

ALPHABETICAL INDEX FOR
THE YEAR 1934

RAREBK
QC
851
.W49
1934

Abnormally normal weather, July 11
Abnormal weather, July 10
Acoustic mysteries, June 23
Air conditioning and stock raising, April 27
Air-mass analysis, February 14
Air-pockets in sand, June 25
Air-soundings by railroad, January 30
All-important monsoon, June 19
Almost rainless land, August 30
American weather chiefs, April 6
Animal fogs, May 30
Antarctic ice, January 1
Antarctic spectacle, April 25
Arctic lands, November 28
Arizona sandstorm, April 19
Autumn colors, October 11
Autumn limits, October 9
Autumn phenology, October 13
Autumn's progress, October 17
Autumn weather, October 12
Avalanche dangers, February 20
Aviators' weather knowledge, April 28

Bad tornado years, May 7
Banner clouds, March 17
Banner hurricane year, April 17
Bashful dust devils, December 18
Battle in the sky, November 24
Beaufort scale, April 9
Bees as barometers, January 24
Beneficent frosts, May 14
Berks county weather prophets, November 1
Birth of a whirlwind, August 29
"Brightening" the weather report, April 30
British climate, September 6
British dialect weather terms, October 3
British rain observers, February 1
Browning's rainbow, June 13
Buys Ballot's law, September 8

Caterpillar barometer, May 5
"Ceiling", April 7
Center of a typhoon, November 27

Atmospheric Administration
U.S. Dept. of Commerce

Classifying rain, September 13
Cliff eddies, January 23
Climate geography, June 15
Cloud photograph competition, February 6
Cloud pictures, March 9
Clouds as a thermostat, February 17
Clouds formed by airplanes, May 16
Coldest afternoons- warmest nights, January 29
Cold-feeling air, November 13
Colliding with a waterspout, August 3
Conquering hot weather, July 3
Cooled-air revolution, April 12
Cost of ice and snow, December 1
Counting chimpanzees, July 5
Crest clouds and cap clouds, November 26
Cricket thermometers, August 14

Damp weather and the automobile, November 22
Dangerous ozone, November 5
Death Valley mirage, November 8
Definitions of dry and wet weather, December 14
Depression affects the air, February 23
Desert areas, June 30
Dew - true and false, July 20
Dingley Dell Christmas, December 25
"Disturbances" and "Hurricanes", August 2
"Doctor", October 8
Drought injury to trees, August 25
Drought on the plains, May 22
Drought on the range, May 25
Droughts and irrigation, July 28
Droughts in India, July 30
Dry and wet moons, September 22
Dust-blocked roads, July 17
Dust-storm epidemic, April 2
Dust-storm problem, December 21
Dust transport, May 21
Dust travels! April 4
Dust-whirl dangers, March 5

Early droughts in England, September 7
Early marine meteorology, May 15
Early temperature records, February 10
Early wind-scales, May 10

Earthquakes and weather, November 29
"Earthquake weather", December 12
Electrical kites, August 20
Enjoying weather, August 22
Exeunt weather-kites, February 22
Explaining strange weather, July 27
Explosive lightning, May 17
Eye of the storm, August 11

Fake thunderbolt, September 11
Fighting ice storms, March 13
First storm signals, March 23
Floods due to glaciers, January 26
Fire-weather services, May 29
Fog, mist, and haze, September 29
"Forecast", January 19
Franklin's forecasts, February 24
Freezing and wind, October 25
Fuji's weather station, October 6
Fulgurite formation, April 13
Fulgurites, March 7

Gathering climatic data, April 11
Glaciology, October 16
Goosebone prophet, December 22
Green flash not rare, April 24
Grouping of waves, November 20
Gulf Stream and storms, November 2

Heat and crops, June 16
Heavy English snows, March 1
Heavy hail, March 6
Heavy rains, February 2
High-level "fronts", December 17
High-level winds, March 20
Horizontal rainbows, June 4
"Hurricane birds", December 13
Hurricanes and the Red Cross, July 9

Ice-breakers, March 22
Ice crystals, October 26
Ice doesn't sink, April 14
Ice pressure, February 5

Ice saints, May 11
Ice sculpture and architecture, January 13
Ice transforms the trees, January 25
Ill-founded forecast, December 26
Indoor snow, December 7
Insulation problems, March 30
International meteorology, September 24
Isograms, November 30
Is weather responsible? June 27

Jack Frost at work, January 16
Juggling with climate, July 16

Kansas hailstorms, May 8
Keeping cool, June 21

Lake Erie waterspouts, March 10
Land drainage and rainfall, December 6
Last winter, March 19
Laundry weather problem, August 17
Learning the clouds, September 20
Lightning and aircraft, September 26
Lightning and field crops, June 20
Lightning prints, May 26
Lightning's travels, April 20
Lightning without thunder, June 22
Little hydrology, November 7
Little known rainbow, June 11
Localized showers, February 28
London fogs today, February 21
London particular, January 22
Long-range weather forecasts, March 2

Manitoba blizzards, November 9
Many-sided meteorology, August 27
Manufacturing a thunderstorm, July 23
Marshal Bugeaud's rule, May 4
May frosts, May 12
Measuring drought, September 1
Measuring rain on slopes, January 2
Measuring weather, April 23
Meteorological advertisement, August 10
Meteorological pronunciations, July 14
Mild-winter economics, December 27
"Moaning of the bar", December 31

Mountain and valley breezes, December 5
Mountain cloudbursts, July 26
Mountain lightning, August 15
Mountain weather observatories, July 18
Muddy rain, May 24
Mud-rain and fruit, June 12
Multiple waterspouts, May 3

Nacreous clouds, May 19
Napoleon's reprimand, February 12
New cloud world, June 26
New Hampshire skiing, December 24
New weather words, July 2
Nice problem, November 6
Nighttime tornadoes, August 7
Noctilucent clouds, June 28
North and south poles, November 12
North Atlantic waterspouts, July 25
North Atlantic winds, February 12
Northern hemisphere weather, August 6

Ocean weather records, May 9
Old idea, September 18
Organisms in the air aloft, October 1
Ozone, July 19
"Ozone belt", October 30

Paintings of clouds, January 12
Paradox of drought, August 21
Phaeton, August 1
Pictorial weather forecasts, May 1
Pimpernel, September 25
Polar twilight, April 5
Pollen in dust storms, October 27
"Protestant" and "popish" winds, September 5

Question of names, May 18

Radio and rainfall, December 11
Radio weather maps, November 15
Radio weather reports, March 31; August 9
Rainbow impossibilities, May 31
Rainbows and halos, June 14
Rainfall and atmospheric moisture, November 16
Rainfall contrasts, March 26

Rainfall trends, May 23
Rain-gauge exposure, September 28
Rain-making schemes, October 23
Rain spectres, January 31
Rattlesnakes and rain, June 1
Record-breaking weather, January 20
Removing ice jams, February 19
Reservoirs and rainfall, October 24
Rising of mist, November 10
Rhymed weather wisdom, December 29
Russian winter, December 28

Salt in the air, August 13
Saturday moon, September 3
Scientific "long-rangers", March 8
Sea and swell, July 24
Seasonal forecasting, March 16
Seeing lightning strike, August 23
Shellfish weather prophets, June 7
Ships in a seaway, November 21
Shrubs in a drought, August 24
Shower of berries, September 17
Sifting snows, January 5
Skiers study snow, October 19
Sky blueness, September 19
Sleeping in comfort, March 28
Slippery roads, December 3
Snow and cold waves, October 31
Snow as a prodigy, January 6
Snow-break, January 27
Snow-capped mountains, April 26
Snow-eating, September 14
Snow rollers again, January 11
Snow silence, January 4
Soil color and temperature, August 4
Soil water and rainfall, August 31
"Soliterraneous" again, March 15
Some rain, December 8
Some weather associations, April 16
Some unusual barometers, June 6
Sounding balloons, March 27
Spouts, October 20
Spray-bows, June 8; October 4
Strange mounds in the air, December 15
"Stratosphere", June 29
Studying indoor air, December 20
Sunrise and sunset oddities, July 21
Sunset spectacle, April 10
Supposed climatic changes, February 9

"Taryn", February 15
Temperature in the sun, December 10
This and that, February 27
Three autumn myths, September 10
Thunderbolts, May 28
Thunderbird myths, September 21
Tipping-bucket rain-gauge, September 31
Toll of storms, June 5
Traveling dust, July 4
Traveling weather, August 16
Triple ball lightning, March 29
"Tule" fogs of California, October 15
Twice as cold, November 17
Two winter sounds, October 29
Typical tornado, June 2

Unauthorized storm warnings, March 3
Undependable rainfall, June 9
Underground ice, January 8
Undersun, December 19
Unfamiliar waterspout, October 2
United States rainfall records, September 12
University meteorology, August 18
Unusual aurora, February 26
Unusual fulgurite, September 15

Vast dust-storm, April 3
Vertical air currents, September 27
Vintage dates, October 10

Warm antarctic weather, October 5
Warm raindrops promote lightning, January 27
Wasteful plants, August 28
Watching glaciers, February 16
Weather and retail trade, September 4
Weather and scent, July 13
Weather and the poets, January 3
Weather cycles, March 14; August 8.
Weather forecasts, March 12
Weather maps, April 21
Weather notices, February 7
Weather observing outposts, June 18
Weather report gambling, July 7
Weather talk, May 2

Wet September , November 3
Wettest and driest, November 14
Whales and weather, April 18
What is a cyclone? November 23
What is a waterspout? October 22
What is graupel? March 24
When ice melts, October 18
When the avalanche halts, March 21
Whirlwinds, July 12
Wind, July 6
Wind and waves, November 19
Winds in miniature, February 8
"Windy Cap", December 4
Winter and the poets, January 9
Winter audibility, January 15
Winter paintings, January 10
Winter waterspout, February 3
Winter word-pictures by Thoreau, January 18
