

ALPHABETIC INDEX FOR THE
YEAR 1931

RAREBK
QC
851
.W49
1931

Abnormal weather, February 17.
African lightning superstition, January 16
Air as a shield, January 19
Air conditioning, July 7
Airship weather studies, October 7
Air trajectories, September 23
"Alberta lows", April 22
Almanac weather predictions, December 9
Amazing tornado story, October 30
American ball lightning, July 17
Anchor ice in Russia, December 25
Ancient fallacy, June 20
Ancient weathervane, May 27
Antarctic blizzards, October 16
Arctic ice and arctic climate, May 22
Arctic weather stations, February 3
Ascending ball lightning, July 28
Atmospheric mystery, March 7
Aurora observatory, January 14
Australian dust storms, September 12
Australian tornadoes, May 4
Automatic weather instruments, April 8
Autumn colors, October 29
Avalanche winds, July 13

Bad weather helps business, April 3
Ball lightning? February 27
Ball lightning at sea, July 21
Ball lightning or corpuscles? July 25
Ball lightning reports, August 11
Barometer as weather glass, September 26
Bell-ringing in storms, February 6
Biggest barometer, October 21
Birds as weather vanes, September 3
Bird song and weather, October 19
Birth of a waterspout, July 24
Blackthorn winter, April 24
Book about climate, April 4
Bright side of a drought, July 1
British rainfall, June 24
Brrrrr, December 28
Buran, April 10
Burning-glass sunshine records, October 9

Charting upper-air winds over oceans, June 26
Chicago's rain god, February 21
Chinese floods, September 2
Circling fires, December 29
Cleaner air in Britain, March 27
Climate and colonization, June 11
Climate and the calendar, January 5
Climatic changes, January 9; May 28
Climatic zones, February 7
Climbing speed of spring, May 20
Colliding with a waterspout, August 4
Comes the typhoon, April 7
Connecticut hailstorm, May 11
Cool reading for the dog days, August 3
Creatures of the snow, October 26
Cricket thermometers, June 2
Crimson cliffs, October 28
Crop reductions due to weather, June 17
Crude weather measurements, May 18
Crust-hunting, December 23
Cyclone, August 1
Cyclonopaths, January 31

Dating the dandelions, July 15
Death Valley climate, October 14
"Degree-days", February 16
Desert downpours, March 23
Desert industry, June 27
Desert rain-gauges, April 15
Desert returns, October 22
Distant visibility, June 12
Dodging thunderstorms, January 30
Donkey barometer, November 19
Double lunar rainbow, January 1
Double sunsets, April 27
Downpours in a dry country, April 11
Drought and ragweed pollen, July 18
Drought and wild animals, December 5
Drought-cracked buildings, January 21
Drought effects, March 12
Dutch weather glass, December 17

Effect of humidity, October 13
Effects of a lightning stroke, August 26
Electric hazard of ballooning, April 25
Encyclopedia of meteorology, July 23

English channel, May 7
English tornado, September 7
Etesians, July 4
"Euzcadi" typhoon, June 19
Excessive rainfall, June 18
Ex-miracles of the air, May 19
Exploring climate, February 9
Eye of the storm, October 6

Facts, January 23
Fata morgana, March 9
Feat of a tornado, August 24
"Fine day", January 12
Fire from a tornado, November 25
Flood news, February 14
Fog at New York, July 14
Forest air, June 15
Freaky ball lightning, April 29
Freezing of Great Salt Lake, April 13
French ice cave, December 31
Fresh water from sea ice, November 16
"Furious Fifties", etc., September 10

Gauging a hot spell, July 9
Glacials and interglacials, February 25
Good flying climate, November 7
Goosebone, November 26
Graupel, March 28
Great lakes storm signals, April 14
Gulf stream temperatures, April 6

Hail oddities, April 30
Headlights for fog, March 21
Hearing the aurora, September 30
Heaviest snows, December 30
Hoarfrost in the henhouse, March 3
Holiday weather, October 2
How hot do things get in sunshine? September 24
How much ice? August 8
How Newton measured the wind, September 25
Huge weathervane, August 5
Hurricanes on our shores, September 22
"Hyther", August 17

Ice age climates, May 21
Ice age weather calendar, June 6
Iceberg dangers, July 3
Iceberg forecasting, October 5
Ice-blink and water sky, September 17
Ice caves, December 24
Ice-clad birds, March 16
Ice fringes, February 24
Ice-storm deposits, January 2
Ideal indoor weather, February 28
India's rainy monsoon, June 23
Indoor ball lightning, May 16
Industrial meteorology, October 27
Insects and air currents, August 20
Insects and wind, November 24
Instructive hail statistics, September 21
Iridescent clouds, June 8
Italian tornado, July 10

"Jocky and Jenny", June 30

Kipling wind name, December 4
Knocked out by ball lightning, August 29

Labor-saving type, November 9
Large arctic icebergs, January 6
Library air, December 21
Lightning and forest fires, July 27
Lightning model, February 23
"Lightning rings" in trees, March 13
Lightning-rod notions, April 1
Local air phantoms, November 18
Local "weather sharp", October 3
Locating icebergs, January 7
Lofty winds, August 21
London fog, January 17
Long season in May, May 29
Lord Robert's cyclone, September 28
Luminous rain, August 15
Luminous waterspouts, November 14

May dew, May 12
Measuring upper winds with smoke, August 6
Measuring snow, January 26

Memorable winter, January 15
"Messengers", August 10
Meteorological music, April 28
Meteorology in art, September 9
Meuse valley fog, February 13
"Miraculous" showers, October 31
Misplaced snowstorms, November 27
Money-making mirage, May 5
Montreal's winter floods, December 26
More ball lightning, October 12
Most dramatic mirage, October 23
Mountain snowfall, January 8
Mud floods, November 20
Musical anemometers, August 7
Mystery of the sea, August 12

Natural hygrosopes, October 10
Nature's snowballs, January 22
Neglected mystery, March 24
New England ball lightning, August 25
Newspaper storm warnings, September 8
Noise before a hail storm, October 24

Odor of the rainbow, November 23
Oimekon, November 11
Orchard-heater smoke, February 4; November 13
Ozone layer, April 9
Ozone myth, March 11

Paris observatory, May 14
Pennsylvania ice cave, June 3
Perennial weather wizard, March 10
Photographing the "Green Flash", September 4
Pictures of climate, March 6
Pictures of the "Tablecloth", November 2
"Planets", April 16
Plant weather bureau, June 5
Pogonip again, February 10
Polar ice and weather, April 20
Protection from blowing sands, July 31
Pronunciation of "Fahrenheit", May 1

Queer sounds in the air, March 17.

Rainfall contrasts, January 3
Rainfall interception, January 24
Rainfall myth, January 20
Rain forests, November 5
Rainiest place in North America? November 28
Rain-tree, February 20
Rain with a moral, August 27
"Rarity" of ignis fatuus, April 21
Red rainbows, May 9
Revising Exodus, September 11
Roaring mountains, March 4
Roger's blast, September 5

"St. Elmo" by day, April 18
St. Elmo's fire, June 10
Sampling snow, February 5
Sandstorm legends, September 16
Scaring away storms, February 11
Scotland's first barometer, June 13
Sea ice, April 17
Sheet lightning, August 19
"Shower" of stones, June 22
Showers of birds, January 10
Slow-motion lightning, December 11
Smoke from forest fires, April 23
Smoke in New York air, December 19
Snow below rain, July 20
Snowfall in the U. S., December 18
Snow surveys, January 13
Solar radiation, December 7
Some Australian winds, September 14
Some drought effects, May 2
Some pranks of lightning, May 23
Some "thermometers" and a "weather glass", October 1
Sounding-balloon recoveries, August 22
South Atlantic "Dew Pond", March 2
Southern frost limits, December 10
Southernmost weather station, November 3
Storm in Parliament, June 1
Storms and steeples, November 30
Strange lights at sea, March 25
Strangest lightning, March 19

Stubborn delusion, July 6
Summer capitals, August 31
Summer frosts, June 16
Sun and shade in mountains, July 16

Talking fog beacon, February 26
Temperatures in Canada, May 26
Temperatures overhead, September 15
Terrible march, June 9
Testing "atmospheric comfort", December 16
Texas northers, January 29
That equinoctial storm, September 19
Thirsty plants, September 1
This and that, May 30
Three-year drought, August 13
Thunderstorm, January 28
Traveling climatologist, December 22
Traveling lightning rods, March 14
Truth or fable? August 28
Two air mysteries, December 15
Two European tornadoes, November 10
Two fateful storms, December 3
Typhoid follows drought, March 18
Typical tornado, June 4

Unique excursion, July 8
Unreliable climatic records, May 15
Upper-air research, March 31
Upper-air study with sound waves, February 19
Utilizing fog drip, March 20

Verifying weather forecasts, May 8
Verkhoyansky, July 22
Vertical air currents, July 2
Volcanic lightning, August 14
Volcano as a wind vane, September 18
Volunteer weather observers, February 12

Water shortage in tons, March 5
Waterspout photograph, May 6
Weather forecasts by flashlight, October 8
Weatherman's kite, February 2
Weatherman's vade mecum, June 25

"Weather hops", November 12
Weather lights, October 20
Weather observing under difficulties, November 6
Weather science and weather prediction, February 18
Weather vane notes, May 25
Wedgwood's horse, October 15
Weekly weather records, November 21
Weight of air, August 18
What is a desert, December 1
What is ball lightning, April 2
What is it? March 30
Where the air is blue, July 11
Why cloudbursts? December 12
Will-o'-the-wisp, March 26
Wind-bent trees, June 29
Wind-blown plants, November 4
Wind-borne dust, December 2
Windmills and wind, May 13
Winds of the plains, October 17
Wind warnings on railways, July 29
Windy land, December 14
Wonderful glacier, November 17
Word "Smog", January 27
Work of a cloudburst, December 8
World's windiest region, September 29
