

Chart IX. Cloudbelts of Venus.

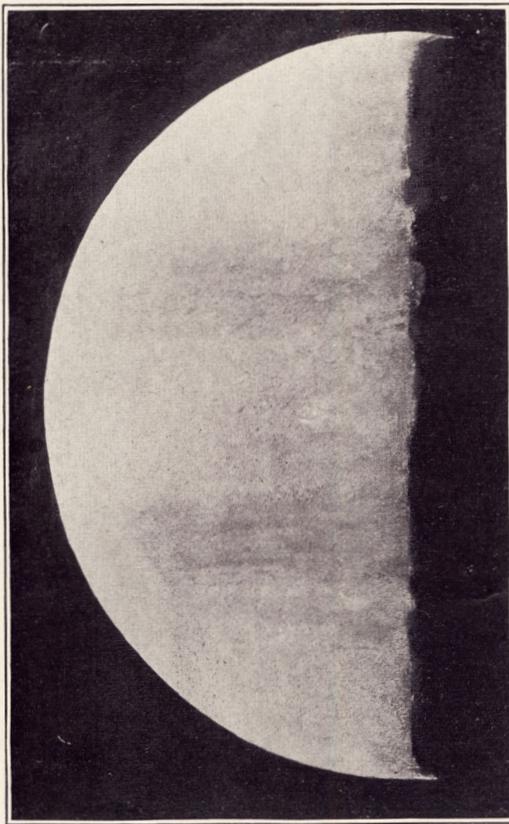

FIG. 2.—Hypothetical sketch of Venus, with her axis making a large angle with the plane of her orbit.

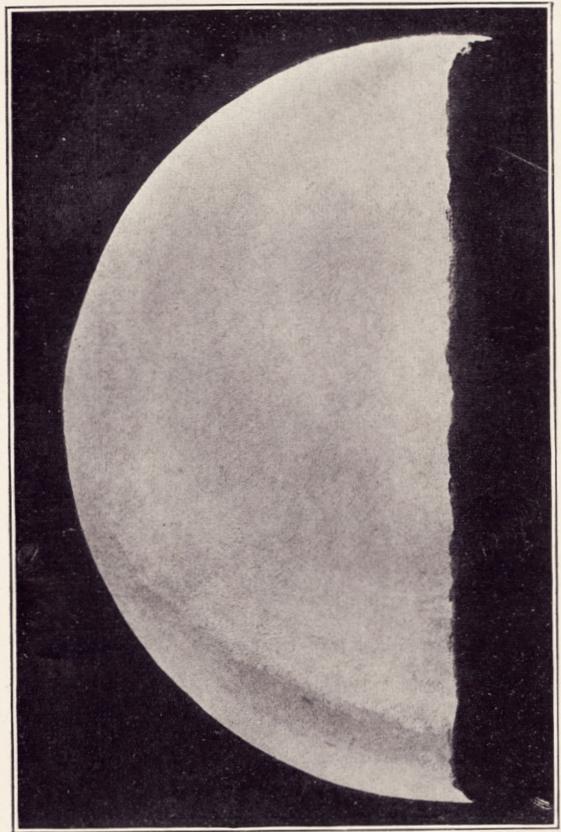

FIG. 3.—Hypothetical sketch of Venus, with her axis inclined 35° to the ecliptic and the warmer pole toward the observer.

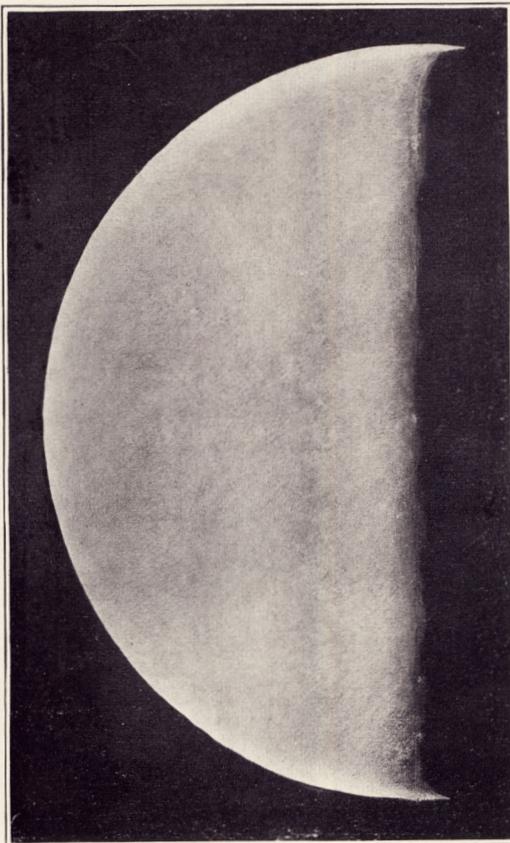

FIG. 4.—Venus as seen. Note the faint band of shade approximately parallel to, but at some distance from the terminator.

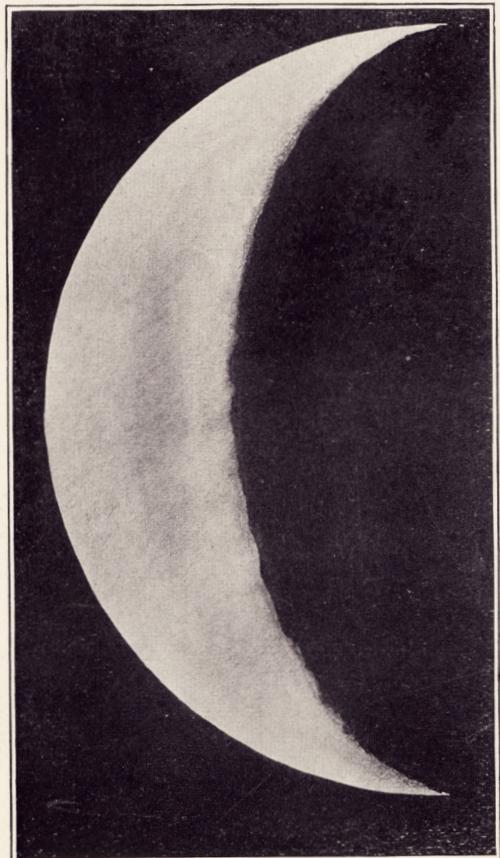

FIG. 5.—Venus as seen.
