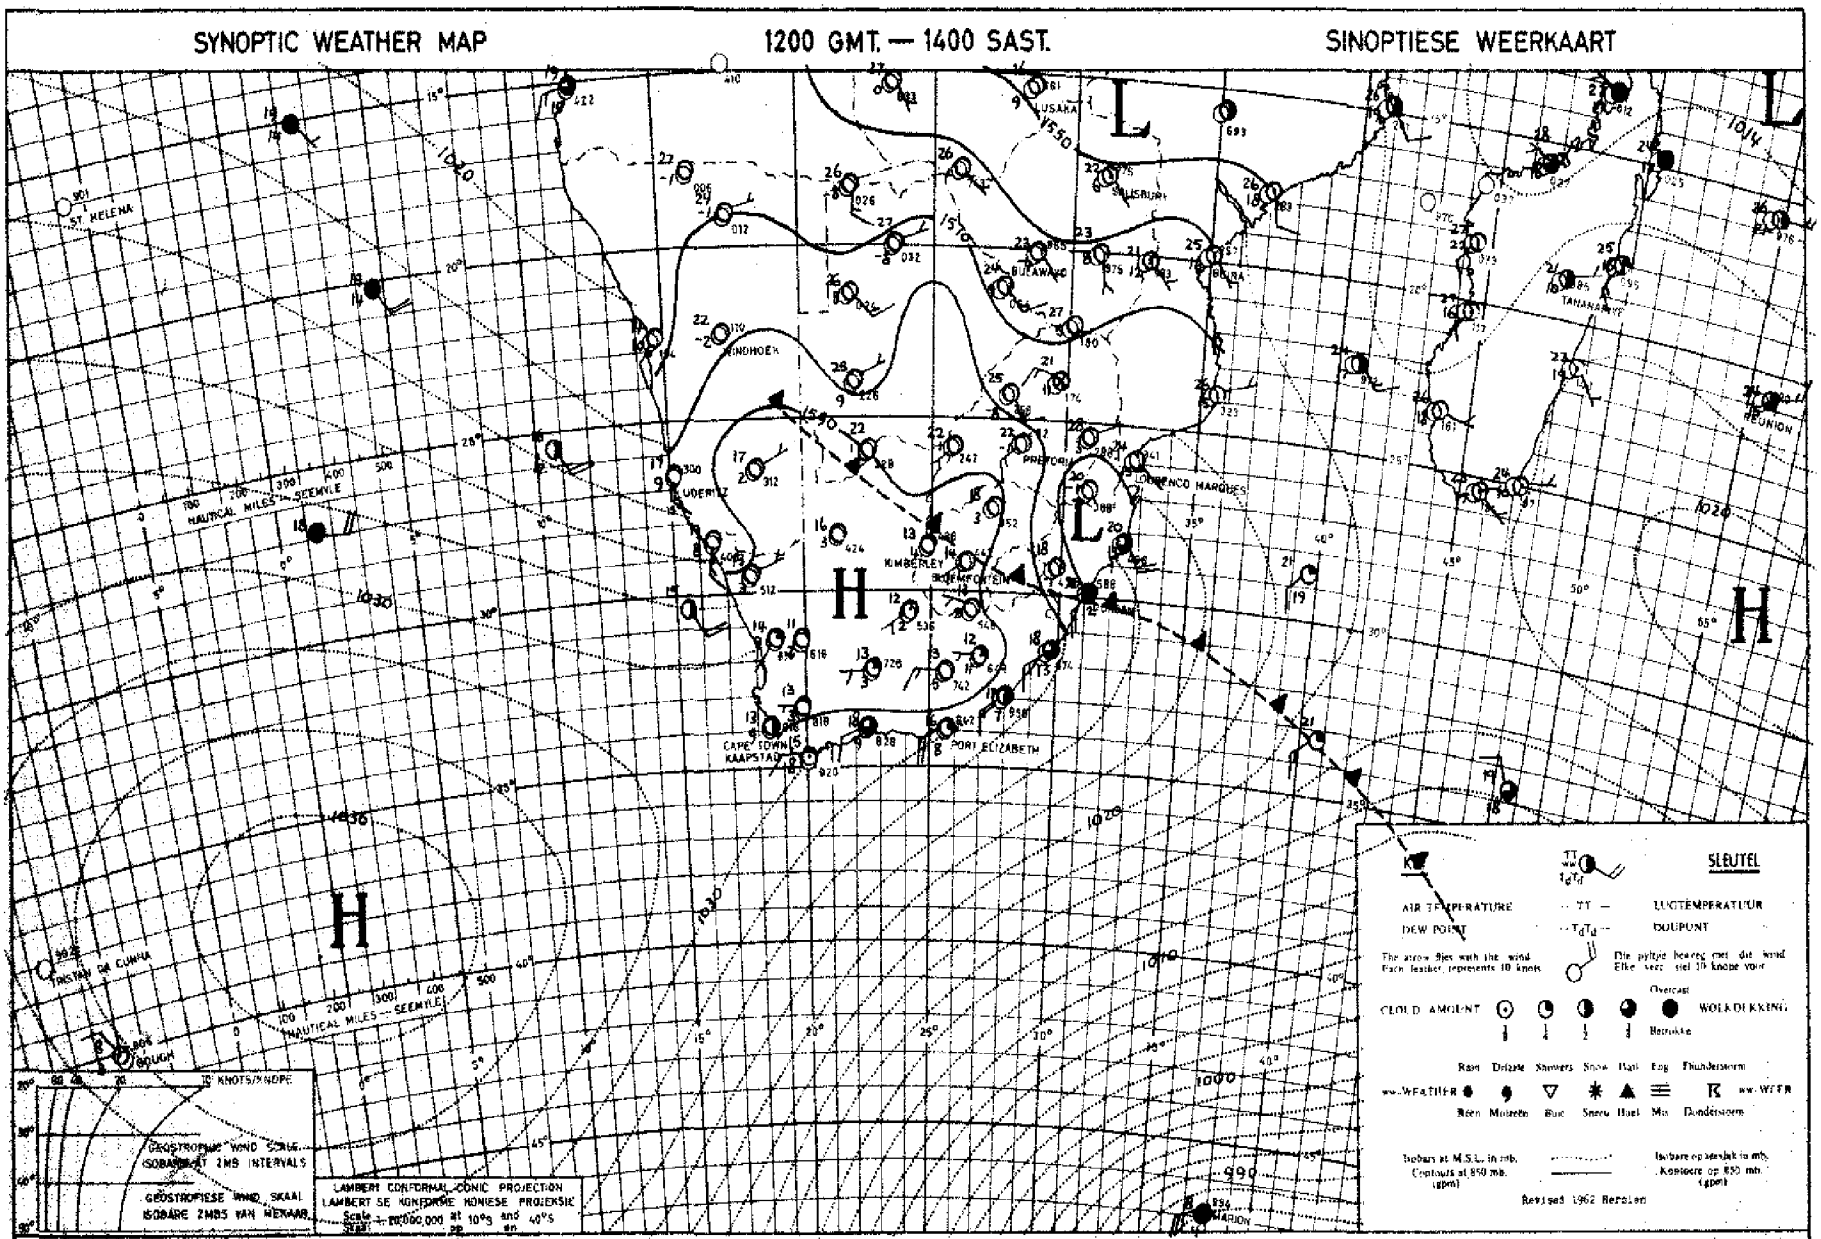
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 1-7-1970 DATUM — AFLEIDING

A ridge of high pressure is moving around the southern and eastern coasts and therefore cooler and cloudy weather will spread over Natal and the eastern parts of Transvaal. Over the remainder of the country it will be mainly fine but it will be cold over the Cape Province and the southern Free State.

'n Rug van hoë druk beweeg nou om die suid- en oskus en daarom sal koel, bewolkte weer uitbrei oor Natal en oor die oostelike dele van Transvaal. Oor die res van die land sal dit hoofsaaklik mooiweer wees maar koud oor die Kaapprovinsie en Suid-Vrystaat.

INFERENCE

DATE 8-7-19 70 DATUM

AFLEIDING

The Atlantic high is practically stationary and no change is expected in the present conditions. It will, however, gradually become warmer over most regions.

Die Atlantiese hoog is feitlik stasionêr en geen verandering word verwag in die heersende toestande nie. Dit sal egter geleidelik warmer word oor die meeste dele.

INFERENCE

DATE 3 - 7 - 1970 DATUM

AFLEIDING

The cold front approaching from the south will cause cloudy weather with showers over the southern areas. Over the remainder of the country it will remain fine as a result of the high pressure system over S.W.A. and Botswana.

Die koufront wat van die suide af aankom, sal bewolkte weer met buie teweegbring oor die suidelike kusgebiede. Oor die res van die land sal dit mooiweer bly as gevolg van die hoëdrukstelsel oor S.W.A. en Botswana.

With a trough of low pressure along the south coast cloudy weather with showers can be expected over these regions. Otherwise the air is dry and no change is expected in the fine weather conditions now prevailing.

Met 'n trog van lae druk langs die suidkus kan koel bewolkte weer oor hierdie streke verwag word met ligte buie plek-plek. Andersins is die lug droog en geen verandering word verwag in die heersende mooiweerstoestande nie.

INFERENCE

DATE 6 - 7 - 19 70 DATUM

AFLEIDING

Cold air from the south-west is flowing in over the south coast where cloudy weather with showers will occur. These conditions will spread later over the Eastern Cape coast and Natal. Over the remainder of the country it will, however, be fine and mild.

Koue lug uit die suidweste stroom in oor die suidkus waar bewolkte weer met buie dus voorkom. Hierdie toestande sal later ook oor die Oos-Kaapse kus en Natal uitbrei. Oor die res van die land sal dit egter mooiweer bly.

INFERENCE

DATE 8 - 7 - 19 70 DATUM

AFLEIDING

The high is ridging eastwards and will cause cloudy or partly cloudy weather along the coast with isolated showers over the Natal coastal regions. It will be fine over the interior apart from partly cloudy conditions over the southern provinces and over Northern Transvaal.

Die oostwaarts-bewegende rug agter die kuslaag, sal gedeeltelik bewolkte toestande op die kus tot gevolg hê en enkele buie word aan die Natalse kus verwag. Afgesien van gedeeltelik bewolkte toestande oor die suidelike provinsies en Noord-Transvaal, sal dit hoofsaaklik mooiweer en warm wees oor die binneland.

INFERENCE

DATE 9 - 7 - 19 70 DATUM

AFLEIDING

The broad low pressure trough south of the country is associated with cold fronts so that cloudy weather with rain will occur over the south-western Cape Province. Over the remainder of the country it will still be fair but fairly strong westerly winds will blow over the southern and central

Die breë laedruk stelsel suid van die land gepaard met koue-fronte sal bewolkte weer met reën veroorsaak oor Suidwes-Kaapland. Oor die res van die land sal dit nog mooiweer bly maar sterk westewind sal oor die suidelike en sentrale binneland waai.

INFERENCE

DATE 10 - 7 - 1970 DATUM

AFLEIDING

The deep low pressure system south of the land will cause cloudy weather over the southern areas of the Cape Province . Over the remainder of the country the circulation is anticyclonic and the weather will be Fair and mild .

Die diep laedrukstelsel suid van die land veroorsaak bewolkte weer oor die suidelike kusgebied van Kaapland . Oor die res van die land is die sirkulasie egter antisiklonaal en sal dit mooiweer en matig wees .

INFERENCE

DATE 11-7-1970 DATUM

AFLEIDING

With a cold front west of Cape Town, cloudy and cold conditions with light rain can be expected along the south-western and southern coasts. With an anticyclonic circulation over the interior fine weather can be expected there.

Met 'n koufront wes van Kaapstad sal bewolkte koue toestande met reën voorkom langs die suidwes- en suidkus. Oor die binneland is die sirkulasie antisiklonaal en mooiweer kan verwag word.

INFERENCE

The cold front over the southern Cape will move eastwards and cause cool, cloudy conditions with showers over the southern and south-eastern coastal regions. It will also become colder over the Cape interior and the southern Free State.

AFLEIDING

Die kouefront wat ooswaarts oor Suid-Kaapland beweeg, sal koel, bewolkte weer met buie veroorsaak oor die suid- en suidooskusgebied. Dit sal ook kouer word oor die Kaapse binneland en die Suid-Vrystaat.

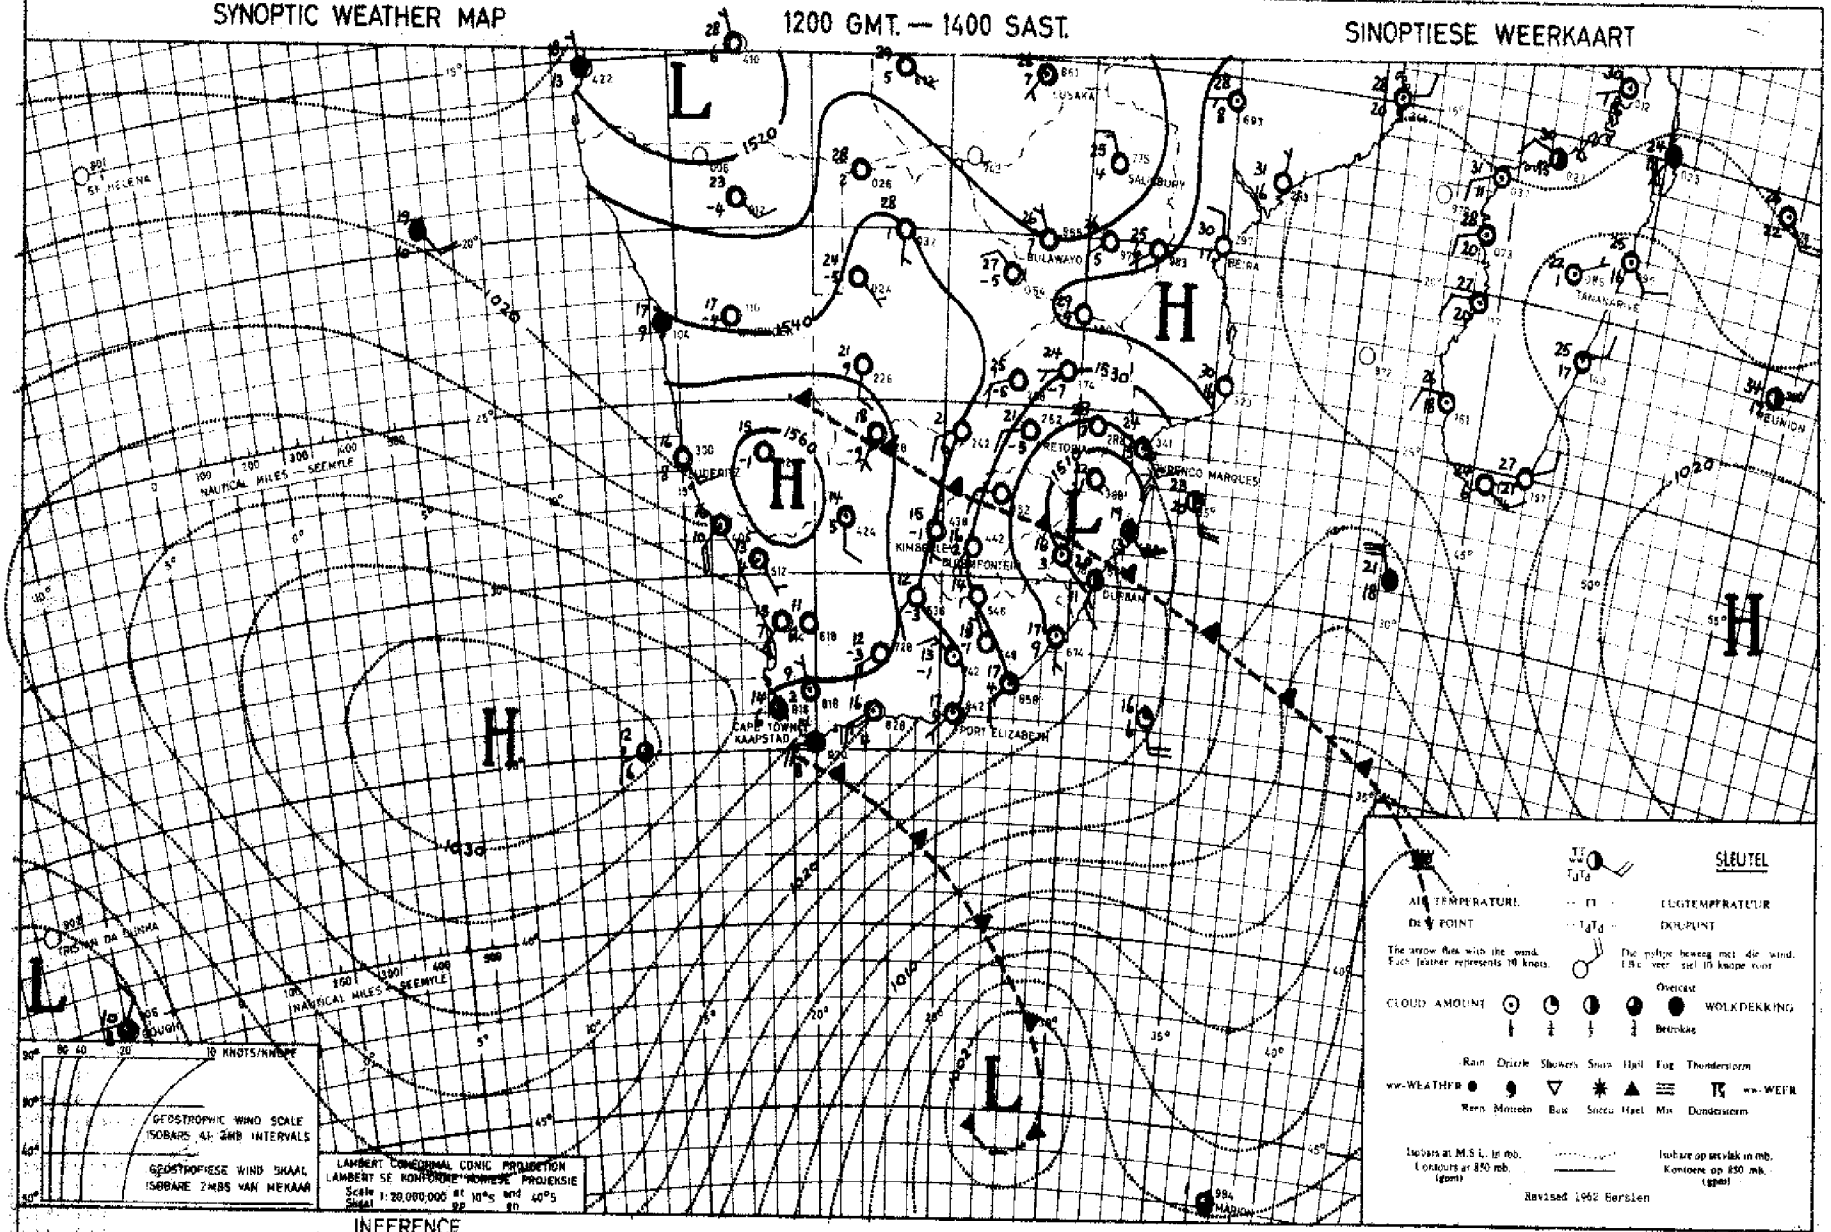
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 13 - 2 - 19 79 DATUM AFLEIDING

Cloudy, cold conditions with isolated light showers will spread to the coastal regions of the Cape. It will also be partly cloudy over the extreme southern Cape Province and cloudy over the Transvaal Lowveld. Over the remainder of the interior it will be fine and cool to cold.

Koue, bewolkte weer met enkele ligte buie sal langs die Kaapse suidkus voorkom agter die tweede koufront. Dit sal ook gedeeltelik bewolk word oor die verre suidelike Kaapprovinsie en bewolk oor die Transvaalse Laeveld. Oor die res van die binneland sal dit mooiweer en koel tot koud wees.

INFERENCE

DATE 14 - 7 - 19 70 DATUM

AFLEIDING

With the strong high now moving in south of the country, moist air from the east will flow in over Natal and Transvaal so that it will be cloudy over these regions. Over the remainder of the country it will be fine and warmer.

Met die sterk hoog wat nou suid van die land inbeweeg, sal vogtige lug uit die ooste instroom oor Natal en Transvaal en dit sal bewolk wees oor hierdie streke. Oor die res van die land sal dit egter mooiweer en warmer wees.

Cool, moist air from the north-east is flowing in over the eastern and central areas of the country while the low pressure system over the western parts is slowly moving eastwards. Consequently scattered rain and showers will occur over the eastern half of the country.

Koel, vogtige lug uit die noordooste vloei in oor die oostelike en sentrale dele van die land terwyl die laedrukstelsel oor die westelike dele geleidelik oosweerts beweeg. Gevolglik sal verspreide reën en buie voorkom oor die oostelike helfte van die land.

DATUM
AFLEIDING
The low pressure system over Northern Cape will move eastwards with the result that the cloudy weather will clear gradually from the west but showers will still occur over Natal and Eastern Transvaal. The cold front and low pressure system approaching from the west will bring cloudy weather with rain to the Western Cape later.
Die laedrukstelsel oor Noord-Kaapland sal ooswaarts beweeg met die gevolg dat die bewolkte weer geleidelik sal opklaar maar buie sal mêre nog voorkom oor Natal en Oos-Transvaal. Die koufront en laedrukstelsel wat van die weste eenkom, sal later bewolkte weer met reën oor Wes-Kaapland aanbring.

Cloudy, cold weather with showers will spread to South-western and southern Cape Province. Isolated showers are also possible over the remainder of the Cape Province and the Free State but over the rest of the Republic it will be fine or partly cloudy and cool to mild.

Koue bewolkte weer met buie sal oor die suidwestelike en suidelike Kaapprovinsie uitbrei. Enkele buie is ook moontlik oor die res van Kaapprovinsie en die Vrystaat. Oor die res van die land sal dit mooiweer of gedeeltelik bewolk en koel tot matig wees.

INFERENCE

DATE 18 - 7 - 1970 DATUM

AFLEIDING

The cold front will move eastwards and showers will occur along the southern, south-eastern and Natal coasts and it will become cold over the O.F.S. and Natal. The remainder of the country will be fine or only partly cloudy and mild to warm, but cold over the Cape Province.

Die koufront sal ooswaarts beweeg en buie sal oor die suid-, suidoos- en Natalse kusstreke voorkom en dit sal koud word oor die O.V.S. en die Natalse binneland. Oor die res van die land sal dit mooiweer of slegs gedeeltelik bewolk en matig tot warm wees, maar koud oor die Kaapprovinsie.

INFERENCE

DATE 19 7 19 70 DATUM

AFLEIDING

The trough over the Atlantic Ocean is moving eastwards and will cause cloudy conditions with showers later tomorrow over the South-West Cape. With the high east of the country it will be partly cloudy over Eastern Transvaal.

Die trog oor die Atlantiese Oseaan beweeg ooswaarts en sal later mêre bewolkte toestande met buie oor Suidwes-Kaapland veroorsaak. Met die hoëdrukstelsel oos van die land sal dit gedeeltelik bewolk wees oor Oos-Transvaal.

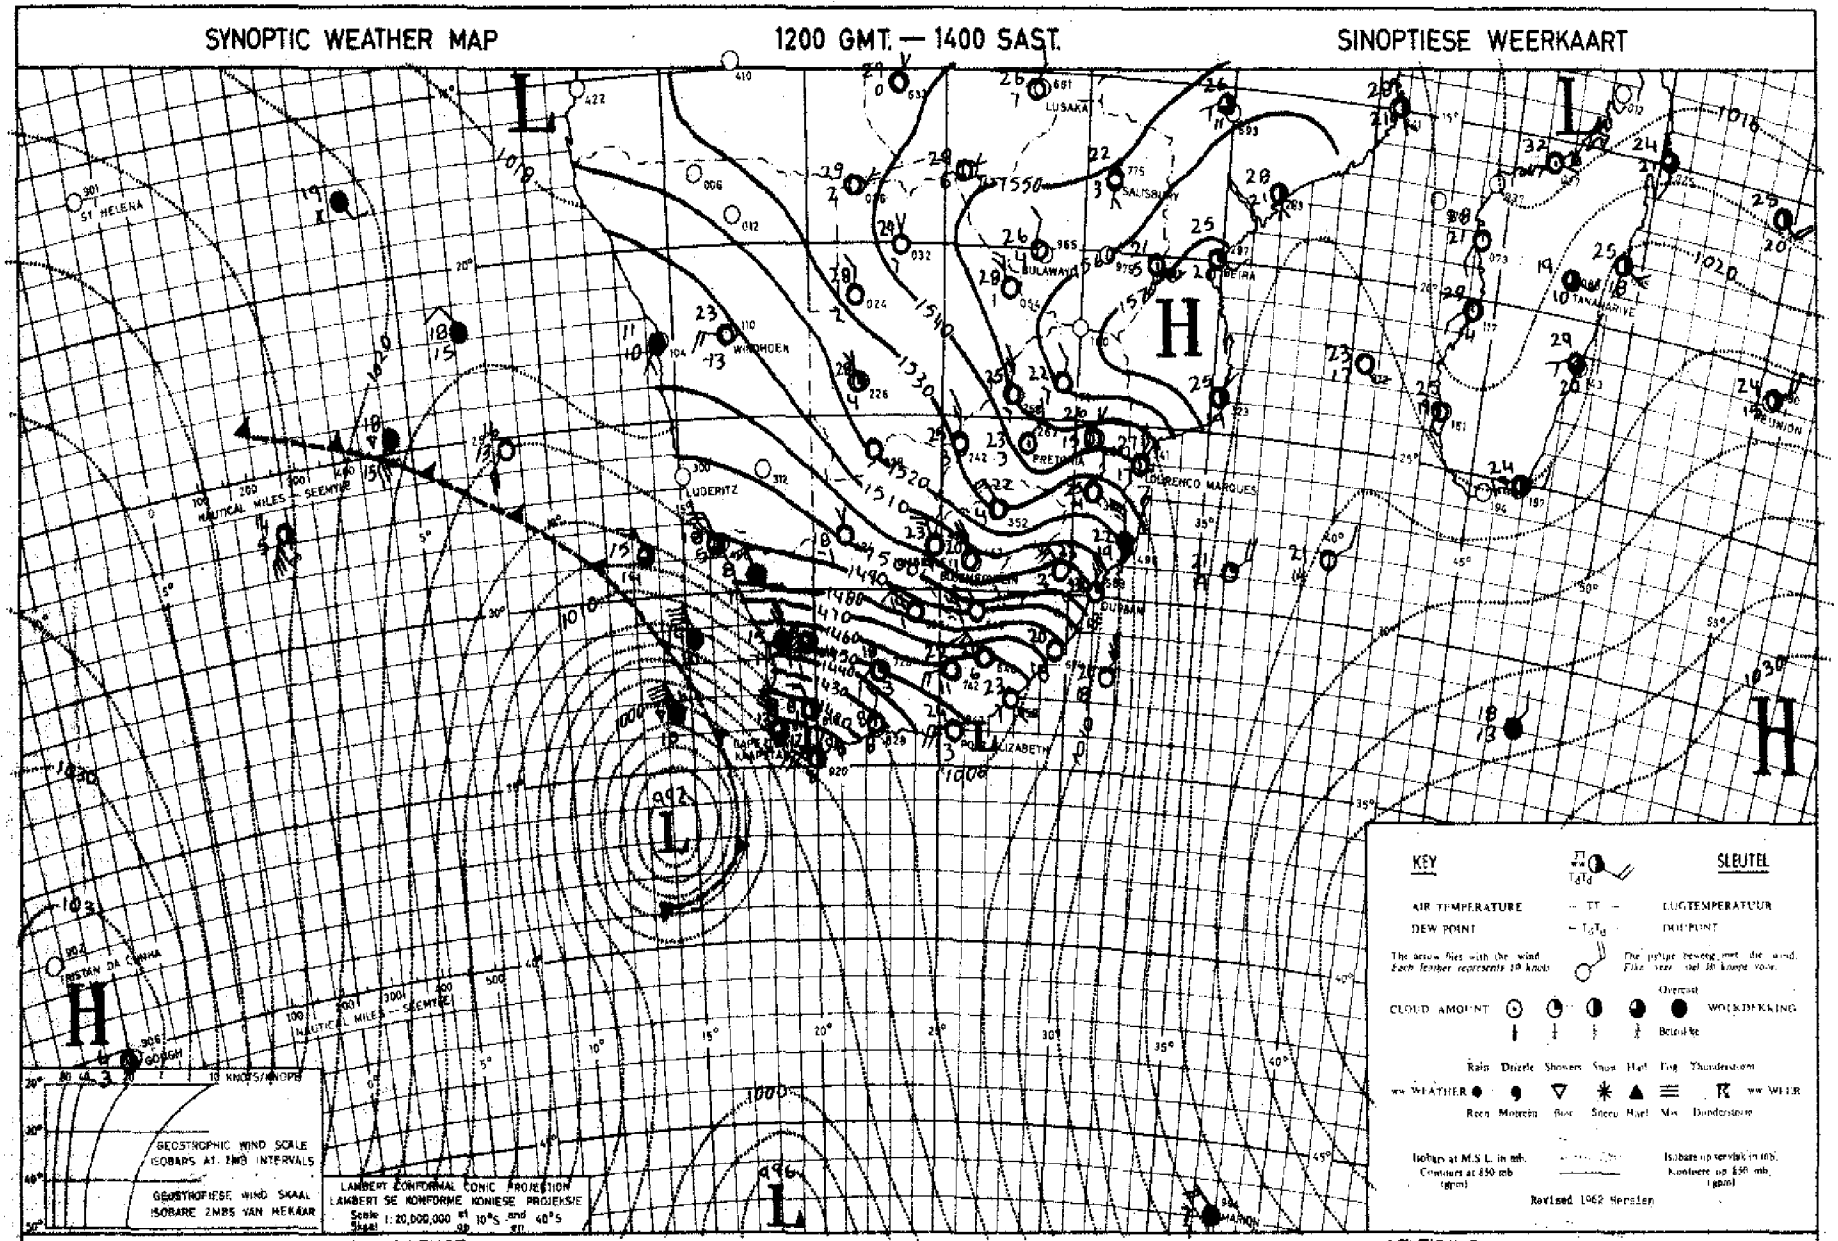
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 20-7-1972 DATUM AFLEIDING

The deep depression west of the Cape with its associated cold front will move eastwards and cause rain and showers and snowfalls over the western and south-western Cape spreading east. Over the remainder of the Republic it will be fine or slightly cloudy and mild to warm with fresh to strong north-westerly winds over the southern half.

'n Diep laagdrukstelsel met sy verwante koue front wes van die Kaap sal ooswaarts beweeg en reën en buie met sneeu oor die westelike en suidelike Kaap veroorsaak wat dan verder oos sal uitbrei. Oor die res van die Republiek sal dit mooiweer of effens bewolk wees en matig tot warm. Redelik sterk tot sterk noordwestelike winde oor die suidelike helfte waai.

INFERENCE

DATE 22-7-1970 DATUM

AFLEIDING

Cold dry air has spread over most parts of the country behind the cold front and apart from cloudy conditions with showers over Natal and cloudy weather along the Eastern lowveld and the North-Eastern Transvaal the weather will be mainly fine and cold becoming gradually warmer

Koue droë lug het agter die koufront oor meeste dele van die land uitgebrei en behalwe vir bewolkte toestande met buie oor Natalen bewolkte weer oor die Oostelike laeveld en Noordoos-Transvaal sal dit hoofsaaklik mooi weer en koud wees maar dit word geleidelik warmer

INFERENCE

DATE 24 - 2 - 19 70 DATUM

AFLEIDING

With the strong high pressure system centred over the eastern part of the country, little change is expected in the prevailing fine weather conditions but it will become warmer generally.

Met die sterk hoëdrukstelsel wat oor die oostelike deel van die land gevestig is, sal min verandering voorkom in die heersende mooiweerstoestande maar dit sal oral warmer word.

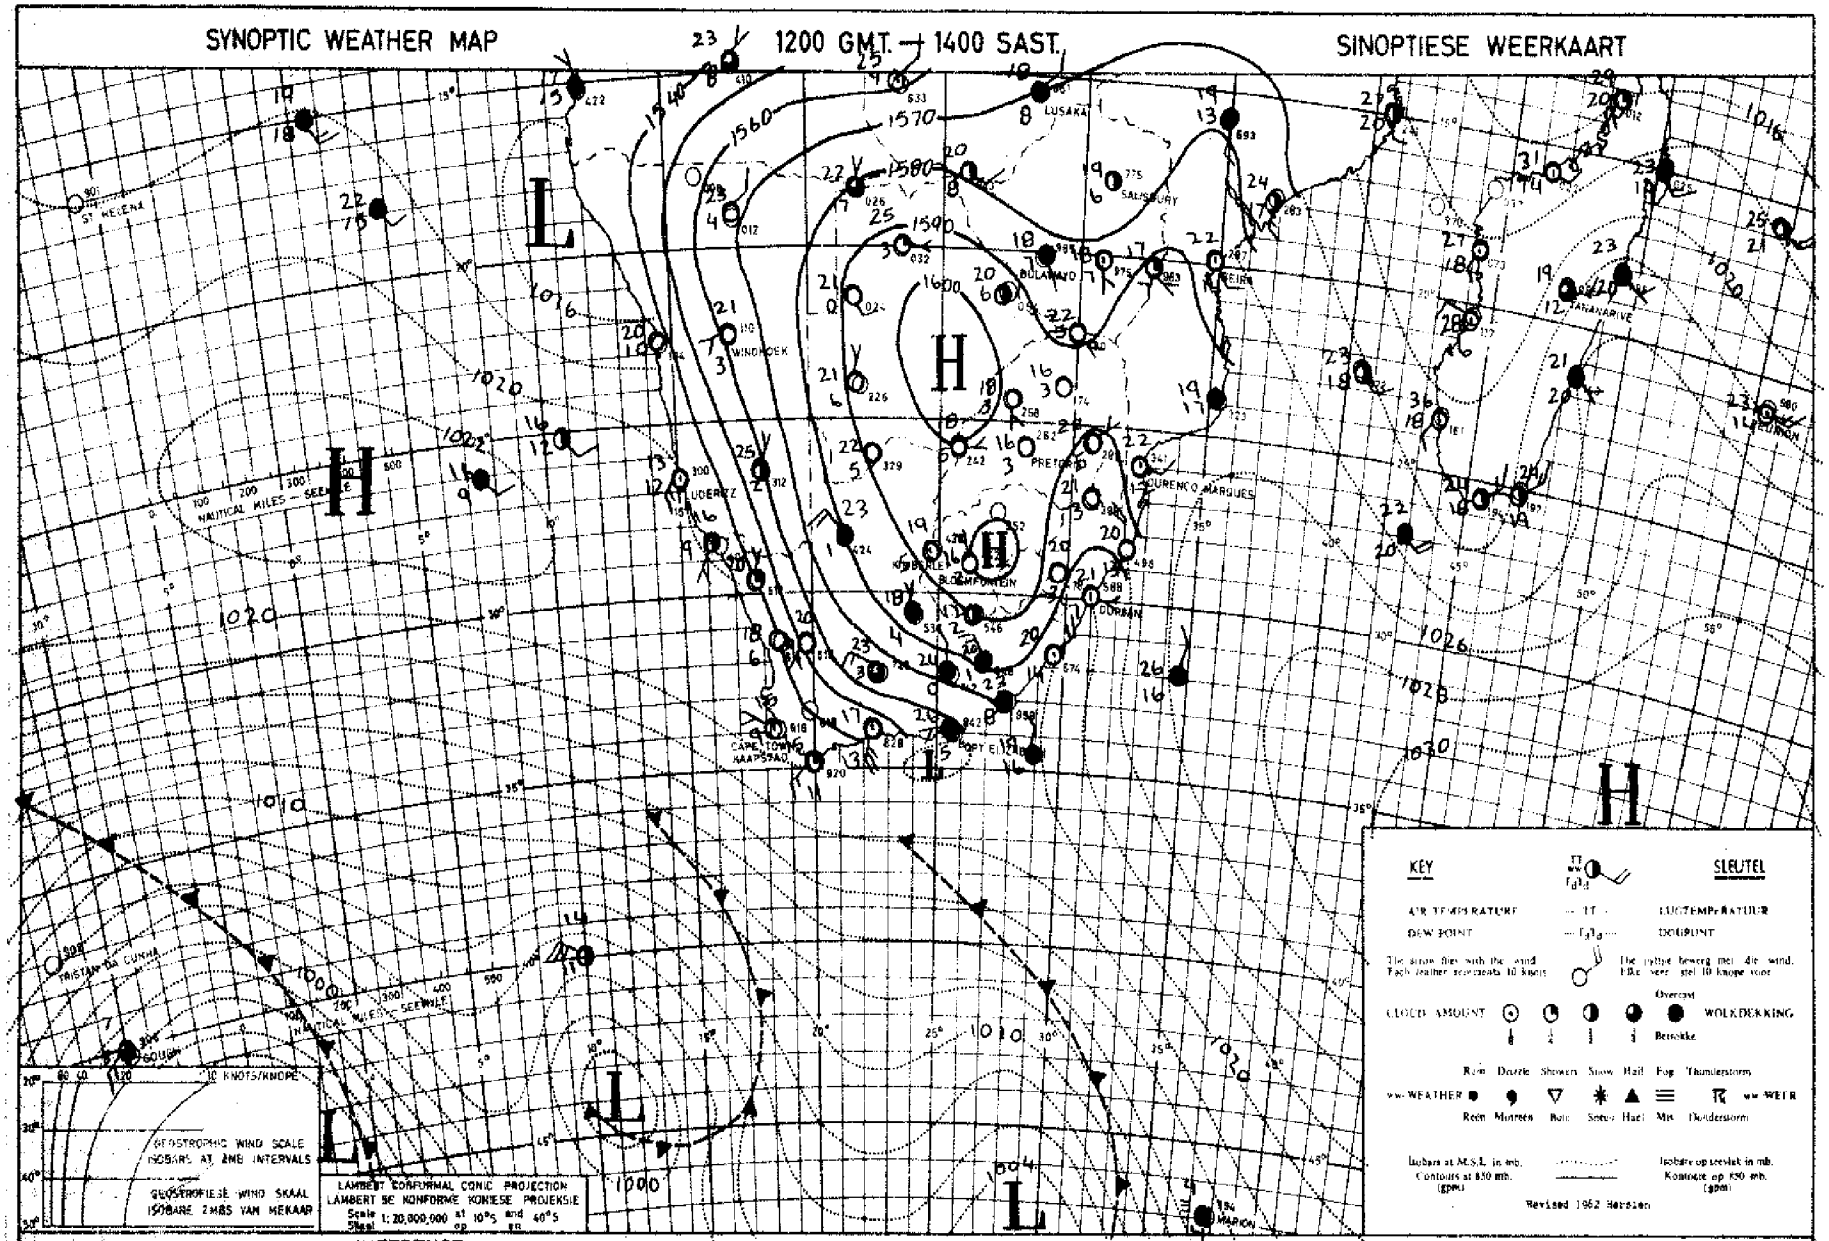
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

DATE 25-7-1970 DATUM

AFLEIDING

Two weak cold fronts are passing to the south of the country without affecting the weather over the country. Temperatures will rise further and fresh north-westerly winds will blow over the western and central regions.

Twee swak kouefronte beweeg suid van die land verby sonder om 'n noemenswaardige invloed op die land se weer uit te oefen. Temperature sal verder styg en taamlike sterk noordwestewind sal oor die westelike en sentrale dele waai.

DAAGLIKSE WEERBULLETIN

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

A fairly active cold frontal trough is approaching from the west and therefore cloudy weather with showers is expected over the western and south-western parts of the Cape Province. Over the remainder of the country it will, however, still be fair and mild.

'n Taamlike sterk koufrontlrog nader die land uit die weste en dus word bewolkte weer met buie oor Wes- en Suidwes-Kaapland verwag. Oor die res van die land sal dit egter voorlopig nog mooiweer en matig bly.

INFERENCE

DATE 27 - 7 - 1962 DATUM

AFLEIDING

Cloudy and cold weather with showers over Western and South-western Cape will spread eastwards along the Cape South coast and over the adjacent interior. It will become partly cloudy and cooler over the remainder of the Cape Province, the Free State and Southern Natal. Over the remainder of the country fine weather will prevail.

Bewolkte, koue weer met buie oor Wes- en Suidwes-Kaapland sal langs die suidkus en aangrensende binneland uitbrei. Dit sal gedeeltelik bewolk en koeler word oor die res van die Kaapse binneland, die Vrystaat, suidooskus en Suid-Natal. Oor die res van die land sal dit mooiweer en matig tot warm bly.

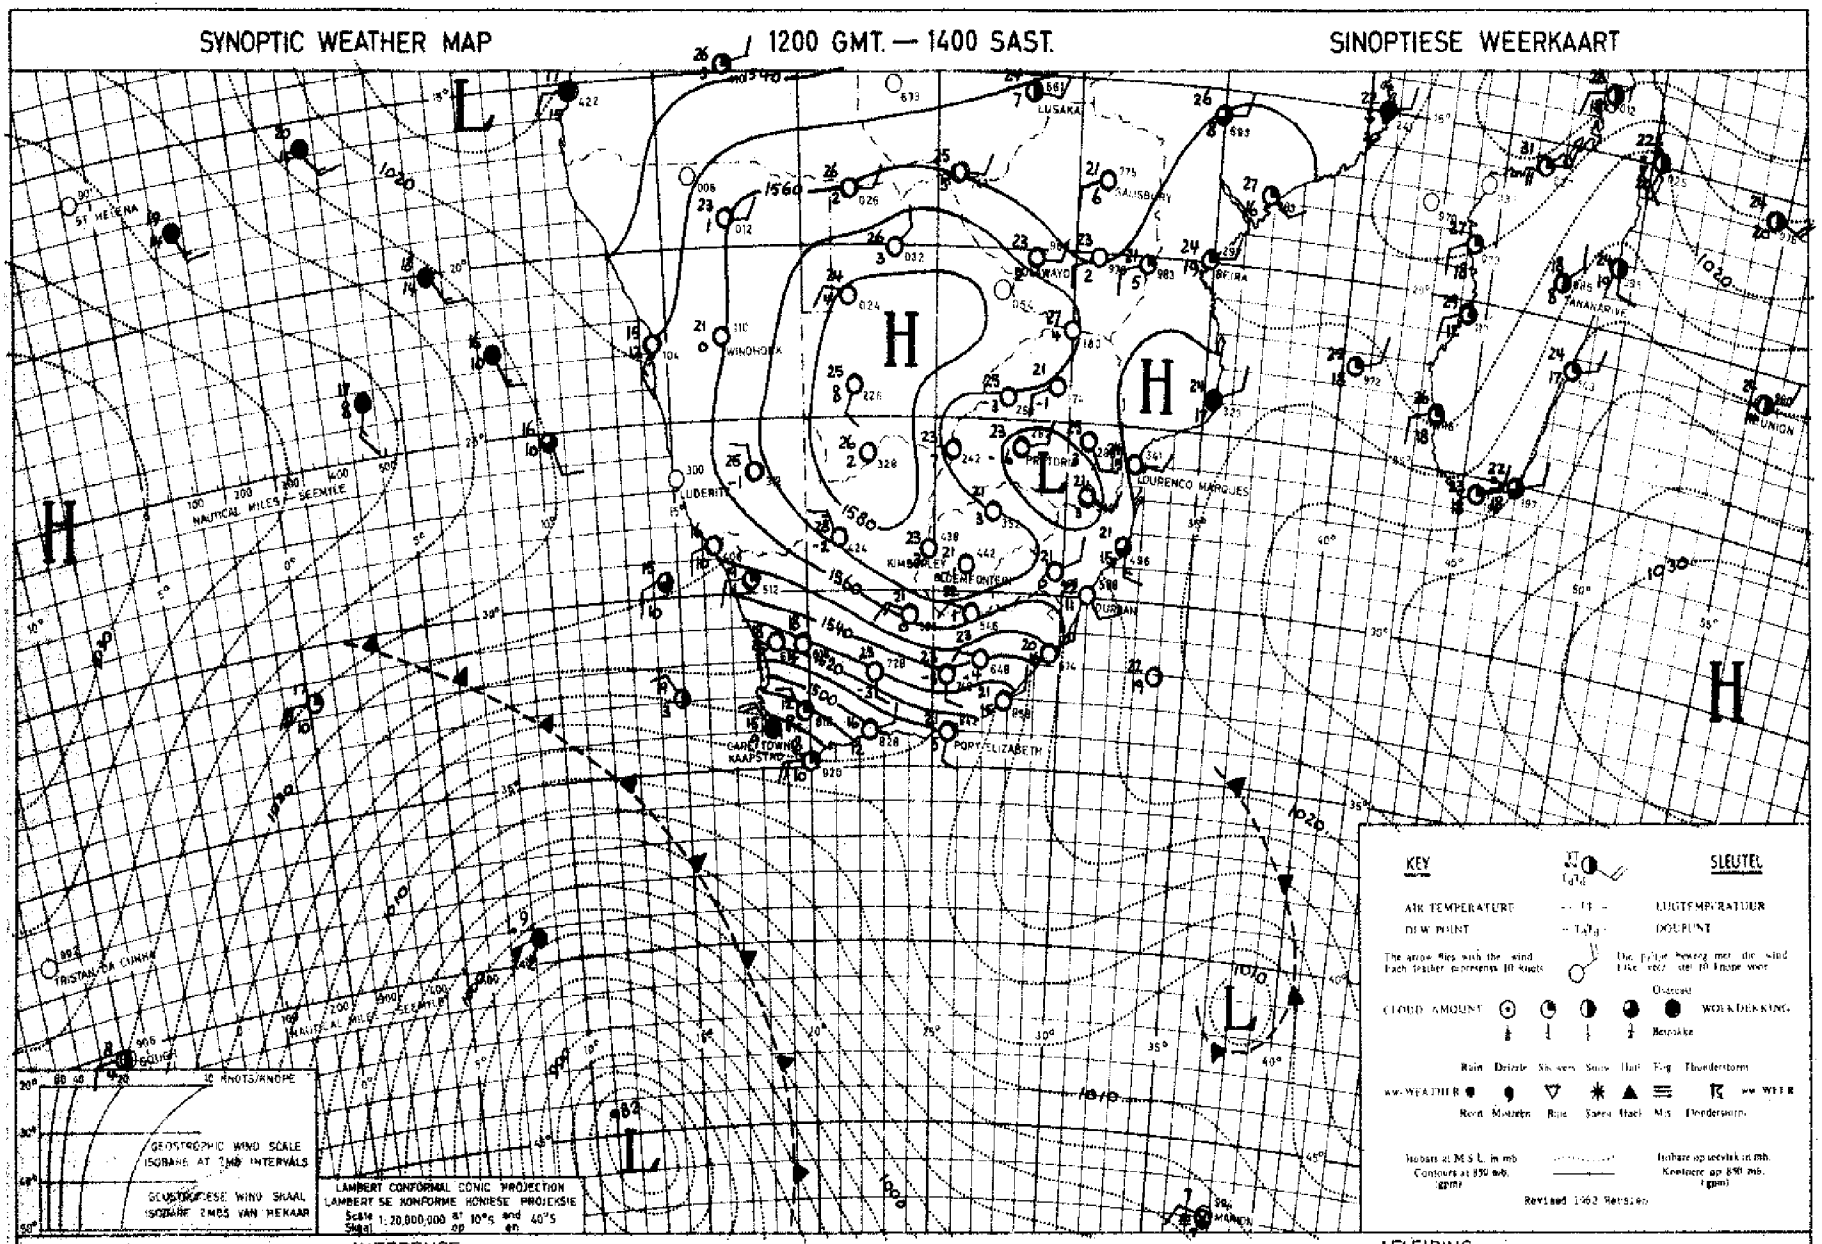
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 28-7-1970 DATUM AFLEIDING

The low pressure trough, associated with a cold front, which is approaching from the west will bring colder cloudy weather with rain showers to the western and southern parts of the Cape Province while it will become colder later also over the rest of the Cape and southern Free State.

Die laedruktrog, gepaard met 'n koufront, wat die Kaap uit die weste nader, sal kouer, bewolkte weer met reënbuie aanbring oor die westelike en suidelike dele van Kaapland terwyl koue lug later ook oor die res van Kaapland en Suid-Vrystaat sal uitbrei.

INFERENCE

DATE 29 - 7 - 19 70 DATUM

AFLEIDING

Cloudy and colder weather with showers will spread eastwards to Natal. Snowfalls will occur over the higher regions of the Cape Province, the Free State and Natal. It will also become colder over the southern parts of South West Africa, Botswana and Transvaal. Elsewhere fine and warm conditions will prevail.

Bewolkte tot gedeeltelik bewolkte weer met buie sal ooswaarts uitbrei en Natal later bereik. Sneeu sal voorkom oor die hoogliggende gebiede van die Kaapprovinsie, Vrystaat en Natal. Dit sal ook kouer wees oor die suidelike dele van Suidwes-Afrika, Botswana en Transvaal. Elders sal dit mooiweer en warm bly.

Cold air has already spread over the greater parts of the country and it will also become cloudy and cooler over Eastern and Northern Transvaal as a high pressure develops along the east coast. Over the western parts of the country it will, however, become warmer gradually.

Koue lug het reeds oor die grootste deel van die land uitgebrei en dit sal ook bewolk en koeler word oor Oos- en Noord-Transvaal namate 'n hoëdrukstelsel langs die oskus vorm. Oor die westelike deel van die land sal dit egter weer warmer word.

INFERENCE

DATE 31-7-1970 DATUM

AFLEIDING

Cloudy and cold weather with light showers will extend eastwards along the Cape South coast and over the adjacent interior. Cloudiness over the Northern Transvaal will clear partially. Elsewhere fine weather will prevail.

Bewolkte, koue toestande met ligte buie sal langs die Kaapse Suidkus en aangrensende binneland voorkom. Die bewolkte weer oor Noord-Transvaal sal gedeeltelik opklaar maar elders sal mooiweerstoestande voortduur.

A wave has developed on the cold front west of the Cape and, as it moves eastwards, cloudy weather with showers will spread over most parts of the Cape Province south of the Orange River. Over the remainder of the country it will remain fair.

'n Golf het ontwikkel op die kouefront wes van die Kaap en namate dit ooswaarts beweeg, sal bewolkte weer met buie uitbrei oor die meeste dele van die Kaapprovinsie suid van die Oranjerivier. Oor die res van die land sal dit redelike mooiweer bly.

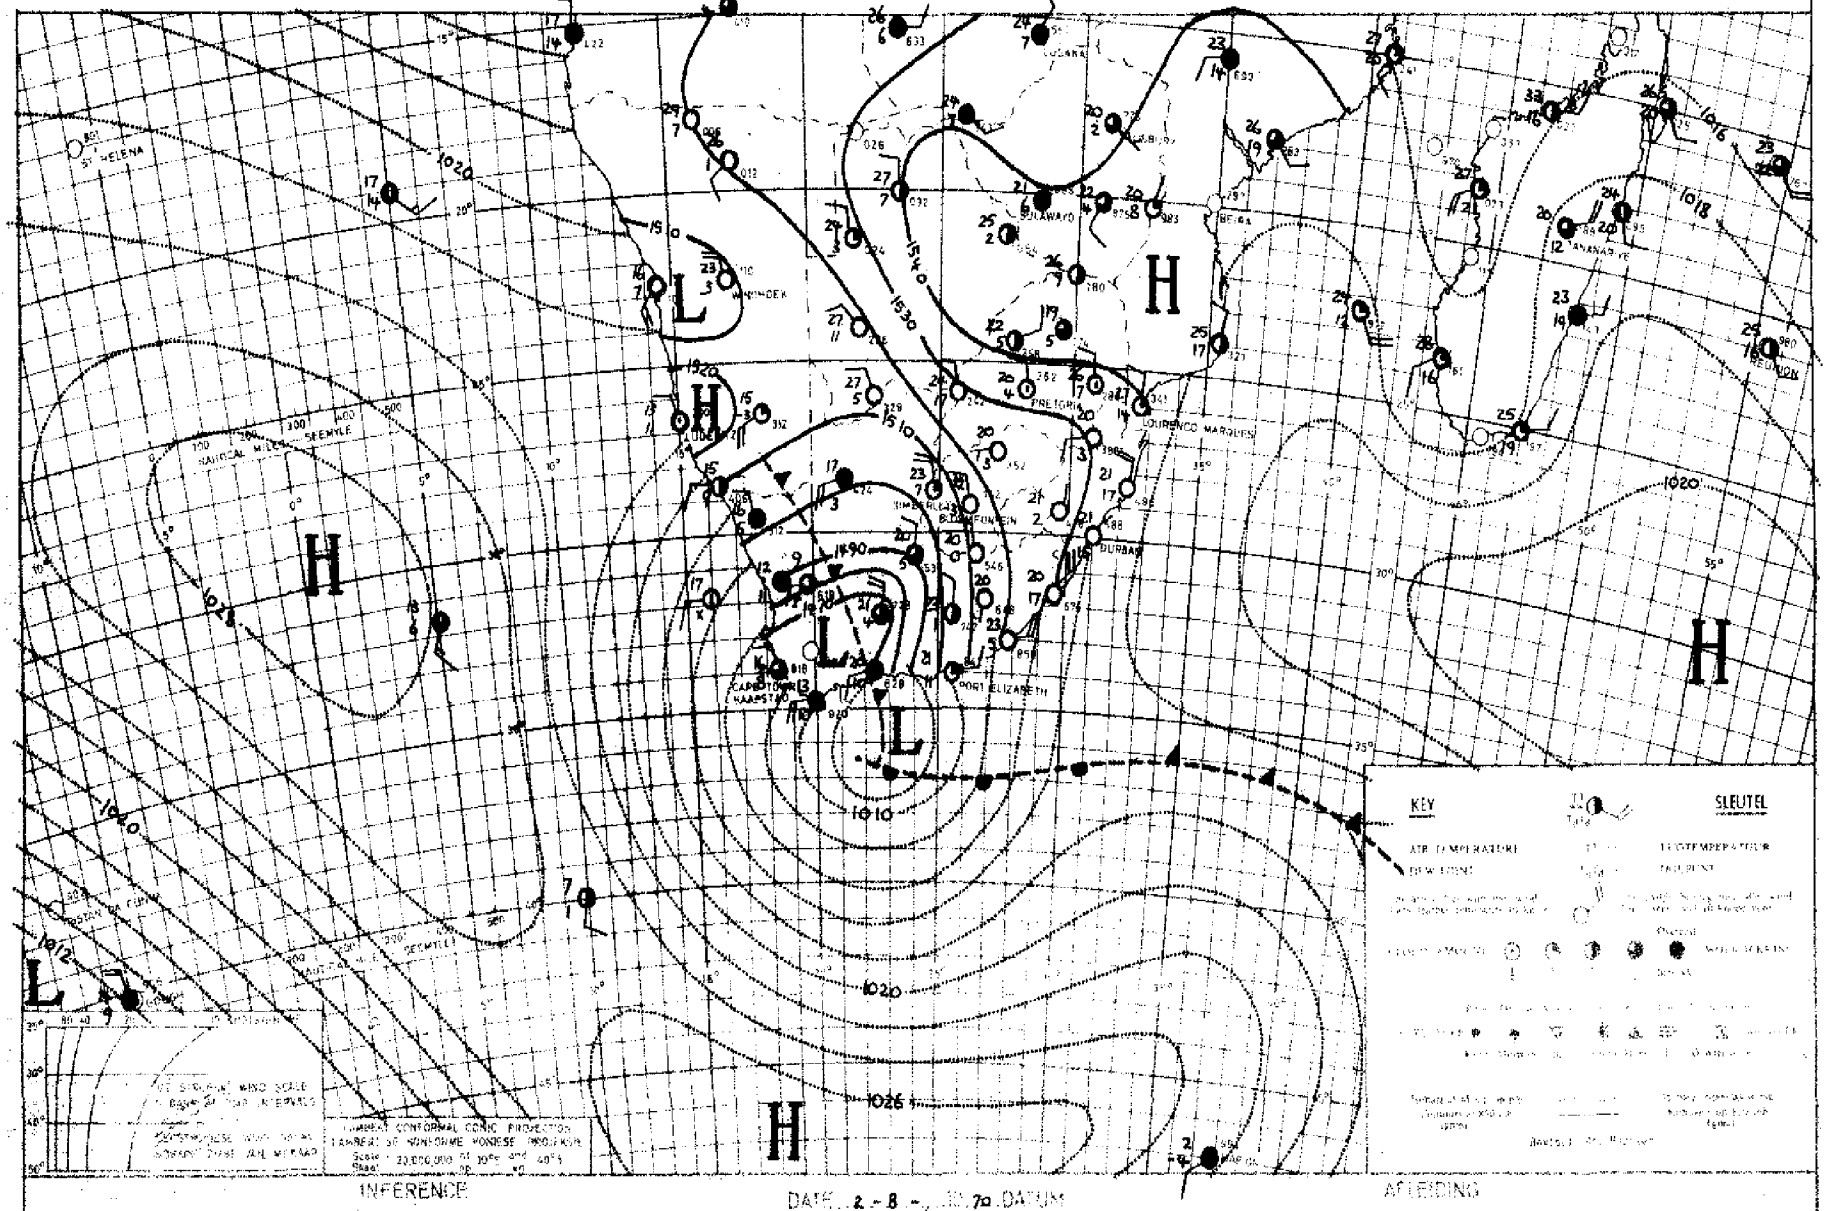
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 2-8-70 DATUM AFLEIDING

The low is moving rather slowly and cooler conditions with showers will spread only over the Cape Province and later over southern Natal and southern Free State. Over the remainder of the country it will still remain fair.

Die laag beweeg stadig sodat bewolkte en kouer toestande met buie mõre slegs oor die Kaapprovinsie sal uitbrei en later eers oor suidelike Natal en Suid-Vrystaat. Oor die res van die land sal dit nog redelike mooiweer bly.

DAAGLIKSE WEERBULLETIN

The cold front at the Cape will move South-eastwards and it will be cloudy and cool with showers over the South-western Cape Province but over the remainder of the country conditions will be mainly fine and mild and even warm in the North.

Die koue front by die Kaap sal suidooswaarts beweeg en dit sal bewolk en koel wees met buie oor Suidwes-Kaapland maar oor die res van die land sal dit hoofsaaklik mooiweer en matig wees en selfs warm in die noorde.

INFERENCE

DATE 5.-8.-1970 DATUM

AFLEIDING

The weak cold front west of Cape Town will cause light rain over the south-western Cape Coast. Over the remainder of the country it will become warmer gradually but partly cloudy weather will occur over the central and north-eastern interior.

Die swak koufront wes van Kaapstad sal ligte reën oor die Suidwes-Kaapse kus veroorsaak. Oor die res van die land sal dit egter geleidelik warmer word maar gedeeltelik bewolkte weer sal oor die sentrale en noordoostelike binneland voorkom.

INFERENCE

DATE 6 - 9 - 1970 DATUM

AFLEIDING

The rapidly moving cold front will cause cloudy and cold conditions with showers to spread to the South-western Cape, to the Cape South Coast and to the Southern and Little Karoo. There will be little or no change over the remainder of the country.

Die vinnig-bewegende koue front sal veroorsaak dat koue, bewolkte weer met buie oor Suidwes-Kaap, sowel as oor die Kaapse Suidkus en die Suid-en Klein-Karoo sal uitbrei. Oor die res van die land sal voorlopig maar min verandering intree.

The cold front near Cape Town is moving eastwards and will cause cloudy weather with rain over the south-western and southern parts of the Cape Province while it will also become colder over the Cape interior.

Die koufront naby Kaapstad beweeg ooswaarts en sal bewolkte weer met reën veroorsaak oor die suidwestelike en suidelike dele van Kaapland terwyl dit ook kouer sal word oor die Kaapse binneland.

INFERENCE

DATE 8 - 2 - 19 70 DATUM

AFLEIDING

Cloudy and cold weather, with showers, is spreading eastwards and will reach Natal tomorrow. It will also be cloudy and cold over the southern-most parts of the Cape Province. It will also become cooler over the Free State but over the remainder of the country there will be little change.

Bewolkte, koue toestande met buie brei ooswaarts uit en sal Natal môre beïnvloed. Dit sal ook bewolk en koud wees oor die mees suidelike dele van Kaapland. Koeler toestande sal die Vrystaat bereik maar elders word weinig verandering verwag.

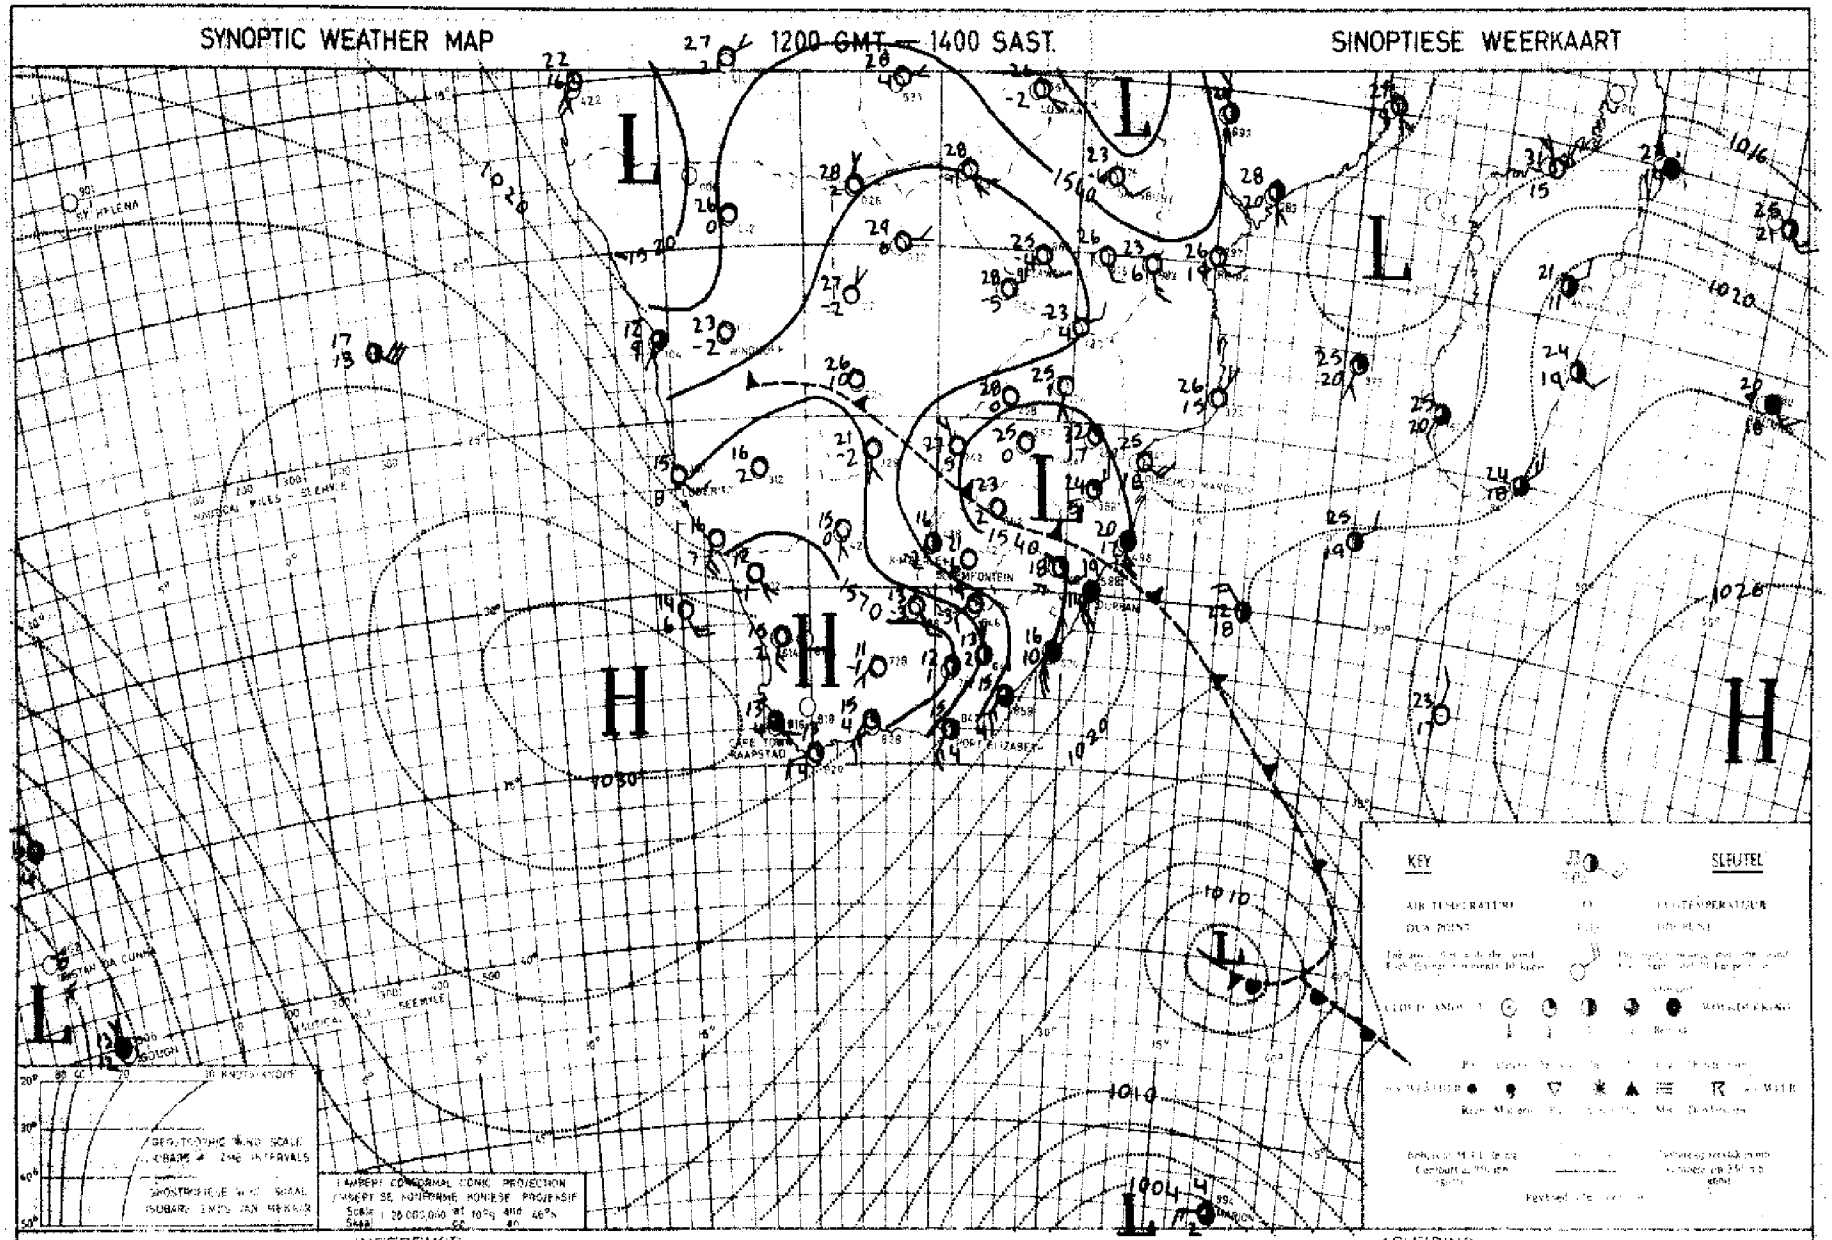
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 9 - 8 - 19 70 DATUM AFLEIDING

Pressures are now rising rapidly along the east coast so that a cell of high will develop east of the country, causing cool cloudy weather to spread from the south-east over Natal and Eastern Transvaal. Over the remainder of the country it will, however, be fine with rising temperatures.

Lugdruk styg vinnig langs die oeskus sodat 'n sel van hoë druk oos van die land sal opbou en koel, bewolkte weer uit die suidooste sal uitbrei oor Natal en die oostelike dele van Transvaal. Oor die res van die land sal dit mooiweer wees met stygende temperature.

INFERENCE

DATE 10 - 8 - 19 70 DATUM

AFLEIDING

The high on the Natal coast will cause cloudy conditions over the Eastern and Northern parts, clearing partially during the morning. The trough south of the Cape will move eastwards but will cause partly cloudy conditions over South-western Cape and the South coast with light showers possible.

Die hoog oor die Natalse kus sal bewolkte toestande oor die oostelike en noordoostelike dele veroorsaak wat gedurende die oggend gedeeltelik sal opklaar. Die trog, suid van die Kaap sal oswaarts beweeg en gedeeltelik bewolkte toestande oor Suidwes-Kaapland en die suidkus veroorsaak en ligte buie is moontlik.

The approaching cold front will not affect the south-western parts of the country. It will be cloudy over the Transvaal at first, clearing partially later. Over the remainder of the country there will be no change.

Die nadergede front sal suid van die land verby beweeg en gevolglik sal daar geen verandering intree oor die suidwestelike streke nie. Dit sal aanvanklik bewolk wees oor die Transvaal waar dit later gedeeltelik sal opklaar. Elders sal dit mooiweer bly.

With an intense low pressure system south of the country isolated showers are possible over this region. It will still be partly cloudy over the northern Transvaal, but with dry air over the remaining regions, it will remain mainly fine.

Met sterk siklonale sirkulasie suid van die land kan enkele buie oor die gebied voorkom. Oor die meeste dele van die binneland is dit lug baie droog en sal dit hoofsaaklik mooiweer wees maar nog gedeeltelik bewolk oor Noord-Transvaal.

The air over most of the country is dry and it will be mainly fine apart from temporary cloudy weather along the Natal coast and over the eastern Transvaal lowveld.

Die lug oor die meeste dele van die land is droog en dit sal hoofsaaklik mooiweer wees afgesien van tydelik bewolkte weer oor die Natalkus en die oostelike laeveld van Transvaal.

INFERENCE

DATE 14 - 8 - 1970 DATUM

AFLEIDING

The cold fronts west of the Cape will cause cold air to advance over most of the Cape Province tomorrow. Rain will fall over the south-western and southern Cape coastal regions. Over the rest of the country it will, however, remain fine and mild.

Die koufronte wes van die Kaap sal koue weer more laat uitbrei oor die meeste dele van Kaapland. Reën sal voorkom oor die suidwestelike en suidelike kusstreke. Oor die res van die land sal dit egter mooiweer en matig bly.

The cold front over the interior is moving eastwards and a high is ridging in behind the front causing cloudy, cold weather with rain over the southern, south-eastern and eastern coasts and adjacent interior. Otherwise it will be mainly fine but colder also.

Die kouefront oor die land beweeg oos waarts en die hoog druk agter die front in en veroorsaak bewolkte koue toestande en reen langs die suid-, suidoos- en ooskus en aangrensende binneland. Andersins sal dit hoofsaaklik mooiweer wees maar ook kouer.

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

INFERENCE

DATE 16-9-1970 DATUM

AFLEIDING

Another cold front has reached the Cape coast from the south-west and will cause cold air once again to advance over the southern half of the Cape Province and later also over Natal. Showers will occur over the south-western districts.

Nog 'n koufront het die Kaapse kus uit die suidweste bereik en sal koue lug opnuut laat uitbrei oor die suidelike helfte van Kaapland en later oor Natal. Reënbuie sal voorkom oor die suidwestelike en suidelike kusstreke.

INFERENCE

DATE 17 - 8 - 1970 DATUM

AFLEIDING

The cold front between Gough Island and Cape Town will cause cloudy weather with showers later tomorrow over the south-western Cape Province. Over the interior regions of the country the air is exceptionally dry and the weather will remain mainly fine.

Die kouefront tussen Gougheiland en Kaapstad sal later môre bewolkte weer met buie oor Suidwes-Kaapland teweegbring. Oor die binnelandse gebiede is besonder droë lug in sirkulasie en dit sal hoofsaaklik mooiweer wees.

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

The cold front is moving eastwards and will cause cold weather to spread over the Cape Province and it will become cloudy with showers over the south-western and southern coastal regions. Over the northern and eastern parts of the country it will still be mild to warm.

Die koufront beweeg oos en sal koue weer laat uitbrei oor die Kaapprovinsie en dit sal bewolk word met buie oor die suidwestelike en suidelike kusstreke. Oor die noordelike en oostelike dele van die land sal dit egter nog matig tot warm wees.

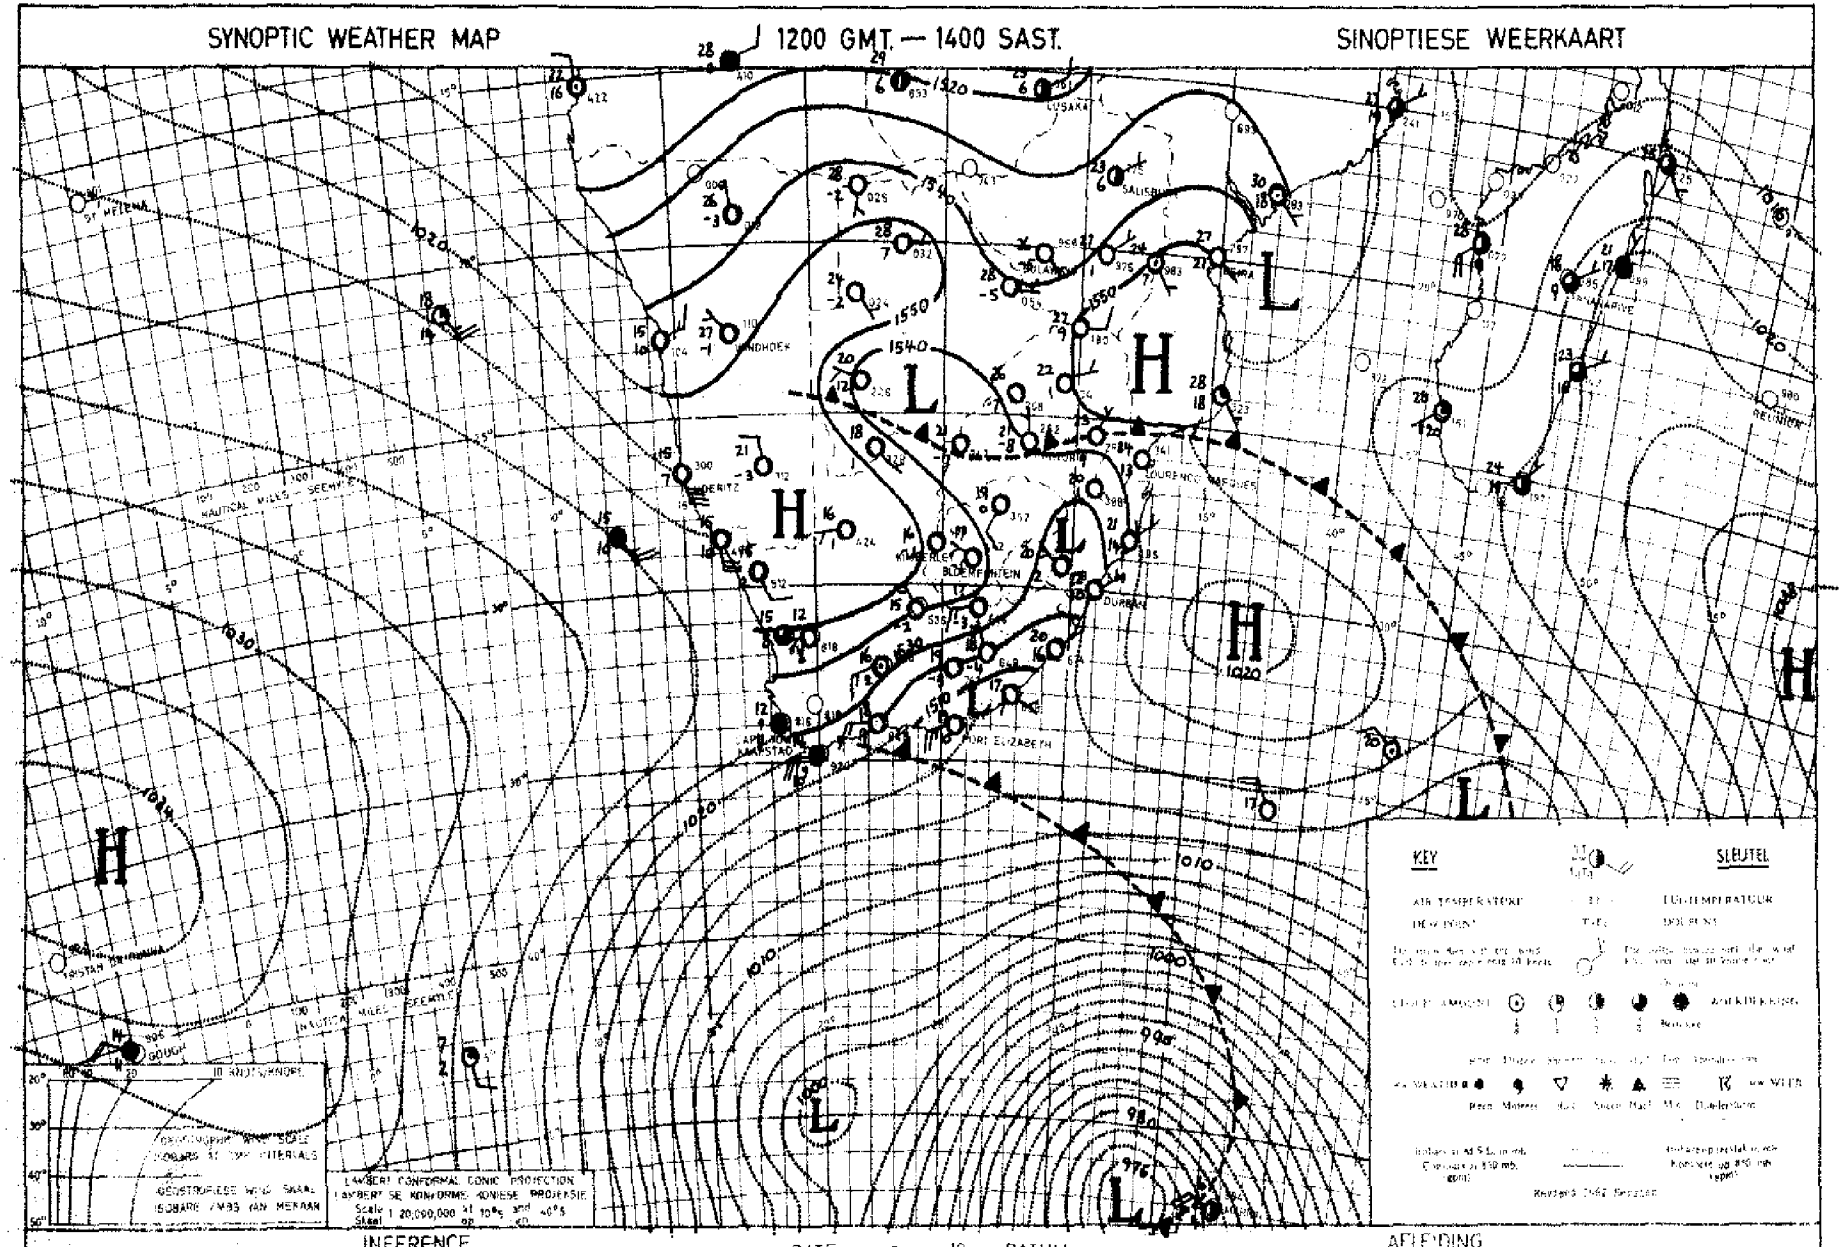
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 23-8-70 DATUM — AFLEIDING

Cold, cloudy weather with light rain will again advance over the southern and eastern coastal regions of the country but elsewhere it will be fine and temperatures will rise further over the interior.

Koue, bewolkte weer met ligte reën sal opnuut oor die suid- en ooskusstreke van die land uitbrei maar oorigens sal dit mooiweer wees en temperature sal verder styg oor die binneland.

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

DATE 25 - 8 - 19 70 DATUM

AFLEIDING

Cloudy and cold conditions with rain and showers will spread over the remainder of the Cape Province, the Free State and Natal. It will also become cloudy over the southern Lowveld. Isolated showers will develop over the remainder of the Transvaal excepting Northern Transvaal. Snowfalls will occur over the higher parts of the Cape and O.F.S.

Koue bewolkte toestande met reën en buie sal uitbrei oor die Kaapprovinsie, die Vrystaat, Natal en die suidelike Transvaalse Laeveld. Enkele buie sal oor die res van Transvaal ontwikkel uitgesonderd Noord-Transvaal. Sneeu sal voorkom oor die hoërdele van die Kaapprovinsie en die Vrystaat.

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

The low over the interior will move slightly eastwards and with a strong flow of moist air from the south-east cloudy weather with scattered or fairly general rain and showers will occur over the central, south-eastern and eastern parts of the country. It will be partly cloudy and mild over the northern parts of Transvaal where only isolated showers will occur.

Die laag oor die binneland sal effens ooswaarts beweeg en met 'n sterk aanslag van vogtige lug uit die suidooste sal bewolkte weer met taemlik algemene reën en buie oor die sentrale, suidoostelike en oostelike dele van die land voorkom. Dit sal gedeeltelik bewolk en matig wees met slegs enkele buie oor Noord - Transvaal.

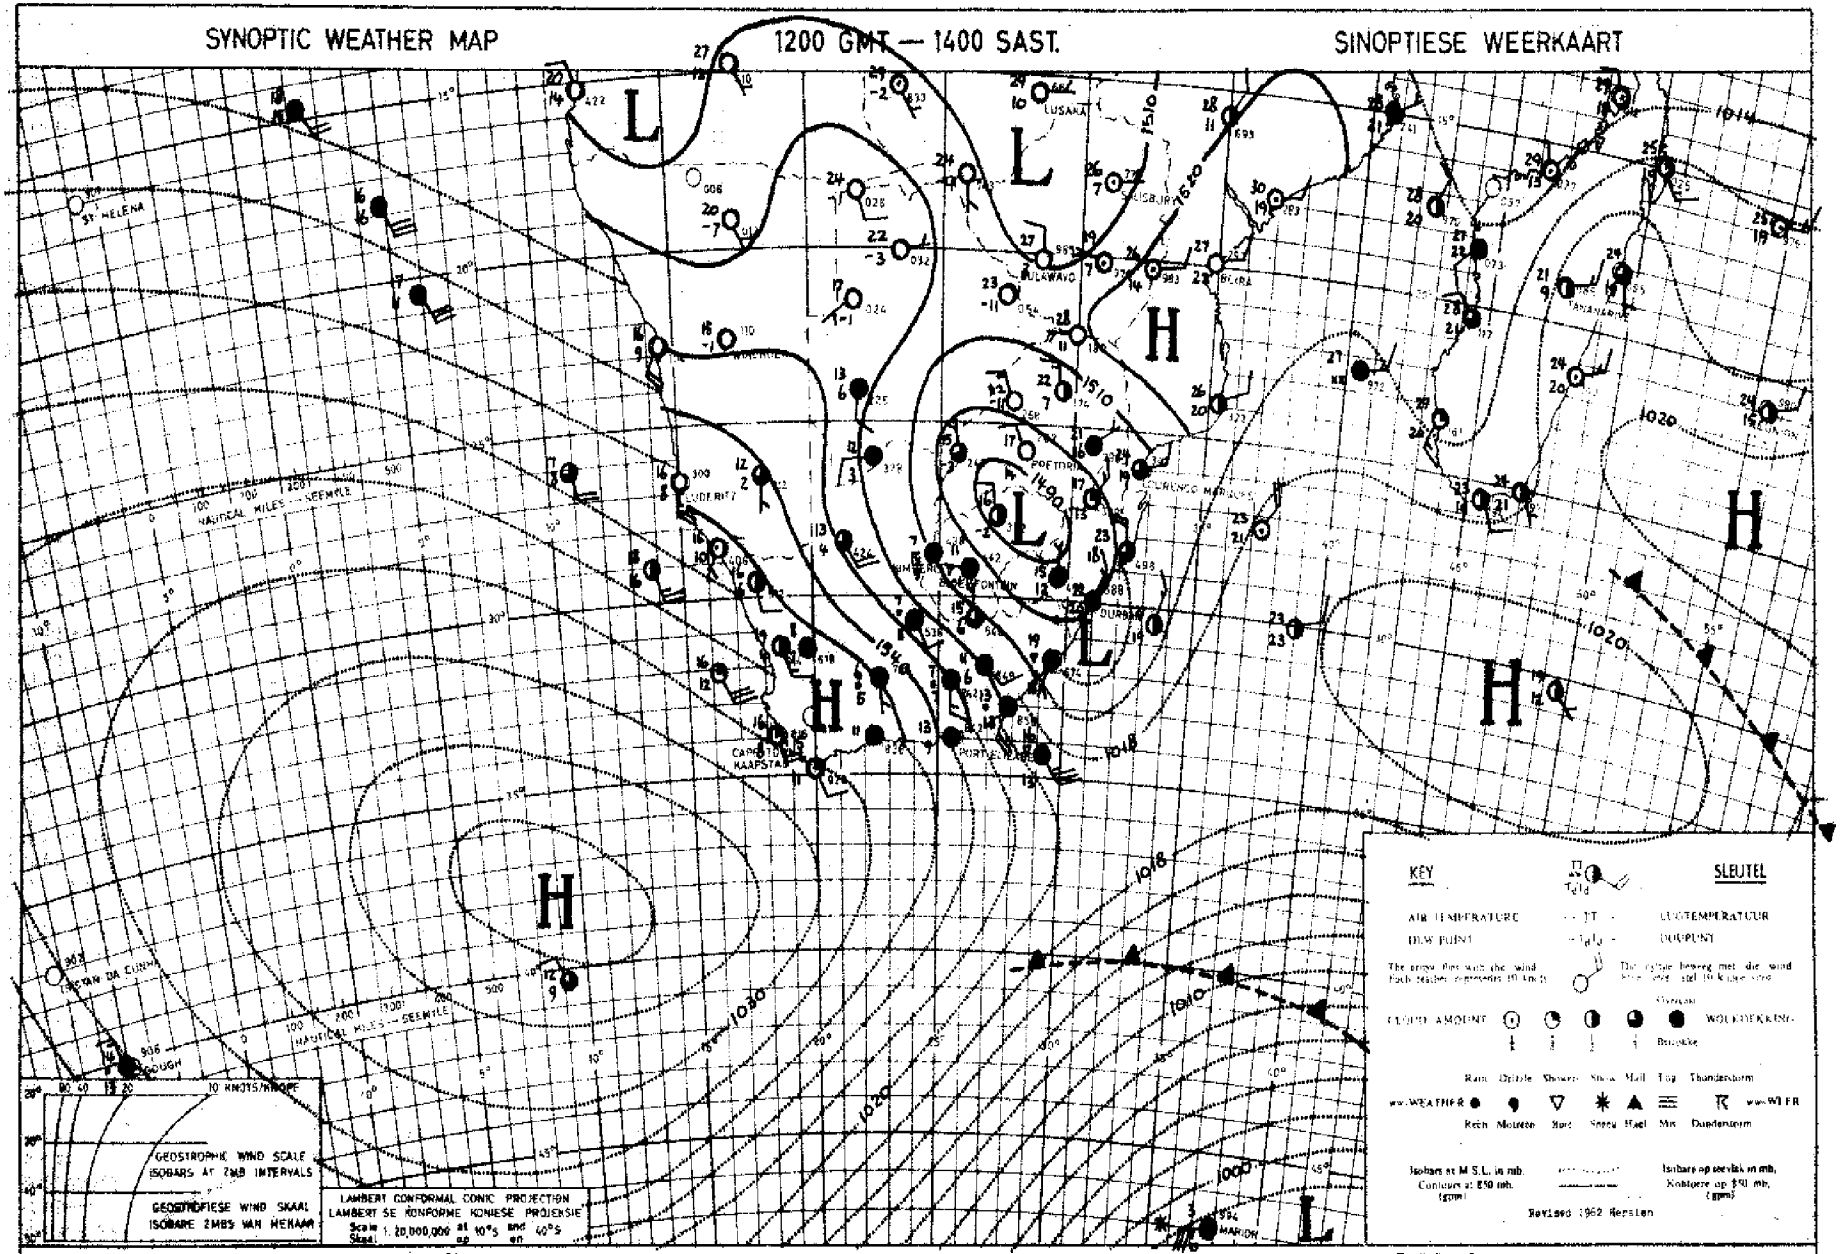
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 27 - 8 - 1970 DATUM AFLEIDING

Further good falls will occur over the Eastern Cape and Natal but since the low pressure systems in the upper-air and on the surface are moving eastwards, drier air will also spread further eastwards. This will cause a decrease in activity over the western and southern parts of the country. It will be cold over most areas.

Verdere goeie neerslae sal voorkom oor Oos-Kaapland en Natal maar aangesien die bolug- en oppervlakte laedrukstelsels ooswaarts beweeg sal droër lug ook verder ooswaarts uitbrei met gevolglike vermindering in aktiwiteit oor die westelike en suidelike dele van die land. Dit sal koud wees oor die meeste dele.

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

INFERENCE

DATE 28.-8.-19.70 DATUM

AFLEIDING

The low along the east coast is slowly moving away so that the rainy weather over the eastern parts will begin to clear. The high moving in over the western parts is bringing in dry air so that it will be fine and warmer over the western half of the country.

Die leag langs die ooskus beweeg stadig weg sodat die reënweer oor die oostelike dele van die land sal begin opklaar. Die hoog wat oor die westelike dele van die land instoot, voer droë lug in en dit sal mooiweer wees en warmer word oor die westelike helfte van die land.

INFERENCE

DATE 29 - 8 - 1970 DATUM

AFLEIDING

The weather has cleared over most areas as the low pressure system off the east coast moves away gradually. A new system of cold fronts is approaching the country from the west and will again cause cloudy weather with showers tomorrow over the south-western Cape Province.

Die weer het oor die meeste dele opgeklaar namate die laag langs die ooskus weg beweeg. 'n Nuwe stelsel van koufronte nader die land egter uit die weste en dus sal bewolkte weer met buie weer more oor Suidwes-Kaapland ontwikkel.

INFERENCE

DATE 30-8-1970 DATUM

AFLEIDING

The cold front at Cape Town is being followed by a strong high pressure system with the result that cool, cloudy weather with light showers will spread over the southern and south-eastern coastal regions.

Die kouefront by Kaapstad word gevolg deur 'n sterk hoëdruk-stelsel met die gevolg dat koel, bewolkte weer met ligte buie sal uitbrei oor die suidelike en suidoostelike kuststreke.

The second cold front is being followed by a strong high pressure system which will cause cold air from the south-west to advance over the entire Cape Province, southern Free State and southern Natal. Cloudy weather with showers will spread over the south-western, southern and eastern Cape and reach Natal later.

Die tweede koufront word gevolg deur 'n sterk hoëdrukstelsel wat koue lug uit die suidweste sal laat inbeweeg oor die hele Kaapland, suidelike Vrystaat en Suid-Natal. Bewolktheid met buie sal oor Suidwes-, Suid- en Oos-Kaapland uitbrei en later Natal bereik.

With a ridge of high pressure moving in south of the continent, cool cloudy weather with light rain will advance over Natal and the eastern Transvaal lowveld. It will also be cold over the Cape Province and the Free State.

'n Rug van hoë druk wat suid van die land indruk, sal koel, bewolkte weer met ligte reën uitbrei oor Natal en ook oor die Oos-Transvaalse laeveld. Dit sal ook koud wees oor die Kaapprovinsie en die Vrystaat.

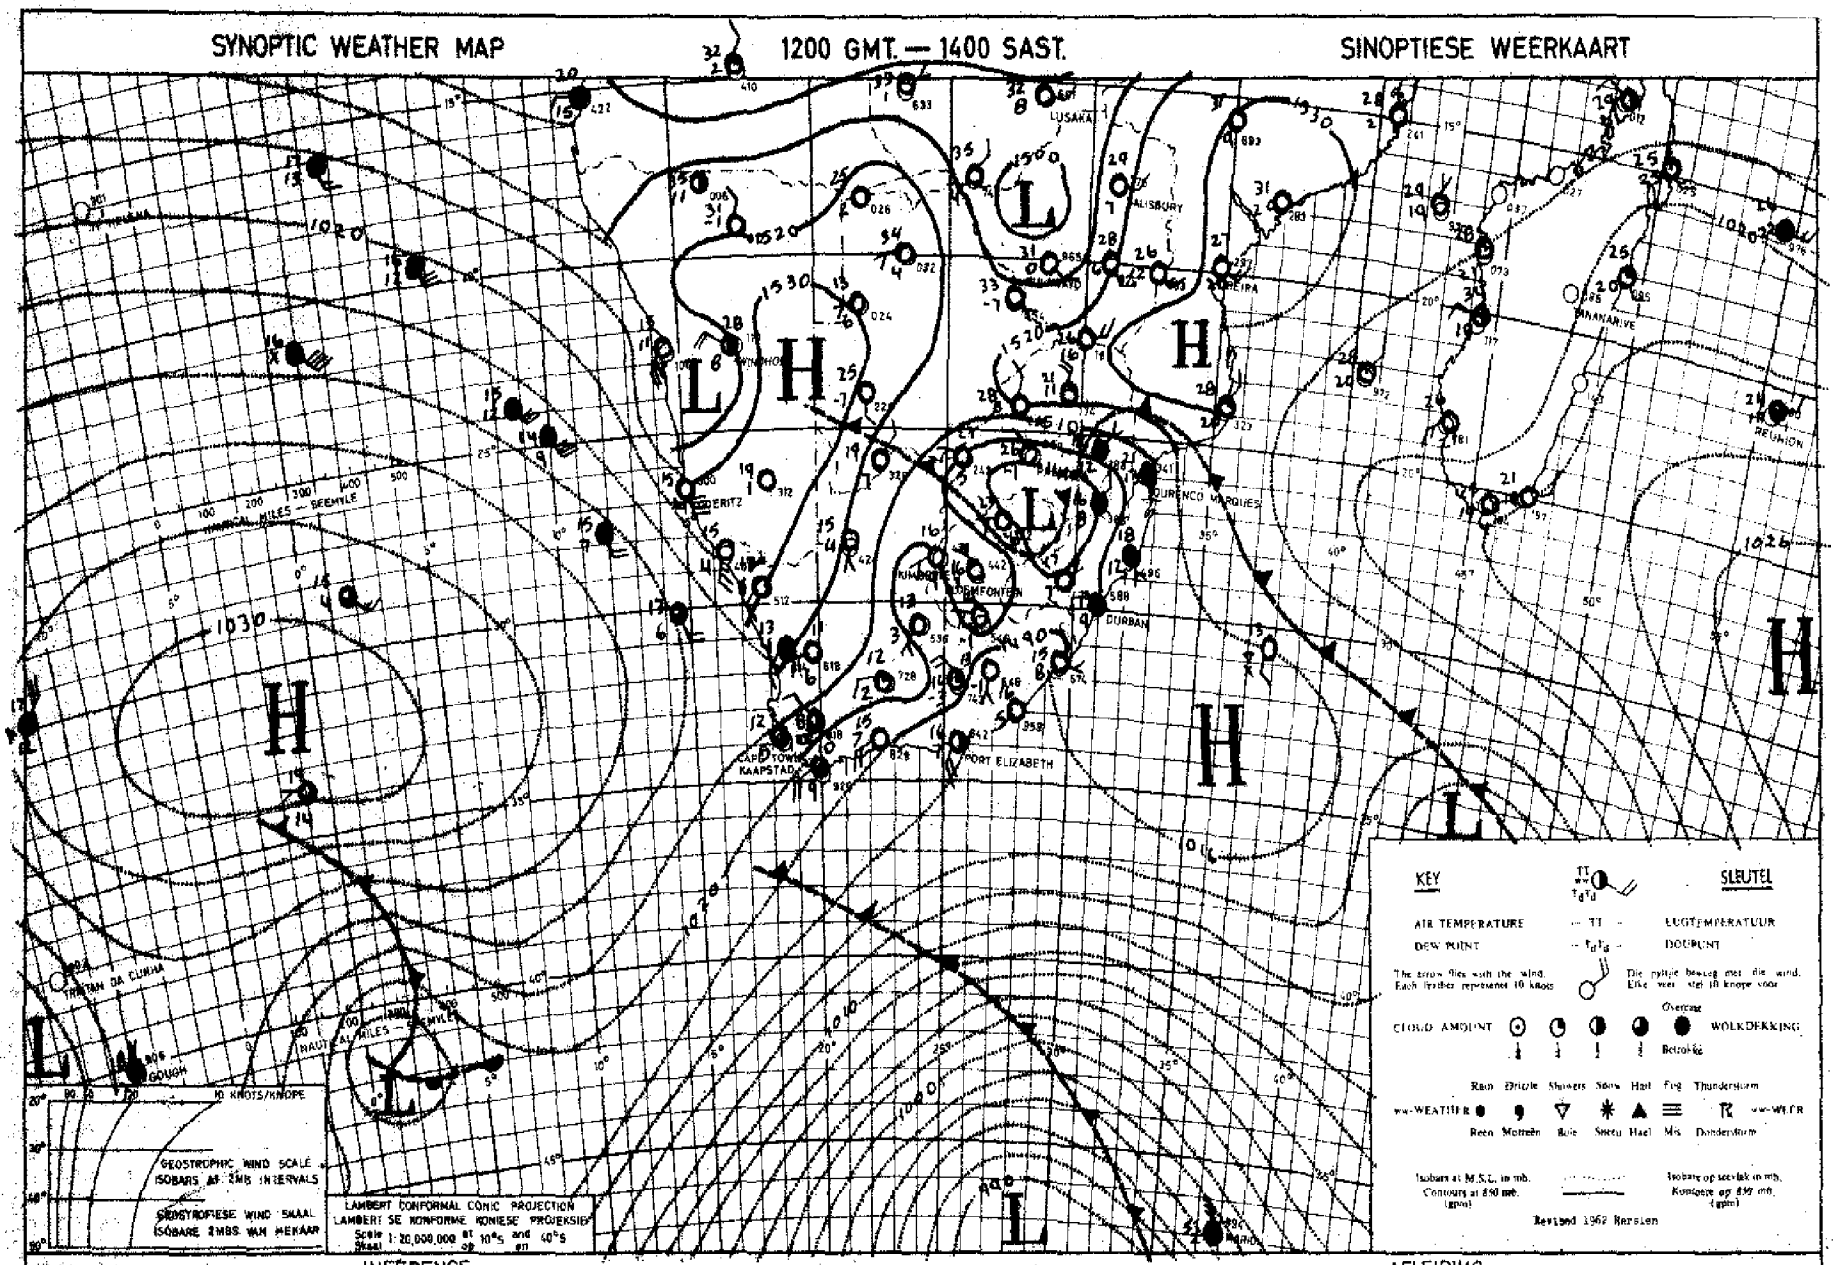
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 2...9...19.20 DATUM AFLEIDING

With a weak low pressure system over Southern Transvaal and a high south-east of Durban moist air is being fed in over Transvaal and Natal so that isolated showers may occur over these regions. The cold front approaching from the south-west will cause cooler weather with showers to spread again to the southern and eastern Cape coastal regions.

Met 'n swak laedrukstelsel oor Suid-Transvaal en 'n hoog suidoos van Durban word vogtige lug oor Transvaal en Natal ingevoer en enkele buie word verwag. Met die koufront wat uit die suidweste nader kom, sal koeler weer met buie weer voorkom oor die suidelike en oostelike kaapse kusgebiede

INFERENCE

DATE 3 - 9 - 1970 DATUM

AFLEIDING

Pressures are rising rapidly along the south coast and therefore a ridge of high will form along the east coast resulting in an inflow of moist air over Transvaal. Over the remainder of the country the weather will remain fine and temperatures will rise gradually.

Die lugdruk styg vinnig langs die suidkus en dus sal 'n sel van hoë druk langs die ooskus vorm met 'n gevolglike instroming van vogtige lug oor Transvaal. Oor die res van die land sal dit mooiweer bly en temperature sal geleidelik styg.

INFERENCE

DATE 4 - 9 - 19 70 DATUM

AFLEIDING

The cold front south of the Cape will move South-eastwards and it will be cloudy or partly cloudy and cold over South-western Cape and the South coast. It will be cloudy at first over Transvaal, clearing as the high pressure system on the East coast moves Eastwards. The remander of the country will be fine and mild to warm.

Die koue front, suid van die Kaap, sal suidoswaarts beweeg en dit sal bewolk of gedeeltelik bewolk en koud oor Suid wes Kaapland en die Suid kus wees. Dit sal aanvanklik bewolk oor Transvaal wees maar die hoëdruk oos van Natal sal ooswaarts beweeg en die weer sal begin opklaar. Oor die res van die land sal dit mooiweer en matig tot warm wees.

The approaching cold front will cause rain over the Peninsula. Cloudiness will also occur over the Transvaal Lowveld and over Northern Natal but it will clear partially over these areas. There will be little or no change over the remainder of the country.

Die naderende front sal reën oor die Kaapse skiereiland veroorsaak. Bewolktheid sal ook voorkom oor die Transvaalse Laeveld en Noord Natal waar dit gedeeltelik sal opklaar. Oor die res van die land word geen verandering verwag nie.

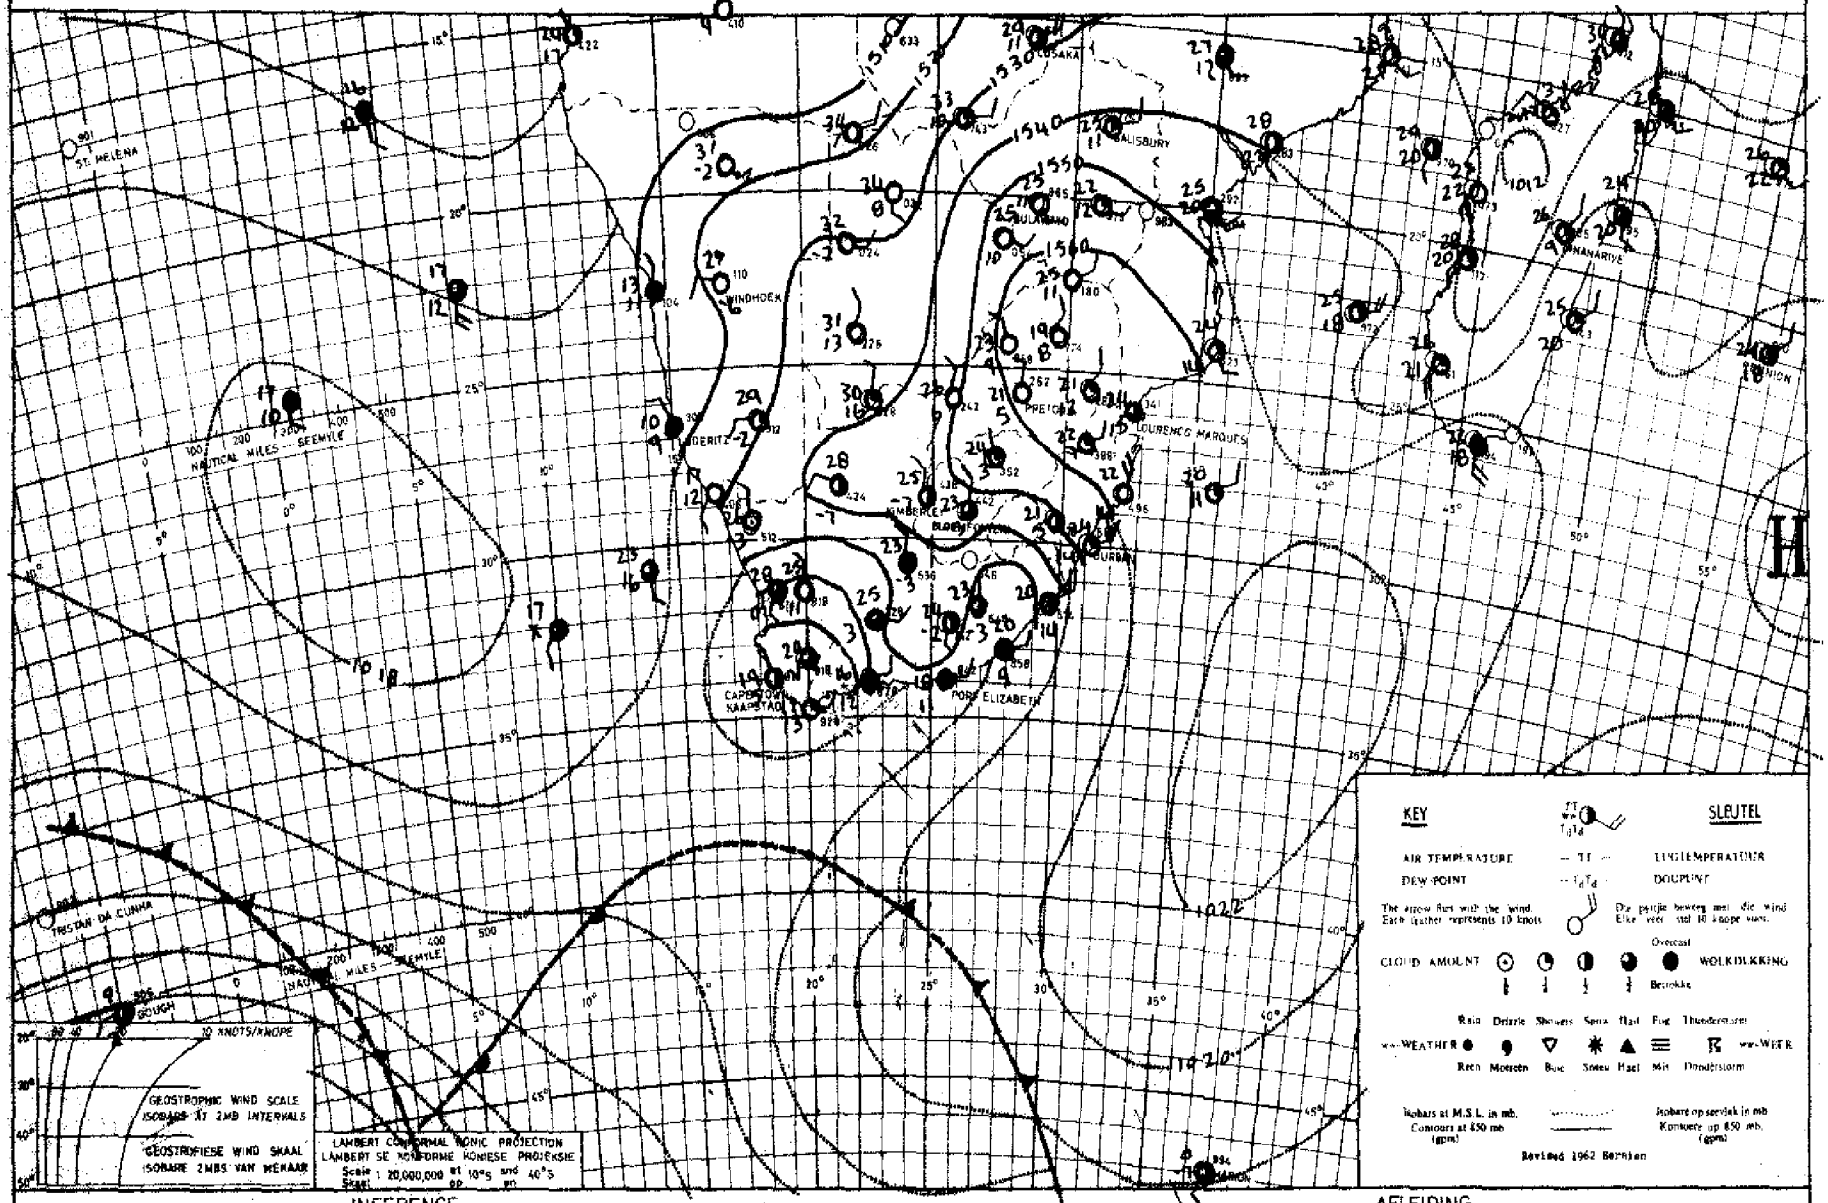
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 7.9.19.70 DATUM AFLEIDING

With a coldfront west of Cape Town cloudy cool weather can be expected along the Cape southwest coast. Otherwise the circulation is anticyclonic causing fine and mild to warm weather.

Met 'n koufront wes van Kaapstad kan bewolkte koel toestande verwag word oor die Kaapse suid-wes kus. Oor die res van die land is die sirkulasie antisiklonaal en veroorsaak mooiweer en matig tot warm toestande.

AFLEIDING
The cold front and trough west of Cape Town will cause cloudy weather with showers over the western and south-western parts of the Cape Province but over the remainder of the country it will still be fair and warm.
Die kouefront en trog wes van Kaapstad sal bewolkte weer met buie laat voorkom oor die westelike en suidwestelike dele van Kaapland. Oor die res van die land sal dit nog mooiweer en warm bly.

INFERENCE

DATE 9 - 9 19 70 DATUM

AFLEIDING

The cold front over the central interior will advance further eastwards so that cold, cloudy weather will also spread over the Eastern Cape and Natal with showers along the coast. Dry, cold air will move in over the Free State and South-western Transvaal while isolated thundershowers will occur over the Transvaal.

Die koufront wat oor die sentrale binneland geleë is, sal verder oos beweeg sodat koue, bewolkte weer ook oor Oos-Kaapland en Natal sal uitbrei met buie langs die kus. Droë, koue lug sal oor die Vrystaat en Suidwes-Transvaal beweeg terwyl enkele donderbuie oor die Transvaal sal voorkom.

DATE 10 - 9 - 19 70 DATUM

AFLEIDING

As a result of deep low pressure systems to the south the Atlantic high is moving eastwards across the interior. Consequently there will be no major change in present conditions, though cold air will also reach the southern and central parts of the Transvaal.

Die diep laedrukstelsels in die suide veroorsaak 'n oorlandse beweging van die Atlantiese Hoog. Gevolglik word geen noemenswaardige verandering in huidige toestande verwag nie. Koue lug sal egter ook die suidelike en sentrale dele van Transvaal bereik.

INFERENCE

DATE 11-9-1970 DATUM

AFLEIDING

Pressures are rising rapidly along the south coast so that the high will be centred south-east of the country tomorrow. As a result cloudy conditions will spread over the Transvaal and the northern O.F.S. from the east. Over the remainder of the country it will be fine and appreciably warmer.

Lugdruk styg vinnig langs die suidkus sodat die hoog meer suidoos van die land gelee sal wees. Gevolglik sal bewolkte toestande uit die ooste oor Transvaal en Noord-Vrystaat uitbreid. Oor die res van die land sal dit redelike mooiweer en aansienlik warmer wees.

INFERENCE

DATE 12 - 9 - 1979 DATUM

AFLEIDING

The cold front will cause cloudy, colder weather with showers over the south-western parts of the Cape Province tomorrow. The coastal low along the Cape south coast will move to the Natal coast but otherwise little change is expected.

Die kouefront sal later môre bewolkte koeler weer met buie oor die suidwestelike dele van Kaapprovinsie veroorsaak. Die kuslaag op die suidkus sal na die Natalse kusstreke beweeg maar andersins word weinig verandering verwag.

The cold front south-west of Cape Town will cause cloudy cool conditions along the south-western and southern coasts with light showers. The low pressure trough over the interior is moving eastwards and isolated thunder showers are expected in the moist air over the areas east of the trough.

Die koufront suidwes van Kaapstad sal bewolkte koel toestande tot gevolg hê, met ligte buie. Die laedruktrog oor die binneland beweeg ooswaarts en enkele donderbuie word verwag in die effens vogtige lug oor die gebiede oos van die trog.

INFERENCE

DATE 14.-9.-19.20. DATUM

AFLEIDING

The high south of the continent will cause cool, moist air to spread over Natal and Transvaal and isolated thundershowers may be expected over these regions. The cold front approaching from the west will bring cloudy weather with rain later to the South-western Cape Province.

Die hoog suid van die land sal koel, vogtige lug oor Natal en Transvaal inbeweeg en enkele donderbuie kan oor Transvaal verwag word. Die koufront wat van die weste af nader, sal later bewolkte weer met reën oor Suidwes-Kaapland aanbring.

The air over the interior is dry and the circulation anticyclonic so that there will be no development except over the Eastern Transvaal Highveld and Escarpment where the air is appreciably moister. The coastal low will move to the Cape south-east coast but otherwise there will be little change on the coast.

Met droë antisiklonale sirkulasie oor die binneland word geen ontwikkeling verwag nie behalwe oor Suid-Natal en die Transvaalse Oostelike Hoëveld en platorand waar die lug aansienlik vogtiger is. Die kuslaag sal na die suidooskus beweeg maar andersins sal daar min verandering intree aan die kus.

With a strong high pressure system over the interior warm, dry weather will persist over most regions. The low pressure system west of the country is slowly approaching and will cause cloudy weather with rain later over the Cape west coast.

Met 'n sterk hoëdrukstelsel oor die binneland sal warm, droë weer oor die meeste gebiede voortduur. Die laedrukstelsel wes van die land kom stadig nader en sal mêre bewolkte weer met reën oor die Kaapse weskus veroorsaak.

The low pressure system south-west of the Cape is moving eastwards and consequently cloudy weather with showers will occur over the south-western and southern coastal regions. Over the interior the circulation is intensely anticyclonic and the weather will remain fine and warm.

Die laedrukstelsel suidwes van Kaapstad beweeg nou oostwaarts en bewolkte weer met reënbuie sal voorkom oor die suidwestelike en suidelike kusstreke. Oor die binneland is die sirkulasie sterk antisiklonaal en sal dit mooiweer en warm bly.

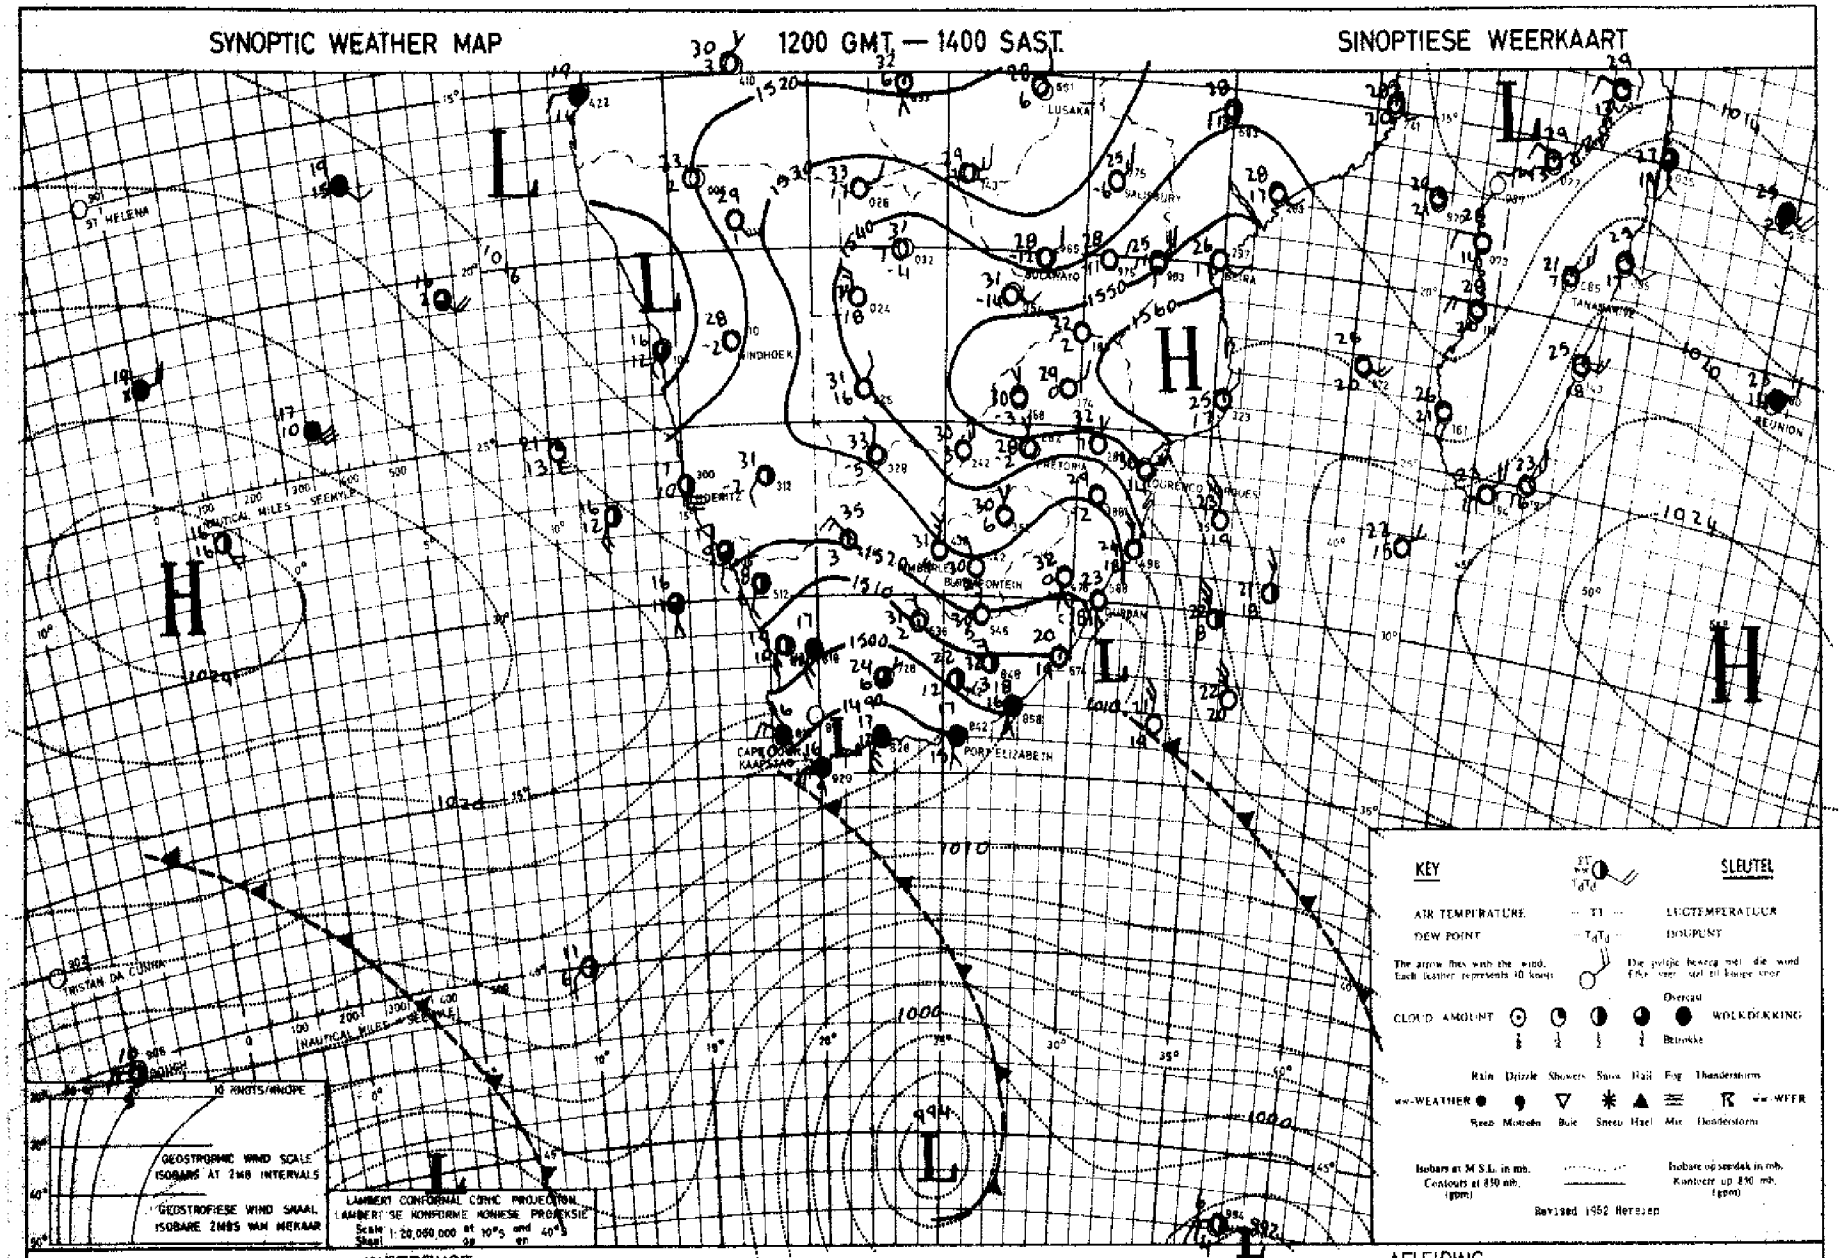
SYNOPTIC WEATHER MAP — 1200 GMT — 1400 SAST — SINOPTIESE WEERKAART



INFERENCE — DATE 18-9-19.. DATUM — AFLEIDING

The cold front at Cape Town is moving eastwards so that cloudy weather with light showers will advance over the southern and eastern coastal regions. Over the central and northern interior the circulation is anticyclonic and will maintain the fine and hot weather conditions.

Die koufront by Kaapstad beweeg oostwaarts en bewolkte weer met ligte buie sal uitbrei oor die suidelike en oostelike kuststreke. Oor die sentrale en noordelike binneland is die sirkulasie sterk antisiklonaal en warm, mooiweersoestande sal voortduur.

AFLEIDING
With the ridge of high pressure south of the country, cloudy weather will occur temporarily along the east coast. Over the interior there will be little change as the upper-air circulation remains intensely anticyclonic.
Met die rug van hoë druk suid van die land sal bewolkte weer tydelik nog langs die ooskus voorkom. Oor die binneland word egter min verandering verwag weens die sterk antisiklonale bolugsirkulasie.

DATE 20 - 9 - 19 70 DATUM

AFLEIDING

The cold front approaching from the west will bring cloudy weather with rain tomorrow over the south-western Cape Province. Over the remainder of the country no significant change is expected.

Die koufront wat van die weste af aankom, sal môre bewolkte weer met reën oor Suidwes-Kaapland aanbring. Oor die res van die land word nog geen noemenswaardige verandering verwag nie.

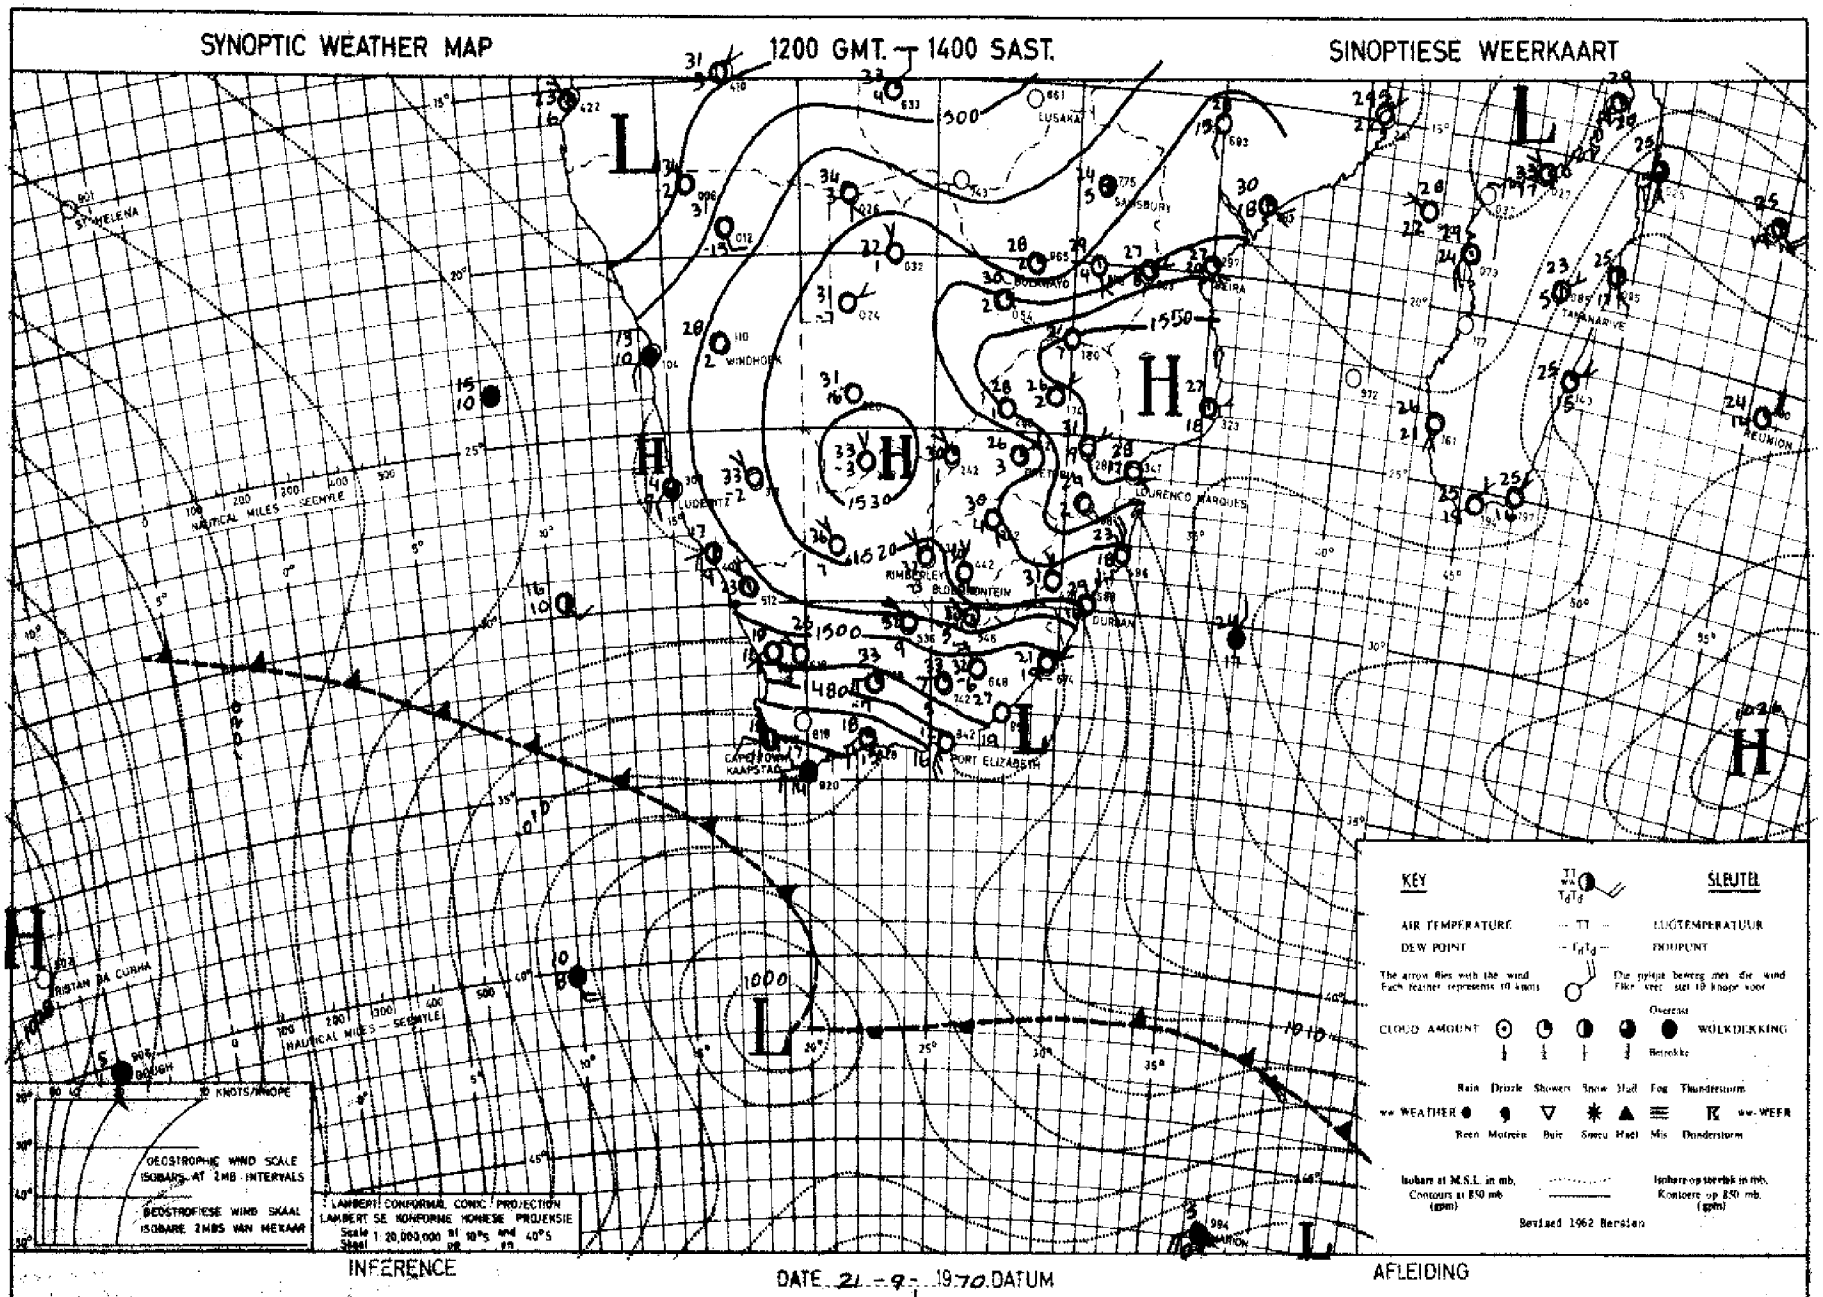
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 21-9-1970 DATUM AFLEIDING

The cold front west of Cape Town will reach the coast tomorrow and therefore colder, cloudy weather with showers will advance over the south-western and southern coastal regions. Over the remainder of the country no change is expected in the prevailing warm, dry weather.

Die kouefront wes van Kaapstad sal more die kus bereik en gevolglik sal kouer, bewolkte weer met buie uitbrei oor die suidwestelike en suidelike kusstreke. Oor die res van die land word geen verandering verwag in die heersende warm, droë weer nie.

INFERENCE

DATE 22-4-19 70 DATUM

AFLEIDING

Cool cloudy weather will advance over the southern and eastern coastal regions from the south. The low pressure system north-west of Cape Town will move towards the west coast and will lead to cloudy weather with rain later over the western parts of the Cape Province.

Koel, bewolkte weer sal oor die suid- en oskusstreke inbeweeg uit die suide. Die laedrukstelsel noordwes van Kaapstad sal na die weskus beweeg en later bewolkte weer met reën oor die westelike dele van Kaapland veroorsaak.

The low pressure system south-west of Cape Town will, as a result of the intense high pressure system in the south, move only slowly eastwards, accompanied by cloudy and cooler weather with showers over the Cape Province south of the Orange River. Over the remainder of the country it will remain fine and warm.

Die laedrukstelsel suidwes van Kaapstad sal, weens die sterk hoëdrukstelsel in die suide, stadig oos waarts beweeg, gepaard met koeler, bewolkte weer en buie oor oor Kaapland suid van die Oranje. Oor die res van die land sal dit nog hoofsaaklik mooiweer en warm wees.

INFERENCE

DATE 25 - 9 - 19 70 DATUM

AFLEIDING

The low pressure system south of the Cape is moving slowly southwards so that cloudy weather with showers will occur over South-western Cape. East of the trough over the interior isolated thundershowers will occur.

Die laedrukstelsel suid van die Kaap beweeg stadig suidwaarts sodat bewolkte weer met buie sal voorkom oor Suidwes-Kaapland. Oos van die trog oor die binneland sal enkele donderbuie voorkom.

INFERENCE

DATE 26 - 1 - 1970 DATUM

AFLEIDING

Together with the surface trough of low pressure, an upper-air low is now also developing with the result that scattered thundershowers will occur over the Free State, Northern Cape and Natal and later also over Western and Southern Transvaal.

Tesame met die oppervlaktetrog van lae druk oor die binneland is 'n boulaag ook besig om te ontwikkel sodat verspreide donderbuie oor die Vrystaat, Noord-Kaapland en Natal sal voorkom en later uitbrei oor Wes- en Suid-Transvaal.

The low pressure trough over the central interior is only slowly moving eastwards together with the upper-air low pressure system. Scattered showers will therefore again occur over Northern Cape, the Free State, Natal and Western and Southern Transvaal.

Die laedruktrog oor die sentrale binneland van die Republiek beweeg net stadig ooswaarts tesame met 'n bolugladrukstelsel. Verspreide buie kan dus weer verwag word oor Noord-Kaapland, die O.V.S., Natal en Wes- en Suid-Transvaal.

INFERENCE

DATE 28 - 9 - 19 79 DATUM

AFLEIDING

The low pressure system over the central interior, associated with the upper-air low, will cause rain and showers over the eastern half of the Republic. The front approaching from the south-west will bring cloudy weather with rain also over the Cape south coast.

Die laedrukstelsel oor die sentrale binneland, in samehang met die boluglaag, sal reën en buie veroorsaak oor die oostelike helfte van die Republiek. Die front wat uit die suidweste nader kom, sal bewolkte weer met reën ook oor die kaapse suidkus aanbring.

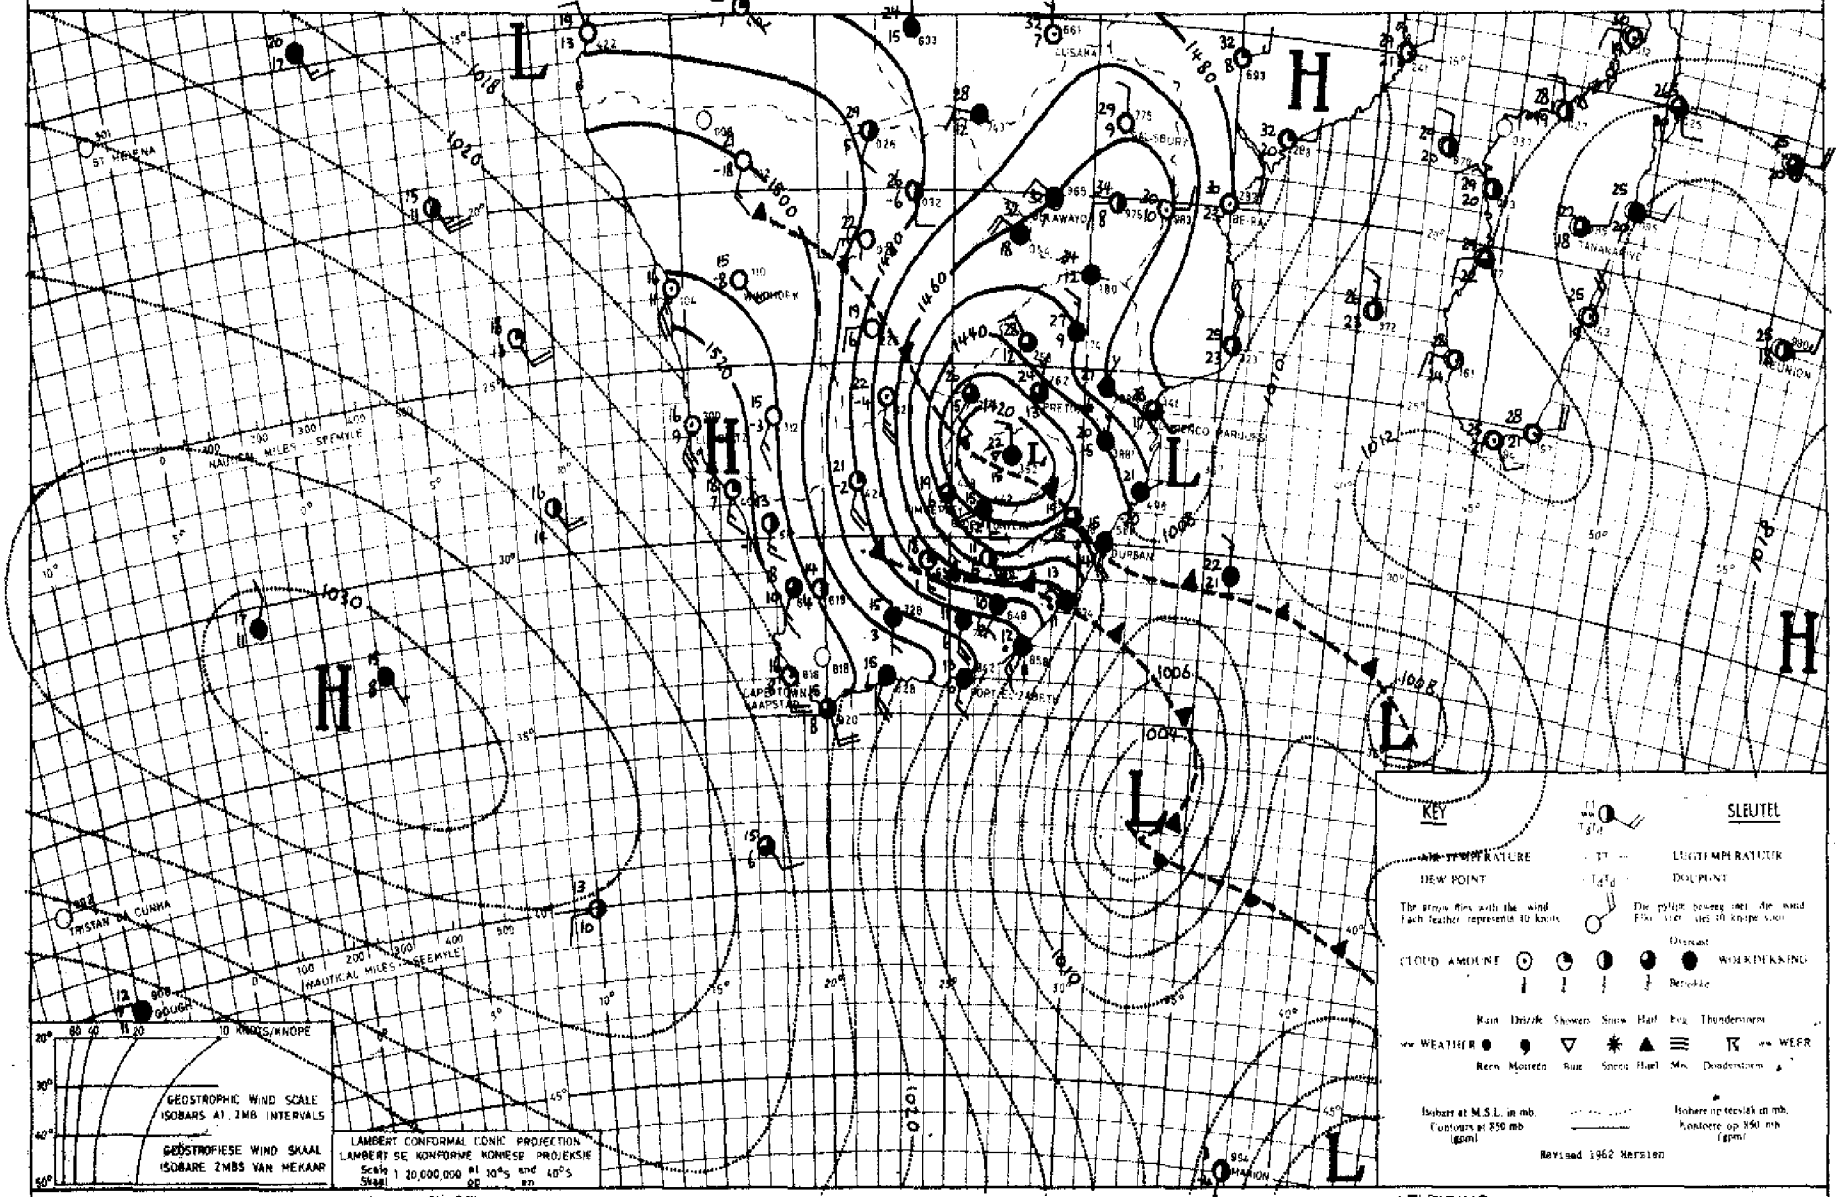
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST. SINOPTIESE WEERKAART



The low pressure system over the interior is moving north-eastwards and is being followed by cool, dry air from the south-west while it will remain cloudy with further rain over Eastern Cape, Natal and South-eastern Transvaal.

Die laedrukstelsel oor die binneland beweeg noordooswaarts en word gevolg deur koel, droë lug uit die suidweste terwyl dit bewolk sal wees met verdere reën oor Oos-Kaapland, Natal en Suidoos-Transvaal.

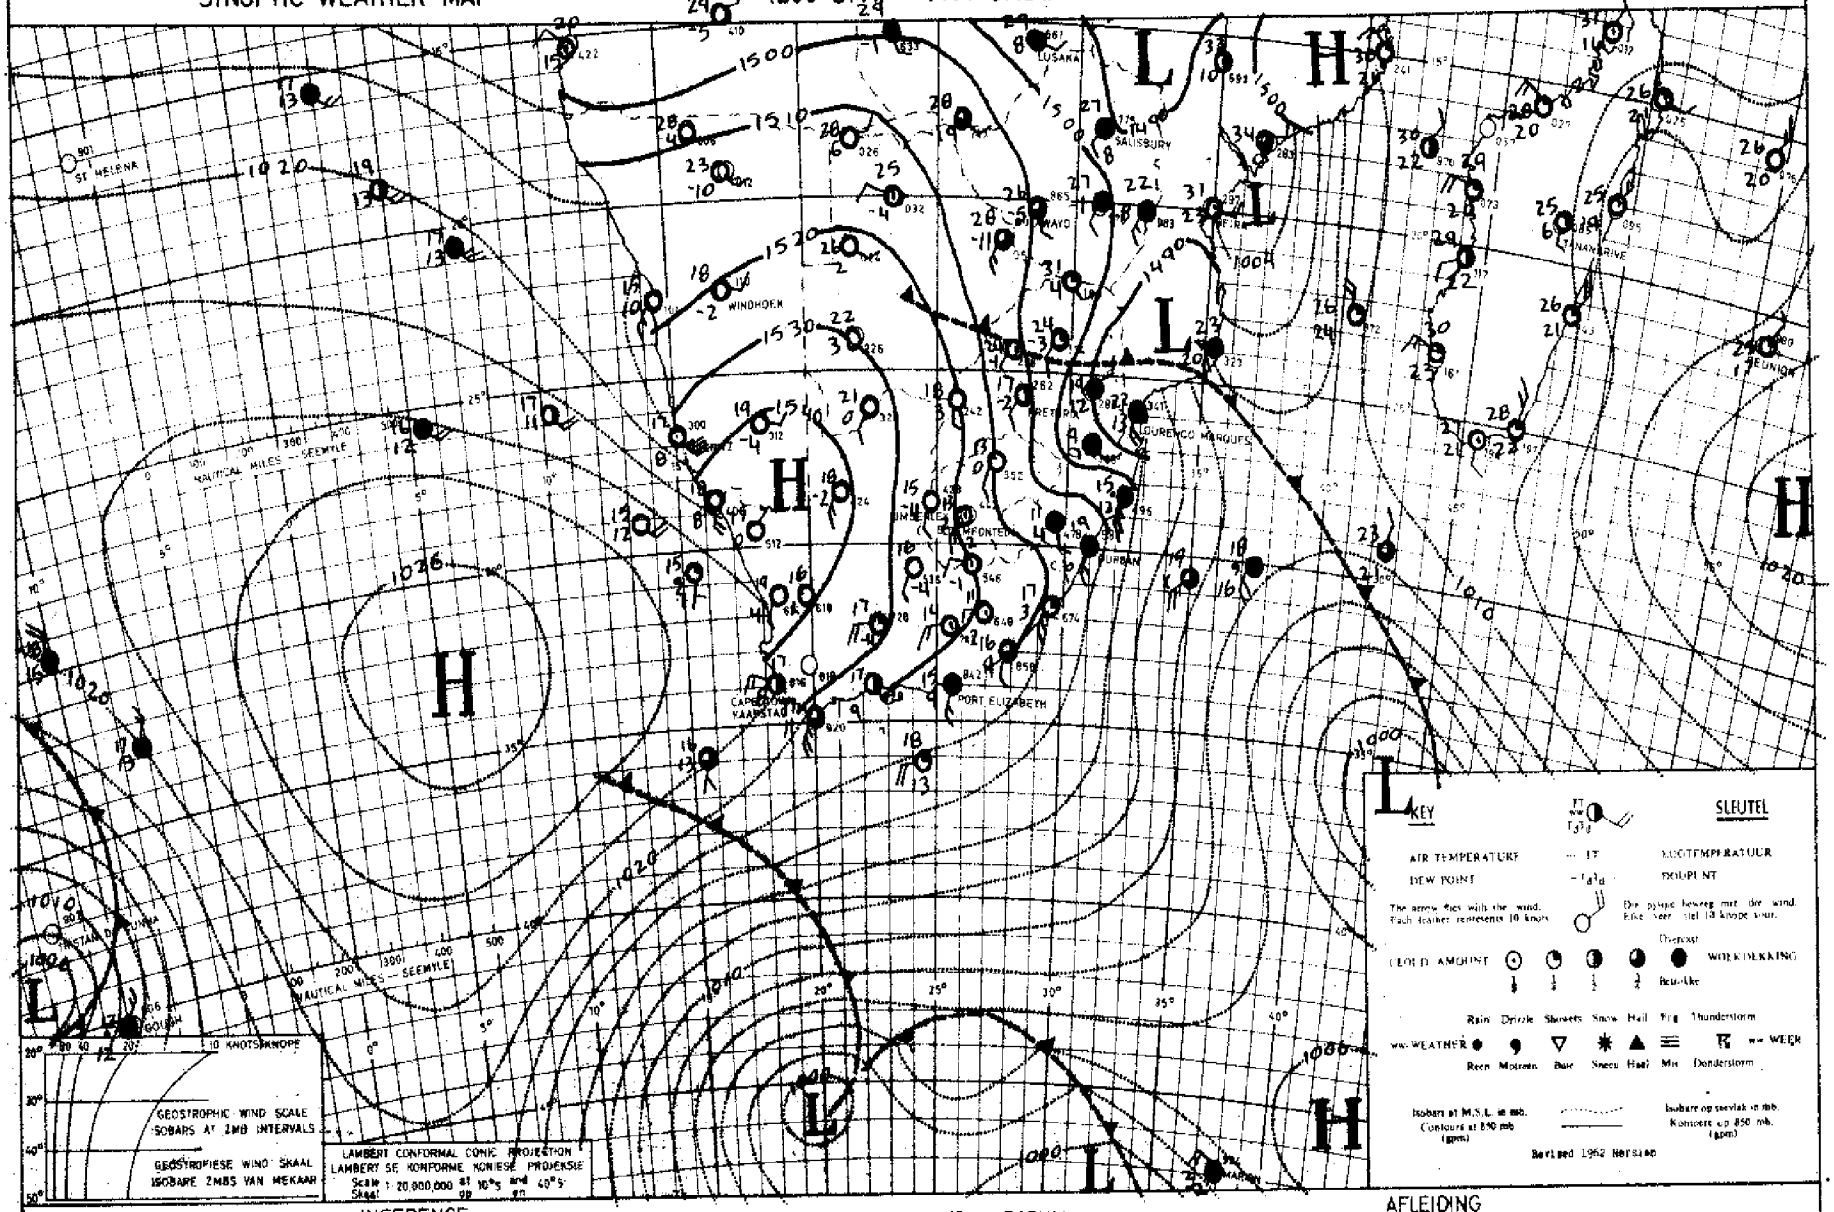
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 30-9-19 70 DATUM AFLEIDING

Cool, dry air has already advanced over most parts of the Republic and it will also clear over Natal. A cold front approaching from the south-west will later cause cloudy weather with showers to spread over the southern and south-eastern coastal regions.

Droë, koel lug het reeds oor die meeste dele van die Republiek uitgebrei en opklaring sal ook nog intree oor Natal. 'n Kouefront wat uit die suidweste aankom, sal later bewolkte weer met buie laat uitbrei oor die suidelike en suidoostelike kusstreke.

INFERENCE

DATE 1-10-1970 DATUM

AFLEIDING

A ridge of high pressure is moving in south of the land and is causing cloudy weather with light showers over the Cape east coast which will spread to the Natal coast. Over the remainder of the country the weather will remain fair.

'n Rug van hoë druk steet suid van die land in en veroorsaak bewolkte weer met ligte buie oor die Kaapse ooskus wat later ook na die Natalkus sal uitbrei. Oor die res van die land sal dit hoofsaaklik mooiweer bly.

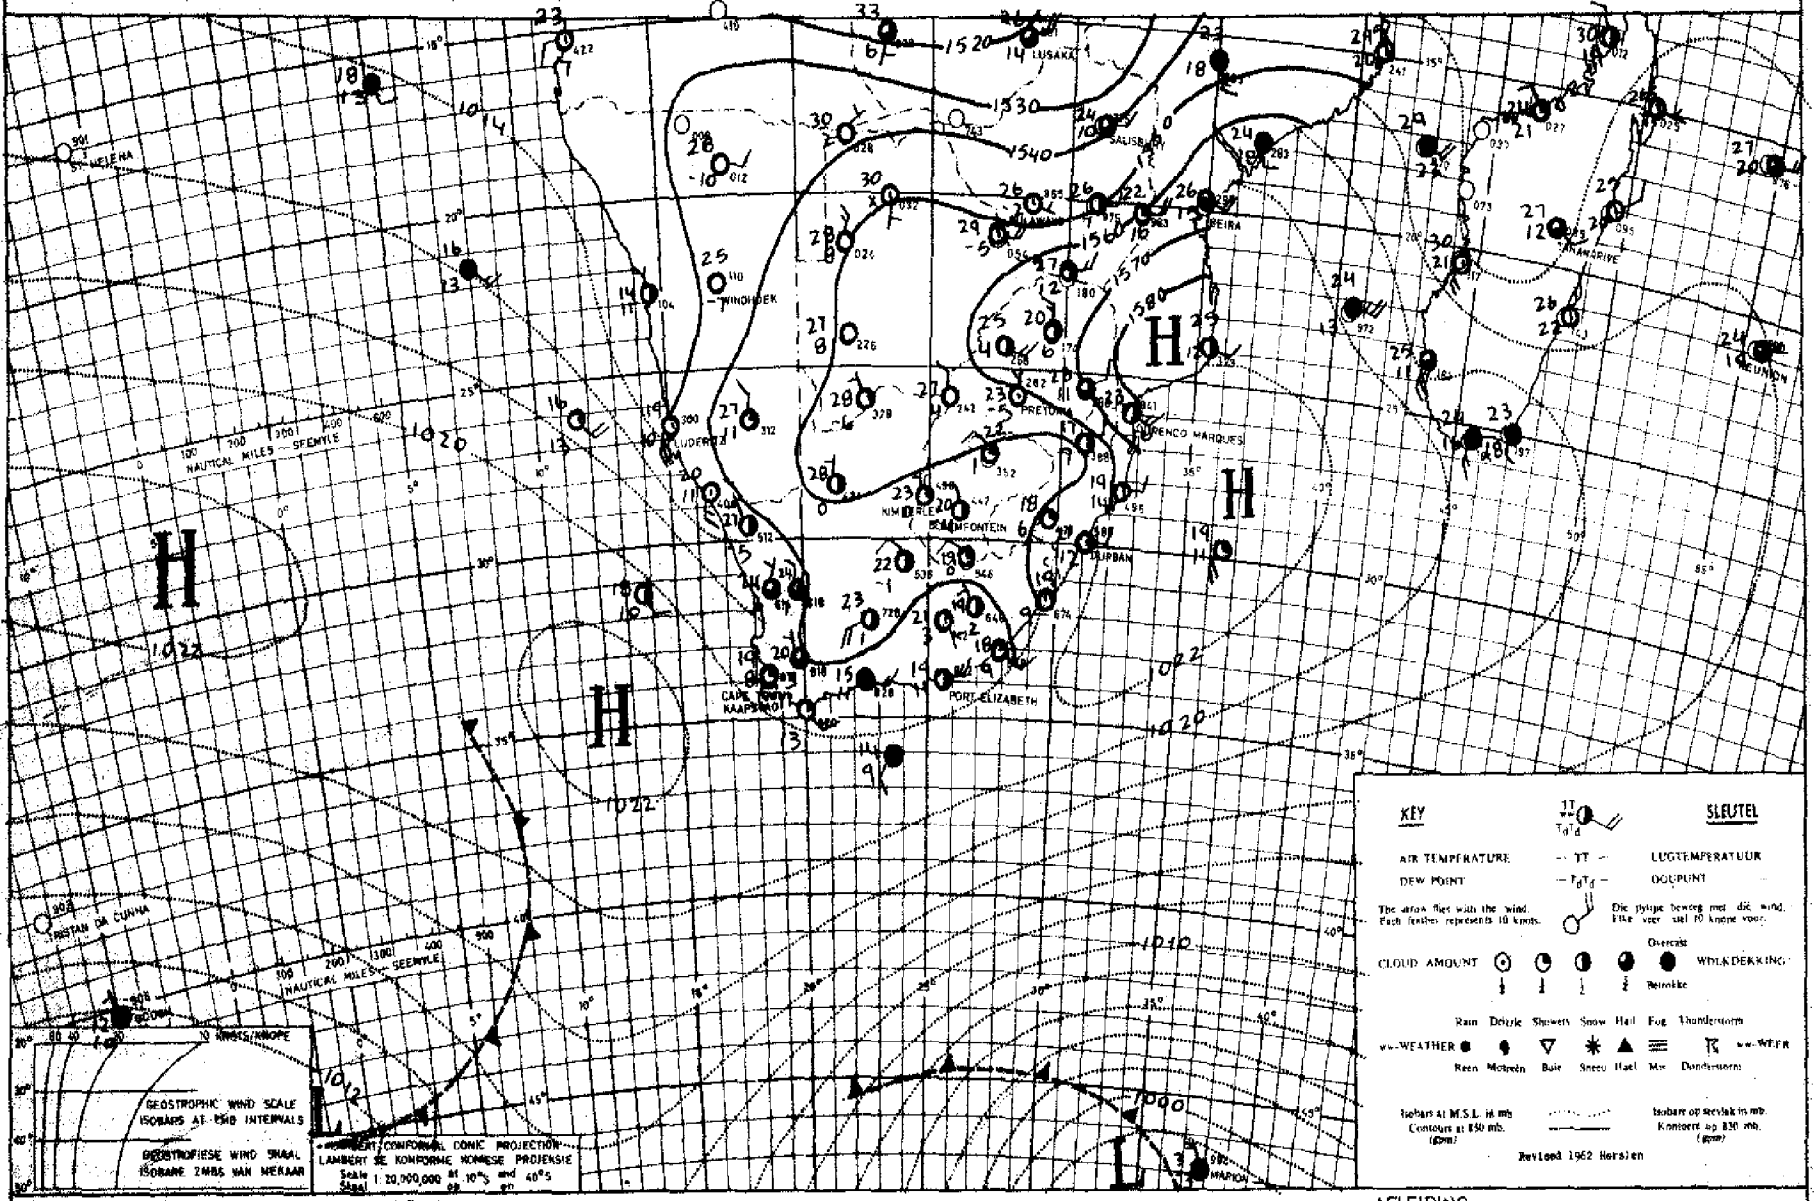
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 2-10-1970 DATUM — AFLEIDING

Pressures are falling rapidly along the south and east coast with the result that a coastal low will move up the Natal coast, followed by strong south westerly winds. Over the rest of the country the circulation will remain anticyclonic and the weather will be fair and warm.

Lugdruk val vinnig langs die suid-en ooskus sodat 'n kuslaag langs die Natalkus sal opbeweeg, gevolg deur sterk suid-westewinde. Oor die res van die land sal die sirkulasie antisiklonaal bly en sal dit mooiweer en warm wees.

Cloudy conditions along the Cape South and East coasts and along the Natal coast will clear. With the axis of high pressure lying fairly far to the North, dry Westerly to south-westerly winds will blow over the interior, where it will be fine.

Bewolkte toestande oor die Kaapse Suid- en Ooskusstreke en oor die Natalse kus sal opklaar. Met die as van hoëdruk wat taamlik ver Noord gelee is, sal westelike tot suidwestelike winde oor die binneland waai gepaard met helder weer.

INFERENCE

DATE 5-10-1970 DATUM

AFLEIDING

As a result of the high pressure system over the interior the weather will remain fine and warm to hot over most areas. The trough south of the continent, together with the coastal low forming on the south-east coast, will cause cool, cloudy weather to advance over the southern and eastern

As gevolg van die hoëdrukstelsel oor die binneland sal dit mooiweer en warm bly oor die meeste gebiede. Die trog suid van die land tesame met 'n kuslaag wat aan die suid-ooskus vorm, sal koel bewolkte toestande oor die suidelike en oostelike kuststreke laat uitbrei.

The front and low pressure system west of Cape Town will cause cloudy weather with rain over the South-western Cape. Cool, cloudy conditions will also occur over the southern and eastern coastal regions. Isolated thundershowers will occur over the interior but falls will be slight.

Die front en laedrukstelsel wes van Kaapstad sal bewolkte weer met reën veroorsaak oor Suidwes-Kaapland. Koel, bewolkte weer sal ook oor die suidelike en oostelike kusgebiede voorkom. Enkele donderbuie sal oor die binneland voorkom maar neerslag sal gering wees.

INFERENCE

DATE 8-10-19 70 DATUM

AFLEIDING

Cooler cloudy conditions will also spread to the Transvaal. Rain or showers will occur over the Eastern Cape, Natal, Transvaal and the north eastern Free State. It will however start clearing over the southern Cape Province

Koeler, vogtiger lug wat om die Hoog sirkuleer sal ook na die Transvaal uitbrei en Reën of buie sal uitsak oor Oos-Kaapland, Natal, Transvaal en die noord-oostelike Vrystaat. Dit sal egter begin opklaar oor die suidelike Kaapprovinsie.

INFERENCE

DATE 8.10.1970 DATUM

AFLEIDING

The high pressure system south of the continent is feeding in moist air over the eastern half of the Republic and the low pressure system over the interior will cause rain and showers to occur over the Transvaal, Natal, the Free State, Northern and Eastern Cape.

Die hoëdrukstelsel suid van die land voer vogtige lug in oor die oostelike helfte van die Republiek en die laedrukstelsel oor die binneland sal veroorsaak dat reën en buie sal uitsak oor Transvaal, Natal, Vrystaat, Noord- en Oos-Kaapland.

INFERENCE

DATE 10-10-19 74 DATUM

AFLEIDING

The interior low pressure system has moved westwards and the rainy conditions has spread over the whole Free State and Northern Cape. Pressures are, however, starting to fall in the east, indicating a south-eastward movement of the low so that further rain will fall also over the eastern and southern parts of

Die binnelandse laedrukstelsel het weswaarts beweeg en die reën-toestande het nou ook uitgebrei oor die hele Vrystaat en Noord-Kaapland. Lugdruk begin egter weer daal in die ooste wat op 'n suidoostwaartse beweging van die laag dui sodat verdere reën ook oor die oostelike en suidelike dele van die land sal voorkom

DATE 11-10-1970 DATUM

AFLEIDING

With the high pressure system still south of the country and the interior low which is moving south eastwards, it is expected that general rain and showers will again occur over the eastern, central and southern areas of the country

Met die hoëdruksstelsel nog suid van die land en die binnelandse laag wat suidoostwaarts beweeg, word verwag dat algemene reën en buie nog sal uitsak oor die oostelike, sentrale en suidelike dele van die land.

INFERENCE

DATE 12-10-19.70 DATUM

AFLEIDING

The low pressure system north of Durban will maintain cloudy weather with rain over the Natal coast and heavy falls may be expected. The interior low has also moved on to the east and further clearance will take place over most regions.

Die laedrukstelsel noord van Durban sal veroorsaak dat bewolkte weer met reën voortduur oor die Natalse kus en swaar neerslae kan verwag word. Die binnelandse laag het ook na die ooste uitbeweeg en die weer sal verder opklaar oor die meeste dele

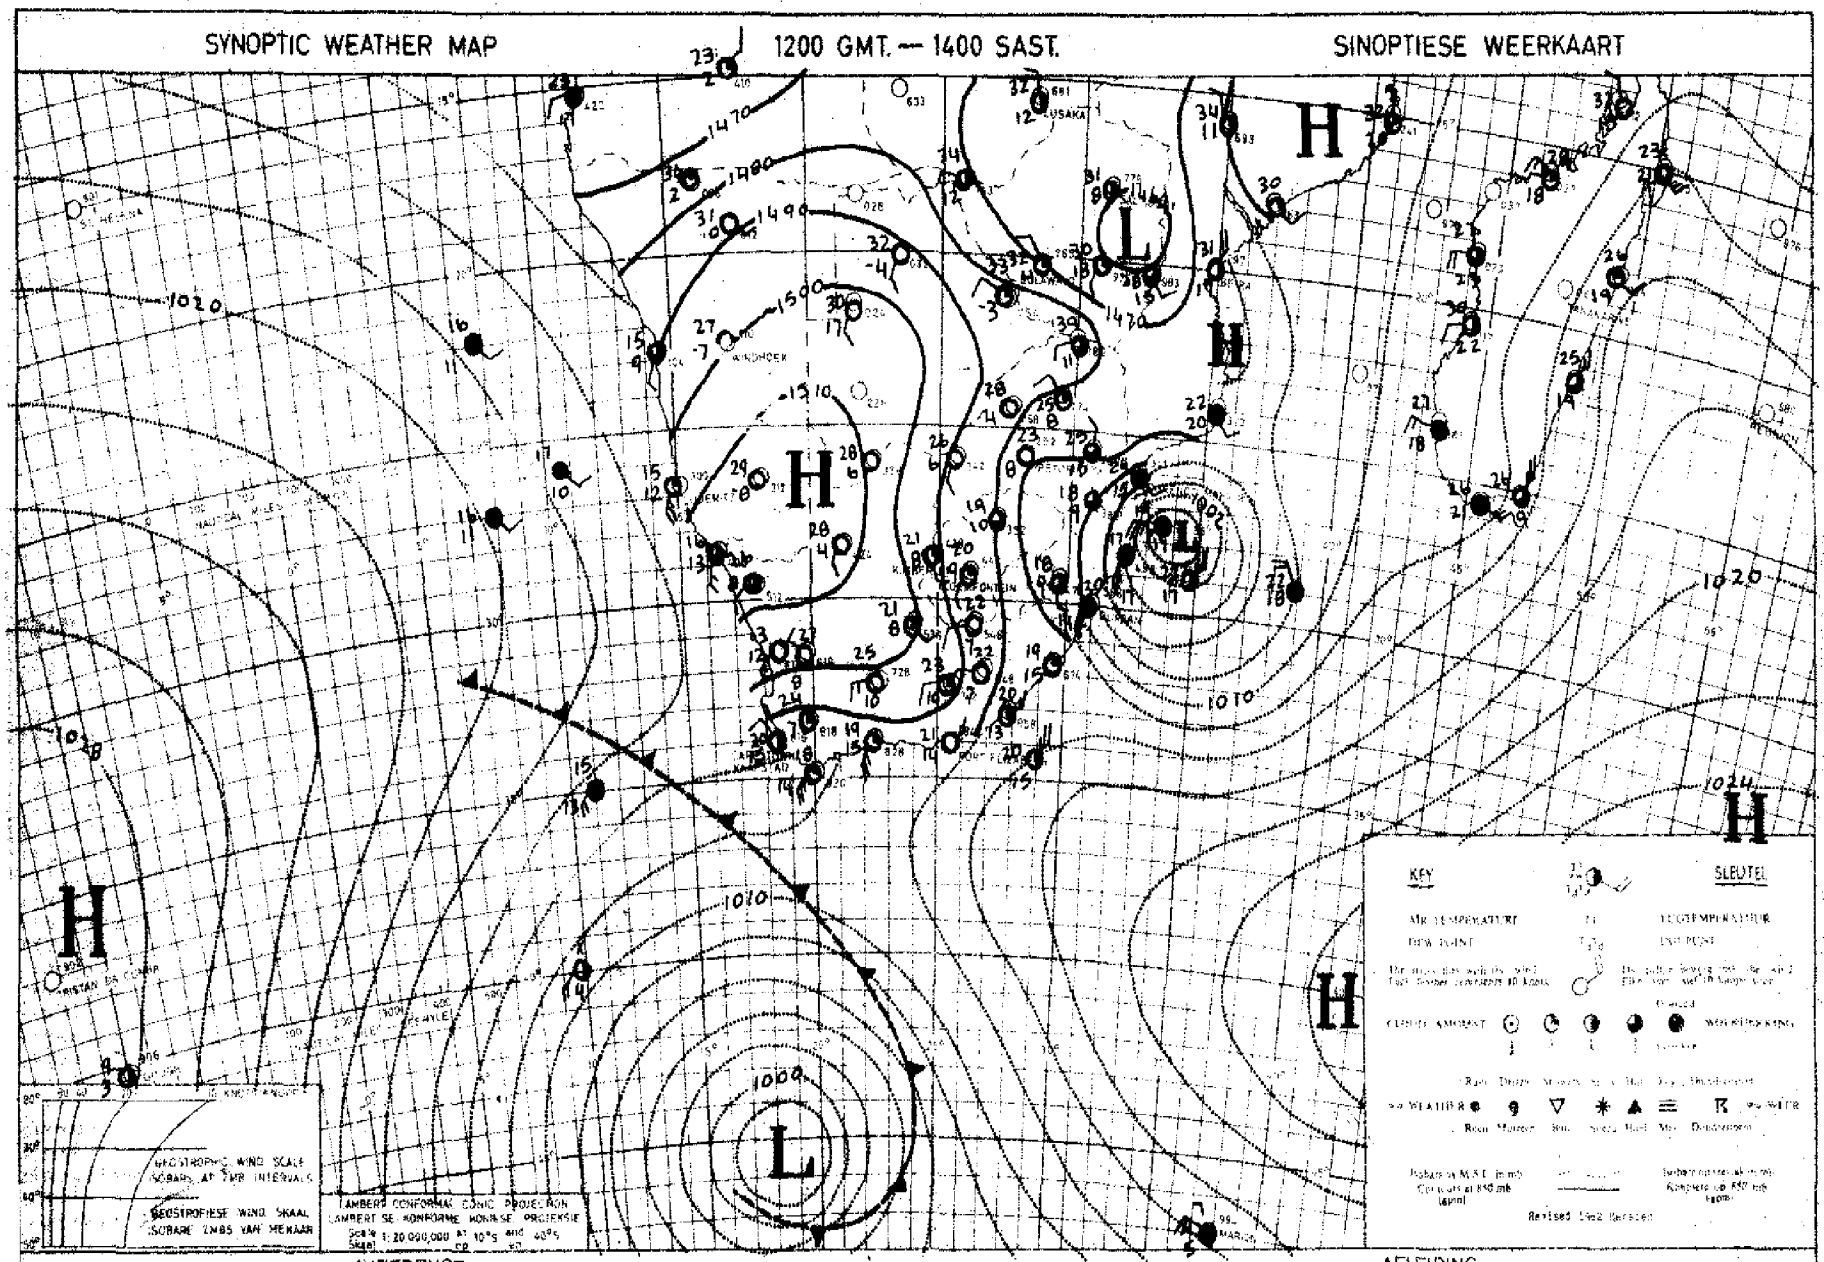
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 13 - 10 - 19 70 DATUM AFLEIDING

The low pressure system along the Natal coast is now moving away and the weather over this region will also clear up. The cold front near Cape Town will move eastwards, associated with cloudy weather and showers over the south-western, southern and eastern Cape coastal regions.

Die laedrukstelsel langs die Natalkus beweeg nou weg en die bewolkte weer oor die gebied sal ook opklaar. Die kouefront naby Kaapstad sal oostwaarts beweeg, gepaard met bewolkte weer en buie oor die suidwestelike, suidelike en oostelike Kaapse kusgebiede.

Cloudy, cooler weather with showers will spread to the coastal regions of Natal and the eastern Cape and Natal interior. Partly cloudy and cooler conditions will occur. Over the remainder of the country it will be fine and warm to hot.

Bewolkte koeler weer met buie sal uitbrei na die kuststreke en die oostelike binneland van Natal en Kaapland terwyl gedeeltelike bewolkte toestande oor Suid-Kaapland sal voorkom. Oor die res van die land sal dit mooi weer en warm of baie warm wees.

The high pressure system ridging in south of the continent will cause cold cloudy weather with rain to spread over the whole Transvaal and the Northern Free State. Over the remainder of the country it will, however, be fair and it will become warmer.

Die hoëdrukstelsel wat suid van die land indruk, sal koue, bewolkte weer met reën laat uitbrei oor die hele Transvaal en die Noord-Vrystaat. Oor die suidelike dele van die land sal dit egter redelik mooiweer wees en warmer word.

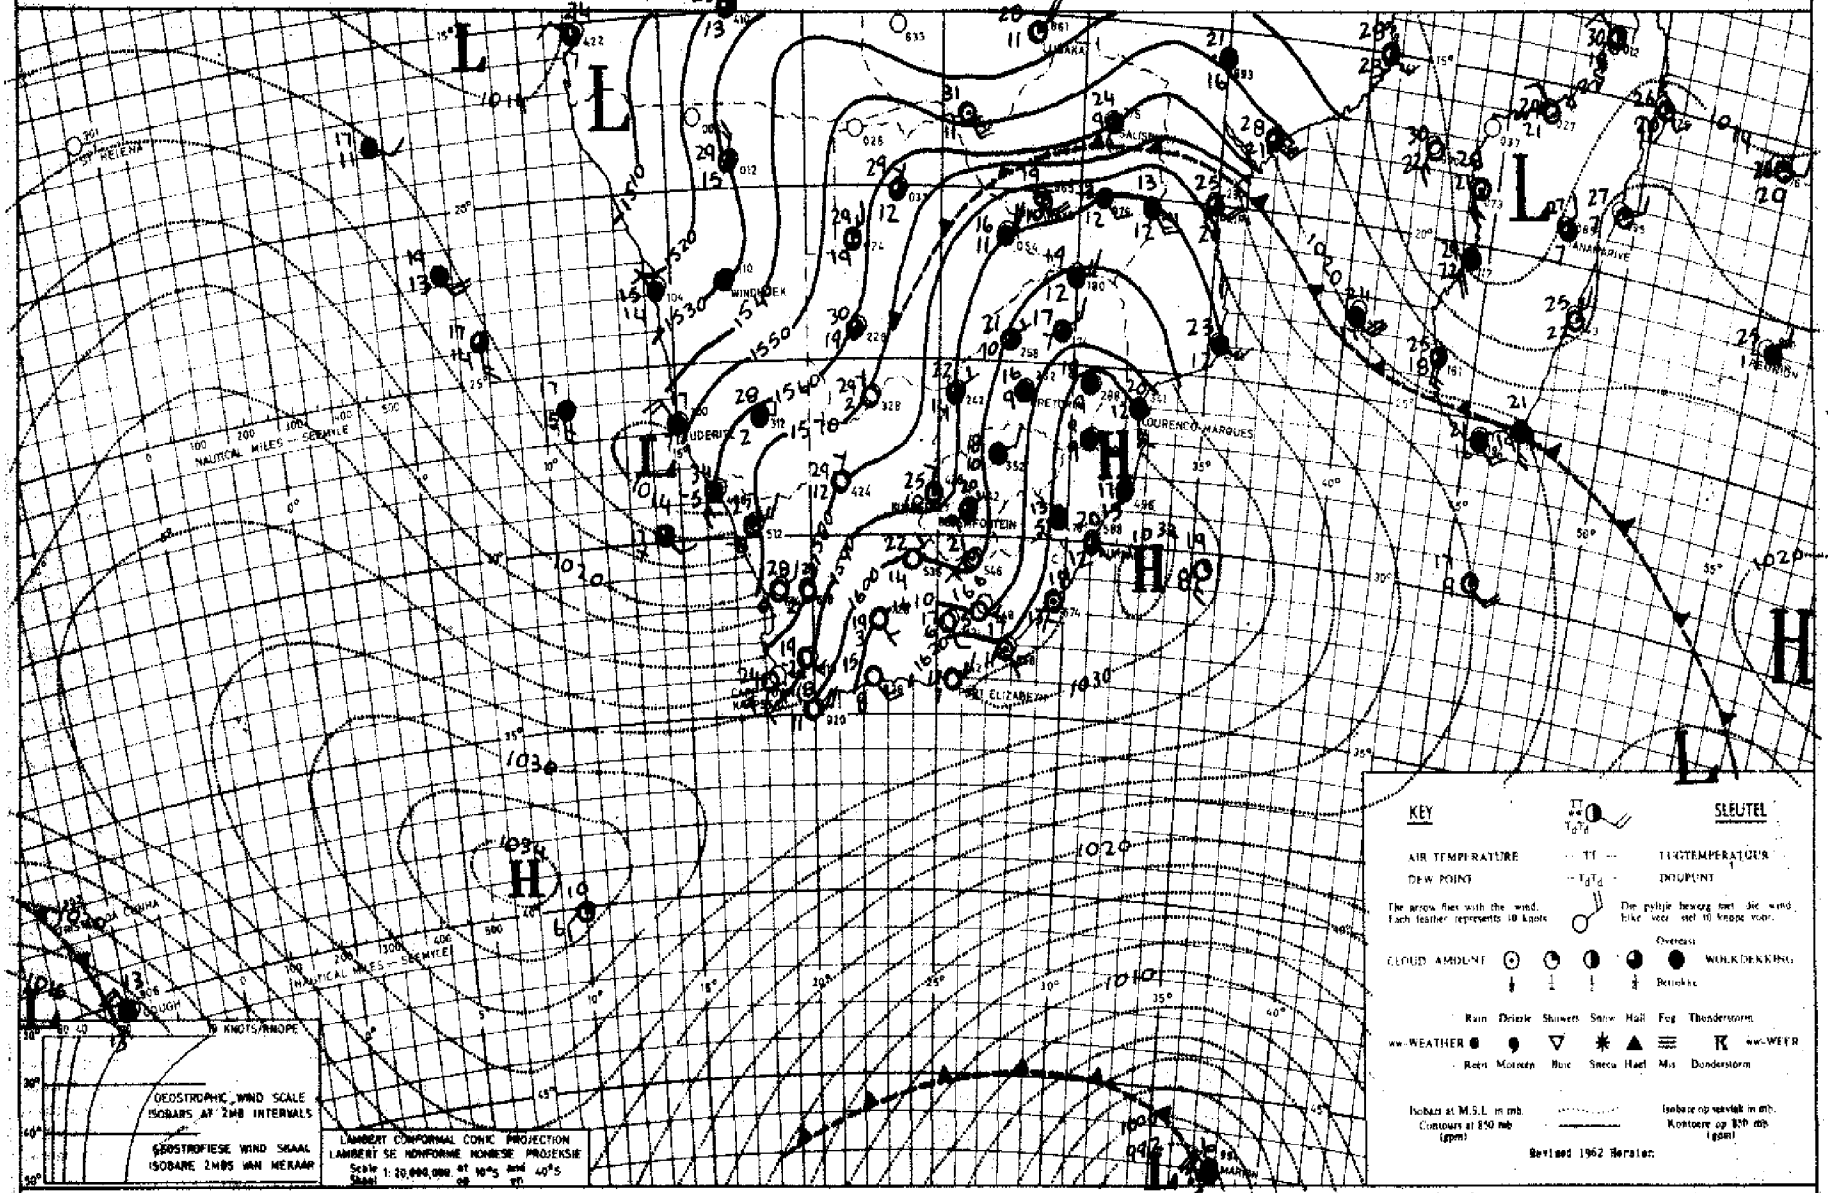
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 17-10-19 70 DATUM — AFLEIDING

As a result of the low pressure trough developing over S.W.A. and warm, moist air advancing over this region, scattered thundershowers will occur there and also over Botswana and Gordonia. The cloudy weather over Transvaal will clear gradually as the high east of the country moves further away.

Met die laedruktrog wat oor S.W.A. ontwikkel en warm, vogtige lug wat oor die gebied inbeweeg, sal verspreide donderbuie daar voorkom en ook oor Botswana en Gordonia. Die bewolkte weer oor Transvaal sal geleidelik opklaar namate die sel van hoë druk oos van die land verder weg beweeg.

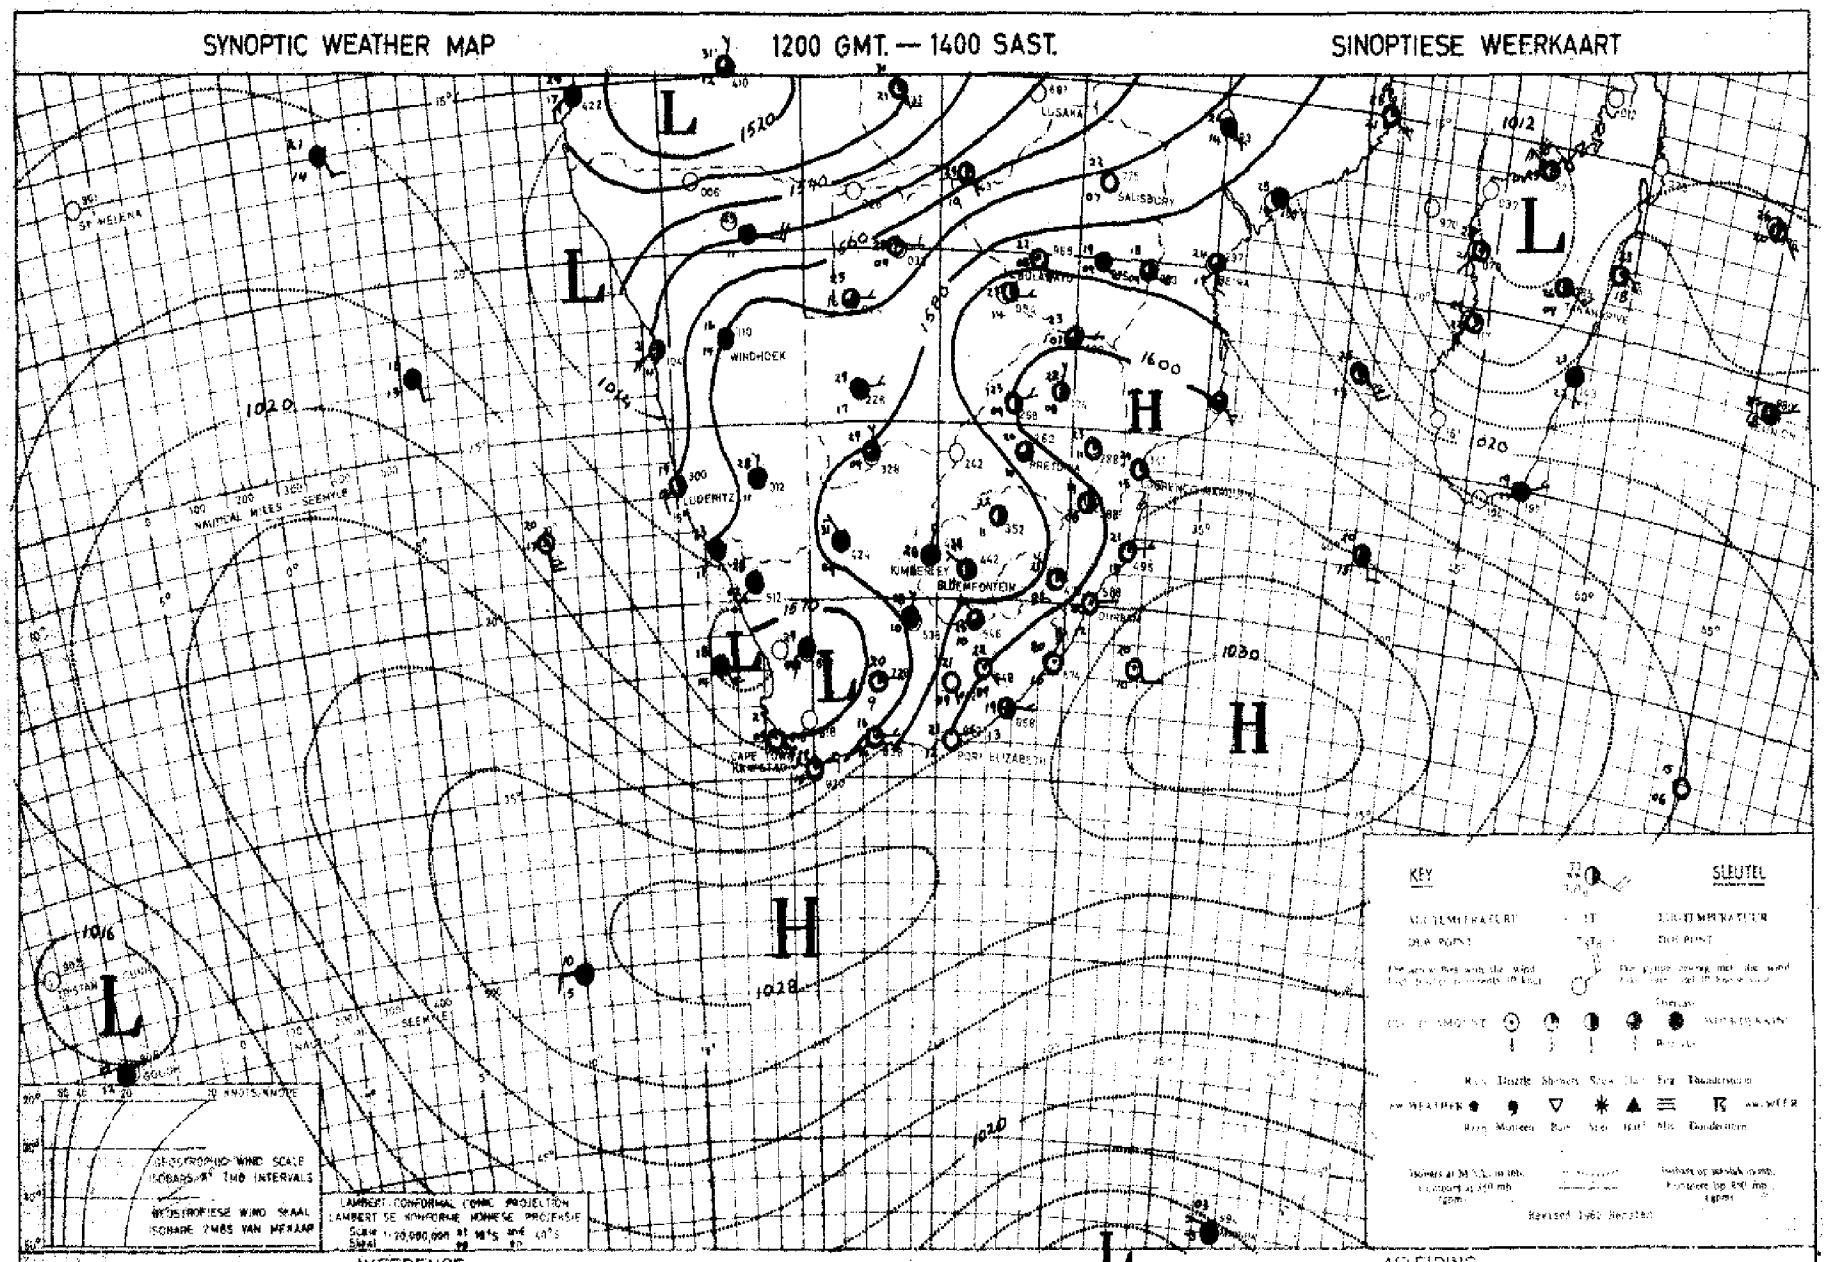
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



The belt of highpressure south and east of the country is moving eastwards slowly. Moister air is moving southwards over the western parts of the country and with an upper low near the west coast, showers will occur over S.W.A., Botswana, Northern and North-western Cape and the northern Free State.

Die hoëdrukgordel suid en oos van die land beweeg stadig ooswaarts. Vogtiger lug beweeg suidwaarts oor die westelike dele en met 'n bolaglaedrukstelsel naby die weskus, word buie verwag oor S.W.A., Botswana, Noord- en Noordwes-Kaapland en die suidelike Vrystaat.

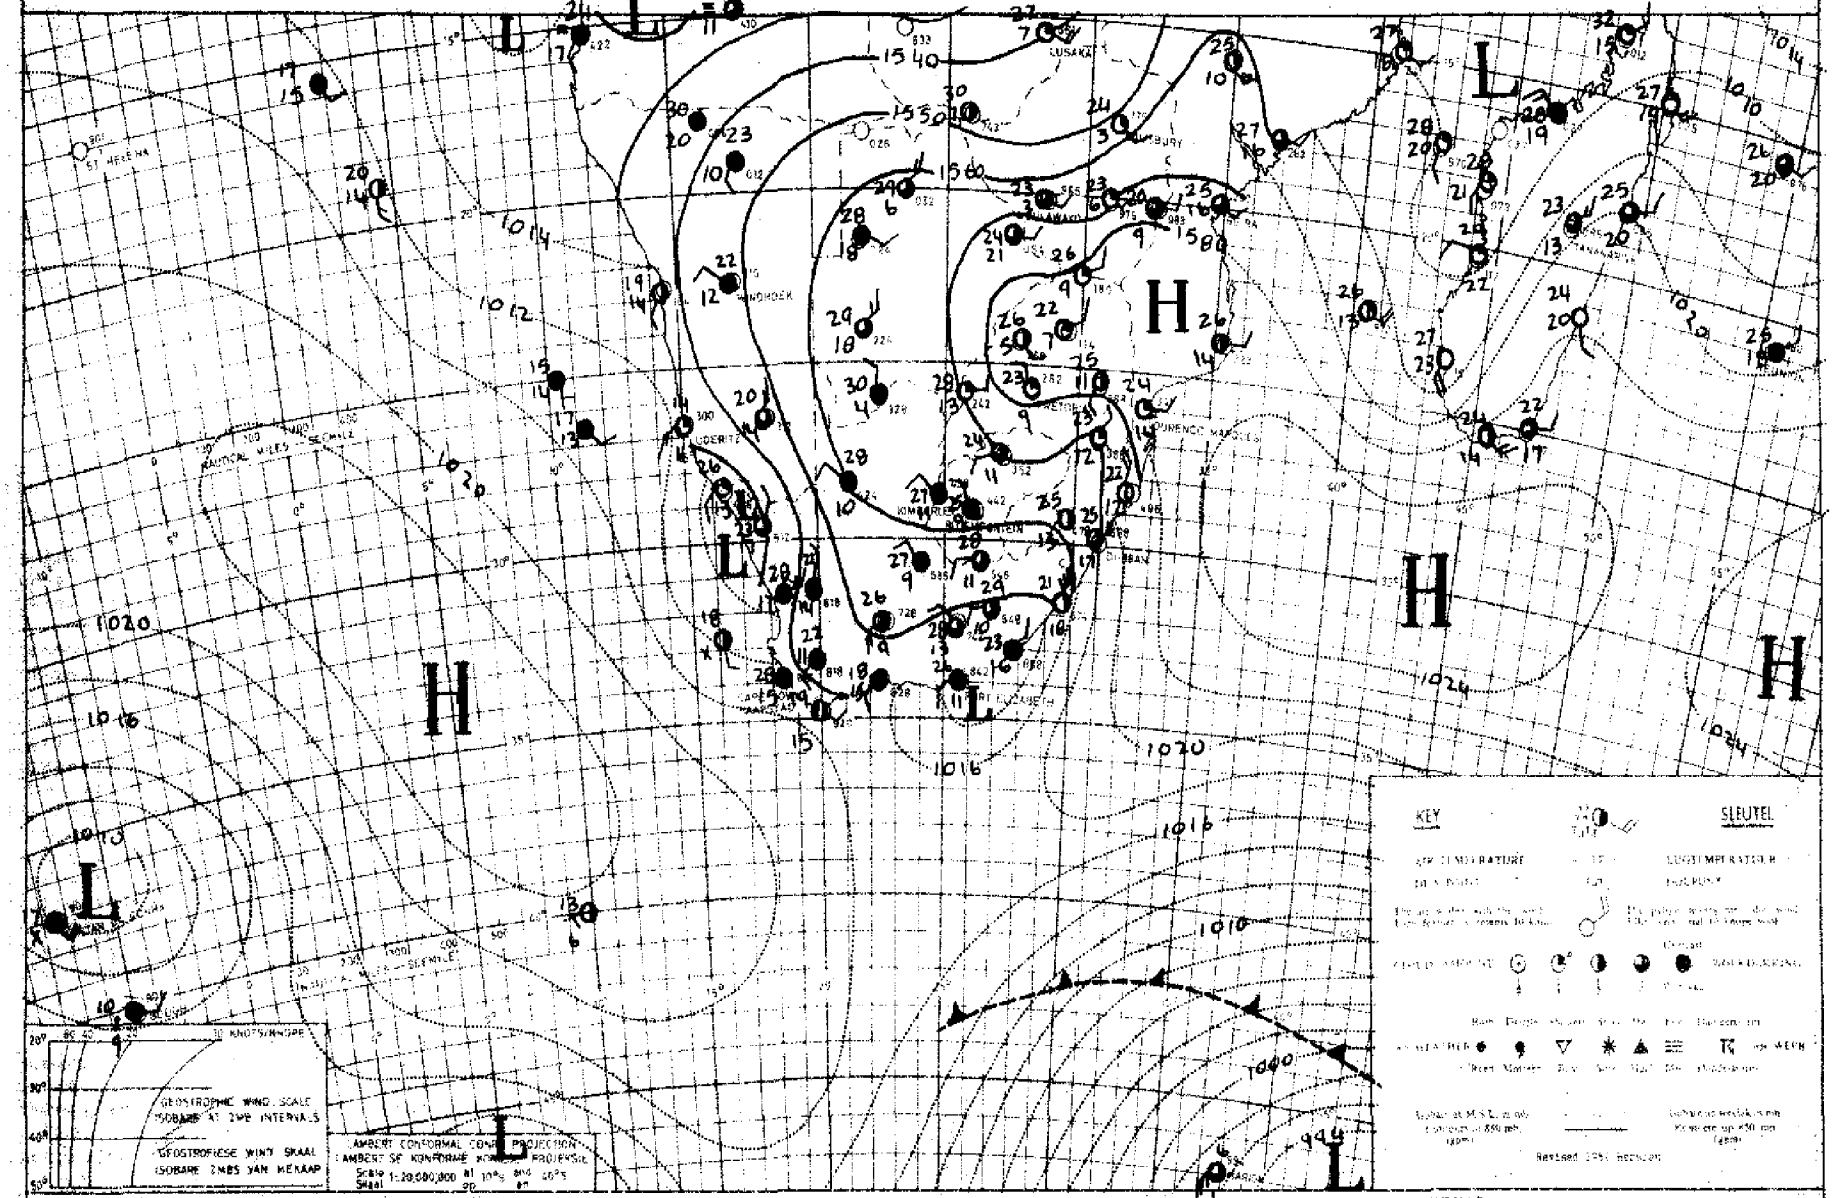
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 19 -10- 1970 DATUM AFLEIDING

A low pressure system on the surface and in the upper air is situated on the west coast and warm, moist air is flowing over S.W.A., the Cape Province and the southern Free State. As a result scattered thundershowers will occur over these regions and spread later to the rest of the Free State and southern Transvaal.

'n laedrukstelsel aan die oppervlakte en in die bolug is oor die weskus aanwesig en warm, vogtige lugstroom oor S.W.A., die Kaapprovinsie en die Suid-Vrystaat. Gevolglik sal verspreide donderbuie oor hierdie gebiede voorkom en later uitbrei oor die hele Vrystaat en Suid-Transvaal.

DAAGLIKSE WEERBULLETIN

The low pressure system in the upper air has weakened and therefore only isolated light showers are expected over Eastern Cape, Natal and the southern Free State. The cold front approaching from the west will bring cloudy weather with showers to the south-western and southern Cape coastal regions.

Die laedrukstelsel in die bolug het baie verswak en dus word enkele ligte buie nog net oor Oos-Kaapland, Natal, en Suid-Vrystaat verwag. Die kouefront wat van die weste af nader kom, sal bewolkte weer met buie aanbring oor die suid-westelike en suidelike Kaapse kusgebiede.

With a ridge of the Atlantic High behind the cold front cloudy and cooler conditions with isolated showers will spread to the Natal coast. It will also be cloudy and cooler over the southern Cape Province, the Natal interior and over the Transvaal Lowveld. Over the remainder of the country it will be fine to partly cloudy and warm to hot.

Die kouefront word gevolg deur 'n rug van die Hoog, gevolglik sal bewolkte, koeler toestande met enkele buie na die Natalse kus uitbrei. Dit sal ook bewolk wees oor Suid-Kaapland, Natalse binneland en oor die Transvaalse Laeveld. Oor die res van die land sal dit mooi weer of gedeeltelik bewolk en warm tot heet

AFLEIDING
The cell of high pressure moving in south of the country, together with the trough of low pressure over the interior will cause scattered thundershowers to occur over the Transvaal, Natal and Free State.
Die sel van hoë druk wat suid van die land inbeweeg, tesame met die binnelandse trog van lae lugdruk, sal ver spreide donderbuie laat voorkom oor Transvaal, Natal en die Vrystaat.

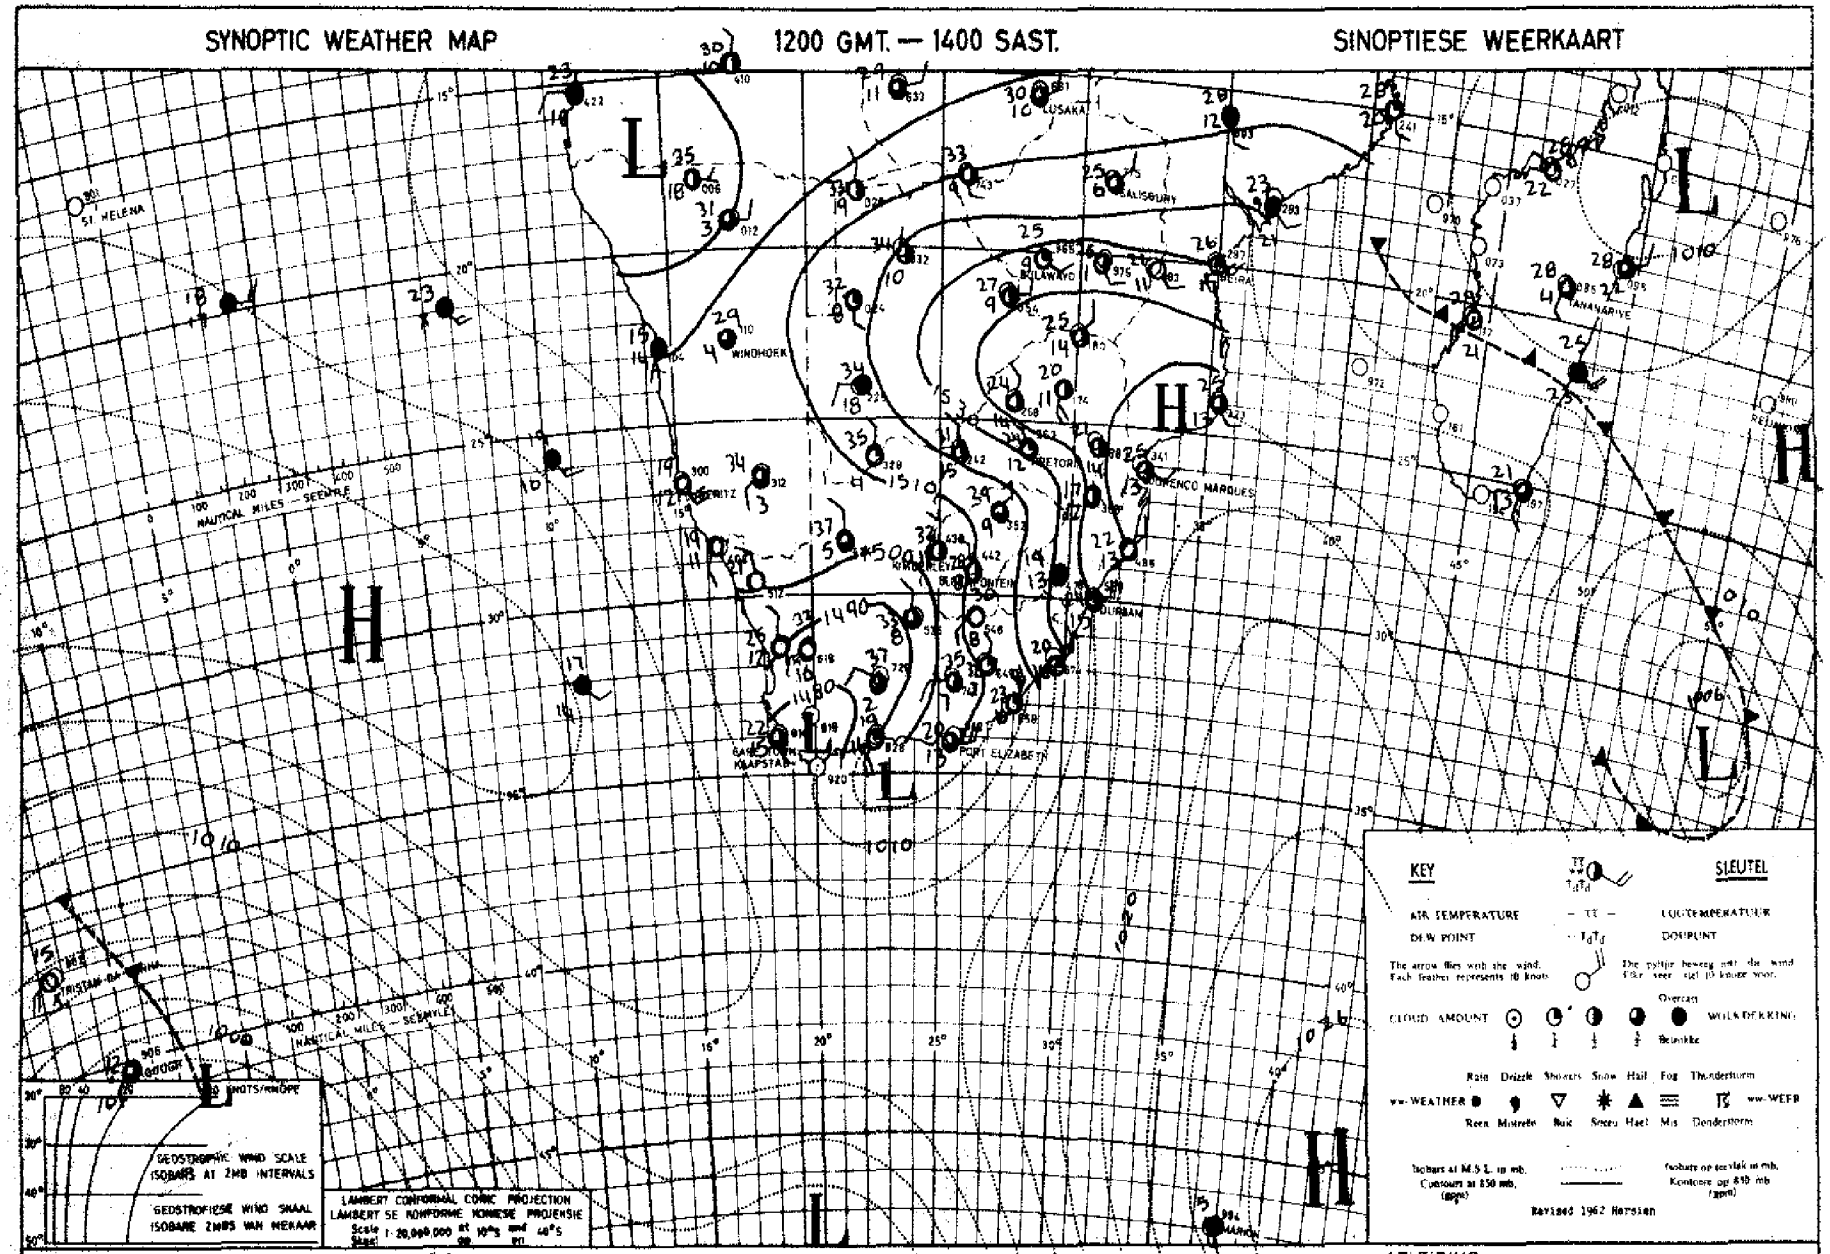
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 25-10-1970 DATUM AFLEIDING

The low pressure system on the south coast will move eastwards along the coast, followed by cooler, cloudy weather. The low pressure trough over the interior will also move eastwards and thundershowers will occur over the area to the east of it.

Die laedrukstelsel aan die suidkus sal ooswaarts langs die kus beweeg, gevolg deur koeler, bewolkte weer. Die laedruktrog oor die binneland sal ook ooswaarts beweeg en donderbuie sal voorkom oor die gebiede wat daarvan gelee is.

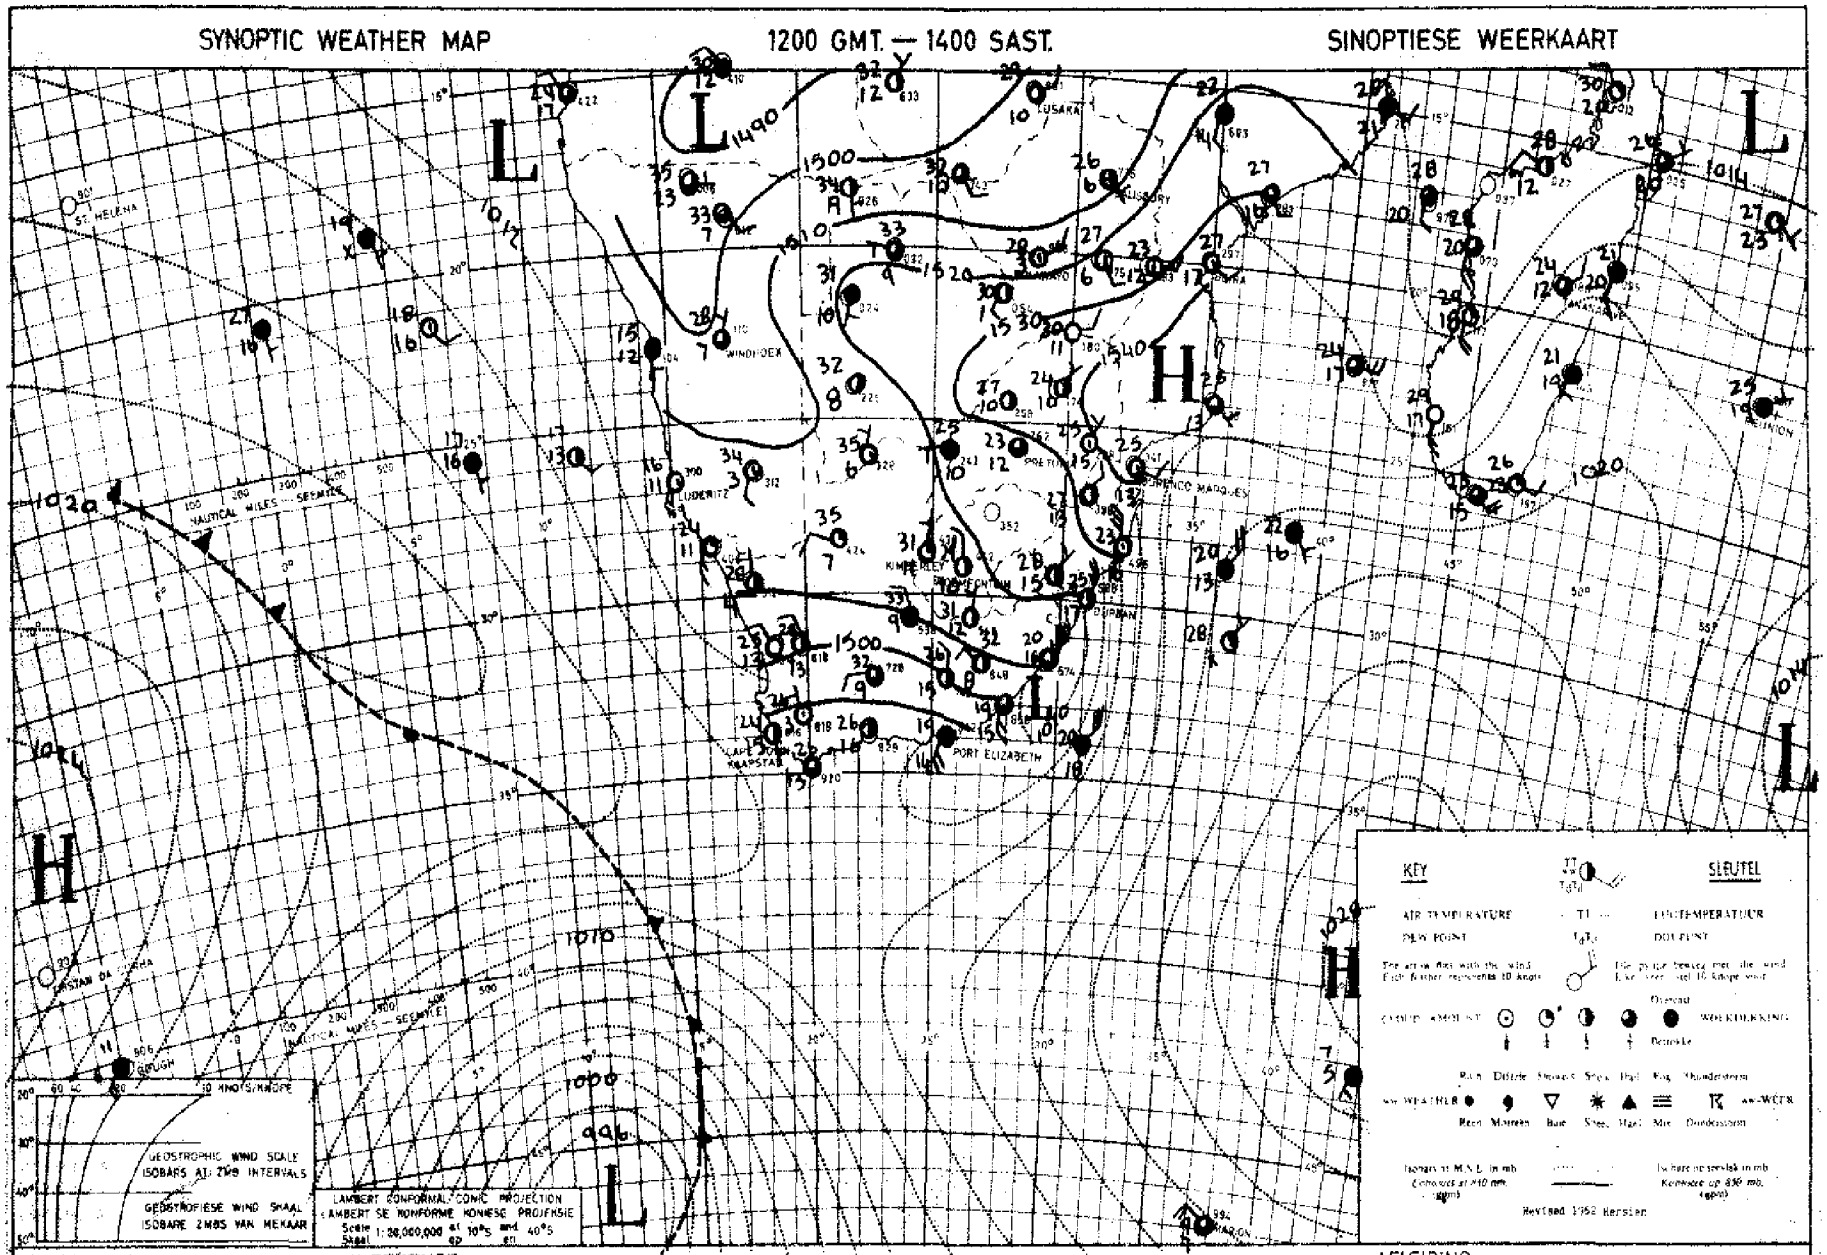
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 26-10-19 70 DATUM — AFLEIDING

A general trough of low pressure extends from S.W.A. towards the south-east coast and therefore thunder-showers will occur over Natal, the Free State, Northern and Eastern Cape and the southern parts of Transvaal as well as Botswana and S.W.A.

'n Algemene trog van lae lugdruk strek vanaf S.W.A. na die suidooskus en dus sal donderbuie voorkom oor Natal, die Vrystaat, Noord-en Oos-Kaapland en die suidelike dele van Transvaal asook oor Botswana en S.W.A.

The trough of low pressure extending from Windhoek south-eastwards will cause thundershowers over northern S.W.A., Botswana, Northern and Eastern Cape, Natal, the Free State and southern Transvaal. The cold front west of Cape Town will cause cooler, cloudy weather to spread over the southern and eastern Cape and later also over Natal.

Met die laedruktrog wat vanaf Windhoek suidoostwaarts uitstrek sal donderbuie voorkom oor noordelike S.W.A., Botswana, Noord-en Oos-Kaapland, Natal, die Vrystaat en Suid-Transvaal. Die kouefront wes van Kaapstad sal koeler, bewolkte weer met reën laat uitbrei oor die suidelike en oostelike dele van Kaapland en later ook oor Natal.

A low pressure trough extends from S.W.A. to southern Transvaal and thundershowers will occur over the areas east of the trough. The high pressure system ridging in south of the continent will cause cooler, cloudy weather with light rain to advance over the Eastern Cape, Natal and later over Eastern Transvaal.

'n Laedruktrog strek van S.W.A. na Suid-Transvaal en donderbuie sal voorkom oor die gebiede oos en noord daarvan. Die hoëdrukstelsel beweeg suid van die land in en koeler, bewolkte weer met ligte reën sal oor Oos-Kaapland, Natal en later oor Oos-Transvaal uitbrei.

The high south of the continent will feed in moist air over the eastern parts of the country where it will be cloudy with light rain. Several low pressure systems over the western and central regions will cause scattered showers and thundershowers over these regions.

Die hoog suid van die land sal vogtige lug laat instroom oor die oostelike dele van die land waar dit dus bewolk sal wees met ligte reën. Verskeie laedrukstelsels oor die westelike en sentrale dele sal veroorsaak dat verspreide buie en donderbuie oor daardie gebiede sal

With the trough of low pressure over the interior, scattered thundershowers are expected over the northern, central and eastern areas of the country. The low on the south coast is moving eastwards and is followed by cooler, cloudy weather along the coast.

Met die trog van lae druk oor die binneland word verspreide donder buie verwag oor die noordelike, sentrale en oostelike dele van die land. Die laag aan die suidkus beweeg ooswaarts en word gevolg deur koeler, bewolkte weer langs die kus.

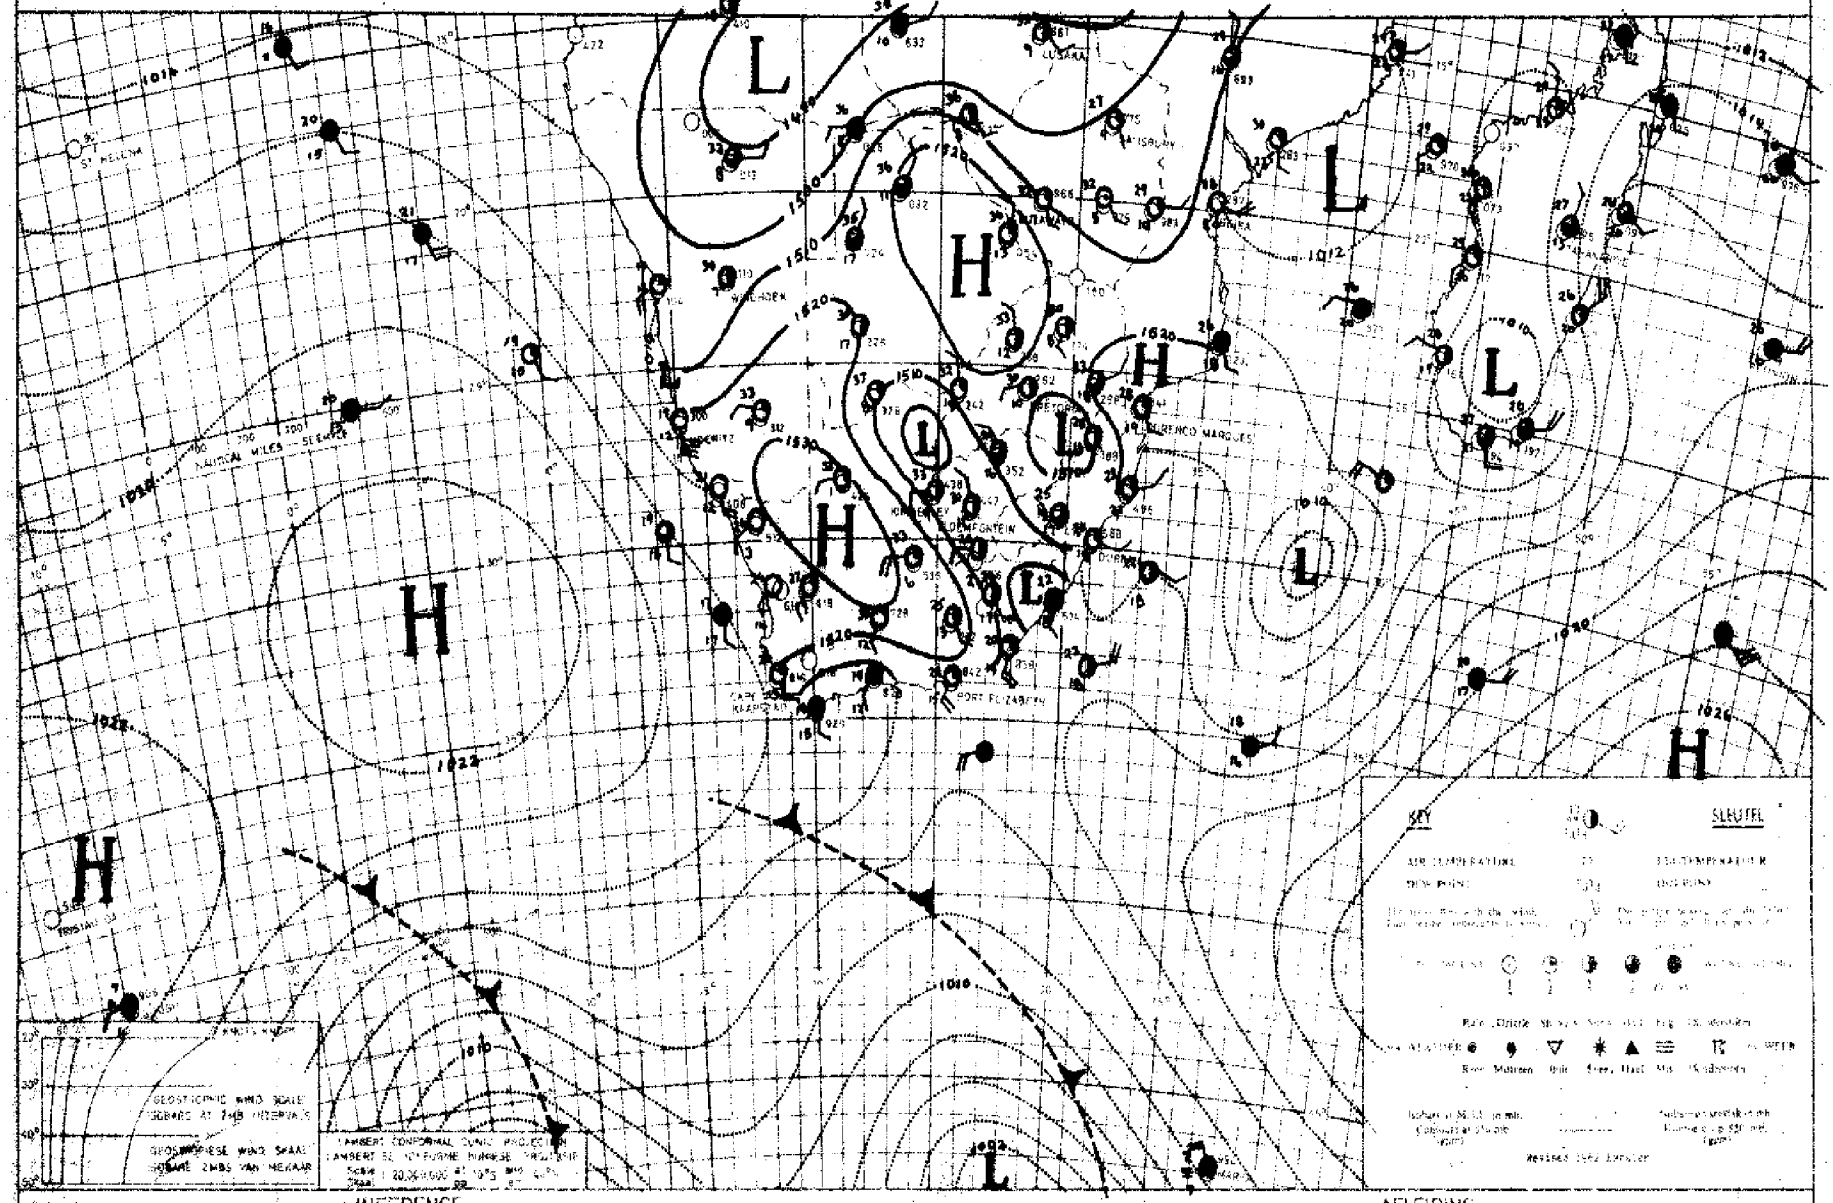
SYNOPTIC WEATHER MAP — 1200 GMT — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 31 - 10 - 70 DATUM — AFLEIDING

The trough over the interior has moved somewhat to the east but scattered showers will still occur over the areas to the east. The cold fronts passing south of the continent will have little influence on the weather along the coasts.

Die binnelandse trog het effens oosweerts beweeg maar verspreide buie sal nog voorkom oor die gebiede oos daarvan. Die koufronte wat suid van die land verby beweeg, sal min invloed hê op die weer langs die kus.

INFERENCE

DATE 1-11-19 79 DATUM

AFLEIDING

With the low pressure system now over the eastern interior, showers are expected only over Natal, Transvaal, Northern Free State and Northern Cape. With the passage of a cold front, cloudy weather with light rain will spread over the southern and south-eastern coastal regions.

Met die laedrukstelsel nou oor die oostelike binneland, word buie slegs oor Natal, Transvaal, Noord-Vrystaat en Noord-Kaapland verwag. Met die verbygang van 'n koufront sal bewolkte weer met ligte reën oor die suid- en suidooskus intree.

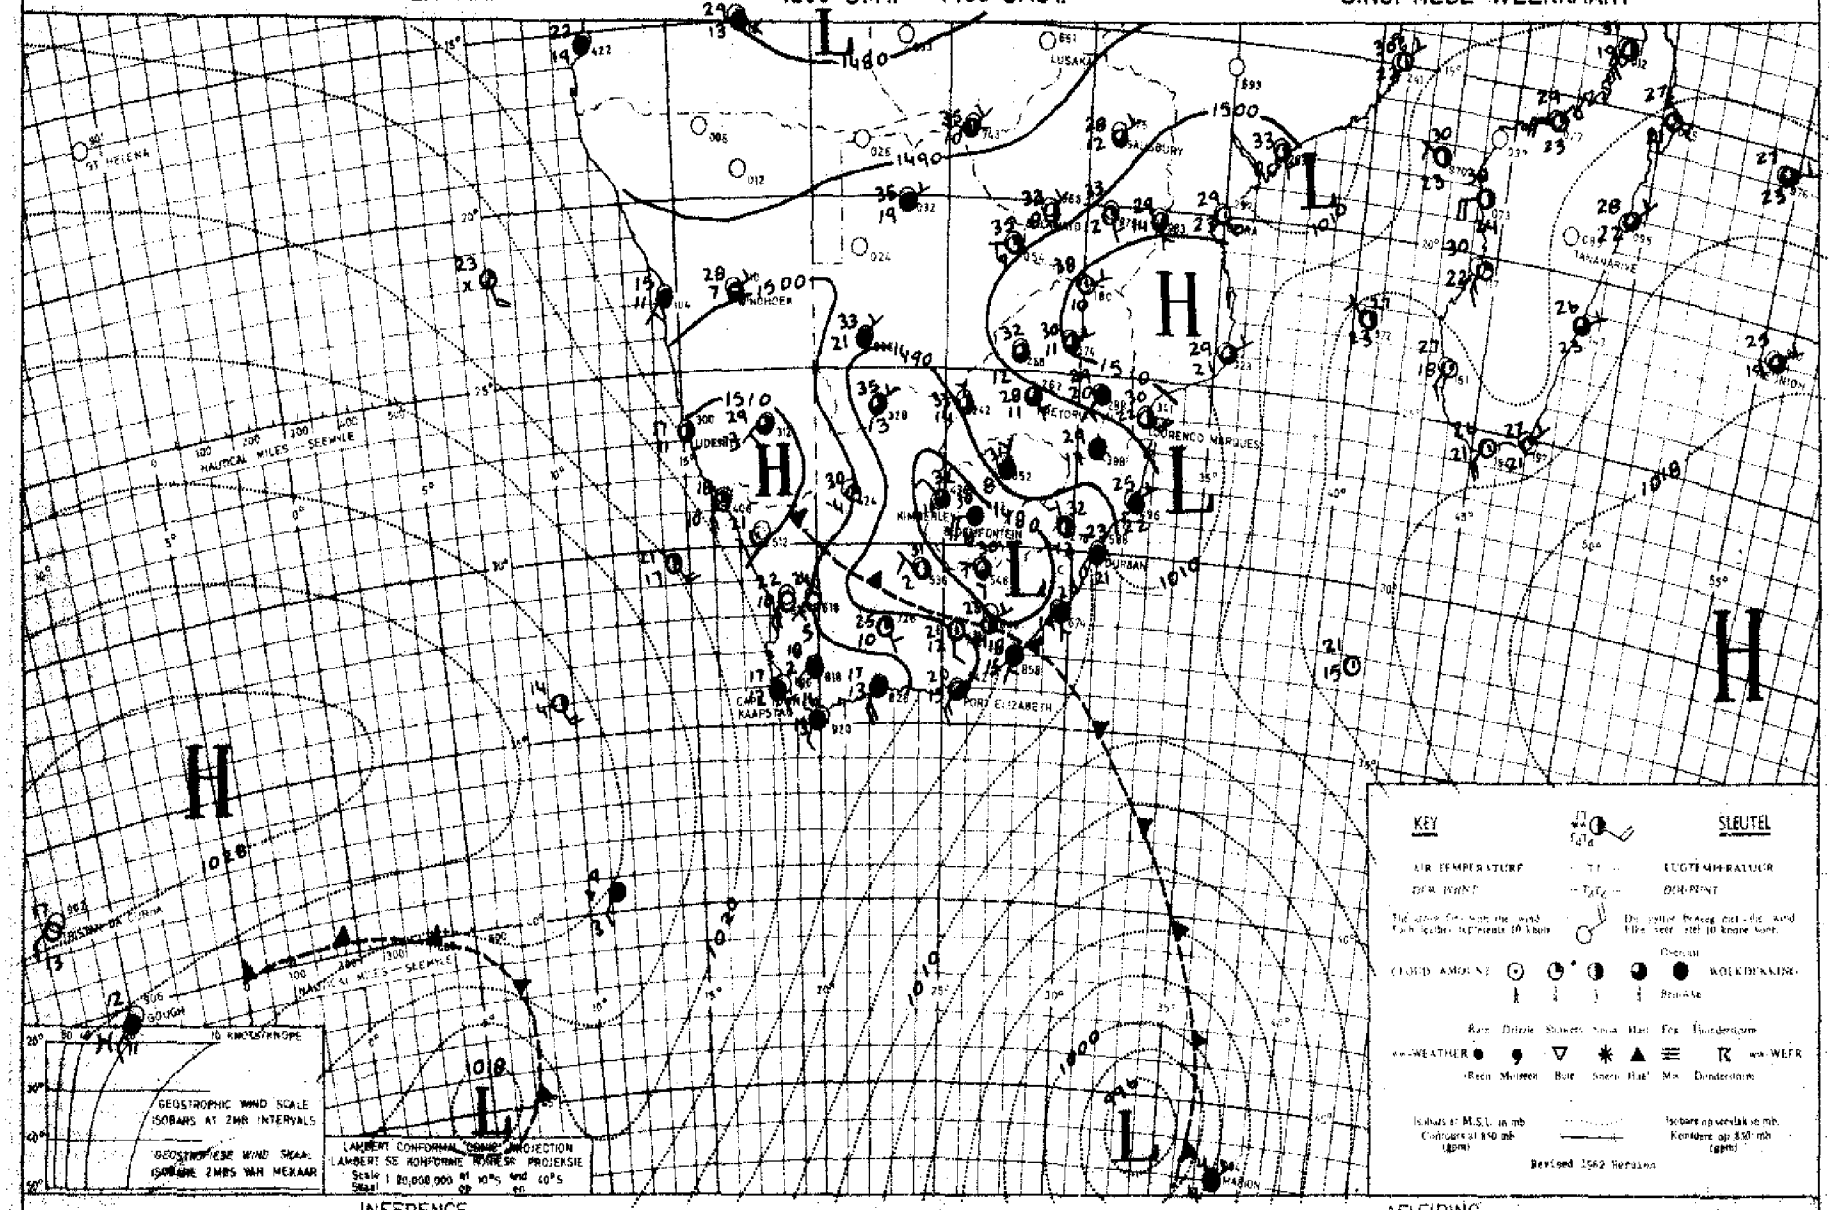
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 2-11-19.70 DATUM AFLEIDING

Cloudy and cooler conditions with rain and showers behind the cold front will move around the coast, spreading to the Eastern Transvaal Lowveld later. Cloudy conditions will also occur over the southern parts of the interior but drier air is moving in over the western parts of the country. Showers or thunderstorms will recur elsewhere over the interior.

Bewolkte, koeler weer met reën en buie sal om die kus beweeg en later ook oor die Oos-Transvaalse Laeveld insloot terwyl bewolkte toestande ook oor die suidelike helfte van die binneland sal voorkom. Droër lug beweeg in oor die westelike dele van die land maar oor die res van die binneland sal buie en donderbuie nog ontwikkel.

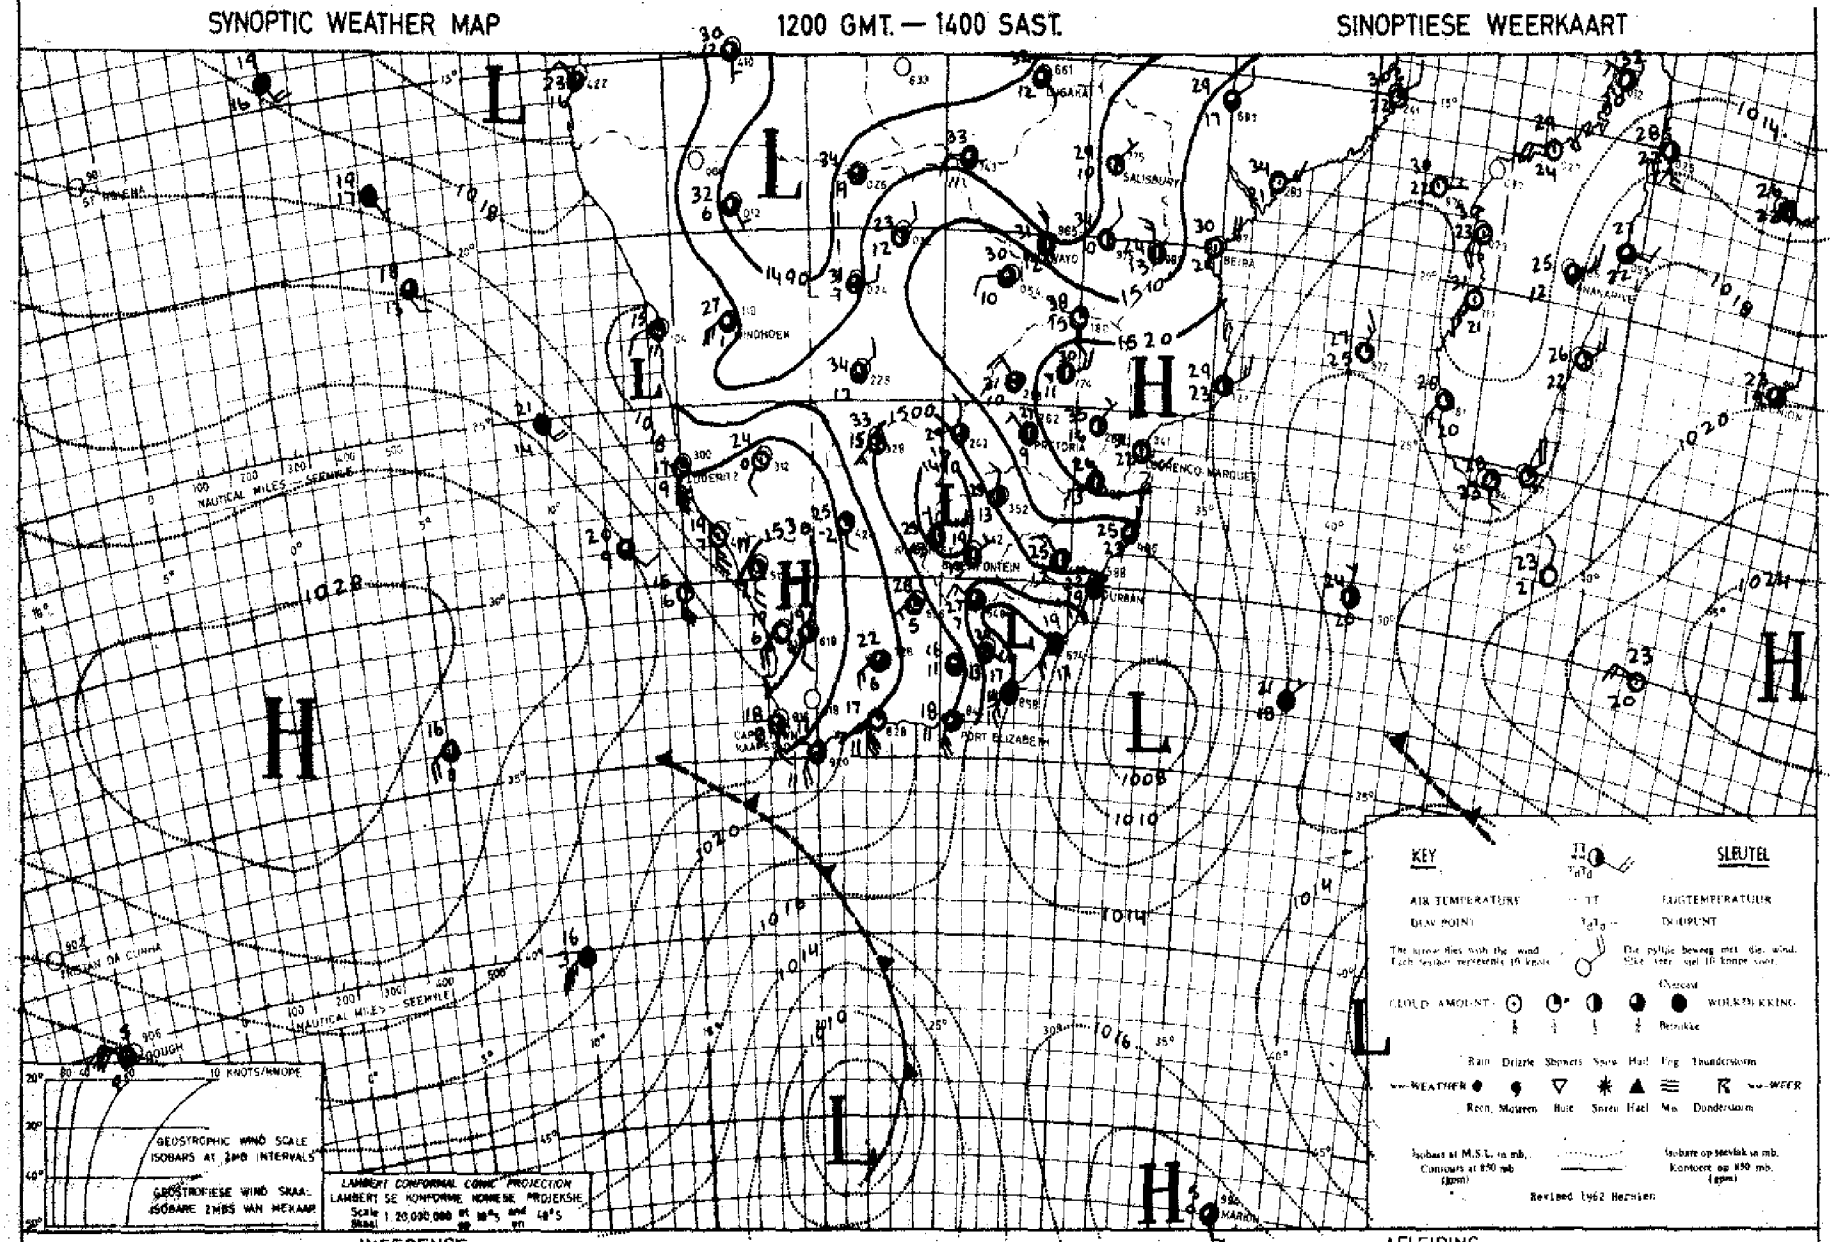
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 3-11-19-70 DATUM — AFLEIDING

The trough of low pressure extending over the interior from the south-east coast will move somewhat to the east, but scattered showers will still occur over most regions, except the western half of the Cape Province and southern S.W.A.

Die trog van lae lugdruk wat vanaf die suidooskus oor die binneland strek, sal effens ooswaarts beweeg maar verspreide buie sal nog voorkom oor die meeste gebiede, uitgesonderd die westelike helfte van Kaapland en suidelike S.W.A.

The cold front passing south of the continent will cause cloudy weather with light rain over the southern and eastern coasts. East of the low over the interior there will be scattered showers but over the western and central regions the weather will be fair as a result of the high over these regions.

Die koufront wat suid van die land verby beweeg, sal bewolkte weer met ligte reën langs die suid- en ooskus veroorsaak. Oos van die laag oor die binneland sal verspreide buie nog voorkom maar oor die westelike en sentrale dele sal dit mooiweer wees as gevolg van die hoog oor die gebiede.

The upper-air flow over the Republic is intensely anticyclonic and, although the air over the eastern parts is fairly moist, there will be little or no precipitation.

Die bolugsTroming oor die Republiek is sterk antisiklonaal en, hoewel die lug redelik vogtig is oor die oostelike dele, sal daar min of geen neerslag wees nie.

INFERENCE

DATE 7.../11/...1970 DATUM

AFLEIDING

The cold front approaching from the west will cause cloudy weather with showers over the south-west coast and later also over the southern and eastern coastal regions. Over the rest of the country it will be partly cloudy and warm with only isolated thundershowers over the eastern areas.

Die koue front wat van die weste nader, sal bewolkte weer met buie oor die suidweskus veroorsaak en later ook oor die suidelike en oostelike kusstreke. Oor die res van die land sal dit gedeeltelik bewolk en warm wees met slegs enkele donderbuie oor die oostelike dele.

Behind the cold front a high is rapidly moving in south of the continent so that cool, moist air will spread over Eastern Cape, Natal and Eastern Transvaal where it will be cloudy with rain. Over the rest of the Transvaal and the Northern Free State scattered thundershowers will occur to the development of a low over the central interior.

Agter die koufront stoot 'n hoog vinnig suid van die land in sodat koel, vogtige lug sal uitbrei oor Oos-Kaapland, Natal en Oos-Transvaal waar dit bewolk sal wees met reën. Oor die res van Transvaal en Noord-Vrystaat sal verspreide donderbuie voorkom weens die ontwikkeling van 'n laag oor die sentrale binneland.

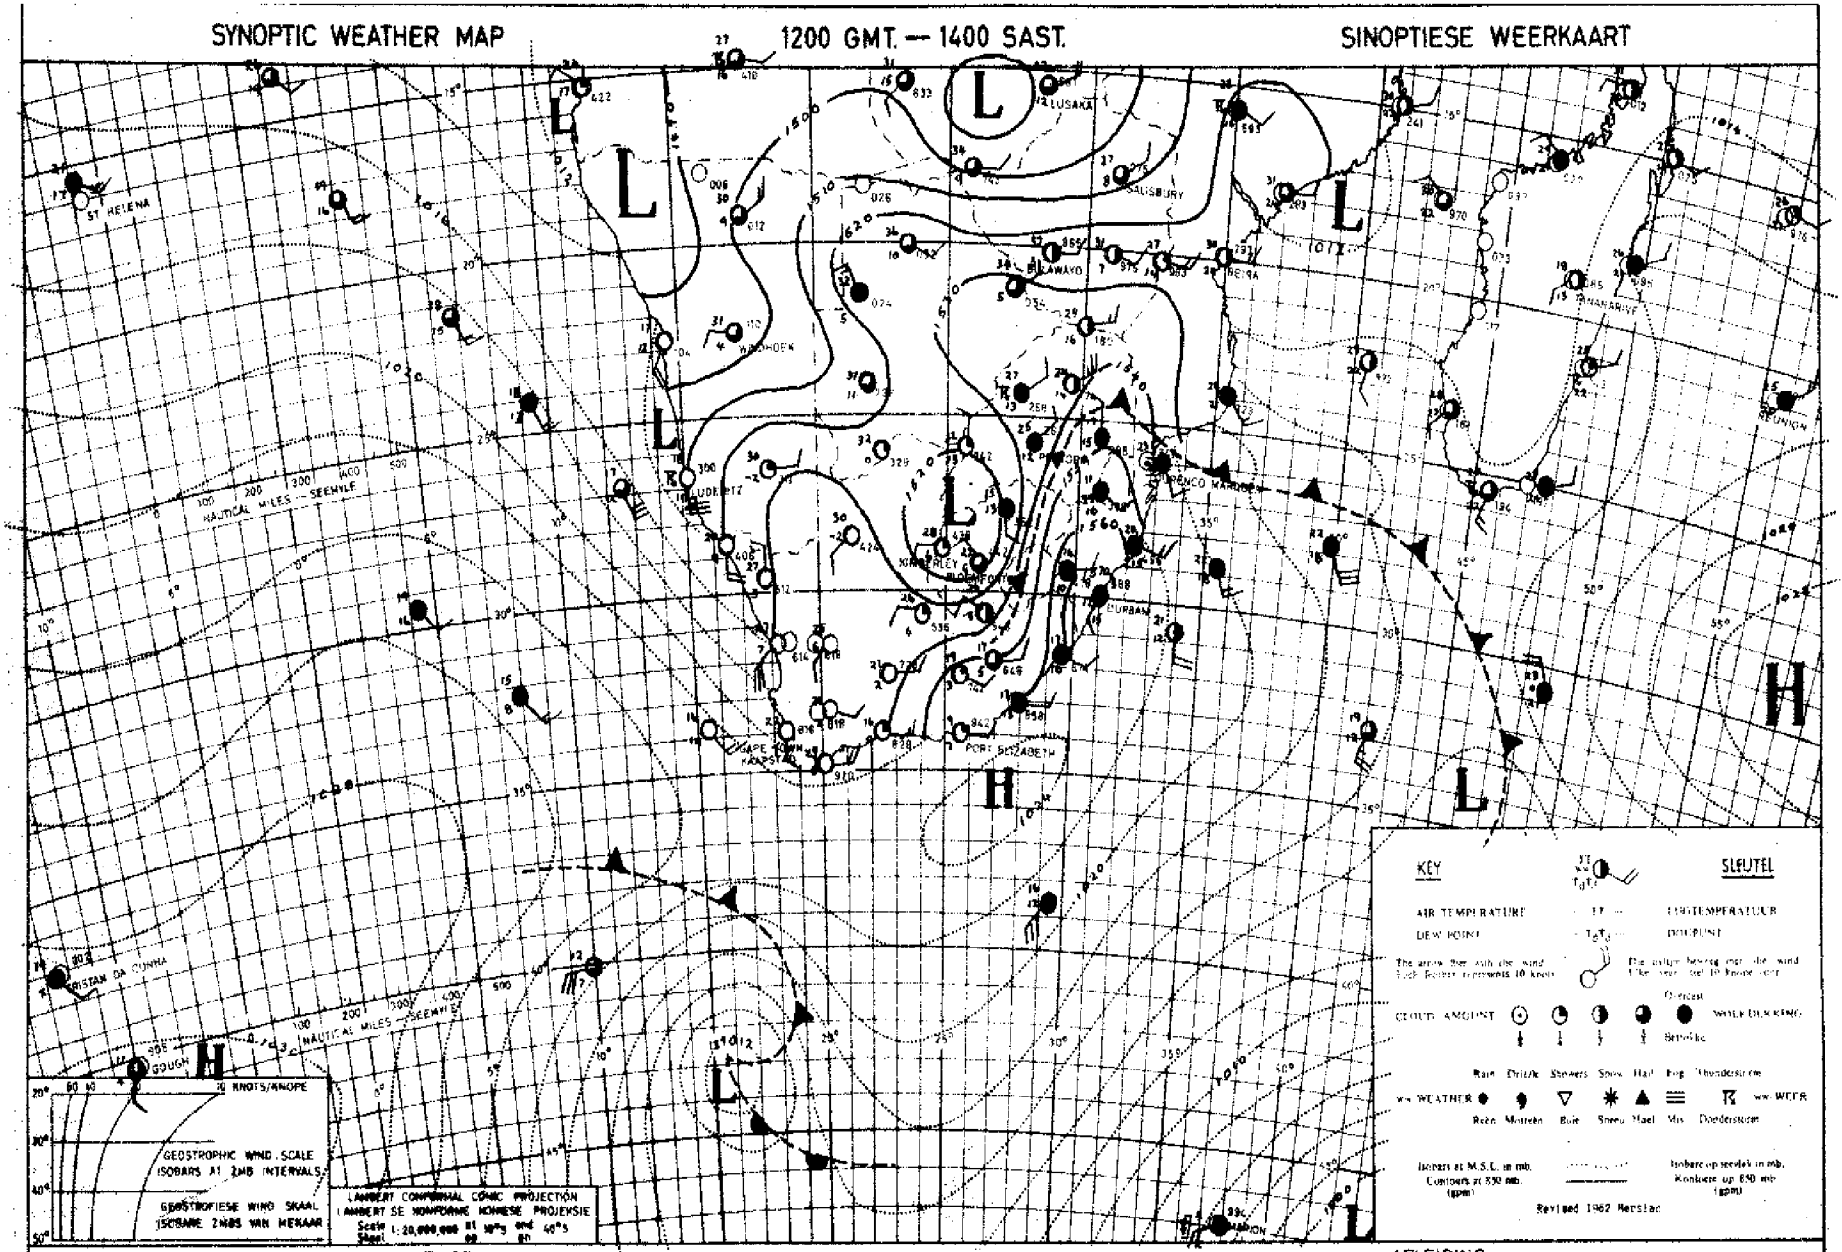
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE

DATE 9 - 11 - 1970 DATUM

AFLEIDING

The high which is moving in over the eastern parts of the country is causing an inflow of cool moist air over Transvaal and the Northern Free State, while there is a low over the central interior. Consequently rain and showers are expected over the abovementioned areas.
The low approaching from the south-west will again cause cloudiness with light rain over the south coast.

Die hoëdrukstelsel wat oor die oostelike dele van die land instoot, veroorsaak 'n invloei van koel vogtige lug oor Transvaal en die Noord-Vrystaat. Terselfdertyd is daar 'n laedrukstelsel oor die sentrale binneland en daarom word reën en buie verwag oor bogenoemde gebiede. Die laag wat uit die suidweste nader, sal weereens bewolkthaid met ligte reën oor die suidkus veroorsaak.

Cloudy cooler weather with rain or showers will spread a-round the coast, also reaching the Transvaal Lowveld. With favourable conditions over the eastern parts of the interior, thundershowers will develop over the Transvaal, the Free State, Natal, the Vryburg - Mafeking area, the North-eastern parts of S.W.A.

Bewolkte, reënerige toestande sal ooswaarts om die kus uitbrei en ook die Transvaalse Laeveld bereik. Met gunstige toestande oor die oostelike dele van die binneland kan donderbuie verwag word oor Transvaal, Vrystaat, Natal, Vryburg - Mafekinggebied asook noordoostelike S.W.A. en Botswana.

The low over the central interior has weakened and therefore only isolated showers are expected over the eastern half of the country. The trough over S.W.A. and Western Cape is, however, deepening and scattered showers are forecast for these areas.

Die laag oor die sentrale binneland het baie verswak en dus word slegs enkele buie oor die oostelike helfte van die land verwag. Die trog oor S.W.A. en Wes-Kaapland is egter aan verdiep en verspreide buie word vir hierdie streke voorspel.

INFERENCE

DATE 13 - 11 - 70 19 DATUM

AFLEIDING

With low pressure systems over Western and Southern Cape, showers will occur in the moist air mass over the areas to the east. Little or no development will take place over Transvaal where the circulation is becoming anticyclonic.

Met laedrukstelsels oor Wes- en Suid-Kaapland sal buie voorkom in die vogtige lugmasse oor die gebiede oos daarvan. Min of geen ontwikkeling word egter verwag oor Transvaal waar die sirkulasie antisiklonaal word.

A high pressure system is ridging in over the country from the west causing the weather to clear over most areas. Cooler, cloudy weather will, however, develop over the south-western Cape coast as a result of the front approaching from the west.

'n Hoëdrukstelsel druk van die weste af in oor die land en die weer sal oor die meeste dele opklaar. Koeler, bewolkte weer sal egter weer oor die Kaapse suidweskus ontwikkel weens die front wat van die weste af nader.

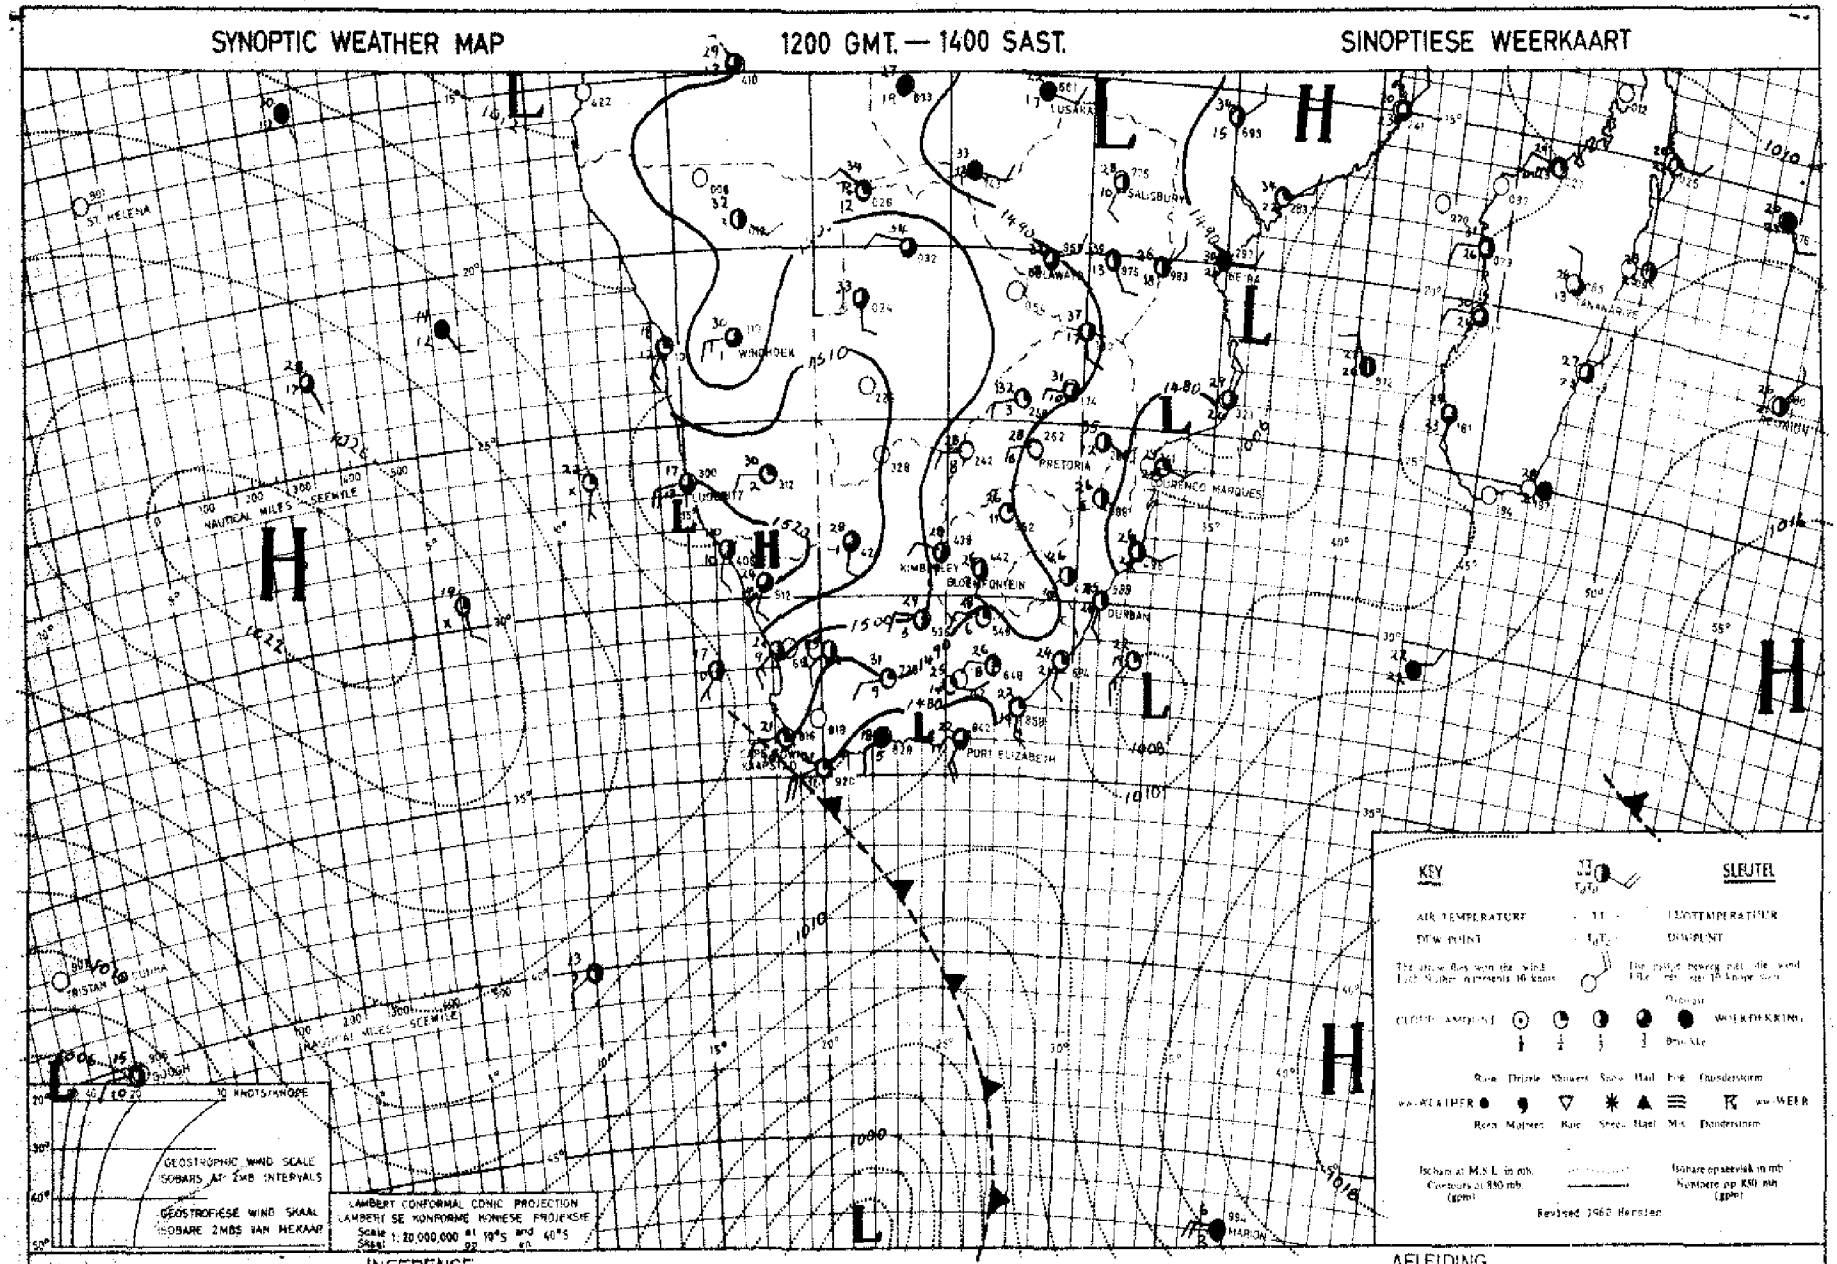
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 15 11 1974 DATUM AFLEIDING

The high which has moved in over the country from the west has caused dry air to spread over nearly all parts of the interior. The cold front at Cape Town will advance eastwards along the coast, accompanied by cloudiness and light showers.

Die hoog wat van die weste af oor die land inbeweeg het, het droë lug oor feitlik alle dele van die binneland laat uitbrei. Die koufront by Kaapstad sal oostwaarts langs die kus beweeg, gepaard met bewolktheid en ligte buie.

DAAGLIKSE WEERBULLETIN

Maksimum en Minimum Temperatuur (°C) en Reënval (RRR) in mm vir die 24 uur geëindig om 0800 SAST op

SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST. SINOPTIESE WEERKAART

INFERENCE DATE 18 - 11 - 1970 DATUM AFLEIDING

A cold front approaching from the west will cause light rain over the South-west Cape and along the South coast. With favourable conditions still over the eastern parts of the country, thunderstorms will recur over the Transvaal, Northern Free-State, Natal, the Mafeking area and the northeastern regions of S.W.A. and Botswana.

Die koufront sal ligte reën oor Suidwes-Kaapland en die Kaapse Suidkus veroorsaak. Met gunstige toestande oor die oostelike dele van die land, sal donderbuie voorkom oor die Transvaal, Noordelike Vrystaat, Natal, die Mafekinggebied en die noordoostelike streke van Suidwes-Afrika en Betswana.

INFERENCE

DATE 19-11-1970 DATUM

AFLEIDING

Behind the cold front cool cloudy weather with showers will advance over Eastern Cape, Natal and Eastern Transvaal. Scattered thundershowers will occur in the warm, moist air over the rest of Transvaal, northern Botswana and north-eastern S.W.A., but the high over the rest of the country will maintain fine weather over these regions.

Agter die koufront sal koel bewolkte weer met buie uitbrei oor Oos-Kaapland, Natal en Oos-Transvaal. Verspreide donderbuie sal voorkom in die warm, vogtige lug oor die res van Transvaal, noordelike Botswana en noordoostelike S.W.A., maar die hoog oor die res van die land sal mooiweers-toestande laat voortduur.

INFERENCE

DATE 20 - 11 - 1970 DATUM

AFLEIDING

The ridge of high pressure moving in south of the country will cause cloudy weather to persist over Natal and to spread over the Transvaal, but the upper-air flow is intensely anticyclonic so that little development will take place. Over the rest of the country it will remain fine.

Die rug van hoë druk wat suid van die land instoot, sal bewolkte weer oor Natal laat voortduur en ook oor Transvaal laat uitbrei, maar die bolugstroming is sterk antisiklonaal sodat min ontwikkeling sal plaasvind. Oor die res van die land sal dit mooiweer bly.

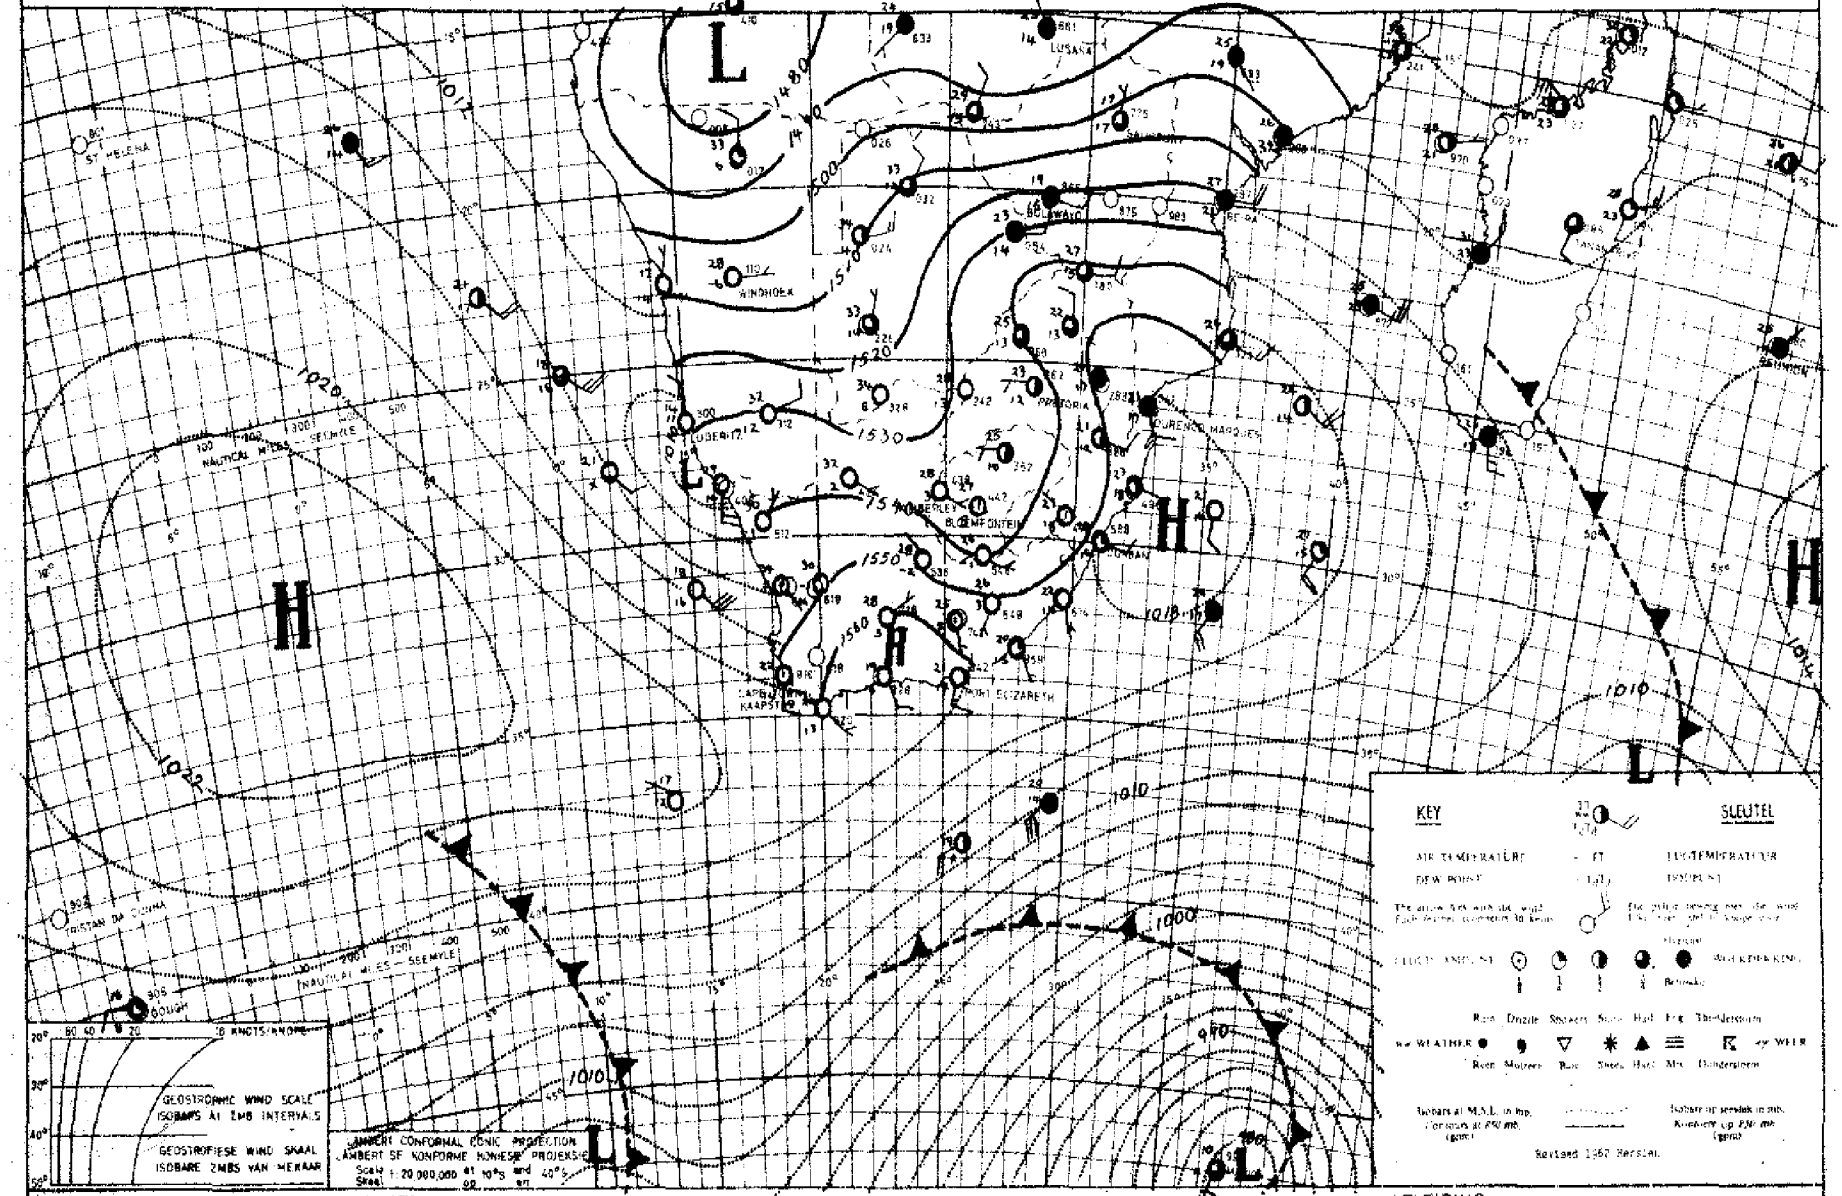
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 21 - 11 - 1970 DATUM AFLEIDING

East of the trough of low pressure, which extends from South West Africa to the central Free State, the air is reasonably moist so that intense heating by day will cause isolated thundershowers. Elsewhere there will be little change in the settled conditions.

Oos van die trog van lae druk wat van Suidwes-Afrika na die sentrale Vrystaat strek, is daar redelike vogtige lug waarin enkele donderbuie sal voorkom as gevolg van die strawwe hitte gedurende die dag. Elders sal daar min verandering wees in die heersende bestendige toestande.

INFERENCE

DATE 22-11-1970 DATUM

AFLEIDING

With only a broad trough south of the country, little change is expected on the coast. Moist air over the northern and eastern parts of the interior is being advected southwards and consequently an increase may be expected in thunder activity over the northern, central and eastern interior.

Met slegs 'n bree trog suid van die land word weinig verandering oor die kusstreke verwag. Vogtige lug oor die noordelike en oostelike binneland beweeg suidwaarts sodat 'n toename in donderaktiwiteit verwag kan word oor die noordelike, sentrale en oostelike dele van die binneland.

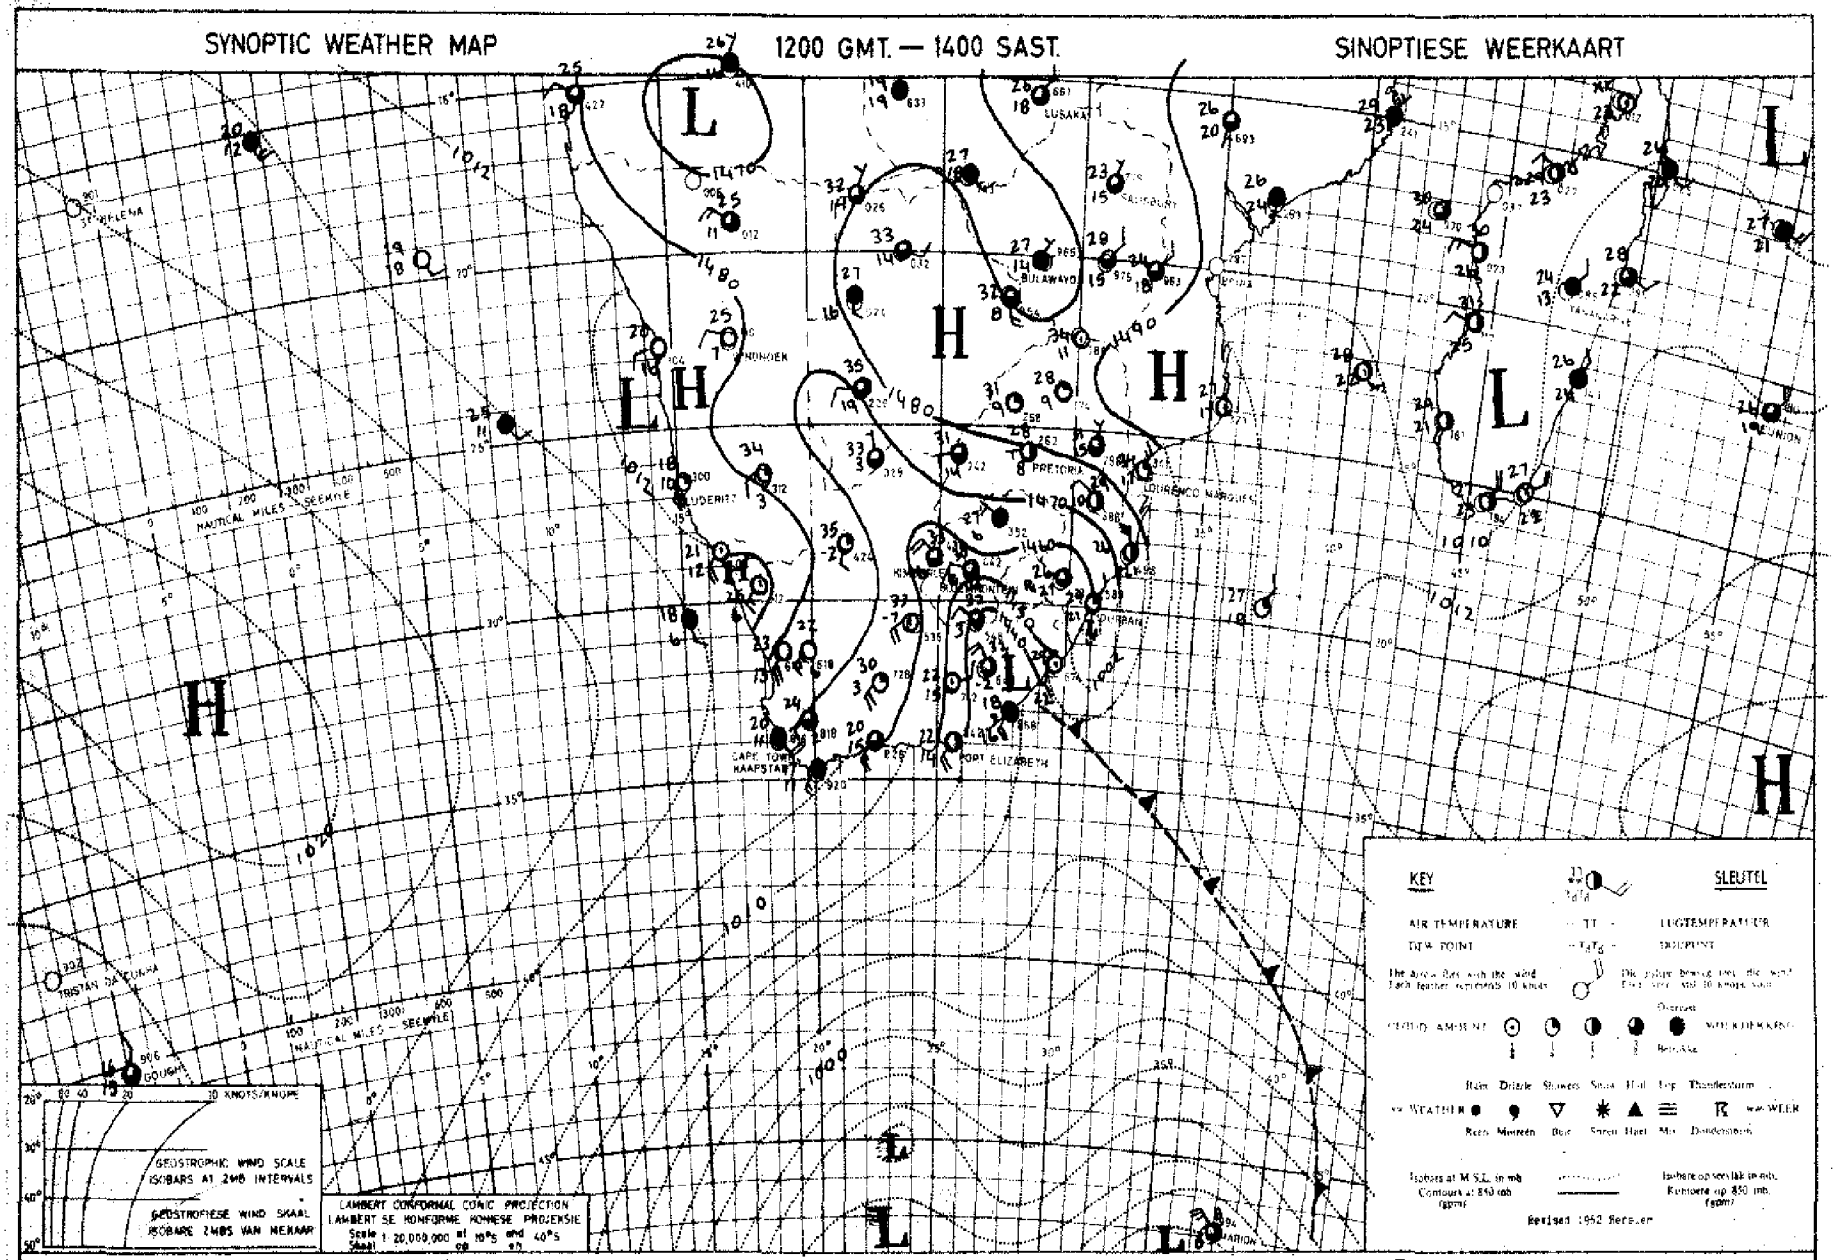
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 23-11-19.79 DATUM AFLEIDING

With a trough over the central interior and a ridge moving around the south-east coast, further showers and thundershowers will occur over the central, northern and eastern parts of the country. The low over Northern S.W.A. will cause thundershowers over the northern half of this territory.

Met 'n trog oor die sentrale binneland en 'n rug wat om die suidoos kus beweeg sal verdere buie en donder buie oor die sentrale, noordelike en oostelike dele van die land voorkom. Die laedruk oor Noord-S.W.A. sal donderbuie oor die noordelike helfte van hierdie gebied veroorsaak.

INFERENCE

DATE 24-11-19.7.0 DATUM

AFLEIDING

A trough is still situated over the central interior while humid air on the surface is moving in over the north-eastern areas. Thundershowers and showers will occur over the northern and north-eastern parts.

'n Trog is nog steeds aanwesig oor die sentrale binneland terwyl vogtige lug aan die oppervlakte oor die noordoostelike dele inbeweeg. Donderbuie en buie sal weereens oor die noordelike en noordoostelike dele voorkom.

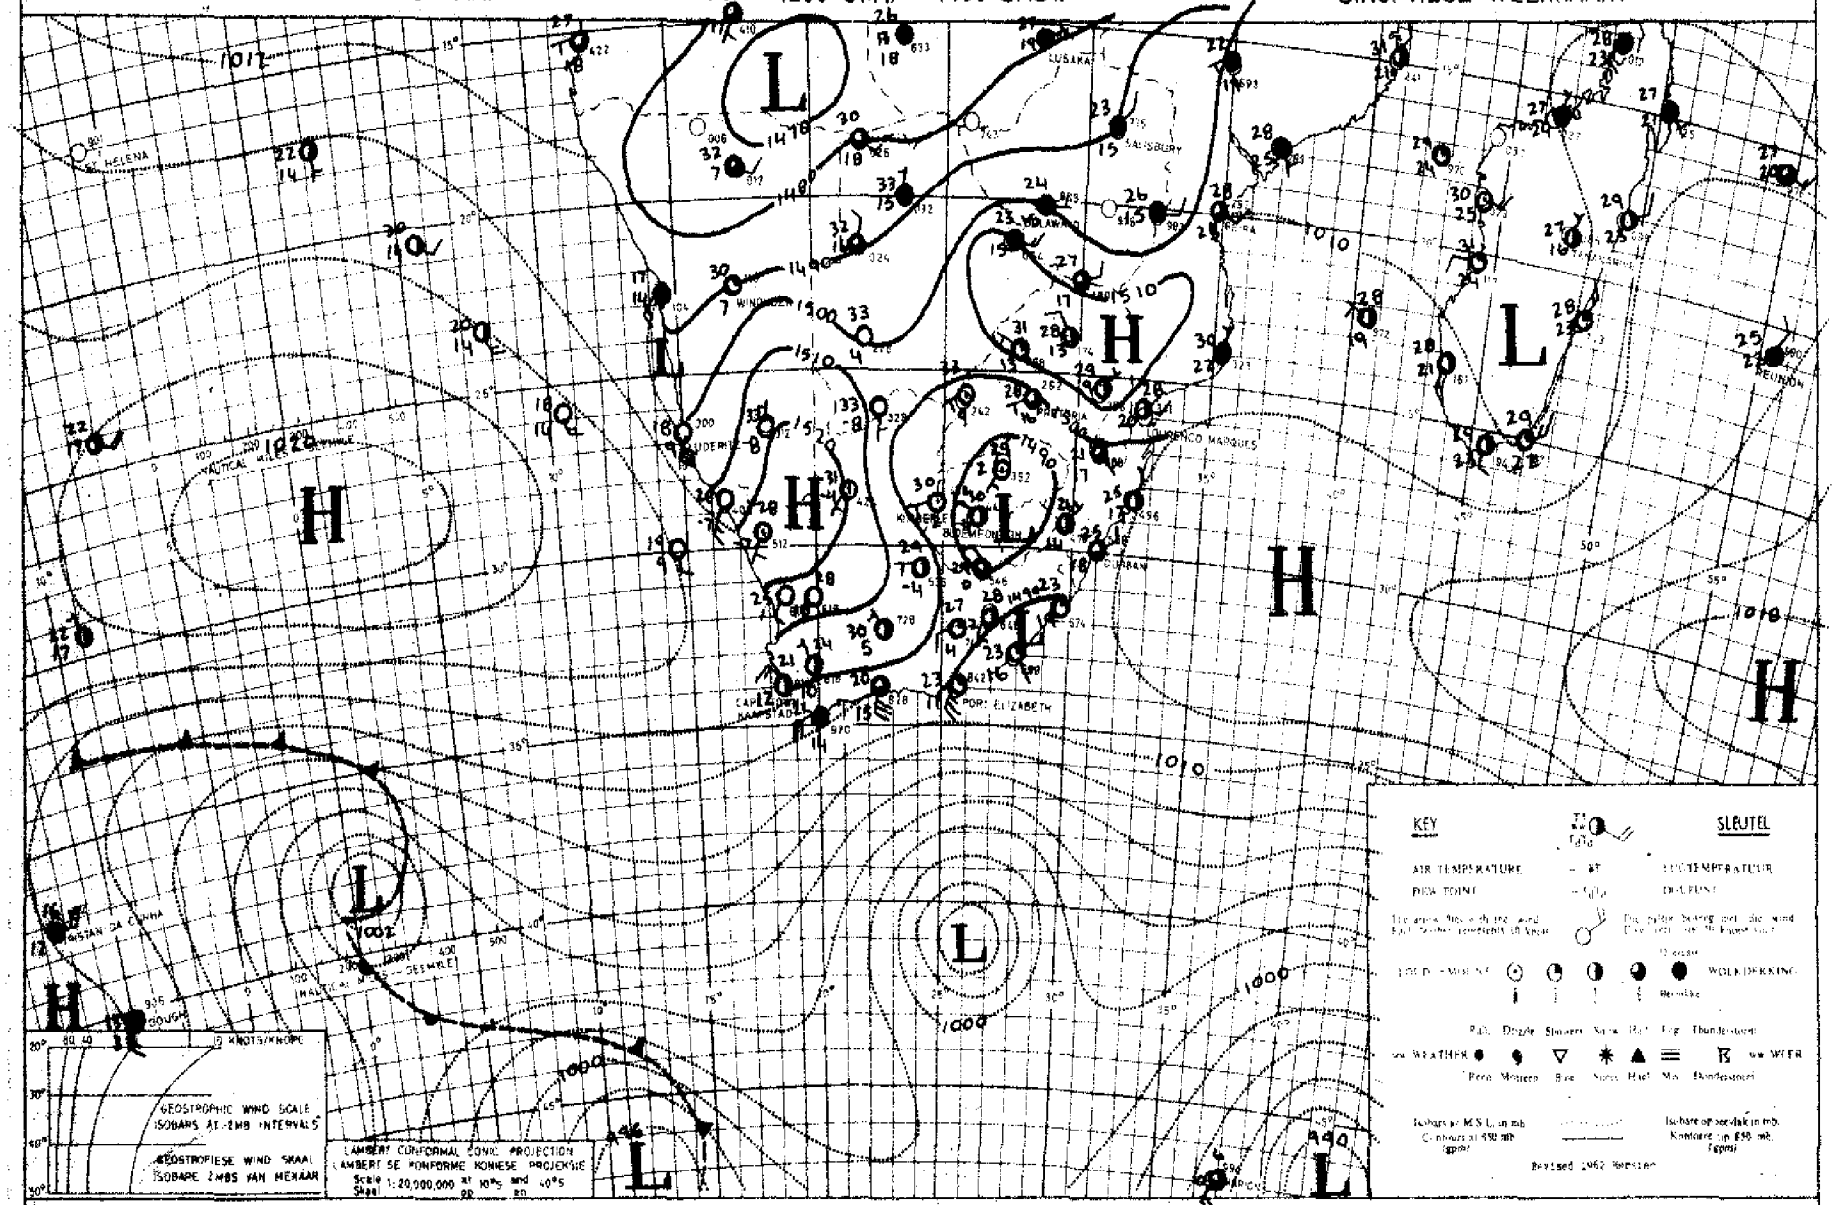
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE: 25-11-1970 DATUM AFLEIDING

The upper air circulation is generally unfavourable for development, but a shallow layer of moist air is present over the northern and eastern parts of the country and isolated thunderstorms are therefore possible over these areas.

Die bolugsirkulasie is oor die algemeen ongunstig vir ontwikkeling, maar 'n vlak lagie vogtige lug is aanwesig oor die noordelike en noordoostelike dele van die land en dus is las donderbuie oor hierdie dele moontlik.

The coldfront southwest of the Cape will cause cooler, cloudy conditions along the coastal regions of the South-Western and Southern Cape and later over the coastal belt of the South-Eastern Cape and Natal. Isolated thunder-showers will occur over the northern and eastern interior.

Die kouefront suidwes van die Kaap sal koeler, bewolkte toestande veroorsaak langs die kusgebiede van Suidwes- en Suid-Kaapland en later oor die kuststreke van Suidoos-Kaapland en Natal. Enkele donderbuie sal oor die noordelike en oostelike binneland voorkom.

INFERENCE

DATE 27-11-1970 DATUM

AFLEIDING

The ridge of high pressure moving in south of the country will maintain an inflow of cool, moist air over Eastern Cape and Natal so that cloudy weather with light rain will persist over these regions. Thundershowers will occur in the relatively moist air over Transvaal and the northern areas of S.W.A. and Botswana.

Die rug van hoë druk wat suid van die land inbeweeg, sal koel, vogtige lug oor Oos-Kaapland en Natal invoer sodat bewolkte weer met ligte reën oor hierdie gebiede sal voorkom. Donderbuie sal voorkom in die warm vogtige lug oor Transvaal en die noordelike dele van S.W.A. en Botswana.

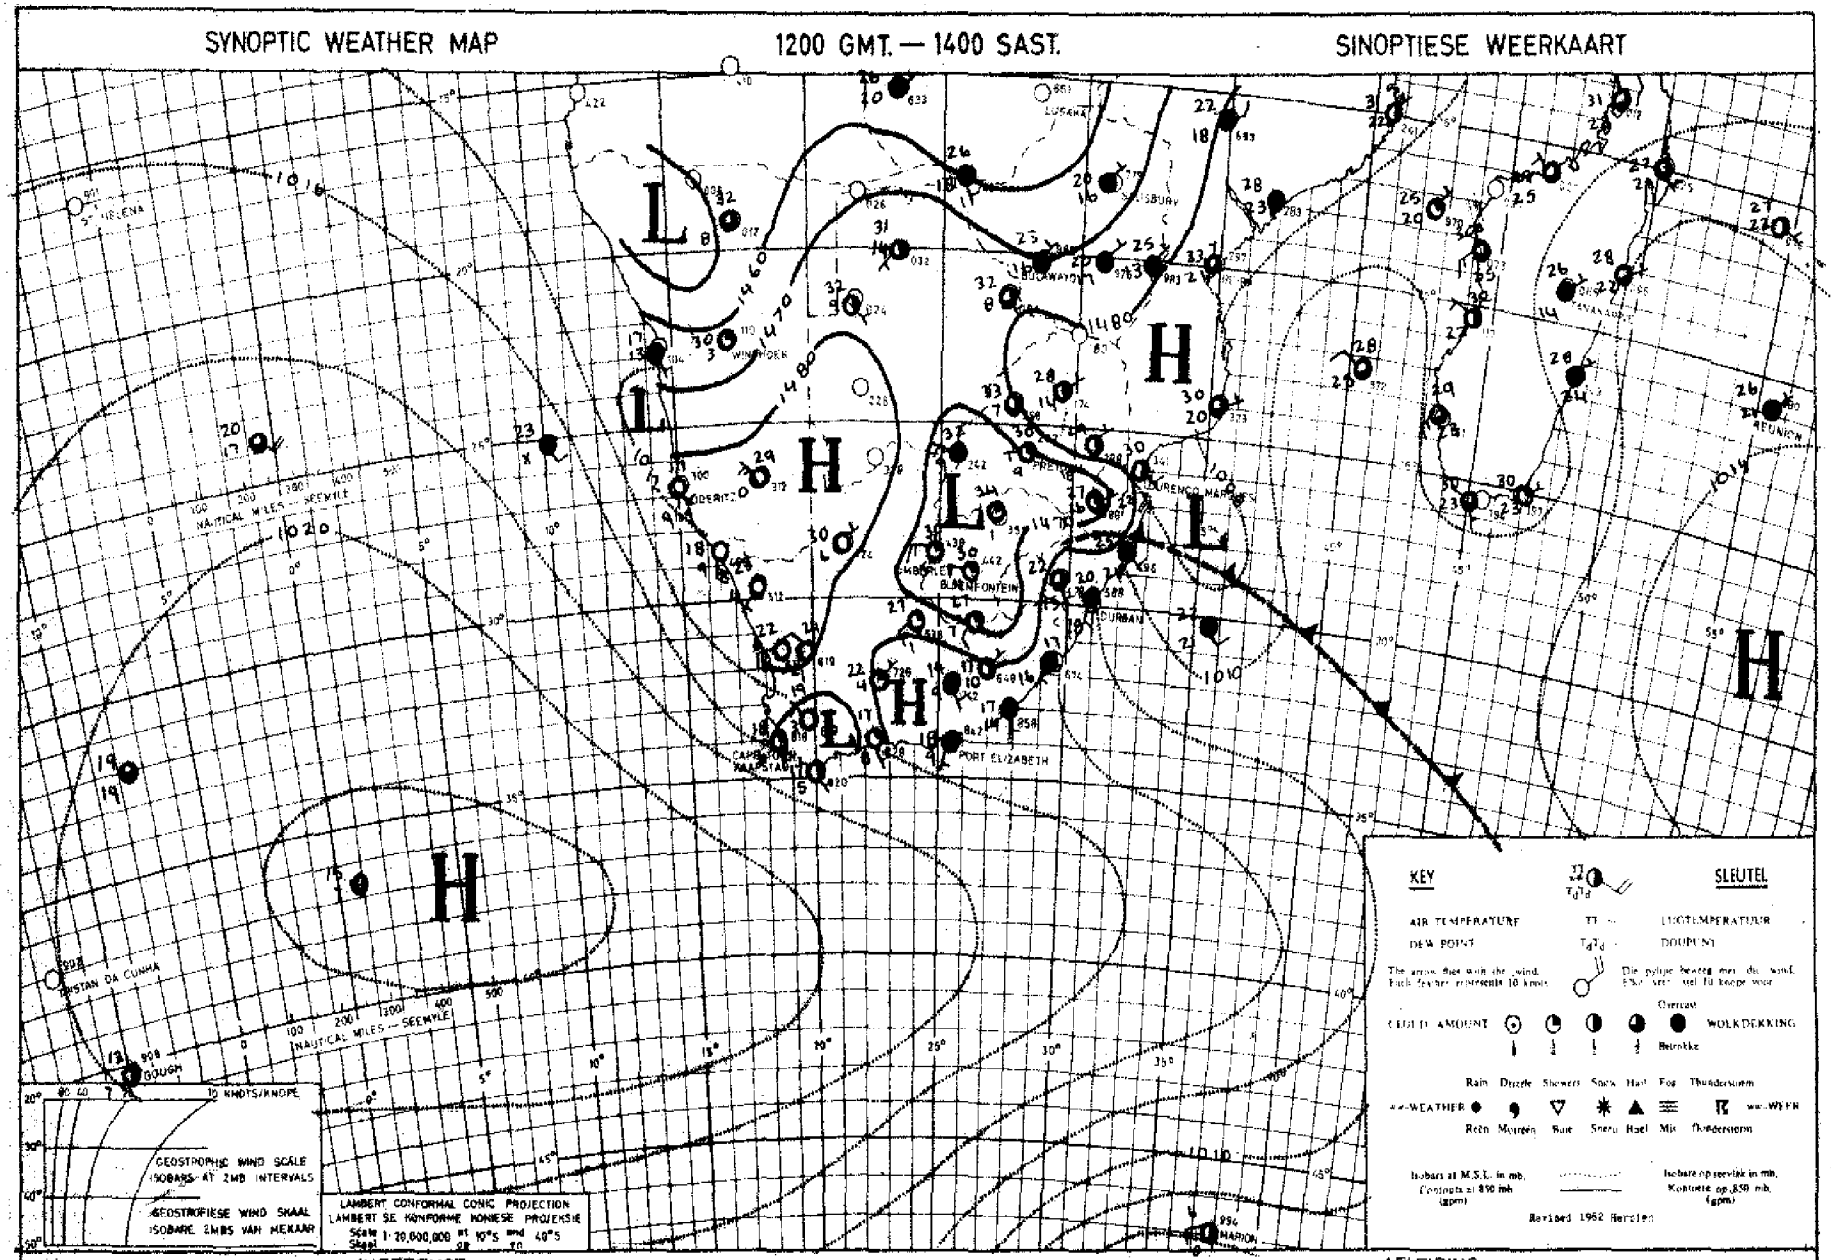
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 28 - 11 - 1970 DATUM AFLEIDING

The high is ridging eastwards rather slowly so that little change is expected along the coast and over the adjacent interior areas. Thunderstorms will recur over the Transvaal, the North-eastern Free State, North-eastern S.W.A. and over Northern Botswana.

Die hoog beweeg stadig oostwaarts en gevolglik word weinig verandering verwag langs die kusgebiede en oor die aangrensende binneland. Donderbuie sal weer ontwikkel oor die Transvaal, Noordoos-Vrystaat, Noordoostelike S.W.A. en die noordelike dele van Botswana.

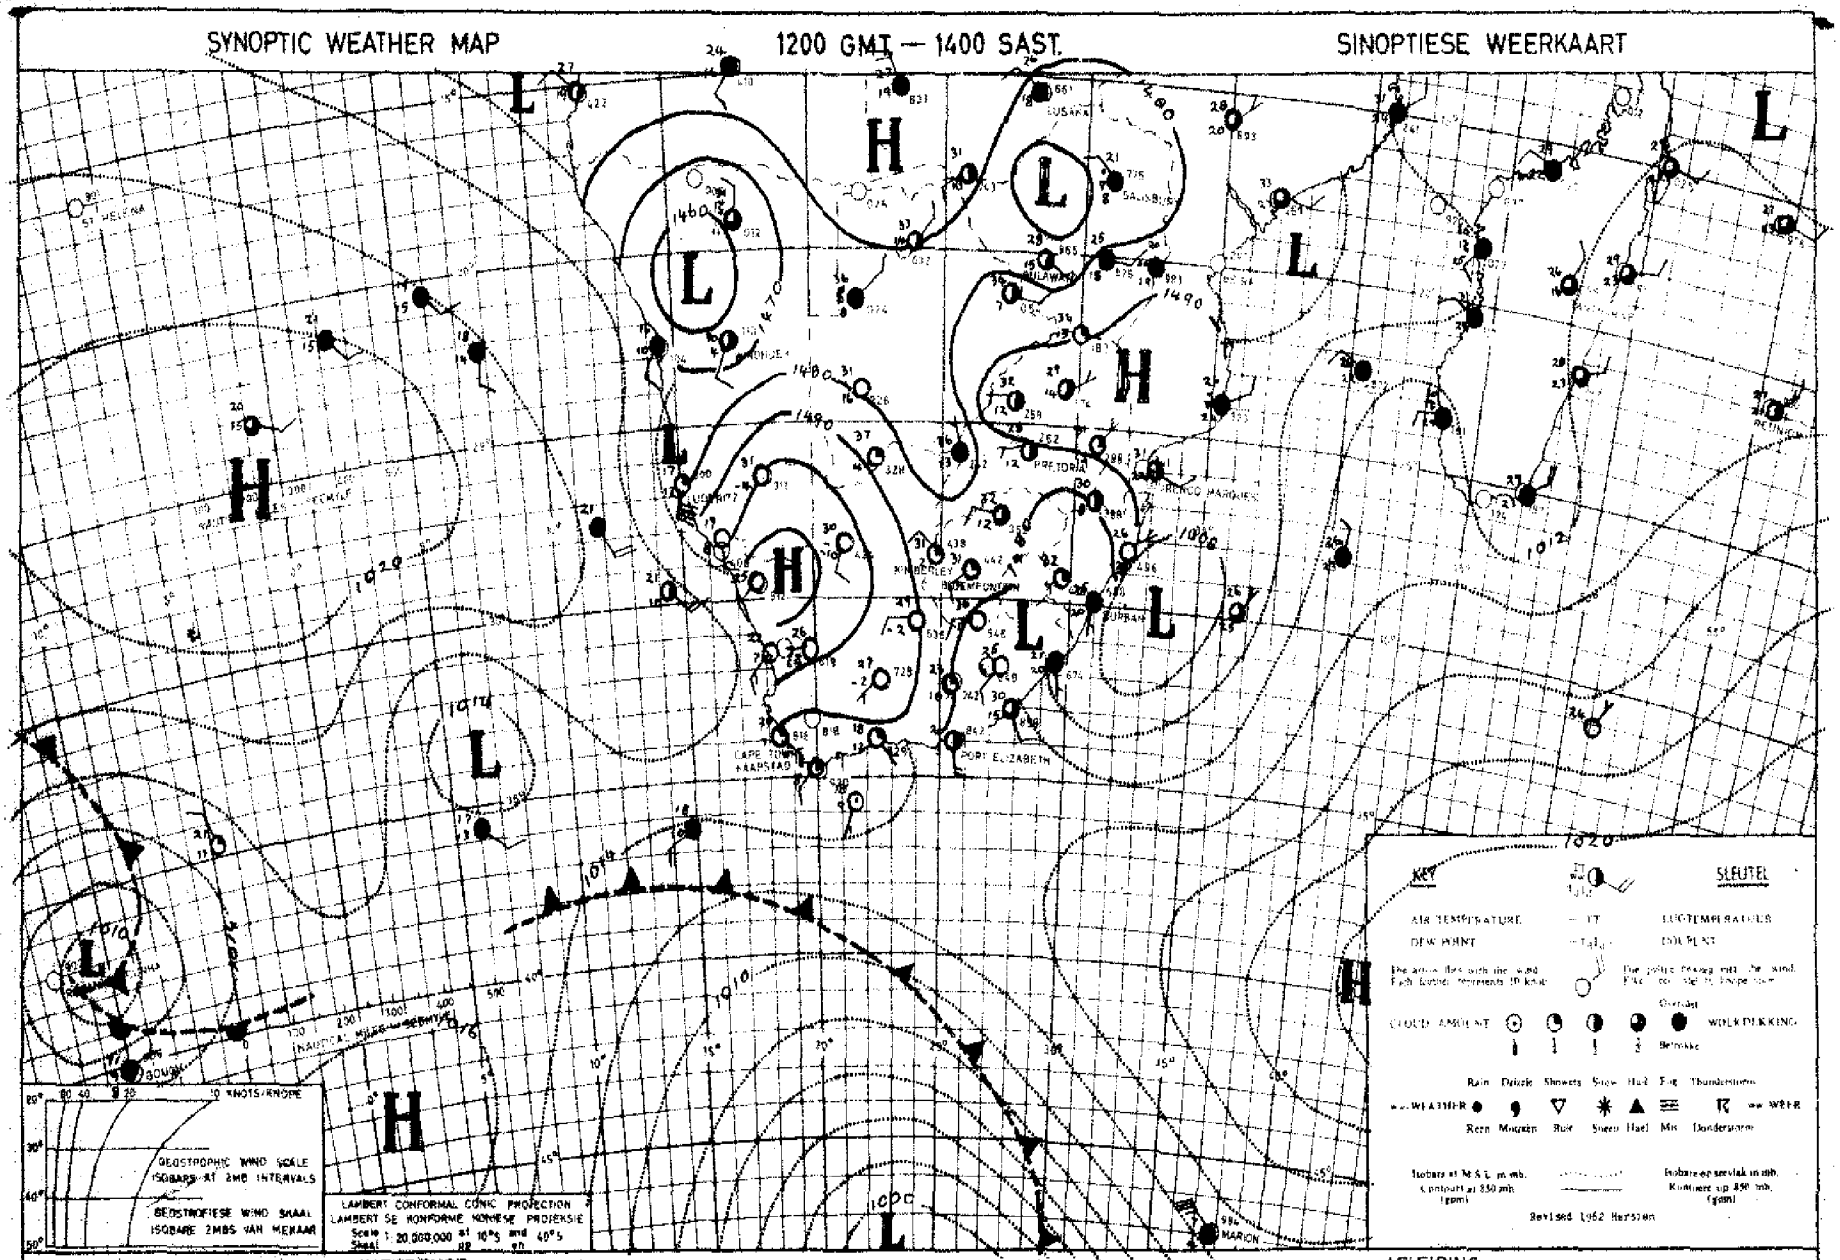
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 29 - 11 - 1970 DATUM AFLEIDING

The cold front which is approaching fairly rapidly from the south west will cause cloudy weather with showers to spread again over the southern and eastern coastal regions. Isolated convective thunderstorms will develop in the warm, fairly moist air mass over Transvaal and the northern areas of S.W.A. and Botswana.

Die koufront wat vinnig uit die suidweste aankom, sal weereens bewolkte weer met buie oor die suidelike en oostelike kusgebiede aanbring. Enkele donderbuie sal ontwikkel in die warm, betreklik vogtige lugmassa wat oor Transvaal en die noordelike gebiede van S.W.A. en Botswana aanwesig is.

INFERENCE
AFLEIDING
DATE 1 - 12 - 1970 DATUM
A low pressure trough extends from S.W.A. towards the Free State and thundershowers will therefore occur in the warm, moist air that is present over the areas north-east of the trough. A coastal low will move along the south and east coast accompanied by cooler, cloudy weather.
'n Laedruktrog strek vanaf S.W.A. na die Vrystaat en donderbuie sal dus voorkom in die warm, vogtige lug wat aanwesig is oor die gebiede noordoos van die trog trog. 'n Kuslaag sal langs die suid-en ooskus op beweeg, gepaard met koeler, bewolkte toestande.

INFERENCE

DATE 2 - 12 - 19 70 DATUM

AFLEIDING

Partly cloudy or cloudy and cooler conditions with light showers will spread eastwards around the coast behind the cold front. Similar conditions will be experienced over the extreme southern regions of the interior. Thunderstorms will recur over the northern and eastern parts of the interior but elsewhere there will be little change.

Gedeeltelik bewolkte of bewolkte en koeler weer met ligte buie sal ooswaarts langs die kus uitbrei namate die front ooswaarts beweeg. Die verre suidelike binneland sal soortgelyke toestande ondervind. Donderbuie sal weer oor die noordelike en oostelike binneland ontwikkel maar andersins word min verandering verwag.

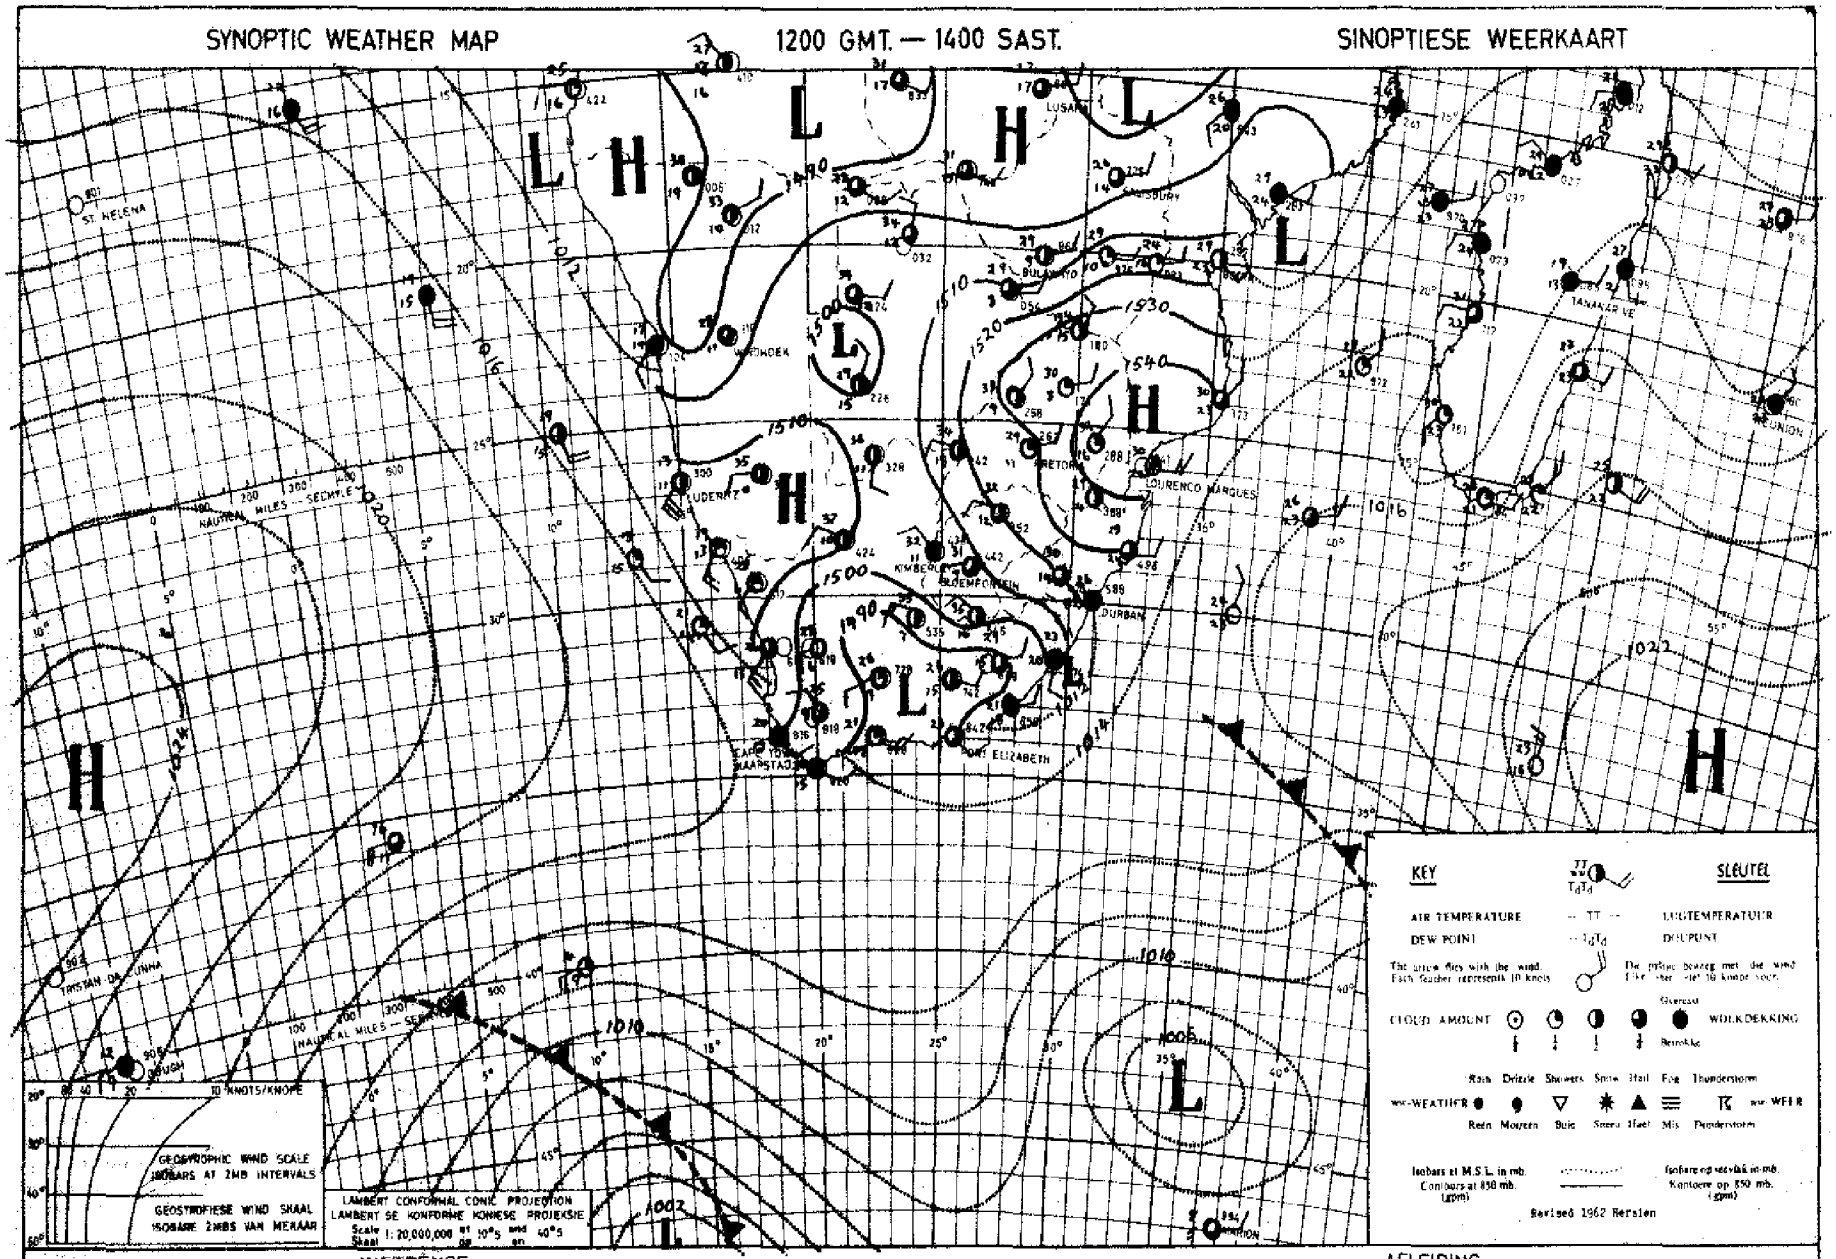
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 3 — 12 — 1979 DATUM AFLEIDING

With a belt of low pressure troughs extending from S.W.A. through Botswana to the Southern Cape; scattered thunder-showers will occur over the areas east of the trough line. Only isolated showers will occur over the Transvaal owing to the anticyclonic circulation over that province.

Met die gordel van laedruktrôe wat vanaf S.W.A. deur Botswana na Suid-Kaapland strek, sal verspreide donderbuie voorkom oor die gebiede oos van die troglyn. Oor die Transvaal sal slegs enkele buie voorkom weens die antisiklonale sirkulasie.

The cold front west of Cape Town will cause colder, cloudy weather to advance over the southern and eastern parts of the Cape Province. With several low pressure systems over the interior, scattered thundershowers will occur over the areas eastwards.

Die kouefront wes van Kaapstad sal kouer, bewolkte weer met buie laat uitbrei oor die suidelike en oostelike dele van Kaapland. Met verskeie laedrukstelsels oor die binneland sal verspreide donderbuie voorkom oor die gebiede oos daarvan.

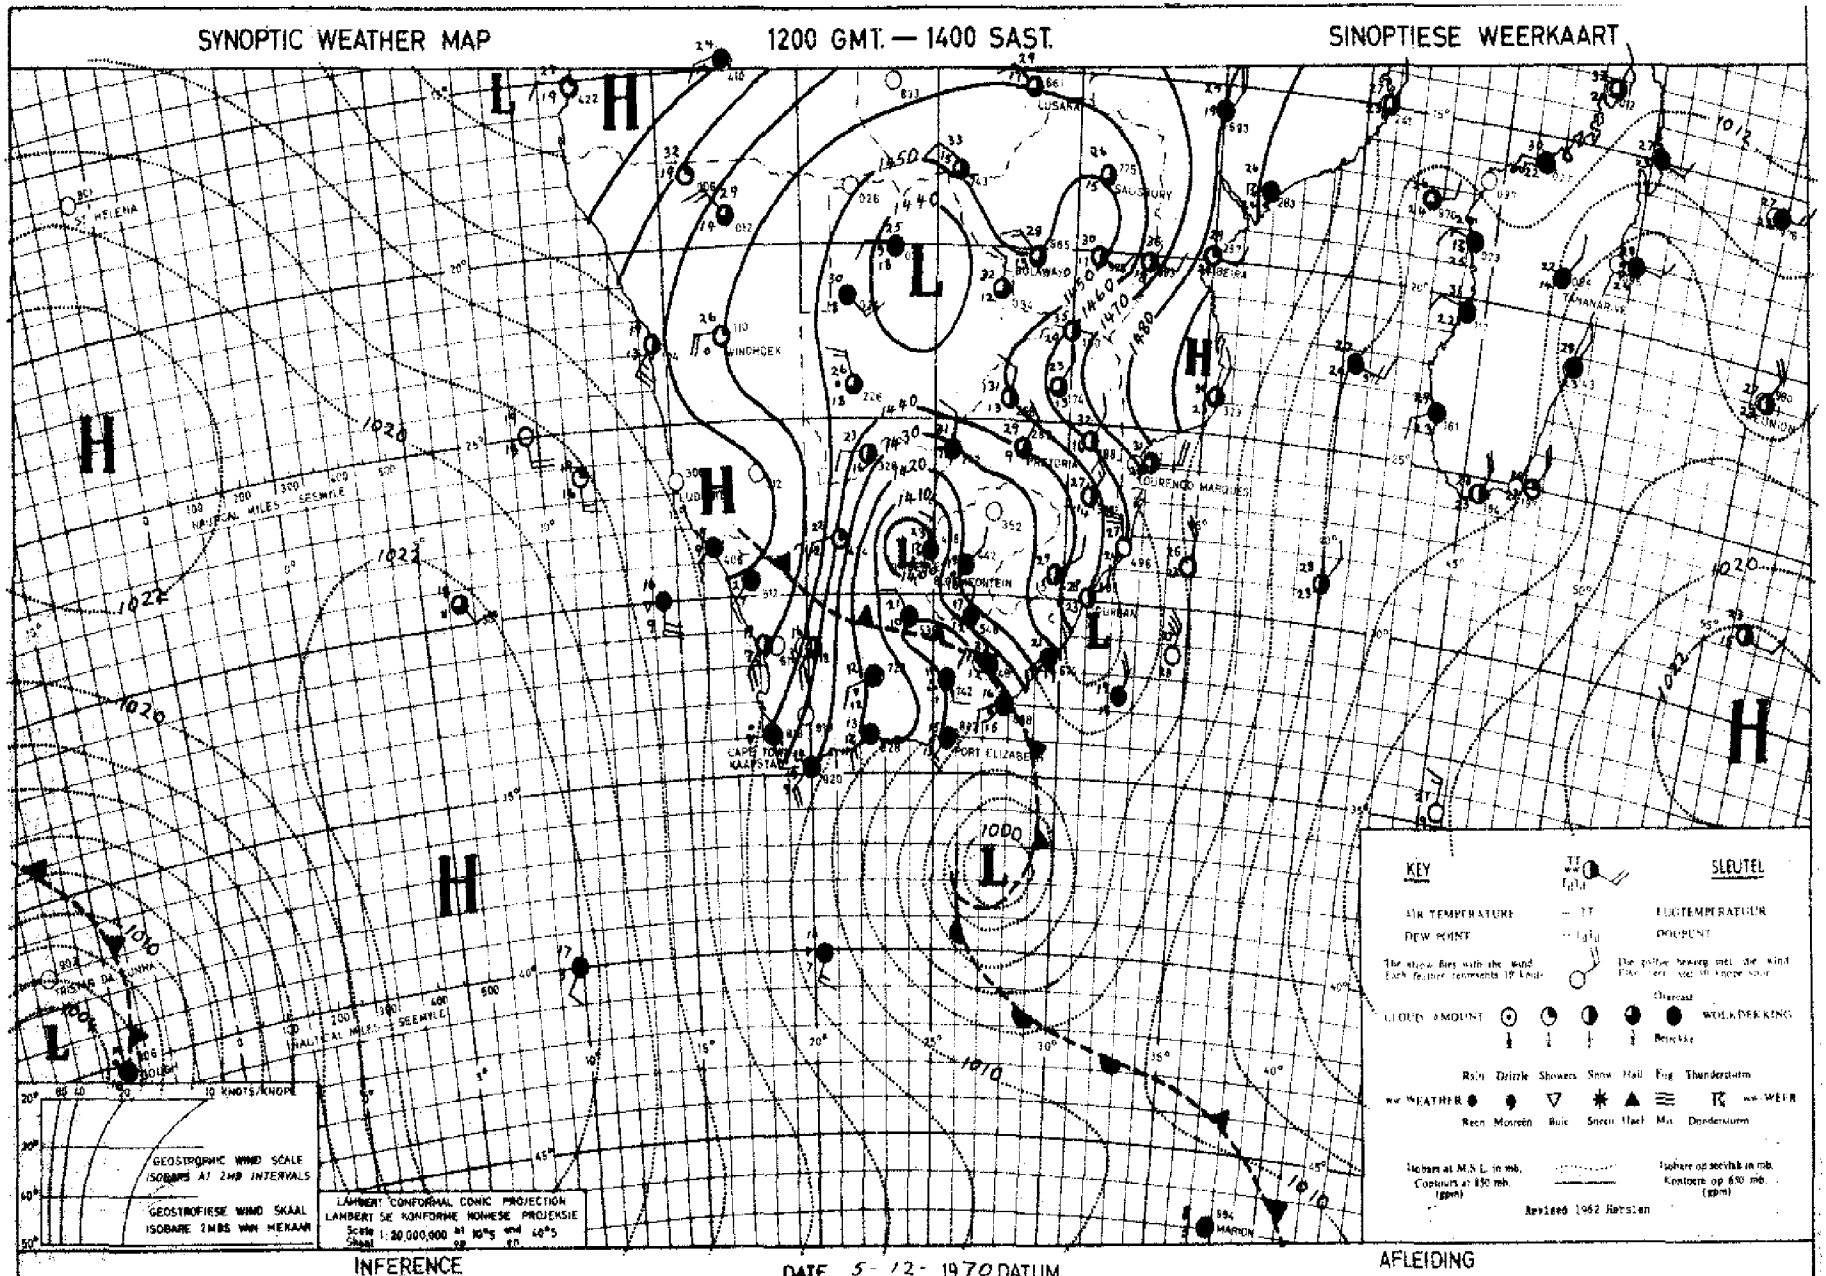
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 5 - 12 - 1970 DATUM AFLEIDING

The cold front, which is already causing cold, cloudy weather with rain over the Cape Province, is associated with a deep upper-air low which is moving eastwards. The cold rainy weather will therefore spread over the whole Cape Province, Free State, Natal and parts of the Transvaal. Snow will fall over the higher regions of the Cape Province.

Die koue front wat reeds koue, bewolkte weer met reën oor Kaapland veroorsaak, gaan gepaard met 'n diep boulaag wat ooswaarts beweeg. Die koue reënweer sal dus oor die hele Kaapland, Vrystaat, Natal en dele van Transvaal uitbrei. Sneeu sal voorkom oor die hoogliggende dele van Kaapland.

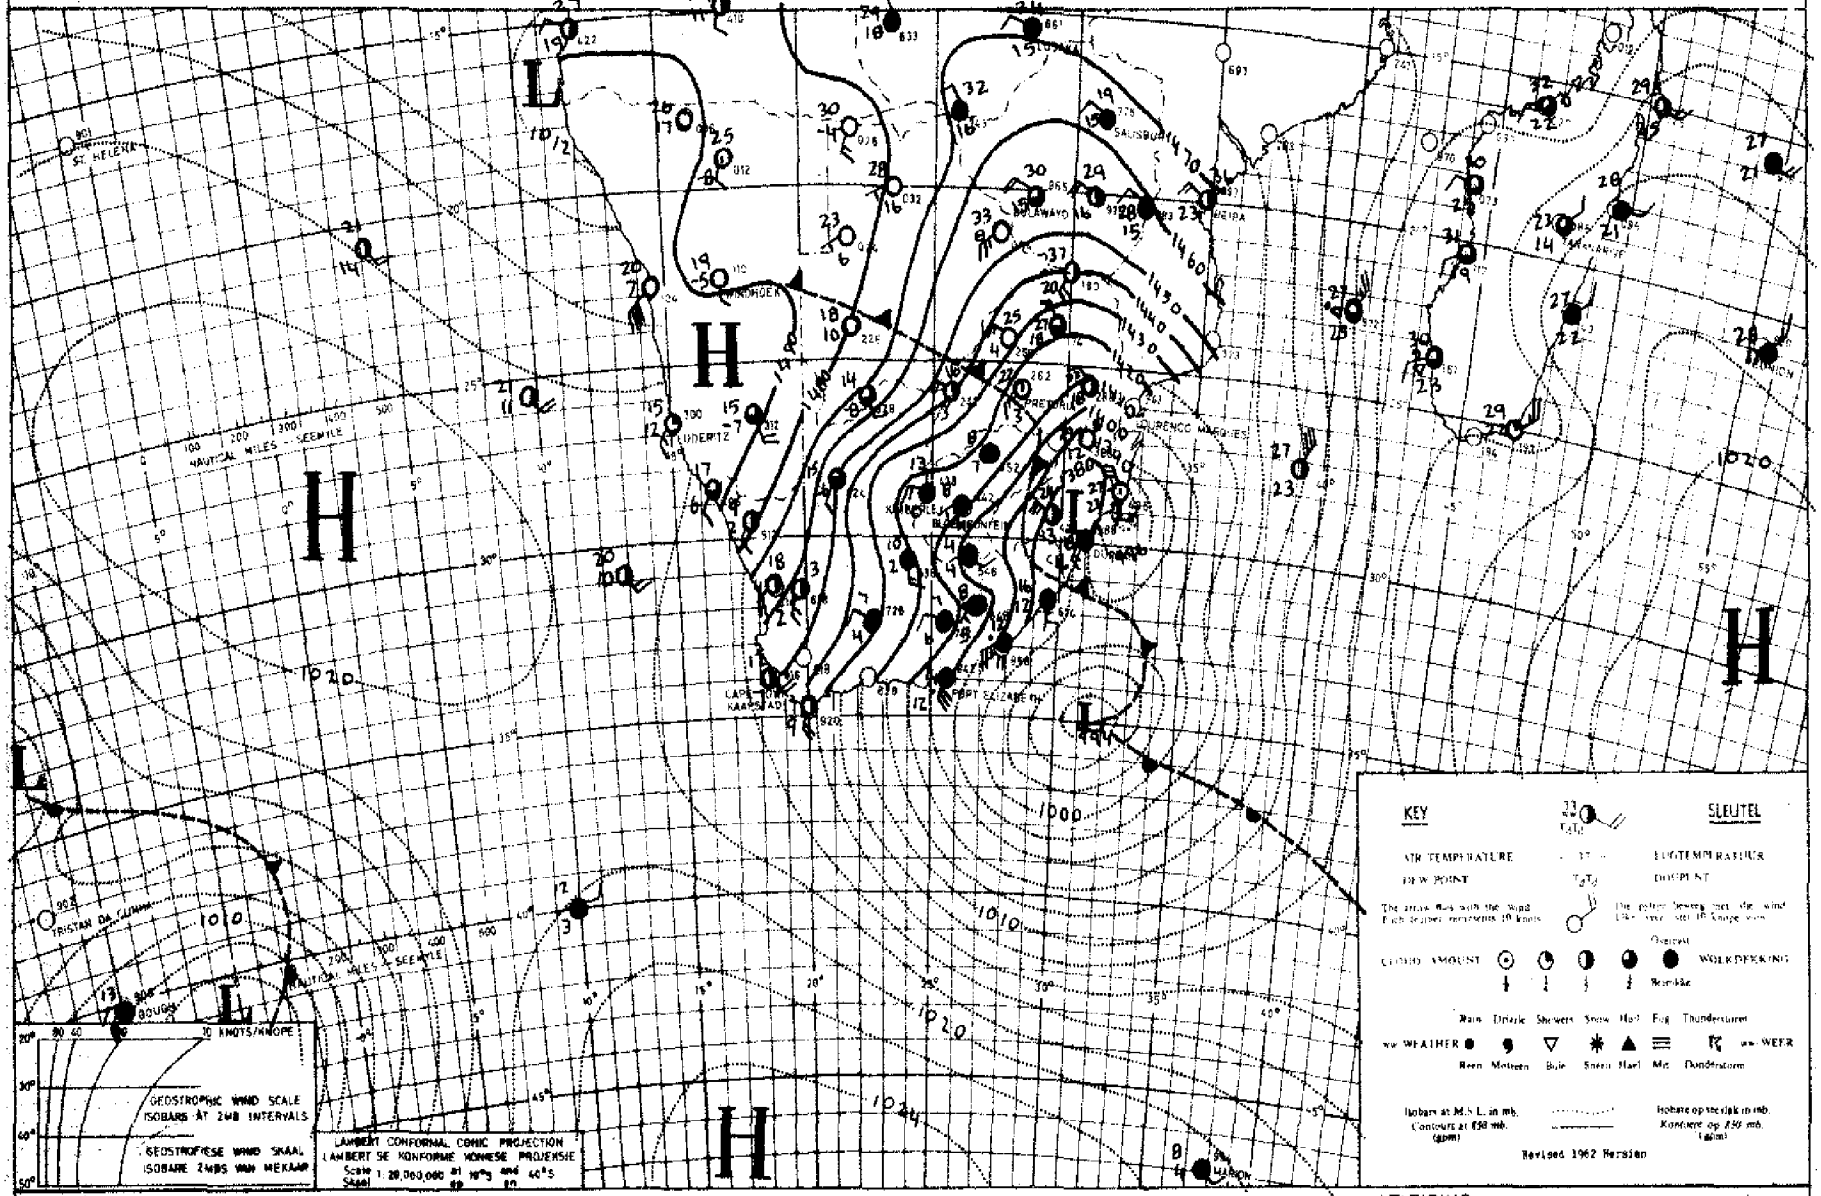
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 6 / 12 / 1970 DATUM AFLEIDING

The deep low pressure system south-east of the country will cause cold air to advance over the whole country while cloudy weather with rain will persist over Eastern Cape and Natal but it will clear from the west over the interior regions.

Die diep laedrukstelsel suidoos van die land sal die koue lug oor die hele land laat uitbrei terwyl bewolkte weer met reën sal voortduur oor Oos-Kaapland en Natal maar oor die binnelandse gebiede sal dit van die weste af opklaar.

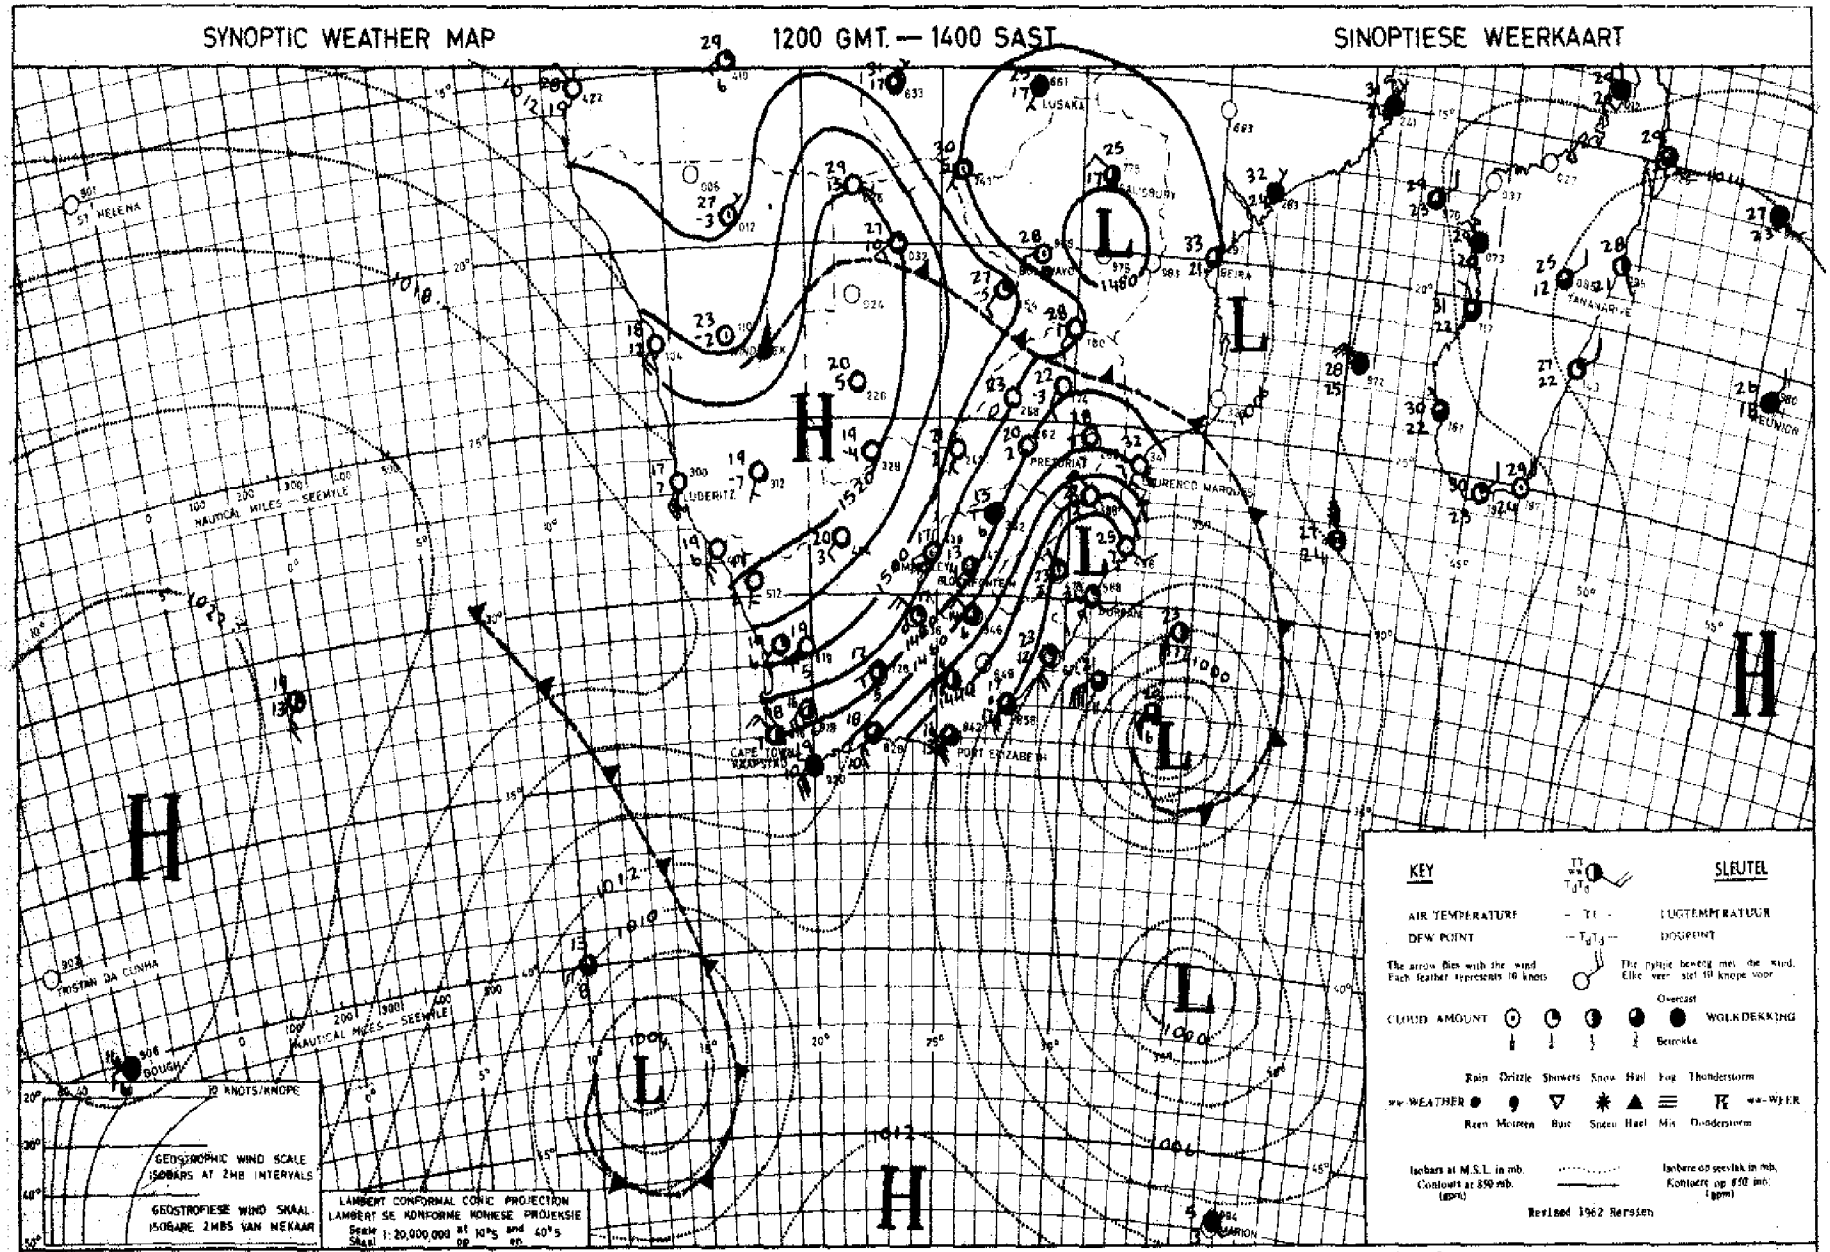
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST SINOPTIESE WEERKAART



INFERENCE DATE 7 - 12 - 19 79 DATUM AFLEIDING

Cloudy conditions over the eastern parts of the country will clear gradually but the approaching cold front will cause further cloudy rainy conditions to spread to the Cape south-west and south coasts and to the southern interior regions of the Cape. It will remain fine over the remainder of the country where it will become warmer.

Die weer sal geleidelik opklaar oor die oostelike dele van die land maar die nuwe front sal verdere bewolkte en reënerige toestande veroorsaak langs die Kaapse suidwes- en suidkus en oor die suidelike Kaapse binneland. Oor die res van die land sal dit mooiweer bly en warmer word.

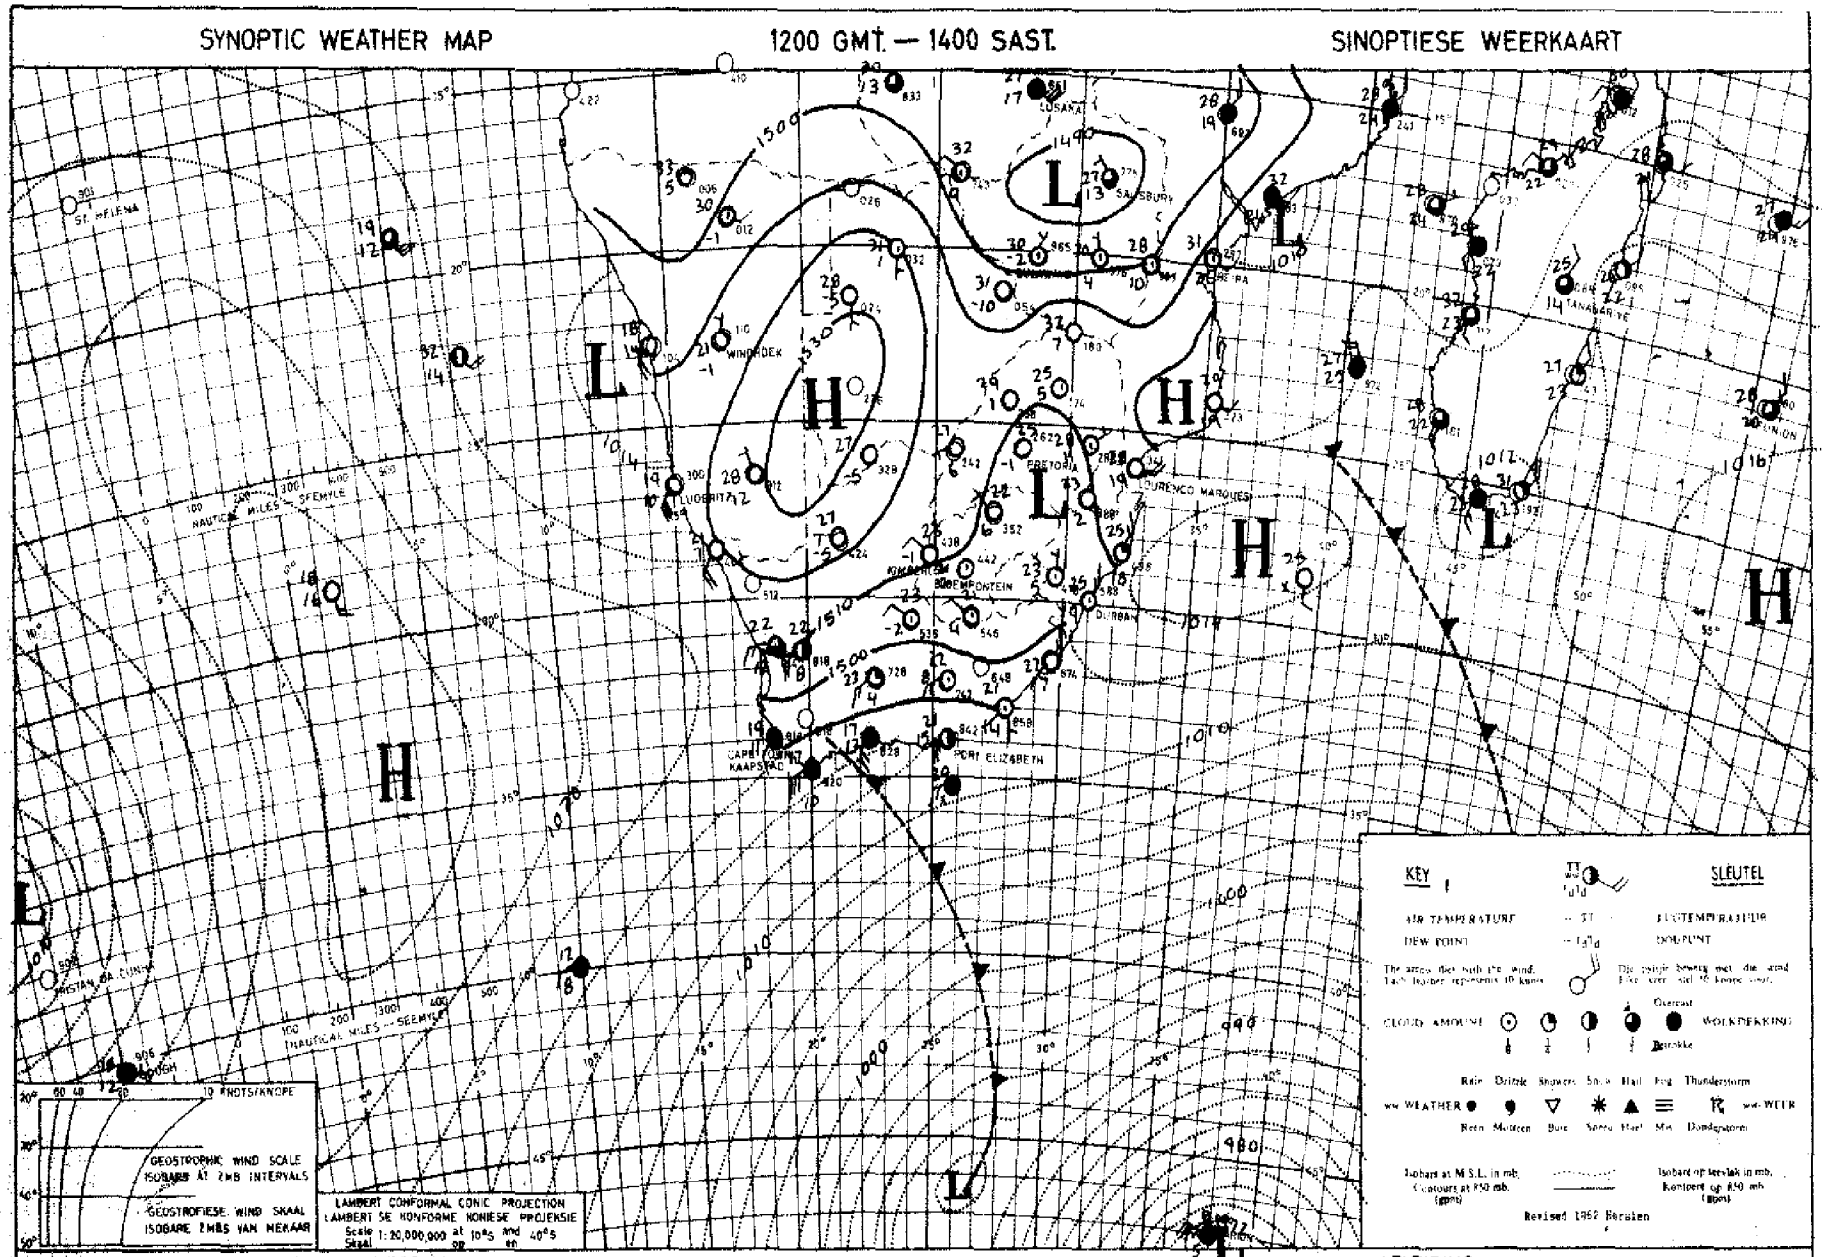
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 8 12 1972 DATUM AFLEIDING

The cold front moving along the south coast will cause cloudy weather with light showers to advance over the southern and eastern coastal regions. Over the remainder of the country dry air is circulating around a high pressure system and it will remain fine over these regions.

Die koufront wat oor die suidkus beweeg, sal bewolkte weer met ligte buie laat uitbrei oor die suidelike en oostelike kusgebiede. Oor die res van die land sirkuleer droë lug rondom 'n hoëdrukstelsel en sal dit mooiweer bly.

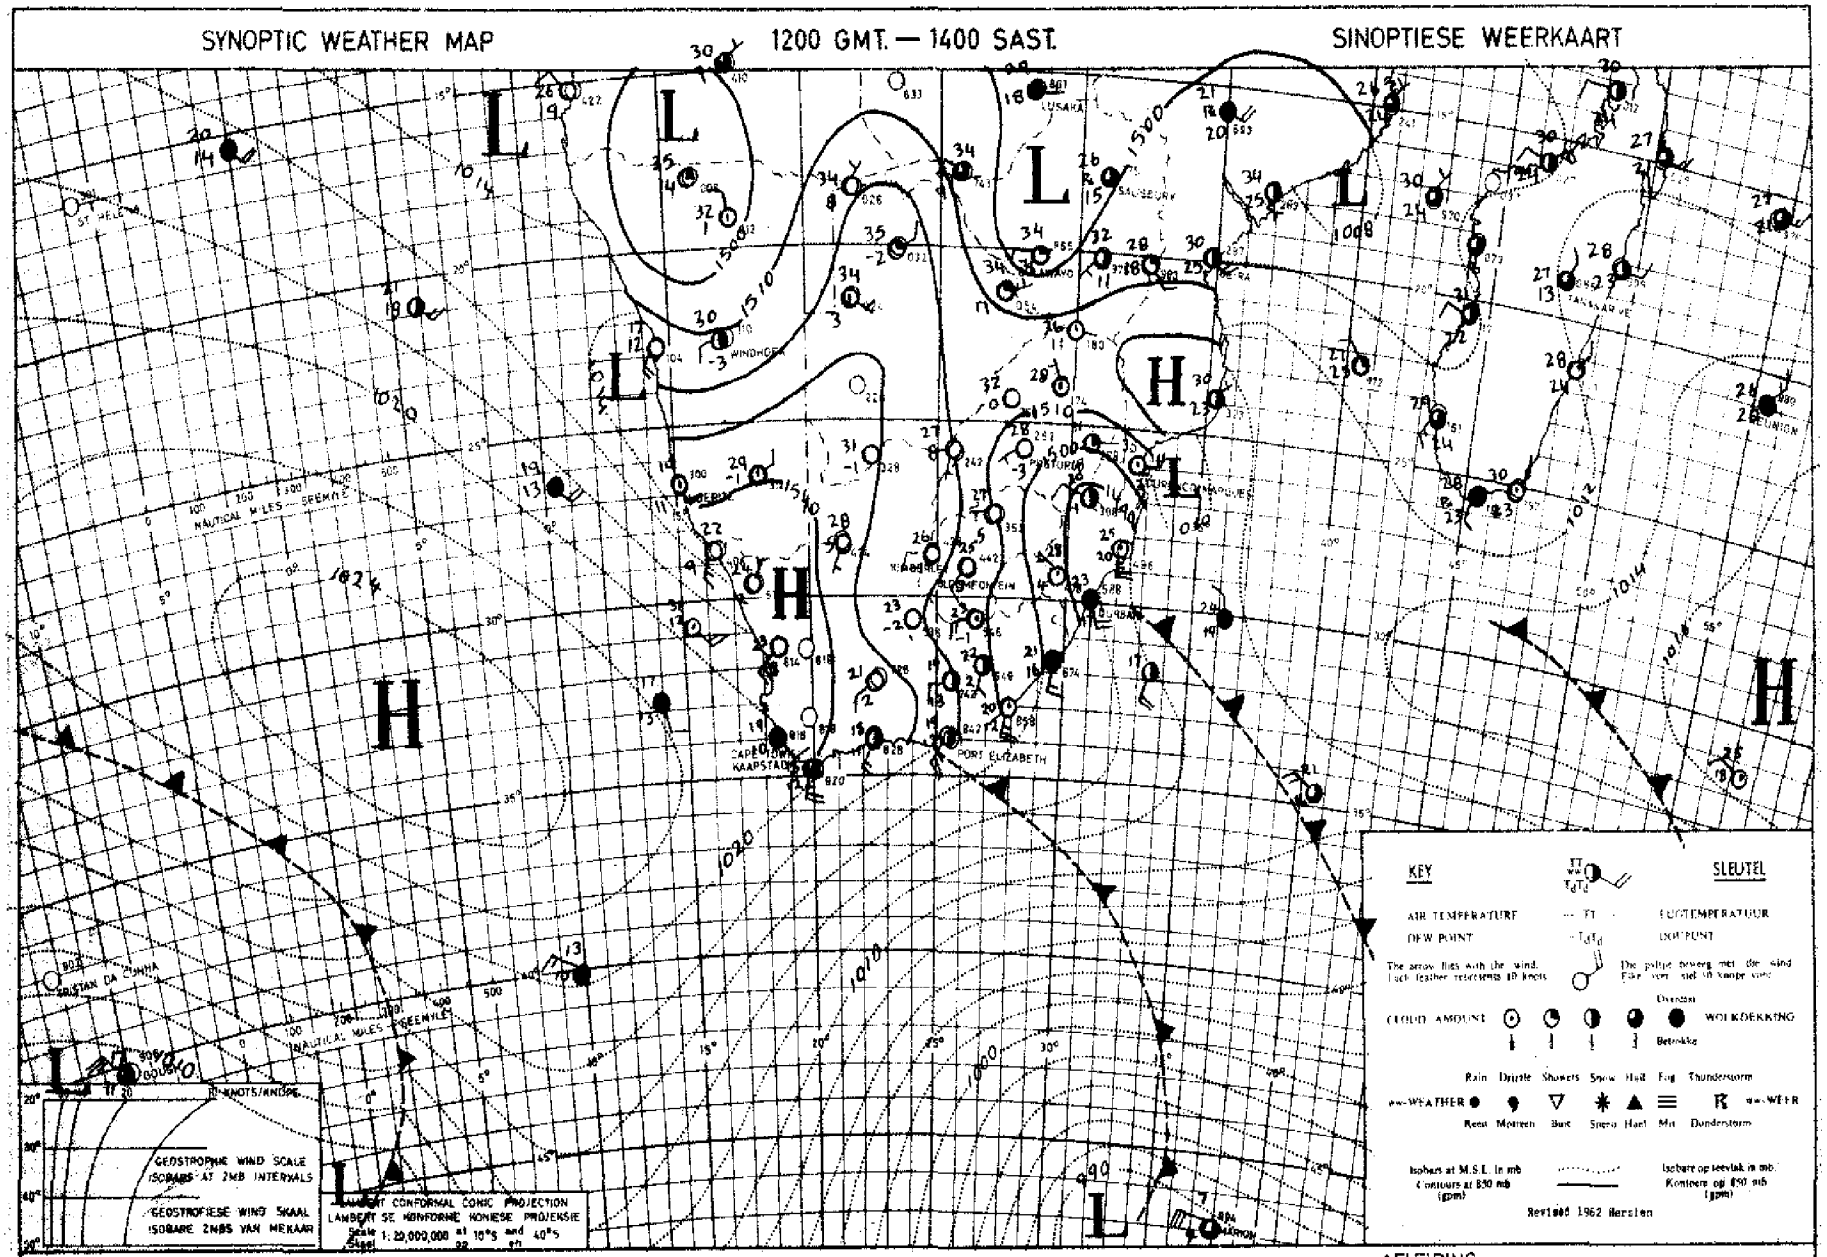
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 9/4/1970 DATUM AFLEIDING

With the persistent south-westerly winds over the southern and eastern coastal regions, it will remain cloudy over these regions with light showers. Over the rest of the country it will remain fine owing to the anticyclonic circulation of dry air.

Met die aanhoudende stroom van suidwestewinde oor die suid- en oskuskgebiede sal dit bewolk bly oor hierdie gebiede met ligte buie. Oor die res van die land sal dit mooiweer bly weens die antisiklonale vloei van droë lug.

INFERENCE

DATE 10 - 12 - 19 79 DATUM

AFLEIDING

Conditions in general are still unfavourable for good rains, but with a shallow layer of moist air over the north-eastern interior isolated thundershowers are possible over North-Eastern Free State and Southern Transvaal.

Toestande is oor die algemeen nog ongunstig vir goeie neerslae, maar met 'n vlak lagie vogtige lug oor die noordoostelike binneland is los donderbuie moontlik oor Noordoos-Vrystaat en Suid-Transvaal.

An extensive low east of Gough will cause cloudy, rainy conditions over the Peninsula tomorrow. Isolated thunderstorms will recur over the Transvaal, Northern and Central Free State, Northern Cape, the northern and eastern parts of S.W.A. and over Botswana.

Die uitgebreide laedrukstelsel oos van Gough sal môre bewolkte toestande met reën oor die Skiereiland veroorsaak maar daar sal geen verandering oor die ander kusstreke intree nie. Enkele donderbuie sal weer voorkom oor die Transvaal, Noord- en Sentraal- Vrystaat, Noord- Kaapland, in die Noordelike en oostelike dele van S.W.A. en oor Botswana.

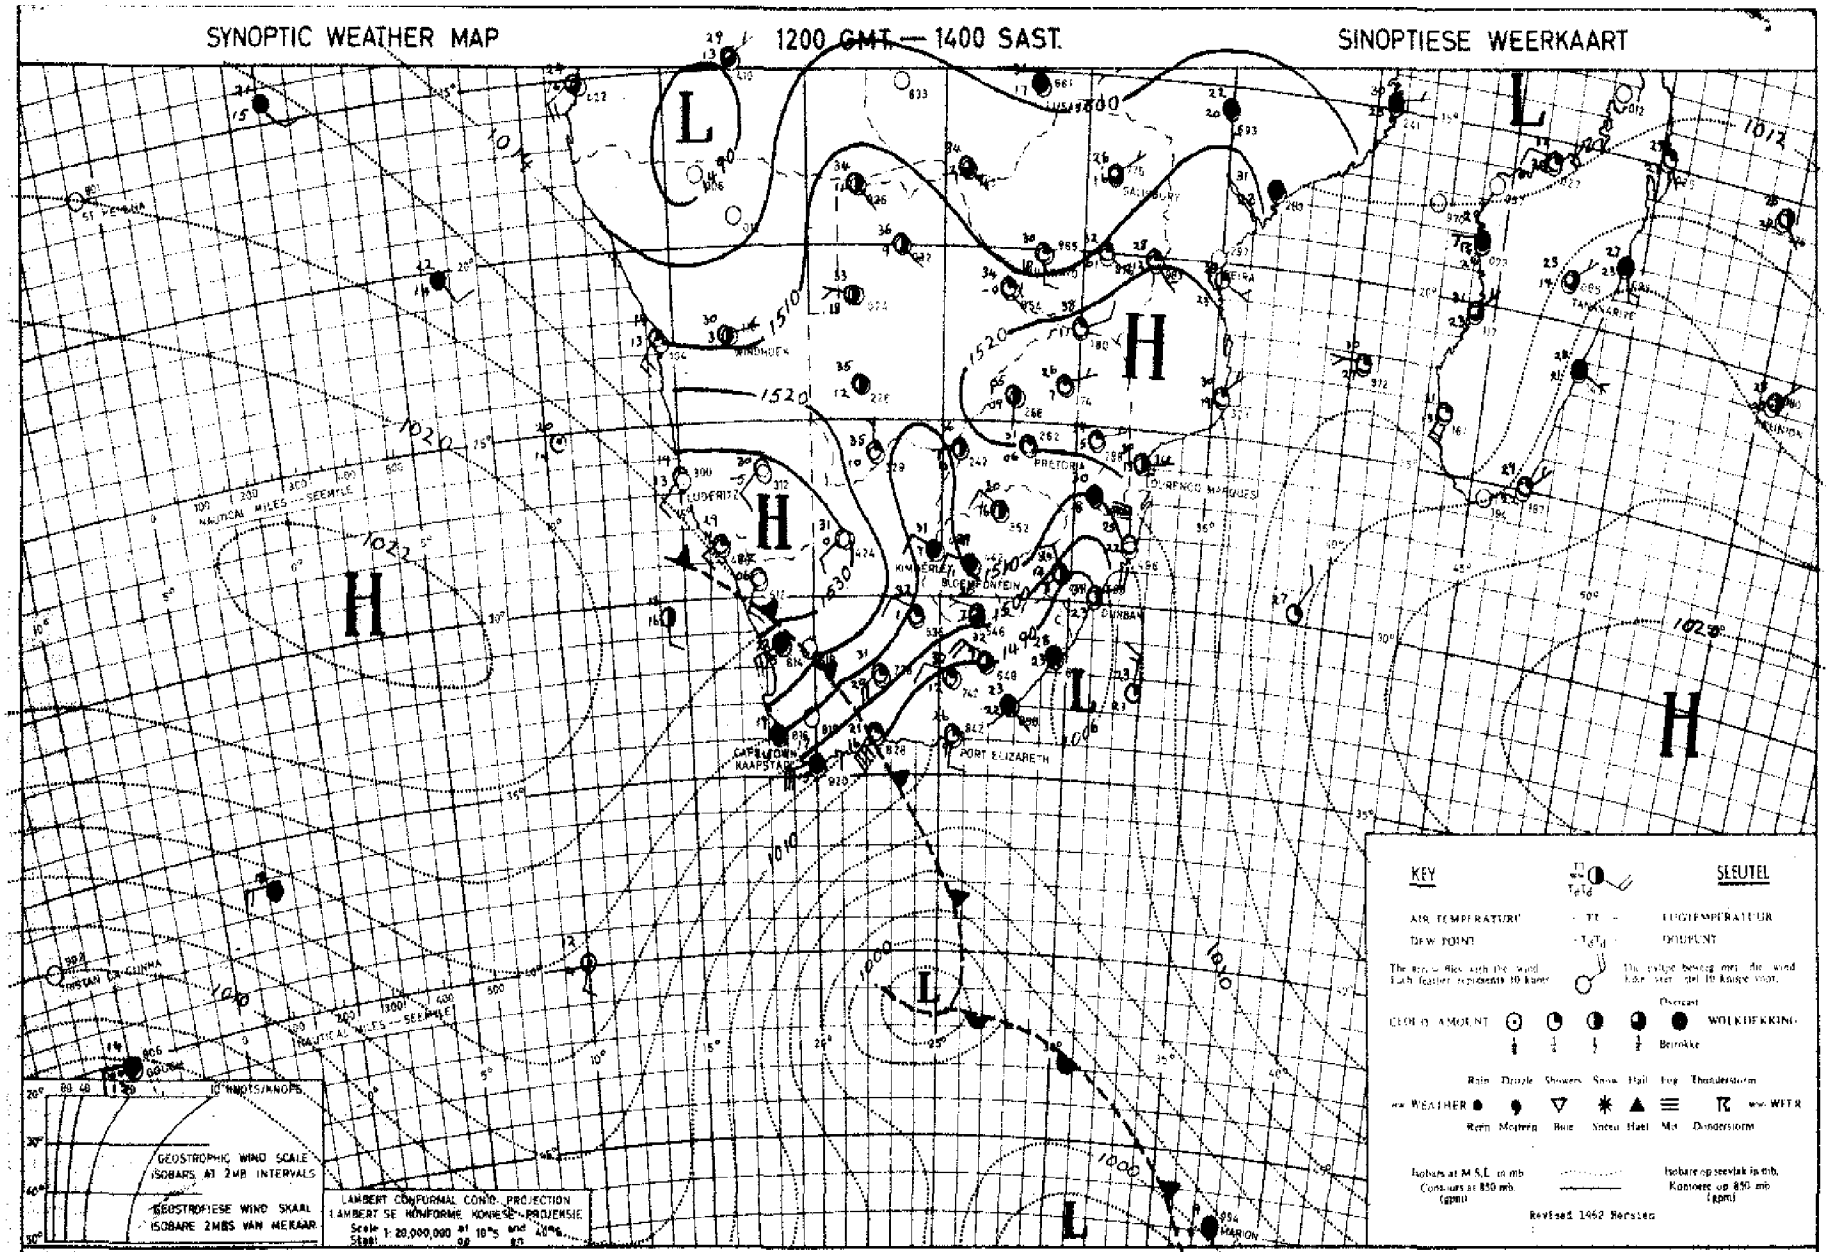
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

DATE 13 - 12 19 70 DATUM

AFLEIDING

A fairly strong ridge of high pressure follows the cold front and therefore cool cloudy weather with showers will advance eastwards over the eastern coastal regions and the adjacent interior and over the Transvaal lowveld. Thundershowers will occur over the rest of Transvaal, Northern Free State, Northern Cape, Botswana and the northern part of S.W.A.

'n Betreklike sterk rug van hoë druk volg op die koue front en dus sal koel, bewolkte weer met buie ooswaarts uitbrei oor die oostelike kusstrehe en aangrensende binneland en oor die Transvaalse laeveld. Donderbuie sal voorkom oor die res van Transvaal, Noord-Vrystaat, Noord-Kaapland, Botswana en noordelike Suidwes-Afrika.

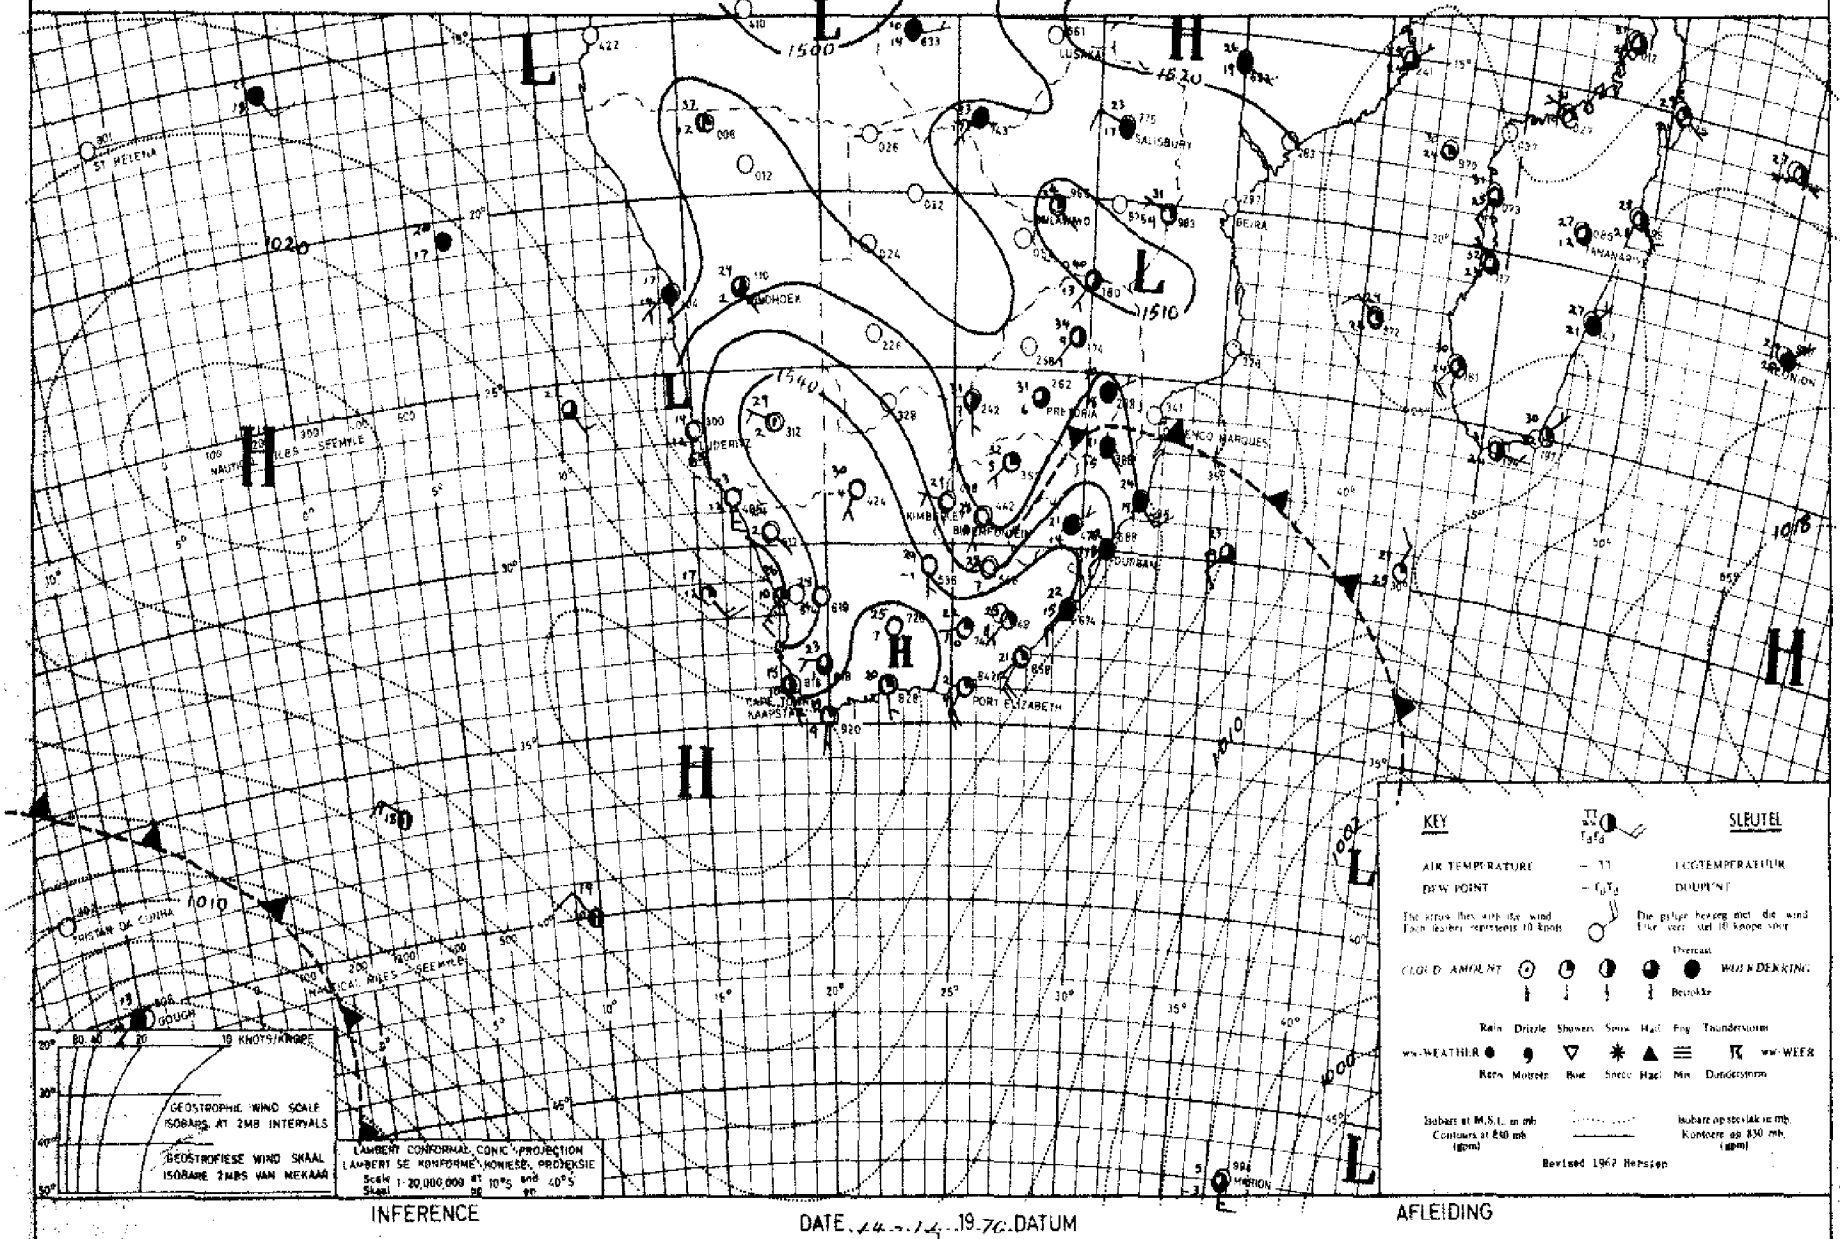
SYNOPTIC WEATHER MAP — 1200 GMT — 1400 SAST — SINOPTIESE WEERKAART



INFERENCE — DATE 14-12-1970 DATUM — AFLEIDING

The high ridging in south of the country will cause cloudy weather with rain over Natal and Eastern Transvaal. Warm fairly moist air is present over the rest of Transvaal, Botswana and northern S.W.A. and thundershowers will occur over these areas.

Die hoog wat suid van die land indruk, sal bewolkte toestande met reën oor Natal en Oos-Transvaal laat uitbrei. Warm, effens vogtige lug is aanwesig oor die res van Transvaal, Botswana en noordelike S.W.A. en donderbuie sal oor die streke uitbreek.

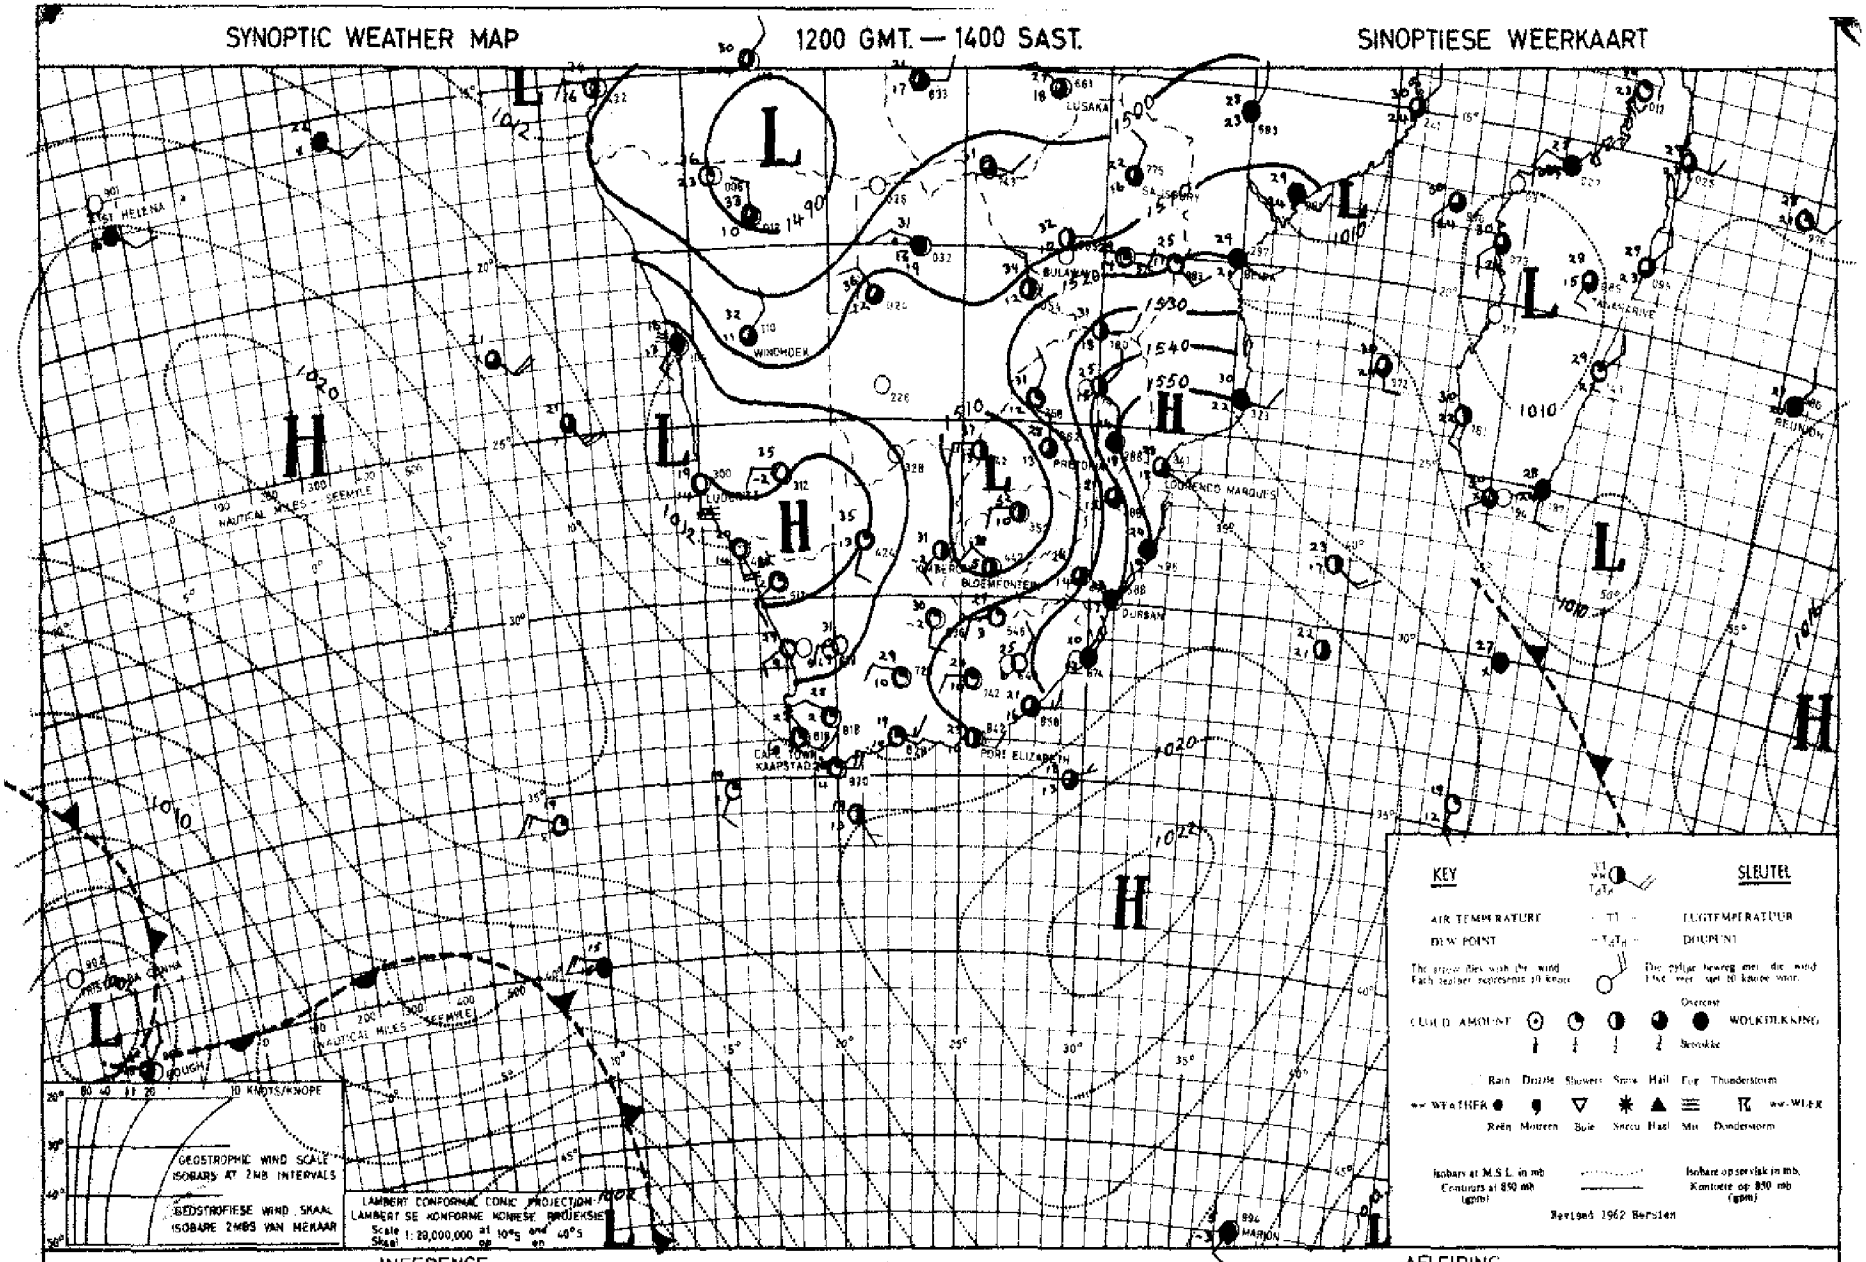
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE

DATE 15-12-1970 DATUM

AFLEIDING

With the trough of low pressure extending from northern S.W.A towards the Free State, scattered thundershowers will occur over the areas east of it. It will, however, remain fine and warm over the western and southern areas.

Met 'n trog van lae lugdruk wat van noordelike S.W.A na die Vrystaat strek, sal donderbuie voorkom oor die gebiede oos daarvan. Oor die westelike en suidelike dele van die land sal dit egter mooiweer en warm bly.

AFLEIDING
A low pressure system is passing south of the country and is being followed by a ridge of high pressure. At the same time there is a trough of low pressure over the interior and therefore isolated thundershowers will occur over the eastern parts.
'n Laedrukstelsel beweeg suid van die land verby en word gevolg deur 'n rug van hoë druk. Terselfdertyd is daar 'n trog van lae druk oor die binneland en dus sal enkele donderbuie voorkom oor die oostelike binneland.

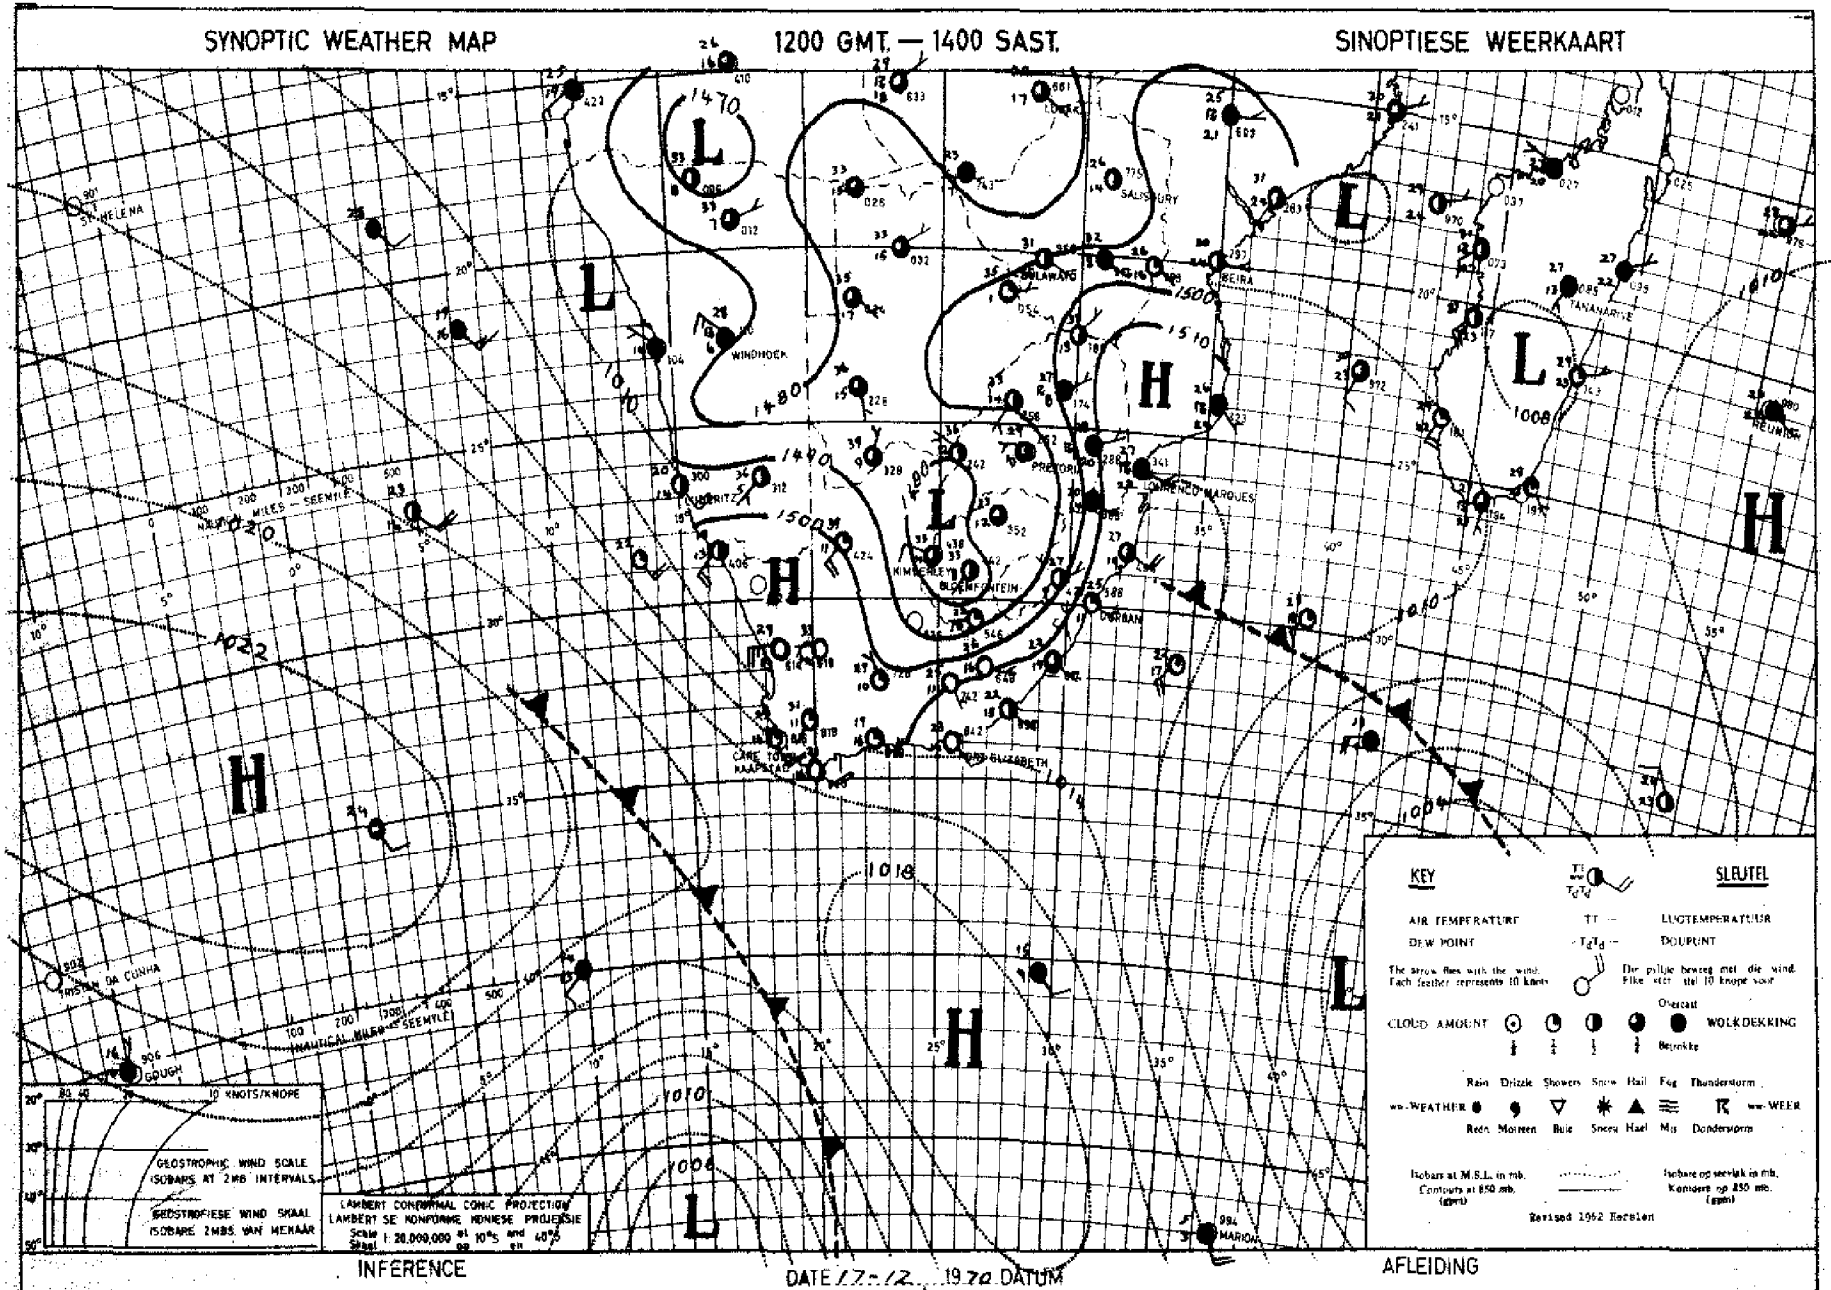
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 17-12-1970 DATUM AFLEIDING

The low pressure systems over the country are intensifying while high pressure systems are moving in south of the continent. Scattered thundershowers are therefore expected over the eastern, northern and central regions.

Die laedrukstelsels oor die land het verdiep terwyl hoëdrukstelsels nou suid van die land indruk. Verspreide donderbuie word dus verwag oor die noordelike, oostelike en sentrale gebiede.

Fairly deep low pressure systems have developed over the interior and moist air is advancing from the north and north-east over all areas except the Western Cape Province. Consequently scattered rain showers will occur over the greater part of the Republic, Botswana and northern S.W.A.

Betreklike diep laedrukstelsels het oor die binneland gevorm en vogtige lug uit die noorde en noordooste beweeg oor alle dele behalwe Wes-Kaapland. Gevolglik sal verspreide reënbuie voorkom oor die grootste deel van die Republiek, Botswana en noordelike S.W.A.

INFERENCE

DATE 19 - 12 - 19 70 DATUM

AFLEIDING

The low pressure system over the Cape south coast is associated with a sharp trough over the interior which is moving eastwards. Rain and thunder showers will therefore occur in the moist air advancing from the north over the eastern, central and northern areas of the country.

Die laedrukstelsel oor die Kaapse suidkus gaan gepaard met 'n sterk trog oor die binneland wat ooswaarts beweeg. In die vogtige lug wat van die noorde af oor die land instroom, sal reën en donderbuie dus voorkom oor die oostelike, sentrale en noordelike dele van die land.

The low pressure system south of Cape Town is moving eastwards and will cause cool, cloudy weather with light showers to advance over the southern Cape Province. Moist air from the north is still advancing over the O.F.S., Transvaal, Natal, Northern and Eastern Cape and further rain will fall over these areas.

Die laedrukstelsel suid van Kaapstad beweeg ooswaarts en sal koel, bewolkte weer met ligte buie oor Suid-Kaapland laat uitbrei. Voglige lug beweeg nog uit die noorde oor die Vrystaat, Transvaal, Natal, Noord- en Oos-Kaapland en verdere reën sal oor hierdie gebiede uitsak.

INFERENCE

DATE 2 / 12 / 1970 DATUM

AFLEIDING

The trough of low pressure over the eastern areas of the country is moving away so that further clearance will take place. The moist air-mass over the northern regions of Transvaal, Botswana and S. W. A. will, however, persist and further showers will occur over these regions.

Die trog van lae lugdruk oor die oostelike deel van die land beweeg weg sodat verdere opklaring sal plaasvind. Oor die noordelike dele van Transvaal, Botswana en S.W.A. sal die vogtige lugmassa stand hou en verdere buie sal oor daardie gebiede voorkom.

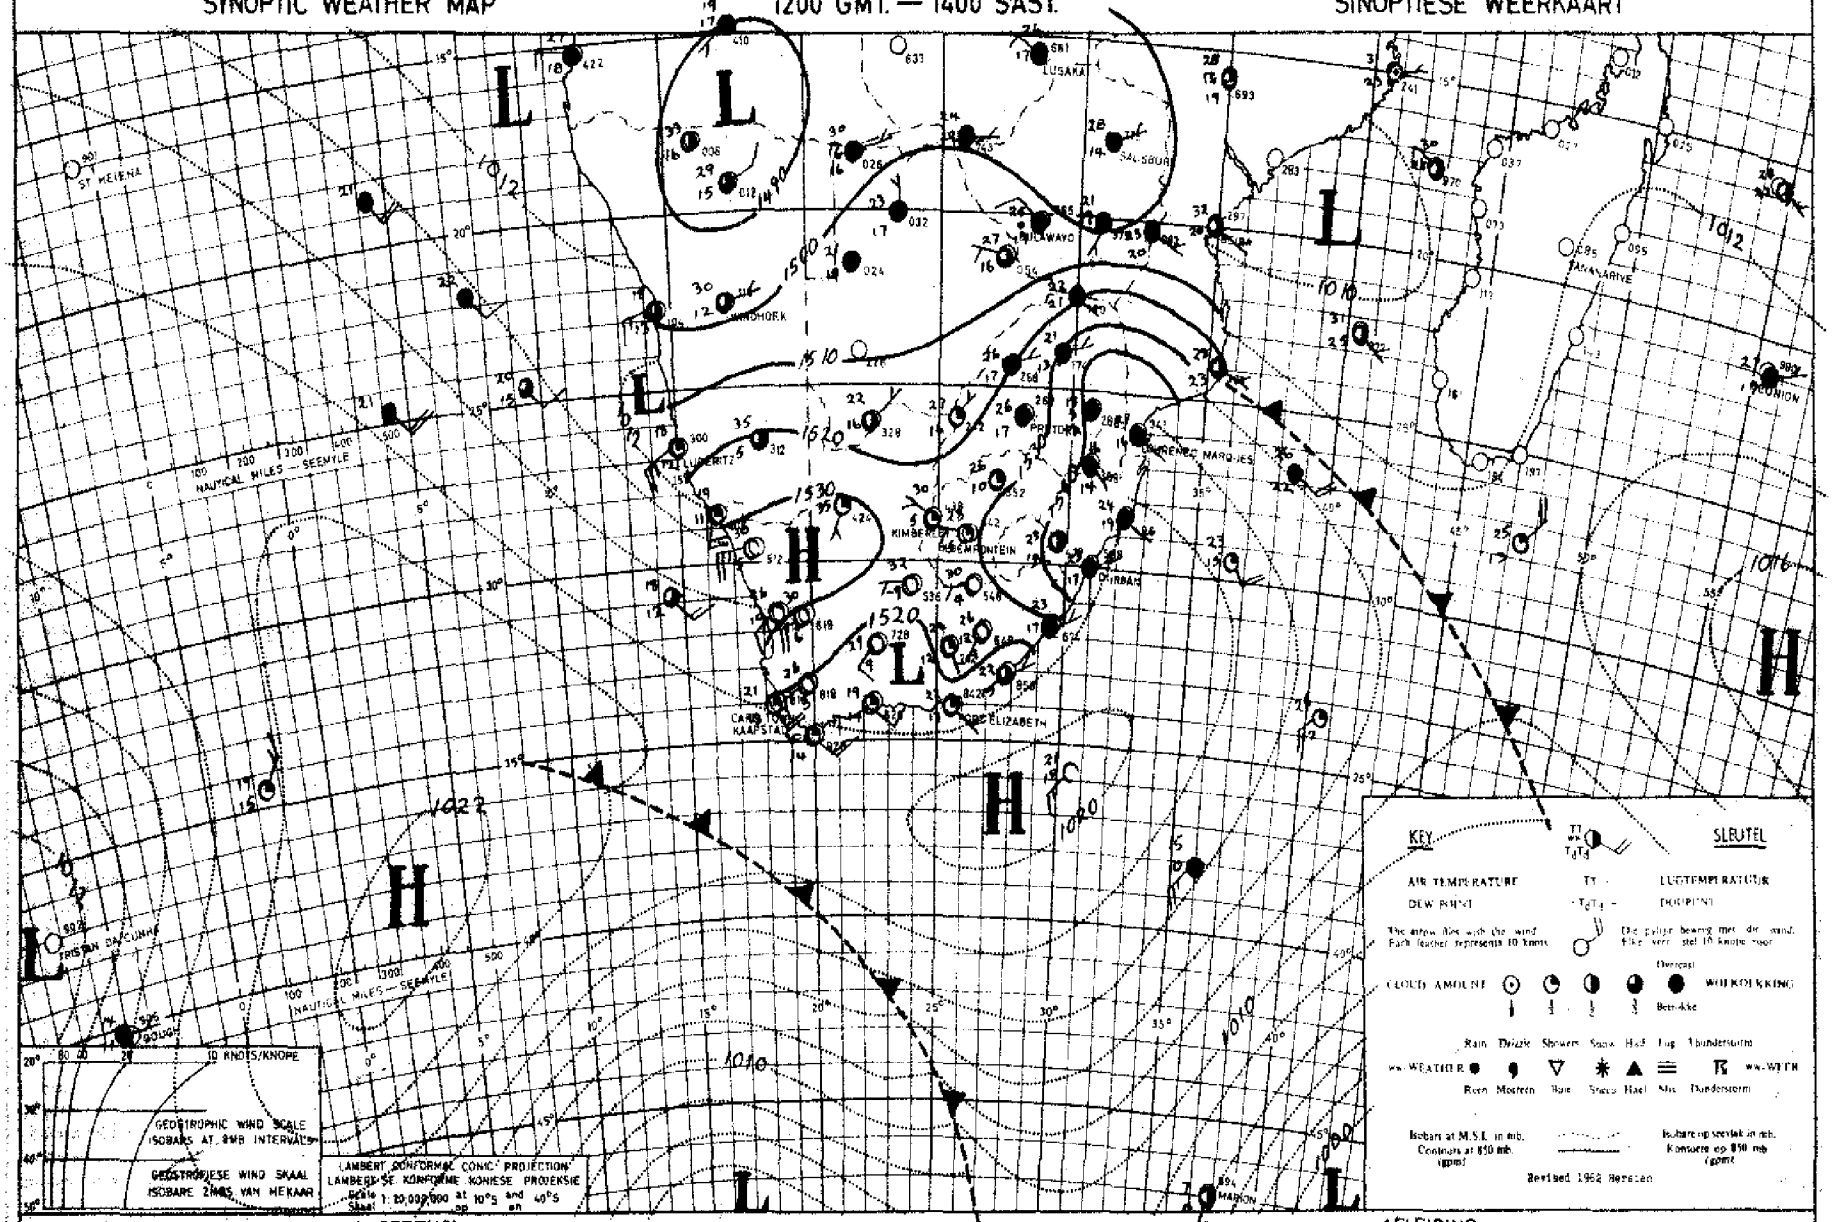
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 2.2.-.2.-.1970.DATUM AFLEIDING

Very moist air is flowing in over Transvaal and eastern Botswana while there is a low pressure trough over the latter areas. Consequently rain and showers will occur over these areas. A second high pressure system is moving in south of the continent and will cause cloudy weather with light rain over the southern and eastern coastal areas.

Besonder vogtige lug is aanwesig oor Transvaal en oostelike Botswana en daar is 'n lae druktrog oor laasgenoemde gebied. Gevolglik sal reën en buie nog oor hierdie dele voorkom. 'n Tweede hoëdrukstelsel sal van die weste af suid van die land indruk en bewolkte weer met ligte reën oor die suid- en oskus veroorsaak.

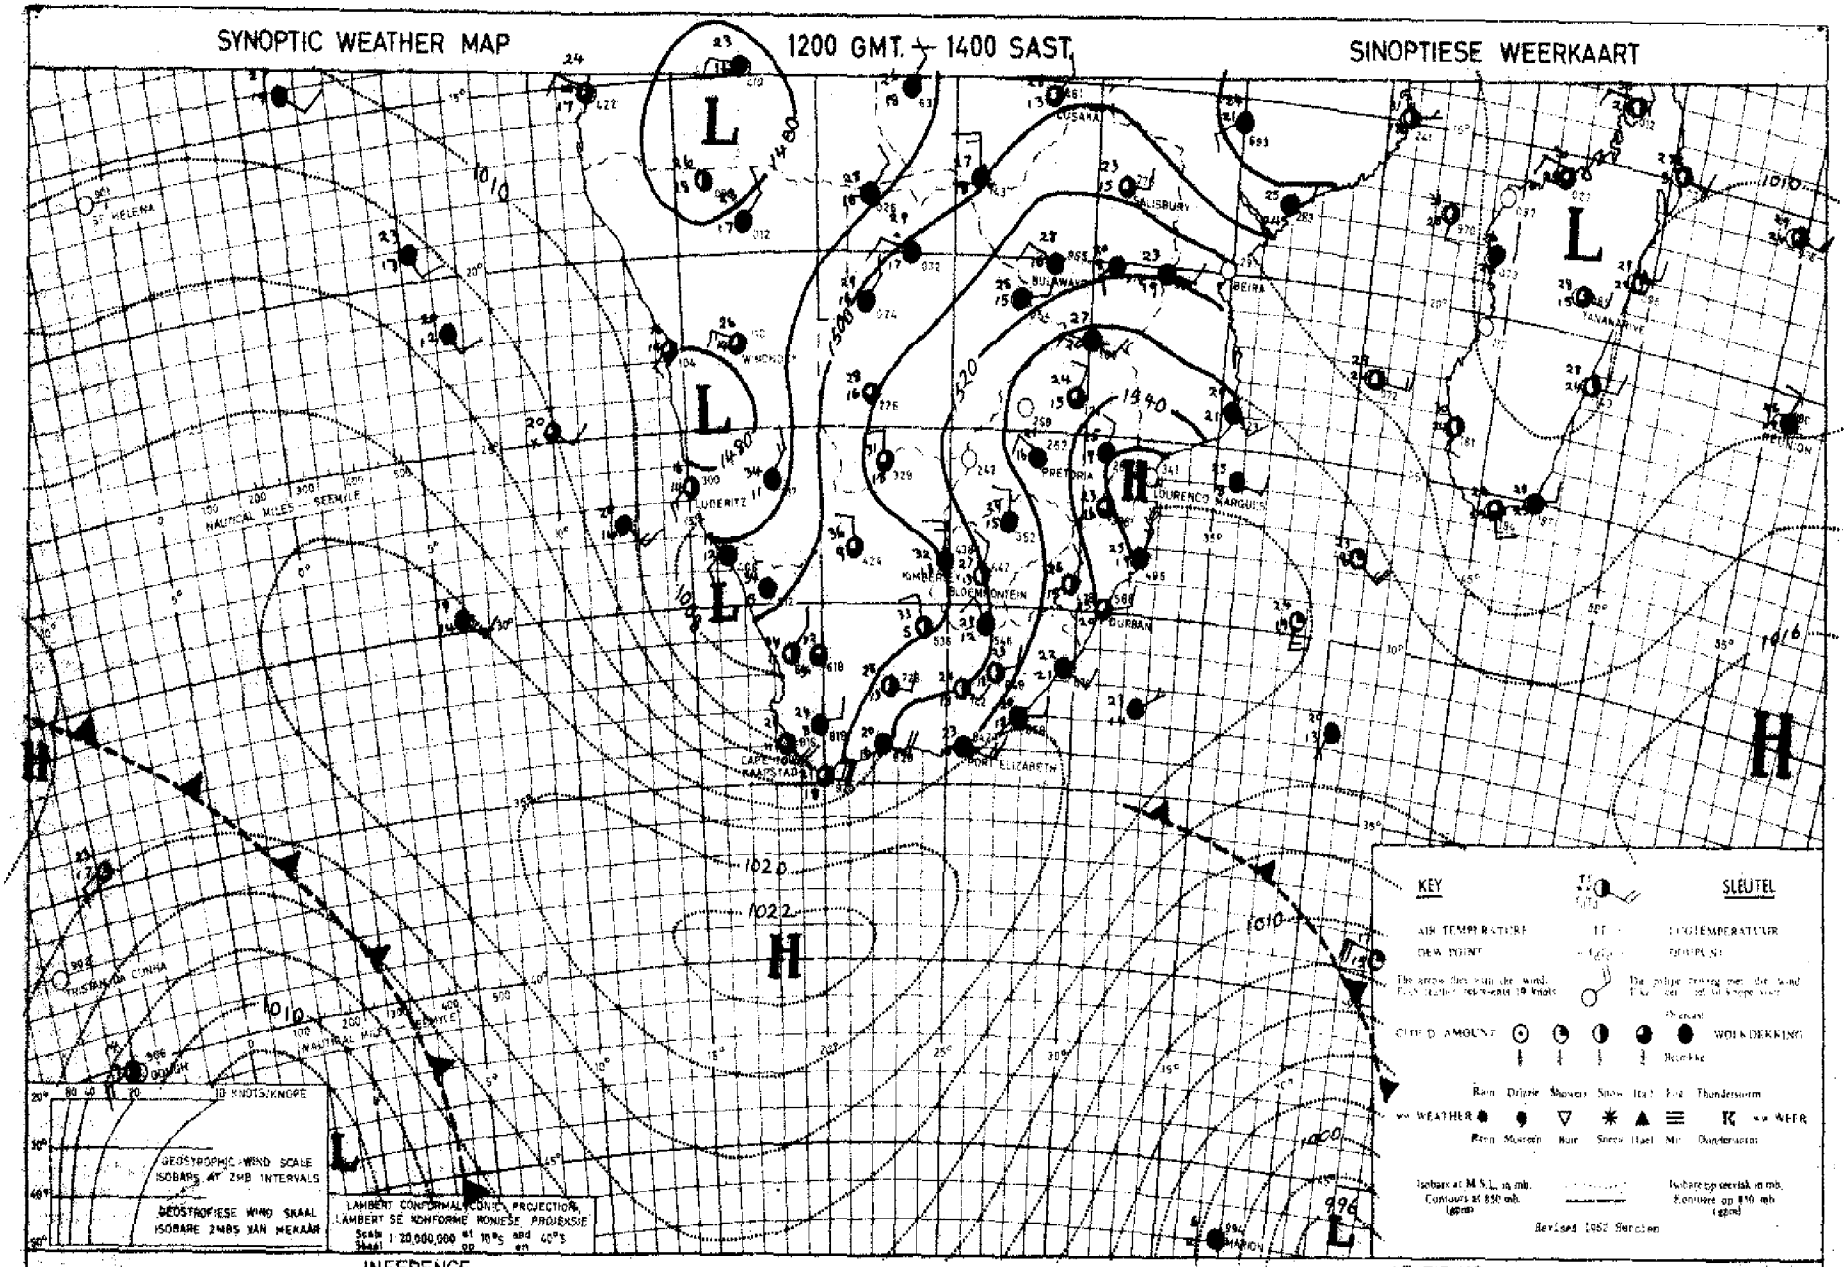
SYNOPTIC WEATHER MAP 1200 GMT. = 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 23 - 12 - 1979 DATUM AFLEIDING

Between the ridge of high pressure moving in south of the country and the trough of low pressure over the western parts moist air from the north will advance over nearly all regions. Scattered rain and thundershowers will therefore occur over all areas.

Tussen die rug van hoë druk wat suid van die land inbeweeg en die trog van lae druk oor die westelike gebiede sal vogtige lug uit die noorde oor feitlik die hele land uitbrei. Verspreide reën en buie sal dus oor alle gebiede voorkom.

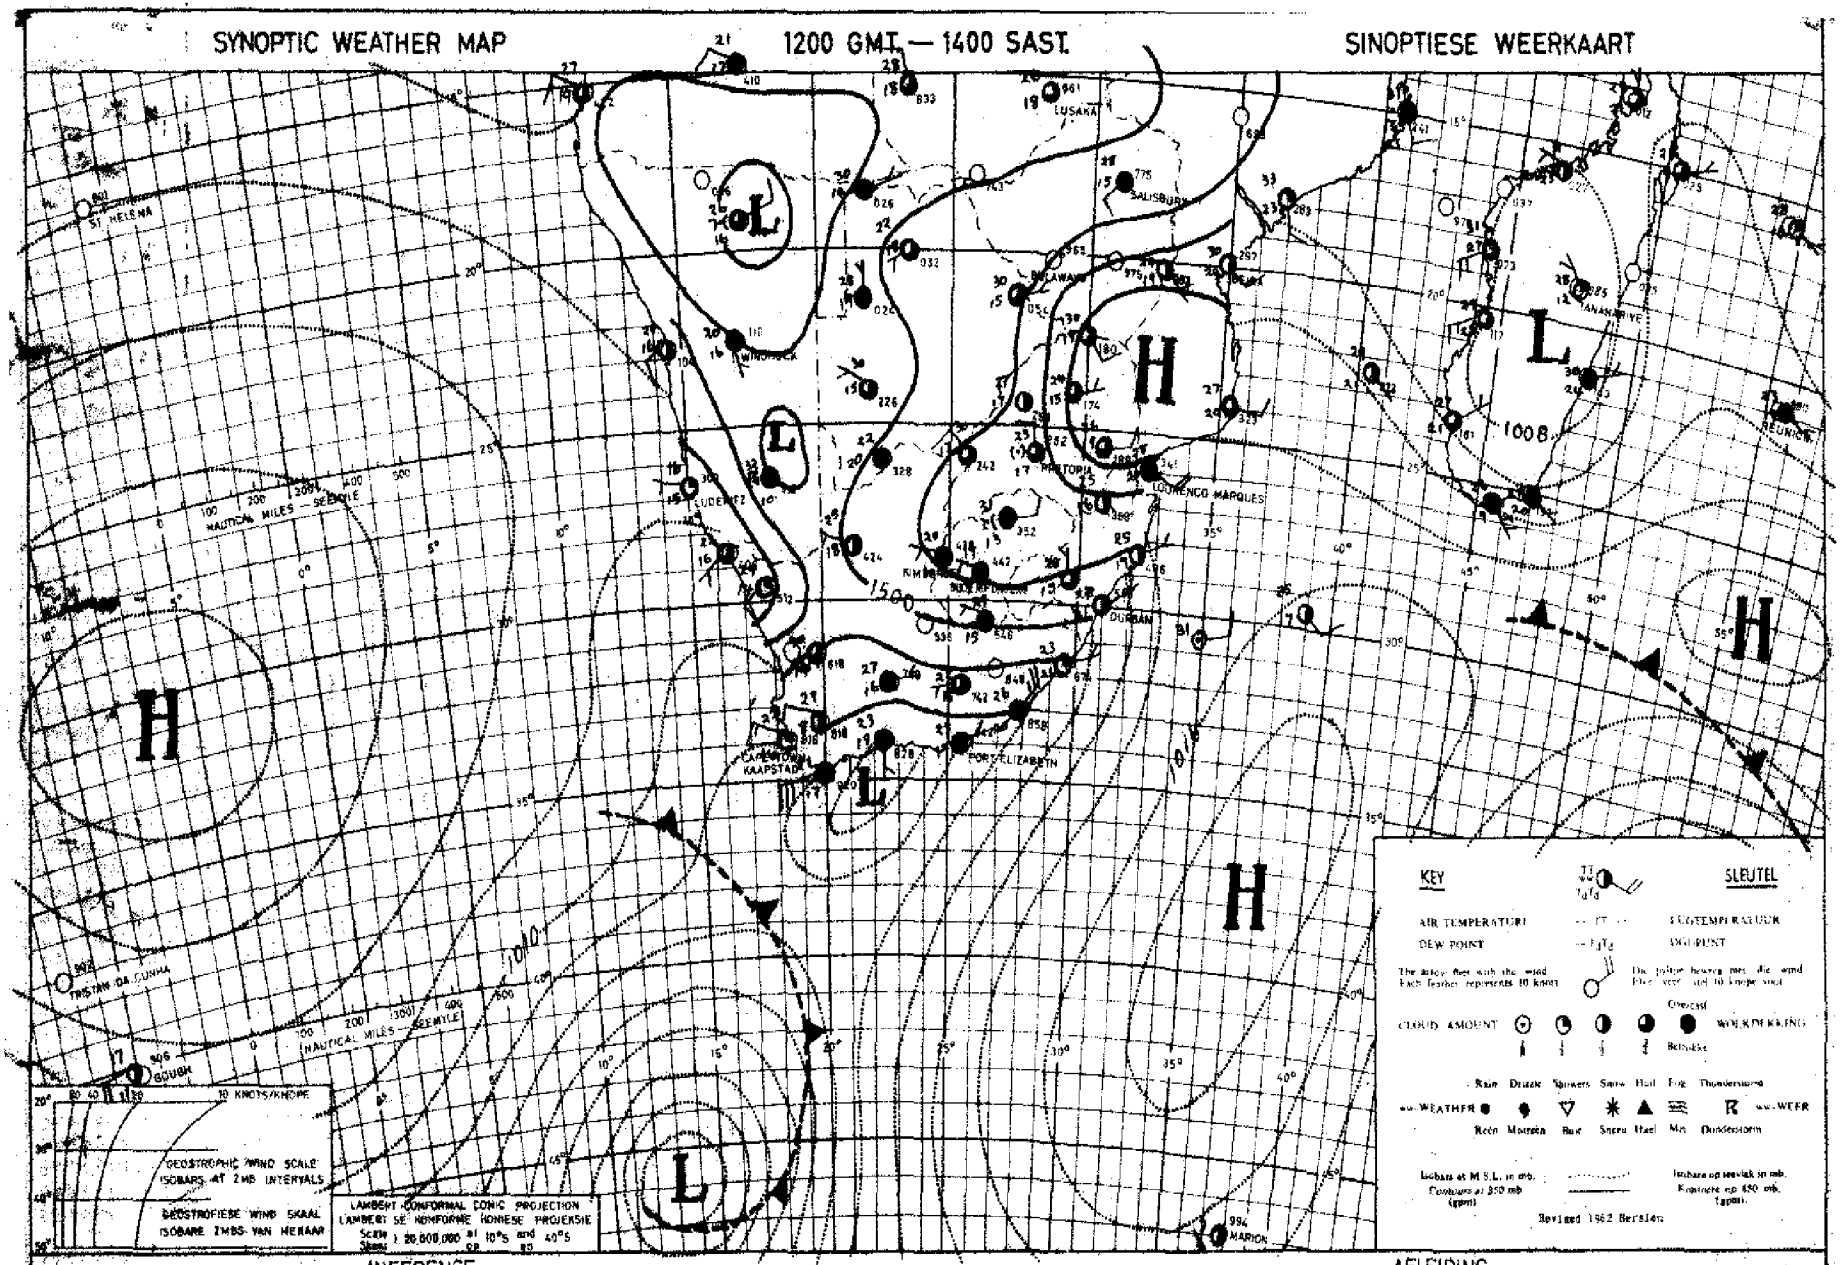
SYNOPTIC WEATHER MAP 1200 GMT — 1400 SAST SINOPTIESE WEERKAART



INFERENCE DATE 24 - 12 - 1970 DATUM AFLEIDING

With a pronounced trough of low pressure over the Western Cape and S.W.A. and moist air flowing southwards to the east of this trough line, general showers and thundershowers will occur over the eastern half of the Cape, the Free State, the Transvaal and Natal.

Met 'n uitgesproke trog van lae druk oor Wes-Kaapland en S.W.A. en vogtige lug wat oos van die trogas suidwaarts stroom sal algemene buie en donderstorms oor die oostelike helfte van die Kaapprovinsie, die Vrystaat, Transvaal en Natal voorkom.

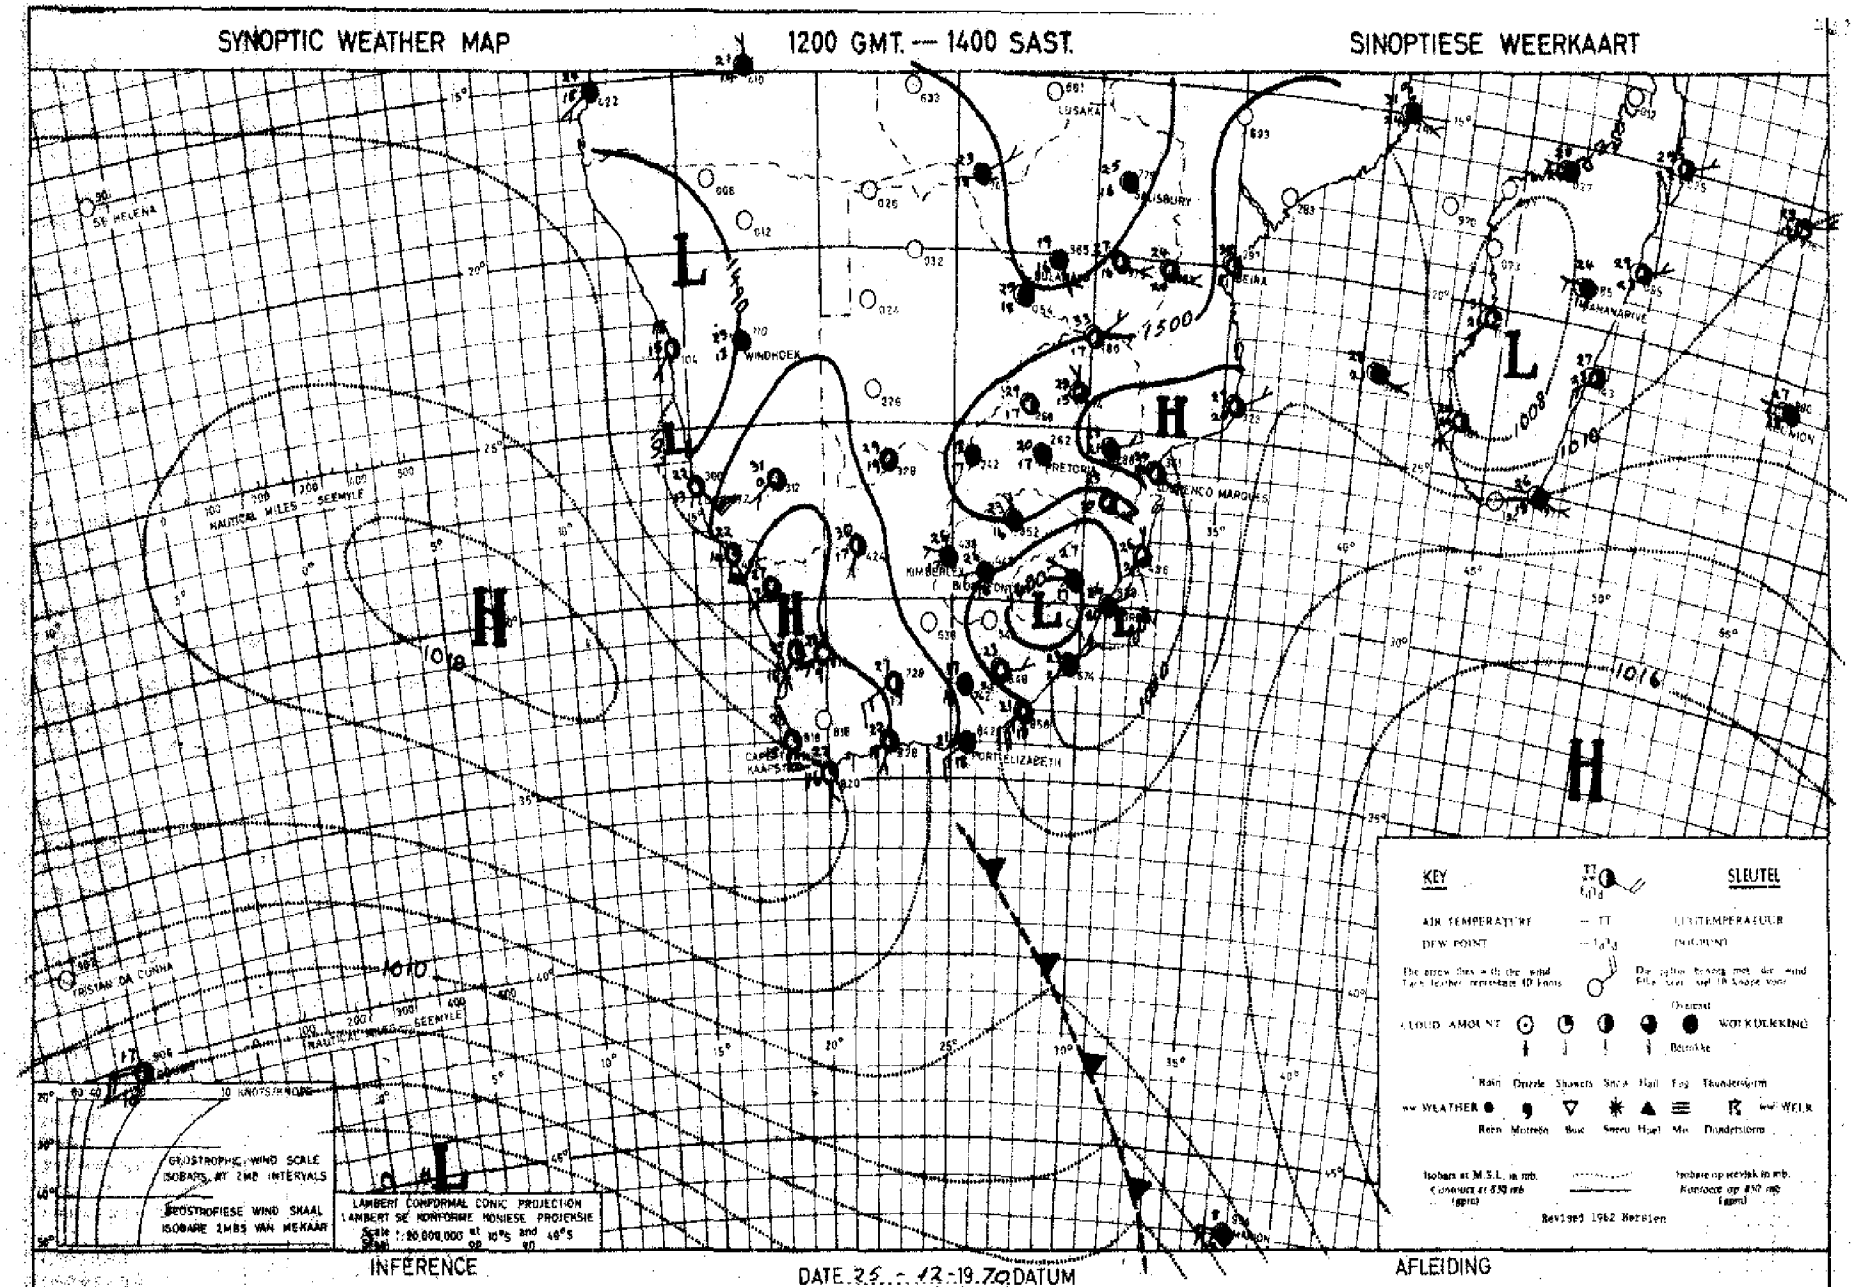
SYNOPTIC WEATHER MAP — 1200 GMT. — 1400 SAST. — SINOPTIESE WEERKAART



INFERENCE — DATE 25 - 12 - 19 70 DATUM — AFLEIDING

Scattered thundershowers will occur over the eastern half of the Republic as a result of the trough of low pressure extending north-westwards from Durban over the interior. Dry air is, however, being fed in over the western regions by the high pressure system moving in there.

Verspreide donderbuie sal voorkom oor die oostelike helfte van die Republiek weens die trog van lae druk wat van Natal noordweswaarts oor die binneland strek. Droë lug word egter oor die westelike helfte ingevoer deur die hoëdruksstelsel wat daar inbeweeg.

AFLEIDING
The air is still very moist over the north-eastern interior and over Northern and Central S. W. A. Further showers will consequently fall over these areas.
Die lug is nog baie vogtig oor die noordoostelike binneland en oor Noord- en Sentraal - S. W. A. en gevolglik sal verdere buie oor hierdie dele uitval.

INFERENCE

DATE 27-12-1970 DATUM

AFLEIDING

The cold front passing south of the land will cause cool cloudy weather with showers to spread over the southern and eastern coastal regions. Thundershowers will still occur over the areas east of the trough of low pressure over the interior.

Die koufront wat suid van die land verby beweeg, sal koel bewolkte weer met ligte buie laat uitbrei oor die suidelike en oostelike kusgebiede. Donderbuie sal nog uitgaan oor die gebiede oos van die trog van lae druk oor die binneland.

INFERENCE

DATE 29-12-1970 DATUM

AFLEIDING

Conditions will remain favourable for rain and thundershowers over the eastern and northern parts of the country as a result of the low pressure systems over Botswana, S.W.A. and Eastern Cape. The cold front moving in south of the continent will cause cool, cloudy weather with light showers to persist over the south west coasts.

Toestande bly gunstig vir reën en donderbuie oor die noordelike en oostelike dele van die land as gevolg van die laedrukstelsels oor Botswana, S.W.A. en Oos-Kaapland. Die koufront wat suid van die land inbeweeg, sal bewolkte weer met ligte buie oor die suid- en ooskus laat voortduur.

Revised 1962 Bartsier

INFERENCE DATE 20 - 12 - 1972 DATUM AFLEIDING

The high pressure system over the western parts of the country is feeding in dry air over these regions which will spread to the central Republic also. Moist air is still moving over most of Transvaal where scattered showers will occur. The cold front approaching from the south-west will cause cloudy weather with showers to advance over the southern and eastern coasts.

Die hoëdrukstelsel oor die westelike dele van die land voer droë lug oor die dele in wat ook na die sentrale Republiek sal uitbrei. Vogtige lug beweeg egter nog in oor die meeste dele van Transvaal waar verspreide buie sal voorkom. Die koufront wat van die suidweste nader kom, sal bewolkte weer met buie laat uitbrei oor die suid- en ooskus.

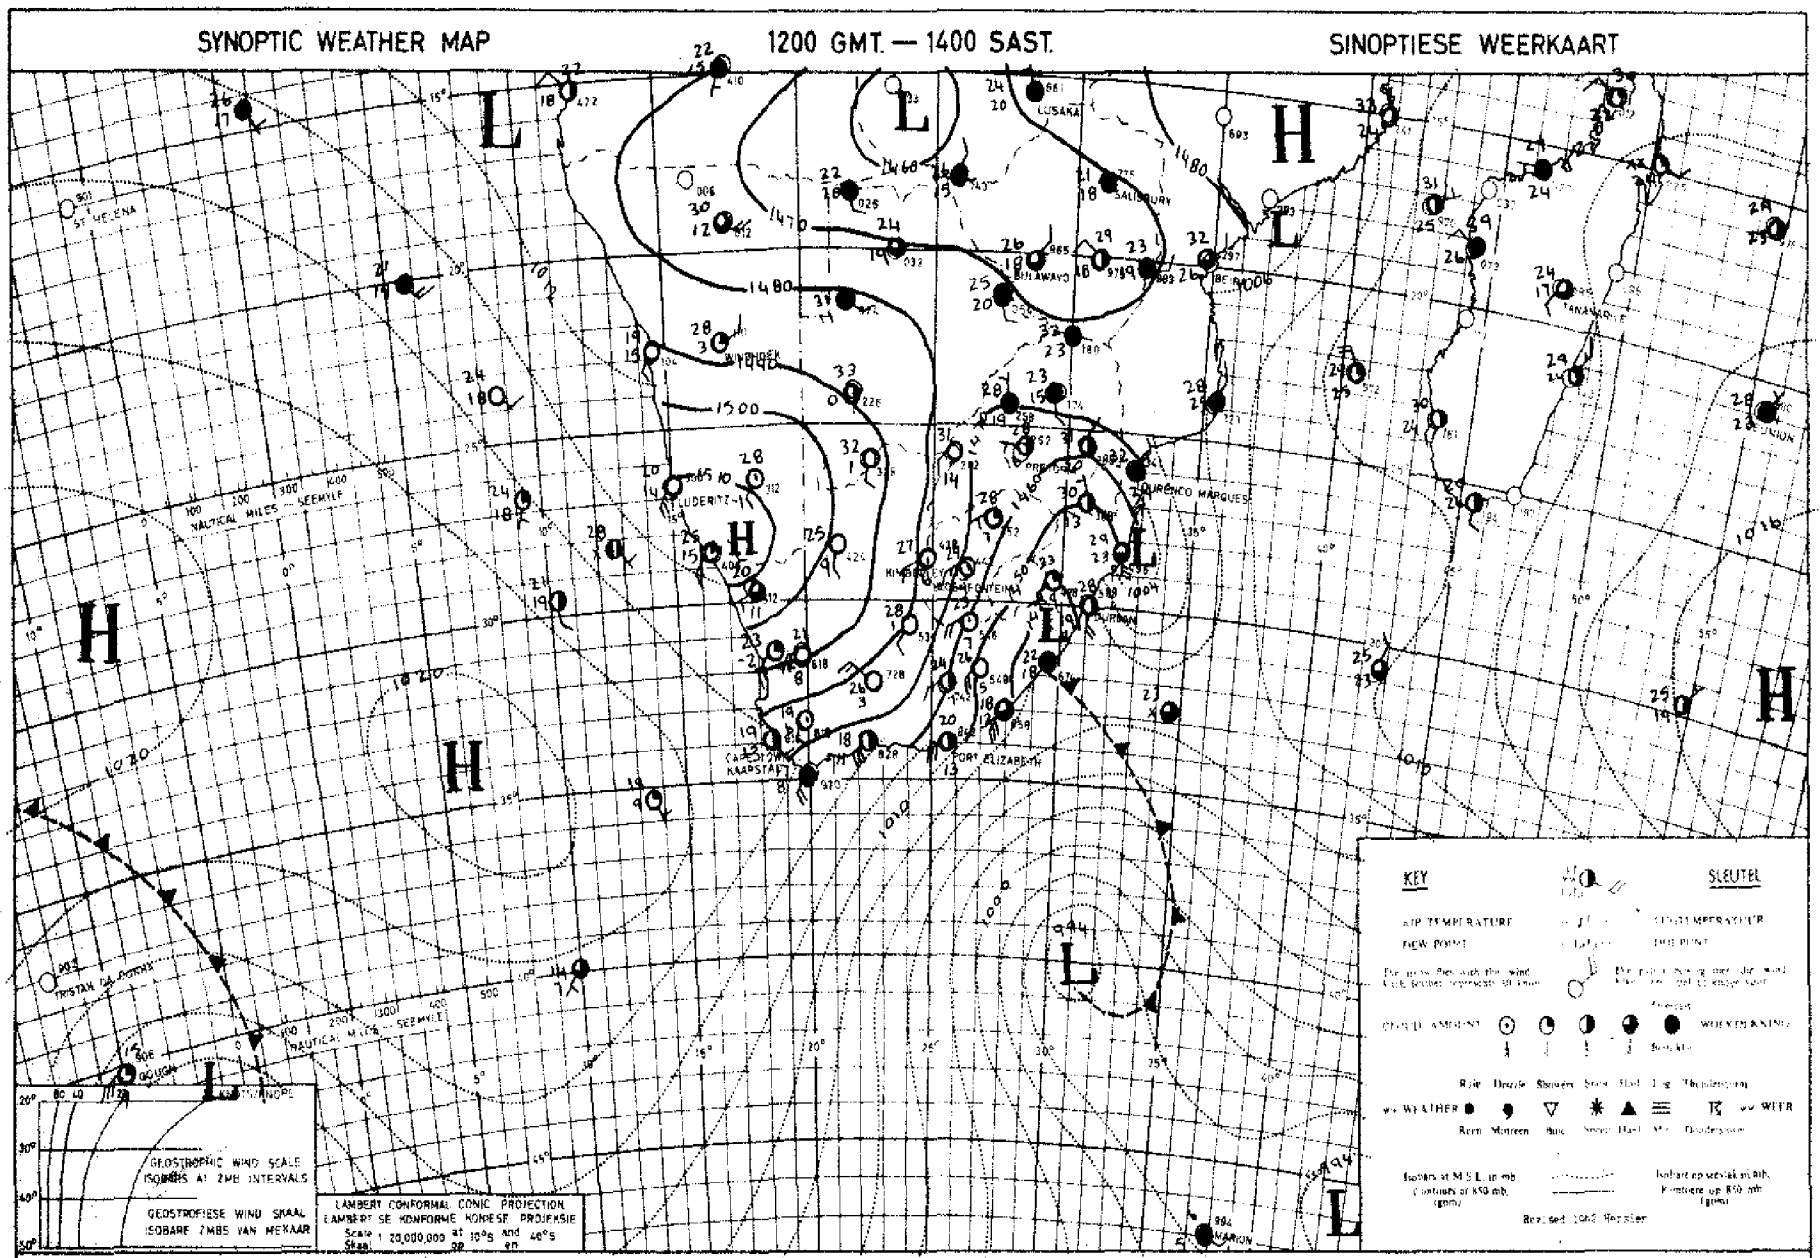
SYNOPTIC WEATHER MAP 1200 GMT. — 1400 SAST. SINOPTIESE WEERKAART



INFERENCE DATE 31-12-1970 DATUM AFLEIDING

The high pressure system over the western parts of the country has caused dry air to spread over the Cape Province, S.W.A. and the Free State. Warm, moist air is still flowing over the central and northern areas of Transvaal where further rain and showers will occur. Behind the cold front cool, cloudy weather will spread over Natal and Eastern Transvaal.

Die hoëdrukstelsel oor die westelike deel van die land het droë lug reeds laat uitbrei oor die Kaapprovinsie, S.W.A. en die Vrystaat. Warm, vogtige lug beweeg nog oor Noord- en Sentraal-Transvaal waar verdere reën en buie sal uitsak. Agter die koufront sal koel, bewolkte weer uitbrei oor Natal en Oos-Transvaal.
