Notes:

1. The station elevation refers to the height of the barometer cistern above Mean Sea Level.
2. There are occasional errors in the co-ordinates as given in the individual station summaries; the correct figures are given in this list.
3. Instrumental corrections are applied at the time of observation.
4. All thermometers are exposed in louvred screens.
5. Extreme temperatures are read in the morning and the maximum is entered to the previous day.
6. Rainfall is read in the morning (normally 1200 G.M.T.) and is entered to the previous day.
7. ... implies that the information is not available or is unreliable.
