Warm and fairly moist air is present over the northern and north-eastern interior and consequently isolated thundershowers will occur over these regions. The coastal low along the south-east coast will move north-eastwards, followed by cooler, cloudy conditions over Eastern Cape and Natal coasts.

Warm en betreklik vogtige lug is aanwesig oor die noordelike en noordoostelike binneland en gevolglik sal enkele donderbuie oor hierdie dele uitsak. Die kuslaag langs die suidoostkus sal noordoswaarts beweeg gevolg deur koeler, bewolkte weer oor die Oos-Kaapse en Natalse kusstrooke.

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

INFERENCE

DATE 2 - 1 - 19 69 DATUM

AFLEIDING

The coastal low is moving slowly along the coast while a cold front is passing to the south. As a result cloudy conditions will persist along the south and south-west coasts of the country and rain will occur at places along the south coast. With the trough over the interior, and moist air present, isolated thundershowers can be expected over Transvaal, Free State and northern parts of the Cape.

Die kuslaag beweeg stadig langs die kus terwyl daar ook 'n koue-front suid van die land verbygaan. Bewolkte weer sal dus oor die suid-en suidweskusstreek voortduur en reën sal op plekke langs die suidkus voorkom. Met die trog oor die binneland en vogtige lug teenwoordig sal los donderbuie oor Transvaal, Vrystaat, en die noordelike dele van Kaapland voorkom.

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

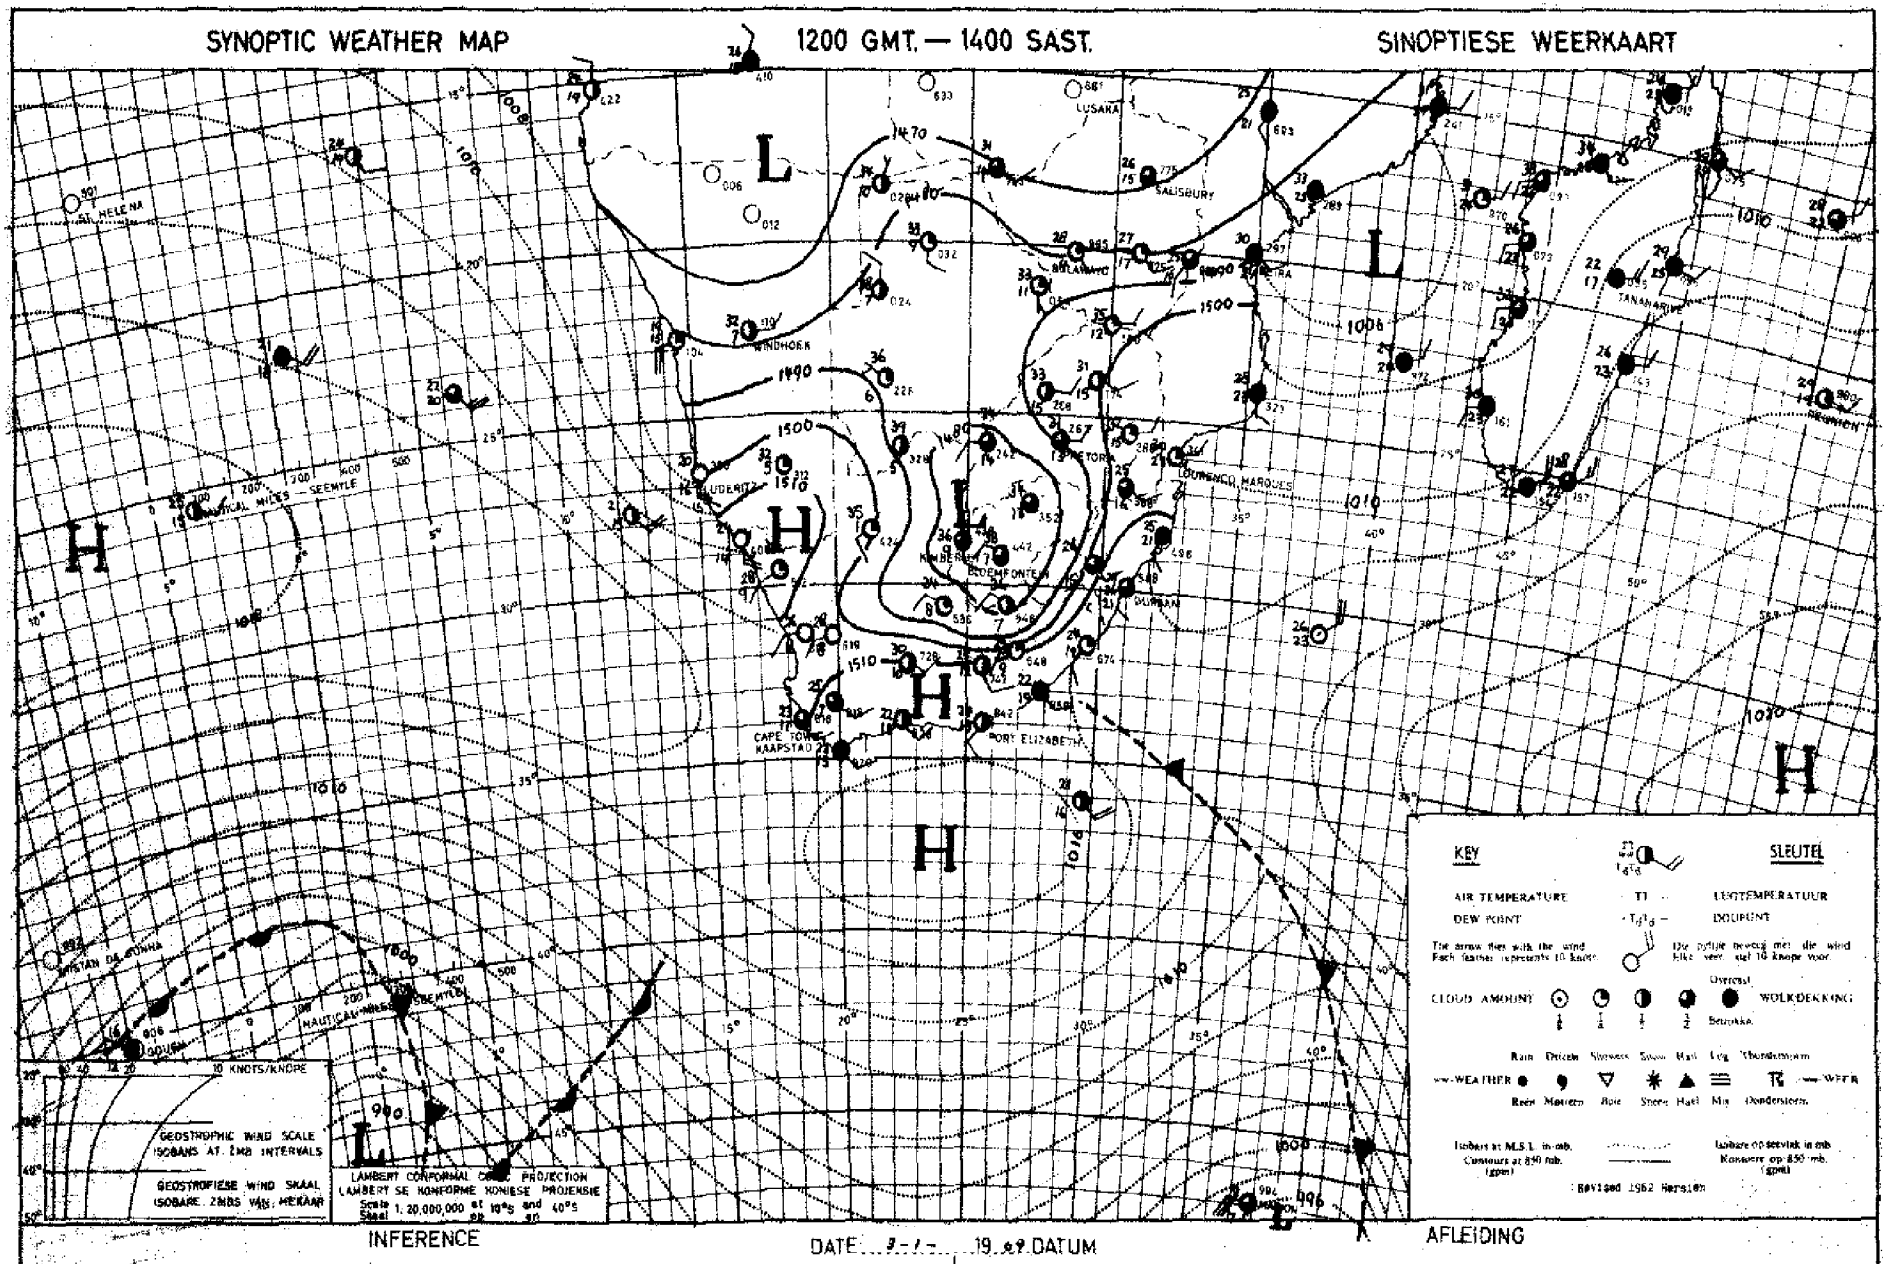
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE

DATE 3-1-19.62 DATUM

With low pressure over the central interior and high pressure south of the continent, somewhat cooler conditions and isolated showers will occur over the eastern and north-eastern interior. The trough over northern S.W.A. will cause isolated showers over this area.

AFLEIDING

Met die laedruk oor die sentrale binneland en hoëdruk suid van die vasteland sal effens koeler toestande en los buie oor die oostelike en noordoostelike binneland voorkom. Die trog oor noordelike S.W.A. sal los buie oor dié deel veroorsaak.

DAAGLIKSE WEER

The upper circulation over the Republic is strongly anticyclonic and it will be fine to slightly cloudy and warm with only a few thundershowers over the northern and eastern areas. The approaching cold front will cause cloudy weather to spread over the south-western Cape where light rain may occur.

Die bolugsirkulasie oor die Republiek is sterk antisiklonaal en dit sal mooiweer tot net effens bewolk en warm wees oor meeste dele met slegs enkele donderbuie oor die noordelike en oostelike dele. Die naderende koufront sal weer bewolkte toestande met moontlike reën oor Suidwes-Kaapland veroorsaak.

INFERENCE

DATE 6 - 1 - 19 69 DATUM

AFLEIDING

The high over the Atlantic ocean will ridge in south of the continent and, with the trough over the central interior, thundershowers will occur over most areas. It will also be cloudy and cool with rain and showers over the southern and eastern coastal regions.

Die hoog oor die Atlantiese oseaan sal suid van die land inwig en met die trog oor die sentrale binneland kan donderbuie oor meeste gebiede verwag word. Dit sal ook bewolk wees langs die suid- en ooskuskstreek met reën en buie.

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op 8 - 1 - 1969 in mm for the 24 hours ended at 0800 SAST on

With moist air over the interior and the low over Northern Cape, thundershowers will occur over most inland areas except the western Cape interior. The cloudy weather over Natal and Eastern Cape will clear as the high south of the country moves away.

Met vogtige lug oor die binneland en die laag oor Noord-Kaapland word donderbuie verwag oor die meeste dele van die binneland, uitgesonderd die westelike Kaapse binneland. Die bewolkte weer oor Natal en Oos-Kaapland sal geleidelik opklaar namate die hoog suid van die land wegbeweeg

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

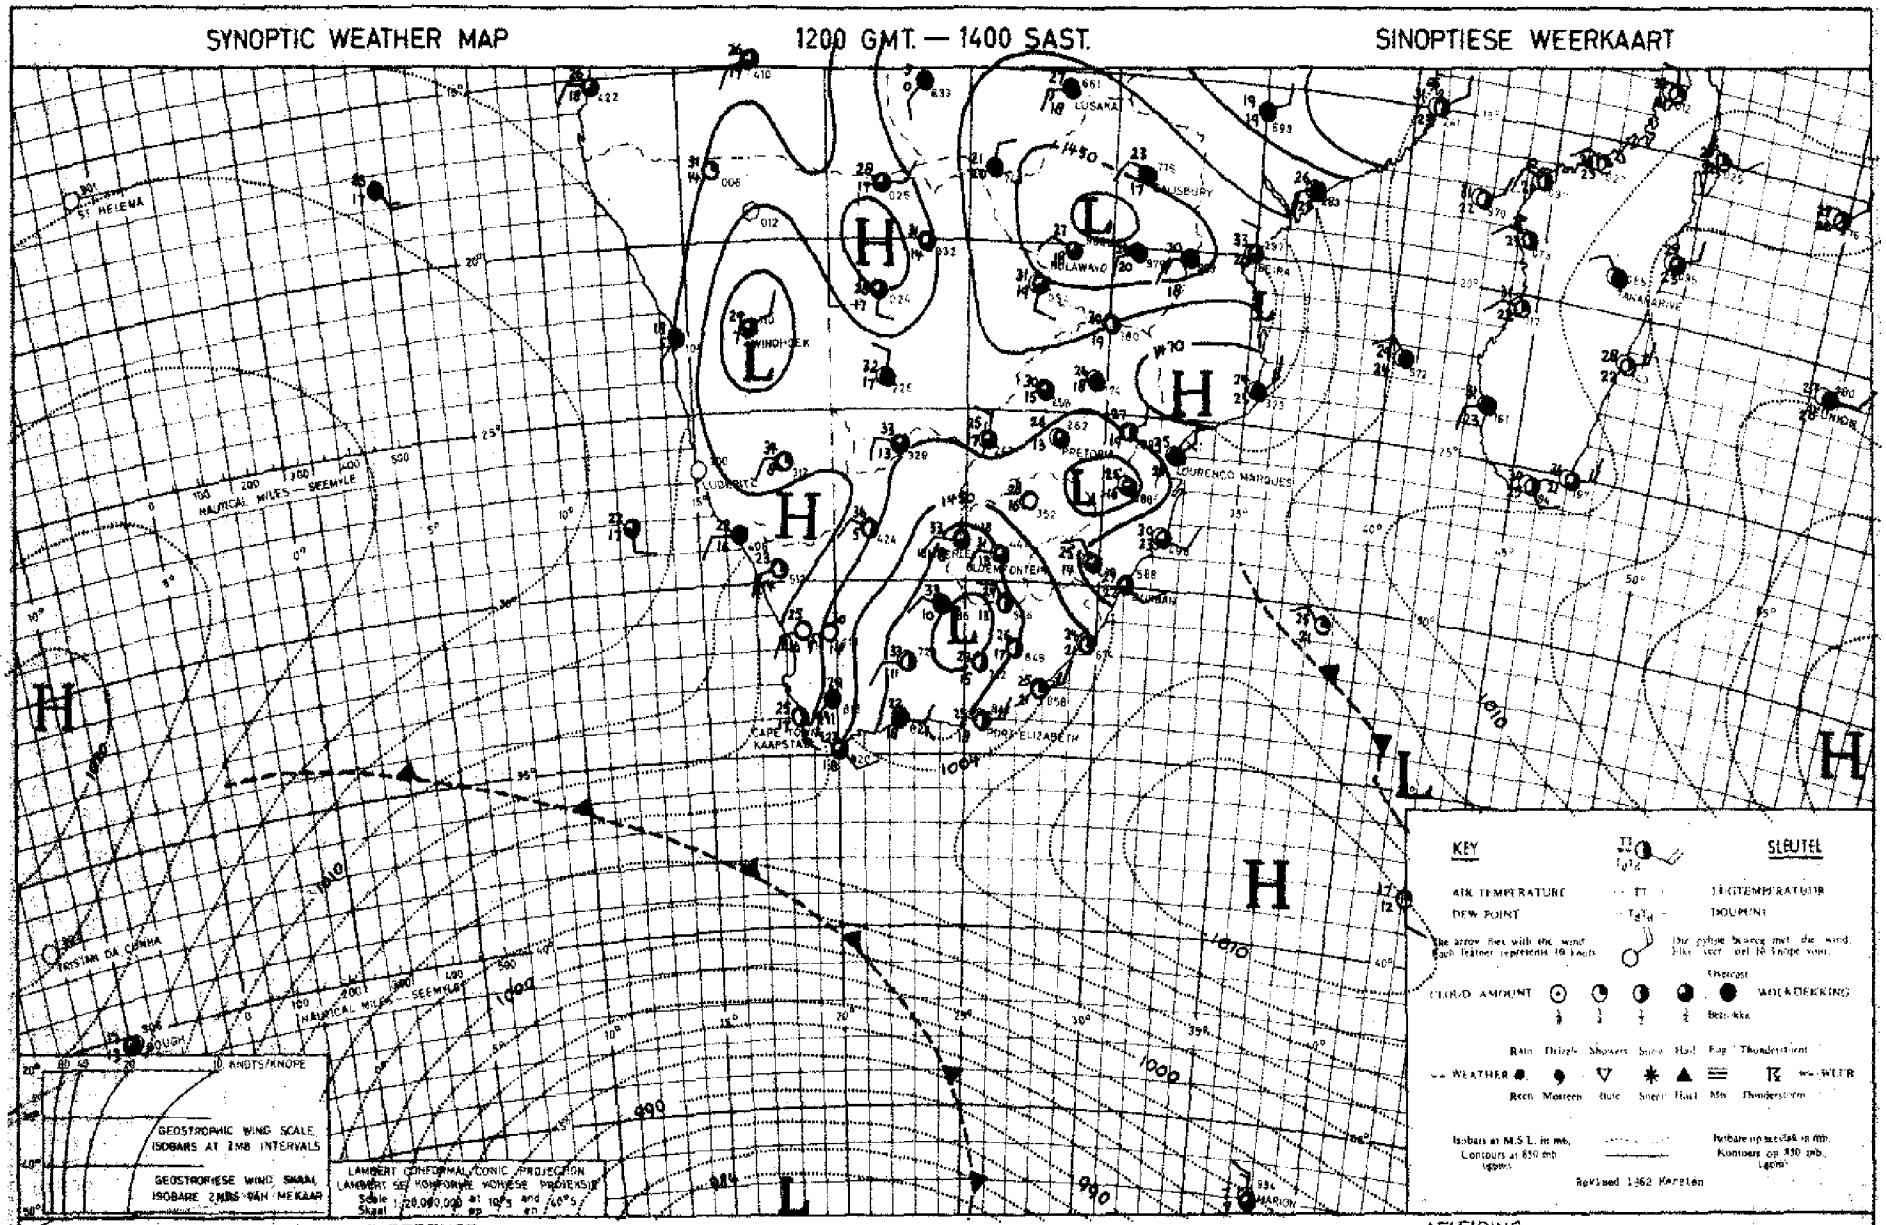
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 8-10-69 DATUM AFLEIDING

The coastal low on the south coast will move to the Natal coast with cloudy, cooler weather and showers later. The trough over the interior will also move eastwards and the weather will be mainly fine and warm except for Transvaal, eastern O.F.S., Natal, northern and eastern Botswana and northern S.W.A. where scattered thundershowers will occur. The cold front will bring cooler, cloudy weather to the south-western Cape coast.

Die kuslaag op die suidkus sal na die Natalkus beweeg met bewolkte, koeler weer en buie later. Die trog oor die binneland sal ook ooswaarts beweeg en dit sal hoofsaaklik mooiweer en warm wees behalwe oor Transvaal, oostelike O.V.S., Natal, die noordelike en oostelike dele van Botswana en noordelike S.W.A. waar verspreide donderstorms sal voorkom. Die koue front sal koeler, bewolkte weer oor die Kaapse suidwestkus aanbring.

DATE 9 - 1 - 19 69 DATUM

AFLEIDING

The high ridging in over the interior from the west is bringing in dry air and therefore thundershowers will occur only over northern and eastern Transvaal and northern Botswana. Cool, cloudy weather with light rain will spread over the southern and eastern coastal regions.

Die hoog wat oor die land indruk van die weste af voer droë lug oor die land in sodat donderbuie slegs nog oor die noordelike en oostelike dele van Transvaal en noordelike Botswana sal uitsak. Koel, bewolkte weer met ligte reën sal egter oor die suidelike en oostelike kusstreke voorkom.

INFERENCE

DATE 10 — 1 — 19 69 DATUM

AFLEIDING

The cold front approaching the Cape will cause cloudy weather with rain over the south-western Cape. Dry air is flowing in over the interior from the west and isolated showers will occur only over Northern and Eastern Transvaal and Eastern Botswana.

Die koufront wat die Kaap nader, sal bewolkte weer met reën oor Suidwes-Kaapland veroorsaak. Oor die binneland stroom droë lug van die weste af in en enkele donderbuie sal slegs nog oor Noord- en Oos-Transvaal en oostelike Bots wana voorkom.

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

INFERENCE

DATE 11-1-1969 DATUM

AFLEIDING

The low at Marion and the associated trough will cause cloudy weather with light rain over the south-western and southern coastal regions. Dry air has, however, spread over the interior except for the extreme northern Transvaal where isolated thundershowers are still possible.

Die laag by Marion en gepaardgaande trog sal bewolkte weer met ligte reën veroorsaak oor die suidwestelike en suidelike kusgebiede. Droë lug het egter oor die binneland inbeweeg behalwe oor die verre noordelike dele van Transvaal waar enkele donderbuie nog sal voorkom.

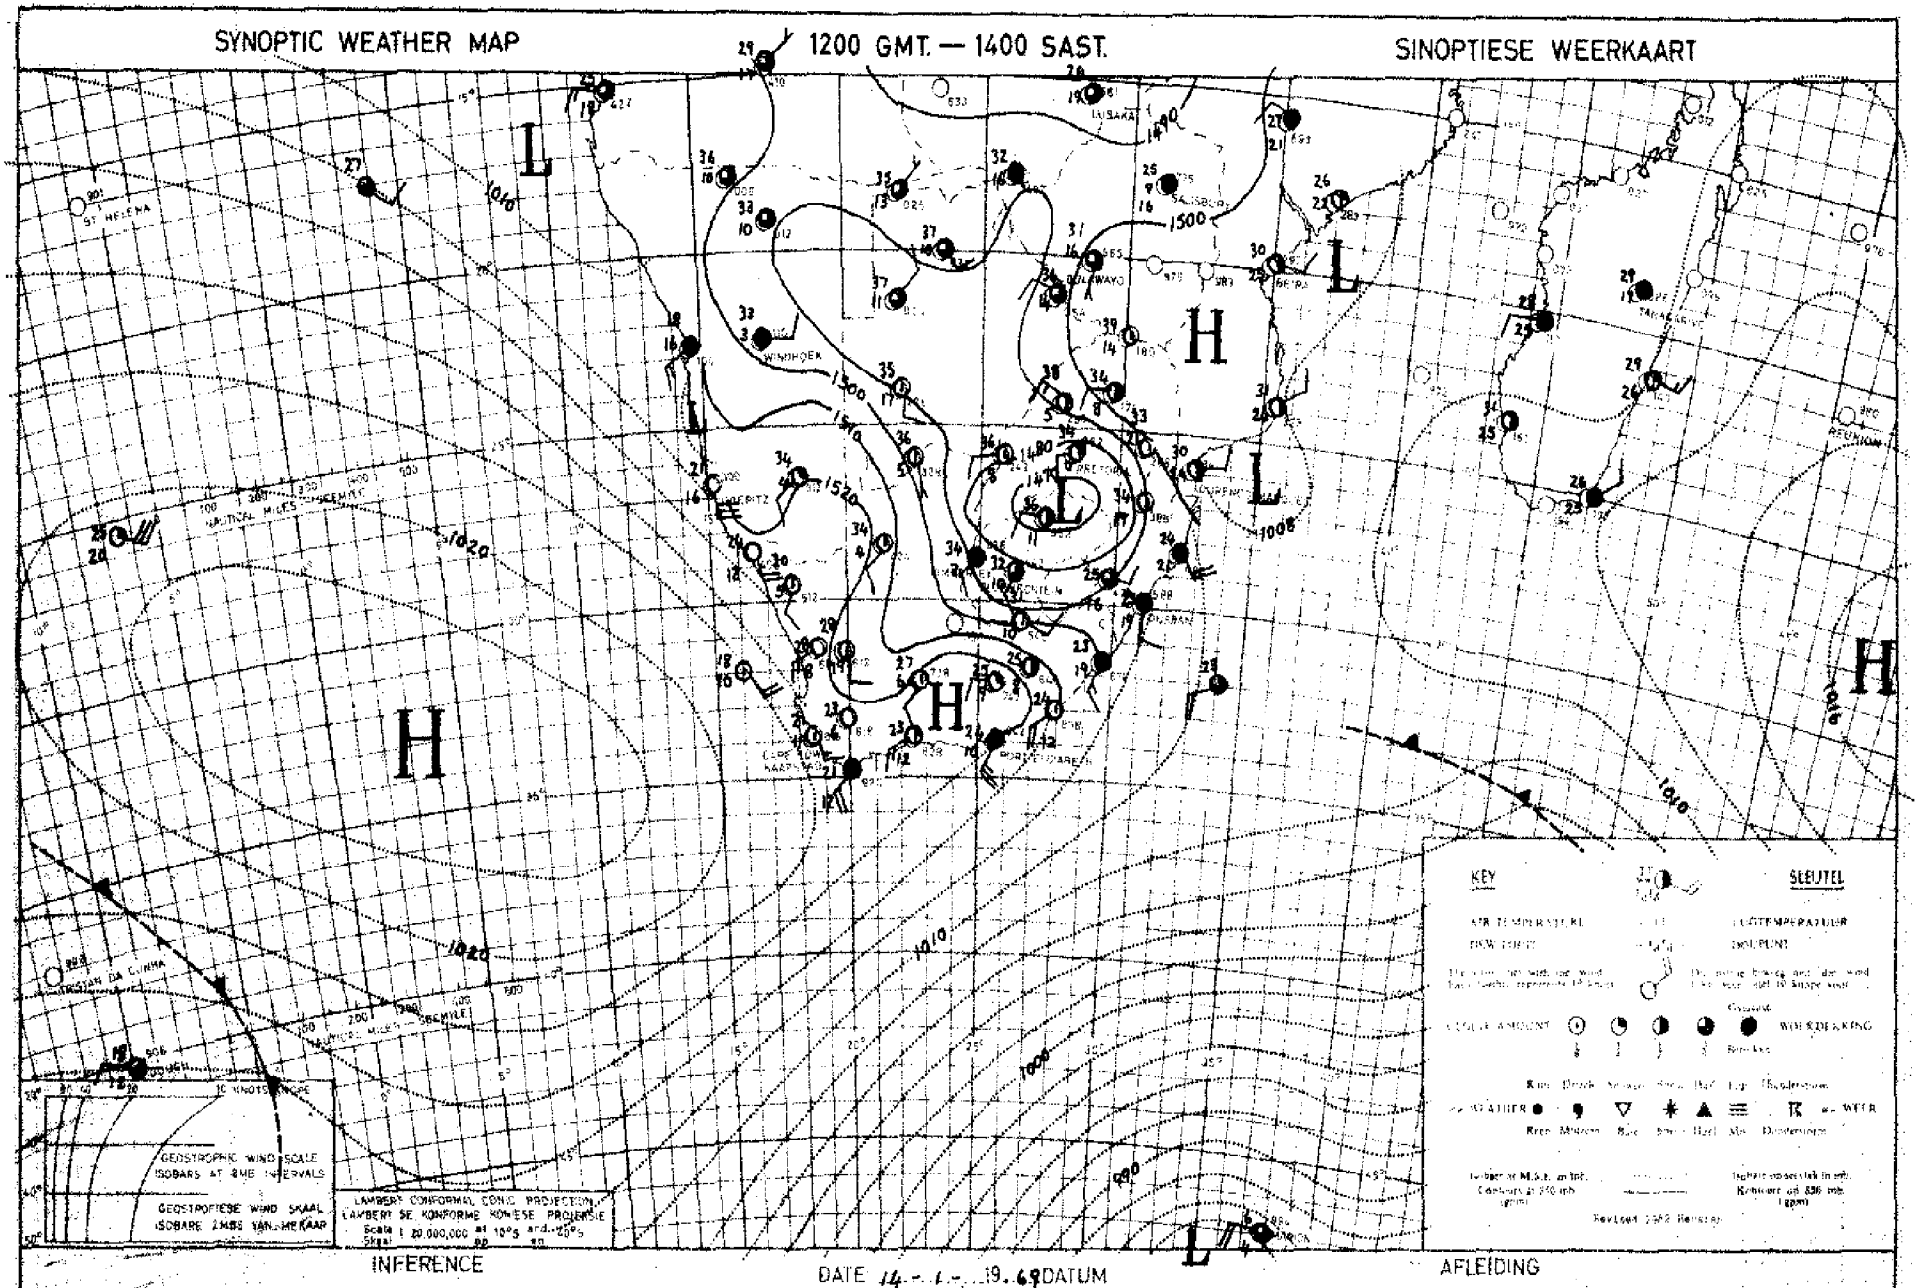
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 14-1-69 DATUM AFLEIDING

The ridge of high pressure moving in south of the country causes cloudy weather with light rain over Natal and it will spread to Eastern Transvaal also. Moister air will advance over the rest of Transvaal so that isolated thundershowers will occur there. Further showers will also fall over northern S.W.A. and Botswana.

Die rug van hoë druk wat suid van die land inbeweeg, veroorsaak bewolkte weer met ligte reëns oor Natal en dit sal ook uitbrei na Oos-Transvaal. Vogtiger lug sal ook oor die res van Transvaal instroom sodat los donderbuie daar sal voorkom. Oor noordelike S.W.A. en Botswana sal ook nog

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

INFERENCE

DATE 18 / 1 / 19 69 DATUM

AFLEIDING

Moist air has moved in over the eastern half of the Republic while there is a low situated over the Free State and therefore scattered thundershowers will occur over Transvaal, O.F.S. and Natal. Further showers will occur also over northern S.W.A. and Botswana. An approaching cold front will bring cloudy weather over the south-west coast.

Vogtige lug het oor die oostelike helfte van die Republiek inbeweeg terwyl daar 'n laag oor die Vrystaat gelee is en dus word verspreide donderbuie verwag oor Transvaal, O.V.S. en Natal. Verdere donderbuie sal voorkom oor noordelike S.W.A en Botswana. 'n Naderende swak koufront sal weer bewolkte weer oor die suidweskus veroorsaak.

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

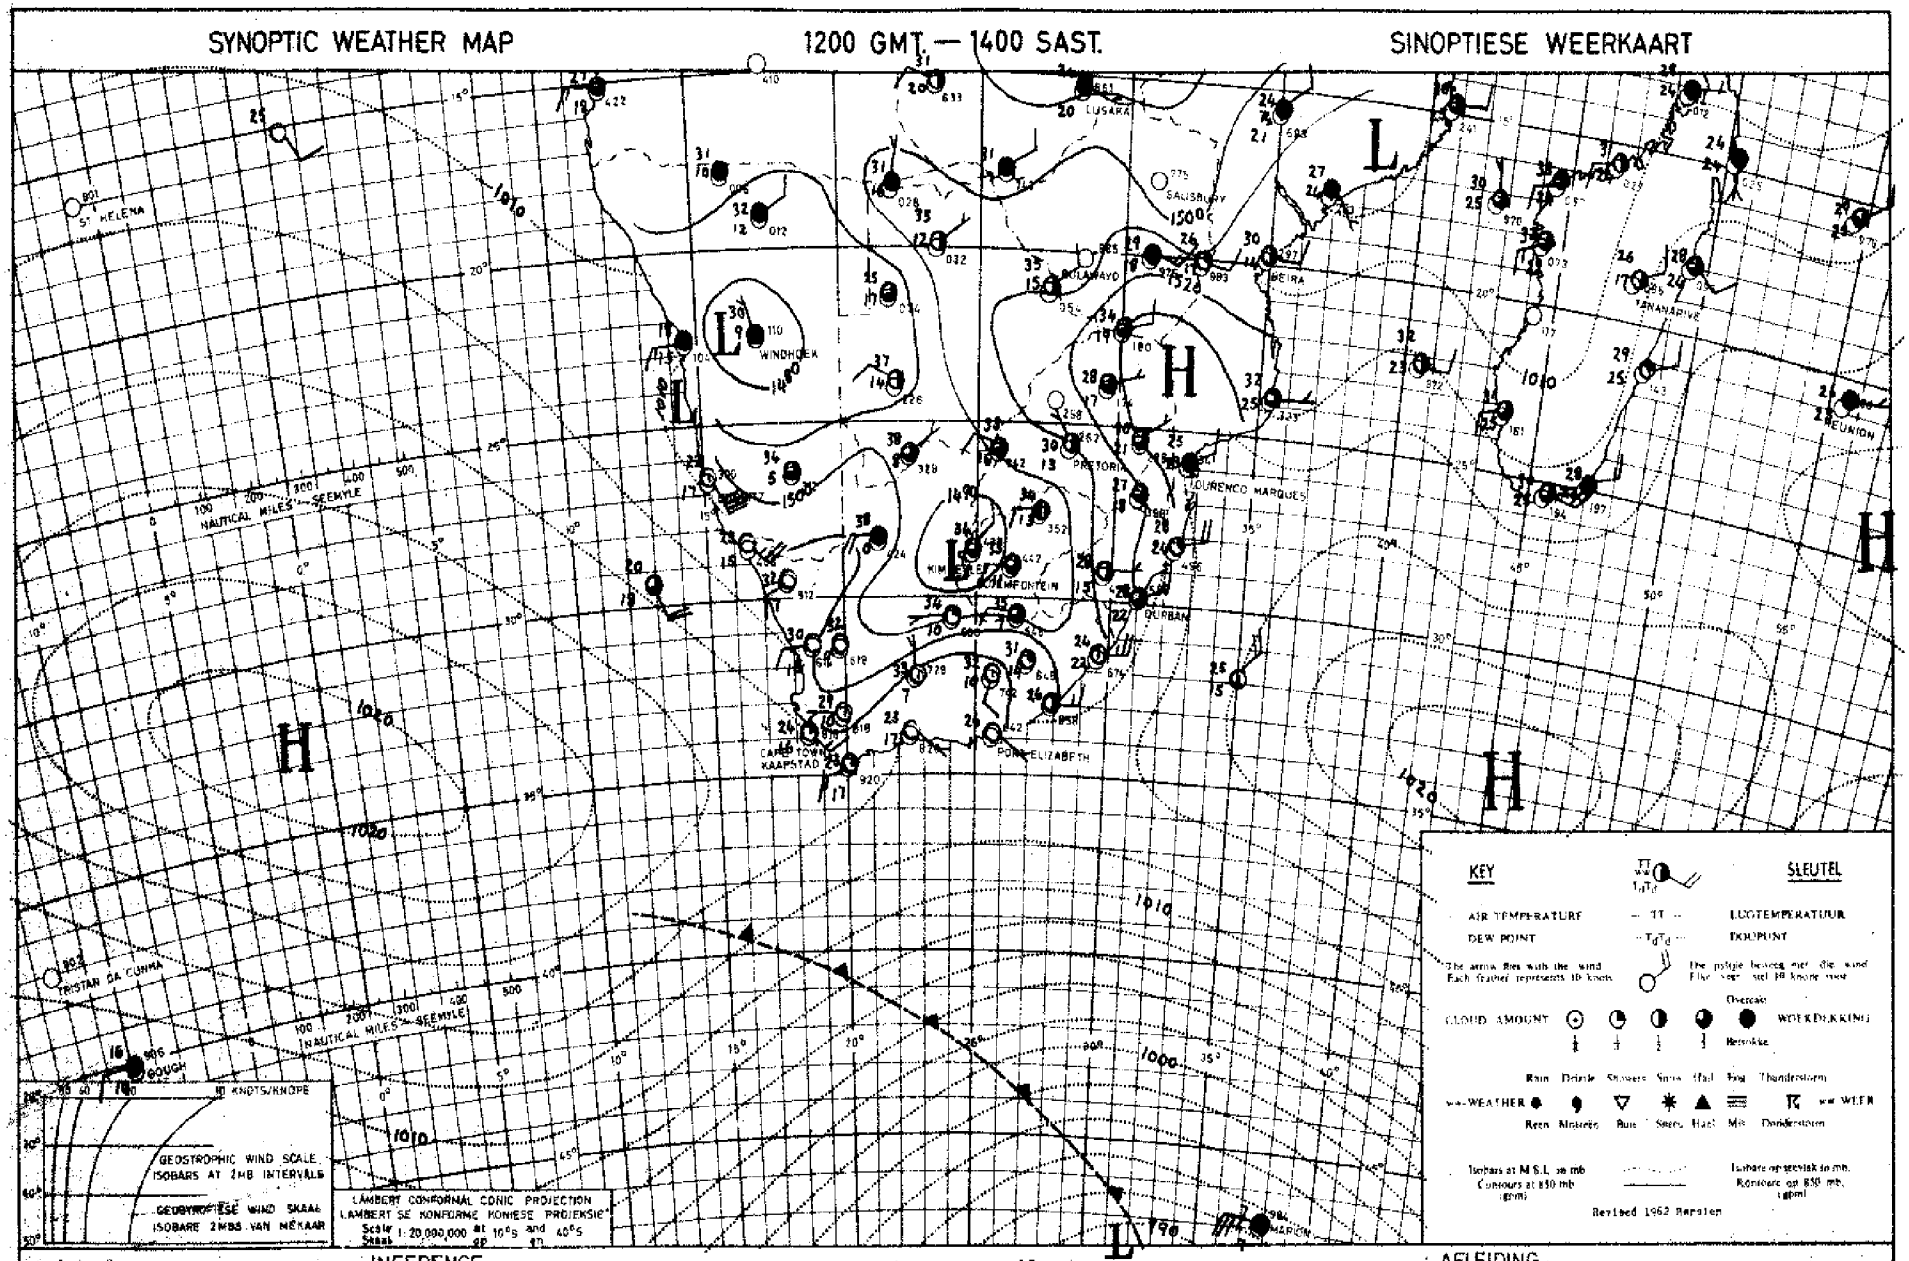
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 16 - 1 - 19 69 DATUM AFLEIDING

With the trough over the interior scattered thundershowers are expected over the northern and north-eastern parts of the country. The weather over the coastal areas and over the rest of the interior will be mainly fine or partly cloudy.

Met die trog ver oor die binneland word verspreide donderbuie oor die noordelike en noordoostelike dele van die land verwag. Die weer oor die kusgebiede en oor die res van die land sal hoofsaaklik mooiweer of gedeeltelik bewolk wees.

With the trough of low pressure over the interior, and fairly moist air present over the eastern and northern regions, scattered thundershowers will occur over the latter areas. Over the east coast it will be cloudy in the morning with light rain.

Met die trog van lae lugdruk oor die binneland en taamlik vogtige lug aanwesig oor die noordelike en oostelike dele sal verspreide donderbuie oor laasgenoemde streke voorkom. Oor die oskus sal dit in die oggend bewolk wees met ligte reën.

INFERENCE

DATE 18 - 1 - 1969 DATUM

AFLEIDING

With the trough over the interior and moist air present thundershowers can be expected over the northern and eastern parts of the country. The ridge south of the country will cause partly cloudy conditions along the south and south-eastern Cape coastal regions.

Met die vogtige lug aanwesig en die trog oor die binneland kan donderbuie oor die noordelike en oostelike dele verwag word. Die hoog wat oor die suidkus inwig, sal gedeeltelik bewolkte toestande tot gevolg hê langs die Kaapse suid-en suidooskus.

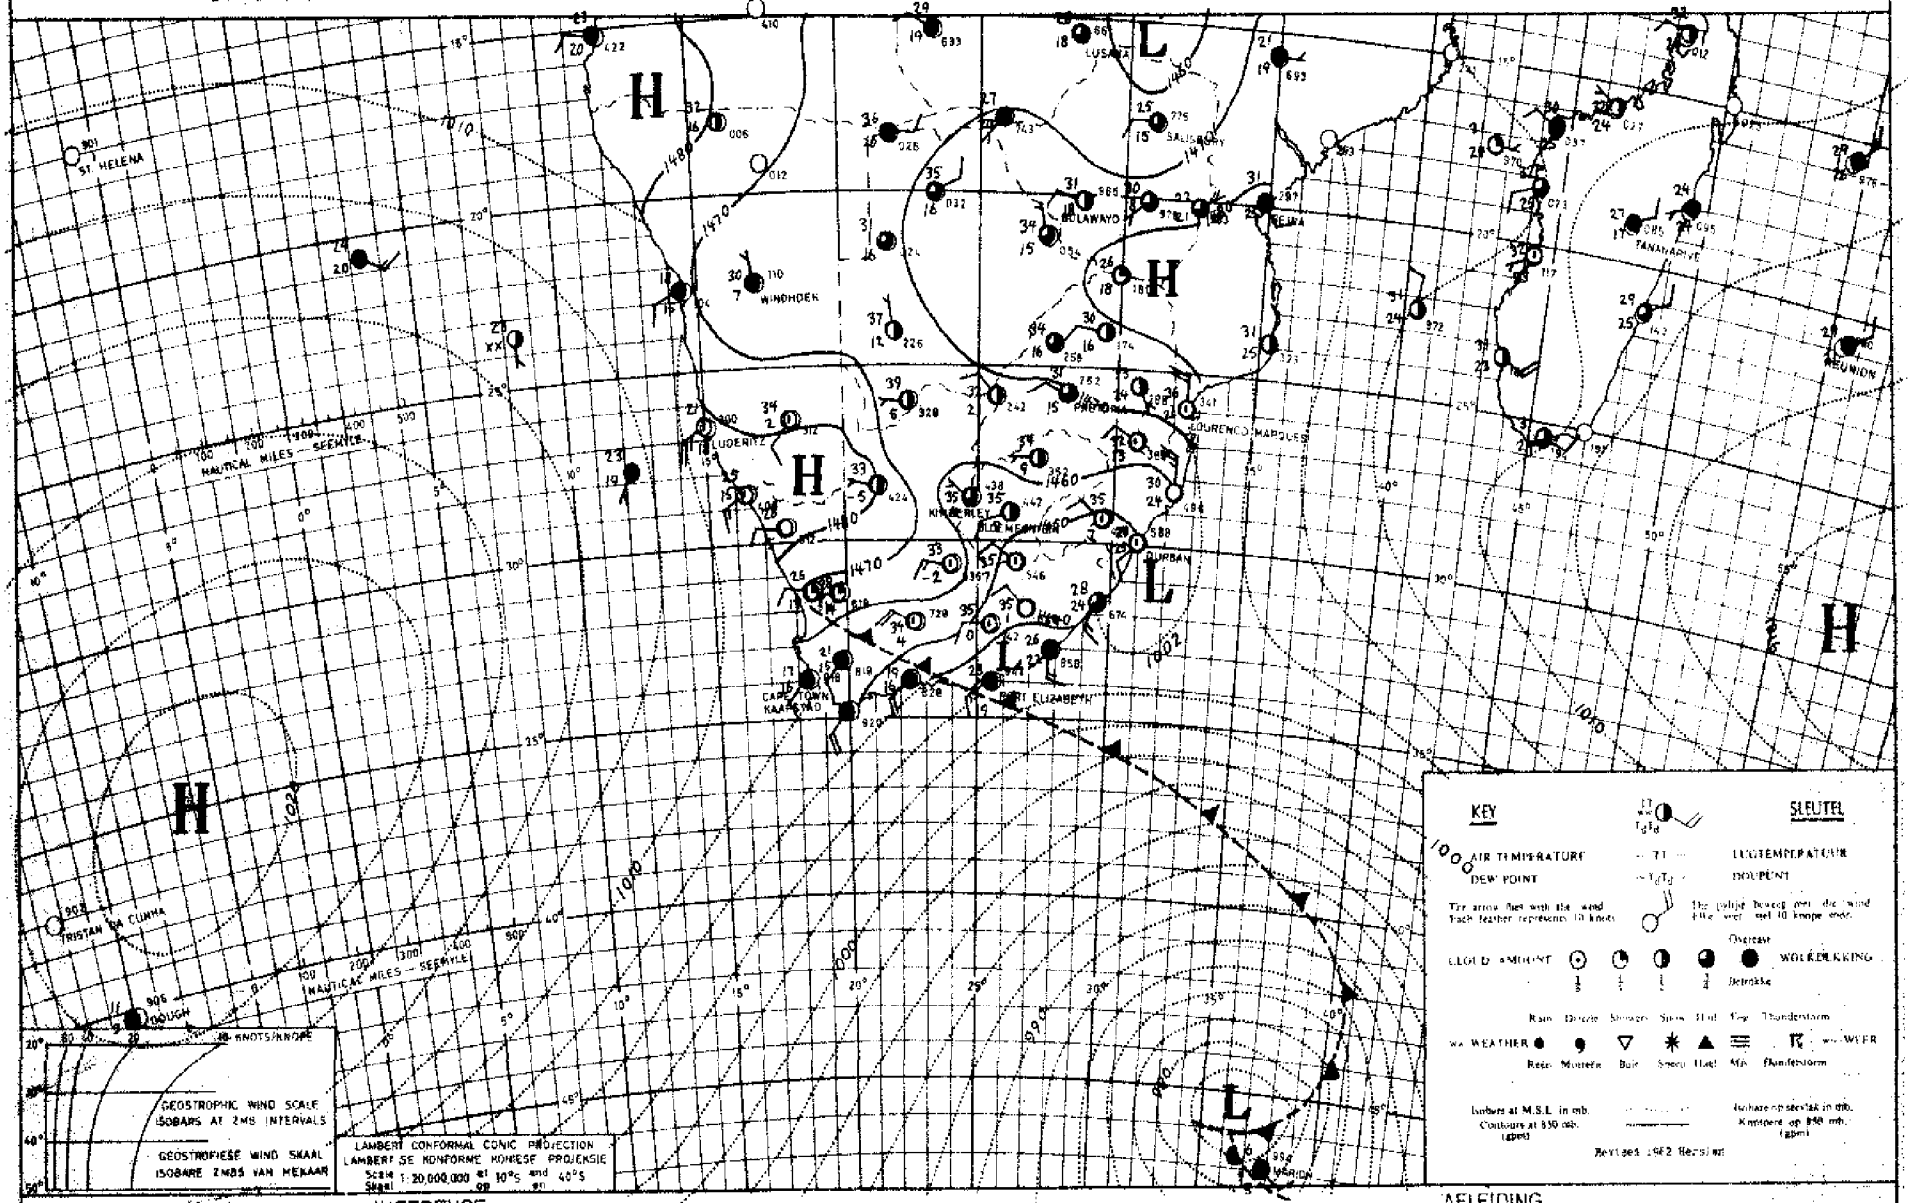
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 20 - 1 - 69 DATUM AFLEIDING

The cold front will cause cloudy cool weather with rain and showers over southern Cape and these conditions will spread to the Eastern Cape and Natal later. With moist air in circulation, thundershowers will occur over the northern parts of the country.

Die koufront sal bewolkte koel weer met reën en buie oor Suid-Kaapland veroorsaak wat later na Oos-Kaapland en Natal sal uitbrei. Met vogtige lug in sirkulasie sal donderbuie oor die noordelike dele van die land voorkom.

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

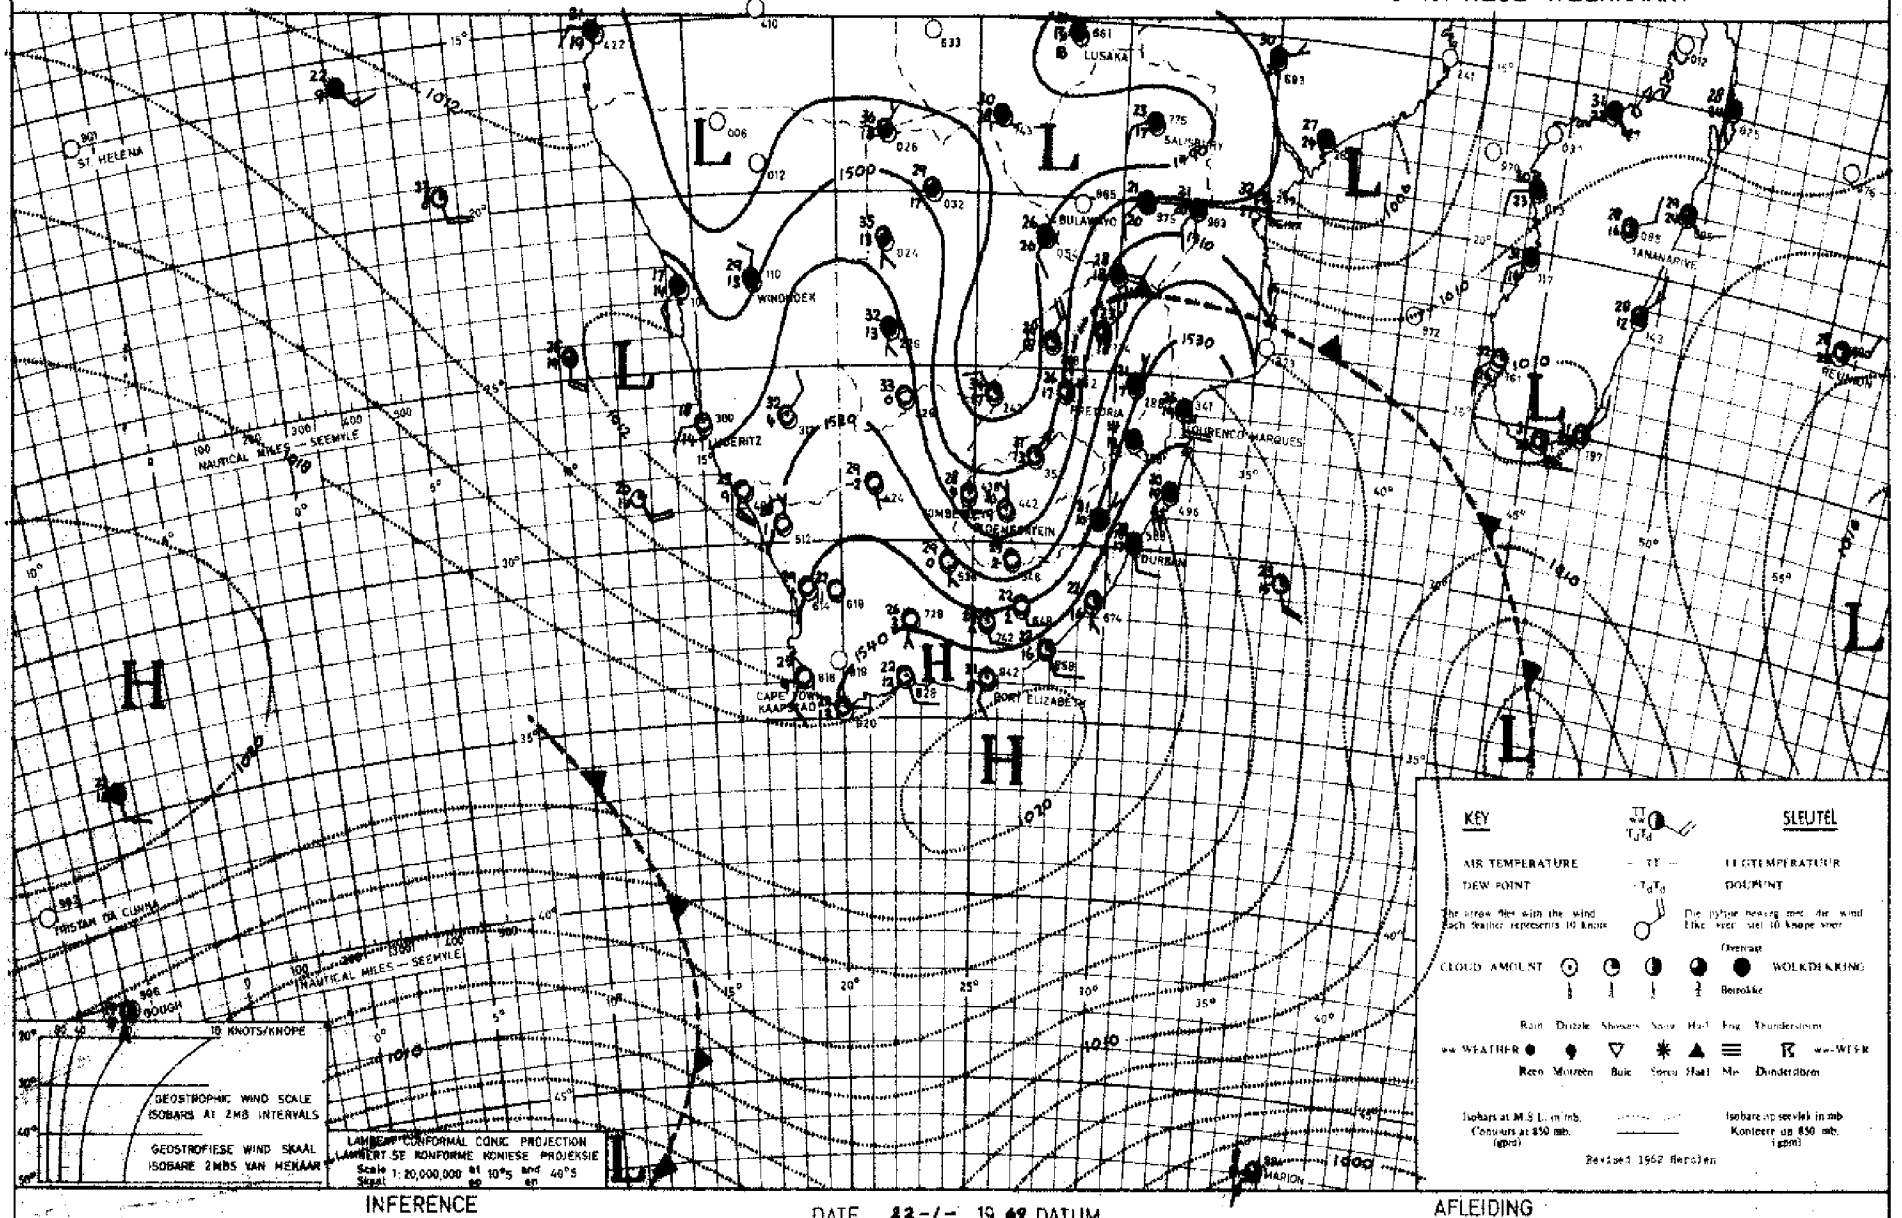
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 12-1-69 DATUM AFLEIDING

The high south of the country feeds in cool, moist air over Transvaal and Natal where light rain will occur. The trough over Western Transvaal will lead to thundershowers over that area as well as Northern Cape and eastern Botswana. Another trough over northern S.W.A. will cause thundershowers over that area.

Die hoog suid van die land voer koel, vogtige lug in oor Transvaal en Natal, waar ligte reën sal voorkom. Die trog oor Wes-Transvaal sal donderbuie veroorsaak oor dié gebied asook oor Noord-Kaapland en oostelike Botswana. 'n Ander trog oor noordelike S.W.A. is verantwoordelik vir donderbuie oor dié gebiede.

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

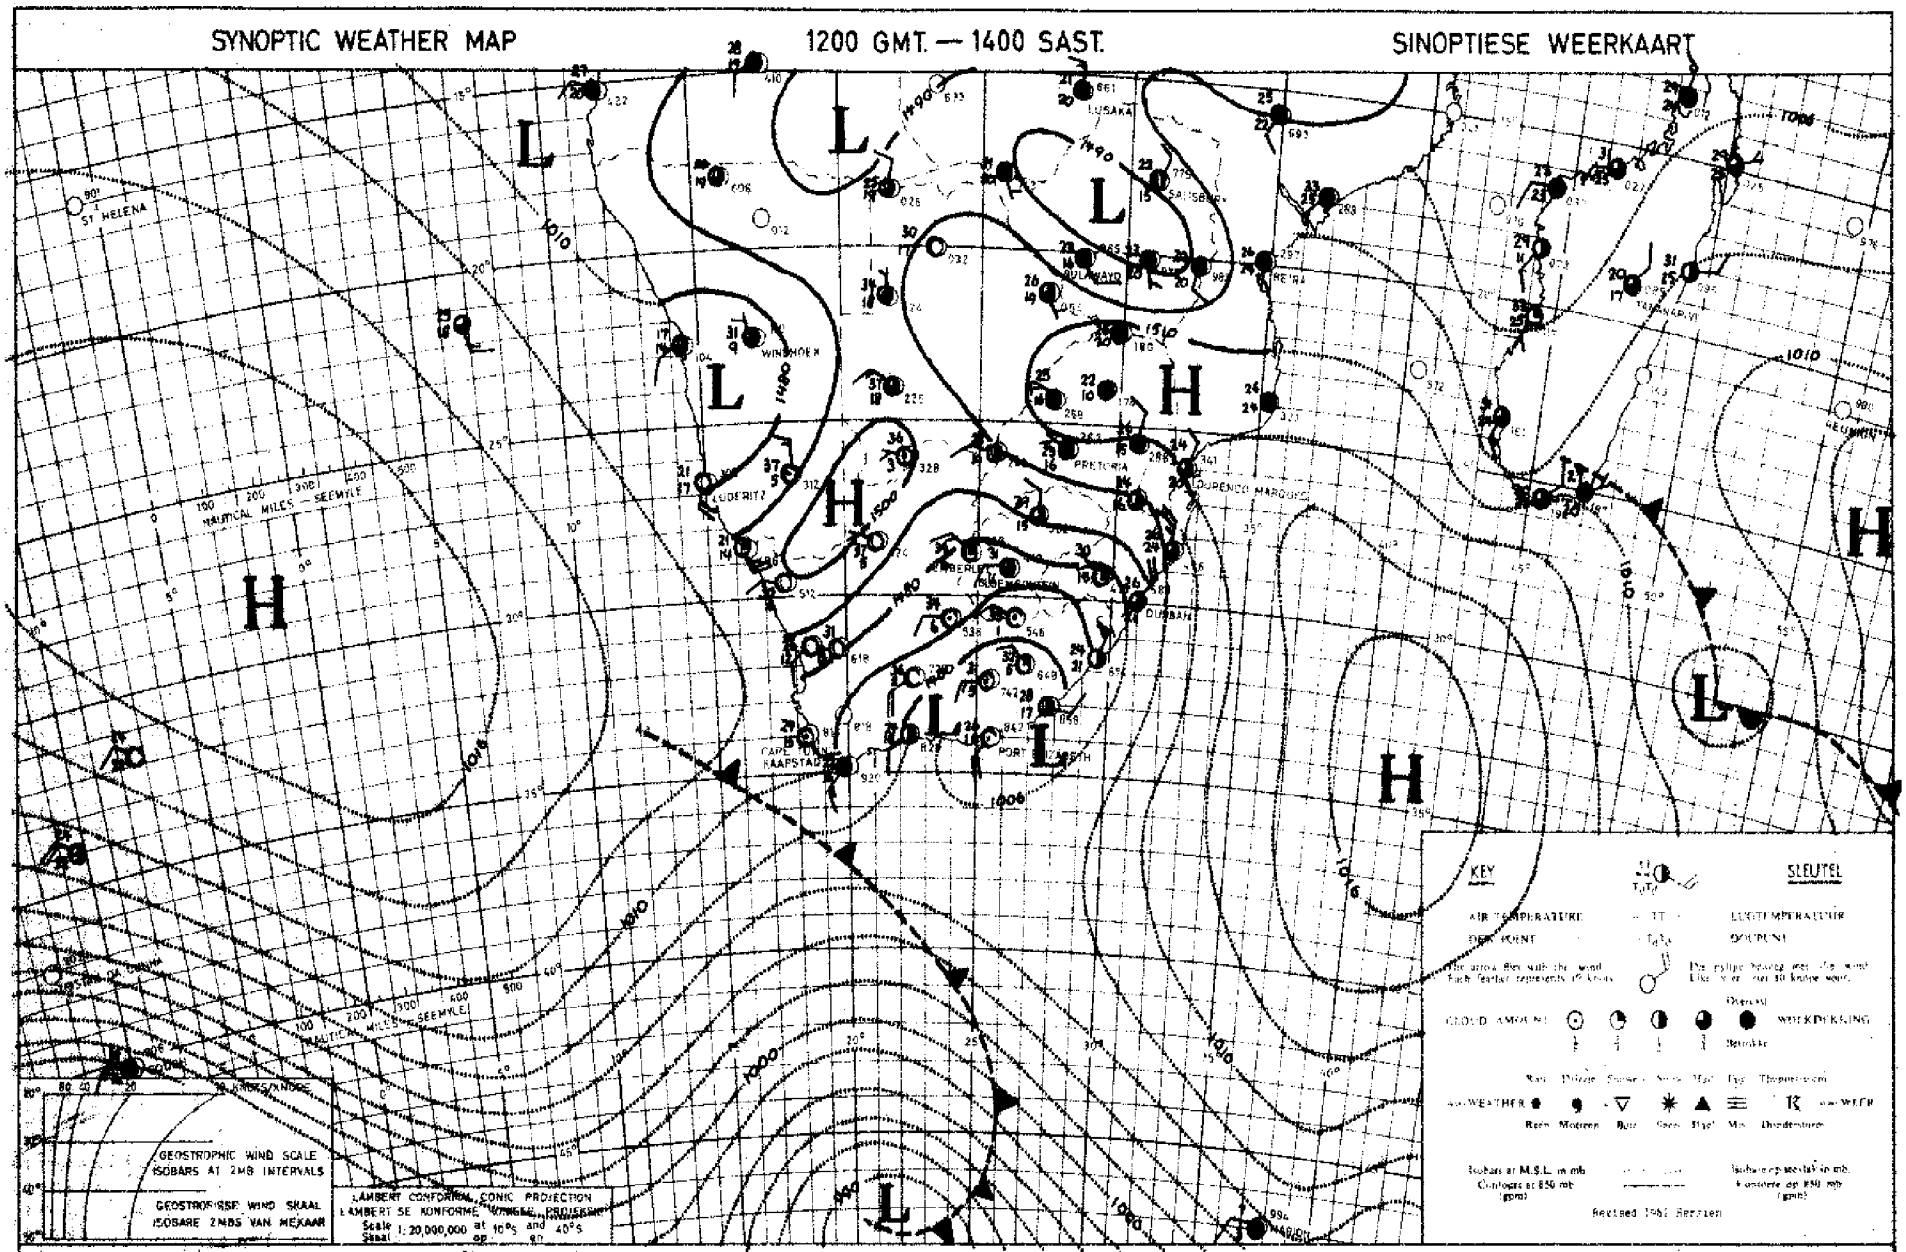
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 23-1-69 DATUM AFLEIDING

The cold front will cause cloudy conditions over the Cape Peninsula and along the South Coast. With dry air in the upper circulation the weather over the eastern parts will clear and only isolated thundershowers are expected over the extreme north-eastern parts.

Die koufront sal bewolkte toestande oor die Kaapse Skiereiland en langs die suidkus veroorsaak. Met droë lug in die bolugsirkulasie, sal die weer oor die oostelike dele opklaar, en slegs los donderbuie word oor die verre noordoostelike dele verwag.

DAAGLIKSE WEERBULLETIN

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

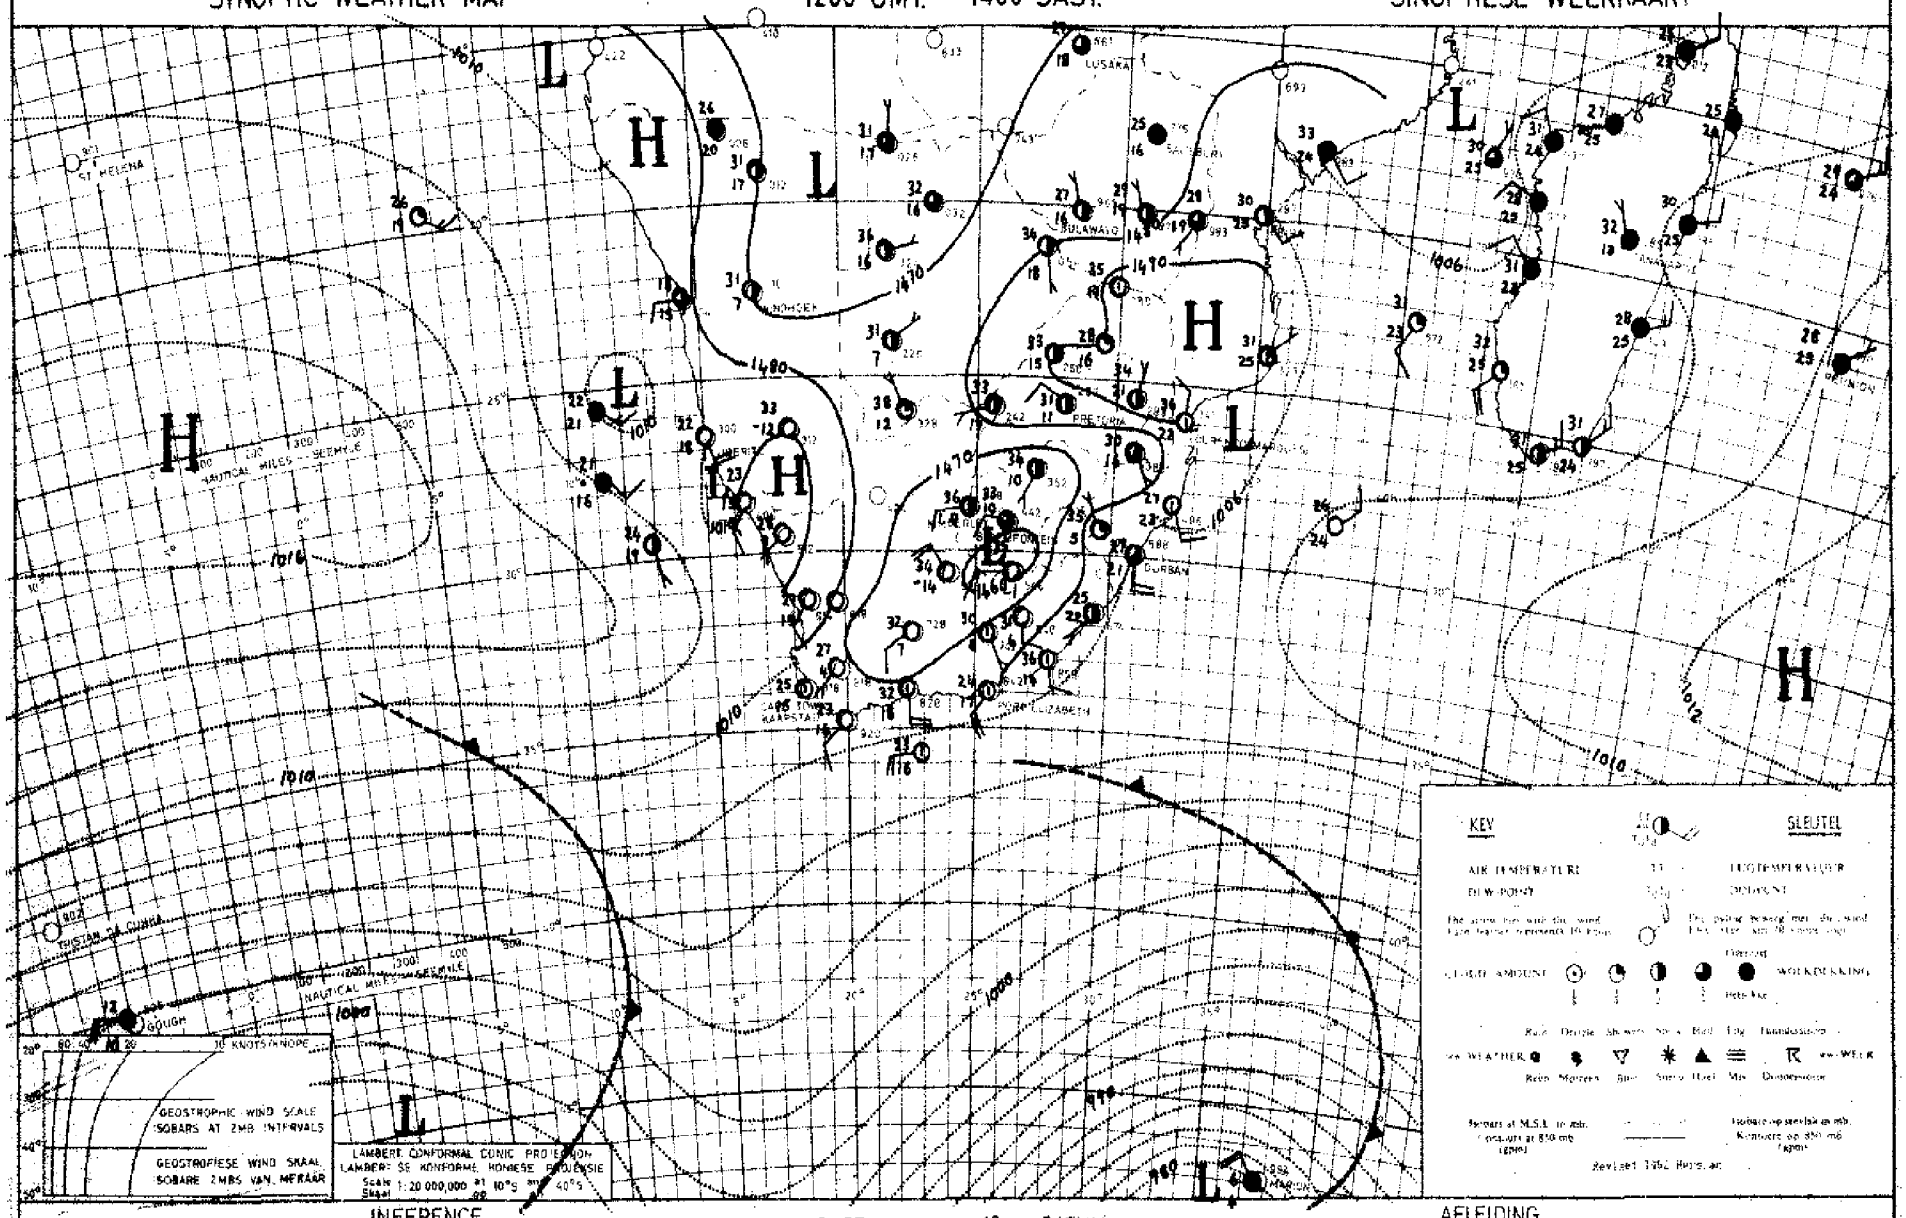
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 24 - 1 - 69 DATUM AFLEIDING

The front approaching from the west will cause cloudy weather with rain over the Cape south-west coast. Warm, moist air is circulating over the eastern and northern areas of the country but the upper circulation is anticyclonic so that only isolated thundershowers will occur.

Die front wat van die weste af nader, sal bewolkte weer met reën oor die Kaapse suidweskus veroorsaak. Warm, vogtige lug sirkuleer oor die noordelike en oostelike dele van die land maar die bolugsirkulasie is antisiklonaal sodat slegs enkele donderbuie sal voorkom.

The cold front will cause cloudy cooler conditions with rain and showers along the south-western and southern Cape coastal areas and these will spread to the south-east coast later. Over the interior conditions are unfavourable for thundershowers except in the North and East where a few showers will develop in the moister air over these parts.

Die koufront sal bewolkte koeler weer met reën en buie langs die Kaapse suidwes- en suidkuskgebied en dié toestande sal later na die suidoostkus uitbrei. Oor die binneland is toestande ongunstig vir donderstorms behalwe in die Noorde en Ooste waar enkele buie sal ontwikkel in die vogtiger lug oor hierdie dele.

INFERENCE

DATE 26-..-..-69 DATUM

AFLEIDING

The cold front and low pressure trough south of the country will cause cool, cloudy weather with light showers to persist over the south-western and southern coasts and to spread later to the east coast. Over the interior it will remain hot and isolated thundershowers will occur over the northern and eastern regions.

Die koufront en laedruktrog suid van die land sal koel, bewolkte weer met ligte buie laat voortduur oor die suidwestelike en suidelike kuste en later laat uitbrei oor die oos-kusgebied. Oor die binneland sal dit baie warm bly en enkele donderbuie sal oor die oostelike en noordelike gebiede voorkom.

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

INFERENCE
DATE 27 - 1 - 19 69 DATUM
AFLEIDING
The air over the northern, eastern and central interior has become appreciably moister and therefore scattered showers and thundershowers are expected over these areas. The cold front approaching from the west will cause cloudy weather with light showers over the south-western Cape.
Die lug oor die noordelike, oostelike en sentrale binneland het heelwat vogtiger geword en dus word verspreide buie en donderbuie oor hierdie dele verwag. Die koufront wat van die weste af nader, sal bewolkte weer met ligte buie oor Suidwes-Kaapland veroorsaak.

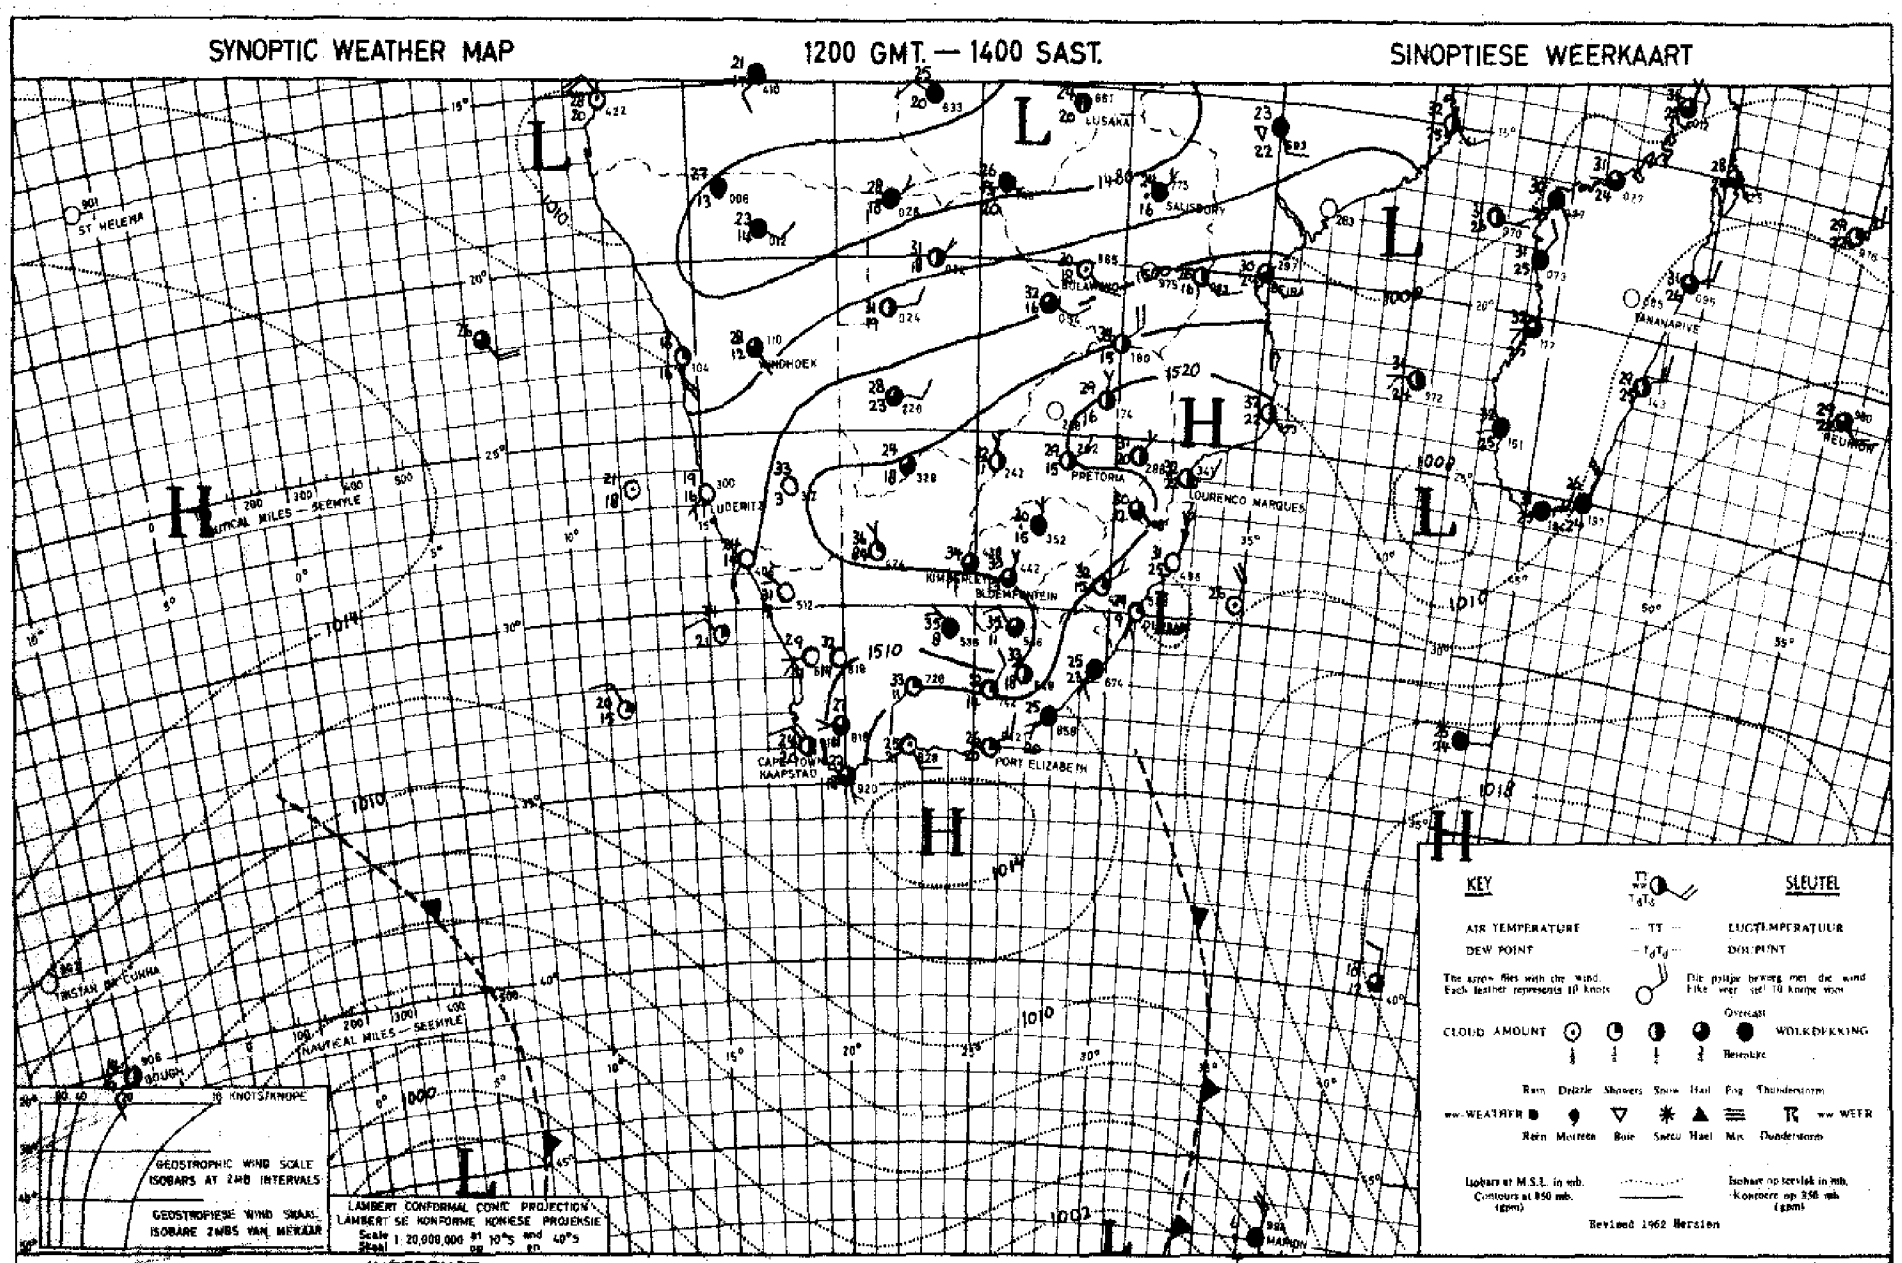
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 29 - 1 - 19 69 DATUM — AFLEIDING

The ridge of high pressure south of the country will cause cloudy weather with light rain over the south-eastern and eastern coasts. Warm, moist air over Botswana and northern S.W.A. will spread over the central Republic and scattered showers will occur over these areas. As a result of the anticyclonic flow over the eastern interior only isolated thundershowers will occur there.

Die rug van hoë druk suid van die land sal bewolkte weer met ligte reën oor die suidooskus en ooskus veroorsaak. Warm, vogtige lug oor Botswana en noordelike S.W.A. beweeg na die sentrale Republiek en verspreide buie sal oor hierdie gebiede uitsak. As gevolg van die antisiklonale sirkulasie oor die oostelike binneland sal net los donderbuie daar voorkom.

MAKSIMUM EN MINIMUM TEMPERATURE (°C) EN REËNVAL (mm)

in mm vir die 24 uur geëindig om 0800 SAST op 31 - 1 - 1969 in mm for the 24 hours ended at 0800 SAST on

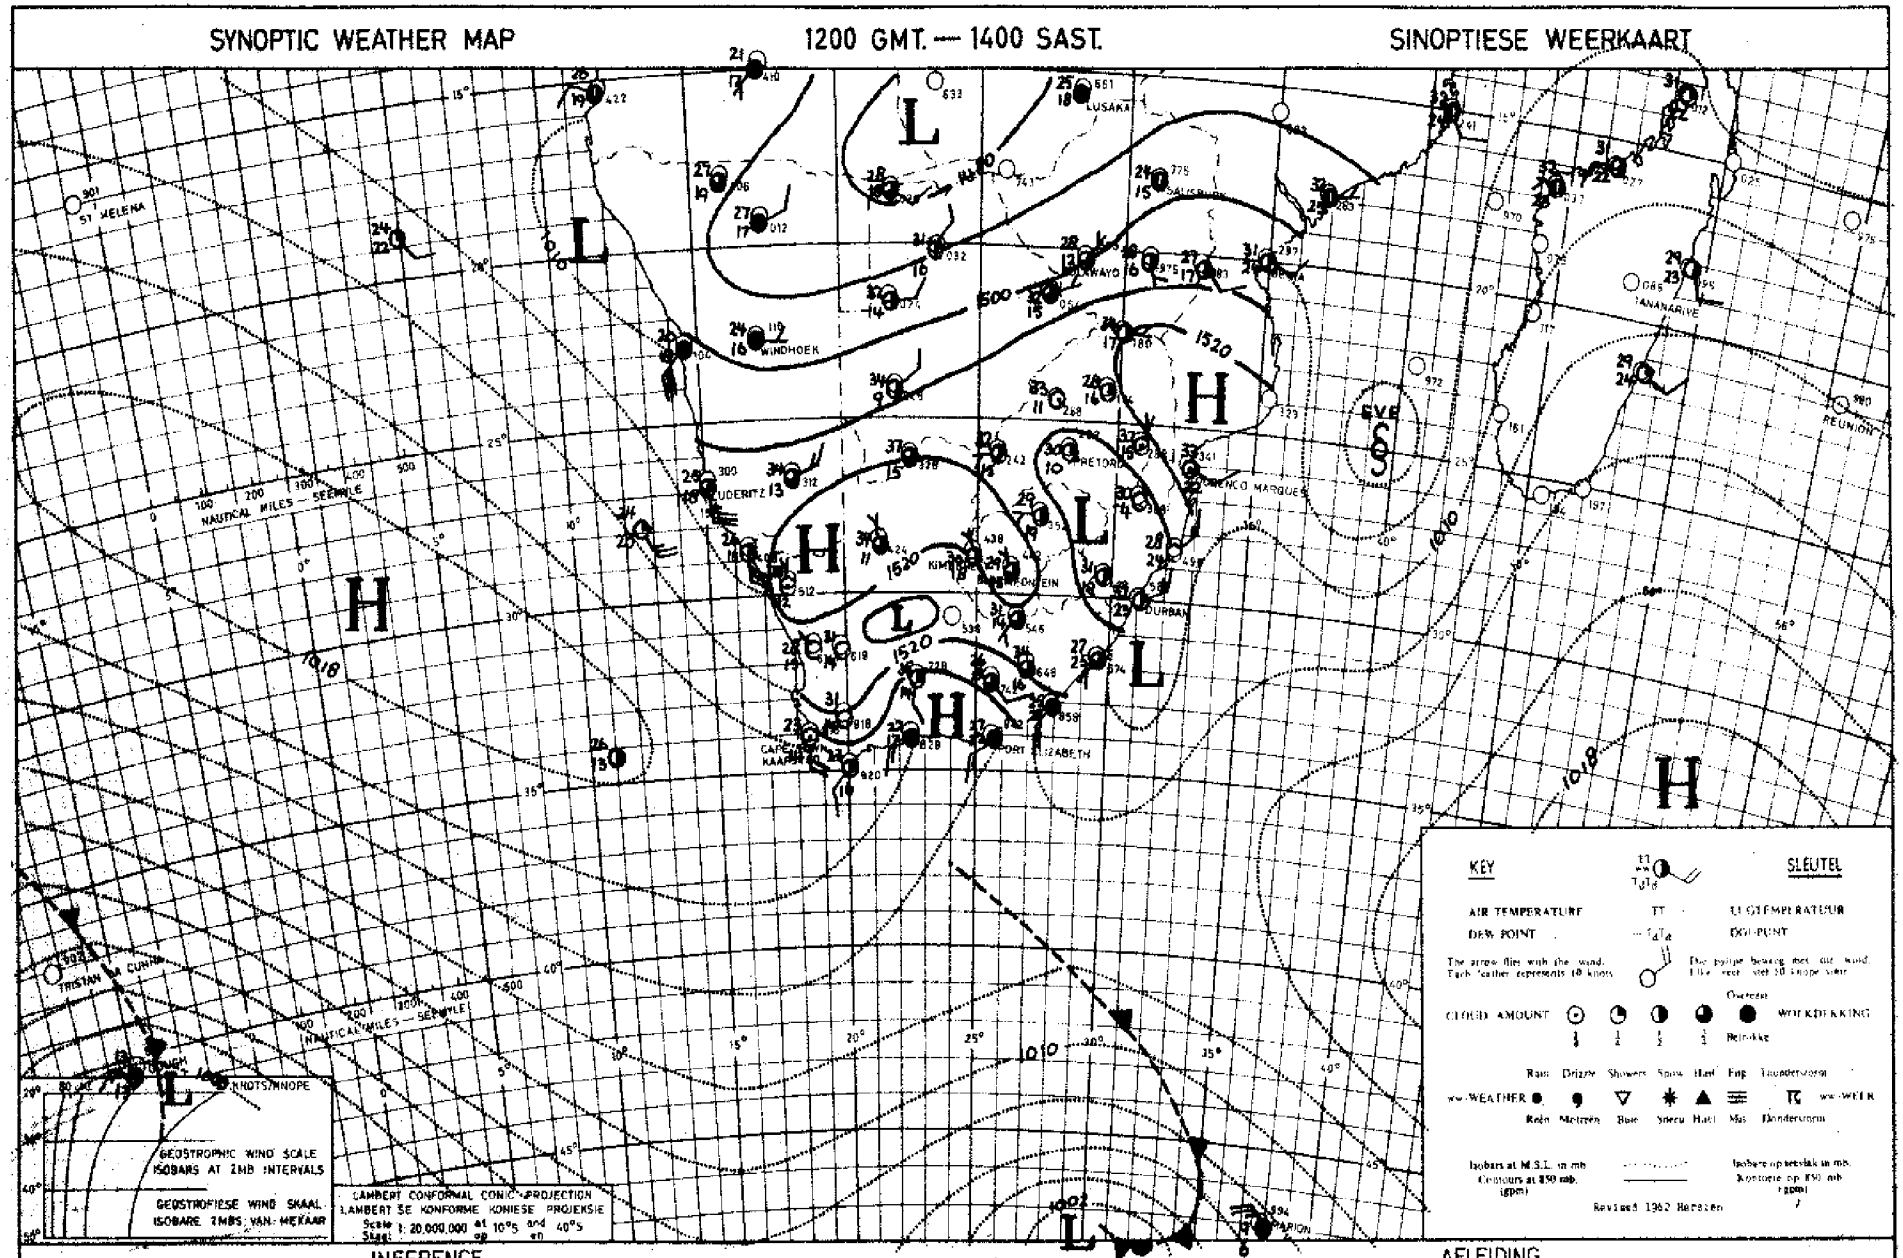
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 30 – 1 – 19 69 DATUM — AFLEIDING

There are several low pressure troughs over the interior and fairly moist air is present. Local thundershowers will therefore occur over most areas. The ridge of high pressure moving in south of the country will cause cloudy weather on the south coast which will spread to the east coast later.

Daar is verskeie laedruktrôe oor die binneland en betreklik vogtige lug is aanwesig. Dus sal los donderstorms oor die meeste dele voorkom. Die rug van hoë druk wat suid van die land inbeweeg veroorsaak bewolkte toestande oor die suidkus wat ook na die ooskus sal uitbrei.

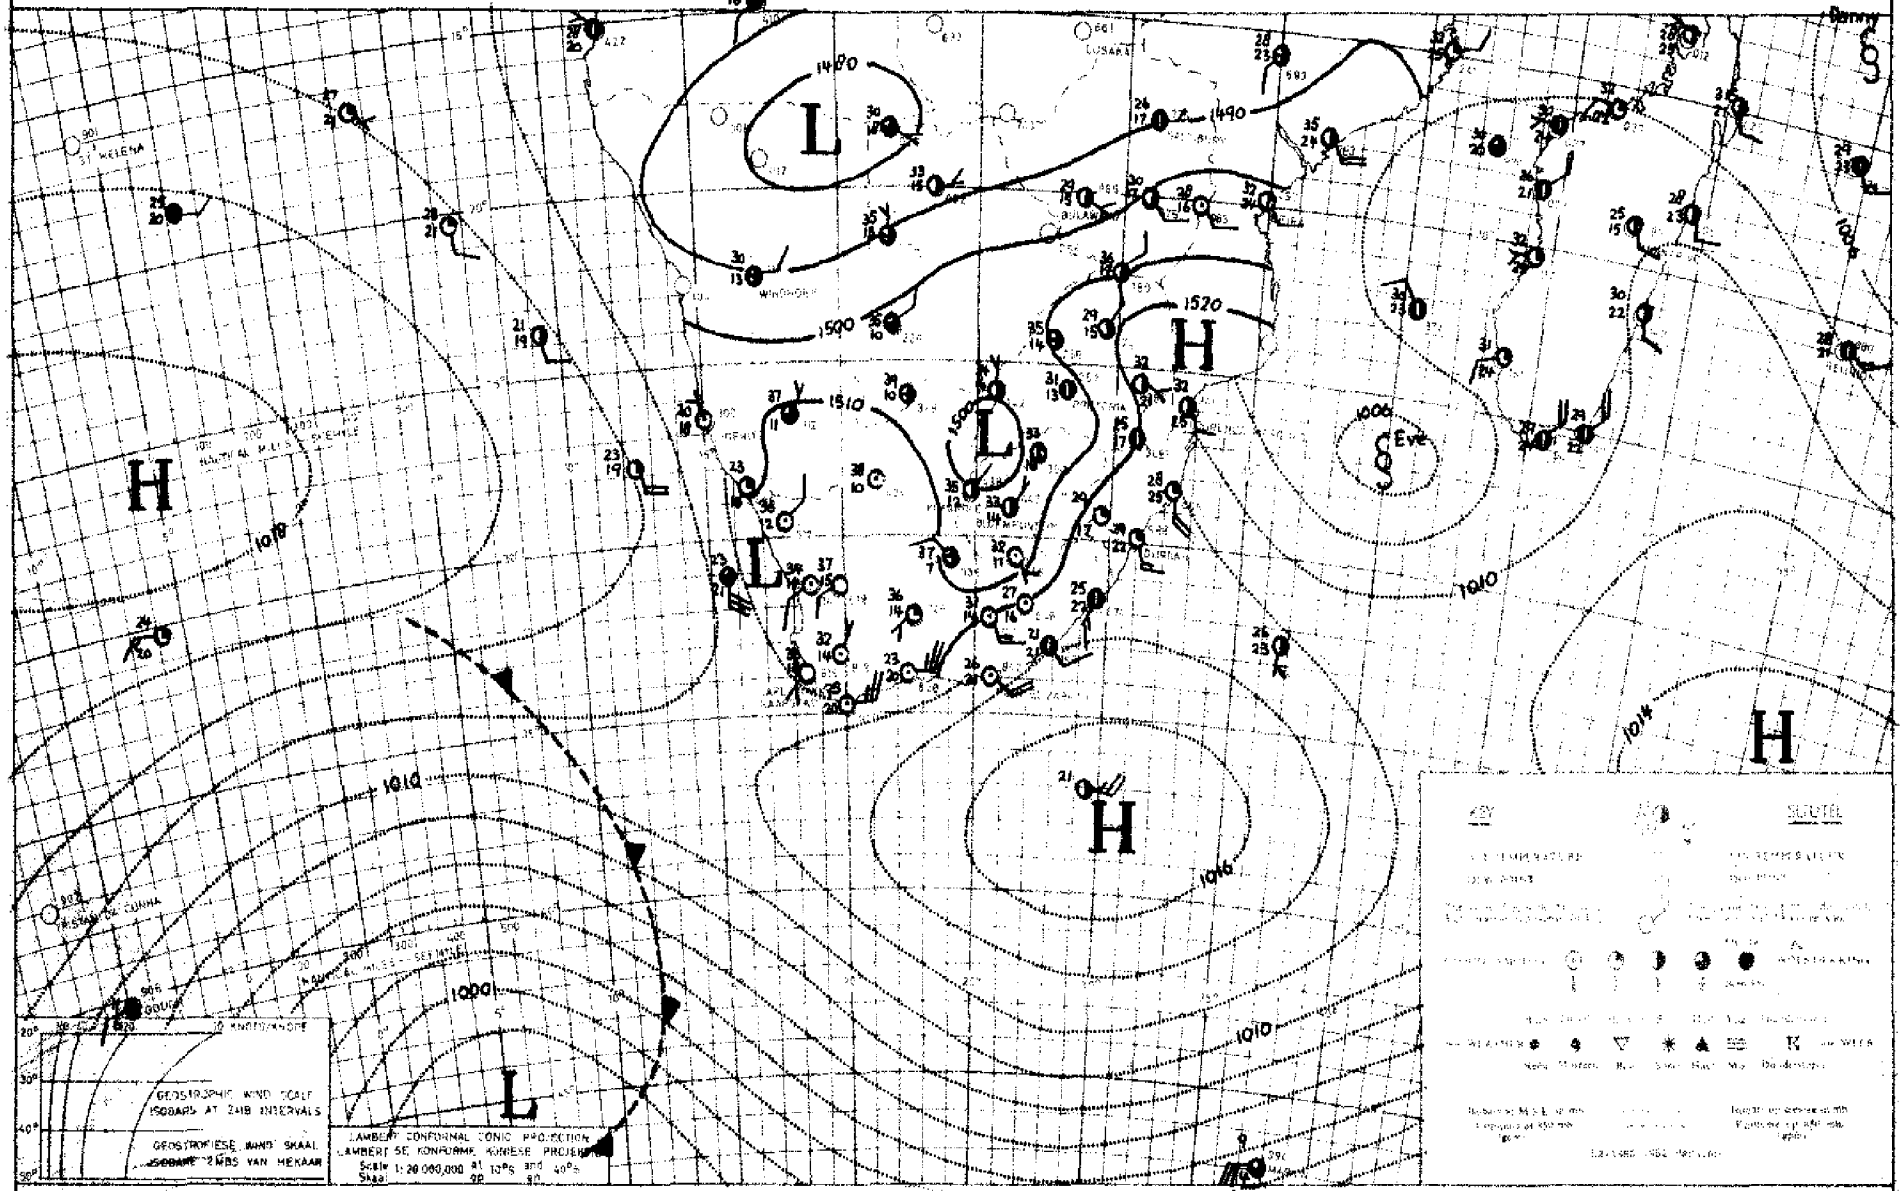
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 31 - 1 - 19 69 DATUM AFLEIDING

Although there are low pressure systems over the interior the upper air flow is strongly anticyclonic and only a few thundershowers are expected over the eastern and northern regions. The approaching cold front will cause cloudy weather with rain later over the south-western Cape Province.

Hoewel daar laedrukstelsels oor die binneland is, is die bolugstroming sterk antisiklonaal en word slegs enkele donderbuie verwag oor die noordelike en oostelike dele. Die naderende koufront sal later bewolkte weer met reën oor Suidwes-Kaapland veroorsaak.

INFERENCE

DATE 1 - 2 - 19 69 DATUM

AFLEIDING

A high pressure system in the upper air dampens all development over the interior where only a few thundershowers will occur. The cold front and trough south of the continent will result in cloudy weather with light rain over the south-western and southern coastal regions.

'n Hoëdrukstelsel in die bolug demp alle ontwikkeling oor die binneland waar slegs enkele donderbuie sal voorkom. Die koufront en trog suid van die land sal bewolkte weer met ligte reën veroorsaak oor die suidwes- en suidkusgebied.

INFERENCE

DATE 3-2- 19 69 DATUM

AFLEIDING

The fronts south of the continent will have little effect on the weather and the upper air circulation is unfavourable for rain. The weather will be mainly fine to partly cloudy and warm to hot with a few thundershowers over the northern and north-eastern regions.

Die fronte suid van die vasteland sal min invloed op die weer uitoefen en die bolugsirkulasie is ongunstig vir reën. Die weer sal hoofsaaklik mooiweer tot gedeeltelik bewolk en warm tot baie warm wees met enkele donderbuie oor noordelike en noordoostelike gebiede.

DAAGLIKSE WEERBULLETIN

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

Pressures are rising rapidly along the south coast, indicating that the Atlantic high is ridging around the coast. Simultaneously there is a low over the Free State with warm moist air to its north and east. Therefore scattered showers are expected over the north-eastern areas of the Republic and northern S.W.A. and Botswana.

Lugdruk styg vinnig langs die suidkus wat aandui dat die Atlantiese hoog 'n rug om die kus vorm. Terselfdertyd is daar 'n laag oor die Vrystaat met warm, voqtige lug ten noorde en ooste daarvan. Gevolglik sal verspreide reën en buie voorkom oor die noordoostelike dele van die Republiek en oor noordelike S.W.A. en Botswana.

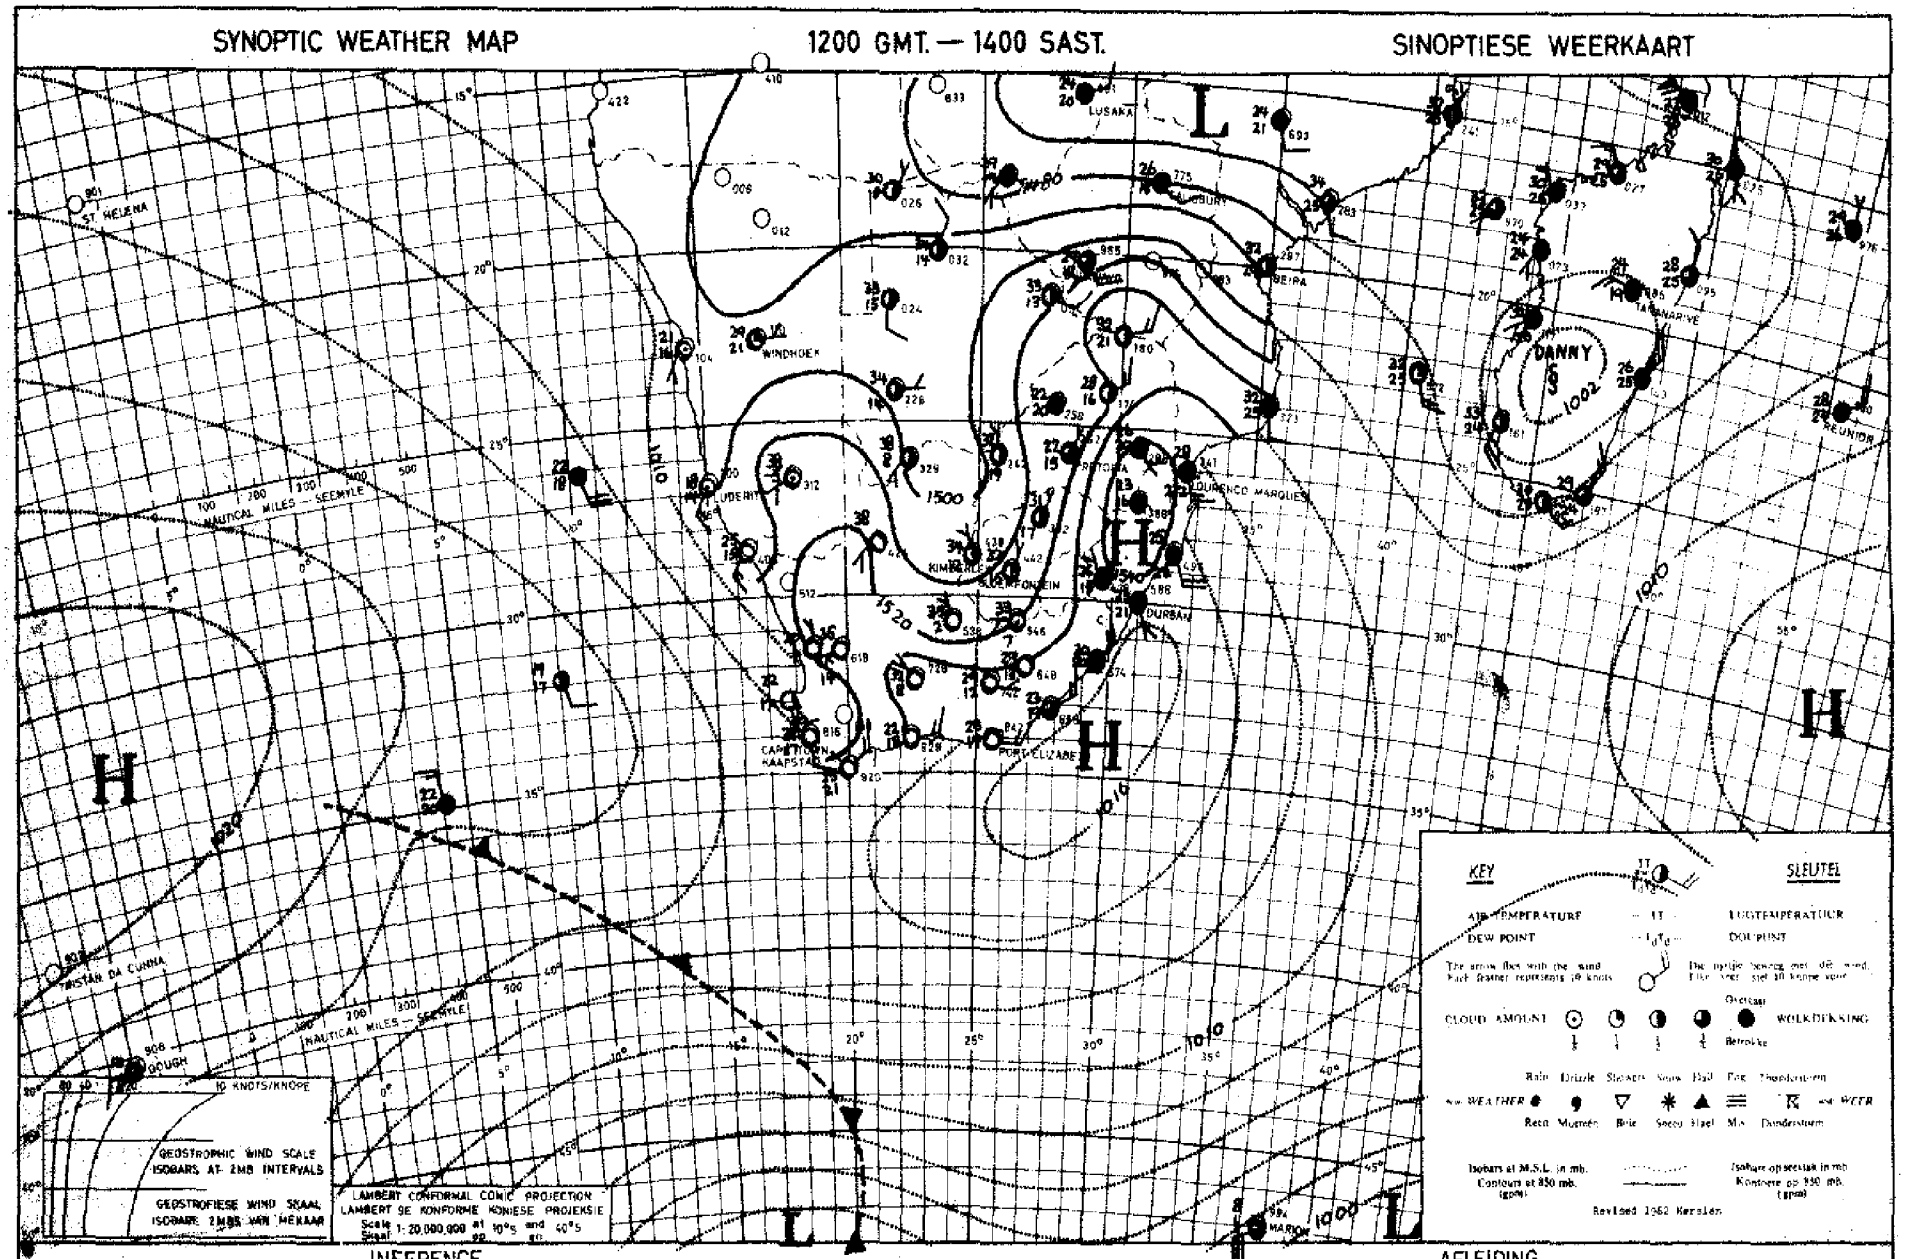
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 5-2-69 DATUM AFLEIDING

The Indian Ocean high is causing an inflow of moist air over the eastern parts of the country. With the trough of low pressures over the interior thundershowers can be expected over the northern and eastern parts of the country.

Die Indiese Oseaan-hoog het tot gevolg 'n invloei van vog oor die oostelike dele van die land. Met 'n trog van lae druk oor die sentrale dele van die land kan donderbuie oor die oostelike en noordelike dele van die land verwag word.

INFERENCE

DATE 6 - 2 - 1969 DATUM

AFLEIDING

Behind the cold front a ridge of high pressure will move in south of the country so, that cool, cloudy weather with light rain will spread over the coastal regions. Isolated thundershowers will develop in the warm moist air over the northern and eastern interior.

Agter die koufront sal 'n rug van hoë druk suid van die land inbeweeg sodat koel, bewolkte weer met ligte reën oor die kus sal inbeweeg. In die warm vogtige lug oor die noordelike en oostelike binneland sal los donderbuie voorkom.

INFERENCE

DATE 7 - 2 - 1968 DATUM

AFLEIDING

Dry air is invading the interior from the west so that it will be mainly fine over these regions. A ridge of high is, however, moving in south of the continent and therefore cloudy conditions with occasional light rain will spread over the southern and eastern coastal regions.

Droë lug stoot van die weste af in oor die binneland waar dit hoofsaaklik mooiweer sal wees. 'n Rug van hoë druk is egter besig om suid van die land in te beweeg sodat dit bewolk sal wees oor die suidelike en oostelike kusgebiede met ligte reën by tye.

Revised 1962 Herstein

INFERENCE — AFLEIDING

DATE 9 - 2 - 19 69 DATUM

There is a trough stretching from north-eastern Cape to northern S.W.A and moist air is flowing over the areas east of the trough. Consequently thundershowers are expected over Transvaal, Free State, Natal and Botswana. The front approaching from the west will again cause cloudy conditions with rain over the south-western and southern coastal regions.

Daar is 'n trog wat van Noordoos-Kaap strek na noordelike S.W.A en ten ooste van die trog is taamlik vogtige lug in sirkulasie, Donderbuie word dus verwag oor Transvaal, Vrystaat, Natal en Botswana. Die front wat van die weste nader, sal weer bewolkte toestande met reën oor die suidwestelike en suidelike kusgebiede teweegbring.

INFERENCE

DATE 10 - 2 - 19 69 DATUM

AFLEIDING

Behind the cold front, which is moving along the coast, cooler cloudy weather with rain will spread over the eastern coastal regions and interior. There is also a deep low pressure over the central interior and thundershowers will occur over Transvaal, northern O.F.S., Botswana and northern S.W.A.

Agter die kouefront wat langs die kus sal beweeg, sal koeler bewolkte weer met reën oor die oostelike kusstreke en binneland uitbrei. Daar is ook 'n diep laedrukgebied oor die sentrale binneland en dus sal donderbuie voorkom oor Transvaal, Noord-Vrystaat, Botswana en noordelike S.W.A.

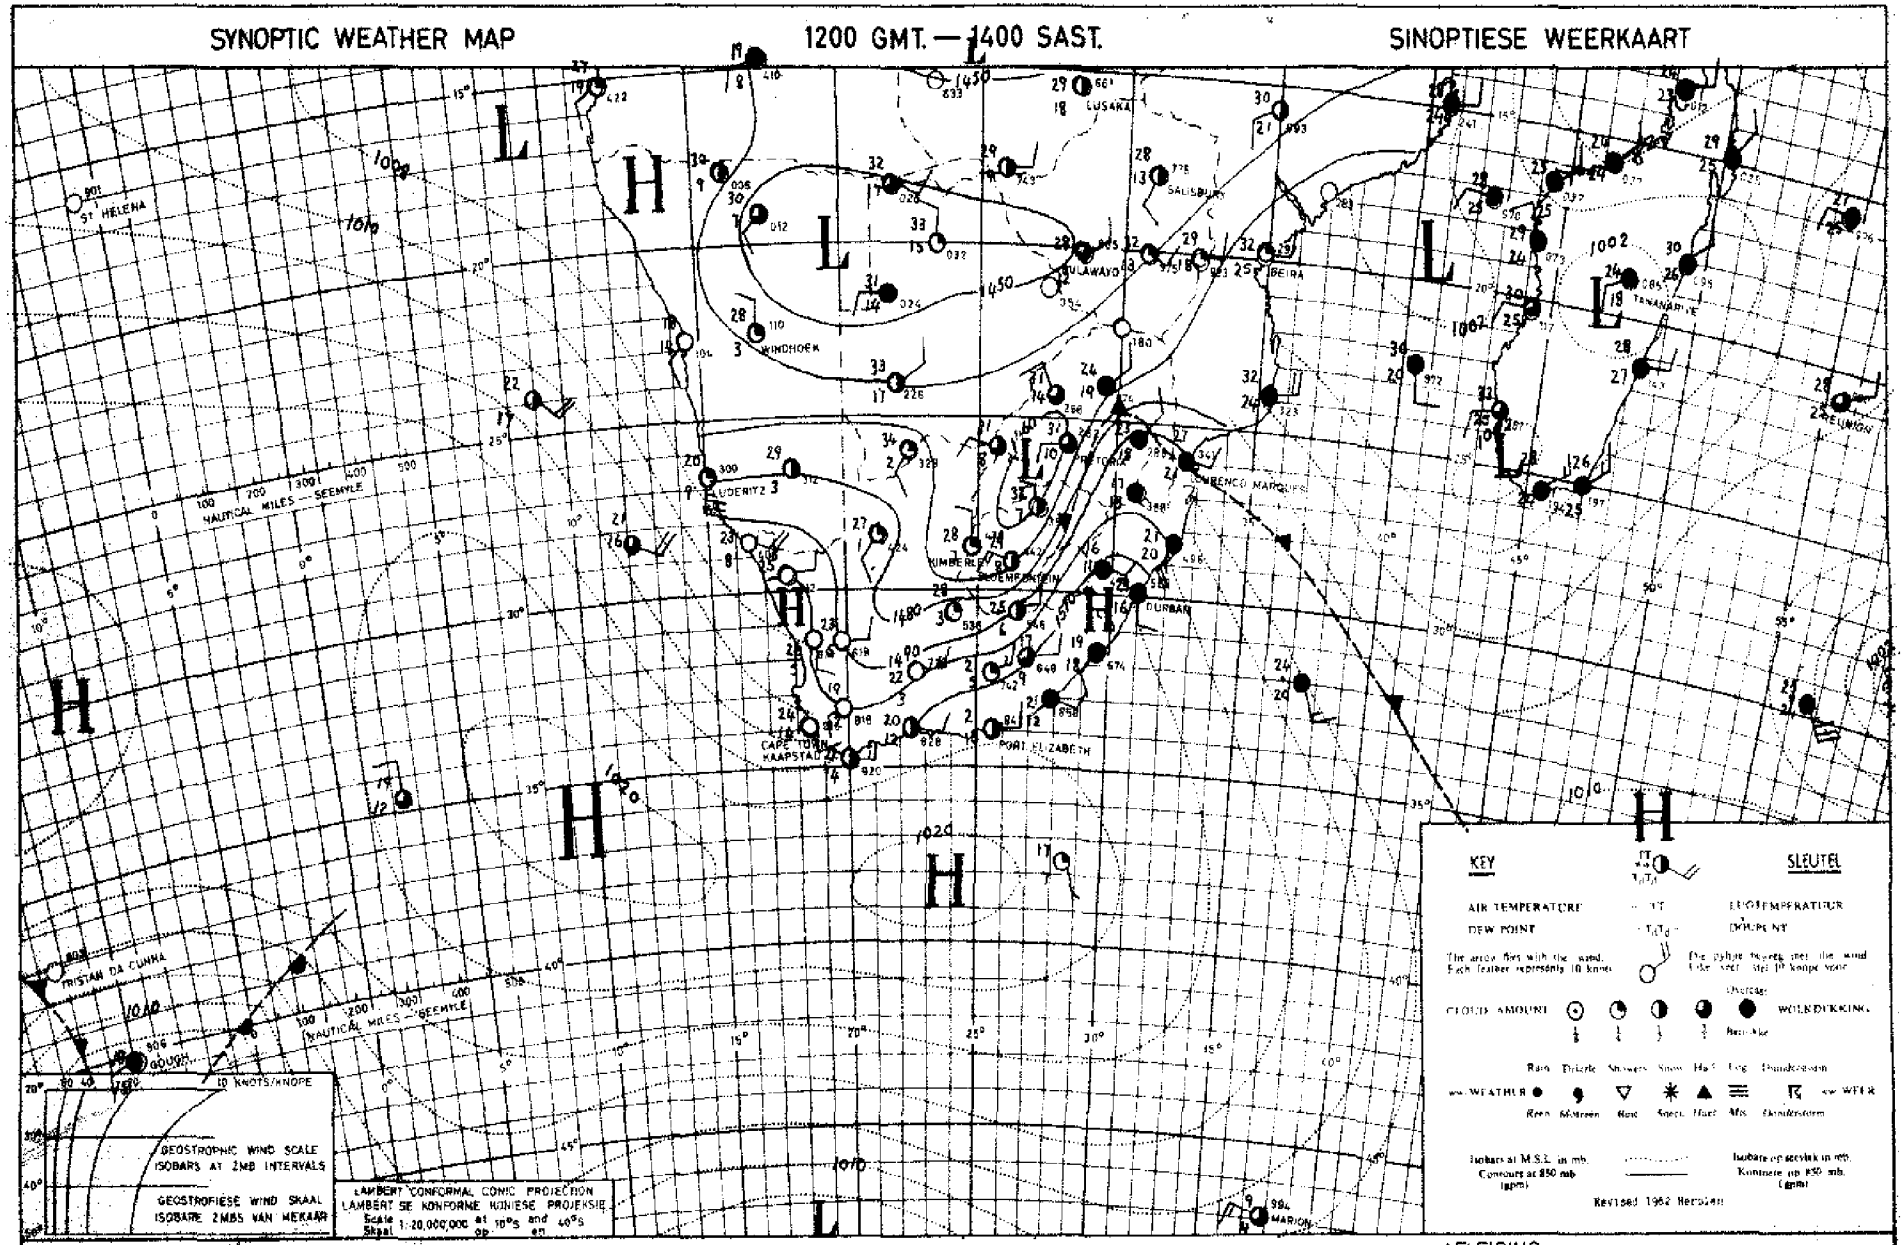
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

DATE 11.2.69 DATUM

AFLEIDING

As the high moves further east, the cool, cloudy weather will extend over the whole Transvaal and northern O.F.S. Light rain will fall over Natal and Eastern Transvaal. The low pressure area stretching from Botswana to the Free State will lead to thundershowers over the latter regions and also over Northern Cape and the western half of Transvaal.

Namate die hoog verder ooswaarts beweeg, sal die bewolkte, koeler weer oor die hele Transvaal en Noord-Vrystaat uitbrei. Ligte reën sal oor Natal en Oos-Transvaal uitsak. Die lae-drukgebied wat van Botswana na die Vrystaat strek, sal donderbuie veroorsaak oor genoemde gebiede asook Noord-Kaapland en die westelike helfte van Transvaal.

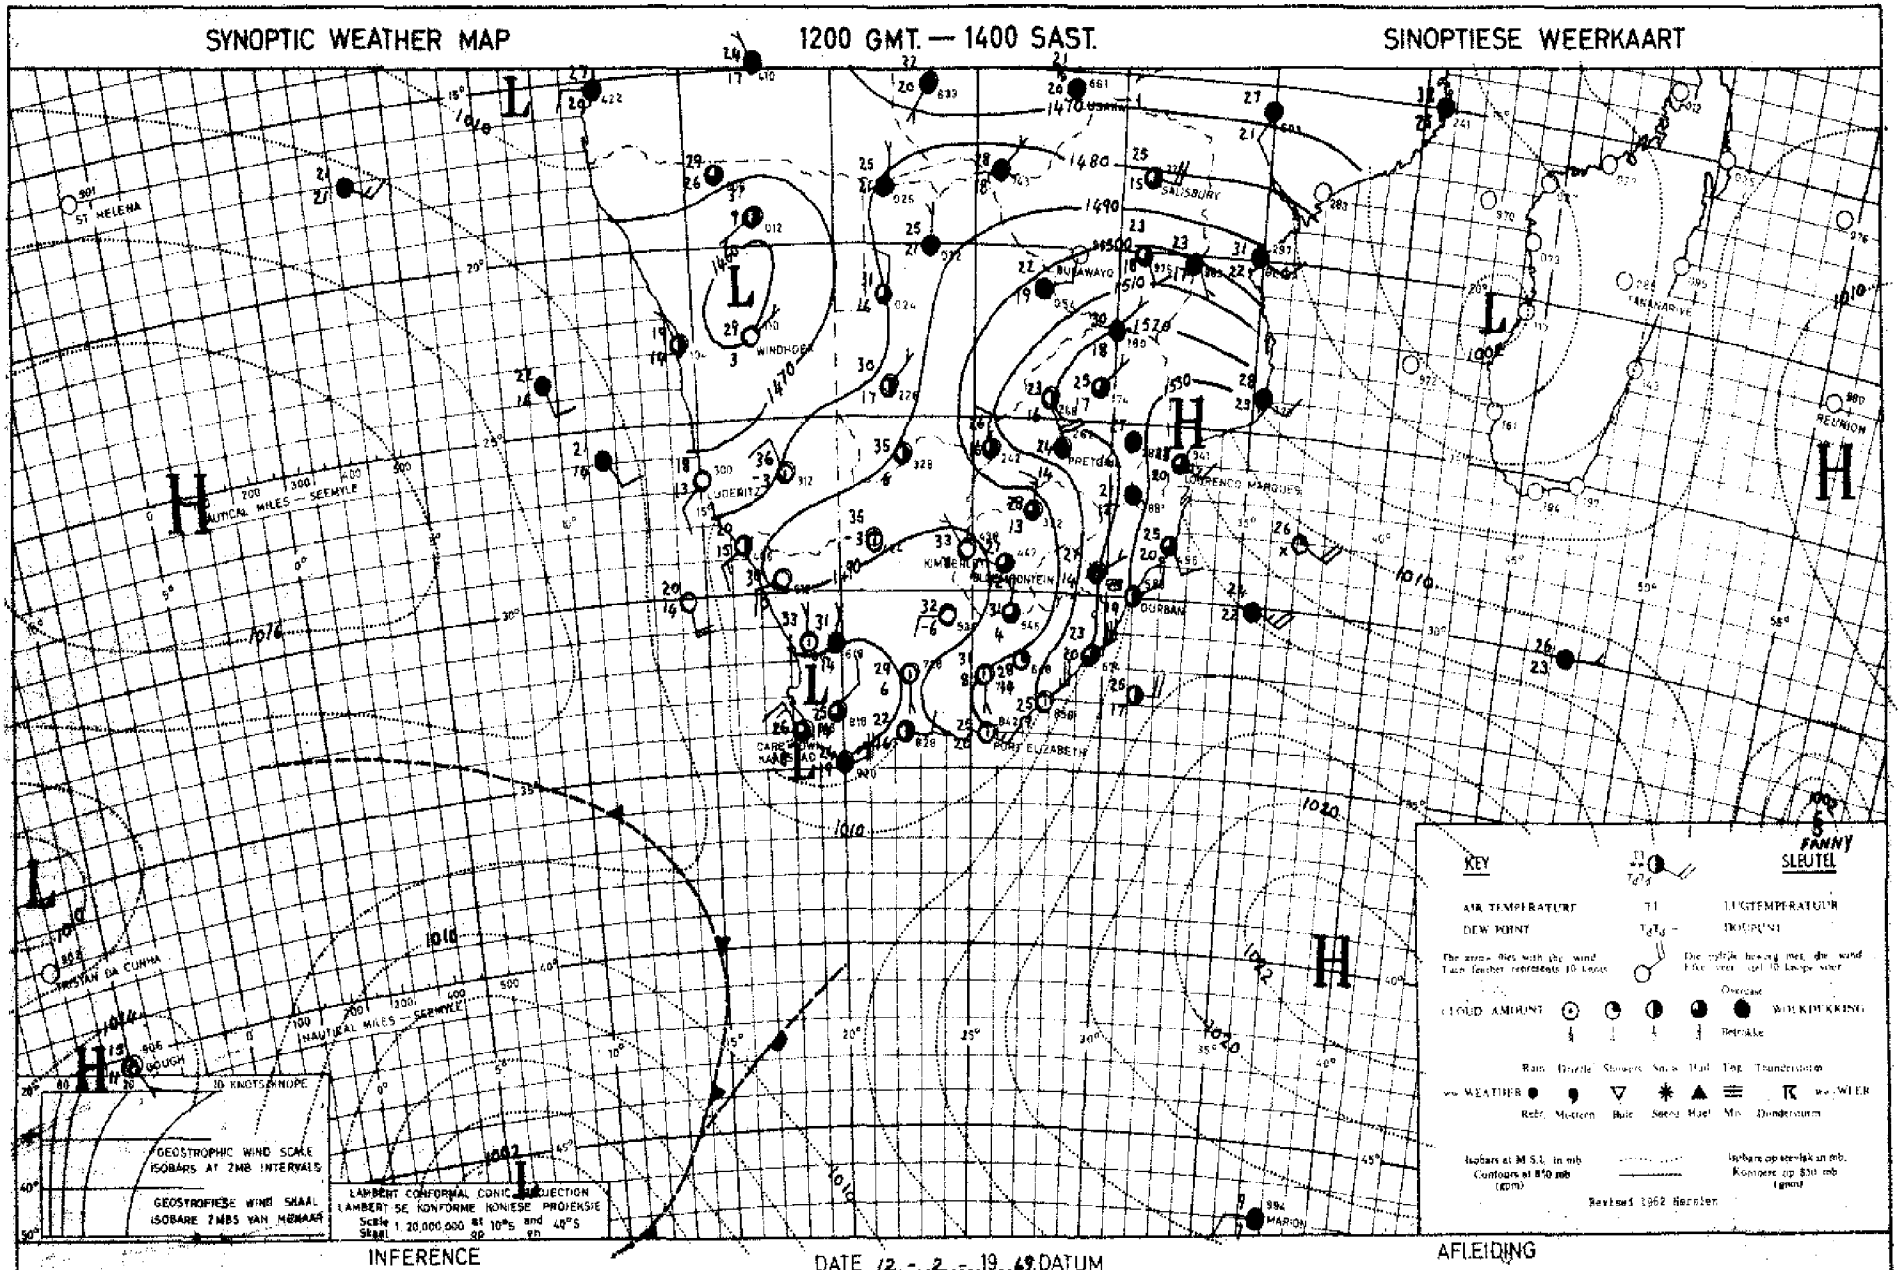
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

DATE 12 - 2 - 1969 DATUM

AFLEIDING

Between the high over Transvaal and the low pressure area over the Cape Province moist air will move southwards over the interior and scattered thundershowers will occur over the northern, eastern and central areas. The weak low along the Cape coast will advance to the east coast accompanied by partly cloudy weather.

Tussen die hoog oor Transvaal en die laedrukgebied oor S.W.A. en Kaapland sal vogtige lug suidwaarts oor die binneland beweeg en verspreide donderbuie sal voorkom oor die noordelike, sentrale en oostelike dele. Die swak laag langs die Kaapse kus sal na die oaskus beweeg gepaard met gedeeltelik bewolkte weer.

INFERENCE

DATE 13 - 2 - 19 89 DATUM

AFLEIDING

With the cold front off Cape Town, cloudy, cool weather with rain or drizzle will spread eastwards from the south-western Cape coast. With moist air still in circulation over the interior, thundershowers will occur mainly over the Free State, Botswana, Northern Cape and Western Transvaal.

Met die koufront naby Kaapstad, sal bewolkte, koel weer met reën of motreën ooswaarts uitbrei vanaf die Kaapse suidwestkus. Met vogtige lug nog in sirkulasie oor die binneland, sal donderbuie voorkom hoofsaaklik oor die Oranje-Vrystaat, Botswana, Noord-Kaapland en Wes-Transvaal.

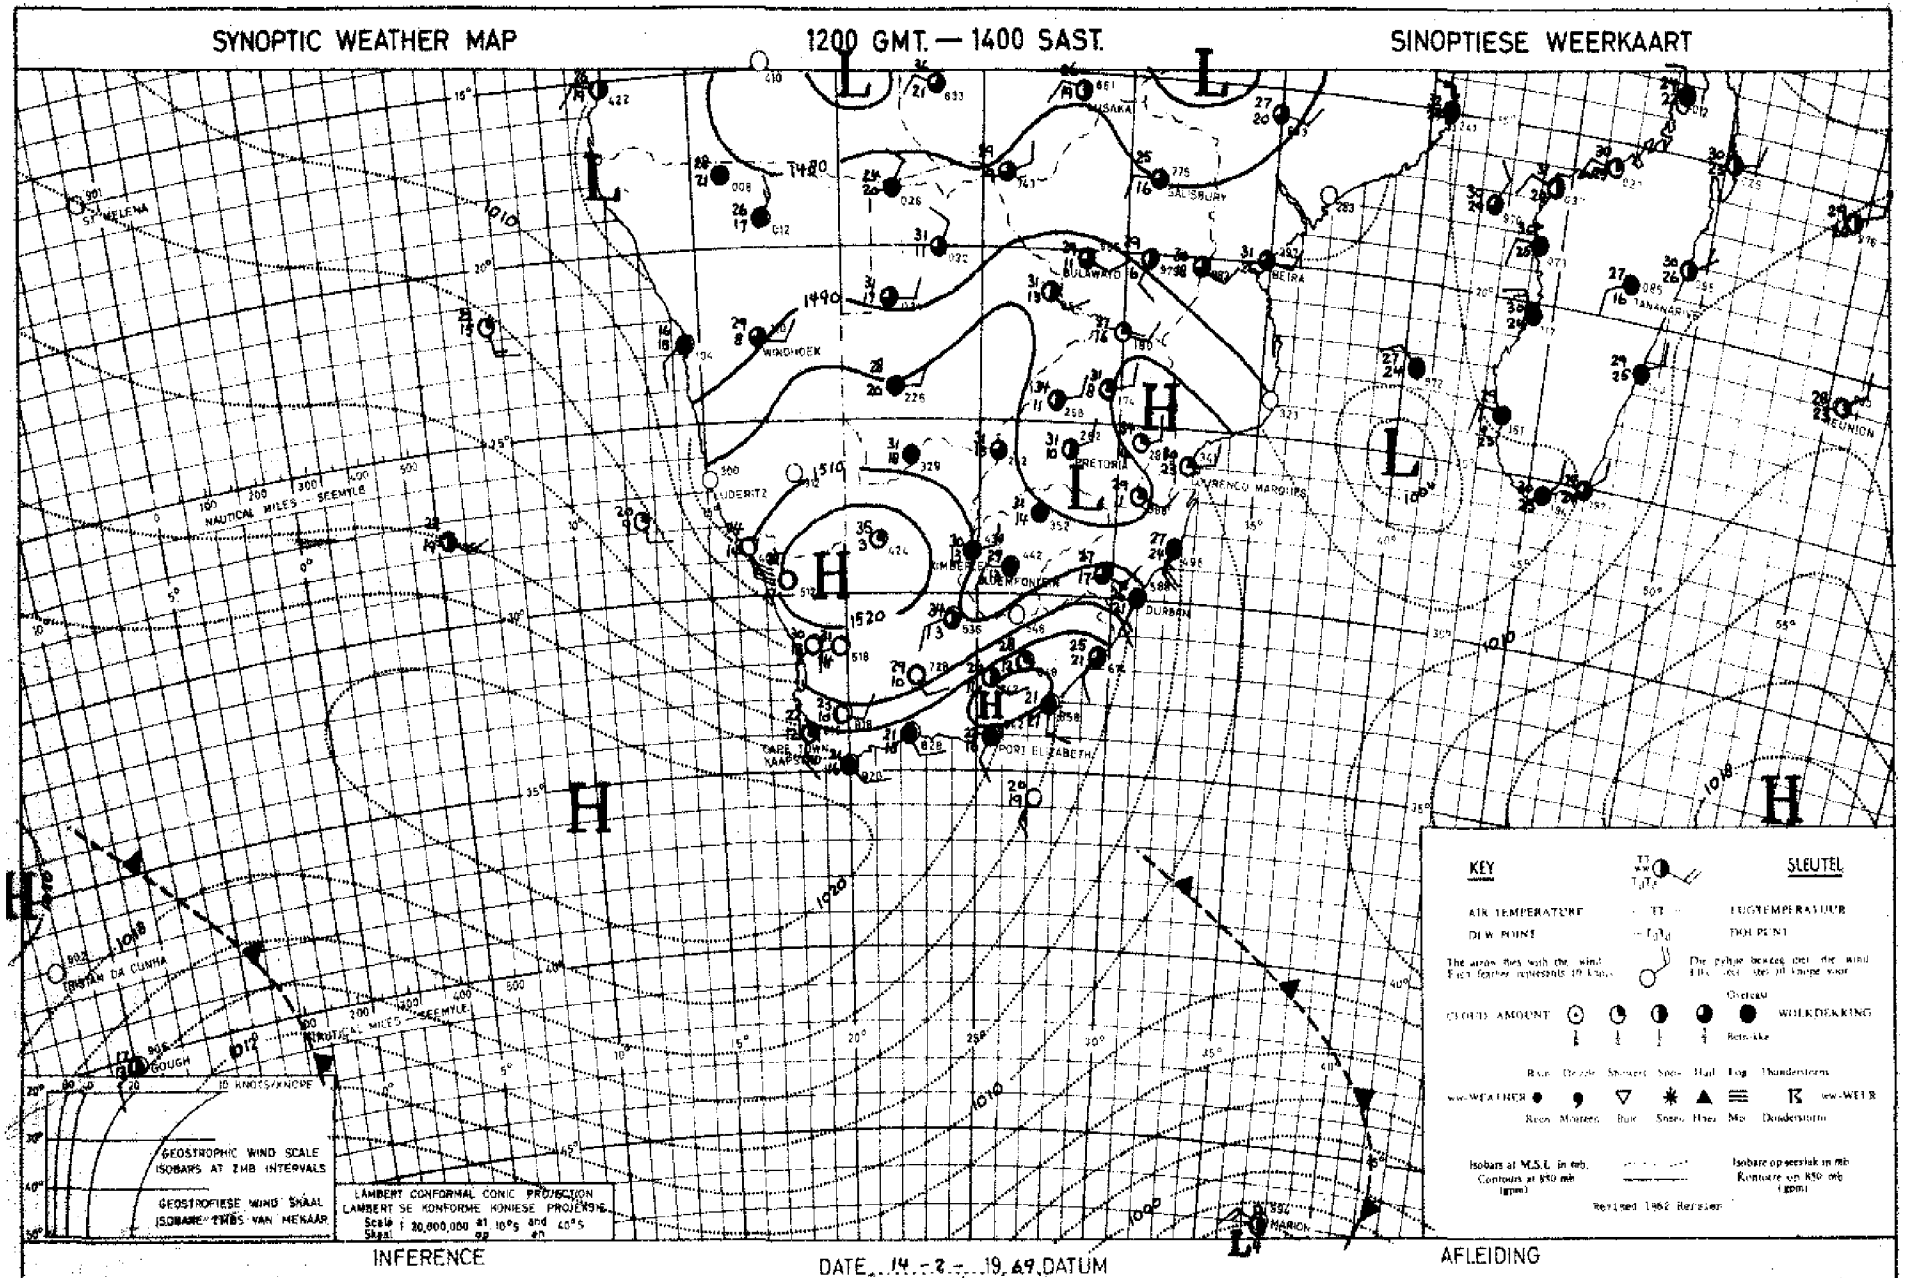
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 14-2-69 DATUM AFLEIDING

The high ridging in south of the country will cause cool cloudy weather with rain over Eastern Cape, Natal, and eastern Transvaal. In the warm moist air over the interior thundershowers will occur over northern S.W.A., Botswana, Northern Cape, the Free State and western Transvaal.

Die rug van hoë druk wat suid van die land inbeweeg, sal koel, bewolkte weer met reën veroorsaak oor Oos-Kaapland, Natal en Oos-Transvaal. In die warm, vogtige lug oor die binneland sal donderbuie voorkom oor noordelike S.W.A., Botswana, Noord-Kaapland, die Vrystaat en Wes-Transvaal.

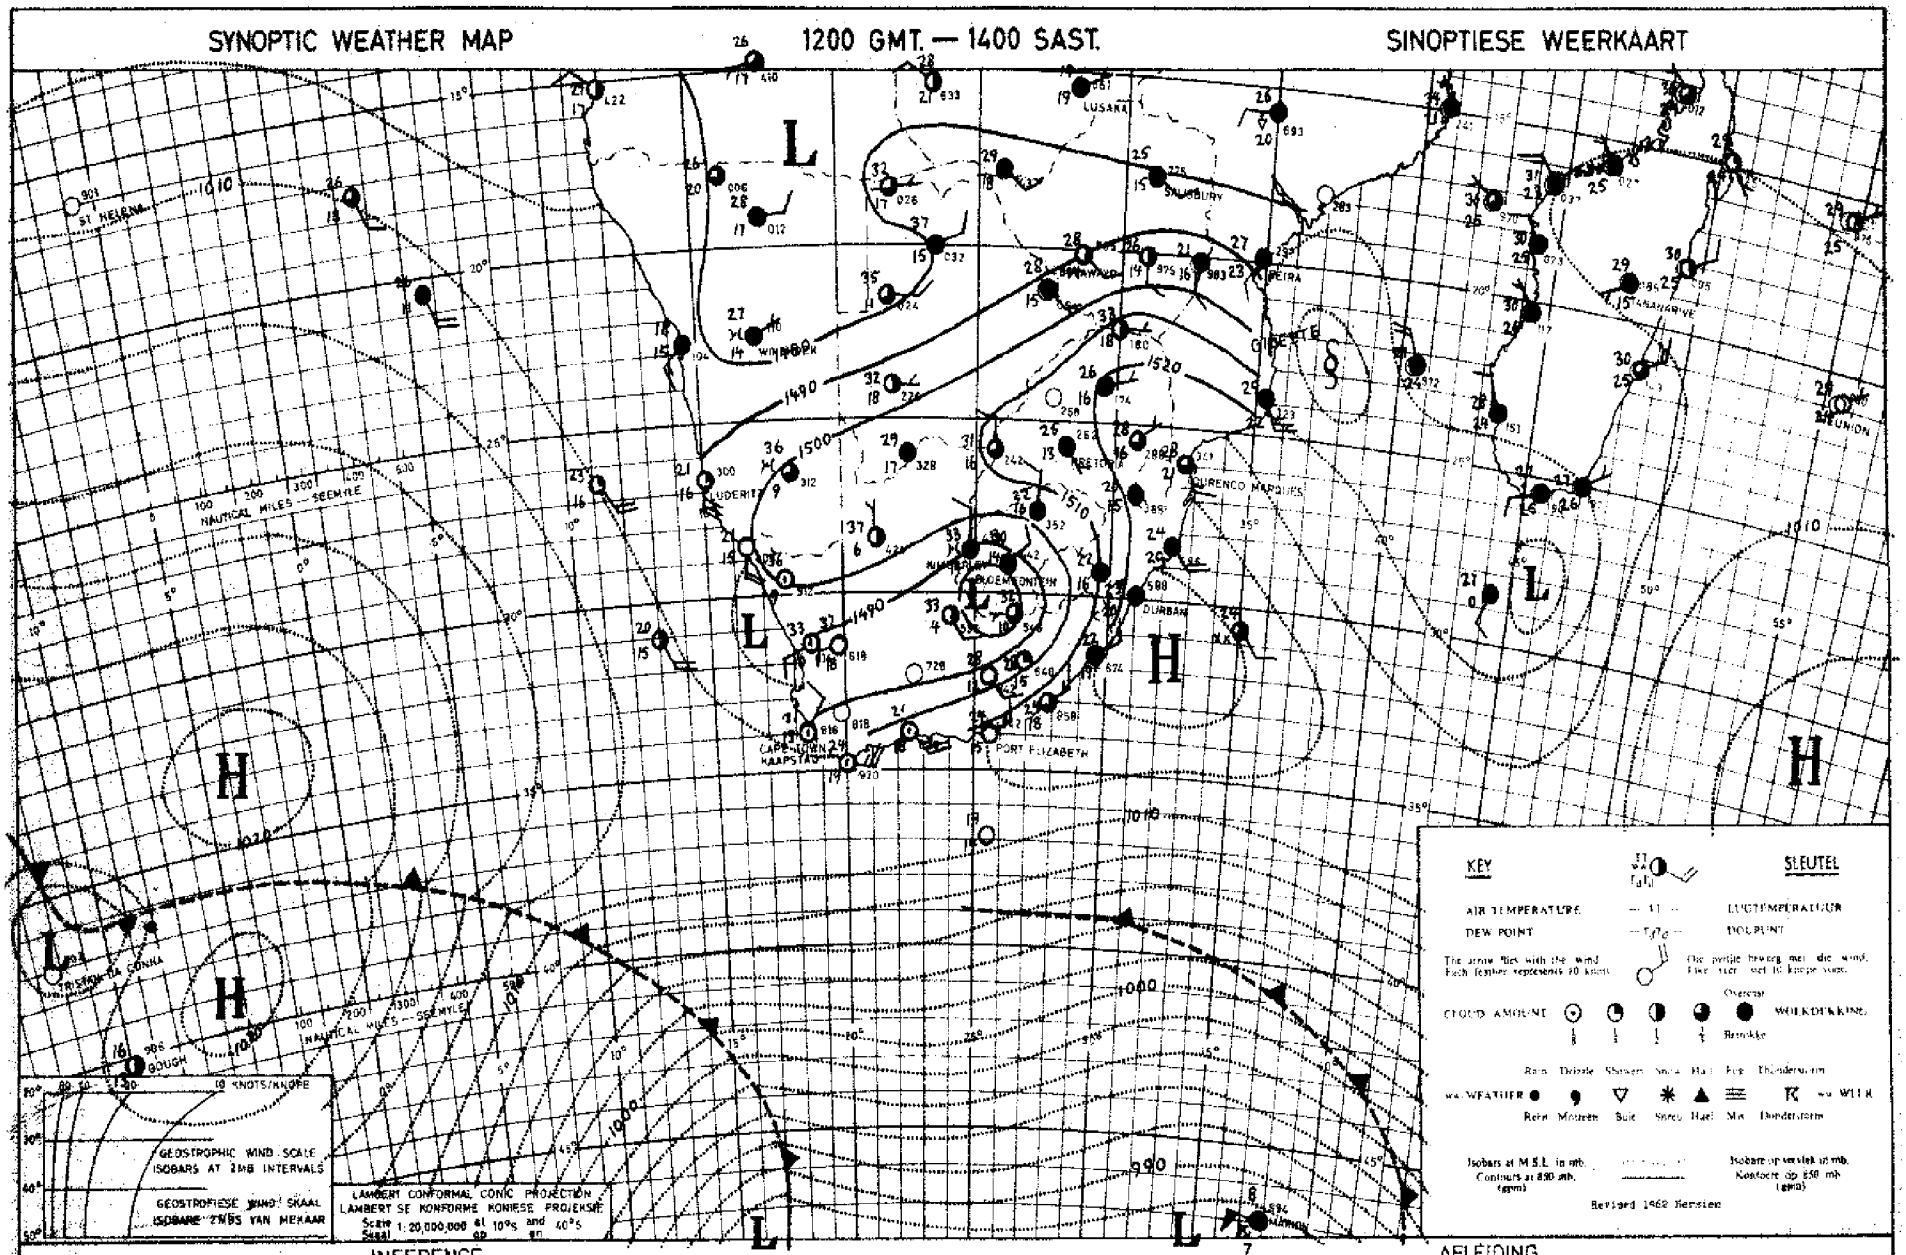
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 15 - 3 - 19 69 DATUM AFLEIDING

With the high along Natal coast moving eastwards, it will clear along the coast. With low presure over the interior and moist air present thunderstorms will develop over the northern half of the country.

Met die hoog langs die Natalkus wat ooswaarts beweeg, sal die weer geleidelik opklaar. Met 'n laedrukstelsel oor die binneland en vogtige lug aanwesig kan donderstorms oor die noordelike helfte van die land verwag word.

INFERENCE

DATE 16 - 2 - 19 69 DATUM

AFLEIDING

The Atlantic high is again ridging in south of the continent and thus cloudy conditions will occur over the southern and eastern coastal areas. Fairly moist air is present over the eastern, central and northern interior where thundershowers will occur.

Die Atlantiese hoog stoot weer 'n rug suid van die land in en bewolkte weer sal oor die suidelike en oostelike kusgebiede voorkom. Betreklik vogtige lug is aanwesig oor die oostelike, sentrale en noordelike binneland sodat donderbuie oor dié gebiede sal uitsak.

Low pressure systems are evident over the western interior and fairly moist air circulates over most regions. Showers and thundershowers will therefore occur over all areas except the western Cape interior. Frontal systems are at present passing fairly far to the south and have little influence on the weather along the coast.

Laedrukstelsels is aanwesig oor die westelike binneland en taamlik vogtige lug sirkuleer oor die meeste gebiede. Buie en donderbuie sal dus voorkom behalwe oor die westelike Kaapse binneland. Frontale stelsels beweeg tans taamlik ver suid van die land verby en het min invloed op die weer langs die kus.

INFERENCE

DATE 19-2-1969 DATUM

AFLEIDING

The low pressure systems over the western interior, together with an upper air low over the central areas, will cause further rain and showers over Transvaal, O.F.S., Natal, Northern and Eastern Cape and also Botswana. The cold front and trough west of Cape Town will bring cloudy conditions with rain to the South-West Cape.

Die laedrukgebiede oor die westelike binneland, tesame met 'n bolugtrog oor die sentrale dele, sal verdere reën en buie veroorsaak oor Transvaal, Vrystaat, Natal, Noord- en Oos-Kaapland asook Botswana. Die kouefront en trog wes van Kaapstad sal bewolkte weer met reën oor Suidwes-Kaapland aanbring.

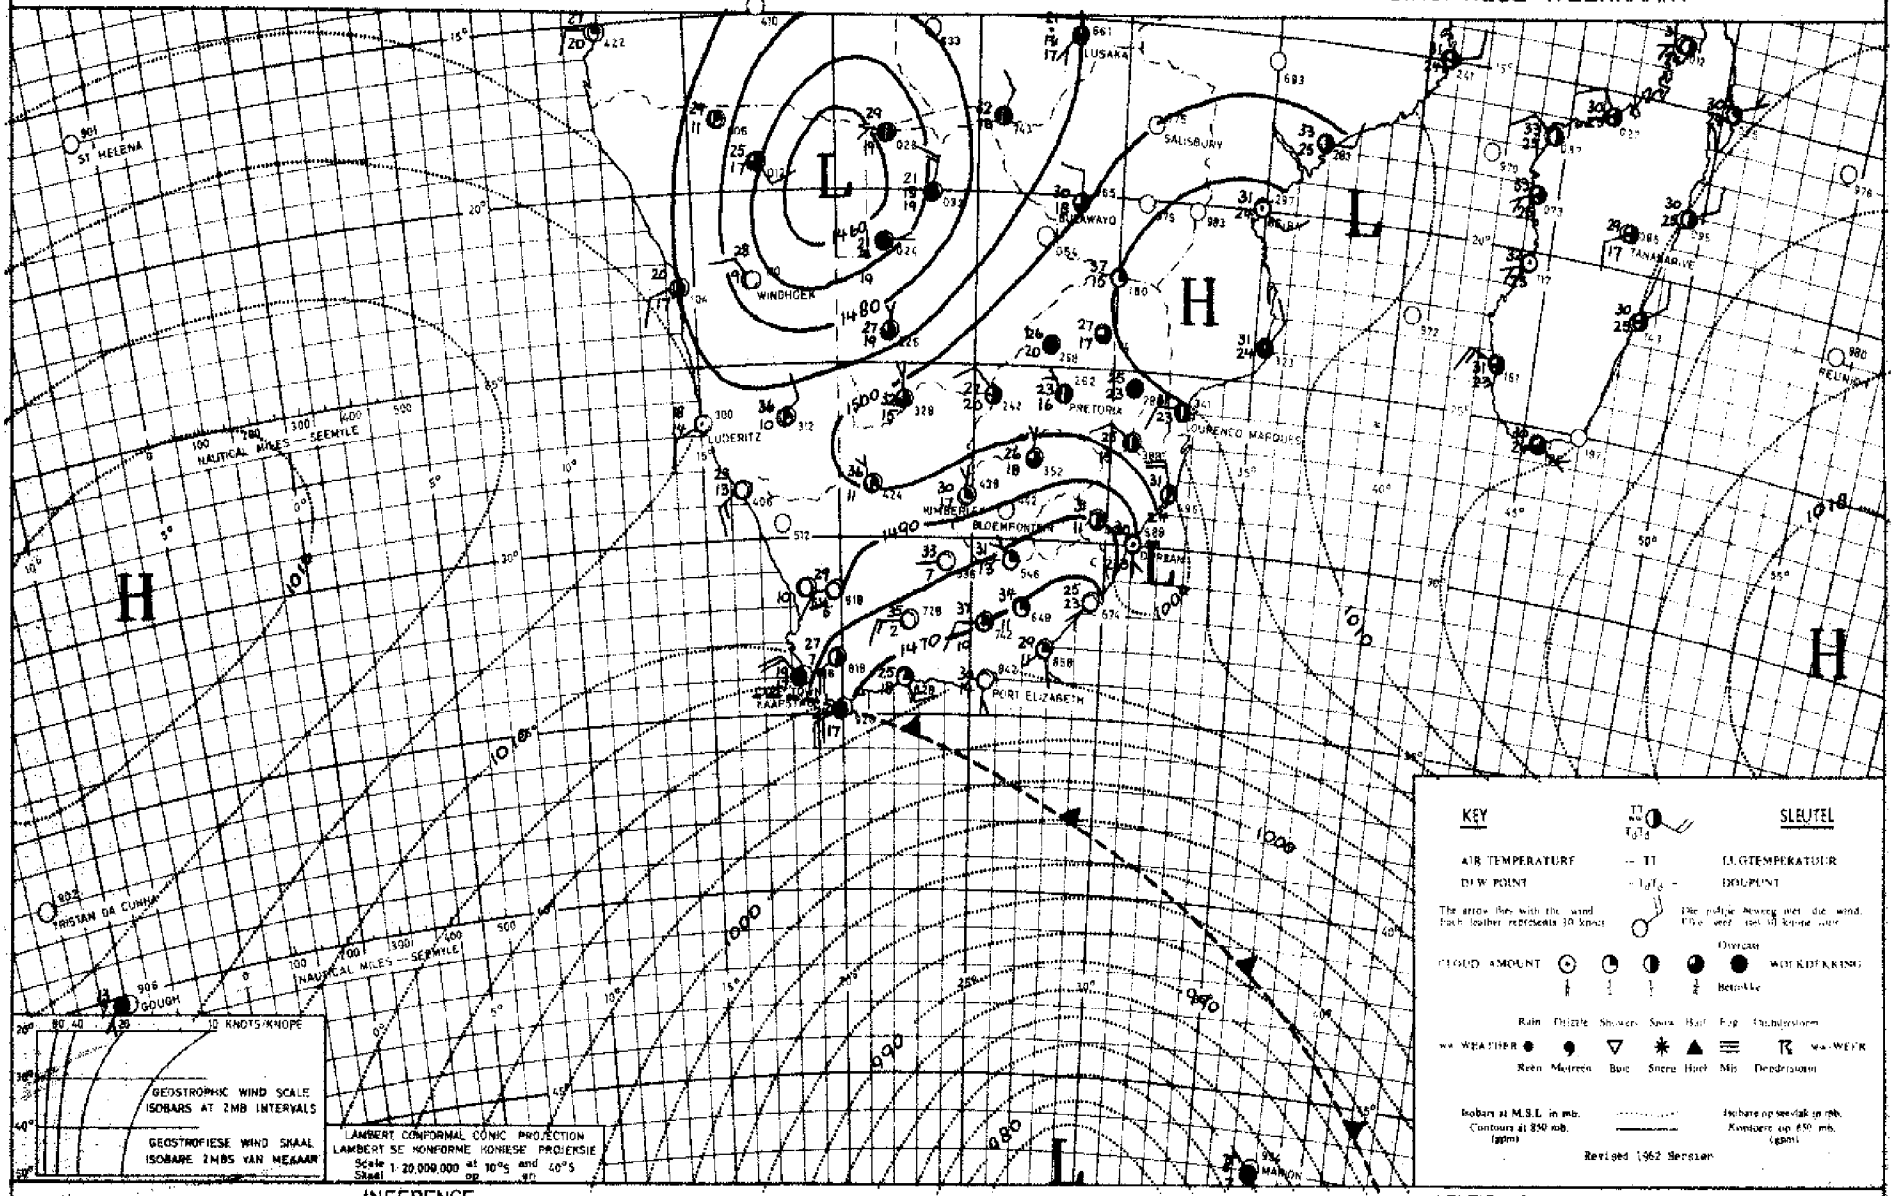
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 20-2-19.69 DATUM AFLEIDING

The cold front on the south-western Cape coast will cause cloudy conditions with light rain or drizzle to spread to the Cape and Natal coastal regions. Over the interior it will be partly cloudy with isolated thunderstorms over the eastern areas. Scattered showers will occur over the northern parts of S.W.A. and Botswana.

Met die koufront op die Kaapse suidweskus sal dit bewolk en koeler word oor die kusgebiede met ligte reën. Oor die binneland sal dit gedeeltelik bewolk wees met los donderbuie oor die oostelike dele. Verspreide buie word egter verwag oor die noordelike gebiede van S.W.A. en Botswana.

DAAGLIKSE WEERBULLETIN

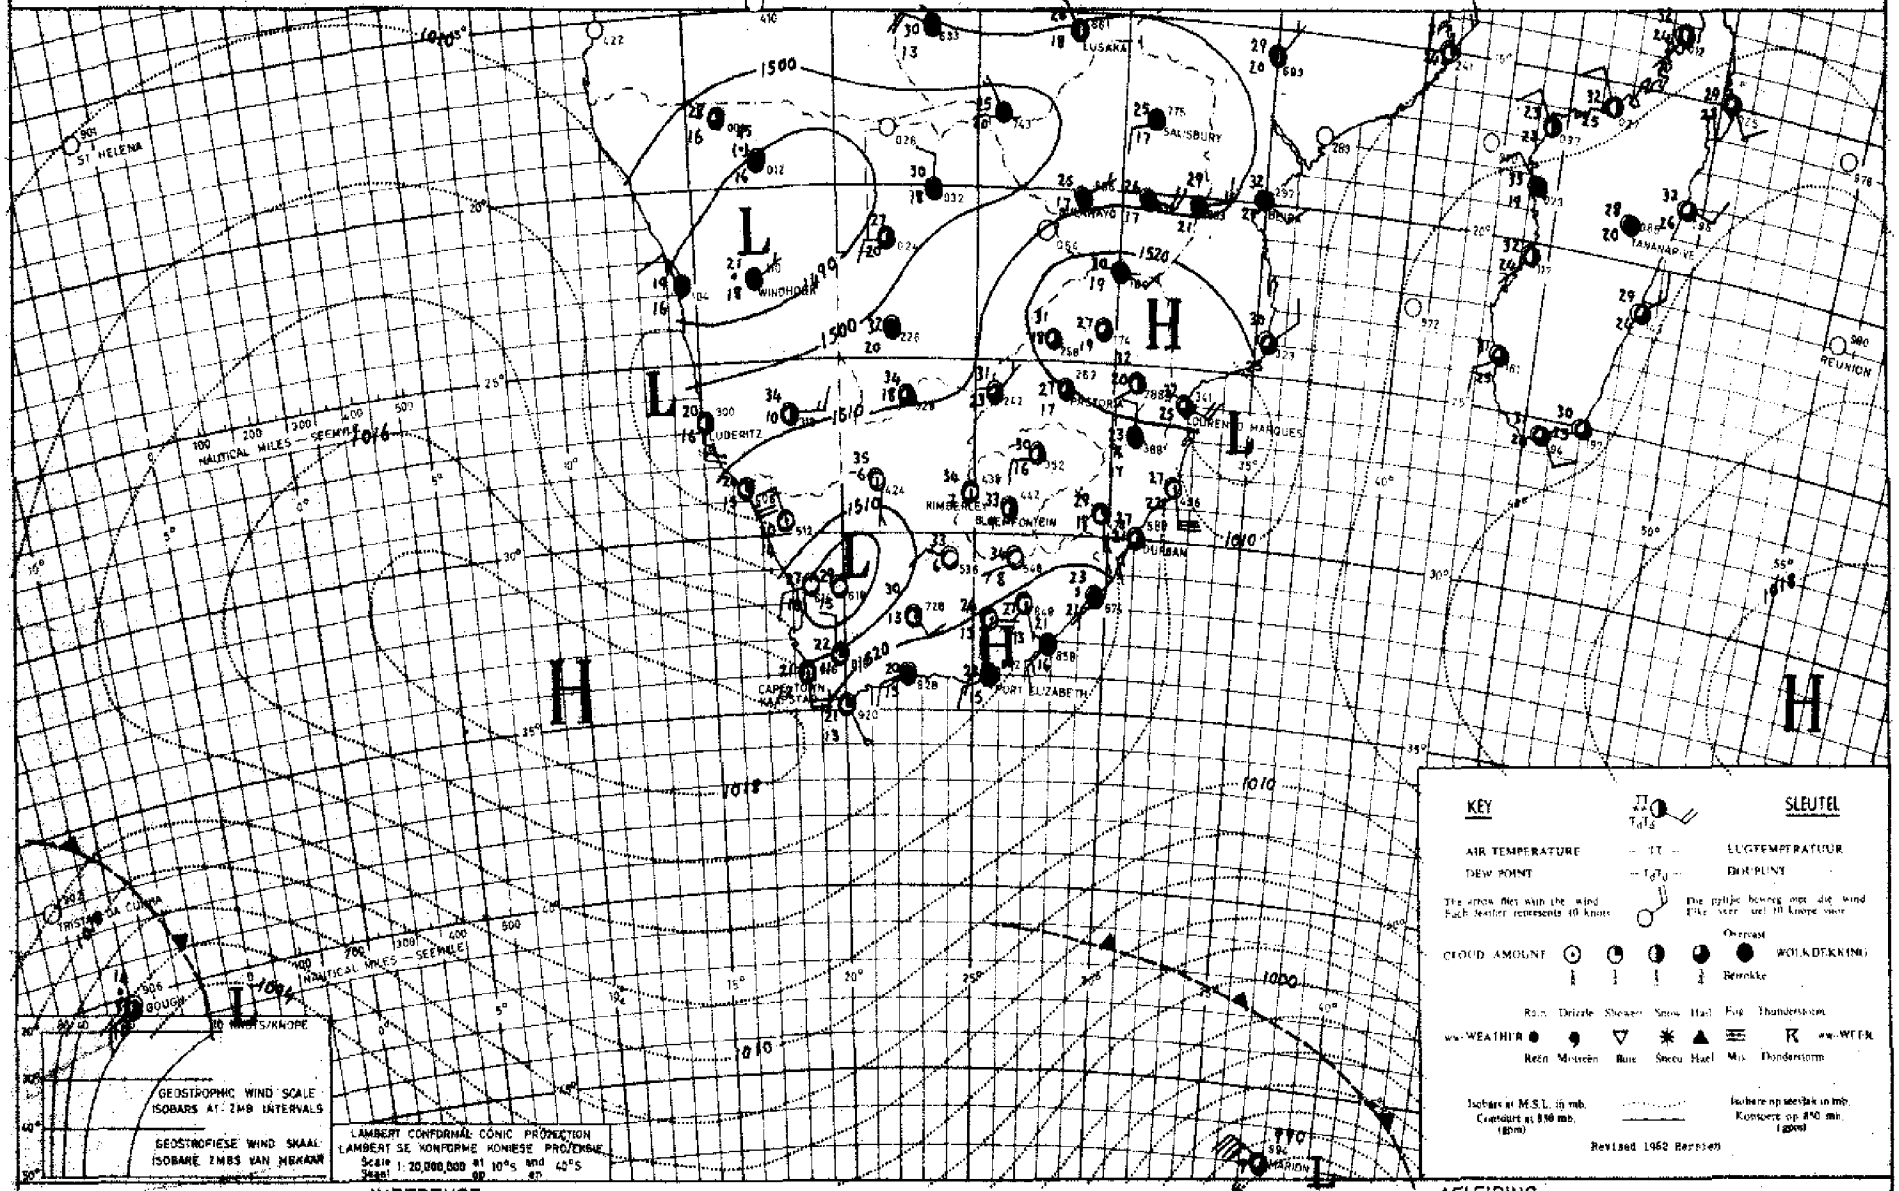
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 21 - 2 - 19 69 DATUM — AFLEIDING

A cell of high pressure is moving eastwards and it will become cloudy over the southern and south-eastern coastal regions with light rain. The air over the interior is still moist and, with low pressure systems in the west, thundershowers will occur over most areas.

'n Rug van hoë druk word verwag om na die suidooskus te beweeg en bewolkte toestande met ligte reën sal oor die Suid-en suidooskusgebied voorkom. Oor die binneland bly die lug vogtig en met laedrukstelsels in die weste kan buie of donderbuie oor meeste gebiede verwag word.

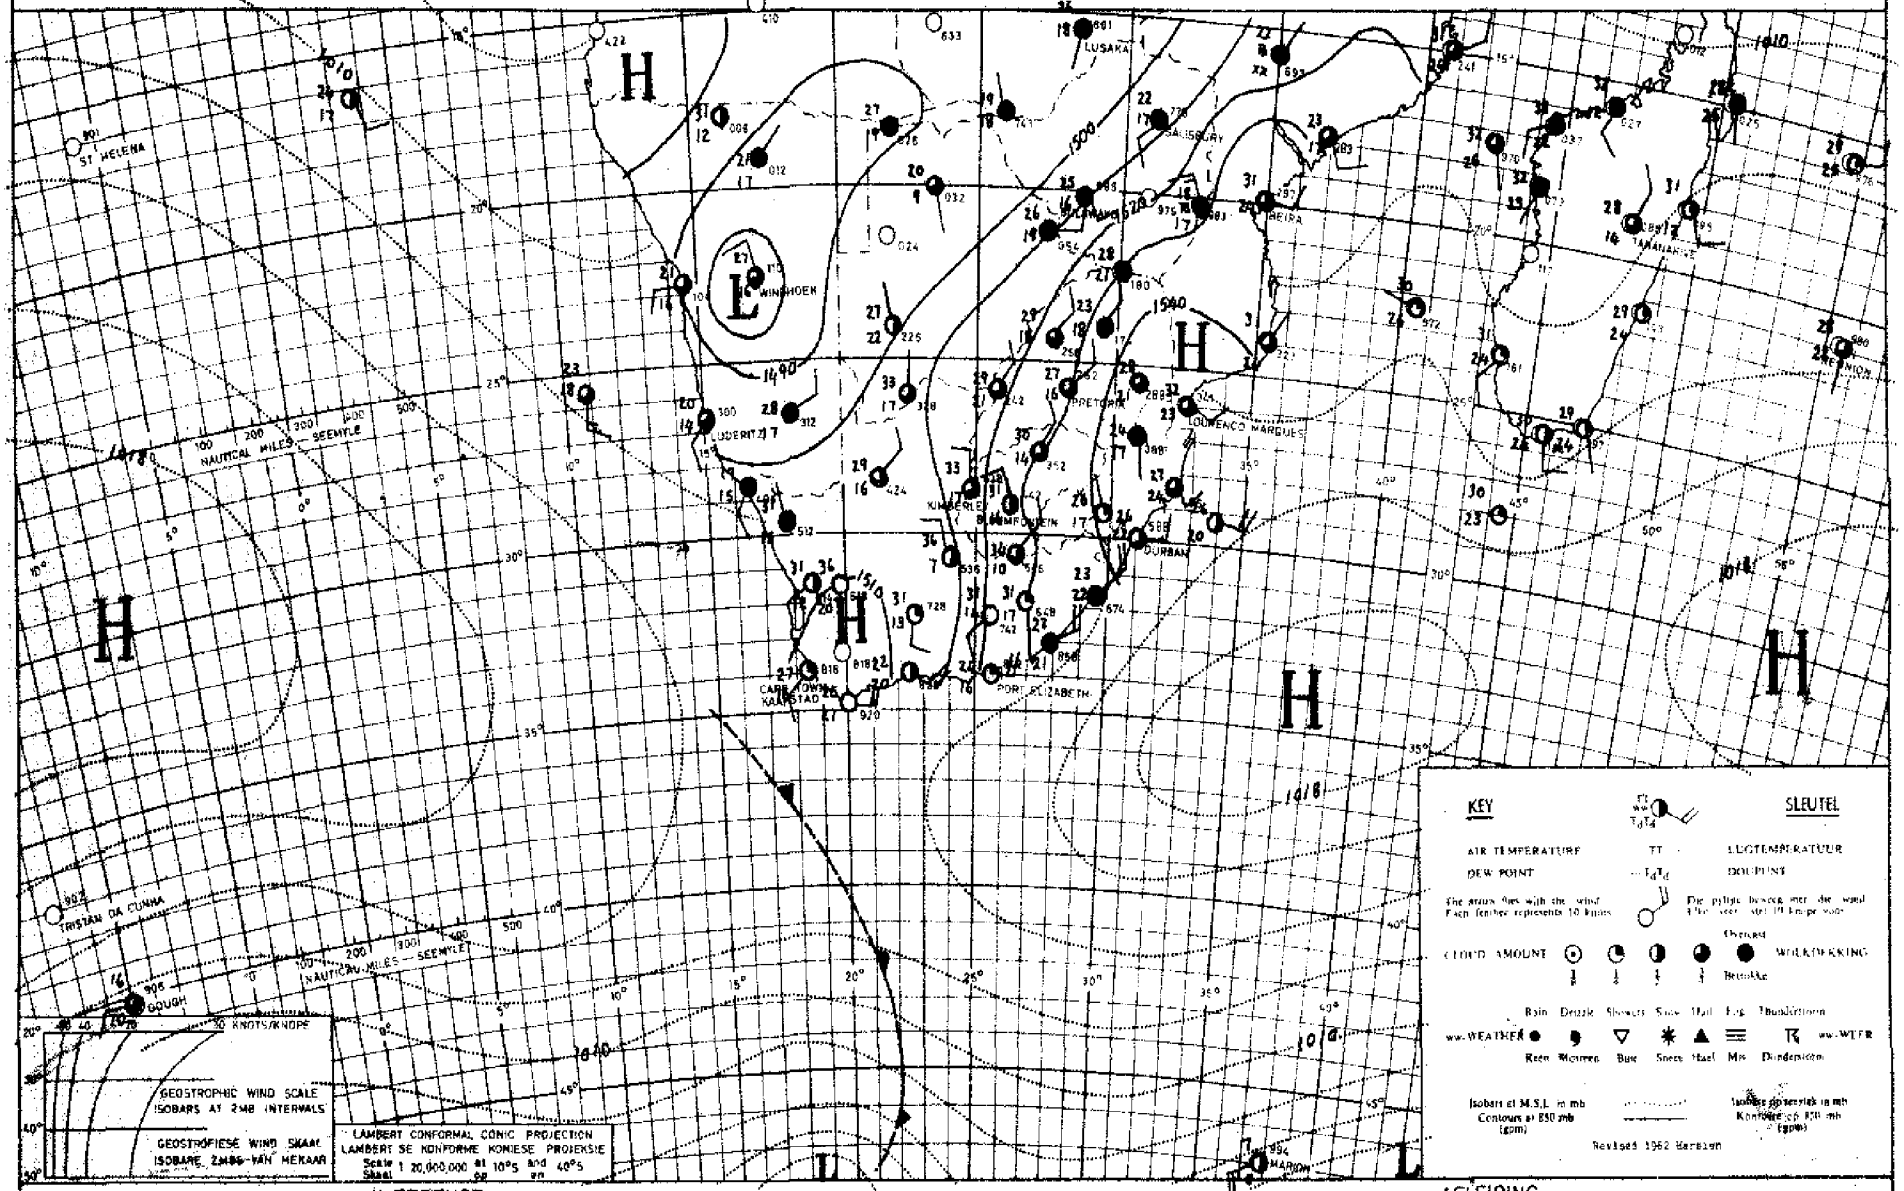
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

DATE 22. - 2. - 19.69 DATUM

AFLEIDING

Between the low over S.W.A and the high over Eastern Transvaal moist air will flow southwards over the interior so that showers and thunder-showers will occur over most areas except the western and southern Cape. The cold front south-west of Cape Town will bring cloudy conditions with rain over the south-western and southern coastal regions.

Tussen die laag oor S.W.A en die hoog oor Oos-Transvaal word vogtige lug suidwaarts oor die binneland gevoer sodat buie en donderbuie sal voorkom oor die meeste gebiede behalwe Wes-en Suid-Kaapland. Die kouefront suidwes van Kaapstad sal weereens bewolkte weer met reën oor die Suidwestelike en suidelike kusgebiede teweegbring.

With the trough over the western parts of the country and moist air having spread over the whole interior, showers and thundershowers can be expected over all areas. With the high ridging in south of the continent cloudy weather with rain will occur over the southern and eastern coastal regions.

Met die trog oor die westelike dele van die land en vogtige lug wat oor die hele binneland uitgebrei het, kan buie en donderbuie oor feitlik alle gebiede verwag word. Met die hoog wat suid van die land indruk, sal bewolkte weer met reën oor die suidelike en oostelike kusgebiede voorkom.

INFERENCE

DATE 24 - 2 - 19 62 DATUM

AFLEIDING

Warm, moist air is flowing southwards over all parts of the interior while a trough of low pressure extends from southern Cape to S.W.A so that fairly general rain will fall over Eastern Cape and scattered showers over the rest of the country. Behind the cold front cooler air will spread over the southern coastal regions.

Warm, vogtige lug stroom nog oor alle dele van die binneland terwyl 'n trog van lae lugdruk strek van Suidelike Kaapland na S.W.A sodat taamlik algemene reën sal uitsak oor Oos-Kaapland en verspreide buie oor die res van die land. Agter die koufront sal koeler weer oor die suidelike kuststreke uitbrei.

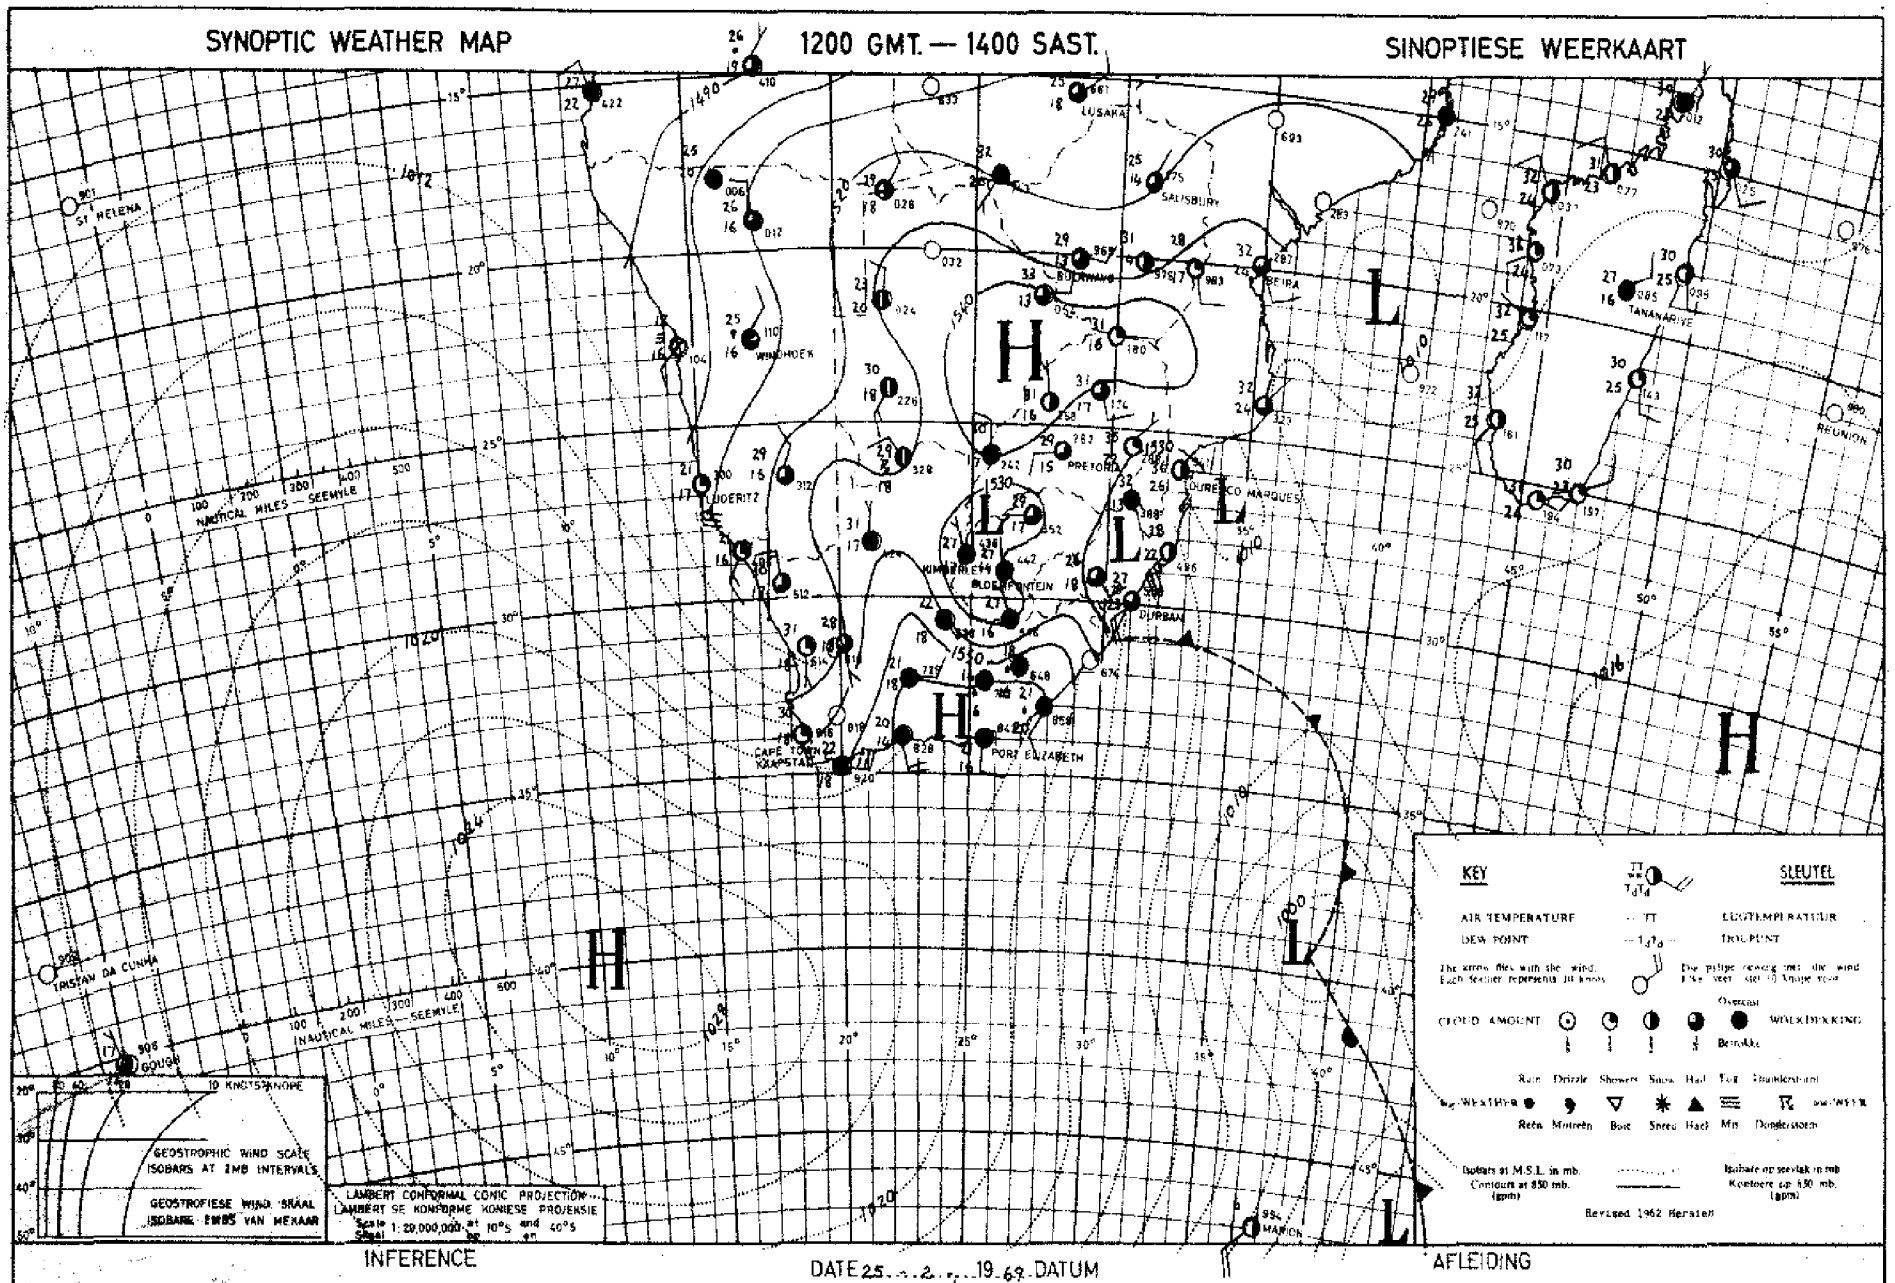
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



KEY — SLEUTEL

AIR TEMPERATURE — LUGTEMPERATUUR

DEW POINT — DOUPUNT

The arrow flies with the wind. Each feather represents 10 knots.

Die pyltjie rigting met die wind. Elke veer stel 10 knope voor.

CLOUD AMOUNT — WOLKEDEKKING

Overcast / Bewolk

WEATHER — WEER

Rain, Drizzle, Showers, Snow, Hail, Fog, Thunderstorm

Reën, Motreën, Boie, Sneeu, Hael, Mis, Donderstorm

Isobars at M.S.L. in mb. Contours at 850 mb. (gpm)

Isobare op seevlak in mb. Kontoere op 850 mb. (gpm)

Revised 1962 Herziening

INFERENCE — AFLEIDING

DATE 25 - 2 - 19 69 DATUM

A high pressure system is moving eastwards and will cause rain along the Natal coast as well as an inflow of moister air over Transvaal. With the trough of low pressure in the west scattered rain and thundershowers will occur over most of the interior.

'n Hoëdrukstelsel beweeg na die Natalse kus en sal bewolkte toestande met reën oor dié gebied veroorsaak. Vogtiger lug sal ook oor Transvaal instroom en met die laedruktrog oor die westelike dele, sal verspreide reën en donderbuie oor die meeste dele van die binneland voorkom.

INFERENCE

DATE 26 - 2 - 1969 DATUM

AFLEIDING

The trough system extending from S.W.A to the south-western Cape will advance eastwards and the air over the interior remains moist so that scattered showers and thundershowers will occur over most areas. A coastal low will move along the coast followed by strong south-westerly winds.

Die trogstelsel wat vanaf S.W.A. na Suidwes-Kaapland strek, sal effens ooswaarts beweeg en die lug oor die binneland bly vogtig sodat verspreide buie en donderbuie nog oor baie dele sal voorkom. 'n Kuslaag sal ooswaarts langs die kus beweeg gepaard met sterk suidwestewinde.

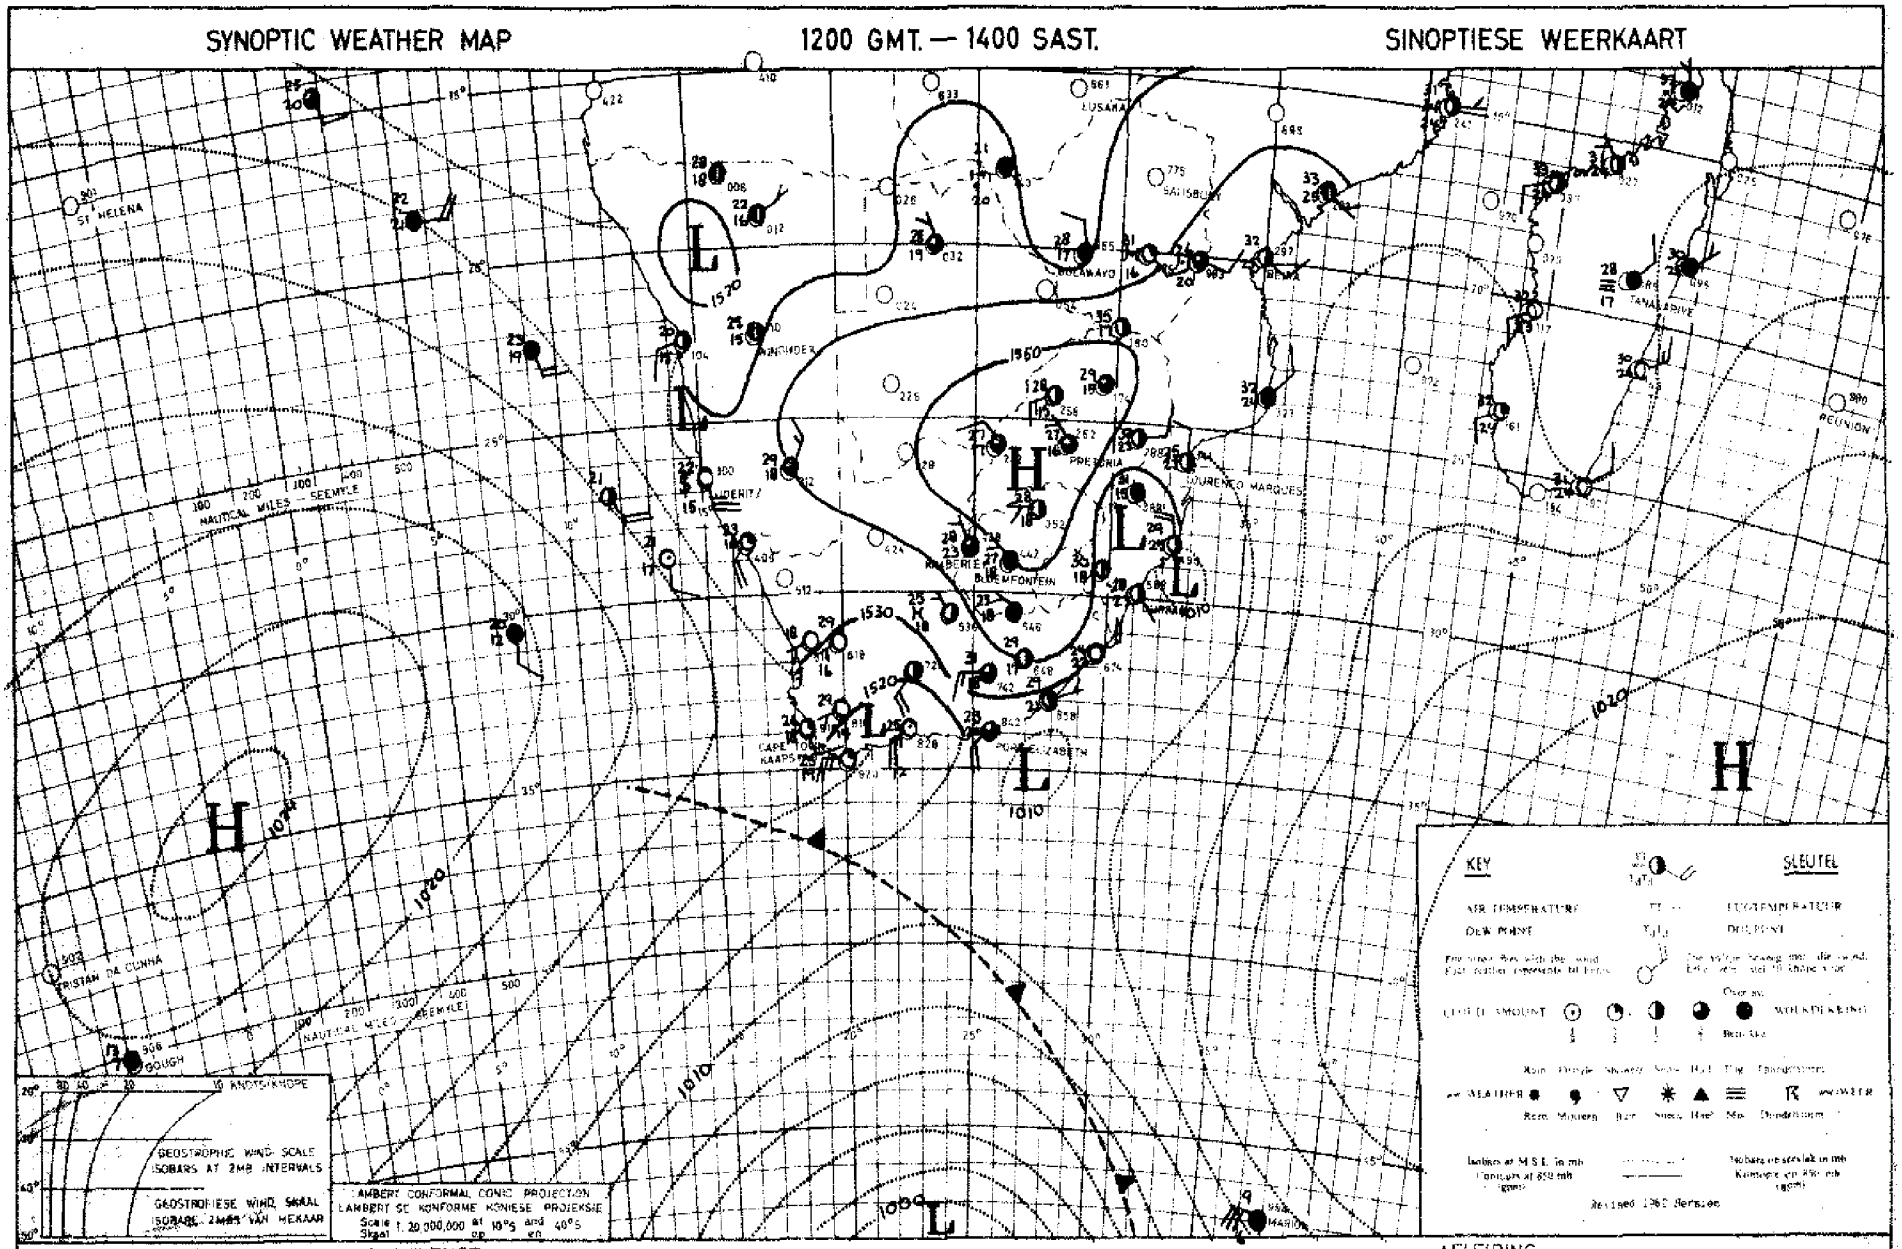
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



LAMBERT CONFORMAL CONIC PROJECTION
LAMBERT SE KONFORME KONIESE PROJEKSIE
Scale 1:20,000,000 at 10°S and 40°S
Skaal 1:20,000,000 op 10° en 40°

INFERENCE — DATE 27-2-69 DATUM — AFLEIDING

With a trough of low pressure over the western part of the country and the air fairly moist thunderstorms will develop over the eastern and central parts of the country. The Atlantic high is ridging round the coast causing fine weather on Cape south-west coast but cloudy weather with rain along the south-east and east coasts.

Met 'n trog van lae druk oor die westelike dele van die land en vogtige lug teenwoordig kan donderbuie oor die sentrale en oostelike dele van die land verwag word. Die Atlantiese hoog druk langs die Kaapse kus in en veroorsaak mooiweer langs die Kaapse suidwestekus maar bewolkte weer oor die suidoos- en ooskus waar reën sal voorkom.

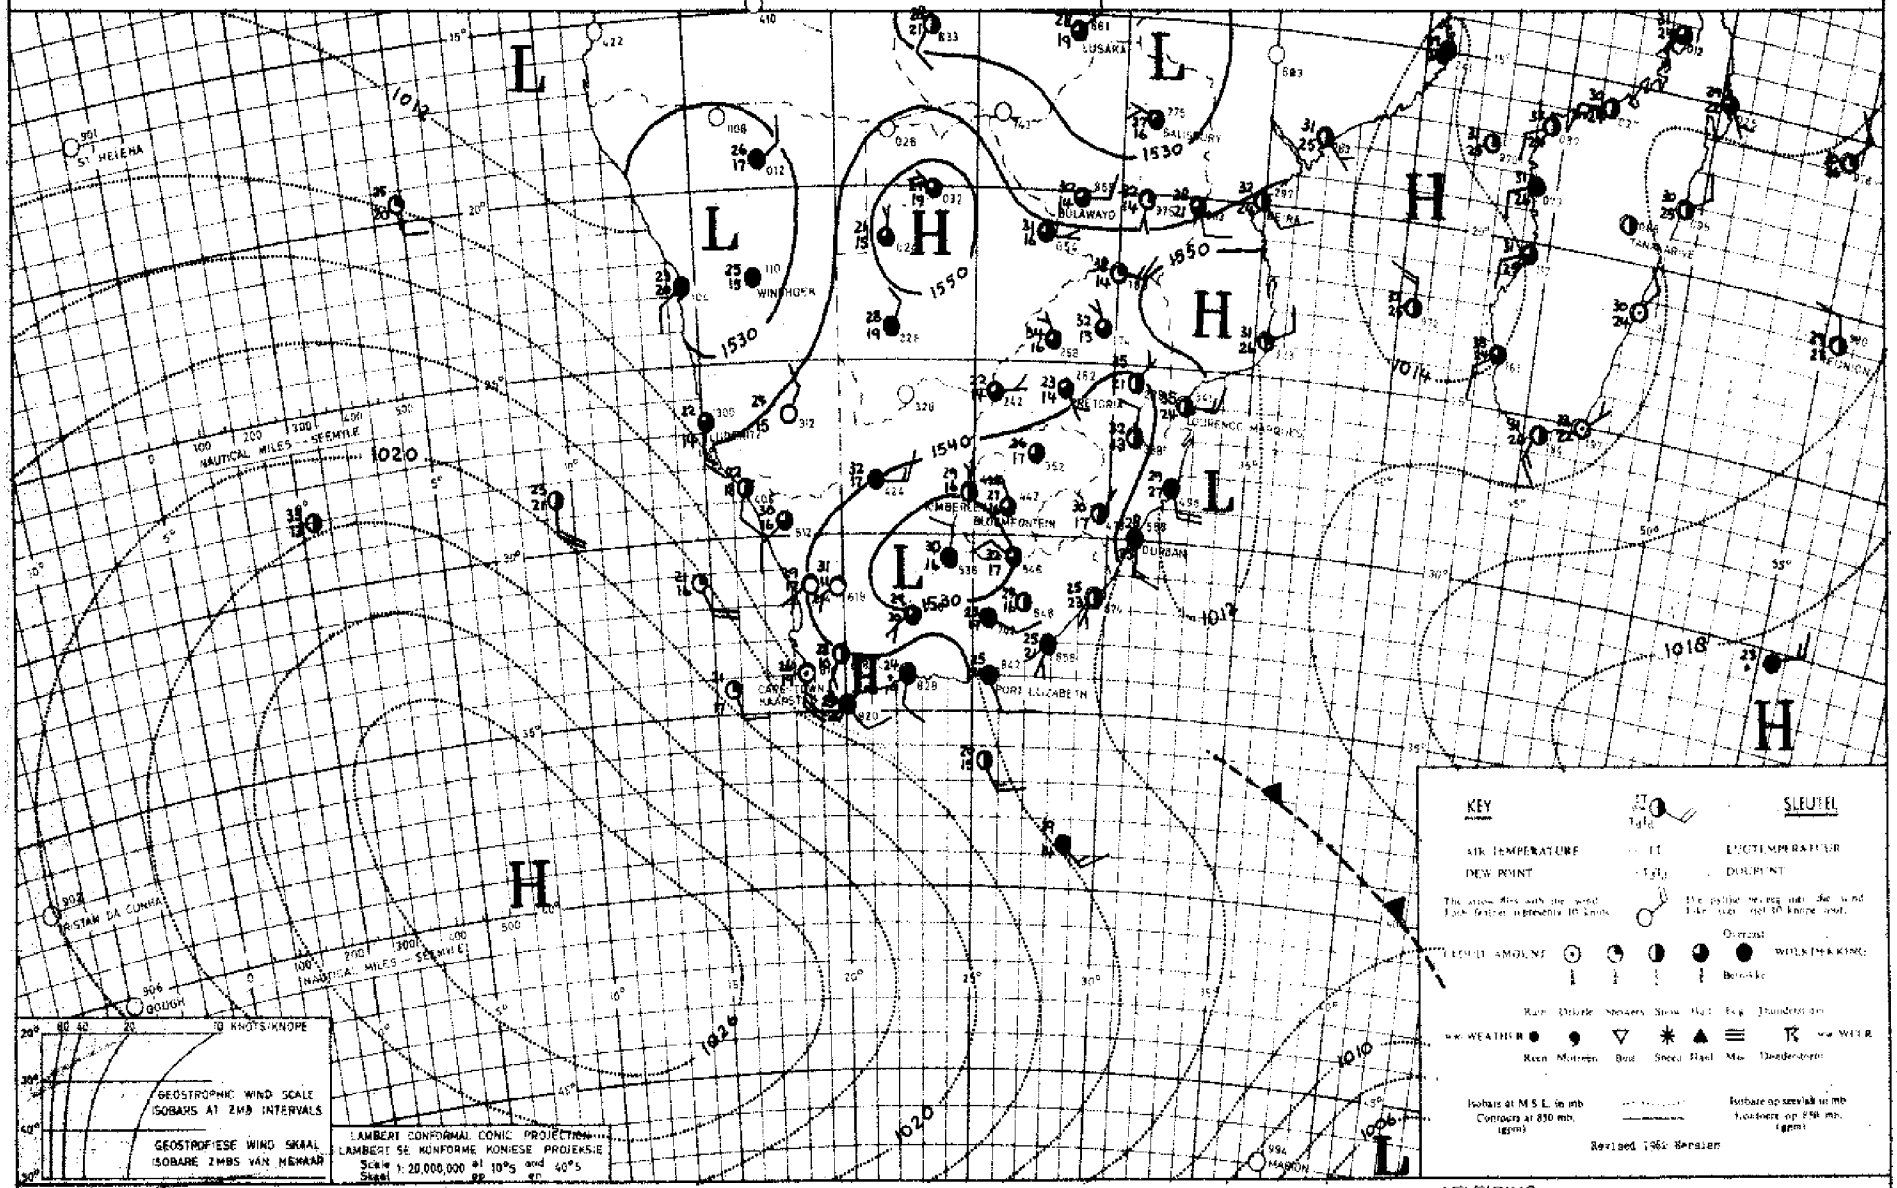
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 28 - 2 - 1969 DATUM AFLEIDING

With an onshore gradient along the south-eastern and eastern coasts it will be cloudy with rain or drizzle. Over the interior the air is very moist and rain or showers will occur over most regions.

Met 'n landwaartse stroming van seelug oor die suidoos- en ooskus sal dit bewolk wees met reën of motreën. Oor die binneland is die lug baie vogtig en reën of buie sal oor die meeste dele voorkom.

Revised 1962 Herziën

INFERENCE — DATE 17.3.69 DATUM — AFLEIDING

The high pressure system is ridging round the Coast causing cloudy weather with rain on the southern and eastern coasts. With a trough of low pressure over the interior rain or thunderstorms will occur over the eastern and central parts of the country and northern S.W.A.

Die hoëdrukstelsel druk suid van die land in en het tot gevolg bewolkte weer met reën oor die suid- en ooskuskstreke. Met 'n trog van lae druk oor die land sal reën of donderbuie voorkom oor die oostelike en sentrale dele van die Republiek en noordelike S.W.A.

Makaimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

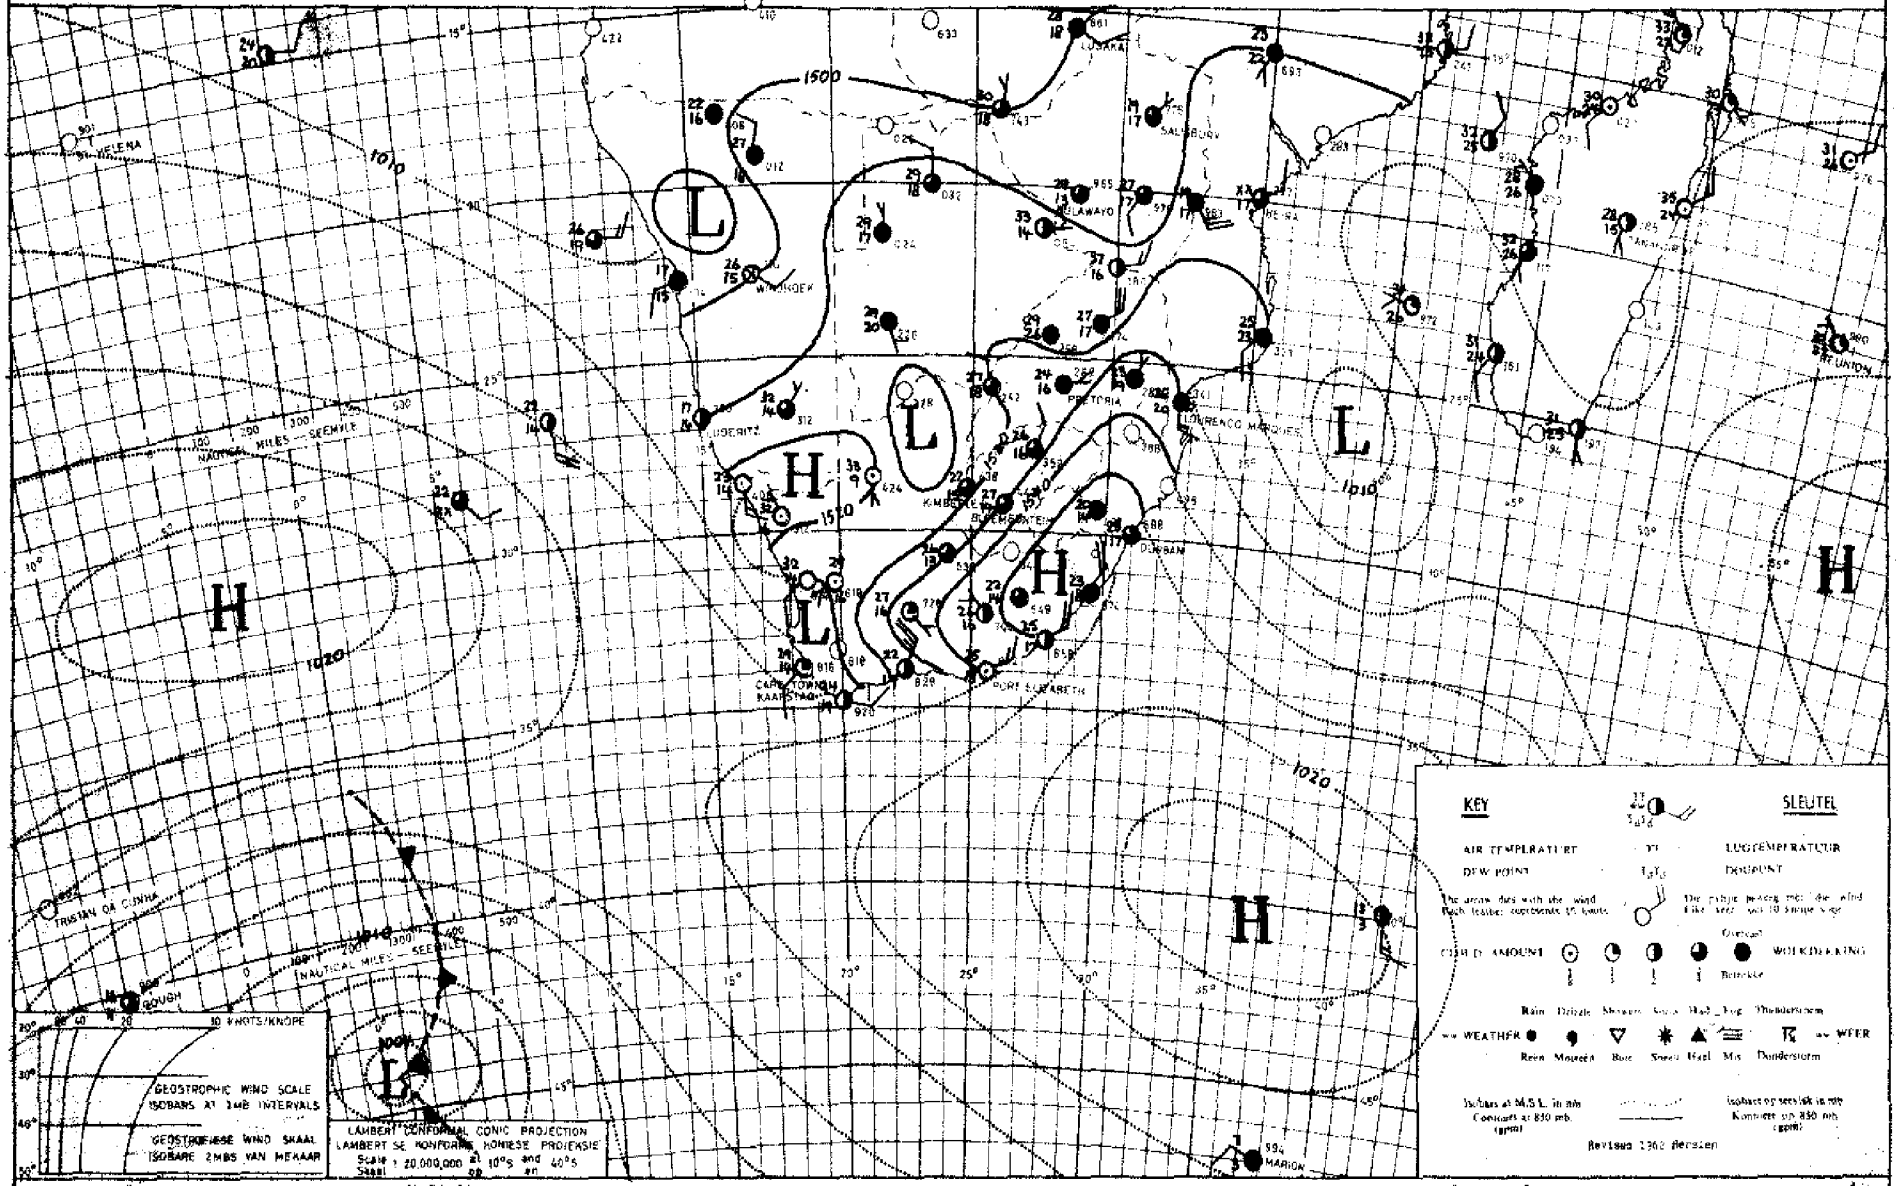
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 2-3-1969 DATUM AFLEIDING

The high pressure system along the east coast is moving eastwards and therefore the weather will clear along the coast. Thunderstorms will again develop over the central, northern and north-eastern parts of the country owing to the trough of low pressure over the central parts of the country.

Die hoëdrukstelsel langs die ooskus beweeg ooswaarts dus word opklaring langs die kusstreke verwag. Maar met 'n trog van lae druk oor die sentrale binneland kan donderstorms weer voorkom oor die sentrale, noordelike en noordoostelike dele van die land.

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0600 SAST op

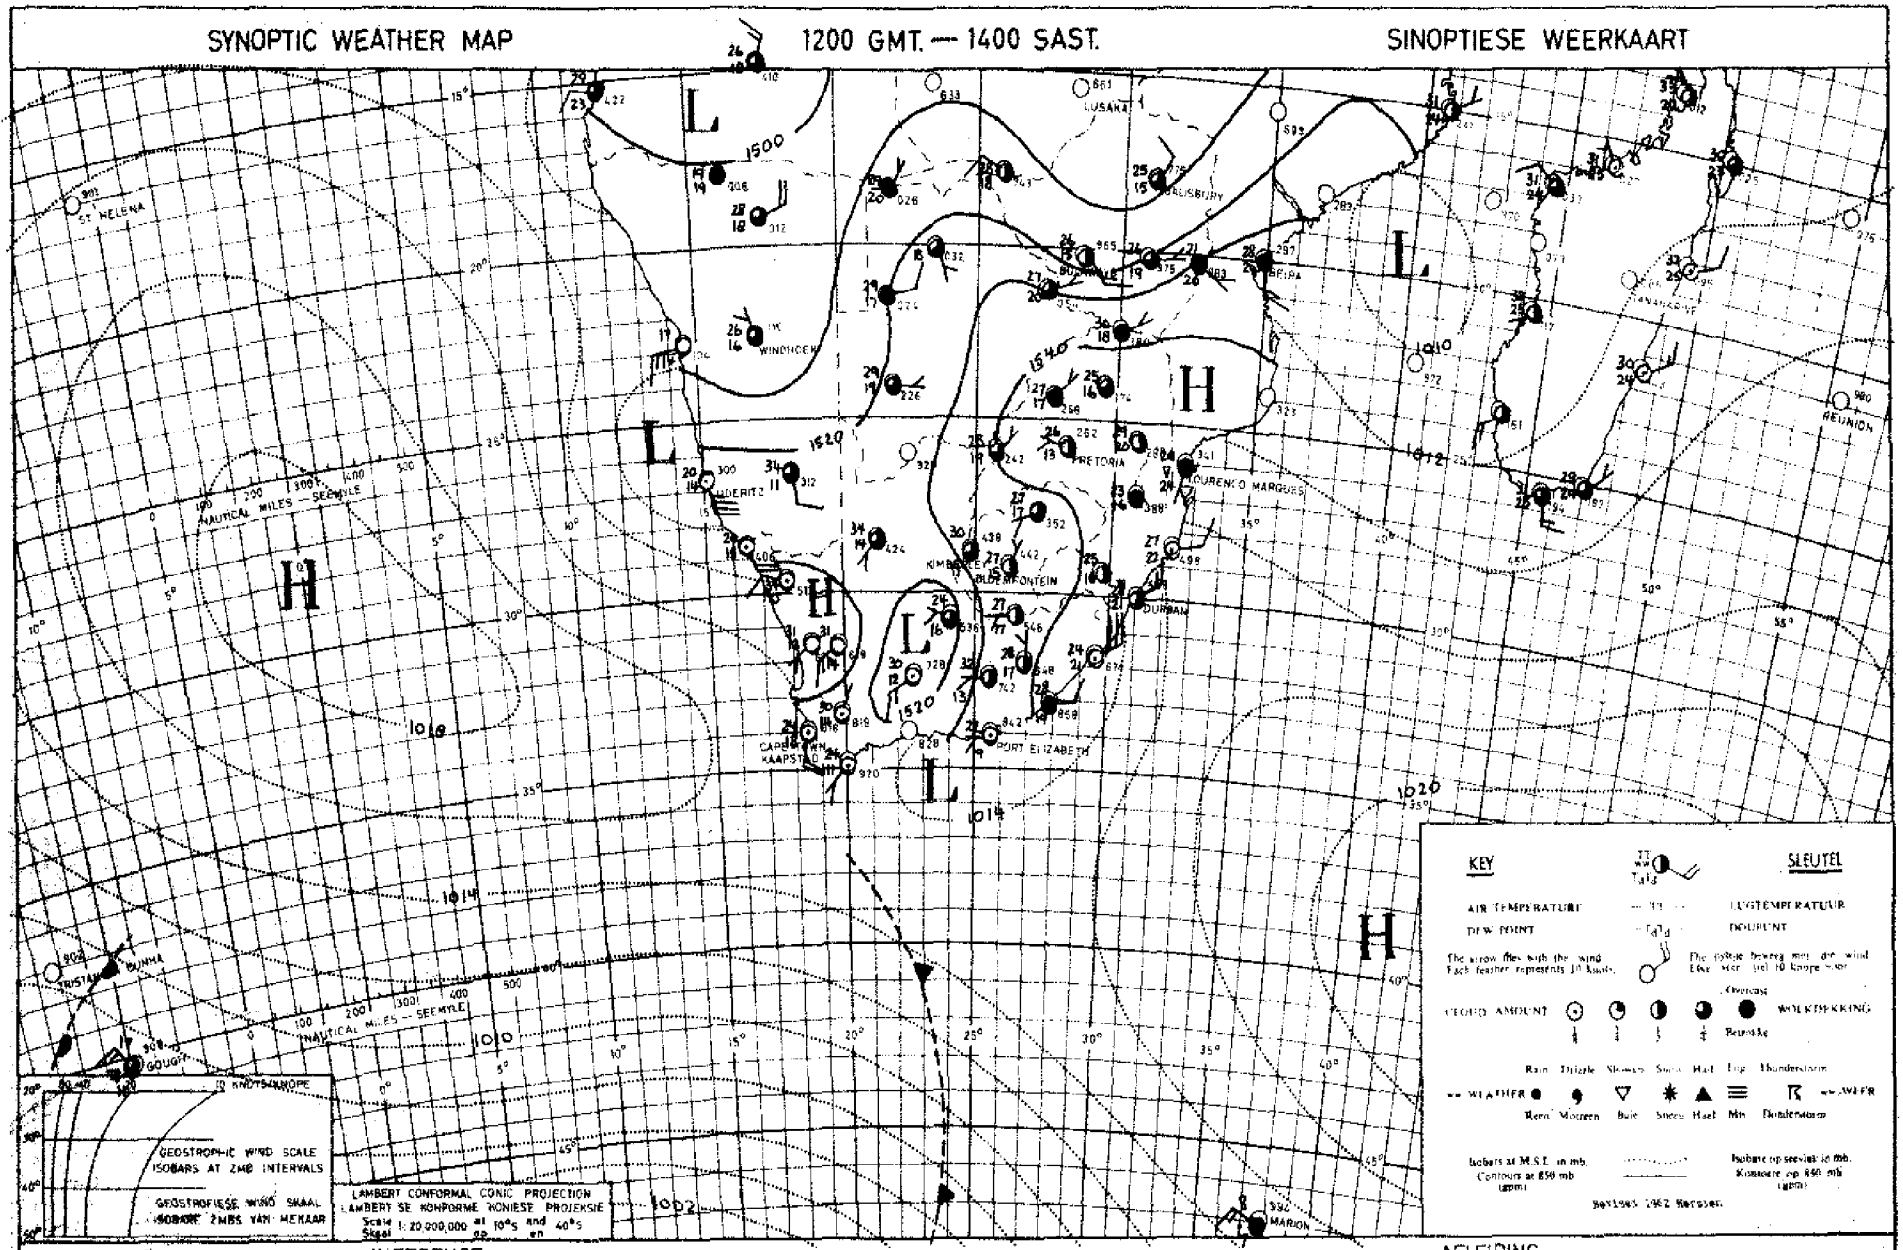
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 3-3-1969 DATUM — AFLEIDING

With moist air in circulation isolated thundershowers will develop over most parts of the Transvaal, O.F.S., Natal, Northern and Eastern Cape, Botswana and S.W.A. Over the remainder of the interior and on the coast it will be mainly fine and warm.

Vogtige lug sirkuleer nog oor die binneland en los donderbuie word verwag oor die meeste dele van die Transvaal, O.V.S., Natal, Noord- en Oos-Kaapland, Botswana en S.W.A. Oor die res van die binneland en die kusgebiede sal dit hoofsaaklik mooiweer en warm wees.

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

INFERENCE

DATE 5-3-1969 DATUM

AFLEIDING

With moist air in circulation, thundershowers are expected to recur over the whole interior, excepting the Transvaal Lowveld and the South-West Cape. The cold front south of the country is not expected to influence conditions significantly.

Vogtige lug sirkuleer oor die binneland en verdere donderbuie word oor die hele binneland verwag uitgesonderd die Transvaalse laeveld en Suidwes-Kaap. Die koue-front suid van die land sal nie die weer noemenswaardig beinvloed nie.

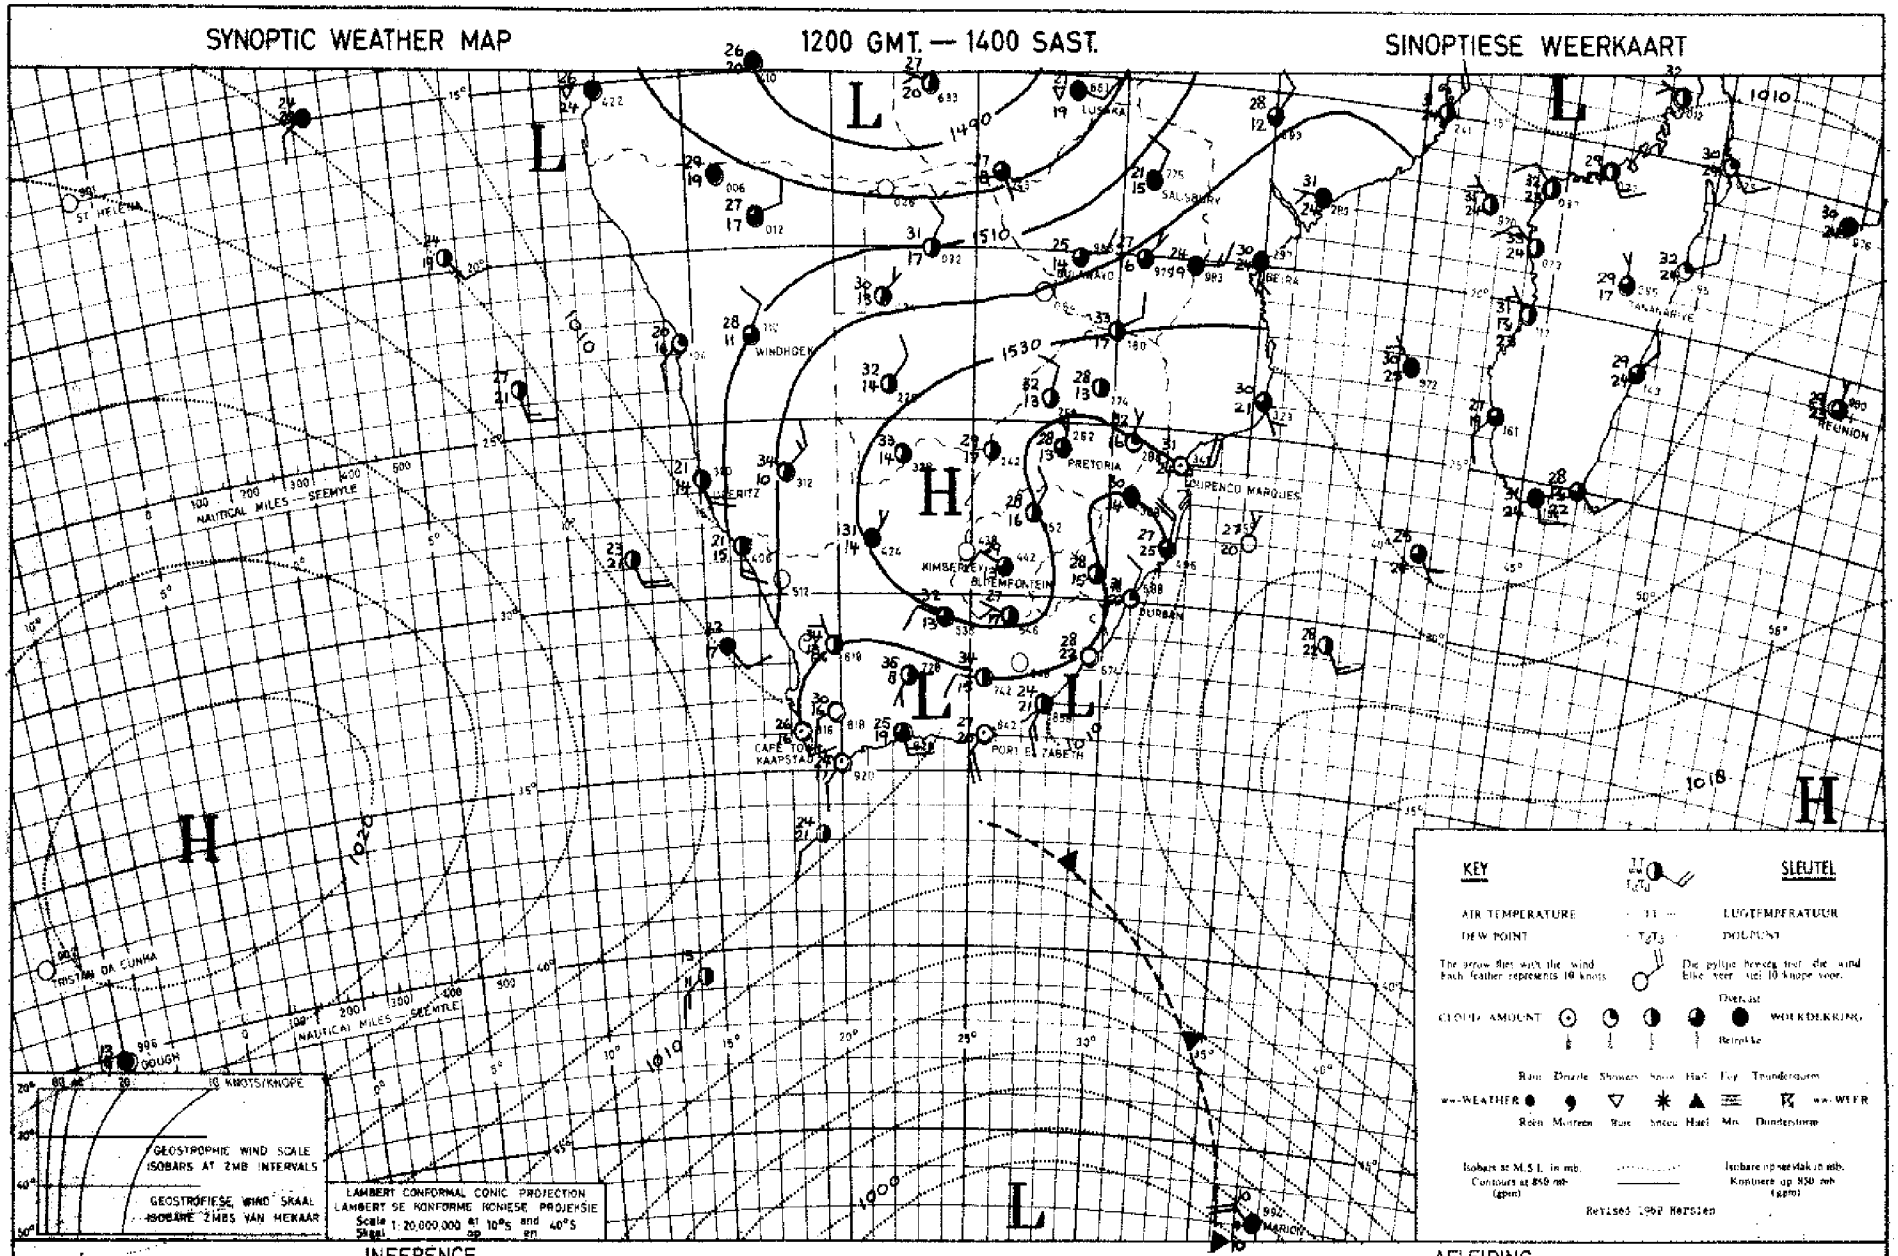
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 6-3-1969 DATUM AFLEIDING

Moist air is flowing over the interior but the upper circulation is anti-cyclonic so that only isolated thundershowers will occur over the eastern half of the country. Scattered showers will, however, occur over S.W.A. and the western parts of the Republic.

Vogtige lug vloei oor die binneland maar die bolugsirkulasie is antisiklonaal sodat slegs los donderbuie oor die oostelike helfte van die land sal uitsak. Verspreide buie sal voorkom oor S.W.A. en die westelike dele van die Republiek.

DATE 7 - 3 - 19 69 DATUM

AFLEIDING

There are troughs of low pressure over the Cape Province and S.W.A. while fairly moist air is flowing over the interior. Therefore scattered thundershowers will occur over most regions, except Western Cape.

Daar is trôe van lae druk oor die Kaapprovinsie en S.W.A. terwyl betreklik vogtige lug oor die binneland stroom. Gevolglik sal donderbuie oor die meeste dele, uitgesonderd Wes-Kaapland, voorkom.

DATE 8-3-1969 DATUM

AFLEIDING

The cold front near Cape Town will move eastwards and cold, cloudy weather with rain will spread over the Cape Province. In the warm, moist air in advance of the front scattered showers and thunder- showers will occur.

Die kouefront naby Kaapstad sal ooswaarts beweeg en koue, bewolkte weer met reën sal uitbrei oor die Kaapprovinsie. In die warm vogtige lug voor die front sal verspreide buie en donderbuie voorkom.

INFERENCE

DATE 9 - 3 - 1969 DATUM

AFLEIDING

There is a strong influx of colder air behind the cold front and it is expected that this and the associated trough of low pressure will cause cool weather with rain and showers over the central and eastern parts of the country with a gradual clearance setting in over the Western Cape.

Daar is 'n sterk instroming van kouer lug agter die koufront en na verwagting sal dit tesame met die gepaardgaande trog van lae druk koel weer met buie en reën oor die sentrale en oostelike dele van die land veroorsaak. Oor die westelike dele van Kaapland sal dit geleidelik opklaar.

INFERENCE

DATE ...19.-3-...19.69.DATUM

AFLEIDING

With a trough of low pressure over the interior and the inflow of moist air round the high pressure system, general rain and showers are expected over the eastern parts of the country as well as snow on the Drakensberg range.

Met 'n trog van lae druk oor die binneland en die invloei van vog om die hoëdrukstelsel kan algemene reën en buie verwag word oor die oostelike dele van die land en ook sneeu oor die Drakensberge.

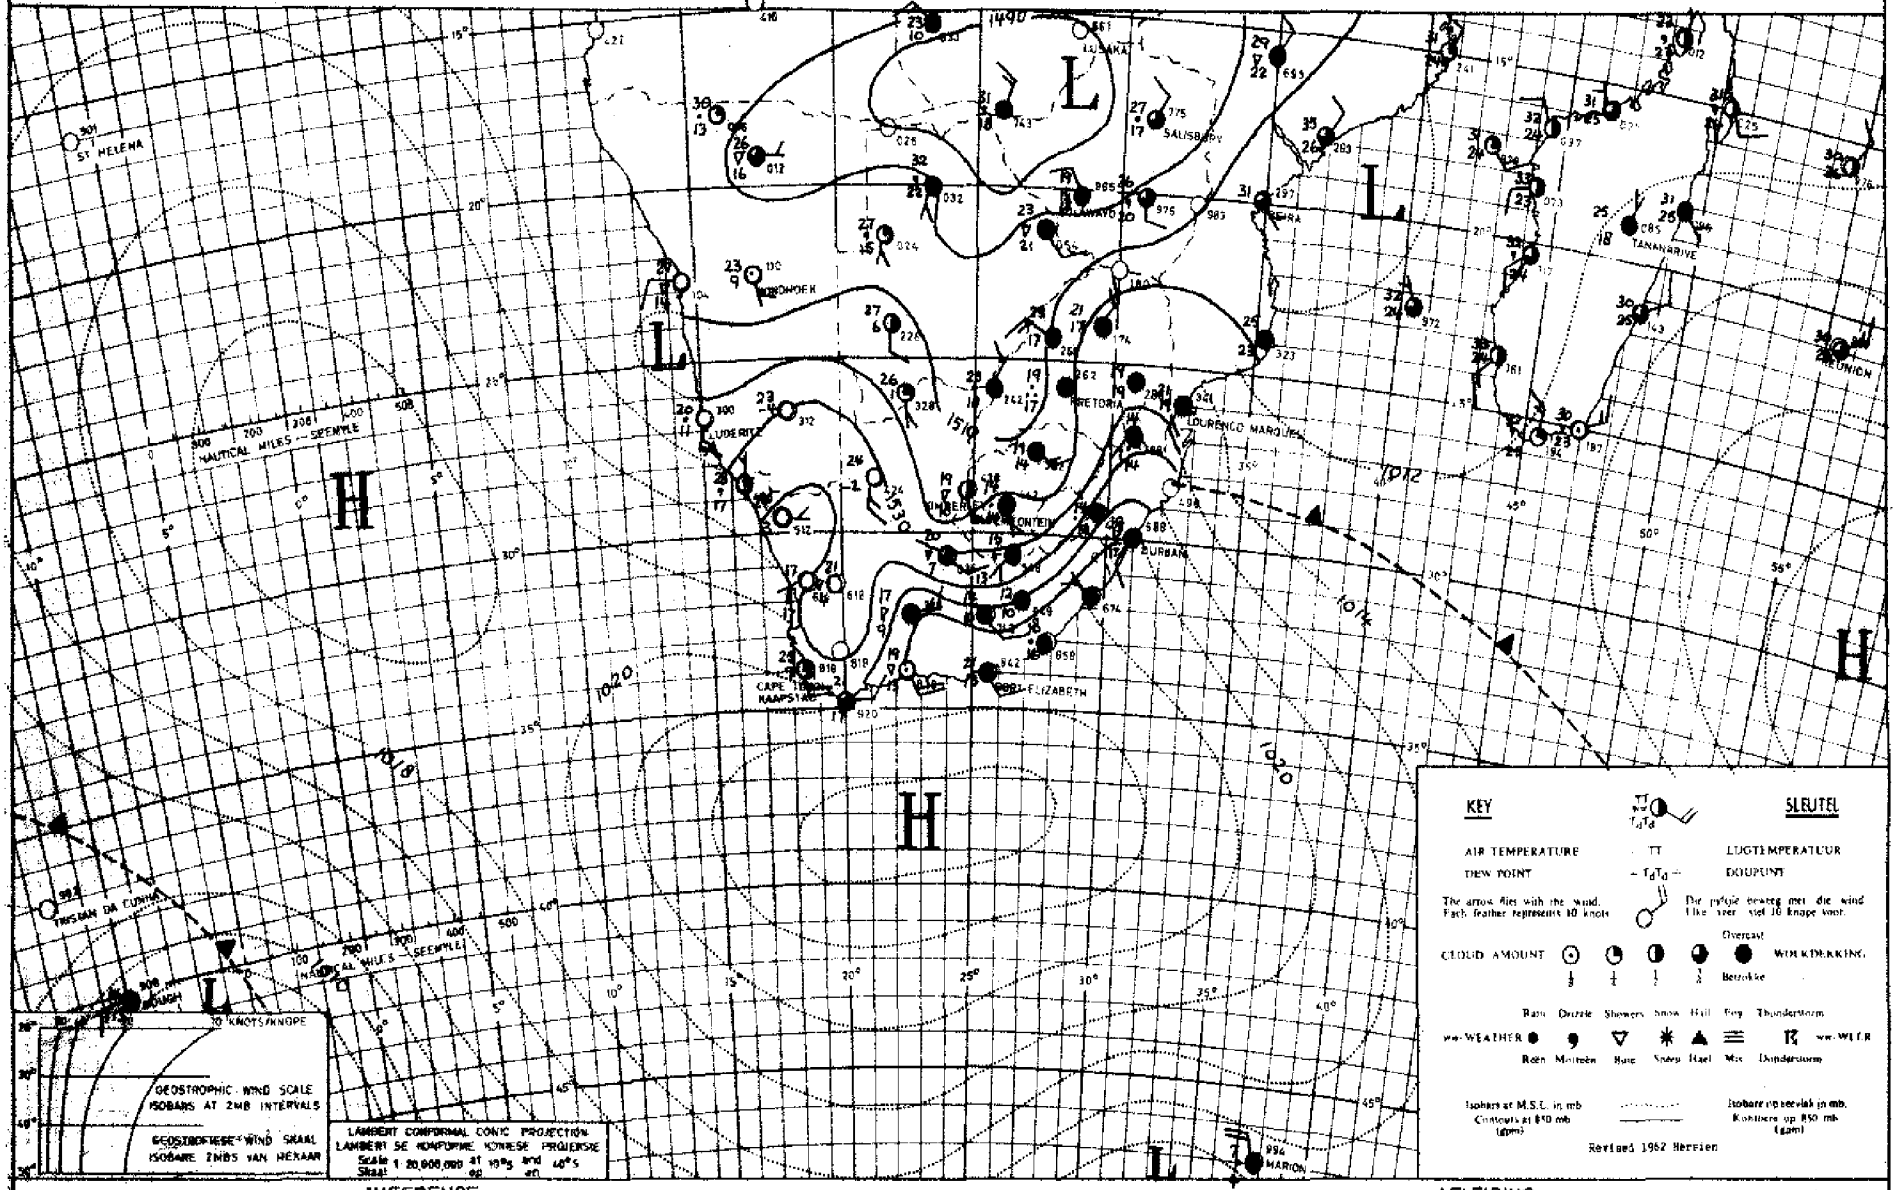
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 11-3-1969 DATUM AFLEIDING

The high south of the country is moving Northeastwards and with favourable upper circulation, further rain will occur over Transvaal, O.F.S., Natal, Northern Botswana, Lesotho, Swaziland. It will clear gradually along the South Coast.

Die hoog suid van die land beweeg noordooswaarts en met gunstige bolugsirkulasie sal verdere reën voorkom oor Transvaal, O.V.S., Natal, Noordelike Botswana, Lesotho en Swaziland. Dit sal geleidelik opklaar oor die suidkus.

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

INFERENCE

DATE 12 - 3 - 1969 DATUM

AFLEIDING

Drier air in the upper layers are gradually spreading eastwards with the result that it will start clearing from the west over the central parts of the country.

Droër lug in die bolug brei geleidelik ooswaarts uit en gevolglik sal dit begin opklaar uit die weste oor die sentrale dele van die land.

INFERENCE

DATE 13 - 3 - 19 69 DATUM

AFLEIDING

The air over the western and central interior has dried out so that showers and thundershowers will occur mainly over the north-eastern regions. The cold front south-west of Cape Town will cause cloudy weather with light showers over the south coast.

Die lug oor die westelike en sentrale binneland het heelwat droër geword sodat buie en donderbuie nou hoofsaaklik oor die noordoostelike dele sal voorkom. Die koufront suidwes van Kaapstad sal bewolkte weer met ligte buie oor die suidkus veroorsaak.

Moist air is still flowing over the northern and eastern parts of the continent where scattered thundershowers will occur. The high which is gradually ridging in south of the continent will maintain cloudy weather over the southern and eastern coastal regions.

Vogtige lug vloei nog oor die noordelike en oostelike dele van die kontinent en verspreide donderbuie sal oor die gebiede voorkom. Die hoog wat geleidelik suid van die land indruk, sal bewolkte weer oor die suidelike en oostelike kusstreke laat voortduur.

INFERENCE

DATE 16 - 3 - 1969 DATUM

AFLEIDING

As a result of the new cell of high pressure ridging in south of the continent, cool moist air is invading the country from the east while warm moist air is still present over the northern regions. Therefore scattered showers and thundershowers will occur over the eastern, central and northern areas.

As gevolg van die nuwe sel van hoë druk wat suid van die land inbeweeg het, stroom koel, vogtige lug uit die ooste in oor die land terwyl warm, vogtige lug nog oor die noordelike gebiede aanwesig is. Gevolglik sal verspreide buie en donderbuie oor die oostelike, sentrale en noordelike streke voorkom.

The low south of the country is moving eastwards associated with a trough over the interior so that showers and thundershowers will fall over many parts of the Cape Province. The cold front approaching from the west will cause cooler, cloudy weather over the south-western Cape. Over the rest of the interior the air is fairly moist and isolated showers will occur over these areas also.

Die laag suid van die land beweeg ooswaarts tesame met 'n trog oor die binneland sodat buie en donderbuie oor baie dele van Kaapland sal uitsak. Die koufront wat van die weste af nader, sal koeler, bewolkte weer oor Suidwes-Kaapland aanbring. Oor die res van die binneland is die lug ook taamlik vogtig en los donderbuie sal oor dié gebiede voorkom.

INFERENCE — DATE 19-3-1969 DATUM — AFLEIDING

The cold front will advance eastwards along the coast associated with cloudy weather and rain over the southern and eastern parts of the Cape which will spread later over Natal and Eastern Transvaal. Isolated thundershowers will still occur in the warm moist air over the central and northern parts of the interior.

Die koufront sal ooswaarts langs die kus beweeg gepaard met bewolkte weer en reën oor die suidelike en oostelike dele van Kaapland wat later oor Natal en Oos-Transvaal sal uitbrei. In die warm vogtige lug oor die noordelike en sentrale binneland sal los donderbuie voorkom.

INFERENCE

DATE 20-3-1969 DATUM

AFLEIDING

An intense high south of the country will cause cloudy conditions with rain over the eastern coastal areas and over the Transvaal Lowveld. Thunderstorms will develop inland except over the south-western Cape.

'n Sterk hoëdrukstelsel suid van die land veroorsaak bewolkte toestande met reën oor die oostelike kusgebiede en die Transvaalse Laeveld. Met vogtige lug oor die binneland sal donderbuie in die namiddag voorkom behalwe oor Suidwes-Kaapland.

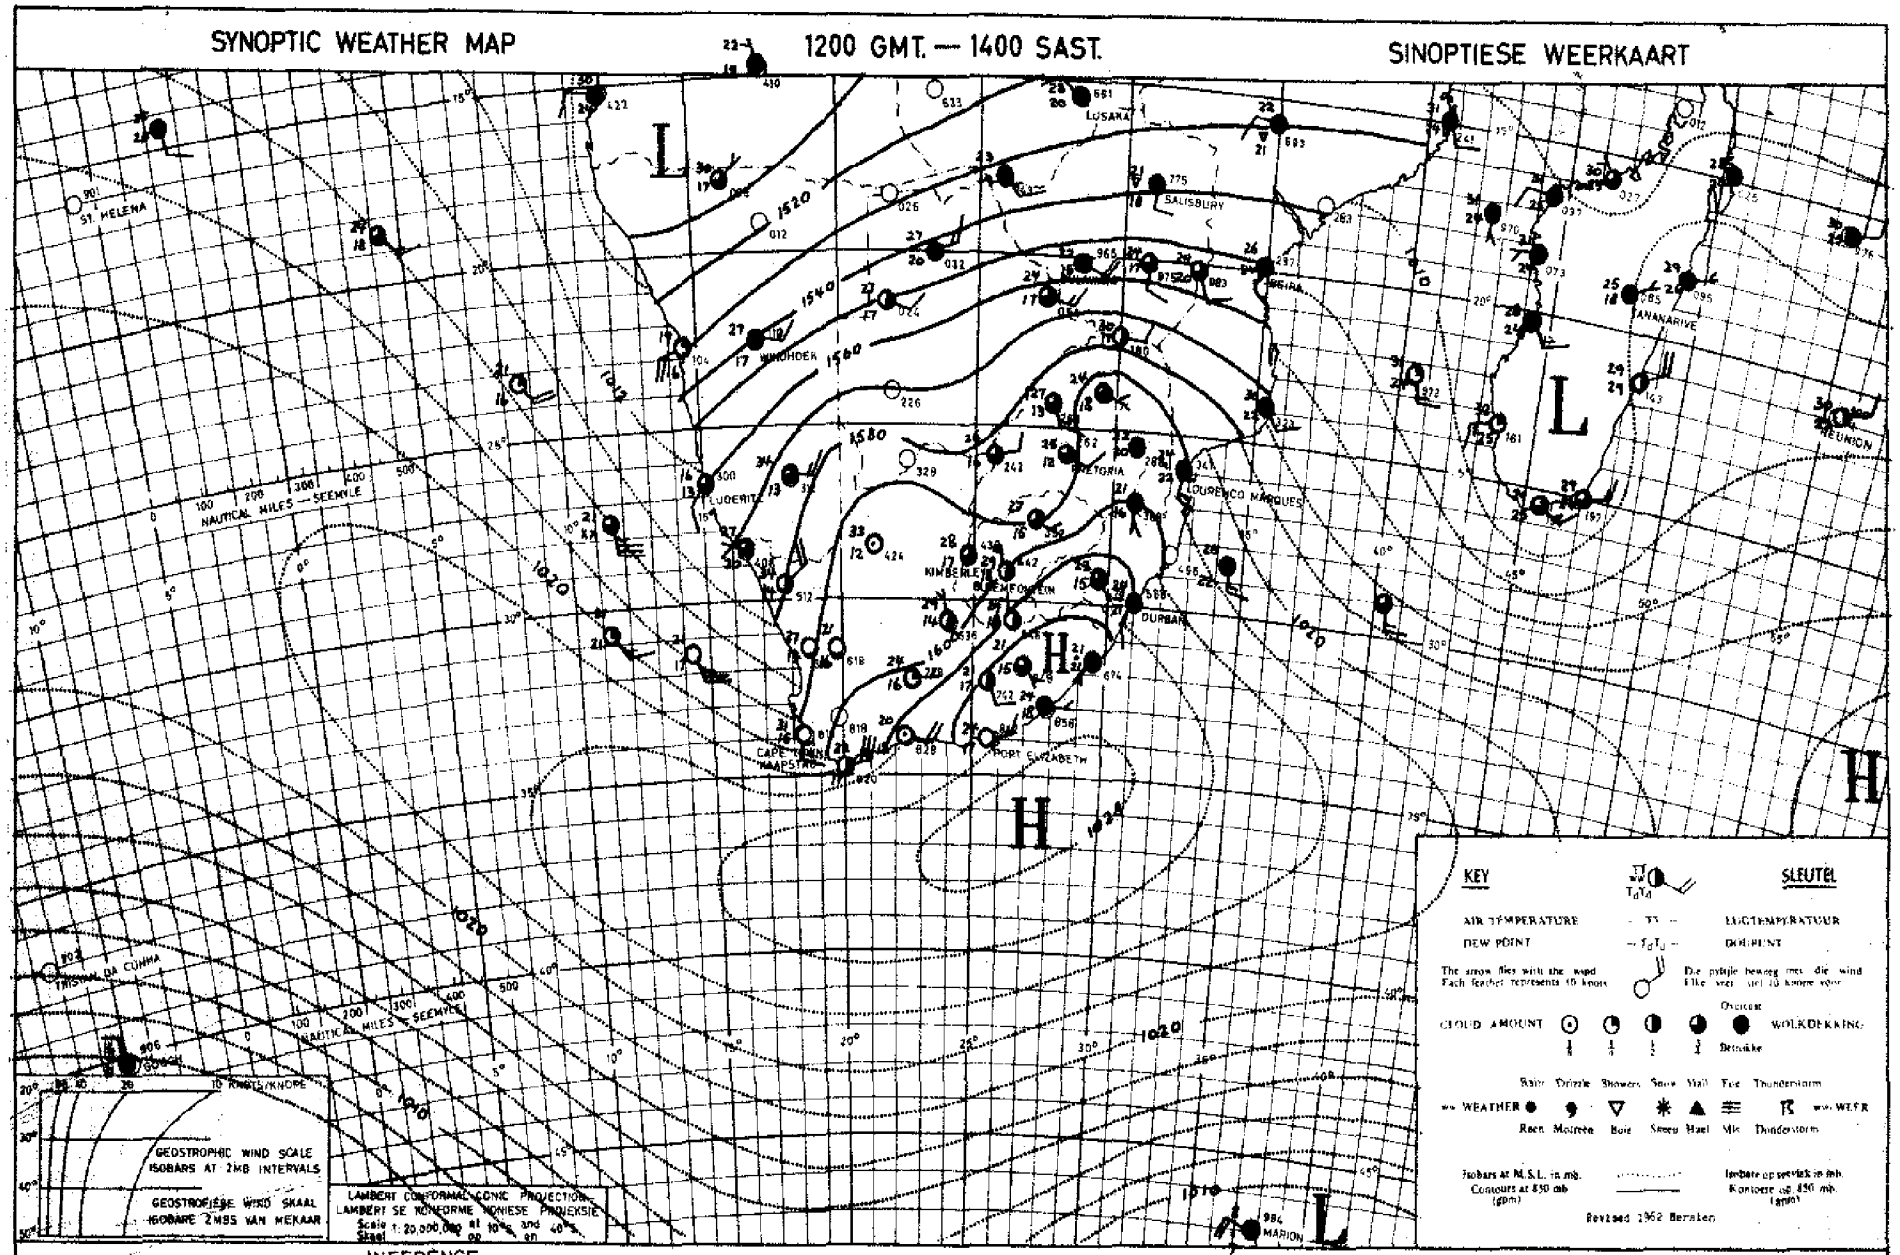
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE

DATE 21-3-1969 DATUM

AFLEIDING

With a strong anticyclonic circulation on the surface and in the upper air over the country it will be fine or only slightly cloudy over most areas. With a strong off-shore flow along the west coast, bergwinds will blow, causing high temperatures over this region.

Met sterk antisiklonale sirkulasie aan die oppervlakte en in die bolug oor die land sal dit mooiweer of net effens bewolk wees oor die meeste dele. Met 'n sterk landaf stroming oor die weskus sal bergwinde gepaard met hoë temperature voorkom.

INFERENCE DATE 22. - 3 - 19 69 DATUM AFLEIDING

Fine weather is expected over the country due to the anticyclonic circulation. A trough of low pressure is developing over northern South West Africa and isolated thundershowers will occur over this region.

Die sirkulasie is antisiklonaal sodat mooiweer verwag kan word, maar met 'n trog van lae druk wat ontstaan het oor noordelike Suidwes-Afrika kan los donderbuie oor dié gebied verwag word.

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

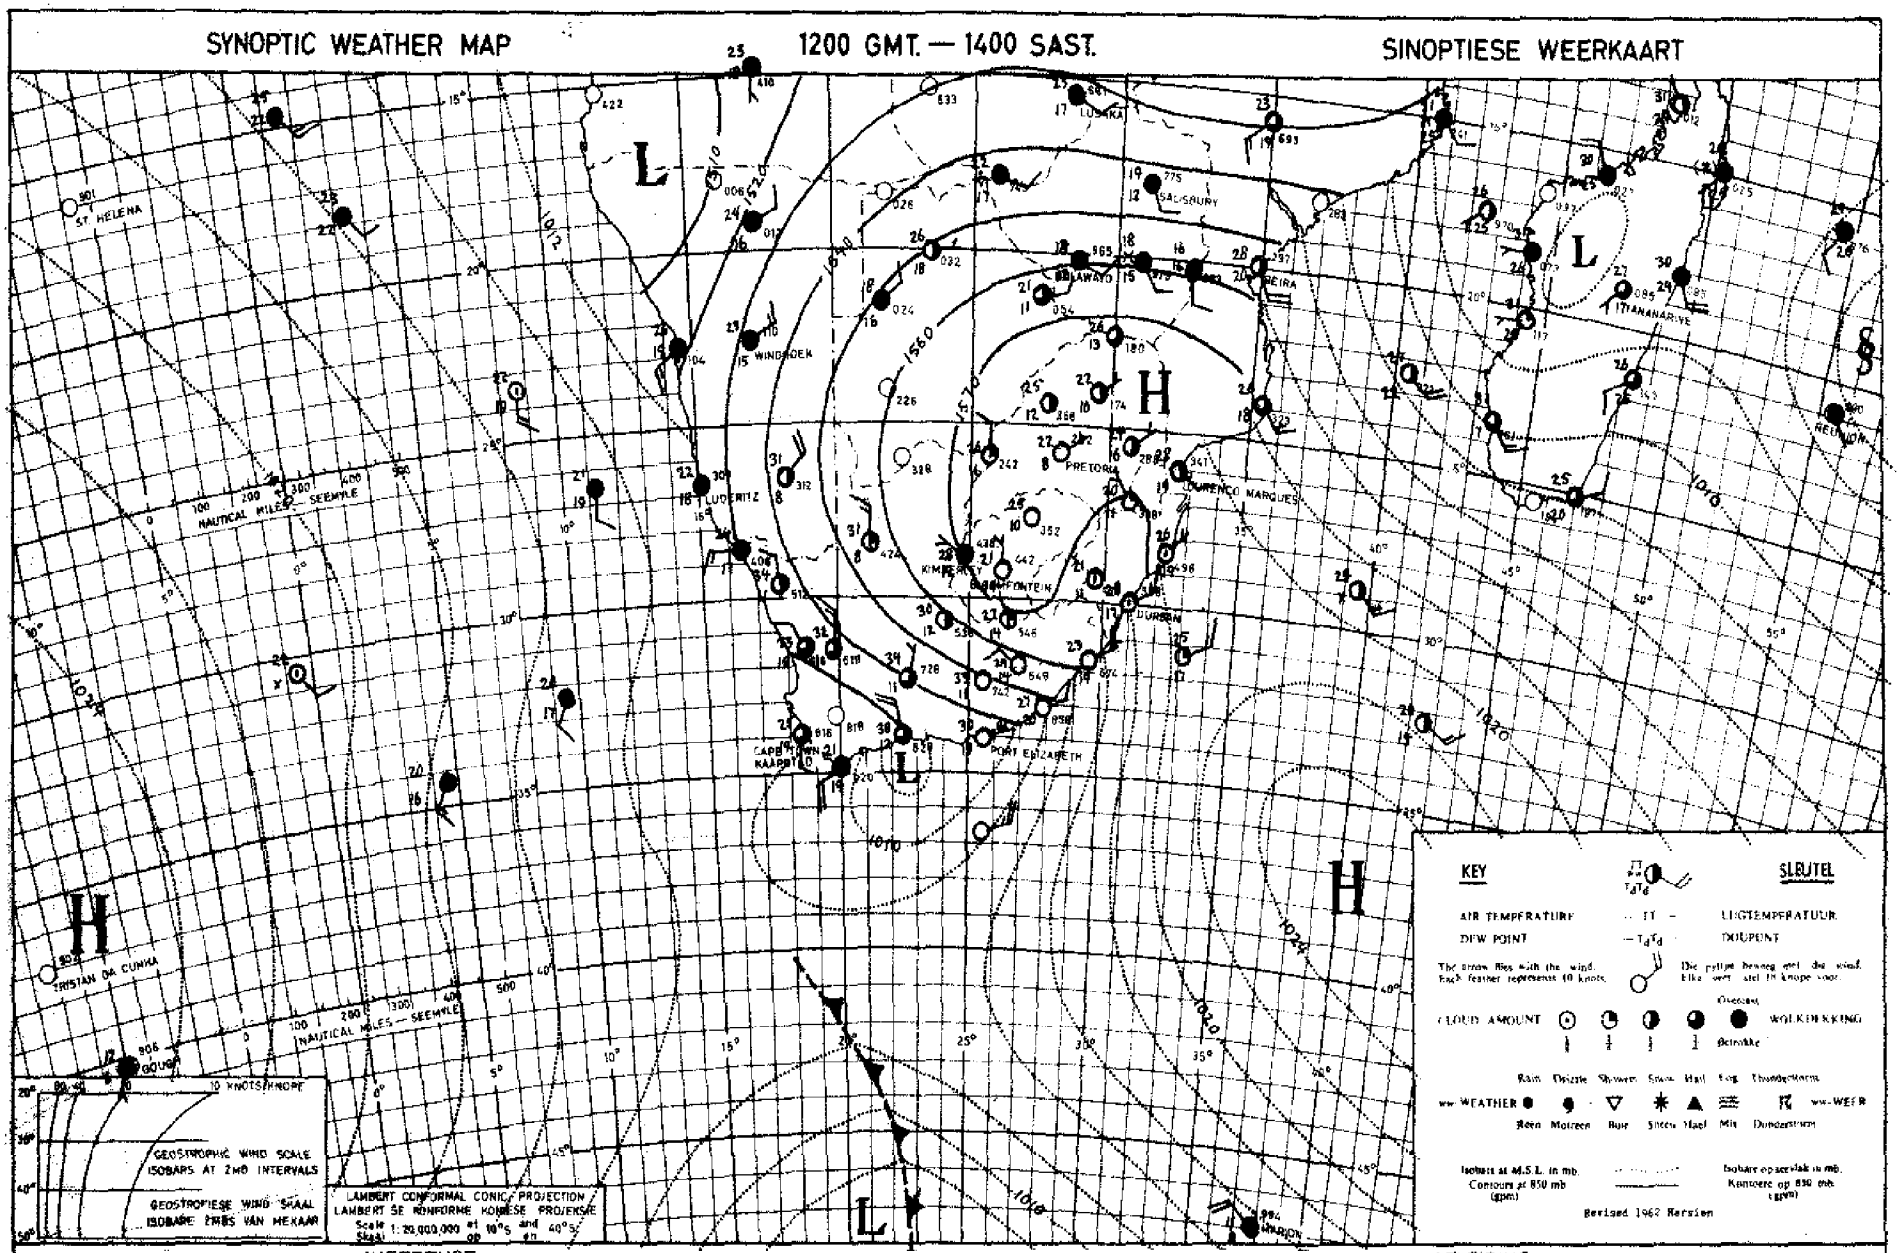
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



KEY — SLEUTEL

AIR TEMPERATURE	T	LUGTEMPERATUUR
DEW POINT	T_dT_d	DOUPUNT

The arrow flies with the wind. Each feather represents 10 knots. — Die pyltjie beweeg met die wind. Elke veer stel 10 knope voor.

CLOUD AMOUNT — Overcast — WOLKEBEDEKKING — Betrokke

ww WEATHER — Rain, Drizzle, Shower, Snow, Hail, Fog, Thunderstorm — ww-WEER — Reën, Motreën, Bui, Sneeu, Hael, Mis, Donderstorm

Isobars at MSL in mb — Isobare op seevlak in mb
Contours at 850 mb (gpm) — Kontoere op 850 mb (gpm)

Bestand 1962 Revisien

INFERENCE — DATE 23 - 3 - 1969 DATUM — AFLEIDING

The coastal low along the south coast will move north-eastwards, followed by cooler, partly cloudy weather. Over the interior it will remain fine as a result of the strong high on the surface and in the upper air.

Die kuslaag langs die suidkus sal noordooswaarts langs die kus opbeweeg, gevolg deur koeler, gedeeltelik bewolkte weer. Oor die binneland sal dit mooiweer bly as gevolg van die sterk hoog aan die oppervlakte en in die bolug.

INFERENCE

DATE 24 - 3 - 19 69 DATUM

AFLEIDING

Tropical air moving southwards over the western parts of the country will cause showers over South West Africa, western Botswana, southern Free State and most parts of Cape Province. The low along the coast will cause rain along the southern and eastern coasts.

Tropiese lug wat suidwaarts beweeg oor die westelike dele van die land sal buie veroorsaak oor Suidwes-Afrika, Wes-Botswana, Suid-Vrystaat en die meeste dele van Kaapland. Die laag oor die kus sal reën langs die suid- en oos kus veroorsaak.

~~PAROLRSE WEERKOERIER~~

A high pressure system is ridging round the Cape coast and will cause cloudy weather with rain over the eastern parts of the country. With warm moist air over the interior thundershowers can be expected over these regions.

'n Hoëdrukstelsel druk suid van die land in en veroorsaak dus bewolkte toestande met reën oor die oostelike dele van die land. Warm vogtige lug is aanwesig oor die binneland en donderstorms sal dus oor die gebiede ontwikkel.

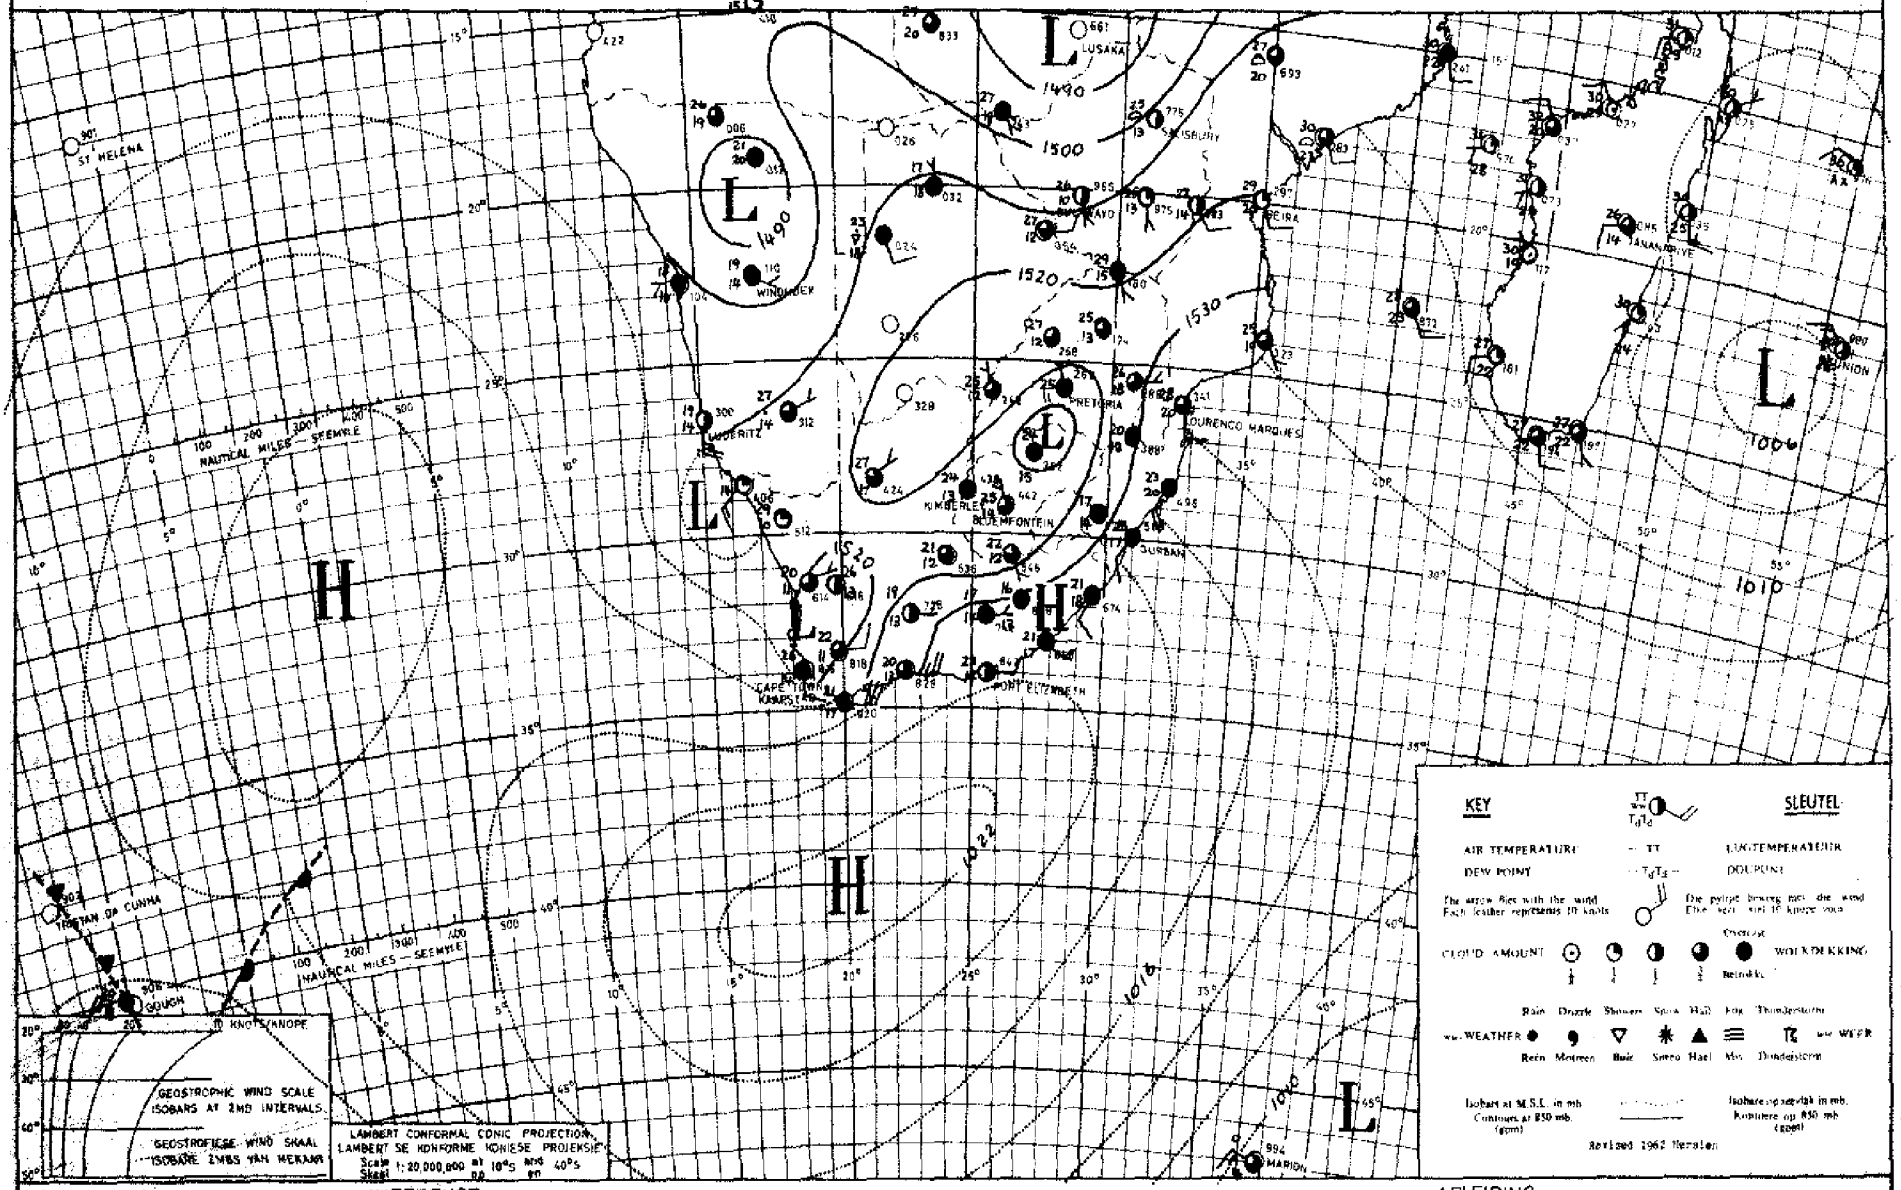
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 26 - 3 - 1969 DATUM — AFLEIDING

The air over the country is moist and the circulation favourable. Rain or thundershowers will develop over most parts of the interior. With the eastwards movement of the high pressure system south of the continent it will clear over the coastal areas of the Cape.

Die lug oor die land is vogtig en die sirkulasie gunstig, sodat reën of donderbuie oor die grootste gedeelte van die binneland sal voorkom. Met die ooswaartse beweging van die hoëdrukstelsel suid van die vasteland sal opklaring plaasvind oor die Kaapse kusgebiede.

A low pressure trough extends from S.W.A. towards the Free State while moist air flows over the northern and eastern parts of the country. As a result scattered rain and showers will occur over these areas.

'n Laedruktrog strek vanaf S.W.A. in die rigting van die Vrystaat terwyl vogtige lug oor die noordelike en oostelike dele van die land aanwesig is. Dus sal verspreide reën en buie oor hierdie gebiede voorkom.

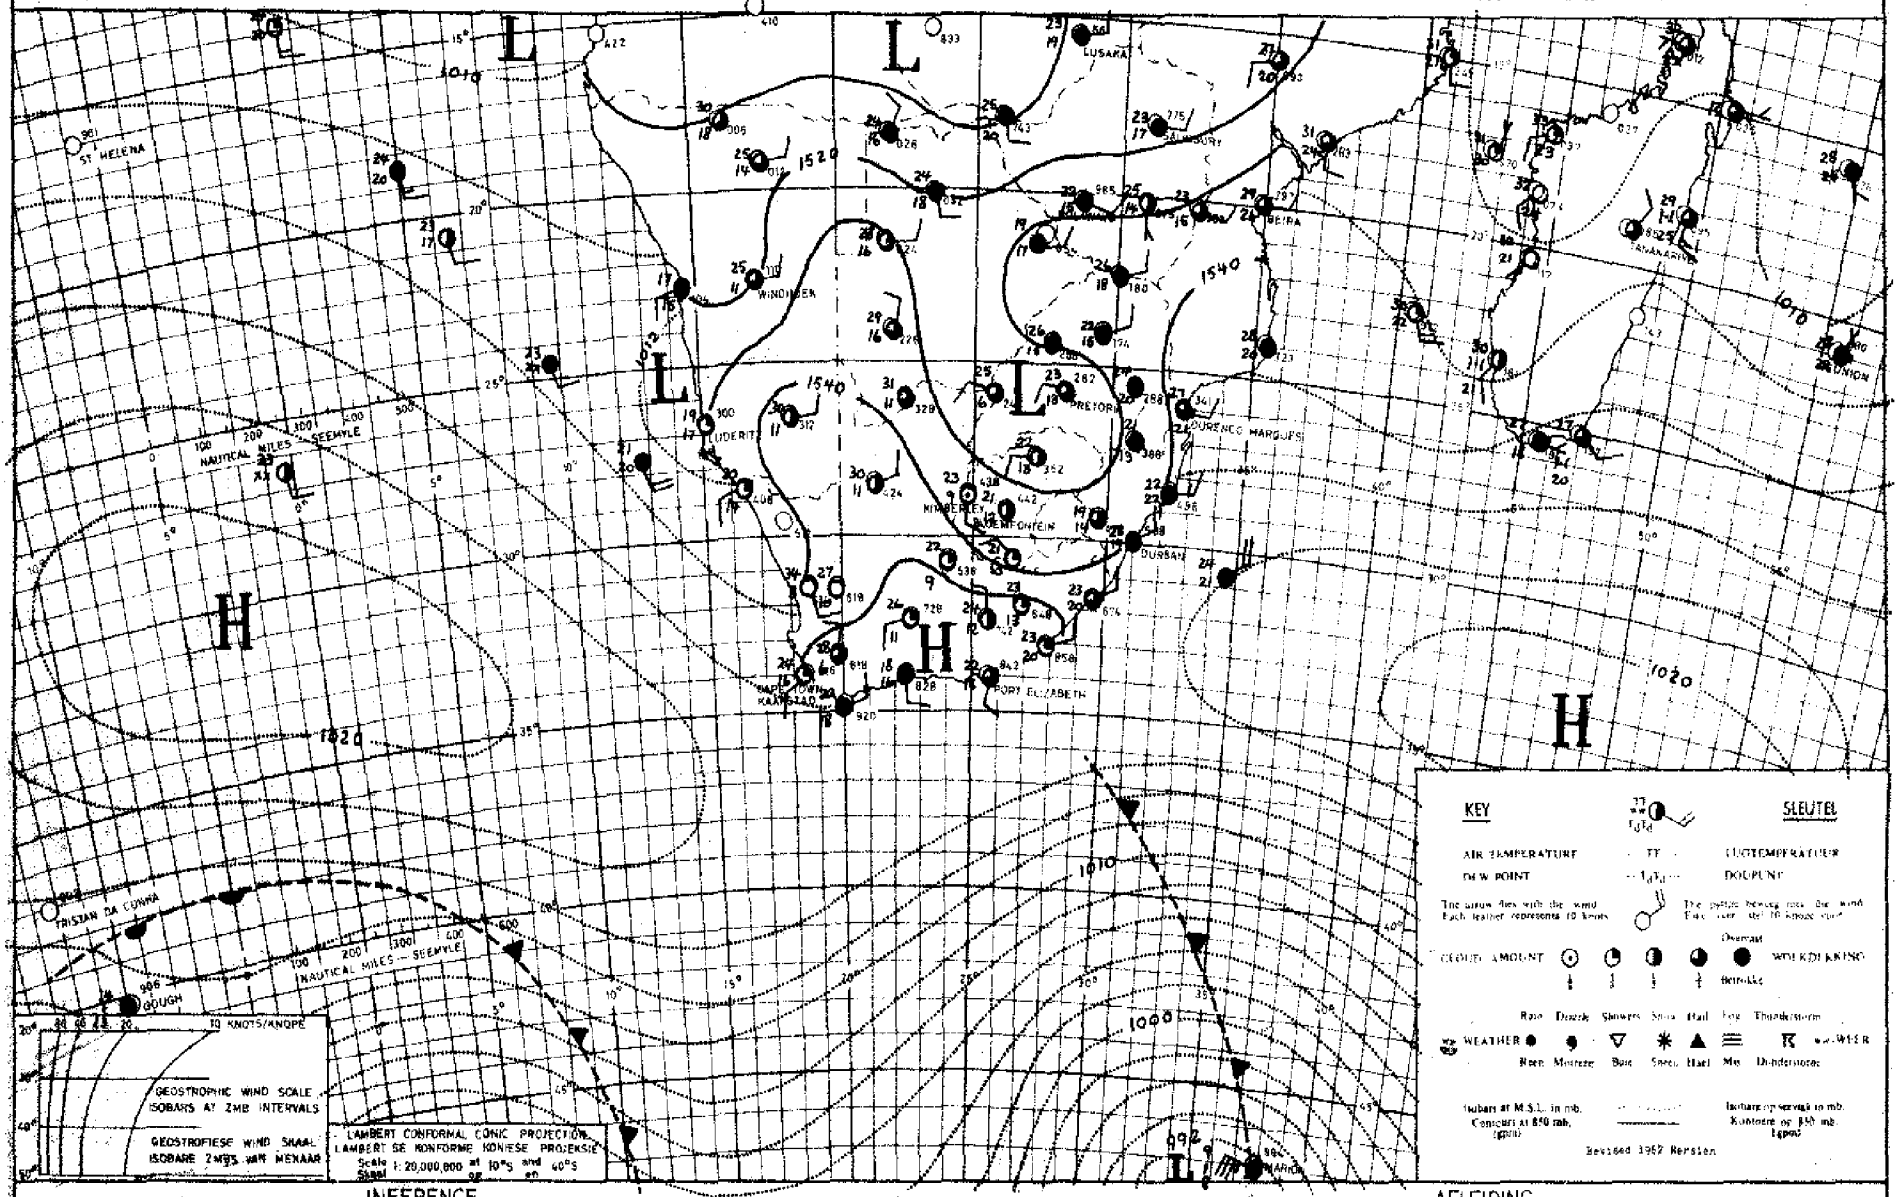
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 28 - 3 - 19 69 DATUM AFLEIDING

With the high moving eastwards it will gradually clear from the south over Natal. The trough over the interior will cause further showers over the north-eastern parts.

Met die hoog wat ooswaarts beweeg sal dit geleidelik uit die suide oor Natal opklaar. Die trog oor die binneland sal verdere buie oor die noordoostelike dele veroorsaak.

[illegible] WEERBULLETIN

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0600 SAST op

With a trough on the surface over the central interior and moist air present over the eastern parts, further showers will fall over the north-eastern interior. Bergwind conditions will prevail over the western coastal regions.

Met 'n trog aan die oppervlakte oor die sentrale binneland en vogtige lug aanwesig oor die oostelike dele, sal verdere buië uitsak oor die noordoostelike binneland. Bergwindtoestande sal voortduur oor die weskus.

AFLEIDING
The air over the northern and north-eastern parts of the country remains moist and isolated thunderstorms will occur over these regions. Bergwind conditions will spread southwards to the south-western coast.
Die lug oor die noordelike en noordoostelike gebiede van die land is nog steeds vogtig en los donderbuie sal oor hierdie dele voorkom. Bergwindtoestande sal suidwaarts uitbrei na die suidweskus.

INFERENCE

DATE 31-3-1969 DATUM

AFLEIDING

As the cold front moves eastwards cooler, cloudy conditions will spread over the southern and south-eastern coastal regions and adjacent interior and showers will occur at places. Isolated thundershowers will occur over the north-eastern and extreme northern interior.

Namate die kouefront ooswaarts beweeg sal koeler, bewolkte toestande oor die suidelike en suidoostelike kusgebiede en aangrensende binneland uitbrei en buie sal plek-plek voorkom. Los donderbuie sal oor die noordoostelike en heel noordelike binneland voorkom.

DATE 1-4-1969 DATUM

AFLEIDING

The high moving around the coast will cause cloudy weather with rain over the southern and eastern parts of the country while thundershowers will occur over the northern and north-eastern parts of the interior.

Die hoog wat om die kus beweeg sal bewolkte weer met reën oor die suidelike en oostelike dele van die land veroorsaak, terwyl donderbuie oor die noordoostelike en noordelike dele van die binneland sal voorkom.

The high along the Natal coast is moving rapidly eastwards and the cloudy conditions over the eastern coastal regions will clear. Moist air is in circulation over the north-eastern interior where further rain and showers will fall.

Die hoog langs die Natalse kus beweeg vinnig ooswaarts en die bewolkte weer sal opklaar oor die oostelike kusstreke. Vogtige lug sirkuleer nog oor die noordoostelike binneland waar verdere reën en buie sal voorkom.

AFLEIDING
Drier air from the west and south-west is moving in over the country and consequently no rain is expected over most parts.
Droër lug uit die weste en suidweste beweeg in oor die land en gevolglik word geen reën oor die meeste dele verwag nie.

INFERENCE

DATE 5 - 4 - 19 69 DATUM

AFLEIDING

A weak cell of high pressure will cause cloudy conditions to develop over the southern and south-eastern coastal areas and over the eastern interior. Over the remainder of the interior it will be mainly fine, but a few showers may develop over northern S.W.A. and Botswana.

'n Swak hoëdrukgebied sal stadig na die suid- en suidooskus beweeg en bewolkte toestande veroorsaak langs die kusgebiede en oor die oostelike binneland. Oor die res van die land sal dit hoofsaaklik mooiweer wees, maar enkele buie mag voorkom oor noordelike S.W.A. en Botswana.

INFERENCE

DATE 6 - 4 - 1969 DATUM

AFLEIDING

Moist air is circulating over the eastern interior where thunder showers will develop. Fine weather conditions associated with strong south-easterly winds will occur over the Cape Peninsula.

Vogtige lug sirkuleer oor die oostelike binneland waar donderbuie sal ontwikkel. Mooiweerstoestande gepaard met sterk suidooste winde sal oor die Kaapse Skiereiland voorkom.

The Atlantic high is ridging round the Cape coast and will cause cloudy weather with light rain along the South-East and East coasts. With a trough over the western interior thunderstorms may be expected over the eastern parts of the country.

Die Atlantiese hoog rug in om die Kaapse kus en veroorsaak bewolkte toestande met reën langs die Oos- en Suidooskus. Met 'n trog oor die westelike binneland kan donderstorms oor die oostelike dele van die land verwag word.

INFERENCE

DATE 8 – 4 – 1969 DATUM

AFLEIDING

With a low over the west coast and the inflow of moist tropical air from the north, fairly general rain and showers will fall over the southern and central parts of the country. Easterly gales will occur over the Cape's south coast.

Met 'n laag oor die weskus en die instroming van vogtige tropiese lug uit die noorde sal taamlik algemene reën en buie oor die suidelike en sentrale dele van die land voorkom. Stormsterk ooste winde sal oor die Kaapse suidkus woed.

INFERENCE

A cold front is approaching the Cape and showers will consequently occur over the coastal regions of the South-West Cape. Drier air from the west in the upper air is moving in over the country and thundershowers will therefore occur only over the north-eastern parts.

AFLEIDING

'n Koufront nader die Kaap en gevolglik sal buie oor die kusgebiede van Suidwes-Kaapland voorkom. Droër lug uit die weste beweeg in die boluq oor die res van die land en donderbuie sal dus alleen oor die noordoostelike dele voorkom

A cold front west of the Cape will cause cooler, cloudy weather over the South - Western Cape and these conditions will spread to the Karoo regions later. Showers will fall over the Peninsula.

'n Koufront wes van die Kaap sal na verwagting koeler weer oor Suidwes - Kaapland veroorsaak en hierdie toestande sal later na die Karoogebiede uitbrei. Buie sal oor die Skiereiland uitsak.

INFERENCE

DATE 13-4-1967 DATUM

AFLEIDING

As the cold front moves farther eastwards cooler conditions will spread over the southern half of the country. A few light showers will fall over the southern coastal regions.

Namate die kouefront verder ooswaarts beweeg sal koeler toestande oor die suidelike helfte van die land uitbrei. Enkele ligte buie sal oor die suidelike kusstreke voorkom.

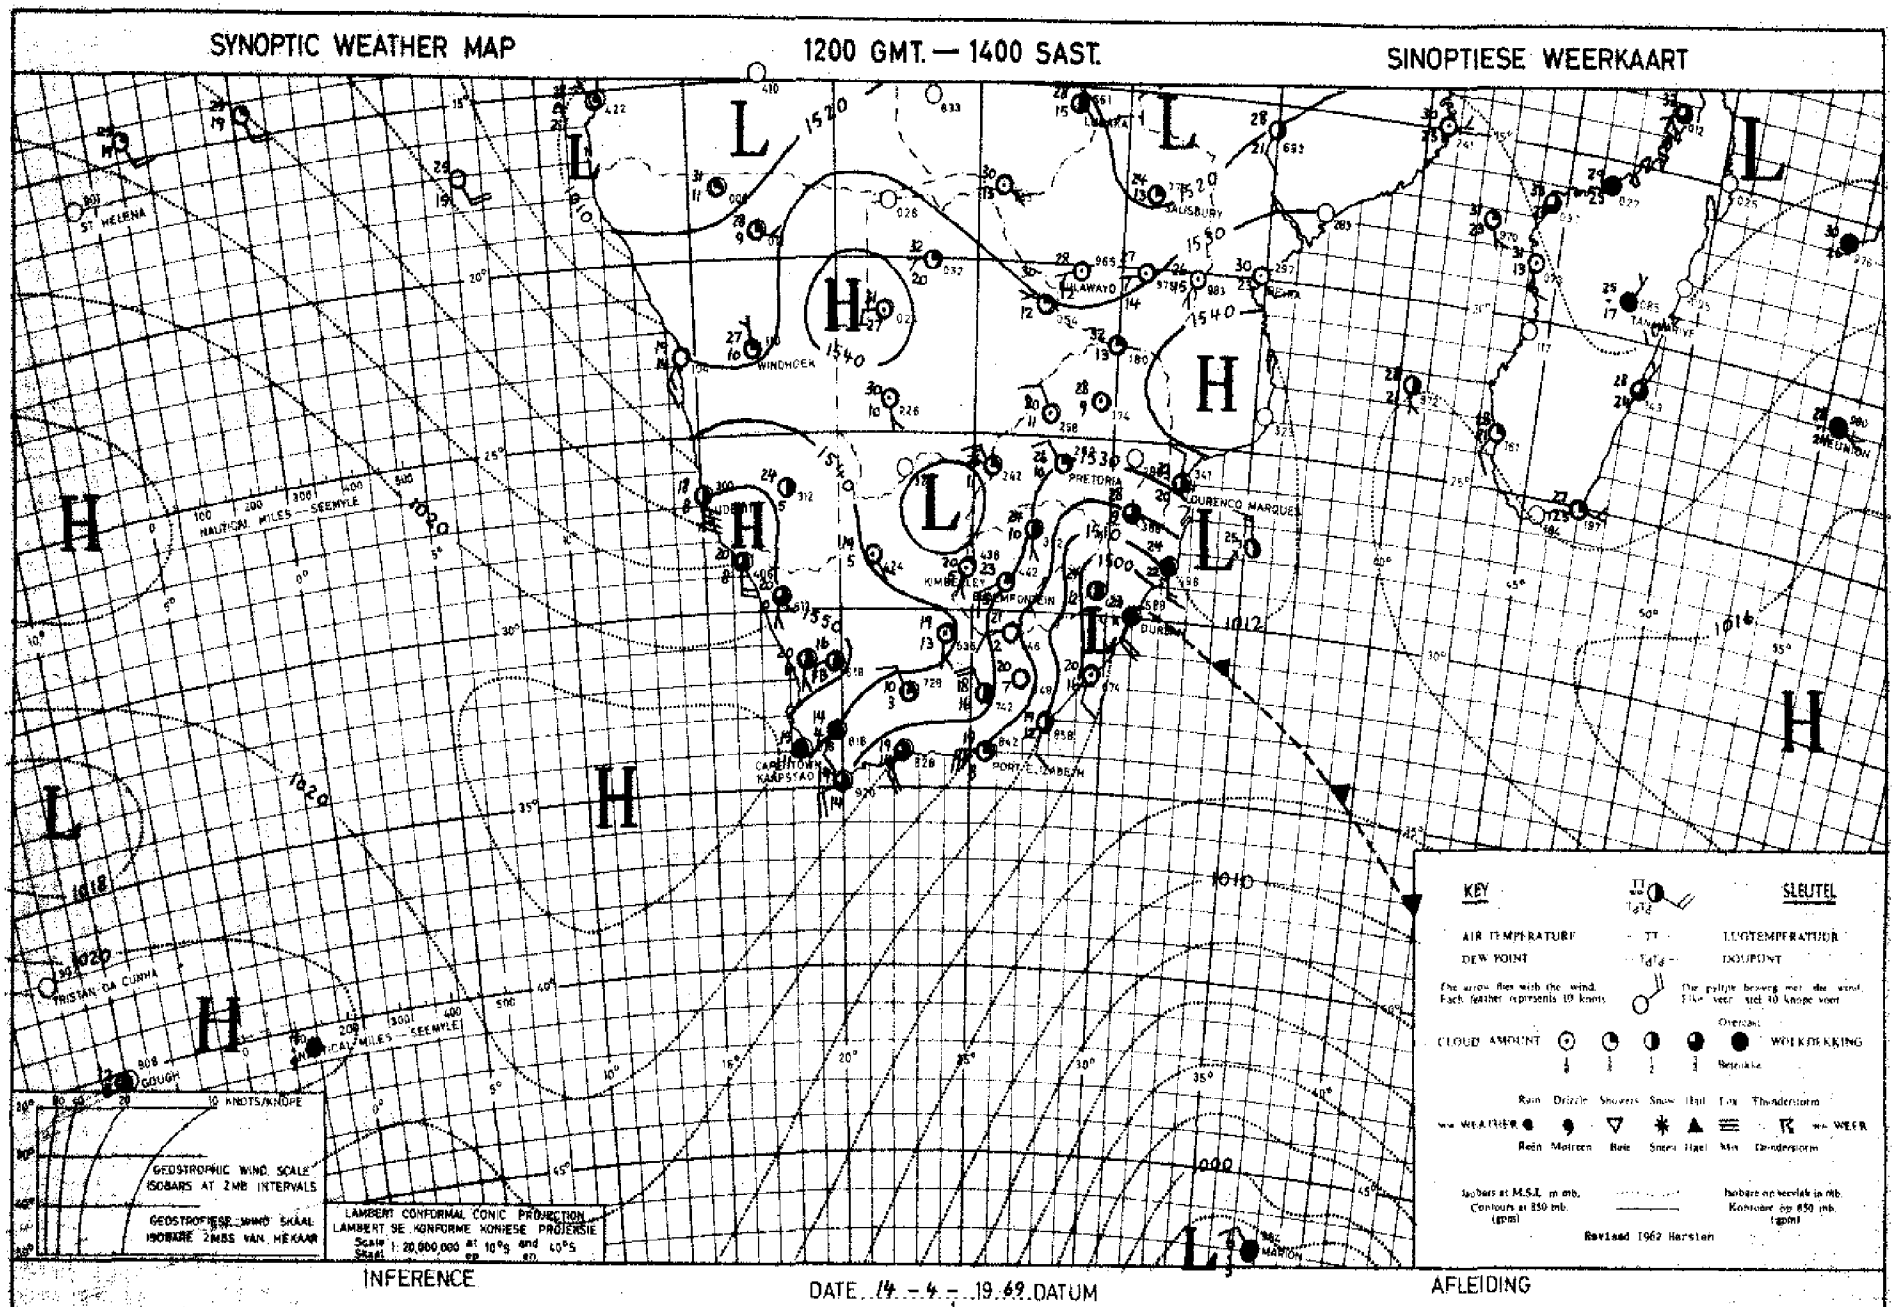
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE

The high just to the west of the Cape is moving eastwards with the result that it will clear over the South-Western Cape, while cooler, cloudy conditions will spread over Natal and the Eastern Transvaal lowveld. Showers will fall at places over Natal.

DATE 14-4-1969 DATUM

AFLEIDING

Die hoog net wes van die Kaap beweeg oooswaarts en gevolglik sal dit opklaar oor Suidwes-Kaapland terwyl koeler bewolkte toestande sal uitbrei oor Natal en die Oos-Transvaalse laeveld. Buie sal plek-plek oor Natal voorkom.

INFERENCE

DATE 15 - 4 - 19 69 DATUM

AFLEIDING

With the high off the east coast moist air will penetrate farther inland and thundershowers will develop at places over the north-eastern interior. The low to the south-west of the Cape can possibly cause showers later over the South-Western Cape.

Met die hoog langs die ooskus sal vogtige lug verder oor die binneland inbeweeg en donderbuie sal plek-plek oor die noordoostelike dele ontwikkel. Die laag suidwes van die Kaap kan moontlik later buie oor Suidwes-Kaapland veroorsaak.

INFERENCE

DATE 16-4-19 69 DATUM

AFLEIDING

The cold front just west of the Cape will cause cooler, cloudy weather with light showers over the South-West Cape and south coast. Isolated thundershowers will occur over the central and northern interior.

Die koufront net wes van die Kaap sal koeler bewolkte toestande met ligte buie oor Suidwes-Kaapland en die suidkus teweegbring. Los donderbuie sal oor die sentrale en noordelike binneland voorkom.

DAAGLIKSE WEERBULLETIN

INFERENCE

DATE 17-4-1969 DATUM

AFLEIDING

With the eastwards movement of the high clearance will take place over the South-West Cape while cooler, cloudy conditions with showers will spread over Natal and the Transvaal lowveld. Thundershowers will develop over the north-eastern interior.

Met die ooswaartse beweging van die hoog sal dit ooptrek oor Suidwes-Kaapland terwyl koeler bewolkte toestande met buie sal uitbrei oor Natal en die Transvaalse laeveld. Donderbuie sal oor die noordoostelike binneland ontwikkel.

Fairly moist air is flowing over the Transvaal and the northern Free State so that isolated thundershowers will occur over these regions. Over the rest of the Republic the air is dry and little change is expected in the prevailing conditions.

Betreklik vogtige lug is aanwesig oor Transvaal en die Noord-Vrystaat sodat enkele donderbuie oor hierdie gebiede sal voorkom. Oor die res van die Republiek is die lug droog en word min verandering in die heersende toestande verwag.

INFERENCE

DATE 19 - X - 1969 DATUM

AFLEIDING

Behind the coastal low along the south-east coast cooler, cloudy weather will occur over the southern and eastern coastal regions. Over the rest of the country it will be mainly fine as a result of dry air spreading over the interior from the west.

Agter die kuslaag langs die suidooskus sal bewolkte koeler weer langs die suidelike en oostelike kusstreke voorkom. Oor die res van die land sal dit hoofsaaklik mooiweer bly as gevolg van droë lug wat uit die weste oor die binneland inkom.

INFERENCE

DATE 20-4-1969 DATUM

AFLEIDING

The low and associated cold front which is moving eastwards will bring cloudy conditions to the south-western and southern parts of the Cape Province. Over the remainder of the country it will remain fine or only partly cloudy and mild to warm.

Die laag en gepaardgaande koufront wat oostwaarts beweeg, sal bewolkte toestande met reën aanbring oor die suidwestelike en suidelike gedeeltes van Kaapland. Oor die res van die land sal dit mooiweer of net gedeeltelik bewolk en matig tot warm wees.

As the cold front moves farther eastwards colder, cloudy conditions with rain and showers and associated with strong westerly winds will spread over the southern parts of the Cape Province while it will become cooler over the central parts of the Republic. Snowfalls are possible over the mountain ranges of the southern and south-western Cape.

Namate die kouefront verder ooswaarts beweeg sal kouer bewolkte toestande met reën of buie en gepaard met sterk weste winde uitbrei oor die suidelike dele van Kaapland terwyl dit koeler sal word oor die sentrale dele van die Republiek. Sneeuvalle is moontlik oor die bergreekse van Suid- en Suidwes-Kaapland.

DATE 22-4- 19.69 DATUM

AFLEIDING

Pressures are rising over the South-West Cape as the high pushes in, and cold air will consequently spread north-eastwards to the southern parts of the Transvaal. Showers will occur over the southern and eastern coastal regions and adjacent interior and snow will fall over the southern Drakensberg.

Drukke styg oor Suidwes-Kaapland met die hoog wat nou instoot en koue lug sal gevolglik noordooswaarts uitbrei tot die suidelike dele van Transvaal. Buie sal voorkom oor die suidelike en oostelike kusgebiede en aangrensende binneland en sneeu sal voorkom oor die suidelike Drakensberge.

With the high moving eastwards colder, cloudy weather with rain will spread over the Transvaal while clearance will gradually take place over the Eastern Cape and later over Natal. Snow will fall on the Drakensberg mountains.

Met die hoog wat ooswaarts beweeg sal kouer bewolkte toestande met reën oor Transvaal uitbrei terwyl opklaring geleidelik sal geskied oor Oos-Kaapland en later oor Natal. Sneeu sal op die Drakensberge voorkom.

INFERENCE

DATE 24-4-1969 DATUM

AFLEIDING

Cool moist air from the west is flowing over the north-eastern areas of the country while an upper air low has formed over the central interior. Consequently scattered showers will occur over Natal, Transvaal and the north-eastern Free State.

Koel, vogtige lug vloei uit die ooste in oor Natal, Transvaal en noordoostelike Vrystaat terwyl h belugleedrukgebied oor die sentrale binneland gevorm het. Gevolglik sal verspreide buie oor die eersgenoemde streke voorkom.

With the surface high over the eastern interior moist air is being advected over the northern and central parts of South West Africa where isolated thundershowers will occur. The upper air ridge together with the surface high over the central interior will cause fine weather over these areas.

Met die oppervlakte-hoog oor die oostelike binneland word vogtige lug ingevoer oor die noordelike en sentrale dele van Suidwes-Afrika waar los donderbuie sal voorkom. Die bolugrug tesame met genoemde oppervlakte-hoog oor die sentrale binneland het mooiweer tot gevolg oor die dele.

INFERENCE

DATE 28-4-1969 DATUM

AFLEIDING

A trough is situated over the western interior, and therefore showers will occur in the fairly moist air over the Cape Province and southern Free State. Cloudy conditions will occur over the southern and south-eastern coasts in the rear of the low along the south-east coast

'n Trog is gelee oor die westelike binneland en dus sal buie voorkom in die betreklik vogtige lug oor Kaapland en die Suid-Vrystaat. Agter die laag oor die suidooskus sal bewolkte weer voorkom oor die suid- en suidooskus.

DAAGLIKSE WEERBULLETIN

INFERENCE

DATE 28-4-19..69 DATUM

AFLEIDING

As the cold front near Cape Town moves eastwards cloudy weather with showers will spread over the southern and south-eastern coastal regions and the adjacent interior. It will also become cooler over most other parts of the interior of the Republic

Gepaard met die oostwaarts-bewegende koufront sal bewolkte weer met buie oor die suidelike en suidoostelike kusgebiede en aangrensende binneland voorkom. Dit sal ook koeler word oor die meeste dele van die Republiek se binneland

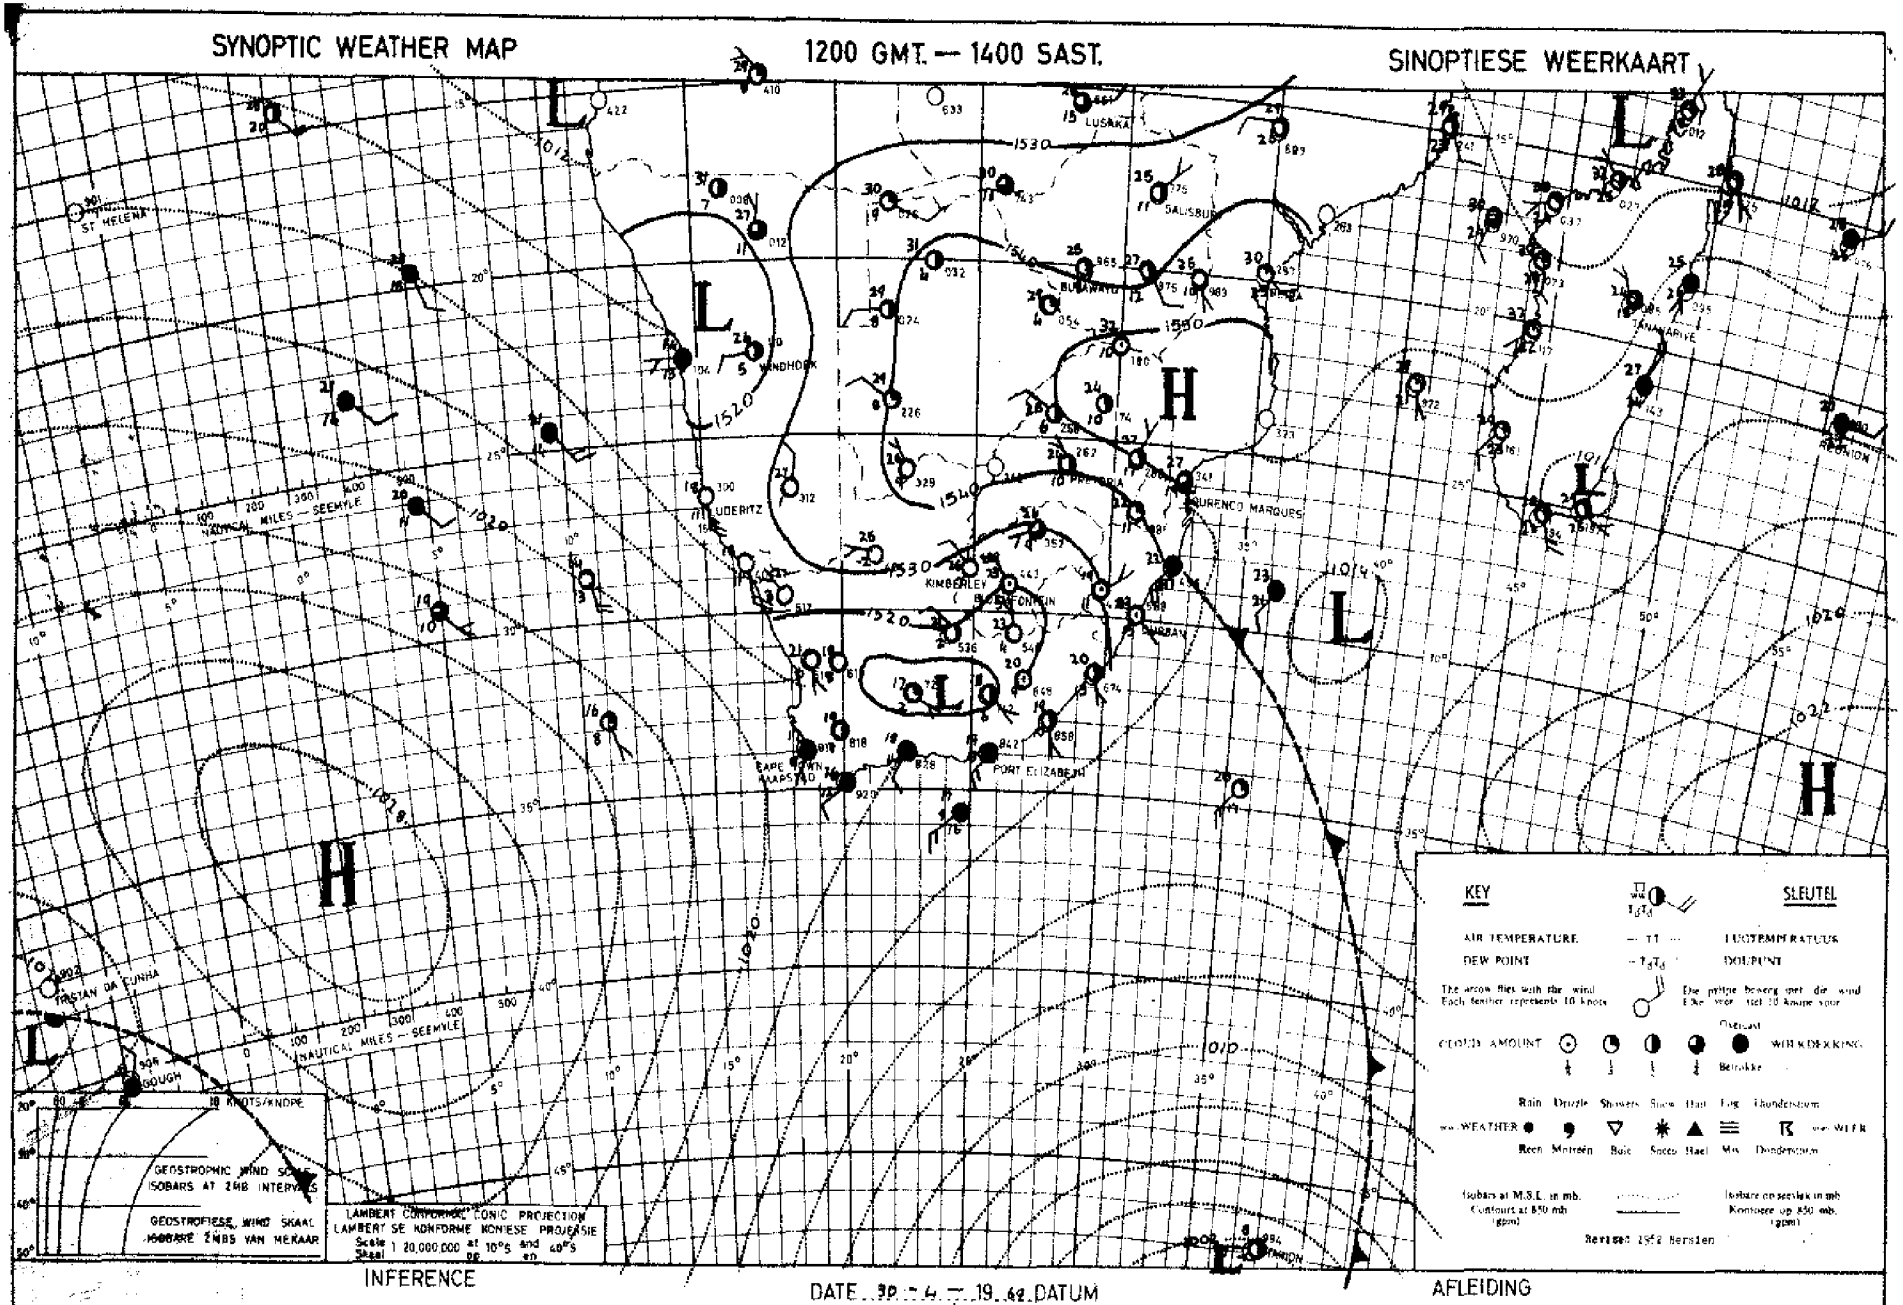
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE

DATE 30 : 4 : 19 62 DATUM

AFLEIDING

Cloudy conditions will occur over the southern and eastern coastal regions as a result of the south-westerly wind flow over these regions. Over the remainder of the country it will be fine or only partly cloudy.

Bewolkte weer sal oor die suidelike en oostelike kusstreke voorkom as gevolg van die suidwestelike lugstroom oor die streke. Oor die res van die land sal dit mooiweer of net effens bewolk wees.

With a ridge of the Atlantic high south of the land cloudy weather will occur over the southern and eastern coastal regions. A weak trough has developed over the interior and, with fairly moist air over Transvaal, northern O.F.S. and northern Natal, isolated thundershowers will occur over these areas.

Met 'n rug van die Atlantiese hoog wat suid van die land ingestoot het, sal bewolkte weer oor die suidelike en oostelike kusstreke voorkom. 'n Swak trog het oor die binneland ontstaan en met betreklik vogtige lug oor Transvaal, Noord-Vrystaat en Noord-Natal sal enkele donderbuie oor hierdie gebiede voorkom.

DATE 2 - 5 - 1969 DATUM

AFLEIDING

With troughs of low pressure over S.W.A and the eastern interior of S.A., and fairly moist air in circulation, scattered showers and thundershowers may be expected over nearly all parts of the country, except those areas of the Cape Province south of the Orange river.

Met trôe van lae druk oor S.W.A. en die oostelike binneland van S.A., en betreklik vogtige lug in sirkulasie, kan verspreide buie en donderbuie verwag word oor feitlik alle dele van die land, uitgesonder Kaapland suid van die Oranjerivier.

With a trough of low pressure over the western parts of the country rain or thunderstorms can be expected over the northern and eastern parts of the country. Elsewhere it will be partly cloudy to fine.

Met 'n trog van lae druk oor die westelike dele van die land kan reën of donderstorms verwag word oor die noordelike en oostelike dele van die land. Andersins sal dit gedeeltelik bewolk tot mooiweer wees.

A cold front has developed in the trough south of the country and therefore colder, cloudy weather with showers will spread over the southern parts of the country. Dry air from the west is moving over the interior and it will clear also over the Transvaal.

'n Koufront het ontwikkel in die trog suid van die land en dit sal kouer, bewolkte weer met buie oor die suidelike dele van die land veroorsaak. Droë lug beweeg van die weste af oor die binneland en dit sal ook oor Transvaal opklaar.

INFERENCE

DATE 5 – 5 – 19 69 DATUM

AFLEIDING

With the cold front on the south-east coast and onshore gradients behind it, cloudy, cold weather with showers is expected along the coastal areas and over the adjacent interior. It will also become colder over the rest of the Cape Province and the Free State.

Met die koue front aan die suidooskus, en die aanslag op die kus daaragter, word bewolkte, koue weer met buie verwag oor die Kaapse kusstreke en oor die aangrensende binneland. Dit sal ook kouer word oor die res van Kaapland en die Vrystaat.

AFLEIDING

The Atlantic high is now also ridging in south of the continent so that cold cloudy weather with rain and showers will spread over the whole of Natal and eastern Transvaal. Further showers will fall over Southern and Eastern Cape. Over the rest of the country it will be fine but cold.

Die Atlantiese hoog staat nou ook suid van die land in sodat koue, bewolkte weer met reën en buie oor die hele Natal en die oostelike dele van Transvaal sal uitbrei. Verdere buie sal oor Suid- en Oos-Kaapland voorkom. Oor die res van die land sal dit mooi weer maar koud wees.

The high south-east of the continent is moving eastwards and, except for the eastern and northern parts of Transvaal, where it will be cloudy and mild, the weather will be mainly fine and mild but cold in the early morning.

Die hoog suidoos van die vasteland beweeg ooswaarts en, behalwe vir die oostelike en noordelike dele van Transvaal waar dit bewolk en matig sal wees, sal dit redelike mooi-weer en matig wees maar koud in die vroeë oggend.

With a northerly flow of moist air over the Western and central parts, it will be partly cloudy over Bushmanland, the Upper Karoo, Gordonia and southern S.W.A. The coastal low on the West Coast will cause temporary cloudy weather along the western and south-western coastal areas towards tomorrow evening.

Met 'n vogtige noordelike windstroom oor die westelike en sentrale dele, sal gedeeltelik bewolkte weer voorkom oor Boesmanland, die Bo-Karoo, Gordonia en Suid-S.W.A. Die kuslaag aan die Weskus sal tydelik bewolkte weer oor die westelike en suidwestelike kusgebiede veroorsaak teen more-aand.

DATE 3 - 5 - 1969 DATUM

AFLEIDING

A new high is moving in south of the continent and will cause cloudy weather with rain over the east coast and adjacent interior. A weak trough over the western Cape interior will lead to isolated light showers over the central interior.

'n Nuwe hoog beweeg suid van die land in en sal bewolkte weer met reën veroorsaak oor die ooskus en die aangrensende binneland. 'n Swak trog oor die Wes-Kaapse binneland sal enkele ligte buie oor die sentrale binneland veroorsaak.

With the strong high south-east of the continent and relatively low pressure over the interior there is an onshore flow of moist sea air along the east coast and rain will fall over this region. It will also be cloudy and cold over the Natal interior and Eastern Transvaal.

Met die sterk hoog suidoos van die land en betreklik lae druk oor die binneland is daar 'n aanslag van vogtige seelug teen die oostkus en reën sal oor die gebied val. Dit sal ook bewolk en koud wees oor die Natal se binneland en Oos-Transvaal.

Fairly moist and unstable air is flowing over Transvaal and the northern Free State where isolated light showers will occur. With a weak low south of Cape Town cloudy weather with light rain will occur over the Cape Peninsula and vicinity.

Betreklik voghige en onstabiele lug vloei oor Transvaal en Noord-Vrystaat waar enkele lighe buie sal voorkom. Met in swak laag suid van Kaapstad sal bewolkte weer met lighe reën oor die Kaapse Skiereiland en omgewing voorkom.

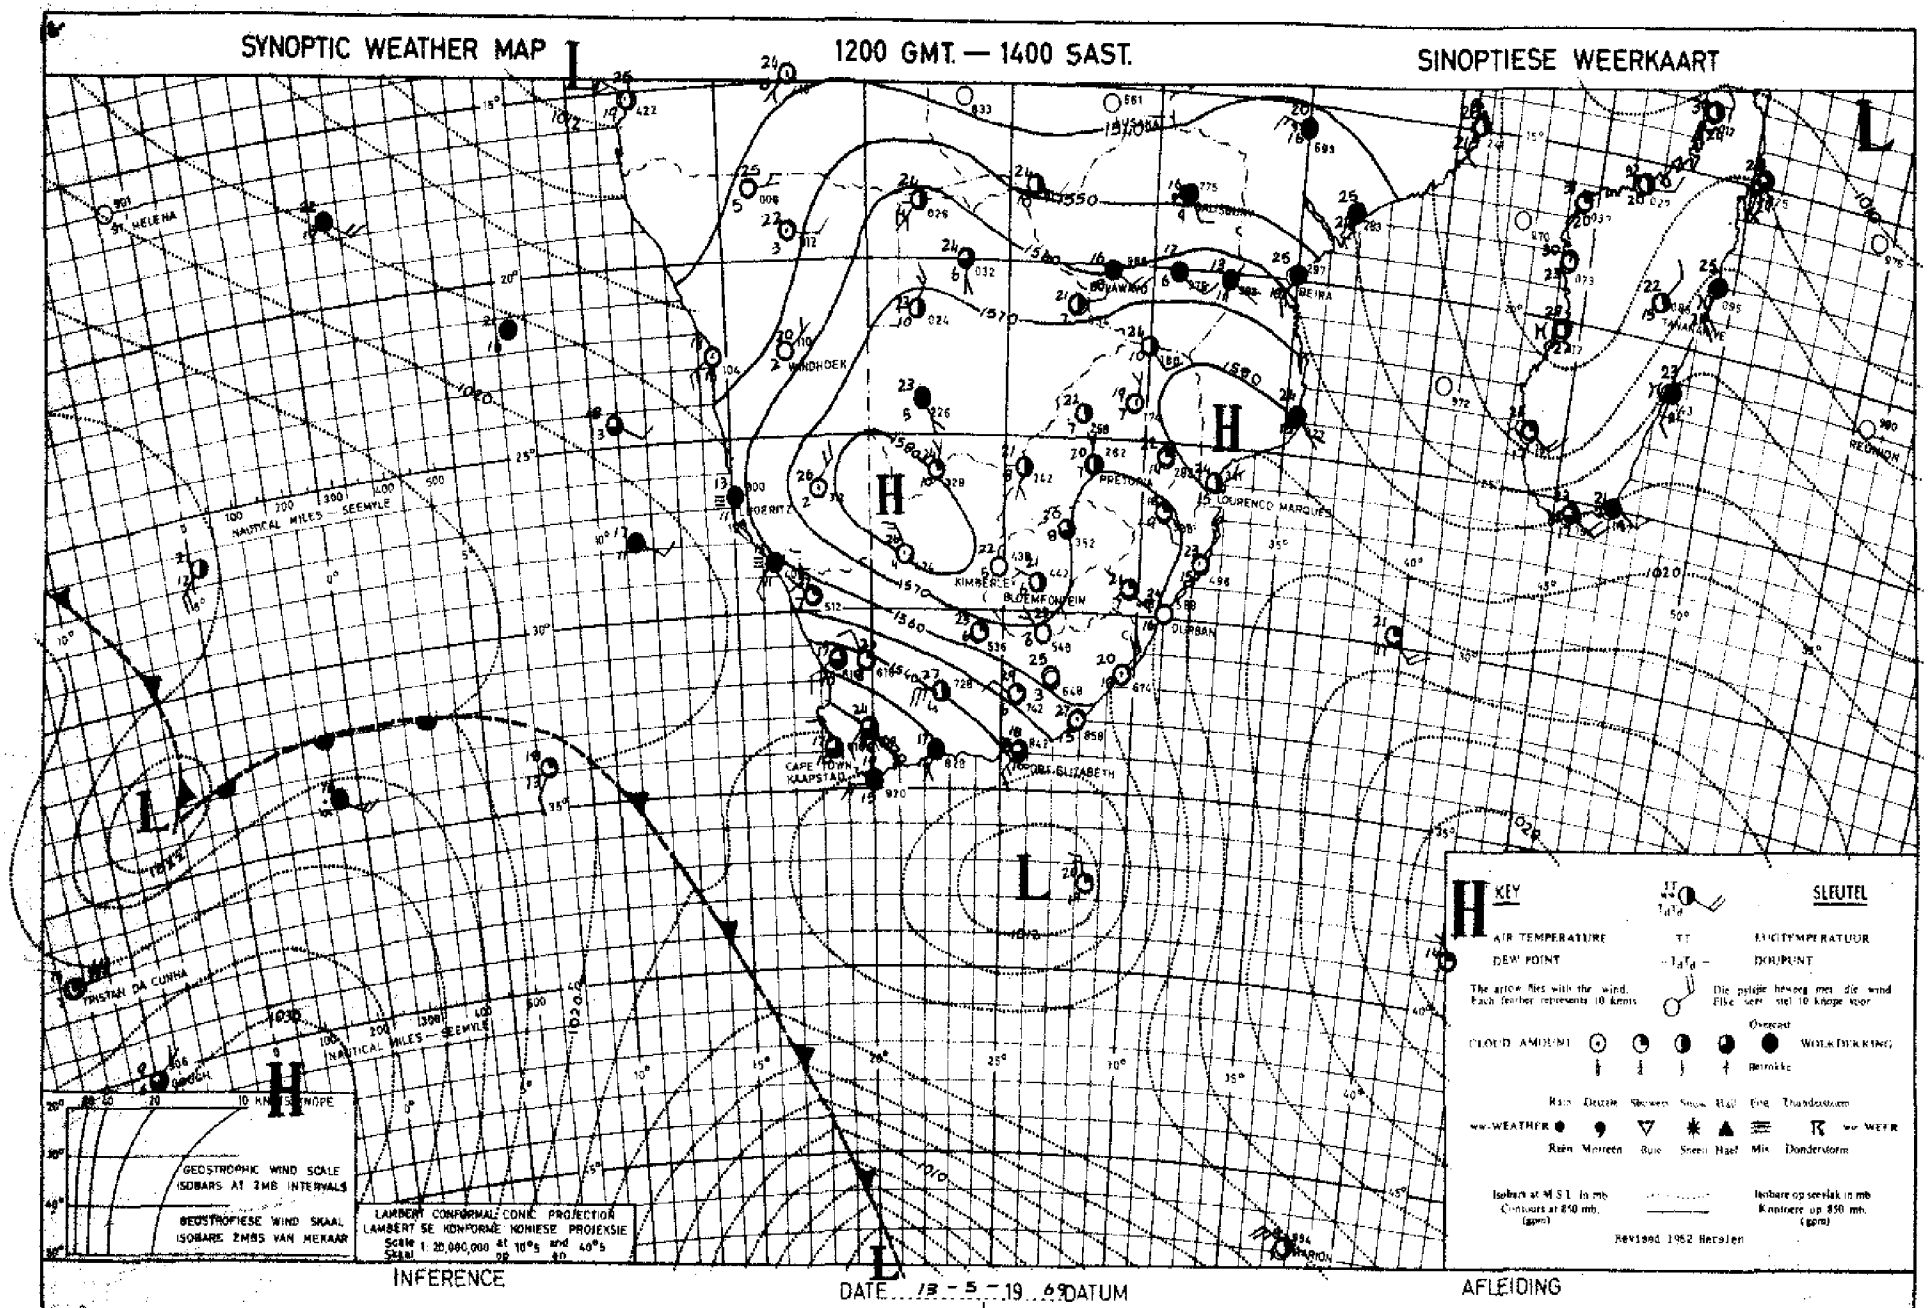
Stegi			



The cold front followed by a big high which is approaching the country from the south-west will cause cold air to spread over most of the Cape Province and later also over the Free State. Cloudy weather with showers will occur over the coastal regions and adjacent interior.

Die koufront gevolg deur 'n groot hoog wat die land uit die suidweste nader, sal koue lug laat uitbrei oor die grootste gedeelte van Kaapland en later ook oor die Vrystaat. Bewolkte weer met buie sal hiermee gepaard gaan oor die kusstreke en aangrensende binneland.

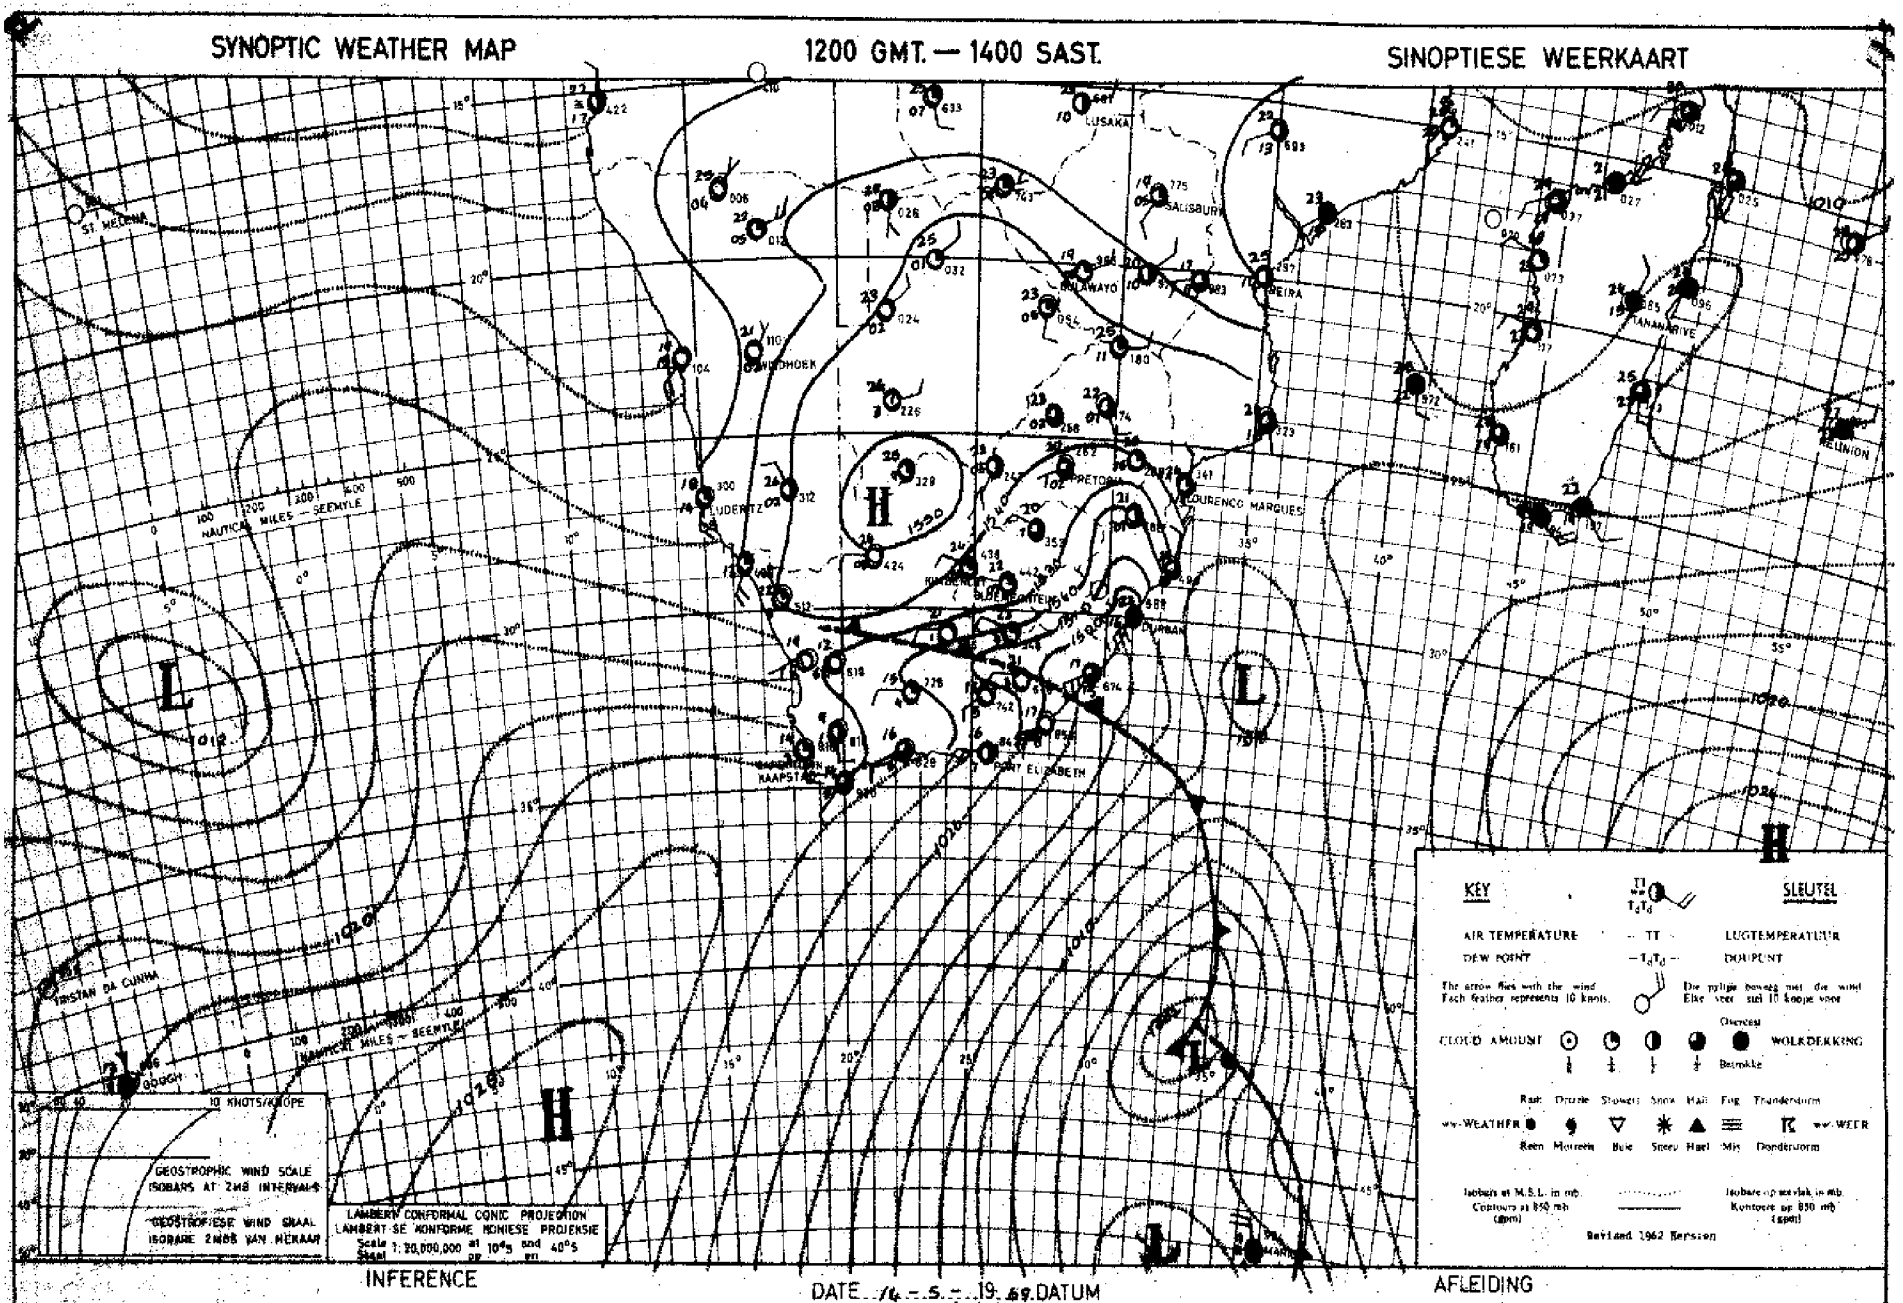
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE ../4.–.5.–.19.69 DATUM — AFLEIDING

The deep low south of the continent causes strong south-westerly winds over the southern and eastern coastal regions where it will be partly cloudy and cool. It will also be fairly cold over the interior of Natal and the Cape Province.

Die diep laag suid van die land veroorsaak sterk suidwestewind oor die suidelike en oostelike kuskstreke waar dit gedeeltelik bewolk en koel sal wees. Dit sal ook betreklik koud wees oor die binneland van Kaapland en Natal.

DAAGLIKSE WEERBULLETIN

INFERENCE

DATE 15 - 5 - 1969 DATUM

AFLEIDING

The low south of the country will move south-eastwards while the high over the Atlantic ocean is almost stationary with the result that the weather over the Republic will not change significantly. It will be partly cloudy over Natal and Eastern Transvaal but fine elsewhere.

Die laag suid van die land beweeg suidoostwaarts en die hoog oor die Atlantiese oseaan is feitlik stilstaande met die gevolg dat die weer oor die Republiek min sal verander. Dit sal gedeeltelik bewolk wees oor Natal en Oos-Transvaal maar mooiweer elders.

INFERENCE

DATE 18-5-1969 DATUM

AFLEIDING

The coastal low on the south-west coast will move round the coast, followed by partly cloudy weather over the south-western and southern coasts. Isolated light showers and thundershowers will occur in the fairly moist air over the central and eastern interior.

Die kuslaag langs die suidweskus sal om die kus beweeg, gevolg deur gedeeltelik bewolkte weer oor die suidwes- en suidkus. In die betreklik vogtige lug oor die sentrale en oostelike binneland sal enkele ligte buie en donderbuie voorkom.

INFERENCE

DATE 17 - 5 - 19 62 DATUM

AFLEIDING

The coastal low on the south coast will move north-eastwards with cloudy or partly cloudy conditions and fog patches over the Cape south-west and west coasts. A trough in the upper air will cause thunder-showers over the Free State, Natal, the southern and south-western parts of Transvaal and the adjacent parts of Botswana and the Cape Province.

Die kuslaag op die suidkus sal noordooswaarts beweeg met bewolkte of gedeeltelik bewolkte toestande en misbanke oor die Kaapse suidwes- en weskus. 'n Trog in die bolug sal donderbuie oor die Vrystaat, Natal, die suidelike en suidwestelike dele van Transvaal en die aangrensende dele van Botswana en Kaapland veroorsaak.

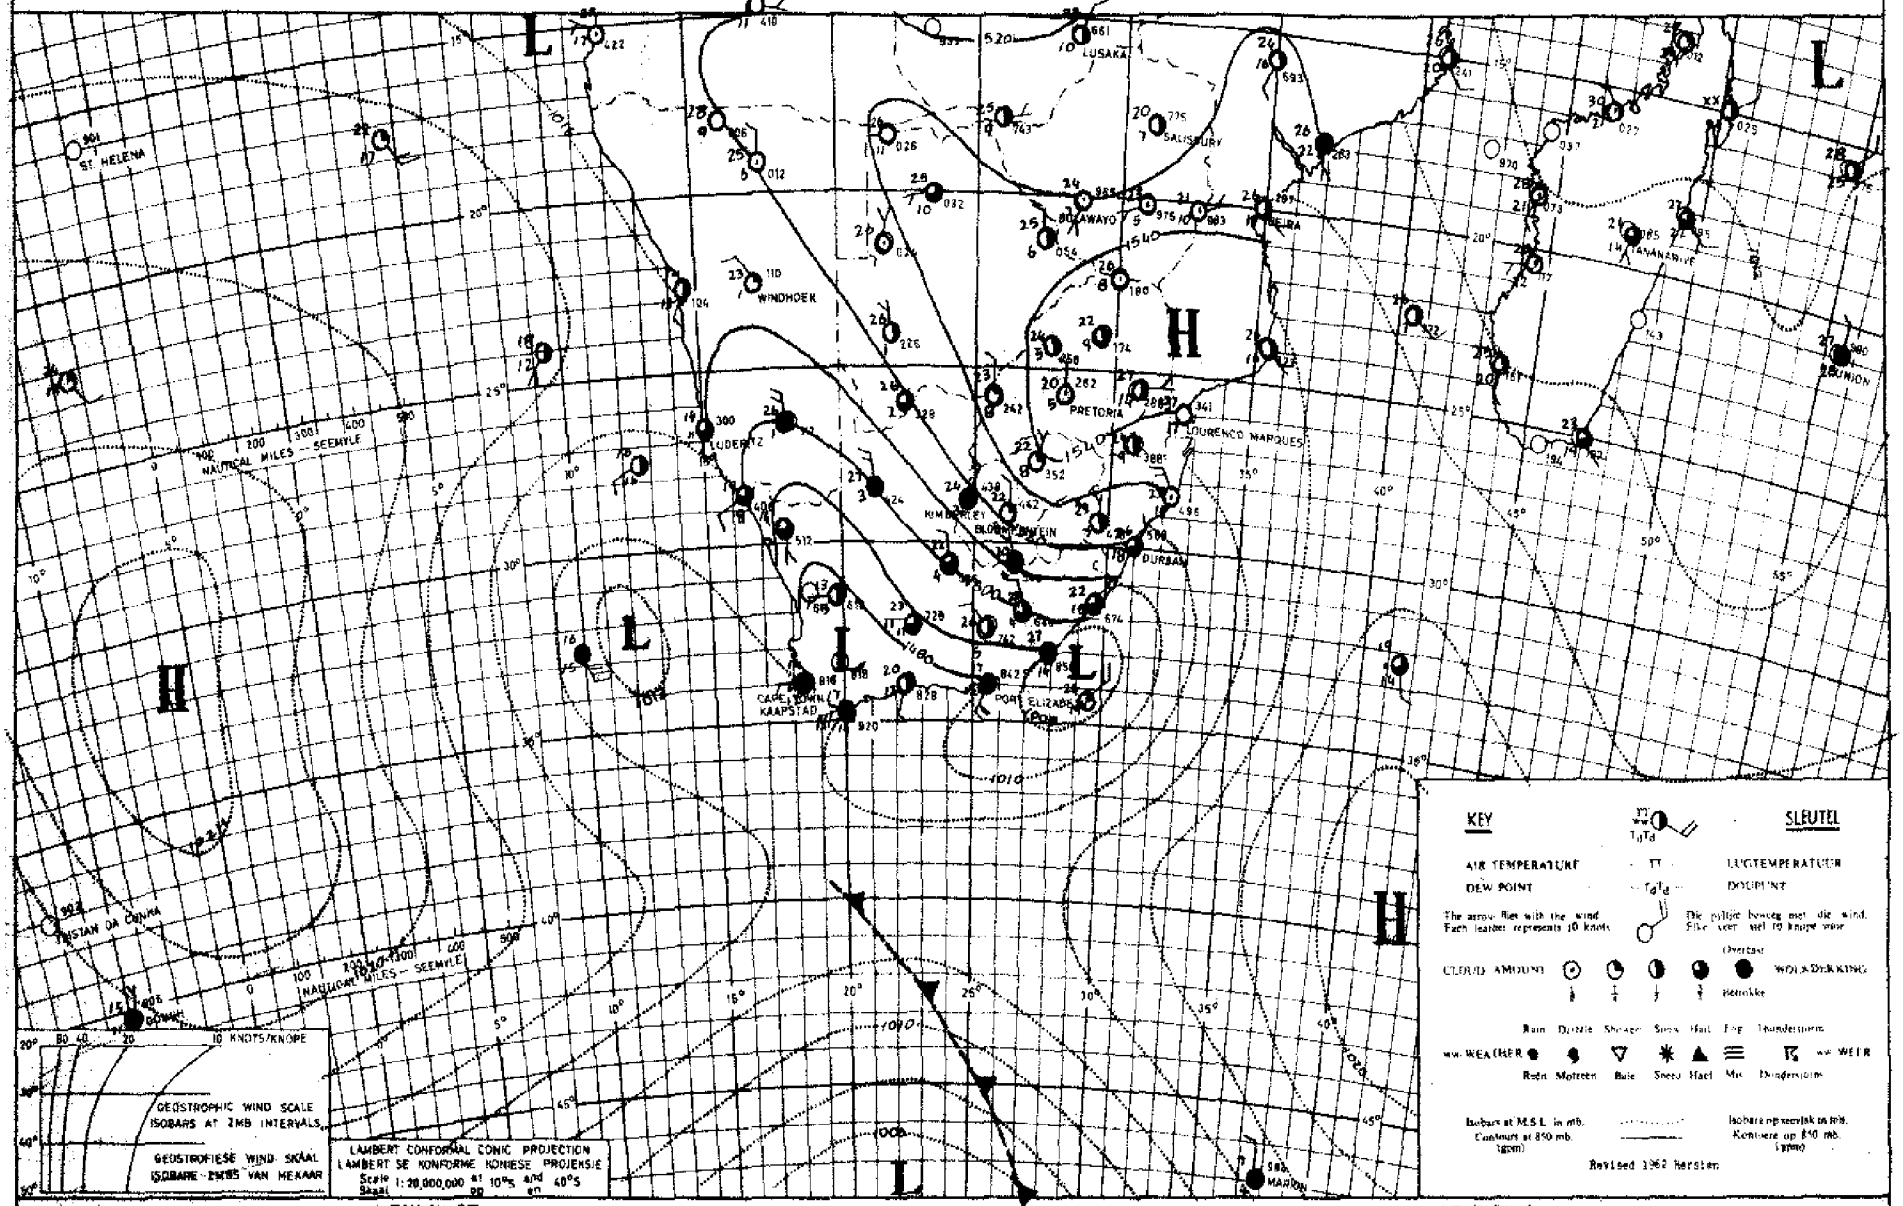
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE

DATE 18 - 5 - 19 69 DATUM

AFLEIDING

The low on the south-east coast will cause cloudy weather over the Cape coastal regions. The trough over the interior will cause isolated showers in the relatively moist air flowing over the central and eastern regions.

Die laag aan die suid ooskus sal bewolkte toestande oor die Kaapse kusstreke veroorsaak. Die trog oor die binneland sal los buie veroorsaak in die betreklik vogtige lug wat oor die sentrale en oostelike dele sirkuleer.

DAAGLIKSE WEERBULLETIN

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

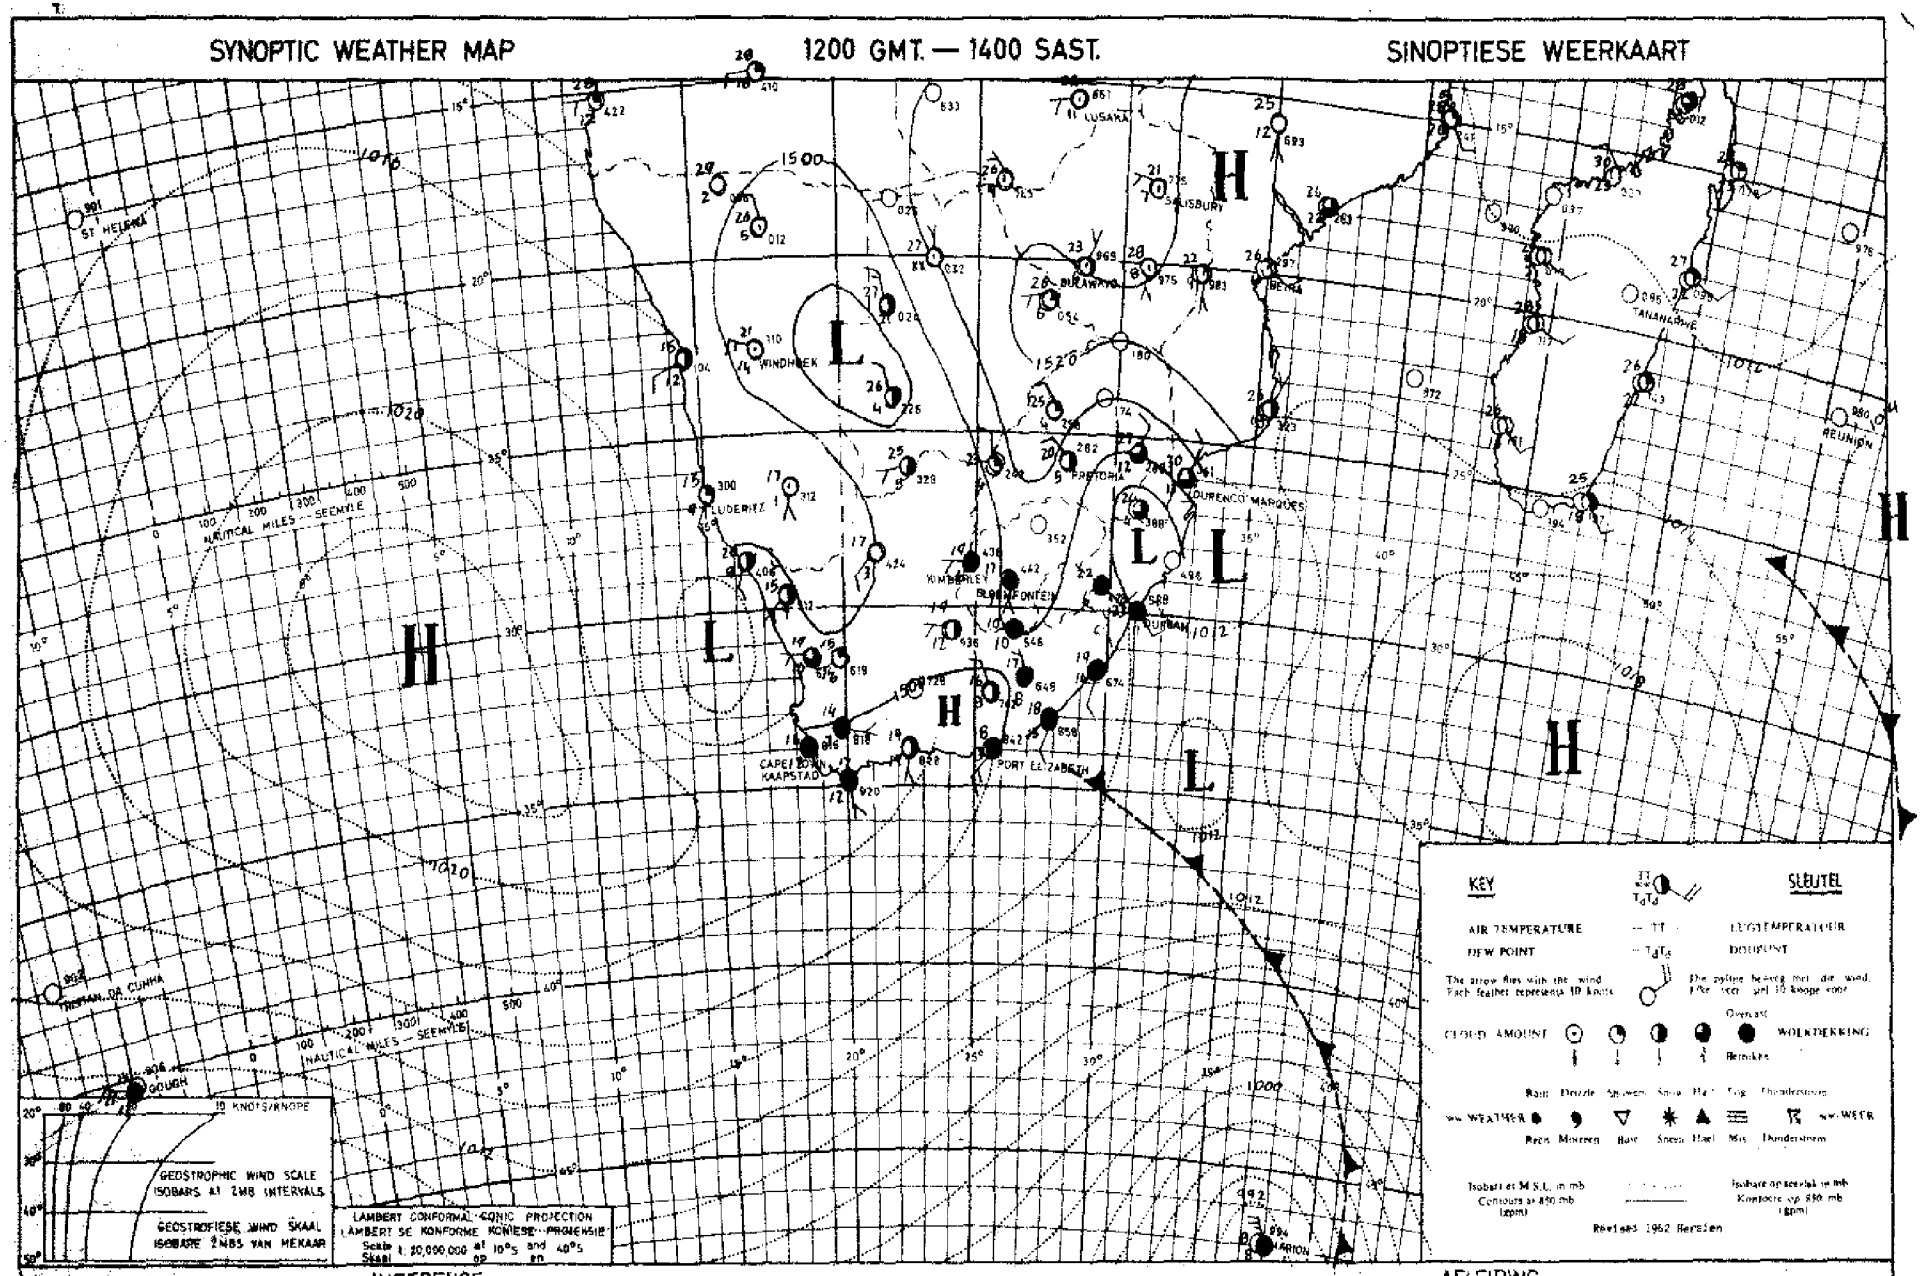
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE

DATE 19-5-1968 DATUM

AFLEIDING

The front off the south-east coast is being followed by a ridge of the Atlantic High and with favourable upper circulation, showers will occur over the southern and south-eastern coastal areas, as well as over the central interior from where it will spread eastwards.

Die front suidoos van die land beweeg ooswaarts en met gunstige bolugsirkulasie en aanslag op die kus, sal dit bewolk wees langs die suid-en suidooskus met buie. Buie sal ook voorkom oor die sentrale binneland en ooswaarts uitbrei.

With the low over the interior extending to great heights of the atmosphere, fairly general rain and showers will occur over the central and eastern areas of the Republic.

Met die laag oor die binneland wat tot groot hoogtes in die atmosfeer strek, sal taamlik algemene reën en buie voorkom oor die sentrale en oostelike dele van die Republiek voorkom.

DATE 21 - 5 - 19 69 DATUM

AFLEIDING

The low over the interior is moving slowly eastwards so that gradual clearance will take place from the west over Northern Cape, the western O.F.S. and south-western half of Transvaal. It will however, remain cloudy with rain over the eastern parts of the Republic.

Die laag oor die binneland beweeg stadig oostwaarts en geleidelike opklaring sal intree uit die weste oor Noord-Kaapland, die Wes-Vrystaat en suidwestelike helfte van Transvaal. Dit sal egter bewolk bly met reën oor die oostelike dele van die Republiek.

The eastwards-moving cell of the Atlantic high will cause cloudy and cooler weather with rain to spread to the southern and south-eastern coastal regions but it will clear partially later on the south coast. Further showers may be expected over the eastern parts of the interior but the low has moved out and further clearance will take place.

In Sel van die Atlantiese hoog beweeg ooswaarts en sal koel bewolkte toestande met reën veroorsaak oor die suidelike en suidoostelike kusgebiede met gedeeltelike opklaring later op die suidkus. Oor die binneland kan enkele buie nog in die oostelike voorkom maar die laag het uitbeweeg en verdere opklaring sal plaasvind.

AFLEIDING
DATE 23. 5 19.62 DATUM
With the low north-east of Durban and the cell of high pressure on the south coast, cloudy weather with rain will still occur over Natal but it will clear later from the south. The high over the interior will maintain fine weather over the rest of the country.
Met die laag noordoos van Durban en die sel van hoë druk aan die suidkus sal bewolkte weer met reën nog voorkom oor Natal maar dit sal later opklaar uit die suide. Die hoog oor die binneland sal mooiweerstoestande laat voortduur oor die res van die land.

The high which has settled over the interior will maintain fine weather over the Republic, S.W.A. and Botswana. The frontal system is passing south of the country without any appreciable effect on the coastal weather.

Die hoog wat oor die binneland gevestig is, sal mooi weerstoestande tot voortduur oor die hele Republiek, S.W.A. en Botswana. Die frontale stelsel beweeg suid van die land verby sonder enige noemenswaardige invloed op die kusweer.

INFERENCE — DATE 26 - 5 - 1969 DATUM — AFLEIDING

The high over the interior is persisting and therefore it will remain fine over all areas. The cold front which has passed Gough Island will bring cloudy weather with rain over the south-west coast by tomorrow evening.

Die hoëdrukstelsel oor die binneland hou nog stand en dus sal dit mooiweer bly oor alle dele. Die koufront wat by Gough verby is, sal teen more-aand bewolkte weer met reën oor die suid-weskus veroorsaak.

DAAGLIKSE WEERBULLETIN

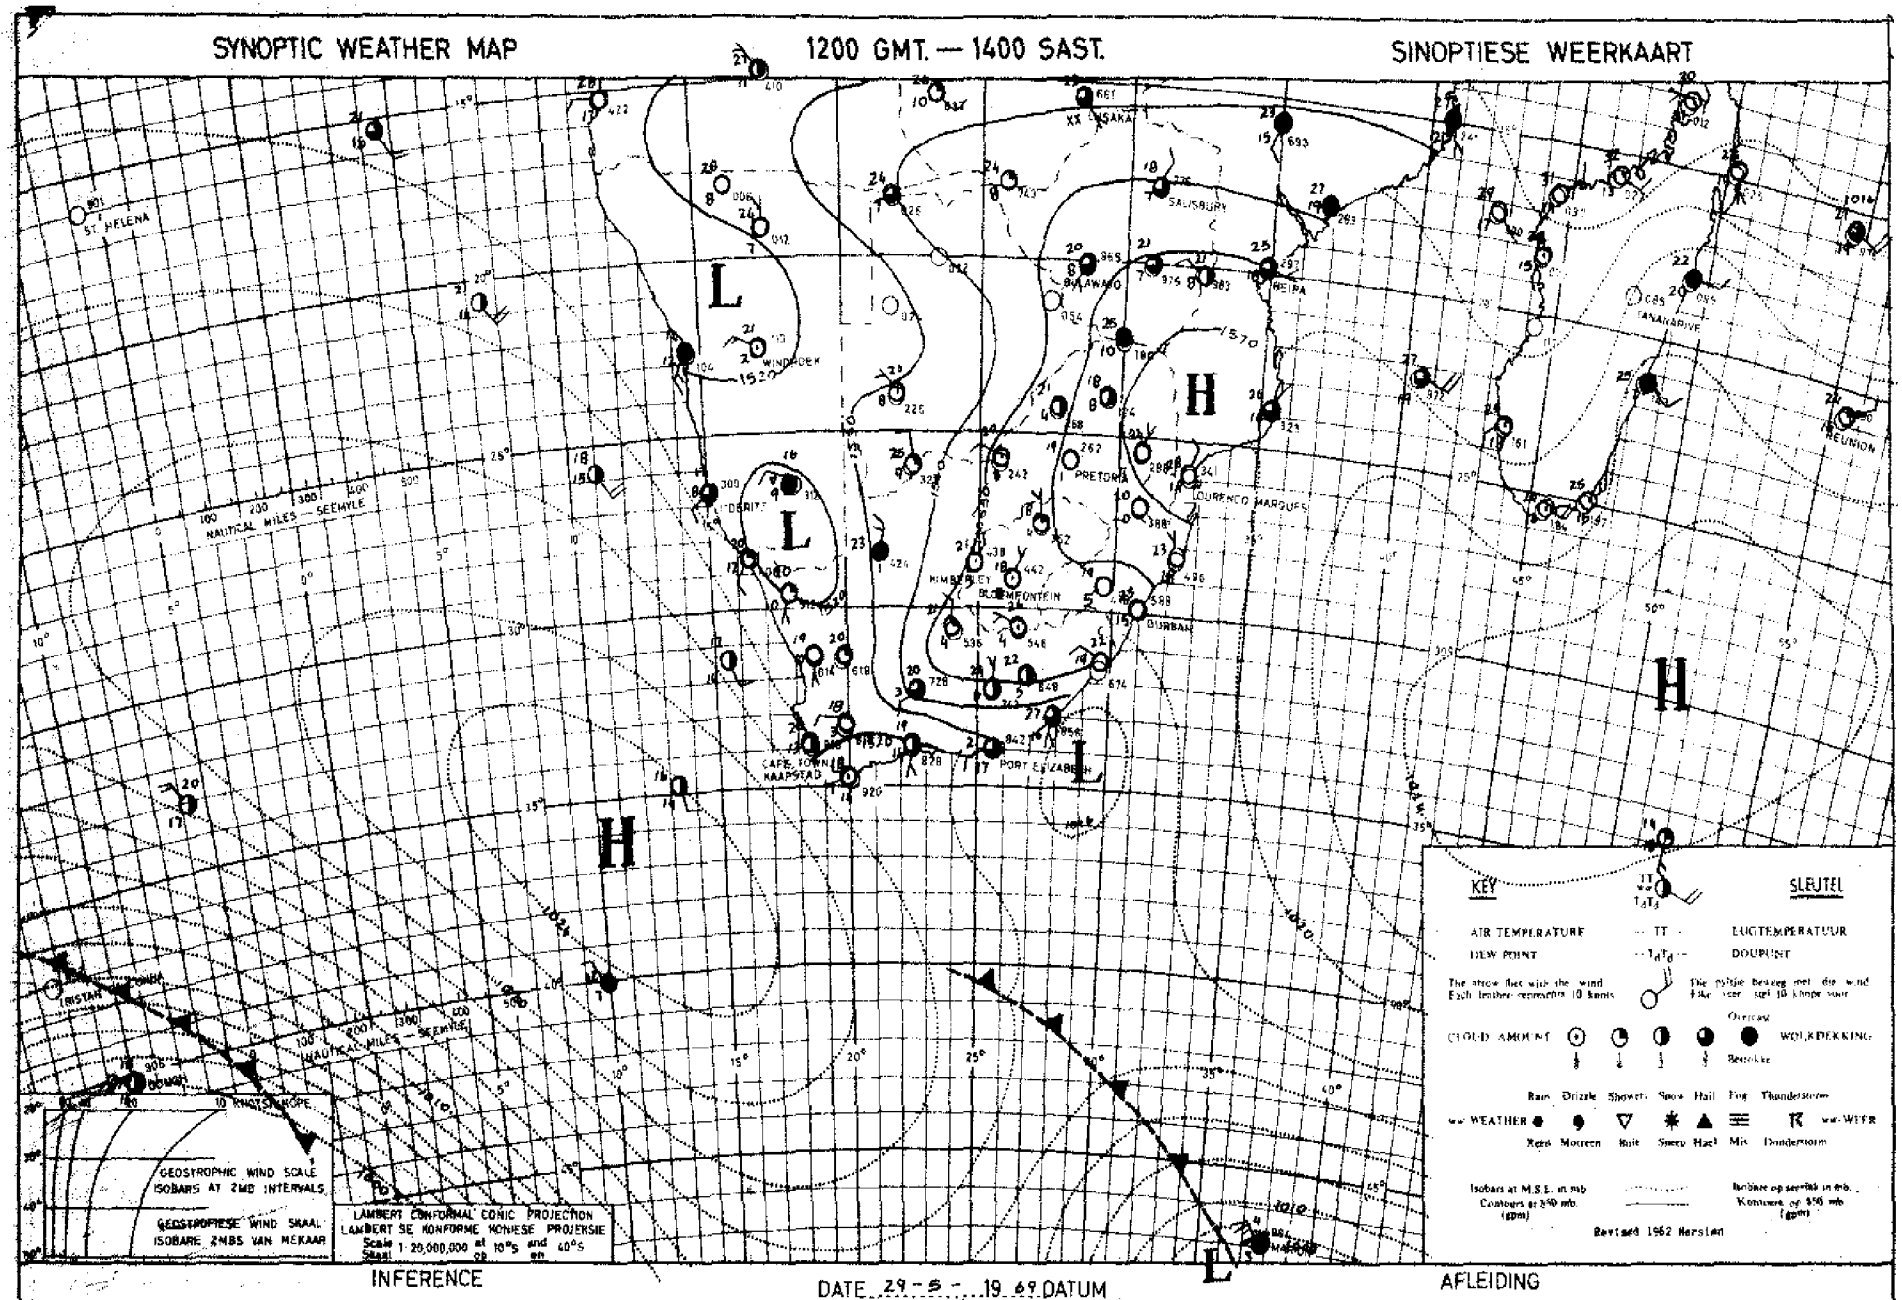
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 29-5-19 69 DATUM — AFLEIDING

With a ridge of high pushing in south of the land cloudy weather with showers can be expected along the south and south-east coasts. An upper air low over the western parts of the country will cause cloudy weather with showers over the central and southern parts of the country.

Met 'n rug van hoë druk wat suid van die land inkom, sal bewolkte weer met buie uitbrei langs die suid- en suidooskus. 'n Laag in die bolug oor die westelike dele van die land sal bewolkte weer met buie tot gevolg hê oor die sentrale en suidelike dele van die land.

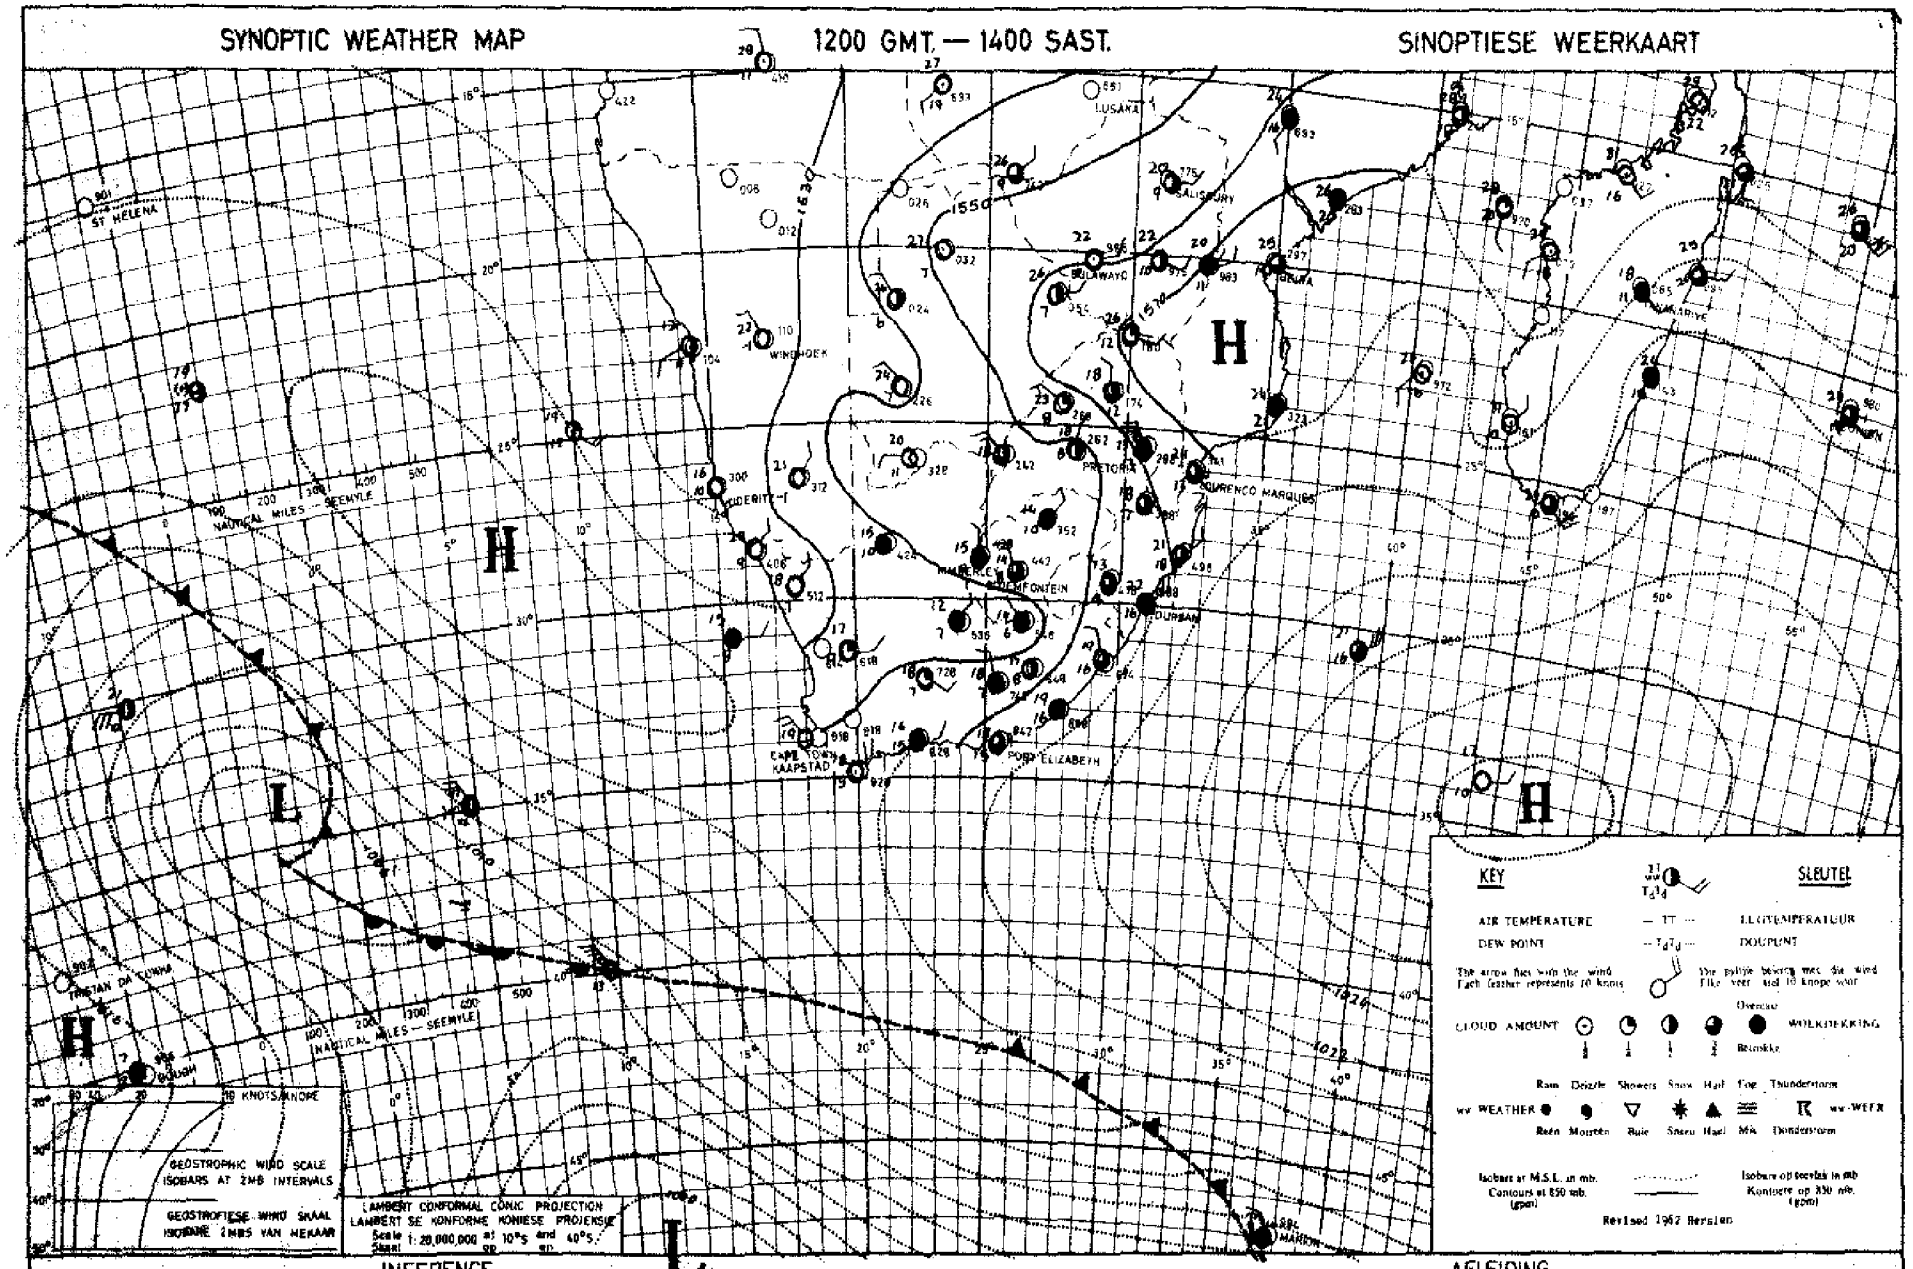
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 31 - 5 - 1969 DATUM — AFLEIDING

The low pressure system in the west will move eastwards so that cloudy weather will develop over the south-western Cape later. The upper air low over the interior will also move away eastwards and the weather over the interior will clear up.

Die laedrukstelsel in die weste sal oostwaarts beweeg sodat bewolkte weer sal ontwikkel oor die Kaapse suidweskus. Die bouluglaag sal wegbeweeg na die ooste sodat die weer oor die binneland sal opklaar.

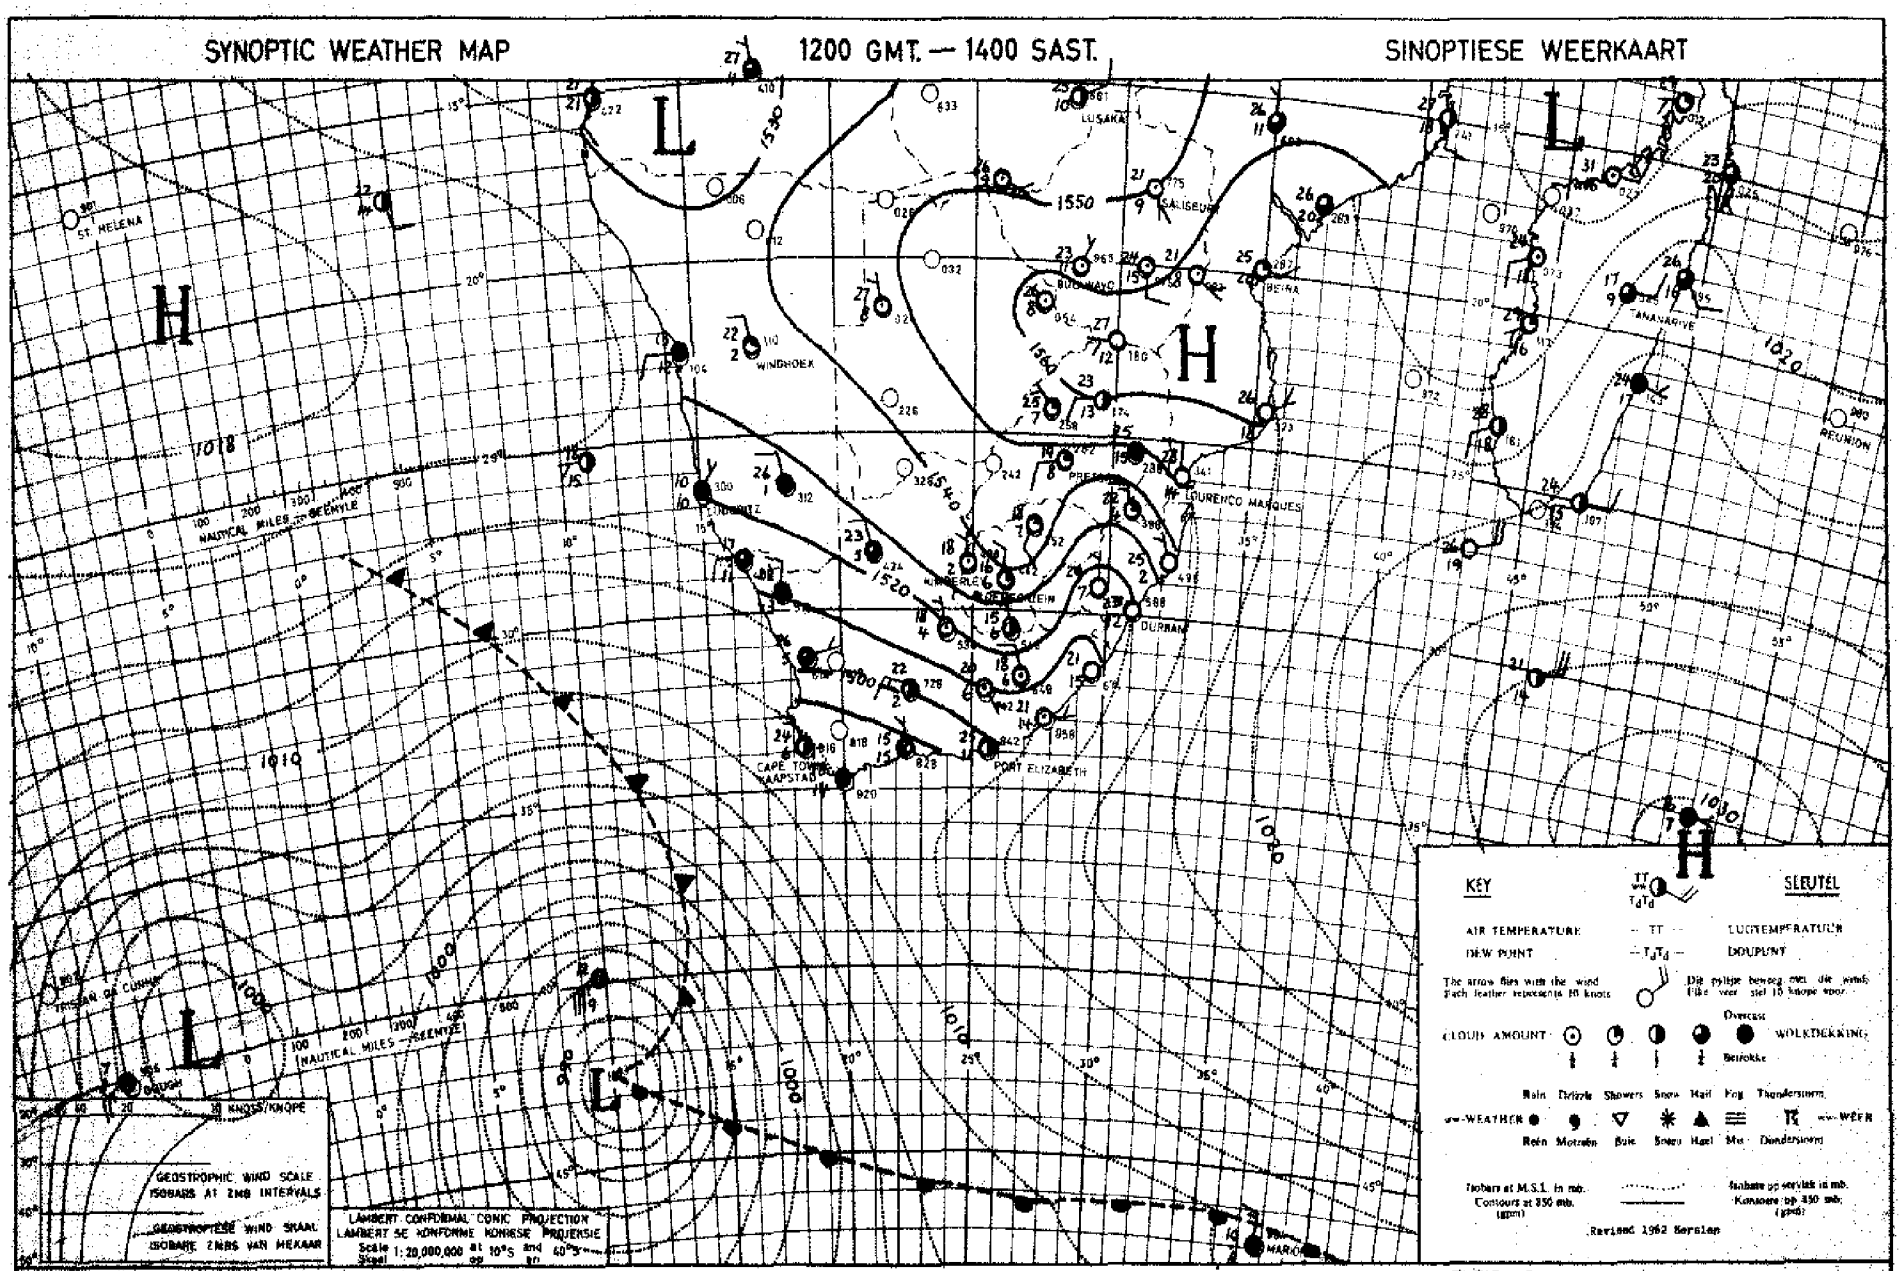
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 1-6-1969 DATUM — AFLEIDING

The cold front approaching from the west will cause cloudy weather with showers over the south-western part of the Cape Province but over the remainder of the country it will be mainly fair.

Die koue Front wat uit die weste nader kom, sal bewolkte weer met buie veroorsaak oor die suidwestelike deel van Kaapland maar oor die res van die land sal dit hoofsaaklik mooiweer wees.

The cold front and trough west of Cape Town will maintain cloudy weather with showers over the south-western Cape. Over the remainder of the country the circulation is anticyclonic and it will be fine apart from high clouds.

Die koufront en trog wes van Kaapstad sal bewolkte weer met buie laat voortduur oor Suidwes-Kaapland. Oor die res van die land is die sirkulasie antisiklonaal en dit sal mooiweer wees afgesien van hoë wolke.

INFERENCE

DATE 3.6.1969 DATUM

AFLEIDING

With a cold front south-west of Cape Town cloudy weather with rain is expected along the south-west coast. Over the rest of the country the circulation is anticyclonic causing fine weather.

Met 'n kouefront suidwes van Kaapstad kan bewolkte weer met reën verwag word langs die suidweskus. Oor die res van die land is die sirkulasie antisiklonaal sodat mooiweer verwag kan word.

INFERENCE — DATE 4 - 6 - 1969 DATUM — AFLEIDING

Behind the eastwards moving cold front cold air will spread over most regions of the country but it will remain mild to warm over the northern parts of Transvaal, S.W.A. and Botswana. Cloudy weather with showers will still occur over [illegible] eastern Cape and southern Natal.

Agter die kouefront, wat oostwaarts beweeg, sal koue lug oor die meeste dele van die land uitbrei. Dit sal egter matig tot warm bly vir die noordelike dele van Transvaal, S.W.A. en Botswana. Wolkige weer met buie sal nog voorkom oor die [illegible]

The high moving in behind the cold front will maintain cool, cloudy weather with showers over Natal and the Eastern Cape while it will also become cloudy and cooler over Transvaal and the north eastern Free State.

Die hoog wat agter die koufront inbeweeg sal veroorsaak dat die koel, bewolkte weer met buie oor Natal en Oos-Kaapland voortduur terwyl die koeler, bewolkte weer ook oor Transvaal

The high pressure system south-east of the country is receding eastwards rapidly, resulting in partial clearance over the Transvaal and over Natal. The approaching cold front will cause cloudy conditions with rain over the Peninsula late tomorrow.

Die hoëdrukstelsel suidoos van die land beweeg vinnig ooswaarts sodat bewolktheid oor Natal en Transvaal gedeeltelik sal opklaar. As gevolg van die naderende koufront word verwag dat dit laat môreaand bewolk sal word oor die Skiereiland met reën.

INFERENCE

DATE 7 - 6 - 19 69 DATUM

AFLEIDING

The high over the eastern interior will maintain the inflow of moist air over these regions so that it will remain cloudy to partly cloudy over Transvaal and the northern areas of the Free State and Natal. Cloudy weather with a possibility of rain will develop over the south-western Cape as a result of the front approaching from the west.

Die hoog oor die oostelike binneland voer nog vogtige lug in oor hierdie dele en dit sal bewolk tot gedeeltelik bewolk bly oor Transvaal en die noordelike dele van die Vrystaat en Natal. Bewolkte weer met 'n moontlikheid van reën sal oor Suidwes-Kaapland ontwikkel weens die front wat van die weste af aankom.

DAAGLIKSE WEERBULLETIN

AFLEIDING

Between the strong high near Marion and the low south-east of Durban the on-shore flow of sea air will continue over the southern and south-eastern coastal areas where it will be cloudy with rain and showers. Over the rest of the country the circulation is anticyclonic and it will remain fair.

Tussen die sterk hoog naby Marion-eiland en die laag suidoos van Durban sal 'n land waartoe stroming van seelug voortduur oor die suidelike en suidoostelike kuststreke waar dit bewolk sal wees met reën en buie. Oor die res van die land is die sirkulasie antisiklonaal en sal dit redelike mooi weer wees.

Revised 1962 Version

INFERENCE — AFLEIDING

DATE 19.6.69 DATUM

The low south-east of the country will cause cloudy weather with rain over the southern and south-western Cape coastal regions. The low and cold front approaching from the west will later bring on cloudy weather with showers over the south-western Cape coast.

Die laag suidoos van die land sal veroorsaak dat bewolkte weer met ligte buie oor die Kaapse suid- en suidooskus voorkom. Die laag en koufront wat uit die weste nader, sal later bewolkte weer met buie oor die Kaapse suidwestkus meebring.

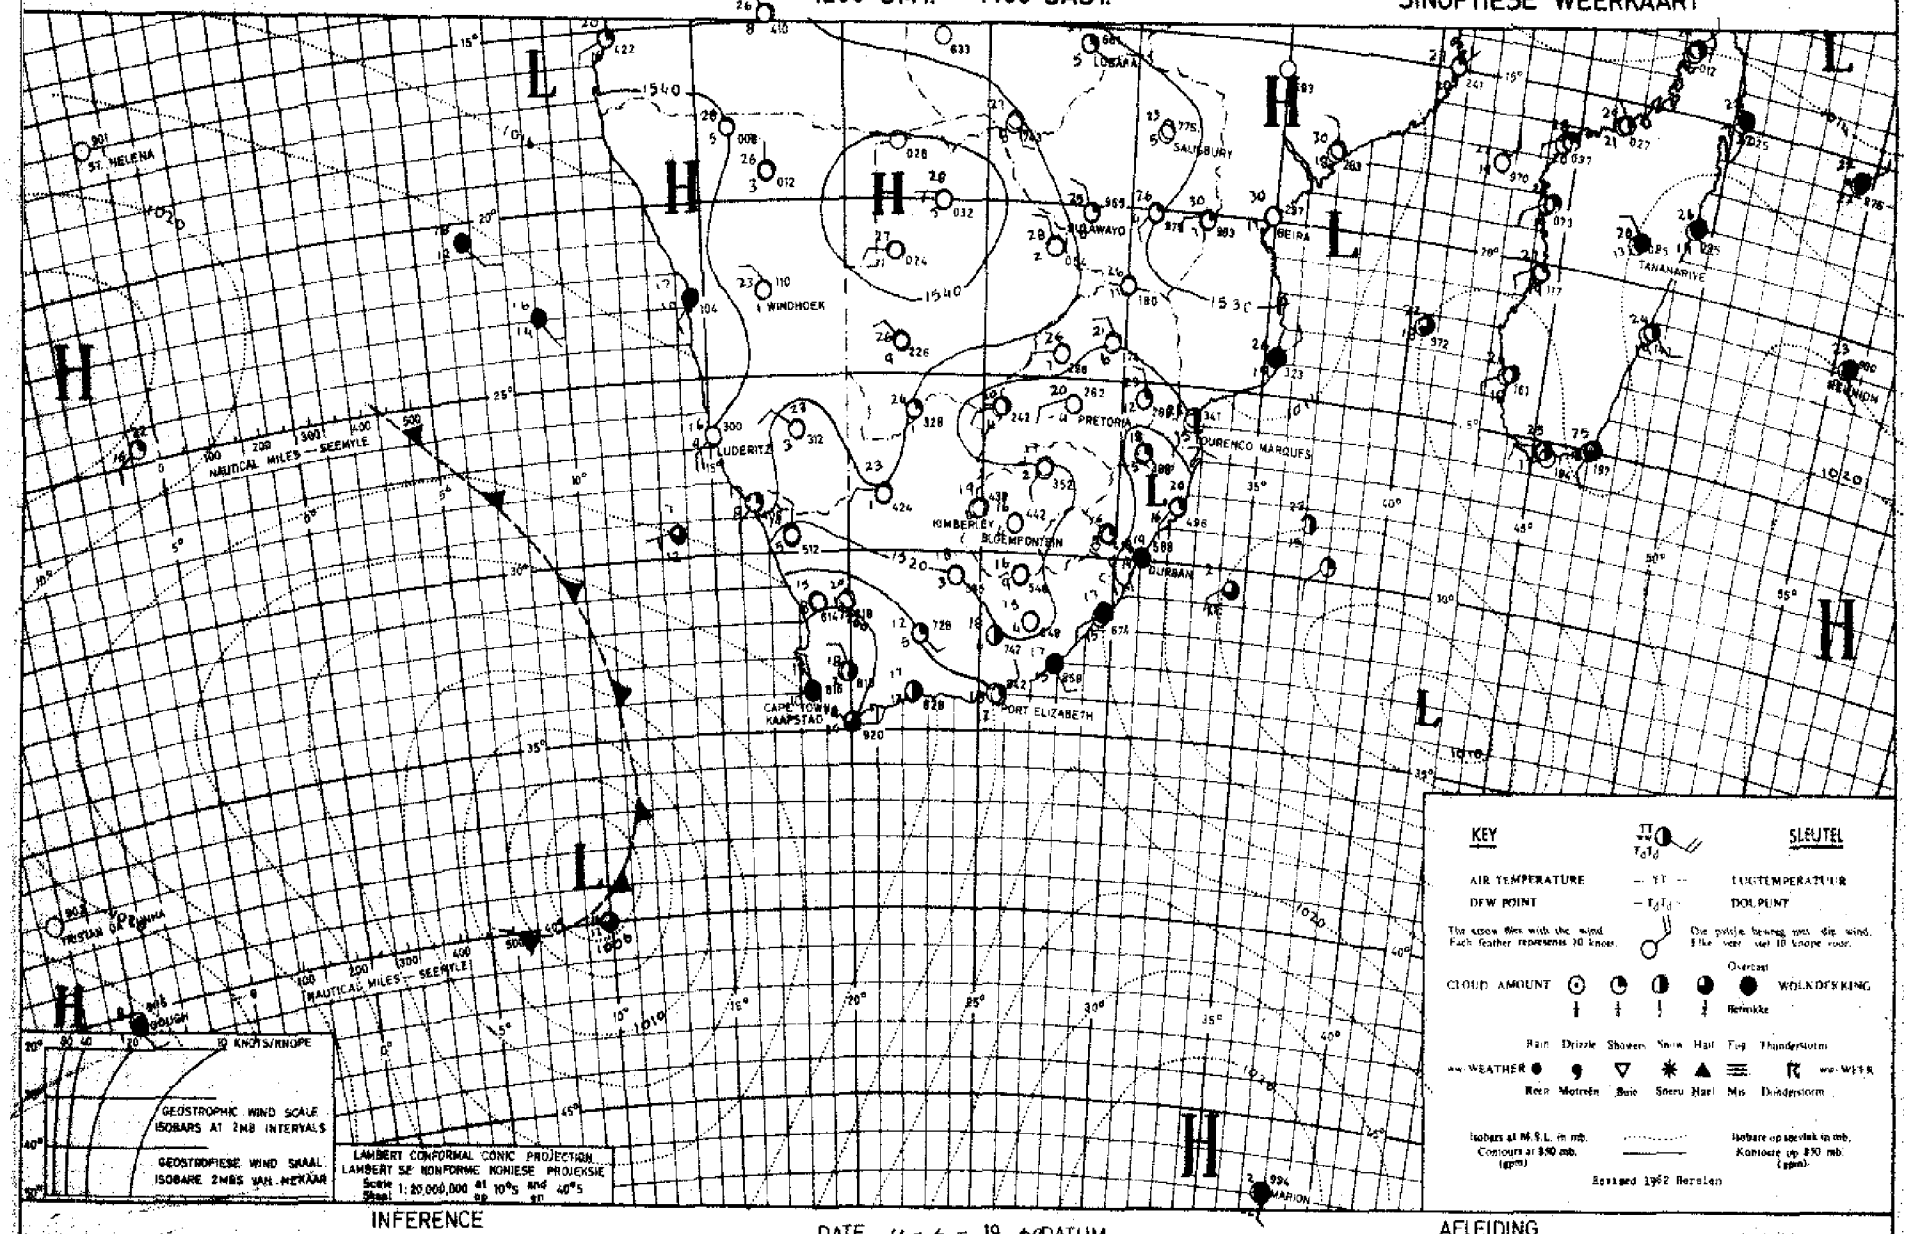
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE

The synoptic situation remains fairly static so that little change is expected. It will be cloudy over the Cape south-western and southern coastal areas but it is expected to clear partially along the Natal coast. Inland it will remain fine.

DATE 11-6-19..62 DATUM

AFLEIDING

Die sinoptiese situasie bly taamlik statiee en min verandering word verwag. Oor die Kaapse suidwes- en suidkus sal dit bewolk wees met reën terwyl opklaring verwag word oor die Natalse kus. Oor die binneland sal mooi weersomstandighede voortduur.

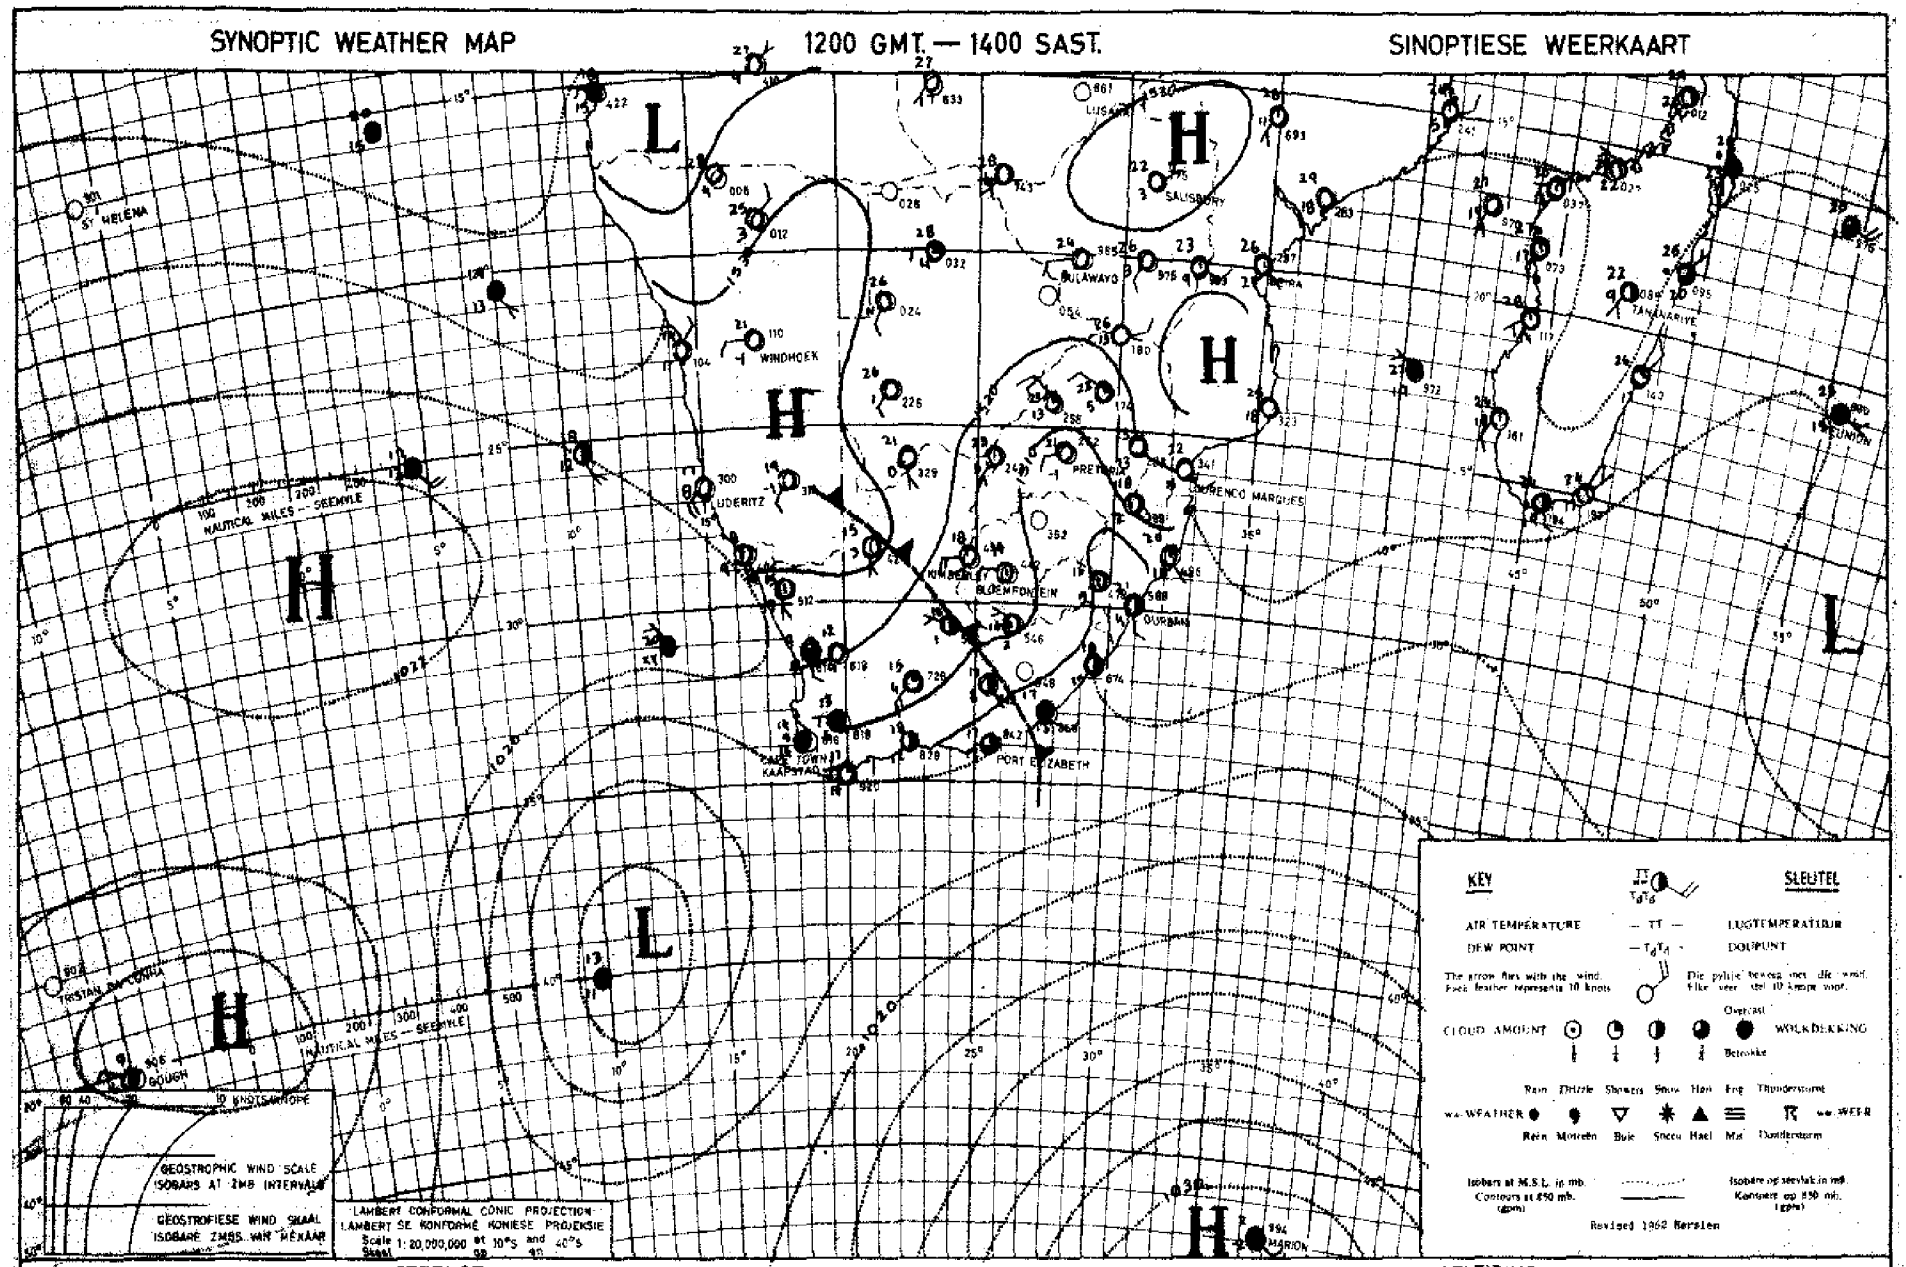
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 12 - 6 - 19 69 DATUM AFLEIDING

With a trough of low pressure south-west of the country it is expected to be cloudy and cold with light showers over the extreme south-western and southern parts of the country. Elsewhere it will be mainly fair and cold to mild.

Met 'n trog van lae druk suidwes van die land, word verwag dat dit bewolk en koud sal wees met buie oor die heel suidwestelike en suidelike dele van die land. Andersins sal dit redelike mooi weer en koud tot matig wees.

INFERENCE

DATE 13-6-1969 DATUM

AFLEIDING

The high over the interior will maintain the fine weather conditions over most of the country but the cold front approaching from the west will cause cold cloudy weather with rain over the south-western Cape by tomorrow night.

Die hoog oor die binneland sal die mooiweersoestande oor die meeste dele van die land laat voortduur, maar die koufront wat by Gough verby is sal teen môreaand koue bewolkte weer met reën oor Suidwes-Kaapland teweegbring.

With a cold front south-west of Cape Town, cloudy weather can be expected along the south-western and southern coasts with showers. Elsewhere the circution is anticyclonic causing fine weather.

Met 'n kouefront suidwes van die land sal bewolkte weer met buie voorkom langs die Kaapse suidwes- en suidkus. Origens is die sirkulasie antisiklonaal en dit sal mooiweer bly oor die meeste gebiede.

The cold front near Cape Town is followed by an extensive high and will therefore advance eastwards over most parts of the Cape Province. Cloudy conditions with rain and showers will occur over the south-western and southern parts of the Province and will spread to the Eastern Cape later.

Die kouefront by Kaapstad word gevolg deur 'n groot hoog en sal dus ooswaarts beweeg oor die meeste dele van Kaapland. Bewolkte weer met reën en buie sal voorkom oor die suidwestelike en suidelike dele van dié provinsie en later ook na Oos-Kaapland uitbrei.

Very cold air is moving rapidly across the country. The Atlantic High is centred far to the north, consequently precipitation on the coast will only be slight. Over the interior it will be very cold and snowshowers will occur over the higher regions.

Baie koue lug beweeg vinnig noordooswaarts. Met die sentrum van die Atlantiese hoog so ver noord geleë, sal daar maar min neerslag langs die kus wees. Oor die binneland sal dit baie koud wees met sneeubuie oor die hoogliggende gebiede.

INFERENCE

DATE 17 - 6 - 19 69 DATUM

AFLEIDING

A new frontal system has moved in over the southern Atlantic ocean and caused winds to veer to north-westerly over South-western Cape where rain started falling again. The cold air behind the first cold front has spread over the whole country and temperatures will remain below normal generally.

'n Nuwe frontale stelsel het oor die Suid-Atlantiese oseaan inbeweeg en het veroorsaak dat die winde oor Suidwes-Kaapland teruggedraai het na noordwes en dat reën weer oor hierdie gebied uitsak. Die koue lug agter die eerste koufront het reeds oor die hele land uitgebrei en temperature sal oral nog onder normaal wig.

The cold front approaching the Cape from the south-west will cause cold, cloudy conditions with rain to spread once again over the southern and eastern Cape coastal regions and later also over Natal. Over the remainder of the country it will remain fair and it will become warmer generally.

Die koufront wat die Kaap uit die suidweste nader, sal koue, bewolkte weer met reën nogeens laat uitbrei oor suidelike en oostelike Kaapland en later oor Natal. Oor die res van die land sal dit redelike mooiweer bly en geleidelik warmer word.

The high moving in south of the country and also over the interior will cause temporary cloudy weather along the east coast and the Transvaal lowveld, but otherwise it will be fine and fairly cold.

Die hoog wat oor die land en suid van die land inbeweeg, sal tydelik bewolkte weer veroorsaak langs die ooskus en die Transvaalse laeveld maar origens sal dit mooiweer en betreklik koud wees.

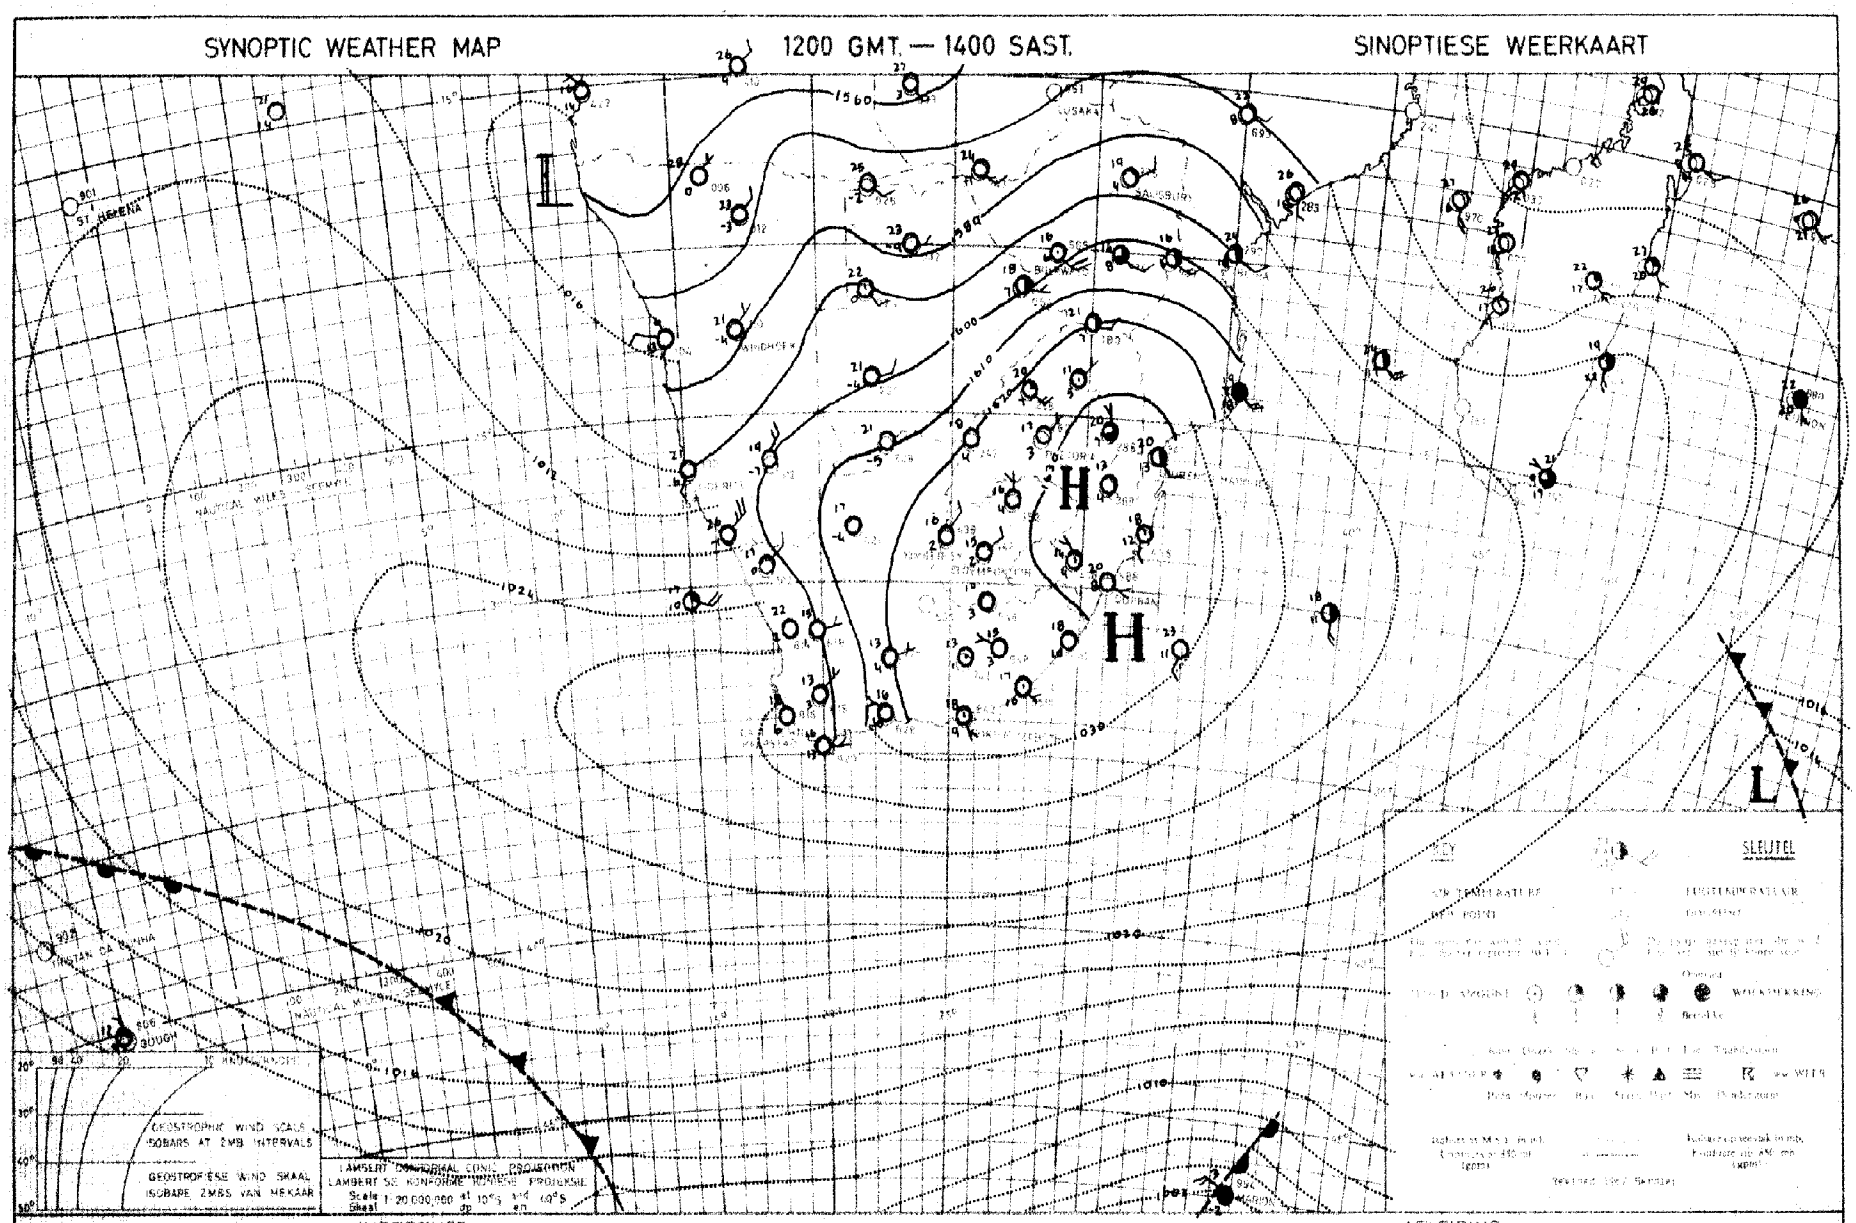
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 20-6-1969 DATUM AFLEIDING

As a result of the strong high pressure system over the country it will be fine generally with day temperatures rising. Warm bergwind conditions will occur along the western and south-western coastal regions.

As gevolg van die sterk hoëdrukstelsel oor die land sal dit algemeen mooi weer wees met dagtemperature wat hoër sal styg. Warm bergwindtoestande sal langs die wes- en suidweskusstreke voorkom.

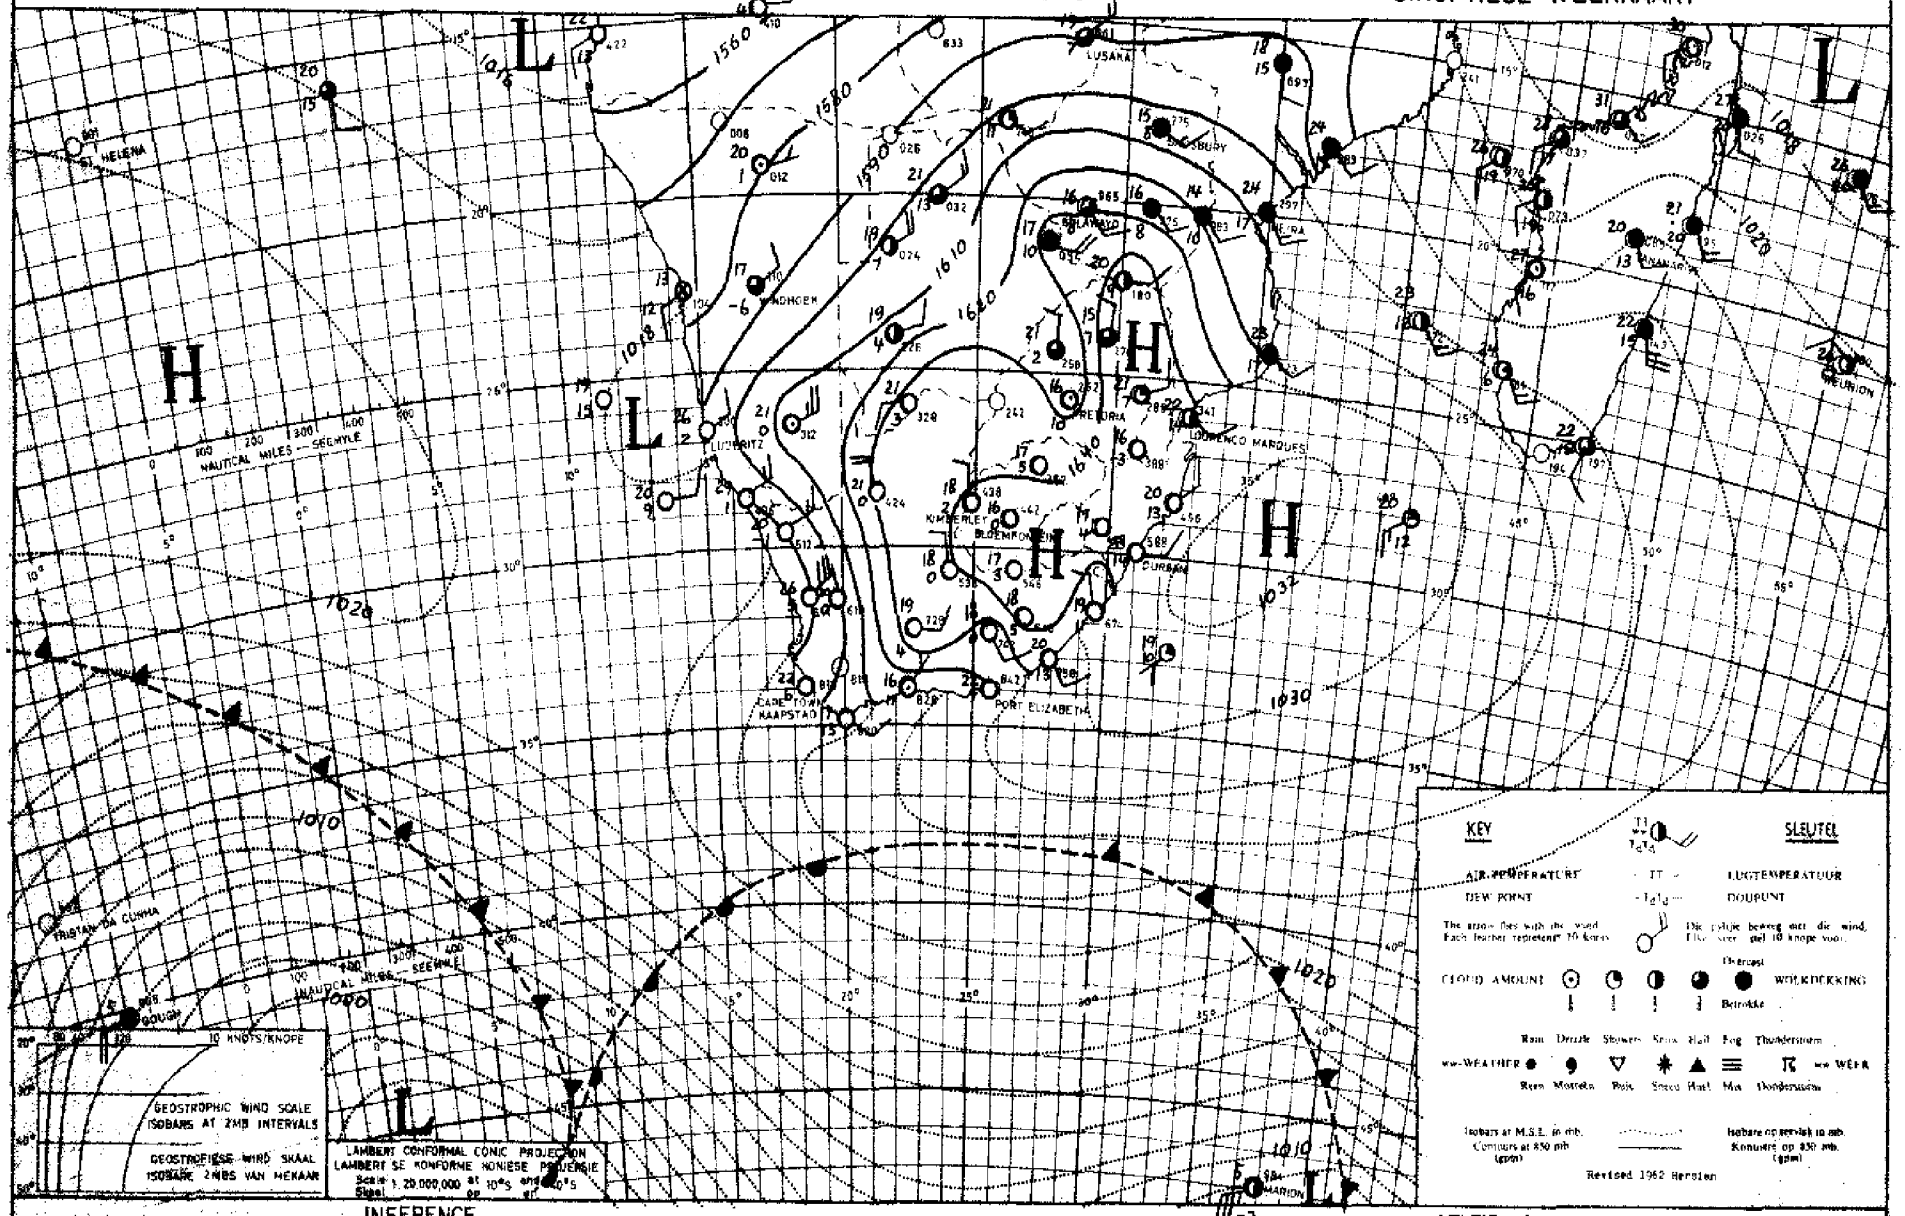
SYNOPTIC WEATHER MAP / 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



The coastal low on the west coast will move southwards and cloudy cooler conditions will spread from the north along the western coastal areas. It will be partly cloudy over Northern Transvaal where moister air is still in circulation, but over the remainder of the country it will remain fine.

Die kuslaag aan die weskus sal suidwaarts beweeg en bewolkte, koeler weer sal vanuit die noorde uitbrei langs die westelike kusstreke. Dit sal gedeeltelik bewolk wees oor Noord-Transvaal waar vogtiger lug nog in sirkulasie is, maar oor die res van die land sal dit mooi-weer bly.

With a cold front south-west of Cape Town cloudy weather with rain can be expected over the south-western parts of the country. Over the rest of the country the circulation is anticyclonic and fine weather is expected.

Met 'n koufront suidwes van Kaapstad word verwag dat dit bewolk sal word met reën oor die suidwestelike dele van die land. Oor die res van die land is die sirkulasie antisiklonaal en mooiweer word verwag.

INFERENCE

DATE 23 - 6 - 19 69 DATUM

AFLEIDING

The cold front near Cape Town will move eastwards and therefore cold, cloudy weather with showers will advance over the south-western and southern areas of the Cape Province. Later it will become colder over the rest of this province but over the remaining areas it will remain fine and mild to warm.

Die koufront naby Kaapstad sal ooswaarts beweeg sodat koue, bewolkte weer met buie sal uitbrei oor die suidwestelike en suidelike dele van Kaapland. Dit sal later ook kouer word oor die res van die provinsie maar mooiweer en matig bly oor die oorblywende gebiede.

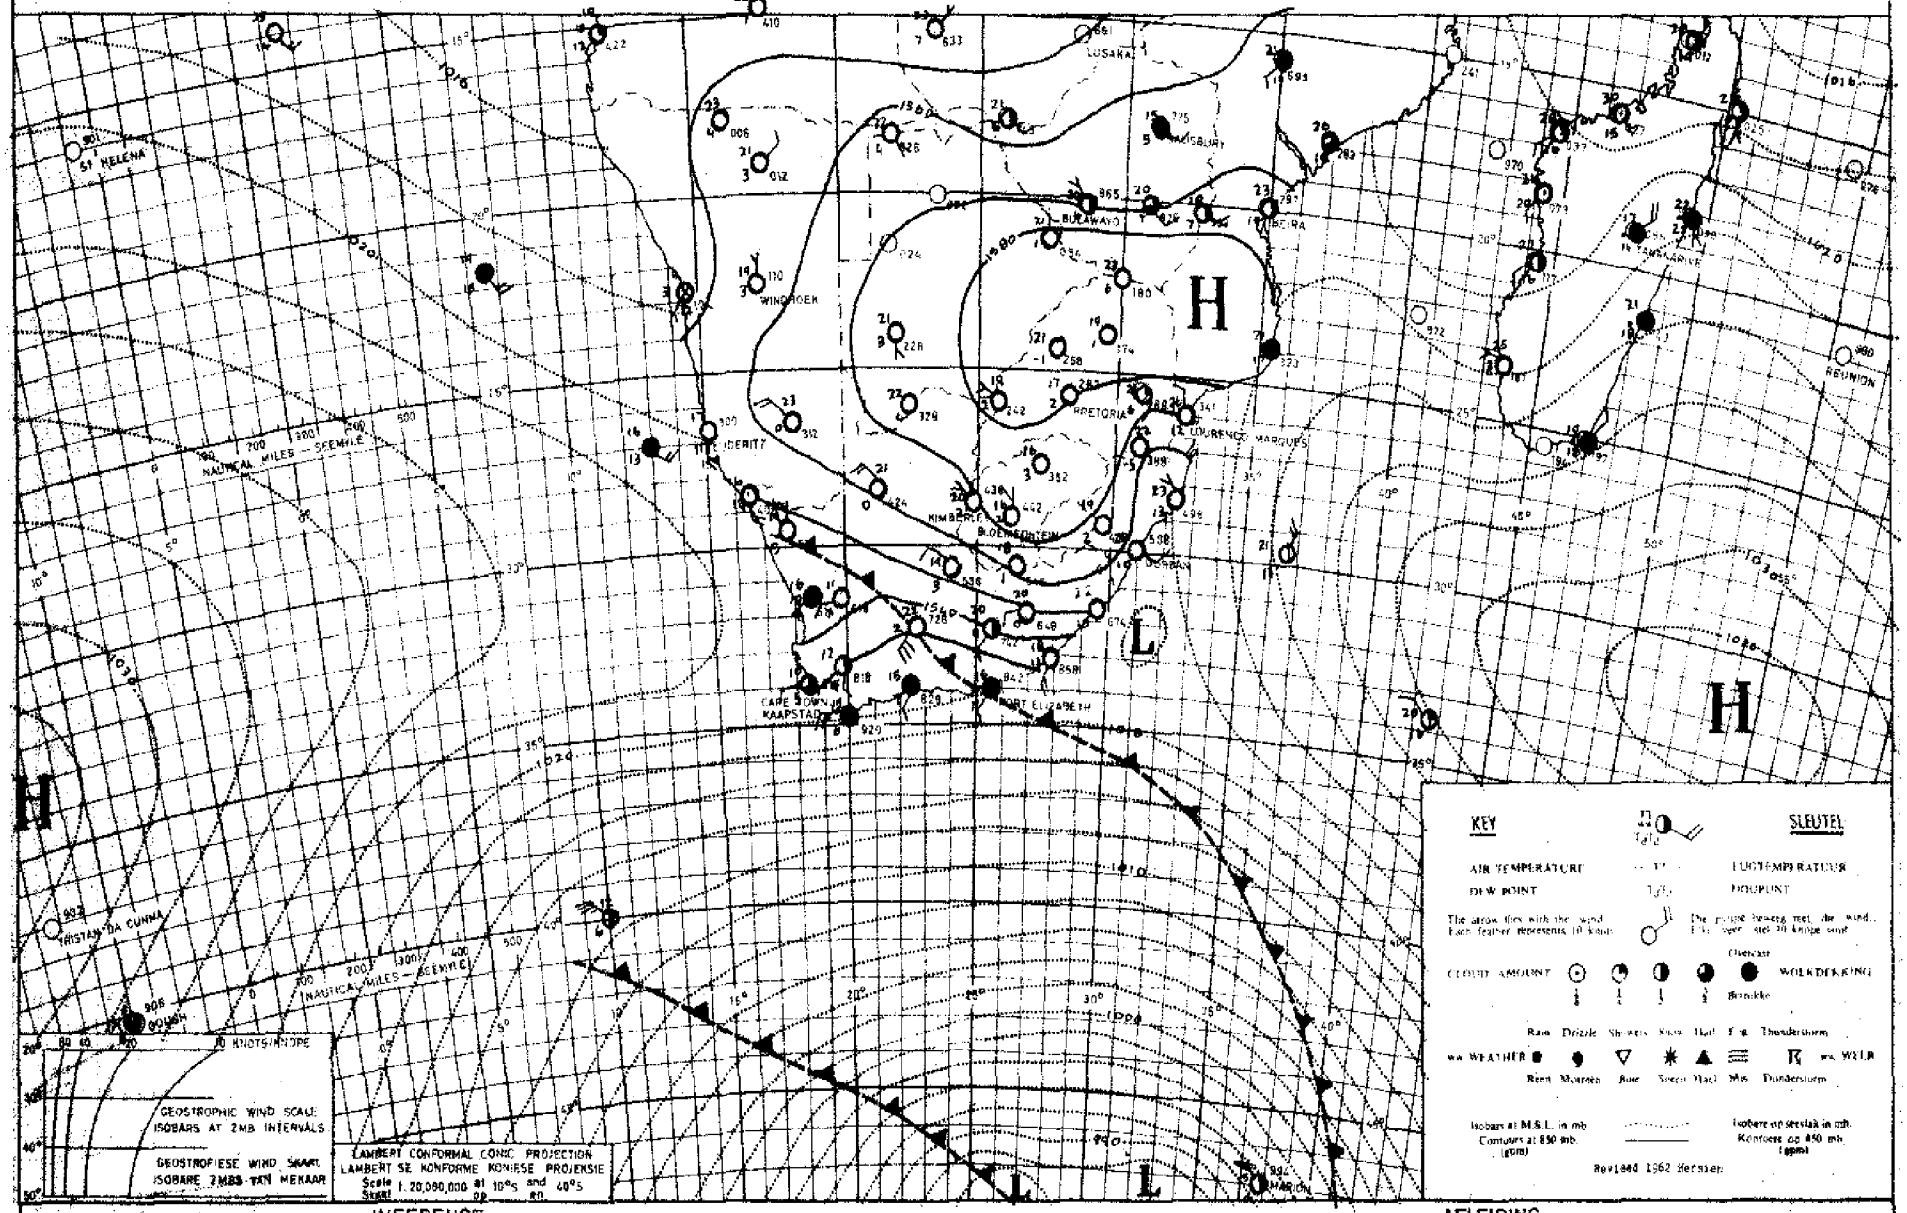
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 24-6-19 66 DATUM AFLEIDING

The synoptic situation is not expected to change substantially. It will remain cloudy and cold over the south-western and southern Cape coastal areas and adjacent interior with isolated showers. Over the remainder of the country it will be mainly fine and mild.

Dit word nie verwag dat die situasie wesenlik sal verander nie. Bewolkte tot gedeeltelik bewolkte en koue toestande met buie sal voortduur oor die Kaapse suidwes- en suidkusstreke en aangrensende binneland. Oor die res van die land sal dit mooiweer en matig bly.

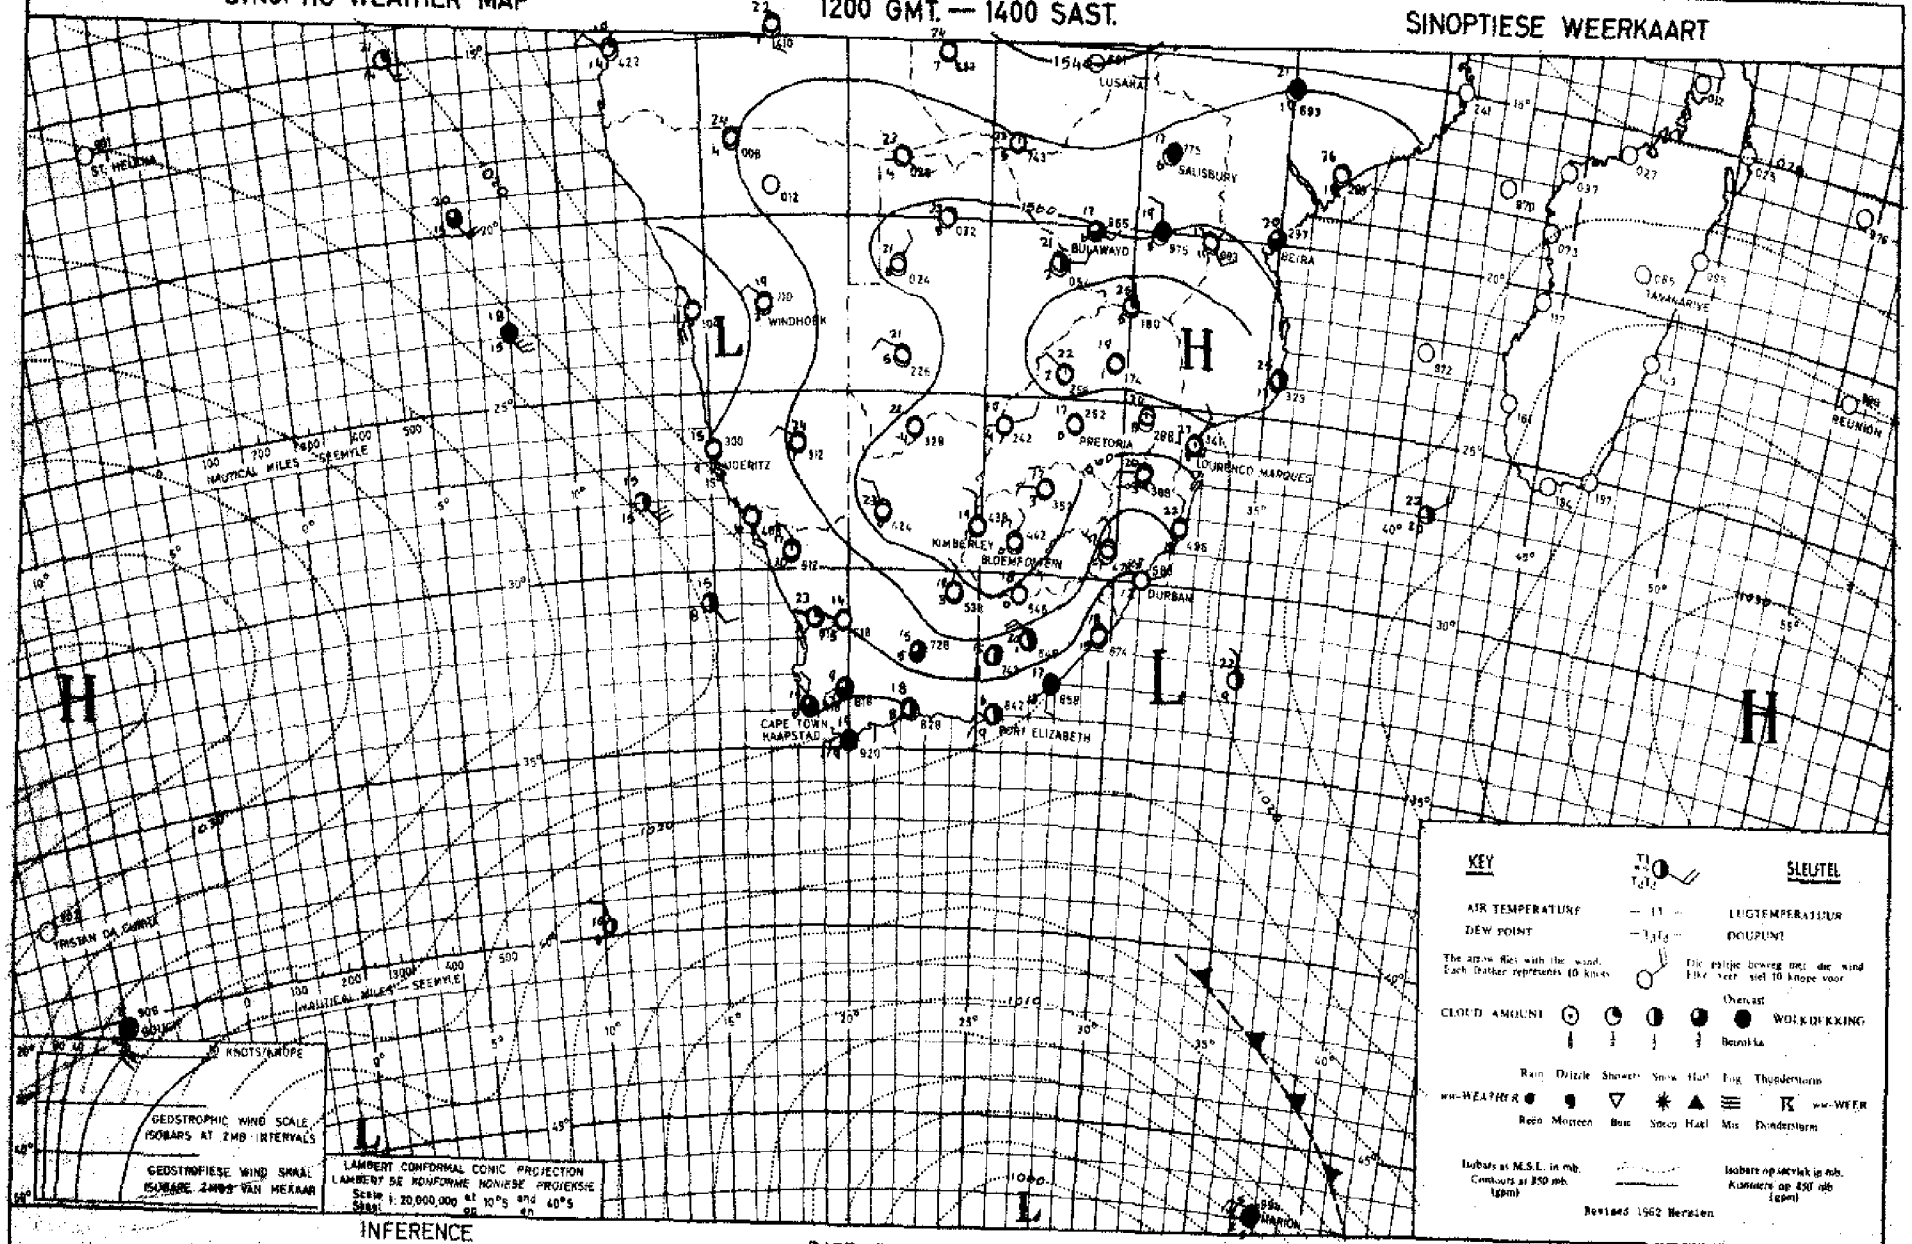
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE

DATE 29 - 6 - 19 69 DATUM

AFLEIDING

With a trough of low pressure to the south of Cape Town cloudy weather with rain can be expected over the south-western parts of the country. Over the rest of the country the circulation is anticyclonic so that the weather will remain fine.

Met 'n trog van lae druk suid van Kaapstad kan bewolkte toestande met reën verwag word oor die suidwestelike dele van die land. Oor die res van die land is die sirkulasie antisiklonaal en mooiweer-toestande kan verwag word.

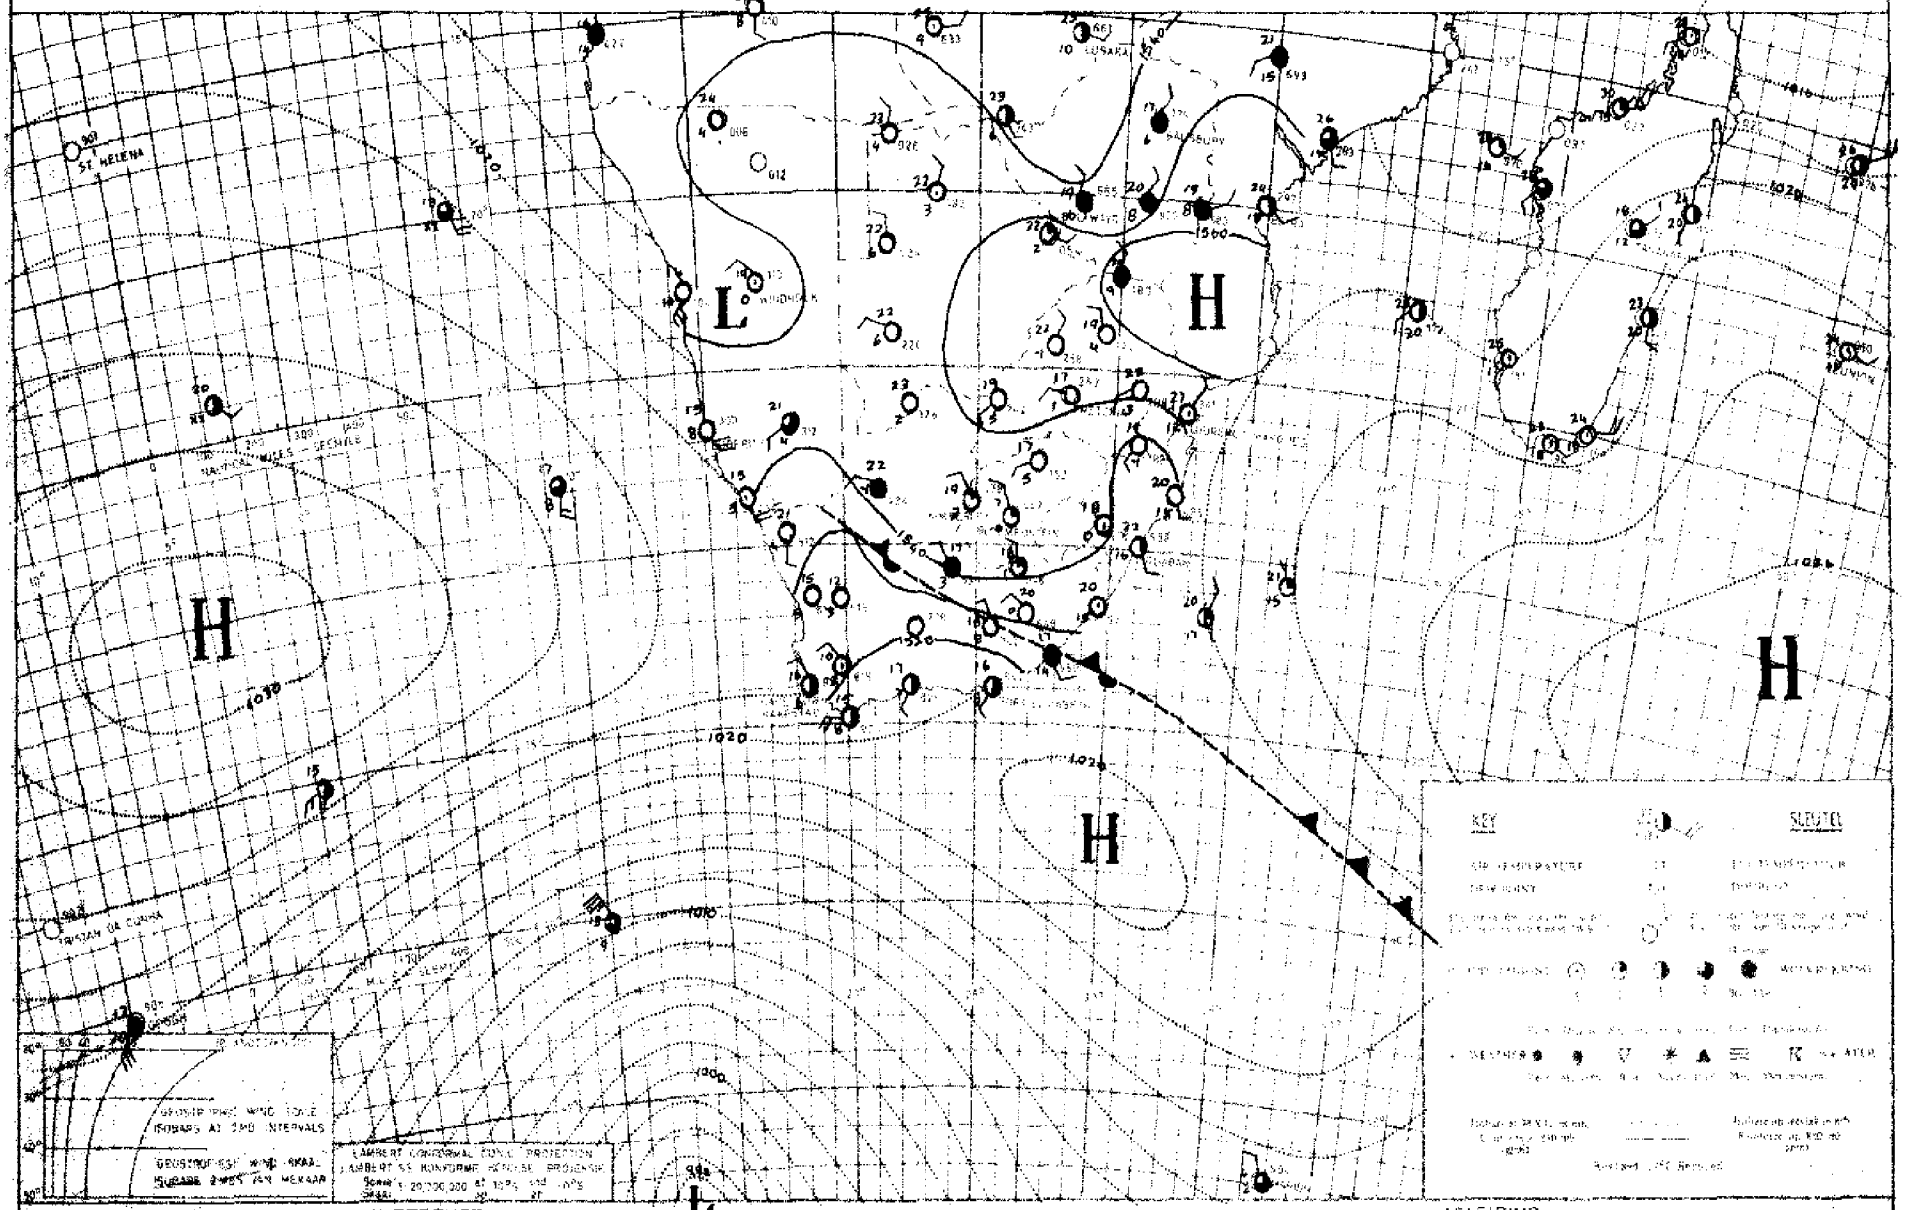
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST SINOPTIESE WEERKAART



INFERENCE DATE 16 . . 6 . . 19 . . 69 DATUM AFLEIDING

With a broad trough of low pressure south-west of Cape Town the weather will be cloudy over the south-west coast with a possibility of light rain. Over the remainder of the country it will be fine to partly cloudy.

Met 'n breë trog van laedruk suidwes van Kaapstad sal bewolkte weer met ligte reën moontlik oor die suidwestkus voorkom. Oor die res van die land sal dit mooiweer tot gedeeltelik bewolk wees.

The trough of low pressure over the western interior is associated with an upper air trough. Light showers will therefore occur over the central and south-eastern interior. Over the remainder of the country it will be partly cloudy and mild.

Die trog van lae druk oor die westelike binneland gaan gepaard met 'n bolugtrog en dus sal ligte buie oor die sentrale en suidoostelike binneland voorkom. Oor die res van die land sal dit gedeeltelik bewolk en matig wees.

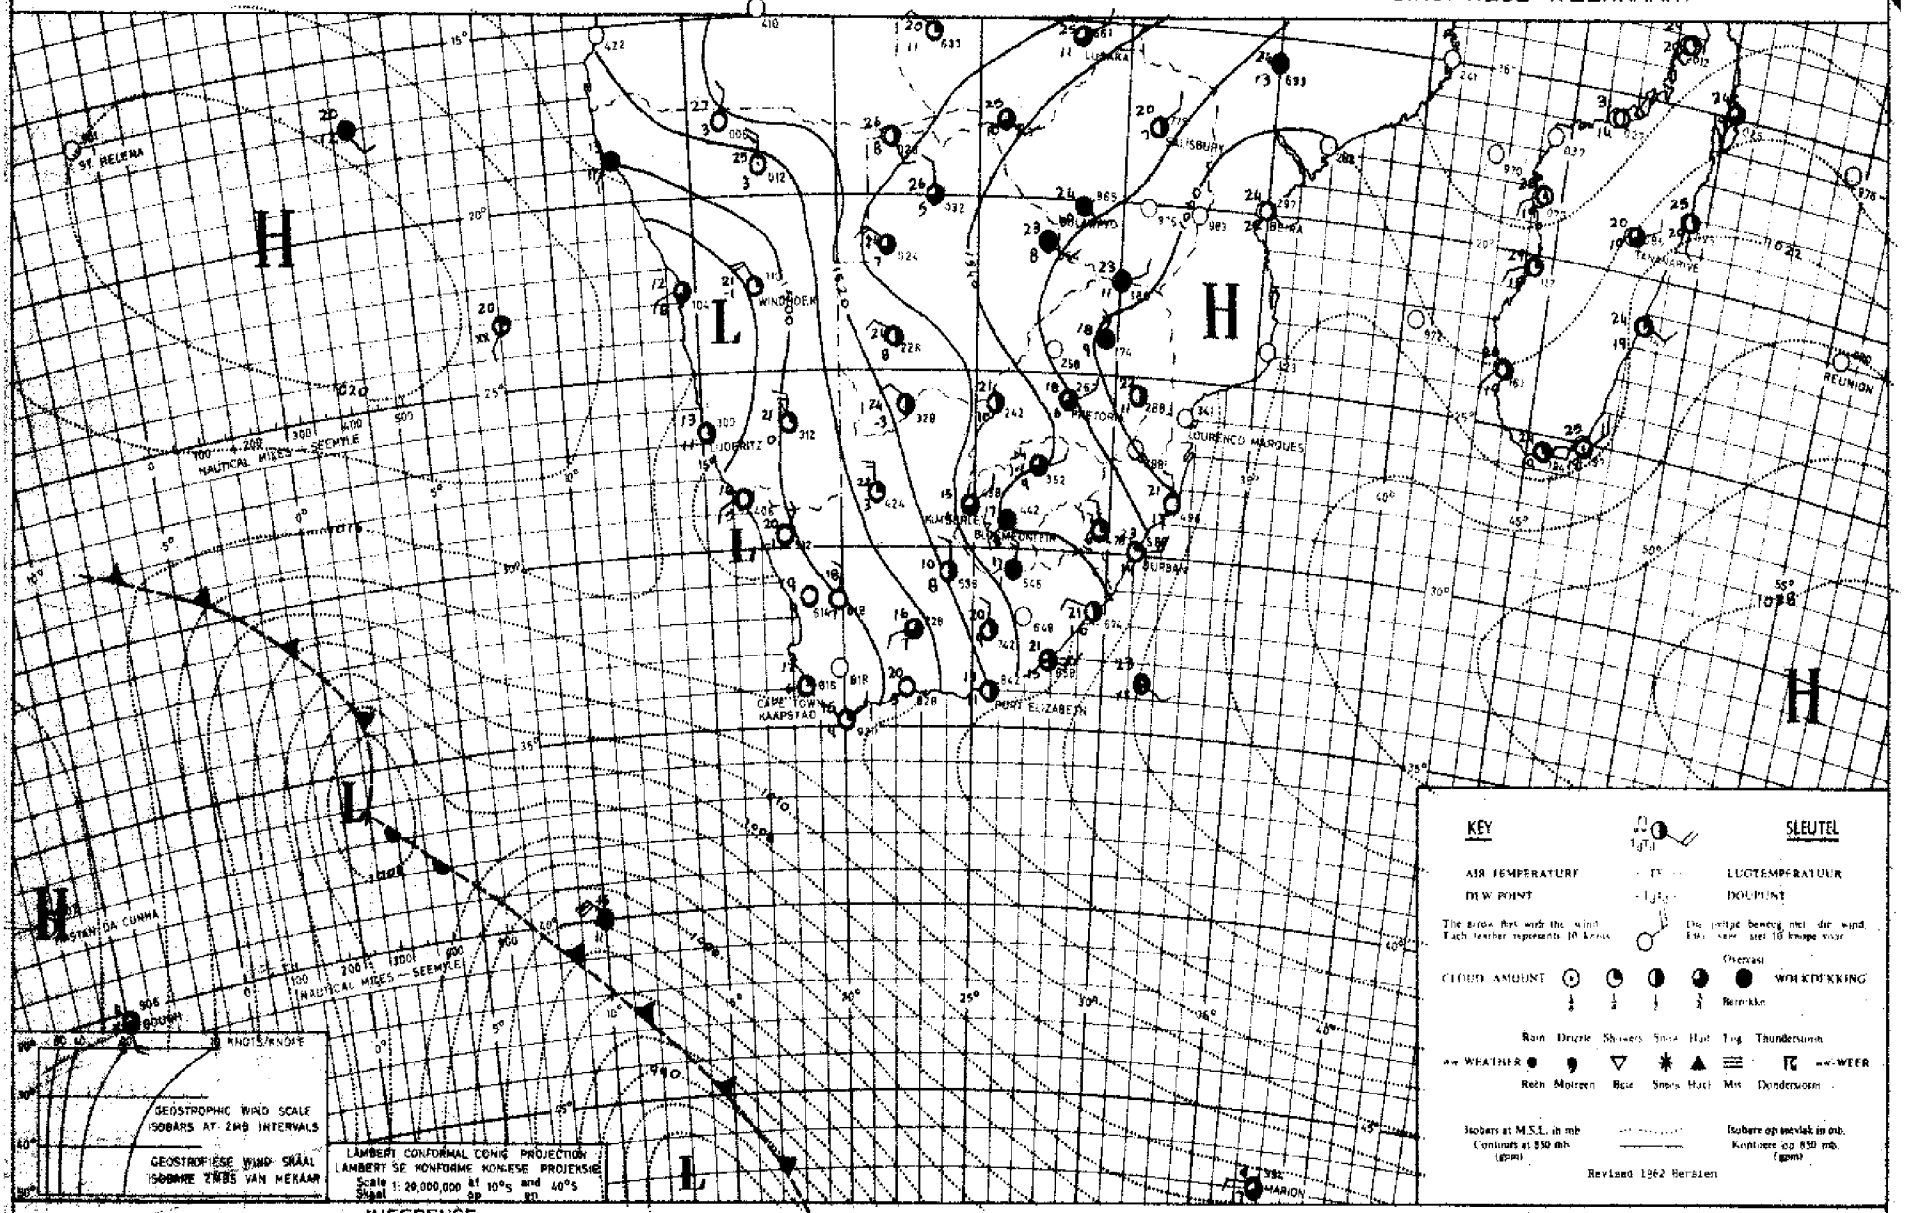
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 28.6.1969 DATUM AFLEIDING

An upper air trough is advancing over the interior and is accociated with light showers. Dry air is, however, moving over the country from the west. The cold front between Gough and Cape Town is moving eastwards so that rain and showers will spread to the western, and south-western parts of the Cape Province

'n Bolugtrog beweeg oor die binneland gepaard met ligte buie maar droë lug beweeg reeds in oor die binneland vanuit die weste. Die koufront tussen Kaapstad en Goughseiland sal oostwaarts beweeg sodat reën en buie oor die westelike en suidelike dele van Kaapland sal uitsak

INFERENCE
AFLEIDING
DATE 29-6-1969 DATUM
It will become cloudy and cold over the south - western and southern Cape coastal and inland regions with showers. Snow will fall over the mountains of south - western Cape. Over the remainder of the country it will be partly cloudy and mild to warm with fresh north - westerly winds.
Koue bewolkte toestande met buie sal na die Kaapse suidwes-en suidkusstreek sowel as na die suidwestelike binneland uitbrei. Sneeu is moontlik oor die berge van Suidwes - Kaapland. Oor die res van die land sal dit gedeeltelik bewolk en matig tot warm wees met 'n taamlike sterk noordwestewind.

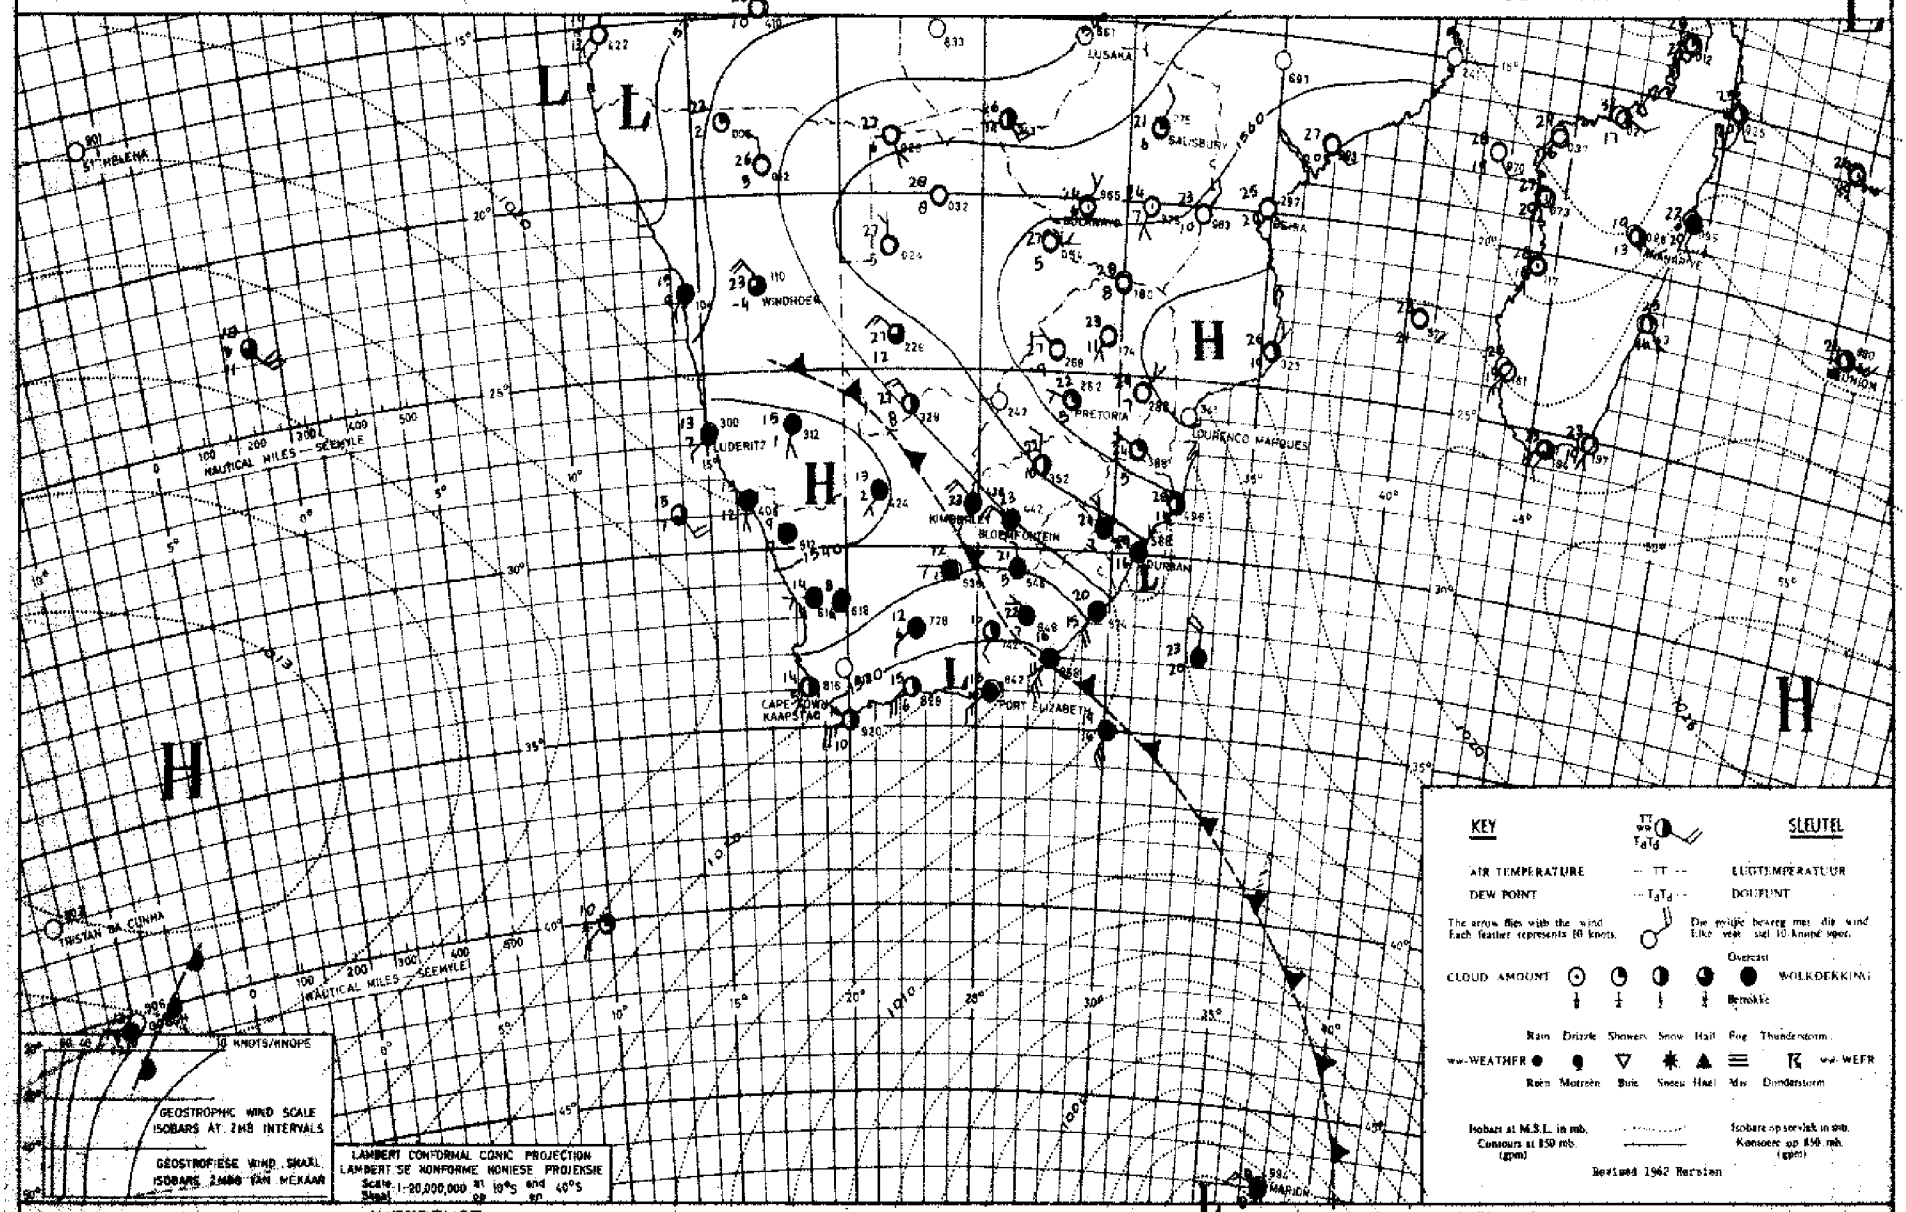
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 30-6-19.62 DATUM — AFLEIDING

Cold air following behind the cold front has already invaded most of the Cape Province and will advance further also over Natal and the southern Free State. Cloudy conditions with showers will occur over Eastern Cape and Natal and later spread over the Transvaal lowveld.

Koue lug het agter die front reeds uitgebrei oor die meeste dele van Kaapland en sal verder beweeg ook oor Natal en die suidelike Vrystaat. Bewolkte weer met buie sal voorkom oor Oos Kaapland en Natal en later ook oor die Transvaalse laeveld.
