Jamaica Weather Report, 1960

BEING A SUMMARY OF OBSERVATIONS COMPILED FROM RETURNS OF OFFICIAL STATIONS AND VOLUNTARY OBSERVERS

CONTENTS

Map of Jamaica.....

Introduction.....

List of Stations.....

Summary of Parish Rainfall for the year 1960

Monthly Weather Reports January-December, 1960

INTRODUCTION

Meteorological services in Jamaica are now maintained by the West Indies Meteorological Service, formerly known as the British Caribbean Meteorological Service, formed in 1951 to serve all of the British Territories in the Caribbean and the Bahamas. With the establishment of the West Indies Federation in May, 1958, the Service was taken over and administered by the Federal Government. The headquarters of the Director of the Service are in Federal House, Port of Spain, Trinidad and the headquarters of the Jamaica Division remain at Palisadoes Airport, Jamaica.

The list of stations provides the most recent available information on the locations and elevations of stations. It would be appreciated if any errors can be notified to the Assistant Director, Jamaica Division, under whose supervision the Report is prepared and published. Also included are the names of authorities and private persons responsible for the maintenance of stations, while the extent and diversity of this list reveals the considerable effort made by large number of individuals in providing the basic data from which the final tabulations are derived. The Meteorological Service is indebted to all the various observers, both official and voluntary, who regularly maintain such a high standard of observing. Without their assistance it would not be possible to compile this series of valuable and informative reports. In particular, tribute must be paid to the Ministry of Agriculture and Lands through whose good offices clerical staff were made available to carry out much of the tabulations.

EXPLANATORY NOTES

1. The time used is Jamaica Standard Time, also known as Eastern Standard Time, which is five hours slow on Greenwich Mean Time. The times of observation at the climatological stations are 07h. (7 a.m.) and 15h (3 p.m.) but the synoptic stations at Morant Point Lighthouse, Negril Point Lighthouse and Palisadoes Airport take observations at 07h. 13h. and 19h. (7 a.m., 1 p.m. and 7 p.m.). Additional observations are taken every hour at Palisadoes Airport but are not published in this Report.

2. So far as is possible, all instrument are sited in approved standard positions to give fully representative readings.

3. Rainfall is measured in inches at 7 a.m. and the total for the previous 24 hours is regarded as having fallen on the previous day. A "day of rain" is a day on which at least 0.01 inch is recorded. The mean monthly rainfall for each Parish included in the Summary of Parish Rainfall is obtained by taking the total rainfall reported from all of the stations within that Parish and dividing the total by the number of stations. The Island rainfall is the mean of all the Parish rainfall. The 'average' rainfall is that for the 25-year period 1925–1949, as employed in previous Reports, while the 'normal' rainfall given in monthly summaries is derived from all available data covering a longer period.

4. Atmospheric pressure readings are converted to the equivalent readings at mean sea level under conditions of standard temperature and gravity and are expressed in millibars, 1,000 millibars being equal to a pressure of 29.53 inches of mercury.

5. Cloud amounts are expressed in 'oktas', an 'okta' being one-eighth of the sky.

WEST INDIES METEOROLOGICAL SERVICE

JAMAICA WEATHER REPORT

MONTHLY SUMMARY OF OBSERVATIONS

MARCH, 1960

Island rainfall was 68% above average. This was most marked in the parish of Portland where the rainfall was four times greater than normal.

Station	Mean Pressure (mbs.)	Temperature: Means 07 hr. (°F)	13/15 hr. (°F)	19 hr. (°F)	Max. (°F)	Min. (°F)	Max. and Min. (°F)	Extreme Max. (°F)	Extreme Min. (°F)	Relative Humidity 07 hr. (%)	13/15 hr. %	19 hr. (%)	Sunshine Mean hrs.	Sunshine % of Poss.
