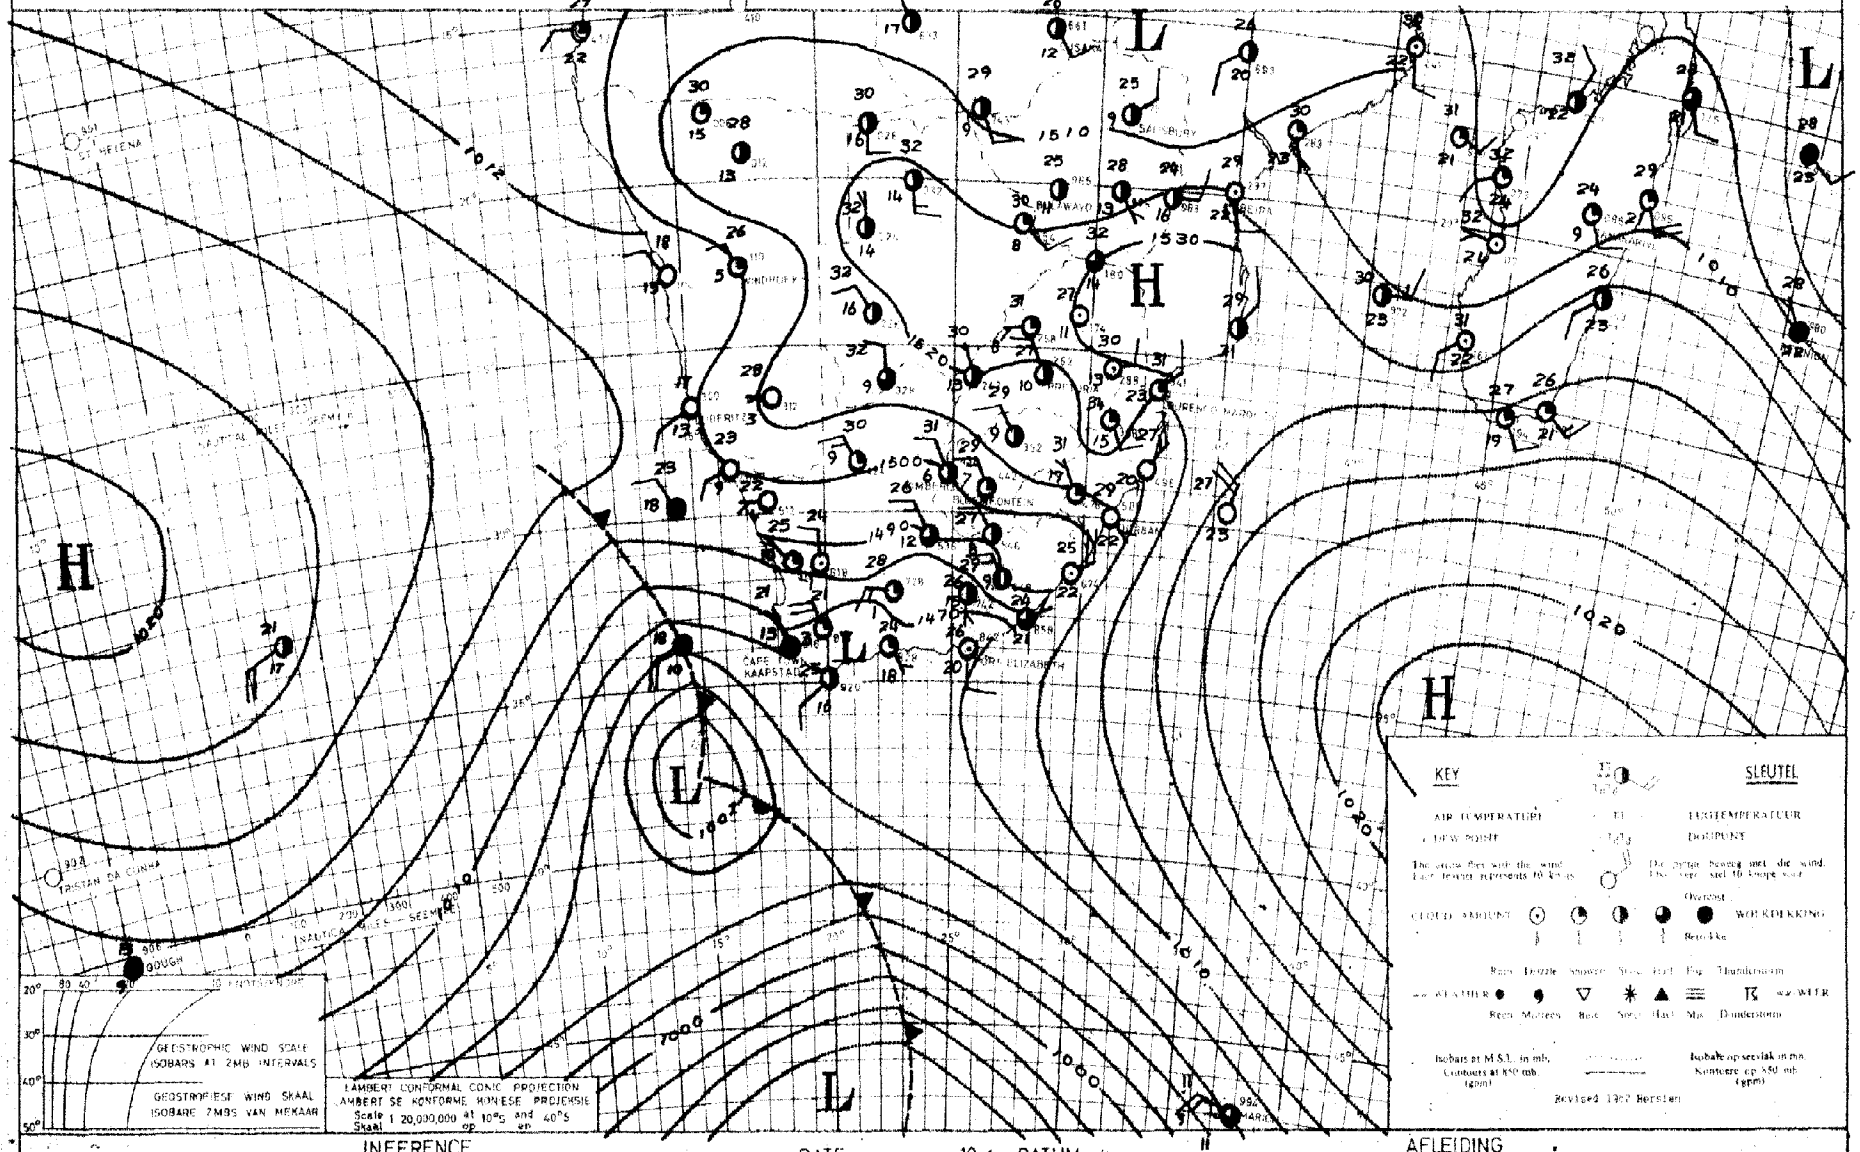
SYNOPTIC WEATHER MAP — 1200 GMT – 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE

DATE 22 - 3 - 1966 DATUM

AFLEIDING

The cold front near Cape Town, is moving slowly eastwards and cloudy to partly cloudy and cooler weather with a few showers will occur along the south-western and southern coasts.

Die koufront naby Kaapstad beweeg stadig ooswaarts en bewolkte tot gedeeltelik bewolkte en koeler weer met enkele buie sal langs die suidwestelike en suidelike kusstreke voorkom.

With the approach of another frontal system towards the Cape the weather will continue cloudy and cool with rain along the south and south-west coasts and coastal districts. Elsewhere it will continue fair to partly cloudy and dry under the influence of the dry north-westerly upper air stream dominating the circulation. Only in the south-eastern interior are a few thundershowers possible.

Met die aankoms van nog 'n frontale stelsel sal die koel en bewolkte reënerige weer langs die Kaapse suid- en weskusstreke voortduur. Oor die res van die land sal dit mooiweer tot gedeeltelik bewolk en droog wees onder die invloed van die droë noordwestelike bolugstroming wat die kenmerk van die sirkulasie is. Net oor die suidoostelike binneland is enkele donderbuie moontlik.

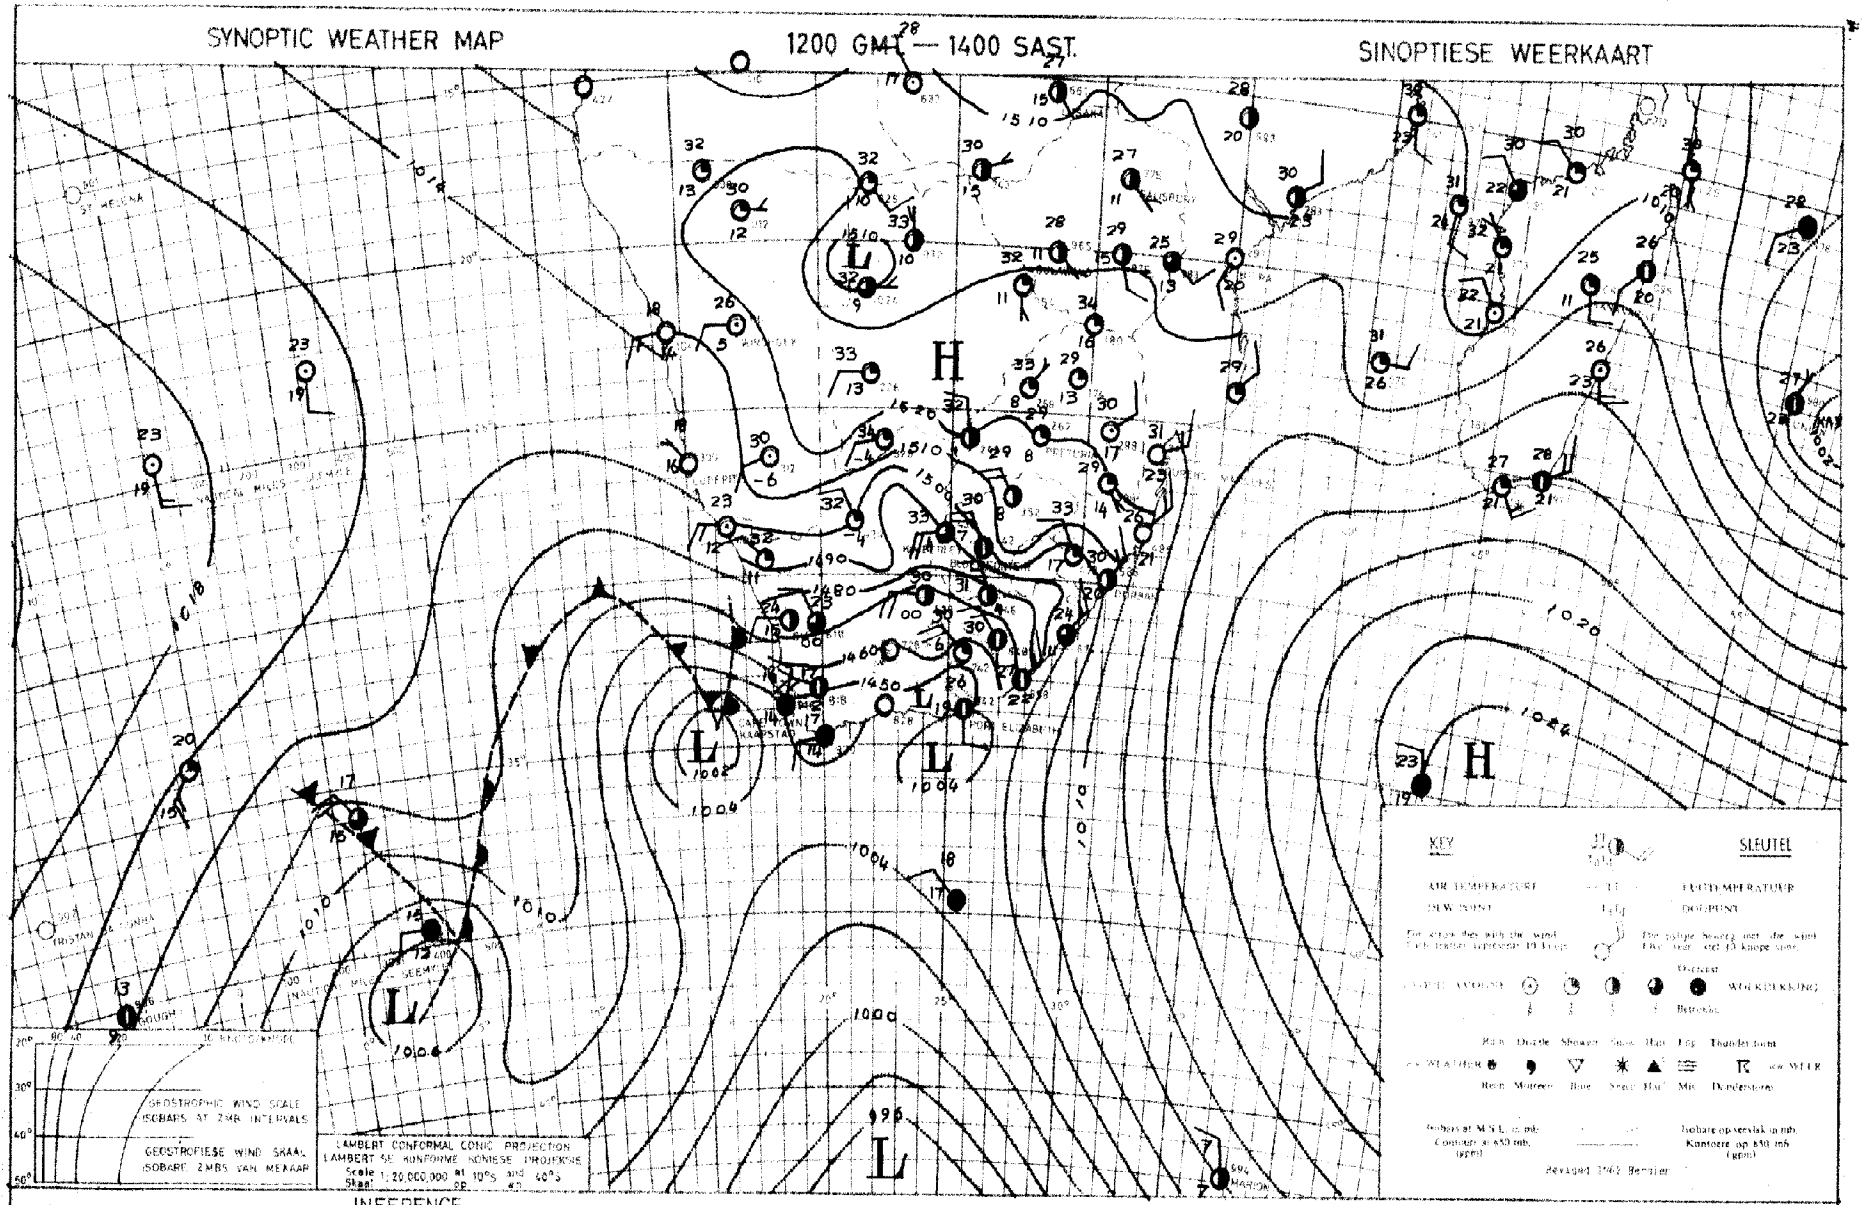
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

The frontal system situated to the west of the Cape will be steered south-eastwards by the strong high situated south-east of the country. Cloudy, cool weather with rain and showers will thus be confined to the south-western and western Cape Province. Over the remainder of the country it will be mainly fine and warm.

DATE 24 - 3 - 1966 DATUM

AFLEIDING

Die frontale sisteem ten weste van die Kaap word suidoos-waarts gestuur deur die sterk hoog wat suidoos van die land geleë is. Bewolkte koel toestande met reën en buie sal dus tot die suidwestelike en westelike Kaapprovinsie beperk wees. Oor die res van die land sal dit hoofsaaklik mooi-weer en warm wees.

DAAGLIKSE WEERBULLETIN

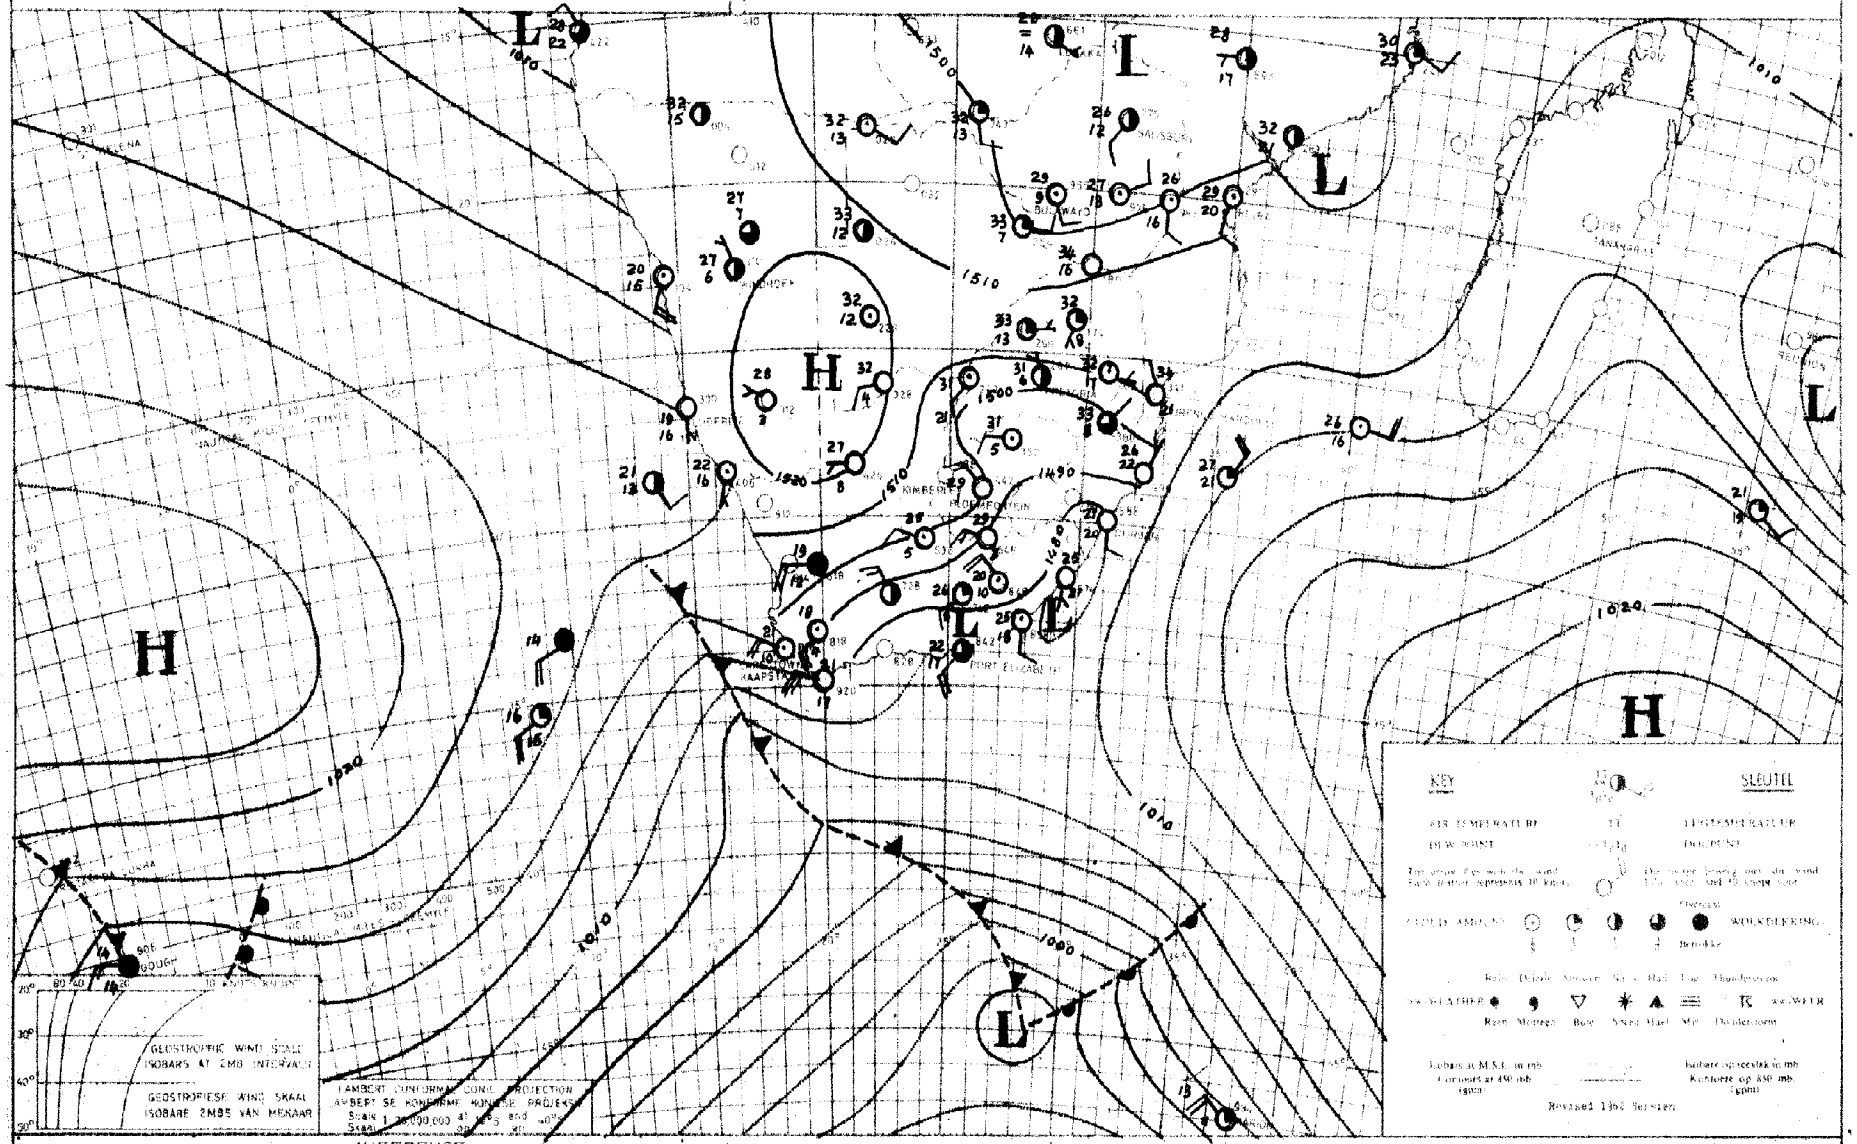
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 25 - 3 - 1966 DATUM AFLEIDING

The cold front off the south-western Cape coast will move eastwards, followed by a ridge of the Atlantic high with the result that cloudy and cooler weather with light rain will spread over the southern and eastern coastal regions and adjacent interior. It will clear later over the southern coasts.

Die koufront naby die Kaapse suidweskus sal oswaarts beweeg, gevolg deur 'n rug van die Atlantiese hoog, sodat bewolkte koeler toestande met ligte reën oor die suidelike en oostelike kusstreke en aangrensende binneland sal uitbrei. Dit sal later opklaar oor die suidelike kusgebiede.

The cold front situated to the west of the Cape is moving south-eastwards and will not influence the Cape weather. Low pressure systems moving from west to east south of the country are causing cloudy conditions with showers along the south-eastern and eastern coastal areas. The air over most of the interior is too dry for any development.

Die koufront ten weste van die Kaap gelee beweeg suid-ooswaarts en sal dus nie die Kaapse weer beinvloed nie. Laagdruksisteme wat suid van die land verbybeweeg, veroorsaak bewolkte toestande met buie oor die suidoostelike en oostelike kusgebiede. Die lug oor meeste dele van die binneland is te droog vir enige ontwikkeling.

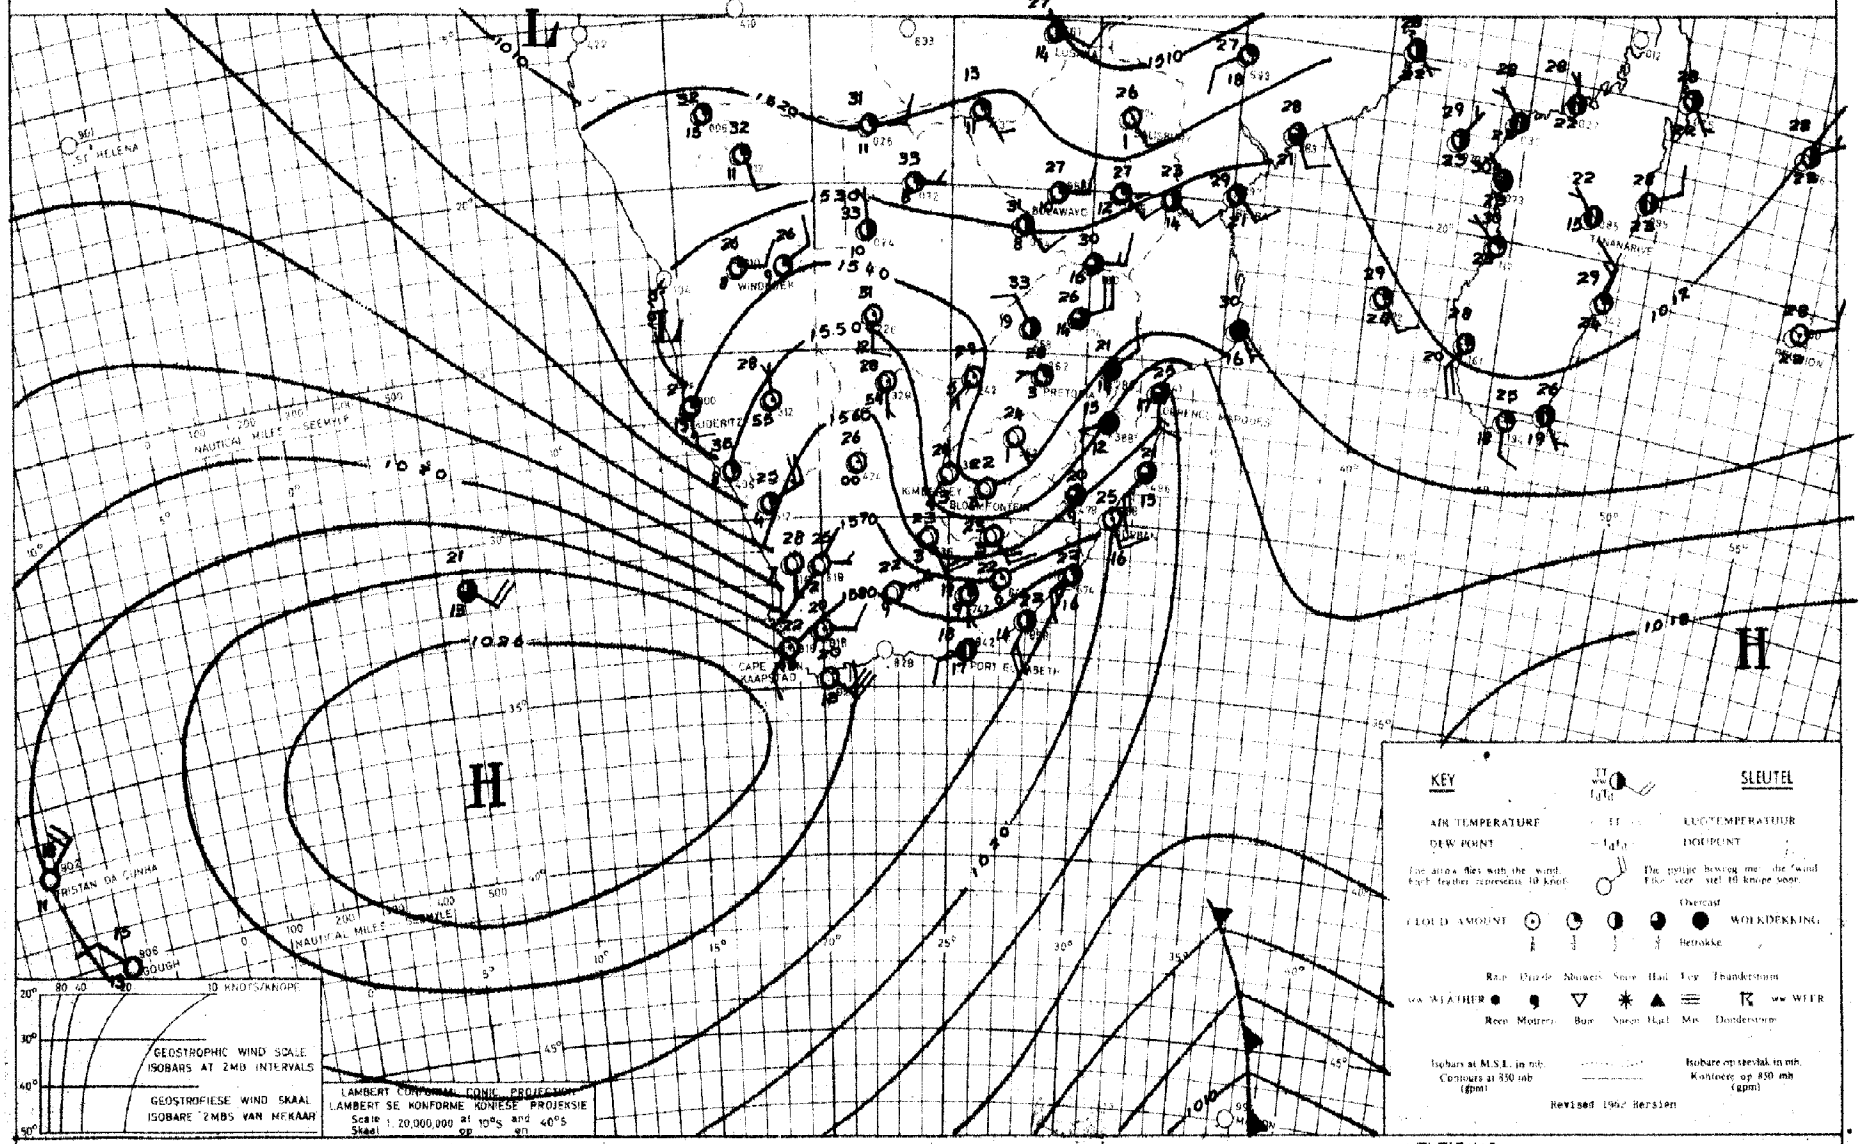
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 30 - 3 - 19 66 DATUM AFLEIDING

A ridge of the Atlantic high extends eastwards, south of the country, and causes the inflow of moist air over the eastern parts. Therefore cloudy and cooler weather will occur over these regions with showers along the escarpment. Over the remainder of the country the air is dry and it will be fine.

'n Rug van die Atlantiese hoog beweeg suid van die land in en veroorsaak die invloei van vogtige lug oor die oostelike dele. Dit sal gevolglik bewolk en koel wees oor dié dele met buie oor die platorand. Oor die res van die land is die lug droog en dit sal mooi weer wees.

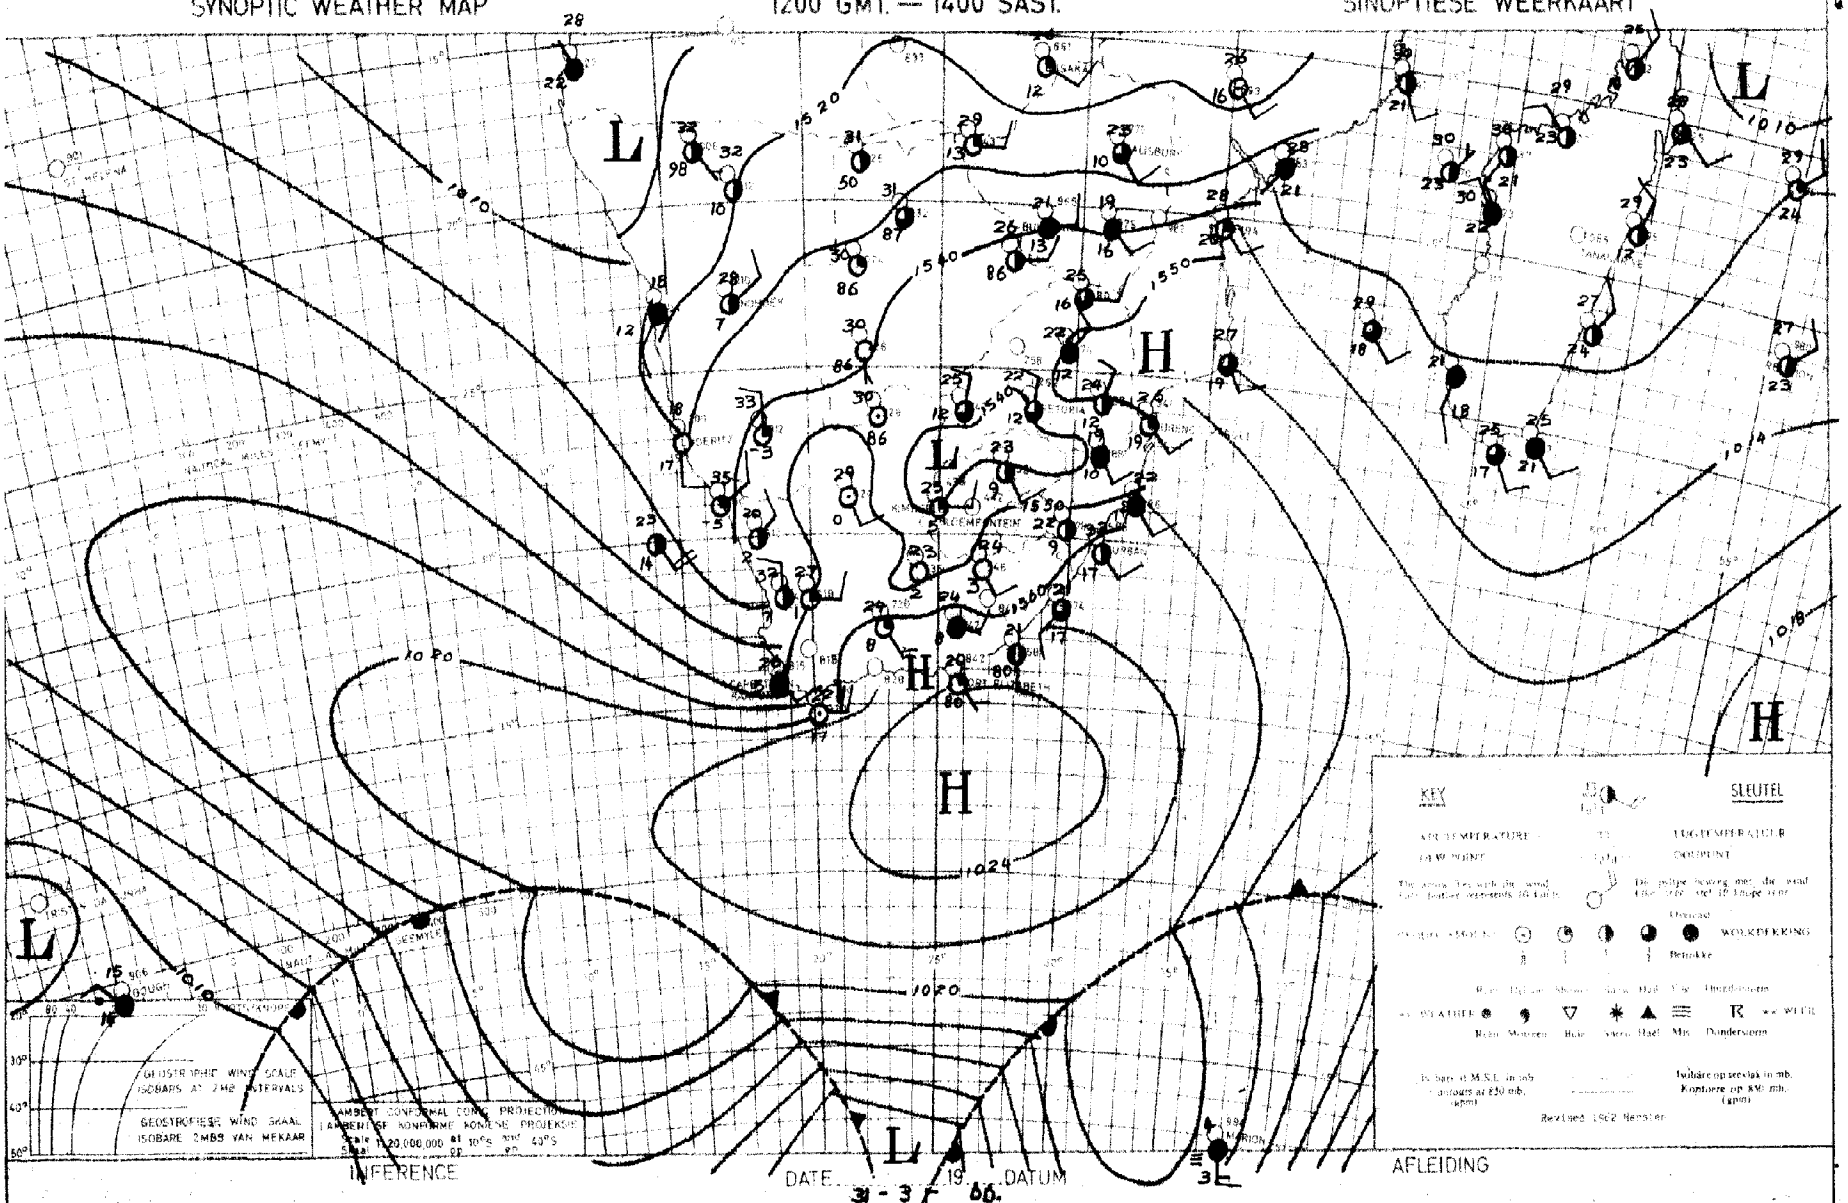
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 31 - 3 - 1966 DATUM AFLEIDING

As a result to the high to the south of the continent winds are offshore over the southern and south-western regions where the weather will be fine. At the same time moist air is being fed in in over the eastern parts where it will be cloudy to partly cloudy and mild.

As gevolg van die hoog wat suid van die vasteland gelee is, waai die winde van die land af oor die suidwestelike en suidelike gebiede en dit sal mooiweer wees. Terselfdertyd word vogtige lug oor die oostelike dele ingevoer waar dit bewolk tot gedeeltelik bewolk en matig sal wees.

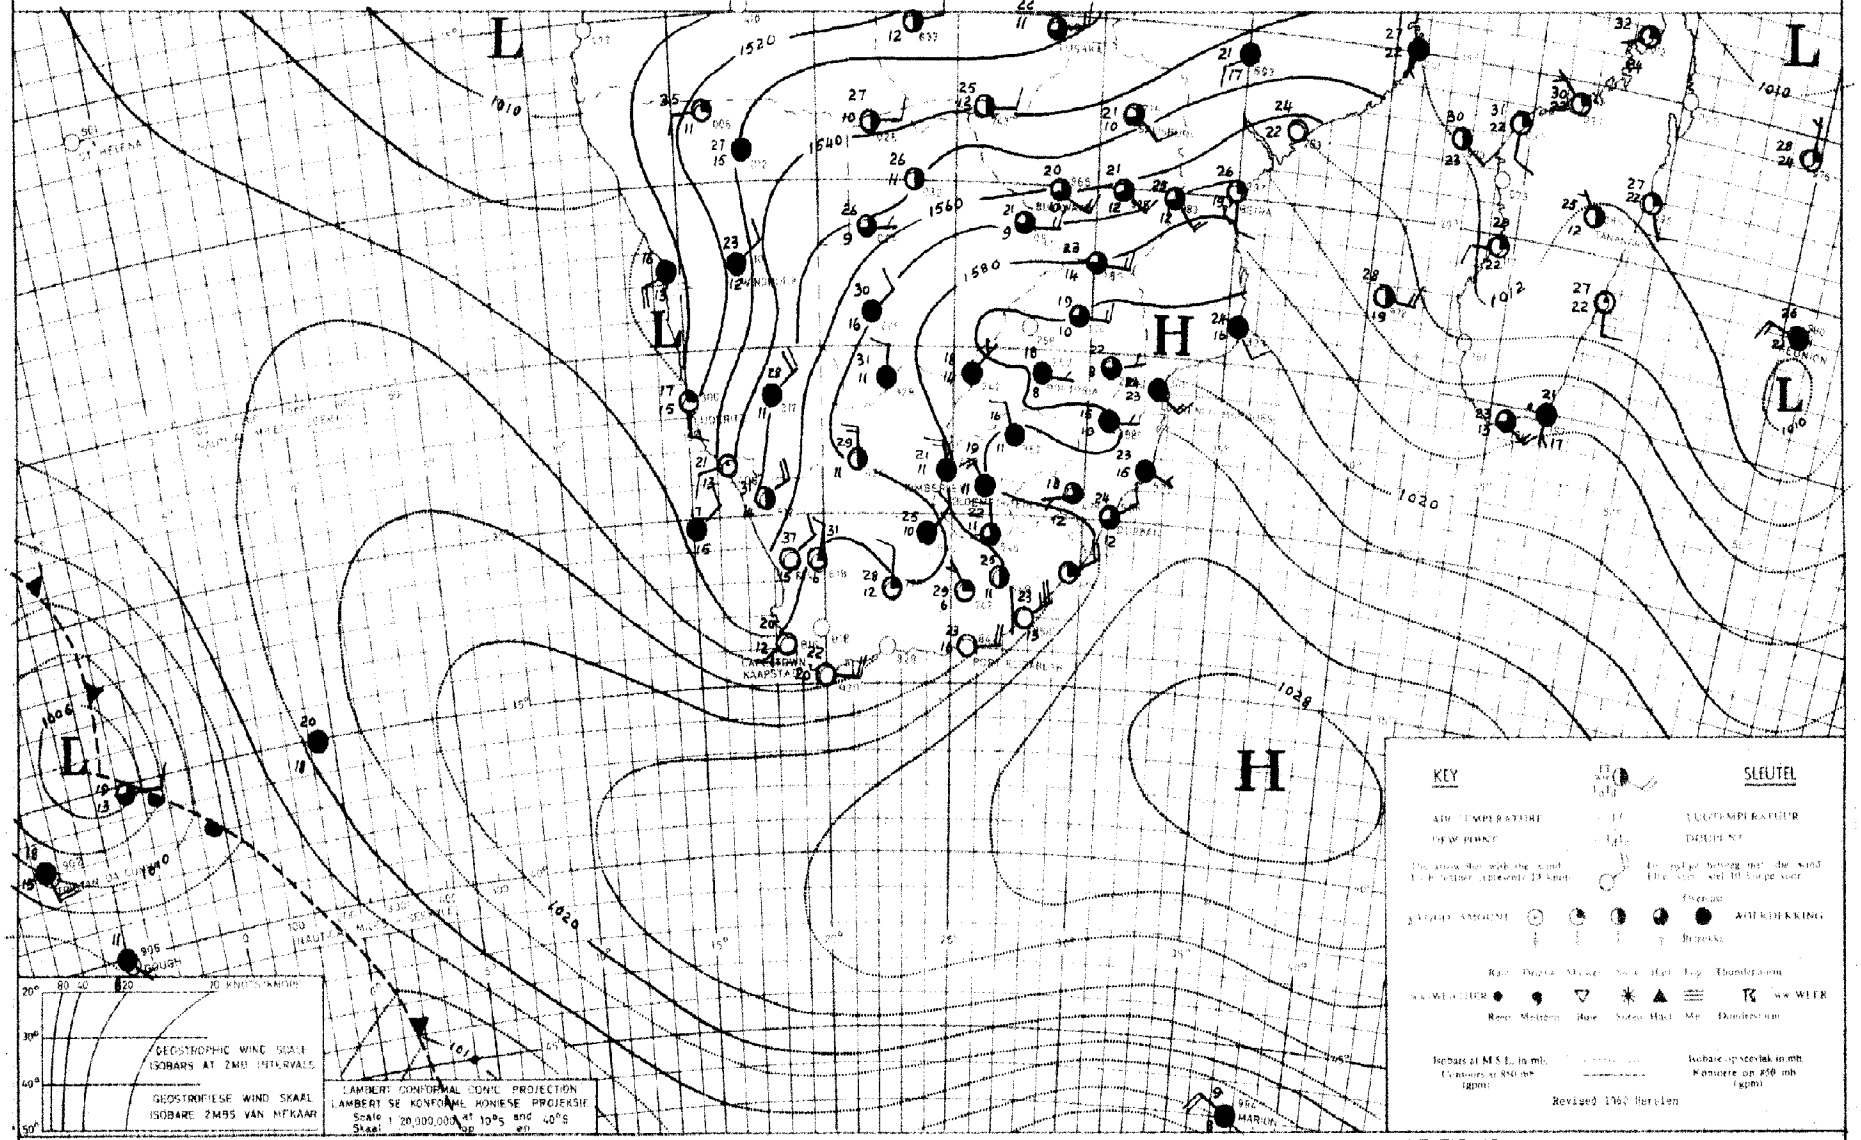
SYNOPTIC WEATHER MAP 1200 GMT 26 — 1400 SAST SINOPTIESE WEERKAART



INFERENCE

The high situated to the south-east of the country is advecting cooler, moist air over the north-eastern interior. Thundershowers will develop over parts of the interior, mainly over South-West Africa. The coastal low near Walvis Bay will move southwards and fog and low clouds will occur overnight over the western and south-western Cape coastal belt.

DATE 2 - 4 - 1966. DATUM

AFLEIDING

Die hoog suidoos van die land gelee", voer koel, vogtige lug in oor die noordoostelike binneland. Donderbuie sal oor dele van die binneland ontwikkel, hoofsaaklik oor Suidwes-Afrika. Die kuslaag by Walvisbaai sal suidwaarts beweeg en dus sal mis en lae wolke oornag voorkom oor die suidwestelike en westelike Kaapse kusgebiede

INFERENCE

DATE 3 - 4 - 1966 DATUM

AFLEIDING

The high situated east of the country is moving eastwards and thundershowers will only develop over South-West Africa and the north-western Cape. With a coastal low situated on the Cape south coast and another near Alexander Bay, fog and low clouds will occur over the western and southern Cape coastal areas.

Die hoog wat oos van die land geleë is, beweeg oos-waarts en donderbuie sal slegs oor Suidwes-Afrika en Noordwes-Kaapland voorkom. Met 'n kuslaag oor die Kaapse suidkus geleë en nog een by die Alexanderbaai, sal mis en lae wolke oornag voorkom oor die westelike en suidelike Kaapse kusgebiede.

INFERENCE

The low in the upper air over southern South-West Africa causes thundershowers over most parts of the interior. However, dewpoints are too low for general development and thus only isolated thundershowers are expected.

DATE 6 - 4 - 1966 DATUM

AFLEIDING

Die laag in die bolug oor suidelike Suidwes-Afrika veroorsaak donderbuie oor meeste dele van die binneland; doupunte is egter te laag vir grootskaalse ontwikkeling en slegs los donderbuie word verwag.

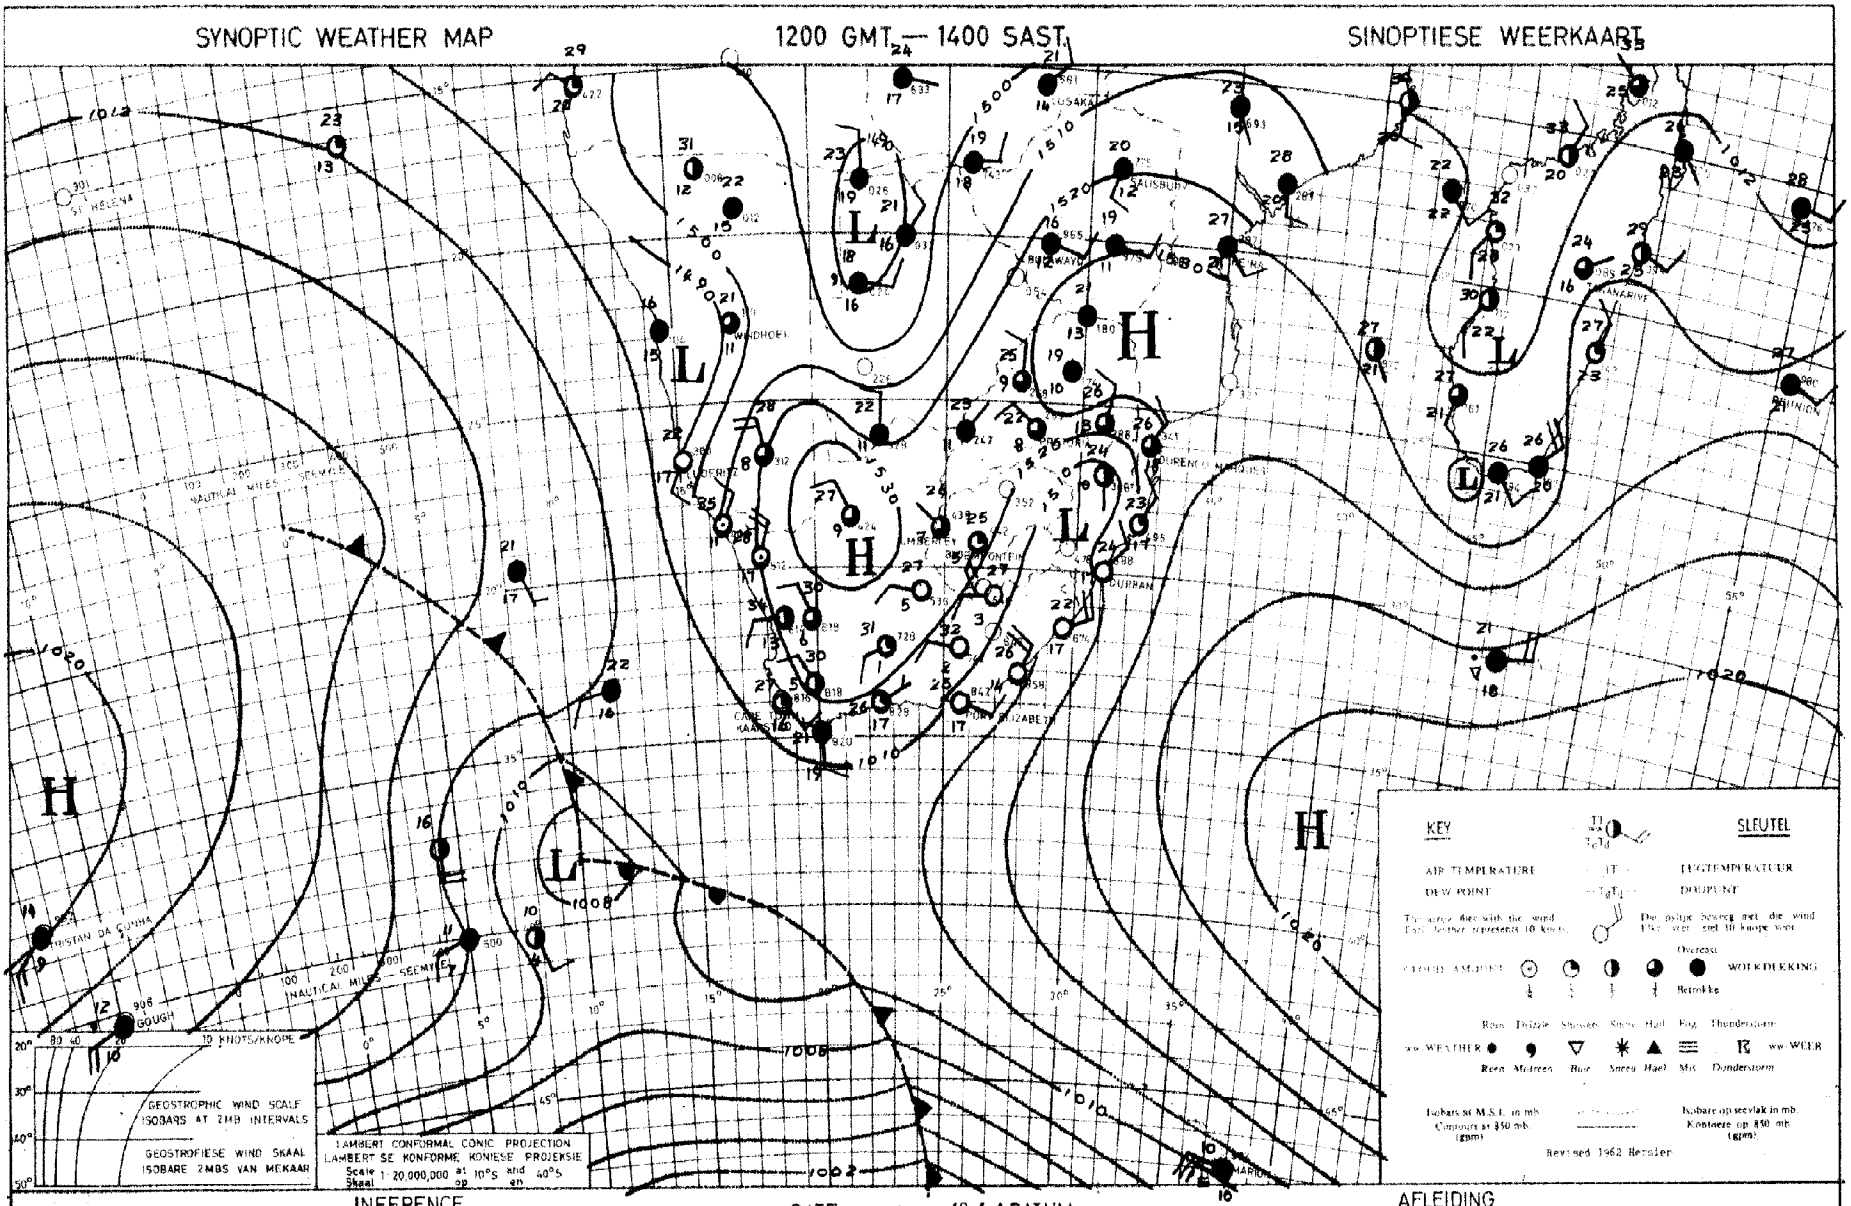
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST SINOPTIESE WEERKAART



INFERENCE DATE 7-4-1966 DATUM AFLEIDING

The cold front west of the Cape is moving eastwards and will cause cooler, cloudy conditions with rain to develop over the south-western Cape. With a low pressure system in the upper air over the north-western interior scattered showers will fall over the northern parts of South-West Africa and Bechuanaland.

Die koufront wes van die Kaap beweeg ooswaarts en sal koeler, bewolkte toestande met reën oor Suidwes-Kaapland veroorsaak. Met 'n laagdrukstelsel in die bolug oor die noordwestelike binneland sal verspreide buie oor die noordelike dele van Suidwes-Afrika en Betsjoeanaland uitsak.

DAAGLIKSE WEERBULLETIN

INFERENCE

DATE 9 - 4 - 1966 DATUM

AFLEIDING

The low south of the continent is moving eastwards and cooler, cloudy weather with rain and showers will spread over the southern and eastern parts of the Cape. As the high to the west of the Cape moves south-eastwards, a gradual clearance will take place over the South-Western Cape.

Die laag suid van die vasteland beweeg oostwaarts en koeler bewolkte toestande met reën en buie sal oor die suidelike en oostelike dele van Kaapland uitbrei. Namate die hoog ten weste van die Kaap suidooswaarts beweeg, sal dit geleidelik ooptrek oor Suidwes-Kaapland.

LAMBERT SE KONFORME KONIESE PROJEKSIE
Scale 1: 20,000,000 at 30°S and 40°S
Skaal 1: 20,000,000 op 30° en 40°

KEY SLEUTEL

INFERENCE DATE 10 - 4 - 1966 DATUM AFLEIDING

Pressures are rising over the eastern coastal regions as the low to the east of the country moves eastwards. Cool cloudy weather with rain and showers will therefore prevail over the Eastern Cape and over Natal.

Lugdruk styg oor die oostelike kusgebiede namate die laag oos van die land ooswaarts beweeg. Koeler bewolkte weer met reën en buie sal dus voortduur oor Oos-Kaapland en Natal.

INFERENCE

DATE 11 - 4 - 1966 DATUM

AFLEIDING

The Atlantic high is ridging around the south coast and thus it will clear over the western Cape coasts, but cloudy weather with showers will persist over the remainder of the coast. The Atlantic high will advect slightly moister air over the interior, and this, together with the trough on the surface, will cause showers over the eastern interior.

Die Atlantiese hoog stoot 'n rug om die suidkus en dus sal dit opklaar oor die westelike Kaapse kusgebiede maar bewolkte weer met buie sal oor die res van die kus voortduur.

Die Atlantiese hoog sal ietwat vogtiger lug oor die binneland invoer en, gepaard met 'n trog op die oppervlakte, sal dit buie oor die oostelike binneland veroorsaak.

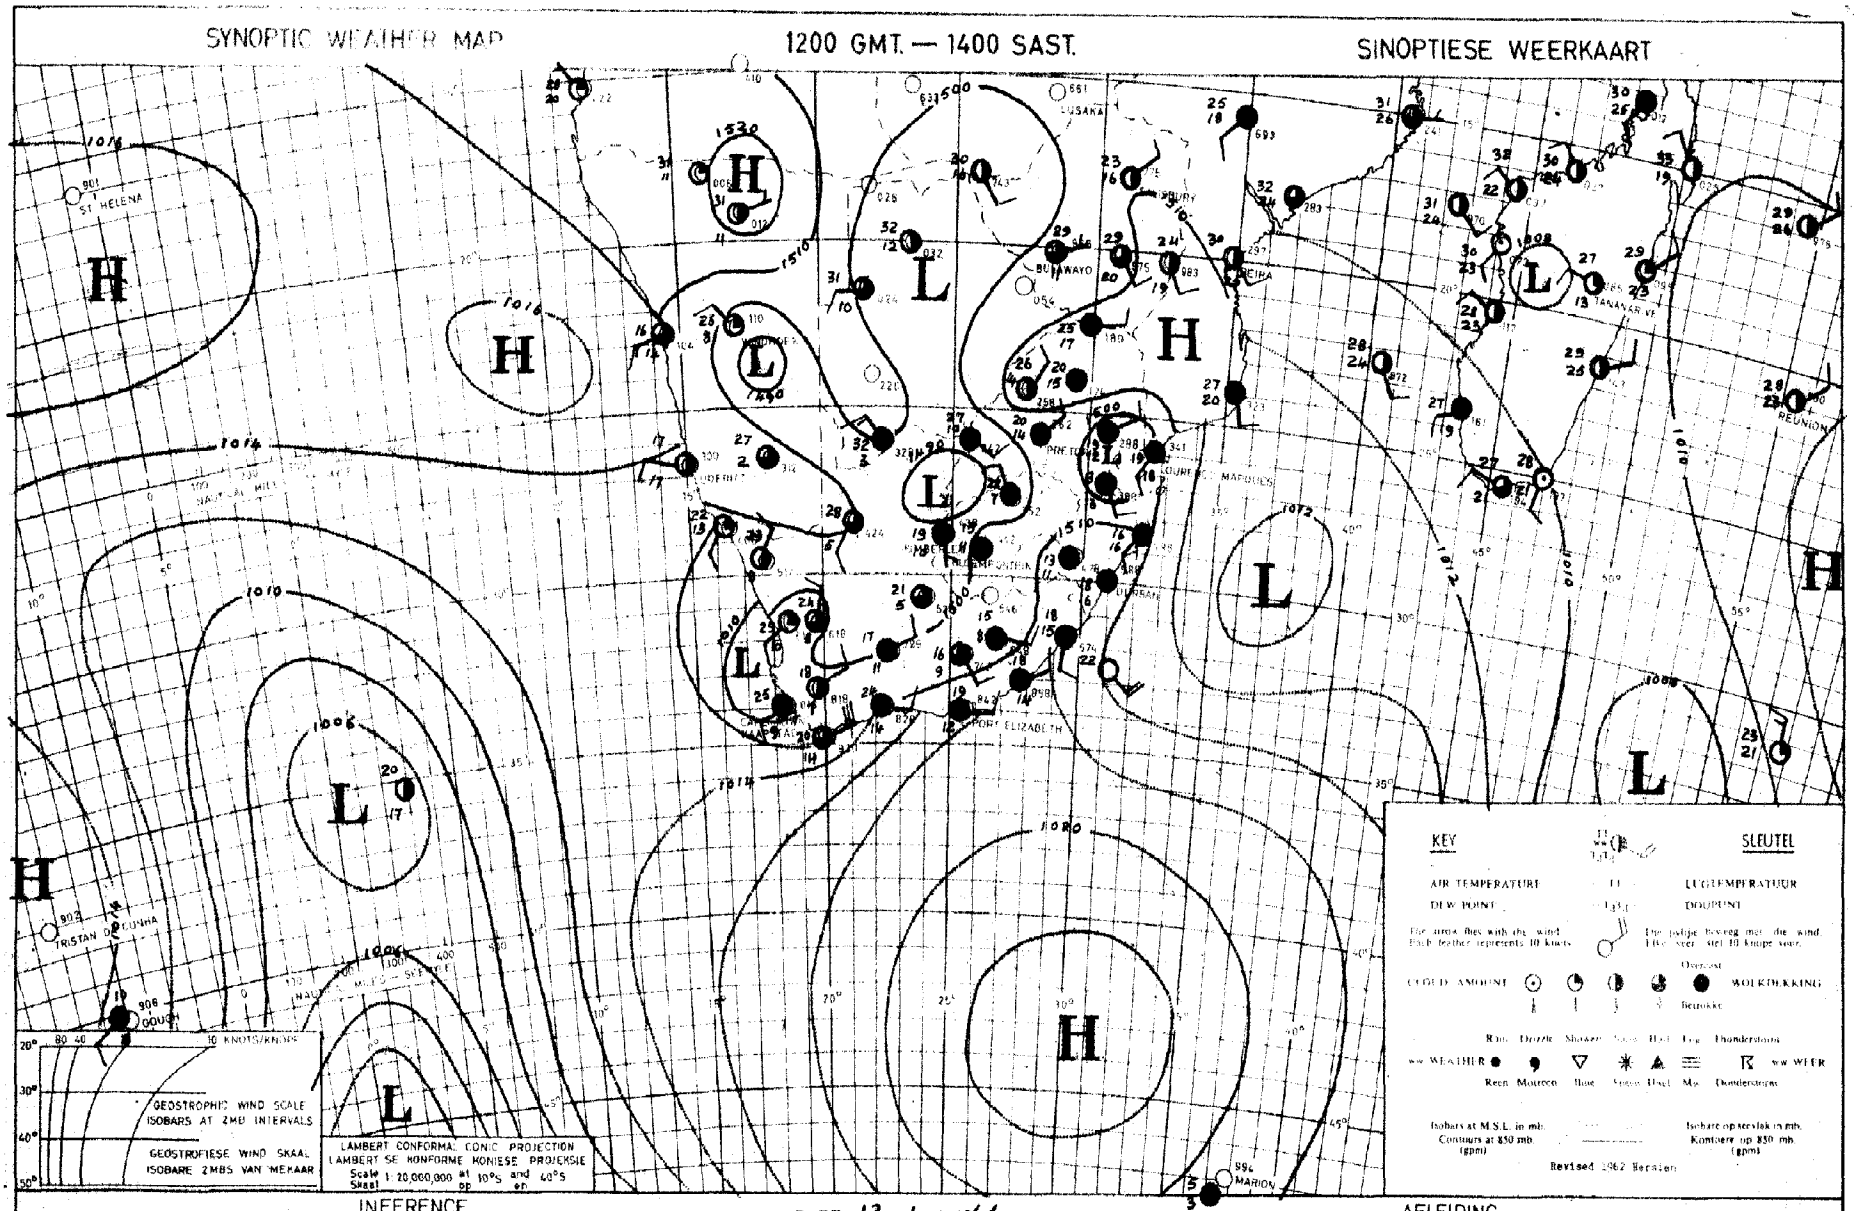
SYNOPTIC WEATHER MAP

1200 GMT. — 1400 SAST.

SINOPTIESE WEERKAART



INFERENCE

DATE 12-4-1966 DATUM

AFLEIDING

The high to the south-east of the continent is causing an inflow of moist air over the eastern half of the country where it will be cloudy and cool. With low pressure over the interior scattered rain and thundershowers will occur. The air over the western parts of the country is relatively dry and only partly cloudy conditions will occur over these regions.

Die hoog suidoos van die land voer vogtige lug in oor die oostelike helfte van die land waar dit bewolk en koel sal wees. Met laagdruk oor die binneland sal verspreide reën en donderbuie voorkom. Oor die westelike dele van die land is die lug betreklik droog en slegs gedeeltelik bewolkte toestande word daar verwag.

INFERENCE

DATE 13 - 4 - 1966 DATUM

AFLEIDING

The low off the Cape coast is moving eastwards and will cause cloudy, cooler weather with rain and showers over the western and southern Cape Province. The strong high near Marion Island continues to cause an inflow of moist air over the eastern regions where it will be cloudy.

Die laag langs die Kaapse kus beweeg oostwaarts en sal bewolkte, koeler weer met reën en buie oor Wes- en Suid-Kaapland veroorsaak. Die sterk hoog naby Marion veroorsaak nog steeds 'n instroming van vogtige lug oor die oostelike gebiede waar dit bewolk sal wees.

The deep low situated off the Cape south-east coast is moving north-eastwards and cloudy weather with showers will spread over the Natal coast. The air is dry and stable over the remainder of the country and no development is expected.

Die diep laagdrukstelsel langs die Kaapse suidooskus gelee, beweeg noordooswaarts en bewolkte weer met buie sal uitbrei oor die Natalse kusgebied. Oor die res van die land is die lug droog en stabiel en geen ontwikkeling word verwag nie.

As a result of the high over the north-western interior and the lows east of the continent, dry air from the south-west has moved across the interior where it will be mainly fine. With onshore winds along the south-eastern coastal regions it will become partly cloudy over these areas. The cold front west of the Cape will cause light rain later over the Peninsula.

As gevolg van die hoog oor die noordwestelike binneland en die laagdrukstelsels oos van die vasteland het droë lug uit die suidweste oor die land inbeweeg waar dit hoofsaaklik mooiweer sal wees. Winde oor die suidoostelike kusstreke waai langs die kuslyn op en sal gedeeltelik bewolkte toestande oor hierdie gebiede teweegbring. Die koue front wes van Kaapland sal later ligte reën oor die Skiereiland veroorsaak.

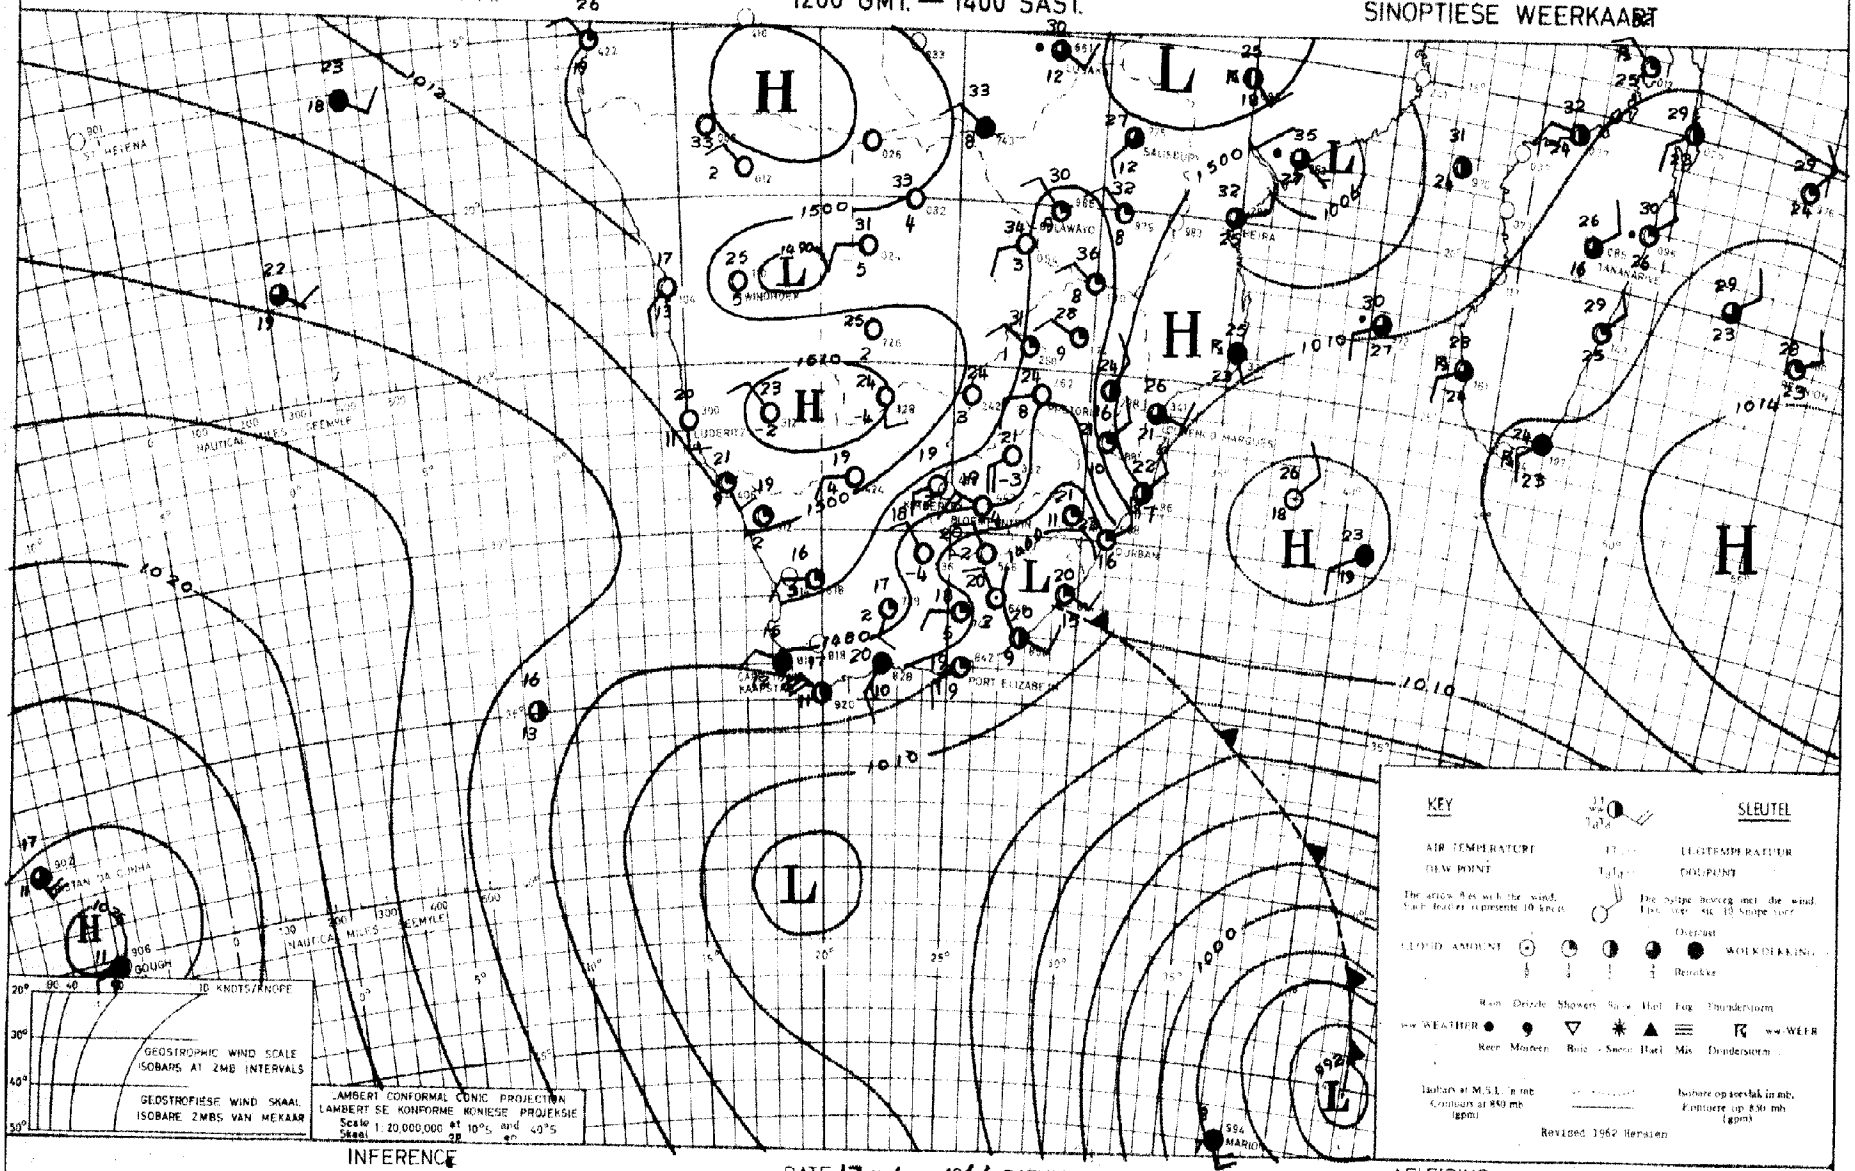
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

The post-frontal trough is still evident to the west of the Cape but is moving slowly eastwards. Rain or showers will consequently fall over the South-Western Cape. The air over the remainder of the country is dry and it will be mainly fine to slightly cloudy.

DATE 17 - 4 - 1966 DATUM

AFLEIDING

Die post-frontale trog strek nog wes van die Kaap maar beweeg geleidelik ooswaarts. Reën en buie sal dus uitsak oor Suidwes- Kaapland. Oor die res van die land is droë lug aanwesig en dit sal hoofsaaklik mooiweer of eftens bewolk wees.

DAAGLIKSE WEERBULLETIN

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

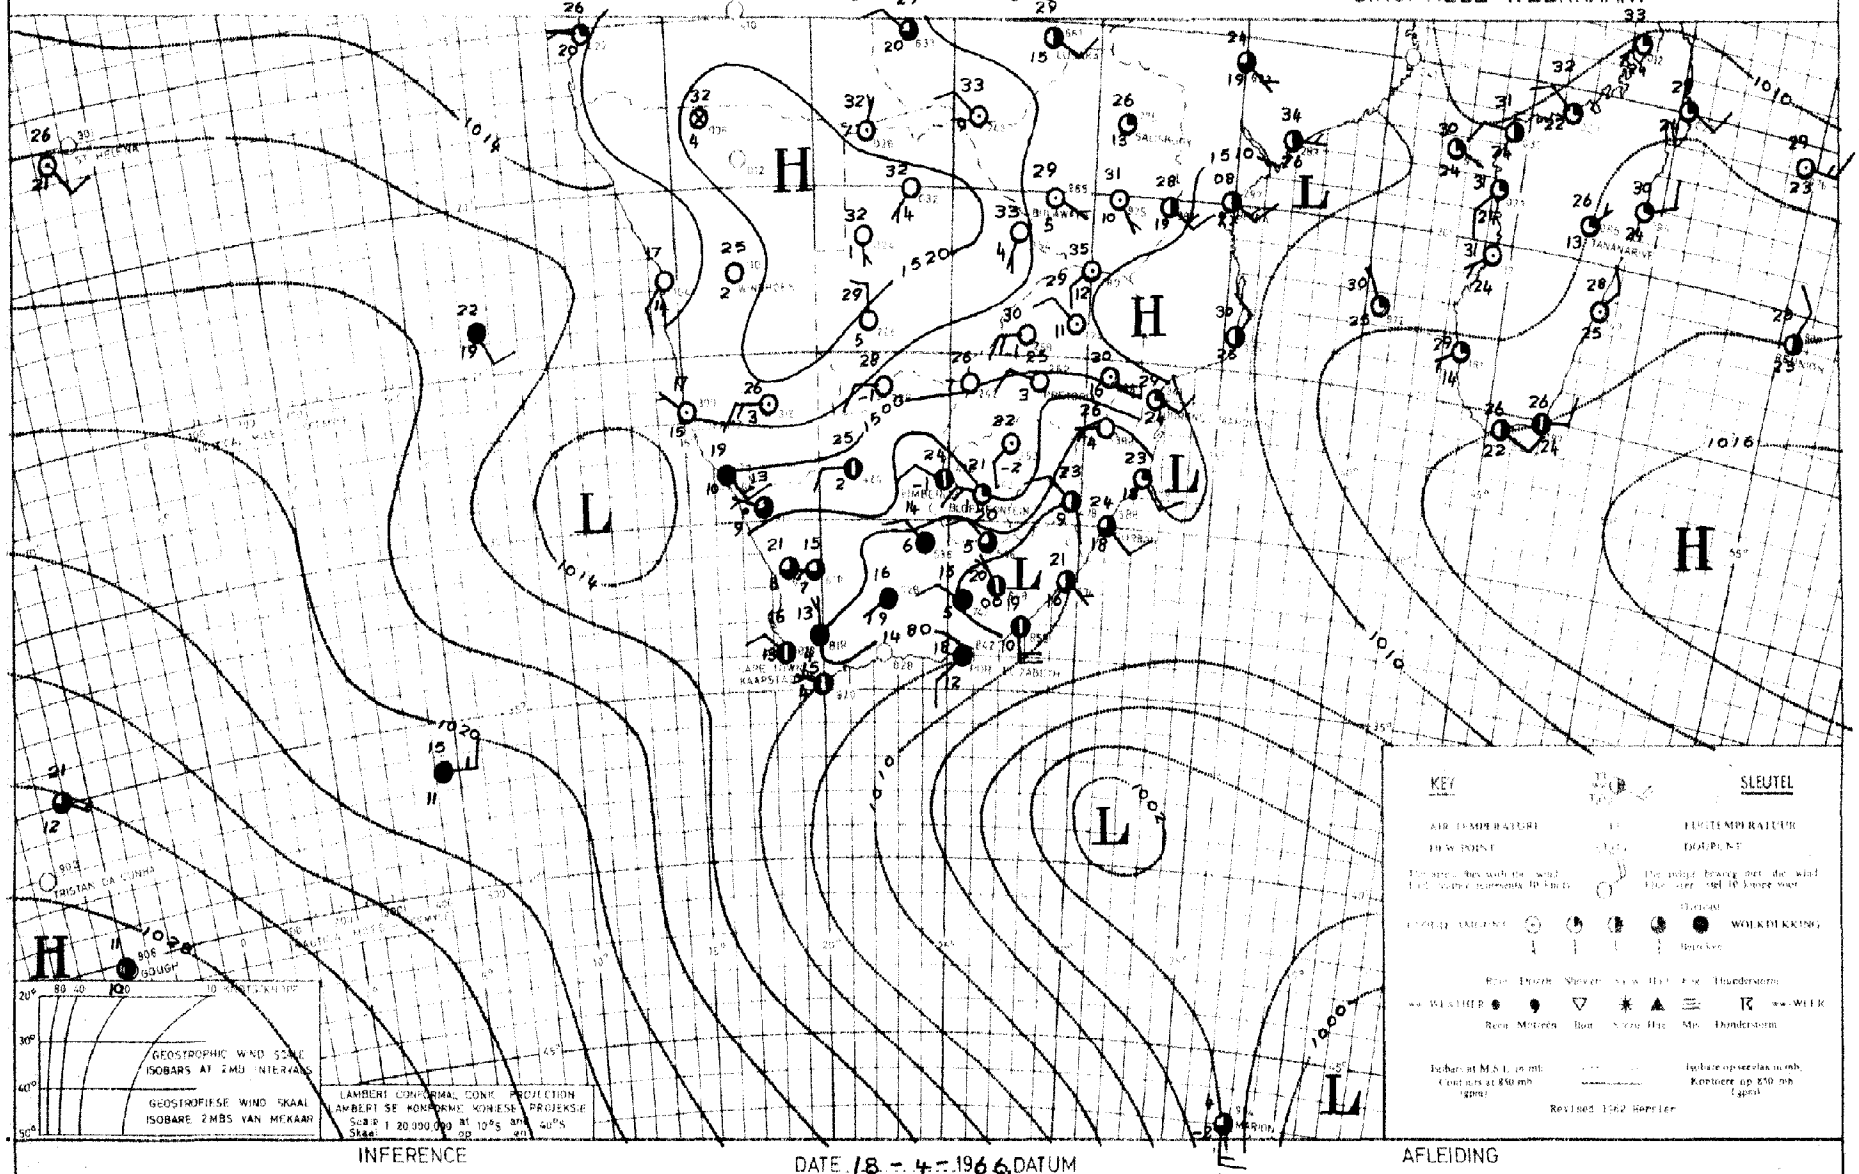
SYNOPTIC WEATHER MAP 1200 GMT 29 — 1400 SAST SINOPTIESE WEERKAART



INFERENCE DATE 18 - 4 - 1966 DATUM AFLEIDING

The Atlantic high is ridging around the south coast and thus it will clear over the western parts of the country. The trough situated off the west coast will move eastwards, causing cloudy conditions with showers over the eastern regions of the southern half of the country.

Die Atlantiese hoog stoot n rug suid van die land om en die weer sal dus opklaar oor die westelike dele van die land. Die trog naby die weskus geleë, sal ooswaarts beweeg en bewolkte toestande met buie veroorsaak oor die oostelike streke van die suidelike helfte van die land.

INFERENCE

The high to the south-west of the Cape is causing an inflow of moist maritime air over the north-eastern parts of the country where it will be partly cloudy. A low in the upper air over the northern interior will cause a few showers to fall over Western and Southern Transvaal. Warm bergwind conditions will occur along the West Coast.

DATE 20 - 4 - 1966. DATUM

AFLEIDING

Die hoog suidwes van Kaapland voer vogtige seelug in oor die noordoostelike dele van die land waar dit gedeeltelik bewolk sal wees. 'n Boluglaag oor die noordelike binneland sal enkele buie oor Wes- en Suid-Transvaal veroorsaak. Warm bergwindtoestande sal langs die Weskus voorkom.

INFERENCE

The high off the south-east coast is causing moist air to flow in over the Transvaal where it will be partly cloudy and mild. Dry air is present over the remaining regions and it will be fair and mild to warm, but hot along the western and south-western coasts with berg winds.

DATE 21 - 4 - 1966. DATUM

AFLEIDING

Die hoog langs die suidooskus veroorsaak 'n instroming van vogtige lug oor Transvaal waar dit gedeeltelik bewolk en matig sal wees. Droë lug is aanwesig oor die res van die land en dit sal redelik mooiweer en matig tot warm wees, maar baie warm langs die wes- en suidweskus met bergwinde.

INFERENCE

DATE 22 - 4 - 1966. DATUM

AFLEIDING

The coastal low situated off the Cape west coast, will move around the coast and cause cloudy, somewhat cooler weather.

Moist air from the north is flowing over the interior, and thundershowers will develop over the Cape province and southern Free State. The air over the Transvaal and northern Free State is too stable for development.

Die kuslaag op die Kaapse weskus geleë, sal om die kus beweeg en bewolkte, ietwat koeler toestande veroorsaak.

Vogtige lug van die noorde stroom nog oor die binneland en donderbuie sal oor die Kaapprovinsie en Suid-Vrystaat ontwikkel. Die lug oor Natal, Noord-Vrystaat en Transvaal is stabiel en geen ontwikkeling word verwag nie.

INFERENCE

DATE 23 - 4 - 19 66 DATUM

AFLEIDING

The coastal low over the south-eastern Cape coast is moving north-eastwards, followed by a ridge of the Atlantic high, with the result that cloudy and cooler weather will spread over the southern and south-eastern Cape coastal regions. Over the remainder of the country it will be fine to partly cloudy and mild to warm.

Die kuslaag oor die Kaapse suidooskus beweeg noordooswaarts, gevolg deur 'n wig van die Atlantiese hoog, sodat bewolkte en koeler weer oor die suidelike en suidoostelike Kaapse kusstreke sal uitbrei. Oor die res van die land sal dit mooiweer tot gedeeltelik bewolk en matig wees.

INFERENCE

The high south of the country is moving north-eastwards to the Natal coast with the result that cloudy cooler weather will spread to the eastern coastal regions while it will clear over the southern coasts.

DATE 24 - 4 - 1966. DATUM

AFLEIDING

Die hoog suid van die land beweeg noordoostwaarts na die Natalse kus sodat bewolkte koeler weer sal uitbrei na die oostelike kusstreke terwyl dit sal opklaar oor die suidelike kusstreke.

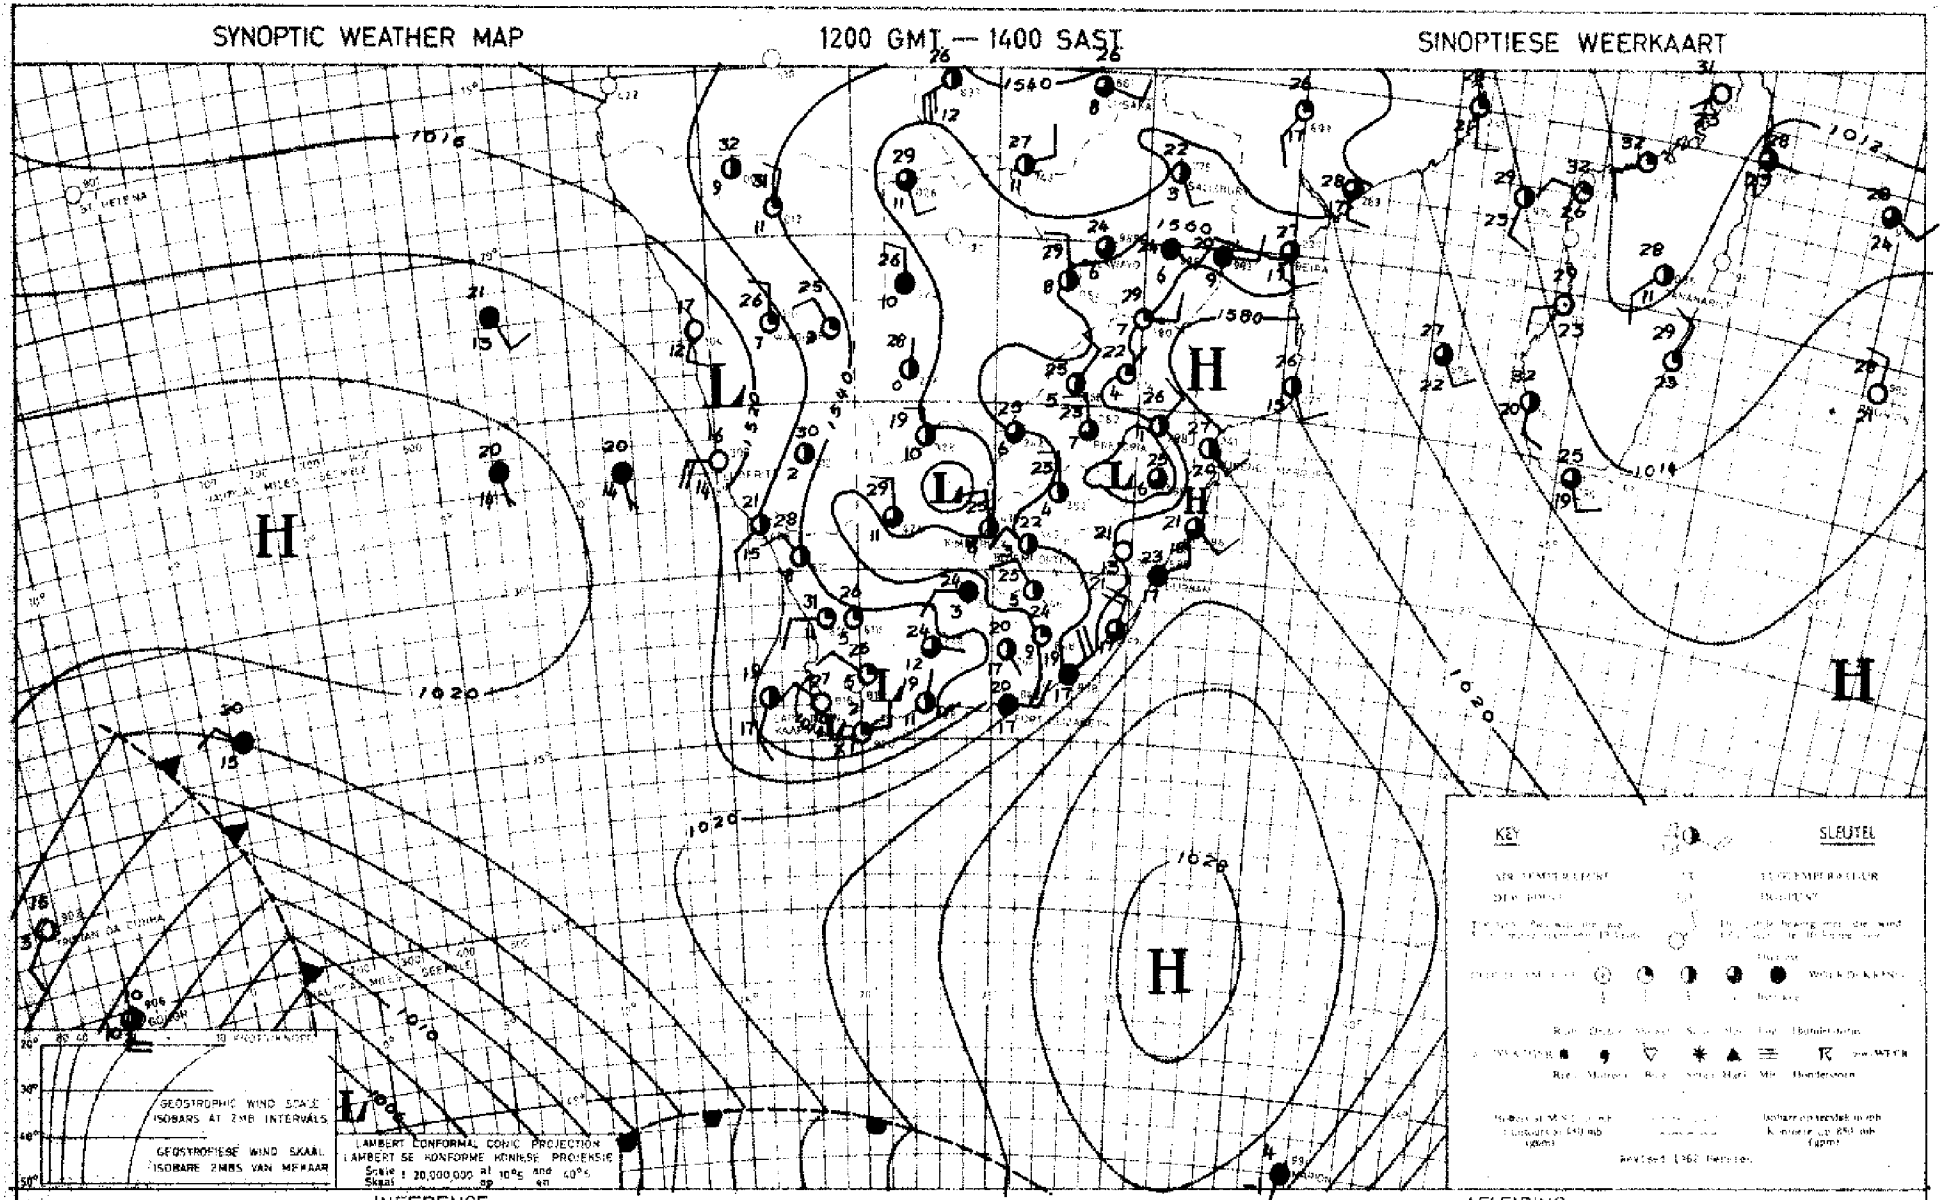
SYNOPTIC WEATHER MAP — 1200 GMT — 1400 SAST — SINOPTIESE WEERKAART



INFERENCE

The strong Indian Ocean high is blocking the systems to the west, and is at the same time advecting moisture over the north-eastern interior. The coastal low, situated on the south-western Cape coast, will move slowly eastwards, so that cloudy weather with fog patches will spread to the Cape south coast.

DATE 25-4-1966 DATUM

AFLEIDING

Die sterk Indiese hoog blokkeer die sisteme na die weste, en voer terselfdertyd vogtige lug oor die noordoostelike binneland in. Die kuslaag wat op die Kaapse suidweskus gelee is, beweeg stadig ooswaarts en bewolkte weer met misbanke sal na die Kaapse suidkus uitbrei.

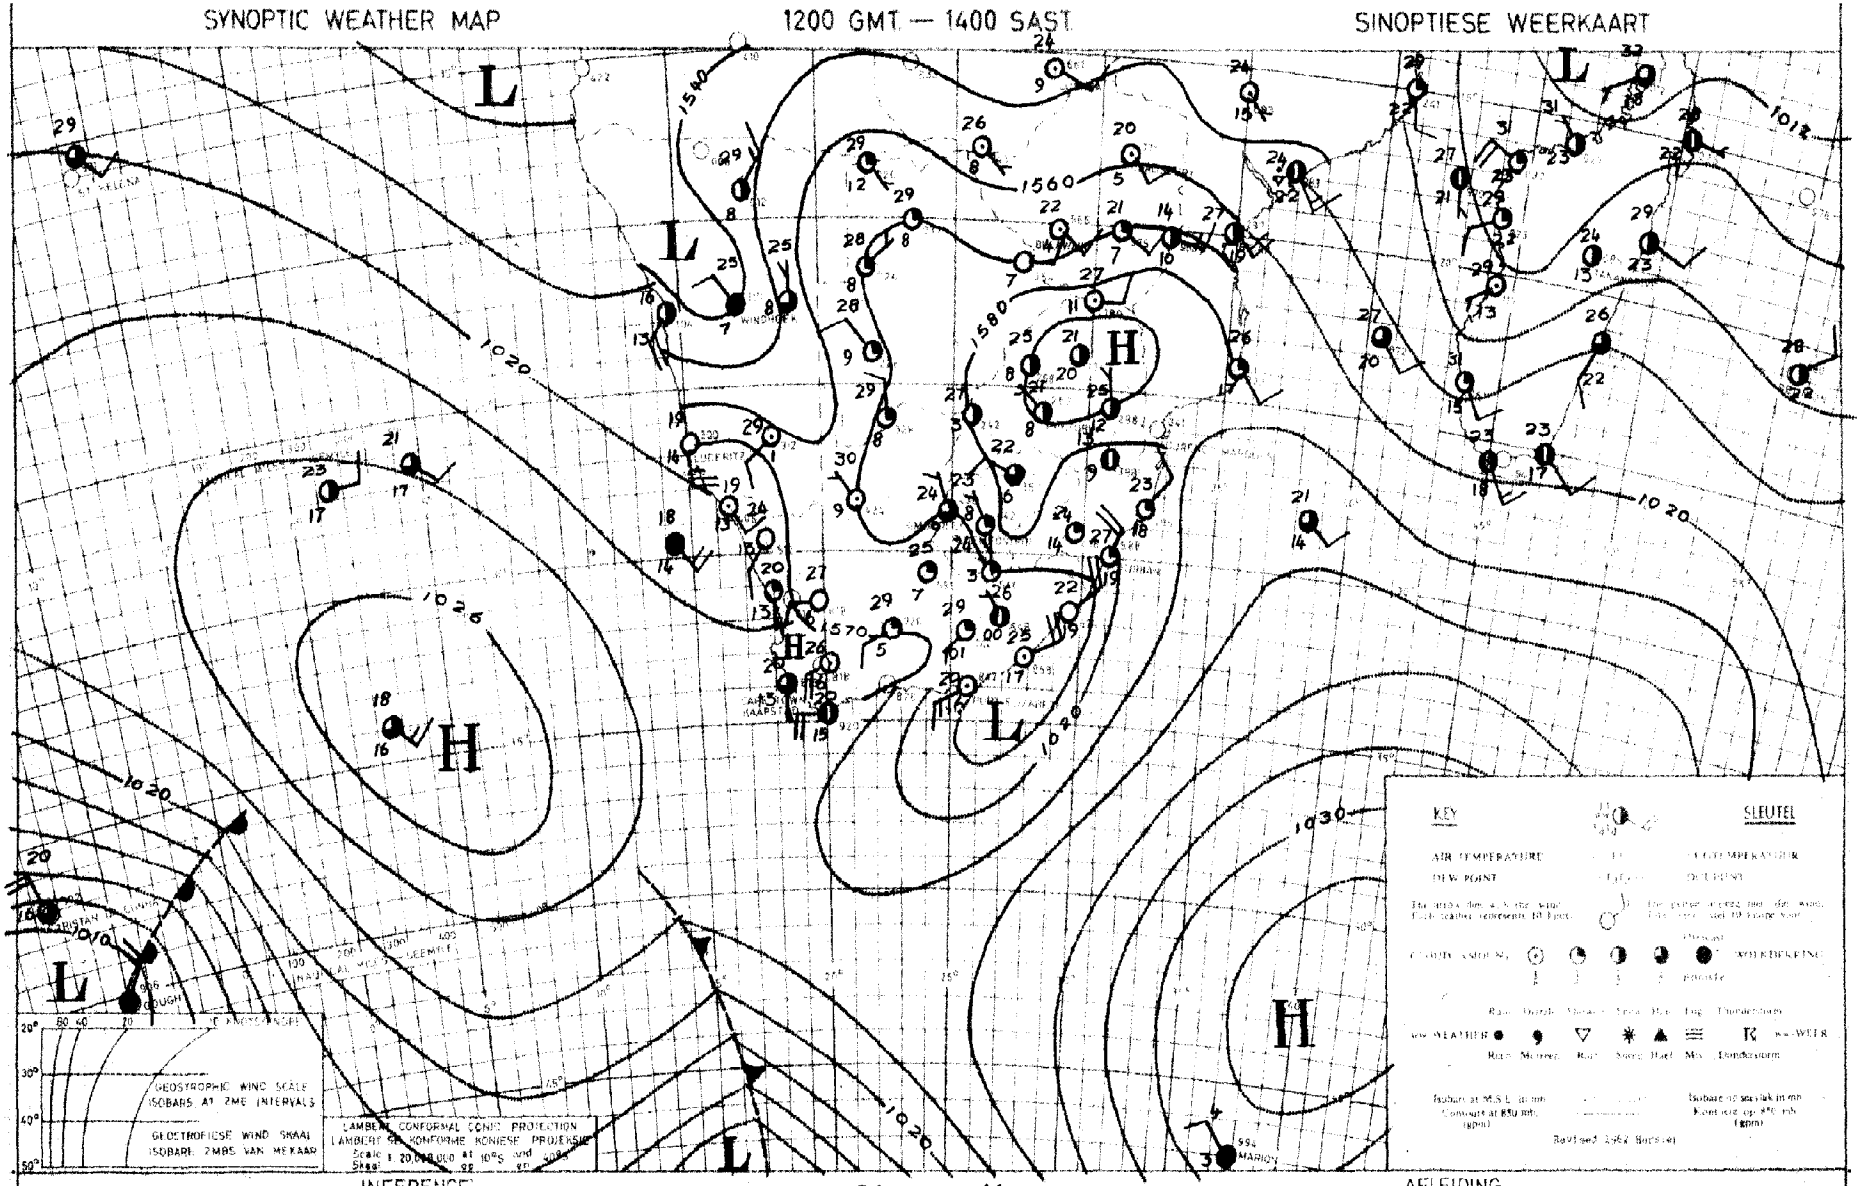
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST SINOPTIESE WEERKAART



INFERENCE

The coastal low off East London will cause partly cloudy to cloudy weather over the east coast. The air over the central and northern interior is fairly moist and it will be partly cloudy with a few showers over these regions.

DATE 26 - 4 - 1966 DATUM

AFLEIDING

Die kuslaag by Oos-Londen sal gedeeltelik bewolkte tot bewolkte weer langs die ooskus veroorsaak. Die lug oor die sentrale en noordelike binneland is taamlik vogtig en dit sal gedeeltelik bewolk wees met enkele buie oor hierdie dele.

INFERENCE

DATE 28 - 4 - 1966 DATUM

AFLEIDING

The Atlantic high is ridging around the south coast, so that it will clear over the southern and south-eastern coastal regions. The air is moist over the interior, and with a trough over the western parts, on the surface as well as in the upper air, scattered to general thundershowers will develop over the interior.

Die Atlantiese hoog stoot 'n rug om die suidkus, met gevolglike opklaring oor die suid- en suidooskus. Die lug oor die binneland is voglig, en met 'n trog oor die westelike dele, op die oppervlakte sowel as in die bolug, sal verspreide tot algemene donderbuie oor die binneland ontwikkel.

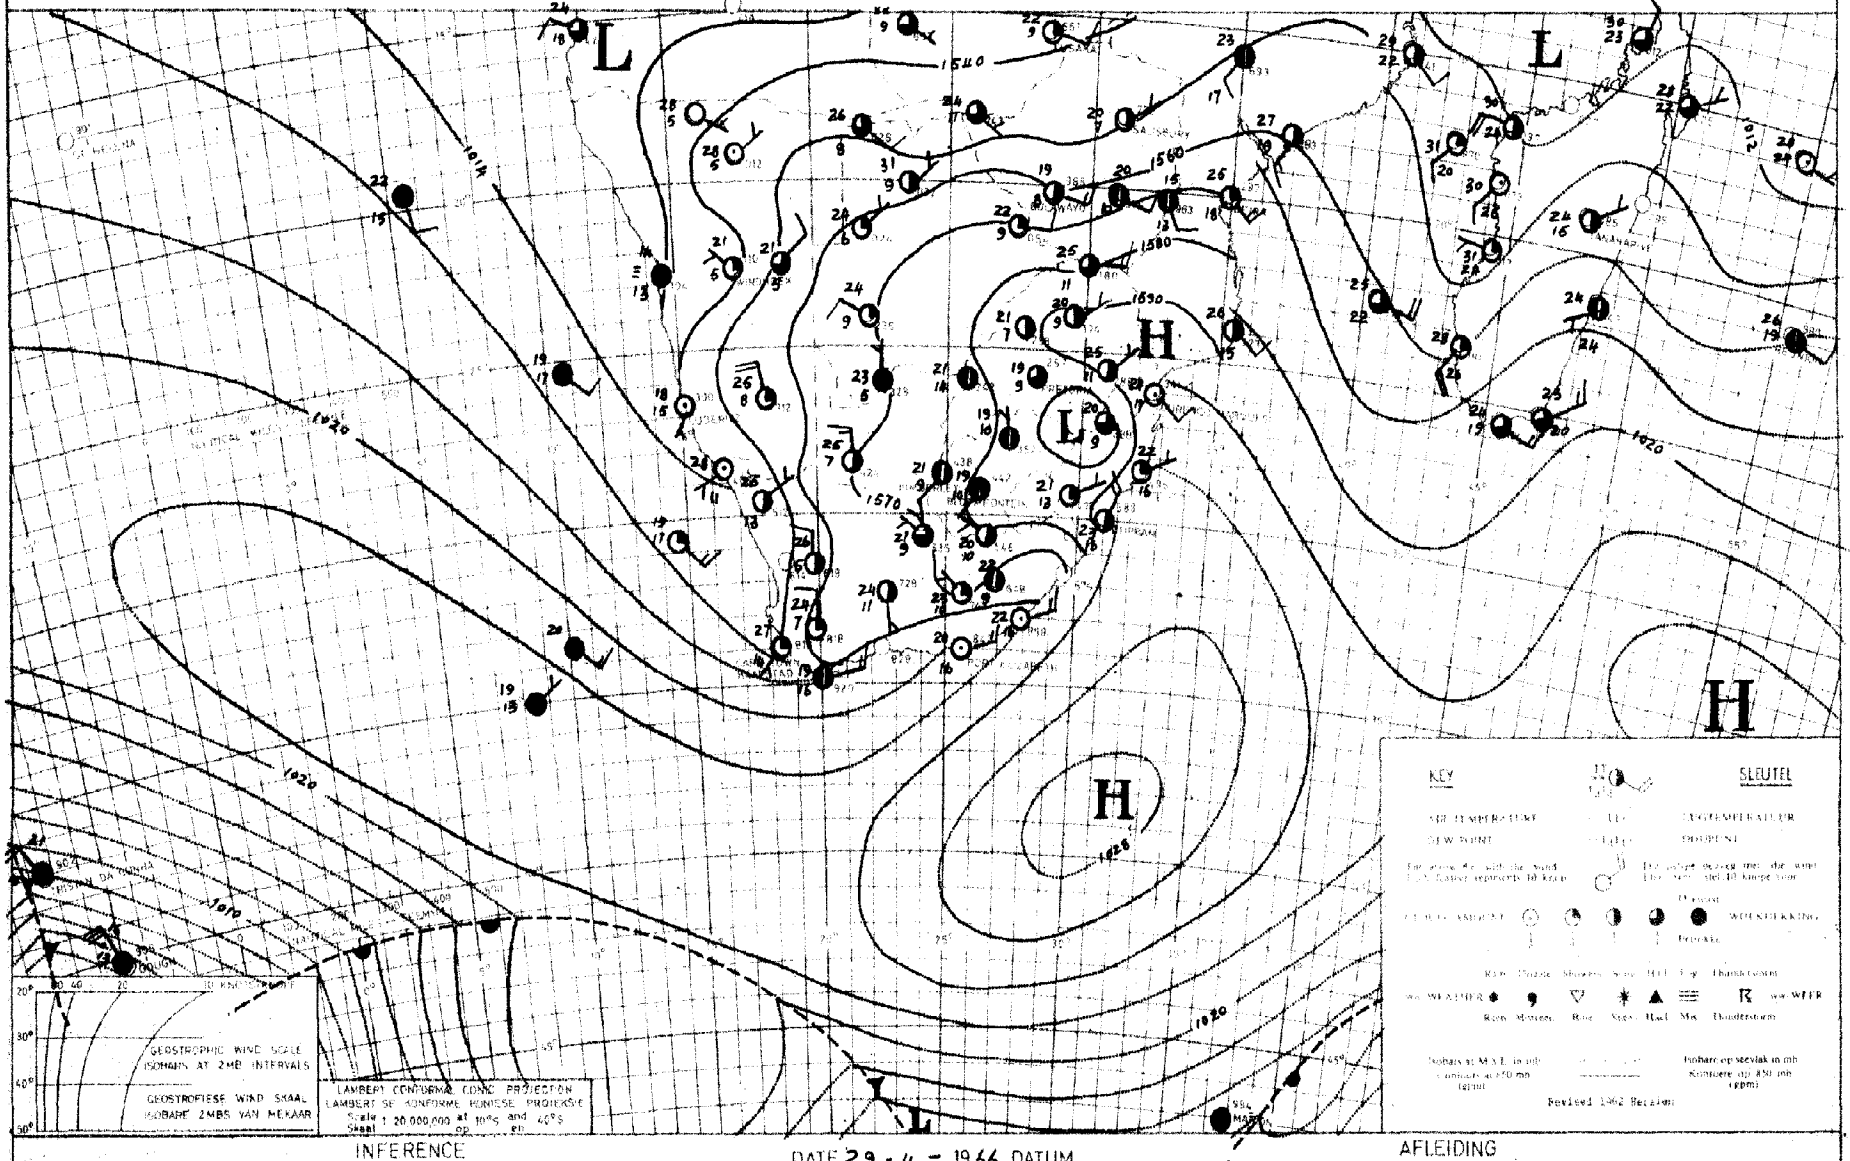
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 29 - 4 - 1966 DATUM AFLEIDING

With the high off the south-east coast it will be fair along the southern and eastern coastal areas. Moist air flowing in from the north will cause partly cloudy weather over the interior and isolated showers will fall over the central and eastern regions.

Met die hoog langs die suidooskus sal dit mooiweer wees langs die suidelike en oostelike kusgebiede. Vogtige lug wat vanuit die noorde inbeweeg sal gedeeltelik bewolkte weer oor die binneland veroorsaak en los buie sal oor die sentrale en oostelike gebiede uitsak.

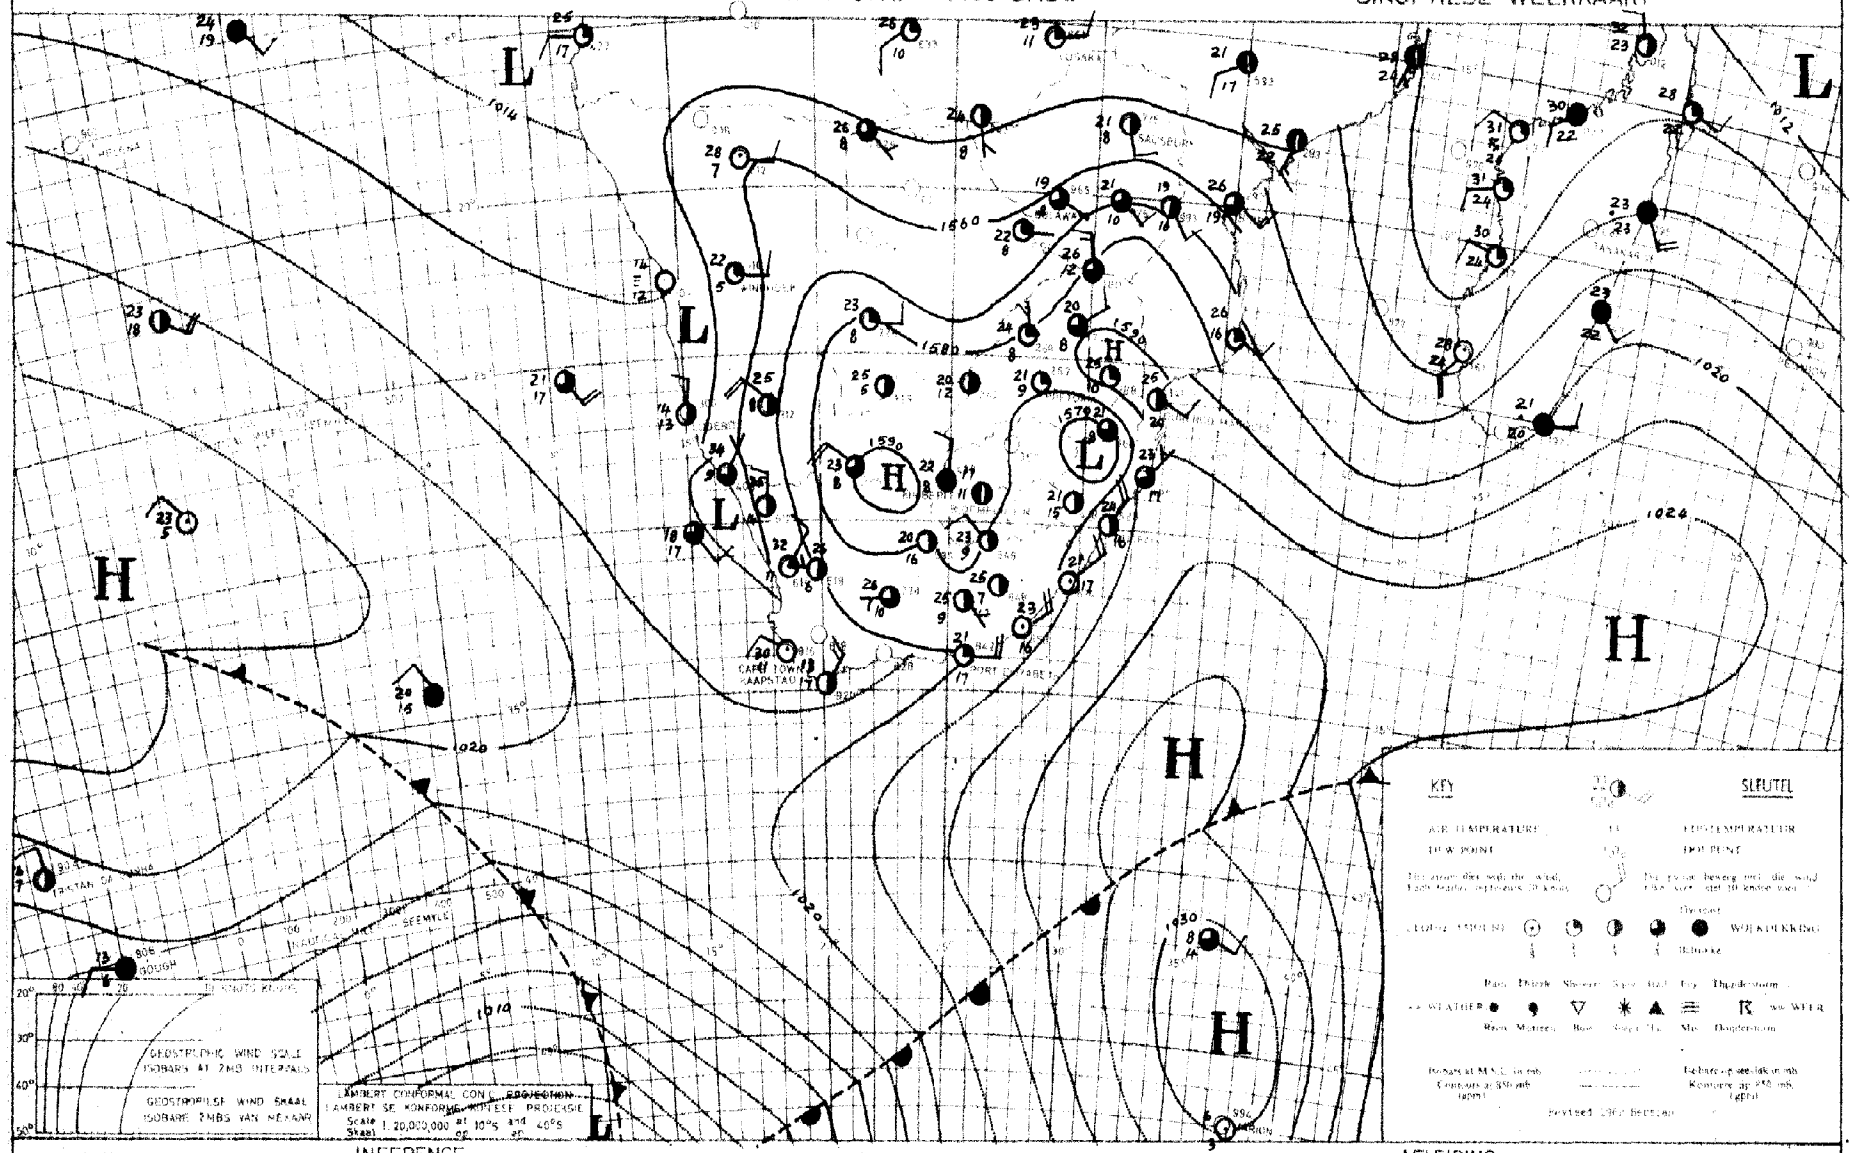
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 30 - 4 - 1966 DATUM AFLEIDING

With moist air present over most of the interior, it will be partly cloudy and mild to warm. A few showers will occur over the Southern Transvaal. The position of the high over the Indian Ocean has not changed much and the weather will remain fair along the coasts.

Met vogtige lug teenwoordig oor die meeste dele van die binneland sal dit gedeeltelik bewolk en matig tot warm wees. Enkele buie sal oor Suid-Transvaal voorkom. Die posisie van die hoog oor die Indiese Oseaan het min verander en dit sal mooiweer langs die kusstreke bly.

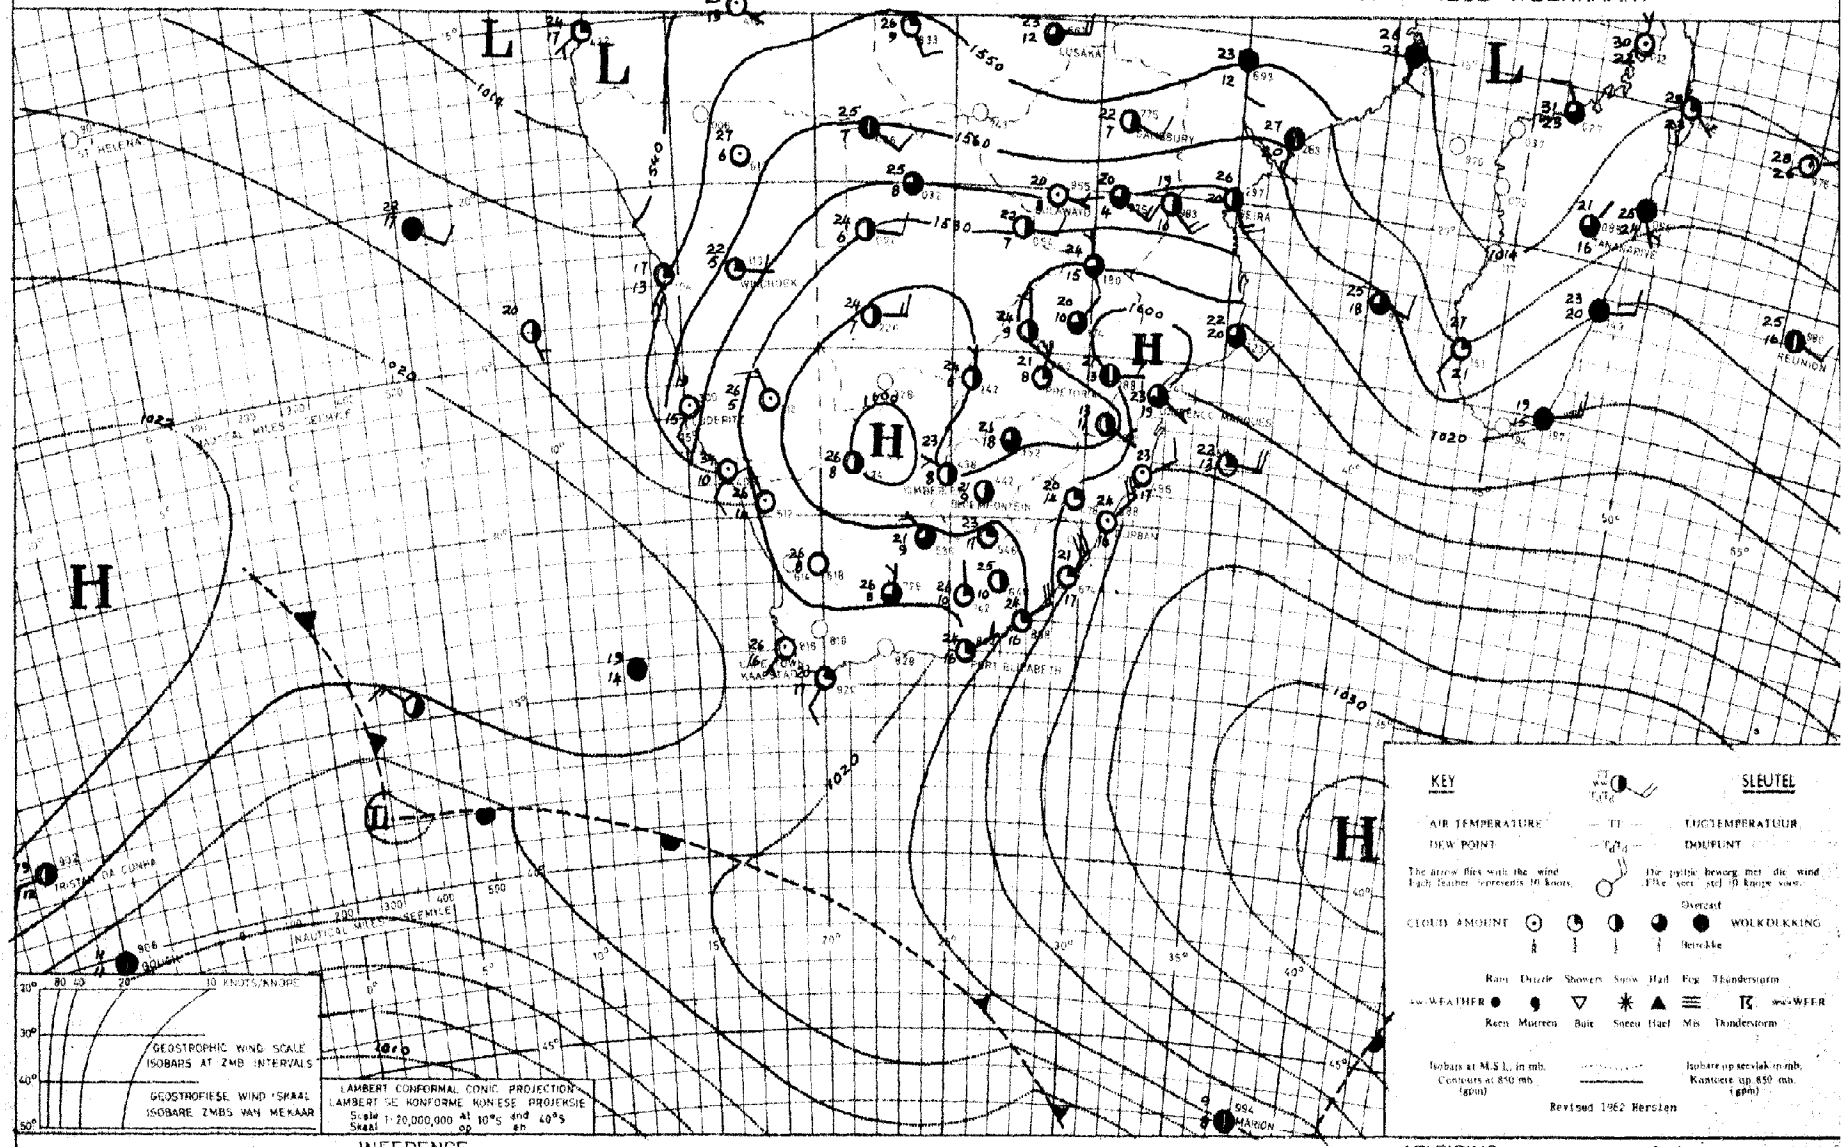
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 1 - 5 - 1966 DATUM AFLEIDING

Dew-points over the northern and eastern interior are fairly high and will result in partly cloudy conditions, but owing to the anticyclonic upper air circulation, very little can be expected in the way of showers or thunder-showers.

Doupunte oor die noordelike en oostelike binneland is taamlik hoog en gedeeltelik bewolkte weer sal voorkom, maar weens die antisiklonale bolugsirkulasie is die kanse vir buie of donderbuie gering.

DAAGLIKSE WEERBULLETIN

INFERENCE

DATE 2-6-1966 DATUM

AFLEIDING

The front, situated to the west of the Cape, will cause cloudy weather with light rain overnight and in the morning over the Cape Peninsula and vicinity. The air is moist over the interior, but the high on the surface and in the upper air is preventing development, so that only a few showers are expected over the northern interior.

Die front wes van die Kaap gelee sal oornag en in die oggend bewolkte weer met ligte reën oor die Skiereiland en omgewing veroorsaak. Die lug oor die binneland is vogtig, maar die hoog op die oppervlakte sowel as in die bolug verhinder ontwikkeling, en slegs enkele buie word oor die noordelike binneland verwag.

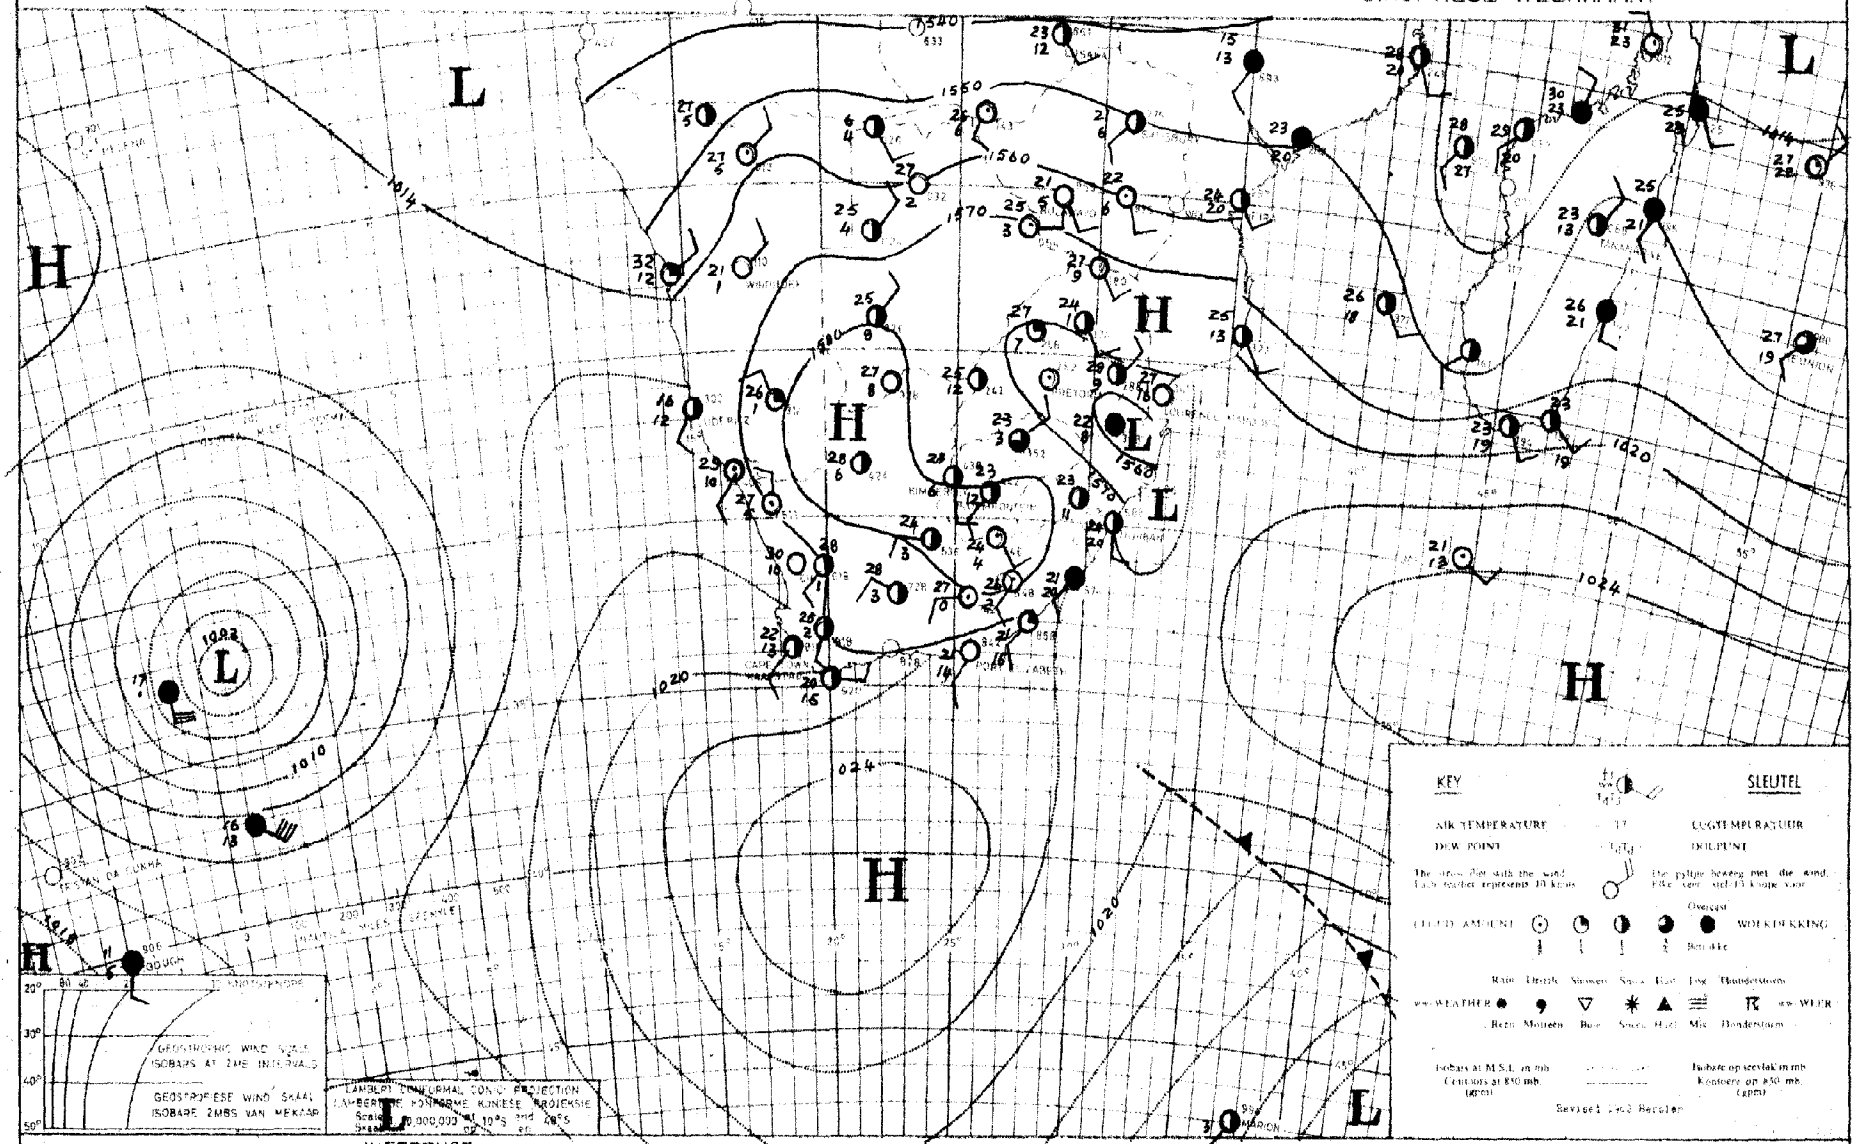
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 4 - 5 - 19 66 DATUM — AFLEIDING

The air is fairly dry and the circulation over the country is anticyclonic. Therefore it will be fine to partly cloudy and warm over most parts of the country.

Die lug is taamlik droog en die sirkulasie oor die land antisiklonaal sodat dit mooiweer tot gedeeltelik bewolk en warm sal wees oor die meeste dele van die land.

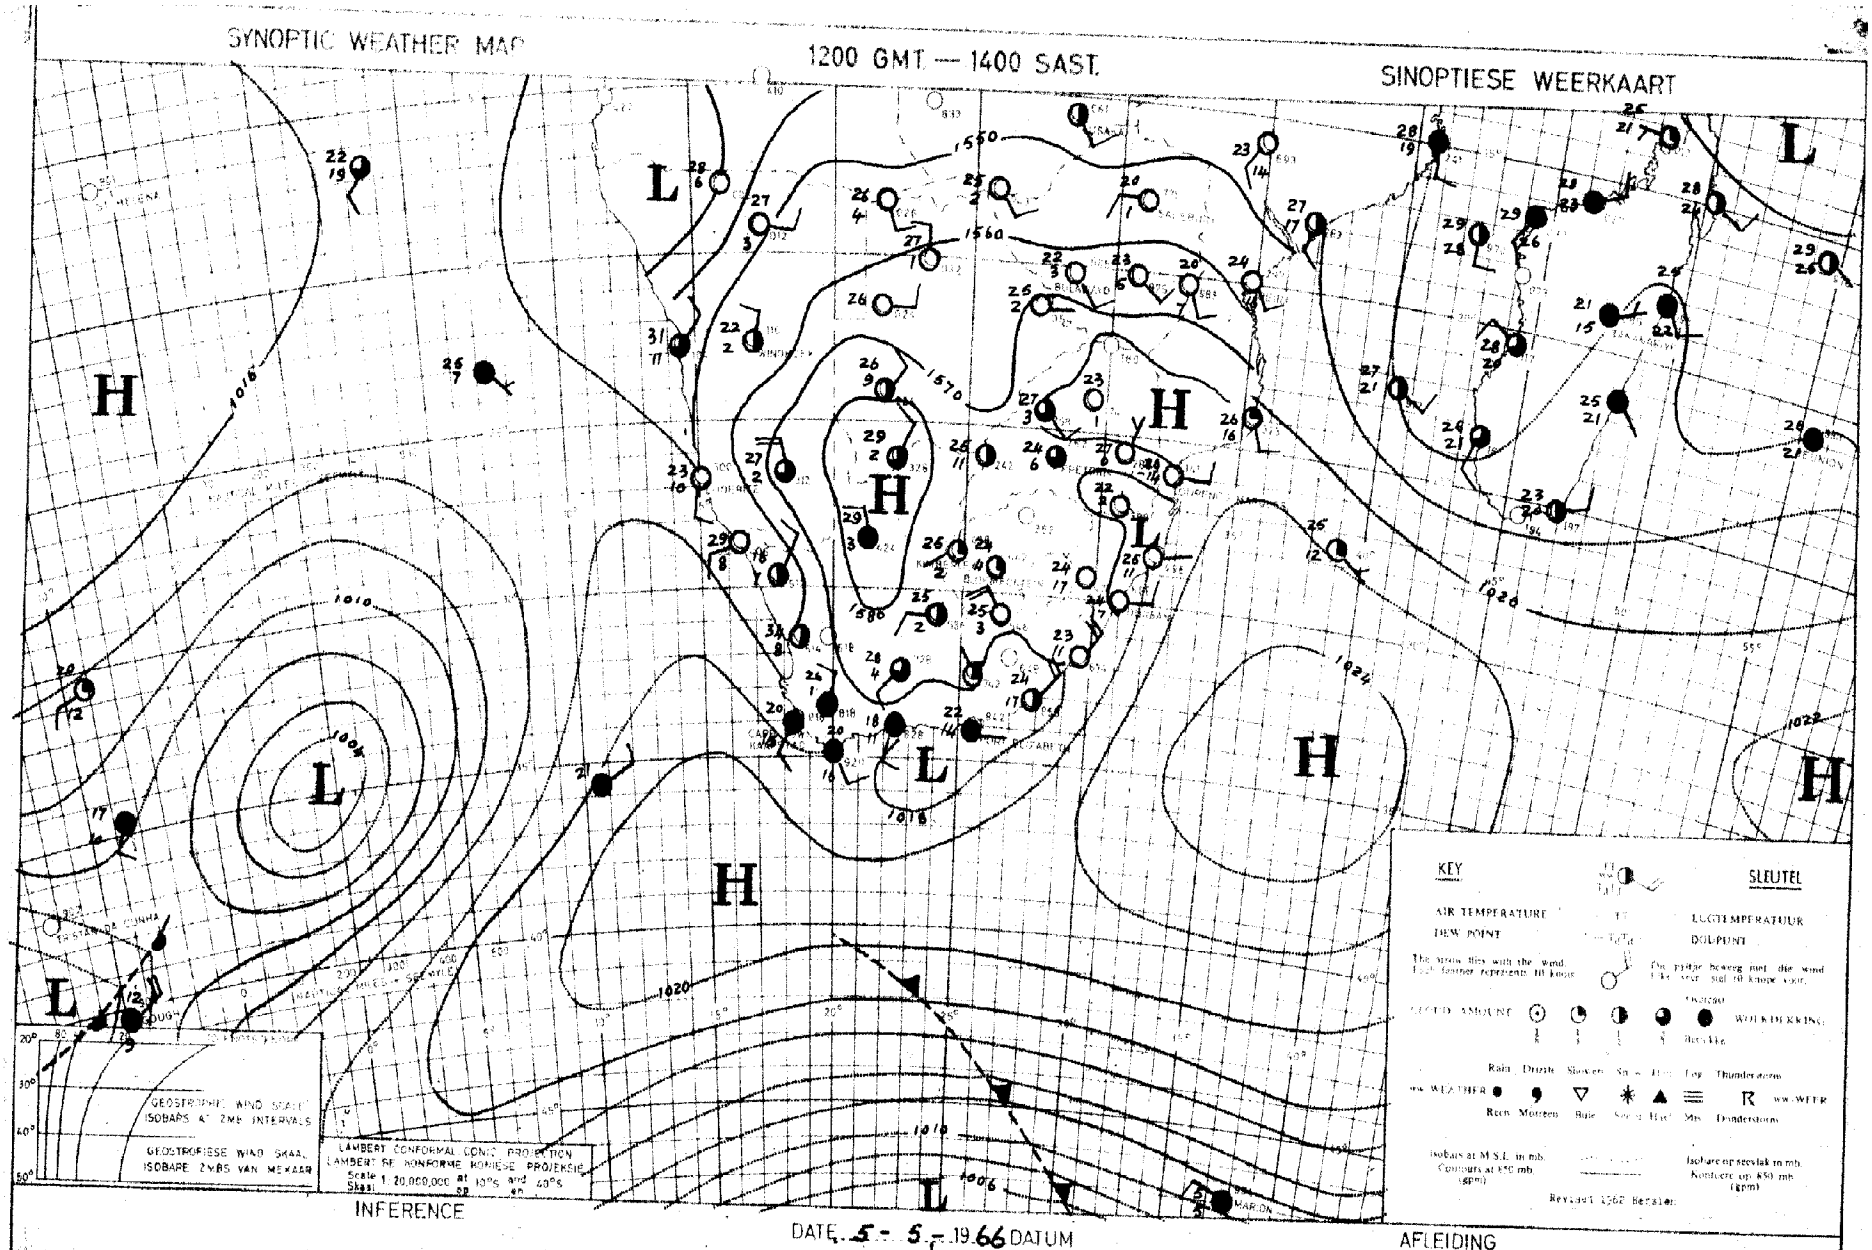
SYNOPTIC WEATHER MAP

1200 GMT — 1400 SAST.

SINOPTIESE WEERKAART



INFERENCE

DATE 5 - 5 - 19 66 DATUM

AFLEIDING

The coastal low situated on the southern Cape coast is moving eastwards, thus causing cloudy weather overnight over the southern and eastern coastal regions. The high over the interior is causing fine weather over most of the interior and berqwind conditions on the west coast.

Die kuslaag op die Kaapse suidkus gelee", beweeg ooswaarts en veroorsaak bewolkte weer oornag oor die suidelike en oostelike kusgebiede. Die hoog oor die binneland veroorsaak mooiweer oor die grootste deel van die binneland, en bergwindtoestande oor die weskus.

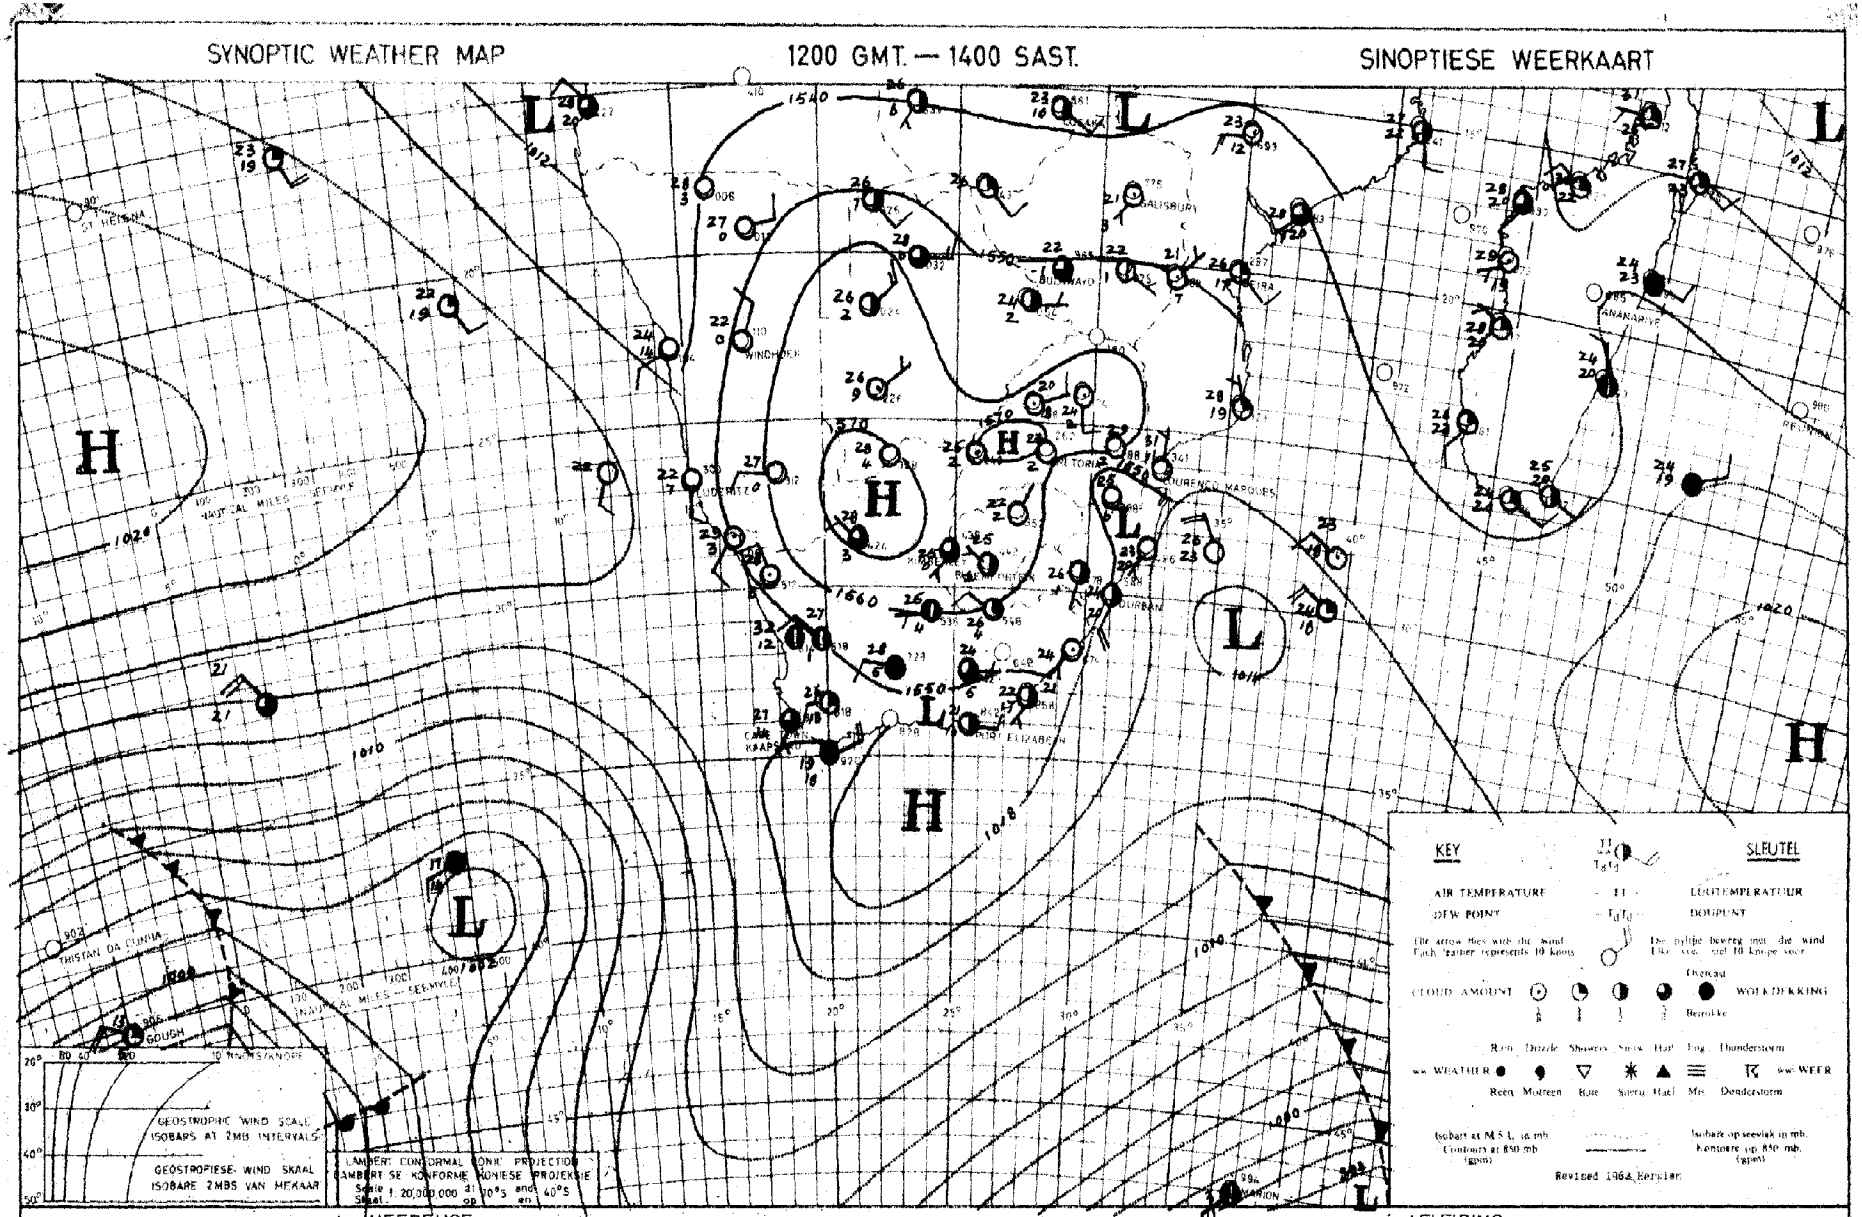
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 6 — 5 — 1966 DATUM AFLEIDING

The air is dry over the country and with the high over the interior it will remain fine over the northern regions. As a result of the trough to the west of the country it will be partly cloudy over the southern regions.

Die lug oor die land is droog en met die hoog oor die binneland sal dit mooiweer bly oor die noordelike dele. As gevolg van die trog wes van die land sal gedeeltelik bewolkte weer oor die suidelike dele voorkom.

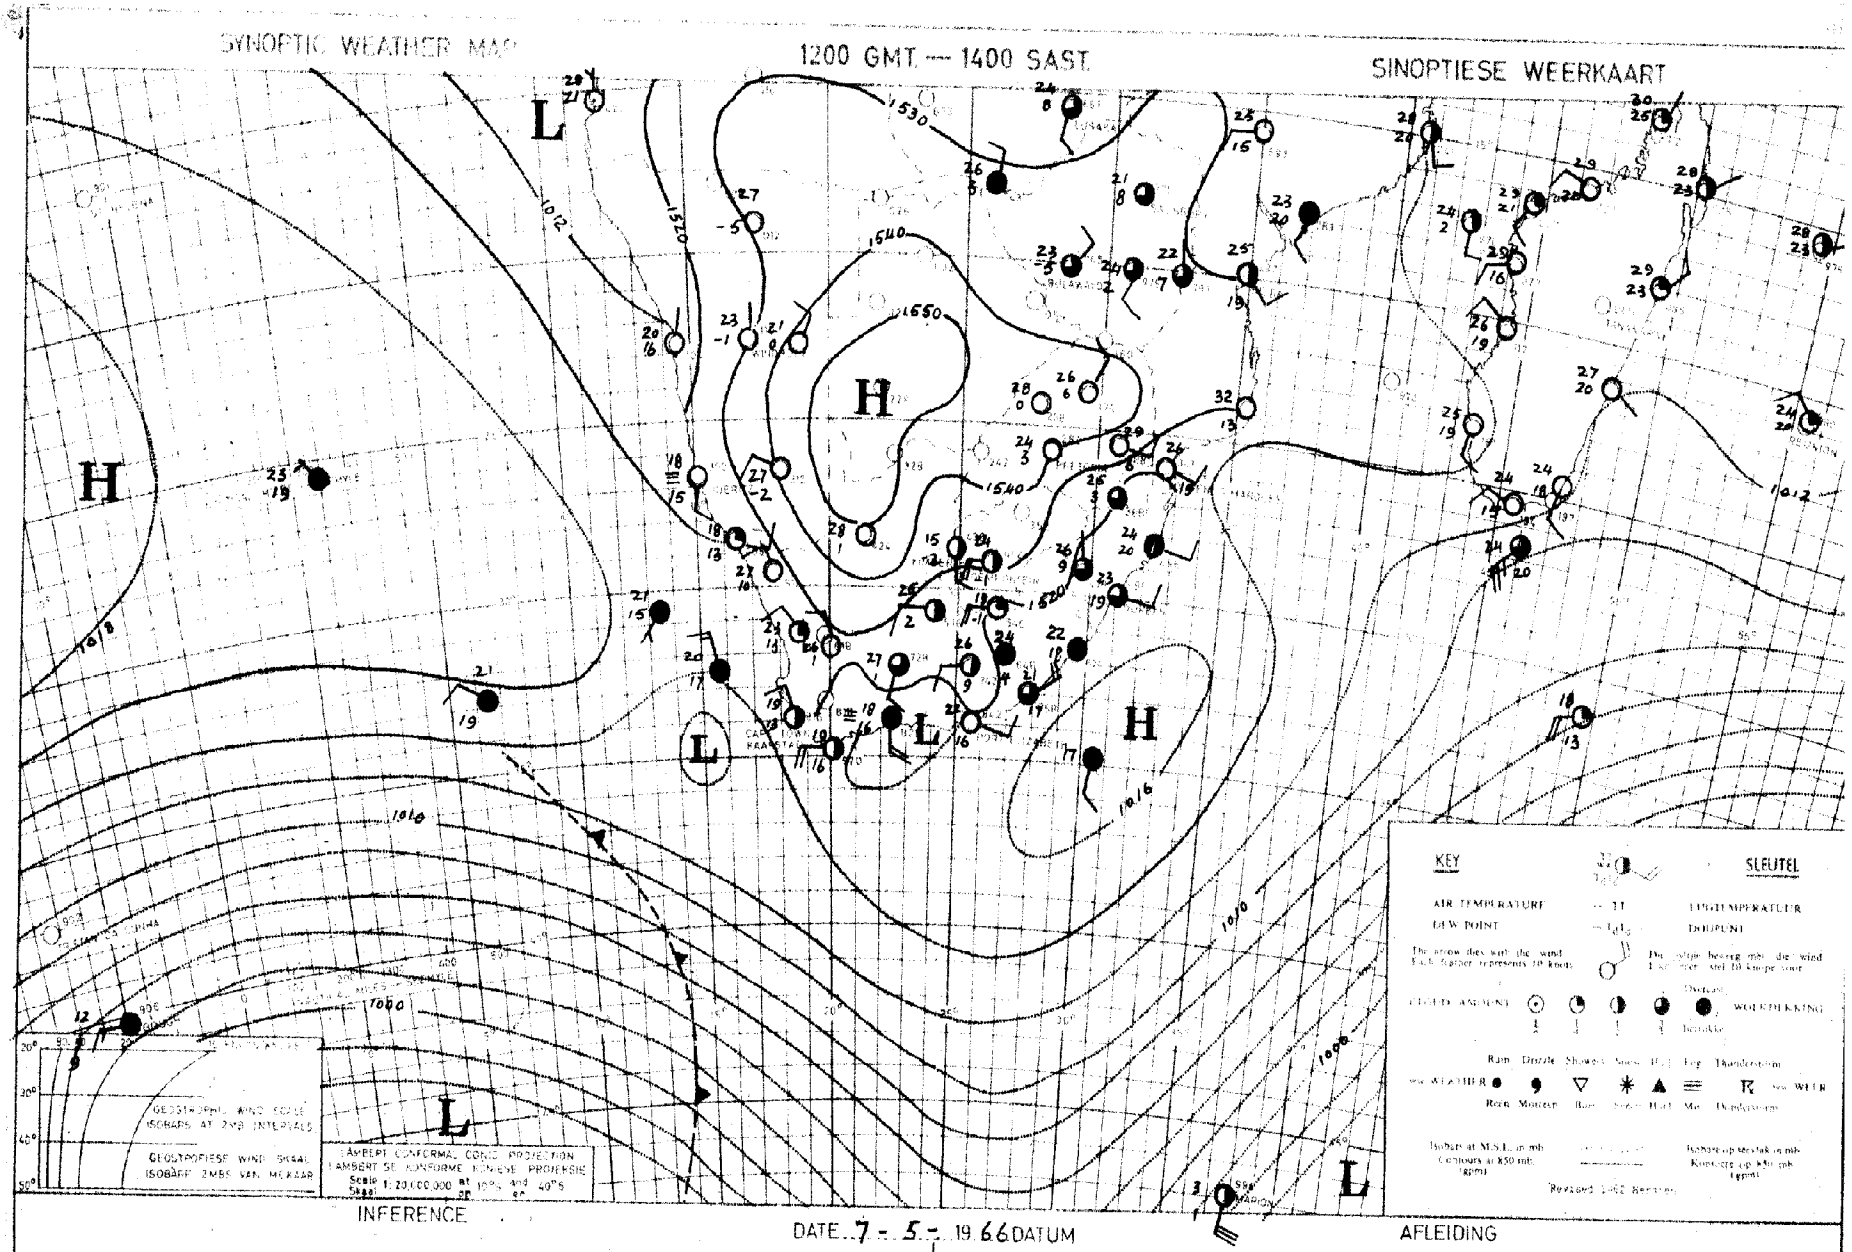
SWAZILAND

Embelembe			
Manzini			
Stegi			



The weak cold front south-west of the country is moving south-eastwards and will not influence the weather over the Cape tomorrow. The circulation over the interior is anticyclonic and it will be mainly fine.

Die swak koufront suidwes van die land beweeg suidoostwaarts en sal nie more die weer oor die Kaap beinvloed nie. Oor die binneland is die sirkulasie antisiklonaal en met droë lug in sirkulasie sal dit hoofsaaklik mooiweer wees.

The cold front west of the country is expected to reach the south-western Cape coast overnight, with the result that cooler cloudy weather will spread over the Cape coastal regions with rain along the southern and south-western coasts. Over the remainder of the country it will be fine, but partly cloudy over the northern interior.

Die koufront wes van die land sal na verwagting oornag die Kaapse suidweskus bereik sodat bewolkte, koeler weer oor die Kaapse kusstreke sal uitbrei met reën langs die suidelike en suidwestelike kuststreke. Oor die res van die land sal dit mooi weer wees maar gedeeltelik bewolk oor die suidelike binneland.

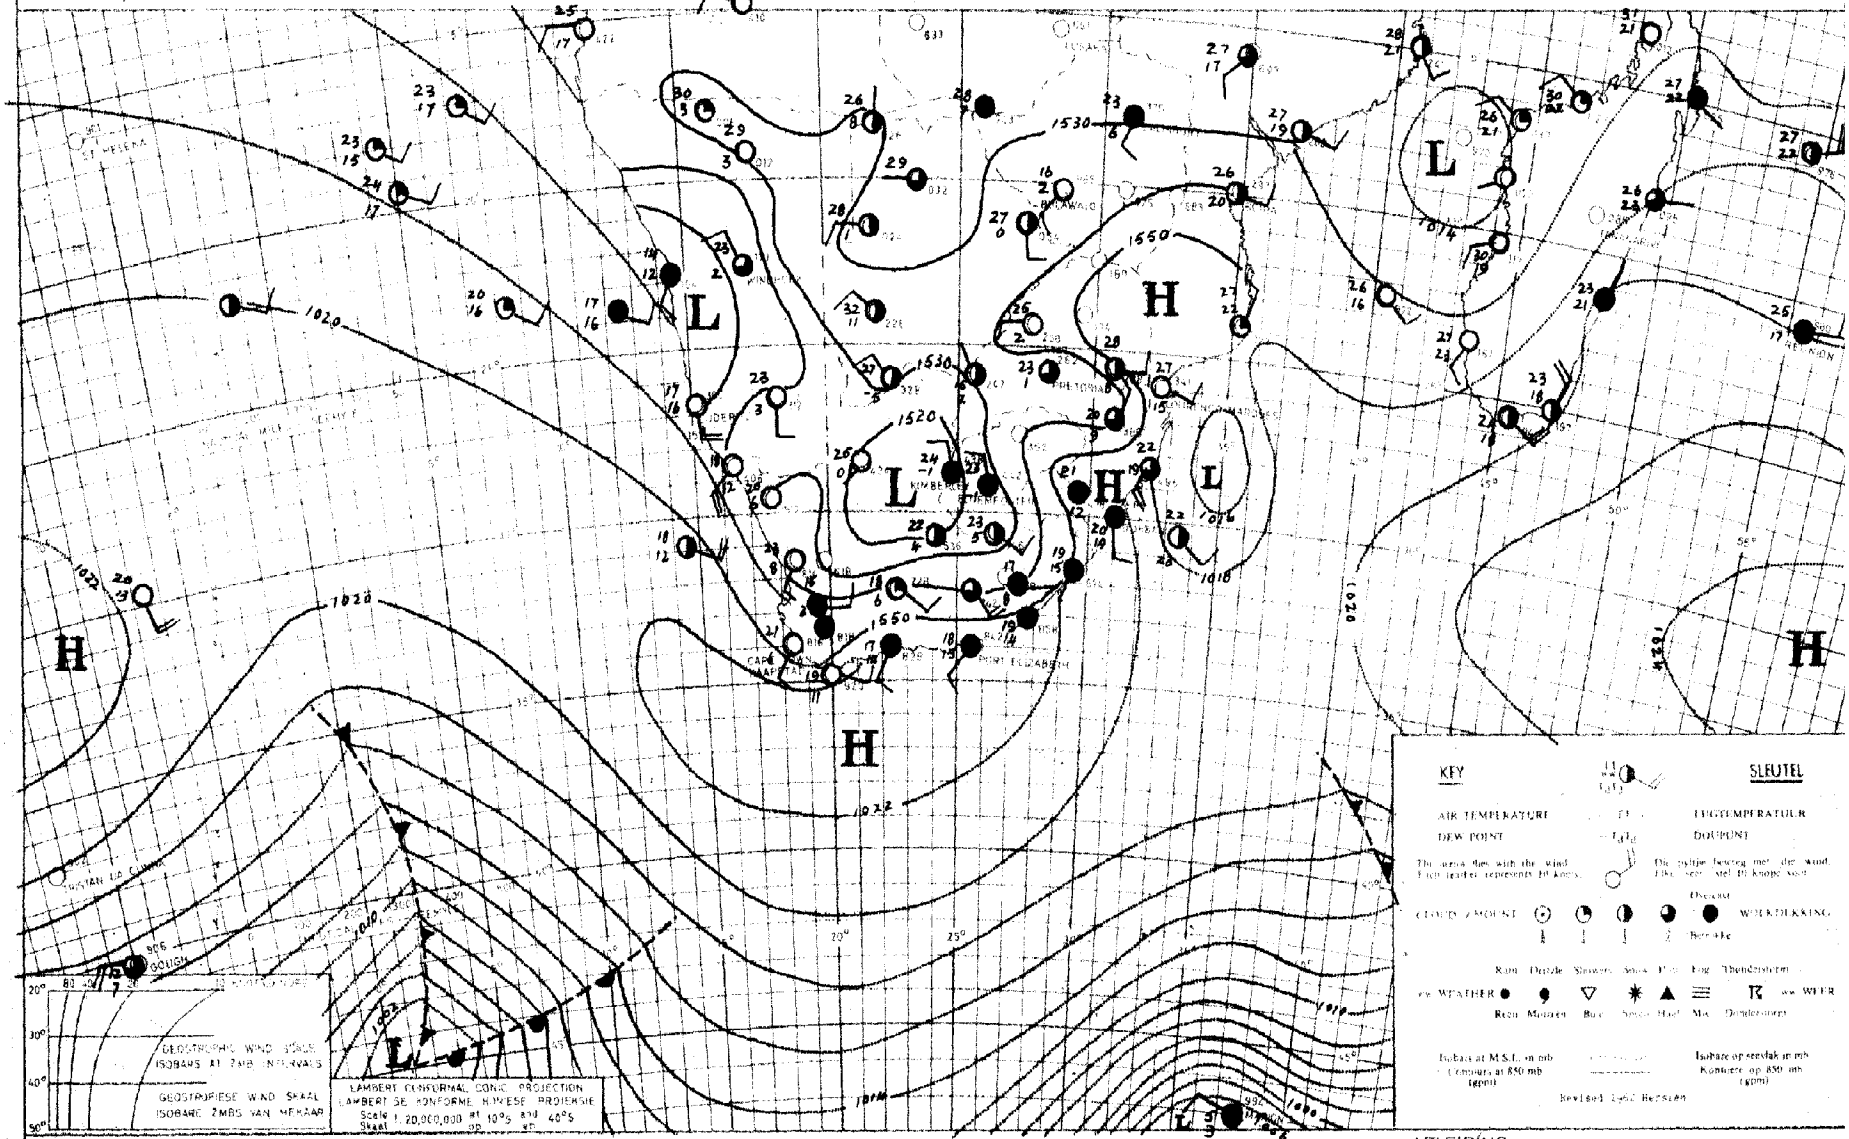
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 10 - 5 - 1966 DATUM AFLEIDING

The high which is moving eastwards around the south coast is advecting moist air over the eastern interior, and with a low over the western interior, on the surface as well as in the upper air, showers are possible over the eastern interior.

Die hoog wat suid van die land ombeweeg, voer vogtige lug in oor die oostelike binneland, en met 'n laag oor die westelike binneland, op die oppervlakte sowel as in die bolug, is buie moontlik oor die oostelike binneland.

INFERENCE

DATE 11 - 5 - 19 66 DATUM

AFLEIDING

As a result of the low over the Eastern Cape it will be cloudy to partly cloudy over the eastern parts of the country, where showers will occur. As the Atlantic high moves eastwards over the country it will clear over the western parts.

As gevolg van die laag oor Oos-Kaapland sal dit bewolk tot gedeeltelik bewolk wees oor die oostelike dele van die land waar buie sal voorkom. Terwyl die Atlantiese hoog oswaarts oor die land beweeg sal dit oor die westelike dele opklaar.

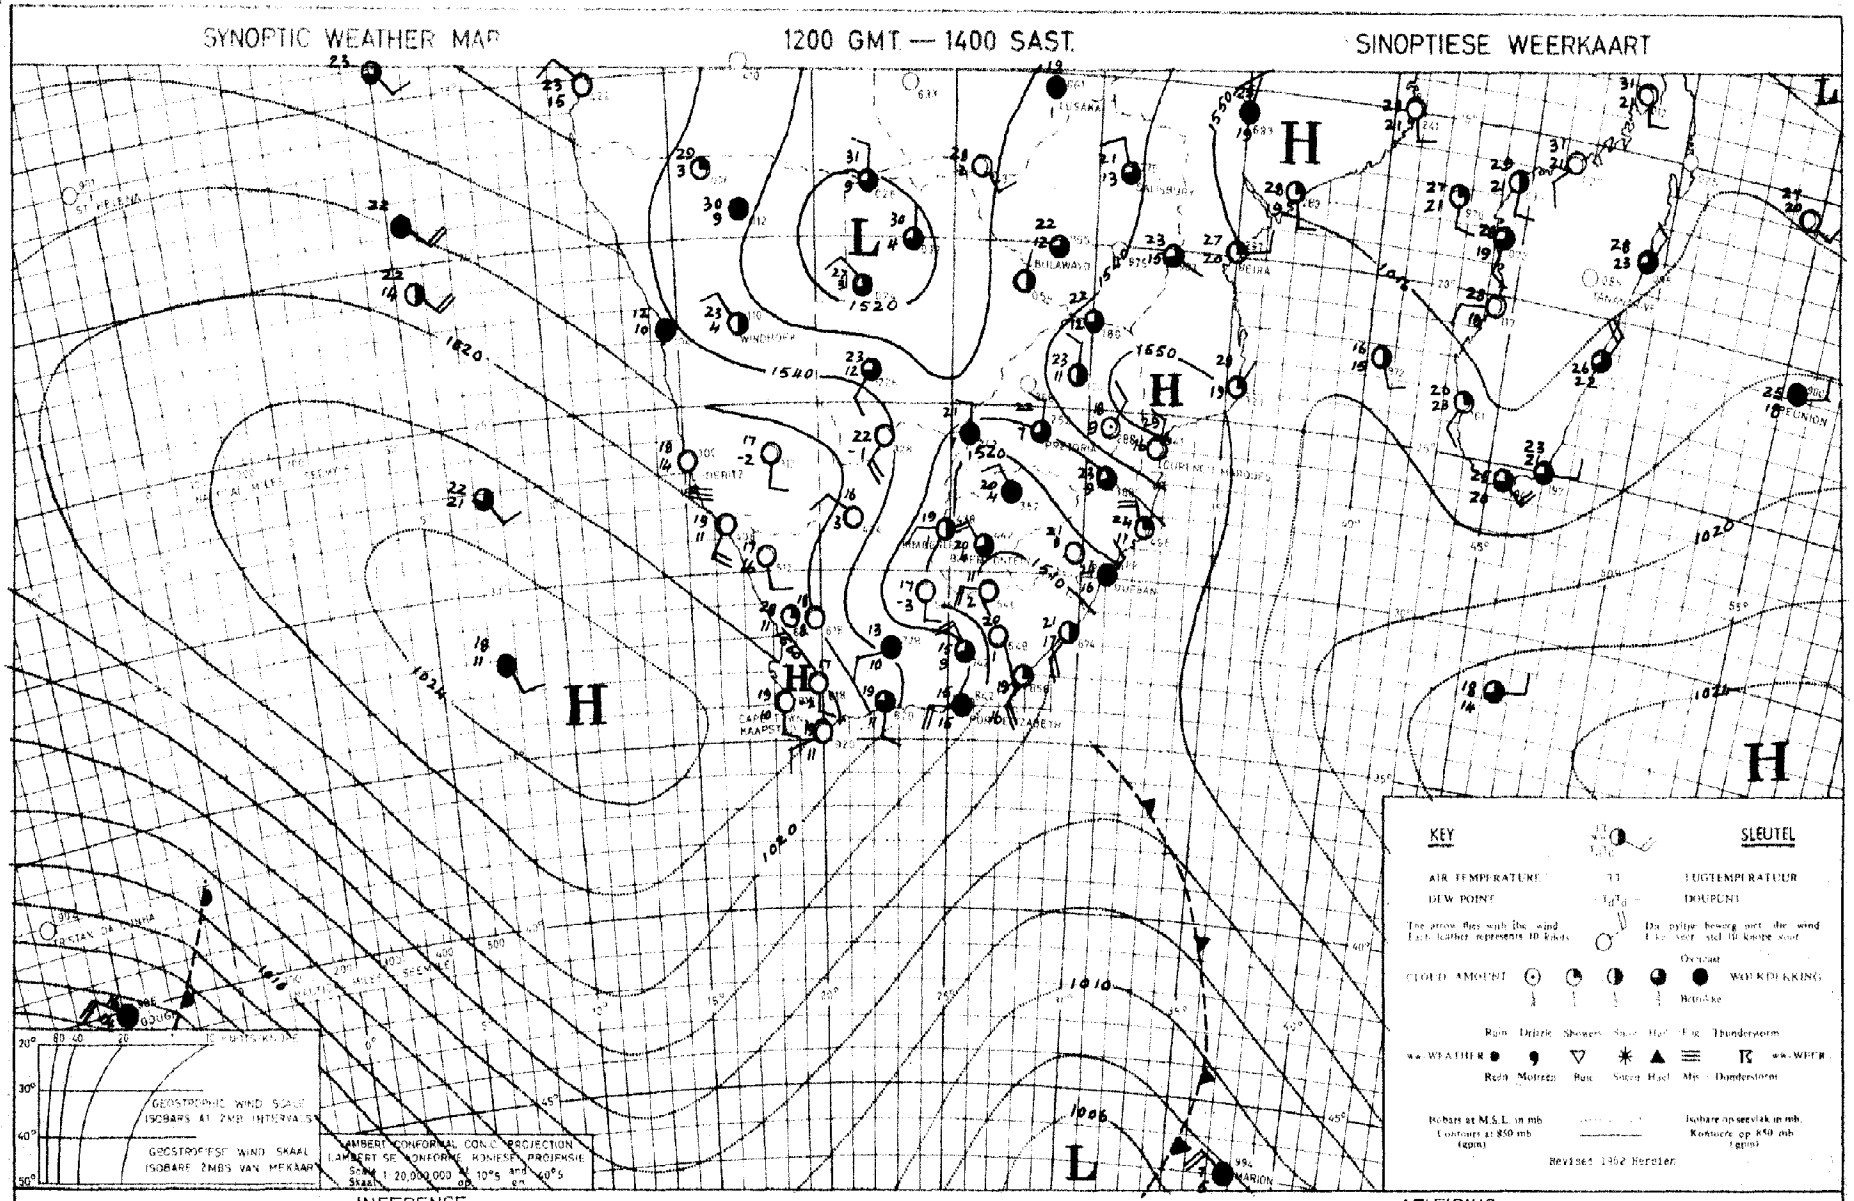
SWAZILAND

Embelebe			
Manzini			
Stegi			



The trough over the country will move further eastwards with the result that showers will be confined to the eastern and northern regions of Transvaal. Over the remainder of the country it will be mainly fine and cold.

Die trog wat oor die land lê sal verder ooswaarts beweeg sodat buie nog oor die oostelike en noordelike dele van Transvaal sal voorkom. Oor die res van die land sal dit hoofsaaklik mooiweer en koud wees.

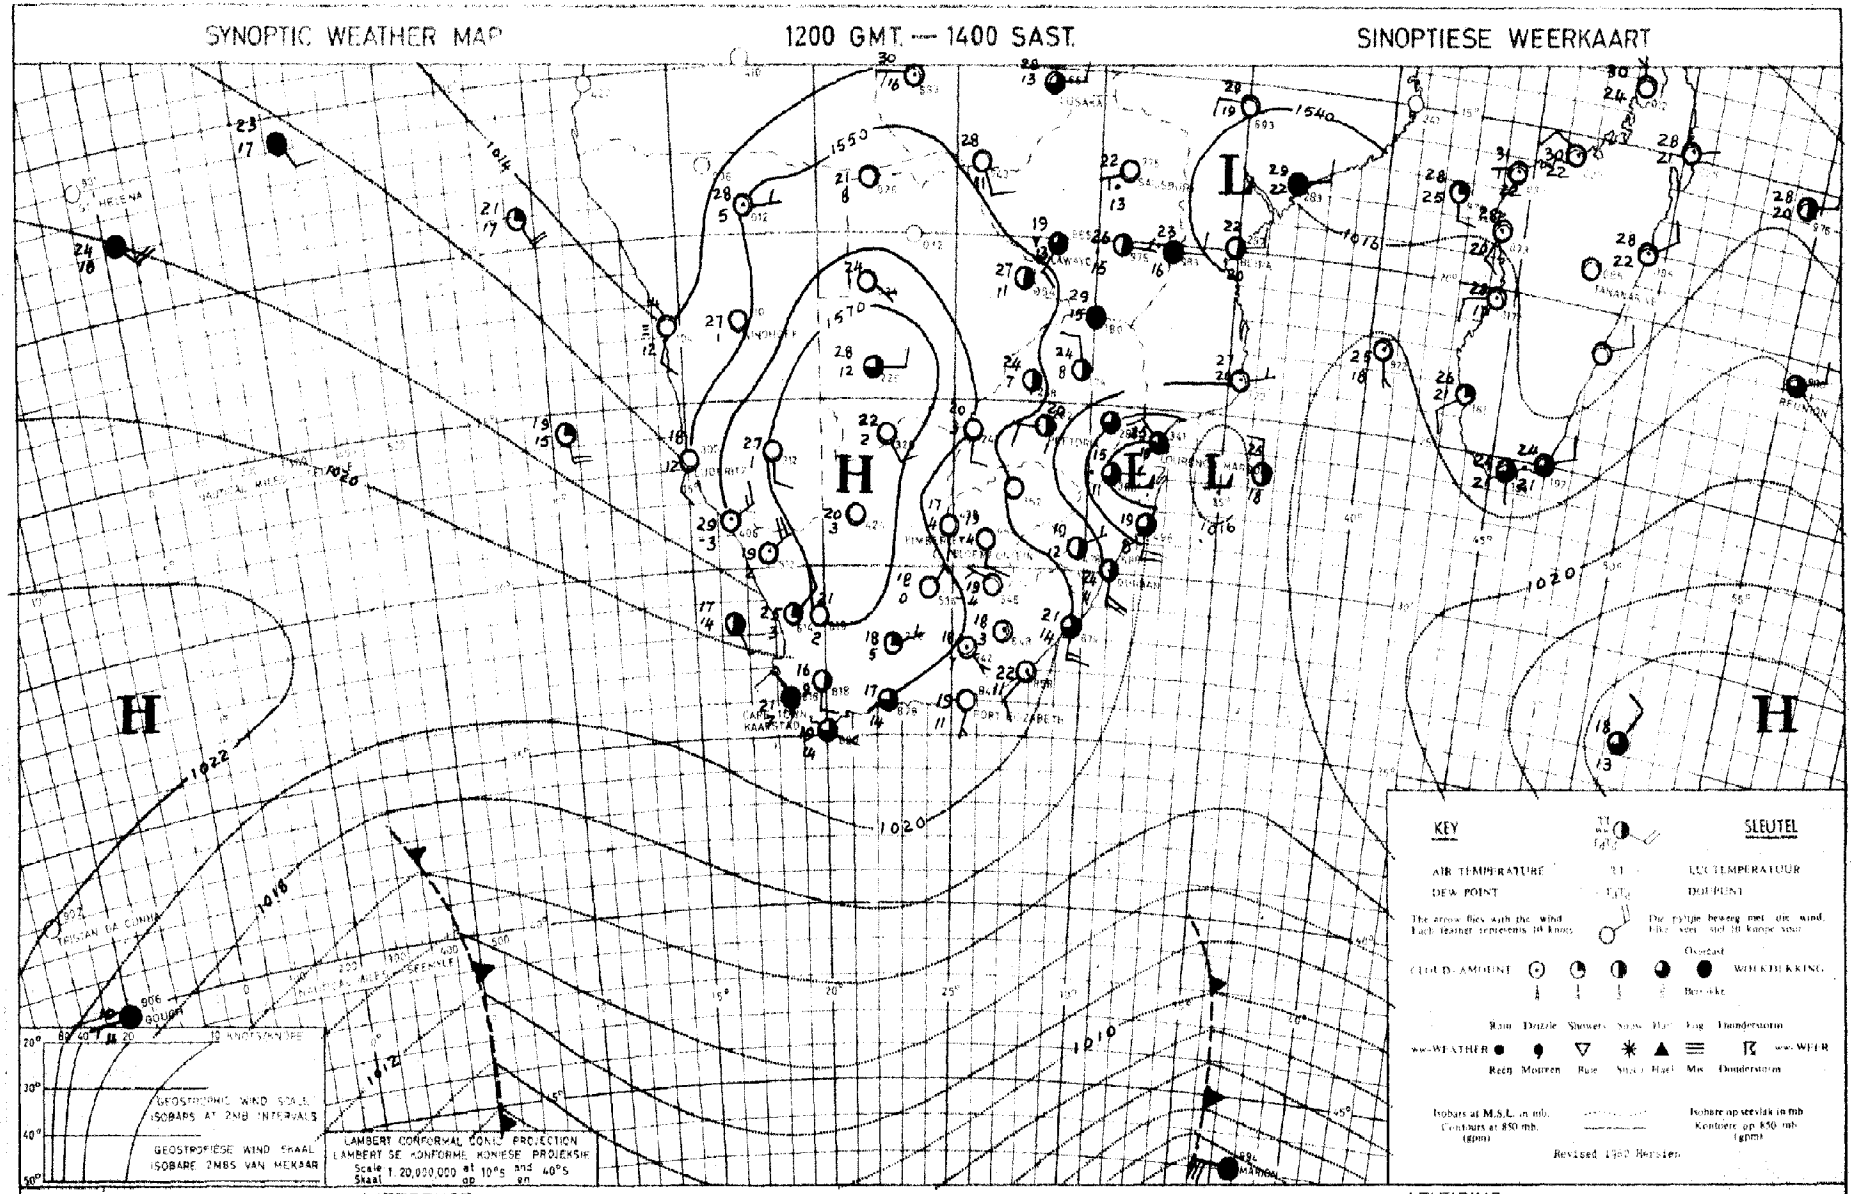
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 13 - 5 - 1966 DATUM AFLEIDING

The high over the interior is causing fine weather over most of the country. Bergwind conditions will develop on the south coast.

Die hoog oor die binneland veroorsaak mooiweer oor die meeste dele van die land. Bergwindtoestande sal oor die suidkus ontwikkel.

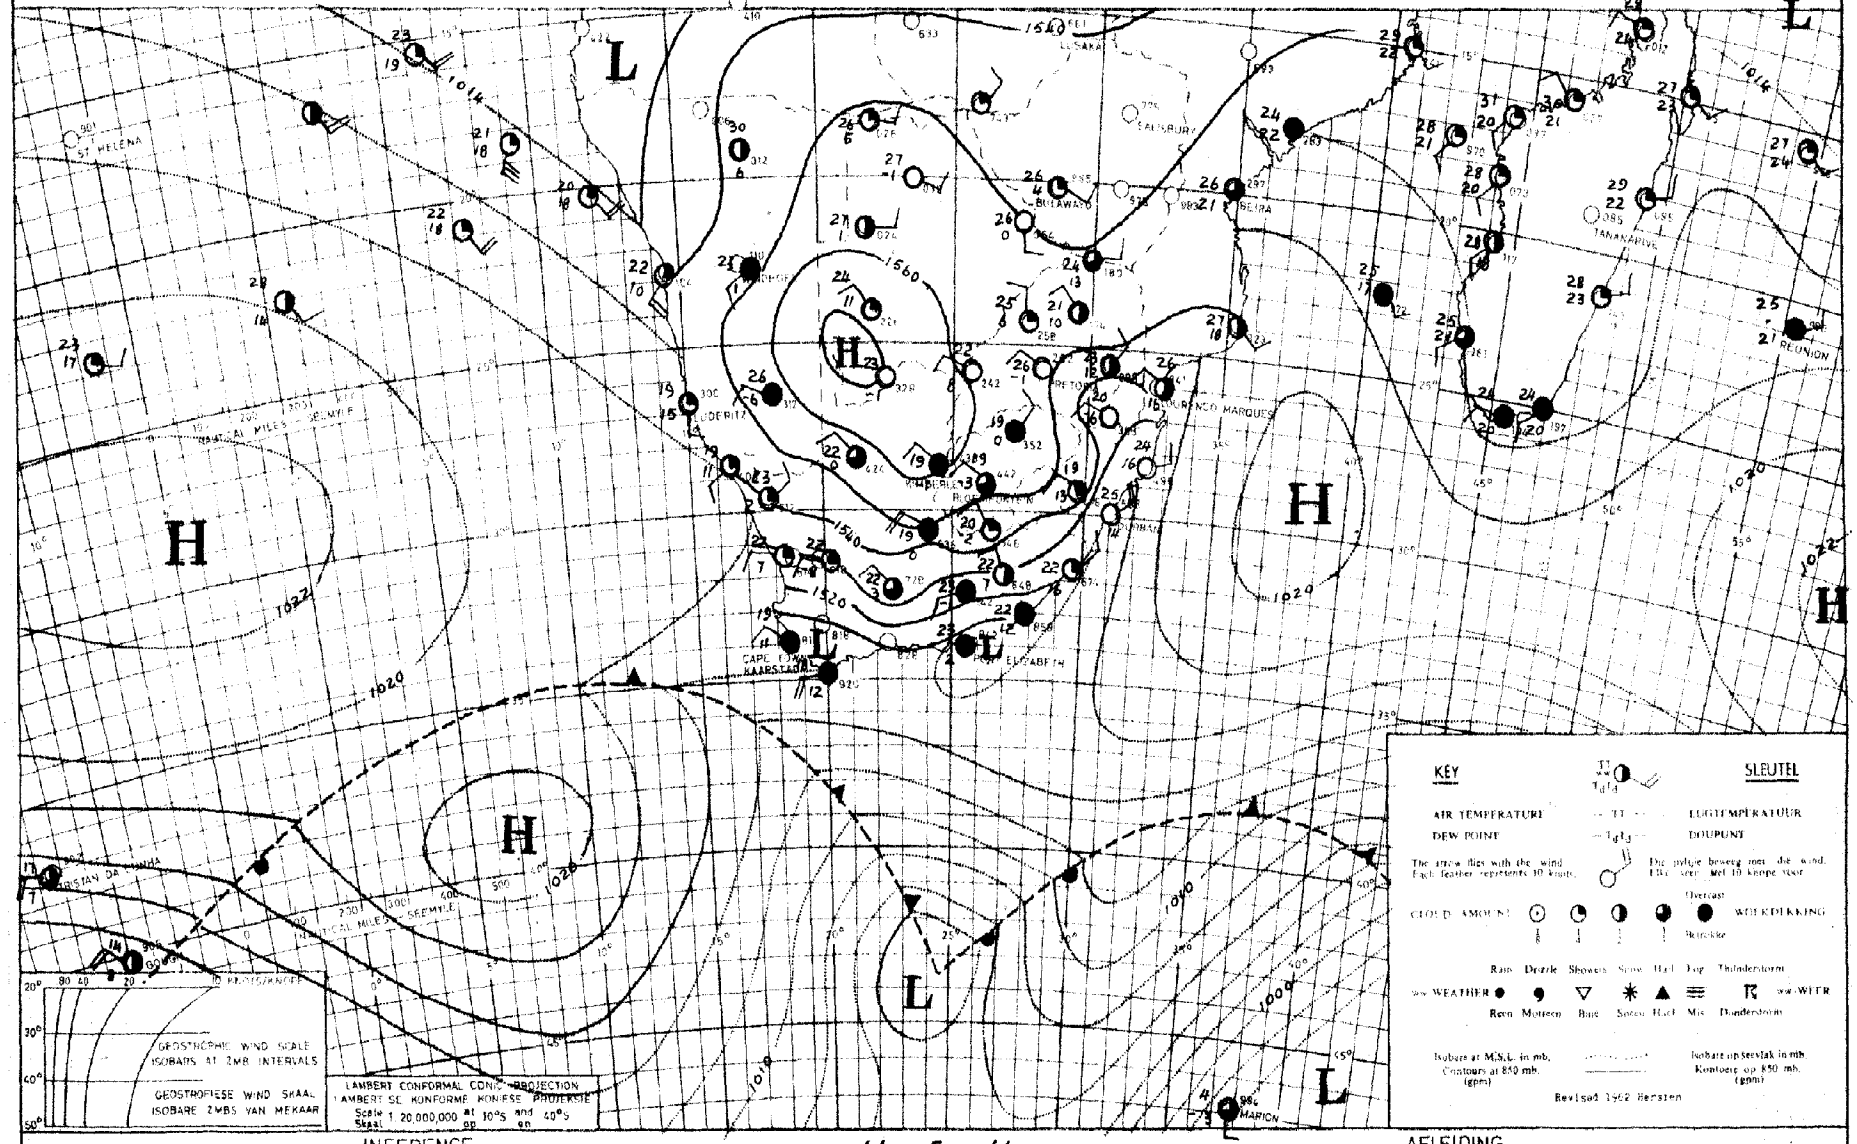
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

DATE 14 - 5 1966 DATUM

AFLEIDING

Frontal systems moving past south of the country will maintain cloudy, cooler weather with isolated light showers over the southern parts of the country. The air is dry and stable over the remainder of the country, where it will remain fine

Met frontale stelsels wat suid van die land verbybeweeg, sal bewolkte, koel toestande met los ligte buie oor die suidelike dele van die land voortduur. Oor die res van die land is die lug droog en stabiel, sodat dit mooiweer sal bly.

DAAGLIKSE WEERBULLETIN

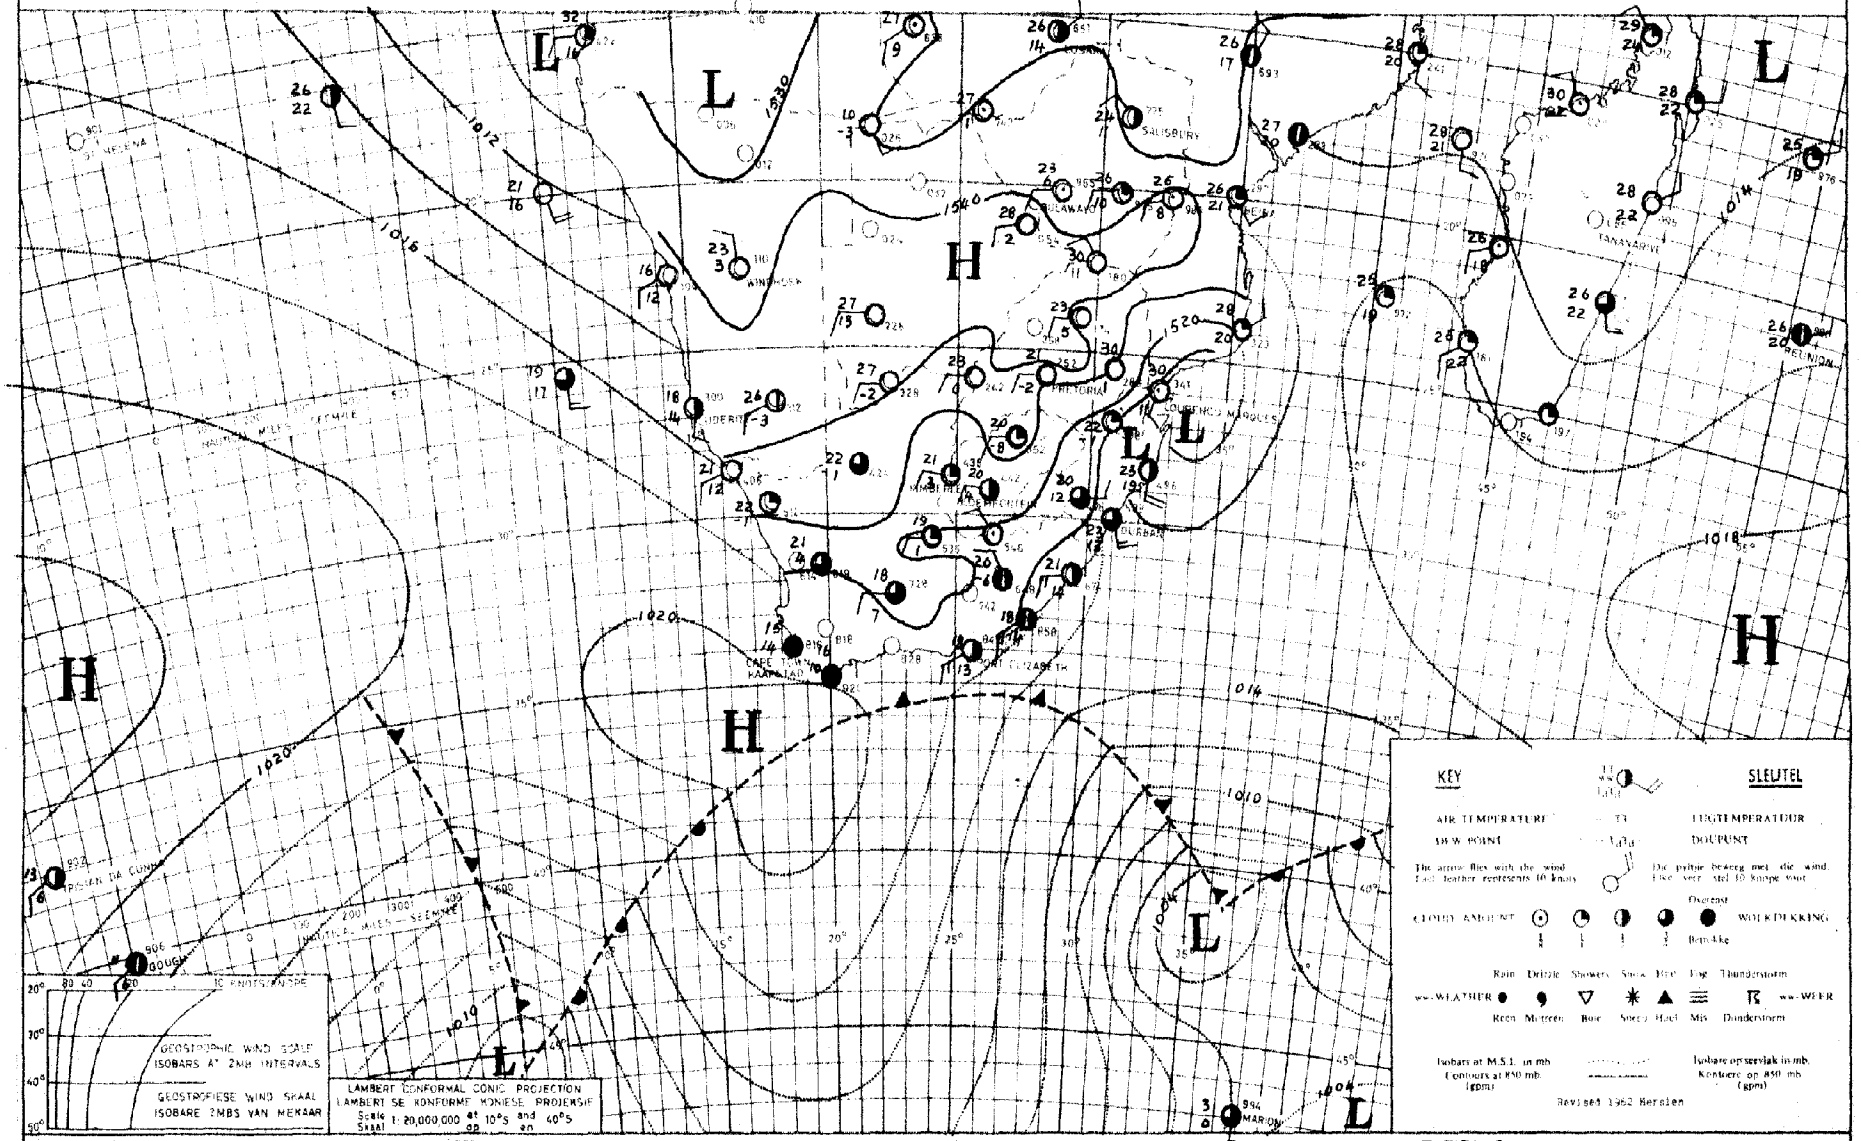
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST SINOPTIESE WEERKAART



INFERENCE DATE 15-5-1966 DATUM AFLEIDING

The front situated to the west of the Cape will later cause showers over the south-western Cape. The high over the interior will maintain fine weather over these regions.

Die front wes van die Kaap gelee, sal later buie oor die suidwestelike Kaapse kusgebiede veroorsaak. Die hoog oor die binneland veroorsaak mooiweer oor die dele.

DAAGLIKSE WEERBULLETIN

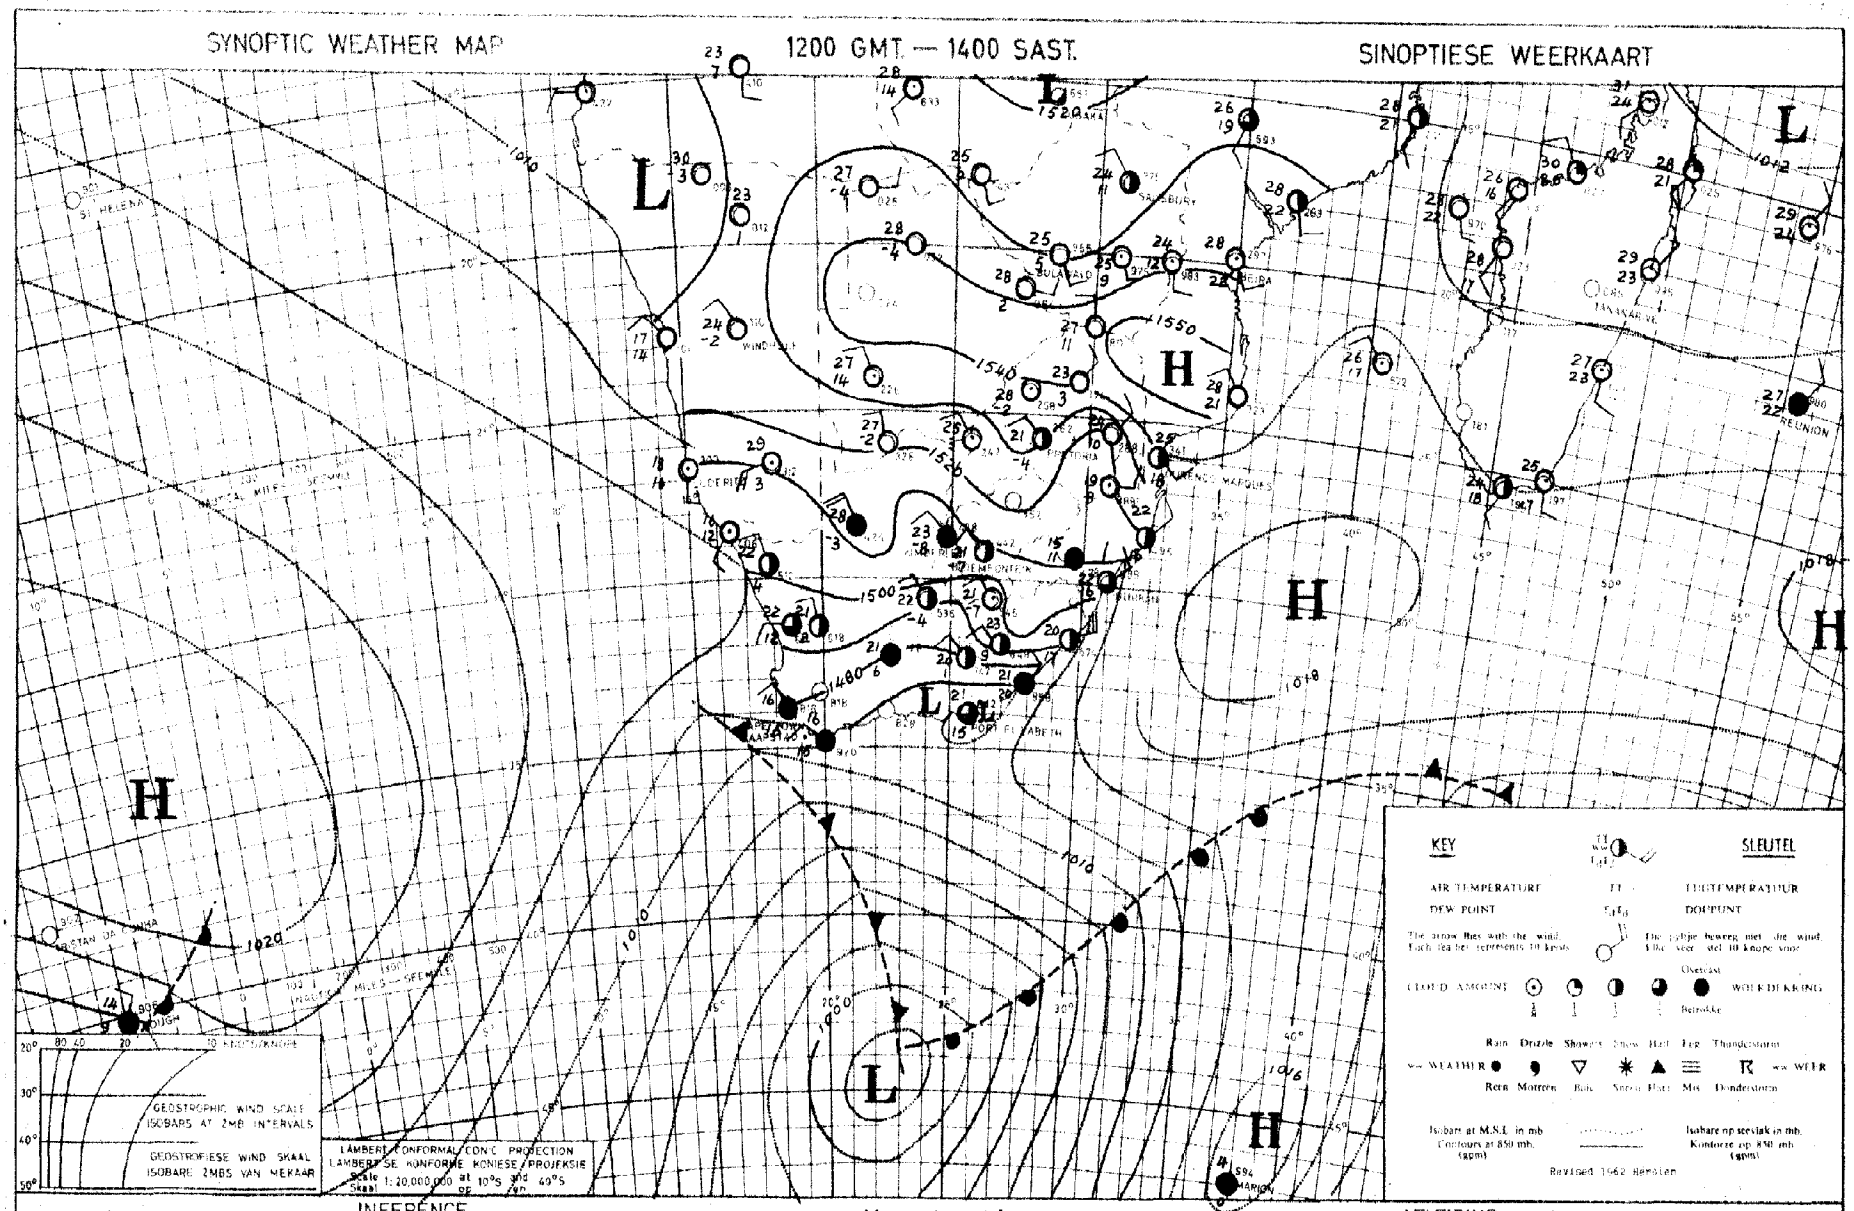
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

DATE 16 - 5 - 1966 DATUM

AFLEIDING

The cold front near Cape Town is expected to move eastwards over the Cape Province with the result that cloudy, colder weather with showers will spread over the Cape coastal regions and over the southern and eastern interior. Snow is possible over the mountains. Over the remainder of the country it will be fine and mild but it will become cloudy and cooler over southern Natal.

Die kouefront naby Kaapstad sal na verwagting oos-waarts beweeg oor die Kaapprovinsie sodat dit bewolk en koud sal word met buie oor die Kaapse kusstreke en die suidelike en oostelike binneland. Sneeu is moontlik oor die berge. Oor die res van die land sal dit mooiweer en matig wees maar dit sal bewolk en koeler word oor Suid-Natal.

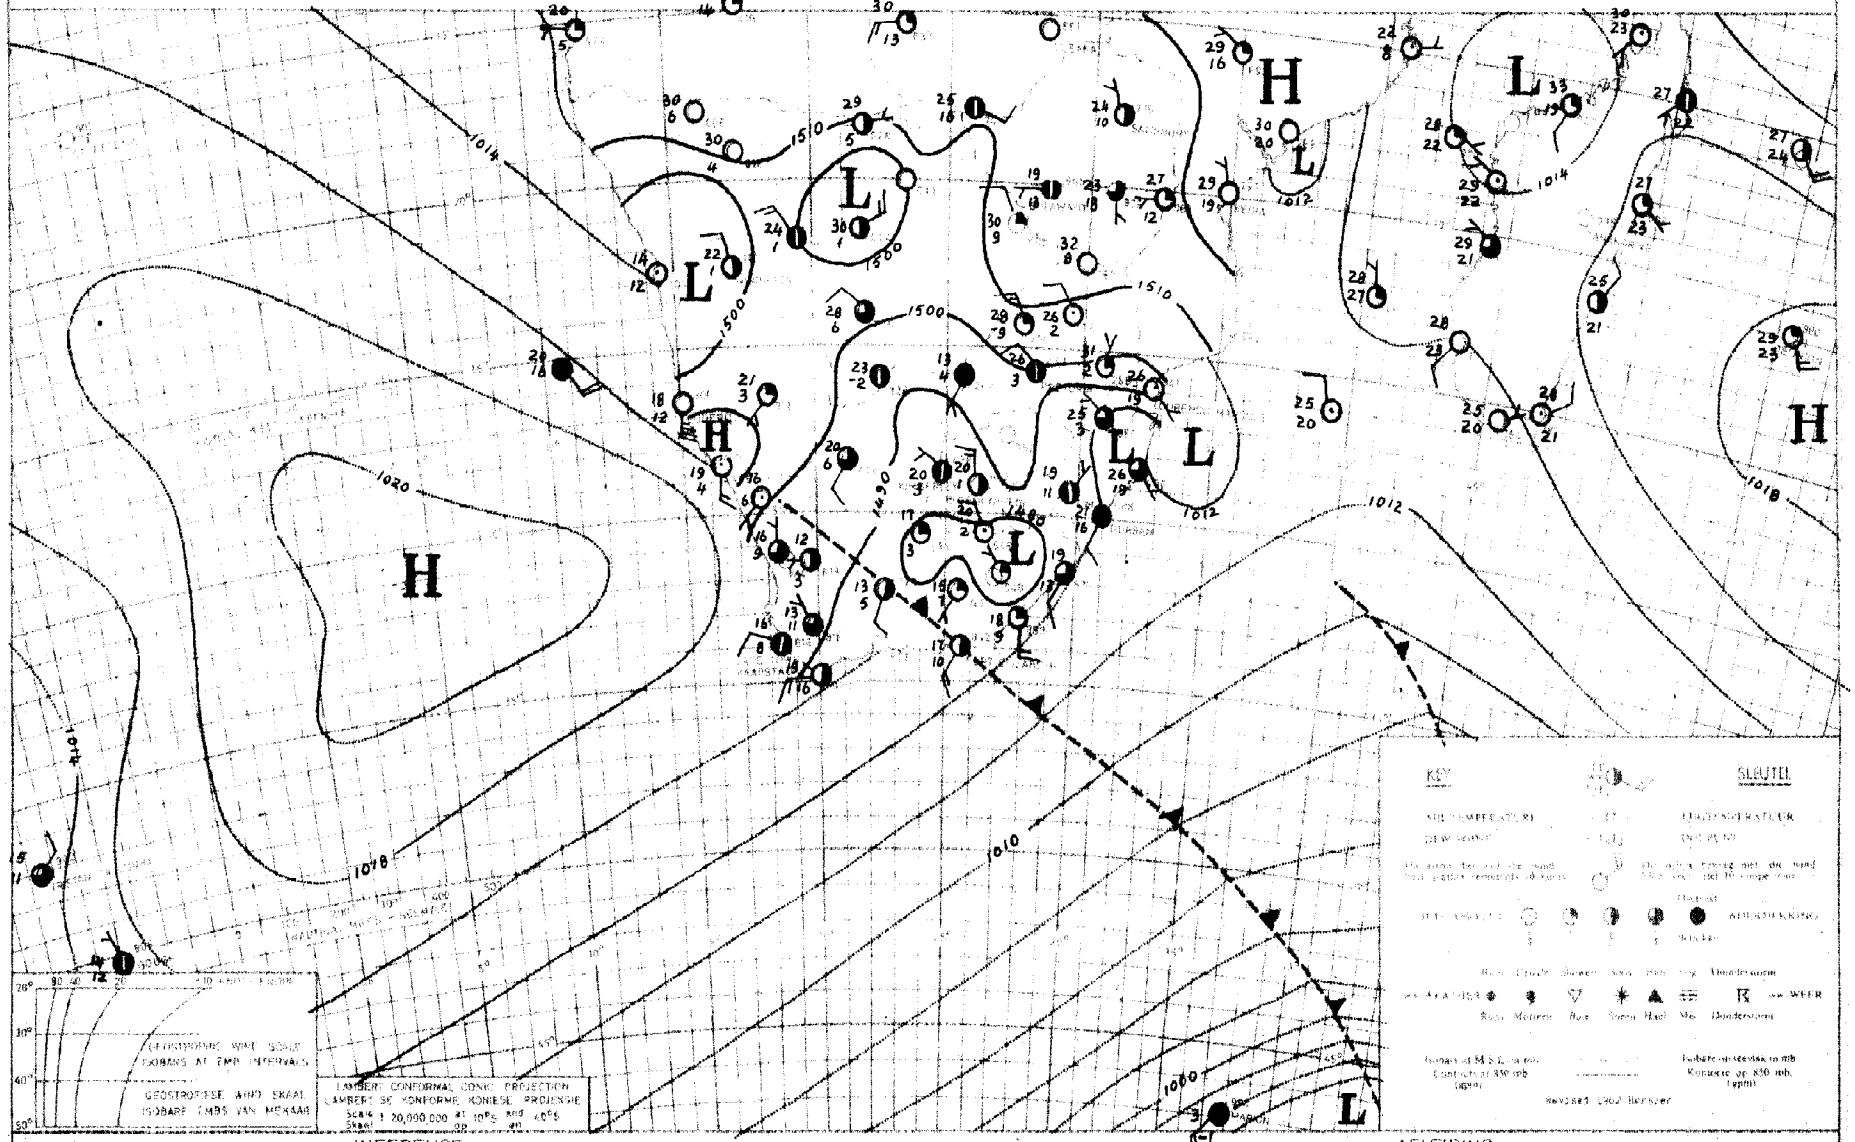
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST SINOPTIESE WEERKAART



INFERENCE DATE 18 - 5 - 1966 DATUM AFLEIDING

The Atlantic high is pushing a ridge around the south coast, and also over the western interior. Cold, cloudy weather with showers will thus spread over the southern and south-eastern areas of the country.

Die Atlantiese hoog stoot 'n rug suid van die land om, en ook oor die westelike binneland. Koue bewolkte weer met buie sal dus oor die suidelike en suid-oostelike dele van die land uitbrei.

INFERENCE
DATE 19-5-1966 DATUM
AFLEIDING
The cold front over the central interior is moving northwards and the cold weather over the Cape Province and Natal will spread to the Free State and southern Transvaal. It will clear partially over the southern Cape coasts but showers will still occur over the remainder of Transvaal, Natal and the eastern Cape. Snow will occur over the highground regions.
Die koufront oor die sentrale binneland beweeg noordwaarts en die koue weer oor die Kaapprovinsie en Natal sal uitbrei na die Vrystaat en Suid-Transvaal. Dit sal gedeeltelik opklaar oor die Kaapse suidkus maar buie sal nog voorkom oor die res van Transvaal, Natal en Oos-Kaapland en sneeu sal oor die hoogliggende dele voorkom.

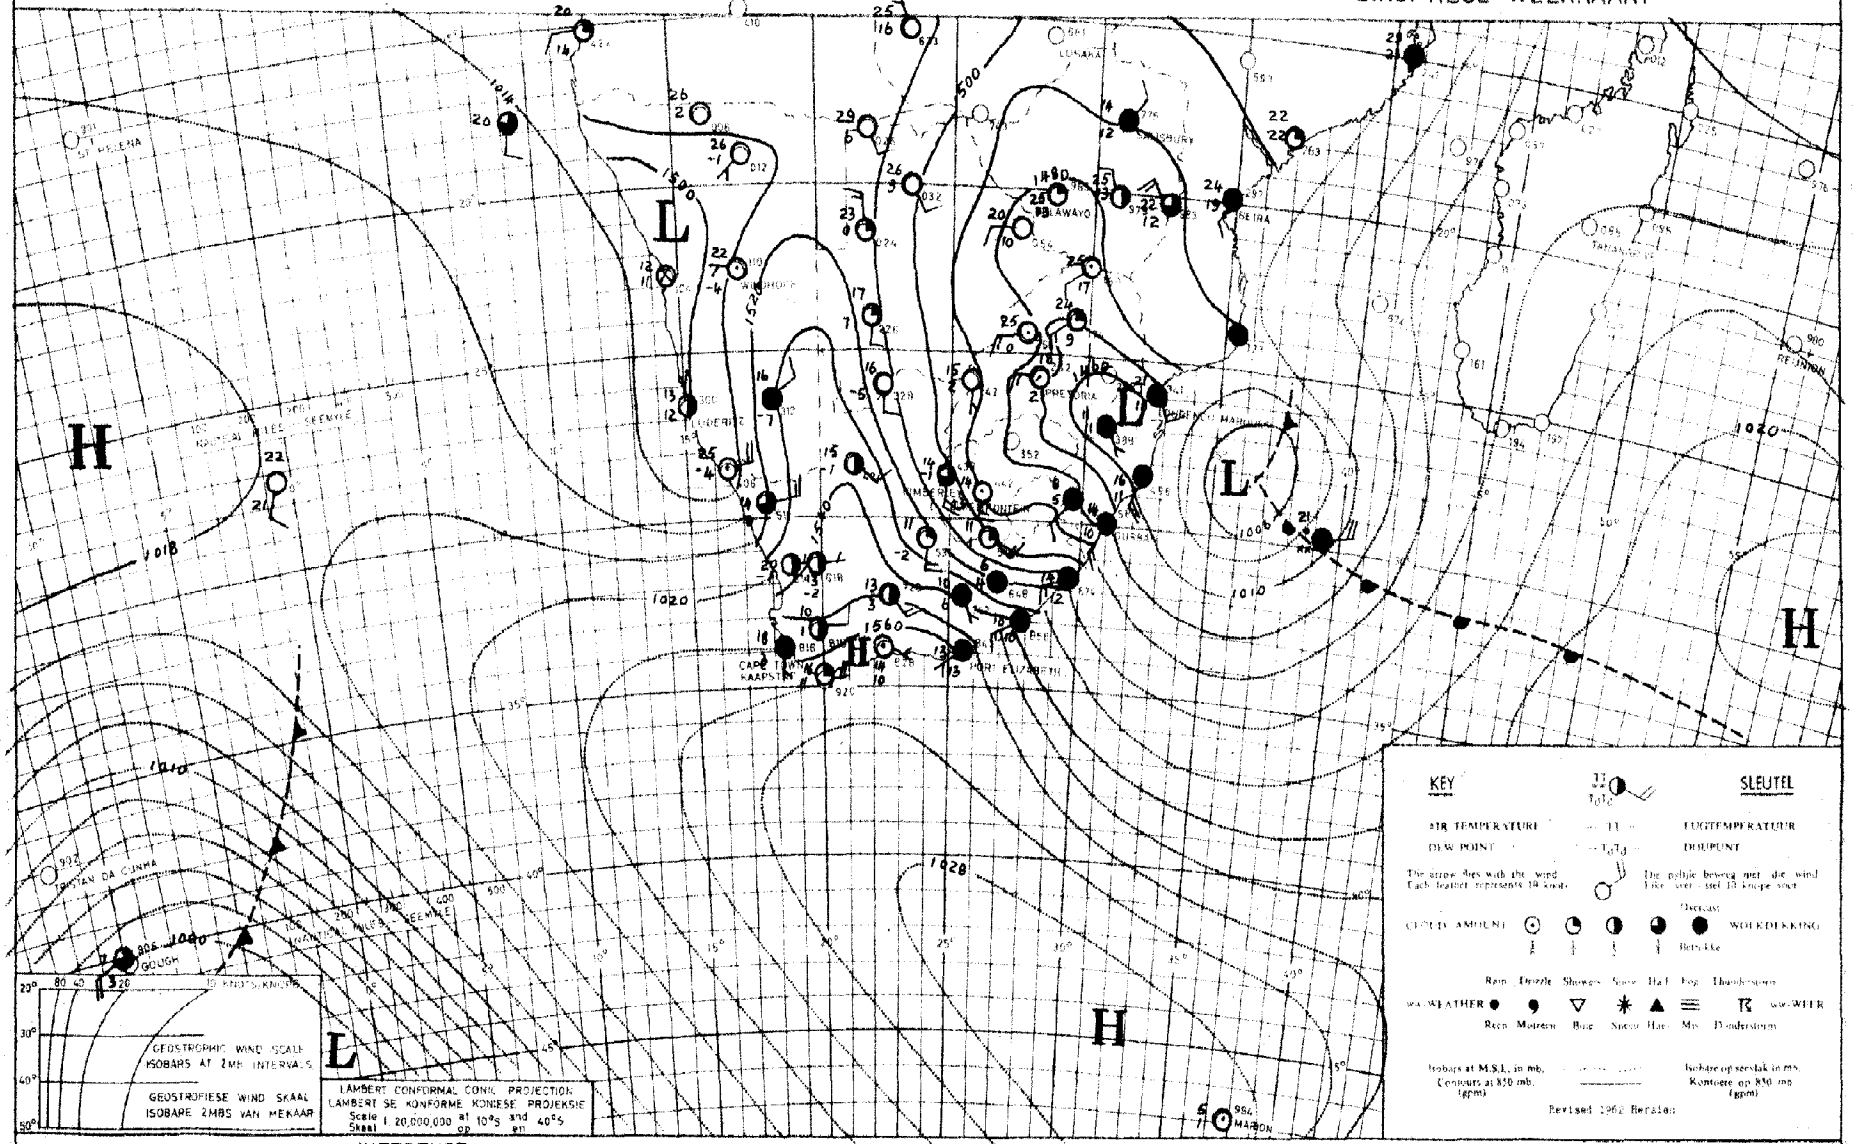
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

DATE 20-5-1966 DATUM

AFLEIDING

The high situated to the south of the country is moving eastwards and it will therefore gradually clear over the eastern Cape. Showers will occur over Natal. Berg-wind conditions are developing over the western coastal belt, and it will be somewhat warmer over the western parts of the country.

Die hoog suid van die land beweeg stadig ooswaarts en dus sal dit geleidelik opklaar oor die oostelike Kaapprovinsie. Buie sal oor Natal voorkom. Bergwindtoestande ontwikkel oor die weskus, en dit sal ietwat warmer wees oor die westelike dele van die land. Dit sal koud wees oor die res van die land.

INFERENCE

DATE 22 - 5 - 1966 DATUM

AFLEIDING

The cold front situated to the west of the Cape is moving south-eastwards, so that it will be only partly cloudy over the south-western Cape coastal areas. The air over the remainder of the country is dry, and fine weather will persist.

Die koufront ten weste van die Kaap gelee, beweeg suidooswaarts, sodat dit slegs gedeeltelik bewolk sal wees oor die suidwestelike Kaapse kusgebiede. Oor die res van die land is die lug droog en mooiweerstoestande sal voortduur.

The cold front will cause partly cloudy weather over South-Western Cape and light rain will occur. With dry air present over the rest of the country it will be fine.

Die koufront sal gedeeltelik bewolkte tot bewolkte weer oor Suidwes-Kaapland veroorsaak en ligte reën sal voorkom. Oor die res van die land is droë lug aanwesig en sal dit mooiweer wees.

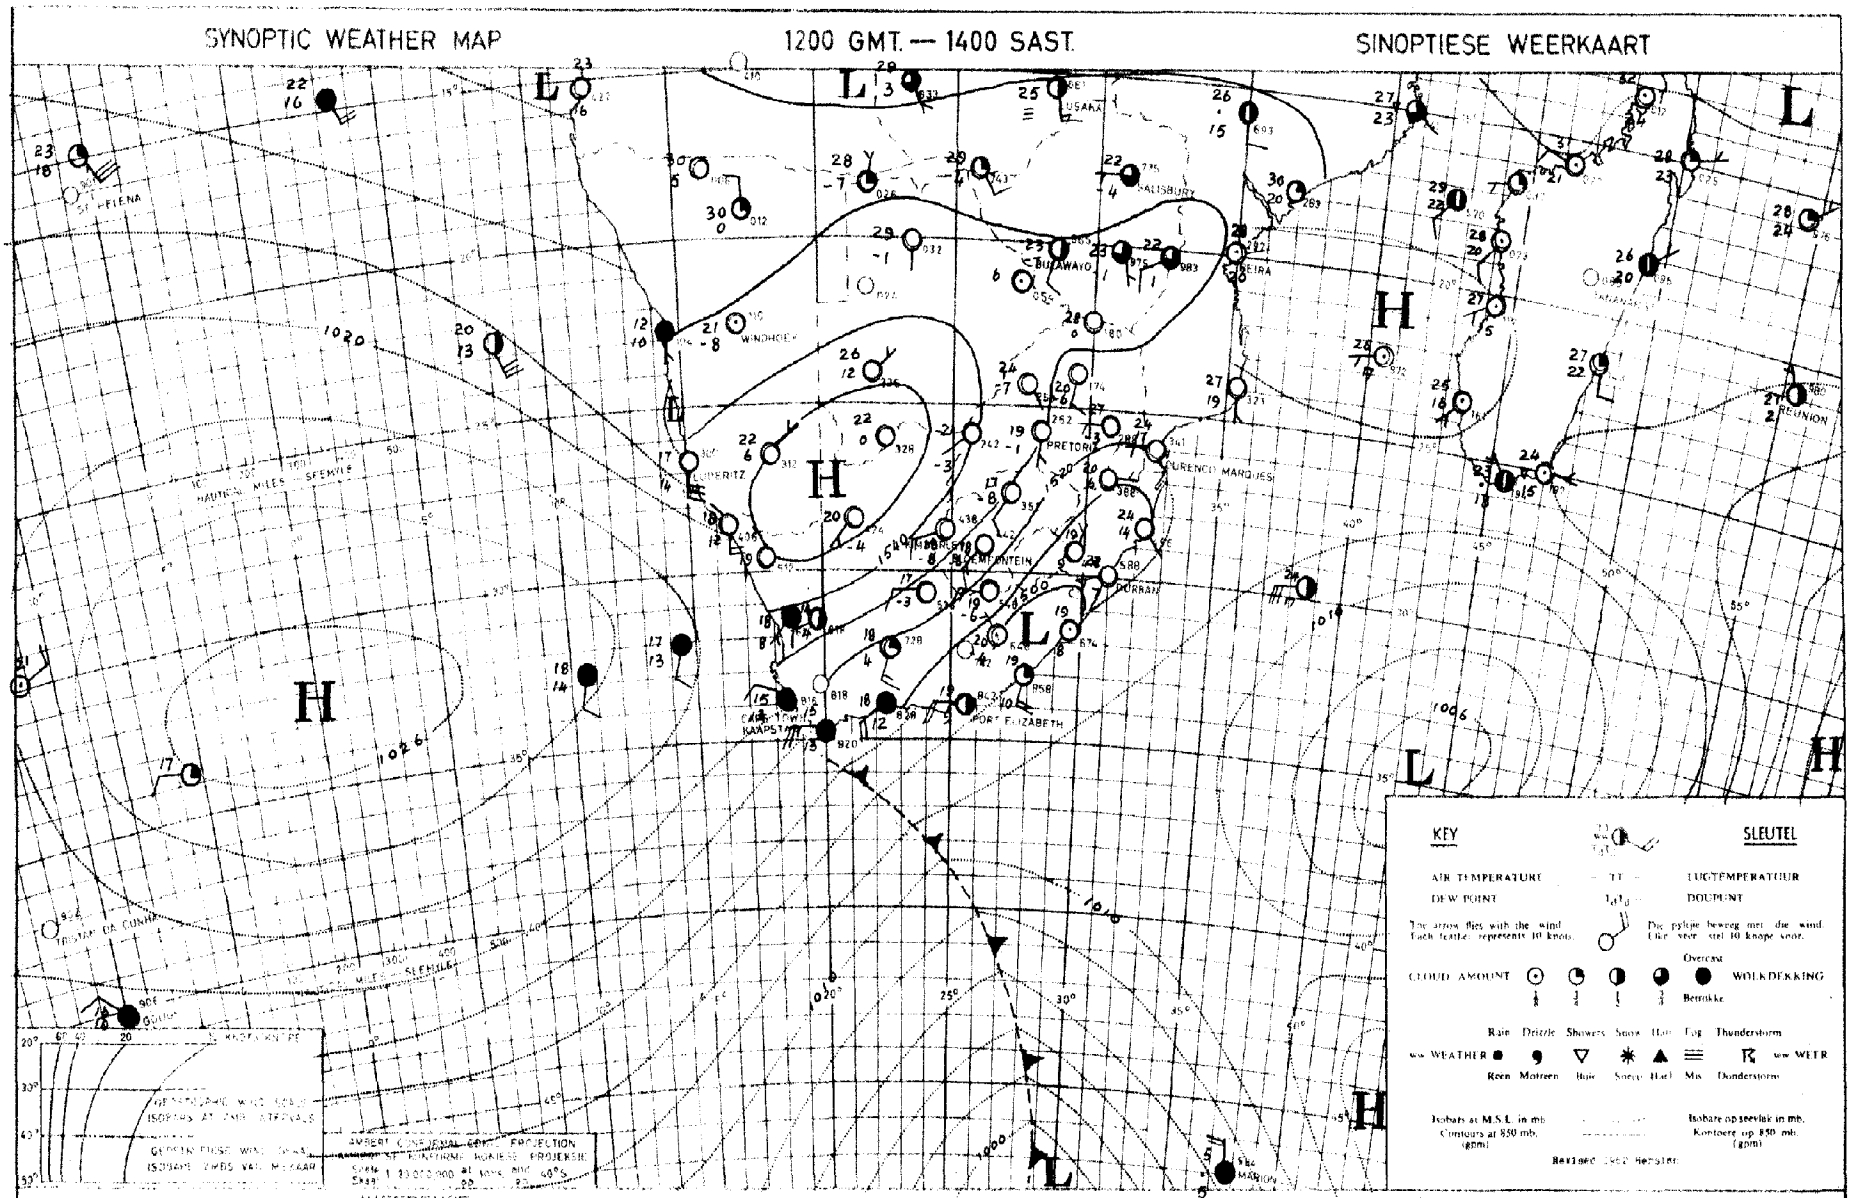
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 24 - 5 - 1966 DATUM AFLEIDING

The weak cold front south of the country is moving eastwards with the result that cooler cloudy weather with light showers will spread over the southern and south-western Cape coastal regions. Over the remainder of the country, the air is dry and it will be fine and mild.

Die swak kouefront suid van die land beweeg oos-waarts sodat koeler bewolkte weer met ligte buie oor die suidelike en suidwestelike Kaapse kusstreke sal uitbrei. Oor die res van die land is die lug droog en sal dit mooiweer en matig wees.

INFERENCE

The Atlantic high is ridging around the south coast, so that it will clear over the south-western and southern Cape coastal areas, spreading eastwards later. The air over the interior is dry and fine weather will persist over these regions.

AFLEIDING

Die Atlantiese hoog stoot 'n rug om die land se suidkus en dit sal dus opklaar oor die suidwestelike en suidelike Kaapse kusgebiede, en later verder ooswaarts. Die lug is droog oor die binneland waar dit dus mooiweer sal bly.

All areas of the country are under the influence of a high pressure system, and with dry air in circulation, the weather will be fine generally.

Al die streke van die land is onder die invloed van 'n hoogdrukstelsel, en met droë lug in sirkulasie, sal dit algemeen mooiweer wees.

Revised 1962 Hersien

INFERENCE

DATE 27 - 5 - 1966 DATUM

AFLEIDING

A series of waves to the west of the country is moving southeastwards and will not influence the weather over the south-western Cape coast. With the high over the interior it will be mainly fine over all regions.

'n Serie van golwe wes van die land beweeg suidooswaarts en sal nie die weer oor die Kaapse suidwestkus beïnvloed nie. Met die hoog oor die binneland sal dit hoofsaaklik mooi weer wees oor alle dele.

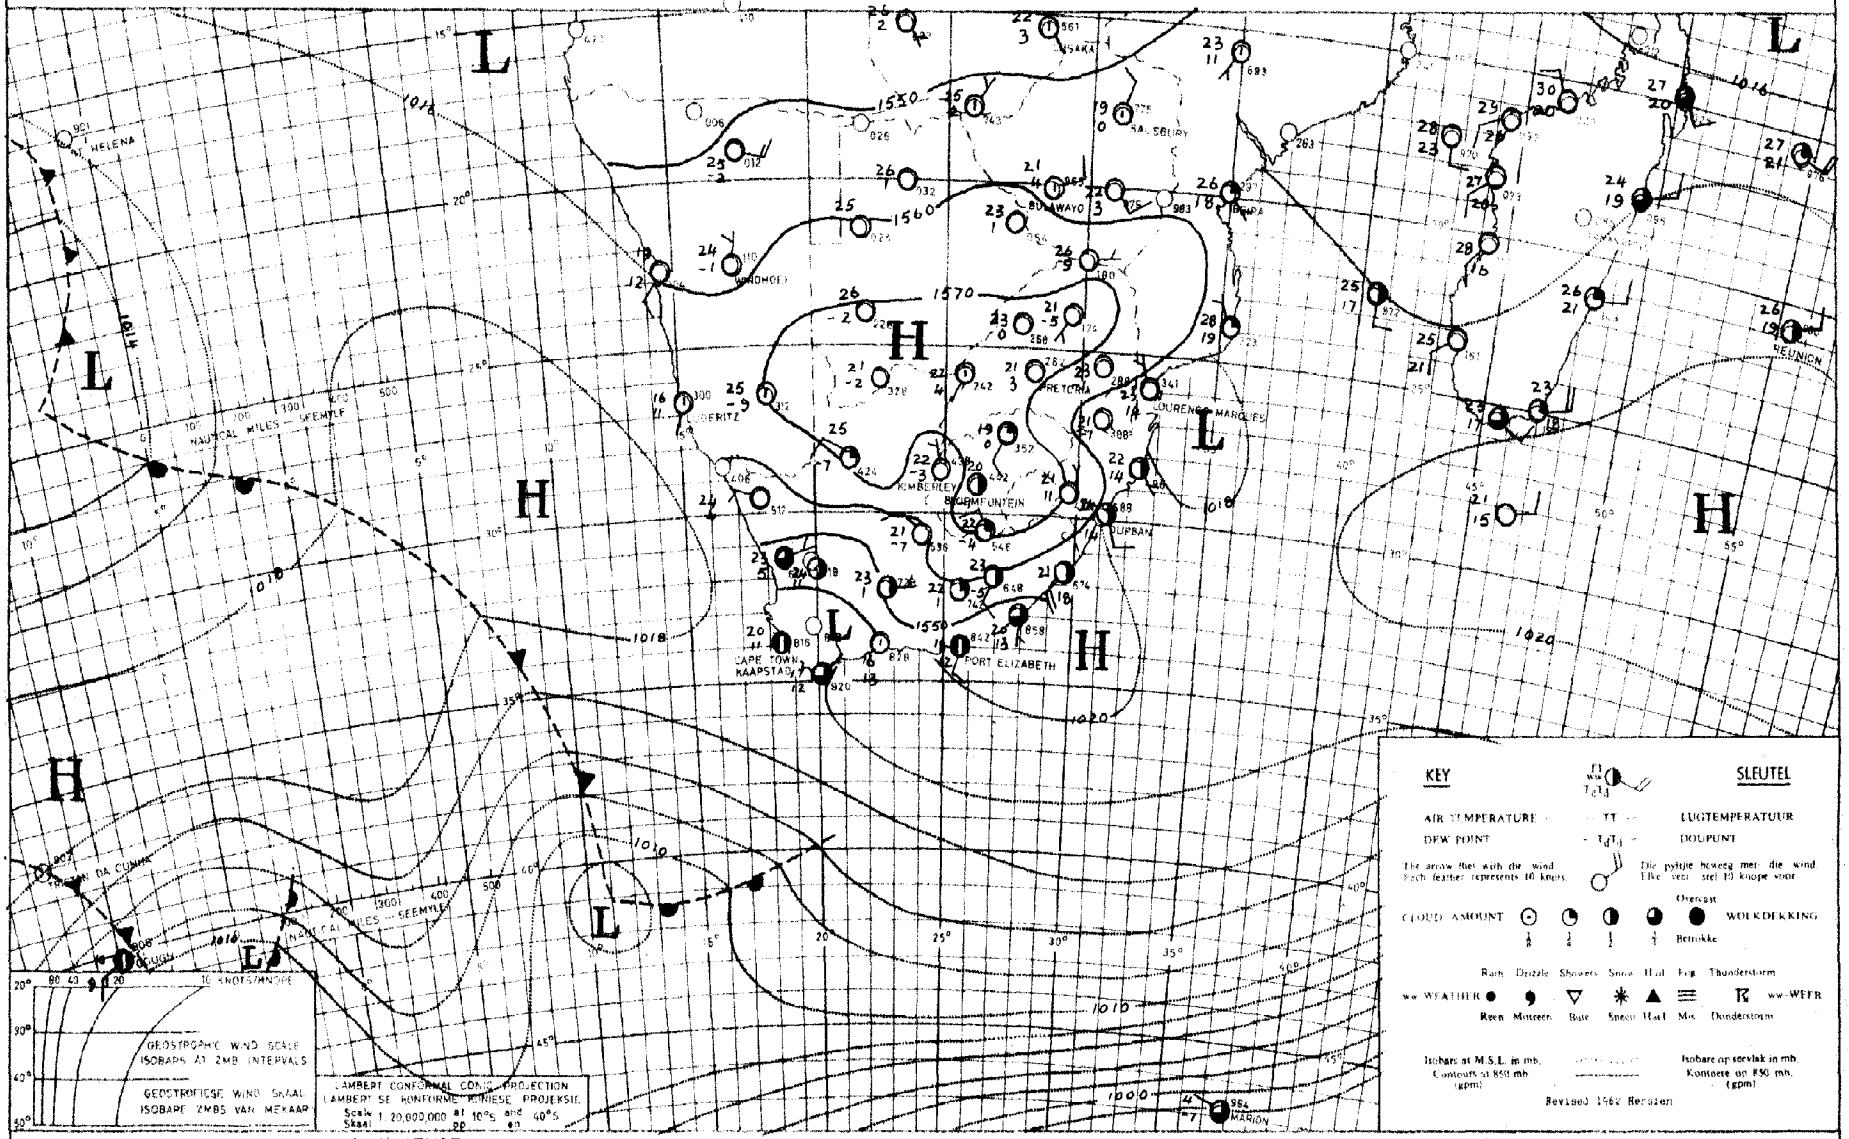
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 28 - 5 - 19 66 DATUM AFLEIDING

The cold front between Gough and Cape Town will reach the south-western Cape coast tomorrow evening and it will become cloudy with rain. Over the remainder of the country it will be fine but it will become partly cloudy over the southern parts of the Cape interior.

Die koufront tussen Gough en Kaapstad sal die Kaapse suidweskus môre aand bereik en dit sal bewolk word met reën. Oor die res van die land sal dit mooiweer wees maar dit sal gedeeltelik bewolk word oor die suidelike Kaapse binneland.

INFERENCE

DATE 29 - 5 - 1966 DATUM

AFLEIDING

The weak cold front west of the Cape will cause light rain along the south-western and southern Cape coasts where it will become cloudy and cooler. Over the remainder of the country it will be fine, except for partly cloudy weather over the southern and eastern regions.

Die swak kouefront wes van die Kaap sal ligte reën veroorsaak oor die Kaapse suidwestelike en suidelike kusstreke, waar dit bewolk en koeler sal word. Oor die res van die land sal dit mooiweer wees, behalwe vir gedeeltelik bewolkte weer oor die suidelike en oostelike dele.

DAAGLIKSE WEERBULLETIN

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

INFERENCE

DATE 30 - 5 - 1966 DATUM

AFLEIDING

Moist air from the south is flowing in over the eastern coastal regions causing cloudy weather. These conditions will spread to the Eastern Transvaal while it will clear along the East Coast. The air over the interior is dry and it will be fine over these regions.

Vogtige lug vanuit die suide word oor die oostelike kusgebiede ingevoer en veroorsaak bewolkte weer. Hierdie toestande sal na Oos-Transvaal uitbrei terwyl dit langs die Ooskus sal opklaar. Die lug oor die binneland is droog en dit sal mooiweer wees oor hierdie gebiede.

DAAGLIKSE WEERBULLETIN

DATE 1.-.6.-.19.66 DATUM

INFERENCE

The cold front which moved over the south-western Cape Province will move further eastwards and cold air will spread over the remainder of the Cape Province and the southern parts of the Free State. Cloudy weather with showers will spread over the southern and south-eastern Cape coastal regions and adjacent interior and the southern parts of Natal, but it will clear over the south-western parts of the Cape.

AFLEIDING

Die kouefront wat oor die suidwestelike Kaapprovinsie beweeg het, sal verder ooswaarts beweeg en koue lug sal oor die res van die Kaapprovinsie en die suidelike dele van die Vrystaat uitbrei. Bewolkte weer sal oor die suidelike en suidoostelike Kaapse kusstreke en aangrensende binneland en die suidelike dele van Natal uitbrei met buie maar dit sal opklaar oor die suidwestelike dele van Kaapland.

Revised 1962 Hersien

INFERENCE DATE 2 - 6 - 1966 DATUM AFLEIDING

A high is moving past the south coast and thus the cloudy conditions with light rain over the eastern Cape and Natal will clear during the day. It will remain fine over the remainder of the country, but somewhat cooler conditions will spread over the Free State and Southern Transvaal.

'n Hoog beweeg om die suidkus en dus sal die aanvanklik bewolkte weer met ligte reën oor die Oostelike Kaapprovinsie en Natal deur die dag opklaar. Oor die res van die land sal dit mooiweer bly, maar ietwat koeler toestande sal oor die Vrystaat en Suid-Transvaal uitbrei.

As a result of the high over the Indian Ocean moist air from the south-west is being advected over the Transvaal where it will be cloudy. At the same time, with an upper air trough over the western and central parts of the country, and moist air present in the middle layers, showers will occur over these areas.

As gevolg van die hoog oor die Indiese Oseaan word vogtige lug vanuit die suidweste oor Transvaal ingevoer waar dit bewolk sal wees. Terselfdertyd, met 'n bolugtrog oor die westelike en sentrale dele van die land en met vogtige lug in die middelste lae, sal buie oor hierdie streke voorkom.

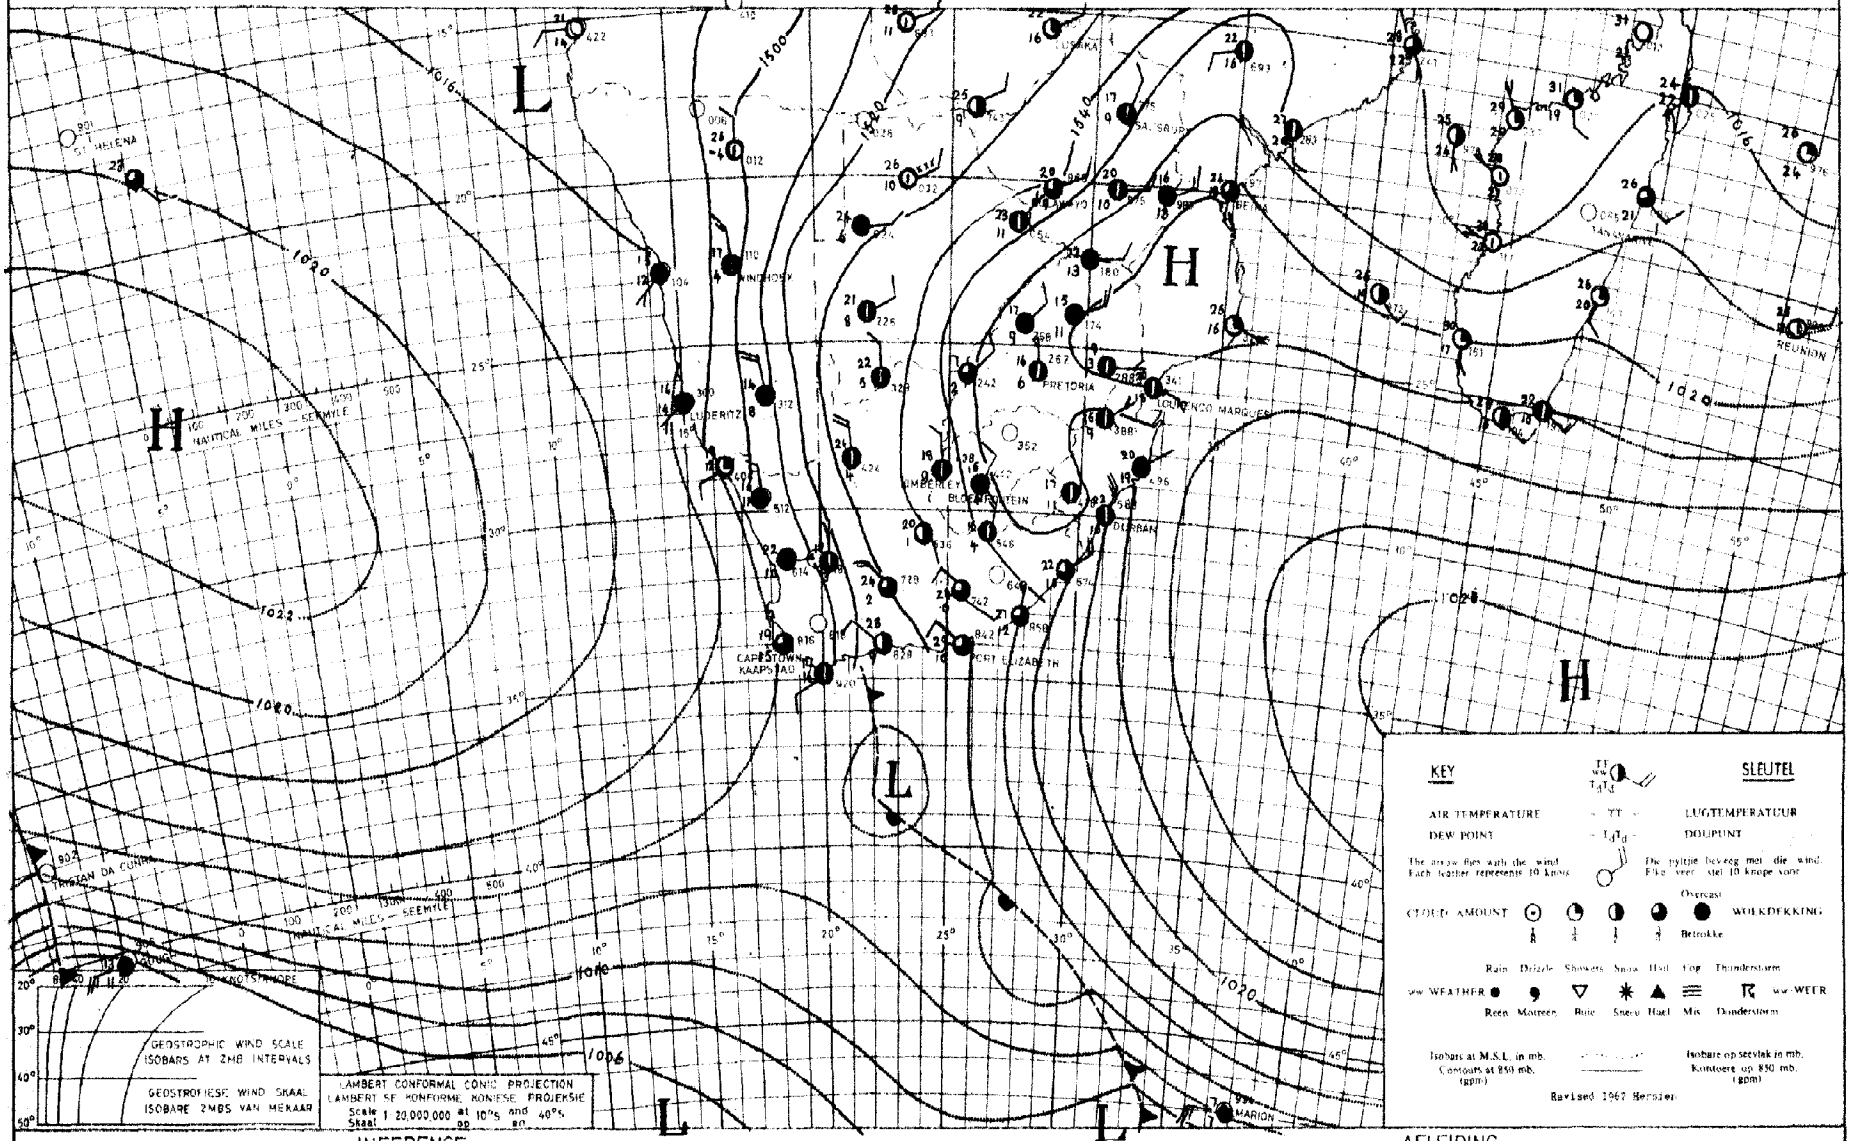
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 4-5 1966 DATUM AFLEIDING

Moist air, which has moved in from the north-east, is now present over most of the country and further showers can be expected but since the upper air through is now moving eastwards clearence will commence over South-West Africa.

Vogtige lug, wat vanuit die noordooste inbeweeg het, is nou oor die meeste dele van die land aanwesig en verdere buie kan verwag word, maar die ooswaartse beweging van die bolugtrog sal opklaring oor Suidwes-Afrika veroorsaak.

DAAGLIKSE WEERBULLETIN

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

INFERENCE

DATE 5 - 6 - 1966 DATUM

AFLEIDING

It will be fair over the western half of the country where dry air has moved in, but with moist air present in the east it will be cloudy with showers over the latter regions.

Droë lug het oor die westelike helfte van die land inbeweeg waar dit mooiweer sal wees, maar met vogtige lug in die ooste sal dit daar bewolk wees met buie.

The high over the southern regions of the Cape Province is moving north-eastwards to the eastern interior, with the result that clearance will take place over the central and southern parts. It will remain partly cloudy in the north-east with light showers.

Die hoog oor die suidelike dele van die Kaapprovinsie beweeg noordooswaarts na die oostelike binneland, sodat dit sal opklaar oor die sentrale en suidelike dele. Dit sal nog gedeeltelik bewolk wees in die noordooste met enkele ligte buie.

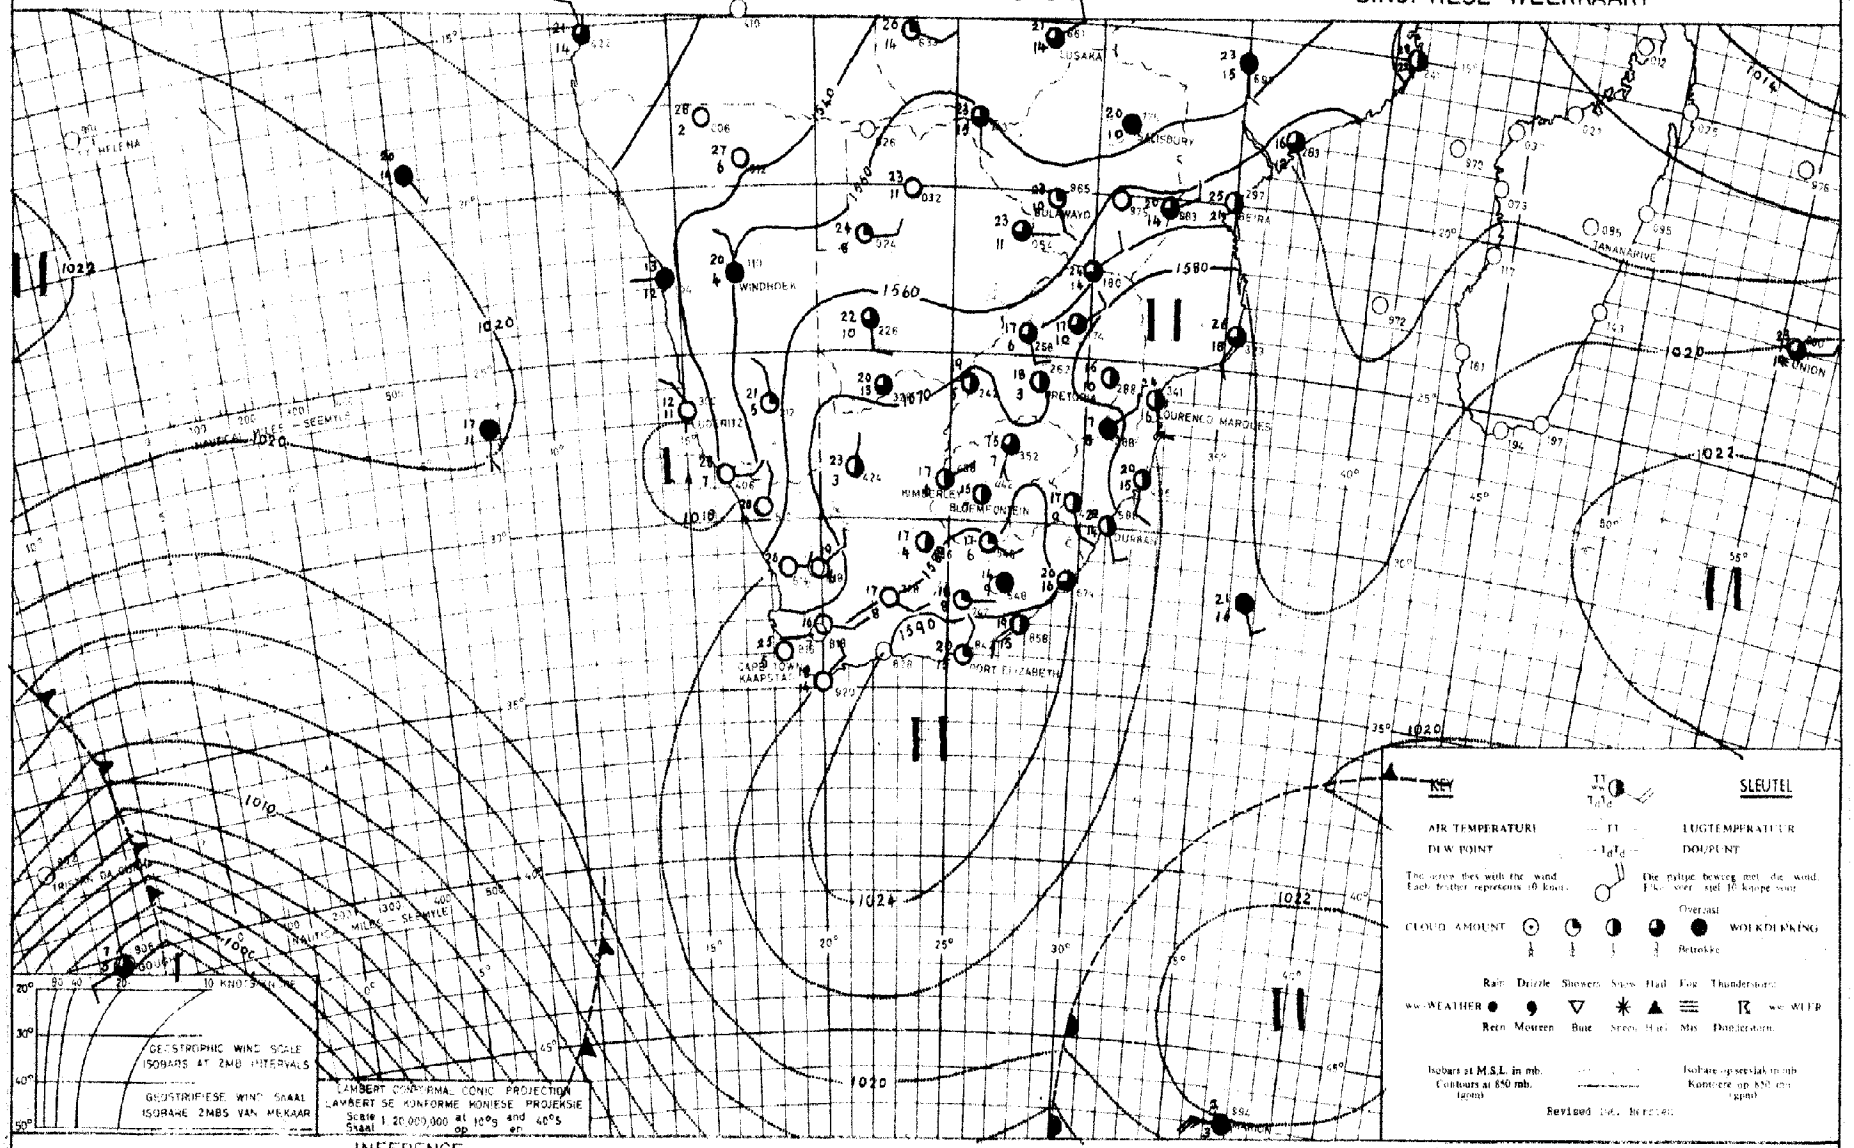
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 7-6-1966 DATUM AFLEIDING

The high to the south of the country is moving eastwards, so that it will clear over the eastern Cape and Natal conditions will spread over the north-eastern interior. The air is still relatively moist over the remainder of the interior, so that it will remain partly clo-

Die hoog suid van die land geleë, beweeg ooswaarts sodat dit ook oos-Kaapland en Natal sal opklaar, terwyl bewolkte toestande oor die noordoostelike binneland sal uitbrei. Oor die res van die binneland is die lug nog redelik vogtig, en dit sal dus gedeeltelik bewolk bly.

DAAGLIKSE WEERBULLETIN

Revised 1962 Hersien

INFERENCE DATE 8-6-86 DATUM AFLEIDING

As a result of the cold front it will be cloudy to partly cloudy with drizzle along the western and south-western coast. With fairly moist air present in the north it will be partly cloudy over these regions, but fair in the south where the air is dry.

As gevolg van die koufront sal dit bewolk tot gedeeltelik bewolk met motreën wees langs die wes- en suidweskusgebiede. Met taamlike vogtige lug aanwesig in die noorde sal dit gedeeltelik bewolk wees oor hierdie gebiede maar mooiweer in die suide waar die lug droog is.

INFERENCE

DATE 10-6-1966 DATUM

AFLEIDING

The cold front in the vicinity of the Greenwich meridian is moving eastwards, with the result that cloudy weather with showers will spread over the south-western Cape coastal regions. Over the remainder of the country it will remain fine.

Die kouefront in die omgewing van die Greenwich-meridiaan beweeg stadig ooswaarts, sodat bewolkte weer met buie langs die Kaapse suidwes- en suid-kusstreke sal uitbrei. Oor die res van die land sal dit mooiweer bly.

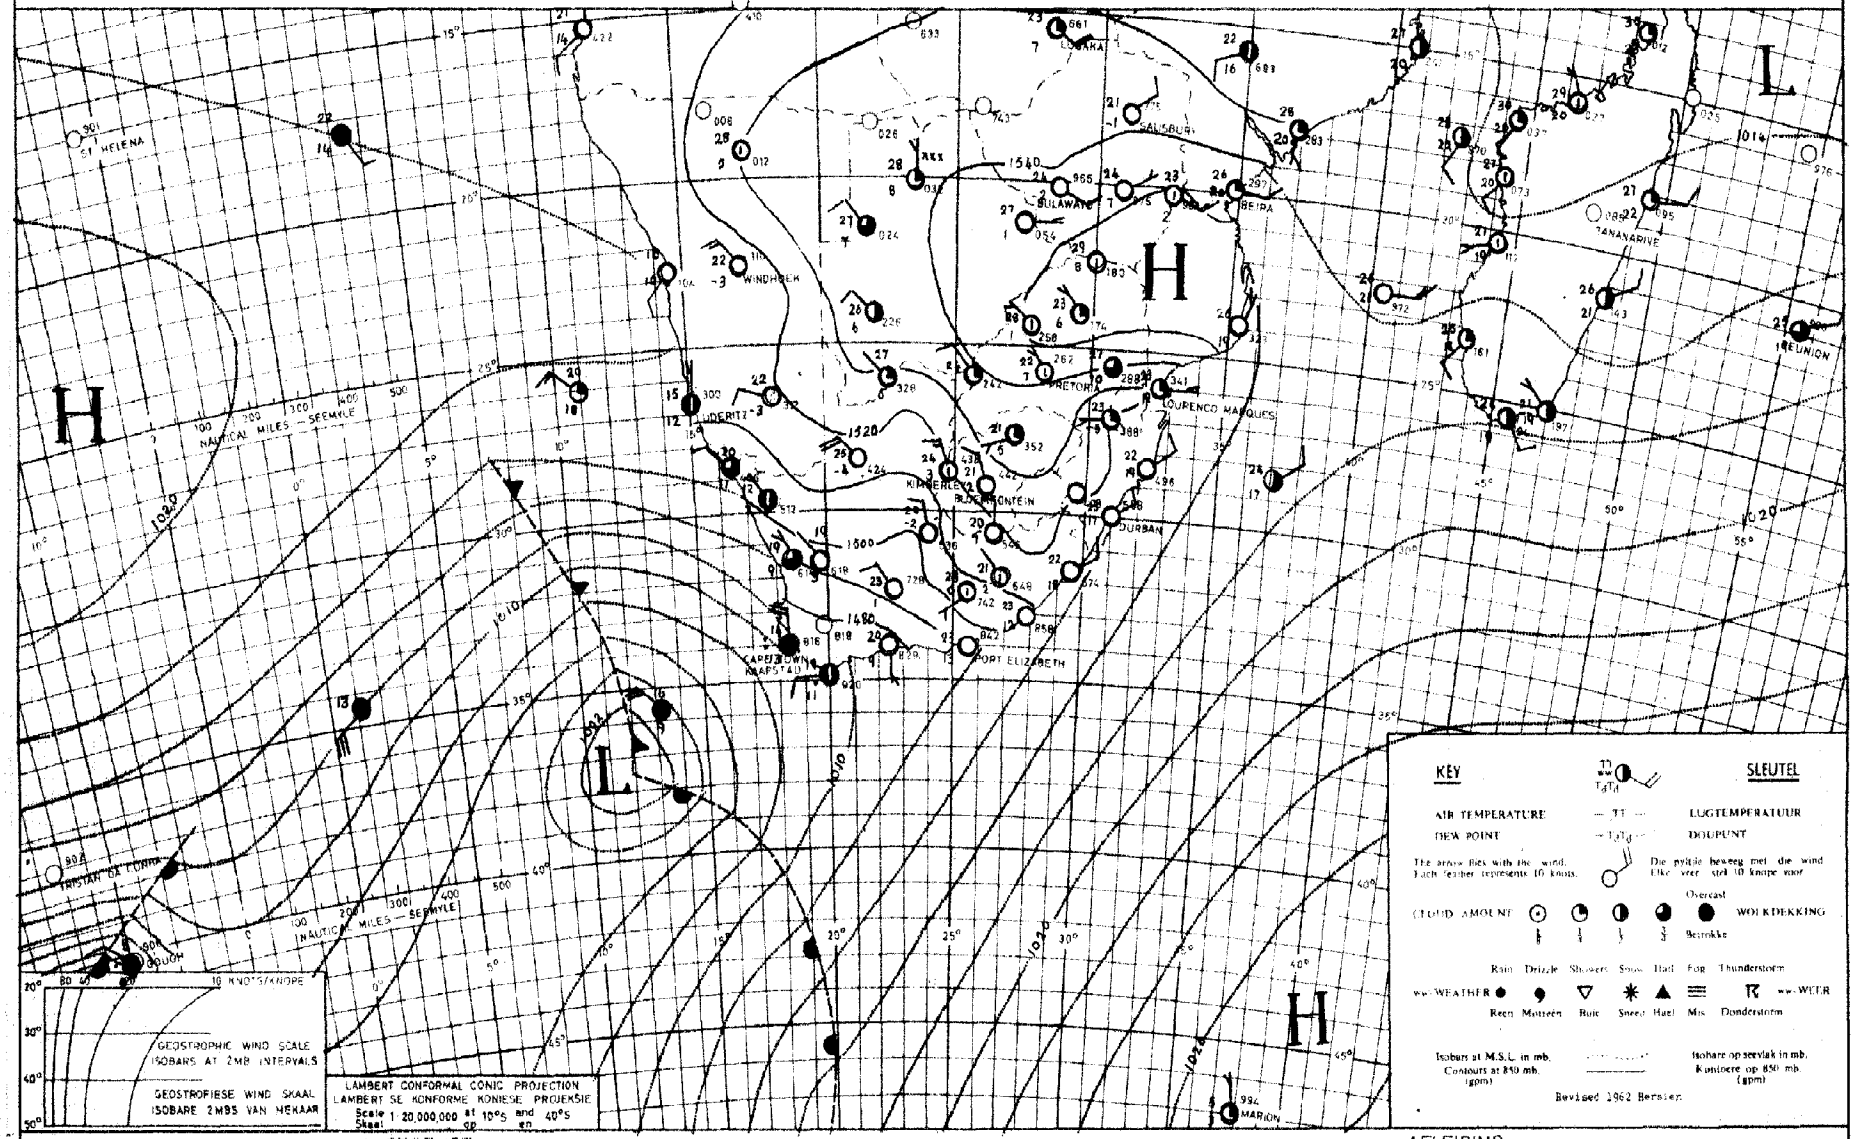
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 11 — 6 — 19.6.6. DATUM AFLEIDING

A cold front is nearing the Cape and thus cloudy, cold conditions with showers over the western and south-western coastal areas will gradually spread eastwards. The air is dry over the remainder of the country where fine weather will persist.

'n Koufront nader die Kaap en bewolkte koue weer met buie oor die Kaapse wes- en suidweskus sal mettertyd ooswaarts uitbrei. Oor die res van die land is die lug droog en mooiweerstoestande sal voortduur.

DAAGLIKSE WEERBULLETIN

INFERENCE

DATE 12 - 6 - 1966 DATUM

AFLEIDING

The air behind the cold front is dry and it will clear over the Cape Province. A ridge of the Atlantic high is moving in south of the country and will cause cloudy weather with rain over Natal, which will spread to eastern Transvaal.

Die lug agter die koufront is droog en dit sal opklaar oor Kaapland. 'n Rug van die Atlantiese hoog druk suid van die land in en sal bewolkte toestande met reën oor Natal veroorsaak wat sal uitbrei na Oos-Transvaal.

INFERENCE

DATE 13 - 6 1966 DATUM

AFLEIDING

The high situated to the south-east of the country is advecting moisture over the north-eastern interior, where it will be cloudy and cooler. It will clear over Natal, while the present fine weather will persist over the remainder of the country.

Die hoog suidoos van die land voer vogtige lug in oor die noordoostelike binneland waar dit bewolk en koeler sal wees. Dit sal opklaar oor Natal, terwyl huidige mooiweerstoestande oor die res van die land sal voortduur.

As a result of a strong high pressure system (also in the upper air) over the country, it will be fair and mild.

As gevolg van die teenwoordigheid van 'n hoogdrukstelsel (ook in die bolug) oor die land sal dit mooiweer en matig wees.

INFERENCE

DATE 15.6.19.66 DATUM

AFLEIDING

The Atlantic high is ridging in south of the country and will cause partly cloudy weather over Natal. Over the remainder of the country the air is dry and it will be mainly fine.

Die Atlantiese hoog druk 'n rug suid van die land in en sal gedeeltelik bewolkte weer oor Natal veroorsaak. Oor die res van die land is die lug droog en sal dit hoofsaaklik mooiweer wees.

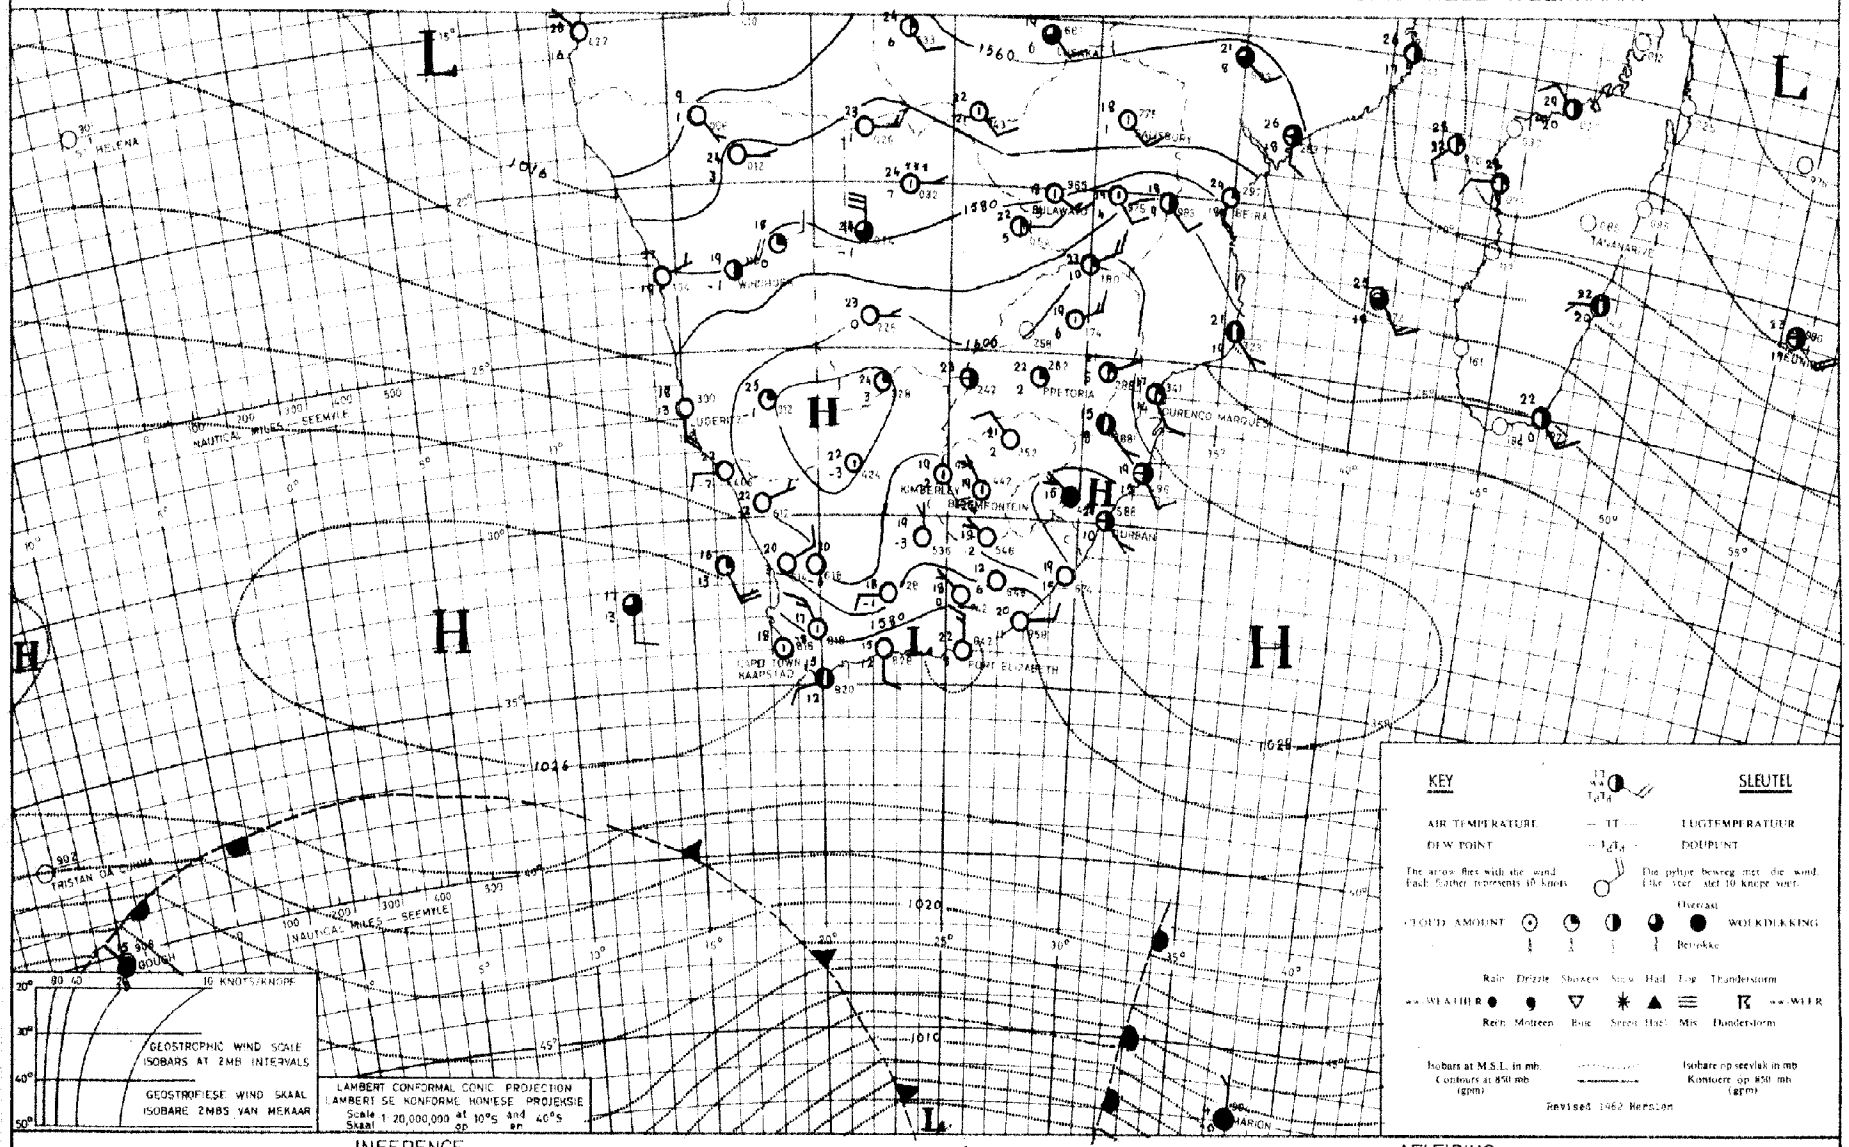
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 16 - 6 1966 DATUM AFLEIDING

The high situated south-east of the country is moving eastwards so that it will clear over the north-eastern interior. With a high over the interior, no change is expected in the fine weather conditions over the remainder of the country.

Die hoog suidoos van die land gelee, beweeg ooswaarts en dus sal dit opklaar oor die noordoostelike binneland. Met 'n hoog oor die binneland word geen veranderings in die mooiweerstoestande oor die res van die land verwag nie.

Revised 1962 Hersien

INFERENCE

DATE 17 - 6 - 1966 DATUM

AFLEIDING

Easterly winds over the north-eastern parts of the country are bringing moisture over the Northern Transvaal and Bechuanaland where it will be partly cloudy. On the other hand, dry easterly winds from the interior will cause bergwinds along the South-West African coast.

Oostewinde oor die noordoostelike dele van die land voer vogtige lug in oor Noord-Transvaal en Betsjoeana-land waar dit gedeeltelik bewolk sal wees. Droë oostewinde wat vanuit die binneland waai sal egter bergwinde langs die Suidwes-Afrikaanse kus veroorsaak.

INFERENCE

DATE 18 - 6 - 1966 DATUM

AFLEIDING

The strong high over the interior will maintain settled conditions over most parts. A shallow layer of moist air on the northern side of the high will cause partly cloudy conditions over Bechuanaland and over Northern Transvaal. The cold front west of the Cape is weak in lower latitudes and will therefore not influence the weather at the Cape.

Met die sterk hoog oor die binneland sal mooiweerstoestande oor die meeste dele voortduur. 'n Vlak vogtige laag aan die noordekant van hierdie hoog sal egter gedeeltelik bewolkte toestande oor Betsjoeanaland en Noord-Transvaal veroorsaak. Die kouefront wes van die Kaap is swak in laer breedtegrade en sal dus nie die weer by die Kaap beinvloed nie.

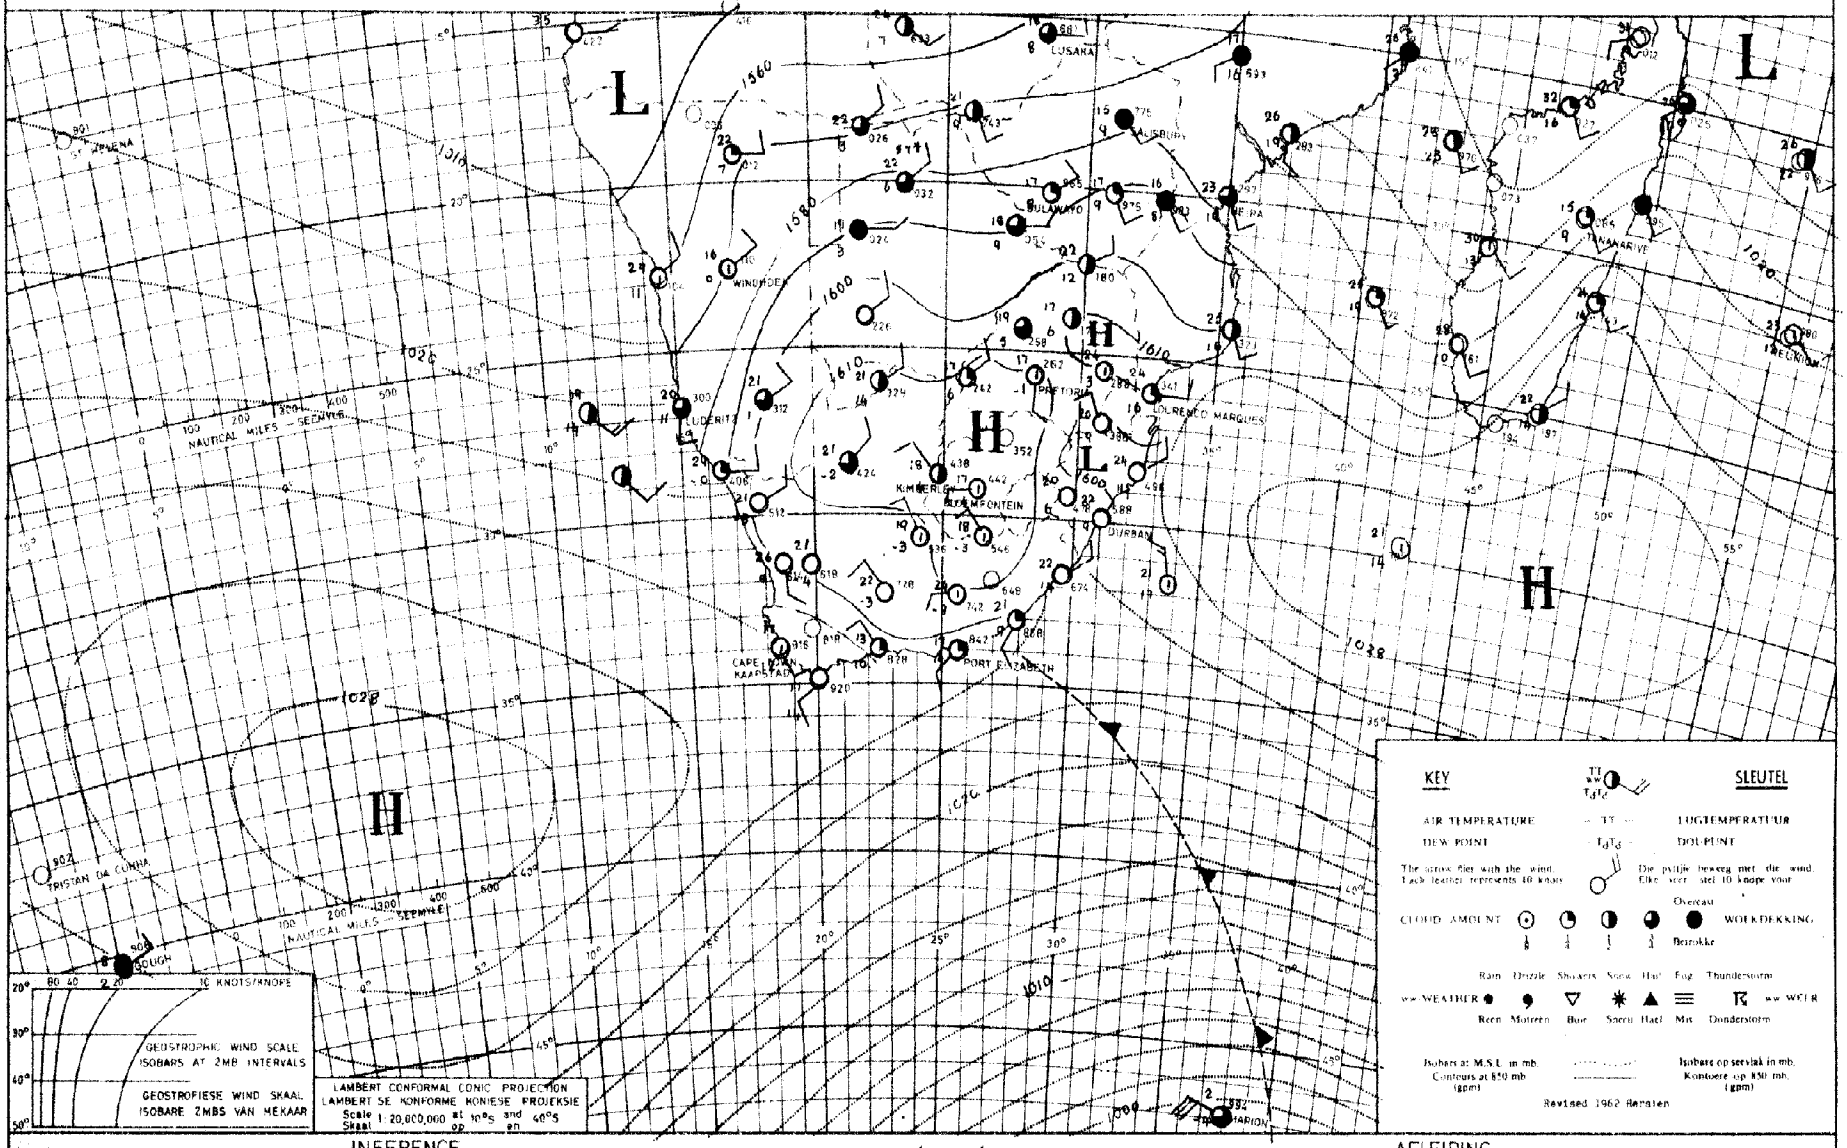
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

DATE 19-6-19.66 DATUM

AFLEIDING

The weak cold front south-east of the country is moving eastwards, and is followed by a ridge of the Atlantic high, which will be off the eastern coastal regions tomorrow and will cause partly cloudy weather over northen Transvaal. Over the remainder of the country the air is dry and it will be fine.

Die swak koufront suidoos van die land beweeg verder ooswaarts en word gevolg deur h rug van die Atlantiese hoog wat môre langs die ooskusstreke sal wees en gedeeltelik bewolkte weer oor die noordelike dele van Transvaal sal veroorsaak. Oor die res van die land is die lug droog en sal dit mooiweer wees.

INFERENCE

DATE 20 - 6 1966 DATUM

AFLEIDING

With the strong high over the interior, fine weather will prevail over the central and southern interior and bergwind conditions will persist along the western coastal regions. It will, however, remain partly cloudy over the extreme northen regions where a shallow layer of moist air is present. It will also become partly cloudy along the Cape south coast.

Met die sterk hoog oor die binneland sal mooiweerstoestande voortduur oor die sentrale en suidelike binneland en warm bergwindtoestande sal heers oor die westelike kusgebiede. Dit sal egter gedeeltelik bewolk bly oor die verre noordelike gebiede waar 'n vlak laag vogtige lug aanwesig is. Dit sal ook gedeeltelik bewolk word langs die Kaapse suidkus.

DATE 21-6-1966 DATUM

AFLEIDING

The country is under the influence of a stationary high pressure system and the present weather conditions will persist.

Die land is onder die invloed van 'n stasionêre hoogdruk-stelsel en die heersende weerstoestande sal voortduur.

INFERENCE

DATE 22 - 6 - 1966 DATUM

The high south of the country is moving north-eastwards and will cause cloudy weather over Natal and eastern Transvaal with showers over the Natal coast. In the upper layers moist air is moving over S.W.A., Bechuanaland and northern Transvaal where it will be partly cloudy. Over the remainder of the country it will be fine.

AFLEIDING

Die hoog suid van die land beweeg noordooswaarts en sal bewolkte weer oor Natal en Oos-Transvaal veroorsaak met buie langs die Natalkus. Vogtige lug beweeg in die bolug oor S.W.A., Betsjoeanaland en Noord-Transvaal waar dit gedeeltelik bewolk sal wees. Oor die res van die land sal dit mooiweer bly.

INFERENCE

DATE 23 - 6 - 19 66 DATUM

Moist air is moving around the strong high pressure westwards and southwards over the northern and western parts of the country. Over these regions it will be partly cloudy. It will be slightly cloudy over the central interior. Warm bergwind conditions will occur over the western and southern coastal regions and adjacent interior.

AFLEIDING

Vogtige lug beweeg om die sterk hoog weswaarts en suidwaarts oor die noordelike en westelike dele van die land. Oor dié dele sal dit gedeeltelik bewolk wees. Effens bewolkte toestande sal oor die sentrale binneland voorkom. Warm bergwind toestande sal oor die westelike en suidelike kusstreke en aangrensende binneland voorkom.

The cold front between Gough Island and Cape Town is moving eastwards and will be off the western coast by tomorrow, with the result that cloudy weather will spread over the south-western regions. Over the remainder of the country it will be partly cloudy. Bergwind conditions will occur over the southern and south-eastern coastal regions owing to the off-shore pressure gradient.

Die kouefront tussen Gough-eiland en Kaapstad beweeg ooswaarts en sal more net wes van die weskus gelee wees, sodat dit bewolk sal word oor die suidwestelike dele van Kaapland. Oor die res van die land sal dit gedeeltelik bewolk wees. Bergwindtoestande sal oor die suidelike en suidoostelike kusstreke voorkom as gevolg van die landaf drukgradiënt.

INFERENCE

DATE 25 - 6 - 1966 DATUM

AFLEIDING

The cold front between Gough Island and Cape Town will move over the south-western regions of the Cape Province where it will be cloudy to partly cloudy with showers. Moist air is moving in over the north-eastern regions of the country, where it will remain partly cloudy but over the remainder of the country it will be fine.

Die koufront tussen Gough-eiland en Kaapstad sal na verwagting more oor die suidwestelike dele van Kaapland beweeg waar dit bewolk tot gedeeltelik bewolk sal word met buie. Vogtige lug beweeg oor die noordoostelike dele van die land in waar dit gedeeltelik bewolk en koel sal wees maar oor die res van die land sal dit mooiweer wees.

INFERENCE

DATE 26-6-19-66 DATUM

AFLEIDING

The cold front south of the country is moving eastwards and partly cloudy weather will spread to the eastern coastal regions. Dry air is moving in from the west over the country and it will be fine elsewhere except for Transvaal where it will remain partly cloudy.

Die kouefront suid van die land beweeg ooswaarts en gedeeltelik bewolkte weer sal oor die oostelike kus-streke uitbrei. Droë lug beweeg oor die land in vanuit die weste en dit sal mooiweer wees oor die res van die land behalwe oor Transvaal waar dit gedeeltelik bewolk sal bly.

With dry air in circulation over the country it will be fair and mild. The eastwards moving cold front between Cape Town and Gough Island, will later cause cloudy, cooler weather over the south-western coast.

Met droë lug in sirkulasie oor die land sal dit mooiweer en matig wees. Die oeswaarts bewegende koufront tussen Kaapstad en Gough-eiland sal bewolkte weer langs die suidwestelike kusgebied veroorsaak.

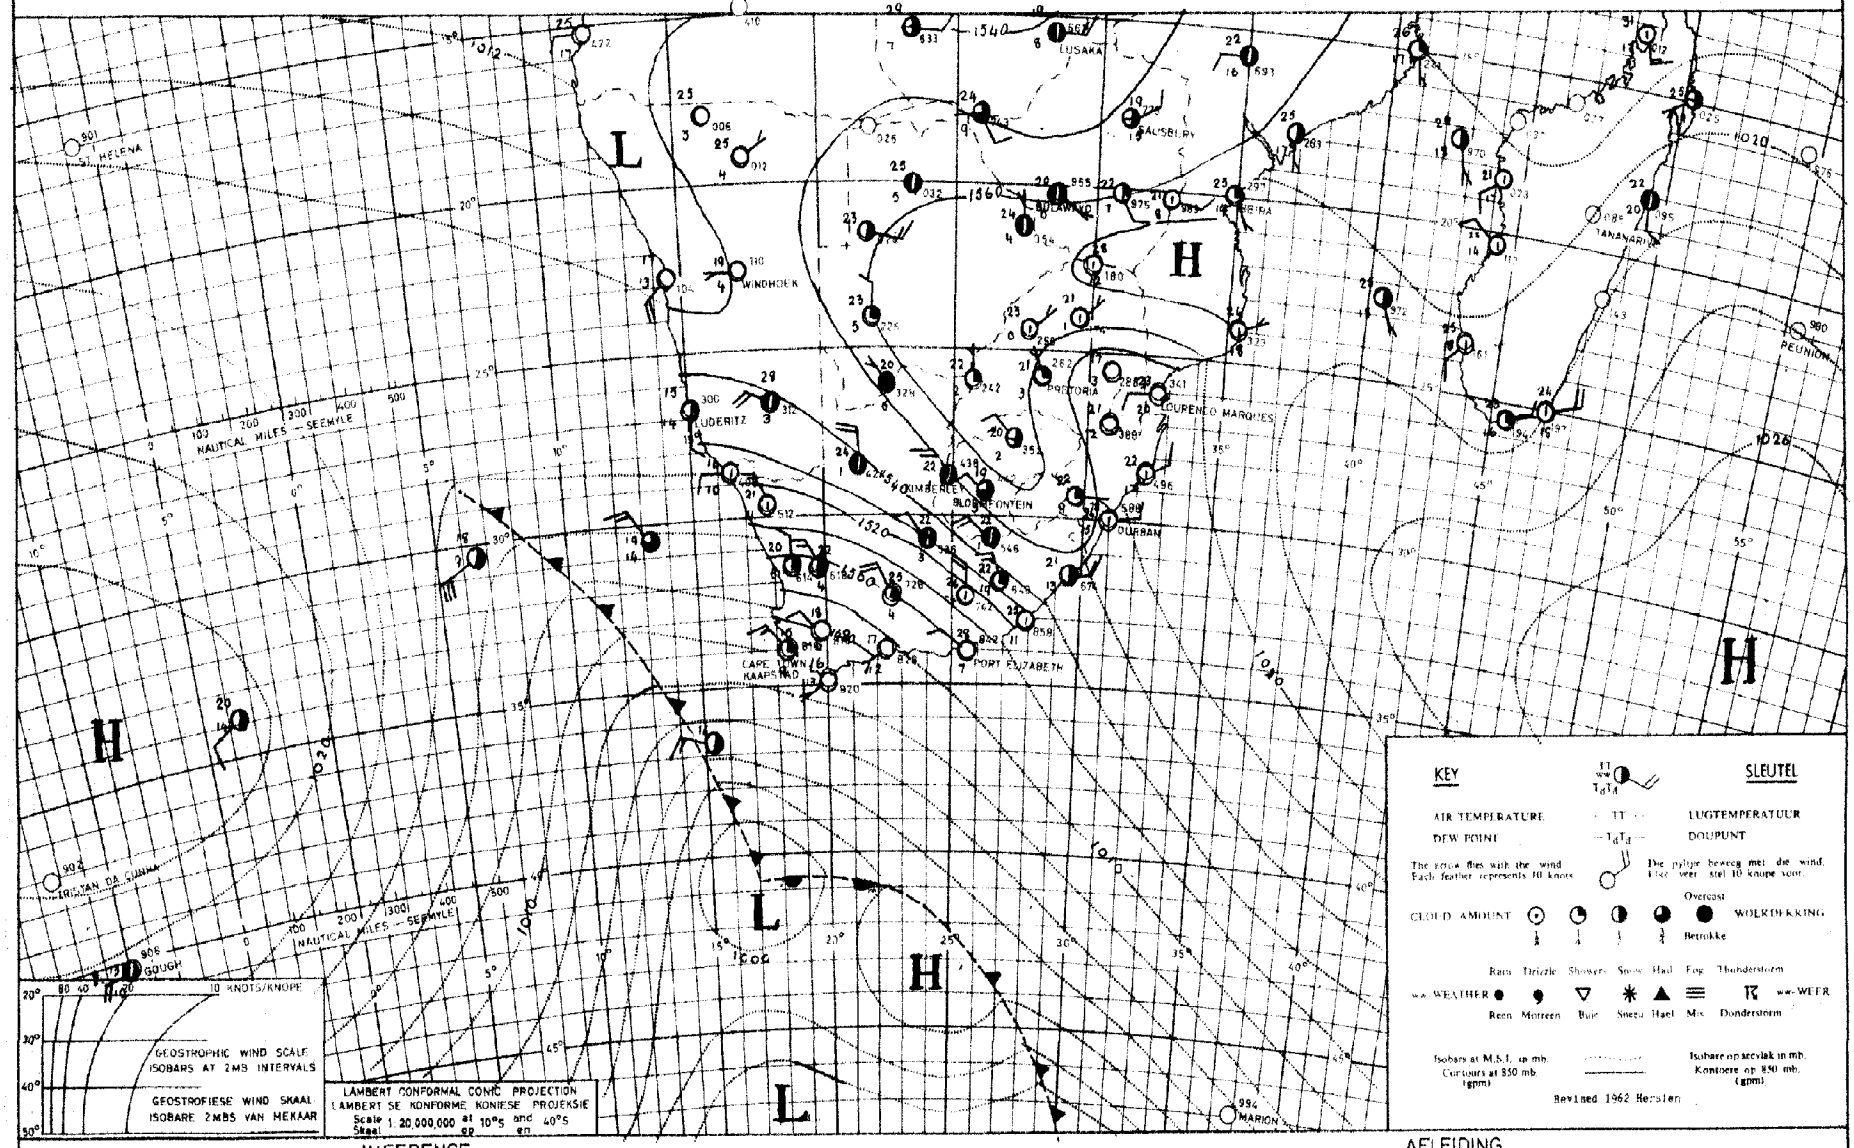
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 29 - 6 - 1966 DATUM AFLEIDING

The cold front west of the Cape is moving eastwards and will cause cloudy, colder conditions with showers mainly over the coastal areas of the western, south-western and southern Cape. No change is expected over the remainder of the country.

Die kouefront wes van die Kaap geleë, beweeg oswaarts en sal bewolkte, kouer toestande veroorsaak met buie hoofsaaklik oor die kusgebiede van Wes-Suidwes- en Suid-kaapland. Oor die res van die land word geen veranderings verwag nie.

DAAGLIKSE WEERBULLETIN

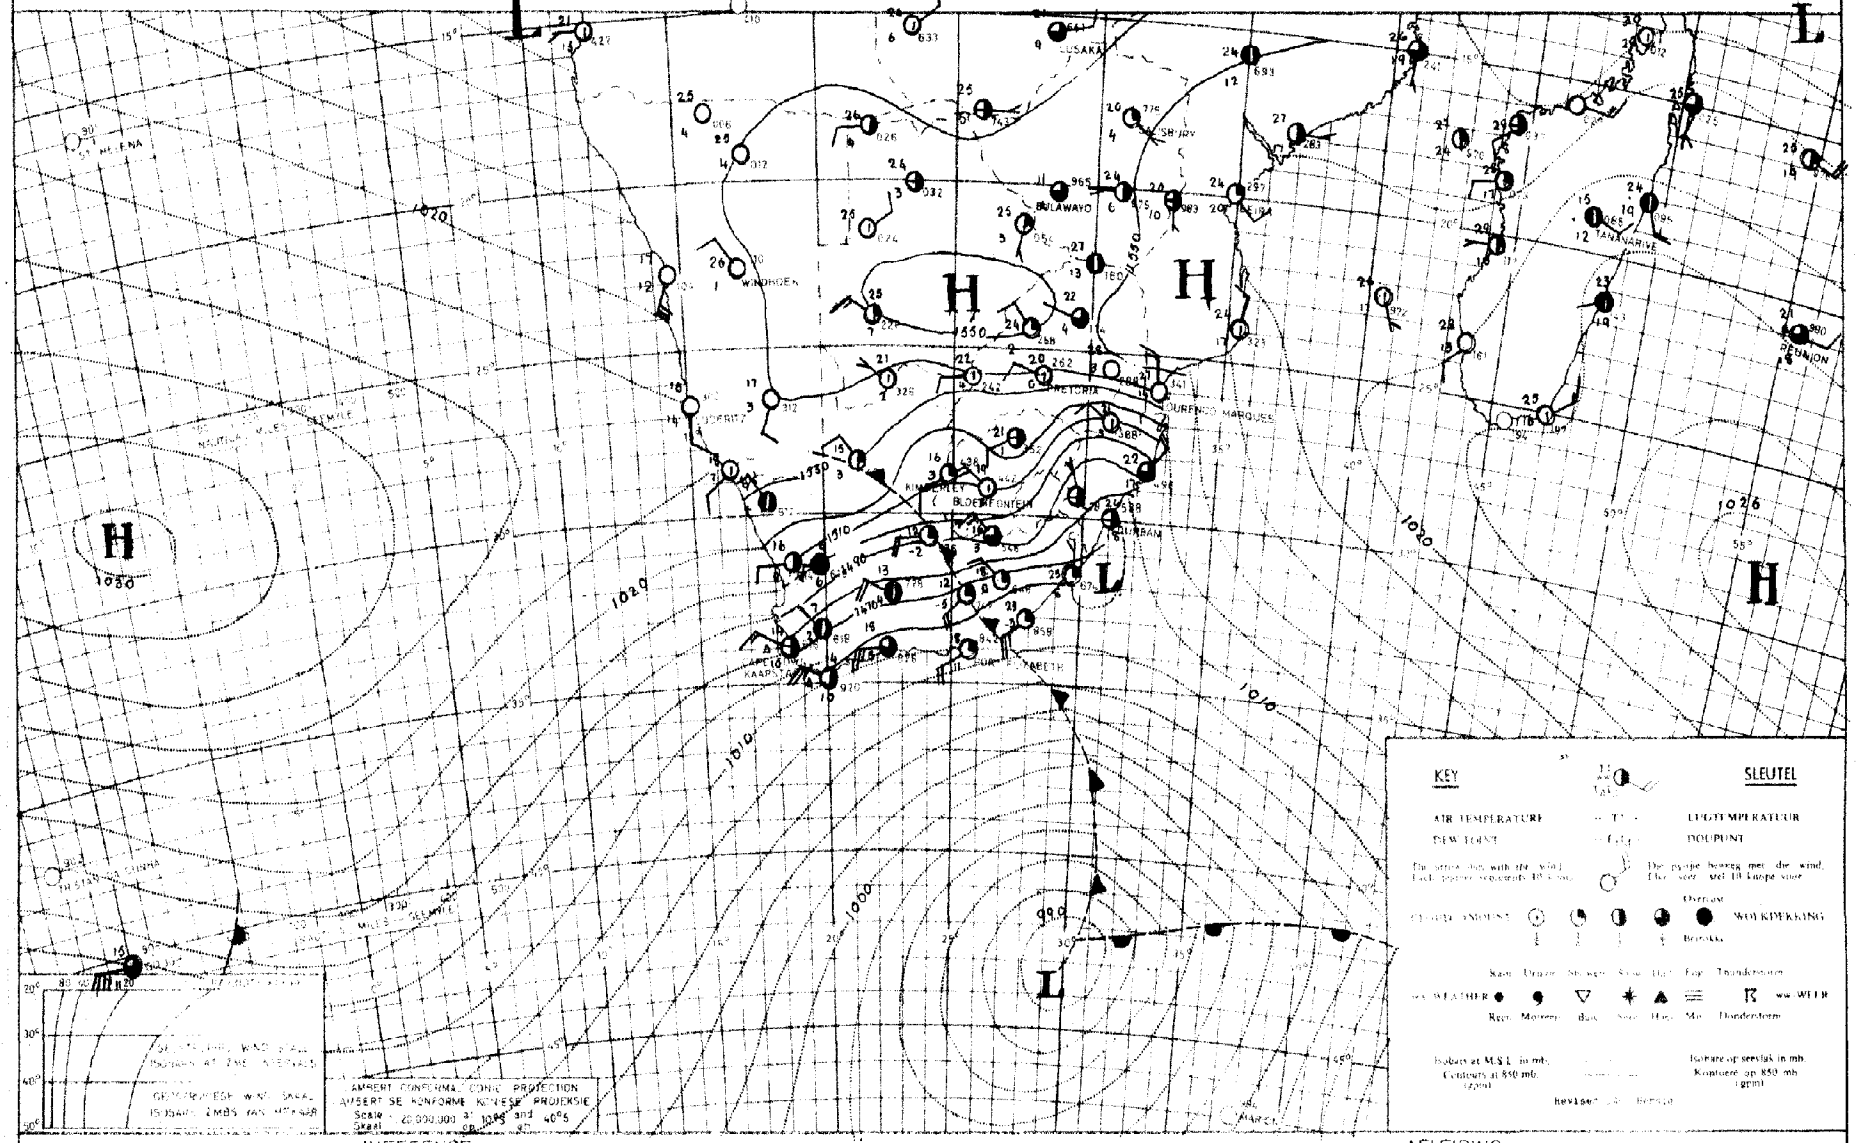
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

Colder air is moving in behind the cold front which is situated over the country and it will be cold over the Free State and most parts of the Cape Province. Cloudy weather with rain will occur over the western regions of the Cape Province, and it will become partly cloudy over the Eastern Cape and later also over the Natal coast.

DATE 29 - 6 19 66 DATUM

AFLEIDING

kouer lug beweeg in agter die kouefront wat oor die land lê en dit sal koud word oor die Vrystaat en die meeste dele van Kaapland. Bewolkte weer sal oor die westelike dele van Kaapland voorkom met buie terwyl dit gedeeltelik bewolk sal word oor Oos-Kaapland en later ook oor die Natalse kus.

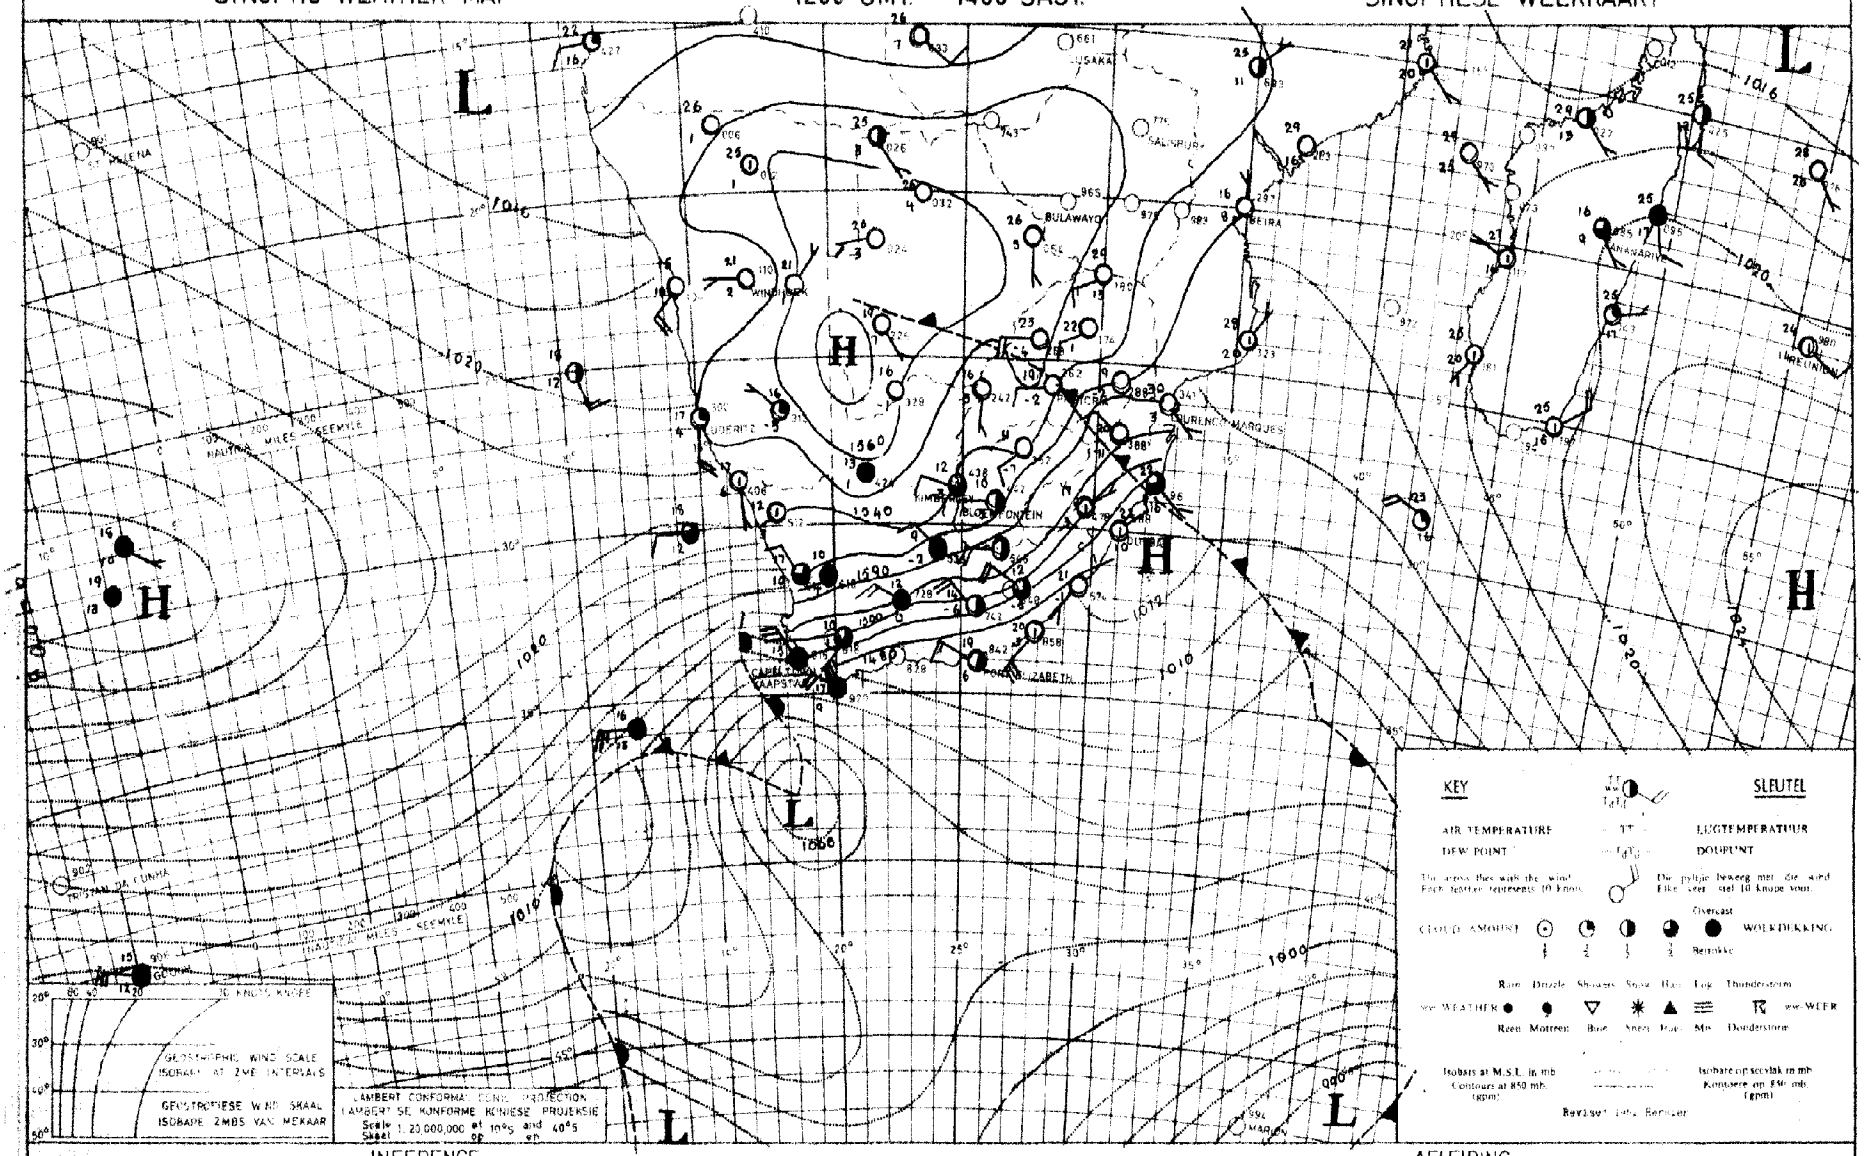
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 30-6-1966 DATUM AFLEIDING

Due to the trough west of Cape Town it will remain cloudy and cool over the South-Western Cape with showers. With fairly dry air present over the remaining regions it will be fair to partly cloudy and cool.

As gevolg van die trog wes van kaapland sal dit bewolk en koel bly oor Suidwes-Kaapland met buie. Met taamlike droë lug oor die res van die land sal dit mooiweer of gedeeltelik bewolk en koel wees.
